United States
1966**

87th Annual Edition

Prepared under the direction of
EDWIN D. GOLDFIELD
Chief, Statistical Reports Division

U.S. DEPARTMENT OF COMMERCE
John T. Connor, Secretary
BUREAU OF THE CENSUS
A. Ross Eckler, Director

BUREAU OF THE CENSUS

A. ROSS ECKLER, *Director*

HOWARD C. GRIEVES, *Deputy Director*

MORRIS H. HANSEN, *Assistant Director for Research and Development*

ACKNOWLEDGMENTS

This edition of the *Statistical Abstract* was prepared under the direction of Edwin D. Goldfield, Chief, Statistical Reports Division. William Lerner, Assistant Chief, was responsible for general supervision, planning of content, and review. Helen E. Teir was responsible for compilation, assisted by Juanita A. Wright for technical editorial work and Minerva K. Moreland for editing and clerical operations.

The cooperation of the many contributors to this volume is gratefully acknowledged. The list of sources of tables (pp. 991-996) and the source note below each table credit the various government and private agencies which have collaborated in furnishing information for the *Statistical Abstract*.

In a few instances, contributors have requested that their data be designated as subject to copyright restrictions. The source notes to the tables affected include a copyright notice. Permission to use copyright material should be obtained directly from the copyright owner.

JULY 1966.

Library of Congress Card No. 4-18089

SUGGESTED CITATION

U.S. Bureau of the Census, *Statistical Abstract of the United States*:
1966. (87th edition.) Washington, D.C., 1966.

PREFACE

The *Statistical Abstract of the United States*, published annually since 1878, is the standard summary of statistics on the social, political, and economic organization of the United States. It is designed to serve as a convenient volume for statistical reference and as a guide to other statistical publications and sources. The latter function is served by the introductory text to each section, the source notes appearing below each table, the Guide to Sources, the section on Publications of Recent Censuses, and the Guide to State Statistical Abstracts.

This volume includes a selection of data from many statistical publications, both governmental and private. Publications cited as sources usually contain additional statistical detail and more comprehensive discussions of definitions and concepts than can be presented here. Data not available in publications issued by the contributing agency but obtained from the agency's unpublished tabulations and records are identified in the source notes as "unpublished data." More information on the subjects covered in tables so noted may generally be obtained from the contributing agency.

Except as otherwise indicated, figures are for the United States as presently constituted. Although emphasis in the *Statistical Abstract* is given primarily to national data, many tables present data for regions and individual States. Statistics for the Commonwealth of Puerto Rico and for outlying areas of the United States are included in the State tables whenever available and are supplemented by information in section 32. Statistics for cities or other relatively small geographic units appear only in a few instances. Additional information for cities, counties, metropolitan areas, congressional districts, and other small units, as well as more historical data, are available in various supplements to the *Abstract*. (See pages V and VI).

Changes in the 1966 edition.—This edition, the 87th annual issue, presents data for the most recent year or period available during the early part of 1966.

Each year the more than 1,300 tables and charts are reviewed and evaluated. New tables and charts of current interest are added, continuing series are brought up to date, and less timely data are curtailed or eliminated. Text notes are revised as necessary to incorporate new definitions and source references. The text for section 3, Immigration and Naturalization, was substantially revised this year to take account of the new preference system for immigrants covered by the immigration act that became effective in December 1965. Likewise, the text for section 10, Social Insurance and Welfare Services, was revised to cover new legislation effective in July 1966 providing protection against costs of medical care in old age.

Newly released information contained in this edition includes data on employment, taxable payrolls, and reporting units under the Social Security Act, abstracted from *County Business Patterns, 1964* (tables 682-685); data from the 1963 Census of Commercial Fisheries (tables 1023 and 1024); and data from the 1963 Censuses of Business, Manufactures, and Transportation (tables 826, 834, 1206, and 1219) supplementing those presented in the 1965 edition. New tables on subjects of particular current interest include more data on the Negro population than were available previously (tables 23, 155, 324, and 476); data on museums and symphony orchestras (tables 299 and 300); and data on sports not previously covered (table 298). More data are also included on automobiles and on motor-vehicle accidents (tables 822, 823, and 828-830).

Altogether, there are 66 entirely new tables in this edition, scattered through 21 of its 33 sections. In addition to the tables specified above, significant inclusions in various sections are 5 new tables on crime and law enforcement in section 5; 2 on military forces in section 9; 11 new tables on social welfare in section 10; and 7 new tables on research and development in section 20.

Following is a list of some of the subjects covered by the new tables:

Population projections to 2015 (p. 8)	Sales of capital assets by individuals (p. 402)
Population of 55 large SMSA's, 1964 (p. 17)	Federal blue-collar workers (p. 411)
National health expenditures (p. 69)	Municipal police departments (p. 437)
Per capita expenditures for medical care (p. 70)	Bank mergers (p. 449)
Heart disease in adults (p. 82)	Property and liability insurance (p. 480)
Average heights and weights of adults (p. 87)	Reporting units under Social Security Act (pp. 488-491)
Schooling, white and Negro population (p. 113)	Changes in fixed capital stock (p. 499)
Characteristics of classroom teachers (p. 126)	Mergers and acquisitions in manufacturing and mining (p. 502)
Expenditures for police protection (pp. 152, 153)	Households with telephones (p. 516)
Juvenile court cases (p. 157)	Newspapers and periodicals (p. 522)
National Park system (p. 204)	Mineral energy consumption (p. 528)
Museums and symphony orchestras (p. 211)	Industrial research and development (p. 544)
Salaries in private industry (p. 230)	R&D scientists and engineers (p. 546)
Farm wage workers (p. 242)	Science and engineering at universities (p. 547)
Military personnel procurement (p. 262)	Federally employed scientists and technicians (p. 547)
Major military forces (p. 264)	Scientists, number and salaries (p. 550)
Income of aged population (p. 286)	Enrollment for advanced degrees (p. 551)
Social security benefits to retired workers (p. 291)	High school enrollment in science and mathematics (p. 551)
Reasons for retirement (p. 291)	Businesses dependent on motor vehicles (p. 573)
Long-term disability benefits (p. 292)	Factory installation of automobile equipment (p. 573)
Public assistance expenditures (p. 304)	Cars and trucks, by age (p. 574)
Income of white and Negro families (p. 338)	Motor-vehicle accidents (pp. 576, 577)
Voter participation, 1964 (p. 382)	Forest land (p. 678)
Expenditures for political broadcasts (p. 382)	Commercial fishing (pp. 690, 691)
Federal property (pp. 395, 396)	Retail sales by merchandise lines (p. 813)
	Merchant wholesalers (p. 828)

Of the tables included in the 1965 edition, 62 were omitted from this issue. The omissions, scattered through 22 sections, represent tables for which comparable details appear in the new or retained tables or for which no recent data are available.

Responsibility.—The contents of this volume were taken from a large number of sources (see "Source Agencies and Table Numbers"). The Bureau of the Census cannot accept the responsibility for the accuracy or limitations of the data presented here, other than for those which it collects. The responsibility for selection of the material and for proper presentation, however, rests with the Bureau.

SUGGESTIONS AND COMMENTS

Many persons have offered suggestions for improving the presentation of data in the *Statistical Abstract* and its supplements. Their comments have been most helpful. Users of these publications are urged to continue to make their needs known for consideration in planning future editions. Suggestions and comments should be sent to the Director, Bureau of the Census, Washington, D.C., 20233.

FOR ADDITIONAL INFORMATION ON DATA PRESENTED

Please write to the agency indicated in the source note to the table which covers the desired subject. Write to the Bureau of the Census only if it is cited as the source.

STATISTICAL ABSTRACT SUPPLEMENTS

Pocket Data Book, USA, 1966-67. Scheduled for release in late 1966. Graphic and tabular presentation of summary statistics on a wide variety of subjects. Designed for quick and easy reference. In color; pocket-size; approximately 350 pp.; paperbound.

Directory of Federal Statistics for Local Areas, 1966. Scheduled for release in late 1966. A comprehensive finding guide to sources of Federal statistics for metropolitan areas, counties, urban places, and other local areas. Specific sources shown for hundreds of items of information on agriculture, banking, business, construction, governments, housing, income, labor, manufactures, mineral industries, population, transportation, and other subjects. Approximately 125 pp.; paperbound.

County and City Data Book, 1962. A compact presentation of 161 items of statistical data for each county in the United States, and 163 items for each of 676 incorporated cities having 25,000 inhabitants or more in 1960. Information comparable to that for counties is also presented for geographic regions and divisions, States, and standard metropolitan statistical areas, with selected data for urbanized areas and unincorporated places. Items included based largely on results of 1960 censuses of population and housing, 1957 census of governments, 1958 censuses of business, manufactures, and mineral industries, and 1959 census of agriculture. Includes 53 maps, explanatory and definitive text, and source notes. 705 pages. Issued 1962. Price \$5.25 (clothbound).

County and City Data Book, 1966. Scheduled for release in late 1966. Contains data similar to those in the 1962 edition, with emphasis on the newly available 1962 census of governments, 1963 censuses of business, manufactures, and mineral industries, and 1964 census of agriculture, as well as data from the 1960 censuses of population and housing. (No data for urbanized areas or unincorporated places.) Approximately 700 pp.; clothbound.

(Continued on page VI)

STATISTICAL ABSTRACT SUPPLEMENTS

(Continued)

Congressional District Data Book (Districts of the 88th Congress) and Supplements, Redistricted States. The *Data Book* together with supplements for 7 States that redistricted after the beginning of the 88th Congress present data for all congressional districts as constituted for the 89th Congress. Includes 254 statistical items for all 435 congressional districts; 113 items pertaining to nonwhite population for selected districts; and 144 items for districts or combinations of districts following county lines. Based largely on results of recent censuses. Includes text, source notes, maps for each State showing congressional district boundaries, and lists of urban places with 10,000 or more inhabitants. **Supplements for States redistricting for the 90th Congress** contain data on vote cast, 1954 to 1964, 226 statistical items on population and housing for all districts, 113 items pertaining to the nonwhite population for selected districts, and maps showing the new district boundaries. *Data Book* (clothbound) 603 pages, issued 1964; *Supplements* (paper) 89th Congress, issued 1965; 90th Congress, in process, 1966. Price—*Data Book* and *Supplements* \$4.75.

Historical Statistics of the United States, Colonial Times to 1957. Prepared with the cooperation of the Social Science Research Council. A compilation of more than 8,000 statistical time series, largely annual, on American social and economic development covering periods from 1610 to 1957. Includes definitions of terms and descriptive text. Specific source notes provide a basic guide to original published sources for further reference and additional data. Detailed alphabetical subject index. 801 pages. Issued 1960. Price \$6.00 (clothbound).

Historical Statistics of the United States, Colonial Times to 1957; Continuation to 1962 and Revisions. Carries forward the more than 6,000 series in the basic volume that are still current; includes about 300 series that are complements to, or substitutes for, series discontinued since 1956; and presents revisions and corrections for more than 650 series. 158 pages. Issued 1965. Price \$1.00 (paperbound).

Purchase orders should be addressed to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

CONTENTS

	Page
<i>Fig. I. Map of the United States, showing Census divisions and regions.</i>	xii
Sec. 1. POPULATION.	1
Censuses, current surveys, and projections—Geographic distribution—Urban and rural—Sex—Age—Race—Nativity and parentage—Marital status—Mobility status—Migration—Households and families—Institutional population—Religious bodies.	
<i>Fig. II-IV. Estimated and projected population; Families, by number of children; Center of population for conterminous U.S.</i>	
Sec. 2. VITAL STATISTICS, HEALTH, AND NUTRITION.	43
Births—Reproduction rates—Fertility—Life expectancy—Deaths—Marriage and divorce—Physicians, dentists, and nurses—National health expenditures—Medical care expenditures—Medical costs for the aged—Hospitals—Mental hospitals, clinics, and institutions—Medicinals—Health conditions—Diseases—Accidents and injuries—Nutrition—Federal food programs.	
<i>Fig. V. Vital statistics rates.</i>	
Sec. 3. IMMIGRATION AND NATURALIZATION.	89
Immigration quotas—Characteristics of immigrants—Displaced persons and refugees—Aliens—Cuban Refugee Program—Migratory workers—Passports issued—Passengers arriving and departing—Naturalization.	
<i>Fig. VI-VII. Immigrants admitted; Nonimmigrants admitted.</i>	
Sec. 4. EDUCATION.	104
Types of schools—Enrollment—Projections—Years of school completed—Income, by education—School dropouts—Elementary and secondary schools—Segregation-desegregation—High school graduates—Institutions of higher education—Degrees conferred—Public library systems—Vocational programs—Federal aid.	
<i>Fig. VIII. Current expenditure per pupil, by States.</i>	
Sec. 5. LAW ENFORCEMENT, FEDERAL COURTS, AND PRISONS.	145
Major crimes—Crime rates—Crimes, by area—Arrests—Police protection and correction—Federal courts—Juvenile delinquency—Lawyers—Juvenile facilities—Prisoners—Executions.	
<i>Fig. IX-X. Prisoners present in Federal and State prisons; Crimes known to the police.</i>	
Sec. 6. AREA, GEOGRAPHY, AND CLIMATE.	167
Territorial expansion—Coastline—Land and water areas—Rivers—Lakes—Altitudes—Storms and floods—Water use and supply—Fluoridation—Air pollution—Dates of freeze—Temperature—Precipitation—Snow and sleet—Sunshine—Wind speed—Relative humidity—Degree days.	
<i>Fig. XI. Territorial expansion of the United States.</i>	
Sec. 7. PUBLIC LANDS, PARKS, RECREATION, AND TRAVEL.	195
Public domain—Land ownership—Federal real property—Leases, permits, and licenses—Entries and patents—Indian lands—National parks and forests—State, county, and municipal parks—Public recreation expenditures and areas—Fishing and hunting—Recreational expenditures and activities—Domestic and foreign travel.	
<i>Fig. XII-XIII. Land owned by the Federal Government; National travel.</i>	

	Page
Sec. 8. LABOR FORCE, EMPLOYMENT, AND EARNINGS.....	214
Employment status—Projections—Unemployment—Employment, by industry—Multiple job-holders—Female labor force—Occupations, by color, sex, earnings, and age—Output indexes—Production worker earnings and hours—Supplementary wage benefits—Farm employment—Wage rates—Labor turnover—Injuries—Union membership—Workers commuting—Work stoppages.	
<i>Fig. XIV. Trends in the labor force.</i>	
Sec. 9. NATIONAL DEFENSE AND VETERANS AFFAIRS.....	250
Defense expenditures—Military procurement—Defense-related employment, contracts, and payrolls—Military assistance—Civil defense—Fallout shelters—War service and casualties—Military personnel—Pay rates—Ships—Aircraft—Selective service—Veterans and veterans benefits.	
<i>Fig. XV–XVI. National defense budget expenditures; Selective service registrants.</i>	
Sec. 10. SOCIAL INSURANCE AND WELFARE SERVICES.....	276
Public expenditures—Federal grants—Population 65 and over—Old-age, survivors, disability, and health insurance—Pension funds and plans—Public retirement systems—Railroad retirement and other benefits—Unemployment insurance—Public employment offices—Workmen's compensation—Public assistance—Maternal and child welfare services—Boy Scouts and Girl Scouts—Vocational rehabilitation—United Fund and Red Cross—Foundations.	
<i>Fig. XVII. Social welfare expenditures.</i>	
Sec. 11. INCOME, EXPENDITURES, AND WEALTH.....	316
Gross national product—Economic growth—Personal consumption expenditures—National income—Personal income—Flow-of-funds accounts—Personal saving—Income of families and individuals—Financial characteristics of families—Poor families—Income distribution by color, sex, and age—Assets of individuals and family units—National wealth.	
<i>Fig. XVIII–XIX. Gross national product and personal income and expenditures; Median money income of families.</i>	
Sec. 12. PRICES.....	348
Purchasing power of dollar—Wholesale price indexes—Consumer price indexes—Cost-of-living indexes—Family budget costs—Residential rent indexes—Unit values of import and export articles—Retail prices and price indexes—Fuel and electricity costs.	
<i>Fig. XX–XXI. Wholesale and consumer price indexes.</i>	
Sec. 13. ELECTIONS.....	366
Electoral and popular vote for President—Vote for U.S. Senators—Apportionment of U.S. Representatives—Vote for U.S. Representatives—Composition of Congress; legislative activity; bills vetoed—Vote for Governors—State legislatures—Southern primaries—Population of voting age—Expenditures for political broadcasts.	
<i>Fig. XXII. Popular vote cast for President.</i>	

Sec. 14. FEDERAL GOVERNMENT FINANCES AND EMPLOYMENT.....

Administrative budget and trust fund—Cash receipts and payments—National income and product accounts—New obligational authority—Subsidies—Federal property—Tax revenue—Income tax returns and rates—Sales of capital assets—Government securities—Public and private debt—Savings bonds—Employment.

Fig. XXIII-XXV. Organization of the Government; Administrative budget; Budget dollar.

Sec. 15. STATE AND LOCAL GOVERNMENT FINANCES AND EMPLOYMENT.....

413

Local governmental units—Federal aid—Tax revenue—Revenue, expenditure, and debt—State finances—City finances—Assessed taxable property—Municipal police—Employment and payrolls.

Fig. XXVI-XXVII. Finances; Per capita tax revenue.

Sec. 16. BANKING, FINANCE, AND INSURANCE.....

443

Money stock and money in circulation—Coin production—Bank mergers—All banks—Federal Reserve banks—Commercial banks—Deposit insurance—Bank suspensions—Farm credit—Mortgages—Home loan banks—Savings and loan associations—Credit unions—Consumer credit—Securities—Stock ownership—Insurance.

Sec. 19. POWER.....

527

Horsepower of prime movers—Energy production and consumption—Electric utilities—Electric energy—Waterpower—Rural electrification—Gas utility and pipeline industries.

Sec. 20. SCIENCE.....

540

Research and development—Scientists, engineers, and technicians—Science and engineering—Science doctorates—High school enrollment—Patents and trademarks—Atomic energy—Space.

Fig. XXXIV-XXXV. Doctorates; NASA expenditures.

Sec. 21. TRANSPORTATION—LAND.....

558

Transport revenues—Intercity traffic—Road mileage—Federal highways—Road finances—Motor fuel—Highway debt—Motor vehicles: Travel, speed, drivers licenses, sales, registrations, employment—Automobiles: Equipment, ownership, insurance—Cars and trucks—Motor-vehicle accidents—Transit industry—Intercity bus lines—Shipments of commodities—Motor carriers—Railroads—Petroleum pipelines.

Fig. XXXVI-XXXVII. Intercity freight traffic; Passenger transportation.

	Page
Sec. 22. TRANSPORTATION—AIR AND WATER.....	588
Civil aviation: Air carriers, accidents, aircraft, airports—Waterborne commerce—International transportation transactions—Commerce of ports, inland waterways, and Panama Canal—Vessels engaged in foreign trade—Shipyard employees and seamen—U.S. merchant vessels—Shipbuilding—U.S. Merchant Marine.	
<i>Fig. XXXVIII-XXXIX. Revenues and expenses of air carriers; Waterborne commerce.</i>	
Sec. 23. AGRICULTURE—FARMS, LAND, AND FINANCES.....	613
Farm population—Farms: Number, acreage, and value—Value of products sold—Color and tenure of operators—Land utilization—Irrigation—Federal reclamation—Drainage—Soil conservation—Fertilizer use—Mortgaged farms—Balance sheet of agriculture—Taxes and insurance—Income and expenditures—Farm prices and price supports—Commodity Credit Corporation—Farm-to-retail price spreads—Farm-operator level-of-living—Farm machinery and equipment—Cooperatives.	
<i>Fig. XL-XLI. Indexes of prices received and paid by farmers; Farm population and number and average size of farms.</i>	
Sec. 24. AGRICULTURE—PRODUCTION, MARKETING, AND TRADE..	639
Indexes of farm output, marketings and consumption, and productivity—Farm labor output per man-hour—Exports and imports—Acreage, production, and value of crops—Field crops—Vegetables and fruits—Canned and frozen foods—Livestock—Meats and lard—Dairying—Poultry—Fats and oils.	
Sec. 25. FORESTS AND FOREST PRODUCTS.....	674
Commercial forest land, growing stock, and live sawtimber—National forests—Tree distribution—Forest fires—Lumber—Roundwood products—Prices—Millwork, wood products, and paints—Naval stores—Pulpwood and paper—Newsprint.	
<i>Fig. XLII-XLIII. Forest land; Lumber production.</i>	
Sec. 26. FISHERIES.....	689
Quantity and value of catch—Fishermen and fishing craft—Commercial fisheries—Catch of principal species—Catch landed at leading ports—Canned and frozen fishery products—Exports and imports of fishery products.	
Sec. 27. MINING AND MINERAL PRODUCTS.....	698
Quantity and value of mineral production—Prices—Supply—Imports and exports—Strategic and critical materials—Employment—Shipments, value added, capital expenditures—Injuries—Coal, petroleum, natural gas—Stone and earth minerals—Metals.	
<i>Fig. XLIV. Indexes of physical volume of mineral production.</i>	
Sec. 28. CONSTRUCTION AND HOUSING.....	732
Value of construction—Building permits—Residential upkeep—Construction costs—Public works expenditures—Construction contracts—Mobile homes—Housing units: Number authorized, location, starts, FHA-insured mortgages, costs, vacancies, occupants, condition, tenure, equipment, rent, value—Public housing—Mortgages—Home loans—Urban renewal.	
<i>Fig. XLV-XLVI. Value of new construction; New nonfarm housing units started.</i>	

Sec. 29. MANUFACTURES.....	Page 762
Manufacturing summary—Production indexes—Industry groups: Firms, employees, value added—Inventories—Employment and output concentrations—Acquisitions—Horsepower—Capital expenditures—Water use—Alcohol and spirits—Tobacco and smoking habits—Textiles and clothing—Leather—Rubber—Chemicals—Glass and clay products—Metal products—Home appliances—Farm machines—Tractors. <i>Fig. XLVII. Industrial production indexes.</i>	
Sec. 30. DISTRIBUTION AND SERVICES.....	808
National income source—Retail trade: Establishments, sales, employees, inventories—Wholesale trade: Establishments, sales, stocks, employees, inventories, public warehousing facilities—Selected services: Establishments, receipts, employees—Motion picture theaters—Hotels—Advertising. <i>Fig. XLVIII-XLIX. National income components; Retail store sales.</i>	
Sec. 31. FOREIGN COMMERCE AND AID.....	841
Balance of payments—International investments—Foreign investments in U.S.—U.S. gold stock, liabilities, foreign currency holdings—Foreign assistance—Foreign trade—Exports and imports in relation to output—Trade by area and country—Indexes of quantity, price, value—Employment due to exports—Dutiable imports. <i>Fig. L-LI. Foreign assistance; Exports and imports.</i>	
Sec. 32. OUTLYING AREAS UNDER THE JURISDICTION OF THE UNITED STATES.....	881
Population characteristics—Vital statistics—Schools—Principal crops—Mineral production—Imports and exports—Puerto Rico: Government receipts and expenditures, employment, manufactures, gross product, personal and net income—Commercial business summary.	
Sec. 33. COMPARATIVE INTERNATIONAL STATISTICS.....	895
World summary—Area and population—Vital statistics and food supply—Gross national and domestic product—Per capita product indexes—European countries: Gross national product, industrial production indexes, foreign trade—Mining and manufacturing indexes—Cost-of-living—Economic indexes—Agricultural production—Labor force—Energy—Manufactures—Foreign trade—Mineral products—Gold and foreign exchange holdings and rates—Transportation—Communications—Housing—Education and health—International organizations: Assessments, financial resources, U.S. contributions.

FIG. 1. MAP OF THE UNITED STATES, SHOWING CENSUS REGIONS AND DIVISIONS

[Alaska and Hawaii are drawn at different scales from contiguous United States and are not shown in their correct relative geographic positions]

Source: Dept. of Commerce, Bureau of the Census.

Section 1

Population

This section presents statistics on the growth, distribution, and characteristics of the population of the United States. The principal source of these data is the Bureau of the Census, which conducts a decennial census of the population and a monthly current population survey and also prepares periodic population estimates. For a listing of specific publications issued, see the Guide to Sources.

Decennial censuses.—The Constitution provides for a census of the population every 10 years, primarily to establish a basis for apportionment of Members of the House of Representatives among the States. For over a century after the first Census in 1790, the census organization was a temporary one. In 1902, the Bureau of the Census was established as a permanent agency of the Government, responsible not only for enumerating the population but also for compiling statistics on other subjects and at other times.

In the 1960 Census, as in previous Censuses, each person was counted as an inhabitant of his usual place of residence (the place where he lives and sleeps most of the time). While this place is not necessarily his legal residence, voting residence, or domicile, the use of these different bases of classification would usually produce substantially the same statistics.

In the last 3 decennial Censuses, some data were obtained from representative samples of the population rather than from a complete count, as follows: 5 percent in 1940, 20 percent in 1950, and 25 percent in 1960. Exact agreement is not to be expected among the various samples, nor between them and the complete count, but the sample data may be used with confidence where large numbers are involved and may be assumed to indicate patterns and relationships where small numbers are involved.

Current Population Survey.—This is a monthly nationwide survey conducted with a scientifically selected sample representing the noninstitutional civilian population. The sample is located in 357 areas comprising 701 counties and independent cities with coverage in every State. About 40,000 housing units and other quarters are designated for the sample at any time, of which about 35,000 (containing 80,000 persons 14 years old and over) are occupied by households eligible for interview; of these, in turn, about 4 to 6 percent are, for various reasons, unavailable for interview. For a discussion of the reliability of estimates based on the sample, see text, p. 215.

Population estimates.—National estimates are derived by use of decennial census data as benchmarks and of data reflecting components of population change available from various agencies as follows: Births and deaths (Public Health Service); immigrants and emigrants (Immigration and Naturalization Service); the Armed Forces (Department of Defense); net migrants (Puerto Rico Planning Board); and Federal employees abroad (Civil Service Commission). State estimates are based on similar data and also on school statistics from State Departments of Education and parochial school systems.

Standard Metropolitan Statistical Areas (SMSA).—The entire territory of the United States has been classified by the Bureau of the Budget as either (a) metropolitan, or "inside SMSA's," and (b) nonmetropolitan, or "outside SMSA's." An SMSA is a county or group of contiguous counties (except in New England) which contains at least one central city of 50,000 inhabitants or more or "twin cities" with a combined population of at least 50,000. In addition, other contiguous counties are included in an SMSA if, according to certain criteria, they are essentially metro-

politan in character and are socially and economically integrated with the central city. In New England, towns and cities rather than counties are used in defining SMSA's. Central cities are those named in the titles of the areas. For a more detailed explanation and a listing of the component areas of each SMSA, see Bureau of the Budget, *Standard Metropolitan Statistical Areas, 1964*. Data on metropolitan-nonmetropolitan residence obtained from the Current Population Survey relate to SMSA's as defined at the time of the 1960 Census of Population.

Urban and rural areas.—According to the 1960 Census definition, the urban population comprises all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, boroughs, villages, and towns (except towns in New England, New York, and Wisconsin); (b) the densely settled urban fringe, whether incorporated or unincorporated, of urbanized areas; (c) towns in New England and townships in New Jersey and Pennsylvania which contain no incorporated municipalities as subdivisions and have either 25,000 inhabitants or more or a population of 2,500 to 25,000 and a density of 1,500 persons or more per square mile; (d) counties in States other than the New England States, New Jersey, and Pennsylvania that have no incorporated municipalities within their boundaries and have a density of 1,500 persons or more per square mile; and (e) unincorporated places of 2,500 inhabitants or more.

Substantially the same definition was used for the 1950 Census, the major difference being the designation in 1960 of urban towns in New England and urban townships in New Jersey and Pennsylvania. In censuses prior to 1950, the urban population comprised all persons living in incorporated places of 2,500 inhabitants or more and areas (usually minor civil divisions) classified as urban under somewhat different rules relating to population size and density. In all definitions, the population not classified as urban constitutes the rural population.

Changes in the size of the urban population from one census to another are affected by 2 components: (a) Growth in areas classified as urban at the beginning of the decade; and (b) reclassification of rural territory as urban. Between censuses, it is possible only to obtain measures of the first component from the Current Population Survey (see p. 1). Measures of the second are too costly. Since about 60 percent of the urban population growth between 1950 and 1960 was attributable to expansion of urban territory, data on the urban population from the Survey may be misleading. Consequently, regular publication of data on urban-rural residence from the Current Population Survey has been discontinued.

Farm and nonfarm residence.—The rural population is divided into "rural-farm," comprising all persons living on farms, and "rural-nonfarm," comprising the remainder. According to the definition used in the 1960 Census, the farm population consists of all persons living in rural territory on places of less than 10 acres yielding agricultural products which sold for \$250 or more in the previous year, or on places of 10 acres or more yielding agricultural products which sold for \$50 or more in the previous year. In the 1950 Census, farm population was determined by answers to the question, "Is this house on a farm (or ranch)?" However, persons on "farms" who paid cash rent for a house and yard only were classified as nonfarm.

Color and race.—The concept of race as used by the Census Bureau is derived from that which is commonly accepted by the general public as reflected in the action of legislative and judicial bodies of the country. It does not, therefore, reflect clear-cut definitions of biological stock, and several categories refer to nationality. "Color" divides the population into white and nonwhite. The nonwhite population consists of Negroes, American Indians, Japanese, Chinese, Filipinos, and all others not classified as white. Persons of Mexican birth or ancestry who are not definitely Indian or of other nonwhite stock are counted as white. Persons of mixed parentage are classified by the race or color of the nonwhite parent.

Mobility status.—Classification of the population by mobility status is based on comparison of an individual's place of residence at the survey or census date with that of a specified earlier date. *Mobile persons or movers* includes all persons living in different houses in the United States at the beginning and at the end of the period. According to their new location, they may be "same county movers" or "different county movers, or migrants." Migrants in turn are classified according to whether they moved within the same State or into a different State. *Nonmobile persons or nonmovers* includes all persons living in the same house in the United States at the beginning and end of the period. *Persons abroad* includes all persons living outside the United States at the beginning of the period.

Nativity.—The category "Native" comprises persons born in the United States, the Commonwealth of Puerto Rico, or a possession of the United States. It also includes persons born in a foreign country or at sea who have at least one parent born in the United States. Persons whose place of birth was not reported are assumed to be native unless their census report contains contradictory information, such as an entry of a language spoken prior to coming to the United States. Persons not having any of the foregoing qualifications are classified as "foreign born."

Household.—A "household" comprises all persons who occupy a "housing unit," that is, a house, an apartment or other group of rooms, or a room that constitutes "separate living quarters." A household includes the head of the household, others in the housing unit related to the head, and also the unrelated persons, if any, such as lodgers, foster children, wards, or employees who regularly live in the house. A person living alone or a group of unrelated persons sharing the same housing unit as partners is also counted as a household. Prior to 1960 a household was defined as all the persons occupying a "dwelling unit." See text, p. 734, for definitions of "housing unit" and "dwelling unit."

Group quarters are living arrangements for persons who do not live in housing units. Examples of group quarters are: A house with at least 5 lodgers, an institution, a college dormitory, or a military barracks.

Family.—The term "family" refers to a group of two or more persons related by blood, marriage, or adoption and residing together. A primary family consists of the head of a household and all other persons in the household related to the head. A secondary family comprises two or more persons such as guests, lodgers, or resident employees and their relatives, living in a household or group quarters (other than such groups among inmates of institutions) and related to each other.

Subfamily.—A "subfamily" is a married couple with or without children, or one parent with one or more children under 18 years old, living in a household and related to, but not including, the head of the household or his wife. Members of a subfamily are also members of the primary family with whom they live. The number of subfamilies, therefore, is not included in the number of families.

Married couple.—A married couple is defined as a husband and his wife living together, with or without children and other relatives.

Unrelated individuals.—"Unrelated individuals" refers to persons (other than inmates of institutions) who are not living with any relatives. A primary individual is a household head living alone or with persons all of whom are unrelated to him. A secondary individual is a person in a household or group quarters such as a guest, lodger, or resident employee (excluding inmates of institutions) who is not related to the head or to any other person in the household or group quarters.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 5. ESTIMATED POPULATION, BY AGE, SEX, AND COLOR: 1965

[In thousands. As of July 1. Total resident population does not contain revisions made in the 1965 estimate shown in table 2. The median is the value which divides the distribution into two equal parts—one-half of the cases falling below this value and one-half exceeding this value]

NA Not available. X Not applicable. Z Less than 0.5 square mile.

¹ Includes estimated population of the Philippines (16,356,000), not shown separately.

² Census taken as of Oct. 1, 1930.

³ Puerto Rico was ceded to the United States by Spain in 1898. On July 25, 1952, pursuant to acts of Congress, it achieved the political status of the Commonwealth of Puerto Rico.

⁴ Not enumerated.

⁵ Enderbury Island uninhabited at time of enumeration.

⁶ Sand Island uninhabited at time of enumeration.

⁷ Little Swan Island uninhabited at time of enumeration.

⁸ Includes Caroline, Christmas, Danger (Pukapuka), Flint, Funafuti, Kingman Reef, Malden, Manahiki, Navassa, Nukufetau, Nukunono, Nurakita, Palmyra, Penrhyn, Rakahanga, Starbuck, Vostok, Phoenix Group (except Canton and Enderbury), and Union (Tokelau) Group, not enumerated in decennial censuses; and Baker, Howland, and Jarvis Islands not inhabited in 1950 and 1960. Quita Sueño Bank, Roneador Cay, and Serrana Bank, claimed by both the United States and Colombia, not enumerated.

⁹ Population of Baker, Howland, and Jarvis Islands. Other islands not enumerated or uninhabited at time of enumeration.

¹⁰ Not enumerated or uninhabited at time of enumeration.

¹¹ Area is for Navassa (2 square miles), Baker, Howland, and Jarvis (combined area 3 square miles), and Palmyra (4 square miles). Excludes Kingman Reef, Quita Sueño Bank, Roneador Cay, and Serrana Bank (each less than 0.5 square mile); area of other islands listed in footnote 8 not available.

¹² Under jurisdiction of United States in accordance with treaty of Nov. 18, 1903, with Republic of Panama.

¹³ Leased (1914) from the Republic of Nicaragua for 99 years.

¹⁴ Figures from Government of Nicaragua. Little Corn Island uninhabited at time of enumeration.

¹⁵ Under the United Nations Trusteeship System with the United States as administering authority since July 18, 1947.

¹⁶ Population 1940, 131,258 (Census of Japan).

¹⁷ Estimated civilian population as of June 30, 1950; see *Current Population Reports*, Series P-25, No. 238, for derivation of estimates.

¹⁸ Census of 1958 conducted by the Office of the High Commissioner. Civilian population; see *Census Report, 1958: Trust Territory of the Pacific Islands*, Office of the High Commissioner, Agaña, Guam, June 1959.

¹⁹ See references in footnotes 17 and 18, above. Comprised of 637 square miles of land area and 7,797 square miles of water area.

²⁰ Excludes United States citizens temporarily abroad on private business, travel, etc. Such persons were enumerated at their usual place of residence in the United States as absent members of households.

²¹ Excludes dependents of Federal employees and crews of merchant vessels.

²² Based on 20-percent sample of reports received.

²³ Represents U.S. citizens abroad for extended periods of time. Since this population was enumerated on a voluntary basis, its coverage is probably less complete than that of other categories of Americans abroad.

² For United States, population of U.S. has been divided by total land area. For each State and Puerto Rico, population at given census has been divided by land area as then constituted, except that 1930 figures are based on revised land areas used for 1940.

Source: Dept. of Commerce, Bureau of the Census; Reports of Fourteenth and Sixteenth Censuses Population, Vol. I, and U.S. Census of Population: 1960, Vol. I.

No. 11. CENTER OF POPULATION: 1790 TO 1960

["Center of population" is that point which may be considered as center of population gravity of the U.S. or that point upon which the U.S. would balance if it were a rigid plane without weight and the population distributed thereon with each individual being assumed to have equal weight and to exert an influence on a central point proportional to his distance from that point]

YEAR	North latitude	West longitude	Approximate location
CONTERMINOUS U.S.¹			
1790.....	39 18 30	76 11 12	23 miles east of Baltimore, Md.
1800.....	39 16 6	76 55 30	18 miles west of Baltimore, Md.
1810.....	39 11 30	77 37 12	40 miles northwest by west of Washington, D.C. (in Virginia).

NO. 12. URBAN AND RURAL PLACES AND POPULATION, BY SIZE OF PLACE: 1910 TO 1960

[Prior to 1960, excludes Alaska and Hawaii. "Previous urban definition" refers to the definition used prior to 1950 when a number of large and densely settled places were not included as urban because they were not incorporated. In 1950, the Bureau of the Census adopted the concept of the urbanized area and delineated boundaries for unincorporated places. All the population residing in urban-fringe areas and in unincorporated places of 2,500 or more is classified as urban according to the "current" definition. See also *Historical Statistics, Colonial Times to 1957*, series A 181-209]

No. 16. POPULATION—METROPOLITAN AND NONMETROPOLITAN RESIDENCE: 1960 AND 1965

[In thousands, except percent. As of April]

RESIDENCE	1960 ¹	1965	Percent increase, 1960 to 1965 ¹	AVERAGE ANNUAL PERCENT INCREASE	
				1950 to 1960 ²	1960 to 1965 ³
Total	178,458	192,185	7.7	1.7	1.5
Standard metropolitan statistical areas ³	112,323	123,813	10.2	2.3	1.9
Central cities	57,790	59,612	3.2	1.0	0.6
Outside central cities	54,533	64,201	17.7	4.0	3.3
Nonmetropolitan areas	66,135	68,372	3.4	0.8	0.7

¹ For comparability with data from the Current Population Survey, figures from the 1960 Census have been adjusted to exclude members of the Armed Forces living in barracks and similar types of quarters.² Based on total population. ³ Covers 212 areas as defined in 1960. See text, p. 1.Source: Dept. of Commerce, Bureau of the Census; *Current Population Reports*, Series: P-20, No. 151.

No. 17. CITIES WITH 100,000 INHABITANTS OR MORE IN 1960—POPULATION, 1910 TO 1960, AND AREA, 1960

[Increase from census to census includes that due to annexation of territory as well as to direct growth. "Cities" refers to political subdivisions which are incorporated as cities, boroughs, towns, or villages with the exception that towns are not recognized as incorporated places in New England States, New York, and Wisconsin. Land area figures, generally supplied by city engineers, have been revised to agree with those in the Bureau of the Census, *Area Measurement Reports*, Series GE-20, where available]

¹ The cities of Madison, Wis., and Rockford, Ill., share the same rank of 96. In order to have the lowest rank equal to the number of cities presented, the number 97 is omitted.² Population shown is for New York City as now constituted.³ Revised population figure for Norfolk is 304,869.⁴ Omaha and South Omaha cities consolidated between 1910 and 1920. Combined population, 1910: 150,355.⁵ Not incorporated in 1910.

1940 (Apr. 1)	34,949	504	1.56	3.77	31,680	3,142	127	90.6
1950 (Apr. 1)	42,857	791	2.06	3.52	39,044	3,633	149	91.2
1960 (Apr. 1)	53,021	1,016	1.92	3.38	47,808	5,153		90.3

X Not applicable. ¹ Computed by compound interest formula.

² Obtained by dividing total population by number of households; hence, not strictly average size of household because total population includes members of quasi-households.

³ Includes small number of hotels, institutions, and other quasi-households. ⁴ Estimated.

No. 39. HOUSEHOLDS, FAMILIES, AND MARRIED COUPLES: 1965 AND PROJECTIONS TO 1980

[In thousands, except average size. Includes members of the Armed Forces living off post or with their families on post, but excludes all other members of the Armed Forces. Data for 1965 based on current definition of a household; projections based on 1960 definition. (See text, pp. 3 and 734.) Figures take account of 1960 Census information on age and sex composition of the population. Projections based on Series II population projections from *Current Population Reports*, Series P-25, Nos. 241 and 251. (See also table 3.) Series A and B assume, in different degrees, increases in the proportion married in each age group. Given the initial projection of marital status for each series, the general method of projection for that series was as follows (except for the number of male primary individuals): A—average annual change from 1950 to 1956-58 in the proportion of persons in each age group who were household heads of a given type was assumed to continue to 1965; one-half assumed for 1965 to 1975; one-quarter assumed for 1975 to 1980. B—one-half the average annual change from 1950 to 1956-58 was assumed for 1965 to 1975; one-quarter assumed for 1975 to 1980; it was assumed that no change would occur thereafter. Projections of the number of male primary individuals were based on average annual change from 1950 to 1960-62. See *Current Population Reports*, Series P-20, No. 123]

No. 45. RELIGIOUS BODIES—CHURCH MEMBERSHIP, NUMBER OF PASTORS, AND SUNDAY SCHOOL ENROLLMENT

Prior to 1950, excludes Alaska and Hawaii. Represents latest information available from religious bodies; excludes a few groups giving no data, such as Church of Christ, Scientist. Totals include, substantially, those religious bodies reporting to Bureau of the Census for Census of Religious Bodies in 1936. Not all groups follow same calendar year nor count membership in same way; some groups give only approximate figures. Roman Catholics count all baptized persons, including infants; Jews regard as members all Jews in communities having congregations; Eastern Orthodox Churches include all persons in their nationality or cultural groups; most Protestant bodies count only persons who have attained full membership, and previous estimates have indicated that all but a small minority of these are over 13 years of age; however, many Lutheran bodies and Protestant Episcopal Church now report all baptized persons, and not only those confirmed]

Section 2

Vital Statistics, Health, and Nutrition

This section presents vital statistics—data on births, deaths, fetal deaths (stillbirths), marriages, divorces—and data on communicable diseases, mental illness, medical care, hospitals, and nutrition. Vital statistics are compiled and published by the Public Health Service in the annual report, *Vital Statistics of the United States*, in certain reports of the *Vital and Health Statistics* series, and in the *Monthly Vital Statistics Report*. Reports in this field are also issued by the individual State bureaus of vital statistics.

Births and deaths.—The collection of death statistics on an annual basis began in 1900. Then the death-registration States consisted of 10 States and the District of Columbia. In 1915, the collection of birth statistics began with 10 States and the District of Columbia. The changing composition of the two registration areas¹ makes it impossible to obtain geographically comparable birth and death data for the entire United States before 1933. However, the rates for the expanding groups of registration States are approximations of national rates, and general comparisons over a long period of years can be made. Beginning with 1933, the birth and death registration areas have comprised the entire United States, including Alaska beginning 1959 and Hawaii beginning 1960. National statistics on fetal deaths were compiled for 1918 and annually since 1922.

Prior to 1951, and in 1955, birth statistics were based on a complete count of the records received in the Public Health Service. From 1951 to 1954, and for 1956 and subsequent years, the figures were based on a 50-percent sample of all registered births. Adjustments shown for underregistration of births are based on the results of nationwide tests of registration completeness in 1940 and 1950. Such adjustments in the published data were discontinued in 1960.

Current death statistics are based on a 10-percent sample of death certificates filed in State vital statistics offices. Fetal deaths (stillbirths) and deaths among Armed Forces abroad are excluded.

Mortality statistics are compiled in accordance with World Health Organization regulations, which specify that member nations classify causes of death according to the *International Statistical Classification of Diseases, Injuries, and Causes of Death*. The current classification, "Seventh Revision of the International Lists," has been used in the United States beginning with 1958. It has been the practice to revise the *International Lists* every 10 years to keep abreast of medical knowledge. Each revision has produced some break in the comparability of cause-of-death statistics. Comparability ratios which measure the net effect of changes in classifications according to the Fifth and Sixth Revisions are shown in *Vital Statistics-Special Reports*, Vol. 51, Nos. 2 and 3; and according to the Sixth and Seventh Revisions in *Vital Statistics of the United States*, 1958, Vol. 1, and in *Vital Statistics-Special Reports*, Vol. 51, No. 4. The extent of earlier changes is discussed in "The Effect of the Sixth Revision of the International Lists of Diseases and Causes of Death Upon Comparability of Mortality Trends," *Vital Statistics-Special Reports*, Vol. 36, No. 10, and *Vital Statistics of the United States*, 1958, Vol. 1.

Births, deaths, and fetal deaths are classified by place of occurrence and by place of residence of the mother or of the decedent.

Marriages and divorces.—National collections of statistics on marriages and divorces in the United States were made for the years 1867 to 1906, 1916, 1922 to 1932, 1937 to

¹ For coverage of these areas, see *Historical Statistics of the United States, Colonial Times to 1957*, series B 1-5.

1940, and each year since 1944. Estimates have been made for the intervening years as well as for years in which collections were not complete. A marriage-registration area was established by the Public Health Service in 1957, and a divorce-registration area in 1958. At the beginning of 1966, the marriage-registration area covered 36 States and 3 independent registration areas; the divorce-registration area, 22 States and 1 independent registration area.

Vital statistics rates.—Vital statistics rates computed by the Public Health Service are based upon the enumerated population figures as of April 1 for 1940, 1950, and 1960 and upon the estimated midyear population figures for other years, provided by the Bureau of the Census unless otherwise noted. Birth and divorce rates for 1940 and 1947 to 1960, and death and marriage rates for 1940 to 1960, for the United States and the individual States are based on total population present in the area, excluding Armed Forces abroad; the population base for 1945 birth and divorce rates includes Armed Forces abroad.

Morbidity.—Annual data on notifiable diseases are compiled by the Public Health Service at its Communicable Disease Center in Atlanta, Georgia, and published as a supplement to its *Morbidity and Mortality Weekly Report*. The data are based on reports from State health departments to the Public Health Service. The list of notifiable diseases is revised biennially and includes those which, by mutual agreement of the States and the Public Health Service, are communicable diseases of national importance.

General health statistics, including morbidity, disability, and the utilization of health services, are provided by the various surveys that make up the National Health Survey, conducted by the Bureau of the Census for the Public Health Service. They are published in *Vital and Health Statistics*, Series 10 to 12.

Morbidity statistics for members of the Armed Forces are prepared and published by the Departments of the Army, Navy, and Air Force. The Department of Labor compiles statistics of industrial injuries (see pp. 244 and 245).

Another aspect of morbidity is provided by statistics on patients in hospitals for mental disease, psychiatric services of general hospitals, outpatient psychiatric clinics, and institutions for the mentally retarded. From 1923 to 1946, data in the field of mental health were collected annually by the Bureau of the Census. With the passage of the National Mental Health Act in 1946, the data-collecting function was transferred to the Public Health Service. Beginning with the 1947 report, the hospital data appear in the annual report, *Patients in Mental Institutions*, and beginning with 1959, the clinic data appear in *Data on Patients of Outpatient Psychiatric Clinics in the United States*, both issued by the Public Health Service.

Medical care.—Statistics of hospitals are obtained from the annual survey of hospitals conducted by the American Hospital Association. These statistics are published annually in *Hospitals*, Guide Issue, and include only hospitals that meet the Association's requirements for listing. Institutions that provide health care, such as nursing and convalescent homes, are not included in the survey. Included are nearly all hospitals in the country that meet the following definition: A hospital is any establishment providing medical and registered nurse supervision; and offering services, facilities, and beds for use beyond 24 hours by 6 or more nonrelated individuals requiring diagnosis, treatment or care for illness, injury, deformity, infirmity, abnormality, or pregnancy; and regularly making available at least (1) clinical laboratory services, (2) diagnostic X-ray services, and (3) treatment facilities for (a) surgery, (b) obstetrical care, or (c) other definitive medical treatment of similar extent. Statistics supporting comprehensive, long-range plans for construction of hospitals and related medical facilities authorized under Title VI of the Public Health Service Act, as amended, are submitted annually by the Hill-Burton State Agencies to the Public Health Service. National data on hospital beds in 1948 to 1962 and detailed State

data as of January 1, 1962, appear in *Hill-Burton State Plan Data: A National Summary as of January 1, 1962*, Public Health Service Publication No. 930-F-2.

Statistics on institutional population based on the 1960 Census of Population include information on number and characteristics of persons in long-term hospitals, in homes and schools for the mentally and physically handicapped, and in homes for the aged and dependent (*U.S. Census of Population, 1960*, PC(2)-8A).

Sample surveys are conducted occasionally to provide information on the medical care received by the population of various communities or States, and certain insurance organizations publish statistics on the medical care received by their beneficiaries.

Nutrition.—Statistics on the apparent per capita consumption of food and its nutrient value are estimated by the Department of Agriculture and published quarterly (nutrient value, annually) in the *National Food Situation*. A discussion of methods used to compute these figures and more detailed information appear in Statistical Bulletin No. 364, *U.S. Food Consumption; Sources of Data and Trends, 1909-63*, and the annual supplements.

Statistics on Federal food distribution programs, data on the quantity and costs of the food commodities distributed, and the number of persons participating in the programs are published annually in *Agricultural Statistics*.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

Fig. V. VITAL STATISTICS RATES: 1915 TO 1965

1965 ⁴	3,767	1,825	1,780	481	19.4	9.4	9.2	2.5

¹ Beginning 1960, based on 50-percent sample.

² Includes estimates and marriage licenses for some States for all years.

³ Includes reported annulments and some estimated State figures for all years.

⁴ For 1940, 1950, and 1960, based on population enumerated as of Apr. 1; for all other years, estimated as of July 1. All rates are based on population excluding Armed Forces abroad, except 1945 birth and divorce rates based on population including Armed Forces abroad.

⁵ Collection of birth certificates began in 1915. ⁶ Provisional.

Source: Dept. of Health, Education, and Welfare, Public Health Service; annual report, *Vital Statistics of the United States*.

No. 49. LIVE BIRTHS AND BIRTH RATE PER 1,000 POPULATION, BY COLOR: 1910 TO 1964

[Number in thousands. Prior to 1959, excludes Alaska, and 1960, Hawaii. Prior to 1959, data are adjusted for underregistration; 1959 data are shown for both adjusted and registered births; beginning 1960, registered births only. For total registered births, see table 48. Beginning 1959, based on 50-percent sample. See also *Historical Statistics, Colonial Times to 1967*, series B 6 and B 19-21]

YEAR	NUMBER ¹			RATE ²		
	Total	White	Non- white	Total	White	Non- white

1962.....	4,167	⁴ 3,394	⁴ 642	22.4	⁴ 21.4	⁴ 30.5
1963.....	4,098	⁴ 3,326	⁴ 639	21.7	⁴ 20.7	⁴ 29.7
1964.....	4,027	3,369	658	21.0	20.0	29.1

¹ Includes adjustments for States not in the birth-registration area before 1933; see text, p. 43.

² For 1940, 1950, and 1960, based on population enumerated as of Apr. 1; for all other years, estimated as of July 1. For 1945, based on population including Armed Forces abroad; for all other years based on total population (in specific group) residing in area.

³ Not estimated. Differences between estimated numbers of all births and white births do not give reliable estimates for nonwhite births.

⁴ Excludes data for residents of New Jersey since this State did not require reporting of color.

Source: Dept. of Health, Education, and Welfare, Public Health Service; annual report, *Vital Statistics of the United States*.

No. 50. LIVE BIRTHS AND BIRTH RATE PER 1,000 POPULATION—STATES: 1940 TO 1965

[By place of residence. Data for 1940 and 1950 are adjusted for underregistration; beginning 1960, registered births only and based on 50-percent sample. Adjusted figures are shown to the last digit as computed, for convenience in summation; they are not assumed to be correct to the last digit]

No. 54. BIRTH RATE, BY LIVE-BIRTH ORDER, NATIVE WHITE WOMEN: 1940 TO 1964

[Births per 1,000 women 15 to 44 years old. Prior to 1959, excludes Alaska, and 1960, Hawaii. Live-birth order refers to number of children born alive. Data for 1940 to 1958 are adjusted for underregistration; 1959 data are shown for both adjusted and registered births; beginning 1960, registered births only. Includes adjustments for States not in the birth-registration area prior to 1930. Figures for births of order not stated are distributed. For 1940, 1950, and 1960, based on enumerated population as of April 1; for all other years, estimated as of July 1. Beginning 1958, based on a 50-percent sample. See also *Historical Statistics, Colonial Times to 1957*, series B 10-18]

¹ Rate per 1,000 unmarried (never married, widowed, and divorced) women aged 15 to 44 years enumerated as of April 1 for 1940 and 1950 and estimated as of July 1 for all other years.

² Figures by color exclude data for residents of New Jersey.

Source of tables 53-55: Dept. of Health, Education, and Welfare, Public Health Service; annual report, *Vital*

No. 56. NET AND GROSS REPRODUCTION RATE, BY COLOR: 1905 TO 1964

[Prior to 1959, excludes Alaska, and 1960, Hawaii. Prior to 1960, based on births adjusted for underregistration; beginning 1960, on registered births. Rates computed using annual vital statistics life tables and population estimates by age, except as noted for earlier years. A net reproduction rate of 1,000 means that each generation would just replace itself, if birth and death rates of a specified period were to continue indefinitely, in the absence of net immigration. A rate above 1,000 implies a potentially gaining population, and a rate below 1,000, a potentially declining population. A gross reproduction rate of 1,000 means that if all women born at the beginning of a generation were to live through their reproductive period and continue birth rates existing at the time of their birth, they would barely reproduce themselves, assuming no migration from outside the area. A comparison of the net reproduction rate with the gross reproduction rate affords an indication of the loss sustained by the potential childbearing population through mortality. Data for 1951-1954 and for 1956 and subsequent years based on a 50-percent sample of births. See also *Historical Statistics, Colonial Times to 1957*, series B 31-36]

- Represents zero.

¹ Services of medical and osteopathic physicians in private practice and consumer-sponsored group clinics.

² Services of registered and practical nurses in private duty, visiting nurses, podiatrists, physical therapists, clinical psychologists, chiropractors, naturopaths, and Christian Science practitioners.

³ Includes surgical supplies.

⁴ Includes fees of optometrists and expenditures for hearing aids, orthopedic appliances, artificial limbs, crutches, wheelchairs, etc.

⁵ Expenditures for dispensaries, outpatient clinics separate from hospitals, field health stations, etc., maintained by Federal Government for military personnel, veterans, seamen, Indians, etc., and administrative costs of Department of Defense and Veterans Administration medical programs; public health expenditures made by Departments of Public Health excluding hospital care, fee payments to private practitioners, research and construction expenditures; includes school health services provided by public education agencies.

⁶ Expenditures of private voluntary health agencies for community health services, community education, fund raising and administration; industrial-in-plant health services.

NA. Not available.

¹ Includes patients in private hospitals or institutions, not shown separately.

² Patients per 100,000 population estimated as of July 1. Total population used for 1935; civilian, thereafter.

³ Includes veterans with mental disorders resident in VA hospitals and public health service hospitals at Fort Worth, Tex., and Lexington, Ky.

⁴ Includes patients in State-operated psychopathic hospitals and, through 1950, in city hospitals (which ceased to exist thereafter).

⁵ Includes patients in city institutions through 1945. Last city institution was transferred to State auspices in 1948.

Source: Dept. of Health, Education, and Welfare, Public Health Service; *Patients in Mental Institutions, Mental Health Statistics—Current Reports; Annual Statistical Report of Outpatient Psychiatric Clinics, Data on Patients of Outpatient Psychiatric Clinics in the United States; Veterans with Mental Disorders Resident in Veterans Administration Hospitals*; and unpublished data.

- Represents zero. NA Not available.

¹ Excess of patients released alive from hospital (direct discharges plus leave placements) over those returning to hospital. National data on placements and returns from extramural care are not available, but net releases may be computed from less detailed movement data as follows: Net release equals resident patients beginning of year, plus all admissions excluding transfers, minus deaths in hospital, minus resident patients end of year.

No. 105. SELECTED MEDICINAL CHEMICALS—PRODUCTION AND SALES: 1945 TO 1964

[Production and sales in thousands of pounds; value in thousands of dollars. Production in terms of 100-percent chemical content, exclusive of materials used in mixing or compounding tablets, solutions, and suspensions for consumer use. Sales include only that part of original production sold in undiluted or uncompounded form except as noted]

- Represents zero.

D Withheld to avoid disclosing figures for individual producers.

¹ Excludes alicyclic and heterocyclic compounds for 1960 and 1961; excludes methionine for 1964.

² Excludes benzenoid compounds.

³ Excludes small amounts of benzenoid barbiturates.

⁴ Includes most, but not all, choline salts.

⁵ For human or veterinary use only through 1961. Sales include both diluted and undiluted forms.

⁶ Excludes derivatives. ⁷ Excludes derivatives other than salts.

⁸ Includes benzenoid skeletal muscle relaxants; excludes small amounts of nonbenzenoid tranquilizers.

⁹ Excludes K vitamins through 1961.

No. 106. DAYS OF DISABILITY—TOTAL AND PER 100 PERSONS, BY ACUTE CONDITION GROUP: 1965

[For year ending June 30. Data refer to civilian noninstitutional population and contain some duplications, since time lost because of several concurrent conditions is counted under each contributing condition. Based on a sample and subject to sampling variability; see source for detailed explanation]

ACUTE CONDITION GROUP ¹	CASES		TOTAL DISABILITY DAYS				DAYS PER 100 PERSONS			
	Number (millions)	Per 100 persons	Restricted activity ²	Bed disability ³	Work loss ⁴	School loss ⁵	Restricted activity ²	Bed disability ³	Work loss ⁴	School loss ⁵
Infective and parasitic	51.9	27.5	217.2	104.0	18.1	57.7	115.3	55.2	25.6	138.9
Respiratory	219.4	116.4	680.8	321.1	100.9	98.9	361.3	170.4	143.1	238.1
Digestive	21.0	11.2	81.9	33.6	14.7	5.2	43.5	17.9	20.8	12.6
Injuries	56.4	29.9	318.1	84.1	74.5	11.8	168.8	44.6	105.7	28.5
All other	52.2	27.7	270.2	115.2	32.4	15.6	143.4	61.2	46.0	37.5

¹ Excludes all conditions involving neither restricted activity nor medical attention.

² A day when a person cut down on his usual activities for the whole day because of illness or injury. Includes bed-disability, work-loss, and school-loss days.

³ A day when a person was kept in bed either all or most of the day because of illness or injury. Includes those work-loss and school-loss days actually spent in bed.

⁴ A day when a person lost the entire work day because of illness or injury. Computed for persons 17 years of age and over who were working or had a job or business from which they were not on layoff during the 2-week period preceding the week of interview.

⁵ A day when a child lost the entire school day because of illness or injury. Computed for children 6 to 16 years of age.

No. 117. NUTRITION—NUTRIENTS AVAILABLE FOR CIVILIAN CONSUMPTION PER CAPITA PER DAY: 1930 TO 1965

[Prior to 1960, excludes Alaska and Hawaii. Based on Bureau of the Census estimated population as of July 1. Computed on basis of estimates of apparent civilian consumption (retail basis) including consumption from home gardens. No deductions have been made in nutrient estimates for loss or waste in home or for destruction or loss of nutrients during preparation of food. Deductions have been made for inedible refuse. Data include quantities of iron, thiamine, riboflavin, and niacin added to flour and cereal products; quantities of vitamin A value added to margarine and milk of all types; quantities of ascorbic acid added to fruit juices and drinks. See also *Historical Statistics, Colonial Times to 1957*, series G 546-551]

Section 3

Immigration and Naturalization

This section presents statistics related to immigration, naturalization, and alien registration. The principal source of these data is the *Annual Report* of the Immigration and Naturalization Service. Immigration statistics are prepared from entry documents. Statistics for naturalizations are compiled from periodic reports by courts conducting such proceedings, and those for alien registrations are compilations of data from alien address report cards.

The continuous record of immigration into the United States began in 1819, under the Act of March 2. Immigration statistics were compiled by the Department of State from 1820 to 1874 and by the Treasury Department from 1867 to 1895. Since 1892 there has been a separate office or bureau of immigration, now a part of the Immigration and Naturalization Service. Information on immigration and naturalization has been included in annual reports issued by the Office of Immigration from 1892 to 1932, the Secretary of Labor from 1933 to 1940, the Attorney General for 1941, and the Immigration and Naturalization Service since then.

Immigration.—Since 1820 the official immigration statistics (see table 123) have changed considerably in coverage. The early figures were for arrivals at Atlantic and Gulf coast seaports of the United States. Pacific coast arrivals were first reported in 1850. Aliens arriving at Canadian seaports en route to the United States were included after 1893. The reporting of arrivals over the land borders began in 1904. Prior to 1868, arriving alien passengers were recorded; thereafter, aliens coming for temporary stay were omitted. The passage of the Act of 1891 increased the number of excludable classes. The basis of reporting was then changed from arrivals to admissions, omitting aliens not permitted to enter the United States, except for the period 1895–1897 when the reporting of arrivals was resumed.

Immigrant.—An immigrant is defined as an alien, other than a returning resident alien, admitted for permanent residence. Quotas limit immigration from countries other than those of the Western Hemisphere. Until 1920 there was only a qualitative limitation into this country. The 1921 Act placed the first numerical ceiling upon immigration. Each country's quota was to be 3 percent of the number of people born in that country who were residing in the United States as reported by the 1910 Census of Population. In 1924, a new formula was enacted for computing a country's quota, based on 2 percent of the number of people born in that country who were residing in the United States as determined by the 1890 Census of Population. The 1924 Act also provided that, beginning July 1, 1929, the quota of any country shall have the same ratio to 150,000 as the number of persons of that national origin living in the United States had to the total population living in the United States as determined from the 1920 Census of Population. This Act also established minimum quotas of 100 for all quota areas. The Immigration and Nationality Act of 1952 simplified the national origins formula of the 1924 Act by basing the annual quota on a flat one-sixth of 1 percent of the population in the 1920 Census. Quotas revised by Presidential proclamation now total 158,561.

Act of 1965.—Effective December 1, 1965, quotas established under the 1952 Act continue but are subject to a new preference system. Moreover, at the end of each fiscal year the numbers allocated to each country which are not used are transferred to an immigration pool and made available to preference immigrants who cannot obtain visas because the quota for their country is exhausted. The allocations from the pool and from existing numbers may not exceed 170,000.

Also effective December 1, 1965, the "quota immigrant" of the 1952 Act is called "immigrant" and the "nonquota immigrant" is called "immediate relative" or "special immigrant."

Immediate relatives of United States citizens are parents (if the citizen is over age 21), spouses, and children under age 21. They are exempted from the numerical ceilings.

Special immigrants include returning resident aliens (although these are often classed as nonimmigrants for statistical purposes), certain former citizens, and certain other specified groups. The spouses and children under age 21 of the following groups are included if they are accompanying or following to join such immigrants: Western Hemisphere natives, retired employees of our government abroad, and ministers of religion. Special immigrants are also exempt from the numerical ceilings.

Effective July 1, 1968, a limit of 170,000 is set for immigrants who are natives of countries outside the Western Hemisphere, with a 20,000 maximum on natives of any one country. Selection is made on the basis of preferences favoring family reunification and persons with skills and talents needed here. Also effective then is a ceiling of 120,000 on Western Hemisphere natives on a first-come first-served basis with no limitation on the number from any one country. "Immediate relatives" and "special immigrants" other than those in the latter category because of Western Hemisphere birth continue to be exempt from numerical ceilings.

Nonimmigrant.—Nonimmigrants are aliens who enter the United States for temporary periods. Included in the nonimmigrant class are foreign government officials, their families, attendants, servants, and employees; temporary visitors for business or pleasure; aliens in continuous transit through the United States; students; and others. Resident aliens returning from a temporary stay abroad are often classed as nonimmigrants, although they are legally special immigrants. Certain temporary admissions such as of persons in possession of border-crossing identification cards are not included in the nonimmigrant totals.

Displaced persons and refugees.—The Displaced Persons Act of 1948 was the first of eight special acts passed between 1948 and 1960 that provided for the admission of refugees from Communist-dominated countries, victims of natural calamities, and orphan children without regard to the usual numerical ceilings.

Alien registration.—The Immigration and Nationality Act provides that each alien who is required to be registered under the Alien Registration Act of 1940, and who is in the United States on January 1, must report his current address to the Attorney General during the month of January. Alien address report cards are distributed through the post offices of the United States or the local offices of the Immigration and Naturalization Service.

Naturalization.—Naturalization statistics for the United States began with the fiscal year 1907. Prior to this time each court kept records of naturalizations but no national data were compiled. The Act of June 29, 1906, effective September 27, 1906, provided for periodic returns by all courts conducting naturalization proceedings, and for the filing with a central Federal agency of a duplicate copy of each declaration of intention and petition for naturalization filed, and of each certificate of naturalization issued. Naturalization statistics were originally compiled by the Bureau of Immigration and Naturalization of the Department of Commerce and Labor, now the Immigration and Naturalization Service of the Department of Justice.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

Section 4

Education

This section presents data concerning the personnel, level, extent, and finances of formal education in the United States. The chief sources of these data are the decennial Census of Population and the Current Population Survey, both conducted by the Bureau of the Census (see text, p. 1), and a number of annual, biennial, and other periodic surveys conducted by the Office of Education. The Census of Population has included data on school enrollment since the Census of 1840 and on educational attainment since the Census of 1940. The Current Population Survey has reported on school enrollment annually beginning in 1945 and on educational attainment and illiteracy periodically beginning in 1947. The surveys of the Office of Education are summarized in the *Digest of Educational Statistics*, an annual publication issued for the first time in 1962. The *Digest* continues many of the tables which formerly appeared in the *Biennial Survey of Education in the United States*, published from 1916-18 through 1956-58 by the Office of Education. It includes data on pupils, staff, finances, and organization at elementary, secondary, and college levels.

Other regular sources of education data include special studies of the Office of Education, publications of the National Education Association, and annual or biennial reports of education agencies in individual States. The Office of Education's reports, *Federal Funds for Education*, contain detailed data on Federal expenditures for education. Administrative statistics on programs concerned with the distribution of Federal funds are issued by the agencies responsible. The quinquennial Census of Governments provides data on school district finances. Reports published by the Bureau of Labor Statistics contain data relating employment experience to educational attainment. Special studies by the National Science Foundation present statistics on scientists and technicians. Similar studies by the National Institutes of Health cover medical fields. Data on vocational training are available in the *Digest of Annual Reports of State Boards for Vocational Education*, issued annually by the Office of Education.

Types of data.—The statistics in this section are of two general types. One type, exemplified by data from the Bureau of the Census, is based on direct questioning of individuals to obtain information about their own and their families' education. Tabulations of this type of data relate to school enrollment and level of education attained, classified by age, sex, and other characteristics of the population.

The second type, exemplified by data from the Office of Education and the National Education Association, is based on reports obtained from administrators of educational institutions and of local and State agencies having jurisdiction over education. This type of data relates to school enrollment, attendance, staff, and finances for the United States, individual States, and local areas, according to institutional characteristics.

State laws.—Although all States except Mississippi and South Carolina have requirements that children attend school, State laws vary as to the ages and circumstances of compulsory attendance. In the majority of States, the laws require that formal schooling begin by age 7 and continue to age 16.

Schools.—The Office of Education defines "school" as "A division of the school system consisting of a group of pupils composed of one or more grade groups, organized as one unit with one or more teachers to give instruction of a defined type, and housed in a school plant of one or more buildings. More than one school may be housed in one school plant, as is the case when the elementary and secondary programs are housed in the same school plant."

The basic Office of Education statistics for elementary and secondary schools are concerned primarily with the local school systems serving the general population. Data from other types of schools are secured from time to time. School enrollment statistics of the Bureau of the Census are based on attendance or enrollment in any regular school within a given period; educational attainment statistics are based on the highest grade completed by an individual. "Regular" schools include public and private kindergartens, graded schools, colleges, universities, and professional schools. "Public" schools are defined as schools controlled and supported by local, State, or Federal governmental agencies; "private" or "nonpublic" schools are those controlled and supported mainly by religious organizations or by private persons or organizations. Neither the Office of Education nor the Bureau of the Census regularly includes specialized vocational, trade, or business schools, residential schools for exceptional children, and correspondence schools. Office of Education enrollment data include kindergartens and those nursery schools which are publicly financed; Census enrollment data include kindergartens but exclude nursery schools. At the higher education level, the basic Office of Education statistics and the Bureau of the Census enrollment statistics are concerned with institutions granting degrees or offering work acceptable for degree-credit, such as junior colleges. Statistics for certain other types of institutions beyond the high school, such as those offering organized occupational curriculums of nondegree character, are also collected by the Office of Education.

With respect to school levels, the Bureau of the Census defines "elementary" schools as including grades 1 through 8; "high" schools as including grades 9 through 12; and "colleges" as including junior or community colleges, regular 4-year colleges, and graduate or professional schools. Statistics reported by the Office of Education and the National Education Association by type of organization, as elementary level and secondary level, may not be strictly comparable with those from the Bureau of the Census because the grades included at the two levels vary, depending on the organization of junior high schools. The trend is for the enrollment in grades seven and eight to shift from an elementary to a secondary organization, with resultant changes in grade distribution.

School year.—Except as otherwise indicated in the tables, data relating to enrollment and staff refer to the school year which generally begins in September of the preceding year and ends in June of the year stated. Statistics concerning school finances are for a 12-month period, usually July 1 to June 30.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 151. SCHOOL ENROLLMENT, BY SEX AND BY LEVEL OF SCHOOL—SURVEY ESTIMATES, 1950 TO 1965, AND PROJECTIONS, 1970 TO 1985

[In thousands. As of fall of year. Prior to 1960, excludes Alaska and Hawaii. Elementary includes kindergarten and grades 1-8; high school, grades 9-12 and postgraduates. Series shown represent projections based on different combinations of assumptions about population and enrollment rates. The population projections are based on current estimates of the population by age and sex for July 1, 1965. The underlying projections of fertility were computed by the cohort method and imply that the completed fertility of women (i.e., the average number of children per 1,000 women at end of childbearing) moves gradually toward 3,100 in Series B and 2,450 in Series D. Enrollment Series 1 and 2 are both based on the assumption that age-specific enrollment rates will continue to increase. Series 1 assumes a relatively rapid increase in the rates following the experience of the period 1950-52 to 1962-64; Series 2 assumes a more moderate increase based on an average of the projected rates in Series 1 and rates in the 1962-64 base period. More detailed methodology is given in source.]

No. 152. RETENTION RATE PER 1,000 STUDENTS ATTENDING SCHOOL FROM FIFTH GRADE THROUGH COLLEGE ENTRANCE: 1924-1932 TO 1957-1965

[Prior to 1962, excludes Alaska and Hawaii. Rates for the 5th grade through high school graduation are based on enrollments in successive grades in successive years in public elementary and secondary schools, and are adjusted to include estimates for nonpublic schools. Rates for first-time college enrollment are based on data supplied by institutions of higher education]

No. 153. PERSONS 25 YEARS OLD AND OVER—YEARS OF SCHOOL COMPLETED BY SEX: 1960 AND PROJECTIONS TO 1985

[In thousands, except median. As of spring of year. Data for 1970 and 1980 based on projected age-grade specific attainment rates from 1960 Census and Current Population Surveys of March 1957 and March 1962. Series A and B for 1970 to 1985 imply following assumptions regarding trends: A, increase in rate of improvement in past trends, and B, a continuation of past trends. Figures based on projections of population as published in Series P-25, No. 286]

No. 158. LIFETIME AND MEAN INCOME IN 1949 TO 1963 OF MALES 25 TO 64 YEARS OLD, BY YEARS OF SCHOOL COMPLETED

[Prior to 1961, excludes Alaska and Hawaii. Includes members of the Armed Forces living off post or with their families on post, but excludes all other members of the Armed Forces. Figures for lifetime income based on application of appropriate life tables to arithmetic mean income, by age, as obtained for a cross section of population in each year shown. Figures for mean income for 1949 based on Census of Population data; thereafter, on Current Population Survey; see text, p. 1]

YEARS OF SCHOOL COMPLETED	LIFETIME INCOME (\$1,000)				ANNUAL MEAN INCOME			
	1949	1956	1961	1963	1949	1956	1961	1963

No. 159. PERSONS 14 YEARS OLD AND OVER—ILLITERACY, BY AGE, COLOR, AND SEX: 1947 AND 1959

[In thousands, except percent. As of October 1947 and March 1959. Excludes Alaska and Hawaii. Relates to civilian noninstitutional population based on Current Population Survey; see text, p. 1. Persons unable to both read and write in any language classified as illiterate. Information on illiteracy was obtained in 1959 only for persons completing less than 6 years of school, and in 1947 only for persons completing less than 5 years of school. See also *Historical Statistics, Colonial Times to 1957*, series H 407-411]

¹ For 1900, enumerated population as of June 1; for 1960, enumerated population as of Apr. 1; for all other years, estimated population as of July 1 of preceding year (1919, 1939, etc.). Excludes Armed Forces abroad.

² Includes librarians and other nonsupervisory instructional staff. Prior to 1940, figures represent number of persons employed rather than number of positions. ³ Beginning 1953, estimated.

⁴ Includes a relatively minor amount from other sources (transportation fees and tuition from patrons, and gifts) which accounted for 0.5 percent of total revenue receipts in 1964.

⁵ Through 1950, includes community services. Beginning 1960, not comparable with prior years.

⁶ Comprises summer schools, community colleges, adult education, and, beginning 1960, community services.

⁷ Based on current expenditure allocable to pupil costs, capital outlay, and interest.

⁸ Excludes current expenditures not allocable to pupil costs. ⁹ Includes interest.

Section 5

Law Enforcement, Federal Courts, and Prisons

This section presents data on crimes, arrests, Federal court cases, the legal profession, Federal and State prisoners, and the use of the death penalty. The chief sources of data on these subjects are: *Uniform Crime Reports for the United States*, issued annually by the Federal Bureau of Investigation; the *Annual Report of the Director and Special Reports on Federal Offenders and Persons Under the Supervision of the Federal Probation System*, issued by the Administrative Office of the U.S. Courts; and *Statistical Tables*, an annual statistical review of the Federal prison system, and *National Prisoner Statistics*, a series of periodical bulletins and reports, both issued by the Bureau of Prisons.

In addition, limited information concerning juvenile delinquency and the operation of juvenile courts is collected by the Children's Bureau of the Department of Health, Education, and Welfare. Statistics on lawyers and their characteristics are compiled by the American Bar Foundation, Chicago, Illinois. Data on prosecution and disposition of persons charged with misdemeanors and other minor offenses may be found for some of the larger cities in the annual reports of their municipal courts or governments.

Law enforcement and legal jurisdiction.—Law enforcement is for the most part a function of State and local officers and agencies. The U.S. Constitution reserves general police powers to the States. By act of Congress, Federal offenses include only offenses against the U.S. Government and against its employees while engaged in their official duties, and offenses which involve the crossing of State lines or an interference with interstate commerce. Consequently, criminal offenses such as murder, robbery, burglary, theft, assault, and rape are violations of State laws unless they involve Federal property or a Federal officer while engaged in his official duties, or unless they occur in Federal territories or reservations or on the high seas. Excluding the military, there are 52 separate criminal law jurisdictions in the United States, 1 in each of the 50 States, 1 in the District of Columbia, and the Federal jurisdiction. Each of these has its own criminal law and procedure and its own law enforcement agencies. Yet the general system of law enforcement is quite similar from State to State, although there are often substantial differences among the States in the penalties provided for like offenses.

Law enforcement can be divided into three parts. The first covers the activities of the police agencies, namely, the investigation of crimes and the arrest of persons suspected of committing them. This function involves municipal police, county police, State police, sheriffs, constables, marshals, Federal agents, and many kinds of special officers. The second phase is the prosecution of those charged with criminal offenses to determine whether they are in fact guilty. The agencies concerned include the courts, justices of the peace, municipal, State, and Federal grand juries, and prosecuting court officers. The third division of administration is concerned with the punishment or treatment of those convicted of crime. While the courts usually determine the sentence after conviction, the penalty is enforced by the prison, reformatory, or jail, or by probation or parole officials.

Crime.—The Federal Bureau of Investigation, through its Uniform Crime Reporting Program, receives monthly and annual reports on a voluntary basis from law enforcement agencies throughout the country. Each month, city police, sheriffs, and State police file reports on the number of offenses that become known to them in the following crime categories—murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny (\$50 and over in value), and auto theft. These

seven categories are the basis of the FBI's Crime Index, a measure of the extent, fluctuation, and distribution of serious crime in the United States. The monthly reports also contain data on the number of these crimes cleared by arrest and certain other analytical data pertaining to specific crime categories. Annual reports provide summaries of data concerning persons arrested for all criminal offenses, by age, sex, and race of the offender, as well as an accounting of the number of persons formally charged and their disposition. The law enforcement agencies currently reporting to the FBI represent 92 percent of the national population.

In summarizing and publishing crime data, the FBI does not vouch for the validity of the reports it receives, but presents the data as information useful to persons concerned with the problem of crime and criminal-law enforcement.

Courts.—Court statistics on criminal offenses and the outcome of prosecutions are incomplete for the country as a whole although data are available for many States individually. The only national compilations of such statistics were made by the Bureau of the Census which, from 1932 to 1945, obtained reports from a number of States on defendants prosecuted, convicted, and sentenced in courts of general trial jurisdiction. At no time, however, were there more than 32 States involved in the reporting system.

Comprehensive information on the business of the Federal courts is collected by the Administrative Office of the U.S. Courts and is published in the *Annual Report of the Director*. The bulk of civil litigation in the country is commenced and determined in the various State courts. Only when the U.S. Constitution and acts of Congress specifically confer jurisdiction upon the Federal courts may civil litigation be heard and decided by these courts. Whether a State court or a Federal court has jurisdiction over a particular civil action is often difficult to determine. Generally, the Federal courts have jurisdiction over the following types of cases:

(1) Suits or proceedings by the United States; (2) Suits or proceedings against the United States; (3) Civil actions between private parties arising under the Constitution, laws, or treaties of the United States; (4) Civil actions between private litigants who are citizens of different States; (5) Civil cases involving admiralty, maritime, or prize jurisdiction; (6) All matters and proceedings in bankruptcy.

The Federal courts of original jurisdiction are known as the U.S. district courts. One or more of these courts is established in every State and one each in Puerto Rico, the Virgin Islands, the Canal Zone, and Guam. Appeals from the district courts are taken to intermediate appellate courts of which there are 11, known as U.S. courts of appeals. The Supreme Court of the United States is the final and highest appellate court in the Federal system of courts.

Prisoners.—Statistics of prisoners committed to penal institutions have been collected and published for a longer period of time than have other criminal statistics. Data on prisoners in Federal and State prisons and reformatories were collected annually by the Bureau of the Census until 1950 when this work was transferred to the Bureau of Prisons. Summary statistics covering persons received and discharged from State prisons and reformatories and from Federal prisons and persons executed in the United States under civilian authority are now published periodically by the Bureau of Prisons in *National Prisoner Statistics* and in its annual statistical report, *Statistical Tables*. Also, nearly every State publishes annual data either for its whole prison system or for each separate State institution.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

FIG. IX. PRISONERS PRESENT IN FEDERAL AND STATE PRISONS AT END OF YEAR: 1945 TO 1964

[See table 230]

¹ All willful felonious homicides. Excludes suicides, justifiable homicides, and deaths caused by negligence.

² Limited to forcible rapes and attempts.

³ Includes the stealing or taking of anything of value by force or violence or by threat of force or violence; includes attempted robbery.

⁴ Includes assault with intent to kill. Excludes simple assault, assault and battery, fighting, etc.

⁵ Includes any unlawful entry to commit a felony or a theft. Includes attempted burglary and burglary followed by larceny.

⁶ Includes theft of property or articles of value (except auto theft) without the use of force and violence or fraud. Excludes larceny resulting from burglary.

⁷ Includes all cases where motor vehicles are driven away and abandoned. Excludes those taken for temporary use when actually returned by the taker.

⁸ For definition of standard metropolitan statistical areas, see text, p. 1.

No. 205. URBAN CRIMES KNOWN TO THE POLICE: 1959-63 AVERAGE AND 1964

[Prior to 1963, excludes Alaska and Hawaii. Offenses known to the police in 3,057 cities over 2,500, total 1964 population as estimated by FBI, 99,882,000. For definitions not shown here, see footnotes, table 204. See *Historical Statistics, Colonial Times to 1857*, series H 445-451, for related but not comparable data]

TYPE OF CRIME	NUMBER OF OFFENSES		Percent change
	1959-63 average	1964	
Total.....	2,313,642	3,004,662	29.9
Murder and nonnegligent manslaughter.....	4,326	5,309	22.7

No. 215. SUMMARY OF GOVERNMENT EXPENDITURE AND EMPLOYMENT FOR POLICE PROTECTION AND CORRECTION: 1962

[Employment data as of October, except as noted. Police employment includes uniformed policemen, law enforcement agents, and clerical, administrative, and custodial personnel concerned with police protection activities. Federal police employment is in the Federal Bureau of Investigation, the Immigration and Naturalization Service, the Bureau of Narcotics, and the Secret Service. Correction includes employment in prison systems, and probation and parole activities for convicted offenders; preconviction detention, as in city jails, is included under police protection]

¹ Includes lawyers not reporting and an estimated adjustment (subtraction) to account for duplications.

² 1963 unofficial estimates, according to *Editor & Publisher Yearbook, 1963*.

³ Includes 5,918 duplications.

⁴ In some cases, if more than one subentry was applicable the individual was tabulated in each.

No. 237. PRISONERS EXECUTED UNDER CIVIL AUTHORITY, BY OFFENSE AND RACE: 1930 TO 1965

[Includes 3 Federal executions in Alaska, 1 each in 1939, 1948, and 1950. Excludes executions by military authorities. The Army (including the Air Force) carried out 160 (148 between 1942 and 1950, 3 each in 1954, 1955, and 1957, and 1 each in 1958, 1959, and 1961). Of the total, 106 were executed for murder (including 21 involving rape), 53 for rape, and 1 for desertion. The Navy carried out no executions during the period. See also *Historical Statistics, Colonial Times to 1967*, series H 432-444]

Section 6

Area, Geography, and Climate

This section relates to area, climatologic, topographic, and hydrologic measurements of the United States. There are few official publications other than those showing area measurements (issued infrequently by the Bureau of the Census), which present area and geography statistics of national scope. However, many data are compiled for particular regions or for internal administrative purposes by such Federal agencies as the Geological Survey and the Environmental Science Services Administration, which includes the Coast and Geodetic Survey and the Weather Bureau.

Area.—Area measurements in the United States began with the country as a whole and developed, as mapping progressed, to measurements for the States.

The annual report of the U.S. General Land Office for 1850 contained the first reference to the areas of the several States and Territories, although there was no indication of the method used in obtaining these measurements. Until 1881, the General Land Office was practically the sole source of information concerning the areas of the States and Territories.

In 1881, as part of the 1880 Census of Population, the Bureau of the Census laid the foundation for accurate and detailed area measurement in the United States. For the first time an account was given of the method and maps employed, the water bodies included, and the outer limits of the United States used as a basis for measurement. As part of the 1940 Census, the Bureau published *Areas of the United States: 1940*, presenting the first basic measurement of the United States since the 1880 Census. The data presented in that study cover the total land and water areas of the States, counties, cities, and minor civil divisions. No comprehensive remeasurement was made for reports of the 1950 and 1960 Censuses, but adjustments in selected area figures were made for three principal reasons: (1) Changes in boundaries, (2) the development of water reservoirs, or (3) the improvement in maps from which area measurements are made. In 1964, the Bureau undertook measurement of the areas of cities, minor civil divisions, and census county divisions of the 1960 Census. The results are published in *Area Measurement Reports, Series GE-20*, the series consisting of one report for each State and a United States summary. These reports include the same kinds of data as the 1940 report plus statistics on the population (total and per square mile) for each area.

Geography.—The Geological Survey, cooperating in some instances with State and local agencies, is responsible for topographic and geologic maps and for basic data concerning the quantity, quality, and movement of surface and ground water.

The Bureau of Land Management conducts cadastral surveys.

The Coast and Geodetic Survey has responsibility for coastal and geodetic surveys and measurement of certain physical phenomena. Authorized in 1807, this agency's original function was to survey and chart the coast of the United States and the outlying islands and fishing banks. In 1871, Congress authorized an extension of the geodetic surveys from coast to coast to provide the States with reference markers for the control of their topographic and geologic mapping and their boundary surveys, and to provide data for use by the Geological Survey and other agencies. Since 1927, the Coast and Geodetic Survey has also been in charge of preparing aeronautical charts for the United States and its outlying areas.

A civil mapping activity of the Corps of Engineers, the U.S. Lake Survey, was established in 1841. Its primary function is to furnish Great Lakes navigators with reliable charts and information on harbor facilities. It also maintains records of the fluctuating levels of the lakes, the flow through connecting rivers, and the precipitation over the lakes, and reports on all hydraulic problems relating to the Great Lakes.

Air pollution.—The Public Health Service first established an air sampling network in 1953. The Federal Air Pollution Research and Technical Assistance Act (PL 159, 84th Congress), under the provisions of which the present National Air Sampling Network was created, became effective in 1955. The Network's objectives are to determine the extent and nature of air pollution, to study trends in levels of atmospheric contaminants, and to investigate relationships between air pollution and socio-economic, geographic, topographic, and other factors. Currently there are 250 sampling stations in the Network, 215 urban and 35 nonurban.

The Radiation Surveillance Network is a cooperative air sampling program consisting of 74 collection stations. It was established by the Public Health Service and is operated by the Division of Radiological Health in conjunction with State health departments.

Climate.—The Weather Bureau is responsible for essentially all meteorologic data and collects, processes, and publishes climatologic data. It maintains about 11,000 weather stations, of which nearly 3,000 produce autographic precipitation records, about 600 take automatic or hourly readings of a series of weather elements, and the remainder record one observation a day. There are few records in existence for stations before 1871 although some detailed records began in the 18th century.

Nearly all weather stations have been moved several times in their history. Consequently, the Weather Bureau uses "normal" values of temperature and precipitation for comparative purposes rather than long-term means which are derived from records taken at the different locations the stations may have had over the years.

Normal values of temperature and precipitation are based on records for the 30-year period 1931 to 1960. For stations having records for the entire 30 years from the same instrument site, monthly precipitation and temperature normals are the means of the monthly values for the 30 years; for temperature, the normal maximum and normal minimum values were used to obtain monthly normals. The annual normal temperature is obtained by dividing by 2 the sum of the annual normal maximum value and the annual normal minimum value of temperature.

For stations that did not have continuous records from the same instrument site for the entire 30 years, 1931 to 1960, the means have been adjusted to the record at the present site. In these adjustments, a "difference factor" was used for temperature and a "ratio factor" for precipitation. These factors were determined by parallel comparison, either between records at the actual station sites or through a second station that had a continuous record to compare against both sites for obtaining the resultant adjustment factors. Normals were thereafter obtained as outlined above.

This system of normals has three characteristics: (1) The 30-year period (1931 to 1960) adopted for the computations is consistent with the term of years accepted by the World Meteorological Organization for climatic normals; (2) where the station and exposure for records in a given locality have been changed, the whole record has been carefully studied and adjusted to the latest source of records and reports; (3) the normals for maximum and minimum temperatures are separately tabulated.

The degree-day normals are derived from the values for the monthly normal maximum and minimum temperatures, and computed from the standard base 65° F. The degree day has been defined as follows: "A unit, based upon temperature difference and time, used in estimating fuel consumption and specifying nominal heating load in winter. For any one day, when the mean temperature is less than 65° F., there exist as many degree days as there are Fahrenheit degrees difference in the temperature between the average temperature for the day and 65° F."

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

FIG. XI. TERRITORIAL EXPANSION OF THE UNITED STATES AND ACQUISITIONS OF OTHER PRINCIPAL AREAS

[See table 240]

Source: Dept. of Commerce, Bureau of the Census.

NO. 240. TERRITORIAL EXPANSION OF THE UNITED STATES AND ACQUISITIONS OF OTHER AREAS

[Boundaries of all territories listed under "United States" were indefinite, at least in part, at time of acquisition. Area figures shown here represent precise determinations of specific territories which have been marked upon maps, based upon interpretations of the several treaties of cession, which are necessarily debatable. These determinations were made by a committee consisting of representatives of various governmental agencies in 1912. Subsequently these figures were adjusted to bring them into agreement with remeasurements made in 1960. See also *Historical Statistics, Colonial Times to 1957*, series J 1-2]

¹ Includes that part of drainage basin of Red River of the North, south of 49th parallel, sometimes considered part of Louisiana Purchase.

² Not included in total. Ceded by Spain in 1898, the Philippines constituted a territorial possession of the United States from 1898 to 1946. Granted independence as of July 4, 1946, they then became the Republic of the Philippines.

³ Ceded by Spain in 1898 and became Commonwealth of Puerto Rico by Act of Congress on July 25, 1952. See table 6.

⁴ Acquired 1898; ratified 1899.

⁵ Acquired 1899; ratified 1900.

⁶ Under jurisdiction of United States in accordance with treaty of Nov. 18, 1903, with Republic of Panama.

⁷ Leased (1914) from Republic of Nicaragua for 99 years.

⁸ Under trusteeship. See table 6, footnote 15.

⁹ Comprises following islands with gross areas as indicated: Midway (2), Wake (3), Palmyra (4), Canton and Enderbury (combined area, 27), Swan (1), Navassa (2), Baker, Howland, and Jarvis (combined area, 3), Johnston and Sand (combined area, less than 0.5), Kingman Reef, Quita Sueño Bank, Roncador Cay, and Serrano Bank (each less than 0.5), and other islands specified in table 6, footnote 8, for which area figures are not available.

¹ Figures are lengths of general outline of seacoast. Measurements were made with a unit measure of 30 minutes of latitude on charts as near the scale of 1:1,200,000 as possible. Coastline of sounds and bays is included to a point where they narrow to width of unit measure, and includes the distance across at such point.

² Figures obtained in 1939-1940 with a recording instrument on the largest-scale charts and maps then available. Shoreline of outer coast, offshore islands, sounds, bays, rivers, and creeks is included to the head of tidewater or to a point where tidal waters narrow to a width of 100 feet.

No. 243. EXTREME POINTS OF THE UNITED STATES

[The geographic center of an area may be defined as the center of gravity of the surface, or that point on which the surface of the area would balance if it were a plane of uniform thickness. Because there is no generally accepted definition of geographic center, and no completely satisfactory method of determining it, there may be as many geographic centers of a State or country as there are definitions of the term. Because many factors such as curvature of the earth, large bodies of water, and irregular surfaces affect the determination of centers of gravity, the following positions should be considered as approximations only]

LOCATION	Direction from geographic center	COORDINATES		Distance from geographic center
		Latitude (N)	Longitude (W)	
From geographic center of conterminous United States near Lebanon, Smith County, Kans., 39°50', 98°35' to—				<i>Miles</i>
Lake of the Woods, Projection, Minnesota.....	North.....	49°23'	95°09'	680

No. 251. INVENTORY OF PUBLIC WATER SUPPLIES FOR COMMUNITY WATER SYSTEMS: 1963

[Includes only systems serving a population of 25,000 or more. Estimated total number of public water systems in the United States (conterminous area) is 21,000 systems serving a population of approximately 144 million. An estimated 16.0 percent of water used by manufacturing industries is supplied by public water systems]

NO. 253. SUSPENDED PARTICULATE MATTER LEVELS, BY URBAN POPULATION GROUPS: 1957-63

[In micrograms per cubic meter. Based on approximately 22,500 air samples taken in 232 cities. Suspended particulate matter consists of particles of smoke, dust, and fumes and droplets of viscous liquid remaining in the air for varying periods of time and ranging from less than 1 micron (1/25,000 inch) to 100 microns. Benzene-soluble organic matter is particulate matter soluble in benzene]

No. 258. AIR POLLUTION—NATIONAL AIR SAMPLING LEVELS, SELECTED CITIES: 1964

[Air pollution is defined as the presence in the air of substances put there by the activities of man, in concentrations sufficient to interfere with comfort, safety, or health or with use and enjoyment of property. Data represent values of samples taken nationally on a biweekly basis by the National Air Sampling Network. See text, p. 168]

Section 7

Public Lands, Parks, Recreation, and Travel

Statistics in this section relate to the Federal public domain and other Federally owned and leased real property, national parks and forests, State and municipal parks, domestic and foreign travel, and other forms of recreation.

Data on public lands are published primarily by the Department of the Interior, Bureau of Land Management, in *Public Land Statistics*. Data on Federally owned land and real property are collected by the General Services Administration and presented in its annual *Inventory Report on Real Property Owned by the United States Throughout the World*. The Economic Research Service of the Department of Agriculture also compiles and issues statistics on land use and land ownership.

The Department of the Interior issues various reports relating to recreation, as follows: The National Park Service publishes information on national parks in its annual report, *Areas Administered by the National Park Service*, and its monthly report, *Public Use of National Parks*; the Bureau of Outdoor Recreation, established in 1962, has issued one statistical report thus far—*State Outdoor Recreation Statistics—1962*, which supersedes *State Park Statistics*, formerly issued annually by the National Park Service; and the Fish and Wildlife Service compiles and releases data on sport fishing and hunting. Data for municipal parks and playgrounds, as well as for other outdoor recreational activities, have been compiled by Resources for the Future, Inc., Washington, D.C., and published in *Statistics on Outdoor Recreation* (1958). These data are based on reports of the National Recreation and Park Association, New York, which issues its *Recreation and Park Yearbook* at 5-year intervals. The Department of Agriculture's Forest Service, in its *Annual Report of the Chief*, issues data on recreational uses of the national forests. Figures on expenditures for recreation and on domestic and foreign travel, compiled by the Department of Commerce's Office of Business Economics, appear periodically in the monthly *Survey of Current Business*. Domestic travel data by volume and type were collected by the Bureau of the Census as part of its 1963 Census of Transportation and published in the *Passenger Transportation Survey: National Travel and Home-to-Work Travel*.

Public-domain and acquired lands.—The U.S. Government acquired sovereignty over its present land area through a series of international agreements and treaties, but did not gain title to all of this land by such agreements. At the time of acquisition of U.S. sovereignty over the areas involved (now 2,271 million acres) title to about 463 million acres rested in individual States and their political subdivisions or in private owners, and was not relinquished to the U.S. Government. Title to the remaining land area passed to the U.S. Government. This area, with the exception of lands in the District of Columbia, is known as the original public domain.

Public-domain lands or public lands are those Federally owned lands to which the public land laws apply. In general, these lands include that portion of the original public domain not disposed of under the public land laws, and certain other lands declared by the Congress specifically to be public lands.

In addition to the original public domain, the U.S. Government has from time to time acquired, by purchase, condemnation, and gift, tracts of land needed for public purposes. Such lands are referred to as acquired lands, to distinguish them from public-domain lands.

Indian lands.—Indian lands refer to public-domain lands ceded to the Government by Indian tribes on condition that proceeds from their sale or other disposition would be earmarked in the Treasury as in trust for the Indians.

Entries, selections, patents, and certifications.—The data on entries, selections, patents, and certifications refer to transactions which involve the disposal, under the public land laws (including the homestead laws), of Federal public lands to non-Federal owners. In general, original entries and selections are applications to secure title to public lands which have been accepted as properly filed. Some types of applications, however, are not reported until the final certificate is issued. Applications become final entries (perfected entries) upon issuance of a final certificate to the applicant after he has complied fully with the requirements of the laws relating to his application. A final certificate passes equitable title to the land to the applicant. Patents are instruments which pass legal title to the land to the applicant. Certifications are issued in lieu of patents in connection with certain State selections.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 272. AREA AND ACQUISITION OF THE PUBLIC DOMAIN: 1781 TO 1964

[In thousands of acres. Areas of acquisitions are as computed in 1912; hence do not agree with figures in square miles shown in table 240, which includes later adjustments and reflects subsequent remeasurement. See also *Historical Statistics, Colonial Times to 1957*, series J 3-9]

1853, Gadsden Purchase.....	18,989	18,962	27
1867, Alaska Purchase.....	375,296	365,482	9,814

¹ Comprises original public domain plus acquired lands. Estimated from imperfect data available for indicated years. Prior to 1959, excludes Alaska.

² Data for Louisiana Purchase exclude areas eliminated by Treaty of 1819 with Spain. Such areas are included in figures for Mexican Cession.

³ Includes 33,920 acres subsequently recognized as part of State of Texas which is not a public-domain State.

⁴ Represents drainage basin of Red River of the North, south of 49th parallel. Authorities differ as to method and exact date of its acquisition. Some hold it as part of Louisiana Purchase; others maintain it was acquired from Great Britain.

No. 280. PUBLIC LANDS—HOMESTEAD ENTRIES, 1941 TO 1965, AND VACANT LANDS, 1940 TO 1965, BY STATES

[Homestead entries for years ending June 30; vacant lands as of June 30. Excludes States with less than 500 acres in years specified. See text, p. 196. Vacant public lands are those which are unappropriated and unreserved. The former represent lands not covered by an entry; the latter, lands not reserved for some public purpose, i.e., available for entry or selection under appropriate laws. Data cover vacant public lands outside Alaska withdrawn for classification in furtherance of Taylor Grazing Act and for conservation and development of natural resources. See *Historical Statistics, Colonial Times to 1967*, series J 10, for vacant lands excluding Alaska and J 17-18 for homestead entries]

FIG. XIV. TRENDS IN THE LABOR FORCE: 1952 TO 1965

[See table 307]

Source: Chart prepared by Dept. of Commerce, Bureau of the Census. Data for 1952-June 1959 from Bureau of the Census; thereafter, Dept. of Labor, Bureau of Labor Statistics.

Section 8

Labor Force, Employment, and Earnings

This section presents statistics dealing with the characteristics of the economically active segment of the population, the labor force; its distribution by occupation and industry affiliation; and the supply of, demand for, and conditions of labor.

The chief sources of these data are the Decennial Census of Population conducted by the Bureau of the Census (see text, p. 1); *Employment and Earnings and Monthly Report on the Labor Force* and *Monthly Labor Review*, issued by the Bureau of Labor Statistics; and *Farm Labor*, issued monthly by the Statistical Reporting Service, Department of Agriculture.

Types of data.—Statistics shown in this section are of two types. One type is obtained by the "population approach" represented by the Census of Population of the Bureau of the Census and by the monthly labor force survey of the Bureau of Labor Statistics, for which data are collected as a part of the Current Population Survey (see below). This approach involves direct enumeration and interrogation to obtain information on employment activity from workers or members of workers' households. Each employed worker is counted only once, even though he may have held two or more jobs during a given period.

The second type of data is obtained by the "establishment approach," represented by the industry surveys of the Bureau of Labor Statistics and the surveys of the Department of Agriculture's Statistical Reporting Service. These data are based on reports from employers, i.e., farms, businesses, or industrial establishments. Such data as wages, hours worked, labor turnover, and industry affiliation of employees can be more accurately obtained from employers' records than from inquiries directed to a worker or a member of his household. Workers appearing on more than one payroll for the same time period are counted more than once in establishment statistics.

The Census of Population provides detailed data for the United States and for each State, city, and other area. It includes personal characteristics (sex, age, race, etc.) of the numbers employed and unemployed, the numbers reported in each occupation and industry, and other items. The labor force survey provides current data published in *Employment and Earnings and Monthly Report on the Labor Force* and in related publications series of the Bureau of Labor Statistics. Data presented include national totals, by sex and age, of the number of persons in the civilian labor force, the number employed in nonagricultural industries and in agriculture, the number unemployed, and the number of nonworkers. Also provided are data on hours of work and broad occupation groups of those employed and duration of unemployment of those unemployed.

In addition, the Bureau of Labor Statistics, in *Employment and Earnings and Monthly Report on the Labor Force* provides detailed monthly data on nonagricultural employment, unemployment, labor turnover, earnings, and hours. These data are shown for broad groupings in the *Monthly Labor Review*, which also presents statistics on wage rates, industrial relations, and output per man-hour. Certain of these data are shown for States and large cities. Historical statistics are shown in the Bureau of Labor Statistics Bulletin No. 1312-3, *Employment and Earnings Statistics for the United States, 1909-65*, and in No. 1370-2, *Employment and Earnings Statistics for States and Areas, 1939-64*.

Current Population Survey.—Monthly data on the labor force are collected and compiled for the Bureau of Labor Statistics as a part of the Current Population Survey, a nationwide sample survey conducted by the Bureau of the Census. (See text, p. 1.) According to current computations, the relative sampling error for summary estimates such as civilian labor force, total employment, and nonagricultural employment is

about 0.4 percent; for agricultural employment and for unemployment, it is roughly 3 to 4 percent. The chances are about 2 out of 3 that an estimate from the sample would differ from a complete census by less than the percentage estimated above for the particular item. The chances are about 19 out of 20 that the difference would be less than twice the specified percentage and about 99 out of 100 that it would be less than $2\frac{1}{2}$ times the percentage. This sampling variability is illustrative of the variability of data based on the Current Population Survey. For further details, see the original releases of the Bureau of the Census and explanatory notes in the Bureau of Labor Statistics *Employment and Earnings and Monthly Report on the Labor Force*.

Statistics obtained from the Current Population Survey may differ from decennial census data because of sampling variability as well as differences in the training and experience of enumerators and in the enumeration procedures. For further information, see *U.S. Census of Population: 1960*, Vol. I.

Labor force.—The labor force data published by the Bureau of Labor Statistics and by the Bureau of the Census include persons 14 years old and over who were employed, unemployed, or in the Armed Forces during a specified week. Employed persons include those who did any work for pay or profit during the week, worked without pay for 15 hours or more in a family enterprise (farm or business), or did not work or look for work but had a job or business from which they were temporarily absent during the week. Unemployed persons comprise those who did not work at all during the week but were looking for work or were on layoff from a job.

In the 1960 Census, the labor force data relate to the first or second week of April for the majority of the population. "Experienced civilian labor force" refers to all employed workers and unemployed workers with previous work experience.

Employment and earnings.—The monthly estimates of nonagricultural employment prepared by the Bureau of Labor Statistics are based on voluntary reports from establishments which employed 11 million manufacturing workers in March 1964 (65 percent of total manufacturing employment at that time) and 8 million workers in nonmanufacturing industries except Government (27 percent of the total in nonmanufacturing industries). These reports are supplemented by data from other Government agencies and adjusted at intervals to data from tabulations of reports under Government social insurance programs. The monthly estimates exclude persons not normally on establishment payrolls, such as proprietors of unincorporated businesses, self-employed persons, domestic servants, unpaid family workers, agricultural workers, and persons in the Armed Forces. The employment data are for all employees, whether full- or part-time, who received pay for any part of the period reported.

Estimates are available on a continuous basis from 1919 for total nonfarm payroll employment and the 8 major industry divisions. Estimates for other periods are available for several hundred selected industries. Both total employment and production-worker estimates are published for 21 major manufacturing groups, 250 manufacturing subgroups, and 11 mining industries. Also, estimates for nonsupervisory workers are published for individual wholesale trade, retail trade, public utility, and some finance and service industries; estimates for construction workers are published for the contract construction industries; and 363 series are published for the employment of women.

Average weekly hours and average weekly and hourly earnings are available for over 350 series covering production and related workers in manufacturing and mining, construction workers in contract construction, and nonsupervisory workers in other selected nonmanufacturing industries. The earnings data are gross (before payroll deductions) and include overtime premiums; they exclude irregular bonuses and value of payments in kind. Hours are those for which pay was received.

Agricultural employment estimates and wage rates, obtained by means of monthly mail returns, have been issued since 1909 by the Department of Agriculture and appear monthly in *Farm Labor*.

Output per man-hour.—The Bureau of Labor Statistics prepares and publishes annual measures of output per man-hour according to two broad concepts. The first, physical output per man-hour, deals with the relationship between production in physical units and man-hours used in production; the second, net output per man-hour, with the relationship between value added (at fixed prices) and man-hours. Both indexes measure the relationship between production and one factor of input—labor time. They do not measure the specific contribution of labor or capital nor do they measure increased efficiency resulting from technological changes or changes in production procedures.

The indexes of output per man-hour for selected industries are based on the physical output per man-hour concept; measurements relating to the total economy and various sectors are based on the net output per man-hour concept. These indexes are influenced by the divergent movements of various industries which make up the total, as well as by changes in the relative importance of these components.

Labor turnover.—Labor turnover rates are published monthly in the *Monthly Labor Review* and in *Employment and Earnings and Monthly Report on the Labor Force* for over 220 industries on the basis of reports from cooperating establishments employing over 10 million workers (about 60 percent of the universe surveyed). Labor turnover data are available on a monthly basis from January 1930 for manufacturing as a whole. Labor turnover rates for individual industries and industry groups are available on a continuous basis only from January 1958.

Work stoppages.—Statistics on strikes are compiled by the Bureau of Labor Statistics and include stoppages, workers involved, and man-days of idleness. Basic data are obtained from the employers and unions involved in strikes. Knowledge of strikes comes from a variety of sources, including newspapers, State employment services, and State and Federal mediation services. The Bureau prepares annual reports published in the *Monthly Labor Review* and, later, in bulletin form, giving total figures for each month of the year and analyses of strikes by industry, State, city, causes, and other classifications.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

NO. 307. EMPLOYMENT STATUS OF THE NONINSTITUTIONAL POPULATION, BY SEX AND COLOR: 1940 TO 1966

[In thousands of persons 14 years old and over, except percent. Prior to 1960, excludes Alaska and Hawaii. Annual figures are averages of monthly figures. Data for 1950 and 1955 adjusted to reflect changes in definition of employment and unemployment adopted in January 1957. Beginning 1955, labor force and employment figures not strictly comparable with previous years as a result of introduction into estimating procedure of 1950 Census data through March 1962 and of 1960 Census data thereafter. See *Historical Statistics, Colonial Times to 1967*, series D 1-14 and D 20, for similar but not exactly comparable data]

No. 315. NONAGRICULTURAL INDUSTRIES—NUMBER OF EMPLOYEES, AND NUMBER, HOURS, AND EARNINGS OF PRODUCTION WORKERS: 1960 AND 1965

[Number in thousands. Covers all full- and part-time employees who worked during, or received pay for, any part of the pay period including the 12th of the month. For mining and manufacturing, data refer to production and related workers; for contract construction industries, to employees engaged in actual construction work; and for other industries, to nonsupervisory employees and working supervisors. See also headnote, table 314. See *Historical Statistics, Colonial Times to 1957*, series D 48-56, D 626-641, and D 669-684, for related but not comparable data.]

**No. 316. EMPLOYEES IN NONAGRICULTURAL ESTABLISHMENTS, ANNUAL AVERAGES—
TOTAL, 1960 AND 1965, AND BY INDUSTRY, 1965, BY STATES**

[In thousands. For coverage, see headnote, table 314. National totals differ from the sum of the State figures because a few States prepare combinations of industries, some States have more recent benchmark levels than others, and methods of computation may vary slightly among the States]

Self-employed workers.....	200	3.0	9	9	(2)	191	191	(2)
Unpaid family workers.....	9	1.5	-	-	(2)	9	9	(3)

- Represents zero.

¹ Persons with 2 or more jobs as a percent of all employed persons in industry—class-of-worker group.

² Self-employed persons with a secondary farm or business, but no wage or salary job, were not counted as multiple jobholders.

³ Persons whose primary jobs were as unpaid family workers were counted as multiple jobholders *only* if they also held a wage or salary job.

No. 319. MARITAL STATUS OF WOMEN IN THE CIVILIAN LABOR FORCE: 1940 TO 1965

[Persons 14 years old and over, except percent. As of March, except as indicated. Prior to 1960, excludes Alaska and Hawaii. Includes institutional population. Figures for 1940 based on complete census revised for comparability with intercensal series. Data for 1944-1965 based on Current Population Survey; see text, p. 1. Beginning 1954, figures not strictly comparable with previous years as a result of introduction into estimating procedure of 1950 Census data through 1961, and of 1960 Census data beginning March 1962. See table 31. See also *Historical Statistics, Colonial Times to 1957*, series D 33-35]

NA. Not available.

¹ Roman numerals indicate work level defined in terms of duties and responsibilities. For detailed definitions, see source.

² For definition of standard metropolitan statistical area (SMSA) see text, p. 1. For 1964, covers the 212 SMSA's as defined in 1961; for 1965, the 218 SMSA's in conterminous United States as defined in 1964.

³ Refers to straight-time salary corresponding to employee's normal work schedule excluding overtime.

⁴ Excludes Alaska and Hawaii.

No. 329. INDEXES OF OUTPUT, PAYMENTS, AND PRICES IN THE PRIVATE ECONOMY AND THE NONFARM SECTOR: 1947 TO 1964

[1957-59=100. Prior to 1960, excludes Alaska and Hawaii. In addition to wages and salaries of employees, labor payments include such supplements as employer contributions to social security, private insurance and pension funds, compensation for injuries, and other minor items of labor income. Nonlabor payments are derived as the difference between labor payments and gross national product in current dollars]

No. 330. OUTPUT PER MAN-HOUR FOR THE PRIVATE ECONOMY—INDEXES AND YEAR-TO-YEAR CHANGE: 1947 TO 1965

[Prior to 1960, excludes Alaska and Hawaii. Output per man-hour refers to constant (1958) dollar value of goods and services produced in relation to hours of all persons employed, including proprietors and unpaid family workers. Man-hour estimates based primarily on data from reports specified; see text, p. 215. See *Historical Statistics, Colonial Times to 1967*, series W 9-11, for indexes on a 1947-49 base]

No. 332. PRODUCTION WORKERS, MANUFACTURING INDUSTRIES—NUMBER, WEEKLY AND HOURLY EARNINGS, AND WEEKLY HOURS: 1940 TO 1966

[Prior to 1960, excludes Alaska and Hawaii. Workers include all full- and part-time employees who worked during, or received pay for, any part of pay period including 12th of month; data adjusted to March 1964 benchmark data from Government social insurance programs. Net spendable average weekly earnings represent average gross earnings less social security and income taxes. Net spendable earnings then divided by BLS-consumer price index, adjusted to average 1957-59 base, to obtain net spendable earnings in 1957-59 dollars. Overtime defined as work in excess of either straight-time workday or workweek and paid for at time and one-half. See *Historical Statistics, Colonial Times to 1957*, series D 626-628, for related but not comparable data]

NO. 336. PERCENT OF WORKERS EMPLOYED IN ESTABLISHMENTS HAVING FORMAL PROVISIONS FOR SELECTED SUPPLEMENTARY WAGE BENEFITS, 212 SMSA's: 1965

[Surveys relate geographically to the 212 standard metropolitan statistical areas in the U.S., as established by the Bureau of the Budget through 1961. Based on occupational wage surveys conducted in 80 areas, selected to represent the 212 areas. Information on establishment practices is obtained annually in 6 of the largest areas; in other areas, biennially in a rotating cycle. Data for a majority of the workers relate to late 1964 and early 1965; for the remainder, to late 1963 and early 1964. Data obtained from sample of establishments which employ 50 workers or more, except in 12 of the largest areas where the minimum size was 100 employees for manufacturing, public utilities, and retail trade; see source. Excludes data for government institutions, and construction and extractive industries. Excludes administrative, executive, and professional employees]

¹ Data are arithmetic means of monthly estimates of persons employed during last full calendar week in each month.

² Includes farm operators doing 1 or more hours of farm work and members of their families doing 15 hours or more of unpaid farm work during survey week.

³ Includes all persons doing 1 or more hours of farm work for pay during survey week. Members of operators' families doing any farm work for cash wages are counted as hired workers.

⁴ Weighted averages of wage rates as reported quarterly by crop reporters.

No. 342. INJURY-FREQUENCY RATES, 1960 TO 1965, AND SEVERITY MEASURES, 1962 AND 1963, FOR SELECTED INDUSTRIES

[Frequency rate is average number of disabling work injuries, and severity rate is average number of days disability, per 1 million employee-hours worked. Data are on basis of Standard Industrial Classification as revised in 1957. See also *Historical Statistics, Colonial Times to 1957*, series D 785, for injury-frequency rates for manufacturing on old basis]

INDUSTRY	INJURY-FREQUENCY RATES				SEVERITY MEASURES

No. 344. INDEXES OF UNION WAGE RATES AND WEEKLY HOURS IN SELECTED TRADES: 1945 to 1965

[1957-59=100. Prior to 1964, excludes Alaska. As of July 1, except that 1950 data for local transit operators are as of October 1. For 1945 to 1961, covers 53 cities in printing and 52 in the other trades; for 1962, 54 cities in printing and 53 in the other trades; for 1963, 62 cities in printing and 61 in the other trades; for 1964 and 1965, 69 cities in printing, 67 cities in local transit, and 68 in the other trades. Indexes of rates reflect changes in minimum hourly wage scales; indexes of hours reflect changes in the negotiated straight-time weekly hours. Year-to-year changes in union scales are based on comparable quotations for each individual trade weighted by membership for current year. See *Historical Statistics, Colonial Times to 1957*, series D 642-653, for printing on 1948-49 base and other trades on 1947-49 base]

No. 347. WORKERS COMMUTING—DISTANCE, TRANSPORTATION, AND TRAVEL TIME TO WORK: 1963

[Workers in millions. As of October. Covers employed members of households who commute $\frac{1}{4}$ mile or more to work and who report to a definite work location at the beginning of the work day. Based on a nationwide probability sample of households and subject to sampling variability]

ITEM	Workers		ITEM	Workers	
	50	100		Percent	Percent
Total.....	50	100	Travel time to work:		
Distance from home to work:			Under 15 minutes.....	13	25

No. 348. WORK STOPPAGES: 1940 TO 1965

[Prior to 1959, excludes Alaska, and 1960, Hawaii. Excludes work stoppages involving fewer than 6 workers or lasting less than 1 day. Information obtained directly from companies and unions involved as well as from various Government labor boards, conciliation services, and other neutral parties. See also *Historical Statistics, Colonial Times to 1957*, series D 764-769 and D 774]

YEAR	WORK STOPPAGES BEGINNING IN YEAR		WORKERS INVOLVED		MAN-DAYS IDLE DURING YEAR		
	Number	Average duration (calendar days)	Number ¹ (1,000)	Percent of total employed ²	Number (1,000)	Percent of estimated working time ³	Per worker involved

1965.....	3,963	25.0	1,550	3.1	23,300	0.18	15.1

¹ Workers counted more than once if involved in more than 1 stoppage during year.

² Total employed workers for 1940-1950 refers to all workers except those in occupations and professions in which there is little if any union organization or in which stoppages rarely if ever occur. In 1951, concept was changed to coincide with the Bureau of Labor Statistics figures for nonagricultural employment, excluding Government but including workers in all occupational groups. Tests show that percentage of total idleness computed on basis of these new figures usually differs by less than one-tenth of a point, while percentage of workers idle differs by about 0.5 or 0.6 of a point.

³ Estimated working time computed by multiplying average number of employed workers (see footnote 2) by number of days worked by most employees.

Section 9

National Defense and Veterans Affairs

This section presents statistics on national defense and its human and financial costs; military personnel, ships, and aircraft; Selective Service operations; and various Federally sponsored programs and benefits for veterans. The principal sources of these data are the Office of the Secretary of Defense; annual reports of the Departments of the Army, Navy, and Air Force; the Selective Service System; *Annual Report of the Administrator of Veterans Affairs*, Veterans Administration; and *Budget of the United States Government*, Bureau of the Budget. Data on veterans also appear in reports of the Census of Population, conducted by the Bureau of the Census.

Department of Defense.—Until 1947, the Army, Navy, and Air Force operated under independent jurisdiction, answering only to the Commander-in-Chief, the President of the United States. In 1947, passage of the National Security Act resulted in the National Military Establishment, organized to provide for the coordination and unified direction of the Army, Navy, and Air Force under a civilian Secretary of Defense. The three services remained separately administered, however, and each retained its Department status. Amendments to the Act in 1949 redesignated the National Military Establishment as the Department of Defense.

Selective Service.—The Selective Service System is responsible for the registration, classification, selection, forwarding for examination, and delivery for induction into the Armed Forces of all men required to register under the Universal Military and Training Act, as amended. The act requires all men in the United States between the ages of 18 and 26 to register, and makes those between 18½ and 26 years old liable for service in the Armed Forces. It also provides exemptions from service or deferments for reasons of previous service, essential occupation, etc. Deferred persons remain liable for service until they reach 35 years of age. Selective Service is also authorized to determine availability of members of the Standby Reserve of the Armed Forces for order to active duty in time of war or national emergency.

Veterans Administration.—The Veterans Administration administers laws authorizing benefits for eligible former and present members of the Armed Forces, and for the beneficiaries of deceased former members. Veterans benefits available under various acts of Congress include: Compensation for service-connected disability or death; pensions for nonservice-connected disability or death; vocational rehabilitation for service-connected disability; education and training; guaranty or insurance of home, farm, and business loans; U.S. Government and National Service Life Insurance; hospitalization; domiciliary care; nursing home care; out-patient medical and dental care for service-connected disability; prosthetic and other appliances; special housing and automobiles or other conveyances for certain disabled veterans; burial allowances; and educational assistance to sons and daughters of deceased or totally disabled veterans.

Estimates of veterans in civil life as published by the Veterans Administration generally cover all persons with war service and include those living outside the United States. Similar data from the Bureau of the Census relate to civilian males, 14 years old and over, who live in the United States and who have served in the Armed Forces, whether in war or peacetime.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 352. FEDERAL ADMINISTRATIVE BUDGET EXPENDITURES FOR NATIONAL DEFENSE FUNCTIONS AND VETERANS BENEFITS AND SERVICES: 1930 TO 1967

[In millions of dollars, except percent. For years ending June 30. Includes expenditures of Department of Defense, Veterans Administration, and other agencies for activities primarily related to national defense and veterans programs. Excludes expenditures for programs which, though closely related to national defense or veterans services, have a primary relationship to other categories of the functional classification (see table 540). Functional classification revisions for national defense have been carried back through 1935. For further detail as to classification of particular items in 1965, 1966, and 1967, see *Budget of the United States Government, 1967*, pp. 145-159 and 166-351. See also *Historical Statistics, Colonial Times to 1957*, series Y 357-358 and Y 360]

D Not shown to avoid disclosure for individual firms. X Not applicable Z Less than 500 employees, \$500,000 disbursements or 0.05 percent. ¹ See table 463.

² Preliminary. Reported on quarterly contribution reports of employers covered by State unemployment insurance laws; excludes disbursements to proprietors and self-employed.

³ Military and civilian. Disbursements to civilians are gross, before withholding. Excludes disbursements to foreign nationals employed. Disbursements to the military are derived as the sum of (a) gross earnings of military personnel stationed in the State, less amounts withheld by the government and sent to dependents, and (b) allotments received by military dependents resident in the State. ⁴ See table 316.

⁵ Preliminary. Workers covered by State unemployment insurance laws. Excludes proprietors, self-employed, and unpaid family workers.

⁶ As of Dec. 31. Excludes foreign nationals and U.S. citizens employed by the U.S. Government abroad.

⁷ Understated. Data for 1 or more of the 5 manufacturing industries were not separately shown, to avoid disclosure for individual firms. ⁸ Excludes data for 5 industries.

No. 360. MILITARY ASSISTANCE PROGRAM—VALUE OF PROGRAMS AND DELIVERIES, BY AREA AND COUNTRY: 1950 TO 1966

[In millions of dollars. For years ending June 30. Programs and deliveries are military equipment, supplies, and services planned for delivery and actually delivered. Includes (a) equipment and supplies procured for the Military Assistance Program or from procurement or stocks of military departments; (b) services, such as training, military construction, repair and rehabilitation of excess stocks, supply operations, and other charges, the delivery of which is included on the basis of the expenditure for the service; and (c) purchases of military equipment and supplies initially credit financed or guaranteed with MAP funds. The fact that there is a military assistance program for a country is not to be construed as a commitment of the United States]

No. 362. CIVIL DEFENSE—FEDERAL MATCHING FUNDS OBLIGATED, AND STATE AND LOCAL GOVERNMENT EXPENDITURES: 1952 to 1965

[In thousands of dollars. Obligations as of June 30, 1965, by fiscal year (ending in year stated) for which the funds were appropriated. Federal funds are obligated from a specified appropriation, and are made available to help State and local governments acquire civil defense emergency operating centers, survival supplies, equipment and training; and for personnel and administrative expenses. Federal contributions made on basis of applications submitted by States and approved by Office of Civil Defense and predecessors. States and outlying areas are required to match Federal funds on an equal basis, except that for 1952 to 1957, the matching ratio for Alaska was 70 percent Federal and 30 percent local]

No. 363. RADIOLOGICAL FALLOUT SHELTERS AND MONITORING STATIONS, STATES AND OTHER AREAS: 1965

As of June 30. Facility defined as any building, mine, or cave providing shelter space for 50 or more people and protection to extent that radiation would be reduced to at least $\frac{1}{10}$ of what it would be with no protection; space defined as area in a facility required to shelter 1 person. Monitoring station defined as a designated location protected to extent that radiation would be reduced to $\frac{1}{100}$ of what it would be with no protection and having trained monitors, radiological equipment, and relatively reliable communications]

- Represents zero. Z Less than 500. ¹ Based on National Fallout Shelter Survey.

² Facility owner has signed fallout shelter license which permits use of facility as a public shelter.

³ Official fallout shelter signs posted on facility.

⁴ Survival items (food, water, sanitation, and medical supplies) placed in shelters.

⁵ Number of spaces accommodated by supplies; not total capacity of facilities stocked.

⁶ Includes 24 monitoring stations in outlying areas of U.S. not allocated by area.

NA Not available. X Not applicable.

¹ Union forces only. Estimates of the number serving in the Confederate forces range from 600,000 to 1,500,000.

² Covers period Dec. 1, 1941, to Dec. 31, 1946.

³ Covers period June 25, 1950, to July 27, 1953.

⁴ Covers period Apr. 21 to Aug. 13, 1898. ⁵ Originally organized in 1907. Established as Air Force under the Armed Services Unification Act of 1947. For World War I, known as Aviation Service and included in data for Army; for World War II, known as Army Air Forces and included in data for Army.

⁶ Established Jan. 28, 1915. ⁷ Based on Army and Marines only. ⁸ Excludes Navy. See footnote 10.

⁹ Covers period July 1950 through January 1955. ¹⁰ Represents Far East area only. ¹¹ During hostilities only.

¹² Covers war personnel who departed from continuous U.S. through December 1898.

¹³ For periods covered, see footnotes 2, 3, 4, and 10. ¹⁴ Includes gassed in action. Army data include casualties in northern Russia to Aug. 25, 1919, and in Siberia to Apr. 1, 1920; Marine data represent casualties in Europe only.

¹⁵ Excludes personnel lost in sinking of the *Maine*, which occurred 2 months before hostilities.

¹⁶ Includes casualties incurred in October 1941, due to hostile action. ¹⁷ Covers only Army personnel base of 1,908,800.

¹⁸ Covers only Army personnel base of 246,410. ¹⁹ Covers only Army personnel base of 3,665,000.

²⁰ Covers all services base of 9,370,985. ²¹ Covers all services base of 4,428,939.

¹ Excludes transfers from appropriations to insurance trust funds from which the actual payments are made. Expenditures from VA Revolving Supply Fund also excluded to avoid duplication.

² Includes direct payments to beneficiaries from insurance appropriations, servicemen's indemnities, and benefits and dividends paid from insurance trust funds. Some noncash transactions, e.g., interest credited to dividends left on deposit also included.

³ Includes education and training allowances under Public Laws 246 and 550, and educational assistance for sons and daughters of deceased or totally disabled veterans under Public Laws 634, 86-785 and 88-361.

⁴ Includes subsistence allowances, tuition, supplies, and equipment of veterans training under Public Laws 16 and 894, and vocational rehabilitation allowances for World War I veterans.

⁵ Total differs from supporting detail by the net of overpayments collected and written off as uncollectable under the readjustment benefits appropriation amounting to \$1,140,000 in 1956, \$647,000 in 1957, \$280,000 in 1958, \$54,000 in 1959, \$193,000 in 1960, \$321,000 in 1961, \$136,000 in 1962, \$459,000 in 1963, \$186,000 in 1964, and \$3,000 in 1965.

⁶ Includes unemployment and self employment allowances; statutory burial allowances; automobiles and other conveyances for disabled veterans; homes for paraplegics; payments to participants in yellow fever experiments; military and naval family allowances of World War I veterans; marine and seamen's insurance in World War I; adjusted compensation (World War I bonus); withdrawals of the personal funds of patients held by VA as banker and funds due incompetent beneficiaries; soldiers' and sailors' civil relief; vocational rehabilitation revolving fund, and other miscellaneous expenditures.

⁷ Estimated; includes expenditures for hospital and domiciliary care, outpatient medical and dental treatment, medical research, and grants to Republic of Philippines for medical care and treatment of veterans.

⁸ Comprises construction and related costs which include expenditures from funds allotted under N.R.A. of 1933, P.W.A. Act of 1938, grants to Republic of Philippines for construction and equipping of a hospital, and amounts transferred to Dept. of Army, Corps of Engineers, for construction of hospitals.

⁹ Includes expenses for vocational counseling, travel for certain programs, reporting allowances paid schools for certifying attendance of veteran trainees, private laws for relief, and all administrative salaries and expenses.

X Not applicable.

¹ Administered as a trust fund for benefit of policyholders and their beneficiaries. All premiums collected on insurance issued and all interest earned thereon are paid into the fund; disbursements are made from it for death claims, dividends, and other benefits. The Government bears the cost of administration of this fund in addition to expenses for certain types of losses.

² Nonparticipating insurance for disabled veterans for whom good health provisions are waived because of disabilities resulting from active service between Oct. 8, 1940, and Sept. 2, 1945.

³ For veterans discharged on or after Apr. 25, 1951, with service-connected disability which would be compensable if 10 percent or more in degree, but who are otherwise insurable.

⁴ Veterans entitled to indemnity protection under Servicemen's Indemnity Act of 1951 and separated from active service without a service-connected disability between Apr. 5, 1951 and Jan. 1, 1957, were granted nonparticipating NSLI on 5-year renewable nonconvertible term plan without medical examination. Effective Jan. 1, 1959, this insurance made convertible to any one of 6 permanent plans (ordinary life, 20-payment life, 30-payment life, 20-year endowment, endowment at age 60, and endowment at age 65) or exchangeable for 5-year limited convertible term, which is not renewable after age 50.

⁵ Modified life, a new form of NSLI, became available May 1, 1965.

FIG. XVII. SOCIAL WELFARE EXPENDITURES UNDER SELECTED PUBLIC PROGRAMS: 1940 TO 1965
[Fiscal-year data. See table 394]

¹ Preliminary.

Sources: Chart prepared by Dept. of Commerce, Bureau of the Census. Data from Dept. of Health, Education, and Welfare, Social Security Administration.

Section 10

Social Insurance and Welfare Services

This section presents data related to governmental programs for old-age, survivors, disability, and health insurance (OASDHI); public and railroad employee retirement; unemployment and temporary disability insurance; aid to the needy; and maternal, child, and other welfare services. Also included here are selected data concerning private pension plans and financial data relating to corporate pension funds, the American Red Cross, United Fund campaigns, and philanthropic trusts and foundations.

There are several principal sources for these data. *Social Security Bulletin* and *Welfare in Review*, monthly publications of the Department of Health, Education, and Welfare, present current data on many of the programs and summarize annual data in statistical supplements published each year. Current data on employment security activities are published monthly in the Department of Labor's *Unemployment Insurance Review*, *Employment Service Review*, and their statistical supplements. Data on retirement and other benefits for railroad workers are published by the Railroad Retirement Board in its *Monthly Review* and *Annual Report*.

Social insurance under the Social Security Act.—Social insurance programs established by the Social Security Act provide protection against wage loss resulting from old age, prolonged disability, death, or unemployment and, since July 1966, protection against the cost of medical care in old age.

The old-age, survivors, disability, and health insurance (OASDHI) program provides monthly cash benefits to retired or disabled insured workers and their dependents and to the survivors of an insured worker. Within the specifications of the law, retirement benefits are payable to an aged insured worker; to his aged spouse or his spouse at any age caring for his child who is under age 18 or totally disabled; and to his child who is under age 18, totally disabled, or a full-time student. An aged worker becomes eligible for full benefits at age 65, although he may elect reduced benefits up to 3 years earlier; his spouse is under the same limitations. Under certain conditions, survivor benefits are payable to some dependents of an insured worker, including his aged widow or his widow at any age caring for his child who is under age 18 or totally disabled; his child who is under age 18, totally disabled, or a full-time student; and aged parents. Disability benefits are payable to an insured worker under age 65 with a prolonged disability that meets the definition in the Act and to his dependents on the same basis as dependents of retired workers. A lump sum benefit is also payable on the death of an insured worker.

Beginning July 1966, medical insurance has been provided under two coordinated plans for nearly all people age 65 and over: A hospital insurance plan which covers hospital and related services and a voluntary supplementary medical insurance plan which covers physicians' services and related medical services.

Retirement, survivors, disability and hospital insurance benefits are paid for by the contributions of workers, employers, and the self-employed on earnings up to \$6,600. Currently workers and their employers each pay 3.85 percent, and the self-employed pay 5.80 percent of covered wages for retirement, survivors and disability insurance. For hospital insurance, workers, employers, and the self-employed each pay .35 percent (see table 414). The rates are scheduled to increase gradually. For persons 65 and over currently not insured under social security the hospital benefits will be financed out of Federal general revenues. The voluntary medical insurance plan is financed by a \$3 a month premium paid by persons age 65 and over who choose

to enroll in the plan, and by an equal contribution by the Federal Government from general revenues. The money collected is deposited in Federal trust funds.

Both unemployment insurance and the public employment (placement) service are administered through the Bureau of Employment Security of the Department of Labor and each State's employment security agency. Under agreements with the Secretary of Labor, the State agencies also administer unemployment compensation for eligible ex-servicemen and Federal employees, and direct aid in the form of training and related cash allowances to persons being trained under the Manpower Development and Training Act.

State unemployment insurance laws pay benefits to unemployed covered workers meeting the qualifications in the State law. In most States, a waiting period of 1 week must be served before payments begin. Benefits are payable for a maximum number of weeks, ranging from 22 to 39 weeks among the States; maximum weekly benefits without dependents' allowances range from \$30 to \$65. In 10 States and the District of Columbia, maximum allowances ranging from \$3 to \$29 for dependents raise the range of maximum benefits to \$43 to \$75. Massachusetts pays \$6 for each dependent up to an unspecified amount. In Puerto Rico, benefits are payable for a maximum of 12 weeks; the maximum weekly benefit is \$20.

A 3.1-percent Federal tax is levied on the payroll of employers of 4 or more workers in industries covered by the Act and is used to finance the Federal-State program. Employers subject to the Federal law are allowed a credit of 2.7 percent of taxable payrolls for contributions paid to State agencies under State unemployment insurance laws; the Federal Government retains 0.4 percent of the tax out of which the Congress appropriates funds each year to cover employment security administrative costs.

Principal industries excluded from coverage are agriculture, State and local government, domestic service, nonprofit organizations, and railroads (see below).

The standard rate of contributions payable by employers in all but 8 States is 2.7 percent of the payroll taxable. However, employers with favorable unemployment experience may be assigned a lower rate (except in Puerto Rico); in 1964 the average employer contribution rate under State laws was 2.2 percent of the taxable payroll. In most States, the contribution is based on the first \$3,000 paid to a worker during the year. In 18 States, the rate applies to wages ranging from \$3,300 to \$7,200. Contributions collected by States are deposited to State accounts in the Federal Unemployment Trust Fund, from which States withdraw amounts needed for benefit payments.

Social insurance for railroad workers.—The social insurance programs administered by the Railroad Retirement Board cover employees of railroads or companies and organizations affiliated with railroad transportation. The Railroad Retirement Act provides retirement annuities for aged and disabled workers and for wives of retired employees, and benefits to survivors of deceased workers. Effective July 1966, Federal health insurance protection became available to railroad workers on the same basis as workers covered by social security. Funds for the railroad retirement and survivor benefit system come primarily from a tax on earnings. Effective January 1966, the first \$550 of each month's earnings became taxable under the Railroad Retirement Tax Act. The tax, divided equally between employer and employee, is 15.9 percent for 1966, including 0.7 percent for hospital insurance benefits.

The Railroad Unemployment Insurance Act provides benefits for unemployment and sickness, including maternity. The unemployment insurance program is financed by contributions from covered employers, paid directly to the Board. The contribution rate for 1966 is 4 percent (applicable to earnings not in excess of \$400 a month).

Social insurance for Federal Government employees.—One contributory retirement system for Federal civilian employees and two small noncontributory systems for special classes of employees are administered by the Civil Service Commission. In addition, there are separate retirement systems in operation for the uniformed

services (supplementing OASDHI under which they are covered on a contributory basis) and for special classes of Federal employees.

The Civil Service Retirement Act provides for age, optional, disability, deferred retirement, and discontinued service annuities for employees in the executive, judicial, and legislative branches of the U.S. Government and in the District of Columbia government if not subject to another retirement system or excluded by statute or by administrative order. It also provides annuities for the widows and minor children of deceased employees, and under certain conditions to the survivors of deceased annuitants. The employee contribution rate is 6½ percent, computed on base pay. Employing agencies pay into the Retirement Fund amounts equal to employee contributions.

Workmen's compensation.—All States have programs providing protection against work-connected injuries and deaths. Federal workmen's compensation laws cover Federal Government employees, private employees in the District of Columbia, and longshoremen and harbor workers. Most State workmen's compensation laws exempt such employments as agriculture, domestic service, and casual labor; the majority exempt employers who have fewer than a specified number of employees. Occupational diseases, or at least specified diseases, are compensable under most laws.

In most States total payments to injured workers or to survivor families are limited as to time, amount, or both. All compensation acts require that medical aid be furnished to injured employees; in about one-fourth of the laws there are either duration or cost limitations—or both—on the amount of medical benefits provided.

Public assistance.—Six programs, all administered by the States and localities, provide public assistance. Payments to four groups—the aged, the blind, the permanently and totally disabled, and children whose need arises from certain causes—are financed in part from Federal funds granted to States under the Social Security Act. The States may also receive grants for medical assistance to those aged persons not receiving old-age assistance and not able to take care of their medical bills themselves. Beginning 1966, the States may also receive grants for medical assistance to younger people not receiving assistance under the other Federally-aided programs who cannot meet their medical expenses. The Welfare Administration's Bureau of Family Services handles the Federal aspects of these programs. Aid to other needy persons is furnished mainly through general assistance, toward which the Federal Government makes no contribution.

To receive a Federal grant for assistance payments and administrative expenses under any Social Security Act program, a State must have a plan approved as meeting the requirements of the Act. Each State establishes the conditions under which needy people may receive assistance and determines how much they shall receive.

Health and welfare services.—Programs providing health and welfare services are aided through Federal grants to States for maternal and child-health services, services for crippled children, child-welfare services, vocational rehabilitation, and public health services (including water-pollution control, hospital survey and construction, community health centers, and control of specific diseases). The Children's Bureau, a part of the Welfare Administration, administers the first three of these programs; the others are administered by the Vocational Rehabilitation Administration and the Public Health Service.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 394. SOCIAL WELFARE EXPENDITURES UNDER PUBLIC PROGRAMS: 1935 TO 1965

[In millions of dollars. For Federal Government, most States, and some localities, years ending June 30; for other States and localities, various 12-month periods ending within year. Prior to 1960, workmen's compensation excludes Alaska, Hawaii, and outlying areas. Represents expenditures under public law and from trust accounts. Includes administrative expenditures and capital outlay for hospitals, public elementary and secondary schools, and publicly controlled higher education. See table 395 for program detail. See *Historical Statistics, Colonial Times to 1957*, series H 1-45, for data covering civilian programs only]

NA Not available. X Not applicable. Z Less than \$500,000.

¹ For old-age, survivors, disability, and health insurance, average monthly number; for railroad retirement program, public employee retirement systems and veterans' programs, number on rolls June 30; State unemployment and temporary disability insurance and veterans' unemployment allowances, average weekly number; railroad unemployment and temporary disability insurance, average number during 14-day registration period.

² Includes benefits to dependents (spouses and children) where applicable.

³ Excludes refunds of contributions to employees who leave service.

⁴ Retirement data include a significant amount and number of disability payments for 1940, and a small but unknown amount and number of survivor payments for 1940 and 1950.

⁵ Retirement data are for veterans of the Civil War, Indian Wars, Spanish-American War, Boxer Rebellion, and Philippine Insurrection; beginning October 1951, includes all service pensions. Disability data represent pensions, compensation, and subsistence payments to disabled veterans undergoing training. Lump sums are for burial of deceased veterans. ⁶ Excludes payments for medical care.

⁷ Program initiated under the Social Security Amendment of 1956.

⁸ Benefits first payable in 1943. Payable in Calif., N.J., N.Y., and R.I. Includes maternity data for R.I. and private-plan beneficiaries in Calif., and N.Y.; data for beneficiaries in N.J. not available.

⁹ Includes maternity data. Benefits first payable in July 1947.

¹⁰ Number represents families for Federal programs under the Uniformed Services Contingency Option Act of 1953 and for State and local government retirement systems.

¹¹ Includes payments made by the States as agents of the Federal Government under the Federal employees' unemployment compensation program and under the Ex-Servicemen's Compensation Act of 1953, and payments under the temporary extended unemployment insurance programs. Beginning 1961, includes Puerto Rico.

¹² Under the Servicemen's Readjustment Act of 1944 (terminated July 1949), and the Veterans' Readjustment Assistance Act of 1952 (terminated January 1960).

¹³ Area Redevelopment Act and Manpower Development Training Act programs. Based on unemployment insurance benefits paid in the State of training and allowances for other qualifying expenditures, such as transportation and dependency where applicable.

¹ Data from Dept. of Commerce, Office of Business Economics. Total earnings include earnings of self-employed; all wages and salaries represent disbursements for civilian and military pay in cash and in kind.

² Beginning 1955, adjusted for duplication of payrolls covered by both old-age, survivors, disability, and health insurance and State and local retirement systems. ³ Taxable plus estimated nontaxable wages and salaries.

⁴ Taxable wages plus estimated nontaxable wages and salaries. Beginning 1950, also represents coverage for railroad temporary disability insurance.

⁵ Excludes voluntary contributions and service credits. ⁶ Effective beginning 1951.

⁷ Taxable plus estimated nontaxable wages and salaries; beginning 1955, includes pay of Federal civilian personnel.

⁸ Payrolls of employers insured with private carriers, State funds, or self-insured, and pay covered by Federal programs in all areas.

⁹ Represents percent of all wages and salaries to reflect inclusion of Armed Forces pay.

No. 403. OLD-AGE, SURVIVORS, DISABILITY, AND HEALTH INSURANCE—ESTIMATED PAID EMPLOYMENT AND COVERAGE STATUS: 1940 TO 1964

[In millions, except percent. As of December. Prior to 1960, excludes Alaska and Hawaii. Represents civilian noninstitutional population aged 14 and over and the Armed Forces. Based on Bureau of the Census Current Population Survey; see text, p. 1. Coverage status generally determined on basis of the job with the greatest number of hours worked during the survey week. Corrected to December 1965]

COVERAGE STATUS	1940	1950	1955	1960	1961	1962	1963	1964

Other ⁴	3.5	7.6	1.9	2.0	2.0	2.0	2.0	2.1

X. Not applicable.

¹ Includes railroad employees and all members of the Armed Forces.

² Persons whose coverage was authorized by Federal law on an elective (generally group) basis but not in effect (chiefly employees of State and local governments).

³ Prior to 1951, all persons employed in the groups specified were excluded from coverage; beginning 1951, some persons in these groups became eligible for coverage; others were still not eligible for coverage either due to specific exclusions—such as employees of the Federal Government with civil service retirement coverage—or due to insufficient earnings where coverage depends on having minimum earnings (for example, farm employment and self-employment).

⁴ Consists chiefly of nonagricultural self-employment and employees of nonprofit organizations.

Source: Dept. of Health, Education, and Welfare, Social Security Administration; *Annual Statistical Supplement to the Social Security Bulletin*.

No. 404. OLD-AGE, SURVIVORS, DISABILITY, AND HEALTH INSURANCE—ACCOUNTS ESTABLISHED, EMPLOYERS REPORTING, AND COVERED EMPLOYMENT: 1940 TO 1965

[Beginning 1955, includes Puerto Rico and Virgin Islands; and beginning 1962, American Samoa and Guam. Quarterly estimates of employment and earnings exclude self-employment and agricultural labor. Excludes joint coverage under the railroad retirement and old-age, survivors, disability, and health insurance programs. See also *Historical Statistics, Colonial Times to 1967*, series H 118-120]

YEAR OR QUARTER	Social security accounts established ¹	Employers reporting taxable wages ²	COVERED EMPLOYMENT

January-March (prel.).....	1,636	4,390	58,600	67,500	1,151	66,100	1,123
1965: January-March (prel.).....	1,162	4,410	60,900	71,200	1,168	69,800	1,145

¹ As of Dec. 31, 1955, 163.4 million account numbers had been issued under the social security system and until June 30, 1963, 2.8 million under the railroad retirement system. After that date all account numbers were issued under social security system. Beginning 1962, includes special issuance of account numbers under the Internal Revenue Service Tax Registration Program.

² Annual data represent number of different employers filing returns for year; quarterly data, number of returns for quarter. A return may relate to more than 1 establishment if employer operates several separate establishments but reports for concern as a whole.

³ Annual data represent persons reported; quarterly data include estimates of wage and salary workers who received taxable limit in previous quarter of calendar year from a given employer. See footnotes 5 and 6.

⁴ Includes estimates of nonreportable earnings in excess of annual taxable limit. See footnote 5.

⁵ Wages up to taxable limit from each employer and self-employment income. Annual taxable limit on wages from a given employer or on self-employment income was \$3,000 through 1950; \$4,200 for 1955; \$4,800 thereafter.

⁶ A worker is not reported for a quarter if he has attained annual taxable limit in an earlier quarter of the year from a given employer.

¹ Benefits payable from the old-age and survivor insurance trust fund to retired-worker beneficiaries and their dependents and to survivors of deceased workers.

² Benefits payable from the disability insurance trust fund to disabled-worker beneficiaries and their dependents.

³ Distribution by type of benefit and by State or other area estimated. Dependents benefits are paid to insured workers' wives or dependent husbands aged 62 or over, wives under age 62 with child beneficiaries in their care, and children under age 18 (or older, if they have a disability that began before age 18). Survivor benefits are paid to widows or dependent widowers aged 62 or over, children under age 18 (or older, if they have a disability that began before age 18), widows or divorced wives with child beneficiaries in their care, and dependent parents age 62 or over of deceased insured workers. ⁴ Distribution by State or other area based on 10-percent sample.

¹ Total benefits provided by individual insurance, group benefits to workers in private employment, and sick leave for government employees.

² Group accident and sickness insurance and self-insurance privately written either on a voluntary basis or in compliance with State temporary disability insurance laws in California, New Jersey, and New York. Includes a small but undetermined amount of group disability insurance paid to government workers and to self-employed persons through farm, trade, or professional associations.

³ Includes State-operated plans in Rhode Island, California, and New Jersey; the State Insurance Fund and the special fund for the disabled unemployed in New York; and the cash sickness provisions of the Railroad Unemployment Insurance Act.

1965.....	1,188	59	-24	1,573	90	1,606	1,439	168

¹ January 1937-June 1940, equals appropriations transferred; July 1940-December 1950, taxes collected; beginning 1951, amounts appropriated. Beginning May 1951, includes State deposits under voluntary coverage agreements. For 1947-51, includes appropriations to cover benefits payable to certain veterans' survivors. Beginning 1952, for old-age and survivors insurance and 1959 for disability insurance trust fund, includes deductions for refund of employee tax overpayment.

² Includes interest and profit on investments and, beginning 1958, adjustment for interest on administrative expenses reimbursed to the old-age and survivors insurance trust fund from the disability insurance trust fund.

³ The purpose of the financial interchange is to place the trust funds in the position they would have been in had railroad employment always been covered under the old-age, survivors, and disability insurance system. Transfers to the railroad retirement account are represented by negative figures.

⁴ Represents net expenditures for administration. Beginning November 1951, adjusted for reimbursements to trust fund of small amounts for sales of services. Beginning October 1953, includes expenses for central office building construction. Since the January 1957 inception of disability fund, most administrative expenses paid initially from old-age and survivors fund, with subsequent reimbursement (plus interest) from disability fund for allocated cost of disability insurance operations. The Treasury Dept., however, is regularly reimbursed from the appropriate trust fund for its expenses as incurred.

⁵ Book value, includes net unamortized premium and discount, accrued interest purchased, and repayments on account of interest accrued on bonds at time of purchase.

⁶ 1937-1939, includes transactions of predecessor fund, the old-age reserve account.

- Represents zero. NA Not available. X Not applicable. Z Less than 500.

¹ Includes State programs shown in table 424. Represents unduplicated counts. For 1955 and 1960, includes data for UCV (Korea Veterans) program which terminated Jan. 31, 1950. Beginning 1964, excludes temporary unemployment programs. ² Adjusted for voided benefit checks. Includes payments under State (not Federal) temporary extended unemployment insurance provisions. ³ Represents number of first payments during year.

Prior to 1960, includes employees filing for unemployment compensation to supplement benefits under other programs; beginning 1960, excludes first payments filed jointly with State unemployment insurance programs.

⁴ 1964 data. Includes FBI employment not distributed by States.

Source: Dept. of Labor, Bureau of Employment Security; *Unemployment Insurance Statistics* and unpublished data.

No. 424. STATE UNEMPLOYMENT INSURANCE—SUMMARY, 1950

[Prior to 1960, total average weekly insured unemployment excludes Alaska and Hawaii. Beginning 1963, all data covered by State law after 1955; excludes unemployment compensation for Federal employees and for ex-service.]

NA Not available. X Not applicable. ¹ Employer becomes subject to State unemployment insurance law when he has employed specified minimum number of workers on at least 1 day in each of specified number of weeks within current or preceding calendar year; coverage provisions shown were in effect as of December 1965.

² For pay period ending nearest 15th of month. ³ Total wages in covered employment for all pay periods ending in year. ⁴ Wages subject to unemployment insurance tax. Includes State and local government coverage as well as private industry coverage; see text, p. 278. ⁵ Based on average covered employment in 12-month period.

⁶ Represents number of first payments during year. ⁷ 1965 constant dollars for: 1950, \$28.71; 1960, \$35.26; 1964, \$36.62. ⁸ Based on average total weekly wage in current year. ⁹ Number of weeks compensated divided by first payments.

¹⁰ Beginning 1960, based on first payments for 12-month period ended June 30; for 1950, based on 12-month period ended Sept. 30. ¹¹ Includes contributions, penalties, and interest from employers; also employee contributions in States which tax workers. ¹² Adjusted for voided benefit checks. Includes payments under State (not Federal) temporary extended unemployment insurance provisions. ¹³ Sum of balances in State clearing accounts, benefit-payment accounts, and State accounts in Federal unemployment trust fund. ¹⁴ 1964 data.

TO 1965, AND STATES AND PUERTO RICO, 1965

include Puerto Rico. Includes unemployment compensation for State and local government employees where men, except as noted. See also table 423 and *Historical Statistics, Colonial Times to 1957*, series H 162-174]

¹ Net cash and medical benefits paid by private insurance companies under standard workmen's compensation policies.² Net cash and medical benefits paid by competitive and exclusive State funds and by Federal workmen's compensation system.³ Cash and medical benefits paid by self-insurers, plus value of medical benefits paid by employers carrying workmen's compensation policies that exclude standard medical coverage.⁴ Premiums written by private carriers and State funds and benefits paid by self-insurers increased by 5 to 10 percent to allow for administrative costs. Also includes benefits paid and administrative costs of Federal workmen's compensation system.Source: Dept. of Health, Education, and Welfare, Social Security Administration. Periodically in *Social Security Bulletin*.

No. 427. WORKMEN'S COMPENSATION PAYMENTS, BY STATES: 1940 TO 1964

[In thousands of dollars. Payments represent cash and medical benefits and include insurance losses paid by private insurance carriers (compiled from the *Spectator (Insurance by States . . . of Casualty Lines)* and from published and unpublished reports of State insurance commissions); net disbursements of State funds (from the *Spectator* and from State reports, published and unpublished), estimated for some States; and self-insurance payments, estimated from available State data. Calendar-year data, except fiscal-year data for Federal employees and for a few States with State funds. Includes benefit payments under Longshoremen's and Harbor Workers' Compensation Act and Defense Bases Compensation Act for States in which such payments are made]

No. 442. VOCATIONAL REHABILITATION—NUMBER OF PERSONS AND FEDERAL GRANTS, STATES AND OTHER AREAS: 1965

[For year ending June 30. Federal grants averaging about 60 percent of total program are made to assist States in rehabilitating handicapped persons so they might prepare for and engage in paid employment to extent of their capabilities. The requisite matching rate varies among States according to per capita income; it averages about 46 percent of total program. Excludes training grants totaling \$20,200,000 and research grants totaling \$21,100,000. See headnote, table 440]

FIG. XIX. MEDIAN MONEY INCOME OF FAMILIES, BY YEARS OF SCHOOL COMPLETED AND COLOR OF HEAD: 1964

[See table 482]

Section 11

Income, Expenditures, and Wealth

This section presents statistics relating to two different aspects of income and expenditures: One aspect is the entire complex of the Nation's economic activities and the interaction of its major components (the national income and product system and the flow-of-funds system); and the other, the distribution of families and individuals by income size-classes or type of expenditure. Statistics on national wealth are also included.

The primary source for national income and product information is *Survey of Current Business*, published monthly by the Department of Commerce, Office of Business Economics. A revised set of income and product statistics for the years 1929 to 1964 was published in the August 1965 issue of *Survey of Current Business*. More detail appears in *The National Income and Product Accounts of the United States, 1929-1965*, a supplement to the *Survey of Current Business*, scheduled for release in late summer, 1966. Summary estimates for current quarters appear on pages S-1 and S-2 of the most recent issue of the *Survey of Current Business*. *National Income, 1954*, is the basic reference source for concepts and methodology which are still applicable.

The primary source for flow-of-funds data is the Board of Governors of the Federal Reserve System; the *Federal Reserve Bulletin* from time to time presents summarized versions of these data.

The major sources of data on income size distributions for families are the Bureau of the Census (Census of Population and Current Population Survey) and the Bureau of Labor Statistics (Survey of Consumer Expenditures). The differences between these series are described in *Family Income Distribution Statistics Published by Federal Agencies*, Statistical Evaluation Report No. 5, Bureau of the Budget, December 1964. Annual data on income distribution by size-class, compiled by the Bureau of the Census, appear in *Current Population Reports—Consumer Income*, Series P-60. A brief description of the Current Population Survey, which is the basis for the data in that report, is given on page 1 of this edition of the *Statistical Abstract*.

Another primary source of information on income distribution is the national *Survey of Consumer Finances* conducted annually since 1946 by the Survey Research Center of The University of Michigan. From 1946 through 1960, this survey consisted of a sample of approximately 2,700 family units or 3,000 spending units located in 66 sampling areas; from 1961 to 1963, it consisted of approximately 1,850 family units or 2,000 spending units. In 1964 and 1965, it consisted of 1,300-1,600 family units. The results of these surveys are published in a monograph series, *Survey of Consumer Finances*.

National income and product.—A general view of the economy is provided by a summary of the Nation's income, expenditure, and saving, shown in the form of a balancing set of accounts for the major economic categories—consumers, business, and government. (See table 452.) These statistics, assembled by the Council of Economic Advisors, are a part of the "national income and product" accounts of the Department of Commerce. An explanation of the items included in this summation may be found in the 1964 *Historical and Descriptive Supplement to Economic Indicators*, 88th Congress, 2d Session.

Gross national product.—Gross national product (called GNP) represents the total national output of goods and services at market prices. It is usually viewed in terms of expenditure categories. These categories comprise purchases of goods and services by consumers and government, gross private domestic investment by business, and net exports of goods and services. The goods and services included in GNP are those bought for final use (excluding illegal transactions) in the markets. There are a number of inclusions, however, which represent imputed values, the most important of which is the rental value of owner-occupied dwellings. GNP, the total national output, also measures the product attributable to the factors of production—labor and property—supplied by residents of the United States or paid in indirect taxes and the allowances for capital consumption (mainly depreciation). GNP differs from “national income,” described below, mainly in that GNP includes allowances for depreciation and for indirect taxes (such as sales and excise taxes).

National income.—National income is the aggregate of earnings by labor and property from the Nation's current production of goods and services. It is the sum represented by compensation of employees, proprietors' income, rental income, net interest, and corporate profits. Thus, it measures the total factor costs of the goods and services produced by the economy. Earnings are inclusive of direct taxes on those earnings.

Personal income.—Personal income is the current income received by individuals, by unincorporated businesses, and by nonprofit institutions (including pension and welfare funds) from all sources net of personal contributions for social insurance. It includes transfers (payments not resulting from current production) from government and business such as social-security benefits, military pensions, etc., but excludes transfers among persons. Although most of the income is in monetary form, there are important nonmonetary inclusions—chiefly, estimated net rental value to owner-occupants of their homes, the value of services furnished without payment by financial intermediaries, and the value of food consumed on farms.

Disposable personal income is equal to personal income less taxes on individuals (including income, property, and other taxes not deductible as business expense), and other general Government revenues (e.g., fines, penalties, etc.) received from individuals as individuals.

Flow-of-funds accounts.—Another general view of the economy is provided by the flow-of-funds accounts. This system of national accounts presents a record designed to picture the flow of funds through the major sectors of the national economy, the structure of the economy's saving and investment, by sector and by form of investment, and the relation between saving and the structure of financial flows. The transactions covered include transactions in financial instruments, existing assets, transfers of various kinds, and transactions involving currently produced goods and services. A similar presentation of the accounts in amounts outstanding for the financial categories gives the structure of financial assets and liabilities and a summary of the principal assets and liabilities by sector and by type of financial instrument. Quarterly flow data are available currently in the *Federal Reserve Bulletin*. The structure of the accounts is described in special articles in the August 1959 and November 1965 issues of the *Bulletin*.

Distribution of income by size-class.—Money income statistics are based on data collected in various field surveys of income conducted since 1936. In each of these field surveys trained enumerators interview representative samples of the population with respect to income received during the previous year. The income here referred to is consumer money income for the calendar year and is before deduction of income taxes or social-security taxes unless otherwise specified in individual tables. Non-

money items of income are not covered. None of the aggregate income concepts (gross national product, national income, or personal income) is exactly comparable with consumer money income. The nearest approximation is "personal income."

Individuals' savings and assets.—The Securities and Exchange Commission issues detailed estimates of individuals' savings showing the increase in financial assets held by individuals less the increase in their debt, exclusive of gains or losses from revaluation of assets. A continuous series starting with 1946 is published quarterly in a special release and in the Commission's *Statistical Bulletin*. (See table 469.) A reconciliation of the annual SEC estimates with the Department of Commerce estimates of personal savings appears in the Office of Business Economics publication, *U.S. Income and Output* for the years 1929 to 1965. The Federal Home Loan Bank Board compiles statistics on changes in selected types of individual long-term savings. (See table 638.)

The Survey Research Center of The University of Michigan also collects annual data (except for 1961) covering the distribution of liquid assets and occasional data covering positive, negative, and net savings of families, by income groups. In 1962 and 1963, the Survey Research Center collected data on the gross worth and net worth of spending units. The data on net worth are comparable to those for 1953 published in the *Federal Reserve Bulletin* for September 1953. Detailed comparisons and an explanation of methods are published in the monograph *1962 Survey of Consumer Finances*, chapter 6. The 1964 and 1965 surveys contain material on attitudes toward saving and statistics on liquid assets. These surveys are now conducted on a family rather than a spending unit basis.

National wealth.—The national wealth data shown here (tables 490 and 491) represent an attempt by Raymond W. Goldsmith to derive a consistent and comprehensive series in this field. As is the case in all national wealth estimates, the figures are intended chiefly to indicate the order of magnitudes involved and to permit rough comparisons among types of wealth and of the growth of wealth over long periods. Careful examination of the methods and sources of the estimates, as they are described in *A Study of Saving in the United States* and in *The National Wealth of the United States in the Postwar Period*, is therefore advisable before use is made of the figures.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 451. GROSS NATIONAL PRODUCT AND NATIONAL INCOME—SUMMARY: 1929 TO 1965

[In billions of dollars. Prior to 1960, excludes Alaska and Hawaii. For definitions of gross national product and national income, see text, p. 318]

ITEM	1929	1930	1933	1935	1940	1945	1950
Gross national product.....	103.1	90.4	55.6	72.2	99.7	212.0	284.8

¹ Dollar estimates in current prices divided by the implicit deflator for the personal consumption expenditures component of gross national product on a 1958 base.

² Total expenditures in 1958 prices divided by population.

³ Disposable personal income less personal outlays (personal consumption expenditures plus interest paid by consumers plus personal transfer payments to foreigners) equals personal net saving.

⁴ Population as of July 1; includes Armed Forces abroad. See *Current Population Reports*, series P-25, No. 327.

³ Net income of farm proprietors, farm wages and farm "other" labor income, less personal contributions under the old-age, survivors, and disability insurance program.⁴ Income disbursed directly to persons by Federal and State and local governments. Comprises wages and salaries (net of employee contributions for social insurance), other labor income, interest, and transfer payments.Source: Dept. of Commerce, Office of Business Economics; *Survey of Current Business*, July 1965.

No. 464. PERSONAL INCOME, 1950 TO 1965, AND RANK ORDER, 1965, BY STATES

[Represents a measure of current income received from all sources during the calendar year by the residents of each State. Excludes wages and salaries received by Federal military and civilian employees temporarily stationed abroad; hence, U.S. data shown here differ from those in tables 453, 456, and 461. See text, p. 318]

No. 466. SUMMARY OF FLOW OF FUNDS/SAVINGS ACCOUNTS: 1965

[In billions of dollars. Preliminary. Financial uses of funds ("U") represent net acquisitions of assets; financial sources of funds ("S"), net changes in liabilities. Differences in total uses and sources of funds for transaction categories result from valuation, timing, and classification differences, and from statistical discrepancies. For explanation of general concepts, see text, p. 318. For description of sectors and types of transactions, see *Federal Reserve Bulletin*, August 1959. "N.e.c." means not elsewhere classified]

- Represents zero.

¹ Estimates obtained by multiplying the constant dollar figures shown in table 491 by the appropriate price index for current year. See also footnote 1 in that table.

² 1945 estimates differ from one another not only because of changes in base period (1929 vs. 1947-49) of deflator applied in transforming original cost data into current values but also because of minor changes in sources of data and methods of estimation used.

³ Estimates are based on book values.

⁴ Estimates for farm land are based on Census or similar data. For other private land, estimates are derived by application of rough ratios of land to structure values for different types of real estate. Excludes subsoil assets.

— Represents zero.

¹ Estimates derived by "perpetual inventory" method which is intended to reflect reproduction cost of different types of assets. Estimates are obtained by: (a) Reducing each year's gross capital expenditures in current prices to 1929 (or 1947-49) price level by means of appropriate construction cost or wholesale price indices; (b) depreciating gross capital expenditures in accordance with an assumed length of life for different types of assets, thus obtaining net capital expenditures for each year in 1929 (or 1947-49) prices; (c) cumulating net capital expenditures for as many years backwards as corresponds to the assumed length of life of the type of asset involved.

² 1945 estimates differ from one another not only because of changes in base period (1929 vs. 1947-49) of deflator used but also because of minor changes in sources of data and methods of estimation used.

³ Estimates reflect book values reduced by means of wholesale price indices.

Section 12

Prices

This section presents indexes of wholesale, retail, and consumer prices, as well as prices for selected commodities. The primary sources of these data are publications of the Department of Labor, Bureau of Labor Statistics, which include: *Monthly Labor Review* and its *Annual Statistical Supplement*; *Consumer Price Index* (monthly); *Estimated Retail Food Prices by Cities* (monthly); *Retail Prices and Indexes of Fuels and Electricity* (monthly); and *Wholesale Prices and Price Indexes* (monthly and annual). The Statistical Reporting Service of the Department of Agriculture prepares indexes of prices received and prices paid by farmers (see text, p. 614).

The Bureau of Labor Statistics prepares weekly and monthly indexes of wholesale prices; a daily index of spot market prices of 22 commodities; and indexes of consumer prices for urban wage earners and clerical workers for the average of U.S. cities and individually for selected large cities, as well as component indexes for food and other groups.

Wholesale price index.—This index, dating from 1890, is the oldest continuous statistical series published by the Bureau of Labor Statistics. It is designed to measure average changes in prices of commodities sold in primary markets in the United States.

The index has undergone 4 major revisions (see *Monthly Labor Review*, February 1962). It is now based on nearly 2,200 commodity price series instead of the approximately 1,900 included in the 1947–60 period and the 900 included for the period prior to 1947. Prices used in constructing the index are collected directly from sellers, if possible, and generally apply to the first significant large-volume commercial transaction for each commodity—i.e., the manufacturer's or other producer's selling price, the importer's selling price, the selling price on an organized exchange or at a central market.

The weights used in the index represent the total net selling value including value of sales for export, f.o.b. production point, less interplant transfers, but plus value of imports for consumption, for the producing and processing sector of the economy. For the 1947–54 period these values were based primarily on dollar value of transactions reported in the 1947 industrial censuses. For 1955–57, weights were computed from values of primary market transactions in 1952 and 1953. For 1958–60, the weights were the net selling value of commodities in 1954. Effective January 1961, the weights were the net selling value of commodities in 1958, with the value of shipments from Alaska and Hawaii included. Formerly these were represented by estimates of imports from these 2 States.

Beginning January 1962, the various wholesale price indexes were converted to a new base of 1957–59=100 from the previous base of 1947–49=100. The all-commodities wholesale price index series on both bases has been extended back to 1890 on an annual average basis. Monthly indexes on the 1947–49 base have been computed from 1926 forward for most of the major commodity groups. Monthly indexes on the 1957–59 base are available for all major commodity groups from 1947 forward and, in a few instances, from earlier periods back to 1913. Any index on the 1957–59 base can be extended as far back as data are available by use of a conversion factor applied to the corresponding index on the 1947–49 base. The Bureau of Labor Statistics will supply conversion factors upon request.

Consumer price index.—This index as constructed through December 1963 measures the average change in prices of goods and services purchased by city wage-earner and clerical-worker families. Beginning January 1964, the coverage of the index was broadened to include single persons living alone. The weights used in calculating the index are based on studies of actual expenditures by wage earners and clerical

workers. The quantities and qualities of the items in the "market basket" remain the same between consecutive pricing periods, so that the index measures the effect of *price change only* on the cost of living of these families. The index does not measure changes in the total amount families spend for living; city indexes do not measure relative differences in prices or living costs between cities.

A study conducted during 1917-19 provided the weights used for 1913 to 1935. Since then, this index has undergone four major revisions, which involved bringing the "market basket" of goods and services up to date and improving the sample and methodology. From 1935 through 1949, time-to-time changes in retail prices were weighted by 1934-36 average expenditures except for certain temporary wartime adjustments. Weights used for 1950 through 1952 represented estimated 1949-50 spending patterns. Beginning 1953, the weights represented average purchases of urban wage-earner and clerical-worker families in fiscal year 1952. The most recent revision, incorporated in a new series beginning in 1964, introduced expenditure weights relating to 1960-61. The description which follows and the tables in this section refer to the new series. Both old and new series indexes are available from January through June 1964.

The list of items currently priced for the index includes approximately 400 goods and services. For some items, several different qualities are priced. The items priced are described by detailed specifications to insure that, as far as possible, the same quality is priced each time, and that differences in reported prices are measures of price change only. Sales taxes are reflected wherever applicable.

Beginning 1964, prices have been obtained in a sample of 50 areas. These include the urban portions of 31 Standard Metropolitan Statistical Areas (SMSA), the more extensive Standard Consolidated Areas for Chicago and New York; and 17 nonmetropolitan urban places. Area definitions are those established for the 1960 Census and do not include any subsequent revisions. Foods, fuels, and a few other items are priced monthly in all areas. Prices of most other goods and services are obtained monthly in the 5 largest areas and every 3 months in other areas. Rents are surveyed bimonthly in the 5 largest areas and every 3 months in other areas. Estimates are made for unpriced areas each month. Price changes for the 50 areas are combined for the United States with weights based on 1960 population of areas represented by each sample area. Area indexes are compiled for 17 of the 50 areas. Prior to 1953, indexes were based on food prices in 56 cities monthly, and prices of other commodities in 34 cities quarterly or monthly; from 1953 to 1964, they were based on prices of food monthly and other goods and services monthly or quarterly in 46 cities. Beginning 1966, the national index is based on 56 areas and separate indexes are published for 23 areas.

Retail food price index.—Retail food price indexes are computed as a subgroup of the consumer price index. Weights used at various times are consistent with those for the index as a whole. In March 1943, the weights were revised to take account of wartime changes in food purchases. In January 1946, the wartime adjustments were eliminated and certain other revisions made. In January 1950, January 1953, and December 1963, the weights were revised as for the total consumer price index.

The indexes were computed from prices of 54 foods for January 1935 to March 1943, 61 foods for March 1943 to June 1947, 50 foods for June 1947 to January 1950, 60 foods for January 1950 to December 1952, 90 foods from January 1953 to December 1963, and 96 foods beginning January 1964.

Comparability with other indexes.—In comparing the movement of the indexes of consumer prices and of the prices paid by farmers for commodities bought for family living (table 926), it should be noted that the consumer price index includes rents and other services and the farm index does not, and that the list of commodities included in the two indexes and their geographic coverage differ because farm family buying differs considerably from that of city families.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 492. WHOLESALE PRICE INDEXES—ALL COMMODITIES AND ALL COMMODITIES EXCEPT FARM PRODUCTS AND FOODS: 1913 TO 1966

NO. 496. WHOLESALE PRICE INDEXES, BY STAGE OF PROCESSING AND DURABILITY OF PRODUCT: 1950 TO 1966

[1957-59=100. 1960 and earlier years exclude Alaska and Hawaii; for treatment in index weights, see text, p. 349. These indexes are a regrouping of the regular Wholesale Price Index series to show price movements at various levels of production and in the various sectors of the economy. The new series comprise three major categories: (a) raw or crude materials; (b) intermediate materials, components, and supplies for further processing; (c) finished goods. Each of these three is further divided in accordance with end-use and durability. See *Historical Statistics, Colonial Times to 1967*, series B 42-64, for indexes on 1947-49 base]

ITEM	1950	1955	1960	1962	1963	1964	1965	1966, April (prel.)
STAGE OF PROCESSING								
All commodities.....	86.8	93.2	100.7	100.6	100.3	100.5	102.5	105.5
Crude materials for further processing.....	104.2	96.7	96.6	97.1	95.0	94.1	98.9	106.4

No. 498. CONSUMER PRICE INDEXES, BY COMMODITY GROUPS: 1913 TO 1966

[1957-59=100. Prior to 1964, excludes Alaska and Hawaii. Beginning 1964, the index structure has been revised to reflect buying patterns of urban wage earners and clerical workers in the 1960's, including single workers living alone as well as families of two or more persons. The indexes for prior years apply only to families of two persons or more. See *Historical Statistics, Colonial Times to 1957*, Series E 113-139, for indexes on 1947-49 base]

No. 501. CONSUMER PRICE INDEXES—RELATIVE IMPORTANCE OF COMMODITY GROUPS AND SERVICES: 1963 TO 1965

[Percent distribution. As of December. The relative importance of a component of the Consumer Price Index at any given time represents its expenditure weight multiplied by the relative price change from the weight date to the given period and the result expressed as a percent of the total for all items. Changes in the relative importance of a component result from (a) major weight revisions based on comprehensive consumer expenditure surveys; (b) minor weight adjustments to take account of changes in the list of items priced; and (c) different rates of price change among the various items. In the absence of a weight revision, if prices of all items changed at the same rate, the relative importance of each item or group in the index would remain unchanged. A major revision of the weighting structure was introduced in December 1963 to reflect 1960-61 spending patterns. In addition, some changes were made in the classification of individual items. Weights are shown according to the new series classification and are not comparable with data shown in the 1964 and earlier editions of the *Statistical Abstract*]

No. 503. ANNUAL BUDGET COSTS—CITY WORKERS' FAMILIES AND RETIRED COUPLES, 20 CITIES: 1959

[Based on autumn prices. City worker's family consists of 38-year-old employed husband, wife not employed outside home, 13-year-old boy, and 8-year-old girl, living in a rented dwelling. Retired couple consists of retired husband and wife, 65 years old or over. Budget represents an estimate of total cost of a representative list of goods and services necessary to maintain a "modest but adequate" (not a minimum subsistence) level of living in a large city]

¹ Includes alcoholic beverages. For retired couples, also includes a small allowance for guest meals.

² Average contract rent for tenant-occupied dwellings (5 rooms for city worker's family and 2 or 3 rooms for retired couple) that conform to housing standards specified for budget plus cost of required amounts of heating fuel, gas, electricity, water, and specified equipment.

³ Weighted average costs of automobile owners and nonowners.

⁴ Includes allowances for life insurance, occupational expenses, Federal old-age and survivors insurance, and, for California and New York, employee contributions to disability insurance as required by State law.

⁵ Budget assumes that payments on life insurance policies have been completed before retirement, and that most of the income of retired couples at this living standard is tax-exempt because of source and the remainder is insufficient to require payment of taxes.

No. 506. AVERAGE PRICES (UNIT VALUES)—SELECTED ARTICLES IMPORTED AND EXPORTED: 1950 TO 1965

[In dollars per unit. Includes trade of Puerto Rico with foreign countries. Unit values obtained by dividing annual values of imports (for consumption through 1963, general imports thereafter) or domestic exports by annual quantities. Values of goods imported represent market values in foreign country from which imported. Values of goods exported represent values at port of exportation. Unit values may show actual price movements only roughly for commodities subject to considerable price variations among different grades, methods of packing, etc., and to year-to-year variations in proportions of grades, etc. Unit values of agricultural exports also include effects of CCC sales for exports, at prices well below U.S. market quotations, and of other Government programs]

No. 507. AVERAGE RETAIL PRICES OF SELECTED FOODS: 1940 TO 1966

[In cents per pound, except as indicated. Prior to 1964, excludes Alaska and Hawaii, and represents averages of prices reported by retail dealers in cities included in the Retail Food Index. Beginning 1964, data are estimated averages of prices reported by retail dealers. For explanation, see *Monthly Labor Review*, January 1965, pp. 61-66. Number of cities varies according to the number of cities in which an item was priced and the availability of prices within the cities. Sales taxes not included after 1940. Prices for individual cities combined on basis of population weights. See also *Historical Statistics, Colonial Times to 1967*, series E 161-176]

No. 508. RETAIL PRICE INDEXES OF FOOD—SUBGROUPS AND SELECTED AREAS FOR URBAN WAGE EARNERS AND CLERICAL WORKERS: 1940 to 1965

[1957-59=100, except as indicated. Prior to 1964, excludes Alaska and Hawaii. See text, p. 350, and headnote table 498. Through 1963, the indexes applied only to families of 2 persons or more in the urbanized area. Beginning 1964, area indexes represent the entire urban portion of the standard metropolitan statistical area, except that the standard consolidated area is used for Chicago and New York. (For definition, see text, p. 1.) The 1964 old series indexes apply to the urbanized area. Represents "food at home" through 1950; thereafter, includes "food away from home." See *Historical Statistics, Colonial Times to 1957*, series E 114-120, for indexes on a 1947-49 base]

FIG. XXII. POPULAR VOTE CAST FOR PRESIDENT, BY MAJOR PARTIES; 1900 TO 1964

[See table 513]

Source: Chart prepared by Dept. of Commerce, Bureau of the Census.

Section 13

Elections

This section relates primarily to presidential, congressional, and gubernatorial elections. Also presented are summary tables on Congressional legislation.

Official statistics on Federal elections are collected by the Clerk of the House of Representatives and published biennially in *Statistics of the Presidential and Congressional Election* and *Statistics of the Congressional Election*. The Congressional Quarterly Service publishes a special report, *Complete Returns of the 19— Elections by Congressional District*, in March or April of each odd-numbered year. This report, prepared from figures gathered by the Governmental Affairs Institute, presents the results of presidential, congressional, and gubernatorial elections. Details of both Federal and State election statistics appear also in *America Votes*, issued biennially by the Governmental Affairs Institute. Data on Federal elections also appear in the *Congressional Directory*, United States Congress, and in official State documents.

Almost all Federal, State, and local governmental units in the United States conduct elections at various intervals—annual, biennial, quadrennial, or longer—for different types of offices and other purposes. No regular and complete system exists for reporting either the number of elections held or the numbers of votes cast for candidates, except for Federal offices and, in most States, for State offices. The conduct of elections is regulated by State laws or, in some cities and counties, by local charter. An exception is that the United States Constitution prescribes the basis of representation in Congress and the manner of electing the President of the United States, and grants to Congress the right to regulate the times, places, and manner of electing Federal officers. The 24th Amendment to the Constitution, adopted in 1964, gave citizens the right to vote in any election for Federal office without payment of tax.

The election of the President of the United States is provided for in the Constitution, article II, section 1, through the establishment of an electoral college in each State, for each presidential election. The method of casting the electoral vote was modified in 1804 by the adoption of the 12th Amendment to the Constitution. The number of electors, and therefore of electoral votes, is "equal to the whole number of Senators and Representatives to which the State may be entitled in Congress." The electors are elected by popular vote in all States. The 22d Amendment to the Constitution, adopted in 1951, limits presidential tenure to 2 elective terms of 4 years each, or to 1 elective term for any person who, upon succession to the Presidency, has held the office or acted as President for more than 2 years. The 23d Amendment, adopted in 1961, grants the District of Columbia electors for President and Vice President.

The number of members in the House of Representatives is fixed by the Congress at the time of each apportionment; since 1912, it has remained constant at 435. However, the legislation granting statehood to Alaska and Hawaii allotted 1 Representative to each of those States and, during 1960 to 1962, increased the total of members to 437. The total reverted to 435 after reapportionment following the 1960 Census. The Constitution provides that "Representatives shall be apportioned among the several States according to their respective numbers . . ." The Constitution also requires that each State have at least 1 Representative. Members are elected for 2-year terms, all terms covering the same period.

The Senate is composed of 100 members, 2 from each State, who are elected to serve for a term of 6 years. One-third of the Senate is elected every 2 years. Senators were originally chosen by the State legislatures. The 17th Amendment to the Constitution adopted in 1913, prescribed that Senators be elected by popular vote.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 513. ELECTORAL AND POPULAR VOTE CAST FOR PRESIDENT, 1900 TO 1964, AND VOTE CAST FOR REPRESENTATIVES, 1930 TO 1964, BY POLITICAL PARTIES

[Excludes Alaska and Hawaii, except as noted. Includes vote cast for major party candidates endorsed by minor parties. See also *Historical Statistics, Colonial Times to 1957*, series Y 27-31 and Y 146-149]

— Represents zero.

¹ Includes votes for minor party candidates, independents, unpledged electors, and scattered write-in votes.

² Includes Alaska and Hawaii. 1964 presidential vote includes District of Columbia.

³ Mainly Progressive in 1912 and 1924, States Rights and Progressive in 1948.

⁴ Socialist Labor only.

⁵ Includes 4,831,289 votes cast for La Follette, official candidate for the Progressive Party.

⁶ Workers Party.

⁷ See also table 519.

⁸ Includes minor party votes.

⁹ Includes Hawaii figures for July 1959.

Source: 1900-1944, Edgar Eugene Robinson, *The Presidential Vote and They Voted for Roosevelt*, Stanford University Press, Stanford, 1934 and 1947, respectively. Later data, Governmental Affairs Institute, Washington, D.C., *America Votes* (copyright); U.S. Congress, Clerk of the House, *Statistics of the Presidential and Congressional Election and Statistics of the Congressional Election*. (For some years, figures have been revised by Governmental Affairs Institute.)

No. 514. POPULAR VOTE CAST FOR PRESIDENTIAL ELECTORS, AND PERCENT OF VOTE FOR MAJORITY PARTY, BY STATES: 1940 TO 1956

[In thousands, except percent. D=Democratic, R=Republican. Majority party vote refers to the party vote representing either a majority or a plurality for the victorious party. See also table 513; for current figures, see table 515. See also *Historical Statistics, Colonial Times to 1957*, series Y 80-128]

¹ The 11-man Democratic elector slate consisted of 6 "unpledged" electors who subsequently voted for Harry F. Byrd, and 5 "loyalist" electors, who subsequently voted for John F. Kennedy.

² Democratic electors were not pledged to Johnson, therefore vote appears in "Other parties."

³ Vote cast for States' Rights Democratic Party.

⁴ Vote cast for unpledged Democratic electors who subsequently supported Harry F. Byrd for President.

⁵ Includes 406,176 Liberal Party votes cast for Democratic candidate for 1960, and 342,432 for 1964.

- Represents zero. X Not applicable. ¹ Includes vote cast for minor parties.

² Democratic candidate unopposed.

³ Votes cast round to same figure. For Nevada for 1964, recount figures: Democratic 66,907; Republican 66,823.

⁴ Represents votes cast for 6-year term. Votes cast for the 2-year term were as follows: Democratic 568,905 and Republican 517,330.

Source: U.S. Congress, Clerk of the House; *Statistics of the Presidential and Congressional Election and Statistics of the Congressional Election*. (In some cases, figures have been revised by Governmental Affairs Institute, Washington, D.C.)

NO. 518. APPORTIONMENT OF MEMBERSHIP IN HOUSE OF REPRESENTATIVES, BY STATES: 1790 TO 1960

[Population figures used for apportionment purposes are those determined for States by each decennial census. Until 1940, population for apportionment purposes excluded Indians not taxed and, until 1870, excluded two-fifths of slaves. Until 1850, apportionment ratios were chosen arbitrarily; 1850 to 1900, ratios were apportionment population of U. S. divided by predetermined number of Representatives; from 1910 on, apportionment ratios shown were computed by dividing fixed number (435) of Representatives into apportionment population but were not used in the original calculations, which were based on priority lists. No reapportionment based on 1920 Population Census. For discussion of apportionment methods, see S. Doc. No. 304, 76th Cong., 3d sess., *A Survey of Methods of Apportionment in Congress*, by Edward V. Huntington. See also *Historical Statistics, Colonial Times to 1957*, series Y 155-204.]

¹ Figures rounded to the nearest thousand.

² Membership increased from 233 to 234 by act of July 30, 1852 (10 Stat. L. 25). See footnote 7.

³ Membership increased from 233 to 241 by act of Mar. 4, 1862 (12 Stat. L. 353). See footnote 7.

⁴ Membership originally fixed at 283 but increased to 292 by act of May 30, 1872 (17 Stat. L. 192).

⁵ Includes one member each assigned to Alaska and Hawaii after apportionment.

⁶ Had not achieved statehood. ⁷ Assigned after apportionment. ⁸ Members seated in 1959.

⁹ Included in apportionment act in anticipation of statehood.

¹⁰ Included in the 20 members originally assigned to Massachusetts but credited to Maine after its admission as a State, Mar. 15, 1820 (3 Stat. L. 553).

NO. 519. VOTE CAST FOR UNITED STATES REPRESENTATIVES, BY MAJOR POLITICAL PARTIES, BY STATES: 1960, 1962, AND 1964

[In thousands, except percent. In each State, totals represent the sum of votes cast in each Congressional District, except as follows: In Alaska, Delaware, Hawaii (1960), Nevada, Vermont, and Wyoming, only 1 Representative is elected from the State at large. In Hawaii (1962 and 1964), New Mexico, and North Dakota (1960), 2 Representatives are elected from the State at large. In Connecticut (1960 and 1962), Maryland (1962 and 1964), Ohio (1962 and 1964), and Texas (1962 and 1964), Representatives are elected by district, except 1 who was elected at large; these at-large votes are not reflected in this tabulation. In numerous States, one or other of the major parties had no candidate in some districts. In those cases where votes of a party as such are cast in endorsement of a candidate of another party, votes are counted as for the endorsing party. See also notes below]

STATE	1960				1962				1964

- Represents zero. ¹ Includes vote cast for minor parties.

² Includes vote cast based on the candidate receiving the greatest number of votes.

³ 1960 data for 5th District only; 1962 for 3d and 4th Districts; 1964 for 3d District only. Arkansas law does not require tabulation of votes for unopposed candidates.

⁴ A person may be candidate of one or more parties for same office, so party votes for candidates are not segregable. Party vote shown is computed by assigning to a party total votes for candidates who are members of that party. ⁵ Voters entitled to vote for any 2 candidates; total ascertained by adding the highest vote received by a single candidate in each political party.

⁶ 2 at-large positions filled separately, candidates filing for position 1 or 2. Voters have 1 vote for each separate position. State totals represent largest number of votes cast for either position. Therefore, total shown for each party does not necessarily add to overall State total.

⁷ Includes votes cast by minor parties for Democratic-endorsed and Republican-endorsed candidates.

⁸ Votes cast round to same figure. Actual figures, Republican 124,453; Democratic 123,959.

⁹ Vote for the 6th District not available.

No. 525. COMPOSITION OF STATE LEGISLATURES, BY POLITICAL PARTY AFFILIATIONS: 1960, 1962, AND 1964

[Dates shown refer to election years in most States, to odd-year elections a year previously in a few; figures reflect immediate results of elections, including holdover members in partial renewal situations. Dem. = Democratic; Rep. = Republican. In general, Lower House refers to body consisting of State Representatives; Upper House, of State Senators. In some States, legislature membership has been changed in recent years and data do not reflect special elections held in 1965 as a result of legislative reapportionment]

No. 526. DEMOCRATIC PRIMARY ELECTIONS HELD IN SELECTED SOUTHERN STATES: 1962 AND 1964

[Vote in thousands. A primary election is one in which the voters of a political party nominate candidates to run for public office in a general election. Because of the historic supremacy of the Democratic Party in parts of the South, votes cast in the Democratic primary elections for Senator or Governor are sometimes a better measure of voter participation than those cast in the general elections]

Section 14

Federal Government Finances and Employment

This section presents statistics relating to the financial structure and the civilian employment of the Federal Government. The fiscal data cover the essential apparatus of public financing, namely appropriations, taxes, receipts, expenditures, and debt. The personnel data relate to civil staffing and payrolls for the various public functions and agencies, to employee characteristics, and to civil service status.

Principal sources of the fiscal data are *The Budget of the United States Government*, published annually by the Bureau of the Budget, and the Treasury Department's annual *Combined Statement of Receipts, Expenditures, and Balances*, the official report relating to the receipts, appropriations, expenditures, and fund accounts. The *Annual Report of the Secretary of the Treasury* is a convenient summary of yearly data relating to somewhat broader fields.

The day-to-day cash operations of the Federal Government clearing through the accounts of the Treasurer of the United States are reported in the *Daily Statement of the United States Treasury*. The issue for the last day of the month contains information as to the public debt receipts and expenditures for the month and the outstanding public debt as of that day.

Receipts and expenditures of the Government classified as to administrative budget and other transactions and showing the budget surplus or deficit appear in the *Monthly Statement of Receipts and Expenditures of the United States Government*. The monthly *Treasury Bulletin* contains analytical material on fiscal operations and related Treasury activities, including financial statements of Government corporations and business-type enterprises. Another special aspect of Federal finances is presented in the Treasury Department's monthly *Circulation Statement of United States Money*.

Tax data are compiled by the Internal Revenue Service of the Treasury Department. The *Annual Report of the Commissioner of Internal Revenue* gives a detailed account of tax collections by kind of tax, by internal revenue regions and districts, and by States. The agency's three annual *Statistics of Income* reports present detailed data from individual income tax returns, corporation income tax returns, and business tax returns, respectively. The report on business tax returns presents financial data for sole proprietorships and partnerships along with summary statistics for corporations. Periodic *Statistics of Income* publications present data from fiduciary income tax, estate tax, and gift tax returns, and also data on such topics as sales of capital assets by individuals, foreign income and tax reported by corporations, depletion and related expenditures, and estate tax wealth.

Federal employment and payroll figures are compiled primarily by the Civil Service Commission and published in its regular *Annual Report* and its *Monthly Report of Federal Employment*. The Commission also publishes annual reports on the pay of Federal employees entitled *Pay Structure of the Federal Civil Service* and on occupations of both white-collar and blue-collar Federal workers. Data on Federal employment are also issued by the Bureau of Labor Statistics in its *Monthly Labor Review*.

Major budget concepts.—Data on Government financial transactions are used for so many purposes that no single budgetary system is wholly adequate for complete analysis of the effect of Federal fiscal operations on the level and composition of economic activity. For this reason, several concepts of budget totals have been developed, among which the major ones are the administrative budget, the consolidated cash statement of Federal transactions, and the Federal sector of the national income and product accounts.

The *administrative budget* covers receipts and expenditures of government-owned funds, of which there are four types. (1) General fund accounts are credited with all receipts not earmarked by law for a specific purpose and are charged with expenditures from the amounts appropriated by the Congress for the general support of the Government. (2) Special fund accounts are credited with receipts from specific sources as authorized by law but not generated from a cycle of operations and may be expended only for the particular purposes specified by law. (3) Public enterprise (revolving) funds finance a cycle of operations in which expenditures generate receipts, primarily from the public. (4) Intragovernmental revolving and management funds facilitate financing operations within and between Government agencies. For many years, the administrative budget accounts served as the principal basis for reporting the affairs of Government and so long as Federally owned funds provided the bulk of financial support for governmental programs, it provided adequate coverage of Federal financial transactions.

The administrative budget does not include trust funds, which consist of money held in trust by the Government for use in carrying out specific purposes or programs in accordance with the terms of a trust agreement or statute, nor does it include deposit fund accounts consisting of funds held by the Government in suspense or as banker or agent pending appropriate disposition. In recent years, trust fund operations have grown so rapidly that the flow of financial transactions between the Federal Government and the public is considerably larger than indicated by the administrative budget.

The *consolidated cash statement* of Federal receipts and payments is more comprehensive than the administrative budget. It covers not only funds wholly owned by the Federal Government but also the financial transactions of Federal trust funds, the largest of which are the social security and highway trust funds, and the transactions of five Government-sponsored enterprises (the Federal Deposit Insurance Corporation; the Federal intermediate credit, land, and home loan banks; and banks for cooperatives).

The Federal sector of the *national income and product accounts* provides a measure of the direct impact of Federal fiscal activity on the Nation's economy. Like the consolidated cash statement, this account includes most trust fund transactions. In contrast to both the administrative budget and the consolidated cash statement, however, it records only those receipts and expenditures which directly affect the current flow of income and output. Therefore, it excludes such capital or financial transactions as loans, mortgages, and the purchase or sale of existing assets, which represent neither the production of current output nor incomes earned in production. Also, whereas the cash and administrative budgets count business tax receipts as they are collected and generally count expenditures at the time of payment, the Federal sector account records some taxes as they accrue and records purchases when delivery is made.

The Federal sector account is especially suited for an analysis of fiscal policy; it was designed to complement the data on private expenditures and incomes contained in the national income accounts. The consolidated cash statement is generally more useful than the national income accounts for purposes of analyzing the Federal impact on financial markets since the actual flow of cash payments to the Government may be more significant for such purposes than the accrual of tax liabilities.

Treasury receipts and expenditures.—All receipts of the Government, with a few exceptions, are deposited to the credit of the Treasurer of the United States, regardless of their ultimate disposition or availability for expenditure. Under the Constitution, no money may be withdrawn from the Treasury unless appropriated by the Congress.

Receipts such as taxes, customs duties, trust receipts, etc., and miscellaneous budget receipts, which are collected by Government agencies, and expenditures represented by checks issued and cash payments made by disbursing officers are reported in the *Monthly Statement of Receipts and Expenditures of the United States Government* and in the annual *Combined Statement of Receipts, Expenditures, and Balances*. These monthly and annual reports include deposits and collections in, and payments from, cash accounts of Government agencies held outside the Treasury as well as those of the general account of the Treasurer of the United States.

Public and private debt.—These data appear annually in the May or July issue of the monthly *Survey of Current Business* of the Department of Commerce. Net public and private debt outstanding is a comprehensive aggregate of indebtedness of borrowers after elimination of certain duplicating governmental and corporate debt. This measure of indebtedness provides a more significant indication of trends in debt structure than does gross debt, since effects of nominal changes in financial practices and organization are largely removed. To obtain net figures, gross or total debt is adjusted for specific types of duplications pertaining to the following: (1) Federal Government and its corporations and agencies generally; (2) State and local governments; and (3) within the private area, those affiliated corporations which operate under a single management. In the noncorporate private area, data are gross throughout with no adjustments for duplications.

Employment and payrolls.—The Civil Service Commission collects employment and payroll data from all departments and agencies of the Federal Government but not from the District of Columbia Government. Employment figures represent the number of persons who occupied civilian positions on the last day of the calendar month shown and who are paid for personal services rendered for the Federal Government, regardless of the nature of appointment or method of payment. Intermittent workers are counted if they performed any service during the report month. Employment totals exclude persons serving without compensation, persons on leave without pay for scheduled periods longer than 30 days, persons in leave status after reduction-in-force, and persons hired informally "on the spot" without formal appointment procedures to cope with fire, flood, or other extreme emergencies.

Federal payrolls include all payments for personal services rendered during the calendar month and payments for accumulated annual leave of employees who separate from the service. Since most Federal employees are paid on a biweekly basis, the calendar month earnings are partially estimated on the basis of the number of work days in each month where payroll periods overlap consecutive months. Monthly payroll totals fluctuate in amount because the number of work days in each month varies from 20 to 23 days. Holidays may be disregarded since Federal employees are paid for the eight national holidays on which they do not work.

¹ Receipts from and payments to public exclude intragovernmental financial transactions but include operations of trust (including deposit) accounts and Government-sponsored enterprises as reflected on the books of the Treasurer of the United States as well as administrative budget accounts of Federal Government. (The public is defined to comprise individuals; banks (including Federal Reserve and Postal Saving System); private corporations; other business; State, local, and foreign governments; and international organizations. For additional explanation, see 1967 *Budget*, pp. 378-380.)

² Estimated by Council of Economic Advisers from receipts and expenditures in the national income accounts. Cash receipts consist of personal tax and nontax receipts, indirect business tax and nontax accruals, and corporate tax accruals adjusted to a collection basis. Cash payments are total expenditures less Federal grants-in-aid and less contributions for social insurance. (Federal grants-in-aid are therefore excluded from State and local receipts and payments and included only in Federal payments.)

No. 540. FEDERAL ADMINISTRATIVE BUDGET AND TRUST FUND RECEIPTS AND EXPENDITURES, BY SOURCE AND FUNCTION: 1955 TO 1967

[In millions of dollars. For years ending June 30. Expenditures reported on a checks-issued basis. "Administrative budget" receipts and expenditures are mainly those of general and special accounts and exclude refunds of receipts, transfers from the general fund to trust funds, interest paid to the U.S. Treasury by revolving funds, transfers of capital between wholly owned Government corporations and the U.S. Treasury, and debt transactions of Government enterprises. Minus sign (-) indicates receipts exceeding expenditures. Expenditures from public debt authorizations are included as well as net transactions (expenditures minus receipts) of wholly owned Government corporations and enterprises. Trust fund data also exclude refunds of receipts, but trust fund expenditures include security transactions of Government-sponsored enterprises. See also *Historical Statistics, Colonial Times to 1957*, series Y 254-256 and Y 356-367]

Other sources ¹¹	748	595	1,009	793	2,407	2,940	5,014

- Represents zero. NA Not available.

¹ Net income. ² Income and defense tax before credits for 1940; income tax after credits thereafter.

³ Joint returns counted twice in computing percent.

⁴ Exemptions 1940: Married \$2,000, single \$800, each dependent \$400. Exemptions 1945: Married \$1,000, single \$500, each dependent \$500. Exemptions 1950 and after: Joint return \$1,200, single \$600, each dependent \$600, additional exemption for taxpayer, and his spouse on joint return, of \$600 if blind and \$800 if age 65 or over.

⁵ Salaries after sick pay exclusion. ⁶ Gross salaries.

⁷ Beginning 1955, dividends after exclusions. ⁸ Royalties included with rents.

⁹ For 1950, business profit or loss after net operating loss deduction.

¹⁰ Farm included with business or profession.

¹¹ Comprises all income subject to income tax not elsewhere listed; for 1945-1955, includes not more than \$100 per return reported on Form W-2 of dividends, interest, and wages not subject to income tax withholding. However, for 1955-1964, this income has been reduced by net operating loss deduction. For 1964, also includes estates and trusts income and loss and ordinary gain from sales of depreciable property.

No. 548. INDIVIDUAL INCOME RETURNS AND TAXES—STATES AND OTHER AREAS: 1950, 1960, AND 1963

[Number in thousands; money figures in millions of dollars. Aggregates in this table differ somewhat from those in other tables for individual returns with income because of a distinct weighting system for State data and, for 1960 and 1963, the inclusion of returns with no adjusted gross income]

No. 554. CORPORATION INCOME TAX RETURNS—SUMMARY: 1940 TO 1963

[Money figures in millions of dollars. Represents returns covering accounting periods ending between July 1 of year shown and July 1 of following year. Based on income tax returns as filed, prior to audit adjustments and other changes made after filing. All corporations are required to file returns except those specifically exempt, such as fraternal, civic, and charitable organizations not operating for profit. Excludes returns of inactive corporations. Includes data from returns of small business corporations which after September 2, 1958, could elect to be taxed through shareholders. Beginning 1960, income tax shown excludes tax on profits of corporations making this election. See source publications for changes in law affecting comparability of historical data. Beginning 1955, based on a probability sample. Corporate data based on income tax returns appear on pp. 486, 494, and 495. See also *Historical Statistics, Colonial Times to 1957*, series Y 280-291]

¹ Includes categories of debt not subject to statutory debt limit. Net Federal debt defined as gross debt outstanding less Federal Government securities held by Federal agencies and trust funds, and Federal agency securities held by U.S. Treasury and other Federal agencies; it thus equals Federal Government and agency debt held by the public.

² Includes State loans to local units.

³ Long-term debt, original maturity of 1 year or more from date of issue; short-term, less than 1 year.

⁴ Debt of farmers and farm cooperatives to institutional lenders and Federal Government lending agencies; farmers' financial and consumer debt included under "nonfarm" category.

⁵ Comprises debt incurred for commercial (nonfarm), financial, and consumer purposes, including debt owed by farmers for financial and consumer purposes.

No. 562. CIVILIAN EMPLOYMENT AND PAYROLLS OF THE FEDERAL GOVERNMENT, BY BRANCH: 1940 TO 1966

[Includes data for employees in outlying areas of the U.S. and in foreign countries. Monthly employment figures represent number in active-duty status as of last day of month, including intermittent employees who worked during month. Annual employment figures are averages of monthly figures. Payrolls are totals for calendar year or month, as indicated. Excludes employees of Central Intelligence Agency and, beginning August 1959, those of the National Security Agency, for security reasons. Employees of General Accounting Office and Government Printing Office included with legislative branch. See *Historical Statistics, Colonial Times to 1957*, series Y 241-250, for employment for years ending June 30]

Section 15

State and Local Government Finances and Employment

Nationwide statistics relating to State and local governments, their numbers, finances, and employment, are compiled primarily by the Bureau of the Census. Each five years, the Bureau conducts a Census of Governments (most recently for the year 1962) involving collection of data for all governmental units in the United States. The Bureau of the Census also conducts annual surveys which cover all the State governments and a sample of local governments. Publications issued annually by the Bureau of the Census include a report on governmental finances which presents figures for the Federal Government, nationwide totals for States and local governments, by type, and State-local data by States. Also issued annually are series of publications on State finances, city finances, and public employment and a descriptive leaflet *Recurrent Publications on Governments*. There are also two series of quarterly reports, one on tax revenue of State and local governments, the other on construction expenditures of State and local governments.

Basic information for Census Bureau statistics on governments is obtained mainly by mail canvass from State and local officials; however, financial data for each of the State governments and for some of the largest local governments are compiled from their official records and reports by Census Bureau personnel, and classified into uniform categories for statistical reporting.

Statistics regarding particular functions in which State and local governments have an important role are presented in other sections of this book (for example, Education, Transportation—Land, and Social Insurance and Welfare Services).

Governmental units.—The governmental structure of the United States includes, in addition to the Federal Government and the States, thousands of local governments—counties, municipalities, townships, school districts, and numerous kinds of “special districts.” As shown by table 572, more than 90,000 local governments were identified by the 1962 Census of Governments. The figures for governmental units include all agencies or bodies having an organized existence, governmental character, and substantial autonomy. While most of these governments can impose taxes, many of the special districts—such as independent public housing authorities, the New York Port Authority, and numerous local irrigation, power, and other types of districts—are financed from rentals, charges for services, benefit assessments, grants from other governments, and other nontax sources. The count of governments excludes semi-autonomous agencies through which States, cities, and counties sometimes provide for certain functions—for example, “dependent” school systems, State institutions of higher education, and certain other “authorities” and special agencies which are under the administrative or fiscal control of an established governmental unit.

Finances.—Unless otherwise stated, financial data in this section relate to the fiscal years of the respective governments. Federal and State government figures are for fiscal years ending June 30, except for a few States with other closing dates in the calendar year specified. Local government figures for 1963, 1964, and 1965 are for fiscal years which closed at various dates during the 12 months ended June 30 of the year specified. Local government figures for 1962 and earlier years are for fiscal years ended with the calendar year.

Nationwide government finance statistics must be classified and presented in terms of uniform concepts and categories, rather than according to the highly diverse terminology, organization, and fund structure of individual governments. Accordingly, financial statistics which appear here for individual States, although based upon the

official records and reports of these governments, will not agree directly with figures appearing in such original sources except where particular segments of the official accounts conform explicitly to standard reporting categories.

The framework for these statistics on governmental finances makes a basic distinction between general government, utilities and liquor stores, and insurance trust activities. These are distinguished as to revenue according to the nature of the source involved and as to expenditure according to the purpose of the spending.

The general government sector comprises all activities other than those classified as utilities, liquor stores, and insurance trusts. The utility sector includes only water supply, electric light and power, gas supply, and transit systems operated by local governments. Liquor stores are operated by 16 States and by a few local governments. Insurance trust figures relate to employee retirement, unemployment compensation, and other social insurance systems administered by State and local governments.

In the basic framework of these statistics, revenue and expenditures reported for these sectors, individually and in total, represent only external transactions and exclude transfers among agencies and funds of the government concerned. Certain internal transactions are shown separately, however, in related tables.

Employment and payrolls.—Public employment and payroll data are primarily from Census Bureau reports based on mail canvassing of State and local governments. Payroll amounts include all salaries, wages, and individual fee payments for the month specified, and employment numbers relate to all persons on governmental payrolls during a pay period of the month covered—including paid officials, temporary help, and (except where otherwise specified) part-time as well as full-time personnel. As in the case of financial data, figures shown for individual governments, such as States, cover major dependent agencies such as institutions of higher education, as well as the ordinary central departments and agencies of the government.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 571. COUNTY, MUNICIPAL, AND TOWNSHIP GOVERNMENTS, 1962, AND THEIR POPULATION, 1960, BY POPULATION SIZE-GROUPS

[Number of governments as of January 1962; population as of April 1960. Township governments include "towns" in the 6 New England States, New York, and Wisconsin]

X. Not applicable.

¹ Federal civilian employment within the U.S. as of June 1965, including employees of the National Guard paid directly from the Federal Treasury. Total accordingly differs from Federal employment reported in table 598 which pertains to October 1965 and includes employees working outside U.S.² Subject to sampling variation.³ Based on estimated population as of July 1, 1965.⁴ Data for Federal employees in the District of Columbia are for Washington, D.C., Standard Metropolitan Statistical Area, and include substantial numbers of employees working in suburban locations in Maryland and Virginia.Source: Dept. of Commerce, Bureau of the Census; annual report, *Public Employment in 1965*.

No. 602. STATE AND LOCAL GOVERNMENT EMPLOYMENT AND PAYROLLS, BY TYPE OF GOVERNMENT: 1955 TO 1965

[For October, 1955, excludes Alaska and Hawaii. For payrolls, see also *Historical Statistics, Colonial Times to 1957*, series Y 223-240]

Section 10

Social Insurance and Welfare Services

This section presents data related to governmental programs for old-age, survivors, disability, and health insurance (OASDHI); public and railroad employee retirement; unemployment and temporary disability insurance; aid to the needy; and maternal, child, and other welfare services. Also included here are selected data concerning private pension plans and financial data relating to corporate pension funds, the American Red Cross, United Fund campaigns, and philanthropic trusts and foundations.

There are several principal sources for these data. *Social Security Bulletin* and *Welfare in Review*, monthly publications of the Department of Health, Education, and Welfare, present current data on many of the programs and summarize annual data in statistical supplements published each year. Current data on employment security activities are published monthly in the Department of Labor's *Unemployment Insurance Review*, *Employment Service Review*, and their statistical supplements. Data on retirement and other benefits for railroad workers are published by the Railroad Retirement Board in its *Monthly Review* and *Annual Report*.

Social insurance under the Social Security Act.—Social insurance programs established by the Social Security Act provide protection against wage loss resulting from old age, prolonged disability, death, or unemployment and, since July 1966, protection against the cost of medical care in old age.

The old-age, survivors, disability, and health insurance (OASDHI) program provides monthly cash benefits to retired or disabled insured workers and their dependents and to the survivors of an insured worker. Within the specifications of the law, retirement benefits are payable to an aged insured worker; to his aged spouse or his spouse at any age caring for his child who is under age 18 or totally disabled; and to his child who is under age 18, totally disabled, or a full-time student. An aged worker becomes eligible for full benefits at age 65, although he may elect reduced benefits up to 3 years earlier; his spouse is under the same limitations. Under certain conditions, survivor benefits are payable to some dependents of an insured worker, including his aged widow or his widow at any age caring for his child who is under age 18 or totally disabled; his child who is under age 18, totally disabled, or a full-time student; and aged parents. Disability benefits are payable to an insured worker under age 65 with a prolonged disability that meets the definition in the Act and to his dependents on the same basis as dependents of retired workers. A lump sum benefit is also payable on the death of an insured worker.

Beginning July 1966, medical insurance has been provided under two coordinated plans for nearly all people age 65 and over: A hospital insurance plan which covers hospital and related services and a voluntary supplementary medical insurance plan which covers physicians' services and related medical services.

Retirement, survivors, disability and hospital insurance benefits are paid for by the contributions of workers, employers, and the self-employed on earnings up to \$6,600. Currently workers and their employers each pay 3.85 percent, and the self-employed pay 5.80 percent of covered wages for retirement, survivors and disability insurance. For hospital insurance, workers, employers, and the self-employed each pay .35 percent (see table 414). The rates are scheduled to increase gradually. For persons 65 and over currently not insured under social security the hospital benefits will be financed out of Federal general revenues. The voluntary medical insurance plan is financed by a \$3 a month premium paid by persons age 65 and over who choose

to enroll in the plan, and by an equal contribution by the Federal Government from general revenues. The money collected is deposited in Federal trust funds.

Both unemployment insurance and the public employment (placement) service are administered through the Bureau of Employment Security of the Department of Labor and each State's employment security agency. Under agreements with the Secretary of Labor, the State agencies also administer unemployment compensation for eligible ex-servicemen and Federal employees, and direct aid in the form of training and related cash allowances to persons being trained under the Manpower Development and Training Act.

State unemployment insurance laws pay benefits to unemployed covered workers meeting the qualifications in the State law. In most States, a waiting period of 1 week must be served before payments begin. Benefits are payable for a maximum number of weeks, ranging from 22 to 39 weeks among the States; maximum weekly benefits without dependents' allowances range from \$30 to \$65. In 10 States and the District of Columbia, maximum allowances ranging from \$3 to \$29 for dependents raise the range of maximum benefits to \$43 to \$75. Massachusetts pays \$6 for each dependent up to an unspecified amount. In Puerto Rico, benefits are payable for a maximum of 12 weeks; the maximum weekly benefit is \$20.

A 3.1-percent Federal tax is levied on the payroll of employers of 4 or more workers in industries covered by the Act and is used to finance the Federal-State program. Employers subject to the Federal law are allowed a credit of 2.7 percent of taxable payrolls for contributions paid to State agencies under State unemployment insurance laws; the Federal Government retains 0.4 percent of the tax out of which the Congress appropriates funds each year to cover employment security administrative costs.

Principal industries excluded from coverage are agriculture, State and local government, domestic service, nonprofit organizations, and railroads (see below).

The standard rate of contributions payable by employers in all but 8 States is 2.7 percent of the payroll taxable. However, employers with favorable unemployment experience may be assigned a lower rate (except in Puerto Rico); in 1964 the average employer contribution rate under State laws was 2.2 percent of the taxable payroll. In most States, the contribution is based on the first \$3,000 paid to a worker during the year. In 18 States, the rate applies to wages ranging from \$3,300 to \$7,200. Contributions collected by States are deposited to State accounts in the Federal Unemployment Trust Fund, from which States withdraw amounts needed for benefit payments.

Social insurance for railroad workers.—The social insurance programs administered by the Railroad Retirement Board cover employees of railroads or companies and organizations affiliated with railroad transportation. The Railroad Retirement Act provides retirement annuities for aged and disabled workers and for wives of retired employees, and benefits to survivors of deceased workers. Effective July 1966, Federal health insurance protection became available to railroad workers on the same basis as workers covered by social security. Funds for the railroad retirement and survivor benefit system come primarily from a tax on earnings. Effective January 1966, the first \$550 of each month's earnings became taxable under the Railroad Retirement Tax Act. The tax, divided equally between employer and employee, is 15.9 percent for 1966, including 0.7 percent for hospital insurance benefits.

The Railroad Unemployment Insurance Act provides benefits for unemployment and sickness, including maternity. The unemployment insurance program is financed by contributions from covered employers, paid directly to the Board. The contribution rate for 1966 is 4 percent (applicable to earnings not in excess of \$400 a month).

Social insurance for Federal Government employees.—One contributory retirement system for Federal civilian employees and two small noncontributory systems for special classes of employees are administered by the Civil Service Commission. In addition, there are separate retirement systems in operation for the uniformed

services (supplementing OASDHI under which they are covered on a contributory basis) and for special classes of Federal employees.

The Civil Service Retirement Act provides for age, optional, disability, deferred retirement, and discontinued service annuities for employees in the executive, judicial, and legislative branches of the U.S. Government and in the District of Columbia government if not subject to another retirement system or excluded by statute or by administrative order. It also provides annuities for the widows and minor children of deceased employees, and under certain conditions to the survivors of deceased annuitants. The employee contribution rate is 6½ percent, computed on base pay. Employing agencies pay into the Retirement Fund amounts equal to employee contributions.

Workmen's compensation.—All States have programs providing protection against work-connected injuries and deaths. Federal workmen's compensation laws cover Federal Government employees, private employees in the District of Columbia, and longshoremen and harbor workers. Most State workmen's compensation laws exempt such employments as agriculture, domestic service, and casual labor; the majority exempt employers who have fewer than a specified number of employees. Occupational diseases, or at least specified diseases, are compensable under most laws.

In most States total payments to injured workers or to survivor families are limited as to time, amount, or both. All compensation acts require that medical aid be furnished to injured employees; in about one-fourth of the laws there are either duration or cost limitations—or both—on the amount of medical benefits provided.

Public assistance.—Six programs, all administered by the States and localities, provide public assistance. Payments to four groups—the aged, the blind, the permanently and totally disabled, and children whose need arises from certain causes—are financed in part from Federal funds granted to States under the Social Security Act. The States may also receive grants for medical assistance to those aged persons not receiving old-age assistance and not able to take care of their medical bills themselves. Beginning 1966, the States may also receive grants for medical assistance to younger people not receiving assistance under the other Federally-aided programs who cannot meet their medical expenses. The Welfare Administration's Bureau of Family Services handles the Federal aspects of these programs. Aid to other needy persons is furnished mainly through general assistance, toward which the Federal Government makes no contribution.

To receive a Federal grant for assistance payments and administrative expenses under any Social Security Act program, a State must have a plan approved as meeting the requirements of the Act. Each State establishes the conditions under which needy people may receive assistance and determines how much they shall receive.

Health and welfare services.—Programs providing health and welfare services are aided through Federal grants to States for maternal and child-health services, services for crippled children, child-welfare services, vocational rehabilitation, and public health services (including water-pollution control, hospital survey and construction, community health centers, and control of specific diseases). The Children's Bureau, a part of the Welfare Administration, administers the first three of these programs; the others are administered by the Vocational Rehabilitation Administration and the Public Health Service.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 394. SOCIAL WELFARE EXPENDITURES UNDER PUBLIC PROGRAMS: 1935 TO 1965

[In millions of dollars. For Federal Government, most States, and some localities, years ending June 30; for other States and localities, various 12-month periods ending within year. Prior to 1960, workmen's compensation excludes Alaska, Hawaii, and outlying areas. Represents expenditures under public law and from trust accounts. Includes administrative expenditures and capital outlay for hospitals, public elementary and secondary schools, and publicly controlled higher education. See table 395 for program detail. See *Historical Statistics, Colonial Times to 1957*, series H 1-45, for data covering civilian programs only]

¹ Excludes refunds to those leaving service. Federal data include military retirement.

² Includes compensation for Federal employees, for ex-servicemen, and for veterans (under Acts of 1944 and 1952), and training allowances. ³ Programs operate in 4 States only: Calif., N.J., N.Y., and R.I.

⁴ Payments by private insurance carriers, State funds, and self-insurers.

⁵ For program detail, see table 431. ⁶ Emergency aid and value of surplus food to needy families.

⁷ Excludes: Domiciliary care in institutions other than mental or tuberculosis; international activities; Federal agency programs; and services included in other social welfare programs.

⁸ "Medicare" for military dependents in non-Federal facilities. ⁹ Includes medical equipment and supplies for civil defense, and administrative costs. Excludes water supply and sanitation services.

¹⁰ Homes for dependent or neglected children and for adults other than veterans and value of surplus food for non-profit institutions.

¹¹ Includes foster care and professional and facilitating services; excludes public institutions and day-care centers, capital expenditures by courts and youth authorities, direct appropriations to voluntary agencies and institutions, and payments from parents, and relatives.

¹² Under Economic Opportunity Act; excludes data reported with education and public aid programs.

¹³ Federal expenditures exclude bonus payments and veterans' life insurance benefits.

¹⁴ Includes burial awards. ¹⁵ Includes vocational rehabilitation, specially adapted homes and automobiles for disabled veterans, counseling, beneficiaries' travel, loan guarantees, and domiciliary care.

¹⁶ Excludes military technical training, such non-educational expenditures as transportation and school lunch program, value of surplus property, and data shown under other social welfare programs.

NA Not available. X Not applicable. Z Less than \$500,000.

¹ For old-age, survivors, disability, and health insurance, average monthly number; for railroad retirement program, public employee retirement systems and veterans' programs, number on rolls June 30; State unemployment and temporary disability insurance and veterans' unemployment allowances, average weekly number; railroad unemployment and temporary disability insurance, average number during 14-day registration period.

² Includes benefits to dependents (spouses and children) where applicable.

³ Excludes refunds of contributions to employees who leave service.

⁴ Retirement data include a significant amount and number of disability payments for 1940, and a small but unknown amount and number of survivor payments for 1940 and 1950.

⁵ Retirement data are for veterans of the Civil War, Indian Wars, Spanish-American War, Boxer Rebellion, and Philippine Insurrection; beginning October 1961, includes all service pensions. Disability data represent pensions, compensation, and subsistence payments to disabled veterans undergoing training. Lump sums are for burial of deceased veterans. ⁶ Excludes payments for medical care.

⁷ Program initiated under the Social Security Amendment of 1956.

⁸ Benefits first payable in 1943. Payable in Calif., N.J., N.Y., and R.I. Includes maternity data for R.I. and private-plan beneficiaries in Calif., and N.Y.; data for beneficiaries in N.J. not available.

⁹ Includes maternity data. Benefits first payable in July 1947.

¹⁰ Number represents families for Federal programs under the Uniformed Services Contingency Option Act of 1953 and for State and local government retirement systems.

¹¹ Includes payments made by the States as agents of the Federal Government under the Federal employees' unemployment compensation program and under the Ex-Servicemen's Compensation Act of 1953, and payments under the temporary extended unemployment insurance programs. Beginning 1961, includes Puerto Rico.

¹² Under the Servicemen's Readjustment Act of 1944 (terminated July 1949), and the Veterans' Readjustment Assistance Act of 1952 (terminated January 1960).

¹³ Area Redevelopment Act and Manpower Development Training Act programs. Based on unemployment insurance benefits paid in the State of training and allowances for other qualifying expenditures, such as transportation and dependency where applicable.

X Not applicable.

¹ Data from Dept. of Commerce, Office of Business Economics. Total earnings include earnings of self-employed; all wages and salaries represent disbursements for civilian and military pay in cash and in kind.

² Beginning 1955, adjusted for duplication of payrolls covered by both old-age, survivors, disability, and health insurance and State and local retirement systems. ³ Taxable plus estimated nontaxable wages and salaries.

⁴ Taxable wages plus estimated nontaxable wages and salaries. Beginning 1950, also represents coverage for railroad temporary disability insurance.

⁵ Excludes voluntary contributions and service credits. ⁶ Effective beginning 1951.

⁷ Taxable plus estimated nontaxable wages and salaries; beginning 1955, includes pay of Federal civilian personnel.

⁸ Payrolls of employers insured with private carriers, State funds, or self-insured, and pay covered by Federal programs in all areas.

⁹ Represents percent of all wages and salaries to reflect inclusion of Armed Forces pay.

No. 403. OLD-AGE, SURVIVORS, DISABILITY, AND HEALTH INSURANCE—ESTIMATED PAID EMPLOYMENT AND COVERAGE STATUS: 1940 TO 1964

[In millions, except percent. As of December. Prior to 1960, excludes Alaska and Hawaii. Represents civilian noninstitutional population aged 14 and over and the Armed Forces. Based on Bureau of the Census Current Population Survey; see text, p. 1. Coverage status generally determined on basis of the job with the greatest number of hours worked during the survey week. Corrected to December 1965]

COVERAGE STATUS	1940	1950	1955	1960	1961	1962	1963	1964
Paid employment (including self-employment)	47.1	61.3	65.7	67.1	68.1	69.2	70.3	72.0

Other ⁴	3.5	7.6	1.9	2.0	2.0	2.0	2.0	2.1

X Not applicable.

¹ Includes railroad employees and all members of the Armed Forces.

² Persons whose coverage was authorized by Federal law on an elective (generally group) basis but not in effect (chiefly employees of State and local governments).

³ Prior to 1951, all persons employed in the groups specified were excluded from coverage; beginning 1951, some persons in these groups became eligible for coverage; others were still not eligible for coverage either due to specific exclusions—such as employees of the Federal Government with civil service retirement coverage—or due to insufficient earnings where coverage depends on having minimum earnings (for example, farm employment and self-employment).

⁴ Consists chiefly of nonagricultural self-employment and employees of nonprofit organizations.

Source: Dept. of Health, Education, and Welfare, Social Security Administration; *Annual Statistical Supplement to the Social Security Bulletin*.

No. 404. OLD-AGE, SURVIVORS, DISABILITY, AND HEALTH INSURANCE—ACCOUNTS ESTABLISHED, EMPLOYERS REPORTING, AND COVERED EMPLOYMENT: 1940 TO 1965

[Beginning 1955, includes Puerto Rico and Virgin Islands; and beginning 1962, American Samoa and Guam. Quarterly estimates of employment and earnings exclude self-employment and agricultural labor. Excludes joint coverage under the railroad retirement and old-age, survivors, disability, and health insurance programs. See also *Historical Statistics, Colonial Times to 1967*, series H 118-120]

YEAR OR QUARTER	Social security accounts established ¹	Employers reporting taxable wages ²	COVERED EMPLOYMENT				
			Workers during period ³	All earnings ⁴		Reported taxable earnings ⁵	
				Total	Average per worker	Total	Average per reported worker ⁶

1962.....	4,519	5,370	74,310	290,000	3,902	219,200	2,960
1963.....	8,617	5,450	75,760	302,200	3,990	225,530	2,977
1964 (prel.).....	5,623	5,510	77,700	322,700	4,155	236,600	3,045
January-March (prel.).....	1,636	4,390	58,600	67,500	1,151	66,100	1,123
1965: January-March (prel.).....	1,162	4,410	60,900	71,200	1,168	69,800	1,145

¹ As of Dec. 31, 1965, 163.4 million account numbers had been issued under the social security system and until June 30, 1963, 2.8 million under the railroad retirement system. After that date all account numbers were issued under social security system. Beginning 1962, includes special issuance of account numbers under the Internal Revenue Service Tax Registration Program.

² Annual data represent number of different employers filing returns for year; quarterly data, number of returns for quarter. A return may relate to more than 1 establishment if employer operates several separate establishments but reports for concern as a whole.

³ Annual data represent persons reported; quarterly data include estimates of wage and salary workers who received taxable limit in previous quarter of calendar year from a given employer. See footnotes 5 and 6.

⁴ Includes estimates of nonreportable earnings in excess of annual taxable limit. See footnote 5.

⁵ Wages up to taxable limit from each employer and self-employment income. Annual taxable limit on wages from a given employer or on self-employment income was \$3,000 through 1950; \$4,200 for 1955; \$4,800 thereafter.

⁶ A worker is not reported for a quarter if he has attained annual taxable limit in an earlier quarter of the year from a given employer.

¹ Benefits payable from the old-age and survivor insurance trust fund to retired-worker beneficiaries and their dependents and to survivors of deceased workers.

² Benefits payable from the disability insurance trust fund to disabled-worker beneficiaries and their dependents.

³ Distribution by type of benefit and by State or other area estimated. Dependents benefits are paid to insured workers' wives or dependent husbands aged 62 or over, wives under age 62 with child beneficiaries in their care, and children under age 18 (or older, if they have a disability that began before age 18). Survivor benefits are paid to widows or dependent widowers aged 62 or over, children under age 18 (or older, if they have a disability that began before age 18), widows or divorced wives with child beneficiaries in their care, and dependent parents age 62 or over of deceased insured workers. ⁴ Distribution by State or other area based on 10-percent sample.

¹ January 1937-June 1940, equals appropriations transferred; July 1940-December 1950, taxes collected; beginning 1951, amounts appropriated. Beginning May 1951, includes State deposits under voluntary coverage agreements. For 1947-51, includes appropriations to cover benefits payable to certain veterans' survivors. Beginning 1952, for old-age and survivors insurance and 1959 for disability insurance trust fund, includes deductions for refund of employee tax overpayment.² Includes interest and profit on investments and, beginning 1958, adjustment for interest on administrative expenses reimbursed to the old-age and survivors insurance trust fund from the disability insurance trust fund.³ The purpose of the financial interchange is to place the trust funds in the position they would have been in had railroad employment always been covered under the old-age, survivors, and disability insurance system. Transfers to the railroad retirement account are represented by negative figures.⁴ Represents net expenditures for administration. Beginning November 1951, adjusted for reimbursements to trust fund of small amounts for sales of services. Beginning October 1953, includes expenses for central office building construction. Since the January 1957 inception of disability fund, most administrative expenses paid initially from old-age and survivors fund, with subsequent reimbursement (plus interest) from disability fund for allocated cost of disability insurance operations. The Treasury Dept., however, is regularly reimbursed from the appropriate trust fund for its expenses as incurred.⁵ Book value, includes net unamortized premium and discount, accrued interest purchased, and repayments on account of interest accrued on bonds at time of purchase.⁶ 1937-1939, includes transactions of predecessor fund, the old-age reserve account.Source: Treasury Dept.; *Monthly and Final Statement of Receipts and Expenditures of the U.S. Government*, and unpublished data.

NA Not available. X Not applicable. ¹ Employer becomes subject to State unemployment insurance law when he has employed specified minimum number of workers on at least 1 day in each of specified number of weeks within current or preceding calendar year; coverage provisions shown were in effect as of December 1965.

² For pay period ending nearest 15th of month. ³ Total wages in covered employment for all pay periods ending in year. ⁴ Wages subject to unemployment insurance tax. Includes State and local government coverage as well as private industry coverage; see text, p. 278. ⁵ Based on average covered employment in 12-month period.

⁶ Represents number of first payments during year. ⁷ 1965 constant dollars for: 1950, \$28.71; 1960, \$35.26; 1964, \$36.62. ⁸ Based on average total weekly wage in current year. ⁹ Number of weeks compensated divided by first payments.

¹⁰ Beginning 1960, based on first payments for 12-month period ended June 30; for 1950, based on 12-month period ended Sept. 30. ¹¹ Includes contributions, penalties, and interest from employers; also employee contributions in States which tax workers. ¹² Adjusted for voided benefit checks. Includes payments under State (not Federal) temporary extended unemployment insurance provisions. ¹³ Sum of balances in State clearing accounts, benefit-payment accounts, and State accounts in Federal unemployment trust fund. ¹⁴ 1964 data.

TO 1965, AND STATES AND PUERTO RICO, 1965

include Puerto Rico. Includes unemployment compensation for State and local government employees where men, except as noted. See also table 423 and *Historical Statistics, Colonial Times to 1957*, series H 162-174]

¹ Net cash and medical benefits paid by private insurance companies under standard workmen's compensation policies.² Net cash and medical benefits paid by competitive and exclusive State funds and by Federal workmen's compensation system.³ Cash and medical benefits paid by self-insurers, plus value of medical benefits paid by employers carrying workmen's compensation policies that exclude standard medical coverage.⁴ Premiums written by private carriers and State funds and benefits paid by self-insurers increased by 5 to 10 percent to allow for administrative costs. Also includes benefits paid and administrative costs of Federal workmen's compensation system.Source: Dept. of Health, Education, and Welfare, Social Security Administration. Periodically in *Social Security Bulletin*.

NO. 427. WORKMEN'S COMPENSATION PAYMENTS, BY STATES: 1940 TO 1964

[In thousands of dollars. Payments represent cash and medical benefits and include insurance losses paid by private insurance carriers (compiled from the *Spectator (Insurance by States . . . of Casualty Lines)* and from published and unpublished reports of State insurance commissions); net disbursements of State funds (from the *Spectator* and from State reports, published and unpublished), estimated for some States; and self-insurance payments, estimated from available State data. Calendar-year data, except fiscal-year data for Federal employees and for a few States with State funds. Includes benefit payments under Longshoremen's and Harbor Workers' Compensation Act and Defense Bases Compensation Act for States in which such payments are made]

Section 16

Banking, Finance, and Insurance

Banking system.—Banks in this country are organized under the laws of both the States and the Federal government. State-chartered banks are supervised by officials of the respective States. "National" banks, organized under Federal law passed in 1863, are supervised by the Comptroller of the Currency. *Reports of Condition* have been collected from national banks since 1863; from 1897 to 1961, summaries of these reports were published in the *Abstract of Reports of National Banks*. Since September 1963, summaries of these data, by States, have been published in *The National Banking Review*, a quarterly publication of the Comptroller of the Currency as well as in the Comptroller's *Annual Report*. Both the *Review* and the *Annual Report* also present data on bank income and expenses and on the structure of the national banking system.

The Federal Reserve System was established in 1914 to exercise central banking functions, some of which are shared with the United States Treasury. It includes national banks and such State banks as voluntarily join the System. After its establishment, State bank members began to submit their statements of condition at the same time and in substantially the same form as national banks. These statements are consolidated by the Board of Governors of the Federal Reserve System with data for national banks collected by the Comptroller of the Currency into totals for all member banks of the System. They are published in the *Summary Report, Assets and Liabilities of Member Banks*, usually four times a year, and in summary form in the *Federal Reserve Bulletin*.

The Federal Deposit Insurance Corporation, established in 1933, insures each deposit account up to \$10,000 in banks which are members of the Federal Reserve System and in such nonmember banks as join the insurance fund. Beginning with 1947, an all-bank series has been tabulated twice a year by the Corporation. A monthly series, also beginning with 1947 and based in part on the all-bank series, is prepared and published by the Board of Governors of the Federal Reserve System.

Currency.—Currency, including coin and paper money, represents about one-fifth of the total media of exchange in the United States, with most payments made by check. All currency is now issued by the Federal Reserve Banks and the Treasury.

"Currency in circulation" or "money in circulation" (official *Treasury Circulation Statement*) refers to all coin and paper money outside the Treasury and Federal Reserve Banks, except gold and silver coin known to have been exported and, beginning with 1934, all gold coin. It includes all coin and paper money held by the public in the United States, whether in current active use or held idle. It also includes some currency which, strictly speaking, is not a part of the money supply in the hands of the public, such as cash in vaults of commercial and savings banks, currency lost or destroyed (other than \$130 million written off as "irretrievably lost" under authority of the Old Series Currency Adjustment Act of 1961) and currency carried abroad by travelers. Historical data on the stock of money and money in circulation appear in the *Annual Report of the Secretary of the Treasury*.

Credit agencies.—Government corporations and credit agencies, operating under mandates and powers given them by the Congress, make available credit of specified types or to specified groups of private borrowers, either by lending directly or by

insuring or guaranteeing loans made by private lending institutions. Statistics relating to the operations of Government credit agencies are available in reports of the individual agencies; statistics on their assets and liabilities are published quarterly in the *Treasury Bulletin*. In addition to commercial banks, savings banks, and Government credit agencies, there are a considerable number of other types of credit agencies in the United States. The most important of these are savings and loan associations, insurance companies, finance companies dealing primarily in installment sales financing, credit unions, and personal loan companies. Statistics of savings and loan associations are collected by the Federal Home Loan Bank Board. Statistics on loans, investments, cash, etc., of life insurance companies are collected and published principally by The Spectator. Federal credit unions are under the supervision of the Bureau of Federal Credit Unions of the Department of Health, Education, and Welfare. Consumer credit data are published currently in the *Federal Reserve Bulletin*.

Securities.—Statistical information on new security issues has been provided by the *Journal of Commerce* since 1906 and the *Commercial and Financial Chronicle* from 1919 to 1957. The statistics of the *Commercial and Financial Chronicle* include, in addition to domestic and foreign corporate issues and State and local government securities, the issues of independent agencies of the United States Government, and of foreign governments and their subdivisions. A more comprehensive series of new issues with detailed information on the intended uses of net and gross proceeds has been compiled by the Securities and Exchange Commission on a monthly basis since 1934. The data cover substantially all new issues offered for cash sale in the United States in amounts over \$100,000 and with terms to maturity of more than one year. (See table 658.) This series is published monthly in the *Statistical Bulletin* of the Securities and Exchange Commission, the *Federal Reserve Bulletin*, and the *Survey of Current Business*.

In addition, the Commission has been compiling statistics since 1933 on changes in security holdings of institutional groups and individuals, and net change in outstanding corporate securities through cash transactions. The latter data are published in the Commission's *Statistical Bulletin* and also in the *Federal Reserve Bulletin*.

Monthly figures on the total value and volume of securities sold on each of the national securities exchanges have been published since October 1934 by the Securities and Exchange Commission. These figures include all sales effected on exchanges except, since March 1944, United States Government issues. They cover odd lots as well as round lots. The Commission also publishes figures on the total daily round-lot volume of trading in stocks on the New York Stock Exchange and the American Stock Exchange, showing short sales and several categories of member and nonmember purchases and sales. Daily odd-lot purchases and sales are reported separately. Since January 1965, the Commission has been publishing weekly purchases and sales by odd-lot customers of 75 selected New York Stock Exchange stocks.

Security price averages.—Among the most widely known indexes of security prices are the Dow-Jones averages, which provide a continuous series of common stock prices on a daily basis since 1897. This series is now based on 65 common stocks divided into 30 industrial, 20 railroad, and 15 public utility stocks. Indexes of the Standard and Poor's Corporation, available since 1918, are now based on daily closing prices of 500 stocks. (See table 655.)

Insurance.—Insurance was formerly classified into three categories—life, fire and marine, and casualty. With the introduction of multiple-line underwriting, insuring companies are now classified as either life or property. Companies which underwrite accident and health insurance only are included with life insurance companies; those which underwrite accident and health insurance in addition to one or more property lines are included with property insurance companies. Insuring companies, other than those classified as life, are permitted to underwrite one or more property lines provided they are so licensed and have the necessary capital and/or surplus.

The regulation of insurance is in the hands of the various States and the District of Columbia, which collect a great deal of primary information on insurance. The Federal Government does not collect comprehensive statistics on insurance on a national basis. Basic theories and practice are parallel throughout insurance but application of theory and details of practice, including vocabulary, differ enormously by class of insurance and by class of insurer. Sound combination or comparison of figures is often difficult or impossible.

There are a number of published sources for statistics on the various classes of insurance—life, health, fire, marine, and casualty. Individual States collect data on all insurers operating within their respective jurisdictions, and many of the States publish an annual insurance report giving individual company data and aggregates of certain items for the companies operating within the State. Organizations representing certain classes of insurers collect data and publish many studies and reports for these classes. A sourcebook of statistics on life insurance, the *Life Insurance Fact Book*, is published annually by the Institute of Life Insurance. Health insurance data are published by the Health Insurance Council in the annual report, *The Extent of Voluntary Health Insurance in the United States*, and by the Health Insurance Institute in its annual *Source Book of Health Insurance Data*. Another source of insurance statistics is represented by the commercial publishers, such as The Spectator and the Alfred M. Best Company. The annual *Spectator Health Insurance Index* contains financial and operating data for individual health and accident insurance companies, including Blue Cross and Blue Shield Plans. Spectator's annual publication, *Insurance by States of Property, Liability, Surety and Miscellaneous Lines*, gives detailed data for other classes of insurance. *Best's Life Insurance Reports* and *Best's Insurance Reports*, fire and casualty edition, both annual publications, give individual company data for all types of life and fire and casualty insurance companies.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

¹ Beginning May 1961, reclassification of deposits of foreign central banks reduced this item by \$1,900 million (\$1,500 million to time deposits adjusted and \$400 million to demand deposits adjusted).

² Deposits other than interbank and U.S. Government, less cash items reported in process of collection.

³ Excludes interbank time deposits; U.S. Treasurer's time deposits, open account; and deposits of Postal Savings System in banks.

⁴ Prior to 1950, includes a relatively small amount of demand deposits. Beginning June 1961, includes amounts now reported by insured mutual savings banks as demand deposits; formerly, before passage of the recent amendment of the F.D.I. Act, reported as time deposits or other liabilities.

No. 617. ALL BANKS—NUMBER AND PRINCIPAL ASSETS AND LIABILITIES, BY CLASS OF BANK: 1940 TO 1966

[Money figures in millions of dollars. As of December 31, except as indicated. Prior to 1959, excludes all banks in Alaska (except for one Federal Reserve System member bank) and all banks in Hawaii. Banks added in 1959 had total assets of \$900 million on December 31, 1959. All banks comprise all commercial banks and all mutual savings banks. Commercial banks comprise all Federal Reserve System member banks (including one bank in the Virgin Islands that became a member on May 31, 1957) and all nonmember commercial banks. Stock savings banks and nondeposit trust companies are included with commercial banks. Comparability of figures for classes of banks is affected somewhat by changes in Federal Reserve membership, insurance status, and the reserve classifications of cities and individual banks, and by mergers, etc. See *Historical Statistics, Colonial Times to 1967*, series X 20-41 and X 95-128, for related but not comparable data]

- Represents zero.

¹ Includes other assets and liabilities not shown separately. ² Excludes reciprocal balances, except for 1940. Reclassification of deposits of foreign central banks in May 1961 reduced interbank deposits by a total of \$1,900 million (\$1,600 million time to other time and \$400 million demand to other demand).

³ Preliminary. ⁴ New York City and Chicago were reclassified as reserve cities effective July 28, 1962.

⁵ Beginning June 1963, 3 New York City banks with loans and investments of \$392 million and total deposits of \$441 million were reclassified as country banks.

¹ When 2 dates are shown, a first-of-month or midmonth date records changes at country banks, and any other date (usually a Thursday) records changes at central reserve and reserve city banks.

² Demand deposits subject to reserve requirements which, beginning Aug. 23, 1935, comprise total demand deposits minus cash items in process of collection and demand balances due from domestic banks (also minus war loan and Series E bond accounts during the period Apr. 13, 1943-June 30, 1947). ³ No change.

⁴ Requirement effective at central reserve and reserve city banks Aug. 11, and at country banks Aug. 16.

⁵ Board of Governors authority to classify or reclassify cities as central reserve cities was terminated July 1962.

— Represents zero. ¹ Adjusted to Dec. 31, 1965.

² Includes principal disbursements in all cases; in deposit payoff cases also includes field payoff expenses and other insurance expenses; in deposit assumption cases includes advances for asset protection, liquidation expenses, and other insurance expense.

³ For definition of "member," see headnote, table 627.

⁴ Disbursement totals for each year relate to cases occurring during that year and may thus contain some amounts disbursed in subsequent years for such cases.

⁵ No cases requiring disbursements by FDIC originated in 1962.

No. 627. BANK SUSPENSIONS—NUMBER OF BANKS AND AMOUNT OF DEPOSITS: 1930 TO 1965

[Prior to 1959, excludes Alaska and Hawaii. Banks closed either permanently or temporarily, on account of financial difficulties, by order of supervisory authorities or by directors of bank. "Member," refers to membership in Federal Reserve System. All national banks are Federal Reserve System members; all Federal Reserve System members are insured. See also *Historical Statistics, Colonial Times to 1967*, series X 165-178]
