Figure 1 is a 3D surface plot showing the relationship between the number of nodes (N), the number of layers (L), and the number of connections (C). The x-axis represents N (0 to 100), the y-axis represents L (0 to 10), and the z-axis represents C (0 to 100). The surface is colored with a gradient from blue (low values) to red (high values). The plot shows a complex, wavy surface with a color gradient from blue (low values) to red (high values). The surface is highest at the corners where N and L are both high.
