## SUBSCORES BY MAJOR DATA CATEGORIES

## SUMMARY

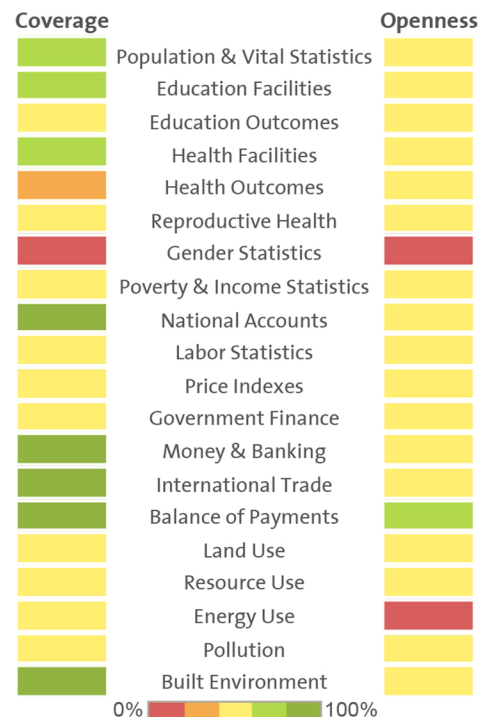

Russia ranks 7th in the Open Data Inventory with a total score of 54/100. The total score is a combination of a data coverage subscore of 60/100 and a data openness subscore of 48/100.

Russia scores higher than the regional median across all three major data categories. Within the country, the highest levels of coverage and openness are on economic statistics and the lowest levels are on social statistics.

Looking across all 20 data categories, Russia the Russian Federation provides the best coverage on, but not limited to: Money & Banking and International Trade, and the least coverage on: Gender Statistics and Health Outcomes.

In terms of openness, Russia receives the highest scores on: Balance of Payments and National Accounts, and the lowest scores on: Gender Statistics and Energy Use.
