### ACKNOWLEDGMENTS

The *Statistical Abstract of the United States* was prepared under the direction of Edwin D. Goldfeld, Chief, Statistical Reports Division. Compilation was under the supervision of William Lerner, Assistant Chief, assisted by Dorothy M. Belzer for editorial supervision and Charles S. James, Jr., for planning and review.

The cooperation of the many contributors to this volume is gratefully acknowledged. The list of sources of tables (pp. 956-959) and the source note below each table credit the various government and private agencies which have collaborated in furnishing information for the *Statistical Abstract*.

JUNE 1960.

Library of Congress Card No. 4-18089

### SUGGESTED CITATION

U.S. Bureau of the Census, *Statistical Abstract of the United States: 1960*. (Eighty-first edition.) Washington, D.C., 1960.

## P R E F A C E

The *Statistical Abstract of the United States*, published annually since 1878, is the standard summary of statistics on the social, political, and economic organization of the United States. It is designed to fulfill two functions: First, to serve as a convenient volume for statistical reference; and second, to serve as a guide to other statistical publications and sources. The latter function is served by the introductory text to each section, the source notes appearing below each table, and the Bibliography of Sources (page 961).

This volume includes a selection of data from many important statistical publications, both governmental and private. The publications cited as sources usually contain additional statistical detail and a more complete discussion of relevant definitions and concepts than can be presented here. Where contributing agencies are cited as sources, without mention of publications, more detailed information frequently is available from their unpublished tabulations and records.

Emphasis in the *Statistical Abstract* is given primarily to national data. Data for regions and individual States are presented to a lesser extent. Statistics for outlying areas of the United States are included in the State tables whenever available and supplemented by specialized information for these areas in section 33. Statistics for cities or other relatively small geographic units appear only in a few instances.

Wherever possible, statistics shown for the United States represent the 50 States and the District of Columbia. Figures for the 2 new States, Alaska and Hawaii, are presented separately in State tables, and are also included in United States summary tables, whenever such figures are available. However, figures for the new States were not available for many of the tables presented. Statements specifying inclusion or exclusion of the figures for Alaska and Hawaii appear in the headnotes to each table unless the inclusion or exclusion is self-evident. In the State tables in which States are arrayed by census geographic divisions, Alaska and Hawaii are included in the West Region and the Pacific Division.

To maintain comparability between current figures and those for earlier years, a new term "conterminous United States" or "conterminous area" has been adopted to represent the United States excluding Alaska, Hawaii, and the outlying areas (such as Puerto Rico, Guam, Virgin Islands, etc.).

To supplement the growing amount of information shown in other sections of the book, during this transitional period section 33, "Outlying Areas . . .", continues to present data for Alaska and Hawaii.

**Changes in the 1960 edition.**—This edition, the 81st annual issue, presents data for the most recent year or period available during the early part of 1960.

Each year, in addition to the normal bringing up to date of the over 1,200 tables and charts included, new tables of current interest are introduced. Data that are less timely are eliminated and format and text changes are made where considered advisable.

This year, publication of the new edition of *Historical Statistics of the United States* (see "Supplements," below) made it appropriate to coordinate the tables presented in this edition of the *Abstract* with the time series in the new supplement. Appendix I (pp. 952-954) links the series in *Historical Statistics* to the tables containing comparable and more recent figures in this *Abstract*. In addition, current *Abstract* tables have been annotated to relate them to specific series in *Historical Statistics*. These aids enable users of *Historical Statistics* to bring many of the series in that volume up to date, and users of the *Abstract* to find earlier data in the historical volume.

In another change, the latest figures from recent national censuses were incorporated into the present edition. Revisions were made in the Manufactures section and the Distribution and Services section to include the newly released statistics from the 1958 Censuses of Business, Manufactures, and Mineral Industries. Statistics from the 1959 Census of Agriculture and the 1960 Censuses of Population and Housing, however, were not yet available and will appear in the 1961 edition of the *Abstract*.

The presentation of scientific research and development data was expanded to include new tables showing: Federal Government obligations for conduct of research, by field of science; shipments of atomic energy equipment and products; and radiation detection and measuring instruments produced.

In the Law Enforcement, Federal Courts, and Prisons section, major revisions in the figures for crimes known to the police were made as a result of changes instituted by the Federal Bureau of Investigation.

Other noteworthy additions were 3 new tables included in the Income, Expenditures, and Wealth section. These tables present revised information developed by the Federal Reserve Board which measures the flow of funds through the major sectors of the national economy and depicts the economy's saving and investment structure. New tables were also added in the Agriculture sections and in the Social Insurance and Welfare section.

Following is a list of some of the subjects covered by the 52 new tables:

Strategic materials inventory	Principal financial flows under flow of funds/saving concept
Federal research obligations, by field of science	National income in distribution and selected service industries
Atomic energy equipment shipped	Governmental expenditure for capital outlay
Radiation detection and measuring instruments produced	Federal Government blue-collar workers
Development Loan Fund	Independent telephone companies
Average weight of men and women	Military personnel, by major program assignment
Mothers employed full time	Principal crops of each State
Persons with two or more jobs	Capital formation in manufacturing
Religious and private welfare expenditures	Average length of interest bearing public debt
Hospital admissions and length of stay	Corporate profits in manufacturing, by industry
Average family monthly social security benefits	Foreign military assistance programs and deliveries
Tornadoes, floods, and tropical storms	
Assessed value and sales prices of real property	

Among the tables shown in the last edition, 36 were omitted from this issue. Major omissions occurred in the Education section affecting estimates and projections of elementary and high school enrollment, enrollment in white and Negro schools, and college summer enrollment; in the Law Enforcement, Federal Courts, and Prisons section, affecting tables on offenses known and cleared by arrest, and income of lawyers; in the Labor Force, Employment and Earnings section, involving employment data from the 1950 Census of Population, and data on trade union membership; in the Income, Expenditures, and Wealth section affecting discontinued series on income of physicians, lawyers, and dentists, and data concerning expenditures of urban families by income class; in the State and Local Government Finances and Employment section affecting data on governmental expenditures and long-term debt outstanding; and in the Manufactures section, affecting size-of-establishment data, and tables on fuels and electric energy, and selected metal products. Some of the information in the omitted tables was absorbed in other tables still present.

**Supplements to the *Abstract*.**—The *Statistical Abstract*, as an annual one-volume publication, is of necessity limited in amount of detail shown. To meet the need for more detailed information for small areas (cities, counties, metropolitan areas, and

others) and for more historical data, a series of supplements to the *Abstract* has been issued.

The *County and City Data Book, 1956*, is designed to help satisfy the need for statistical information about counties and cities and other relatively small geographic areas. Conveniently assembled are 133 statistical items for each county in the United States and 130 statistical items for each of the 484 cities having 25,000 inhabitants or more in 1950. Information comparable to that for counties is also presented for geographic regions and divisions, States, and standard metropolitan areas. A special feature is an appendix which presents selected data for Congressional Districts. Also included are descriptive text and source notes.

This edition is the fifth in the *County and City Data Book* series. Many of the statistics in this volume were obtained from the results of the 1954 Censuses of Agriculture, Business, and Manufactures. Other subjects covered include births, deaths, and marriages; population characteristics; dwelling units; city government finances and employment; hospitals; bank deposits; and other items of social and economic importance. This volume is on sale by the Superintendent of Documents, Government Printing Office, Washington 25, D. C., for \$4.50.

Preparation of a new edition of the *County and City Data Book* is presently underway. The 1959 edition will present information from the 1958 Censuses of Business, Manufactures, and Mineral Industries and the 1957 Census of Governments, as well as current data from other government and private sources.

*Historical Statistics of the United States, Colonial Times to 1957*, is a completely revised and expanded version of *Historical Statistics of the United States, 1789-1945*, which was issued in 1949. Compiled by the Bureau of the Census with the cooperation of the Social Science Research Council, this supplement presents in compact and convenient form more than 8,000 statistical time series (mostly on an annual basis) which cover periods from 1610 to 1957. The new volume includes historical data on every major aspect of the nation's social and economic development and consists of 24 chapters and 51 sections. The statistics are accompanied by text notes which specify the sources of the data, include references to other sources, discuss the historical development of the data and evaluate their reliability, and present definitions of technical terms. Also included is a separate chapter on colonial statistics and a 15-page subject index.

The volume is on sale by the Superintendent of Documents, Government Printing Office, Washington 25, D.C., for \$6.00 per copy.

**Responsibility.**—The contents of this volume are taken from a large number of sources (see Source Agencies and Table Numbers, pp. 956-959). The Bureau of the Census cannot accept the responsibility for the accuracy or limitations of the data presented here, other than for those which it collects. However, the responsibility for selection of the material and for proper presentation rests with the Bureau.

#### SUGGESTIONS AND COMMENTS

Many persons have written offering suggestions for improving the presentation of the material. These letters have been most helpful and users are urged to continue to make their needs known. All suggestions will be carefully considered in planning future editions. Suggestions and comments should be sent to the Director, Bureau of the Census, Washington 25, D.C.

#### FOR ADDITIONAL INFORMATION ON DATA PRESENTED

write to the agency indicated in the source note to the table which covers the desired subject.

## STATISTICAL ABSTRACT SUPPLEMENTS

*County and City Data Book, 1956.* A compact presentation of 133 items of statistical data for each county in the United States, and 130 items of statistical data for each of 484 cities having 25,000 inhabitants or more in 1950. Information comparable to that for counties is also presented for geographic regions and divisions, States, and standard metropolitan areas. Items included based largely on results of 1954 Censuses of Agriculture, Business, and Manufactures. Includes 51 maps, explanatory and definitive text, and source notes. Issued 1957. Price \$4.50 (Buckram).

*Historical Statistics of the United States, Colonial Times to 1957.* Prepared with the cooperation of the Social Science Research Council. A compilation of more than 8,000 statistical time series, largely annual, on American social and economic development covering periods from 1610 to 1957. Includes definitions of terms and descriptive text. Specific source notes provide a basic guide to original published sources for further reference and additional data. Detailed alphabetical subject index. 801 pages. Issued 1960. Price \$6.00 (Buckram).

Purchase orders should be addressed to the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C.

# CONTENTS

	Page
<i>Fig. I. Map of the United States, showing Census divisions and regions</i> -----	XII
<b>Sec. 1. POPULATION</b> -----	1
Population estimates—Geographic distribution—Projections—Urban and rural—Sex—Age—Race—Nativity—Citizenship—Mobility status—Marital status—Households and families—Institutional population—Religious bodies.	
<i>Figs. II–V. Population: Age and sex; Urban and rural trends; Households; Center of population.</i>	
<b>Sec. 2. VITAL STATISTICS, HEALTH, AND NUTRITION</b> -----	49
Births—Reproduction rates—Fertility—Life table values—Deaths—Accidents and injuries—Marriage and divorce—Physicians, dentists, and graduate nurses—Health insurance benefits—Medical care expenditures—Hospitals—Mental patients under institutional care—Morbidity—Average weight of men and women—Nutrition—Federal food programs.	
<i>Fig. VI. Vital statistics rates.</i>	
<b>Sec. 3. IMMIGRATION, EMIGRATION, AND NATURALIZATION</b> ----	88
Immigration quotas—Immigration—Emigration—Movement and characteristics of aliens—Displaced persons and refugees—Resident aliens reporting—Arrivals and departures—Passports issued—Naturalization.	
<i>Figs. VII–VIII. Immigrants admitted; Displaced persons and refugees admitted.</i>	
<b>Sec. 4. EDUCATION</b> -----	103
School enrollment—Years of school completed—Illiteracy—Elementary and secondary schools—Institutions of higher education—Earned degrees conferred—Land grant institutions—Special schools—Public library systems—Vocational schools—Federal aid.	
<i>Fig. IX. Current expenditure per pupil.</i>	
<b>Sec. 5. LAW ENFORCEMENT, FEDERAL COURTS, AND PRISONS</b> ..	136
Major crimes—Crime rates—Arrests—Juvenile delinquency—Police employment—Federal courts—Legal profession—Prisoners in Federal and State prisons—Federal prisoners released—Federal and State prison employees—Prisoners executed.

## Section I

# Population

This section relates to the population of the United States, its distribution, and its characteristics. The principal source of these data is the Decennial Census of Population, a house-to-house enumeration made by the Bureau of the Census. In accordance with a Constitutional provision for a decennial canvass of the population, the first census enumeration was made in 1790. The primary reason for the Census of Population, as set forth in the Constitution, was to provide a basis for the apportionment of Members of the House of Representatives among the several States. Until 1902, the census organization was temporary. The Bureau of the Census was then established as a permanent agency of the Government charged with responsibility for the decennial census and for compiling statistics on other subjects as needed. Currently, this Bureau supplies intercensal data based on surveys and estimates in addition to making the comprehensive decennial census enumeration.

**Decennial censuses.**—In accordance with Census practice dating back to 1790, each person enumerated in the 1950 Census was counted as an inhabitant of his usual place of residence or usual place of abode, that is, the place where he lives and sleeps most of the time. This place is not necessarily the same as his legal residence, voting residence, or domicile, although, in the vast majority of cases, the use of these different bases of classification would produce identical results.

Most of the data which are presented are based on complete counts. However, certain of the 1950 data are indicated as being obtained from representative samples of 20 percent or 3½ percent of the population. A few tables also include 1940 data obtained on a sample basis.

Exact agreement is not to be expected among the various samples, nor between them and the complete census count, but the sample data may be used with confidence where large numbers are involved, and may be assumed to indicate patterns and relationships where small numbers are involved. Detailed statements regarding the sampling errors are given in the original sources. In addition, experience has shown that in mass operations two tabulations of a set of punch cards are not likely to yield identical results. These differences are caused by occasional errors in the tabulation processes—machine failure, loss of punch cards, and other types.

Figures from the 1960 Census of Population, taken as of April 1, were not available when material for this section was organized and sent to the printer.

**Current Population Survey.**—Several tables present statistics based on the Current Population Survey, conducted monthly by the Bureau of the Census. Until May 1956, the Survey covered a sample of approximately 21,000 interviewed households spread over a sample of areas throughout the United States. Since then, the sample has been expanded to approximately 35,000 interviewed households in a larger number of areas. For a discussion of the reliability of estimates based on this sample, see Technical Note, page 203.

**Population estimates.**—Population estimates for dates after April 1950, which are not the result of sample surveys, are based on data from the 1950 Census; statistics of births and deaths provided by the National Office of Vital Statistics, Public Health Service; statistics of immigration and emigration reported by the Immigration and Naturalization Service, Department of Justice; and statistics on the Armed Forces provided by the Department of Defense. Estimates of State population are based on the same types of data and also make use of school statistics provided by State Departments of Education and parochial school systems throughout the country.

**Urban and rural areas.**—In the course of its history, the Bureau of the Census has employed several definitions of urban area.

According to the new urban-rural definition adopted for the 1950 Census, the urban population comprises all persons living in (1) places of 2,500 inhabitants or more incorporated as cities, boroughs, and villages, (2) incorporated towns of 2,500 inhabitants or more except in New England, New York, and Wisconsin, where "towns" are simply minor civil divisions of counties, (3) the densely settled urban fringe, including both incorporated and unincorporated areas, around cities of 50,000 or more, and (4) unincorporated places of 2,500 inhabitants or more outside any urban fringe. The remaining population is classified as rural.

According to the definition used in 1940, the urban population had been limited to all persons living in incorporated places of 2,500 inhabitants or more and in other areas classified as urban under special rules relating to population size and density. The remaining area of the country was classified as rural. The definition of urban area used in the 1940 Census was adopted substantially as stated above at the time of the 1910 Census.

In this edition, figures by urban and rural residence for all dates prior to the 1950 Census are in accordance with the old definition. Figures for 1950 and subsequent years are in accordance with the new definition unless otherwise stated.

**Farm and nonfarm residence.**—The rural population is divided into the rural-farm population, which comprises all rural residents living on farms, and the rural-nonfarm population, which comprises the remaining rural population. The definition of farm and nonfarm residents used in the 1950 Census differs somewhat from that used in earlier surveys and censuses. Persons on "farms" who were paying cash rent for their house and yard only were classified as nonfarm, as were persons in institutions, summer camps, motels, and tourist camps.

**Color and race.**—Information concerning the population classified by color and race collected by the Bureau of the Census is not ordinarily based on replies to questions asked by the enumerators, but rather is obtained by observation. The concept does not reflect a clear-cut definition of biological stock, and several categories obviously refer to nationality. "Color" divides the population into two groups, white and nonwhite. The nonwhite population consists of Negroes, American Indians, Japanese, Chinese, Filipinos, and all other groups not classified as white. Persons of Mexican birth or ancestry who are not definitely Indian or of other nonwhite stock are included in the white population. Persons of mixed parentage are placed in the race or color classification of the nonwhite parent.

Beginning with the 1960 Census, however, information regarding color and race will depend more on self-reporting than on observation.

**Household.**—A "household," according to present usage of the Census Bureau, comprises all persons who occupy a dwelling unit, that is, a house, an apartment or other group of rooms, or a room that constitutes "separate living quarters." A household includes the "related persons" (the head of the household and others in the dwelling unit who are related to the head) and also the lodgers and employees, if any, who regularly live in the house. The number of households, thus defined, is the same as the number of "private households" or "families" as used in 1940 Census reports, and approximately the same as the number of "occupied dwelling units" as used in the 1950 Census of Housing. See section 29, Construction and Housing, for definition of dwelling unit. A person living alone or a group of unrelated persons sharing the same dwelling unit as partners is counted as a household.

A quasi-household is a group of persons living in quarters not classified as a dwelling unit, for example, in a house with at least five lodgers, or in a hotel, institution, labor camp, or military barracks.

**Family.**—The term "family," as used here, refers to a group of two or more persons related by blood, marriage, or adoption and residing together, and differs from the

meaning of the term as used in the 1930 and 1940 Censuses. A primary family consists of the head of a household and all (one or more) other persons in the household related to the head. A secondary family comprises two or more persons such as guests, lodgers, or resident employees and their relatives, living in a household or quasi-household (other than the negligible number of such groups among inmates of institutions) and related to each other.

**Subfamily.**—A subfamily is a married couple with or without children, or one parent with one or more children under 18 years old, living in a household and related to, but not including, the head of the household or his wife. Members of a subfamily are also members of the primary family with which they live. The number of subfamilies, therefore, is not included in the number of families.

**Married couple.**—A married couple is defined as a husband and his wife living together, with or without children and other relatives.

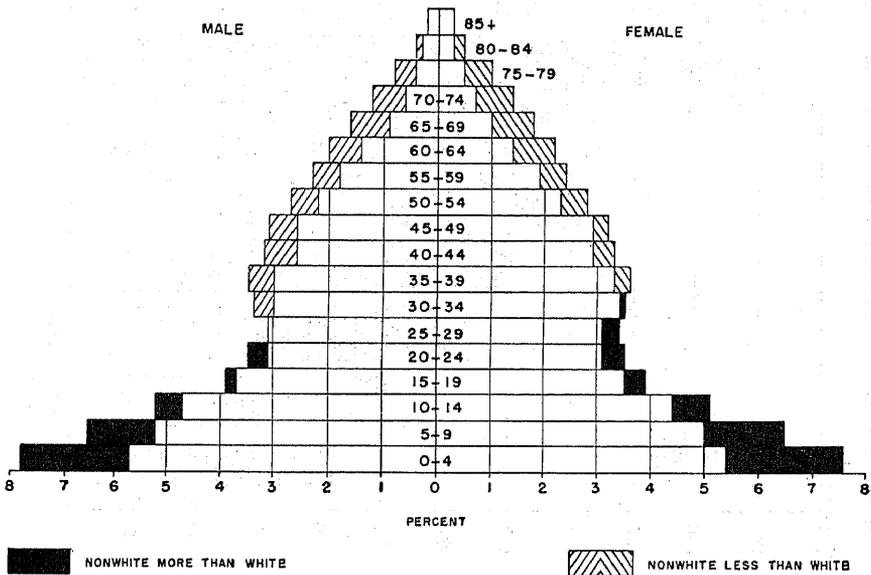

**Unrelated individuals.**—The term "unrelated individuals" as used here refers to persons (other than inmates of institutions) who are not living with any relatives. A primary individual is a household head living alone or with persons all of whom are unrelated to him. A secondary individual is a person in a household or a quasi-household such as a guest, lodger, or resident employee (excluding inmates of institutions) who is not related to the head or to any other person in the household or quasi-household.

**Alaska and Hawaii.**—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, Colonial Times to 1957*, series A 17-21") provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

<sup>1</sup> Area figures for each census year represent all continental area, excluding Alaska, under jurisdiction of United States on indicated date, including in some cases considerable areas not then organized or settled, and not covered by the census. Area figures have been adjusted to bring them into agreement with remeasurements made in 1940.

<sup>2</sup> Revised to include adjustments for underenumeration in Southern States; unrevised number is 38, 558, 371.

No. 2. ESTIMATED POPULATION: 1900 TO 1960

[In thousands. As of July 1, except where noted. Includes Alaska beginning 1959 and Hawaii beginning 1960. Estimates for 1900 to 1909 are sums of State estimates based on local data indicative of population change. Estimates for 1910 to 1960 are based on decennial censuses and statistics of births, deaths, immigration, emigration, and Armed Forces. See also *Historical Statistics, Colonial Times to 1967*, series A 1-3]

No. 3. PROJECTIONS OF THE TOTAL POPULATION, BY AGE AND SEX: 1955 TO 1980

POPULATION

[In thousands. As of July 1. Excludes civilian population of Alaska and Hawaii. Includes Armed Forces abroad. Projections based on current estimates for 1957. Series I, II, III, and IV imply the following assumptions as to fertility: I—fertility averages 10 percent above 1955-57 level throughout projection period; II—1955-57 level continues to 1975-80; III—1955-57 level declines to 1949-51 level by 1965-70, then remains at that level to 1975-80; IV—1955-57 level declines to 1942-44 level by 1965-70, then remains at that level to 1975-80. Series I illustrates the size of the future population under very high fertility conditions, it is unlikely that the fertility level implied will persist throughout the projection period.]

<sup>1</sup> Figures represent survivors of births of the appropriate years and were used as the base for the projections of 5-to-9 year olds for later years. Figures in the second column (under 5 years) are comparable to 1950 Census counts of children under 5 years of age. They were obtained by subtracting approximately 802,000 (estimated "net census under-count" of children under 5 years) from the "adjusted" figures in order to make them comparable to 1950 Census counts. A more detailed discussion of this point is given in Bureau of the Census, *Current Population Reports*, Series P-25, Nos. 168 and 212. Source: Department of Commerce, Bureau of the Census; *Current Population Reports*, Series P-25, Nos. 187 and 212.

### No. 4. POPULATION AND AREA OF THE UNITED STATES AND OUTLYING AREAS: 1930 TO 1950

[Areas within each group are listed in rank order of population in 1950. For area figures of individual States, see table 206. See also *Historical Statistics, Colonial Times to 1957*, series A 4-6, A 9-15, and J 2]

AREA	POPULATION			Gross area (land and water), 1950  Sq. mi. 3,628,130
	1930	1940	1950

Families of Armed Forces personnel or of civilian citizen employees.....	( <sup>23</sup> )	( <sup>23</sup> )	107,350	
Crews of merchant vessels.....	( <sup>25</sup> )	( <sup>25</sup> )	45,690	

<sup>1</sup> Includes estimated population of the Philippine Islands (1940: 16,356,000; 1930: 13,513,000), not shown separately. Ceded by Spain in 1898, the Philippine Islands constituted a territorial possession of the United States from 1898 to 1946. Granted independence as of July 4, 1946, they then became the Republic of the Philippines.

<sup>2</sup> Census taken as of Oct. 1 of preceding year.

<sup>3</sup> Excludes inhabitants (36) of Midway Islands which were enumerated with Hawaii in 1930.

<sup>4</sup> Excludes inhabitants (560) of Baker, Canton and Enderbury, Howland, Jarvis, Johnston and Sand, and Midway Islands which were enumerated with Hawaii in 1940.

<sup>5</sup> Not enumerated.

<sup>6</sup> Enderbury Island uninhabited at time of enumeration.

<sup>7</sup> Sand Island uninhabited at time of enumeration.

<sup>8</sup> Less than 0.5 square mile.

<sup>9</sup> Little Swan Island uninhabited at time of enumeration.

<sup>10</sup> Includes Caroline, Christmas, Danger (Pukapuka), Flint, Funafuti, Kingman Reef, Malden, Manahiki, Navassa, Nukunetau, Nukulalai, Nurakita, Penrhyn, Rakahanga, Starbuck, Vostok, Phoenix Group (except Canton and Enderbury), and Union (Tokelau) Group, not enumerated in decennial censuses; and Baker, Howland, and Jarvis Islands. Quita Sueño Bank, Roncador Cay, and Serrana Bank, claimed by both the United States and Colombia, not enumerated.

<sup>11</sup> Not enumerated or uninhabited at time of enumeration.

<sup>12</sup> Population of Baker, Howland, and Jarvis Islands. Other islands not enumerated or uninhabited at time of enumeration.

<sup>13</sup> Area figure is for Navassa (area, 2 square miles), and Baker, Howland, and Jarvis (combined area 3 square miles); excludes Kingman Reef, Quita Sueño Bank, Roncador Cay, and Serrana Bank (each less than 0.6 square mile). Area of other islands (listed in footnote 10) not available.

<sup>14</sup> Under jurisdiction of United States in accordance with treaty of Nov. 18, 1903, with Republic of Panama.

<sup>15</sup> Leased (1914) from the Republic of Nicaragua for 99 years.

<sup>16</sup> Figures are those of the 1950 and 1940 Censuses of the Republic of Nicaragua, May 1950 and 1940. Little Corn Island uninhabited at time of both enumerations.

<sup>17</sup> Under trusteeship with the United States as administering authority. See *Trusteeship Agreement for the Former Japanese Mandated Islands (Documentary Supplement No. 1)* of the Security Council of the United Nations which became effective on July 18, 1947.

<sup>18</sup> Population 1930, 69,626; 1940, 131,253 (Censuses of Japan).

<sup>19</sup> U. S. Department of the Navy. *Report on the Administration of the Trust Territory of the Pacific Islands for the Period July 1, 1948 to June 30, 1950*. Washington, D. C., U. S. Government Printing Office, 1950.

<sup>20</sup> U. S. Department of the Navy. *Handbook on the Trust Territory of the Pacific Islands*. Washington, D. C., U. S. Government Printing Office, 1945.

<sup>21</sup> Excludes United States citizens abroad on private business, travel, etc. Many of these were enumerated in the United States at their usual place of residence as absent members of households.

<sup>22</sup> Based on 20-percent sample of reports received and consequently subject to sampling variability. Chances are about 2 out of 3 that the figure that would have been obtained from a complete count would have differed by less than 1,200 from figure shown here.

<sup>23</sup> Not available.

No. 5. CENTER OF POPULATION: 1790 TO 1950

["Center of population" is that point which may be considered as center of population gravity of the U. S. or that point upon which the U. S. would balance, if it were a rigid plane without weight and the population distributed thereon with each individual being assumed to have equal weight and to exert an influence on a central point proportional to his distance from the point. Excludes Alaska and Hawaii]

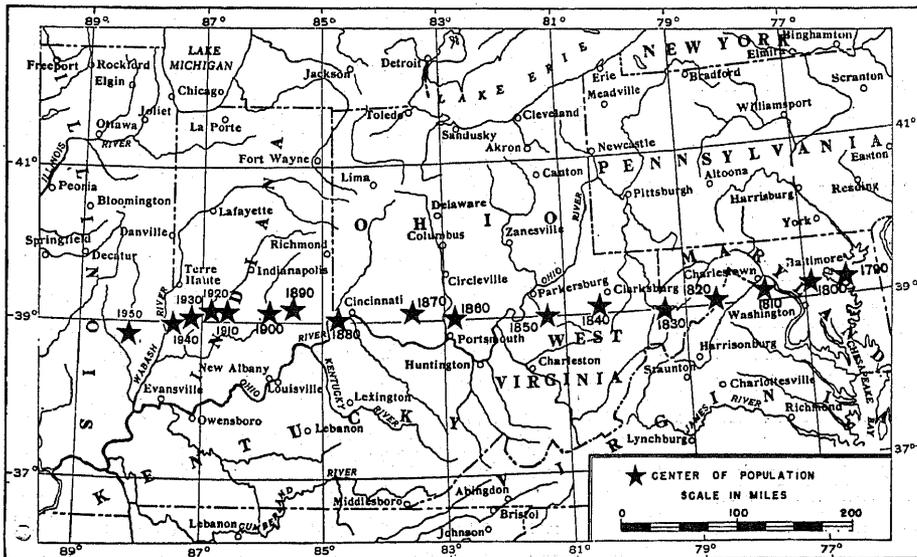

YEAR	North latitude	West longitude	Approximate location
1790	39 16 30	76 11 12	23 miles east of Baltimore, Md.
1800	39 16 6	76 56 30	18 miles west of Baltimore, Md.
1810	39 11 30	77 37 12	40 miles northwest by west of Washington, D. C. (in Virginia).
1820	39 5 42	78 33 0	16 miles east of Moorefield, W. Va. <sup>1</sup>
1830	38 57 54	79 16 54	19 miles west-southwest of Moorefield, W. Va. <sup>1</sup>
1840	39 2 0	80 18 0	16 miles south of Clarksburg, W. Va. <sup>1</sup>
1850	38 59 0	81 19 0	23 miles southeast of Parkersburg, W. Va. <sup>1</sup>
1860	39 0 24	82 48 48	20 miles south by east of Chillicothe, Ohio.
1870	39 12 0	83 35 42	48 miles east by north of Cincinnati, Ohio.
1880	39 4 8	84 39 40	8 miles west by south of Cincinnati, Ohio (in Kentucky).
1890	39 11 56	85 32 53	20 miles east of Columbus, Ind.
1900	39 9 36	85 48 54	6 miles southeast of Columbus, Ind.
1910	39 10 12	86 32 20	In the city of Bloomington, Ind.
1920	39 10 21	86 43 15	8 miles south-southeast of Spencer, Owen County, Ind.
1930	39 3 45	87 8 6	3 miles northeast of Linton, Greene County, Ind.
1940	38 56 54	87 22 35	2 miles southeast by east of Carlisle, Haddon township, Sullivan County, Ind.
1950	38 50 21	88 9 33	8 miles north-northwest of Olney, Richland County, Ill.

<sup>1</sup> West Virginia was set off from Virginia Dec. 31, 1862, and admitted as a State June 19, 1863.

<sup>1</sup>Includes changes due to admissions into, and discharges from, Armed Forces abroad, for which figures are not shown separately.

<sup>2</sup>Adjusted for underregistration.

<sup>3</sup>Adjusted for underregistration of infant deaths; includes estimates of deaths in Armed Forces abroad.

<sup>4</sup>Provisional estimates.

<sup>5</sup>Incorporates the addition of the civilian population of Alaska in January 1959 and Hawaii in September 1959 to the total including Armed Forces abroad.

Source: Department of Commerce, Bureau of the Census; *Current Population Reports*, Series P-25, Nos. 195 and 215.

No. 8. ESTIMATES OF COMPONENTS OF CHANGE IN POPULATION, BY STATES AND FOR OTHER AREAS: CUMULATIVE, 1950 TO 1958

[In thousands. Covers period April 1, 1950, to July 1, 1958. Excludes Armed Forces abroad. Based on school statistics, vital statistics, and data on Armed Forces. For explanation of methodology, see source. Minus sign (-) denotes decrease]

<sup>3</sup> For United States, population of U.S. has been divided by total land area. For each State and Puerto Rico, population at given census has been divided by land area as then constituted. However, 1930 figures are based on revised land areas used for 1940. Alaska and Hawaii figures based on 1940 measurement of gross area.

<sup>4</sup> Oklahoma (10.3) and Indian Territory (12.7) combined.

## No. 10. POPULATION OF STANDARD METROPOLITAN STATISTICAL AREAS: 1950

[Minus sign (-) denotes decrease. A standard metropolitan statistical area is a county or group of contiguous counties (except in New England) which contains at least one city of 50,000 inhabitants or more in 1950 or subsequently. In addition to the county, or counties, containing such a city, or cities, contiguous counties are included in a standard metropolitan statistical area if according to certain criteria they are essentially metropolitan in character and sufficiently integrated with the central city. In New England, standard metropolitan statistical areas have been defined on a town rather than on a county basis. This list of areas is based on "Standard Metropolitan Statistical Area Definitions" issued by the Executive Office of the President, Bureau of the Budget, as of September 1950]

No. 11. CIVILIAN POPULATION OF THE UNITED STATES, BY AREA OF RESIDENCE: 1950 AND 1959

[In thousands. Excludes Alaska and Hawaii. Covers 108 areas, listed in "Standard Metropolitan Area Definitions" issued by the Bureau of the Budget, on Oct. 17, 1950. For definitions, see headnote, table 10, and text, p. 2. A central city is any city over 25,000 within a standard metropolitan statistical area, and having one-third or more of the population of the largest city in the area, with a maximum of 3 per area]

RESIDENCE	April 1950	April 1959	Percent increase, 1950 to 1959 <sup>1</sup>	RESIDENCE	April 1950	April 1959	Percent increase, 1950 to 1959 <sup>1</sup>
<b>Total</b>	<b>149,634</b>	<b>173,708</b>	<b>16.1</b>	Other territory	65,833	73,783	12.1
Standard metropolitan statistical areas	83,800	99,924	19.2	Urban	23,075	25,378	9.9
Central cities	49,138	49,901	1.5	Rural nonfarm	20,519	29,288	42.7
Outside central cities	34,663	50,023	44.3	Rural farm <sup>2</sup>	22,239	19,117	-4.0
Urban	23,704	29,711	25.3				
Rural nonfarm	8,168	17,713	117.1				
Rural farm <sup>2</sup>	2,801	2,599	-7.2				

<sup>1</sup> Minus (-) denotes decrease.

<sup>2</sup> The rural-farm population total of 21,716,000 is not comparable with the total of 21,172,000 shown in table 822, which is an annual average centered on April 1959 and includes some residents of farms located in urban areas.

**No. 22. POPULATION, BY AGE AND SEX, 1930 TO 1950, AND BY COLOR AND FOR RURAL FARM, 1950**

[Excludes Alaska and Hawaii. The median is the value which divides the distribution into two equal parts—one-half of the cases falling below this value and one-half exceeding this value. See also *Historical Statistics, Colonial Times to 1957*, series A. 71-94]

NONWHITE POPULATION

No. 26. SELECTED CHARACTERISTICS OF THE NONWHITE POPULATION, BY RACE: 1950

[Excludes Alaska and Hawaii. Statistics for races other than Negro based on complete count except as noted. Statistics for Negroes obtained by subtracting totals for the other races from the nonwhite totals. Figures may differ from those for corresponding items in other tables, because of different tabulations; see text, p. 1]

ITEM	Total nonwhite	Negro	Indian	Japanese	Chinese	Filipino	All other <sup>1</sup>

<sup>1</sup> Data for native white based on 5-percent sample for 1940; for foreign or mixed parentage based on 5-percent sample for 1940, on 20-percent sample for 1950; therefore native and foreign born may not add to complete count figure shown for white population. Native of native parentage for 1940 and 1950 obtained by subtraction.

<sup>2</sup> Comprises Filipinos, Asian Indians, Koreans, Polynesians, Indonesians, and other nonwhite races.

<sup>3</sup> Based on 20-percent sample.

<sup>4</sup> Less than 0.1 percent.

## No. 36. MARITAL STATUS OF THE POPULATION, BY SEX: 1890 TO 1959

[In thousands of persons 14 years old and over. Excludes Alaska and Hawaii. Total population, 1890 to 1940, and civilian population, 1947 to 1959. 1947-1959 based on Current Population Survey; see Technical Note, p. 203. Civilian population includes members of the Armed Forces living off post or with their families on post, but excludes all other members of the Armed Forces. Armed Forces included are as follows: 1950, 547,000; 1951, 610,000; 1952, 974,000; 1953, 982,000; 1954, 822,000; 1955, 800,000; 1956, 872,000; 1957, 809,000; 1958, 895,000; 1959, 1,007,000. See also *Historical Statistics, Colonial Times to 1857*, series A 210-227]

1959 (Mar. 15)	51,302	900	1.79	3.42	-----	-----	-----	-----

<sup>1</sup> Computed by compound interest formula.

<sup>2</sup> Obtained by dividing total population by number of households; hence, not strictly average size of household because total population includes members of quasi-households.

<sup>3</sup> Includes small number of hotels, institutions, and other quasi-households.

<sup>4</sup> Estimated.

<sup>5</sup> See Technical Note, p. 203.

**No. 43. PROJECTIONS OF HOUSEHOLDS, FAMILIES, AND MARRIED COUPLES: 1958 TO 1980**

[In thousands. Excludes Alaska and Hawaii. Population base from *Current Population Reports*, Series P-25, No. 187. (See also table 3.) Series A and B based on population projection Series II and Series C and D on population projection Series III. Series A, B, and C assume, in varying degree, increases in the proportion married in each age group; Series D assumes no change. The general method of projection in each series, given the initial projection of marital status for that series, was as follows: A—average annual change from 1950 to 1956-58 in the proportion of persons in each age group who were household heads of a given type was assumed to continue to 1965; one-half assumed for 1965 to 1975; one-quarter assumed for 1975 to 1980. B—one-half the average annual change from 1950 to 1956-58 was assumed for the period 1957 to 1965; one-quarter assumed for 1965 to 1975; it was assumed that no change would occur thereafter. C—one-quarter the average annual change from 1950 to 1956-58 was assumed for the period 1957 to 1965; it was assumed that no change would occur thereafter. D—1956-58 proportion of persons in each age group who were heads of households of a given type was assumed to continue to 1980]

No. 48. RELIGIOUS BODIES—CHURCH MEMBERSHIP, NUMBER OF PASTORS, AND SUNDAY SCHOOL ENROLLMENT

[Beginning 1958, includes Alaska. Represents latest information available from religious bodies; excludes a few groups giving no data, such as Church of Christ, Scientist. Totals include, substantially, those religious bodies reporting to Bureau of Census for Census of Religious Bodies in 1936. Not all groups follow same calendar year nor count membership in same way; some groups give only approximate figures. Roman Catholics count all baptized persons, including infants; Jews regard as members all Jews in communities having congregations; Eastern Orthodox Churches include all persons in their nationality or cultural groups; most Protestant bodies count only persons who have attained full membership, and previous estimates have indicated that all but a small minority of these are over 13 years of age; however, many Lutheran bodies and Protestant Episcopal Church now report all baptized persons, and not only those confirmed.]

RELIGIOUS BODY	Year	Number of churches reported	Church membership (1,000)	Number of pastors with charges	Sunday or Sabbath School enrollment <sup>1</sup> (1,000)

## Section 2

### Vital Statistics, Health, and Nutrition

This section presents vital statistics—data on births, deaths, fetal deaths (stillbirths), marriages, divorces—and data on communicable diseases, mental health, medical care, hospitals, and nutrition. Vital statistics are compiled and published by the National Office of Vital Statistics, Public Health Service, in its annual report, *Vital Statistics of the United States*, and its *Monthly Vital Statistics Report*. Reports in this field are also issued by the individual State bureaus of vital statistics.

**Births and deaths.**—The collection of death statistics on an annual basis began in 1900. Then the death-registration States consisted of 10 States and the District of Columbia. In 1915, the collection of birth statistics began with 10 States and the District of Columbia. The changing composition of the two registration areas<sup>1</sup> makes it impossible to obtain geographically comparable birth and death data for the entire United States before 1933. However, the rates for the expanding groups of registration States are approximations of national rates, and general comparisons over a long period of years can be made. Beginning with 1933, the birth and death registration areas have comprised the entire United States (conterminous area). National statistics on fetal deaths were compiled for 1918 and annually since 1922.

Prior to 1951, and in 1955, birth statistics were based on a complete count of the records received in the National Office of Vital Statistics. From 1951 to 1954, and for 1956 and subsequent years, the figures were based on a 50-percent sample of all registered births. Adjustments shown for underregistration of births are based, for the most part, on the results of nationwide tests of registration completeness in 1940 and 1950.<sup>2</sup>

Current death statistics are based on a 10-percent sample of death certificates filed in State vital statistics offices; deaths among Armed Forces overseas are excluded. Fetal deaths (stillbirths) are also excluded from death statistics. Fetal death figures represent only fetal deaths for which the period of gestation was 20 weeks or more, or was not stated, since many States do not require the registration of earlier fetal deaths.

Since 1900 the causes of death have been classified according to 7 different revisions of the *International Lists of Diseases and Causes of Death*, issued by the Public Health Service. It has been the practice to revise the *International Lists* every 10 years to keep abreast of medical knowledge. Each revision has produced some break in the comparability of cause-of-death statistics. The extent of the changes is discussed in "The Effect of the Sixth Revision of the International Lists of Diseases and Causes of Death Upon Comparability of Mortality Trends," *Vital Statistics—Special Reports*, Vol. 36, No. 10, and *Vital Statistics of the United States, 1958*, Vol. 1. The latest (7th) revision was made in 1958.

Births, deaths, and fetal deaths are classified by place of occurrence and by place of residence<sup>3</sup> of the mother or of the decedent.

**Marriages and divorces.**—National collections of statistics on marriages and divorces in the United States were made for the years 1867 to 1906, 1916, 1922 to 1932, 1937 to 1940, and 1944 to 1959. Estimates have been made for the intervening years as well as for years in which collections were not complete. A marriage-registration area was

<sup>1</sup> For coverage of these areas, see *Historical Statistics of the United States, Colonial Times to 1957*, series B 1-5.

<sup>2</sup> For a description of these tests and their findings see "Birth Registration Completeness in the United States and Geographic Areas, 1950, Part I, Data for Each State," *Vital Statistics—Special Reports*, Vol. 39, No. 2.

<sup>3</sup> For a discussion of methods of residence allocation and of significance of residence figures, see *Vital Statistics of the United States, 1950*.

established by the National Office of Vital Statistics on January 1, 1957; it covers 33 States and 3 independent registration areas. A divorce-registration area was inaugurated on January 1, 1958; it comprises 18 States and 1 independent registration area. These registration areas were established in order to improve national statistics of marriages and divorces.

**Vital statistics rates.**—Vital statistics rates computed by the National Office of Vital Statistics are based upon the enumerated population figures as of April 1 for 1940 and 1950, and upon the estimated midyear population figures for other years, provided by the Bureau of the Census unless otherwise noted. The special situation created by the changes in size and disposition of the Armed Forces necessitated the use of different types of population bases during the war and postwar period.<sup>4</sup> Birth and divorce rates for 1941 to 1946 for the United States are based on the total population including members of the Armed Forces overseas. Birth and divorce rates for 1940 and 1947 to 1959, and death and marriage rates for 1940 to 1959, for the United States and the individual States are based on total population present in the area, excluding Armed Forces overseas.

**Morbidity.**—Annual data on morbidity are compiled by the Public Health Service and published as a supplement to its *Morbidity and Mortality Weekly Report*. The list of diseases reported by individual States depends upon laws or regulations within the various States. However, most of the common communicable diseases are reportable in all States. Data on morbidity in the general population are also obtained occasionally by special surveys conducted in various communities or States. A clearing-house of such surveys is maintained by the Public Health Service.

Another source of health statistics is the National Health Survey's continuing program which collects statistics on disease, injury, impairment, disability, and related topics on a uniform basis for the nation as a whole.

Morbidity statistics for members of the Armed Forces are prepared and published by the Departments of the Army, Navy, and Air Force. The Department of Labor compiles statistics of industrial injuries (see pp. 232 and 233).

**Medical care.**—Statistics of hospitals are obtained from the annual survey of hospitals conducted by the American Hospital Association. These statistics are published annually by that organization in *Hospitals*, Guide Issue, and include only hospitals that meet American Hospital Association requirements for listing. A relatively large number of institutions that provide health care, such as nursing and convalescent homes, are not included in the survey. Included are nearly all hospitals in the country that meet the following definition: A hospital is any establishment providing medical and registered nurse supervision; and offering services, facilities, and beds for use beyond 24 hours by 6 or more nonrelated individuals requiring diagnosis, treatment or care for illness, injury, deformity, infirmity, abnormality, or pregnancy; and regularly making available at least (1) clinical laboratory services, (2) diagnostic X-ray services, and (3) treatment facilities for (a) surgery, (b) obstetrical care, or (c) other definitive medical treatment of similar extent. Statistics supporting comprehensive, long-range plans for construction of hospital facilities authorized under Title VI of the Public Health Service Act, as amended, are revised annually, and are available from the Public Health Service. Summary data from the same source on existing hospital beds from 1948 to 1955 appear in *Public Health Reports* (May 1955 issue). Detailed data on existing hospital beds as of July 1, 1956, appear in *The Nation's Health Facilities—Ten Years of the Hill-Burton Hospital and Medical Facilities Program, 1946–1956*, Public Health Service Publication No. 616.

Statistics on institutional population based on the 1950 Census of Population include information on number and characteristics of persons in long-term hospitals,

<sup>4</sup> For a discussion of the interpretation of crude rates during wartime, see "Summary of Natality and Mortality Statistics, United States, 1943," *Vital Statistics—Special Reports*, Vol. 21, No. 1, and "Marriage and Divorce in the United States, 1937 to 1945," *Vital Statistics—Special Reports*, Vol. 23, No. 9.

in homes and schools for the mentally and physically handicapped, and in homes for the aged and dependent (*U. S. Census of Population, 1950, Vol. IV, Part 2C*).

Sample surveys are conducted occasionally to provide information on the medical care received by the population of various communities or States, and certain insurance organizations publish statistics on the medical care received by their beneficiaries.

Another aspect of medical care is provided by statistics on patients in hospitals for mental disease, and in institutions for mental defectives and epileptics. From 1926 to 1946, such data were collected annually by the Bureau of the Census. Beginning with the 1947 report, the data appear in the annual report, *Patients in Mental Institutions*, issued by the National Institute of Mental Health, Public Health Service.

**Nutrition.**—Statistics on the apparent per capita consumption of food and its nutrient value are estimated by the Department of Agriculture and published quarterly (nutrient value, annually) in the *National Food Situation*. A discussion of methods used to compute these figures and more detailed information appear in Agriculture Handbook No. 62, *Consumption of Food in the United States, 1909-52*, and the 1956 and later supplements to that publication present revised and current figures.

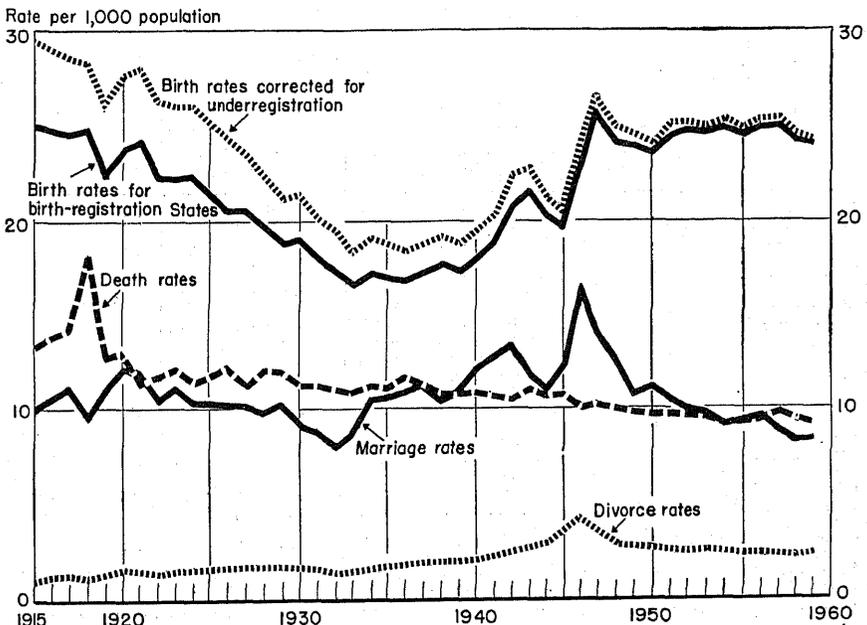

Statistics on Federal food distribution programs, and data on the quantity and costs of the food commodities distributed and the number of persons participating in the programs are published annually in *Agricultural Statistics*.

**Alaska and Hawaii.**—For a general statement concerning their attempt of data for Alaska and Hawaii, see preface. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, Colonial Times to 1957*, series B 7-9") provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

Fig. VI. VITAL STATISTICS RATES: 1915 TO 1959

### NO. 51. BIRTHS, DEATHS, MARRIAGES, AND DIVORCES AND RATE PER 1,000 POPULATION: 1900 TO 1959

[In thousands. Beginning 1959, includes Alaska. Births and deaths are registered births and deaths only; for years prior to 1933 not all States were represented (see text, p. 49); for births adjusted for underregistration, see table 62. See also *Historical Statistics, Colonial Times to 1957*, series B 7-9, B 129, B 176, and B 178]

YEAR	Births	Deaths	Marriages <sup>1</sup>	Divorces <sup>2</sup>	RATE PER 1,000 POPULATION <sup>3</sup>			
					Births	Deaths	Marriages <sup>1</sup>	Divorces <sup>2</sup>
1900		343	709	56		17.2	9.3	0.7
1905		346	842	68		15.9	10.0	0.8
1910		697	948	83		14.7	10.3	0.9
1915	776	816	1,008	104	25.0	13.2	10.0	1.0
1920	1,509	1,118	1,274	171	23.7	13.0	12.0	1.6
1925	1,879	1,192	1,188	175	21.3	11.7	10.3	1.5
1930	2,204	1,327	1,127	196	18.9	11.3	9.2	1.6
1935	2,155	1,393	1,327	218	16.9	10.9	10.4	1.7
1940	2,860	1,417	1,596	254	17.9	10.8	12.1	2.0
1945	2,735	1,402	1,613	485	19.5	10.6	12.2	3.5
1950	3,554	1,452	1,667	385	23.6	9.6	11.1	2.6
1953	4,302	1,518	1,546	390	24.6	9.6	9.8	2.5
1954	4,017	1,481	1,490	379	24.9	9.2	9.2	2.4
1955	4,047	1,529	1,531	377	24.6	9.3	9.3	2.3
1956	4,163	1,564	1,585	382	24.9	9.4	9.5	2.3
1957	4,255	1,633	1,518	381	25.0	9.6	8.9	2.2
1958	4,204	1,648	1,451	368	24.3	9.5	8.4	2.1
1959 <sup>4</sup>	4,249	1,660	1,494	396	24.1	9.4	8.5	2.2

<sup>1</sup> Estimated for 1920, 1935, and 1953-59. Includes estimates and marriage licenses for some States for all years.

<sup>2</sup> Estimated, except for 1900, 1905, 1925, and 1930. Includes reported annulments.

<sup>3</sup> For 1940 and 1950, based on population enumerated as of April 1; for all other years, estimated as of July 1. Birth and divorce rates for 1945 based on population including Armed Forces overseas; for 1940 and 1950-59, based on population excluding Armed Forces overseas. Death and marriage rates for 1940-59 based on population excluding Armed Forces overseas.

<sup>4</sup> Based on 50-percent sample. <sup>5</sup> Provisional.

### NO. 52. REGISTERED BIRTHS, ESTIMATED BIRTHS ADJUSTED FOR UNDERREGISTRATION, AND RATE PER 1,000 POPULATION, BY COLOR: 1910 TO 1959

[In thousands. Beginning 1959, includes Alaska. For total registered births, see table 51. See also *Historical Statistics, Colonial Times to 1957*, series B 6 and B 19-21]

YEAR	REGISTERED BIRTHS				BIRTHS ADJUSTED FOR UNDERREGISTRATION <sup>2</sup>					
	Number		Rate <sup>1</sup>		Number			Rate <sup>1</sup>		
	White	Non-white	White	Non-white	Total	White	Non-white	Total	White	Non-white
1910	(3)	(3)	(3)	(3)	2,777	2,401	(4)	30.1	29.2	(4)
1915	764	12	25.1	18.4	2,965	2,594		29.5	28.0	(4)
1920	1,396	113	23.5	27.0	2,950	2,566	383	27.7	26.9	35.0
1925	1,732	147	21.0	25.4	2,909	2,506	403	25.1	24.1	34.2
1930	1,953	251	18.6	21.6	2,618	2,274	344	21.3	20.6	27.5
1935	1,888	267	16.5	20.6	2,377	2,042	334	18.7	17.9	25.8
1940	2,068	292	17.5	21.7	2,559	2,199	360	19.4	18.6	26.7
1945	2,396	340	19.1	23.2	2,868	2,471	398	20.4	19.7	26.5
1950	3,064	491	22.7	31.1	3,632	3,108	524	24.1	23.0	33.3
1953	3,357	545	23.7	32.3	3,965	3,389	575	25.0	24.0	34.1
1954	3,444	574	23.9	33.2	4,078	3,475	603	25.3	24.1	34.9
1955	3,458	589	23.6	33.1	4,104	3,488	617	25.0	23.8	34.7
1956	3,545	618	23.8	33.9	4,218	3,573	645	25.2	24.0	35.4
1957	3,621	633	23.9	33.8	4,308	3,648	660	25.3	24.1	35.2
1958	3,572	632	23.2	32.8	4,255	3,598	657	24.6	23.4	34.2
1959 <sup>6</sup>	3,611	638	23.1	32.3	4,292	3,621	671	24.3	23.1	34.0

<sup>1</sup> For 1940 and 1950, based on population enumerated as of April 1; for all other years, estimated as of July 1. For 1945 based on population including Armed Forces overseas; for 1940 and 1950-59, based on total population residing in area.

<sup>2</sup> Includes adjustments for States not in the birth-registration area before 1933; see text, p. 49.

<sup>3</sup> Not available. Birth-registration area began in 1915; see text, p. 49.

<sup>4</sup> Not estimated. Differences between estimated numbers of all births and white births do not give reliable estimates for nonwhite births. <sup>5</sup> Based on a 50-percent sample. <sup>6</sup> Estimated.

No. 53. GROSS AND NET REPRODUCTION RATE, BY COLOR: 1905 TO 1958

[Excludes Alaska and Hawaii. Based on births adjusted for underregistration, and on annual life tables and population estimates by age, except as noted. A net reproduction rate of 1,000 means that each generation would just replace itself, if birth and death rates of a specified period were to continue indefinitely, in the absence of net immigration. A rate above 1,000 implies a potentially gaining population, and a rate below 1,000, a potentially declining population. A gross reproduction rate of 1,000 means that if all women born at the beginning of a generation were to live through their reproductive period and continue birth rates existing at the time of their birth, they would barely reproduce themselves, assuming no migration from outside the area. Where gross reproduction rate is less than 1,000, an improvement in mortality alone would not prevent a potential decline in population. See also *Historical Statistics, Colonial Times to 1957*, series B 31-30]

PERIOD OR YEAR	NET RATE			GROSS RATE		
	Total	White	Nonwhite	Total	White	Nonwhite
1905 to 1910 <sup>1</sup> .....	1,336	1,339	1,329	1,793	1,740	2,240
1930 to 1935 <sup>1</sup> .....	984	972	1,074	1,108	1,080	1,336
1935 to 1940 <sup>1</sup> .....	978	957	1,137	1,101	1,063	1,413
1940.....	1,027	1,002	1,209	1,121	1,082	1,422
1945.....	1,132	1,106	1,323	1,212	1,175	1,493
1948.....	1,435	1,401	1,680	1,514	1,468	1,846
1949.....	1,439	1,396	1,741	1,515	1,461	1,906

<sup>1</sup> Based on 50-percent sample of live births.

<sup>2</sup> Provisional and unadjusted, and by place of occurrence.

<sup>3</sup> Rate per 1,000 population (excluding Armed Forces overseas) enumerated as of April 1 for 1940 and 1950 and estimated as of July 1 for all other years.

<sup>4</sup> Beginning 1959, includes Alaska.

<sup>5</sup> Includes estimate for Massachusetts. <sup>6</sup> Not available.

No. 56. REGISTERED LIVE BIRTHS, BY COLOR, FOR URBAN AND RURAL AREAS,  
BY STATES: 1957 AND 1958

[By place of residence. Based on a 50-percent sample. Definition of urban and rural based on 1940 Census of Population; see p. 2. Tests made in 1950 indicate that for the country as a whole, errors in residence reporting result in a significant overstatement of births to residents of urban places, and a corresponding understatement in the number to residents of areas classified as rural]

<sup>1</sup> Based on population enumerated as of April 1 for 1940 and 1950 and estimated as of July 1 for other years. Rates per 100,000 population residing in area.

<sup>2</sup> Estimated; based on a 10-percent sample of death certificates.

<sup>3</sup> Not available.

<sup>4</sup> Includes neoplasms of lymphatic and hematopoietic tissues.

<sup>5</sup> Excludes diarrhea of newborn.

### No. 77. ESTIMATES OF MARRIAGES FOR THE UNITED STATES AND MARRIAGE LICENSES ISSUED IN MAJOR CITY AREAS, BY MONTH: 1950 TO 1959

[Excludes Alaska and Hawaii prior to 1959. Data for 1959 include Alaska and exclude Hawaii. Provisional data. Figures for major-city areas represent licenses issued in 35 cities with population of 100,000 or more according to the 1950 Census, and in 69 counties containing the remaining 72 cities in that population-size group. These areas contain nearly two-fifths of the total population of the United States.]

1958.....	133.9	1,273.5	9.5	2.3	1,406.0	0.5	108.0	210.5

<sup>1</sup> Includes all types of hospitals other than mental and tuberculosis.

<sup>2</sup> Rate per 1,000 estimated population as of July 1, excluding Armed Forces overseas.

Source: Department of Health, Education, and Welfare, Public Health Service; *Health, Education, and Welfare Trends*, annual supplement to *Health, Education, and Welfare Indicators*. (Computed from data prepared by American Medical Association and American Hospital Association.)

No. 91. HOSPITALS—TYPE OF SERVICE AND CONTROL: 1920 TO 1958

[Beginning 1958, includes Alaska and Hawaii. For 1920-1953, covers hospitals and related institutions registered by the American Medical Association. Registration was a basic recognition extended to hospitals and related institutions in accordance with requirements outlined in *Essentials of a Registered Hospital*, officially adopted by the House of Delegates of the A. M. A. Hospital registration series was discontinued by the A. M. A. in 1954. Beginning 1954, represents new series covering hospitals accepted for listing by the American Hospital Association, and may not be entirely comparable. Listing is a basic recognition extended to hospitals and related institutions in accordance with requirements outlined in *Requirements for Accepting Hospitals for Listing*, officially adopted by the House of Delegates of the American Hospital Association. See also *Historical Statistics, Colonial Times to 1957*, series B 195-248]

### No. 100. SPECIFIED REPORTABLE DISEASES—CASES REPORTED, BY MONTH: 1958

[Excludes Alaska and Hawaii. Figures in this table and table 101 should be interpreted with caution. Reporting of most of these diseases is known to be seriously incomplete. However, these figures have proved valuable to health authorities by indicating significant changes in disease incidence. They should not be interpreted as measures of total amount of illness caused by the diseases concerned.]

## No. 102. DAYS OF DISABILITY PER YEAR AND PER 100 POPULATION, BY ACUTE OR CHRONIC CONDITION GROUP: 1959

[For year ending June 30. Excludes Alaska and Hawaii. Data refer to civilian noninstitutional population and contain some duplications, since time lost because of several concurrent conditions is counted under each contributing condition. Based on a sample and subject to sampling variability; see source for detailed explanation. For definitions of types of time lost, see footnotes, table 103]

CONDITION GROUP	TOTAL DISABILITY DAYS (1,000,000)				DAYS PER 100 POPULATION			
	Restricted activity	Bed disability	Work loss <sup>1</sup>	School loss <sup>2</sup>	Restricted activity	Bed disability	Work loss <sup>3</sup>	School loss <sup>2</sup>
<b>ACUTE CONDITION GROUP</b>

Other impairments.....	165.9	57.3	15.3	1.9	96.8	33.5	25.9	5.3
All other chronic conditions.....	829.2	267.3	113.6	25.4	484.0	166.1	191.8	70.5

<sup>1</sup> Computed for persons 17 years old and over.

<sup>2</sup> Computed for children 6 to 16 years old.

<sup>3</sup> Population upon which rate is computed is only persons 17 years old and over who reported "working" as their major activity during the 12-month period preceding the week of interview.

Source: Department of Health, Education, and Welfare, Public Health Service, U.S. National Health Survey

**No. 103. DAYS OF DISABILITY PER YEAR AND PER PERSON, BY TYPE OF TIME LOST AND SEX: 1959**

[For year ending June 30. Excludes Alaska and Hawaii. Data refer to civilian noninstitutional population. Based on a sample and subject to sampling variability; see source for detailed explanations]

TYPE OF TIME LOST	TOTAL DISABILITY DAYS (1,000,000)			DAYS PER PERSON					
	Both sexes	Male	Female	Total	Sex		Residence		
					Male	Female	Urban	Rural nonfarm	Rural farm
Restricted-activity days <sup>1</sup> .....	2,700.9	1,129.6	1,571.4	15.8	13.6	17.9	15.2	15.7	18.8
Bed-disability days <sup>2</sup> .....	987.6	405.8	581.9	5.8	4.9	6.6	5.7	5.7	6.4
Work-loss days <sup>3</sup> .....	412.8	265.6	147.2	7.0	6.4	8.3	6.5	6.7	10.5
School-loss days <sup>4</sup> .....	298.9	106.5	102.4	5.8	5.8	5.8	6.0	5.8	5.0

<sup>1</sup> A day when a person cuts down on his usual activities for the whole of the day because of an illness or an injury. Includes bed-disability, work-loss, and school-loss days.

<sup>2</sup> A day on which a person was kept in bed either all or most of the day because of an illness or injury. Includes those work-loss and school-loss days actually spent in bed.

<sup>3</sup> A day is counted as a work-loss day if a person loses the entire work day because of illness or injury. Computed for persons 17 years of age and over. Population upon which rate is computed is only persons who reported "working" as their major activity during the 12-month period preceding the week of interview.

<sup>4</sup> A day is counted as lost from school if the child lost the entire school day because of illness or injury. Computed for children 6 to 16 years of age.

## Section 3

### Immigration, Emigration, and Naturalization

This section presents statistics related to immigration, emigration, naturalization, and alien registration. The principal source of these data is the *Annual Report* of the Immigration and Naturalization Service. Statistics of immigration and emigration are prepared from passenger and crew lists or manifests, and land border station registrations. Statistics for naturalizations are compiled from periodic reports by courts conducting such proceedings, and those for alien registrations are compilations of data from alien address report cards.

Although the reporting of alien arrivals was required in certain of the colonies and original States, the continuous record begins in 1819. Under the Act of March 2, 1819, passenger lists for all vessels arriving from foreign places were to be delivered to the local collector of customs, copies transmitted to the Secretary of State, and the information reported to Congress. Immigration statistics were compiled by the Department of State from 1820 to 1874 and by the Bureau of Statistics of the Treasury Department from 1867 to 1895. Since 1892 there has been a separate office or bureau of immigration, now a part of the Immigration and Naturalization Service. Annual reports were issued by this bureau from 1892 to 1932. From 1933 to 1940, a summary of the work of the Immigration and Naturalization Service was given in the Annual Reports of the Secretary of Labor. For 1941, the *Annual Report of the Attorney General* contained a report on immigration and naturalization. For subsequent fiscal years, Annual Reports of the Immigration and Naturalization Service (submitted by the Commissioner to the Attorney General) were published independently.

**Immigration.**—Since 1820 the official immigration statistics (see table 111) have changed considerably in coverage. The early figures were for arrivals at Atlantic and Gulf coast seaports of the United States. Pacific coast arrivals were first reported in 1850. Aliens arriving at Canadian seaports en route to the United States were included after 1893. The reporting of arrivals over the land borders began in 1904 and was gradually extended up to 1908. For reporting purposes, Hawaii in 1901, Puerto Rico in 1902, and Alaska in 1904 were treated as integral parts of the United States. Travel between the Philippine Islands and the United States was not treated as immigration or emigration between July 1, 1898 and May 1, 1934. Prior to 1868 arriving alien passengers were recorded; thereafter aliens coming for temporary stay were omitted. The passage of the Act of 1891 increased the number of excludable classes. The basis of reporting was then changed from arrivals to admissions, omitting aliens not permitted to enter the United States, except for the period 1895 to 1897 when the reporting of arrivals was resumed. Two classes of alien admissions are now reported, immigrant under either quota or nonquota status, and nonimmigrant.

**Immigrant.**—An immigrant is defined as an alien, other than a returning resident, admitted for permanent residence.

**Quota immigrant.**—Quotas limit immigration from countries other than those of the Western Hemisphere. Until 1920 there was only a qualitative limitation on immigration into this country. The 1921 Act placed the first numerical ceiling upon immigration. Each country's quota was to be 3 percent of the number of people born in that country who were residing in the United States as reported by the 1910 Census of Population. In 1924, a new formula was enacted for computing a country's quota, based on 2 percent of the number of people born in that country who were residing in the United States as determined by the 1890 Census of Population. The 1924 Act also provided that beginning July 1, 1929, the quota of any country shall have the

same ratio to 150,000 as the number of persons of that national origin living in the United States had to the total population living in the United States, as determined from the 1920 Census of Population. This Act also established minimum quotas of 100 for all quota areas and thereby raised the total quota authorized to 153,714. By 1952, this figure had become 154,277 by virtue of minor changes. The most recent step in legislation was in the Immigration and Nationality Act of 1952, which simplified the national origins formula of the 1924 Act by basing the annual quota on a flat one-sixth of 1 percent of the population in the 1920 Census. By Presidential proclamation effective January 1, 1953, new quotas were established for each quota area, totaling 154,657. Quotas were further revised during 1957, 1958, and 1959 by Presidential proclamation, and the total now stands at 154,857.

**Nonquota immigrant.**—Nonquota immigrants comprise immigrants born in Canada, Mexico, Cuba, Haiti, the Dominican Republic, the Canal Zone, and countries of Central and South America, and their spouses and children under age 21 if accompanying or following to join such immigrants; spouses and children of citizens of the United States; ministers of religious denominations, their spouses and children, if accompanying or following to join such ministers; refugees; and others.

**Nonimmigrant.**—Nonimmigrants are aliens who enter the United States for temporary periods or resident aliens returning from a temporary stay abroad. Included in the nonimmigrant class are foreign government officials, their families, attendants, servants and employees; temporary visitors for business or pleasure; aliens in continuous transit through the United States; returning resident aliens; students; and others. Certain temporary admissions such as of persons in possession of border-crossing identification cards are not included in the nonimmigrant totals.

**Displaced persons and refugees.**—The Displaced Persons Act of 1948, as amended, authorized the entry of certain displaced persons and other refugees without regard to the current availability of quotas, but subject to charges made against future annual quotas. The major provisions of the Displaced Persons Program expired in December 1951, and the program was nearly completed by June 30, 1952.

The Refugee Relief Act of 1953 authorized the issuance of 214,000 special nonquota visas until the end of 1956 to German, Italian, Greek, Far-Eastern, and other refugees and expellees from the Soviet and other Communist-dominated countries. An act passed September 11, 1957, further provided for the reallocation of 18,000 of these visas which were unused. The act of July 25, 1958, authorized the adjustment of status to that of permanent residents for Hungarian parolees after they had acquired 2 years residence in the United States. The act of September 2, 1958, authorized admission as nonquota immigrants of Azores victims of earthquakes and of Netherlands nationals displaced from Indonesia.

**Alien registration.**—The Immigration and Nationality Act provides that each alien required to be registered under the Alien Registration Act of 1940, who is in the United States on January 1, must report to the Attorney General his current address during the month of January. Alien address report cards are distributed through the Post Offices of the United States or the local offices of the Immigration and Naturalization Service.

**Emigration.**—No official record of alien departures was kept prior to July 1, 1907. For statistical purposes an emigrant is an alien departing from the United States after a stay of one year or more with the declared intention of remaining permanently in a foreign country. Emigrant data are available through June 30, 1957.

**Naturalization.**—Naturalization statistics for the United States began with the fiscal year 1907. Prior to this time each court kept records of naturalizations but no national data were compiled. The Act of June 29, 1906, effective September 27, 1906, provided for periodic returns by all courts conducting naturalization proceedings, and for the filing with a central Federal agency of a duplicate copy of each declaration of intention and petition for naturalization filed, and of each certificate of naturalization

issued. Naturalization statistics were originally compiled by the Bureau of Immigration and Naturalization of the Department of Commerce and Labor, now the Immigration and Naturalization Service of the Department of Justice.

**Alaska and Hawaii.**—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, Colonial Times to 1957*, series C 139") provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

<sup>1</sup> Quota was 153,774 from 1934 to Feb. 8, 1944, when quota of 105 Chinese, authorized by Act of Dec. 17, 1943, increased the maximum quota to 153,879. On July 4, 1946, quota for Philippine Islands was increased from 50 to 100, thereby raising total quota to 153,929. Quota was increased to 154,206 on July 27, 1949, by establishment of separate quotas of 100 each for Israel, Syria, and Lebanon, and abolishment of combined quota of 123 established for Syria and Lebanon. Quota was increased to 154,277 on Oct. 31, 1950, when quota for Italy was reduced to 5,677, quota for Yugoslavia was increased to 938, and a separate quota of 100 was established for Trieste.

<sup>2</sup> Quota of 154,667 established by this Act effective Jan. 1, 1953, was increased by 200 by Presidential proclamation in 1957 (100 each for Sudan, Tunisia, and Ghana, minus 100 for British Togoland now part of Ghana). In 1958, quotas of 100 each for Egypt and Syria were abolished and quotas of 100 each for United Arab Republic and Federation of Malaya were established, the total thereby remaining at 154,857.

<sup>3</sup> All Ireland included with Great Britain prior to 1925, thereafter, Northern Ireland only.

<sup>4</sup> Includes Philippines.

<sup>1</sup> Classification by quota preferences in 1950 not comparable with subsequent years.

<sup>2</sup> Excludes German ethnics.

<sup>3</sup> Under the Immigration Act of 1924, this class covered only women who had been U.S. citizens.

<sup>4</sup> New classes under the provisions of the Immigration and Nationality Act of 1952.

<sup>5</sup> Refugees admitted under Refugee Act of 1953.

<sup>6</sup> Adjusting status under Act of July 25, 1953.

<sup>7</sup> Admissions under Act of September 2, 1953.

<sup>8</sup> Excludes agricultural laborers except those admitted from Japan and those admitted from the West Indies and Canada after March 8, 1957.

<sup>9</sup> Returning resident aliens who have once been counted as immigrants are included with nonimmigrants. Beginning 1957, not comparable with previous years due to changes in documentary requirements.

## Section 4

### Education

Statistics in this section relate to the level, extent, personnel, and finances of formal education in the United States. The principal sources of these data are the Decennial Census of Population (see text, p. 1) and the Biennial Survey of Education conducted by the Office of Education. Other statistical studies of the Office of Education, publications of the National Education Association, annual or biennial reports of the individual State agencies which have jurisdiction over education, and the Current Population Survey conducted by the Bureau of the Census (see text, p. 2) are the additional regular sources of data in the field of education.

State laws vary concerning the compulsory school attendance of children. However, most State laws require that formal schooling begin at 7 years of age and extend until 16 years of age.

Data on school enrollment are available from the Decennial Census of Population since the Census of 1840 and on educational attainment from the same source for 1940 and 1950. The Current Population Survey of the Bureau of the Census has reported on school enrollment annually beginning in 1945, and on educational attainment periodically beginning in 1947. Biennial Survey of Education reports include a variety of information presented in much detail for each school level (kindergarten, elementary, secondary, and college). A major difference between the Current Population Survey of the Census Bureau and the Biennial Survey of the Office of Education is that the former shows education data for the country as a whole by age and other population characteristics, whereas the latter shows data on attendance, staff, and finances for the United States and individual States. The Office of Education also issues annually the *Digest of Annual Reports of State Boards for Vocational Education*.

**Enrollment and attainment.**—School enrollment statistics of the Bureau of the Census are based on attendance or enrollment in any regular school (or college) within a given period. Attainment statistics are based on the last full grade completed by a student. A regular school as defined in this respect by the Bureau of the Census is any public, private, or parochial school, college or university, but excludes nursery schools or, generally, vocational, trade, business, or correspondence schools; kindergartens were also excluded until October 1950.

**Schools.**—The school data shown here from the *Biennial Survey of Education* are reasonably complete for the types of education covered, but do not include figures for private schools of art, music, drama, etc., for private, commercial, trade, and vocational schools, or private correspondence schools.

The comparability of elementary or secondary school data over a period of years was invalidated by the introduction of the junior high school which includes the 7th and 8th grades of the traditional elementary school and the 9th grade of regular high school. A comparable time series utilizing these data is possible only on the strict basis of grade enrollment, grades 1 through 8 as elementary and grades 9 through 12 as secondary.

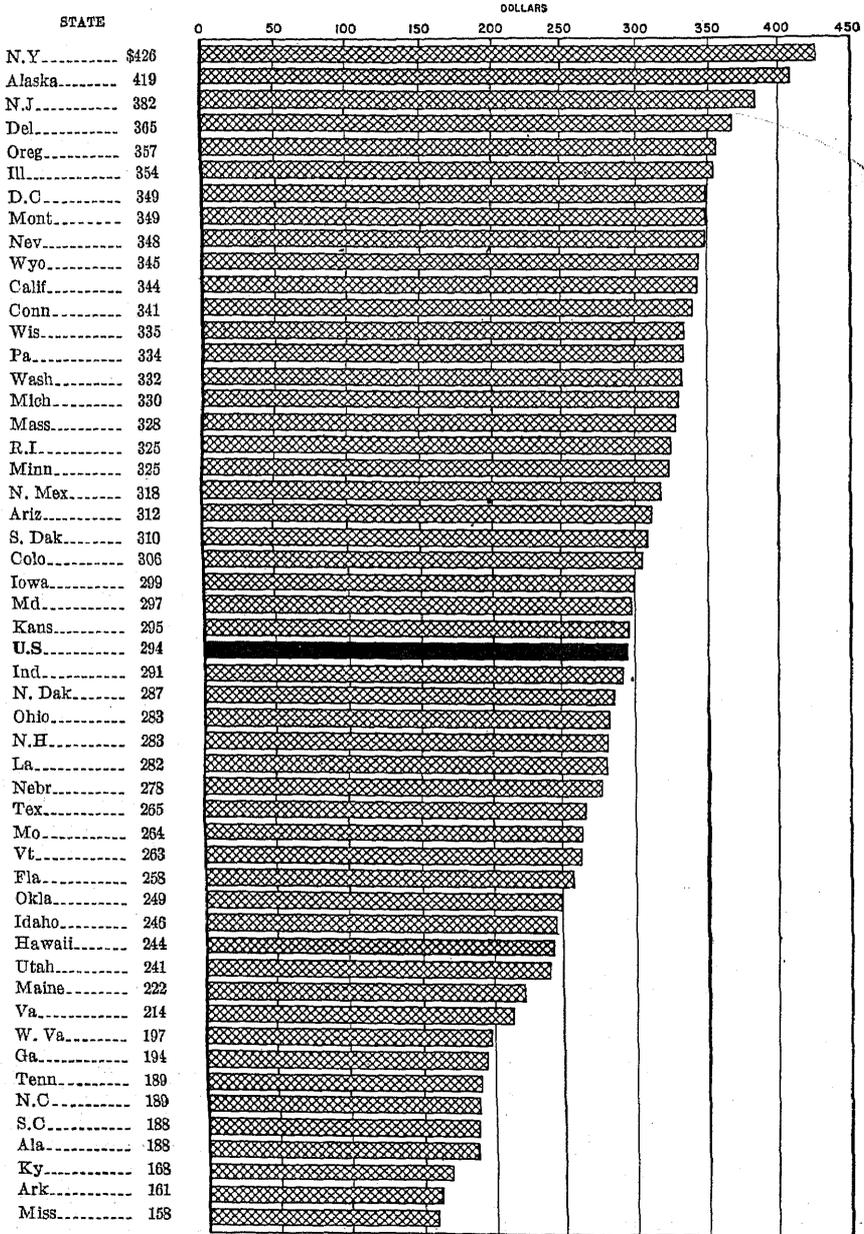

Office of Education data in this section relate to school terms or academic years unless otherwise indicated; except as noted, the year shown refers to the period beginning in September of the prior year and extending to June of the year indicated.

**Alaska and Hawaii.**—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, Colonial Times to 1957*, series H 407-411") provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

FIG. IX. CURRENT EXPENDITURE PER PUPIL IN AVERAGE DAILY ATTENDANCE FOR PUBLIC ELEMENTARY AND SECONDARY DAY SCHOOLS: 1956

<sup>1</sup> Includes persons for whom years of school completed was not reported, not shown separately.  
<sup>2</sup> Includes persons reporting no school years completed.  
<sup>3</sup> Excludes Hawaii. <sup>4</sup> Based on complete-count data. <sup>5</sup> Not available.

No. 144. PROJECTIONS OF EDUCATIONAL ATTAINMENT FOR PERSONS 25 YEARS OLD AND OVER, BY SEX: 1960 TO 1980

[In thousands. As of spring of year. Excludes Alaska and Hawaii. Data based on projected age-grade specific attainment rates from the 1950 Census and Current Population Surveys of October 1952 and March 1957. Series A and B in 1970 and 1980 imply the following assumptions regarding trends in educational attainment: A—continuation of short-term past trends in attainment of younger adult age groups; B—continuation of long-term past trends in attainment of younger adult age groups. Figures are based on projections of population as published in Series P-25, No. 187]

No. 145. ILLITERACY OF PERSONS 14 YEARS OLD AND OVER, BY AGE, COLOR, SEX, AND URBAN AND RURAL RESIDENCE: 1947 AND 1959

[In thousands. As of October 1947 and March 1959. Excludes Alaska and Hawaii. Data relate to civilian non-institutional population based on Current Population Survey. Persons unable to both read and write in any language were classified as illiterate. Information on illiteracy was obtained in 1959 only for persons completing less than 6 years of school, and in 1947 only for persons completing less than 5 years of school. Persons completing more than that amount were classified as being literate. See also *Historical Statistics, Colonial Times to 1957*, series H 407-411]

<sup>1</sup> For 1900, enumerated population as of June 1; for all other years, estimated as of July 1 of preceding year (1910, 1920, etc.); excludes Armed Forces overseas.

<sup>2</sup> Includes librarians and other nonsupervisory instructional staff; excludes supervisors and principals. Prior to 1940, figures represent number of persons employed rather than number of positions.

<sup>3</sup> Estimated.

<sup>4</sup> Through 1950, includes community services.

<sup>5</sup> Comprises summer schools, community colleges, and adult education, and beginning 1954, community services.

<sup>6</sup> Based on current expenditure allocable to pupil costs, capital outlay, and interest.

<sup>7</sup> Based on expenditure allocable to pupil costs.

<sup>8</sup> Includes interest.

No. 149. PUBLIC ELEMENTARY AND SECONDARY SCHOOLS—ENROLLMENT, TEACHERS, AND SCHOOLROOMS, BY STATES: FALL 1959

[Enrollment data, compiled in the fall, are not directly comparable with the cumulative statistics on enrollment which, in *Biennial Survey of Education in the United States*, are given for an entire school year. Except as noted, schools are classified by type of organization, rather than by grade-group; elementary includes kindergarten and secondary includes junior high schools]

<sup>1</sup> Per pupil in average daily attendance based on expenditures allocable to pupil costs.  
<sup>2</sup> Comprises administration, fixed charges, and other (health services, pupil transportation, etc.).  
<sup>3</sup> Comprises summer schools, adult education, community colleges (those operated by local school districts), and community services.  
<sup>4</sup> Total excludes \$211,000,000 expended by State and local schoolhousing authorities.  
<sup>5</sup> Community colleges included with elementary and secondary schools.  
<sup>6</sup> Includes agricultural high schools operated in conjunction with junior colleges.  
<sup>7</sup> \$87,472,000 for summer schools, adult education, and community colleges, not separately shown, included with elementary and secondary schools, but omitted in computing expenditure per pupil.  
<sup>8</sup> Excludes \$3,890,172 expended through Alaska Public Works Program.

No. 155. SCHOOL AND COLLEGE ENROLLMENT AND EXPENDITURE: 1920 TO 1956

Mentally gifted.....	9	14	4,080	16,632	622	15	27	3,683	19,233	920

<sup>1</sup> Comprises full-time and part-time teachers. A teacher serving more than one type of exceptional child is reported only with the type to which she devotes the major portion of her time.

<sup>2</sup> Includes District of Columbia.

<sup>3</sup> Total number of different places reporting a program for one or more of the specified types of exceptional children; not the sum of the figures reported in the column.

<sup>4</sup> Not reported in the 1947-48 survey. Figures for 1948 are the sum of those for "delicate" and "epileptic."

No. 170. VOCATIONAL PROGRAMS, FEDERALLY AIDED—NUMBER OF TEACHERS AND STUDENTS, BY TYPE OF PROGRAM AND BY SEX: 1940 TO 1958.

[For years ending June 30. Includes Hawaii and Puerto Rico, and beginning 1955, Alaska and Virgin Islands. Institutions Federally aided are reimbursed from Federal funds provided under act known as "The Smith-Hughes Act," or the "National Vocational Education Act of 1917," and subsequent acts extending benefits of vocational education to Alaska, Hawaii, Puerto Rico, and Virgin Islands, and providing for further development of vocational education of less-than-college grade. These acts, administered by Office of Education, provide appropriations for reimbursement in part from Federal funds for expenditures by States and local communities for vocational education]

Other	48,481	68,478		29,259		39,448	38,673	38,252

<sup>1</sup> Includes, in addition to Federally affected areas, funds for support of land-grant colleges, vocational education below college level, vocational rehabilitation, American Printing House for the Blind, value of surplus property transferred to educational institutions, education of Public Health personnel, etc.

<sup>2</sup> Areas affected by Federal activity and employment, e. g., defense production, etc.

<sup>3</sup> Includes, in addition to school lunch program, funds for Agricultural Experiment Stations, and Cooperative Agricultural Extension Service.

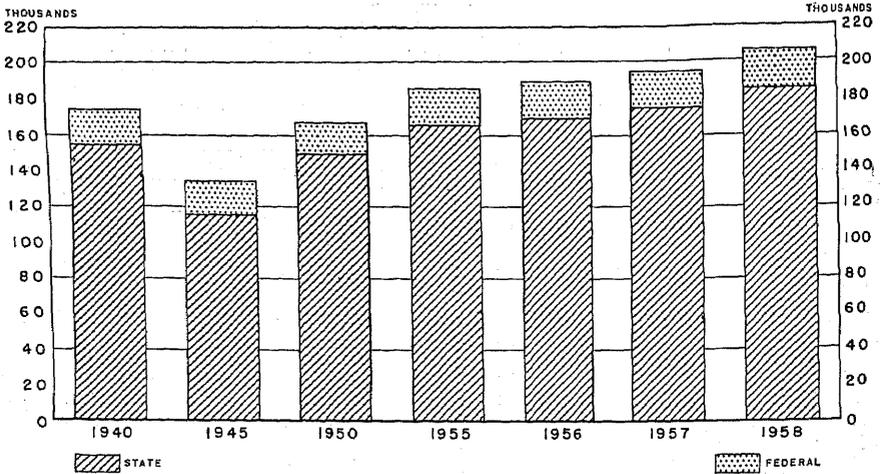

<sup>4</sup> Includes also vocational rehabilitation under Public Laws 16 and 894, education and training under Public Law 346, and educational assistance for war orphans under Public Law 634.

<sup>5</sup> Federal funds allotted to national programs which cannot be reported by States.

<sup>6</sup> Negative reconciliation figure.

## Section 5

### Law Enforcement, Federal Courts, and Prisons

This section presents data on crimes, arrests, Federal court cases, the legal profession, Federal and State prisoners, and the use of the death penalty. The more important publications in which figures relating to these subjects appear are: *Uniform Crime Reports*, an annual bulletin of the Federal Bureau of Investigation; the Administrative Office of the U.S. Courts, *Annual Report of the Director*; and the Bureau of Prisons annual review, *Federal Prisons*, and periodical bulletins and reports in its *National Prisoner Statistics* series.

In addition, limited information concerning juvenile delinquency and the operation of juvenile courts is collected and published by the Children's Bureau of the Department of Health, Education, and Welfare. Data on prosecution and disposition of persons charged with misdemeanors and other minor offenses may be found for some of the larger cities in the annual reports of their municipal courts or governments.

**Law enforcement and legal jurisdiction.**—Law enforcement is for the most part a function of State and local officers and agencies. The U.S. Constitution reserves to the States the general police powers, and only offenses against the U.S. Government and against its employees while engaged in their official duties, and offenses which involve the crossing of State lines or an interference with interstate commerce are made Federal offenses by act of Congress. Consequently, criminal offenses such as murder, robbery, burglary, theft, assault, and rape are violations of State laws unless they involve Federal property or a Federal officer while engaged in his official duties, or unless they occur in Federal territories or reservations or on the high seas. There are 52 separate criminal law jurisdictions in the United States, 1 in each of the 50 States, 1 in the District of Columbia, and the Federal jurisdiction. Each of these has its own criminal law and procedure and its own law enforcement agencies. Yet the general system of law enforcement is quite similar from State to State, although there are among the States often substantial differences in the penalties provided for like offenses.

Law enforcement can be divided into three parts. The first covers the activities of the police agencies, namely, the investigation of crimes and the apprehension of persons suspected of committing them. This function involves agencies such as municipal police, county police, State police, sheriffs, constables, marshals, Federal agents, and many kinds of special officers. The second phase is the prosecution of those charged with criminal offenses to determine whether they are in fact guilty. The agencies concerned include the courts, justices of the peace, municipal, State, and Federal grand juries, and prosecuting court officers. The third division of administration is concerned with the punishment or treatment of those convicted of crime. While the courts usually determine the sentence after conviction, the application of the penalty is carried out by the prison, reformatory, or jail, or by probation or parole officials.

**Crime.**—Nearly all statistical data on crime and criminals are derived from the records and reports of the various agencies engaged in the administration of criminal law. Police statistics present the number of offenses reported, the number of persons arrested, and the offenses cleared by arrest. Arrest records provide data concerning sex, age, race, and other characteristics of the persons arrested and charged with crime. As the police agencies are largely local, a problem is involved in collecting statistical data from the large number of such agencies. The Federal Bureau of Investigation obtains reports from police agencies and publishes summaries for the

country as a whole in its annual *Uniform Crime Reports*. However, in publishing the data submitted by chiefs of police in different cities, the Federal Bureau of Investigation does not vouch for their accuracy. They are issued as information which may throw some light on problems of crime and criminal-law enforcement. The great majority of communities are now reporting to the Federal Bureau of Investigation and the reports received cover over 97 percent of both urban and rural population in the United States.

In 1958 the Federal Bureau of Investigation appointed a consultant committee to make a study of crime reporting in the United States. As a result of the findings and recommendations of this committee, the FBI has revised its methods of compiling, classifying, and presenting statistics on crime. Because of the changes in methodology and definitions, crime figures presented in this edition of the *Statistical Abstract* for the most part are not comparable with those shown in prior editions. The revisions are discussed in *Uniform Crime Reports for the United States for 1958*.

**Courts.**—Court statistics for criminal offenses and the outcome of the prosecutions for the country are quite incomplete. In many States, an annual or biennial publication presents data on the disposition of criminal cases in the trial courts. The only national compilation of such statistics was made by the Bureau of the Census which annually, until 1945, published data in *Judicial Criminal Statistics* on the disposition of criminal cases in the general trial courts.

Comprehensive information is collected on the business of the Federal courts by the Administrative Office of the U.S. Courts, and is published in the *Annual Report of the Director*. The bulk of civil litigation in the country is commenced and determined in the various State courts, and only when the U.S. Constitution and acts of Congress specifically confer jurisdiction upon the Federal courts may civil litigation be heard and decided by these courts. The question whether a State court or a Federal court has jurisdiction over a particular civil action is often difficult to determine, but generally speaking the Federal courts have jurisdiction over the following types of cases:

- (1) Suits or proceedings by the United States; (2) Suits or proceedings against the United States; (3) Civil actions between private parties arising under the Constitution, laws, or treaties of the United States; (4) Civil actions between private litigants who are citizens of different States; (5) Civil cases involving admiralty, maritime, or prize jurisdiction; (6) All matters and proceedings in bankruptcy.

The Federal courts of original jurisdiction are known as the U.S. district courts, and one or more of these courts is established in every State, including Alaska and Hawaii, and one each in Puerto Rico, the Virgin Islands, the Canal Zone, and Guam. Appeals from the district courts are taken to intermediate appellate courts of which there are 11. They are known as U.S. courts of appeals. The Supreme Court of the United States is the final and highest appellate court in the Federal system of courts.

**Prisoners.**—Statistics of prisoners committed to penal institutions have been collected and published for a longer period of time than have other criminal statistics. Data on prisoners in Federal and State prisons and reformatories were collected annually by the Bureau of the Census until 1950 when this work was transferred to the Bureau of Prisons. Summary statistics covering persons received and discharged from State prisons and reformatories and from Federal prisons, and persons executed in the United States under civilian authority are now published periodically by the Bureau of Prisons in *National Prisoner Statistics* and in its annual report, *Federal Prisons*. Also, nearly every State publishes annual data either for its whole prison system or for each separate State institution.

**Alaska and Hawaii.**—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, Colonial Times to 1957*, series H 445-451") provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 175. CRIMES KNOWN TO THE POLICE, BY TYPE: 1957 AND 1958

[Excludes Alaska and Hawaii. Estimates based on reports of offenses known from city and rural law enforcement agencies representing 91 percent of the urban population and 68 percent of the rural population for 1957, and 99 percent of the urban population and 97 percent of the rural population for 1958, according to current FBI estimates of population. Figures not comparable with those published in previous editions of the *Statistical Abstract*; see text, p. 138]

TYPE OF CRIME	NUMBER OF OFFENSES		INCREASE, 1957 TO 1958	
	1957	1958	Number	Percent
<b>Total</b> .....	<b>1,422,285</b>	<b>1,553,922</b>	<b>131,637</b>	<b>9.3</b>
Murder <sup>1</sup> .....	8,027	8,182	155	1.9
Forcible rape <sup>2</sup> .....	12,836	14,501	1,675	13.0
Robbery <sup>3</sup> .....	66,848	75,347	8,504	12.7
Aggravated assault <sup>4</sup> .....	110,672	118,530	2,858	2.6
Burglary <sup>5</sup> .....	603,707	679,787	76,080	12.6
Larceny over \$50 <sup>6</sup> .....	354,972	391,550	36,578	10.3
Auto theft <sup>7</sup> .....	265,178	270,965	5,787	2.2

<sup>1</sup> Includes all willful felonious homicides; excludes suicides and justifiable homicides.

<sup>2</sup> Limited to forcible rapes and attempts.

<sup>3</sup> Includes the stealing or taking of anything of value by force or violence or by threat of force or violence; includes attempted robbery.

<sup>4</sup> Includes assault with intent to kill. Excludes simple assault, assault and battery, fighting, etc.

<sup>5</sup> Includes any unlawful entry to commit a felony or a theft. Includes attempted burglary and burglary followed by larceny.

<sup>6</sup> Includes theft of property or articles of value (except auto theft) without the use of force and violence or fraud. Excludes larceny resulting from burglary.

<sup>7</sup> Includes all cases where motor vehicles are driven away and abandoned. Excludes those taken for temporary use when actually returned by the taker.

Source: Department of Justice, Federal Bureau of Investigation; annual report, *Uniform Crime Reports for the United States*.

No. 176. URBAN CRIMES KNOWN TO THE POLICE: 1953-57 (AVERAGE) AND 1958

[Excludes Alaska and Hawaii. Offenses known to the police in 2,703 cities over 2,500, total population 84,872,159, according to current FBI estimates. For definitions not shown here, see footnotes, table 175. Figures not comparable with those published in previous editions of the *Statistical Abstract*; see text, p. 138. See also *Historical Statistics, Colonial Times to 1957*, series H 445-461, for related but not comparable data]

TYPE OF CRIME	NUMBER OF OFFENSES		Percent Increase
	1953-57, average	1958	
<b>Total</b> .....	<b>1,412,545</b>	<b>1,782,534</b>	<b>26.2</b>
Murder and nonnegligent manslaughter.....	3,314	3,679	11.0
Manslaughter by negligence <sup>1</sup> .....	2,301	2,343	1.8
Forcible rape <sup>2</sup> .....	5,208	6,872	32.1
Robbery.....	45,661	52,180	14.3
Aggravated assault.....	63,035	67,966	7.8
Burglary—breaking or entering.....	321,218	404,293	25.9
Larceny— <sup>3</sup> theft.....	821,212	1,061,369	29.2
Auto theft.....	150,601	183,832	22.1

<sup>1</sup> Includes deaths primarily attributable to gross negligence on the part of some individual other than the victim.

<sup>2</sup> Beginning 1958, the rape category was limited to forcible offenses. Prior to 1958 statutory cases were also included. The forcible rapes used to construct the annual averages for 1953-57 were estimates based on special offense analyses furnished by over 400 selected cities (total population over 50,000,000) which showed the proportion of reported rapes classified as forcible each year.

<sup>3</sup> Includes all reported thefts regardless of value of property stolen.

Source: Department of Justice, Federal Bureau of Investigation; annual report, *Uniform Crime Reports for the United States*.

## No. 177. CRIME RATES, BY TYPE, BY STATES: 1957 AND 1958

[Rates based on offenses known per 100,000 population. Based on Bureau of the Census estimated population as of July 1, excluding Armed Forces overseas. For definitions of crimes, see footnotes, table 175. Figures not comparable with those published in previous editions of the *Statistical Abstract*; see text, p. 138]

1959.....	-----	-----	-----	-----	24,636,000	129

<sup>1</sup> Data for 1940-1951 based on fingerprint records received by the Federal Bureau of Investigation. Beginning 1952, based on report forms (including arrests of children who were not fingerprinted) sent in by city police departments in varying number of reporting cities; for example, covers 232 cities in 1952, 1,174 in 1953, etc.

<sup>2</sup> Beginning 1955, based on data from a representative national sample of juvenile courts; for earlier years, estimated by Children's Bureau. For an explanation of the limitations of juvenile court statistics, see *Juvenile Court Statistics, 1957* (Children's Bureau Statistical Series No. 62).

<sup>3</sup> Estimates of civilian population as of July 1 published by the Bureau of the Census in *Current Population Reports*, Series P-25. Beginning 1959, includes Alaska. <sup>4</sup> Provisional.

Source: Department of Justice, Federal Bureau of Investigation; Department of Health, Education, and Welfare, Social Security Administration, Children's Bureau; and Department of Commerce, Bureau of the Census.

**No. 183. ARRESTS, BY AGE GROUPS, IN 1,586 CITIES OF 2,500 OR MORE: 1958**

[Excludes Alaska and Hawaii. Data for all persons arrested for violations that happened in these reporting cities, covering about 49 percent of the total city population in 1958. Total estimated population 52,329,497 based on 1958 estimates. Each person arrested is counted rather than the number of charges that may be filed against one person. Arrest of a juvenile is counted with the offense actually committed even though a technical charge, such as juvenile delinquency, must be filed under local procedure. Figures not comparable with those published in previous editions of the *Statistical Abstract*; see text, p. 138]

<sup>1</sup> Not included in State figures.

<sup>2</sup> Beginning 1957, excludes misdemeanant prisoners received from court into Adult Correctional Institutions.

<sup>3</sup> Covers only the New Castle County workhouse through 1955; beginning July 1, 1956, also includes the Kent and Sussex County workhouses which were united with it to form a State correctional system.

<sup>4</sup> Includes only prisoners liable to imprisonment in Georgia State Prison.

<sup>5</sup> Beginning June 20, 1957, excludes misdemeanant prisoners received from court.

Source: Department of Justice, Bureau of Prisons; *National Prisoner Statistics*, bulletin Nos. 19 and 21.

**NO. 198. AVERAGE TIME SERVED BY PRISONERS RELEASED FROM FEDERAL INSTITUTIONS FOR FIRST TIME, BY OFFENSE: 1959**

[For year ending June 30. Includes a few prisoners committed from the Federal courts in Alaska and Hawaii. Excludes 487 first releases other than by parole, expiration of sentence, and mandatory release, also excludes 659 parole releases of offenders sentenced under the Youth Corrections Act and 1,148 second or subsequent releases. In computing averages, sentences to life and to more than 45 years; minority sentences of juvenile delinquents were counted from date of sentence to 21st birthday]

**No. 202. PRISONERS EXECUTED UNDER CIVIL AUTHORITY, BY OFFENSE AND RACE: 1930 TO 1959**

 Includes 2 Federal executions in Alaska, 1 in 1948 and 1 in 1950. Excludes executions by military authorities. The Army (including the Air Force) carried out 159 (148 between 1942 and 1950, 3 each in 1954, 1955, and 1957, and 1 each in 1958 and 1959). Of the total, 106 were executed for murder (including 21 involving rape), 52 for rape, and 1 for desertion. The Navy carried out no executions during the period. See also *Historical Statistics, Colonial Times to 1957*, series H 432-444]

FIG. XII. TERRITORIAL EXPANSION OF THE UNITED STATES AND ACQUISITIONS OF OTHER PRINCIPAL AREAS

[See table 204]

Source: Department of Commerce, Bureau of the Census.

## Section 6

### Area, Geography, and Climate

Statistics in this section relate to area, climatological, topographic, and hydrologic measurements of the United States. There are few official publications other than those showing area measurements issued infrequently by the Bureau of the Census, which present area and geography statistics of national scope. However, many data are compiled by Federal Government agencies, such as the Geological Survey, the Coast and Geodetic Survey, and the Weather Bureau, which are primarily for particular regions or are collected for internal administrative purposes.

**Area.**—Area measurements in the United States began with measurements for the country as a whole and developed, as mapping progressed, to measurements for the States.

The annual report of the U.S. General Land Office for 1850 contained the first reference to the areas of the several States and Territories, although there was no indication of the method used in obtaining these measurements. The General Land Office was practically the sole source of information concerning the areas of the States and Territories until 1881.

The Bureau of the Census in 1881, as a part of the 1880 Census of Population, laid the foundation for accurate and detailed area measurement in the United States. For the first time an account was given of the method and maps employed, the water bodies included, and the outer limits of the United States used as a basis for measurement.

The same Bureau, in 1940 in its publication, *Areas of the United States: 1940*, presented the first basic measurement of the United States since its work in 1880. The data presented in that study cover the total land and water areas of the States, counties, cities, and minor civil divisions.

**Geography.**—The Geological Survey, cooperating with State agencies, is responsible for topographic and geologic maps and for basic data concerning the quantity, quality, and movement of surface and ground water.

The Bureau of Land Management conducts cadastral surveys.

The Coast and Geodetic Survey has responsibility for coastal and geodetic surveys and measurement of certain physical phenomena. Authorized in 1807, this agency's original function was to survey and chart the coast of the United States and the outlying islands and fishing banks. In 1871, Congress authorized an extension of the geodetic surveys from coast to coast to provide the States with reference markers for the control of their topographic and geologic mapping and their boundary surveys, and to provide data for use by the Geological Survey and other agencies. Since 1927 the Coast and Geodetic Survey has also been charged with the preparation of aeronautical charts for the United States and its outlying areas.

A civil mapping activity of the Corps of Engineers, the U.S. Lake Survey, was established in 1841. Its primary function is to furnish Great Lakes navigators with reliable charts and information regarding harbor facilities. It also maintains records of the fluctuating levels of the lakes, the flow through connecting rivers, the precipitation over the lakes, and reports on all hydraulic problems relating to the Great Lakes.

**Climate.**—The Weather Bureau is responsible for essentially all meteorologic data. It collects, processes, and publishes climatological data. This Bureau maintains about 11,000 weather stations. Of this number nearly 3,000 stations produce autographic precipitation records, about 600 take automatic or hourly readings of a series of weather elements, and the remainder record one observation a day. There are few

records in existence for stations before 1871 although some earlier and less detailed records began in the 18th century.

Nearly all weather stations have been moved several times in their history. Consequently, the Weather Bureau has adopted the practice of using "normal" values of temperature and precipitation for comparative purposes rather than long-term means which are derived from records taken at the several different locations the stations may have had over the years.

Normal values of temperature and precipitation are based on records for the 30-year period 1921 to 1950, inclusive. Where a station had a record for the entire 30 years from the same instrument site, monthly precipitation normals are the mean of the monthly values for the 30 years. For such stations, the temperature normals were obtained in a similar manner, using normal maximum and normal minimum values to obtain monthly normals. The annual normal temperature is obtained by dividing the sum of the annual normal maximum value and the annual normal minimum value for temperature by 2.

For stations that did not have continuous records from the same instrument site for the entire 30 years, 1921 to 1950, the means have been adjusted to the record at the present site. In these adjustments, a "difference factor" was used for temperature and a "ratio factor" for precipitation. These factors were determined by parallel comparison, either between records at the actual station sites or through a second station that had a continuous record to compare against both sites for obtaining the resultant adjusting factors. Normals were thereafter obtained as outlined above.

This system of normals has three characteristics: (1) The 30-year period (1921 to 1950) adopted for the computations is consistent with the term of years accepted by the World Meteorological Organization for climatic normals; (2) where the station and exposure for records in a given locality have been changed, the whole record has been carefully studied and adjusted to the latest source of records and reports; (3) the normals for maximum and minimum temperatures are separately tabulated.

The degree-day normals are derived from the values for the monthly normal maximum and minimum temperatures, and are computed on the standard base 65° F. The degree day has been defined as follows: "A unit, based upon temperature difference and time, used in estimating fuel consumption and specifying nominal heating load in winter. For any one day, when the mean temperature is less than 65° F., there exist as many degree days as there are Fahrenheit degrees difference in the temperature between the average temperature for the day and 65° F."

**Alaska and Hawaii.**—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, Colonial Times to 1957*, series J 1-2") provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

**No. 204. TERRITORIAL EXPANSION OF THE UNITED STATES AND ACQUISITIONS OF OTHER AREAS**

[Boundaries of all territories listed under "United States" were indefinite, at least in part, at time of acquisition. Area figures shown here represent precise determinations of specific territories which have been marked upon maps, based upon interpretations of the several treaties of cession which are necessarily debatable. These determinations were made by a committee consisting of representatives of various governmental agencies in 1912. Subsequently these figures were adjusted to bring them into agreement with remeasurements made in 1940. See also *Historical Statistics, Colonial Times to 1867*, series J 1-2]

ACCESSION	Date	Gross area (land and water)	ACCESSION	Date	Gross area (land and water)
<b>Total</b> .....		<b>Sq. mi.</b> <b>3,623,130</b>	<b>Other:</b>		<b>Sq. mi.</b> <b>115,600</b>

<sup>1</sup> Figures are lengths of general outline of seacoast. Measurements made with unit measure of 30 minutes of latitude on charts as near scale of 1:1,200,000 as possible. Shoreline of bays and sounds is included to point where they narrow to width of unit measure, and distance across at such point is included.

<sup>2</sup> Measurements made with unit measure of 3 statute miles on charts of 1:200,000 and 1:400,000 scale when available. Shoreline of bays, sounds, and other bodies of water included to point where they narrow to width of 3 statute miles, and distance across at such point is included.

<sup>3</sup> Figures obtained in 1939-1940 with recording measure on largest scale maps and charts then available. Shoreline of bays, sounds, and other bodies of water included to head of tide-water, or to point where they narrow to width of 100 feet.

<sup>1</sup> Dry land and land temporarily or partially covered by water, such as marshland, swamps, and river flood plains; streams, sloughs, estuaries, and canals less than one-eighth of a statute mile in width; and lakes, reservoirs, and ponds less than 40 acres of area.

<sup>2</sup> Permanent inland water surface, such as lakes, reservoirs, and ponds having 40 acres or more of area; streams, sloughs, estuaries, and canals one-eighth of a statute mile or more in width; deeply indented embayments and sounds, and other coastal waters behind or sheltered by headlands or islands separated by less than 1 nautical mile of water; and islands having less than 40 acres of area. Does not include water surface of the oceans, bays, the Gulf of Mexico, the Great Lakes, Long Island Sound, Puget Sound, and the Straits of Juan de Fuca and Georgia, lying within the jurisdiction of the United States but not defined as inland water.

<sup>3</sup> Year of ratification of Constitution; one of the original 13 States.

<sup>4</sup> See table 4, footnote 14.

<sup>5</sup> See table 4, footnote 17.

No. 207. EXTREME POINTS OF THE UNITED STATES

[The geographic center of an area may be defined as that point on which the surface of the area would balance if it were a plane of uniform thickness, or in other words, the center of gravity of the surface. The exact position of the geographic center of the United States cannot be determined from the data available and the positions given here must be considered approximate only. They are believed to be sufficiently accurate for ordinary purposes]

LOCATION	Direction from geographic center	COORDINATES		Distance from geographic center  Miles
		Latitude (N)	Longitude (W)

Kure Island, Hawaii.....	Southwest.....	28°25'	178°22'	4,136

<sup>1</sup> Excludes adjacent islands.

<sup>2</sup> Excludes the adjacent islands to the United States (conterminous area).

<sup>3</sup> Excludes islands adjacent to the United States (conterminous area) but includes all islands of the Aleutian chain and Hawaii.

Note.—The following distances are computed to mean sea level: (a) from West Quoddy Head west along the parallel to the Pacific Ocean the distance is 2,807 miles; (b) from the south point of Texas due north to the 49th parallel the distance is 1,598 miles; (c) the two points farthest apart are Kure Island, Hawaii, and Mangrove Point, Florida, a distance of 5,848 miles; (d) length of the northern boundary, excluding Alaska, is 3,987 miles; (e) length of the Mexican boundary from the Gulf of Mexico to the Pacific Ocean is approximately 2,013 miles. The Lake of the Woods projection extends to latitude 49°23' at longitude 95°09'. The extreme south point of Texas is in latitude 25°50', longitude 97°24'.

## No. 214. ESTIMATED WATER USE: 1900 TO 1980

[In billions of gallons daily average. In preparing these projections, it was estimated that the population residing in the United States (conterminous area) would grow from 176.2 million in 1959 to 230.8 million in 1980, and that the index of industrial production would rise from approximately 152 to 330 in the same period. See also *Historical Statistics, Colonial Times to 1967*, series J 91-102]

FIG. XIII. OWNERSHIP OF LAND, BY CLASS: 1954

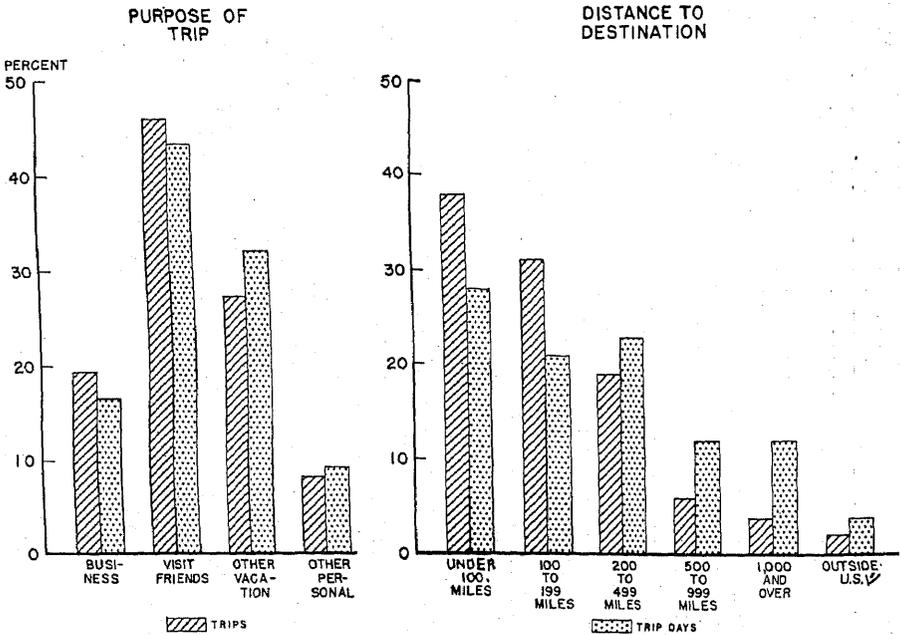

[See table 231]

Source: Chart prepared by Department of Commerce, Bureau of the Census. Data are from Department of Agriculture, Agricultural Research Service.

FIG. XIV. DOMESTIC TRAVEL: 1957

[See table 257]

<sup>1</sup> Comprises Alaska, Hawaii, outlying areas, and foreign countries.

Source: Department of Commerce, Bureau of the Census.

## Section 7

### Public Lands; Parks; and Recreation

Statistics in this section relate to the Federal public domain and other Federally owned real property, national parks and forests, State and municipal parks, foreign and domestic travel, and other forms of recreation.

Public lands statistics are published primarily by the Department of the Interior, Bureau of Land Management, in the *Annual Report of the Director*. Data on Federally owned land and real property are collected by the General Services Administration and presented in its annual *Inventory Report on Real Property Owned by the United States Throughout the World*. The Agricultural Research Service of the Department of Agriculture also compiles and issues statistics on land use and land ownership.

The National Park Service of the Department of the Interior publishes information on national parks in its annual reports, *Areas Administered by the National Park Service* and *Public Use, Tabulations of Visitors to Areas Administered by the National Park Service* (monthly with cumulative annual in December); and on State park systems in its annual report, *State Park Statistics*. Data for municipal parks and playgrounds, as well as for other outdoor recreational activities, have been compiled by a private agency, Resources for the Future, Inc., Washington, D.C., and published in *Statistics on Outdoor Recreation* (1958). The Forest Service collects and issues figures for recreational uses of the national forests. The Fish and Wildlife Service compiles data for hunting and fishing. Figures on expenditures for recreation and on domestic and foreign travel are compiled by the Department of Commerce and appear periodically in the monthly *Survey of Current Business* and in other reports.

**Public-domain and acquired lands.**—Sovereignty over its present continental land area was acquired by the U.S. Government through a series of international agreements and treaties. The United States, however, did not gain title to all of these lands by such agreements. At the time of acquisition of U.S. sovereignty over the areas involved (now 1,905 million acres) title to about 463 million acres rested in individual States and their political subdivisions or in private owners, which title was not relinquished to the Federal Government. Title to the remaining 1,442 million acres of land area passed to the U.S. Government. This area, with the exception of lands in the District of Columbia, is known as the original public domain.

In addition to the original public domain, the Federal Government has from time to time acquired, by purchase, condemnation, and gift, tracts of land needed for public purposes. Such lands are referred to as acquired lands, to distinguish them from public-domain lands.

Public-domain lands or public lands refer to those Federally owned lands to which the general body of public land laws apply. In general, these lands include that portion of the original public domain not disposed of under the public land laws, and certain other lands declared by the Congress specifically to be public lands, and exclude acquired lands, as defined above.

**Indian lands.**—Indian lands refer to public-domain lands ceded to the Government by Indian tribes on condition that proceeds from their sale or other disposition would be earmarked into the Treasury in trust for the Indians.

**Entries, selections, patents, and certifications.**—The data on entries, selections, patents, and certifications refer to transactions which involve the disposal, under the public land laws (including the homestead laws), of Federal public lands to non-Federal owners. In general, original entries and selections are applications to secure title to

public lands which have been accepted as properly filed. Some types of applications, however, are not reported until the final certificate is issued. Applications become final entries (perfected entries) upon issuance of a final certificate which is given to the applicant after he has complied fully with the requirements of the laws relating to his application. A final certificate passes equitable title to the land to the applicant. Patents are instruments which pass legal title to the land to the applicant. Certifications are issued in lieu of patents in connection with certain State selections.

**Alaska and Hawaii.**—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, Colonial Times to 1957*, series J 3-9") provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

**No. 229. ACQUISITION AND EXTENT OF PUBLIC DOMAIN OF THE UNITED STATES:  
1781 TO 1959**

[Areas are as computed in 1912, hence do not agree with figures (in square miles) shown in table 204, which includes later adjustments and reflects subsequent remeasurement. See also *Historical Statistics, Colonial Times to 1957*, series J 3-9]

ITEM	ACQUISITION OF THE ORIGINAL PUBLIC DOMAIN			Estimated area of the public domain (selected years) <sup>1</sup>

1803, Louisiana Purchase <sup>4</sup> .....	529,911,680	523,446,400	6,465,280	
1802, estimate of public domain.....				200,000,000
1781-1802 (State Cessions).....	236,525,600	233,415,680	3,409,920	

<sup>1</sup> Estimated from imperfect data available for indicated years. Beginning 1959, includes Alaska.

<sup>2</sup> Data for Louisiana Purchase exclude area eliminated by Treaty of 1819 with Spain. Such areas are included in figures for Mexican Cession.

<sup>3</sup> Includes 83,920 acres subsequently recognized as part of State of Texas which is not a public domain State.

<sup>4</sup> Represents drainage basin of Red River of the North, south of 49th parallel. Authorities differ as to method and exact date of its acquisition. Some hold it as part of Louisiana Purchase, others maintain it was acquired from Great Britain.

1959	136,721	738	303	280	850	1,181	147	41

<sup>1</sup> Comprises receipts from such sources as following: Sales of public and ceded Indian lands; fees and commissions; mineral rentals, royalties, and bonuses; sales of timber; grazing fees and rentals; and land rentals. For period prior to 1901, receipts were \$340,821,000.

<sup>2</sup> As of June 30, 1959, process of legal adjudication had not yet been completed for all grants and small changes in data for certain years may occur. For period 1802-1900, total land granted to States was 156,044,000 acres. Includes grants for such public purposes as following: Educational, penal, and other public institutions and buildings; bridges, reservoirs, and other internal improvements; reclamation of swamp and arid lands; experiment stations; recreation areas; wildlife and forestry areas; military camps; and payments of bonds issued by local governments. Excludes grants to aid in construction of railroads, wagon roads, canals, and river improvements, or acreage of swamplands lost to States, for which States received indemnity in cash. Excludes data for Alaska and also 10,000 acres because of the rounding process.

<sup>3</sup> Includes homesteads. <sup>4</sup> Includes some classes of final entries and patents prior to 1911.

<sup>5</sup> Excludes commuted homesteads. <sup>6</sup> 1920 only.

No. 237. VACANT PUBLIC LANDS—ACREAGE, BY STATES: 1900 TO 1959

[In thousands. As of June 30. Vacant public lands are those which are unappropriated and unreserved. The former represent lands not covered by an entry, the latter, lands not reserved for some public purpose, i.e., available for entry or selection under appropriate laws. Data cover vacant public lands outside Alaska withdrawn for classification in furtherance of Taylor Grazing Act and for conservation and development of natural resources. See *Historical Statistics, Colonial Times to 1957*, series J 10, for U.S. totals excluding Alaska]

FIG. XV. TRENDS IN THE LABOR FORCE: 1947 TO 1959  
 [See table 263]

Source: Chart prepared by Department of Commerce, Bureau of the Census. Data for 1947-June 1959 are from Bureau of the Census; thereafter, Department of Labor, Bureau of Labor Statistics.

## Section 8

### Labor Force, Employment, and Earnings

This section presents statistics dealing with the characteristics of the economically active segment of the population, the labor force; its distribution by occupation and industry affiliation; and the supply of, demand for, and conditions of labor.

The chief sources of these data are the Bureau of the Census' Decennial Census of Population (see text, p. 1) and Current Population Survey (see text, p. 2); the Bureau of Labor Statistics' *Employment and Earnings* and *Monthly Labor Review*; and the Agricultural Marketing Service's monthly report, *Farm Labor*.

Statistics shown in this section are of two types. One type is obtained by the "population approach" represented by the Census of Population of the Bureau of the Census and the monthly labor force survey of the Bureau of Labor Statistics, for which data are collected by the Bureau of the Census as a part of the Current Population Survey. This approach involves direct enumeration and interrogation of individuals to obtain information on employment activity from workers or members of workers' households. Each employed worker is counted only once, even though he may have held two or more jobs during a given period.

The second type of data is obtained by the "establishment approach" represented by the industry surveys of the Bureau of Labor Statistics and the surveys of the Agricultural Marketing Service. These data are based on reports from employers, i.e., farms, businesses, or industrial establishments. Such data as wages, hours worked, labor turnover, and industry affiliation of employees can be more accurately obtained from employers' records than from inquiries directed to a worker or a member of his household. Workers appearing on more than one payroll for the same time period are counted more than once in establishment statistics.

The Decennial Census of Population provides detailed data for the United States, and for each State, city, and other area, including personal characteristics (sex, age, race, etc.) of the numbers employed and unemployed, the number reported in each occupation and in each industry, and other items. The labor force survey, conducted as a part of the Current Population Survey, provides current data published in *Employment and Earnings* and related publications series of the Bureau of Labor Statistics. Data presented include national totals, by sex and age, of the number of persons in the civilian labor force, the number employed in nonagricultural industries and agriculture, the number unemployed, and the number of nonworkers. Also provided are data on hours of work and major occupation group of those employed and duration of unemployment of those unemployed.

In addition, the Bureau of Labor Statistics in *Employment and Earnings* provides detailed monthly data on employment, unemployment, payrolls, labor turnover, earnings, and hours. These data for broad groupings are shown in the *Monthly Labor Review*, which also presents statistics on wage rates, industrial relations, and output per man-hour. Although, for the most part, data are presented for the United States only, certain of these data are also shown for States and large cities.

**Labor force.**—The labor force data published by the Bureau of Labor Statistics and the Bureau of the Census include persons 14 years old and over who were employed, unemployed, or in the Armed Forces during a specified week. Employed persons are those who did any work for pay or profit during the week, or who worked without pay for 15 hours or more in a family enterprise (farm or business); also included are persons who did not work or look for work but who had a job or business from which

they were temporarily absent during the week. Unemployed persons comprise those who did not work at all during the week but were looking for work, or were on layoff from a job.

In the 1950 Census, the labor force data relate to the first or second week of April for the majority of the population. The "experienced civilian labor force" consists of all employed workers and unemployed workers with previous work experience. Population censuses earlier than 1940 used a concept of "gainful workers." This concept included all persons 10 years old and over who reported a gainful occupation, without regard to their work or work-seeking status, and, in general, excluded new job seekers without previous experience in a gainful occupation.

**Employment and earnings.**—The monthly estimates of nonagricultural employment prepared by the Bureau of Labor Statistics are based on voluntary reports for about 44,000 establishments in manufacturing industries and for about 135,000 establishments in selected nonmanufacturing industries, supplemented by data from other Government agencies and adjusted at intervals to data from tabulations of reports under Government social insurance programs. These estimates exclude proprietors of unincorporated businesses, self-employed persons, domestic servants, unpaid family workers, agricultural workers, and persons in the Armed Forces. The employment data are for all full- and part-time employees who worked or received pay for any part of the period reported.

Estimates are available for total employment for 8 major industry divisions, and for selected nonmanufacturing industries. Both total employment and production-worker estimates are published for 21 major manufacturing groups, 137 manufacturing subgroups, and for mining industries. Also, estimates for nonsupervisory workers are published for individual wholesale and retail trade and public utility industries, and estimates for construction workers are published for the contract construction industries.

Average weekly hours and average weekly and hourly earnings are available for production and related workers for over 300 series in manufacturing; in mining, laundries, and cleaning and dyeing industries; and for nonsupervisory employees and working supervisors in other selected nonmanufacturing industries. The earnings data are gross (before payroll deductions) and include overtime premiums; they exclude irregular bonuses and value of payments in kind. Hours are those for which pay was received.

Agricultural employment estimates and wage rates, obtained by means of monthly mail returns, have been issued since 1909 by the Department of Agriculture and appear monthly in *Farm Labor*.

**Output per man-hour.**—The Bureau of Labor Statistics prepares and publishes annual measures of output per man-hour according to two broad concepts. The first, physical output per man-hour, deals with the relationship between production in physical units and man-hours used in production. The indexes measure the relationships between the volume of goods produced and one factor of input—labor time. They do not measure the specific contribution of labor or capital nor do they measure increased efficiency resulting from more economical use of fuels and materials or more efficient integration of industries.

The other concept of productivity measurement, net output per man-hour, deals with the relationship between value added (at fixed prices) to purchased goods and services and man-hours. These indexes reflect not only average productivity change of industry components, but shifts among industries, and savings in materials consumption. Productivity series using gross national product in constant dollars as an output measure are consistent with the net output per man-hour concept. The gross national product estimates consist of the market value of final goods and services produced excluding the value of intermediate products. Estimates based on this concept have been developed by the Bureau of Labor Statistics covering the total private economy, farm, total nonfarm, manufacturing, and nonmanufacturing sectors of the economy.

**Labor turnover.**—Labor turnover rates are published monthly in the *Monthly Labor Review* and in *Employment and Earnings* for approximately 100 industries on the basis of about 10,000 reports from cooperating establishments. Labor turnover data are available on a monthly basis from January 1930 for manufacturing as a whole. Because of the adoption of the Standard Industrial Classification system beginning with data for January 1950, labor turnover rates for many industries and industry groups are available on a continuous basis only from that date.

**Work stoppages.**—The basic measures of strike statistics compiled by the Bureau of Labor Statistics are the number of stoppages, of workers involved, and of unions involved. Basic statistical data are obtained from the employers and unions involved. Knowledge of strikes comes from a variety of sources, including newspapers, State employment services, and State and Federal mediation services. The Bureau prepares annual reports published in the *Monthly Labor Review* and later in bulletin form, which give the total figures for each month of the year, and also analyses of strikes by industry, State, city, and by causes, labor organizations involved, and other pertinent classifications.

**Alaska and Hawaii.**—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, Colonial Times to 1957*, series D 36-45") provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

---

#### Technical Note—Current Population Survey

**Source of data.**—The Current Population Survey is a monthly sample survey conducted by the Bureau of the Census. Monthly data on the labor force are collected and compiled for the Bureau of Labor Statistics as a part of the Current Population Survey. The current sample design, instituted in May 1956, is spread over 333 areas comprising 641 counties and independent cities, with coverage in each of the 50 States and the District of Columbia. Approximately 35,000 households are interviewed each month. Another 1,500 occupied dwelling units, on the average, are visited but interviews are not obtained because the occupants are not found at home after repeated calls or are unavailable for some other reason. There are also about 5,500 sample units in an average month which are visited but are found to be vacant or otherwise not to be enumerated. Data on the Armed Forces are obtained from the Department of Defense.

**Reliability of the estimates.**—According to rough computations, the relative sampling error during 1956 for summary estimates such as civilian labor force, total employment, and nonagricultural employment is about 0.4 percent; for agricultural employment and for unemployment it is roughly 3 to 4 percent. The chances are about 2 out of 3 that an estimate from the sample would differ from a complete census by less than the percentage estimated above for the particular item. The chances are about 19 out of 20 that the difference would be less than twice the specified percentage and about 99 out of 100 that it would be less than  $2\frac{1}{2}$  times the percentage.

The sampling variability indicated above is illustrative of the variability of data based on the Current Population Survey. For further details on the sampling variability, see the original releases of the Bureau of the Census and explanatory notes in the Bureau of Labor Statistics *Employment and Earnings*.

**Comparability with Decennial Population Census data.**—Statistics obtained from the Current Population Survey may differ from Decennial Census data because of sampling variability, as described above. In addition, comparability between the two sets of data may be affected by other factors, such as differences in the training and experience of enumerators and in the enumeration procedures. For further information, see *U.S. Census of Population: 1950*, Vol. II, Part 1.

**No. 261. GAINFUL WORKERS, 1820 TO 1930, AND EXPERIENCED CIVILIAN LABOR FORCE, 1940 AND 1950, BY SEX AND IN AGRICULTURAL AND NONAGRICULTURAL OCCUPATIONS**

[In thousands, except percent. Excludes Alaska and Hawaii. For explanation of differences in concept between gainful workers and labor force, see text, p. 201. See also *Historical Statistics, Colonial Times to 1937*, series D 36-45]

<sup>1</sup> Data not adjusted for relatively minor differences in agricultural and nonagricultural occupations between (a) 1820-1930 series, (b) figures for 1930 and 1940, and (c) figures for 1950.

<sup>2</sup> Figures estimated on basis of returns covering greater part of population.

<sup>3</sup> Figures based on interpolation between 1820 and 1840.

<sup>4</sup> Includes additions due to estimated underenumeration in 13 Southern States.

<sup>5</sup> Corrected figure; for explanation, see analysis of occupation returns for 1890 in Twelfth Census (1900) Special Reports, *Occupation*, pp. lxxi-lxxiii. Excludes persons in Indian Territory and on Indian reservations, areas specially enumerated at that census, but for which areas no occupation statistics are available.

<sup>6</sup> Figures revised to deduct estimated underreporting of agricultural workers.

<sup>7</sup> Figures revised to add estimated underreporting of gainful workers, partly due to change in census date to January 1.

<sup>8</sup> Includes persons in experienced civilian labor force who did not report occupation.

EMPLOYMENT STATUS

205

No. 263. EMPLOYMENT STATUS OF THE NONINSTITUTIONAL POPULATION, BY SEX: 1929 TO 1960

[In thousands of persons 14 years old and over. Beginning 1960, includes Alaska and Hawaii. Annual figures are averages of monthly figures. Data for 1947-1956 adjusted to reflect changes in definition of employment and unemployment adopted in January 1957. Beginning 1953, labor force and employment figures not strictly comparable with previous years as a result of the introduction of material from the 1950 Census into estimating procedure. See also *Historical Statistics, Colonial Times to 1857*, series D 1-14 and D 20, for similar but not exactly comparable data]

<sup>1</sup> Excludes inmates of penal and mental institutions and homes for the aged, infirm, and needy.

<sup>2</sup> Data for 1940-1952 revised to include about 150,000 members of the Armed Forces who were outside the U.S. (contiguous area) in 1940 and were, therefore, not enumerated in the 1940 Census and were excluded from the 1940-1952 estimates.

**No. 264. PROJECTIONS OF TOTAL LABOR FORCE AND OF LABOR FORCE PARTICIPATION RATES, BY AGE AND SEX: 1955 TO 1975**

[Persons 14 years old and over. Excludes Alaska and Hawaii. Annual averages. Rate represents the proportion of each age group in the labor force (employed, unemployed, or in the Armed Forces). Projections based on average annual rates of change in labor force participation rates between 1920 and the average of April 1954, 1955, and 1956]

No. 272. EMPLOYEES IN NONAGRICULTURAL ESTABLISHMENTS (ANNUAL AVERAGE),  
TOTAL, 1958 AND 1959, AND BY INDUSTRY DIVISION, 1959, BY STATES

[In thousands. For coverage, see headnote, table 269. State data are based on the new Standard Industrial Classification (1957), and are adjusted to 1st quarter 1957 benchmark levels indicated by data from Government social insurance programs. National totals differ from the sum of the State figures because a few States prepare combinations of industry divisions, some States have more recent benchmark levels than others, and methods of computation may vary slightly among the States; also national totals have not as yet been converted to the 1957 Standard Industrial Classification]

<sup>1</sup> Production worker hours paid.

<sup>2</sup> For 1929, covers almost all industries; for 1935 to 1950, represents 6 principal industries (bituminous coal; anthracite; crude petroleum, natural gas, and natural gasoline; iron; copper; and lead and zinc), representing 80 percent of total employment.

<sup>3</sup> Refers to Class I line-haul railroads; in terms of hours worked plus constructive allowances, for all hourly-basis employees.

<sup>4</sup> Output per employee. Covers principal wire-telephone and ocean-cable carriers.

<sup>5</sup> Production worker hours paid prior to 1947, and worked since 1947.

<sup>6</sup> Adjusted to levels indicated by 1947 and 1954 Censuses of Manufactures.

<sup>7</sup> Production worker hours worked.

**No. 285. HOURLY AND WEEKLY EARNINGS AND WEEKLY HOURS OF PRODUCTION WORKERS IN MANUFACTURING INDUSTRIES: 1940 TO 1960**

[Excludes Alaska and Hawaii. Net spendable average weekly earnings represent average gross earnings less social security and income taxes for which specified worker is liable. These net spendable earnings are then divided by the BLS consumers price index adjusted to an average 1947-49 base, to obtain net spendable earnings in 1947-49 dollars. Overtime is defined as work in excess of either the straight-time workday or workweek and paid for at time and one-half. Computation of average hourly earnings exclusive of overtime makes no allowance for special rates of pay for work done on holidays. See also *Historical Statistics, Colonial Times to 1957*, series D 626-628]

## No. 287. HOURS AND GROSS EARNINGS OF PRODUCTION WORKERS OR NONSUPERVISORY EMPLOYEES, BY INDUSTRY: 1950, 1958, AND 1959

[Excludes Alaska and Hawaii. Data are based upon reports from cooperating establishments covering both full- and part-time employees who worked during, or received pay for, any part of the pay period ending nearest the 15th of the month. For mining, manufacturing, laundries, and cleaning and dyeing plants, data refer to production and related workers only. For contract construction industries, data relate to employees engaged in actual construction work. For other industries, data relate to nonsupervisory employees and working supervisors. See also *Historical Statistics, Colonial Times to 1857*, series D 626-641 and D 669-684, for selected industries]

1 Data are arithmetic means of monthly estimates of persons employed during last complete calendar week in each month ending at least one day before last of month.

2 Includes farm operators doing one or more hours of farm work and members of their families doing 15 hours or more of unpaid farm work during survey week.

3 Includes all persons doing one or more hours of farm work for pay during survey week. Members of operators' families doing any farm work for cash wages are counted as hired workers.

4 Weighted averages of wage rates as reported quarterly by crop reporters. U.S. estimates affected by importance of rates in particular regions; see table 293.

5 New series of wage rates began in 1948; not exactly comparable with prior years.

Source: Department of Agriculture, Agricultural Marketing Service; monthly report, Farm Labor.

## No. 293. FARM WAGE RATES, BY GEOGRAPHIC DIVISIONS: 1950 TO 1959

**No. 294. INDEXES OF UNION WAGE RATES AND WEEKLY HOURS IN SELECTED TRADES: 1945 TO 1959**

[1947-49 average=100, except for printing where 1948-49 average=100. Excludes Alaska and Hawaii. Data for 1963 to 1969 were collected as of July 1 and cover 53 cities in printing and 52 in the other trades. For 1950 and 1952, however, data were collected as of October 1 for streetcar and bus operators. Relative rates are percentages which indicate changes in minimum hourly wage scales. Relative hours are percentages showing changes in straight-time weekly hours, account not being taken of loss of time from slack work or other causes, nor of overtime work. Year-to-year changes in union scales are based on comparable quotations for each trade weighted by membership for current year. See also *Historical Statistics, Colonial Times to 1957*, series D 642-653]

1959	3,708	24.6	1,880	4.3	69,000	0.61	36.7

<sup>1</sup> Workers counted more than once if involved in more than one stoppage during year.

<sup>2</sup> Total employed workers for 1933-1950 refers to all workers except those in occupations and professions in which there is little if any union organization or in which stoppages rarely if ever occur. In 1951, concept was changed to coincide with the Bureau's figures for nonagricultural employment, excluding Government but including workers in all occupational groups. Tests show that percentage of total idleness computed on basis of these new figures usually differs by less than one-tenth of a point while percentage of workers idle differs by about 0.5 or 0.6 of a point.

<sup>3</sup> Estimated working time computed by multiplying average number of employed workers (see footnote 2) by number of days worked by most employees.

No. 301. WORK STOPPAGES—MAJOR ISSUES INVOLVED AND DURATION: 1957 TO 1959

[Beginning 1950, includes Alaska. See headnote, table 300. Data by issues based on stoppages beginning in year; duration data based on stoppages ending in year. See also *Historical Statistics, Colonial Times to 1937*, series D 770-778]

## Section 9

# Military Services and Veterans Affairs

This section presents statistics relating to national defense, several measures of its human and financial costs, and indicators of military personnel, ships, aircraft, and Selective Service operations. Also included are statistics on the various programs and benefits sponsored by the Federal Government for veterans. The principal sources of these data are the Department of Defense, Office of the Secretary of Defense; annual reports of the separate Departments of the Army, Navy, and Air Force; the Selective Service System; the *Annual Report of the Administrator of Veterans Affairs*, Veterans Administration; and the *Budget of the United States Government* issued by the Bureau of the Budget.

**Department of Defense.**—Until 1947 the Army, Navy, and Air Force operated under independent jurisdiction answering only to the Commander-in-Chief, the President of the United States. In 1947, as a result of the passage of the National Security Act, a new executive department was established, the National Military Establishment. This department was organized to provide for the coordination and unified direction of the Army, Navy, and Air Force under a civilian Secretary of Defense. The Army, Navy, and Air Force, however, were not merged. Each remained separately administered and retained its individual Department status. Amendments to the National Security Act in 1949 added new powers to the Secretary of Defense and redesignated the National Military Establishment as the Department of Defense.

**Selective Service.**—The Selective Service System is responsible for the registration, classification, selection, forwarding for examination by the Armed Forces, and delivery for induction into the Armed Forces of all men required to register under the Universal Military and Training Act, as amended. The act requires the registration of all men who are in the United States between the ages of 18 and 26, and makes those between 18½ and 26 years old (except aliens with less than one year of residence) liable for service in the Armed Forces. Deferred persons remain liable for service until they attain 35 years of age. The act also provides exemptions or deferments from service for many persons for reasons of previous service, essential occupation, etc. Selective Service is also authorized to determine the availability of members of the Standby Reserve of the Armed Forces for order to active duty in time of war or national emergency.

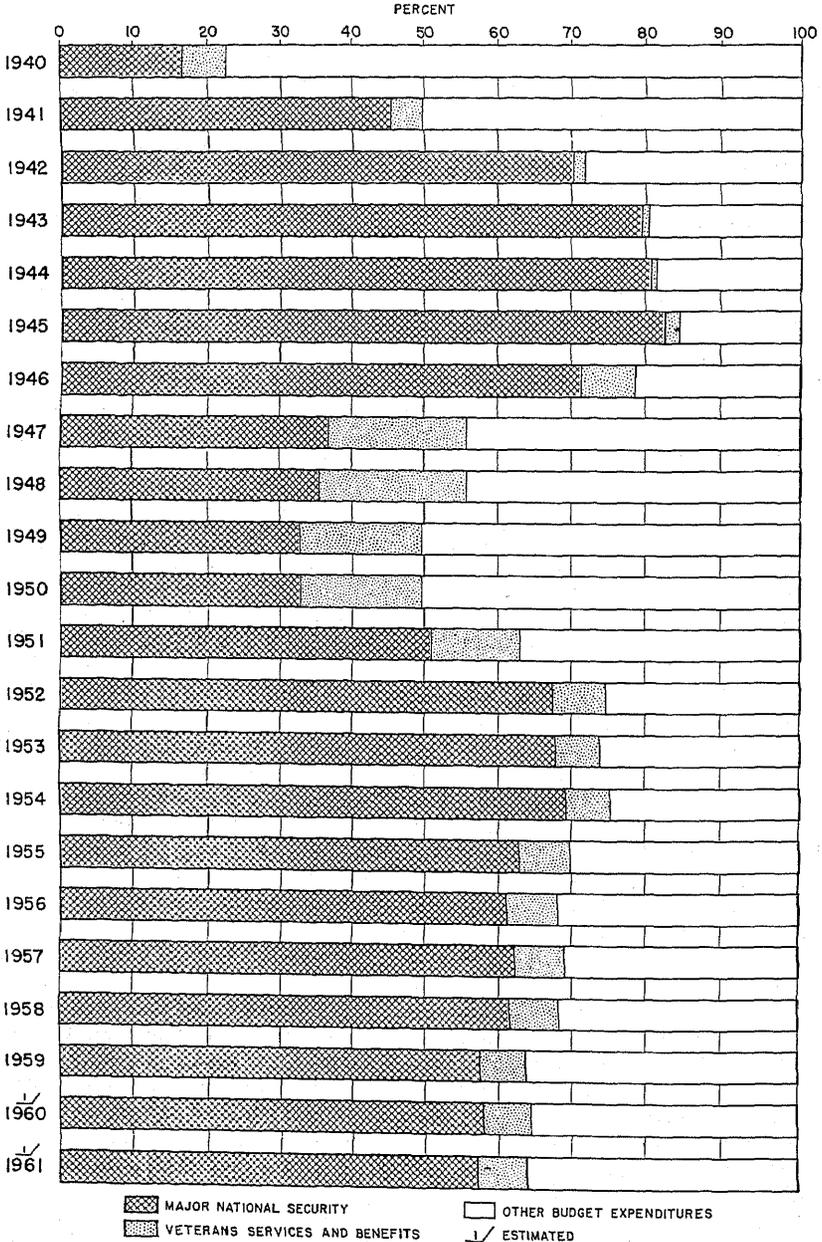

**Veterans Administration.**—The Veterans Administration administers laws authorizing benefits for eligible former and present members of the Armed Forces and for the dependents and other beneficiaries of deceased former members of such forces. Veterans benefits available under various acts of Congress include: Compensation for service-connected disability or death; pension for nonservice-connected disability or death; vocational rehabilitation for service-connected disability; education and training; guaranty or insurance of home, farm, and business loans; unemployment compensation; U. S. Government and National Service Life Insurance; servicemen's indemnity in lieu of insurance; hospitalization; domiciliary care; outpatient medical and dental care for service-connected disability; prosthetic and other appliances; special housing for certain seriously disabled veterans; automobiles or other conveyances for certain disabled veterans; burial allowances; and educational assistance to war orphans.

**Alaska and Hawaii.**—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, Colonial Times to 1957*, series Y 337-358") provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

FIG. XVI. FEDERAL GOVERNMENT EXPENDITURES FOR MAJOR NATIONAL SECURITY FUNCTIONS AND VETERANS SERVICES AND BENEFITS, IN RELATION TO TOTAL FEDERAL BUDGET EXPENDITURES: 1940 TO 1961

[See table 304]

Source: Chart prepared by Department of Commerce, Bureau of the Census. Data are from Bureau of the Budget.

**No. 304. FEDERAL GOVERNMENT EXPENDITURES FOR MAJOR NATIONAL SECURITY FUNCTIONS AND VETERANS SERVICES AND BENEFITS, IN RELATION TO TOTAL FEDERAL BUDGET EXPENDITURES: 1930 TO 1961**

[In millions of dollars. For years ending June 30. Includes expenditures of agencies other than the Department of Defense and Veterans Administration, for activities primarily related to major national security and veterans programs. Excludes expenditures for programs which, though closely related to major national security or veterans services, have a primary relationship to other categories of the functional classification (see table 475). Functional classification revisions for major national security have been carried back through 1939. For further detail as to classification of particular items in 1959, 1960, and 1961, see Special Analysis C of the *Budget of the United States, 1961*, pp. 907-913. See also *Historical Statistics, Colonial Times to 1967*, series Y 357-358 and Y 360]

<sup>1</sup> Beginning 1954, includes Alaska, Hawaii, Puerto Rico, and outlying areas.

<sup>2</sup> Covers firms not dominant in their fields of operation and employing fewer than 500 persons, and those with 500 or more employees which have been certified by the Small Business Administration as small business firms.

<sup>3</sup> For 1953, covers awards by offices located outside U.S. (contiguous area) for work to be performed outside U.S.; beginning 1954, covers all awards for work to be performed in foreign countries.

<sup>4</sup> Covers purchases made from government agencies other than Department of Defense, and interservice purchases placed by one military service, bureau, or command against contracts executed by other military technical services, bureaus, or commands.

<sup>5</sup> Prior to 1957, included with business firms.

### No. 310. CIVIL DEFENSE—FEDERAL FUNDS OBLIGATED IN THE FEDERAL CONTRIBUTIONS PROGRAM, BY PROGRAM, AND STATE AND CITY EXPENDITURES: 1952 TO 1959

[In thousands of dollars. Federal funds represent those obligated against a specified appropriation, not necessarily in a given fiscal year. In later years, the funds are obligated against a given appropriation over a 2-year period. Federal funds are obligated to help the State and local governments acquire civil defense materials, equipment, and training. Federal contributions are made on the basis of project applications submitted by the States and approved by the Office of Civil and Defense Mobilization. States and outlying areas are required to match Federal funds on an equal basis, except that for 1952 to 1957, the matching ratio for Alaska was 70 percent Federal and 30 percent local.]

ITEM	Cumulative, total	1952 to 1955	1955-56	1956-57	1957-58	1958-59

<b>STATE AND CITY EXPENDITURES <sup>6</sup></b>						
State expenditures <sup>7</sup>	119,258	<sup>8</sup> 65,866	17,218	19,407	16,767	
City expenditures <sup>7</sup>	46,711	<sup>8</sup> 27,801	6,812	6,606	5,492	

<sup>1</sup> Includes outlying areas. <sup>2</sup> Prior to 1957 included with communications.

<sup>3</sup> In effect for 1952 and 1953 only.

<sup>4</sup> 1953 only; included with training and education for 1952 and 1954.

<sup>5</sup> Police items mostly for 1953 and evacuation studies for 1955-56 and 1958-57.

<sup>6</sup> Expenditures in specified fiscal year and not against any appropriation over a 2-year period, as for Federal funds. Represents total expenditures of State and specified city governments for all phases of civil defense; only a part of this money was used to match Federal funds.

<sup>7</sup> Represents the expenditures of State and specified city governments from their Civil Defense appropriations for all programs. State data include funds received from Federal government. City data comprise 41 cities of 250,000 inhabitants or more in 1950. The city figures represent direct expenditures only, and do not include payments to other governments for civil defense. State data include expenditures for Alaska for 1958 only, but none for Hawaii. <sup>8</sup> 1951 to 1955.

<sup>1</sup> Union forces only. Estimates of the number serving in the Confederate forces range from 600,000 to 1,500,000.  
<sup>2</sup> Covers period Dec. 1, 1941, to Dec. 31, 1946.  
<sup>3</sup> Covers period June 25, 1950, to July 27, 1953.  
<sup>4</sup> Covers period Apr. 21 to Aug. 13, 1898.  
<sup>5</sup> Includes Air service.  
<sup>6</sup> Includes Army Air Corps.  
<sup>7</sup> Not available.  
<sup>8</sup> Based on Army and Marines only.  
<sup>9</sup> Excludes Navy. See footnote 10.  
<sup>10</sup> Covers period July 1950 through January 1955. Represents Far East area only.  
<sup>11</sup> During hostilities only.  
<sup>12</sup> Covers war personnel who departed from continental U.S. through December 1898.  
<sup>13</sup> For periods covered, see footnotes 2, 3, 4, and 10.  
<sup>14</sup> Includes gassed in action; Army data includes casualties in northern Russia to Aug. 25, 1919, and in Siberia to Apr. 1, 1920. Marine data represent casualties in Europe only.  
<sup>15</sup> Excludes personnel lost in sinking of the *Maine*, which occurred 2 months before hostilities.  
<sup>16</sup> Includes casualties incurred in October 1941, due to hostile action.  
<sup>17</sup> Covers only Army personnel base of 1,908,800.  
<sup>18</sup> Covers only Army personnel base of 246,410.  
<sup>19</sup> Covers only Army personnel base of 3,665,000.  
<sup>20</sup> Covers all services base of 9,370,986.  
<sup>21</sup> Covers all services base of 4,428,939.

### No. 323. SELECTIVE SERVICE REGISTRANTS EXAMINED, FOUND ACCEPTABLE, AND DISQUALIFIED: 1950 TO 1959

[In thousands. Includes Alaska, Hawaii, and outlying areas. Based on results of preinduction examinations]

ITEM	1950 to 1959, total <sup>1</sup>		1956		1957		1958		1959	
	Num-ber	Per-cent	Num-ber	Per-cent	Num-ber	Per-cent	Num-ber	Per-cent	Num-ber	Per-cent
<b>Examined</b> .....	5,701	100.0	246	100.0	367	100.0	485	100.0	149	100.0
Found acceptable.....	3,714	65.1	161	65.3	231	62.9	282	58.1	76	51.2
Disqualified.....	1,987	34.9	85	34.7	136	37.1	203	41.9	73	48.8
Medically disqualified only.....	922	16.3	37	15.2	59	16.1	92	19.0	32	21.6
Failed mental test only <sup>2</sup> .....	820	14.3	33	15.5	60	16.4	87	18.0	32	21.6
Failed mental test and medically disqualified.....	178	3.1	6	2.4	11	3.0	16	3.3	5	3.1
Administrative disqualification.....	67	1.2	4	1.6	6	1.6	8	1.6	4	2.5

<sup>1</sup> 1950 figures for July through December only. 1950-1959 adjusted for examinees disqualified prior to January 1952 for failing mental test only, but later reexamined and found acceptable under modified mental test procedures.

<sup>2</sup> As of August 1958, includes medically and administratively qualified registrants who failed mental test as well as medically and administratively qualified registrants in Mental Group IV who failed the Army Classification Battery (ACB). The latter registrants are referred to as "Trainability Limited (V-O)" group; 9,000 registrants were so classified in 1959.

### No. 324. PERCENT DISTRIBUTION OF SELECTIVE SERVICE REGISTRANTS FOUND ACCEPTABLE, BY MENTAL GROUP: 1953 TO 1959

[Includes Alaska, Hawaii, and outlying areas]

MENTAL GROUP AND PERCENTILE SCORE	1953	1954	1955	1956	1957	1958	1959
Group I (63-100).....	9.2	11.4	11.3	12.3	13.3	14.6	16.5
Group II (65-92).....	26.4	27.3	26.9	27.0	25.9	27.2	28.4
Group III (31-64).....	32.8	31.2	31.6	32.6	32.8	33.8	34.7
Group IV (10-30) <sup>1</sup> .....	27.3	27.8	28.6	27.5	27.7	24.2	20.1
Administrative acceptees <sup>2</sup> .....	4.3	2.3	1.6	0.6	0.3	0.2	0.3

<sup>1</sup> Beginning August 1958, includes only those registrants within Mental Group IV who subsequently passed the Army Classification Battery (ACB). (See footnote 2, table 323.)

<sup>2</sup> Refers to registrants who failed the mental test or the ACB but who were administratively declared acceptable either on the basis of their education or the findings of a personal interview.

<sup>1</sup> Under amendments of June 19, 1951, to Universal Military Training and Service Act, age of military liability was extended to 35 years for certain specified kinds of registrants.

<sup>2</sup> Legally exempted registrants; no longer liable for service because of age. See also footnote 1.

<sup>3</sup> Cumulative since inception of Universal Military Training and Service Act, as amended, September 1948.

<sup>4</sup> Includes enlistments and deferments between time of preinduction examination and notice of induction.

<sup>5</sup> Cumulative net credits resulting from inductions plus home address reports minus separation reports, as reported by the Armed Forces September 1948 through June 1959. Each State is credited with its inductions as well as its enlistments and reserves called to active duty. Because of time lag in reporting to local boards, credits given are not necessarily in complete accord with present strength of Armed Forces contributed by each State.

<sup>6</sup> Comprises trained reservists who are not in either the ready or the retired reserve, but who are liable for recall to active duty in time of war or national emergency.

Other wars and Regular Establishment <sup>5</sup> .....	152	143	135	128	128	132	138

<sup>1</sup> Excludes persons who served in the Armed Forces only in peacetime (Regular Establishment) unless they were receiving Veterans Administration compensation for service-connected disability. A small but unknown number of persons with service in two or more periods prior to the Korean conflict are included more than once. Veterans with service both in World War II and the Korean conflict are counted only once.

<sup>2</sup> Estimated cumulative returns to civil life since June 27, 1950, of all persons who served in the Armed Forces of the United States between that date and January 31, 1955 (including persons who had also served in World War II), less estimated deaths out of service and less estimated returns to active duty from civil life.

<sup>3</sup> Estimated cumulative returns to civil life since September 16, 1940, of all persons who served in the Armed Forces of the United States between that date and July 25, 1947 (including persons who also served in the Korean conflict), less estimated deaths out of service and less estimated returns to active duty from civil life.

<sup>4</sup> Estimated by application of appropriate survival rates to the 1918 age distribution of World War I participants. Includes veterans of Civil War, Indian Wars, Spanish-American War. Only former members of Regular Establishment (peacetime service only) who are receiving Veterans Administration compensation for service-connected disability are included. Spanish-American War totals estimated by application of appropriate survival rates to the 1902 age distribution of living Spanish-American War participants.

<sup>1</sup> Excludes transfers from appropriations to insurance trust funds from which the actual payments are made. Expenditures from VA Revolving Supply Fund also excluded to avoid duplication.

<sup>2</sup> Includes direct payments to beneficiaries from insurance appropriations, servicemen's indemnities, and benefits and dividends paid from insurance trust funds. Some noncash transactions, e.g., interest credited to dividends left on deposit also included.

<sup>3</sup> Includes subsistence allowances, tuition, supplies, and equipment of veterans training under Public Law 346, education and training allowances of veterans training under Public Law 550, and war orphans educational assistance under Public Law 634.

<sup>4</sup> Includes subsistence allowances, tuition, supplies, and equipment of veterans training under Public Laws 16 and 894, and vocational rehabilitation allowances for World War I veterans.

<sup>5</sup> Total differs from supporting detail by the net of overpayments collected and written-off as uncollectable under the readjustment benefits appropriation amounting to \$1,140,000 in 1956, \$647,000 in 1957, \$260,000 in 1958, and \$54,000 in 1959.

<sup>6</sup> Includes cumulative adjustment for prior years of \$295,650,997    <sup>7</sup> Less than \$500,000.    <sup>8</sup> Credit.

<sup>9</sup> Credit of less than \$500,000.

<sup>10</sup> Includes statutory burial allowances; automobiles and other conveyances for disabled veterans; homes for paraplegics; payments to participants in yellow fever experiments; military and naval family allowances of World War I veterans; marine and seamen's insurance in World War I; adjusted compensation (World War I bonus); withdrawals of the personal funds of patients held by VA as banker and funds due incompetent beneficiaries; soldier's and sailor's civil relief; vocational rehabilitation revolving fund, and other miscellaneous expenditures.

<sup>11</sup> Estimated; includes expenditures for hospital and domiciliary care, outpatient medical and dental treatment, medical research, and grants to Republic of Philippines for medical care and treatment of veterans.

<sup>12</sup> Comprises construction and related costs which include expenditures from funds allotted under NRA of 1933, P.W.A. Act of 1933, grants to Republic of Philippines for construction and equipping of a hospital, and amounts transferred to Dept. of Army, Corps of Engineers, for construction of hospitals.

<sup>13</sup> Includes expenses for vocational counseling, travel for certain programs, reporting allowances paid schools for certifying attendance of veteran trainees, private laws for relief, and all administrative salaries and expenses.

Paid-up insurance.....	3,291	7,601	2,624	3,934	6	9	3	8		

<sup>1</sup> Fund is administered as a trust fund for benefit of policyholders and their beneficiaries. All premiums collected on insurance issued and all interest earned thereon are paid into the fund; disbursements are made from the fund for death claims, dividends, and other benefits. Government, however, bears cost of administration of this fund in addition to expenses for certain types of losses.

<sup>2</sup> Nonparticipating insurance for disabled veterans for whom good health provisions are waived because of disabilities resulting from active service between October 8, 1940, and September 2, 1945.

<sup>3</sup> For veterans discharged on or after April 25, 1951, with service-connected disability which would be compensable, if 10 percent or more in degree, but who are otherwise insurable.

<sup>4</sup> Veterans who are entitled to indemnity protection under the Servicemen's Indemnity Act of 1951 and who were separated from active service without a service-connected disability after Apr. 25, 1951, and before Jan. 1, 1957, were granted nonparticipating NSLI on the 5-year renewable nonconvertible term plan without medical examination. Effective Jan. 1, 1959, this insurance was made convertible to any one of the 6 permanent plans (ordinary life, 20-payment life, 30-payment life, 20-year endowment, endowment at age 60, and endowment at age 65) or exchangeable to 5-year limited convertible term. This latter plan is not renewable after age 50.

FIG. XVII. SOCIAL WELFARE EXPENDITURES UNDER SELECTED PUBLIC PROGRAMS: 1935 TO 1958

[See table 340]

Source: Chart prepared by Department of Commerce, Bureau of the Census. Data from: Department of Health, Education, and Welfare, Social Security Administration.

## Section 10

### Social Insurance and Welfare Services

This section presents data related to governmental programs for old-age, survivors, and disability insurance, public and railroad employee retirement, unemployment and temporary disability insurance, aid to the needy, and maternal, child, and other welfare services. Also included here are selected data concerning private pension plans and financial data relating to corporate pension funds, the American Red Cross, the Community Chest, and philanthropic trusts and foundations.

There are several principal sources for these data. The *Social Security Bulletin*, an official monthly publication of the Department of Health, Education, and Welfare, presents current data on many of these programs and summarizes annual data for them in a statistical supplement published each year. A large volume of statistics flows from employers' wage reports submitted under the Social Security Act and used in the accounting operations of the Bureau of Old-Age and Survivors Insurance. Information on workers and beneficiaries and on establishments, employment, and payrolls covered by this Act is published in detail in the Social Security Administration's *Handbook of Old-Age and Survivors Insurance Statistics*. Establishment data showing employment and payrolls, by industry, for counties, are also available in the cooperative report of the Bureau of the Census and the Social Security Administration, *County Business Patterns*. Current data on employment security activities are published monthly in the Department of Labor's *Labor Market and Employment Security* and its supplements. Data on retirement and other benefits for railroad workers are published by the Railroad Retirement Board in its *Monthly Review and Annual Report*.

**Social insurance under the Social Security Act.**—Social insurance programs established by the Social Security Act provide protection against wage loss resulting from old age, prolonged disability, death, or unemployment. Under old-age, survivors, and disability insurance, protection against wage loss due to old age, disability, or death is available to nearly all the gainfully employed (excluding chiefly self-employed doctors of medicine and most civilian employees of the Federal Government).

Old-age, survivors, and disability insurance provides monthly retirement benefits to fully insured workers at 65 or over (or, for women workers, at age 62 if they elect to receive a reduced benefit) and supplementary benefits to their wives, if they are aged or have a child of the earner in their care, to aged dependent husbands, and to dependent children under age 18, or older, if the child has a disability that began before 18. Monthly survivor benefits are payable to certain dependents of fully or currently insured workers. Monthly disability benefits are payable to fully and currently insured workers between the ages of 50 and 65 with a disability that meets the definition in the Act, and to the dependents of these workers, on the same basis as dependents of retired workers. A lump-sum death payment is made in the case of all insured deaths.

Covered workers and their employers each pay contributions of 3 percent on the worker's wages, not counting amounts above the first \$4,800 in a year. The rate is scheduled to rise by steps until it reaches 4½ percent each in 1969. Self-employed persons pay 1.5 times the employee rate. An amount equal to the contributions collected is appropriated for deposit in the old-age and survivors insurance trust fund, from which benefits and administrative costs are paid. One-fourth of 1 percent of the contributions collected from employees and from employers and ¾ of 1 percent of the

contributions from the self-employed are allocated to a separate disability trust fund, from which the costs of the disability benefits are paid.

Both unemployment insurance and the public employment (placement) service are administered through the Bureau of Employment Security of the Department of Labor and a State employment security agency in each State. Under agreements with the Secretary of Labor, the State agencies also administer unemployment compensation for eligible Korea veterans, ex-servicemen, and Federal employees.

State unemployment insurance laws pay benefits to unemployed covered workers who meet the qualifying conditions specified in the State law. In most States, a waiting period of 1 week must be served before payments begin. Benefits are payable for a maximum number of weeks, ranging from 18 to 39 weeks among the States; maximum weekly benefits without dependents' allowances range from \$26 to \$55 under the several State laws. In 12 States maximum allowances for dependents ranging from \$3 to \$25 raise the range of maximum augmented benefits to \$30 to \$70.

Under the Federal Unemployment Tax Act, a 3-percent tax is levied on the payroll of employers of 4 or more workers in industries covered by the Act, although smaller employers are also covered by some State laws. Principal industries excluded from coverage, as of January 1960, are agriculture, State and local government, domestic service, nonprofit organizations, and railroads (see below). Employers subject to the Federal law are allowed a credit offset of 90 percent of the Federal tax, or 2.7 percent of taxable payrolls, for contributions paid to State agencies under State unemployment insurance laws. The Federal Government, therefore, collects only 0.3 percent, which is earmarked for employment security purposes. The Congress appropriates funds each year to cover administrative costs of the employment security system.

The standard rate of contributions payable by employers in all areas is 2.7 percent of the first \$3,000 a year paid to an employee (except in California, Delaware, Nevada, Oregon, and Rhode Island, where the 2.7 percent applies to the first \$3,600 and in Alaska to the first \$4,200). All States except Alaska may adjust employer contribution rates according to individual employer experience with the risk of unemployment. Contributions collected by States are deposited to State accounts in the Federal Unemployment Trust Fund, from which States withdraw amounts needed for benefit payments.

**Social insurance for railroad workers.**—The social insurance programs administered by the Railroad Retirement Board under the Railroad Retirement Act and Railroad Unemployment Insurance Act cover employees of railroads or companies and organizations affiliated with railroad transportation, including the Railway Express Agency and the Pullman Company.

The Railroad Retirement Act provides retirement annuities for aged and disabled workers and for wives of retired employees, and benefits to survivors of deceased workers. The credits of employees who die or retire with less than 10 years of railroad service are transferred to the Social Security Administration for the payment of old-age, survivors, and disability insurance under the Social Security Act. Funds for the railroad retirement and survivor benefit system come from a tax on earnings up to \$400 a month under the Railroad Retirement Tax Act. The tax, divided equally between the employer and employee, is now 13½ percent; for 1962–64, it will be 14½ percent; it will rise thereafter by the number of percentage points that the old-age, survivors, and disability insurance tax rates (for employers and employees combined) exceed 5½ percent.

The Railroad Unemployment Insurance Act provides benefits for unemployment and sickness, including maternity. The unemployment insurance program is financed entirely by contributions from covered employers, paid directly to the Board. The contribution rate for any year depends upon the balance in the unemployment insurance account and may vary from 1½ to 3½ percent of payrolls (exclusive of individual earnings in excess of \$400 a month). Contributions during 1960 are at the maximum rate.

**Social insurance for Federal Government employees.**—One contributory retirement system for Federal civilian employees and two noncontributory systems for special classes of employees are administered by the Civil Service Commission. In addition, there are separate retirement systems in operation for the uniformed services (supplementing old-age, survivors, and disability insurance under which they are covered on a contributory basis) and for special classes of Federal employees.

The Civil Service Retirement Act provides for age, optional, disability, and discontinued service annuities for employees in the executive, judicial, and legislative branches of the United States Government and in the municipal government of the District of Columbia if not subject to another retirement system or excluded by statute or by administrative order. It also provides annuities for the widows and minor children of deceased employees, and under certain conditions to the survivors of deceased annuitants. The employee contribution rate, computed on base pay, was increased from 6 percent to 6½ percent in October 1956, at which time liberalized benefit provisions became effective. Beginning in July 1957, employing agencies pay into the Retirement Fund amounts equal to the contributions of their employees.

**Workmen's compensation.**—All States now have programs providing protection against work-connected injuries and deaths. In addition to the State laws, there are Federal workmen's compensation laws covering employees of the Federal Government, private employees in the District of Columbia, and longshoremen and harbor workers. Most of the State workmen's compensation laws exempt such employments as agriculture, domestic service, and casual labor; the majority exempt employers who have fewer than a specified number of employees. Occupational diseases, or at least specified diseases, are compensable under most laws.

In most States total payments to injured workers or to survivor families are limited as to time, amount, or both. All compensation acts require that medical aid be furnished to injured employees; in about one-fourth of the laws there are either duration or cost limitations—or both—on the amount of medical benefits provided.

**Public assistance.**—Public assistance is provided through five major programs, all administered by the States and localities. Payments to four groups of needy persons—the aged, the blind, the permanently and totally disabled, and children whose need arises from certain causes—are financed in part from Federal funds granted to States under the Social Security Act. The Federal aspects of these programs are the responsibility of the Bureau of Public Assistance of the Social Security Administration. Aid to other needy persons is furnished for the most part through general assistance, toward which the Federal Government makes no contribution.

To receive a Federal grant for assistance payments and administrative expenses under any of the four programs established by the Social Security Act a State must have a plan approved as meeting the requirements of the Federal act. Each State establishes the conditions under which needy people may receive assistance and determines how much they shall receive.

**Health and welfare services.**—Programs providing health and welfare services are aided through Federal grants to States for maternal and child-health services, services for crippled children, child-welfare services, vocational rehabilitation, and public health services (including water-pollution control, hospital survey and construction, and control of specific diseases). The Children's Bureau, a part of the Social Security Administration, administers the first three of these programs; the others are administered by the Office of Vocational Rehabilitation and the Public Health Service; all are units of the Department of Health, Education, and Welfare.

**Alaska and Hawaii.**—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, Colonial Times to 1957*, series H 1-45") provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

## No. 340. SOCIAL WELFARE EXPENDITURES UNDER PUBLIC PROGRAMS: 1935 TO 1958

In millions of dollars. For years ending June 30 for Federal Government, most States, and some localities; for other States and localities, years cover various 12-month periods ending within year. All programs except workmen's compensation include some payments and expenditures for Alaska, Hawaii, and outlying areas. Represents expenditures under public law and from trust accounts. Includes administrative expenditures and capital outlay for hospitals, public elementary and secondary schools, and publicly controlled higher education. See also *Historical Statistics, Colonial Times to 1957*, series H 1-45, for data covering civilian programs only. Corrected to January 1960]

<sup>1</sup> Although social insurance expenditures include non-Federal workmen's compensation benefits payable under law by employers and private insurance carriers, such expenditures and that part of temporary disability insurance payments made through private carriers have been omitted in computing percentages relating to all government expenditures.

<sup>2</sup> Includes hospital construction and medical research; excludes health and medical expenditures under veterans programs, public education, public aid, workmen's compensation, and vocational rehabilitation (which are included under those programs), and medical expenditures provided subordinate to the performance of other functions.

<sup>3</sup> Represents vocational rehabilitation, child welfare services, school lunch program, and institutional care.

<sup>4</sup> Excludes expenditures of courts and public institutions serving children, public day-care centers, and appropriations made directly by legislatures to voluntary agencies or institutions.

<sup>1</sup> Excludes refunds of contributions to those leaving service. Federal expenditures include retirement pay of military personnel.

<sup>2</sup> Includes unemployment compensation for veterans of the Korean conflict and for Federal employees.

<sup>3</sup> Programs operate in 4 States only.

<sup>4</sup> Payments by private insurance carriers, State funds, and self-insurers of benefits payable under State law and estimated State administrative costs.

<sup>5</sup> Old-age assistance, aid to dependent children, aid to the blind, aid to the permanently and totally disabled, and, from State and local funds, general assistance. <sup>6</sup> Value of surplus food distributed to needy persons.

<sup>7</sup> Excludes expenditures for domiciliary care (other than mental or tuberculosis) included under institutional care; health and medical services included under other programs; international health activities; and expenditures for certain medical programs subordinate to performance of other functions.

<sup>8</sup> Crippled children's services and maternal and child health services programs under the Social Security Act. <sup>9</sup> Expenditures of the Public Health Service, Food and Drug Administration, Veterans Administration, Atomic Energy Commission, and Defense Department. <sup>10</sup> Not available.

<sup>11</sup> Excludes expenditures for water supply, sanitation services, and sewage disposal but includes regulatory and administrative expenditures in connection with these activities; also includes expenditures for medical equipment and supplies in civil defense.

<sup>12</sup> Includes expenditures for homes for adults (other than veterans) and for dependent or neglected children, and value of surplus foods for nonprofit institutions.

<sup>13</sup> Cash apportionment, value of commodities purchased and distributed under the National School Lunch Act, value of surplus commodities distributed under other agricultural programs, and special school milk program.

<sup>14</sup> See footnote 4, table 340.

<sup>15</sup> Excludes Federal bonus payments, appropriations to Government life insurance trust fund, and accounts of several small revolving funds. State and local data represent State expenditures for bonus and other payments and services for veterans; local data not available.

<sup>16</sup> Vocational rehabilitation, specially adapted homes and automobiles for disabled veterans, counseling, beneficiaries' travel, loan guarantees, domiciliary care, and medical research.

<sup>17</sup> Federal and State subsidies (and administrative costs) for low-cost housing.

### No. 342. SOCIAL WELFARE EXPENDITURES PER CAPITA UNDER PUBLIC PROGRAMS, ACTUAL AND 1958 PRICES: 1935 TO 1958

[For years ending June 30. Per capita figures based on total population of the United States as of end of December, including Armed Forces overseas and civilian population of Alaska, Hawaii, and outlying areas of the U.S. See headnote, table 340. Corrected to October 1959]

<sup>1</sup>Data from Department of Commerce, Office of Business Economics; exclude Alaska and Hawaii, except that pay for Federal civilian and military personnel is for all areas. Total earnings include earnings of self-employed; "all wages and salaries" represent disbursements for civilian and military wages and salaries in cash and in kind.

<sup>2</sup>Beginning 1955, adjusted for duplication of payrolls covered by both old-age, survivors, and disability insurance and State and local retirement systems.

<sup>3</sup>Taxable plus estimated nontaxable wages and salaries. Excludes Alaska and Hawaii, except that, for 1958, data include wages and salaries pay in all areas.

<sup>4</sup>Taxable wages (including those for Alaska and Hawaii) plus estimated nontaxable wages and salaries.

<sup>5</sup>Pay of Federal civilian personnel in all areas.

<sup>6</sup>Excludes Alaska and Hawaii. <sup>7</sup>Not available.

<sup>8</sup>Taxable plus estimated nontaxable wages and salaries, except that, beginning 1955, pay of Federal civilian personnel in all areas is included.

<sup>9</sup>Payrolls of employers insuring with private carriers, State funds, or self-insured (excluding Alaska and Hawaii), and pay covered by Federal programs in all areas.

<sup>10</sup>Represents percent of all wages and salaries to reflect inclusion of Armed Forces pay.

No. 344. SOCIAL INSURANCE AND RELATED PROGRAMS—BENEFICIARIES AND BENEFITS, BY RISK AND PROGRAM: 1940 TO 1958

[Partly estimated. Data for some programs include some beneficiaries and benefit payments in Alaska and Hawaii and in other outlying areas except workmen's compensation, State and local government retirement, and State temporary disability insurance. Data for State and local government, Federal civil service, and other Federal contributory retirement systems exclude refunds of employee contributions. See also *Historical Statistics, Colonial Times to 1957*, series H 69-114. Corrected to February 1960]

<sup>1</sup> Average monthly number, except as noted.  
<sup>2</sup> Old-age benefits include benefits to dependents of retired-worker beneficiaries and, for 1958, to dependents of disabled-worker beneficiaries. Disability benefits were first payable July 1957.  
<sup>3</sup> For 1940 and 1950, small number and amount of survivor and disability payments included with old-age benefits. Lump-sum beneficiaries represent civil service program only.  
<sup>4</sup> For 1940 and 1950, survivor and disability payments included with old-age benefits (significant in number and amount only for disability payments in 1940).  
<sup>5</sup> For survivorship, number represents families. Data for 1958 preliminary. <sup>6</sup> Under Veterans Administration.  
<sup>7</sup> For veterans of Spanish-American War, Boxer Rebellion, and Philippine Insurrection; for 1950 and 1958, includes all service pensions for this group.  
<sup>8</sup> Monthly survivor benefits include a small amount of lump-sum death payments.  
<sup>9</sup> Not available. <sup>10</sup> Payments are for burial of deceased veterans.  
<sup>11</sup> Includes pensions and compensation, and subsistence payments to disabled veterans undergoing training.  
<sup>12</sup> Excludes payments for medical care.  
<sup>13</sup> Payable only in Calif., N.J., N.Y., and R.I. Includes maternity benefits in R.I.; excludes hospital benefits in Calif. and hospital, surgical, and medical benefits under approved plans in N.Y. Beneficiaries are average weekly number; exclude private-plan beneficiaries in Calif. and N.J.  
<sup>14</sup> Beneficiaries are average number in 14-day registration period.  
<sup>15</sup> Beginning 1955, includes payments to Federal employees made by States as agents of Federal Government; for 1958, includes payments made June-December under the temporary unemployment compensation programs and those made November-December to unemployed veterans under the Ex-Servicemen's Unemployment Act of 1953. Beneficiaries are average weekly number.  
<sup>16</sup> Under the Servicemen's Readjustment Act of 1944 and the Veterans Readjustment Assistance Act of 1952; includes self-employment allowances under the Servicemen's Readjustment Act (negligible in 1955 and 1958). Beneficiaries are average weekly number for unemployment allowances, average monthly number for self-employment allowances. See footnote 15.

### No. 348. PERSONS 65 YEARS OLD AND OVER, RECEIVING MONEY INCOME FROM SPECIFIED SOURCES: 1948, 1958, AND 1959

[As of June; partly estimated. Includes Alaska, Hawaii, Puerto Rico, and Virgin Islands for 1958 and 1959. 1959 data are preliminary]

SOURCE OF INCOME	NUMBER OF PERSONS (1,000)			PERCENT DISTRIBUTION		
	1948	1958	1959	1948	1958	1959
		11,540	15,190	15,520	100.0	100.0
<b>Total</b> <sup>1</sup> .....	11,540	15,190	15,520	100.0	100.0	100.0
Employment.....	3,830	3,950	3,920	33.2	26.0	25.2
Earnings.....	2,930	3,070	3,030	25.4	20.2	19.5
Nonworking wives of earners.....	900	880	890	7.8	5.8	5.7
Social insurance and related programs <sup>2</sup> .....	2,330	10,360	11,390	20.2	68.2	73.4
Old-age, survivors, and disability insurance.....	1,460	8,840	9,720	12.7	58.2	62.6
Railroad retirement insurance.....	303	580	610	2.6	3.9	3.9
Government employees' retirement programs.....	307	750	930	2.6	4.9	6.0
Veterans compensation and pension programs.....	350	1,160	1,390	3.0	7.6	9.0
Public assistance <sup>3</sup> .....	2,400	2,520	2,480	20.8	16.6	16.0
No money income or income solely from other sources.....	3,400	1,500	1,090	29.4	9.9	7.0
Income from more than one of specified sources.....	420	3,140	3,360	3.6	20.7	21.6
Employment and social insurance or assistance.....	270	2,500	2,660	2.3	16.5	17.1
Social insurance and public assistance.....	150	640	700	1.3	4.2	4.5

<sup>1</sup> Total population 65 and over is less than sum of the first 4 major classifications by the number in the fifth; persons with more than 1 major source of income were counted under each appropriate classification and then classified separately. Persons with income from sources specified may also have income from other sources (for example, private pensions or interest, dividends, and other returns on investment).

<sup>2</sup> Persons with income from more than one program counted only once. In addition, unemployment insurance, workmen's compensation, and temporary disability insurance provided income for an unknown number; overlap with other programs cannot be estimated. Includes the estimated number of male beneficiaries' wives not in direct receipt of benefits.

<sup>3</sup> Old-age assistance recipients and persons aged 65 and over receiving aid to the blind and aid to the permanently and totally disabled. Includes a small number of persons receiving vendor payments for medical care but no direct cash payment.

Source: Department of Health, Education, and Welfare, Social Security Administration; *Social Security Bulletin*, June and December 1959.

### No. 349. OLD-AGE AND SURVIVORS INSURANCE—PERCENT DISTRIBUTION OF SELECTED BENEFICIARY GROUPS, BY VALUE OF ASSETS AND NET WORTH: 1957

[Data are estimates based on sample of major types of beneficiaries on rolls in December 1956; values are as of end of survey year—September, October, or November 1957, depending on date of interview. Total number of beneficiaries includes Alaska, Hawaii, Puerto Rico, and Virgin Islands. Beneficiary group includes 1 person for single retired workers and aged widows, 2 persons for married couples, whether or not the spouse was entitled to benefits, and 2 or more persons for widowed mothers with entitled children. Net worth is difference between value of selected assets and total reported debt. Equity in nonfarm homes represents owner's estimate of current value of home, less any mortgage or other debt on home. Liquid assets consist of reserve money at home, checking and savings accounts in banks, postal savings, shares in savings and loan associations and credit unions, all types of stocks and bonds, mortgages on real estate, and loans to others]

BENEFICIARY GROUP AND TYPE OF ASSET	Total <sup>1</sup>	None <sup>2</sup>	\$1 to \$999	\$1,000 to \$1,999	\$2,000 to \$2,999	\$3,000 to \$3,999	\$4,000 to \$4,999	\$5,000 to \$9,999	\$10,000 and over	Median (dollars)

**No. 350. OLD-AGE AND SURVIVORS INSURANCE—PERCENT DISTRIBUTION OF SELECTED BENEFICIARY GROUPS, BY TOTAL MONEY INCOME AND INDEPENDENT MONEY RETIREMENT INCOME: 1957**

[See headline, table 349. Includes Alaska, Hawaii, Puerto Rico, and Virgin Islands. Money income represents cash receipts from all sources except sale of property, tax refunds, large cash gifts, lump-sum inheritances and insurance payments, and cash contributions by relatives within the household. Includes, where the amount was known, the value of bills (except medical bills) paid by relatives outside the household. Independent money retirement income represents 12 months OASI benefits and money income received during survey year from employer, union, and veterans pension; rents, interest, dividends, and annuities; and income from trust funds and from other reasonably permanent independent sources]

BENEFICIARY GROUP	Total	\$1 to \$599	\$600 to \$899	\$900 to \$1,199	\$1,200 to \$1,799	\$1,800 to \$2,099	\$2,100 to \$2,399	\$2,400 to \$2,999	\$3,000 to \$4,999	\$5,000 and over	Median (dollars)

1959: January-March <sup>7</sup> .....	617	53,000	51,000	960	50,000	940

<sup>1</sup> As of Nov. 27, 1959, 131.5 million account numbers had been issued under the social security system and 2.8 million under the railroad retirement system.

<sup>2</sup> Includes workers with earnings in excess of annual taxable limit. See footnote 4.

<sup>3</sup> Includes earnings in excess of annual taxable limit. See footnote 4.

<sup>4</sup> Excludes earnings in excess of taxable limit. Annual limit on taxable earnings was \$3,000 through 1950; \$3,600 for 1951-1954; \$4,200 for 1955-1958; and \$4,800 beginning 1959.

<sup>5</sup> A worker is not reported for a quarter if he has attained the annual taxable limit in an earlier quarter.

<sup>6</sup> Includes 17,202,000 accounts established in 1936.

<sup>7</sup> Quarterly covered employment excludes agricultural labor.

Nonagricultural.....	0.4	0.5	0.6	0.6	0.6
Other <sup>3</sup> .....	9.2	2.3	1.9	2.0	2.0

<sup>1</sup> Beginning 1955, excludes employees of State and local governments and nonprofit organizations and ministers who were not actually covered although eligible for coverage.

<sup>2</sup> Under the 1961 amendments to the Railroad Retirement Act, earnings in railroad service are credited toward benefits under both railroad and old-age, survivors, and disability insurance programs.

<sup>3</sup> Beginning 1955, includes noncovered workers in the following partially covered industries: Nonagricultural self-employment; educational institutions and agencies; medical and health services; religious, charitable, and membership organizations; and forestry and fishing. In 1950, also includes noncovered workers in railroad and railway express companies and in banks and trust companies.

<sup>1</sup> Beginning 1958, includes benefits payable to wives or husbands of disability (disabled worker) beneficiaries.  
<sup>2</sup> Beginning 1957, includes benefits payable to disabled persons aged 18 or over (dependent children of deceased or retired workers) whose disability began before age 18; beginning 1958, also includes benefits payable to dependent children of disability (disabled worker) beneficiaries, including disabled children aged 18 or over whose disability began before age 18.  
<sup>3</sup> Beginning July 1957, payable to disabled workers aged 50-64; effective for months beginning August 1958, disability benefits are not offset by other benefits payable because of disability.  
<sup>4</sup> Represents new entitlements.

<sup>1</sup> Benefits under the old-age and survivors insurance part of the old-age, survivors, and disability insurance program are payable from the OASI trust fund to old-age insurance (retired worker) beneficiaries and their dependents and to survivors of deceased workers. Benefits under the disability insurance part of the program are payable from the DI trust fund to disability insurance (disabled worker) beneficiaries and, beginning September 1958, to their dependents.

<sup>2</sup> Distribution by type of benefit and by State estimated. Supplementary benefits are paid to wives aged 62 or over, wives under age 62 with child beneficiaries in their care, dependent aged husbands, children under age 18, and disabled children aged 18 or over (whose disability began before age 18) of old-age or disabled-worker beneficiaries. Survivor benefits are paid to aged widows, dependent aged widowers, children under age 18, disabled children aged 18 or over whose disability began before age 18, widows or divorced wives with child beneficiaries in their care, and dependent aged parents of deceased insured workers.

<sup>3</sup> Distribution by State based on 10-percent sample.

1959.....	891	41	457	50	—21	447	1,793	32	1,825

<sup>1</sup> Includes adjustments for (a) refund of contributions beginning in 1952 and (b) transfers during 1947–51 from general funds equivalent to additional payments arising from the extension of survivors protection to certain veterans of World War II (Social Security Act Amendments of 1946).

<sup>2</sup> Includes profits on marketable investments and annual interfund transfers of interest between the old-age and survivors insurance trust funds and the railroad retirement account (see footnote 4) and from the disability insurance trust fund to the old-age and survivors insurance trust fund on reimbursed administrative expenses.

<sup>3</sup> Includes administrative expenses, less receipts for sale of surplus material, services, etc. Beginning 1953, includes cost of construction of an office building for the Bureau of Old-Age and Survivors Insurance. Beginning July 1956, expenses incurred by the Department of Health, Education, and Welfare, under the disability insurance program, are initially charged to the old-age and survivors insurance trust fund with subsequent reimbursement from the disability insurance trust fund.

<sup>4</sup> Under the Railroad Retirement Act, transfers, with interest, are made annually between the old-age, survivors, and disability insurance trust funds and the railroad retirement account to place the 2 trust funds in the position in which they would have been had railroad employment always been covered under old-age, survivors, and disability insurance.

<sup>1</sup> Through June 30, 1940, data relate entirely to employees retired voluntarily or involuntarily under various age and length-of-service requirements and to employees with at least 5 years of service who became totally disabled for the position occupied prior to eligibility for retirement. Beginning Jan. 1, 1940, certain employees may elect a joint and survivor annuity, and beginning Feb. 29, 1948, widows and minor children of deceased employees and annuitants are eligible for survivor annuities under certain conditions; number of survivor annuities in force as of June 30 increased from 26 in 1941 to 136,641 in 1959. Beginning Jan. 24, 1942, employees with at least 5 years service who separate voluntarily or involuntarily prior to eligibility for retirement may obtain deferred annuity at age 62.

<sup>2</sup> Prior to 1952, excludes annuities purchased by voluntary contributions.

<sup>3</sup> Due to adjustments, number in force at end of fiscal year does not in all cases equal number certified less number terminated in that year, plus number in force at end of preceding fiscal year.

<sup>4</sup> Refunds of amounts to employees' credit in fund paid to employees not eligible for an annuity or who, if eligible, elected to take a refund.

<sup>5</sup> Refunds of amounts to employees' credit paid to designated or other beneficiaries of employees who died in service or after separation.

<sup>6</sup> Refunds of balance of amount to annuitants' credit at time of death paid to designated or other beneficiaries of annuitants. Includes refunds to disability annuitants, whose entitlement to an annuity was terminated, and unexpended balances paid upon termination of survivor annuities.

<sup>6</sup> Includes increases under the act of June 25, 1958 (Public Law 85-465, 85th Cong.), effective Aug. 1, 1958.

<sup>1</sup> Application submitted for unemployment when worker applies for unemployment benefits for first time with respect to benefit year, for sickness at the beginning of each spell of sickness. Beginning with 1950, data include some applications submitted in June with respect to following year.

<sup>2</sup> Per 2-week claim period.

<sup>3</sup> Adjusted for settlement of underpayments and recovery of overpayments.

<sup>4</sup> Not reported on comparable basis.

<sup>5</sup> Excludes retroactive payments made under 1950 amendments.

Benefits paid <sup>2</sup> .....						\$7,030	\$79,565

<sup>1</sup> Data represent unduplicated counts. Beginning 1958, excludes temporary unemployment program; see table 371.

<sup>2</sup> Adjusted for voided benefit checks and transfers under interstate combined wage plan. For 1958, State amounts include \$31.5 million spent under State programs for temporarily extended duration of benefit payments; for 1959, \$54.8 million.

<sup>3</sup> Includes the Federal employee program for Jan. 1955-June 1959 except as noted (see footnote 4).

<sup>4</sup> Beginning 1950, includes Alaska and Hawaii, and excludes UCFE.

<sup>5</sup> Insured unemployment as a percent of average covered employment during a 12-month period.

<sup>6</sup> Represents number of first payments during year.

<sup>7</sup> Number of weeks compensated divided by first payments. <sup>8</sup> For total unemployment.

<sup>9</sup> For 1940, represents average employment on last payroll ending in month; thereafter, represents average employment on payroll ending nearest the 15th of the month. <sup>10</sup> Not available.

<sup>11</sup> Wages subject to unemployment insurance tax. For 1940-1957, includes workers in private industry; excluded thereafter.

<sup>12</sup> Includes contributions, penalties, and interest from employers; also employee contributions in States which tax workers.

<sup>13</sup> Represents number of first payments during year. Prior to 1959, includes data for employees filing for unemployment compensation to supplement benefits under other programs; beginning July 1959, excludes first payments filed jointly with State unemployment insurance programs.

<sup>14</sup> Cumulative from beginning of program, Oct. 15, 1952.

<sup>15</sup> Cumulative from beginning of program, Oct. 27, 1958.

<sup>1</sup> Employer becomes subject to State unemployment insurance law when he has employed specified minimum number of workers on at least 1 day in each of specified number of weeks within current or preceding calendar year; coverage provisions shown were in effect as of December 1958.

<sup>2</sup> Average of 12 monthly figures, each of which is total number of workers in covered employment in pay periods ending nearest 15th of month. <sup>3</sup> Total wages in covered employment for all pay periods ending in year.

<sup>4</sup> Wages subject to unemployment insurance tax. Includes workers in private industry; see text, p. 260.

<sup>5</sup> Includes 23,000 employment and \$130,760,700 wages, not reported by States and Puerto Rico and Virgin Islands not shown separately. <sup>6</sup> And wages over \$100 in any quarter.

<sup>7</sup> Or 4 in 8 weeks and payroll over \$6,000 in any quarter. <sup>8</sup> And wages of \$150 in any quarter.

<sup>9</sup> Or 25 in 1 week. <sup>10</sup> Or 4 in 3 quarters of preceding year, and \$50 per quarter for each worker.

<sup>11</sup> Employers of fewer than 4 outside corporate limits of a city, village, or borough of 10,000 inhabitants or more not liable for contributions unless subject to Federal Unemployment Tax Act.

<sup>12</sup> Or wages over \$500 in a calendar year. <sup>13</sup> Or wages of \$10,000 in any quarter.

<sup>14</sup> And wages of \$225 in any quarter. <sup>15</sup> Or wages of \$450 in any quarter, or 2 in 13 weeks.

<sup>16</sup> And wages of \$1,800 in year. <sup>17</sup> Or annual payroll of \$24,000 in current or preceding year not counting more than \$3,000 wages per employee in applying the test of \$24,000 in year. <sup>18</sup> And wages of \$140 in any quarter.

<sup>19</sup> Or wages of \$6,000 in any year or wages of \$10,000 in any quarter not counting more than \$1,000 wages per employee in applying the test of \$10,000 per quarter. <sup>20</sup> And wages of \$500 in any year.

<sup>1</sup> Comprises insured unemployment under State, UCV, UCX, UCFE, and railroad programs; latter program included in total but not distributed by State. Excludes temporary programs.

<sup>2</sup> Represents number of first payments during year; Wis. figure, first payments on a "per employer" basis.

<sup>3</sup> Coverage under Federal employee program included in data on beneficiaries, and average weekly payments for January through June 1959.

<sup>4</sup> Adjusted for voided benefit checks and (except for UCV program) transfers under interstate combined wage plan. <sup>5</sup> For total unemployment.

<sup>6</sup> Includes data on veterans filing for unemployment compensation payments to supplement benefits under State and/or UCFE programs.

<sup>7</sup> Cumulative Oct. 15, 1952, through Dec. 31, 1959. Includes 2,300 veterans supplementing railroad unemployment program not distributed by State.

<sup>8</sup> Excludes data on ex-servicemen filing for unemployment compensation payments to supplement benefits under State and/or UCFE programs.

<sup>9</sup> Excludes data on Federal employees filing for unemployment compensation payments to supplement benefits under State programs.

<sup>10</sup> Represents programs in 36 areas which temporarily extended duration of benefits to claimants exhausting their benefits under regular State programs. 15 covered exhaustees under only UCFE, UCX, or UCV programs. Terminated in most areas in June 1959.

<sup>11</sup> Gross benefit amounts unadjusted for voided benefit checks. <sup>12</sup> Less than 500.

<sup>13</sup> Amounts paid by State agencies operating temporary programs within framework of their own laws. Amounts paid to State UI claimants are also included in figures in column 3. <sup>14</sup> Not applicable.

<sup>1</sup> Codes and titles from the 1957 edition of the *Standard Industrial Classification Manual* for all industries.  
<sup>2</sup> Average of 12 monthly figures, each of which is total number of workers in covered employment in all payrolls for pay periods ending nearest fifteenth of the month.  
<sup>3</sup> Total wages in covered employment for all pay periods ending in year.  
<sup>4</sup> Less than 1,000 employees. <sup>5</sup> Less than \$1,000,000.  
<sup>6</sup> Excludes railroad and allied groups subject, as of July 1, 1939, to Railroad Unemployment Insurance Act.  
<sup>7</sup> Includes data for firms whose activities are not classifiable in any of above industries and data for firms not classified due to lack of sufficient information regarding nature of business.

## NO. 377. WORKMEN'S COMPENSATION PAYMENTS, BY STATES: 1940 to 1958

[In thousands of dollars. Estimated by Social Security Administration. Payments represent cash and medical benefits and include insurance losses paid by private insurance carriers (compiled from the *Spectator (Insurance by States, of . . . Casualty Lines)*), net disbursements of State funds (from *Spectator* and State reports; estimated for some States), and self-insurance payments (estimated from available State data). Calendar-year data, except fiscal-year data for Federal employees and for a few States with State funds. Includes benefit payments under Longshoremen's and Harbor Workers' Compensation Act and Defense Base Compensation Act for States in which such payments are made.]

<sup>1</sup> Includes 11,230 children living elsewhere. Children reported in institutions represent only those children served by workers attached to State or local public welfare agencies and not all children receiving institutional care.

<sup>2</sup> Includes a number of children for whom whereabouts is unknown. For total, this is less than 1 percent.

<sup>3</sup> Estimated by Pennsylvania State Department of Welfare.

### No. 395. EXPENDITURES OF RELIGIOUS AND PRIVATE WELFARE ORGANIZATIONS: 1909 TO 1958

[Excludes Alaska and Hawaii. Comprises religious bodies, social welfare and foreign relief agencies, political organizations, museums and libraries, and foundations (except foundation expenditures for education and research). Represents current expenditures (including depreciation but excluding relief payments within U.S.) and is net of receipts accounted for separately in consumer expenditures, such as receipts from meals, rooms, and entertainments]

### No. 396. FOUNDATIONS—DECADE ESTABLISHED AND LATEST RESOURCE CLASS

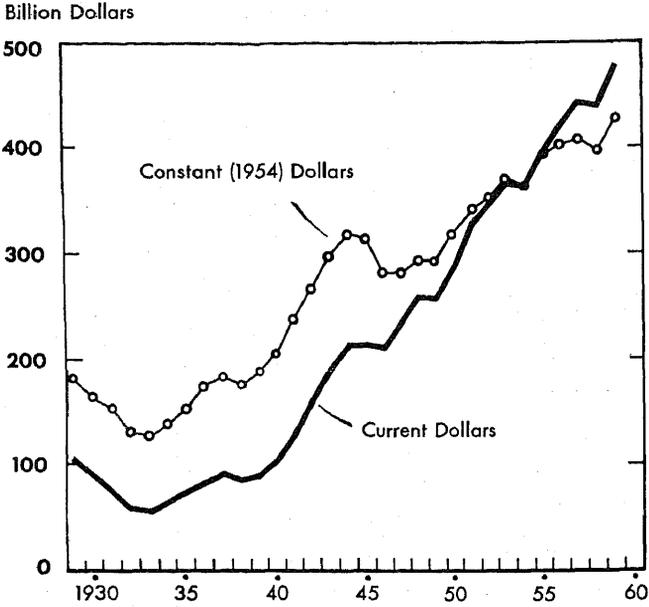

[Excludes Hawaii. Excludes those which have ceased functioning. A foundation is a nonprofit legal entity having a principal fund of its own, or receiving charitable contributions of a living founder or founders, which is governed by its own trustees or directors, and which has been established to serve the welfare of mankind. Excludes endowed religious and educational institutions, those which solicit or appeal for endowment or operating funds, and those which conduct a clinical or other local program or benefit solely a single institution or group. Data are admittedly incomplete in coverage with respect to foundations which meet the above specifications. It is estimated that approximately 7,300 are in existence which would qualify for inclusion under these standards]

## Section 11

### Income, Expenditures, and Wealth

This section presents statistics relating to two different aspects of income and expenditures: Those which in aggregate reflect the entire complex of the Nation's economic activities and the interaction of its major components (the national income and product system and the flow-of-funds system); and those showing the distribution of families and individuals by income size-classes or type of expenditure. It also includes statistics on national wealth.

The primary source for national income and product information is the Department of Commerce, Office of Business Economics' monthly *Survey of Current Business*. Each July issue of the *Survey* is identified as the *National Income Number* and contains the most recent and detailed statistics on this subject. *National Income, 1954*, is the basic reference source for concepts and methodology which are still applicable, and for numerous statistics for the 1929-1945 period. A more recent supplement, *U.S. Income and Output*, contains a complete set of revised statistics for the 1946-1957 period, and introduces a number of new statistical series.

A further development of the general body of national income data appears in *Income Distribution in the United States, 1944-50*, a supplement to the *Survey*, which presents personal income data classified by income size-groups. More recent data are presented in the *Survey of Current Business* for March 1955, June 1956, April 1958, and April 1959.

The primary source for flow-of-funds data is the Board of Governors of the Federal Reserve System; the *Federal Reserve Bulletin* from time to time presents summarized versions of these data. Detailed historical data appear in *Flow of Funds in the United States, 1939-53*.

A primary source for data on distribution of income by size-class is the Bureau of the Census, *Current Population Reports—Consumer Income*, Series P-60. A brief discussion of the Current Population Survey which is the basis for the data in the above report appears in the Technical Note on page 203 and also on page 2. Another primary source for information in this field is the national Survey of Consumer Finances conducted annually from 1946 to 1959 for the Board of Governors of the Federal Reserve System by the Survey Research Center of the University of Michigan. This survey consisted of a sample of approximately 2,700 family units or 3,000 spending units located in 66 sampling areas.

**National income and product.**—A synoptic view of the economy is provided by the summary of the Nation's income, expenditure, and saving shown in the form of a balancing set of accounts for the major economic categories—consumers, business, and government. (See table 397.) These statistics assembled by the Council of Economic Advisers are based on the "national income and product" accounts of the Department of Commerce. An explanation of the items included in this summation may be found in the 1957 *Historical and Descriptive Supplement to Economic Indicators*, 85th Congress, 1st Session.

**Gross national product.**—Gross national product (called GNP) represents the total national output of goods and services at market prices. It measures this output in terms of the expenditures by which these goods are acquired. These expenditures comprise the purchases of goods and services by consumers and government, gross private domestic investment, and net exports of goods and services. The goods and services included in GNP are, for the most part, those actually bought for

final use (excluding illegal transactions) in the markets. There are a number of inclusions, however, which represent imputed values, the most important of which is the rental value of owner-occupied dwellings. GNP, the total national output, also measures the product attributable to the factors of production—labor and property—supplied by residents of the United States (conterminous area). GNP differs from “national income,” described below, mainly in that GNP includes allowances for depreciation and similar capital consumption and for indirect taxes (such as sales and excise taxes).

**National income.**—National income is the aggregate of earnings by labor and property from the current production of goods and services by the Nation's economy. It is the sum represented by compensation of employees, proprietors' income, rental income, net interest, and corporate profits. Thus, it measures the total factor costs of the goods and services produced by the economy. Earnings are inclusive of taxes on those earnings.

**Personal income.**—Personal income is the current income received by individuals, by unincorporated businesses, and by nonprofit institutions (including pension, trust, and welfare funds) from all sources. It includes transfers (payments not resulting from current production) from government and business such as social-security benefits, military pensions, etc., but excludes transfers among persons. Although most of the income is in monetary form, there are important nonmonetary inclusions—chiefly, estimated net rental value to owner-occupants of their homes and the value of food consumed on farms.

Disposable personal income is equal to personal income less taxes on individuals (including income, property, and other taxes not deductible as business expense), and other general Government revenues (e. g., fines, penalties, etc.) received from individuals as individuals.

**Flow-of-funds accounts and saving and investment estimates.**—Another synoptic view of the economy is provided by the flow-of-funds accounts. This system of national accounts presents a record designed to picture the flow of funds through the major sectors of the national economy, the structure of the economy's saving and investment, by sector and by form of investment, and the relation between saving and the structure of financial flows. The transactions covered include transactions in financial instruments, existing assets, and transfers of various kinds, as well as transactions involving currently produced goods and services. In addition to estimates of flows, the accounts present estimates of amounts outstanding of financial assets and liabilities by sector and by type of financial instrument.

**Distribution of income by size-class.**—Money income statistics are based on data collected in various field surveys of income conducted since 1936. In each of these field surveys trained enumerators interview representative samples of the population with respect to income received during the previous year. The income here referred to is consumer money income for the calendar year and is before deduction of income taxes or social security taxes. Nonmoney items of income are not covered. None of the aggregate income concepts (gross national product, national income, or personal income) is exactly comparable with consumer money income. The nearest approximation is “personal income.”

A size distribution of family “personal income” (less amounts received by institutional residents or retained by private trust, pension, health, and welfare funds) is prepared by the Office of Business Economics based on data from consolidated Federal individual income tax returns and the sample data from the surveys mentioned above. These are described in *Income Distribution in the United States, 1944-1950*, mentioned above. Detailed statistics, including information on Federal individual income tax liabilities, are available in the March 1955, June 1956, April 1958, and April 1959 issues of the *Survey of Current Business*.

**Individuals' savings.**—The Securities and Exchange Commission issues detailed estimates of individuals' savings showing the increase in financial assets held by individuals less the increase in their debt, exclusive of gains or losses from revaluation of assets. A continuous series starting with 1942 is published quarterly in a special release and in the Commission's *Statistical Bulletin*. (See table 414.) A reconciliation of the annual SEC estimates with the Department of Commerce estimates of personal savings appears in the Office of Business Economics publication, *U. S. Income and Output*, for the years 1946 to 1958, and *National Income, 1954 Edition*, for prior years back to 1933. The Federal Home Loan Bank Board compiles statistics on changes in selected types of individual long-term savings. (See table 578.) The Board of Governors of the Federal Reserve System also issues annual data covering the distribution of liquid assets and occasional data covering positive, negative, and net savings of families, by income groups.

**National wealth.**—The national wealth data shown here (tables 429 and 430) represent the most recent attempt to derive a consistent and comprehensive series in this field. They were compiled by Dr. Raymond W. Goldsmith. As is the case in all national wealth estimates, the figures are intended chiefly to indicate the order of magnitudes involved and to permit rough comparisons among types of wealth and of the growth of wealth over long periods. Careful examination of the methods and sources of the estimates, as they are described in the source, *A Study of Saving in the United States*, is therefore advisable before use is made of the figures.

**Alaska and Hawaii.**—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, Colonial Times to 1957*, series F 87-103") provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

## NO. 397. THE NATION'S INCOME, EXPENDITURE, AND SAVING: 1957 TO 1959

[In billions of dollars. Excludes Alaska and Hawaii. Based on national income and product data of Department of Commerce. See text, p. 301]

## No. 404. NATIONAL INCOME BY INDUSTRIAL ORIGIN: 1929 TO 1959

[In millions of dollars. Not adjusted to include Alaska and Hawaii. National income (for definition, see text, p. 302) originating in each industry is the sum of factor costs incurred by the industry in production. Hence, it is net value added to production by industry, measured at factor costs. See also *Historical Statistics, Colonial Times to 1957*, series F 22-33]

PERSONAL CONSUMPTION EXPENDITURES

309

No. 405. PERSONAL CONSUMPTION EXPENDITURES, BY TYPE OF PRODUCT: 1929 TO 1959

[In millions of dollars. Not adjusted to include Alaska and Hawaii. Represents market value of purchases of goods and services by individuals and nonprofit institutions, and value of food, clothing, housing, and financial services received by them as income in kind. Includes rental value of owner-occupied houses, but not purchases of dwellings (which are classified as capital goods). See also *Historical Statistics, Colonial Times to 1957*, series G 198-218]

<sup>1</sup> Dollar estimates in current prices divided by the implicit deflator for the personal consumption expenditures component of gross national product on a 1959 base.

<sup>2</sup> These estimates represent an approximate conversion of the Department of Commerce series in 1954 prices. This was done by major components, using the implicit price deflators converted to a 1959 base.

<sup>3</sup> Total expenditures in 1959 prices divided by population.

<sup>4</sup> Population as of July 1, excluding Alaska and Hawaii; includes Armed Forces abroad.

<sup>4</sup> Income disbursed directly to persons by Federal and State and local governments. Comprises wages and salaries (net of employee contributions for social insurance), other labor income, interest, and transfer payments.

<sup>5</sup> Excludes Alaska.

<sup>6</sup> Less than \$500,000.

## No. 408. PERSONAL INCOME, BY STATES: 1929 TO 1958

[State personal income is a measure of current income received from all sources during the calendar year by the residents of each State. Excludes amounts disbursed by the Federal Government to its civilian and military personnel outside the United States (coterminous area). See text, p. 302]

No. 410. FLOW OF FUNDS/SAVING—SUMMARY: 1958

[Annual flows, in billions of dollars. Includes Alaska and Hawaii. Financial uses of funds ("U") represent net acquisitions of assets; financial sources of funds ("S"), net changes in liabilities. Differences in total uses and sources of funds for transaction categories result from valuation, timing, and classification differences, and from statistical discrepancies. For explanation of general concepts, see text, p. 302. For description of sectors and types of transactions, see source. "N.a.c." means not elsewhere classified.]

## No. 413. COMPONENTS OF PERSONAL SAVING: 1946 TO 1958

[In billions of dollars. Not adjusted to include Alaska and Hawaii. The OBE and SEC personal savings tables (413 and 414) differ in (a) the definition of savings, (b) statistical methodologies of measuring savings, and (c) the treatment of uninsured pension funds. For example, conceptually, SEC gross savings includes, and OBE personal savings excludes, consumer durable goods and Government insurance funds. See also *Historical Statistics, Colonial Times to 1967*, series F 253 and F 262-303]

Bank debt not elsewhere classified.....	1.2	1.5	1.7	1.5	2.9
Errors and omissions.....	.1	-.1	-1.0		-1.7

<sup>1</sup> Includes farm dwellings.

<sup>2</sup> Includes accidental damage to fixed property.

<sup>3</sup> Includes depreciation on farm property owned by nonfarm landlords and accidental damage to fixed property.

<sup>4</sup> Excludes changes in Government insurance and pension reserves, and Armed Forces leave bonds (both of which are ascribed to the Government sector in the national income accounts). Annual amounts, in billions of dollars, of changes in Government insurance and pension reserves are as follows: 1946, \$3.55; 1947, \$3.49; 1948, \$3.57; 1949, \$2.34; 1950, \$1.09; 1951, \$4.24; 1952, \$4.40; 1953, \$3.24; 1954, \$2.63; 1955, \$3.09; 1956, \$3.57; 1957, \$3.19; and 1958, \$0.67. Annual amounts, in billions of dollars, of Armed Forces leave bonds are as follows: 1946, \$0.60; 1947, \$0.16; 1948, -\$0.30; 1949, -\$0.12; 1950, -\$0.10; 1951, -\$0.15; and less than -\$0.05 in each of the succeeding years.

<sup>5</sup> Includes changes in assets of noncorporate enterprises of the types specified.

<sup>6</sup> Includes increase in redemption value of outstanding bonds.

\$7,500 and over.....	3	7	14	17	18	20	23	32	37	47	40	50

<sup>1</sup> Liquid assets represent U.S. savings bonds, checking accounts, savings accounts in banks, and shares in savings and loan associations and credit unions; currency is excluded. Data prior to 1959 include postal savings accounts, which were held by less than 2 percent of all spending units early in 1958. Data prior to 1957 also include marketable U.S. Government bonds, which were held by about 1 percent of all spending units early in 1957.

**No. 420. MONEY INCOME OF FAMILIES AND UNRELATED INDIVIDUALS—PERCENT DISTRIBUTION BY INCOME LEVEL, AND FARM AND NONFARM MEDIAN INCOME: 1944 TO 1958**

[Excludes Alaska and Hawaii. Based on samples of population residing in households only. Includes small number of families and unrelated individuals with no money income. Excludes small number of families and individuals residing in quasi-households (hotels, large rooming houses, etc.). "Family" refers to a group of 2 or more related persons residing in same household. "Unrelated individual" is used to refer to a person living alone or with persons not related to him. See Technical Note, p. 203. For explanation of urban and rural areas, see p. 2]

**No. 421. MONEY INCOME OF FAMILIES AND UNRELATED INDIVIDUALS—PERCENT DISTRIBUTION BY INCOME LEVEL, BY COLOR, URBAN AND RURAL: 1958**

[Excludes Alaska and Hawaii. Based on sample. Percent not shown where less than 0.1. Includes small number of families and unrelated individuals with no money income, and families and individuals in quasi-households (hotels, large rooming houses, etc.) as well as households. "Family" refers to a group of 2 or more related persons residing in same household. "Unrelated individual" refers to a person living alone or with persons not related to him. See Technical Note, p. 203. For explanation of urban and rural areas, see p. 2]

No. 427. MEAN AND MEDIAN INCOMES OF SPENDING UNITS, BY OCCUPATIONAL GROUPS: 1947 to 1958

[In dollars. Excludes Alaska and Hawaii. See text, p. 301. For definition of spending unit, see headnote, table 415. Mean income is the average obtained by dividing aggregate money income before taxes by number of spending units. Median income is that of middle spending unit when units are ranked by size of money income before taxes. Figures beginning 1953 are high relative to prior years owing largely to a change in 1954 questionnaire that improved the reporting of income]

OCCUPATION OF HEAD OF SPENDING UNIT	1947	1950	1953	1954	1955	1956	1957	1958
<b>MEAN INCOME</b>

<sup>1</sup> Estimates obtained by multiplying the *constant dollar* figures shown in table 430 by the appropriate price index for current year. See also footnote 1 in that table.

<sup>2</sup> 1945 estimates differ from one another not only because of changes in base period (1929 vs. 1947-49) of deflator applied in transforming original cost data into current values but also because of minor changes in sources of data and methods of estimation used.

<sup>3</sup> Estimates are based on book values.

<sup>4</sup> Estimates for farm land are based on Census or similar data. For other private land, estimates are derived by application of rough ratios of land to structure values for different types of real estate. Excludes subsoil assets.

<sup>1</sup> Estimates derived by "perpetual inventory" method which is intended to reflect reproduction cost of different types of assets. Estimates are obtained by: (1) Reducing each year's gross capital expenditures in current prices to 1929 (or 1947-49) price level by means of appropriate construction cost or wholesale price indices; (2) depreciating gross capital expenditures in accordance with an assumed length of life for different types of assets, thus obtaining net capital expenditures for each year in 1929 (or 1947-49) prices; (3) cumulating net capital expenditures for as many years backwards as corresponds to the assumed length of life of the type of asset involved.

<sup>2</sup> 1945 estimates differ from one another not only because of changes in base period (1929 vs. 1947-49) of deflator used but also because of minor changes in sources of data and methods of estimation used.

<sup>3</sup> Estimates reflect book values reduced by means of wholesale price indices.

## Section 12

### Prices

This section presents indexes of wholesale, retail, and consumer prices. Average prices are also shown for selected commodities. The primary sources of these data are the publications of the Department of Labor, Bureau of Labor Statistics, which include: *Monthly Labor Review*; *Handbook of Labor Statistics*; *Consumer Price Index* (monthly); *Retail Food Prices by Cities* (monthly); *Retail Prices and Indexes of Fuels and Electricity* (monthly); *Wholesale (Primary Market) Price Index* (monthly); and *Wholesale Prices* (annually). The Agricultural Marketing Service prepares indexes of prices received and prices paid by farmers (see text, p. 614).

The Bureau of Labor Statistics prepares weekly and monthly indexes of wholesale prices, a daily index based on spot market prices of 22 commodities; and indexes of consumer prices for urban wage-earner and clerical-worker families for the United States, based on 46 cities, and individually for 20 large cities, as well as component indexes for food and other groups.

**Wholesale price index.**—This index, dating from 1890, is the oldest continuous statistical series published by the Bureau of Labor Statistics. It is designed to measure average changes in prices of commodities sold in primary markets in the United States.

The index has undergone 4 major revisions. The latest revised index (see *Monthly Labor Review*, February 1952), based on 1947-49=100, is the official index for January 1952 and all subsequent months. The index beginning with data for 1947 is based on nearly 2,000 commodity price series instead of the 900 included in the earlier index. Prices used in constructing the index are collected directly from sellers, if possible, and apply as nearly as practicable to the first large-volume commercial transaction for each commodity—i. e., the manufacturer's or other producer's selling price, the importer's selling price, the selling price on an organized exchange or at a central market. Respondents are asked to report prices f. o. b. point of production if possible.

For the 1947-54 period, the weights used in the index represent the total net selling value including the value of sales for export, f. o. b. production point, less interplant transfers, but plus the value of imports for consumption, for the producing and processing sector of the economy in the United States (conterminous area) for the year 1947 (adjusted for price change to the average of 1947-49). For the years 1955-1957, the weights used are based on data for the average of the years 1952 and 1953, and beginning in January 1958, on data for 1954.

The all-commodities wholesale price index series on a base 1947-49=100 has been extended back to 1890. Monthly indexes on the same base are available for most of the major groups of commodities from January 1926. They are available on a 1926=100 base by groups from January 1890 and by subgroups beginning with 1913. The index 1926=100 is the official index for December 1951 and all earlier dates.

**Consumer price index.**—This index measures the average change in prices of goods and services purchased by city wage-earner and clerical-worker families. The weights used in calculating the index are based on studies of actual expenditures by families of wage earners and clerical workers. The quantities and qualities of the items in the "market basket" remain the same between consecutive pricing periods, so that the index measures the effect of *price change only* on the cost of living of these families. The index does not measure changes in the total amount families spend for living; city indexes do not measure relative differences in prices or living costs between cities.

A study conducted during 1917-19 provided the weights used from 1913 to 1935. Since then, there have been three major revisions of this index, which involved bringing the "market basket" of goods and services up to date and improving the sample and methodology. From 1935 to January 1950, time-to-time changes in retail prices were weighted by 1934-36 average expenditures except for certain temporary wartime adjustments. Weights used from January 1950 to December 1952 represented estimated 1949-50 spending patterns. Beginning January 1953, the weights represent average purchases of urban wage-earner and clerical-worker families in fiscal year 1952, derived from a study of family expenditures in 1950 and estimated changes in income and prices between 1950 and fiscal 1952.

The list of items currently priced for the index includes approximately 300 goods and services. For some items, a number of different qualities are priced. The items priced are described by detailed specifications to insure that, as far as possible, the same quality is priced each time, and that differences in reported prices are measures of price change only. Sales taxes are reflected wherever applicable.

Beginning January 1953, prices are obtained in a sample of 46 cities. Foods, fuels, and a few other items are priced monthly in all cities. Prices of most other goods and services are obtained on a regular rotating cycle—monthly in the 5 largest cities and every 3 months in other cities. Rents are surveyed bimonthly in the 5 largest cities and every 3 months in other cities. Estimates are made for unpriced cities each month. Prior to January 1953, indexes were based on food prices in 56 cities monthly, and prices of other commodities in 34 cities quarterly or monthly.

Price changes for the 46 cities are combined for the United States with weights based on 1950 population of cities represented by each sample city. City indexes are compiled for the 20 largest of the 46 cities.

**Retail food price index.**—Retail food price indexes are computed as a subgroup of the consumer price index. Weights used at various times are consistent with those for the index as a whole. In March 1943, the weights for the food index were revised to take account of changes in food purchases due to wartime shortages and rationing. In January 1946, these wartime weight adjustments were eliminated and certain other revisions made in the calculating procedures. In January 1950 and again in January 1953 the weights were revised as described above for the total consumer price index.

The indexes were computed from prices of 54 foods for the period from January 1935 to March 1943, 61 foods for the period March 1943 to June 1947, 50 foods from June 1947 to January 1950, 60 foods from January 1950 to December 1952, and 90 foods beginning January 1953.

**Comparability with other indexes.**—In comparing the movement of the indexes of consumer prices and of the prices paid by farmers for commodities bought for family living (table 847), it should be noted that the consumer price index includes rents and other services and the farm index does not, and that the list of commodities included in the two indexes and their geographic coverage differ because farm family buying differs considerably from that of city families, and farm and city workers are located in different parts of the country.

**Alaska and Hawaii.**—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, Colonial Times to 1957*, series E 25-26") provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

**No. 431. WHOLESALE PRICE INDEXES FOR ALL COMMODITIES, AND FOR ALL COMMODITIES OTHER THAN FARM PRODUCTS AND FOODS: 1926 TO 1960**

[1947-49=100. Includes Alaska and Hawaii. This index is the official price index, beginning with January 1952. See text, p. 329. See also *Historical Statistics, Colonial Times to 1967*, series E 25-26]

**NO. 435. WHOLESALE PRICE INDEXES, BY STAGE OF PROCESSING AND DURABILITY OF PRODUCT: 1947 TO 1959**

[1947-49=100. Includes Alaska and Hawaii. These indexes are a regrouping of the regular Wholesale Price Index Series to show price movements at various levels of production and in the various sectors of the economy. The new series comprise three major categories: (a) raw or crude materials; (b) intermediate materials for further processing, components, and supplies; (c) finished goods. Each of these three is further divided in accordance with end-use and durability. See also *Historical Statistics, Colonial Times to 1957*, series E 42-64]

<sup>10</sup> 1950 price, standard, heavier than 60 lb., No. 1 open hearth, f.o.b., mill; thereafter, standard, carbon steel, No. 1 open hearth, 115 lb. per linear yard, control cooled, base quantity, f.o.b. mill.  
<sup>11</sup> 1950 price for nails, wire, 8d common; 1955, nails, wire, 8d common, carload lots; thereafter, packed in fiber-board boxes.

No. 437. CONSUMER PRICE INDEX—ALL ITEMS AND COMMODITY GROUPS: 1913 TO 1960

[1947-49=100. Excludes Alaska and Hawaii. 1913 to 1952 rebased according to new groupings from adjusted series indexes on 1935-39=100 formerly published. For detailed explanation, see text, p. 329. Includes a correction of new unit bias in the rent index from 1940 to December 1949 and adjusted population and commodity weights beginning with January 1950. These adjustments make a continuous comparable series. See also *Historical Statistics, Colonial Times to 1967*, series E 113-139]

<sup>1</sup> 34 cities prior to January 1953. Indexes for food based on prices in 51 cities through 1942, 56 cities 1943 through 1952, and 46 cities beginning January 1953. Separate city indexes not compiled for 26 medium- and small-sized cities included in the national average.

<sup>2</sup> As of November. <sup>3</sup> As of October.

<sup>4</sup> Includes "food away from home" (restaurant meals and other food bought and eaten away from home).

<sup>5</sup> Includes "other shelter" (home purchase and other home owner costs).

<sup>6</sup> Comprises tobacco, alcoholic beverages, and miscellaneous services such as legal services, banking fees, and burial services.

**No. 440. CONSUMER PRICE INDEX—RELATIVE IMPORTANCE OF COMMODITY GROUPS AND SERVICES (PERCENT DISTRIBUTION): 1947 TO 1959**

[Excludes Alaska and Hawaii. The relative importance of a component of the Consumer Price Index at any given time represents its expenditure weight multiplied by the relative price change from the weight date to a later period and the result expressed as a percentage of the total for all items. Changes in the relative importance of a component result from (a) major weight revisions based on comprehensive consumer expenditure surveys; (b) minor weight adjustments to take account of changes in the list of items priced; and (c) different rates of price change among the various items. In the absence of a weight revision, if prices of all items changed at the same rate, the relative importance of each item or group in the index would remain unchanged. For further explanation of the index, see text, p. 329]

<sup>1</sup> Represents "food at home" through 1950; thereafter, includes "food away from home." <sup>2</sup> January 1953=100.  
<sup>3</sup> Comprises eggs, beverages (nonalcoholic), fats and oils, sugar and sweets, and miscellaneous foods.  
<sup>4</sup> Based on 61 cities for 1930 and 1940, 56 cities for 1945 and 1950 and 46 cities thereafter. City indexes not compiled for 26 medium- and small-sized cities included in the national average.  
<sup>5</sup> Minneapolis-St. Paul after 1950. <sup>6</sup> New York-Northeastern N.J. after 1950.

## No. 444. AVERAGE RETAIL PRICES OF SELECTED FOODS: 1930 TO 1960

[In cents per pound except as indicated. Excludes Alaska and Hawaii. Data are averages of prices reported by retail dealers in cities included in the Retail Food Index. (See footnote 4, table 443.) Number of cities also varies slightly according to availability and prices for each item. Sales taxes not included after 1945. Prices for individual cities combined with use of population weights. See also *Historical Statistics, Colonial Times to 1957*, series E 161-176]

No. 451. ANNUAL AVERAGE UNIT VALUES OF IMPORTANT ARTICLES IMPORTED AND EXPORTED: 1930 TO 1958

[Includes trade of Alaska, Hawaii, and Puerto Rico with foreign countries. "Ton" signifies long ton of 2,240 pounds except where otherwise specified. Values of goods imported represent values in foreign markets whence exported to United States. Values of goods exported represent value at time and place of exportation. Averages obtained by dividing total value of imports (for consumption) and exports of specified article by total quantity. Where, as in some commodities, considerable price variations may exist between different grades, methods of packing, etc., and proportions of grades, etc., may vary from year to year, such averages may show actual price movements only roughly]

## Section 13

### Elections

This section relates to popular participation in, and results of, Presidential, Congressional, and gubernatorial elections. Also presented are several tables concerning Congressional legislation.

Official statistics on Federal elections are collected by the Clerk of the House of Representatives and published biennially in *Statistics of the Presidential and Congressional Election* and *Statistics of the Congressional Election*. A detailed presentation of both Federal and State election statistics appears in *America Votes*, issued biennially by the Governmental Affairs Institute. Data on Federal elections also appear in the United States Congress, *Congressional Directory*, and in the official State documents (Registers, Manuals, Reports of the Secretary of State, etc.) of the separate States.

Almost all Federal, State, and local governmental units in the United States conduct elections at various intervals—annual, biennial, quadrennial, or longer—for different types of offices and other purposes. No regular and complete system exists for reporting either the number of elections held or the numbers of votes cast for candidates, except for Federal offices, and, in most States, for State offices.

The conduct of elections in the United States for Federal, State, and local offices and on State and local issues is regulated by State laws or, in some cities and a few counties, by local charters. An important exception is that the United States Constitution prescribes the basis of representation in Congress and the manner of electing the President of the United States and grants to Congress the right to regulate the times, places, and manner of electing Federal officers.

The election of the President of the United States is provided for in the Constitution, article II, section 1, through the establishment of an electoral college in each State, for each Presidential election. The method of casting the electoral vote was modified in 1804 by the adoption of the 12th Amendment to the Constitution. The number of electors, and therefore of electoral votes, is "equal to the whole number of Senators and Representatives to which the State may be entitled in Congress." The electors are elected by popular vote in all States. The 22d Amendment to the Constitution, adopted in 1951, limits Presidential tenure to 2 elective terms of 4 years each, or to 1 elective term for any person who, upon succession to the Presidency, has held the office or acted as President for more than 2 years.

The number of members in the House of Representatives is fixed by the Congress at the time of each apportionment; since 1912, it has remained constant at 435. However, the legislation granting Statehood to Alaska and Hawaii allotted 1 Representative to each of the new States and temporarily increased the total of members to 437. The 14th Amendment to the Constitution provides that "Representatives shall be apportioned among the several States according to their respective numbers . . ." The Constitution also requires that each State have at least 1 Representative. Members are elected for 2-year terms, all terms covering the same period.

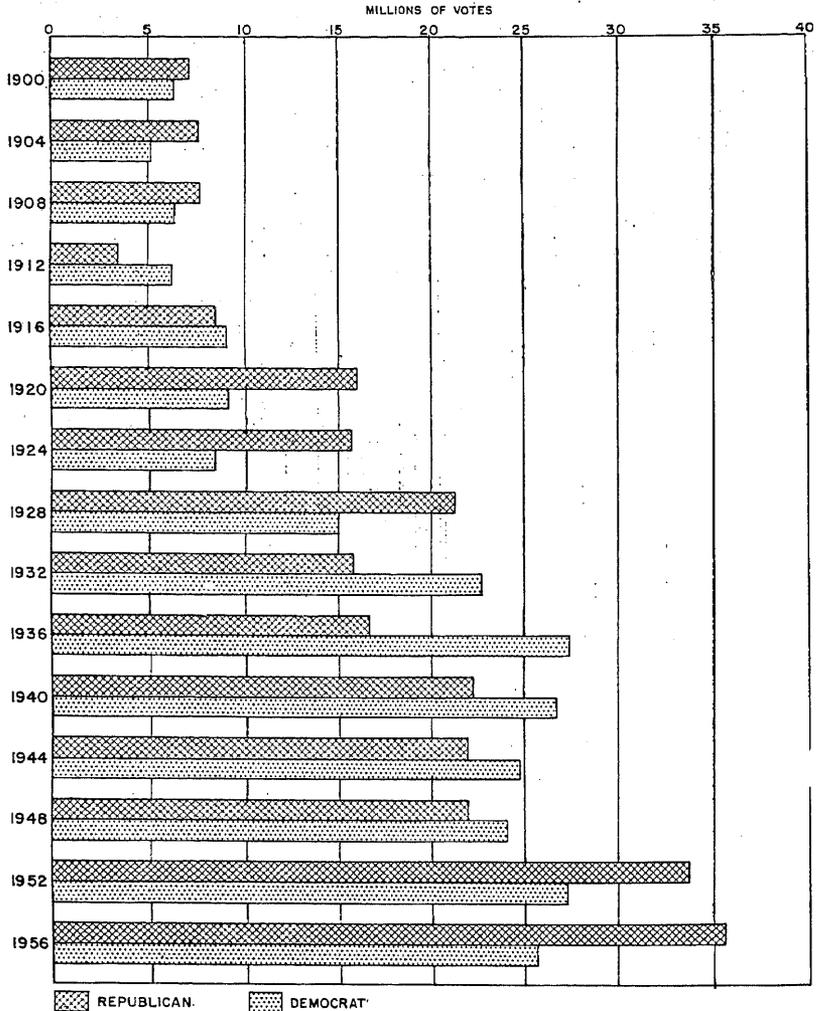

The Senate is composed of 100 members, 2 from each State, who are elected to serve for a term of 6 years. One-third of the Senate is elected every 2 years. Senators were originally chosen by the State legislatures. The 17th Amendment to the Constitution, adopted in 1913, prescribed that Senators be elected by popular vote.

**Alaska and Hawaii.**—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface.

**Historical statistics.**—Tabular headnotes (as “See also *Historical Statistics, Colonial Times to 1957*, series Y 27-31”) provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

<sup>1</sup> Totals for years prior to 1928 exclude votes cast for names not appearing on electoral tickets for parties specified. Totals for 1928-44 exclude void and blank ballots. <sup>2</sup> Democrat-Populist.  
<sup>3</sup> Includes scattering votes; 445 in Iowa; 633 in New Jersey; and 131 in Pennsylvania.  
<sup>4</sup> Included with Miscellaneous are 798 Union votes cast in endorsement of Republican candidate.  
<sup>5</sup> Included with Miscellaneous are 417,418 American Labor votes cast in endorsement of Democratic candidate.  
<sup>6</sup> Included with Miscellaneous are 496,405 American Labor and 329,235 Liberal votes cast in endorsement of Democratic candidate.  
<sup>7</sup> Included with Miscellaneous are 1,169,021 votes for Thurmond (States' Rights Democrats) and 1,156,103 votes cast for Wallace (Progressives, etc.); included with Democratic are 222,662 Liberal votes cast for Democratic nominees.  
<sup>8</sup> Included with Democratic are 416,711 Liberal Party votes cast for democratic candidate.  
<sup>9</sup> For 1888, Union Labor Party; 1892, 1900, and 1904, Populist; 1896, National Democrat; 1908, Populist and Independent; 1912, Progressive; 1916 to 1952, miscellaneous. <sup>10</sup> Socialist-Labor only.  
<sup>11</sup> Includes 4,822,856 votes cast for La Follette and Wheeler, official candidates of both Socialist and Independent Progressive parties. <sup>12</sup> Workers Party. <sup>13</sup> See also table 400.  
<sup>14</sup> Includes minor party votes; and for certain years scattering, void, and blank votes.  
<sup>15</sup> Excludes votes for Georgia; statistics not furnished by State authorities.  
<sup>16</sup> Although the Republican Party received 50.6 percent of the total vote cast, the Democratic Party won a greater number of individual contests for Representatives (221 as against 210 for the Republicans) and thereby retained control of the House of Representatives. <sup>17</sup> Includes Alaska.

No. 457. APPORTIONMENT OF MEMBERSHIP IN HOUSE OF REPRESENTATIVES, BY STATES, FROM ADOPTION OF CONSTITUTION TO 1950

[Population figures used for apportionment purposes are those determined for States by each decennial census. Until 1940, population for apportionment purposes excluded Indians not taxed and until 1870, excluded two-fifths of slaves. Until 1850, apportionment ratios were chosen arbitrarily; 1850 to 1900, ratios were apportionment population of U. S. divided by predetermined number of Representatives; from 1910 on, apportionment ratios shown were computed by dividing fixed number (435) of Representatives into apportionment population but were not used in the original calculations, which were based on priority lists. No reapportionment based on 1920 Population Census. For discussion of apportionment methods, see S. Doc. No. 304, 76th Cong., 3d sess., *A Survey of Methods of Apportionment in Congress*, by Edward V. Huntington]

1 Ratio of apportionment population to Representatives.  
 2 Number of Representatives not to exceed 1 for each 30,000 inhabitants.  
 3 See headnote.  
 4 Membership increased from 233 to 234 by act of July 30, 1852 (10 Stat. L. 25). See footnote 8.  
 5 Membership increased from 233 to 241 by act of Mar. 4, 1862 (12 Stat. L. 353). See footnote 8.  
 6 Membership originally fixed at 233 but increased to 292 by act of May 30, 1872 (17 Stat. L. 192). One member assigned to Colorado after apportionment.  
 7 Includes one member each assigned to Alaska and Hawaii after apportionment.  
 8 Assigned after apportionment.  
 9 Included in apportionment act in anticipation of Statehood.  
 10 Included in the 20 members originally assigned to Massachusetts but credited to Maine after its admission as a State, Mar. 15, 1820 (3 Stat. L. 555).

No. 458. APPORTIONMENT OF MEMBERSHIP IN HOUSE OF REPRESENTATIVES, BY STATES: 1950 AND 1960

[Figures for 1960 are based on projected population by States for April 1. Actual apportionment based on the 1960 decennial census is likely to differ slightly from the estimates shown. See headnote, table 457]

No. 459. PRIMARY ELECTIONS HELD IN SELECTED SOUTHERN STATES: 1956 AND 1958

[Vote in thousands. A primary election is one in which the voters of a political party nominate candidates to run for public office in a general election. Because of the overwhelming supremacy of the Democratic Party in the South, votes cast in the primary elections for Senator or Governor are often a better measure of voter participation than those cast in the general elections]

No. 460. VOTE CAST FOR UNITED STATES REPRESENTATIVES, BY POLITICAL PARTIES, BY STATES: 1954, 1956, AND 1958

[In thousands. In each State, totals represent the sum of votes cast in each Congressional District, except as follows: In Delaware, Nevada, Vermont, and Wyoming, only 1 Representative is elected from the State at large. In New Mexico, North Dakota, and Alaska, 2 Representatives are elected from the State at large. In Connecticut, Texas, and Washington, Representatives are elected by district, except 1 who is elected at large; these at-large votes are not reflected in this tabulation. In numerous States, one or other of the major parties had no candidate in some districts. In those cases where votes of a party, as such, are cast in endorsement of a candidate of another party, the votes are counted as for the endorsing party. See also notes below]

<sup>1</sup> Includes vote cast for minor parties, not shown separately.  
<sup>2</sup> For New York, included in Republican are 17,954 votes cast for Republican-endorsed Democrat in 18th District.  
<sup>3</sup> Includes Alaska and Hawaii; general election held in Alaska on Nov. 25, 1958, and in Hawaii on July 28, 1959.  
<sup>4</sup> Vote for the 5th District only. According to Arkansas law it is not required to tabulate the votes for unopposed candidates.  
<sup>5</sup> A person may be candidate of one or more parties for same office, so that party votes for candidates are not segregable. Party vote shown is computed by assigning to a party total votes for candidates who are members of that party. Source: Governmental Affairs Institute, Washington, D.C.  
<sup>6</sup> Voters entitled to vote for 2 candidates; total ascertained by adding the highest vote received by a single candidate in each political party.  
<sup>7</sup> Includes 171,344 votes cast by minor parties for Liberal-endorsed Democrats.  
<sup>8</sup> Includes 230,434 votes cast by minor parties for Democratic-endorsed candidates and 762 for Republican-endorsed.  
<sup>9</sup> Includes 13,283 votes cast for Democratic-endorsed candidates.

<sup>1</sup> Estimated as of November 1. Figures for Georgia and Kentucky relate to civilians 18 years old and over.<sup>2</sup> Excludes Alaska and Hawaii.<sup>3</sup> Includes 95,745 males in Indian Territory.<sup>4</sup> 1910 and 1920 State figures include foreign-born Negroes (not naturalized) excluded from U. S. totals, but exclude native born of all other nonwhite races included in U. S. totals.<sup>5</sup> Figures for Georgia, where minimum voting age was 18, includes all persons (172,441), citizens and noncitizens, 18 to 20 years of age.<sup>6</sup> The most recently revised total for the United States is 104,697,000.Source: Department of Commerce, Bureau of the Census. 12th Census Reports, *Population*, Vol. I, Pt. 1; 13th Census Reports, *Abstract of the Census*; 14th Census Reports, *Population*, Vol. III; 15th Census Reports, *Population*, Vol. II; 16th Census Reports, *Population*, Vol. II, Pt. 1; *U. S. Census of Population: 1950*, Vol. II, Pt. 1, and *Current Population Reports*, Series P-25, Nos. 143 and 185.

## Section 14

### Federal Government Finances and Employment

This section presents statistics relating to the financial structure and the civilian employment of the Federal Government. The fiscal data cover the essential apparatus of public financing, namely appropriations, taxes, receipts, expenditures, and debt. The personnel data relate to civil staffing and payrolls for the different public functions and agencies, certain employee characteristics, and civil service status.

Principal sources of the fiscal data are *The Budget of the United States Government* published annually by the Bureau of the Budget and the Treasury Department's annual *Combined Statement of Receipts, Expenditures and Balances*, an abstract of the Treasury books relating to all of the receipt and appropriation accounts which report disbursements under the appropriations made by the Congress. The *Annual Report of the Secretary of the Treasury* is a convenient summary of yearly data relating to somewhat broader fields.

The day-to-day cash operations of the Federal Government clearing through the accounts of the Treasurer of the United States are reported in the *Daily Statement of the United States Treasury*. In the issue for the last day of the month the *Statement* contains information as to the public debt receipts and expenditures for the month and the outstanding public debt as of that day.

Receipts and expenditures of the Government classified as to budgetary and non-budgetary transactions and showing the budget surplus or deficit appear in the *Monthly Statement of Receipts and Expenditures of the United States Government*. The monthly *Treasury Bulletin* contains analytical material on fiscal operations and related Treasury activities. Another special aspect of Federal finances is presented in the Treasury Department's monthly *Circulation Statement of United States Money*.

Tax data are compiled by the Internal Revenue Service of the Treasury Department. The *Annual Report of the Commissioner of Internal Revenue* gives a detailed account of tax collections by kind of tax and geographic area. The agency's three annual *Statistics of Income* reports present detailed data from individual income tax returns, corporation income tax returns, and business tax returns; the latter presents income data for sole proprietorships and partnerships along with summary statistics for corporations. Biennial *Statistics of Income* publications present data from fiduciary income tax, estate tax, and gift tax returns.

Federal employment figures are compiled primarily by the Civil Service Commission. The figures are issued by that agency in its regular *Annual Report* and its *Monthly Report of Federal Employment*. The Commission also publishes an annual report on the pay of Federal employees entitled *Pay Structure of the Federal Civil Service* and reports on occupations of both white-collar and blue-collar Federal workers. Data on Federal employment are also issued by the Bureau of Labor Statistics in its *Monthly Labor Review*.

**Treasury receipts and expenditures.**—All receipts of the Government, with a few exceptions, are deposited to the credit of the Treasurer of the United States, irrespective of their ultimate disposition or availability for expenditure. The Treasury Department currently uses two bases for the reporting of receipts: (1) Latest available reports of deposits in government depositories in the general account of the Treasurer of the United States; and (2) collections as reported by government collecting agencies.

Receipts on the first basis are presented in the *Daily Statement of the United States Treasury*, the purpose of which is to report receipts as promptly as possible. Receipts on a collection basis (taxes, customs duties, trust receipts, receipts of certain government corporations and public enterprises) and miscellaneous budget receipts which are on the basis of the latest reports of deposits in government depositories are presented in the *Monthly Statement of Receipts and Expenditures of the United States Government*. The *Monthly Statement* also includes deposits or collections in cash accounts of Government agencies held outside the Treasury as well as those in the general account of the Treasurer of the United States. The final statement issued after the close of the fiscal year is held open until all reports have been received covering deposits or collections for that year.

Under the Constitution, no money may be withdrawn from the Treasury unless appropriated by the Congress. The Treasury Department reports Government expenditures on two bases: (1) Checks paid or withdrawals affecting the account of the Treasurer of the United States; and (2) checks issued and cash payments made by disbursing officers. Transactions of the first type are reported in the *Daily Statement* referred to above; items representing interfund or intragovernmental payments are not included. Expenditures of the second type are presented in the *Monthly Statement*, mentioned above, and in the annual *Combined Statement of Receipts, Expenditures and Balances*, also cited earlier. These monthly and annual reports include payments from cash accounts of Government agencies held outside the Treasury as well as those from the general account of the Treasurer of the United States.

**Treasury budget and nonbudget accounts.**—All receipts of the Government are recorded by the Treasury in accounts classified generally according to the source and according to whether or not the receipts are earmarked in some degree for expenditure. Disbursements of the Government are similarly classified by accounts reflecting various types of authorizations or conditions under which they may be expended.

Budget accounts include: General fund receipts available for financing the general Government operations to the extent appropriations are made by the Congress (sources of general receipts are income, excise, and employment taxes, customs duties, etc.); special fund receipts (earmarked moneys) received subject to special legal authorizations which may be expended only for the particular purpose specified (examples are the Mineral Leasing Act and the National Forest Fund); expenditure (appropriation) accounts which record the amounts authorized by the Congress and expenditures therefrom, for the general support of the Government; revolving and management fund accounts which record funds authorized by specific provisions of law to finance without further action by the Congress a continuing cycle of operations, with receipts derived from such operations, and to facilitate accounting for and administration of intragovernmental operations.

Nonbudget accounts include: Trust accounts which record the receipt and expenditure of moneys held in trust by the Government for the benefit of individuals or classes of individuals, such moneys being expended only in accordance with the terms of a trust agreement or statute (examples are Civil Service Retirement Fund, Old-Age and Survivors Insurance Trust Fund, the Highway Trust Fund, etc.); deposit fund accounts which record receipts either held in suspense temporarily and later refunded or transferred to another Government account, or held by the Government as banker or agent and paid out at the owners' direction (example is account for the accumulation of taxes withheld from employees' salaries). Funds in nonbudget accounts have no effect on the budget surplus or deficit.

**Foreign currency operations.**—Transactions relating to foreign currencies acquired by the Government, without the payment of dollars, are not included in reports of dollar appropriations and therefore are reported as a separate and distinct Government activity. Such currencies are primarily generated under the Mutual Security

Acts, as amended, the Agricultural Trade Development and Assistance Act, as amended, Surplus Property and Lend-Lease Acts, etc.

**Public and private debt.**—These data appear annually in the May issue of the monthly *Survey of Current Business* of the Department of Commerce. Net public and private debt outstanding is a comprehensive aggregate of indebtedness of borrowers after elimination of certain duplicating governmental and corporate debt. This measure of indebtedness provides a more significant indication of trends in debt structure than does gross debt, since effects of nominal changes in financial practices and organization are largely removed. To obtain net figures, gross or total debt is adjusted for specific types of duplications pertaining to the following: (1) Federal Government and its corporations and agencies generally; (2) State and local governments; and (3) within the corporate area, those affiliated corporations which operate under a single management. In the noncorporate private area, data are gross throughout with no adjustments for duplications.

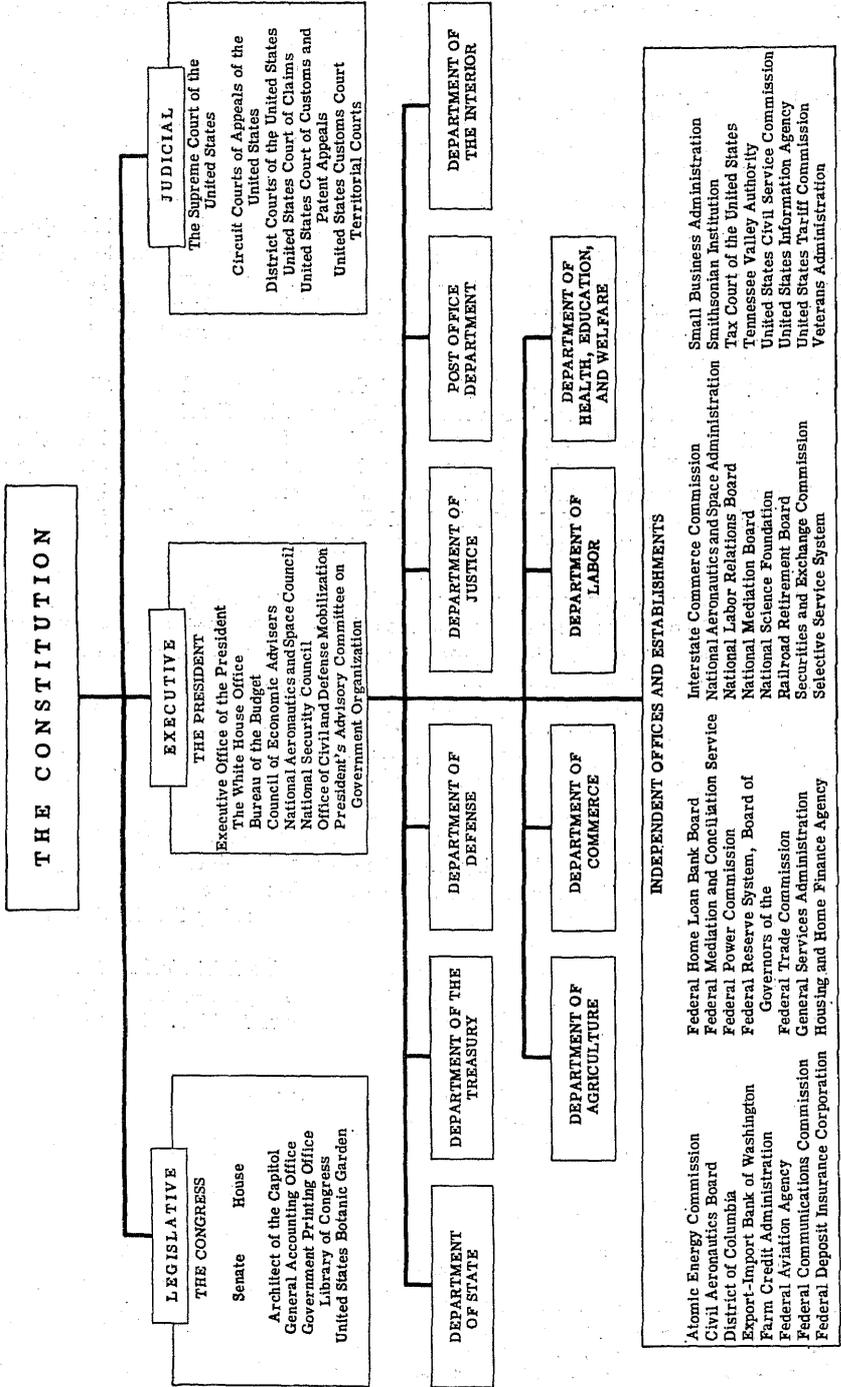

**Employment and payrolls.**—Employment data are collected from all departments and agencies of the Federal Government by the Civil Service Commission. The Commission does not collect personnel statistics from the District of Columbia Government. Employment figures represent the number of persons who occupied civilian positions on the last day of the calendar month shown and who are paid for personal services rendered for the Federal Government, regardless of the nature of appointment or method of payment. Intermittent workers are counted if they performed any service during the report month. Employment totals exclude persons serving without compensation, persons on leave without pay for scheduled periods longer than 30 days, persons in leave status after reduction-in-force, and persons hired informally "on the spot" without formal appointment procedures to cope with fire, flood, or other extreme emergencies.

Federal payrolls include all payments for personal services rendered during the calendar month and payments for accumulated annual leave of employees who separate from the service. Since most Federal employees are paid on a biweekly basis, the calendar month earnings are partially estimated on the basis of the number of work days in each month where payroll periods overlap consecutive months. Monthly payroll totals fluctuate in amount because the number of work days in each month varies from 20 to 23 days. Holidays may be disregarded since Federal employees are paid for the eight national holidays on which they do not work.

**Alaska and Hawaii.**—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, Colonial Times to 1957*, series Y 254-263") provide cross-references, where applicable, to *Historical Statistics Of the United States, Colonial Times to 1957*. See preface.

1958.....	71,936	9,776	10,913	18,437	7,607	25,203	276,343	1,687.60
1959.....	80,697	10,284	11,720	19,033	7,593	32,017	284,706	1,607.36

<sup>1</sup> Excludes debt retirements, refunds of receipts and capital transfers, and beginning 1951, investments of wholly owned Government corporations in public debt securities.

<sup>2</sup> Includes all expenditures (including rivers and harbors and Panama Canal), and Air Force prior to 1949.

<sup>3</sup> Includes expenditures of Office of Secy. of Defense, expenditures for "Govt. corporations (wholly owned), etc. (net)" beginning 1932; expenditures for veterans pensions, and expenditures of Dept. of Defense not segregated as to respective departments beginning 1952.

<sup>4</sup> Represents gross debt as of end of each period; e. g., 1935, 1940, etc.

<sup>5</sup> For comparability with earlier years, all transactions relating to Foreign Economic Cooperation Trust Fund (amounting to \$3,000,000,000) have been consolidated with budget expenditures.

Source of tables 470 and 471: Treasury Department, *Annual Report of the Secretary*; annual and current data published in *Monthly Statement of Receipts and Expenditures of the United States Government*.

FEDERAL GOVERNMENT EXPENDITURES

367

No. 472. FEDERAL GOVERNMENT EXPENDITURES, BY ORGANIZATION UNIT: 1953 TO 1960

[In millions of dollars. For years ending June 30. Expenditures reported on a checks-issued basis. "Budget" receipts, expenditures, and authorizations, as used in this and following tables, are mainly those of general and special accounts. Excluded from both receipts and expenditures are refunds of receipts and transfers from the general fund to trust funds. Budget expenditures also include net transactions (expenditures minus receipts) of wholly owned Government corporations and enterprises; omitted from both expenditures and receipts are transfers of capital between wholly owned Government corporations and the United States Treasury, and debt transactions of Government enterprises (expenditures from public debt authorizations are included). Figures in early years have not been revised to reflect recent changes in organizational structure]

### No. 473. RECEIPTS FROM AND PAYMENTS TO THE PUBLIC BY THE FEDERAL GOVERNMENT: 1930 TO 1961

[In billions of dollars. For years ending June 30. Receipts from and payments to public exclude intragovernmental financial transactions but include operations of trust (including deposit) accounts and Government-sponsored enterprises as reflected on the books of the Treasurer of the United States as well as budget accounts of Federal Government. Net cash borrowing or repayment of borrowing from the public excludes borrowing by Treasury from Federal trust accounts and Government-sponsored enterprises, and also excludes certain types of public debt transactions like issuance and redemption of Armed Forces leave bonds. The public is defined to comprise individuals; banks (including Federal Reserve and Postal Savings System); private corporations; businesses; State, local, and foreign governments; and international organizations. For additional explanation, see 1961 Budget, pp. 897-900 and headnote to table 472. See also *Historical Statistics, Colonial Times to 1957*, series Y 380-383.]

<sup>1</sup> Receipts are net of refunds.

<sup>2</sup> Consists of the increment resulting from reduction in weight of the gold dollar and the seigniorage on silver.

<sup>3</sup> Consists of change in Treasurer's balance through 1953. For years after 1953, also includes change in cash balances held outside the Treasury.

<sup>4</sup> Less than \$50 million.

<sup>1</sup> Beginning January 1951, withheld income taxes and social security employment taxes on employees and employers are paid into the Treasury in combined amounts without separation as to type of tax; figures for prior years have been combined accordingly in this table for purposes of comparison.

<sup>2</sup> Includes tax on business income of exempt organizations.

<sup>3</sup> Excludes \$3,767,000 transferred to the Government of Guam, (\$3,363,000 from individual income and employment taxes and \$404,000 from corporation income and profits taxes) in 1957, \$3,500,000 (all individual income and employment taxes) in 1958, and \$4,343,000 (\$3,967,000 from individual income and employment taxes and \$376,000 from corporation income and profits taxes) in 1959.

	-4	-4	-4	-3	-4	-4	(5)		(5)

<sup>1</sup> Includes miscellaneous taxes in following amounts (in millions): 1957, \$12,091; 1958, \$12,232; 1959, \$12,118.

<sup>2</sup> Includes taxes withheld on salaries and wages. <sup>3</sup> Includes tax on business income of exempt organizations.

<sup>4</sup> Includes collections for D. C.; separate data not available. <sup>5</sup> Under \$500,000.

<sup>6</sup> Effective Jan. 2, 1957, revised accounting procedures provide for the central reporting, by the Treasury Bureau of Accounts, of amounts of depository receipts issued in national totals only.

<sup>7</sup> Collections are adjusted to exclude amounts originally deposited in the U. S. Treasury and subsequently transferred to the Government of Guam, in accordance with Public Law 630, approved Aug. 1, 1950.

<sup>1</sup> Actual tax liability on selected net incomes and necessary assumptions.  
<sup>2</sup> Provisions of 1926 Act were retroactive to 1925.  
<sup>3</sup> Normal tax rates of 1928 Act were reduced for 1929 only by Joint Resolution of Congress, No. 133, approved Dec. 1929.  
<sup>4</sup> Rates and exemptions for 1936 and 1938 Acts were identical and resulted in the same tax liabilities.  
<sup>5</sup> Includes defense tax.  
<sup>6</sup> Tax liabilities for 1942 and 1943 unadjusted for transition to current payment basis.

<sup>7</sup> Includes net Victory tax. Computed by assuming that deductions are 10 percent of Victory tax net income; i. e., that Victory tax net income is ten-ninths of selected net income.

<sup>8</sup> Individual Income Tax Act of 1944.

<sup>9</sup> Taking into account maximum effective rate limitation of 77 percent.

<sup>10</sup> Excludes self-employment tax.

<sup>11</sup> Internal Revenue Code of 1954.

<sup>12</sup> Split income basis.

<sup>13</sup> Tax liability divided by stated net income.

Other sources <sup>10</sup> .....	do.	748	595	1,000	793	1,298

<sup>1</sup> Net income for 1940.

<sup>2</sup> Income and defense tax before credits for 1940; income tax after credits beginning 1945.

<sup>3</sup> Joint returns counted twice for percent of population filing.

<sup>4</sup> Exemptions 1940: Married \$2,000, single \$800, each dependent \$400. Exemptions 1945: Married \$1,000, single \$500, each dependent \$500. Exemptions 1950 and after: Joint return \$1,200, single \$600, each dependent \$600, additional exemption for taxpayer, and his spouse on joint return, of \$600 if blind and \$800 if age 65 or over.

<sup>5</sup> This is the income tax base for all taxable returns whether or not reported on the return.

<sup>6</sup> Not available.

<sup>7</sup> Beginning 1955, salaries after sick pay exclusion.

<sup>8</sup> Beginning 1955, dividends after exclusions.

<sup>9</sup> For 1945 and 1950 only, business profit or loss after net operating loss deduction.

<sup>10</sup> Comprises all income subject to income tax not elsewhere listed and includes wages not subject to income tax withholding, dividends, and interest not exceeding a total of \$100 per return reported on Form W-2 for 1945 and 1940A for 1950 and later years. However, for 1955-57, this income has been reduced by net operating loss deduction which is a component of adjusted gross income.

<sup>1</sup> Exemption allowed for income tax purposes; includes the per capita exemption of \$600 for the taxpayer, his spouse on a joint return, and each dependent, together with additional exemptions for taxpayer, and his spouse on a joint return, of \$600 if blind and \$800 if age 65 or over.

<sup>2</sup> This is the income tax base for all taxable returns whether or not reported on the return.

<sup>3</sup> Income tax as percent of taxable income.

### No. 488. CORPORATION INCOME TAX RETURNS—SUMMARY: 1935 TO 1957

[Money figures in millions of dollars. Represents returns covering accounting periods ending between July 1 of year shown and June 30 of following year. Includes data for Alaska, D.C., and Hawaii; based on income tax returns as filed, prior to audit adjustments or other changes made after returns were filed as permitted by law. All corporations are required to file returns except those specifically exempt, such as fraternal, civic, and charitable organizations not operating for profit. Excludes returns of inactive corporations, except as noted. See source publications for changes in law affecting comparability of historical data. Beginning 1955, based on a probability sample. Corporate data based on income tax returns appear on pp. 381-385, 488-490, 495, and 862. See also *Historical Statistics, Colonial Times to 1957*, series Y 280-291]

Excess profits net income.....		2,998	14,165	25,654			
Adjusted excess profits net income.....		912	3,368	8,985			

<sup>1</sup> Consists of gross sales and receipts from operations, interest less amortizable bond premium, rents, royalties, net gain from capital assets (as defined by law) and other property, dividends, and other taxable income.

<sup>2</sup> Net income (or deficit) is gross taxable income less allowable current year deductions except statutory deductions for dividends and Western Hemisphere trade corporations. Excludes tax-exempt Government interest and, for 1935, dividends from domestic corporations, which are included in total compiled receipts.

<sup>3</sup> Includes defense tax. <sup>4</sup> For tax reported, see above.

**No. 489. ACTIVE CORPORATION INCOME TAX RETURNS—TOTAL COMPILED RECEIPTS, NET INCOME OR DEFICIT, AND TOTAL TAX, BY INDUSTRIAL DIVISIONS: 1935 TO 1957**

[Industrial classification of a return is based on the activity accounting for the largest percentage of total corporate receipts. Diversified activities and filing of consolidated returns by some affiliated groups affect data classified by industry. For changes in classification affecting comparability of data, see *Statistics of Income*, Part 2, for 1938 and 1948. See also headnote and footnotes, table 488.]

<sup>1</sup> Data for nontaxable returns not available.

<sup>2</sup> A return is required of every citizen or resident who during the calendar year made gifts (or who is considered as having made gifts) to any one donee of more than \$3,000 in value or made gifts of future interests in property regardless of value. A nonresident alien is required to file a return if gifts consist of property situated in the U. S.

<sup>3</sup> Not available.

<sup>4</sup> By consent of both spouses who are citizens or residents, gifts of husband or wife to third party may be considered as made one-half by each. Imbalance for 1957 results from omission of nontaxable data.

<sup>5</sup> Exclusions are the first \$3,000 of gifts (other than gifts of future interests) made to any one donee during calendar year. In case of consent to divide gifts between husband and wife, each spouse is allowed an exclusion against his half of the gift to a common donee.

<sup>6</sup> Deduction allowed citizens or residents for gifts made to the donor's spouse.

<sup>7</sup> The specific exemption of \$30,000 less the sum of amounts allowed in prior years may be taken in one year or spread over a period of years, at option of donor. A nonresident alien donor is not entitled to this exemption.

No. 492. FEDERAL ESTATE TAX RETURNS—SUMMARY: 1940 TO 1957

[Includes Alaska and Hawaii. An estate tax return is required to be filed (1) for estate of every citizen and resident alien who died (a) in period Aug. 31, 1935, through Oct. 21, 1942, the value of whose gross estate exceeds \$40,000; and (b) on or after Oct. 22, 1942, value of whose gross estate exceeds \$60,000; and (2) for estate of every nonresident alien who died (a) prior to Oct. 22, 1942, any part of whose estate is situated in U. S., at date of death; and (b) on or after Oct. 22, 1942, only if gross estate situated in U. S., at date of death exceeds \$2,000. The estate of an individual who died in the period June 6, 1932, through Aug. 16, 1954, is subject to 2 Federal estate taxes—basic and additional. Basic tax is computed at rates provided by Revenue Act of 1926, which rates are embodied in Int. Rev. Code of 1939 as basic estate tax. Additional tax is excess of tentative tax computed at rates provided by act in force at date of death, over basic tax. Under the 1954 Code, basic and additional rates were combined into a single tax rate schedule, applying to taxable estate. See also *Historical Statistics, Colonial Times to 1957*, series Y 333-342]

FILING PERIOD <sup>1</sup>	RETURNS FILED		GROSS ESTATE (\$1,000)		NET TAXABLE ESTATE <sup>4</sup> (\$1,000)		TAX <sup>4</sup> (\$1,000)

1957.....	46,473	908	10,293,669	28,884	4,342,072	20,987	1,176,710	4,589

<sup>1</sup> No data compiled for 1946, 1952, 1953, 1956, or 1958.

<sup>2</sup> Excludes returns for estates of nonresident citizens who died prior to May 11, 1934.

<sup>3</sup> Includes returns for estates of nonresident citizens who died prior to May 11, 1934.

<sup>4</sup> Net taxable estate is net estate for additional tax and regular net estate for returns filed under the 1926 and prior acts. Tax shown is total net estate tax liability—the sum of net basic tax and net additional tax—and includes defense tax (10 percent of net tax) effective only for estates of individuals who died in period June 26, 1940, through Sept. 20, 1941.

No. 493. FEDERAL BUSINESS-TYPE ACTIVITIES—PRINCIPAL ASSETS AND LIABILITIES: 1953 TO 1959

[In millions of dollars. As of June 30. Changes in coverage over the period shown have resulted in only minor changes in total loans outstanding but in substantial additions to inventories and to land, structures, and equipment]

<sup>1</sup> Assets are shown on a net basis, i.e., after reserve for losses. Prior to 1959 figures for trust revolving funds include interagency items. <sup>2</sup> Comprises cash, inventories, and all other assets.

<sup>3</sup> Comprises bonds, notes, and debentures payable, privately owned interest (some agencies classified as deposit funds or trust revolving funds have such interest), and other liabilities. Prior to 1959 figures for trust revolving funds include interagency items.

<sup>4</sup> Beginning 1956, includes investment of the Agricultural Marketing Act revolving fund in the banks for cooperatives; Treasury compilations prior to 1956 classified this item as an interagency asset. <sup>5</sup> Less than \$500,000.

<sup>6</sup> Includes \$827 million due under the agreement with Germany signed Feb. 27, 1953, and lend-lease and surplus property balances due the United States in the principal amount of \$1,743 million.

<sup>7</sup> Prior to 1959 was classified as a trust revolving fund.

## No. 494. PUBLIC AND PRIVATE DEBT: 1930 TO 1959

[In billions of dollars. Data as of end of calendar year except State and local government debt as of June 30. Alaska and Hawaii are included in many of the components. See text, p. 363. See also *Historical Statistics, Colonial Times to 1957*, series X 423-434]

### No. 500. CIVILIAN EMPLOYMENT AND PAYROLLS OF THE FEDERAL GOVERNMENT, BY BRANCH: 1929 TO 1960

[Includes data for employees in Alaska, Hawaii, outlying areas of the U.S., and in foreign countries. Monthly employment figures represent number in active-duty status as of last day of month, including intermittent employees who worked during month. Annual employment figures are averages of monthly figures. Payrolls are totals for calendar year or month, as indicated. Excludes employees of Central Intelligence Agency and, beginning August 1959, those of the National Security Agency, for security reasons. Employees of General Accounting Office and Government Printing Office included with legislative branch. See also *Historical Statistics, Colonial Times to 1957*, series Y 241-250, for employment for years ending June 30]

**No. 508. WHITE-COLLAR EMPLOYEES IN THE FEDERAL GOVERNMENT, BY MAJOR OCCUPATIONAL GROUP: 1958**

[As of October 31. Covers full-time employees; includes Alaska, Hawaii, outlying areas of the United States and foreign countries, but excludes foreign nationals overseas. Average grade is median based on employees reported by General Schedule grades; average salary is arithmetic mean based on mean salary for each grade for General Schedule positions and actual salary for those not reported by grades. Employees for whom neither grades nor salaries were reported are included in employment totals but excluded from computation of averages. The General Schedule is a compensation scale for Federal employees set up by the Classification Act of 1949, as amended which established a system of grades 1 to 18 for grouping of positions, based on relative difficulty of duties and responsibilities]

## Section 15

### State and Local Government Finances and Employment

Statistics relating to State and local governments, their numbers, finances, and employment, are compiled on a nationwide basis primarily by the Bureau of the Census. That Bureau conducts a periodic Census of Governments (most recently for the year 1957) involving collection of data for all governmental units in the United States, and annual surveys which cover all the State governments and include a sample of local governments. Reports issued annually by the Bureau of the Census include a *Summary of Governmental Finances* which presents figures for the Federal Government as well as nationwide totals for States and local governments, by type; and series of publications on State finances, city finances, and public employment. A descriptive leaflet, *Bureau of the Census Publications on Governments*, is issued annually.

Basic information for Census Bureau statistics on governments is obtained mainly by mail canvass from State and local officials; however, financial data for each of the State governments and for some of the largest local governments are compiled from their official records and reports by Census Bureau personnel, and classified into uniform categories for statistical reporting.

Statistics regarding particular functions in which State and local governments have an important role are presented in other sections (for example, the sections on Education, Roads and Motor Vehicles, and Social Insurance and Welfare Services).

**Governmental units.**—The governmental structure of the United States includes, in addition to the Federal Government and the States, a total of more than 100,000 distinct units of local government, created or authorized by the States. About half of these are local school districts, but there are large numbers also of county and township governments, municipalities, and numerous kinds of "special districts." The figures for governmental units shown in table 512 include all agencies or bodies having an organized existence, governmental character, and substantial autonomy. While most of these governments can impose taxes, many of the special districts—such as independent public housing authorities, the New York Port Authority, and numerous local irrigation, power, and other types of districts—lack this power but are financed from rentals, charges for services, benefit assessments, grants from other governments, and other nontax sources. The count of governments excludes semi-autonomous agencies through which States, cities, and counties sometimes provide for certain functions—for example, "dependent" school systems, State institutions of higher education, and certain other "authorities" and special agencies which are under the administrative or fiscal control of an established governmental unit.

**Finances.**—Unless otherwise stated, financial data in this section relate to the fiscal years of the respective governments. Federal and State government figures are for fiscal years ending on June 30, except for a few States with other closing dates within the calendar year named. Local government figures are for fiscal years ending in the calendar year specified, except for a few units which close their fiscal years in the succeeding January. Most school districts have fiscal years ending on June 30, but a majority of other local governments operate on a fiscal year ending December 31.

Nationwide government finance statistics must be classified and presented in terms of uniform concepts and categories, rather than according to the highly diverse terminology, organization, and fund structure of individual governments. Accordingly, financial statistics which appear here for individual States and large cities, although based upon the official records and reports of these governments, will not agree directly with figures appearing in such original sources except where particular segments of the official accounts conform explicitly to standard reporting categories.

The framework for these statistics on governmental finances makes a basic distinction between general government, utilities and liquor stores, and insurance trust activities. These are distinguished as to revenue according to the nature of the source involved and as to expenditure according to the purpose of the spending.

The general government sector comprises all activities other than those classified as utility or insurance trust in nature. The utility sector includes only water supply, electric light and power, gas supply, and transit systems operated by local governments, and liquor stores operated by 16 States and by a few local governments. Other kinds of semicommercial activities carried on by some governments are included in the general government category. Insurance trust figures relate to employee retirement, unemployment compensation, and other social insurance systems administered by State and local governments.

Revenue and expenditure reported for each of these sectors and in total, in the basic framework of these statistics, represent only external transactions, and exclude transfers among agencies and funds of the government concerned. Certain internal transactions are shown separately, however, in related tables.

**Employment and payrolls.**—Public employment and payrolls data are primarily from Census Bureau reports based on mail canvassing of State and local governments. Payroll amounts include all salaries, wages, and individual fee payments for the month specified, and employment numbers relate to all persons on governmental payrolls during a pay period of the month covered—including paid officials, temporary help, and (except where otherwise specified) part-time as well as full-time personnel. As in the case of financial data, figures shown for individual governments, such as States, cover major dependent agencies such as institutions of higher education, as well as the ordinary central departments and agencies of the government.

**Alaska and Hawaii.**—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, Colonial Times to 1957*, series Y 386-391") provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

**No. 511. COUNTY, MUNICIPAL, AND TOWNSHIP GOVERNMENTS, 1957, AND THEIR POPULATION, 1950, BY POPULATION SIZE-GROUP**

[Number of governments as of January 1957; population as of April 1950. Excludes Alaska and Hawaii. Township governments include "towns" in the 6 New England States, New York, and Wisconsin]

<sup>1</sup> Includes value of property not subject to classification by type, a relatively insignificant portion for most States, but more than 2 percent for Arkansas (3.3%), Illinois (2.2%), Kentucky (2.5%), Maine (5.1%), North Carolina (4.9%), Pennsylvania (2.2%), Rhode Island (2.1%), and Texas (33.4%, mainly comprising separately assessed mineral rights)

<sup>2</sup> Excludes Alaska and Hawaii.

<sup>3</sup> Includes property not subject to classification by type, mainly, separately assessed mineral rights.

<sup>4</sup> Distribution based on State-equalized values.

<sup>5</sup> Distribution based on "taxable values" rather than on other types of valuations also locally recorded.

## No. 530. ASSESSED VALUE OF PROPERTY SUBJECT TO STATE AND LOCAL

[In millions of dollars. 'Relates to officially recorded or "assessed" values, which should not be interpreted as amounts rounded to the nearest thousand. Excludes value

STATE	TOTAL ASSESSED VALUE		STATE-ASSESSED PROPERTY (ALL SUBJECT TO TAX)				LOCALLY ASSESSED PROPERTY				
	Gross (before exemptions)	Subject to tax (after deduction of exemptions)	Total	Railroads	Other public utilities	All other	Gross assessed value (before exemptions)			Tax-exempt portion

<sup>1</sup> Based on a sample survey of "arms-length" transfers involving taxable real properties for which figures could be obtained on assessed values (from local tax records) and on sales price (from the buyer or seller); excludes sales of newly constructed houses.

<sup>2</sup> Weighted by type and of size of property.

<sup>3</sup> Excludes Alaska and Hawaii. Each of the average ratios shown is geographically weighted according to the State-by-State distribution of locally assessed values for taxable real property.

<sup>4</sup> Not computed.

<sup>1</sup> Federal civilian employment within the U.S. as of September 1959, including employees of the National Guard paid directly from the Federal treasury. Total accordingly differs from Federal employment reported in tables 533 and 534 which pertain to October 1959 and include employees working outside U.S.

<sup>2</sup> Subject to sampling variation.

<sup>3</sup> Based on estimated population as of July 1, 1959.

<sup>4</sup> Data for Federal employees in the District of Columbia are for Washington, D. C., metropolitan area, and include substantial numbers of employees working in suburban locations in Maryland and Virginia.

Source: Department of Commerce, Bureau of the Census; annual report, *State Distribution of Public Employment in 1959*.

**No. 537. STATE AND LOCAL GOVERNMENT EMPLOYMENT AND PAYROLLS, BY TYPE OF GOVERNMENT: 1952 TO 1959**

[For October, except as noted. Beginning 1959, includes Alaska and Hawaii. For payrolls, see also *Historical Statistics, Colonial Times to 1957*, series Y 223-240]

## Section 16

# Banking and Finance

### MONEY AND BANKING

**Banking and monetary system.**—Banks in this country are organized under the laws of both the States and the Federal government. "National" banks organized under Federal law, passed in 1863, are supervised by the Comptroller of the Currency, and State-chartered banks are supervised by officials of the respective States. The Federal Reserve System was established in 1914 to exercise central banking functions, some of which are shared with the United States Treasury. The Reserve System includes national banks and such State banks as voluntarily join the System. The Federal Deposit Insurance Corporation, established in 1934, insures each deposit account up to \$10,000 in banks which are members of the Federal Reserve System and in such nonmember banks as join the insurance fund.

**Condition of banks.**—The Comptroller of the Currency, who has charge of the supervision of national banks, has collected condition reports since 1863 from these banks and since 1897 has tabulated and published summaries of their reports in detail in the *Abstract of Reports of National Banks* (now usually four times a year). The call report data are also summarized in the annual reports of the Comptroller.

After the Federal Reserve System was established in 1914, State bank members of the Federal Reserve System began to submit their statements of condition at the same time and in substantially the same form as national banks. These are consolidated by the Board of Governors of the Federal Reserve System with data for national banks collected by the Comptroller of the Currency into totals for all member banks of the Federal Reserve System, and published in the *Member Bank Call Report* (usually four times a year) and in summary form in the *Federal Reserve Bulletin*.

Beginning with 1947, an all-bank series has been tabulated twice a year by the Federal Deposit Insurance Corporation. A monthly series, based in part on the all-bank series, is prepared and published by the Board of Governors of the Federal Reserve System.

**Currency.**—Currency, including coin and paper money, represents a relatively small part of the total media of exchange in the United States, as most payments are made by check. All currency is now issued by the Federal Reserve Banks and the Treasury.

"Currency in circulation" or "money in circulation" (official *Treasury Circulation Statement*) refers to all coin and paper money outside the Treasury and Federal Reserve Banks, with the exception of gold and silver coin known to have been exported and, beginning with 1934, all gold coin. It includes all coin and paper money held by the public in the United States whether in current active use or held idle—also some currency which, strictly speaking, is not a part of the money supply in the hands of the public, that is, cash in vaults of commercial and savings banks, currency lost or destroyed, and currency carried abroad by travelers. Historical data on the stock of money and money in circulation may be found in the *Annual Report of the Secretary of the Treasury*.

**Government credit agencies.**—Government corporations and credit agencies, operating under mandates and powers given them by the Congress, make available credit of specified types or to specified groups of private borrowers, either by lending directly or by insuring or guaranteeing loans made by private lending institutions.

Statistics on the assets and liabilities of Government credit agencies are published quarterly in the *Treasury Bulletin*. Statistics relating to the operations of Government credit agencies are also available in reports of the individual agencies.

**Private credit agencies other than banks.**—In addition to commercial banks, savings banks, and Government credit agencies, there are a considerable number of other types of credit agencies in the United States. The most important of these are savings and loan associations, insurance companies, finance companies dealing primarily in installment sales financing, credit unions, and personal loan companies. Statistics of savings and loan associations are collected by the Home Loan Bank Board. Statistics on loans, investments, cash, etc., of life insurance companies are collected and published principally by the Spectator Company, which also publishes data on other types of insurance. Federal credit unions are under the supervision of the Bureau of Federal Credit Unions of the Department of Health, Education, and Welfare. Consumer credit data are published currently in the *Federal Reserve Bulletin*.

#### SECURITIES MARKETS

**New issues and retirement of securities.**—Statistical information on new security issues has been provided for many years by the *Journal of Commerce* (since 1906) and the *Commercial and Financial Chronicle* (1919–1957). The statistics of the *Commercial and Financial Chronicle* include, in addition to domestic and foreign corporate issues and State and local government securities, the issues of independent agencies of the United States Government, and of foreign governments and their subdivisions.

A more comprehensive series of new issues with detailed information on the intended uses of net and gross proceeds has been compiled by the Securities and Exchange Commission on a monthly basis since 1934. The data cover substantially all new issues offered for cash sale in the United States in amounts over \$100,000 and with terms to maturity of more than one year. (See tables 597 and 599.) This series is published monthly in the *Statistical Bulletin* of the Securities and Exchange Commission, the *Federal Reserve Bulletin*, and the *Survey of Current Business*.

In addition, the Commission has been compiling statistics since 1933 on changes in security holdings of institutional groups and individuals, and net change in outstanding corporate securities through cash transactions. The latter data are published in the Commission's *Statistical Bulletin* and also in the *Federal Reserve Bulletin*.

**Trading in securities.**—(See tables 588, 590, 591.) Monthly figures on the total value and volume of securities sold on each of the national securities exchanges have been published since October 1934 by the Securities and Exchange Commission. These figures include all sales effected on exchanges except, since March 1944, United States Government issues. They cover odd lots as well as round lots. The Commission also publishes figures on the total daily round-lot volume of trading in stocks on the New York Stock Exchange and the American Stock Exchange, showing short sales and several categories of member and nonmember purchases and sales. Daily odd-lot purchases and sales are reported separately.

**Security price averages.**—Among the most widely known indexes of security prices are the Dow-Jones averages, which provide a continuous series of common stock prices on a daily basis since 1897. This series is now based on 65 common stocks divided into 30 industrial, 20 railroad, and 15 public utility stocks. Indexes of the Standard and Poor's Corporation, available since 1918, are now based on daily closing prices of 500 stocks. (See table 593.) The Securities and Exchange Commission compiles an index of weekly closing prices of 265 stocks listed on the New York Stock Exchange, comprising 37 industry groups. These indexes are published in the Commission's *Statistical Bulletin*, the Council of Economic Advisers' *Economic Indicators*, and the *Federal Reserve Bulletin*.

## INSURANCE

**Insurance statistics.**—The regulation of insurance is in the hands of the various States and the District of Columbia and these bodies collect a great deal of primary information on insurance. The Federal Government does not collect comprehensive statistics on insurance on a national basis. Basic theories and practice are parallel throughout insurance but application of theory and details of practice, including vocabulary, differ enormously by class of insurance and by class of insurer. Sound combination or comparison of figures is often difficult or impossible.

There are a number of published sources for statistics of the various classes of insurance—life, health, fire, marine, and casualty. Individual States collect data on all insurers operating within their respective jurisdictions, and many of the States publish an annual insurance report giving individual company data and aggregates of certain items for the companies operating within the State. Organizations representing certain classes of insurers collect data and publish many studies and reports for these classes. A sourcebook of life insurance company statistics, the *Life Insurance Fact Book*, is published annually by the Institute of Life Insurance. Health insurance data are published by the Health Insurance Council in the annual report, *The Extent of Voluntary Health Insurance in the United States*, and by the Health Insurance Institute in its annual *Source Book of Health Insurance Data*. Another source of insurance statistics is represented by the commercial publishers, such as the Spectator Company and the Alfred M. Best Company. The *Spectator Insurance Year Book*, published annually, contains financial data for individual companies, and the aggregates of each item. The annual *Spectator Accident Insurance Register* contains financial and operating data for individual health and accident insurance companies, including Blue Cross and Blue Shield Plans. Spectator's annual publication *Insurance by States of Fire, Marine, Casualty, Surety and Miscellaneous Lines*, gives less detailed data for other classes of insurance. *Best's Life Insurance Reports* and *Best's Insurance Reports*, fire and casualty edition, both annual publications, give individual company data for all types of life and fire and casualty insurance companies.

**Types of insurance.**—Insurance is traditionally classified as life, fire and marine, and casualty. With some overlapping between classes, an insurer is authorized to write insurance falling into one of these three classes, though the States now permit insurers, other than life, to write all kinds of insurance except life. *Life insurance* and *marine insurance* are each fairly homogeneous, the one having to do with life contingencies, and the other with losses connected with transportation. *Fire insurance*, as such, offers protection against loss by fire, but insurers in that business write several allied classes of insurance, principally against loss by windstorm, by damage to motor vehicles, by damage to aircraft, by sprinkler leakage, by earthquake, and by riot. *Casualty insurance* is a miscellaneous class, the principal subclasses of which are liability insurance (protecting against loss due to claims for damages) and workmen's compensation insurance (protecting an employer against loss due to his obligations under a workmen's compensation law). (See section 10, Social Insurance and Welfare Services.)

---

**Alaska and Hawaii.**—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, Colonial Times to 1957*, series X 266-274") provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

### No. 545. BANKS AND THE MONETARY SYSTEM—CONSOLIDATED CONDITION STATEMENT: 1929 TO 1960

[In millions of dollars. Beginning 1959, includes Alaska and Hawaii. Figures partly estimated. Comprises all commercial and savings banks, Federal Reserve Banks, Postal Savings System, and Treasury currency funds. Treasury funds included are the gold account, Treasury currency account, and Exchange Stabilization Fund. See also *Historical Statistics, Colonial Times to 1967*, series X 266-274, for deposits and currency, end of June]

<sup>1</sup> Excludes gold and silver certificates and Treasury notes of 1890 outside Treasury. Beginning 1940, excludes amount (gold certificates) held for Federal Reserve Banks and agents. These items are excluded since gold and silver held as security against them are included.

<sup>2</sup> Includes reserve against Treasury notes of 1890.

<sup>3</sup> 1940 to date, gold certificates. Amount excluded from total since gold held as security against gold certificates is included in column "In trust against gold and silver certificates."

<sup>4</sup> Includes paper currency held outside United States.

<sup>1</sup> Totals involve duplication to extent that United States notes and Federal Reserve notes, included in full, are in part secured by gold, also included in full. Gold certificates, silver certificates, and Treasury notes of 1890 excluded, since they are complete duplications of equal amounts of gold or silver held as security therefor and included in totals.

<sup>2</sup> By proclamation of the President dated Jan. 31, 1934, weight of gold dollar reduced from 25.8 to 15 $\frac{1}{2}$  grains of gold, 0.9 fine. Hence, value of gold based on \$35 per fine ounce beginning June 1934; theretofore, based on \$20.67 per fine ounce.

<sup>3</sup> Includes paper currency held outside United States.

<sup>4</sup> Gold Reserve Act of 1934, which was culmination of gold actions of 1933, vested in United States title to all gold coin and gold bullion. Gold coin was withdrawn from circulation and formed into bars. Gold coin (\$287,000,000) shown on Treasury records as being then outstanding was dropped from monthly circulation statement as of Jan. 31, 1934.

Source: Treasury Department; *Annual Report of the Secretary; Circulation Statement of United States Money*, published monthly.

**No. 548. DEMAND DEPOSIT ACCOUNTS—BANK DEBITS AND DEPOSIT TURNOVER: 1945 TO 1960**

[Excludes Alaska and Hawaii. Data partly estimated for 1945 and 1950 and comprise only debits or charges to demand deposit accounts of individuals, partnerships, and corporations, and of State and local governments, and payments from trust funds on deposit in the banking department. Excludes debits to U.S. Government deposit accounts, debits to time deposit accounts, and payments of certified and officers' checks, payments in settlement of clearing house balances, charges to expense and miscellaneous accounts, corrections and similar charges, and debits to the accounts of banks, that is, to interbank accounts. See also *Historical Statistics, Colonial Times to 1957*, series X 216-225, for related but not comparable data]

No. 550. ALL ACTIVE BANKS—PRINCIPAL ASSETS AND LIABILITIES, BY CLASS OF BANKS: 1900 TO 1958

[Money figures in millions of dollars. As of June 30 to 1930; Dec. 31, thereafter. Includes banks in Alaska, Hawaii, Puerto Rico, Philippine Islands (through 1940), and beginning with 1940, those in Virgin Islands, Canal Zone, Guam, and American Samoa. Figures for mutual savings banks include some stock savings banks for years prior to 1910 and also a few in several more recent years. Statistics for private banks cover only banks under State supervision and those voluntarily reporting. See also *Historical Statistics, Colonial Times to 1957*, series X 20-96, for related but not comparable data]

CLASS OF BANK AND YEAR	Number of banks	Total assets or liabilities <sup>1</sup>	SELECTED ASSETS			SELECTED LIABILITIES

<sup>1</sup> Reciprocal interbank demand balances with banks in U. S. are reported net, beginning 1945.

<sup>2</sup> Acceptances of other banks and bills of exchange or drafts sold with endorsements are excluded for national and State banks beginning with 1920 and for other banks beginning with 1930.

<sup>3</sup> Securities borrowed excluded for national banks beginning with 1910 and for other banks beginning with 1930. Not reported separately for prior years.

<sup>4</sup> Includes lawful reserve and exchanges for clearing house. Beginning 1940, excludes cash items not in process of collection.

<sup>5</sup> Beginning 1940, includes capital notes and debentures in banks other than national.

<sup>6</sup> Interest, taxes, and other expenses accrued and unpaid are excluded for national banks beginning with 1920 and for other banks beginning with 1930. Beginning 1951, includes book value of capital notes and debentures of mutual savings banks.

<sup>7</sup> Includes loan and trust companies, and with some exceptions (see headnote), stock savings banks.

No. 552. ALL BANKS—PRINCIPAL ASSETS AND LIABILITIES AND NUMBER OF BANKS, BY CLASS OF BANK: 1940 TO 1960

[Money figures in millions of dollars. As of December 31, except as indicated. Includes all banks in the United States. Beginning with 1959, figures include all banks in Alaska (one member bank was previously included); and beginning August 1959, figures include all banks in Hawaii (one member bank had been included since April); added banks had total assets of \$900 million on December 31, 1959. All banks comprise all commercial banks and all mutual savings banks. Commercial banks comprise all nonmember commercial banks and all Federal Reserve System member banks (including one bank in the Virgin Islands that became a member on May 31, 1957). Stock savings banks and nondeposit trust companies are included with commercial banks. Comparability of figures for classes of banks is affected somewhat by changes in Federal Reserve membership, insurance status, and the reserve classifications of cities and individual banks, and by mergers, etc. For figures on all active banks, including those in outlying areas, see table 550. See also *Historical Statistics, Colonial Times to 1967*, series X 20-41 and X 95-128, for related but not comparable data]

<sup>1</sup> Adjusted to December 31, 1959.

<sup>2</sup> Includes principal disbursements in all cases; in deposit payoff cases also includes field payoff expenses and other insurance expenses; in deposit assumption cases includes advances for asset protection, liquidation expenses, and other insurance expense; excludes \$89,000 of expenses which could not be allocated to individual cases.

<sup>3</sup> Disbursement totals for each year relate to cases occurring during that year and may thus contain some amounts disbursed in subsequent years for such cases.

### No. 564. BANK SUSPENSIONS—NUMBER OF BANKS AND AMOUNT OF DEPOSITS: 1921 TO 1959

[Beginning 1959, includes Alaska and Hawaii. Banks closed either permanently or temporarily, on account of financial difficulties, by order of supervisory authorities or by directors of bank. "Member," refers to membership in Federal Reserve System. All national banks are Federal Reserve System members; all Federal Reserve System members are insured. See also *Historical Statistics, Colonial Times to 1967*, series X 165-178.]

No. 573. FEDERAL HOME LOAN BANK SYSTEM—MEMBER INSTITUTIONS: 1950 TO 1959

[Money figures in millions of dollars. Includes Alaska, Hawaii, Guam, and Puerto Rico. Federal Home Loan Bank System is composed of savings and loan associations, savings banks, and insurance companies engaged in home financing. Federal Home Loan Banks provide a permanent reserve credit system for member institutions. The Banks are privately owned by their members and are entirely self-sustaining. Federal Home Loan Bank Board supervises the operations of the 11 Federal Home Loan Banks, and of the Federal Savings and Loan Insurance Corporation, and charters and regulates Federal savings and loan associations. See also *Historical Statistics, Colonial Times to 1957, series N 188, for advances outstanding*]
