ACKNOWLEDGMENTS

This edition of the *Statistical Abstract* was prepared under the direction of **William Lerner,** Chief, Statistical Compendia Staff, Data User Services Office. **Helen E. Teir,** Assistant Chief, was responsible for general supervision and compilation, assisted by **Juanita A. Wright** for technical editorial work and **Susan S. Berger** for graphic content. **Minerva K. Moreland** and **Linnette D. Cunningham** had primary responsibility for editing and clerical operations.

The cooperation of the many contributors to this volume is gratefully acknowledged. The list of sources of tables (pp. 965–970) and the source note below each table credit the various government and private agencies which have collaborated in furnishing information for the *Statistical Abstract.*

In a few instances, contributors have requested that their data be designated as subject to copyright restrictions. The source notes to the tables affected include a copyright notice. Permission to use copyright material should be obtained directly from the copyright owner.

July 1972.

SUGGESTED CITATION

U.S. Bureau of the Census, *Statistical Abstract of the United States: 1972.* (93d edition.) Washington, D.C., 1972.

For sale by the Superintendent of Documents, U.S. Government Printing Office
Washington, D.C. 20402 - Price $5.50 (cloth)

PREFACE

The Statistical Abstract of the United States, published annually since 1878, is the standard summary of statistics on the social, political, and economic organization of the United States. It is designed to serve as a convenient volume for statistical reference and as a guide to other statistical publications and sources. The latter function is served by the introductory text to each section, the source notes appearing below each table, the Guide to Sources, the section on Publications of Recent Censuses, and the Guide to State Statistical Abstracts.

This volume includes a selection of data from many statistical publications, both governmental and private. Publications cited as sources usually contain additional statistical detail and more comprehensive discussions of definitions and concepts than can be presented here. Data not available in publications issued by the contributing agency but obtained from the agency's unpublished tabulations and records are identified in the source notes as "unpublished data." More information on the subjects covered in tables so noted may generally be obtained from the source.

Except as otherwise indicated, figures are for the United States as presently constituted. Although emphasis in the *Statistical Abstract* is given primarily to national data, many tables present data for regions and individual States. Statistics for the Commonwealth of Puerto Rico and for outlying areas of the United States are included in the State tables whenever available and are supplemented by information in section 31. Statistics for cities or other relatively small geographic units appear only in a few instances. Additional information for cities, counties, metropolitan areas, congressional districts, and other small units, as well as more historical data, are available in various supplements to the *Abstract.* (See page v.)

Changes in the 1972 edition.—This edition, the 93d annual issue, presents data for the most recent year or period available during the early part of 1972.

Each year the more than 1,300 tables and charts are reviewed and evaluated. New tables and charts of current interest are added, continuing series are brought up to date, and less timely data are curtailed or eliminated. Text notes are revised as necessary to incorporate new definitions and source references.

A new feature introduced in this edition is a loose insert, "USA Statistics in Brief, 1972," abstracted from the "Recent Trends" summary (p. xiii). Additional copies are available at 10 cents each (discount of 25 percent on orders of 100 copies or more) from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

A more comprehensive selection of statistics from the 1970 Census of Population and Housing is presented in this edition than was possible in 1971. Also, data from the 1969 Census of Agriculture are included for the first time.

The availability of much new data on subjects of current interest is reflected in the largest number of new tables in many years. Although they appear separately in a number of different sections, sixteen of the new tables have in common as subjects the changing social and economic conditions of women and minority groups.

Among the sections most affected by change, new tables comprise nearly one-third of the 49 tables in section 11, Income, Expenditures, and Wealth. New studies by the U.S. Bureau of Economic Analysis on business and residential capital and 1970 census results showing income characteristics of low income groups provided the bulk of the new material.

Altogether there are 113 entirely new tables in this edition, scattered through 28 sections. Following are some of the subjects covered by new tables:

Coastal population, p. 6
Population, by size of States, p. 11
Population projections, by States, p. 15
Birth expectations of wives, p. 54
Catastrophic accidents, p. 62
Physicians, by specialty, p. 68
School enrollment, p. 110
Pupil transportation, by States, p. 126
Participation in adult education, p. 136
Arrested, by race, sex, and age, pp. 149, 150
Defendants charged with marijuana and drug violations, p. 156
Communications intercepts, p. 158
Outdoor activity participants, p. 202
Museums, p. 208
Labor force of Spanish origin p. 218
Husband-wife work experience, p. 219
Married women, by occupation, p. 220
Defense-attributable employment, p. 255
Prisoners of war in SE Asia, p. 260
Military desertion and AWOL rates, p. 261
ROTC enrollment, p. 262
Disabled population characteristics p. 290
OASDHI benefits for children, p. 303
Gross product, by industry, p. 314
Sources and uses of gross saving, p. 321
Wife's contributions to family income, p. 327
Persons and families below low income level, by States, p. 331
Federal outlays benefiting low income persons, p. 335
Cost valuation of nonresidential and residential capital, pp. 336, 338
Voting-age population, pp. 376, 378
Budget costs of Federal subsidies, p. 390
Private health insurance income, p. 462
Minority-owned businesses, pp. 471, 472
Cable and educational TV p. 497
Television programing, p. 499
Nuclear electric energy capacity, p. 516
Scientists and engineers, unemployment rates, p. 527
Farms, by type of organization, p. 586
Chemicals used on farms, p. 594
Costs of housing units, pp. 681, 683
Depreciable assets in manufacturing, p. 702
Export and import price indexes, p. 776

Section 33, Metropolitan Area Statistics, covering metropolitan areas with 200,000 population and over in 1970, includes additional data from the 1970 census. Of special interest are population data on such subjects as family income, education, foreign stock, Spanish heritage, and transportation to work. Reprints of this section are available at 35 cents per copy (discount of 25 percent on orders of 100 copies or more) from the Superintendent of Documents, cited above.

Source citations for tables provided by Federal agencies have been simplified in this edition to conform more nearly with library cataloging practices.

In addition, many of the sections have undergone fairly extensive tabular rearrangement and format changes designed to improve the organization of subject matter.

Of the tables included in the 1971 edition, 63 were omitted from this issue. The omissions represent primarily tables for which comparable details appear in the new or retained tables or for which no recent data are available.

Responsibility.—The contents of this volume were taken from a large number of sources (see "Source Agencies and Table Numbers"). The Bureau of the Census cannot accept the responsibility for the accuracy or limitations of the data presented here, other than for those which it collects. The responsibility for selection of the material and for proper presentation, however, rests with the Bureau.

SUGGESTIONS AND COMMENTS

Many persons have offered suggestions for improving the presentation of data in the *Statistical Abstract* and its supplements. Their comments have been most helpful. Users of these publications are urged to continue to make their needs known for consideration in planning future editions. Suggestions and comments should be sent to the Director, Bureau of the Census, Washington, D.C. 20233.

FOR ADDITIONAL INFORMATION ON DATA PRESENTED

Please consult the source publications available in local libraries or write to the agencies indicated in the source notes to the tables covering the desired subject. Write to the Bureau of the Census only if it is cited as the source.

STATISTICAL ABSTRACT SUPPLEMENTS

Pocket Data Book, USA 1971. Graphic and tabular presentation of summary statistics on a wide variety of subjects. Designed for quick and easy reference. 352 pages. Issued 1971. Price $1.75 (paperbound). 1973 edition in preparation.

Congressional District Data (Districts of the 93d Congress). Separate reports for States that revised their congressional district boundaries for the 93d Congress. Population and housing data from the 1970 census and vote cast in congressional and presidential elections, 1964–1970. Pages vary. Issued 1971–72. Each report 25¢ except California and New York, 50¢.

County and City Data Book, 1967. Statistical data for each county in the United States, 224 standard metropolitan statistical areas, and 683 incorporated cities having 25,000 inhabitants or more in 1960. Information also for regions and States. Based largely on 1962 census of governments, 1963 censuses of business, manufactures, and mineral industries, 1964 census of agriculture, and 1960 censuses of population and housing. 713 pages. Issued 1967. Out of print. 1972 edition in preparation.

Historical Statistics of the United States, Colonial Times to 1957. More than 8,000 series, largely annual, on social and economic development from 1610 to 1957. 801 pages. Issued 1960. Price $8.25 (clothbound). New edition in preparation.

Historical Statistics of the United States, Colonial Times to 1957; Continuation to 1962 and Revisions. Carries forward the more than 6,000 series in the basic volume that are still current; includes related series and revisions and corrections. 158 pages. Issued 1965. Price $1.50 (paperbound).

Directory of Non-Federal Statistics for States and Local Areas: 1969. A finding guide to sources of statistics issued by State agencies, colleges and universities, and private organizations. Specific sources shown for each State, the District of Columbia, Puerto Rico, Guam, and Virgin Islands. 686 pp. Issued 1970. Price $6.25 (paperbound).

Directory of Federal Statistics for States: 1967. A finding guide to sources of Federal statistics available at the State level. Specific sources shown for hundreds of items. 380 pages. Issued 1968. Price $2.25 (paperbound).

Directory of Federal Statistics for Local Areas: 1966. Similar to the directory for States, cited above, but devoted to the data available for areas below the State level. 162 pages. Issued 1966. Price $1.00 (paperbound).

Order *Congressional District Data* reports from Bureau of the Census, Washington, D.C. 20233; other reports from Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

GUIDE TO TABULAR PRESENTATION

The following symbols, used in the tables throughout this book, are explained in condensed form in footnotes to the tables where they appear:

— Represents zero or rounds to less than half the unit of measurement shown.

B Base figure too small to meet statistical standards for reliability of derived figure.

D Figure withheld to avoid disclosure of information pertaining to a specific organization or individual.

NA Data not enumerated, tabulated, or otherwise available separately.

NS Percent change irrelevant or insignificant.

S Figure does not meet publication standards for reasons other than that covered by symbol B, above.

X Figure not applicable because column heading and stub line make an entry impossible, absurd, or meaningless.

Z Entry would amount to less than half the unit of measure shown.

Headnotes immediately below table titles provide information important for correct interpretation or evaluation of the table as a whole or for a major segment of it.

Footnotes below the bottom rule of tables give information relating to specific items or figures within the table.

Unit indicators ("In thousands," "In millions of dollars," etc.) are usually given in boldface type as the first element of the headnote. In tables where several units are used, the unit indicators are generally given in the stub or in the column headings.

Median: The value which divides the distribution into two equal parts—one-half the cases falling below this value and one-half exceeding it.

Parallel vertical rules are used to the right of a total column to indicate—

(1) that the components which follow add to the total (e.g., tables 1, 7, 16, etc.);

(2) in the case of derived figures, that the underlying data are additive to thei total (e.g., table 16 for percentages, table 24 for ratios, table 65 for rates and table 100 for averages).

Heavy vertical rules are used—

(1) in tables where the stub (the area, date, or descriptive column at the left) is continued into one or more additional columns across the table to separate each segment of stub and its accompanying data columns from the continued segments (e.g., tables 2, 6, 9, etc.);

(2) to set off independent sections of a table (e.g., tables 1, 4, 5, etc.).

In many tables, details will not add to the totals shown because of rounding.

Section 1
Population

This section presents statistics on the growth, distribution, and characteristics of the population of the United States. The principal source of these data is the Bureau of the Census, which conducts a decennial census of the population and a monthly current population survey and also prepares periodic population estimates. For a list of publications, see the Guide to Sources in Appendix III of this book.

Decennial censuses.—The Constitution provides for a census of population within every 10-year period, primarily to establish a basis for apportionment of Members of the House of Representatives among the States. For over a century after the first census in 1790, the census organization was a temporary one. In 1902, the Bureau of the Census was established as a permanent Federal agency, responsible for enumerating the population and also for compiling statistics on other subjects and at other times.

In population censuses, each person is counted as an inhabitant of his usual place of residence. While this place is not necessarily his legal residence, voting residence, or domicile, the use of these different bases of classification would usually produce substantially the same statistics.

In recent censuses, some data were obtained from representative samples of the population rather than from a complete count, as follows: 5 percent in 1940, 20 percent in 1950, 25 percent in 1960, and 5, 15, and 20 percent in 1970. Exact agreement is not to be expected among the various samples, nor between them and the complete count, but sample data may be used with confidence where large numbers are involved and assumed to indicate patterns and relationships where small numbers are involved.

Evaluation studies of the 1970 census results were not completed in time for inclusion in this book. Estimates based on evaluation studies of the 1960 census results indicate a total net underenumeration of about 5.7 million persons, of whom about 2.1 million persons were of races other than white. Although the amount of underenumeration was about the same as in the 1950 census, the percentage was somewhat less. Data from the 1950 and 1960 censuses have not been adjusted for the estimated underenumeration.

Current Population Survey.—This is a monthly nationwide survey of a scientifically selected sample representing the noninstitutional civilian population. The sample is located in 449 areas comprising 863 counties and independent cities with coverage in every State and the District of Columbia. About 58,500 housing units and other quarters are designated for the sample at any time, of which about 50,000 (containing 105,000 persons 16 years old and over) are occupied by households eligible for interview; of these, in turn, about 4 to 6 percent are, for various reasons, unavailable for interview. See also text, section 8, Labor Force, Employment, and Earnings.

Population estimates and projections.—National estimates are derived by use of decennial census data as benchmarks and of data available from various agencies as follows: Births and deaths (Public Health Service); immigrants and emigrants (Immigration and Naturalization Service); the Armed Forces (Department of Defense); net migrants (Puerto Rico Planning Board); and Federal employees abroad (Civil Service Commission and Department of Defense). State estimates are based on similar data and also on school statistics from State departments of education and parochial school systems.

National population projections indicate the approximate future level and characteristics of the population under given assumptions as to future fertility, mortality, and net immigration. The method used to develop the projections involved preparation of projections of each of the components of population change—births, deaths,

and net immigration—and the combination of these with July 1 estimates of the current population. Projections for States and metropolitan areas incorporate further assumptions about population redistribution through interarea migration.

Current estimates and projections are consistent with official census figures and are not adjusted for estimated census underenumeration. For details on methodology, see the sources cited below individual tables.

Standard Metropolitan Statistical Areas (SMSA).—The entire territory of the United States has been classified by the Office of Management and Budget as (*a*) metropolitan, or "inside SMSA's," and (*b*) nonmetropolitan, or "outside SMSA's." An SMSA is a county or group of contiguous counties (except in New England) which contains at least one central city of 50,000 inhabitants or more or "twin cities" with a combined population of at least 50,000. Other contiguous counties are included in an SMSA if, according to certain criteria, they are essentially metropolitan in character and are socially and economically integrated with the central city. In New England, towns and cities are used in defining SMSA's. Central cities are those named in the titles of the areas. For details and a listing of the component areas, see Bureau of the Budget (now Office of Management and Budget), *Standard Metropolitan Statistical Areas*, 1967 edition, and subsequent revisions.

Urban and rural areas.—According to the 1970 census definition, the urban population comprises all persons in (*a*) places of 2,500 inhabitants or more incorporated as cities, villages, boroughs (except Alaska), and towns (except in New England, New York, and Wisconsin), but excluding persons living in the rural portions of extended cities; (*b*) unincorporated places of 2,500 inhabitants or more; and (*c*) other territory, incorporated or unincorporated, included in urbanized areas. Some urbanized areas contain one or more incorporated places which are designated as "extended cities" because they have one or more large portions (normally at the city boundary) with relatively low population density. These portions are classified as rural.

In 1960 (but not in 1970), certain towns in New England, townships in New Jersey and Pennsylvania, and counties elsewhere were also designated as urban. Substantially the same definition was used in the 1950 census as in the 1970 census except for the introduction of the concept of "extended cities." In censuses prior to 1950, the urban population comprised all persons living in incorporated places of 2,500 inhabitants or more and areas (usually minor civil divisions) classified as urban under somewhat different rules relating to population size and density. In all definitions, the population not classified as urban constitutes the rural population.

Changes in the size of the urban population from one census to another are affected by 2 components: (*a*) Growth in areas classified as urban at the beginning of the decade; and (*b*) reclassification of rural territory as urban and urban territory as rural. Between censuses, it is possible only to obtain measures of the first component from the Current Population Survey (see p. 1). Measures of the second are too costly. Since about 60 percent of the urban population growth between 1950 and 1960 was attributable to expansion of urban territory, data on the urban population from the Survey may be misleading. Consequently, regular publication of data on urban-rural residence from the Current Population Survey has been discontinued.

Farm and nonfarm residence.—The rural population is divided into "rural-farm," comprising persons living on farms, and "rural-nonfarm," comprising the remainder. According to the 1960 and 1970 census definitions, the farm population consists of persons living in rural areas on places of less than 10 acres yielding agricultural products which sold for $250 or more in the previous year, or on places of 10 acres or more yielding agricultural products which sold for $50 or more in the previous year.

Race.—The population is divided into three major groups on the basis of race: White, Negro, and other. The 1960 and 1970 censuses obtained the information on race principally through self-enumeration; thus, the data represent essentially self-classification by people according to the race with which they identify themselves.

Persons of Mexican or Puerto Rican birth or ancestry who did not identify themselves as of a race other than white were classified as white. In 1970, the father's race was used for persons of mixed parentage who were in doubt as to their classification. In 1960, persons who reported mixed parentage of white and any other race were classified according to the other race; mixtures of races other than white were classified according to the father's race.

Mobility status.—Classification of the population by mobility status is based on comparison of an individual's place of residence at the survey or census date with that of a specified earlier date. *Mobile persons or movers* includes all persons living in different houses in the United States at the beginning and at the end of the period. According to their new location, they may be "same county movers" or "different county movers, or migrants." Migrants in turn are classified according to whether they moved within the same State or into a different State. *Nonmobile persons or nonmovers* includes all persons living in the same house in the United States at the beginning and end of the period. *Persons abroad* includes all persons living outside the United States at the beginning of the period.

Nativity.—The category "Native" comprises persons born in the United States, the Commonwealth of Puerto Rico, an outlying area of the United States, or at sea. It also includes persons born in a foreign country who have at least one parent born in the United States. Persons not having any of the foregoing qualifications are classified as "foreign born."

Ethnic origin.—The 1970 Census obtained data on origin through self-identification of the person's origin or descent. Previously, ethnic origin was inferred from information on place of birth, country of origin, mother tongue, surname, etc.

Household.—A "household" comprises all persons who occupy a "housing unit," that is, a house, an apartment or other group of rooms, or a room that constitutes "separate living quarters." A household includes the related family members and all the unrelated persons, if any, such as lodgers, foster children, wards, or employees who share the housing unit. A person living alone or a group of unrelated persons sharing the same housing unit as partners is also counted as a household. See text, section 27, Construction and Housing, for definition of "housing unit."

Group quarters are living arrangements for persons who do not live in housing units. Examples of group quarters are: A rooming house, an institution, a college dormitory, or a military barracks.

Family.—The term "family" refers to a group of two or more persons related by blood, marriage, or adoption and residing together in a household. A primary family consists of the head of a household and all other persons in the household related to the head. A secondary family comprises two or more persons such as guests, lodgers, or resident employees and their relatives, living in a household and related to each other.

Subfamily.—A "subfamily" is a married couple with or without children, or one parent with one or more unmarried children under 18 years old, living in a household and related to, but not including, the head of the household or his wife. Members of a subfamily are also members of the primary family with whom they live. The number of subfamilies, therefore, is not included in the number of families.

Married couple.—A "married couple" is defined as a husband and his wife living together in the same household, with or without children and other relatives.

Unrelated individuals.—"Unrelated individuals" refers to persons (other than inmates of institutions) who are not living with any relatives. A primary individual is a household head living alone or with nonrelatives only. A secondary individual in a household is a person such as a guest, lodger, or resident employee who is not related to any other person in the household. Persons in group quarters, except inmates of institutions, are classified as secondary individuals.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

FIG. II. UNITED STATES POPULATION—PROJECTIONS TO 1990

[See table 7]

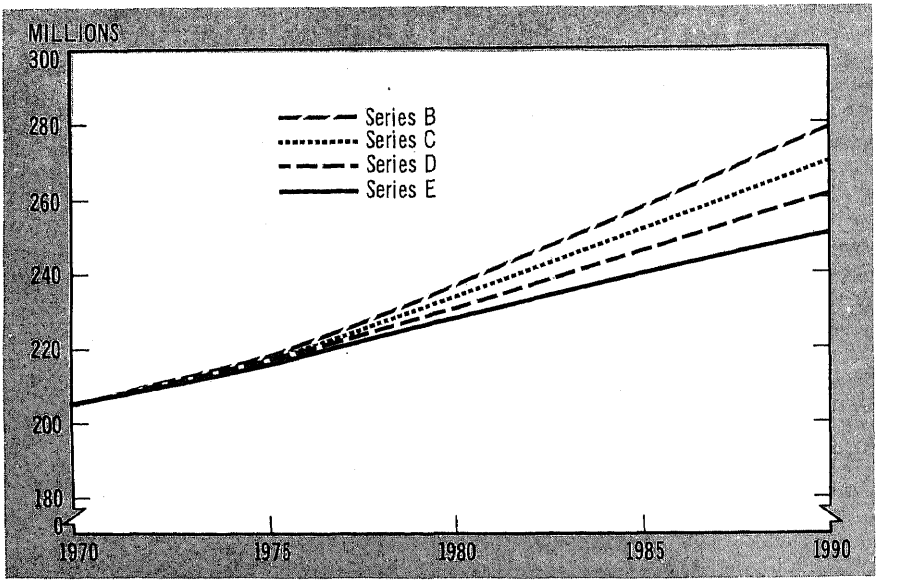

FIG. III. POPULATION CHANGES IN METROPOLITAN AREAS, BY RACE: 1950 TO 1960 AND 1960 TO 1970

[See table 15]

No. 3. Center of Population: 1790 to 1970

["Center of population" is that point which may be considered as center of population gravity of the United States or that point upon which the United States would balance if it were a rigid plane without weight and the population distributed thereon with each individual being assumed to have equal weight and to exert an influence on a central point proportional to his distance from that point]

YEAR [1]	North latitude			West longitude			Approximate location
	°	′	″	°	′	″	
1790	39	16	30	76	11	12	23 miles east of Baltimore, Md.
1850	38	59	0	81	19	0	23 miles southeast of Parkersburg, W. Va.
1900	39	9	36	85	48	54	6 miles southeast of Columbus, Ind.
1950	38	50	21	88	9	33	8 miles north-northwest of Olney, Richland County, Ill.
1960	38	35	58	89	12	35	In Clinton County about 6½ miles northwest of Centralia, Ill.
1970	38	27	47	89	42	22	5.3 miles east southeast of the Mascoutah City Hall in St. Clair County, Ill.

– Represents zero. NA Not available. X Not applicable. Z Less than 0.5 square mile.

[1] Puerto Rico was ceded to the United States by Spain in 1898. On July 25, 1952, pursuant to acts of Congress, it achieved the political status of the Commonwealth of Puerto Rico.

[2] Includes population of Corn Islands (1950, 1,304; 1960, 1,872) not shown separately. Lease of Corn Islands from Republic of Nicaragua was terminated in 1971. Area total excludes area of these islands (4 square miles).

[3] Enderbury Island uninhabitated in 1950 and 1960; Canton and Enderbury in 1970.

[4] Sand Island uninhabited at time of enumeration.

[5] Area is for Navassa (2 square miles), Baker, Howland, and Jarvis (3 square miles), and Palmyra (4 square miles); uninhabited at time of enumeration.

[6] Under jurisdiction of the United States in accordance with treaty of Nov. 18, 1903, with Republic of Panama.

[7] Administered by United States since July 18, 1947, under United Nations Trusteeship system.

[8] Estimated civilian population as of June 30, 1950.

[9] Census of 1958 conducted by the Office of the High Commissioner, Trust Territory of the Pacific Islands.

[10] Comprises 717 square miles of land area and 7,772 square miles of water area.

[11] Excludes U.S. citizens temporarily abroad on private business, travel, etc. Such persons were enumerated at their usual place of residence in the United States as absent members of their own households.

[12] Based on 20-percent sample of reports received.

[13] Based partially on tabulations provided by Dept. of Defense.

[14] Represents U.S. citizens abroad for extended periods. Since this population was enumerated on a voluntary basis, its coverage is probably less complete than that of other categories of Americans abroad.

Source: U.S. Bureau of the Census, *U.S. Census of Population: 1970, Number of Inhabitants*, final report, PC(1)-A1, *United States Summary*.

No. 6. Estimated and Projected Population: 1960 to 2020

[**In millions.** Estimates and projections as of July 1. Includes Armed Forces abroad. See p. 1 for derivation of estimates and projections. For brief statement of assumptions, see headnote, table 7]

No. 7. Estimated and Projected Population, by Age and Sex: 1950 to 1990

[**In thousands.** As of July 1. Includes Armed Forces abroad. Projections are consistent with the April 1, 1970 census. These sets of projections were computed using the "cohort-component" technique and assume that annual net immigration will be 400,000 and that completed fertility of all women (i.e. the average number of children per 1,000 women at end of childbearing) will move gradually toward the following levels: Series B, 3,100; Series C, 2,775; Series D, 2,450; and Series E, 2,110. See p. 1 for derivation of estimates and projections.]

1965–1969	2,123	1.1	3,628	1,885	418	10.7	18.3	9.5	2.1	89.9
1960–1970	2,421	1.3	3,903	1,831	386	12.6	20.3	9.5	2.0	100.3

[1] Includes changes due to admissions into, and discharges from, Armed Forces abroad, and "error of closure" (the amount necessary to make the components of change add to the net change between censuses), for which figures are not shown separately. [2] Percent of population as of Jan. 1. [3] Adjusted for underregistration. [4] Prior to Apr. 1, 1960, adjusted for underregistration of infant deaths; includes estimates of deaths to Armed Forces abroad, except in 1935. [5] Annual births per 1,000 females 15 to 44 years of age. [6] Covers immediate prior year not shown.

No. 14. Population Projections—States: 1980 and 1990

[*In thousands.* As of July 1. Preliminary. Roman numerals indicate interstate migration assumptions. Series I assumes 1960-1970 migration patterns will continue. Series III assumes net interstate migration by age, sex, and color will be zero. Series II, which allows for a convergence of migration rates, is omitted in these preliminary projections. Letters C and E represent national population projection series from table 7. See source for detailed explanation]

No. 16. Population, Urban and Rural, by Race: 1950 to 1970

[**In thousands, except percent.** An urbanized area comprises at least 1 city of 50,000 inhabitants (central city) plus contiguous, closely settled areas (urban fringe). Data for 1950 and 1960 according to urban definition used in the 1960 census; 1970 data according to the 1970 definition. For urban definitions, see text, p. 2]

No. 17. Urban and Rural Places and Population, by Size of Place: 1910 to 1970

[Prior to 1960, excludes Alaska and Hawaii. "Previous urban definition" refers to the definition used prior to 1950 when a number of large and densely settled places were not included as urban because they were not incorporated. In 1950, the Bureau of the Census adopted the concept of the urbanized area and delineated boundaries for unincorporated places. All the population residing in urban-fringe areas and in unincorporated places of 2,500 or more is classified as urban according to the "current" definition. See also *Historical Statistics, Colonial Times to 1957*, series A 181–209]

No. 20. Large Metropolitan Areas—Population, 1960 and 1970, and Components of Population Change, 1960 to 1970

[**In thousands, except as indicated.** Covers 100 large SMSA's, as defined in *Standard Metropolitan Statistical Areas*, 1967, (as amended up to February 23, 1971), issued by the Executive Office of the President, Office of Management and Budget. Change measured from census date, April 1, 1960 to April 1, 1970; minus sign (−) denotes decrease. Rank based on unrounded figures. For more detailed data on large SMSA's, see Section 33]

No. 22. Cities With 100,000 Inhabitants or More in 1970—Population, 1940 to 1970, and Area, 1970

[Increase from census to census includes that due to annexation of territory as well as to direct growth. "Cities" refers to political subdivisions which are incorporated as cities, boroughs, towns, or villages with the exception that towns are not recognized as incorporated places in New England States, New York, and Wisconsin. Land area figures, generally supplied by city engineers, have been revised to agree with those in the Bureau of the Census, *Area Measurement Reports*, series GE-20, No. 1]

No. 26. Components of Population Change, by Race, Between 1960 and 1970

[**In thousands, except as indicated.** Total population, including Armed Forces abroad; growth, birth, and death rates per 1,000 population estimated as of July 1]

ITEM	Total	White	Other races
Population:			
1960	180,007	159,467	20,540
1970	204,265	178,580	25,686
APR. 1, 1960 to APR. 1, 1970			
Components of change:			
Net increase	24,258	19,113	5,145
Births [1]	39,033	32,476	6,557
Deaths [2]	18,247	16,030	2,217
Net immigration [3]	3,472	2,666	806
Percent of 1960 population:			
Net increase	13.5	12.0	25.0
Births [1]	21.7	20.4	31.9
Deaths [2]	10.1	10.1	10.8
Net immigration [3]	1.9	1.7	3.9

ITEM	Total	White	Other races
1960 (calendar year):			
Net growth rate	16.0	14.8	25.1
Birth and death rates:			
Births [1]	23.8	22.7	33.0
Deaths [2]	9.5	9.4	10.0
General fertility rate [4]	119.1	113.8	158.8
1970 (calendar year): [5]			
Net growth rate	10.9	9.6	20.1
Birth and death rates:			
Births [1]	18.3	17.3	25.3
Deaths [2]	9.4	9.5	9.1
General fertility rate [4]	88.0	83.9	114.3

[1] Adjusted for underregistration. [2] Includes deaths in the Armed Forces abroad. [3] Includes changes due to admissions into, and discharges from, Armed Forces abroad, amounting to 11,000 for the total population, and "error of closure" (the amount necessary to make the components of change add to the net change between censuses). [4] Births per 1,000 females aged 15 to 44 as of July 1. [5] Preliminary.

No. 48. Households, Families, and Individuals—Projections: 1975 to 1990

[**In thousands.** As of July 1. Includes members of the Armed Forces living off post or with their families on post, but excludes all other members of the Armed Forces. Series 1 assumes that the annual change in the proportions of the evermarried and single population who are heads of households or families will be the same as from 1957 to 1969, in general. Series 2 assumes that rates of change in the proportions of the evermarried and single population who are heads of households or families will be one-half those for Series 1. For additional explanation, see source]

No. 59. Religious Bodies—Selected Data

[Represents latest information available from religious bodies with memberships of 50,000 or more; excludes a few groups giving no data. Not all groups follow same calendar year nor count membership in same way; some groups give only approximate figures. Roman Catholics count all baptized persons, including infants; Jews regard as members all Jews in communities having congregations; Eastern Orthodox Churches include all persons in their nationality or cultural groups; most Protestant bodies count only persons who have attained full membership, and previous estimates have indicated that all but a small minority of these are over 13 years of age; however, many Lutheran bodies and The Episcopal Church now report all baptized persons, and not only those confirmed. Data which appear in italics are "noncurrent," i.e., they are reported for 1969 or earlier. All other data are "current" and were reported in 1970 or 1971]

Section 2

Vital Statistics, Health, and Nutrition

This section presents vital statistics—data on births, deaths, fetal deaths (stillbirths), marriages, divorces—and data on communicable diseases, mental illness, medical care, hospitals, and nutrition. Vital statistics are compiled and published by the Public Health Service in the annual report, *Vital Statistics of the United States*, in certain reports of the *Vital and Health Statistics* series, and in the *Monthly Vital Statistics Report*. Reports in this field are also issued by State bureaus of vital statistics. Current data on fertility of the population and on age of persons at first marriage are compiled by the Bureau of the Census from its Current Population Survey (see text, p. 1) and published in *Current Population Reports*, series P–20.

Births and deaths.—The collection of death statistics on an annual basis began in 1900 with 10 registration States and the District of Columbia; the collection of birth statistics began in 1915, also with 10 States and the District of Columbia. The changing composition of the two registration areas [1] makes it impossible to obtain geographically comparable birth and death data for the entire United States before 1933. Beginning 1933, the birth and death registration areas have comprised the entire United States, including Alaska beginning 1959 and Hawaii beginning 1960. National statistics on fetal deaths were compiled for 1918 and annually since 1922.

Prior to 1951, birth statistics were the result of a complete count of the records received in the Public Health Service. Since 1951, they have been based on a 50-percent sample of all registered births (except for 1955 when they reverted to a complete count and for 1967 when they were based on a 20–50 percent sample).

Current provisional death statistics are based on a 10-percent sample of death certificates filed in State vital statistics offices. Fetal deaths (stillbirths) and deaths among Armed Forces abroad are excluded.

Mortality statistics are compiled in accordance with World Health Organization regulations, which specify that member nations classify causes of death according to the *International Statistical Classification of Diseases, Injuries, and Causes of Death*. The current classification, "Eighth Revision International Classification of Diseases, Adapted for Use in The United States," has been used beginning with 1968.

Marriages and divorces.—National collections of statistics on marriages and divorces in the United States were made for various years from 1867 to 1940 and for each year since 1944. Estimates have been made for intervening years and for years in which collections were not complete. A marriage-registration area was established by the Public Health Service in 1957, and a divorce-registration area in 1958. At the beginning of 1972, the marriage-registration area covered 41 States and 3 independent registration areas; the divorce-registration area, 29 States and 1 independent area.

Vital statistics rates.—Vital statistics rates computed by the Public Health Service are based upon the enumerated population figures as of April 1 for 1940, 1950, 1960, and 1970 and upon the estimated midyear population figures for other years, provided by the Bureau of the Census unless otherwise noted.

Medical care.—Historical data on national health expenditures, by source of public and private funds and by object of expenditure, are compiled by the Social Security Administration and appear annually in the *Social Security Bulletin*. From this series are derived estimates of total personal health care expenditures, private consumer expenditures for health services, and those portions of such expenditures met by private health insurance and third-party payments, which include private health

[1] For coverage of these areas, see *Historical Statistics of the United States, Colonial Times to 1957*, series B 1–5.

insurance benefit payments, government expenditures, and philanthropy, and the expenditures of employers to maintain in-plant health facilities.

Data on physicians, dentists, nurses, and other providers of health services are published in the *Health Manpower Source Book Series*, Public Health Service Publication No. 263. A comprehensive compilation of data on some 35 categories of health occupations, three categories of inpatient health facilities, and outpatient and nonpatient health services is presented in the annual *Health Resources Statistics*, Public Health Service Publication No. 1509.

Statistics of hospitals are obtained from the American Hospital Association's annual survey of hospitals. They are published annually in *Hospitals*, Guide Issue, and cover all hospitals accepted for registration by the Association. To be accepted for registration, a hospital must meet certain requirements, as follows: It must have at least 6 beds for the care of nonrelated patients for an average stay of over 24 hours per admission; be constructed and equipped to insure safety of patients and to provide sanitary facilities for their treatment; have an organized medical staff, registered nurse supervision, and nursing care for round-the-clock patient care; maintain clinical records on all patients and submit evidence of patient care by doctors; provide minimal surgical and obstetrical facilities or relatively complete diagnostic and treatment facilities; have diagnostic X-ray and clinical laboratory services readily available; and offer services more intensive than those required merely for room, board, personal services, and general nursing care.

The Social Security Administration is another source of data for hospitals and nursing homes. These data, available by State for such institutions and for extended care facilities and home health agencies, are based on the Health Insurance for the Aged program (Medicare) begun in 1966. They differ from those of the American Hospital Association and other sources because they are limited to the facilities meeting Federal eligibility standards for participation in Medicare.

Data on persons receiving inpatient care in short-stay hospitals, resident patients in mental hospitals, and residents of homes for the aged and chronically ill are collected by the Public Health Service and presented in *Vital and Health Statistics*, Series 12 and 13; data on patient visits to physicians, dentists, and other providers of health care are furnished in Series 10.

Another aspect of medical care is provided by statistics on patients in hospitals for mental disease, psychiatric services of general hospitals, outpatient psychiatric clinics, and institutions for the mentally retarded. From 1923 to 1946, data on mental health were collected annually by the Bureau of the Census. Since 1946 they have been issued by the Public Health Service. From 1947 through 1966, hospital data appeared annually in *Patients in Mental Institutions* and, from 1959 through 1966, clinic data appeared in *Data on Patients of Outpatient Psychiatric Clinics in the United States*. In 1967, these data appeared in *Mental Health Statistics*, Series A—*Mental Health Facilities Reports*. The 1968 and 1969 data are published as reference tables for the different types of facilities. *Mental Health Statistics—Current Facility Reports* presented provisional data through 1969. These are now in the Statistical Note series which also include special reports as they become available.

Statistics on institutional population based on the 1960 Census of Population include information on number and characteristics of persons in long-term hospitals, in homes and schools for the mentally and physically handicapped, and in homes for the aged and dependent (see table 57).

Illness and disability.—Annual data on notifiable diseases, based on reports from State health departments, are compiled by the Public Health Service at its Center for Disease Control in Atlanta, Georgia, and published as a supplement to its *Morbidity and Mortality Weekly Report*. The list of notifiable diseases is revised biennially and includes those which, by mutual agreement of the States and the Public Health Service, are communicable diseases of national importance.

General health statistics, including morbidity, disability, and the utilization of health services, are provided by the various surveys that make up the National Health Survey of the Public Health Service. They are published in *Vital and Health Statistics*, Series 10 and 11. Morbidity statistics for members of the Armed Forces are prepared and published by the Departments of the Army, Navy, and Air Force. The Department of Labor compiles statistics of industrial injuries (see p. 239).

Nutrition.—Statistics on the annual per capita consumption of food and its nutrient value are estimated by the Department of Agriculture and published quarterly (nutrient value, annually) in the *National Food Situation*. Data beginning with 1909 are published in *Food Consumption, Prices, and Expenditures*, Agricultural Economics Report No. 138, July 1968; they are updated in annual supplements. Data on Federal food distribution programs, quantity and cost of food commodities distributed, value of food stamps issued, and number of persons participating in the programs are published annually in *Agricultural Statistics*.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

Fig. IV. Vital Statistics Rates: 1925 to 1971

No. 73. Total Fertility Rate and Intrinsic Rate of Natural Increase, by Race: 1940 to 1968

[Excludes Hawaii and, prior to 1959, Alaska. Prior to 1960, based on births adjusted for underregistration; beginning 1960, on registered births. The *total fertility rate* is the number of births that 1,000 women would have in their lifetime if, at each year of age, they experienced the birth rates occurring in the specified year. A total fertility rate of 2,110 represents "replacement level" fertility for the total population under current mortality conditions. The *intrinsic rate of natural increase* is the rate that would eventually prevail if a population were to experience, at each year of age, the birth rates and death rates occurring in the specified year and if these rates remained unchanged over a long period of time]

PERIOD OR YEAR	TOTAL FERTILITY RATE			INTRINSIC RATE OF NATURAL INCREASE (expressed as a percent)		
	Total	White	Negro and other	Total	White	Negro and other
1940–1944	2,523	2,460	3,010	0.5	0.4	1.0
1945–1949	2,985	2,916	3,485	1.2	1.1	1.7
1950–1954	3,337	3,221	4,185	1.7	1.5	2.6
1955–1959	3,690	3,549	4,716	2.1	2.0	3.1
1960–1964	3,459	[1] 3,331	[1] 4,375	1.9	[1] 1.7	[1] 2.8
1965	2,928	2,790	3,891	1.2	1.0	2.3
1966	2,736	2,609	3,615	1.0	0.8	2.0
1967	2,573	2,453	3,385	0.7	0.6	1.8
1968	2,477	2,368	3,197	0.6	0.4	1.6

[1] Figures by race exclude data for residents of New Jersey for 1962 and 1963.

Bronchitis, emphysema and asthma	(3)	(3)	(3)	14.4	16.6	15.6	14.9	31,520	30,340
Chronic and unqualified bronchitis	(3)	(3)	(3)	2.5	3.1	3.0	2.7	*6,000*	*5,460*
Emphysema	(3)	(3)	(3)	9.6	12.1	11.3	11.1	22,830	22,630
Asthma	2.9	3.6	3.0	2.3	1.3	1.3	1.1	2,690	2,250
Peptic ulcer	5.5	5.9	6.3	5.4	4.7	4.6	4.1	*9,360*	*8,450*
Hernia and intestinal obstruction	5.9	5.3	5.1	5.2	3.9	3.9	3.6	7,910	7,390
Cirrhosis of liver	9.2	10.2	11.3	12.8	14.6	15.0	15.8	30,190	32,260
Cholelithiasis, cholecystitis, and cholangitis	3.9	3.6	2.6	2.4	2.2	2.2	2.2	4,420	4,450
Nephritis and nephrosis	18.7	11.1	7.6	6.2	4.7	4.6	3.9	9,290	7,880
Infections of kidney	2.1	3.0	4.3	5.1	4.7	4.2	3.9	8,500	7,920
Hyperplasia of prostate	4.2	3.7	2.5	1.8	1.3	1.2	1.0	2,440	2,080
Congenital anomalies	12.2	12.5	12.2	10.1	8.4	8.7	8.1	17,600	16,540
Certain diseases of early infancy	40.5	39.0	37.4	27.0	21.9	20.9	20.9	42,270	42,680
Symptoms and ill-defined conditions	14.9	12.1	11.4	12.1	11.8	15.6	16.2	31,540	33,100
Accidents	60.6	56.9	52.3	55.7	57.5	56.0	54.2	113,150	110,720
Motor vehicle accidents	23.1	23.4	21.3	25.4	27.5	26.8	26.2	54,170	53,430
All other accidents	37.5	33.5	31.0	30.4	30.0	29.2	28.0	58,980	57,290
Suicide	11.4	10.2	10.6	11.1	10.7	10.9	11.1	22,060	22,630
Homicide	5.3	4.5	4.7	5.5	7.3	7.2	7.6	*14,480*	*15,610*
All other causes	52.3	50.3	55.3	48.9	57.4	55.5	58.7	111,990	119,880

[1] Based on resident population enumerated as of Apr. 1 for 1950, 1960, and 1970, and estimated as of July 1 for other years.
[2] Estimated; based on a 10-percent sample of death certificates.
[3] Included in "All other causes." Comparable data not available separately.
[4] With or without renal disease.
[5] Excludes pneumonia of newborn.

No. 81. Death Rates for the 10 Leading Causes of Death—States: 1968

[**By place of residence.** Refers only to deaths occurring within the United States. Rates per 100,000 estimated midyear population in each area. Causes of death classified according to eighth revision of the International Classification of Diseases, adapted 1965; see text, p. 47. For method of selecting the leading causes of death, see *Vital Statistics of the United States, 1968*, Technical Appendix, Part A]

S Does not meet publication standards because reporting less than 90 percent complete.

[1] Preliminary. Represents either marriages performed, licenses issued, or intentions filed. U.S. total based on receipts corrected for observed differences between provisional and final data. State data are not corrected in this manner. [2] Per 1,000 population. Based on total population residing in area; population enumerated as of Apr. 1 for 1960 and 1970, estimated as of July 1 for other years. [3] Includes reported annulments.

[4] Estimated. [5] Incomplete. [6] Marriage licenses.

No. 92. Health Services and Supplies—Per Capita National and Private Consumer Expenditures, by Object: 1950 to 1970

[As of July 1. Based on Bureau of the Census data for total U.S. population including Armed Forces and Federal civilian employees abroad and the civilian population of outlying areas. Excludes expenditures for research and construction]

Object of expenditure	1950	1955	1960	1965	1968	1969	1970
Total, national	**$75.66**	**$100.27**	**$137.06**	**$187.61**	**$257.28**	**$286.68**	**$315.83**
In 1970 prices [1]	169.92	186.61	208.97	252.80	292.44	304.88	315.83
Hospital care	24.90	35.04	49.46	68.81	102.49	117.47	134.21
Physicians' services	17.76	21.91	30.92	44.23	54.36	60.03	65.28
Dentists' services	6.21	8.96	10.75	14.20	17.74	19.63	21.31
Other professional services [2]	2.56	3.34	4.69	5.25	6.22	6.51	6.87
Drug and drug sundries	11.16	14.16	19.89	24.53	30.19	32.64	34.61
Eyeglasses and appliances [3]	3.17	3.59	4.22	6.22	8.48	8.82	9.04
Nursing home care	1.21	1.85	2.86	6.72	11.17	12.85	14.88
Expenses for prepayment and admn. [4]	2.04	3.71	4.69	6.59	9.83	10.23	10.07
Government public health activities	2.33	2.24	2.24	3.52	5.38	5.95	6.91
Other health services	4.31	5.49	7.32	7.54	11.42	12.55	12.64
Total, private consumer	**54.47**	**72.94**	**102.50**	**141.89**	**158.10**	**176.92**	**194.34**
In 1970 prices [1]	122.33	135.75	156.28	191.19	179.71	188.15	194.34
Hospital care	11.84	17.80	27.85	41.14	47.17	56.68	65.63
Physicians' services	16.79	20.39	28.88	41.38	41.53	44.97	48.97
Dentists' services	6.21	8.96	10.74	14.03	16.55	18.57	20.21
Other professional services [2]	2.39	3.15	4.49	4.96	5.20	5.38	5.72
Drug and drug sundries	11.09	13.99	19.57	23.81	28.68	30.69	32.27
Eyeglasses and appliances [3]	3.12	3.48	4.13	6.07	8.24	8.55	8.75
Nursing home care	1.09	1.53	2.24	4.07	3.11	4.37	5.88
Expenses for prepayment	1.94	3.65	4.60	6.43	7.62	7.71	6.92

[1] Based on medical care component of the consumer price index.
[2] Services of registered and practical nurses in private duty, visiting nurses, podiatrists, physical therapists, clinical psychologists, chiropractors, naturopaths, and Christian Science practitioners.
[3] Includes fees of optometrists and expenditures for hearing aids, orthopedic appliances, artificial limbs, crutches, wheelchairs, etc.
[4] Includes the net cost of insurance and administrative expenses of federally financed health programs.

No. 113. Public Institutions for the Mentally Retarded: 1950 to 1970

[Preliminary data as submitted by many State agencies; therefore, in many instances figures reflect estimates rather than a substantiated figure. For example, resident patients at the end of a year do not equal the number at the beginning of a succeeding year. Includes estimates for underreporting wherever possible]

Item	1950	1960	1965	1967	1968	1969	1970
Number of facilities	96	108	143	165	170	180	190
Resident patients, beginning of year	103,377	158,682	181,549	192,774	193,121	192,848	189,956
Total admissions, excluding transfers	10,369	14,701	17,300	15,714	14,688	14,868	14,985
Rate per 100,000 civilian population [1]	6.9	8.3	9.1	8.1	7.4	7.4	7.5
First admissions	9,382	13,534	15,033	13,193	12,359	12,226	12,075
Readmissions	987	1,167	2,267	2,521	2,329	2,642	2,910
Patients under treatment	113,746	173,383	198,849	208,488	207,809	207,716	204,941
Deaths in institutions	1,971	3,202	3,583	3,635	3,614	3,621	3,496
Net live releases [2]	4,681	6,451	7,993	11,665	11,675	14,701	14,702
Resident patients, end of year	107,094	163,730	187,273	193,188	192,520	189,394	186,743
Average daily resident patient population	127,830	163,282	189,172	194,650	193,690	191,363	187,897
Personnel, full-time, total [3]	25,744	54,277	79,056	94,900	100,804	107,737	117,327
Rate per 100 average daily resident patient population	20.1	33.2	41.8	48.8	52.0	56.3	62.4
Maintenance expenditures [3] [4] mil. dol.	92	266	442	577	673	765	871
Per average daily resident patient:							
Per year dol.	746	1,650	2,335	2,965	3,472	3,996	4,635
Per day dol.	2	5	6	8	9	11	13

[1] Based on Bureau of the Census estimated resident population as of July 1.
[2] Excess of patients released alive from hospital over those returning to hospital.
[3] Reporting facilities only.
[4] Includes salaries and wages, purchased provisions, fuel, light, water, etc.

– Represents zero. [1] Includes returns from extended leave as well as admissions and readmissions. [2] Source: U.S. Social and Rehabilitation Service, *Residents in Public Institutions for the Mentally Retarded*, annual report. [3] Excess of patients released alive from hospital (direct discharges plus leave placements) over those returning to hospitals. [4] 146 known hospitals; 107 reported data on residents and 127 reported total additions. [5] Excludes 68 VA clinics. [6] No institutions for mentally retarded; patients requiring hospitalization receive care at State mental hospital.

– Represents zero.
D Withheld to avoid disclosing figures for individual producers.
[1] Excludes alicyclic and heterocyclic compounds for 1960; beginning 1965, excludes methionine.
[2] Excludes benzenoid compounds.
[3] Includes some sales of aspirin tablets inadvertently reported as bulk sales through 1965.
[4] Includes most but not all choline salts. [5] Choline chloride only.
[6] For human or veterinary use only through 1960. Sales of mixture and dosage-form products included through 1960; excluded thereafter. [7] Excludes semi-synthetic penicillins.
[8] Beginning 1965, excludes derivatives other than salts. [9] Excludes derivatives.
[10] Includes skeletal muscle relaxants.
[11] Excludes K vitamins through 1960.

[1] A day when a person cut down on his usual activities for the whole day because of illness or injury. Includes bed-disability, work-loss, and school-loss days.
[2] A day when a person was kept in bed either all or most of the day because of illness or injury. Includes those work-loss and school-loss days actually spent in bed.
[3] A day when a person lost the entire work day because of illness or injury. Computed for persons 17 years of age and over in the currently employed population, defined as those who were working or had a job or business from which they were not on layoff during the 2-week period preceding the week of interview.
[4] Child's loss of entire school day because of illness or injury. Computed for children 6–16 years of age.

No. 118. Measures of Disability and Health Conditions: 1969 and 1970

[**Rate per 100 persons per year.** Based on a sample and subject to sampling variability; see source]

SUBJECT	1969			1970		
	All ages	Persons under 65	Persons 65 and over	All ages	Persons under 65	Persons 65 and over
Restricted activity days [1]	1,476	1,280	3,351	1,458	1,289	3,066
Bed-disability days [1]	607	535	1,293	612	530	1,385
Days for patients discharged from short-stay hospitals	117	91	358	114	94	307
Incidence of acute conditions [2]	201	212	95	203	214	102
Activity limited by chronic conditions	12	8	42	12	9	42
Persons injured [2]	25	26	15	28	29	21

[1] For definition of terms, see footnotes 1 and 2, table 117.
[2] Excludes all conditions or injuries involving neither restricted activity nor medical attention.

No. 125. Nutrition—Nutrients Available for Civilian Consumption per Capita per Day: 1940 to 1971

[Prior to 1960, excludes Alaska and Hawaii. Based on Bureau of the Census estimated population as of July 1. Computed on basis of estimates of apparent civilian consumption (retail basis) including consumption from home gardens. No deductions have been made in nutrient estimates for loss or waste in home or for destruction or loss of nutrients during preparation of food. Deductions have been made for inedible refuse. Data include quantities of iron, thiamin, riboflavin, and niacin added to flour and cereal products; quantities of vitamin A value added to margarine and milk of all types; quantities of ascorbic acid added to fruit juices and drinks. Minus sign (−) denotes decrease. See also *Historical Statistics, Colonial Times to 1957*, series G 546-551]

NA Not available. [1] Includes Indian reservations.
[2] Unemployed and low-income persons except those on regular public assistance rolls.
[3] Total cost to Federal Government including commodity cost, warehousing, processing, repackaging, miscellaneous handling charges, and transportation costs to designated carload receiving points within the States.

Source of tables 129 and 130: U.S. Dept. of Agriculture, Food and Nutrition Service. In annual report, *Agricultural Statistics*, and unpublished data.

No. 131. Cost of U.S. Department of Agriculture Food Plans: 1971

[As of December. Cost of the Economy Plan is often used as the minimum price for purchasing a nutritionally good diet. Studies show that most families that spend this little do not select foods that make up a good diet. The Low-cost Plan costs about 25 percent more than the Economy Plan]

FAMILY MEMBERS	COST PER MONTH	
	Economy plan	Low-cost plan
Woman, 35 to 55 years	$32.00	$40.10
Couple, 55 to 75 years	54.10	67.50
Parents, 20 to 35 years, two preschool children	95.60	119.60
Parents, 20 to 35 years, two elementary school children	111.10	139.00
Parents, 35 to 55 years, two preschool and two elementary school children and two teenagers	184.80	231.10

Section 3
Immigration and Naturalization

This section presents statistics related to immigration, naturalization, and alien registration. The principal source of these data is the *Annual Report* of the Immigration and Naturalization Service. Immigration statistics are prepared from entry documents. Statistics for naturalizations are compiled from periodic reports by courts conducting such proceedings, and those for alien registrations are compiled from alien address report cards.

The continuous record of immigration into the United States began in 1819, under the Act of March 2. Immigration statistics were compiled by the Department of State from 1820 to 1874 and by the Treasury Department from 1867 to 1895. Since 1892 there has been a separate office or bureau of immigration, now a part of the Immigration and Naturalization Service. Information on immigration and naturalization has been included in annual reports issued by the Office of Immigration from 1892 to 1932, the Secretary of Labor from 1933 to 1940, the Attorney General for 1941, and the Immigration and Naturalization Service since then.

Immigration.—Since 1820 the official immigration statistics (see table 135) have changed considerably in coverage. The early figures were for arrivals at Atlantic and Gulf coast seaports of the United States. Pacific coast arrivals were first reported in 1850. Aliens arriving at Canadian seaports en route to the United States were included after 1893. The reporting of arrivals over the land borders began in 1904. Prior to 1868, arriving alien passengers were recorded; thereafter, aliens coming for temporary stay were omitted. The passage of the Act of 1891 increased the number of excludable classes. The basis of reporting was then changed from arrivals to admissions, omitting aliens not permitted to enter the United States, except for the period 1895 to 1897 when the reporting of arrivals was resumed.

Immigrant.—An immigrant is defined as an alien, other than a returning resident alien, admitted for permanent residence. Prior to July 1, 1968 (see p. 90) quotas limited immigration only from Eastern Hemisphere countries. Until 1920 there was only a qualitative limitation into this country. The 1921 Act placed the first numerical ceiling upon immigration. Each country's quota was to be 3 percent of the number of people born in that country who were residing in the United States as reported by the 1910 Census of Population.

In 1924, a new formula was enacted for computing a country's quota, based on 2 percent of the number of people born in that country who were residing in the United States as determined by the 1890 Census of Population. The 1924 Act also provided that, beginning July 1, 1929, the quota of any country shall have the same ratio to 150,000 as the number of persons of that national origin living in the United States had to the total population living in the United States as determined from the 1920 Census of Population. This Act also established minimum quotas of 100 for all quota areas.

The Immigration and Nationality Act of 1952 simplified the national origins formula of the 1924 Act by basing the annual quota on a flat one-sixth of 1 percent of the population in the 1920 Census. Quotas revised by Presidential proclamation totaled 158,261 in 1967.

Effective December 1, 1965, quotas under the 1952 Act were continued but made subject to a new preference system. Moreover, at the end of each year, until July 1, 1968, the numbers allocated to each country which were not used were transferred to an immigration pool and made available to preference immigrants who could not obtain visas because the quota for their country was exhausted. The allocations from the pool and from existing numbers could not exceed 170,000.

Also effective December 1, 1965, the "quota immigrant" of the 1952 Act is called "immigrant" and the "nonquota immigrant" is called "immediate relative" or "special immigrant." Immediate relatives of United States citizens are parents (if the citizen is over age 21), spouses, and children under age 21. They are exempted from the numerical ceilings.

Special immigrants include returning resident aliens (although these are often classed as nonimmigrants for statistical purposes), certain former citizens, and certain other specified groups. The spouses and children under age 21 of the following groups are included if they are accompanying or following to join such immigrants: Western Hemisphere natives, retired employees of our government abroad, and ministers of religion. Special immigrants are also exempt from the numerical ceilings.

Effective July 1, 1968, a ceiling of 120,000 was set for Western Hemisphere natives on a first-come first-served basis with no limitation on the number from any one country. "Immediate relatives" and "special immigrants" other than those in the latter category because of Western Hemisphere birth continue to be exempt from numerical ceilings. Effective December 1, 1968, a limit of 170,000 was set for immigrants who are natives of the Eastern Hemisphere, with a 20,000 maximum on natives of any one country. Selection is made on the basis of preferences favoring family reunification and persons with skills and talents needed here.

Nonimmigrant.—Nonimmigrants are aliens who enter the United States for temporary periods. Included in the nonimmigrant class are foreign government officials, their families, attendants, servants, and employees; temporary visitors for business or pleasure; aliens in continuous transit through the United States; students; and others. Resident aliens returning from a temporary stay abroad are often classed as nonimmigrants, although they are legally special immigrants. Certain temporary admissions such as of persons in possession of border-crossing identification cards are not included in the nonimmigrant totals.

Displaced persons and refugees.—The Displaced Persons Act of 1948 was the first of eight special acts passed between 1948 and 1960 that provided for the admission of refugees from Communist-dominated countries, victims of natural calamities, and orphan children without regard to the usual numerical ceilings.

Status of Cubans.—Effective November 2, 1966, Cubans admitted or paroled into the United States after January 1, 1959, and present in the United States for at least 2 years may obtain permanent resident status. A record of the alien's admission for permanent residence will be created as of 30 months prior to filing of an application or the date of his last arrival in the United States, whichever is later. Cuban immigrants who have been admitted for permanent residence may also have the date of admission adjusted to a date 30 months prior to the date of this Act.

Alien registration.—The Immigration and Nationality Act provides that each alien who is required to be registered under the Alien Registration Act of 1940, and who is in the United States on January 1, must report his current address to the Attorney General during the month of January. Alien address report cards are distributed through the post offices of the United States or the local offices of the Immigration and Naturalization Service.

Naturalization.—Naturalization statistics for the United States began with the fiscal year 1907. Prior to this time each court kept records of naturalizations but no national data were compiled. The Act of June 29, 1906, effective September 27, 1906, provided for periodic returns by all courts conducting naturalization proceedings, and for the filing with a central Federal agency of a duplicate copy of each declaration of intention and petition for naturalization filed, and of each certificate of naturalization issued. Naturalization statistics were originally compiled by the Bureau of Immigration and Naturalization of the Department of Commerce and Labor, now the Immigration and Naturalization Service of the Department of Justice.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957.* See preface.

No. 135. Immigration: 1820 to 1971

[**In thousands, except rate.** For years ending June 30, except as noted. For 1820–1867, alien passengers arriving; 1868–1891 and 1895–1897, immigrants arriving; 1892–1894 and 1898 to the present, immigrants admitted. Rates based on Bureau of the Census estimates as of July 1 for resident population through 1929, and for total population thereafter (excluding Alaska and Hawaii prior to 1959). See also *Historical Statistics, Colonial Times to 1957*, series C 88 and C 140–144]

Section 4

Education

This section presents data concerning the enrollment, personnel, level, extent, and finances of formal education in the United States. The chief sources are the decennial Census of Population and the Current Population Survey, both conducted by the Bureau of the Census (see text, p. 1), and annual, biennial, and other periodic surveys conducted by the Office of Education. The Census of Population has included data on school enrollment since 1840 and on educational attainment since 1940. The Current Population Survey has reported on school enrollment annually since 1945 and on educational attainment and illiteracy periodically since 1947. The Office of Education has collected statistical information on education since 1870. Its annual *Digest of Educational Statistics*, first issued in 1962, includes data on pupils, staff, finances, and organization at elementary, secondary, and higher education levels. The *Digest* is also the primary source for detailed information on Federal funds for education and related activities. Projections of enrollment, graduates, teachers, and expenditures appear in *Projections of Educational Statistics*, issued annually since 1964.

Other regular sources of education data include special studies of the Office of Education, publications of the National Education Association, and annual or biennial reports of education agencies in individual States. Administrative statistics on programs concerned with the distribution of Federal funds are issued by the agencies responsible. The quinquennial Census of Governments, conducted by the Bureau of the Census, provides data on school district finances. Reports published by the Bureau of Labor Statistics contain data relating employment experience to educational attainment. Data on vocational training are available in *Vocational and Technical Education*, issued annually by the Office of Education.

Types and sources of data.—The statistics in this section are of two general types. One type, exemplified by data from the Bureau of the Census, is based on direct questioning of individuals to obtain information about their own and their families' education. Tabulations of this type of data relate to school enrollment and level of education attained, classified by age, sex, and other characteristics of the population. School enrollment statistics of the Bureau of the Census are based on attendance or enrollment in any regular school within a given period; educational attainment statistics are based on the highest grade completed by an individual.

The second type, exemplified by data from the Office of Education and the National Education Association, is based on reports from administrators of educational institutions and of local and State agencies having jurisdiction over education. This type of data relates to school enrollment, attendance, staff, and finances for the Nation, individual States, and local areas, by institutional characteristics.

Neither the Office of Education nor the Bureau of the Census regularly includes specialized vocational, trade, or business schools, residential schools for exceptional children, and correspondence schools. Office of Education enrollment data include kindergartens and publicly financed nursery schools; Census enrollment data include kindergartens and all nursery schools. At the higher education level, the basic Office of Education statistics and the Bureau of the Census enrollment statistics are concerned with institutions granting degrees or offering work acceptable for degree-credit, such as junior colleges. Statistics for certain other types of institutions beyond the high school, such as those offering organized occupational curriculums of non-degree character, are also collected by the Office of Education.

State laws.—Although all States except Mississippi have requirements that children attend school, State laws vary as to the ages and circumstances of compulsory attendance. In the majority of States, the laws require that formal schooling begin by age 7 and continue to age 16.

Schools.—The Office of Education defines a "school" as "A division of the school system consisting of a group of pupils composed of one or more grade groups, organized as one unit with one or more teachers to give instruction of a defined type, and housed in a school plant of one or more buildings. More than one school may be housed in one school plant, as is the case when the elementary and secondary programs are housed in the same school plant."

"Regular" schools are those which advance a person towards a diploma or degree. They include public and private nursery schools, kindergartens, graded schools, colleges, universities, and professional schools. "Public" schools are schools controlled and supported by local, State, or Federal governmental agencies; "private" or "nonpublic" schools are those controlled and supported mainly by religious organizations or by private persons or organizations.

The Bureau of the Census defines "elementary" schools as including grades 1 through 8; "high" schools as including grades 9 through 12; and "colleges" as including junior or community colleges, regular 4-year colleges, and graduate or professional schools. Statistics reported by the Office of Education and the National Education Association by type of organization, as elementary level and secondary level, may not be strictly comparable with those from the Bureau of the Census because the grades included at the two levels vary, depending on the organization of junior high schools. The trend is for the enrollment in grades seven and eight to shift from an elementary to a secondary organization, with resultant changes in grade distribution.

School year.—Except as otherwise indicated in the tables, data relating to enrollment and staff refer to the school year which generally begins in September of the preceding year and ends in June of the year stated. Statistics concerning school finances are for a 12-month period, usually July 1 to June 30.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957.* See preface.

[1] Estimated by Office of Education. Excludes data for private residential schools for exceptional children and subcollegiate departments of institutions of higher education. [2] See headnote, table 205.

No. 159. School Enrollment, by Sex and by Level: 1950 to 1990

[In thousands, except percent. As of fall of year. Prior to 1960, excludes Alaska and Hawaii. Civilian noninstitutional population 5 to 34 years old. Elementary includes kindergarten and grades 1–8; high school, grades 9–12 and postgraduates; and colleges, 1–4 year college and graduate and professional schools. Series shown represent projections based on different combinations of assumptions about population and enrollment rates. For basis of population projections, see headnote, table 7. Enrollment Series 1 and 2 are both based on the assumption that age-specific enrollment rates will continue to increase. Series 1 assumes a relatively rapid increase in the rates following the experience of 1950–52 to 1969–70; the projected rates are adjusted to tie in with the estimates for 1970. Series 2 assumes a more moderate increase based on an average of the projected rates in Series 1 and rates in 1970. More detailed methodology is given in source]

No. 166. Years of School Completed, by Sex: 1971 and Projections to 1990

[**In thousands of persons 25 years old and over.** As of March 1. Excludes Armed Forces overseas and in barracks. Projections are based on the age-grade specific attainment trends between 1957–59 and 1969–70. The projections assume decline in the proportions of the population aged 25–29 terminating their education at a given level, some further attainment by ages 30–34, and a continuation of past attainment ratios for older age cohorts. Series 1 assumes lower rates of termination than indicated by the trends from 1957–59 to 1969–70. Series 2 assumes higher rates of termination. For basis of population projections, see headnote, table 7]

Year, series, and sex	Persons 25 years old and over	Years of school completed						
		Elementary school			High school		College	
		Under 5	5–7 years	8 years	1–3 years	4 years	1–3 years	4 years or more

– Represents zero. NA Not available.

[1] For 1900, enumerated population as of June 1; for 1960, enumerated population as of Apr. 1; for all other years, estimated population as of July 1 of preceding year (1919, 1939, etc.). Excludes Armed Forces abroad.

[2] Includes librarians and other nonsupervisory instructional staff. Prior to 1940, figures represent number of persons employed rather than number of positions.

[3] Beginning 1960, estimated.

[4] Through 1950, includes community services. Beginning 1960, not comparable with prior years.

[5] Comprises summer schools, community colleges, adult education, and, beginning 1960, community services.

[6] Excludes capital outlay by nonschool agencies.

[7] Based on current expenditure allocable to pupil costs, capital outlay, and interest.

[8] Excludes current expenditures not allocable to pupil costs.

[9] Includes interest.

No. 186. Achievement Tests—Median Scores for Students in Grades 1 and 12, by Race or Ethnic Group: 1965

[As of fall. For definition of median, see preface. Estimates based on survey of public elementary and secondary schools. Represents results of standard achievement tests of such skills as reading, writing, calculating, and problem solving. Scores on each test were standardized so that the average over the national sample equaled 50 and the standard deviation equaled 10. This means that about 16 percent of all students would score below 40 and about 16 percent above 60]

GRADE AND TYPE OF TEST	White	Negro	Puerto Ricans	Indian Americans	Mexican Americans	Oriental Americans
Grade 1: Nonverbal	54.1	43.4	45.8	53.0	50.1	56.6
Verbal	53.2	45.4	44.9	47.8	46.5	51.6

– Represents zero. X Not applicable. Z Less than $500,000.

[1] Includes interest on school debt, not shown separately. [2] Includes expenditures for summer schools, adult education, community services, and community colleges and technical institutes under the jurisdiction of local boards of education. [3] Based on U.S. Bureau of the Census estimated resident population as of July 1, 1971. Source: *Current Population Reports*, series P-25, No. 468. [4] Source: U.S. Bureau of Economic Analysis, *Survey of Current Business*, August 1971. [5] Amount shown should be reduced about one-fourth to make it roughly comparable to amounts shown for other States. [6] 1971 data. [7] Estimated. [8] The following States share the same rank. Hawaii and Mass., 12; Mont. and Wash., 25. In order to have the lowest rank equal to the number of States presented, the numbers 13 and 26 are omitted.

– Represents zero. NA Not available.

[1] Number of pupils for whom subsistence was paid in lieu of transportation. [2] Totals are for States reporting this information. [3] Estimated by Office of Education. [4] Drivers salaries only. [5] Transportation program normally provides for handicapped children only; therefore computations for cost not comparable to those of the States. [6] 1965–66 school year. [7] Private school pupils included with public.

No. 199. School Retention Rates—Fifth Grade Through College Entrance: 1930–1938 to 1962–1970

[Prior to 1962, excludes Alaska and Hawaii. Rates for the 5th grade through high school graduation are based on enrollments in successive grades in successive years in public elementary and secondary schools, and are adjusted to include estimates for nonpublic schools. Rates for first-time college enrollment are based on data supplied by institutions of higher education]

Year of entrance into 5th grade	Retention per 1,000 pupils who entered 5th grade								High school graduates	Year of high school graduation	First-time college students
	5th grade	6th grade	7th grade	8th grade	9th grade	10th grade	11th grade	12th grade			
1930	1,000	943	872	824	770	652	529	463	417	1938	148

2-year institutions 1,000	150	310	407	841	1,081	1,528

NA Not available. [1] Represents institutions reporting staff and enrollment. Institutions reporting income and expenditure numbered 1,609. [2] Includes regular, administrative, extension service, correspondence, and organized research staff. For 1966, 1968, and 1970, represents total instructional staff for resident courses. Beginning 1960, represents total number of different persons (not reduced to full-time basis). 1940 and 1950 data are for academic year; thereafter, for first term ending in year stated. [3] Estimated. [4] Includes extension credit enrollment. [5] Includes nondegree-credit extension and correspondence enrollment.

Source: U.S. Office of Education, 1940 and 1950, *Biennial Survey of Education in the United States*, chapter on Statistical Summary of Education; thereafter, *Digest of Educational Statistics*, annual; *Projections of Educational Statistics to 1980–81*; and unpublished data.

No. 201. Junior Colleges—Number and Enrollment: 1950 to 1970

[Enrollment in thousands, except percent. As of fall. Prior to 1960, excludes Alaska and Hawaii. Beginning 1955, enrollment figures include resident and extension degree-credit students; earlier years exclude extension students. See *Historical Statistics, Colonial Times to 1957*, series H 325–326, for related but not comparable data]

Job Corps	–	22	22	–	43	50	–	170	161

– Represents zero. [1] Refers to number of training positions provided for by funding.
[2] Refers to new enrollees; their number per fiscal year is generally larger than the number of enrollment opportunities (slots) programmed, as a slot may be used by more than one individual during the year because of turnover or short-term training. If openings are unfilled, the number of first-time enrollments may be smaller than the number of enrollment opportunities. [3] Part-time and other training included with institutional training.
[4] Includes the Jobs-Optional Program (JOP) which began in fiscal 1971 and the MDTA (OJT) which ended in fiscal 1970 except for national contracts. Also includes Apprenticeship Outreach. [5] Work training in industry included with out of school. [6] Includes new careers. [7] Data not meaningful because an individual may be enrolled in one or more program components.

No. 220. Work and Training Programs—Selected Characteristics of Enrollees: 1970 and 1971

[For years ending June 30. Covers work and training programs administered by the U.S. Department of Labor]

Section 5

Law Enforcement, Federal Courts, and Prisons

This section presents data on crimes, arrests, Federal court cases, the legal profession, Federal and State prisoners, and use of the death penalty. The chief sources of data on these subjects are: *Uniform Crime Reports for the United States,* issued annually by the Federal Bureau of Investigation; the *Annual Report of the Director* and *Special Reports on Federal Offenders and Persons Under the Supervision of the Federal Probation System,* issued by the Administrative Office of the U.S. Courts; and *Statistical Report,* an annual review of the Federal prison system, and *National Prisoner Statistics,* issued by the Law Enforcement Assistance Administration beginning 1971, and before then by the Bureau of Prisons; and *Governmental Finances* and *Public Employment,* issued annually by the Bureau of the Census. Limited information on juvenile delinquency and the operation of juvenile courts is collected by the Social and Rehabilitation Service of the Department of Health, Education, and Welfare. Statistics on lawyers are compiled by the American Bar Foundation, Chicago, Illinois, and on law firms by the Bureau of the Census.

Other recent reports on subjects in this section are: *National Jail Census 1970,* presenting characteristics of jails and their inmates, issued by the Law Enforcement Assistance Administration; *The Challenge of Crime in a Free Society,* issued in 1967 by the President's Commission on Law Enforcement and Administration of Justice; the *Report* of the President's National Advisory Commission on Civil Disorders, issued in 1968; the various Task Force Reports of the National Commission on the Causes and Prevention of Violence, issued in 1969; *Crime Against Small Business,* issued in 1969 by the Small Business Administration; and, beginning 1969, the annual *Expenditure and Employment Data for the Criminal Justice System,* issued jointly by the Law Enforcement Assistance Administration and the Bureau of the Census.

Law enforcement and legal jurisdiction.—Law enforcement is for the most part a function of State and local officers and agencies. The U.S. Constitution reserves general police powers to the States. By act of Congress, Federal offenses include only offenses against the U.S. Government and against its employees while engaged in their official duties, and offenses which involve the crossing of State lines or an interference with interstate commerce. Consequently, criminal offenses such as murder, robbery, burglary, theft, assault, and rape are violations of State laws unless they involve Federal property or a Federal officer while engaged in his official duties, or unless they occur in Federal territories or reservations or on the high seas. Excluding the military, there are 52 separate criminal law jurisdictions in the United States: 1 in each of the 50 States, 1 in the District of Columbia, and the Federal jurisdiction. Each of these has its own criminal law and procedure and its own law enforcement agencies. Yet the system of law enforcement is quite similar among the States, although there are often substantial differences in the penalties for like offenses.

Law enforcement can be divided into three parts. The first, covering the investigation of crimes and the arrest of persons suspected of committing them, involves municipal police, county police, State police, sheriffs, constables, marshals, Federal agents, and many kinds of special officers. The second phase is the prosecution of those charged with criminal offenses to determine whether they are in fact guilty. The agencies concerned include the courts, justices of the peace, municipal, State, and Federal grand juries, and prosecuting court officers. The third division of administration is concerned with the punishment or treatment of those convicted of crime. While the courts usually determine the sentence after conviction, the penalty is enforced by the prison, reformatory, or jail, or by probation or parole officials.

Crime.—The Federal Bureau of Investigation, through its Uniform Crime Reporting Program, receives monthly and annual reports on a voluntary basis from law enforcement agencies throughout the country, currently representing 91 percent of the national population. Each month, city police, sheriffs, and State police file reports on the number of offenses that become known to them in the following seven crime categories—murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny ($50 and over in value), and auto theft. These categories are the basis of the FBI's Crime Index, a measure of the extent, fluctuation, and distribution of serious crime in the United States. Monthly reports also contain data on the number of these crimes cleared by arrest and certain other analytical data pertaining to specific crime categories. Annual reports provide summaries of data concerning persons arrested for all criminal offenses, by age, sex, and race of the offender, as well as an accounting of the number of persons formally charged and their disposition.

In summarizing and publishing crime data, the FBI does not vouch for the validity of the reports it receives, but presents the data as information useful to persons concerned with the problem of crime and criminal-law enforcement. The FBI is the only agency which collects such data nationally on a regular basis.

Courts.—Court statistics on criminal offenses and the outcome of prosecutions are incomplete for the country as a whole although data are available for many States individually. The only national compilations of such statistics were made by the Bureau of the Census from 1932 to 1945. At no time, however, were there more than 32 States involved in the reporting system.

Comprehensive information on the business of the Federal courts is collected by the Administrative Office of the U.S. Courts and is published in the *Annual Report of the Director*. The bulk of civil and criminal litigation in the country is commenced and determined in the various State courts. Only when the U.S. Constitution and acts of Congress specifically confer jurisdiction upon the Federal courts may civil litigation be heard and decided by these courts. Whether a State court or a Federal court has jurisdiction over a particular action is often difficult to determine. Generally, the Federal courts have jurisdiction over the following types of cases: Suits or proceedings by or against the United States; civil actions between private parties arising under the Constitution, laws, or treaties of the United States; civil actions between private litigants who are citizens of different States; civil cases involving admiralty, maritime, or prize jurisdiction; all matters and proceedings in bankruptcy.

The Federal courts of original jurisdiction are known as the U.S. district courts. One or more of these courts is established in every State and one each in Puerto Rico, the Virgin Islands, the Canal Zone, and Guam. Appeals from the district courts are taken to intermediate appellate courts of which there are 11, known as U.S. courts of appeals. The Supreme Court of the United States is the final and highest appellate court in the Federal system of courts.

Prisoners.—Statistics of prisoners committed to penal institutions have been collected and published for a longer period of time than have other criminal statistics. Data on prisoners in Federal and State prisons and reformatories were collected annually by the Bureau of the Census until 1950. This work was transferred to the Bureau of Prisons in 1950 and to the Law Enforcement Assistance Administration in 1971. Summary statistics covering persons received and discharged from State prisons and reformatories and from Federal prisons and persons executed in the United States under civilian authority are now published periodically by the Law Enforcement Assistance Administration in *National Prisoner Statistics*. Also, nearly every State publishes annual data either for its whole prison system or for each separate State institution.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 223. Crimes and Crime Rates, by Type: 1960 to 1971

[**In thousands, except as indicated.** Data refer to offenses known to the police. Rates are based on Bureau of the Census population data, excluding Armed Forces abroad. For definitions of crimes, see footnotes, table 224]

ITEM AND YEAR	Total	VIOLENT CRIME					PROPERTY CRIME

No. 235. Grievances in Cities Where Civil Disorders Occurred: 1967

[Based on surveys made in 20 cities where civil disorders occurred. Grievances evaluated as to significance in each city and rank and points assigned to the 4 most serious, as follows: 4 points for 1st place, 3 for 2d, 2 for 3d, and 1 for 4th. Total points for each grievance category represents number of cities in which it was ranked among the top 4 multiplied by the number of points. Thus, a 4-point grievance assigned to 2 cities amounted to 8 points. Judgments of severity based on frequency of mention of a particular grievance, relative intensity with which it was discussed, references to incidents exemplifying it, and estimates of severity]

Grievance category	Cities [1]	Points	Grievance category	Cities [1]	Points
Police practices	14	45.5	Disrespectful white attitudes	4	6.5
Unemployment, underemployment	17	42.0	Discriminatory admin. of justice	3	4.5
Inadequate housing	14	36.0	Inadequate Federal programs	1	2.5
Inadequate education	9	21.0			
Poor recreation facilities	8	21.0	Inadequate municipal services	1	2.0
Ineffective political structure and grievance mechanisms	5	14.0	Discriminatory consumer and credit practices	2	2.0

[1] Where grievances were mentioned as significant.

NA Not available. [1] Not included in State figures. [2] Total excludes, and individual State figures include transfers.

[3] Beginning 1960, excludes male misdemeanant prisoners in adult correctional institutions. Beginning 1965, excludes female misdemeanants.

[4] Beginning 1960, prisoners present include prisoners out of the institution on temporary absences.

[5] Through 1955, covers only the New Castle County workhouse; thereafter, also includes the Kent and Sussex County workhouses which were united with it to form a State correctional system.

[6] Includes all felony prisoners regardless of age.

[7] Beginning 1960, excludes misdemeanant prisoners received from court.

No. 269. Prisoners Executed Under Civil Authority: 1930 to 1971

[Includes 3 Federal executions in Alaska, 1 each in 1939, 1948, and 1950. Excludes executions by military authorities. The Army (including the Air Force) carried out 160 (148 between 1942 and 1950, 3 each in 1954, 1955, and 1957, and 1 each in 1958, 1959, and 1961). Of the total, 106 were executed for murder (including 21 involving rape), 53 for rape, and 1 for desertion. The Navy carried out no executions during the period. See also *Historical Statistics, Colonial Times to 1957*, series H 432-444]

Section 6
Geography and Environment

This section relates to area, climatologic, topographic, and hydrologic measurements of the United States. There are few official publications other than those showing area measurements (issued infrequently by the Bureau of the Census) which present area and geography statistics of national scope. However, many data are compiled for particular regions or for internal administrative purposes by such Federal agencies as the Geological Survey and the National Oceanic and Atmospheric Administration.

Area.—Area measurements in the United States began with the country as a whole and developed, as mapping progressed, to measurements for the States. The annual report of the U.S. General Land Office for 1850 contained the first reference to the areas of the States and Territories, although there was no indication of the method used in obtaining the measurements. In 1881, as part of the 1880 Census of Population, the Bureau of the Census laid the foundation for accurate and detailed area measurement in the United States. For the first time an account was given of the method and maps employed, the water bodies included, and the outer limits of the United States used as a basis for measurement. As part of the 1940 census, the Bureau published *Areas of the United States: 1940,* presenting data on the total land and water areas of the States, counties, cities, and minor civil divisions. For reports of the 1950 and 1960 censuses, adjustments in selected area figures were made for reasons of changes in boundaries, development of water reservoirs, or improvement in maps from which measurements are made. In 1964, the Bureau undertook measurement of the areas of cities, minor civil divisions, and census county divisions of the 1960 census. The results are published in *Area Measurement Reports, Series GE–20,* the series consisting of one report for each State and a U.S. summary. These reports include the same kinds of data as the 1940 report plus statistics on population for each area. Land areas as of January 1, 1970 of places with population of 2,500 and over are given in *1970 Census of Population,* vol. 1, part A.

Geography.—The Geological Survey, cooperating with State and local agencies, is responsible for topographic, geologic, and hydrologic maps; basic data on the quantity, quality, and movement of surface and ground water; and classification of Federal lands for mineral and waterpower potential. The Bureau of Land Management conducts surveys and maintains records of the public domain and other public lands.

The National Ocean Survey, a component of the National Oceanic and Atmospheric Administration, is responsible for coastal and geodetic surveys and measurement of certain physical phenomena. Its original function was to survey and chart the coast of the United States and the outlying islands and fishing banks. Currently, its primary functions are to provide charts for marine and air navigation, a basic network of geodetic control, and other basic data for engineering, scientific, commercial, industrial, and defense needs.

The surveying and charting functions of the U.S. Lake Survey, established in 1841 under the Corps of Engineers, were transferred to the National Ocean Survey in 1970. Its primary function is to furnish Great Lakes navigators with reliable charts and information on harbor facilities. It also maintains records of the fluctuating levels of the Great Lakes, the precipitation over them, and the flow through connecting rivers, and issues reports on all hydraulic problems relating to the Great Lakes.

Maps prepared by the Bureau of the Census show boundaries of various types of areas such as unincorporated places, extensions beyond the urbanized areas of large cities, county subdivisions, and business districts, among others.

Environment.—The Council on Environmental Quality, established in January 1970, is responsible for coordinating all environmental quality programs and for reviewing all other Federal programs affecting the environment. Duties of the Environmental Protection Agency, established in December 1970, include research, monitoring, standard-setting, and enforcement activities related to pollution abatement and normal control.

An air sampling network was established in 1953 by the Public Health Service. The basic sampling system of the present National Air Surveillance Network was set up in 1957. The Network's objectives are to determine the extent and nature of air pollution and to study trends in levels of atmospheric contaminants, including particulate matter and gases. Currently there are 264 sampling stations in the Network, 229 urban and 35 nonurban. The Radiation Alert Network conducts a continuous surveillance of gross beta radioactivity in air and precipitation. The network consists of 70 sampling stations and is operated by the Environmental Protection Agency in conjunction with State health departments. Its primary objective is to alert Federal, State, and local health agencies to significant increases of radioactivity in the atmosphere and deposition of radioactive particles by precipitation.

The Federal Water Quality Administration is responsible for enhancing and improving the quality of water in streams, lakes, estuaries, and coastal areas to levels which provide adequate supplies for all forseeable appropriate uses. Among its programs is assistance to State agencies in the development and administration of water pollution control programs.

Climate.—The National Oceanic and Atmospheric Administration, through the National Weather Service and the Environmental Data Service, is responsible for collecting, processing, and publishing data on climate. It maintains about 11,000 weather stations, of which nearly 3,000 produce autographic precipitation records, about 600 take automatic or hourly readings of a series of weather elements, and the remainder record one observation a day.

Nearly all weather stations have been moved several times in their history. Consequently, the National Weather Service uses "normal" values of temperature and precipitation for comparative purposes rather than long-term means which are derived from records taken at the different locations the stations may have had over the years.

Normal values of temperature and precipitation are based on records for the 30-year period 1931 to 1960. For stations having records for the entire 30 years from the same instrument site, monthly precipitation and temperature normals are the means of the monthly values for the 30 years; for temperature, the normal maximum and normal minimum values were used to obtain monthly normals. The annual normal temperature is obtained by dividing by 2 the sum of the annual normal maximum value and the annual normal minimum value of temperature.

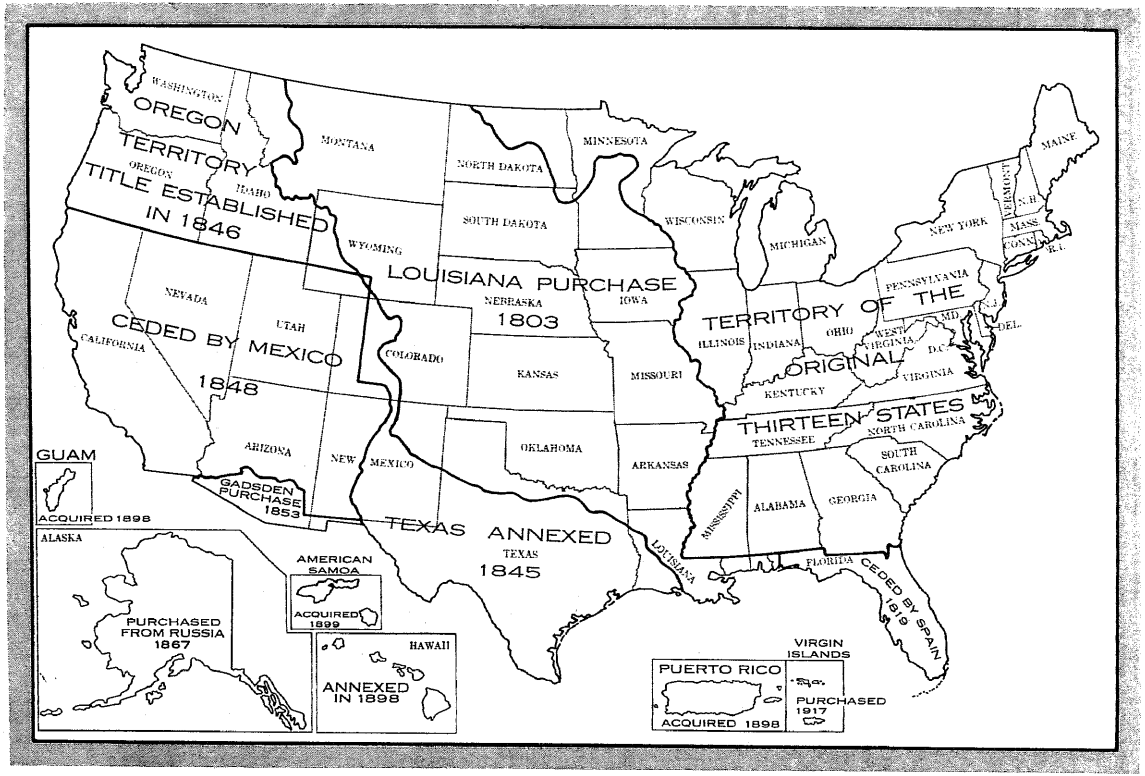
For stations that did not have continuous records from the same instrument site for the entire 30 years, 1931 to 1960, the means have been adjusted to the record at the present site. In these adjustments, a "difference factor" was used for temperature and a "ratio factor" for precipitation. These factors were determined by parallel comparison, either between records at the actual station sites or through a second station that had a continuous record to compare against both sites for obtaining the resultant adjustment factors. Normals were thereafter obtained as outlined above.

This system of normals has three characteristics: (1) The 30-year period (1931 to 1960) adopted for the computations is consistent with the term of years accepted by the World Meteorological Organization for climatic normals; (2) where the station and exposure for records in a given locality have been changed, the whole record has been carefully studied and adjusted to the latest source of records and reports; (3) the normals for maximum and minimum temperatures are separately tabulated.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

FIG. XII. TERRITORIAL EXPANSION OF THE UNITED STATES AND ACQUISITIONS OF OTHER PRINCIPAL AREAS

[See table 271]



Source: U.S. Bureau of the Census.

No. 271. Territorial Expansion of the United States and Acquisitions of Other Areas

[Boundaries of all territories listed under "United States" were indefinite, at least in part, at time of acquisition. Area figures shown here represent precise determinations of specific territories which have been marked upon maps, based upon interpretations of the several treaties of cession, which are necessarily debatable. These determinations were made by a committee consisting of representatives of various governmental agencies in 1912. Subsequently these figures were adjusted to bring them into agreement with remeasurements made in 1960. See also *Historical Statistics, Colonial Times to 1957*, series J 1–2]

ACCESSION	Date	Gross area (land and water)	ACCESSION	Date	Gross area (land and water)
		Sq. mi.			*Sq. mi.*
Total	1970	3,628,066	Other:

X Not applicable.

[1] Includes that part of drainage basin of Red River of the North, south of 49th parallel, sometimes considered part of Louisiana Purchase.

[2] Not included in total. Ceded by Spain in 1898, the Philippines constituted a territorial possession of the United States from 1898 to 1946. Granted independence as of July 4, 1946, they then became the Republic of the Philippines.

[3] Ceded by Spain in 1898, ratified in 1899, and became Commonwealth of Puerto Rico by Act of Congress on July 25, 1952. See table 5.

[4] Acquired 1898; ratified 1899.

[5] Acquired 1899; ratified 1900.

[6] Under jurisdiction of United States in accordance with treaty of Nov. 18, 1903, with Republic of Panama.

[7] Included in total for 1970. Leased (1914) from Republic of Nicaragua for 99 years but returned April 1971.

[8] Under trusteeship. See table 5, footnotes 7 and 10.

[9] Comprises following islands with gross areas as indicated: Midway (2), Wake (3), Palmyra (4), Canton and Enderbury (combined area, 27), Swan (1), Navassa (2), Baker, Howland, and Jarvis (combined area, 3), Johnston and Sand (combined area, less than 0.5), Kingman Reef, Quita Sueño Bank, Roncador Cay, and Serrano Bank (each less than 0.5), and other islands for which area figures are not available.

Rhode Island	40	384			
			Arctic coast, Alaska	1,060	2,521

– Represents zero.

[1] Figures are lengths of general outline of seacoast. Measurements were made with a unit measure of 30 minutes of latitude on charts as near the scale of 1: 1,200,000 as possible. Coastline of sounds and bays is included to a point where they narrow to width of unit measure, and includes the distance across at such point.

[2] Figures obtained in 1939–1940 with a recording instrument on the largest-scale charts and maps then available. Shoreline of outer coast, offshore islands, sounds, bays, rivers, and creeks is included to the head of tidewater or to a point where tidal waters narrow to a width of 100 feet.

[1] Dry land and land temporarily or partially covered by water, as marshland, swamps, etc.; streams and canals under one-eighth statute mile wide; and lakes, reservoirs, and ponds under 40 acres of area.

[2] Permanent inland water surface, such as lakes, reservoirs, and ponds having 40 acres or more of area; streams, sloughs, estuaries, and canals one-eighth of a statute mile or more in width; deeply indented embayments and sounds, and other coastal waters behind or sheltered by headlands or islands separated by less than 1 nautical mile of water; and islands having less than 40 acres of area. Excludes areas of oceans, bays, sounds, etc., lying within U.S. jurisdiction but not defined as inland water.

[3] Year of ratification of Constitution; one of the original 13 States.

[4] See table 5, footnote 6. [5] See table 5, footnotes 7 and 10.

No. 278. Federal Funds for Pollution Control and Abatement—Summary: 1970 to 1972

[**In millions of dollars.** For years ending June 30. Obligations refer to liabilities, contracts, and other commitments entered into requiring the payment of money by the Government. Outlays refer to the issuance of checks or disbursements of cash by the Government to liquidate obligations. (Outlays during any fiscal year may be payments of obligations incurred in prior years or in the same year.) For complete definitions, see *The Budget of the United States Government, 1973*, part 6, The Budget System and Concepts, pp. 482-492]

Medium or pollutant	Obligations			Agency	Outlays		
	1970	1971	1972 est.		1970	1971	1972 est.

[1] Total take, including delivery losses but not including reservoir evaporation.
[2] Rural farm and nonfarm household and garden use, and water for farm stock and dairies.
[3] For 1900–1960, includes manufacturing and mineral industries, rural commercial industries, air-conditioning, resorts, hotels, motels, military and other State and Federal agencies, and other miscellaneous uses; thereafter, includes manufacturing, mining and mineral processing, ordnance, and construction.

Source: U.S. Bureau of Domestic Commerce, 1900–1960 based principally on committee prints, *Water Resources Activities in the United States*, for the Senate Committee on National Water Resources, U.S. Senate, 1960; thereafter, based on the first *National Assessment of the Water Resources Council*, 1968.

NA Not available.

[1] For definition, see headnote, table 290. The national primary standard for suspended particulate matter is 75 micrograms per cubic meter of air (ug/m^3), annual geometric mean. The national secondary standard is 60 micrograms per cubic meter of air (ug/m^3), annual geometric mean. (*Federal Register*, vol. 36, No. 84, April 30, 1971.)

[2] Particulate matter soluble in benzene.

[3] At Continuous Air Monitoring Project (CAMP) stations.

Section 7

Public Lands, Parks, Recreation, and Travel

Statistics in this section relate to the Federal public domain and other federally owned and leased real property, Indian lands, national parks and forests, State and municipal parks, domestic and foreign travel, and other forms of recreation.

Data on public lands are published primarily by the Department of the Interior, Bureau of Land Management, in *Public Land Statistics*. Data on federally owned land and real property are collected by the General Services Administration and presented in its annual *Inventory Report on Real Property Owned by the United States Throughout the World*. The Economic Research Service of the Department of Agriculture also issues statistics on land use and land ownership.

The Department of the Interior issues various reports relating to recreation, as follows: The National Park Service publishes information on national parks in its monthly report, *Public Use of the National Parks;* its semiannual report, *Areas Administered by the National Park Service*, which gives acreage; and its *National Parks and Landmarks*, which gives a brief description of each area and also covers sites eligible for registry as natural or national historic landmarks and nonfederally owned national historic sites. The Bureau of Outdoor Recreation administers a land and water conservation fund which provides funds to States, counties, and cities for outdoor recreation purposes and to designated Federal agencies for acquisition of new recreational lands and waters. It also provides statistics on the fund and on other aspects of outdoor recreation. The Fish and Wildlife Service complies and releases data on sport fishing and hunting and on number and acreage of national wildlife refuges and fish hatcheries. Data for State and municipal parks and playgrounds, as well as for other outdoor recreational activities, are compiled by the National Recreation and Park Association, Washington, D.C., which issues its *Recreation and Park Yearbook* at 5-year intervals. The Department of Agriculture's Forest Service, in its *Annual Report of the Chief*, issues data on recreational uses of the national forests.

Figures on expenditures for recreation and on domestic and foreign travel, compiled by the Department of Commerce's Bureau of Economic Analysis (formerly Office of Business Economics), appear periodically in the monthly *Survey of Current Business*. Domestic travel data by volume and type were collected by the Bureau of the Census in its 1963 Census of Transportation and published in the *Passenger Transportation Survey*, vol. I, *National Travel and Home-to-Work Travel*. Comparable data (excluding home-to-work travel) from the 1967 Census of Transportation appear in *National Travel Survey*, vol. I. Foreign travel data based on analysis of passports (see table 336, p. 210 of this book) are published in the annual *Summary of Passport Statistics*, issued by the Department of State's Passport Office.

Few statistical series are available on activities of a cultural nature—art, music, theater, etc.—and those are generally based on infrequent and incomplete studies by private agencies. The available series in this field are presented in tables 332 and 333.

Other sources of data relating to individual sports and recreational activities appear in footnotes to table 331 and in the Guide to Sources in Appendix III of this book.

Public-domain and acquired lands.—The U.S. Government acquired sovereignty over its present land area through a series of international agreements and treaties. At the time of acquisition of sovereignty over the areas involved (now 2,271 million acres) title to about 463 million acres rested in individual States and their political subdivisions or in private owners, and was not relinquished to the U.S. Government.

Title to the remaining land area passed to the U.S. Government. This area, except for lands in the District of Columbia, is known as the original public domain.

Public-domain lands or public lands are those federally owned lands to which the public land laws apply. In general, these lands include that portion of the original public domain not disposed of under the public land laws, and certain other lands declared by the Congress specifically to be public lands. In addition to the original public domain, the U.S. Government has from time to time acquired, by purchase, condemnation, and gift, tracts of land needed for public purposes. Such lands are referred to as acquired lands.

Indian lands.—Indian lands are the private landholdings of individual Indians or Indian tribes that are subject to special restrictive provisions of Federal law administered by the Bureau of Indian Affairs. They have been set aside for Indian use by treaties, congressional acts, and executive orders. Although most of these lands are in reservations for specific tribes, there are groups of scattered off-reservation allotments in individual ownership and other small tracts of land occupied by Indian groups. Recreational facilities are increasingly being located and operated by Indians on Indian reservations (see table 315).

Entries, selections, patents, and certifications.—The data on entries, selections, patents, and certifications refer to transactions which involve the disposal, under the public land laws (including the homestead laws), of Federal public lands to non-Federal owners. In general, original entries and selections are applications to secure title to public lands which have been accepted as properly filed. Some types of applications, however, are not reported until the final certificate is issued. Applications become final entries (perfected entries) upon issuance of a final certificate to the applicant after he has complied fully with the requirements of the laws relating to his application. A final certificate passes equitable title to the land to the applicant. Patents are instruments which pass legal title to the land to the applicant. Certifications are issued in lieu of patents in connection with certain State selections.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 306. Area and Acquisition of the Public Domain: 1781 to 1971

[**In thousands of acres.** Areas of acquisitions are as computed in 1912; hence do not agree with figures in square miles shown in table 271, which includes later adjustments and reflects subsequent remeasurement. Excludes area outside the United States amounting to 527,596 acres in 1971. See also *Historical Statistics, Colonial Times to 1957*, series J 3-9]

1961	767,766	1971	760,204	1867, Alaska Purchase	375,296	365,482	9,814

[1] Comprises original public domain plus acquired lands. Estimated from imperfect data available for indicated years. Prior to 1959, excludes Alaska, and 1960, Hawaii. Source: beginning 1955: General Services Administration, *Inventory Report on Real Property Owned by the United States Throughout the World*, annual.

[2] Data for Louisiana Purchase exclude areas eliminated by Treaty of 1819 with Spain. Such areas are included in figures for Mexican Cession.

[3] Includes 33,920 acres subsequently recognized as part of State of Texas which is not a public-domain State.

[4] Represents drainage basin of Red River of the North, south of 49th parallel. Authorities differ as to method and date of its acquisition. Some hold it as part of Louisiana Purchase; others, as acquired from Great Britain.

Source: Except as noted, U.S. Dept. of the Interior. Estimated area, Bureau of Land Management; all other data' Office of the Secretary, *Areas of Acquisitions to the Territory of the U.S.*, 1922.

No. 314. Public Lands—Homestead Entries, 1941 to 1971, and Vacant Lands, 1940 to 1971, by States

[Homestead entries for years ending June 30; vacant lands as of June 30. Excludes States with less than 500 acres in years specified. See text, p. 191. Vacant public lands are those which are unappropriated and unreserved. The former represent lands not covered by an entry; the latter, lands not reserved for some public purpose, i.e., available for entry or selection under appropriate laws. Data cover vacant public lands outside Alaska withdrawn for classification in furtherance of Taylor Grazing Act and for conservation and development of natural resources. See *Historical Statistics, Colonial Times to 1957*, series J 10, for vacant lands excluding Alaska and J 17-18 for homestead entries]

[1] Original entries, except as indicated. [2] Includes acreage of public lands within grazing districts, as follows (in thousands): 1940, 131,926; 1950, 134,875; 1960, 141,645; 1970, 132,669; 1971, 132,371.

[3] Includes 1,000 acres for Missouri. [4] Excludes Alaska; see footnote 5. [5] Effective Jan. 17, 1969 all unreserved lands in Alaska were withdrawn from all forms of appropriations or disposition under the Public Land Laws; land and resources were reserved until Dec. 31, 1970, for determination and protection of rights of native Aleuts, Eskimos, and Indians of Alaska. [6] For States no longer having local offices, entries, if any, included with Bureau of Land Management. [7] Excludes commuted homesteads and ceded Indian lands.

– Represents zero. NA Not available. X Not applicable.

[1] Excludes transfers and allocations from appropriations to other agencies (e.g., Land and Water Conservation Fund, etc.). [2] Excludes salaries and wages.

[3] Represents receipts deposited in Treasury; not available for expenditure by National Park Service.

[4] For calendar year; 1950 and 1955 data not adjusted for comparability with counting system as modified in 1960. Prior to 1965, excludes visits to White House. [5] Excludes National Capital Parks.

[6] Combined data for North Cascades National Park and two adjacent National Recreation Areas are included in National Parks total.

[7] Excludes "other" overnight stays. [8] Acreage as of Jan. 1 following year stated.

[9] Represents U.S. lands alienated by exchange of U.S. and private lands.

Other [6]	13	33	84	215	226	235	273	394	462

[1] Preliminary.
[2] Excludes the following: Travel to Canada and Mexico; travel between conterminous United States and Alaska, Hawaii, Puerto Rico, and Virgin Islands; cruise travelers; military personnel and other Government employees and their dependents stationed abroad, and U.S. citizens residing abroad. [3] Includes shore expenditures of cruise travelers; excludes travel expenditures of military personnel and other Government employees and their dependents stationed abroad, and U.S. citizens residing abroad.
[4] Excludes passenger fares of emigrant aliens. [5] Beginning 1960, new series; not comparable with earlier years.
[6] Beginning 1965, Mediterranean Asia and Africa, and Eastern Europe included with "Other."

No. 338. Travel to Europe and the Mediterranean Area—Travelers and Average Expenditure: 1950 to 1971

[**Travelers in thousands.** Covers residents of United States and Puerto Rico, except as noted]

ITEM	1950	1955	1960	1965	1967	1968	1969	1970	1971

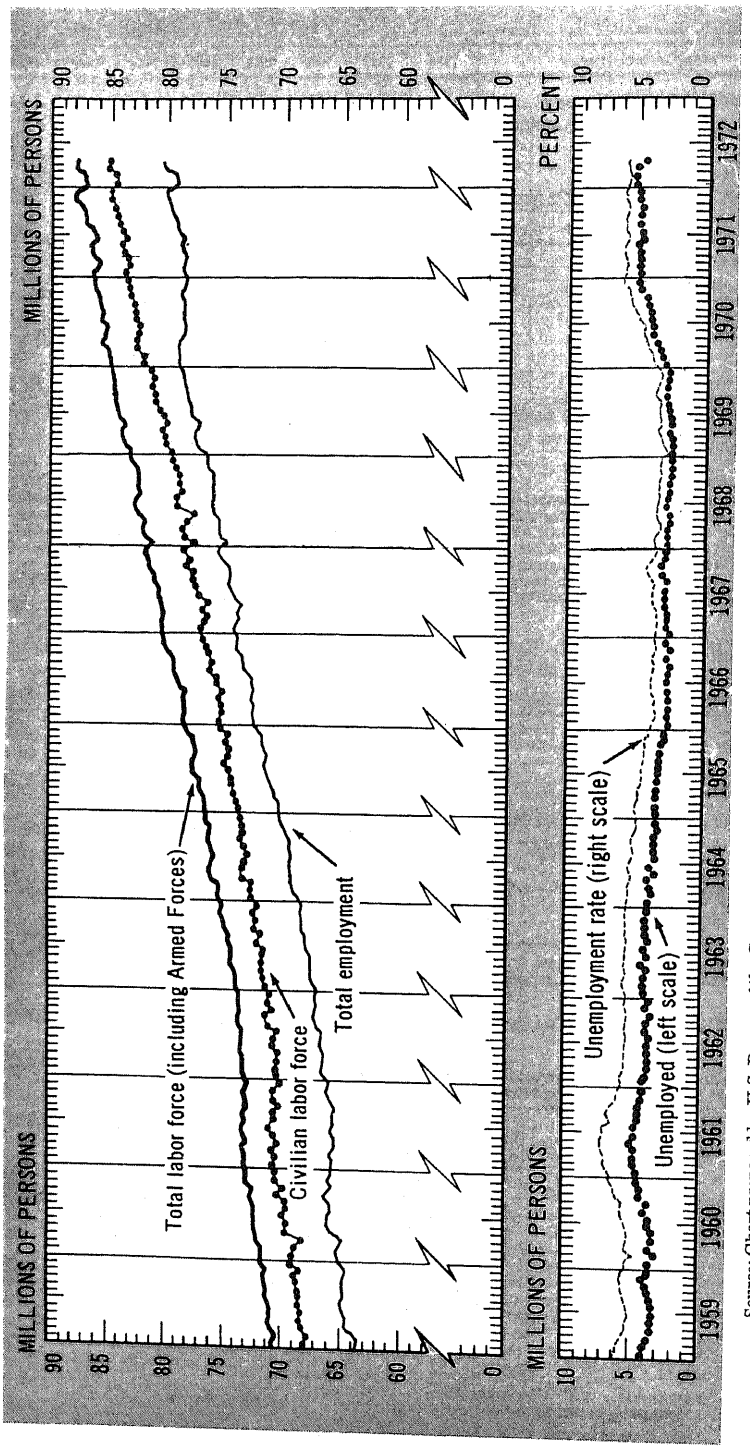
FIG. XV. TRENDS IN THE LABOR FORCE: 1959 TO 1972

[See table 340]



Source: Chart prepared by U.S. Bureau of the Census. Data for January–June 1959 from U.S. Bureau of the Census; thereafter, U.S. Bureau of Labor Statistics.

Section 8

Labor Force, Employment, and Earnings

This section presents statistics dealing with the characteristics of the economically active segment of the population, the labor force; its distribution by occupation and industry affiliation; and the supply of, demand for, and conditions of labor.

The chief sources of these data are the Decennial Census of Population conducted by the Bureau of the Census (see text, p. 1); the monthly *Employment and Earnings* and *Monthly Labor Review*, issued by the Bureau of Labor Statistics; and *Farm Labor*, issued monthly by the Statistical Reporting Service, Department of Agriculture.

Types of data.—Statistics on the labor force, employment status, and jobs shown in this section are derived from two different bodies of data. Each measures a different aspect of employment. Data based on household interviews conducted by the Bureau of the Census in the Census of Population and the Current Population Survey (see below) present information on employment status obtained from workers or members of their households. Each employed worker is counted only once, even though he may have held more than one job during a given period.

Data based on establishment reports are used in industry surveys of the Bureau of Labor Statistics and in surveys by the Department of Agriculture's Statistical Reporting Service. Workers are counted each time they appear on a payroll during the same period. While population characteristics are obtained only from the household survey, detailed data on wages, hours worked, and labor turnover are more readily obtained from establishment reports.

The decennial Census of Population provides detailed data for the United States and for each State, standard metropolitan statistical area, county, city, and other area. The data include personal characteristics (sex, age, race, etc.) of persons employed and unemployed, the numbers reported in each occupation and industry, and other items. Monthly data from the labor force survey are published by the Bureau of Labor Statistics in *Employment and Earnings* and related publications. Data presented include national totals, by sex, race, and age, of the number of persons in the civilian labor force; the number employed in nonagricultural industries and in agriculture along with data on hours of work and broad occupation groups; the number unemployed and duration of unemployment; and the number of nonworkers, their work experience, and job-seeking intentions.

Employment and Earnings also presents monthly data from establishment surveys on nonagricultural employment, labor turnover, and hours worked. These data are shown for broad groupings in the Bureau of Labor Statistics *Monthly Labor Review*, which also presents statistics on wage rates, industrial relations, and output per man-hour. Certain of these data are shown for States and most standard metropolitan statistical areas (see text, p. 2). Historical statistics, in geographic detail, are shown in the Bureau of Labor Statistics Bulletin No. 1370–8, *Employment and Earnings, States and Areas*, 1939–70.

Current Population Survey.—Monthly data on the labor force are collected and compiled for the Bureau of Labor Statistics as a part of the Current Population Survey, a nationwide sample survey conducted by the Bureau of the Census. (See text, p. 1.) Because the data are derived from a probability sample, they may differ from the figures that would have been obtained if it were possible to take a complete census

using the same questionnaire and procedures. Thus, the data are subject to some degree of sampling error which must be taken into account in evaluating changes in the data. According to current computations, the relative sampling error for summary estimates such as civilian labor force, total employment, and nonagricultural employment is about 0.3 percent; for agricultural employment and for unemployment, it is roughly 2 to 4 percent. The chances are about 2 out of 3 that an estimate from the sample would differ from a complete census by less than the percentage estimated above for the particular item. The chances are about 19 out of 20 that the difference would be less than twice the specified percentage and about 99 out of 100 that it would be less than 2½ times the percentage. This sampling variability is illustrative of the variability of data based on the Current Population Survey. For further details, see the explanatory notes in the Bureau of Labor Statistics *Employment and Earnings.*

Statistics obtained from the Current Population Survey may differ from decennial census data because of sampling variability as well as differences in the training and experience of enumerators and in the enumeration procedures. For further information, see *U.S. Census of Population: 1960*, Vol. I.

Labor force.—Effective in January 1967, the lower limit for official statistics on the labor force was raised from 14 to 16 years of age. Data on employment status, collected in the Current Population Survey, relate to activity or status during the calendar week which includes the 12th of the month. Employed persons comprise all persons who, during that week, did any work for pay or profit (a minimum of an hour's work), worked 15 hours or more as unpaid workers in a family enterprise, or did not work but had jobs or businesses from which they were temporarily absent for noneconomic reasons (illness, vacation, strikes, etc.). Unemployed persons comprise all persons not working during the survey week who had made specific efforts to find a job in the previous 4 weeks (such as applying directly to an employer, or to a public employment service, or checking with friends and relatives) and who were available for work. Persons on layoff from a job or waiting to report to a new wage or salary job within 30 days are not classified as unemployed. Those persons who are neither employed nor unemployed are "not in the labor force." A detailed discussion of the survey and its methodology appears in *Concepts and Methods Used in Manpower Statistics From the Current Population Survey* (Report No. 313), available on request from the Bureau of Labor Statistics.

Employment and earnings.—The monthly estimates of nonagricultural employment prepared by the Bureau of Labor Statistics are based on voluntary reports from establishments which, in March 1970, employed 12 million manufacturing workers (61 percent of total manufacturing employment at that time), 10 million workers in nonmanufacturing industries except government (27 percent of the total in nonmanufacturing industries), and 8 million Federal, State, and local government employees (64 percent of the total in government). These reports are supplemented by data from other government agencies and adjusted at intervals to data from tabulations of reports under government social insurance programs. The monthly estimates exclude persons not normally on establishment payrolls, such as proprietors of unincorporated businesses, self-employed persons, domestic servants, unpaid family workers, agricultural workers, and persons in the Armed Forces. The employment data are for all employees, whether full- or part-time, who received pay for any part of the period reported.

Estimates are available on a continuous basis from 1919 for total nonfarm payroll employment and the 8 major industry divisions. Estimates for other periods are available for several hundred selected industries. Both total employment and production-worker estimates are published for 21 major manufacturing groups, 277 manufacturing subgroups, and 11 mining industries. Also, estimates for nonsuper-

visory workers are published at broad levels and in varying detail for wholesale and retail trade, transportation, public utilities, finance, insurance, real estate, and services; estimates for construction workers are published for the contract construction industries; and 402 series are published for the employment of women.

Average weekly hours and average weekly and hourly earnings are available for over 360 series covering production and related workers in manufacturing and mining, construction workers in contract construction, and nonsupervisory workers in other selected nonmanufacturing industries. The earnings data are gross (before payroll deductions) and include overtime premiums; they exclude irregular bonuses and value of payments in kind. Hours are those for which pay was received.

Agricultural employment estimates and wage rates, obtained by means of monthly mail returns, have been issued since 1909 by the Department of Agriculture and appear monthly in *Farm Labor*. Annual estimates of persons 14 years old and over who did farm work for cash wages at any time during the year are published in *The Hired Farm Working Force*. Also reported are days employed, earnings from farm and nonfarm work, personal characteristics of hired farm workers and other pertinent information. These estimates are derived from a survey conducted once a year under contract by the Bureau of the Census for the Economic Research Service.

Output per man-hour.—The Bureau of Labor Statistics prepares and publishes annual measures of output per man-hour according to two broad concepts. The first, physical output per man-hour, deals with the relationship between production in physical units and man-hours used in production; the second, net output per man-hour, with the relationship between value added (at fixed prices) and man-hours. Both indexes measure the relationship between production and one factor of input—labor time. They do not measure the specific contribution of labor or capital nor do they measure increased efficiency resulting from technological changes or changes in production procedures.

The indexes of output per man-hour for selected industries are based on the physical output per man-hour concept; measurements relating to the total economy and various sectors are based on the net output per man-hour concept. These indexes are influenced by the divergent movements of various industries which make up the total, as well as by changes in the relative importance of these components.

Labor turnover.—Labor turnover rates are published monthly in the *Monthly Labor Review* and in *Employment and Earnings* for over 220 industries on the basis of reports from cooperating establishments employing over 11 million workers (about 57 percent of the universe surveyed). Labor turnover data are available on a monthly basis from January 1930 for manufacturing as a whole. Labor turnover rates for individual industries and industry groups are available on a continuous basis only from January 1958.

Work stoppages.—Statistics on strikes are compiled by the Bureau of Labor Statistics and include stoppages, workers involved, and man-days of idleness. Basic data are obtained from the employers and unions involved in strikes. Knowledge of strikes comes from a variety of sources, including newspapers, State employment services, and State and Federal mediation services. The Bureau prepares annual reports published in the *Monthly Labor Review* and, later, in bulletin form, giving total figures for each month of the year and analyses of strikes by industry, State, city, causes, and other classifications.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 340. Employment Status of the Noninstitutional Population, by Sex and Race: 1950 to 1972

[**In thousands of persons 16 years old and over, except as noted.** Prior to 1960, excludes Alaska and Hawaii. Annual figures are averages of monthly figures. See *Historical Statistics, Colonial Times to 1957*, series D 1–14 and D 20, for similar but not exactly comparable data]

No. 341. Labor Force and Participation Rates, 1960 to 1971, and Projections to 1985, by Race, Sex, and Age

[**In thousands of persons 16 years old and over, except percent.** Annual averages. Rate is based on total population as of July 1 and represents the proportion of each age group in the labor force (employed, unemployed, or in the Armed Forces). Projections based on trends in labor force participation rates between 1947 and 1968]

No. 356. Unemployment in Urban Neighborhoods, by Race: 1970 and 1971

[In thousands of persons 16 years old and over, except as indicated. Relates to standard metropolitan statistical areas (SMSA's) with 250,000 inhabitants or more in 1960. Neighborhood classification based on a ranking of census tracts according to 1960 data on income, education, skills, housing, and proportion of one-parent families. The poorest one-fifth of these tracts are considered low-income neighborhoods]

Z Less than 500. [1] Mining combined with Services. [2] Mining combined with Contract construction. [3] Federal employment in the Maryland and Virginia sectors of the Washington, D.C., Standard Metropolitan Statistical Area is included in District of Columbia.

Source: U.S. Bureau of Labor Statistics, *Employment and Earnings*, monthly. Compiled from data supplied by cooperating State agencies.

No. 364. Nonagricultural Industries—Number of Employees, 1960 to 1971, and Number and Earnings of Production Workers, 1965, 1970, and 1971

[Covers all full- and part-time employees who worked during, or received pay for, any part of the pay period including the 12th of the month. For mining and manufacturing, data refer to production and related workers; for contract construction industries, to employees engaged in actual construction work; and for other industries, to nonsupervisory employees and working supervisors. See also headnote, table 361. "N.e.c." means not elsewhere classified. See *Historical Statistics, Colonial Times to 1957*, series D 48-56, D 626-641, and D 669-684, for related but not comparable data]

No. 368. Weekly Earnings of Full-Time Wage and Salary Workers in Current and 1967 Dollars: 1967 to 1971

[Figures are for May and represent medians of usual weekly earnings. For definition of median, see preface]

Characteristics	Current dollars				1967 dollars			
	1967	1969	1970	1971	1967	1969	1970	1971
All workers	$109	$121	$130	$138	$110	$111	$112	$114
Male	125	142	151	162	126	130	131	134
16–24 years old	97	108	112	114	98	99	97	94
25 years and over	131	148	160	172	132	136	138	142
Female	78	86	94	100	78	79	81	83
16–24 years old	74	82	88	91	74	75	76	75
25 years and over	79	88	96	103	79	81	83	85
White	113	125	134	142	114	115	116	118
Male	130	146	157	168	131	134	136	139
Female	79	88	95	102	79	81	82	84
Negro and other races	79	90	99	107	79	83	86	89
Male	90	104	113	123	91	95	98	102
Female	63	73	81	87	63	67	70	72
Occupation:								
Professional and technical workers	145	167	181	189	146	153	156	156
Managers, officials, and proprietors	164	178	190	[1] 200+	165	163	164	[1] 165+
Clerical workers	91	102	109	115	92	94	94	95
Saleworkers	113	123	133	141	114	113	115	117
Craftsmen and foremen	131	146	157	167	132	134	136	138
Operatives	97	109	115	120	98	100	99	99
Nonfarm laborers	93	106	110	117	94	97	95	97
Private household workers	32	34	38	38	32	31	33	31
Other service workers	75	82	87	96	75	75	75	79
Farmworkers	58	66	71	74	58	61	61	61

[1] Exact medians could not be computed, either in current or constant dollars, where more than 50 percent of a group's workers earned more than $200 a week.

No. 369. Indexes of Output per Man-Hour, Hourly Compensation, and Unit Labor Costs in the Private Economy: 1950 to 1971

[1967=100. Prior to 1960, excludes Alaska and Hawaii]

ITEM	1950	1955	1960	1965	1969	1970	1971
Output [1], total private	52.5	64.3	71.9	91.8	107.5	106.8	109.9
Manufacturing	51.3	65.0	68.6	92.7	109.9	105.7	105.4
Other nonfarm industries	51.4	62.5	72.5	90.9	106.7	107.8	112.4
Man-hours [2], total private	87.9	92.1	92.0	97.4	104.0	102.4	101.7
Manufacturing	79.8	88.2	85.8	94.3	103.6	98.1	94.4
Other nonfarm industries	78.6	85.2	89.9	97.2	105.6	106.0	106.7
Output per man-hour, total private	59.7	69.9	78.2	94.2	103.4	104.3	108.1
Manufacturing	64.4	73.7	79.9	98.3	106.1	107.7	111.6
Other nonfarm industries	65.3	73.4	80.6	93.5	101.1	101.7	105.3
Compensation per man-hour [3], total private	42.8	55.9	71.7	88.4	115.6	124.0	132.6
Manufacturing	44.7	60.0	76.6	91.2	114.1	121.6	129.1
Other nonfarm industries	45.7	57.6	72.6	88.3	115.2	123.9	133.3
Unit labor cost, total private	71.7	80.1	91.8	93.8	111.9	118.9	122.7
Manufacturing	69.5	81.4	95.9	92.8	107.5	112.9	115.7
Other nonfarm industries	69.9	78.4	90.0	94.4	114.0	121.9	126.5

[1] Refers to gross national product in 1958 prices. [2] Hours of all persons in private industry engaged in production; includes man-hours of proprietors and unpaid family workers. Based primarily on establishment data. [3] Wages and salaries of employees plus employers' contribution for social insurance and private benefit plans. Also includes an estimate of wages, salaries, and supplemental payments for the self-employed.

[1] Average hourly earnings are on a "gross" basis reflecting not only changes in basic hourly and incentive wage rates but also such variable factors as premium pay for overtime and late-shift work and changes in output of workers paid on an incentive plan. [2] Reflects purchasing power of money earnings. [3] Based on employee compensation data from U.S. Bureau of Economic Analysis, and man-hours data from U.S. Bureau of Labor Statistics. Includes employer contributions to social insurance and to private welfare and pension plans.

No. 375. Indexes of Union Wage Rates in Selected Trades: 1945 to 1971

[1967=100. Prior to 1965, excludes Alaska. As of July 1, except as noted. Indexes of rates reflect changes in minimum hourly wage scales. Year-to-year changes in union scales are based on comparable quotations for each individual trade weighted by membership for current year. See *Historical Statistics, Colonial Times to 1957*, series D 642–653, for printing on 1948–49 base and other trades on 1947–49 base]

TRADE	1945	1950	1955	1960	1965	1966	1968	1969	1970	1971

No. 378. Percent Increase in Average Pay for Selected Occupations and in Consumer Prices: 5-Year Period Ending in 1970–71

[Data based on period January 1966–January 1971, except as noted]

Item	Total	Average annual rate	Item	Total	Average annual rate
Private industry:			Government:		
Professional, admin., tech., and clerical employees, average salaries: [1]			Police patrolmen and firefighters: [3]		
Clerical and beginning technicians	30.7	5.5	Minimum annual salary scales	44.2	7.6
Entry and development professional levels, advanced technician levels, supervisors of nonprofessional levels	33.4	5.9	Police patrolmen	44.3	7.6
Fully experienced professional working levels, supr. of prof. levels and program admin. levels	30.4	5.5	Firefighters	43.9	7.6
Production and nonsupervisory workers in nonagricultural industries:			Maximum annual salary scales	44.6	7.7
Average hourly earnings adjusted for overtime [2] (in manufacturing only) and interindustry employment shifts	34.3	6.1	Police patrolmen	44.4	7.6
			Firefighters	44.6	7.7
			Public school teachers, average annual salaries [4]	42.9	7.4
			Federal classified employees: [5]		
			Basic annual salary scales	35.1	6.2
			Average annual salary rates	36.2	6.4
			Average annual salaries	43.3	7.5
			Consumer prices:		
			Consumer price index	24.9	4.5

[1] Covers five 12-month periods between February-March 1966 and June 1971. For further details, see *National Survey of Professional, Administrative, Technical, and Clerical Pay*, Bulletin No.1742.

[2] Derived from gross hourly earnings by assuming that overtime paid for at rate of time and one-half.

[3] Covers cities with 1960 population of 100,000 or more. [4] Relates to 5 school years ending with 1970–71.

[5] Covers July 1965–1970. Basic salary scales reflect only statutory changes in salaries. Average salary rates show statutory changes and the effect of changes in the proportion of workers at each step within the salary ranges for individual grades. Average salaries measure the effect not only of statutory changes in basic pay scales and in-grade salary increases, but also changes in the proportion of workers in the various grades.

No. 380. Percent Increase in Average Salaries for Selected Occupations in Private Industry: 1961 to 1971

[Excludes Alaska and Hawaii. Prior to 1965, includes only standard metropolitan statistical areas; for definition see text, p. 2. 1966 and subsequent years cover establishments employing 50 workers or more in the finance, insurance, and real estate division; 100 workers or more in transportation; communications; electric, gas, and sanitary services; wholesale trade; engineering and architectural services; and research, development, and testing laboratories operated on a commercial basis; and 250 workers or more in the manufacturing and retail trade divisions. Prior to 1966, covers establishments employing 250 workers or more in all above industries. Based on sample and subject to sampling variability]

No. 382. Percent of Workers Employed in Establishments Having Formal Provisions for Selected Supplementary Wage Benefits, 229 SMSA's: 1970

[Surveys relate geographically to the 229 standard metropolitan statistical are as in the United States, as established by the U.S. Office of Management and Budget through January 1968. Data for half of the areas surveyed relate to late 1969 and early 1970; for the remainder, to late 1968 and early 1969. Data obtained from sample of establishments which employ 50 workers or more, except in 12 of the largest areas where the minimum size was 100 employees for manufacturing, public utilities, and retail trade; see source. Excludes data for government institutions, and construction and extractive industries. Excludes administrative, executive, and professional employees]

No. 383. Injury-Frequency Rates, 1960 to 1970, and Severity Measures, 1969 and 1970, for Selected Industries

[Frequency rate is the number of disabling work injuries, and severity rate is the number of days disability, per 1 million employee-hours worked. Data are from the American National Standard Method of Recording and Measuring Work Injury Experience. Data are on basis of Standard Industrial Classification. See also *Historical Statistics, Colonial Times to 1957*, series D 785, for injury-frequency rates for manufacturing on old basis]

No. 391. Labor Unions—Financial Data, by Type of Union: 1969 and 1970

[**Money figures in millions of dollars.** For fiscal years ending during calendar year. Data from annual financial reports of labor organizations filed with Department of Labor under provisions of Labor-Management Reporting and Disclosure Act of 1959 which covers substantially all labor unions in the United States, except those not engaged in an industry affecting commerce, those composed entirely of public employees, and those which are State or local central bodies. Classification by type is based mainly on union's self-classification in reports filed with Department of Labor]

Other disbursements	479.4	88.4	271.9	638.5	97.3	283.7

[1] Financial data adjusted to represent a constant universe of 48,000 local unions because financial detail could not be tabulated for all. Actual number of reporting local unions: 48,043 in 1969 and 48,053 in 1970.

[2] Receipts and disbursements for national, intermediate, and local unions should not be added; such a total would contain duplication due to transfer of certain monies from one type of union to another, with each type reporting the transaction.

Source: U.S. Office of Labor-Management and Welfare-Pension Reports, unpublished data.

[1] Financial data adjusted to represent a constant universe of 48,000 local unions because financial detail could not be tabulated for all. Actual number of reporting local unions: 48,053.

Source: U.S. Office of Labor-Management and Welfare-Pension Reports, unpublished data.

No. 393. Work Stoppages: 1950 to 1971

[Prior to 1960, excludes Alaska and Hawaii. Excludes work stoppages involving fewer than 6 workers or lasting less than 1 day. Information obtained directly from companies and unions involved as well as from various Government labor boards, conciliation services, and other neutral parties. See also *Historical Statistics, Colonial Times to 1957*, series D 764–769 and D 774]

Year	Work stoppages beginning in year		Workers involved		Man-days idle during year		
	Number	Average duration (calendar days)	Number [1] (1,000)	Percent of total employed [2]	Number (1,000)	Percent of estimated working time [3]	Per worker involved
1950	4,843	19.2	2,410	5.1	38,800	0.33	16.1
1955	4,320	18.5	2,650	5.2	28,200	0.22	10.7
1960	3,333	23.4	1,320	2.4	19,100	0.14	14.5

1971	5,135	27.0	3,263	4.5	47,417	0.26	14.5

[1] Workers counted more than once if involved in more than 1 stoppage during year.
[2] In 1967, total employed workers were redefined to coincide with the U.S. Bureau of Labor Statistics figures for nonagricultural employment, plus agricultural wage and salaried workers. Idleness computed on this basis is lower than the former series.
[3] Estimated working time computed by multiplying average number of employed workers (see footnote 2) by number of days worked by most employees.

Section 9

National Defense and Veterans Affairs

This section presents statistics on national defense and its human and financial costs; military personnel, ships, and aircraft; Selective Service operations; and various federally sponsored programs and benefits for veterans. The principal sources of these data are the annual *Selected Manpower Statistics* and other reports issued by the Office of the Secretary of Defense; annual reports of the Departments of the Army, Navy, and Air Force, the Office of Civil Defense, and the National Guard Bureau; the Selective Service System; *Annual Report of Administrator of Veterans Affairs*, Veterans Administration; and *Budget of the United States Government*, Office of Management and Budget. Data on veterans also appear in reports of the Census of Population, conducted by the Bureau of the Census.

Department of Defense.—Until 1947, the Army, Navy, and Air Force operated under independent jurisdiction, answering only to the Commander-in-Chief, the President of the United States. In 1947, the National Security Act set up the National Military Establishment, which provided for the coordination of the Army, Navy, and Air Force under a civilian Secretary of Defense. The three services remained separately administered, however, and each retained its Department status. Amendments to the Act in 1949 established the Department of Defense.

Selective Service.—The Selective Service System is responsible for the registration, classification, selection, forwarding for examination, and delivery for induction into the Armed Forces of all men required to register under the Military Selective Service Act. The act requires men to register at age 18 and to be liable for military service up to age 26 or, if they have been deferred from service, up to age 35. Selection of young men is based on a random selection of birthdates conducted once each year. Men whose birthdates are drawn at some time during the year in which they become 19 years of age may be inducted at some time during the year in which they become 20 years of age. Men who are not called and were available during their year of liability are placed in succeedingly lower draft priorities during the remaining years of their draft obligation. Selective Service is responsible for the issuing of deferments and exemptions as well as the administration of the conscientious objector alternate service work program. Selective Service is also authorized to determine availability of members of the Standby Reserve of the Armed Forces for order to active duty in time of war or national emergency.

Military reserves.—Reserve personnel of the Armed Forces consist of the Army National Guard, Army Reserve, Naval Reserve, Marine Corps Reserve, Air National Guard, Air Force Reserve, and Coast Guard Reserve. The purpose of these components is to provide trained personnel available for active duty in the Armed Forces in time of war or national emergency and at such other times as required by the national security. Whenever Congress determines that more personnel are needed for the national security than are in the regular ground, sea, and air forces, units of reserve personnel are ordered to active duty and retained as long as needed.

The National Guard has dual Federal-State responsibilities and uses jointly provided equipment, facilities, and budget support. In peacetime, the National Guard is State-administered, under command of the State Governors. The State mission is to provide units organized, trained, and equipped to protect life and property and to preserve peace, order, and public safety. The Federal mission is to provide units capable and ready for mobilization in time of war or national emergency to support the Army and Air Forces. The President is also empowered to mobilize the National Guard and to use such of the Armed Forces as he considers necessary to quell insur-

rection in any State against its government, to enforce Federal authority in any State, and to suppress interference with the execution of State and Federal law in a State by insurrection, violence, or conspiracy.

Veterans Administration.—The Veterans Administration administers laws authorizing benefits for eligible former and present members of the Armed Forces, and for the beneficiaries of deceased former members. Veterans benefits available under various acts of Congress include: Compensation for service-connected disability or death; pensions for nonservice-connected disability or death; vocational rehabilitation for service-connected disability; education and training; guaranty or insurance of home, farm, and business loans; U.S. Government and National Service Life Insurance; hospitalization; domiciliary care; nursing home care; out-patient medical and dental care for service-connected disability; prosthetic and other appliances; special housing and automobiles or other conveyances for certain disabled veterans; burial allowances; and educational assistance to wives, widows, sons, and daughters of deceased or totally disabled veterans.

Estimates of veterans in civil life as published by the Veterans Administration generally cover all persons with war service or service between January 31, 1955, and August 5, 1964, and include those living outside the United States. Similar data from the Bureau of the Census relate to civilian males, 14 years old and over, who live in the United States and who have served in the Armed Forces, whether in war or peacetime.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 397. Federal Budget Outlays for National Defense and Veterans Benefits and Services: 1940 to 1972

[**In millions of dollars, except percent.** For years ending June 30. Includes outlays of Department of Defense, Veterans Administration, and other agencies for activities *primarily* related to national defense and veterans programs. See *Historical Statistics, Colonial Times to 1967*, series Y 357-358 and Y 360, for related data]

No. 403. Military Assistance Program—Value of Grant Aid Deliveries: 1950 to 1971

[**In millions of dollars.** For years ending June 30. Covers programs authorized and appropriated by the Foreign Assistance Act and the Foreign Assistance Appropriation Acts. Does not include military assistance to Thailand and the other countries in Southeast Asia, which was formerly a part of this program but which has been withdrawn and put in the Department of Defense appropriation. Represents military equipment and supplies delivered and expenditures for services. Includes (*a*) equipment and supplies procured for the Military Assistance Program or from procurement or stocks of military departments; and (*b*) services, such as training, military construction, repair and rehabilitation of excess stocks, supply operations, and other charges]

[1] Beginning 1965, includes defense agencies except Defense Supply Agency.
[2] Includes Puerto Rico and outlying areas.
[3] Covers firms not dominant in their fields of operation and employing fewer than 1,000, 750, or 500 persons, depending on industry classification. For certain types of firms, other criteria are used, such as yearly gross sales.
[4] 1960 includes interservice purchases; thereafter, covers only purchases from other Federal agencies and reimbursable purchases on behalf of foreign governments.

[1] Military awards for supplies, services, and construction. Figures reflect impact of prime-contracting on State distribution of defense work. Often the State in which a prime contractor is located is not the State in which the subcontracted work is done. See also headnote, table 406.

[2] Military and civilian personnel. See footnotes 3 and 4.

[3] For shore-based personnel only. [4] Direct hire employees only.

[1] Union forces only. Estimates of the number serving in the Confederate forces range from 600,000 to 1,500,000. [2] Covers period Dec. 1, 1941, to Dec. 31, 1946. [3] Covers period June 25, 1950, to July 27, 1953. [4] Covers period Apr. 21 to Aug. 13, 1898. [5] Originally organized in 1907. Established as Air Force under the Armed Services Unification Act of 1947. For World War I, known as Aviation Service and included in data for Army; for World War II, known as Army Air Forces and included in data for Army. [6] Included in Army. [7] Established Jan. 28, 1915. [8] Based on Army and Marines only. [9] Excludes Navy. See footnote 10. [10] Covers period July 1950 through January 1955. Represents Far East area only. [11] During hostilities only. [12] Covers war personnel who departed from conterminous United States through December 1898. [13] For periods covered, see footnotes 2, 3, 4, and 10. [14] Includes gassed in action. Army data include casualties in northern Russia to Aug. 25, 1919, and in Siberia to Apr. 1, 1920; Marine data represent casualties in Europe only. [15] Excludes personnel lost in sinking of the *Maine*, which occurred 2 months before hostilities. [16] Includes casualties incurred in October 1941, due to hostile action. [17] Covers only Army personnel base of 1,908,800. [18] Covers only Army personnel base of 246,410. [19] Covers only Army personnel base of 3,665,000. [20] Covers all services base of 9,370,986. [21] Covers all services base of 4,428,939.

Administratively disqualified	185	23.6	10	1.0	9	7	2	1.5	1.4	2.4

[1] 1950 data are for July through December only. [2] Examinees who failed minimum requirement (10 percentile) on Armed Forces Qualification Test (AFQT) or minimum requirement (below raw score of 60) on its equivalent (ECFA) administered to Spanish-speaking examinees in Puerto Rico.

[3] Examinees classified as mental group IV on basis of AFQT but who failed to meet additional aptitude area requirements effective in August 1958 and called Army Classification Battery (ACB) tests until mid-September 1961 and Army Qualification Battery (AQB) since then. The AQB requirements were raised in May 1963 and lowered in November 1965, April 1966, October 1966, and December 1966.

– Represents zero. X Not applicable.

[1] Excludes transfers from appropriations to insurance trust funds from which the actual payments are made. Expenditures from VA Revolving Supply Fund also excluded to avoid duplication.

[2] Includes direct payments to beneficiaries from insurance appropriation, servicemen's indemnities, and benefits and dividends paid from insurance trust funds. Some noncash transactions, e.g., interest credited to dividends left on deposit, also included.

[3] Includes education and training allowances for veterans and servicemen, and educational assistance for wives, widows, sons, and daughters of deceased or totally disabled veterans.

[4] Includes subsistence allowances, tuition, supplies, and equipment for training of disabled veterans.

[5] Includes payments and allowances for various programs such as unemployment and self employment allowances, automobiles and other conveyances for disabled veterans, etc.

[6] Estimated; includes expenditures for hospital and domiciliary care, outpatient medical and dental treatment, medical research, and grants to Republic of Philippines for medical care and treatment of veterans.

[7] Comprises construction and related costs, and amounts transferred to Dept. of Army, Corps of Engineers, for construction of hospitals.

[8] Includes expenses for vocational counseling, travel for certain programs, reporting allowances paid schools for certifying attendance of veteran trainees, private laws for relief, and all administrative salaries and expenses.

– Represents zero. [1] Excludes $713,275,000 shown in table 441 for expenditures not distributed by State. [2] Includes expenditures for hospital and domiciliary care, outpatient medical and dental treatment, and medical research. [3] Educational assistance for wives and widows, sons and daughters of deceased or totally disabled veterans, and post-Korean conflict veterans. [4] Excludes interest paid to U.S. Treasury and miscellaneous expenses; therefore, total differs from that shown in table 441 which includes these items.

Section 10

Social Insurance and Welfare Services

This section presents data related to governmental programs for old-age, survivors, disability, and health insurance (OASDHI); public and railroad employee retirement; unemployment and temporary disability insurance; aid to the needy; and maternal, child, and other welfare services. Also included here are selected data on workmen's compensation, pension plans and funds, the American Red Cross, United Way campaigns, and philanthropic trusts and foundations.

There are several principal sources for these data. The monthly *Social Security Bulletin* and the bimonthly *Welfare in Review*, publications of the Department of Health, Education, and Welfare, present current data on many of the programs and summarize annual data in statistical supplements published each year. Current data on employment security activities are published monthly in the Department of Labor's *Unemployment Insurance Statistics* and *Employment Service Statistics*. Data on retirement and other benefits for railroad workers are published by the Railroad Retirement Board in its *RRB Quarterly* and *Annual Report*.

Social insurance under the Social Security Act.—Social insurance programs established by the Social Security Act provide protection against wage loss resulting from old age, prolonged disability, death, or unemployment and, since July 1966, protection against the cost of medical care in old age.

The old-age, survivors, disability, and health insurance (OASDHI) program provides monthly cash benefits to retired or disabled insured workers and their dependents and to the survivors of an insured worker. Within the specifications of the law, retirement benefits are payable to an aged insured worker; to his aged spouse or his spouse at any age caring for his child who is under age 18 or totally disabled; and to his child who is under age 18, totally disabled, or a full-time student, age 18 to 21. An aged worker becomes eligible for full benefits at age 65, although he may elect reduced benefits up to 3 years earlier; his spouse is under the same limitations. Special benefits are also provided the aged 72 and over who do not meet the insured status requirements. Under certain conditions, survivor benefits are payable to some dependents of an insured worker, including his aged or disabled widow or his widow at any age caring for his child who is under age 18 or totally disabled; his child who is under age 18, totally disabled, or a full-time student, age 18 to 21; and aged parents. Disability benefits are payable to an insured worker under age 65 with a prolonged disability that meets the definition in the Act and to his dependents on the same basis as dependents of retired workers. A lump sum benefit is also payable on the death of an insured worker.

Beginning July 1966, health insurance has been provided under two coordinated plans for nearly all people age 65 and over: A hospital insurance plan which covers hospital and related services and a voluntary supplementary medical insurance plan which covers physicians' services and related medical services.

Retirement, survivors, disability, and hospital insurance benefits are paid for by the contributions of workers, employers, and the self-employed on annual earnings up to $9,000. Currently workers and their employers each pay 4.6 percent, and the self-employed pay 6.9 percent of covered wages for retirement, survivors, and disability insurance. The special benefits for noninsured persons age 72 and over are financed from general funds. For hospital insurance, workers, employers, and the self-employed each pay 0.6 percent (see table 458). The rates are scheduled to increase gradually. For persons 65 and over with specified amounts of social security coverage less than

that required for cash benefit eligibility, the hospital benefits are financed out of Federal general revenues. The voluntary medical insurance plan is financed by a $5.80 a month (effective July 1, 1972) premium paid by persons age 65 and over who choose to enroll in the plan, and by an equal contribution by the Federal Government from general revenues. The money collected is deposited in Federal trust funds.

Both unemployment insurance and the public employment (placement) service are administered through the Manpower Administration of the Department of Labor and each State's employment security agency. Under agreements with the Secretary of Labor, the State agencies also administer unemployment compensation for eligible ex-servicemen and Federal employees, and direct aid in the form of training and related cash allowances to persons being trained under the Manpower Development and Training Act and the Trade Expansion Act.

State unemployment insurance laws pay benefits to unemployed covered workers meeting the qualifications in the State law. In most States, a waiting period of 1 week must be served before payments begin. Benefits are payable for a maximum number of weeks, ranging from 26 to 36 weeks among the States (most frequently 26 weeks); extended and emergency benefits are payable under a Federal-State program to workers who exhaust their regular State benefits during periods of high unemployment, maximum weekly benefits without dependents' allowances range from $45 to $105. Nine States and the District of Columbia augment their allowances for dependents. Maximum augmented weekly benefits range from $65 to $129. In Puerto Rico, benefits are payable for a maximum of 20 weeks; the maximum weekly benefit is $50 for nonagricultural workers and $26 for agricultural workers.

A 3.2-percent Federal tax is levied on the payroll of employers of 1 or more workers in industries covered by the Act and is used to finance the Federal-State program. Employers subject to the Federal law are allowed a credit of 2.7 percent of taxable payrolls for contributions paid to State agencies under State unemployment insurance laws; the Federal Government retains 0.5 percent of the tax out of which the Congress appropriates funds each year to cover employment security administrative costs and to finance the Federal share of the extended-benefit program.

Excluded from coverage are the railroad industry (see below) and most workers in domestic service and agricultural employment. A limited number of State and local government workers are covered, usually on an optional basis.

The standard rate of contributions payable by employers in all but 9 States is 2.7 percent of the taxable payroll. However, employers with favorable unemployment experience may be assigned a lower rate (except in Puerto Rico); in 1971 the average contribution rate under State laws was estimated at 1.5 percent of the taxable payroll. The contribution is based on the first $4,200 paid to a worker during the year. In a few States, the rate applies to wages above $4,200. Contributions are deposited to State accounts in the Federal Unemployment Trust Fund, from which States withdraw amounts needed for benefit payments.

Social insurance for railroad workers.—The social insurance programs administered by the Railroad Retirement Board cover employees of railroads or companies and organizations affiliated with railroad transportation. The Railroad Retirement Act provides retirement annuities for aged and disabled workers and for wives of retired employees, and benefits to survivors of deceased workers. Supplemental annuities have also been provided for career employees since 1966. In addition, Federal health insurance protection is available to railroad workers on the same basis as workers covered by social security. Funds for the regular railroad retirement and survivor benefit program come primarily from a tax, divided equally between employer and employee, on the first $750 of each month's earnings. The combined rate for 1972 is 19.9 percent, including 1.2 percent for hospital insurance benefits. The supplemental annuity program is financed by a special variable quarterly tax on railroad employers for each manhour paid for.

The Railroad Unemployment Insurance Act provides benefits for unemployment and sickness financed by contributions from covered employers of 4 percent (applicable to earnings not in excess of $400 a month).

Social insurance for Federal Government employees.—One contributory retirement system for Federal civilian employees and two small noncontributory systems for special classes of employees are administered by the Civil Service Commission. In addition, there are separate retirement systems in operation for the uniformed services (supplementing OASDHI under which they are covered on a contributory basis) and for special classes of Federal civilian employees.

The Civil Service Retirement Act provides for age, optional, disability, deferred retirement, and discontinued service annuities for employees in the executive, judicial, and legislative branches of the U.S. Government and in the District of Columbia government if not subject to another retirement system or excluded by statute or by administrative order. It also provides annuities for the widows and minor children of deceased employees, and under certain conditions to the survivors of deceased annuitants. The employee contribution rate is 7.0 percent, computed on base pay. Employing agencies pay amounts equal to employee contributions.

Workmen's compensation.—All States have programs providing protection against work-connected injuries and deaths. Federal workmen's compensation laws cover Federal Government employees, private employees in the District of Columbia, and longshoremen and harbor workers. In addition, the Social Security Administration administers a "black lung" benefits program for coal miners disabled by pneumoconiosis and for specified dependents. Most State workmen's compensation laws exempt such employments as agriculture, domestic service, and casual labor; about half exempt employers who have fewer than a specified number of employees. Occupational diseases, or at least specified diseases, are compensable under most laws.

In most States total payments to injured workers or to survivor families are limited as to time, amount, or both. All compensation acts require that medical aid be furnished to injured employees; in one-fifth of the laws there are either duration or cost limitations—or both—on the amount of medical benefits provided.

Public assistance.—Six programs, all administered by the States and localities, provide public assistance. Payments to four groups—the aged, the blind, the permanently and totally disabled, and families with dependent children whose need arises from certain causes—are financed in part from Federal funds granted to States under the Social Security Act. The States may also receive grants for medical assistance to persons not able to take care of their medical bills themselves. The Social and Rehabilitation Service handles the Federal aspects of these programs. Aid to other needy persons is furnished mainly through general assistance, toward which the Federal Government makes no contribution.

To receive a Federal grant for assistance payments and administrative expenses under any Social Security Act program, a State must have a plan approved as meeting the requirements of the Act. Each State establishes the conditions under which needy people may receive assistance and determines how much they shall receive.

Health and welfare services.—Programs providing health and welfare services are aided through Federal grants to States for child welfare services, vocational rehabilitation, aging activities, maternal and child health services, services for crippled children, maternity and infant care projects, comprehensive health services and a variety of public health activities (including community mental health centers, medical facilities construction, regional medical programs, and control of specific diseases). The Social and Rehabilitation Service administers the first three of these programs; the others are administered by the Health Services and Mental Health Administration.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 451. Social Welfare Expenditures Under Public Programs: 1935 to 1971

[**In millions of dollars, except percent.** For Federal Government, most States, and some localities, years ending June 30. Represents expenditures under public law and from trust accounts. Includes administrative expenditures and capital outlay; also includes some expenditures and payments outside U.S. See table 451 for program detail. See *Historical Statistics, Colonial Times to 1957*, series H 1-45, for related but not comparable data]

– Represents zero. X Not applicable. [1] Excludes refunds to those leaving service. Federal data include military retirement. [2] Includes compensation for Federal employees and ex-servicemen, and trade adjustment and cash training allowances. [3] Cash and medical benefits in 6 areas. [4] Benefits by private insurance carriers, State funds, and self-insurers. [5] Refugee assistance, surplus food for the needy, food stamps, and Job Corps, Neighborhood Youth Corps, and work-experience programs under the Economic Opportunity Act and related laws. [6] Excludes domiciliary care in institutions other than mental or tuberculosis, and services included with other programs in social welfare series. [7] Includes medical care for military dependent families. [8] Includes services for crippled children. [9] Includes burial awards and subsistence payments to disabled veterans undergoing training. [10] Excludes servicemen's group life insurance. [11] Federal expenditures for administrative costs (Office of Education) and research not shown separately but included in total. [12] Construction costs of vocational and adult education programs included under elementary-secondary expenditures. [13] Federal expenditures represent primarily surplus foods for nonprofit institutions. State and local expenditures include some amounts for antipoverty programs. [14] Represents primarily child welfare services under title V of the Social Security Act. [15] Includes community action, migrant workers, and VISTA programs and all administrative expenses of the Office of Economic Opportunity. [16] Includes administrative expenses of the Secretary of Health, Education, and Welfare; Indian welfare; aging and juvenile delinquency activities; certain manpower activity; and other items.

[1] For old-age, survivors, disability, and health insurance (OASDHI), average monthly number; for railroad retirement program, public employee retirement systems, and veterans programs, number on rolls June 30; for State unemployment and temporary disability insurance and veterans unemployment allowances, average weekly number; for railroad unemployment and temporary disability insurance, average number during 14-day registration period; Area Dedevelopment Act and Manpower Development and Training Act programs, number on rolls December 31.

[2] Includes benefits to dependents where applicable.

[3] Excludes payments for medical care.

[4] Payable in Calif., N.J., N.Y., and R.I. under public and private plans. Data for beneficiaries in N.J. not available.

[5] Number represents families for Federal programs under the Uniformed Services Contingency Option Act of 1953 and for State and local government retirement systems.

[6] Lump sums are for burial of deceased veterans.

[7] Includes payments made by the States as agents of the Federal Government under the Federal employees' unemployment compensation program and under the Ex-Servicemen's Compensation Act of 1958, and payments under the extended unemployment insurance programs. Beginning 1961, includes Puerto Rico and, beginning 1966, the Automotive Products Trade Act of 1965.

[8] Under the Veterans' Readjustment Assistance Act of 1952 (terminated January 1960).

[9] Area Redevelopment Act of 1961 (November 1961-June 1966) and Manpower Development Training Act of 1962.

X Not applicable. [1] Benefit payment actually being made at a specified time with no deductions or with deductions amounting to less than a month's benefit, i.e., the benefits actually being received.

[2] Persons aged 65 and over (and aged 62-64, beginning 1956 for women and 1961 for men).

[3] July 1957-October 1960, disabled workers aged 50-64; thereafter, disabled workers under age 65.

[4] Includes wife beneficiaries under age 65 with entitled children in their care and, beginning September 1965, entitled divorced wives. [5] Beginning 1957, includes disabled persons aged 18 and over whose disability began before age 18 and, beginning September 1965, entitled full-time students aged 18-21.

[6] Includes surviving divorced mothers with entitled children in their care.

[7] Beginning September 1965, includes widows aged 60-61 and surviving divorced wives aged 60 and over and, beginning March 1968, disabled widows and widowers aged 50 and over.

[8] Represents benefits for persons aged 72 and over who are not insured under the regular or transitional provisions of the Social Security Act.

[9] Benefits payable without reduction for early retirement. 1950 data are estimated.

[10] Benefits payable with reduction for early retirement, at ages 62-64.

[11] Includes awards that are suspended chiefly because of earnings of the retired worker and awards that have been converted from disability awards to retirement awards on attainment of 65. Also includes awards to transitionally insured persons aged 72 and over.

[12] Payments under 1939 and later amendments, except as noted. Represents total disbursements of benefit checks by the Dept. of the Treasury during the years specified. [13] Distribution by type estimated.

X Not applicable. [1] Employer becomes subject to State unemployment insurance law when he has employed specified minimum number of workers on at least 1 day in each of specified number of weeks within current or preceding calendar year.

[2] For pay period including the 12th of the month. [3] Wages subject to unemployment insurance tax. Includes State and local government coverage as well as private industry coverage; see text, p. 276.

[4] Number of weeks compensated divided by first payments.

[5] Beginning 1960, based on first payments for 12-month period ended June 30; 1950 based on 12-month period ended Sept. 30. [6] Includes contributions from employers; also employee contributions in States which tax workers. [7] Includes payments under State (not Federal) temporary extended unemployment insurance provisions. [8] Sum of balances in State clearing accounts, benefit-payment accounts, and State accounts in Federal unemployment trust funds. [9] 1970 data; latest available by States. [10] Preliminary. [11] And wages over $100 in any quarter. [12] Or 4 in 8 weeks and payroll over $6,000 in any quarter. [13] Also covers employers of 20 or more agricultural workers in 20 weeks. [14] And wages of $300 in any quarter.

1950 TO 1971, AND STATES AND PUERTO RICO, 1971

employees where covered by State law after 1955; excludes unemployment compensation for Federal employees

[1] Net cash and medical benefits paid under standard workmen's compensation policies.
[2] Net cash and medical benefits paid by competitive and exclusive State funds and by Federal workmen's compensation programs. [3] Cash and medical benefits paid by self-insurers, plus value of medical benefits paid by employers carrying workmen's compensation policies that exclude standard medical coverage.
[4] Premiums written by private carriers and State funds and benefits paid by self-insurers increased by 5–10 percent to allow for administrative costs. Also includes benefits paid and administrative costs of Federal workmen's compensation programs.

No. 485. Workmen's Compensation Payments, by States: 1940 to 1970

[**In thousands of dollars.** Payments represent cash and medical benefits and include insurance losses paid by private insurance carriers (compiled from the *Spectator* (*Insurance by States . . . of Casualty Lines*), from reports of State insurance commissions, and from A. M. Best Co.); net disbursements of State funds (from the *Spectator*, from *Argus Casualty and Surety Chart*, and from State reports), estimated for some States; and self-insurance payments, estimated from available State data. Calendar-year data, except fiscal-year data for Federal programs and for a few States with State funds. Includes benefit payments under Longshoremen's and Harbor Workers' Compensation Act and Defense Bases Compensation Act for States in which such payments are made]

[1] Includes the children and 1 or both parents, or 1 caretaker relative other than a parent, in families where the needs of such adults were considered in determining the amount of assistance.

[2] Includes 221 recipients of payments made without Federal participation in California and 591 in Missouri; excludes 7,393 such recipients in Pennsylvania.

[3] Partly estimated; total not as large as sum of State figures because of adjustment.

No. 491. Aid to Families With Dependent Children (AFDC)—Characteristics of Recipient Families: 1969 and 1971

[Refers to federally aided State programs providing aid to needy children deprived of parental care or support. Based on a sample and subject to sampling variability; for details, see source]

CHARACTERISTIC	1969	1971	CHARACTERISTIC	1969	1971
Number of families....1,000	1,630.5	2,523.9	**Percent distribution**—Con.		
Percent distribution	100.0	100.0	Status of mother:		
Residence:			In the home, total	91.7	92.9
Metropolitan areas [1]	72.4	74.4	Employed [3] or in training	17.2	18.0
In central cities	56.0	56.5	Incapacitated for employment	13.7	11.3
Outside central cities	16.4	17.8	Full-time homemaker	35.5	37.1
Nonmetropolitan areas [2]	27.5	25.6	Other	25.3	26.4
Race:			Dead	2.4	1.9
White	48.1	48.3	Deserted	3.3	2.9
Negro	45.2	43.3	Absent for other reasons [2]	2.6	2.3
Other [2]	6.7	8.4			
Number of children:			Number of years as recipient:		
1	26.6	29.7	Less than 1 year	32.2	35.2
2	23.0	24.5	1–2 years	31.2	33.0
3	17.7	18.0	3–4 years	13.8	13.7
4 or 5	21.3	18.9	5–9 years	15.5	11.6
6 or more [2]	11.2	9.0	10–14 years	5.2	4.3
Status of father:			15–19 years	1.5	1.3
Dead	5.5	4.3	20 years or more	0.6	0.5
Incapacitated	11.7	9.8	Unknown	–	0.4
Unemployed or employed part-time	4.6	6.1	Median [4] number of years	1.9	1.6
Absent from home	75.4	76.2			
Other [2]	2.8	3.6			

– Represents zero. [1] For definition of standard metropolitan statistical area, see text, p. 2.
[2] Includes unknown or not reported. [3] Full-time and part-time. [4] For definition of median, see preface.

No. 496. Orphans, by Type: 1940 to 1970

[Beginning 1960, includes Puerto Rico and Virgin Islands. Covers children under age 18 who have been orphaned at any time. Paternal orphan refers to loss of father, maternal orphan to loss of mother, full orphan to loss of both parents. Percent of child population based on Bureau of the Census estimated population of children under 18, as of July 1. Data not exactly comparable for all years because of changes in methodology]

Year	Number (1,000)				Percent of child population			
	Total	Paternal	Maternal	Full	Total	Paternal	Maternal	Full
1940, October	2,930	1,890	960	80	6.1	3.9	2.0	0.2
1955, July	2,710	1,830	820	60	4.8	3.2	1.5	0.1
1960, January	2,955	2,055	840	60	4.5	3.1	1.3	0.1
1965, January	3,290	2,330	890	70	4.7	3.3	1.3	0.1
1970, January	3,260	2,300	890	70	4.6	3.2	1.3	0.1

No. 500. Foundations—Number and Finances by States and Other Areas

[**Money figures in millions of dollars.** Figures are for latest year reported by foundations, usually 1968 or 1969. A foundation may be defined as a nongovernmental, nonprofit organization, with funds and programs managed by its own trustees or directors, established to maintain or aid social, educational, charitable, religious, or other activities serving the common welfare. Excludes organizations which make general appeals to the public for funds, act as trade associations for industrial or other special groups, are restricted by charter solely to aiding one or several named institutions, or which are captive trusts, within colleges, churches, or other organizations, or are very small—defined as having neither assets of $500,000 nor making grants of at least $25,000 in the latest year of record]

Section 11

Income, Expenditures, and Wealth

This section presents statistics on two different aspects of income and expenditures: One aspect relates to the national income and product system (a summation reflecting the entire complex of the Nation's economic activities and the interaction of its major components) and the other to the distribution of income to families and individuals. Statistics on national wealth are also included in this section. Figures from the flow-of-funds accounts, a financial view of the economy, appear in section 16.

The primary source for national income and product information is *Survey of Current Business*, published monthly by the Department of Commerce, Bureau of Economic Analysis, (formerly Office of Business Economics). The complete set of national income and product tables for the 1967–70 period is published in the July 1971 *Survey*. For the 1964–67 period, these figures are available in *U.S. National Income and Product Accounts, 1964–67*. Corresponding information for earlier years, with data starting in 1929 in most cases, is published in *The National Income and Product Accounts of the United States, 1929–1965, Statistical Tables*, a supplement to the *Survey*. Summary estimates for current periods appear in the most recent issue of the *Survey*. The basic reference sources for concepts and methodology are *National Income, 1954 Edition; U.S. Income and Output, 1958;* the August 1965 issue of the *Survey;* and *Readings in Concepts and Methods of National Income Statistics.*

The major source of data on income distribution is the Bureau of the Census (Census of Population and Current Population Survey). Annual data on income distribution by size-class appear in *Current Population Reports—Consumer Income*, series P–60. A brief description of the Current Population Survey, which is the basis for the data in that report, is given on page 1 of this edition of the *Statistical Abstract.*

Another primary source of information on income distribution is the national Survey of Consumer Finances conducted annually since 1946 by the Survey Research Center of The University of Michigan. From 1946 through 1960, this survey comprised a sample of approximately 2,700 family units or 3,000 spending units located in 66 sampling areas; from 1961 to 1963, it comprised approximately 1,850 family units or 2,000 spending units. In 1964 and 1965, it comprised 1,300–1,600 family units; in 1966 to 1970, 2,400–2,700. The results of these surveys are published in a monograph series, *Survey of Consumer Finances.*

Gross national product.—Gross national product (GNP) is the total national output of goods and services valued at market prices. It can be viewed in terms of expenditure categories. These categories comprise purchases of goods and services by consumers and government, gross private domestic investment, and net exports of goods and services. The goods and services included are largely those bought for final use (excluding illegal transactions) in the market economy. There are a number of inclusions, however, which represent imputed values, the most important of which is the rental value of owner-occupied dwellings. GNP measures the output attributable to the factors of production—labor and property—supplied by residents of the United States. GNP differs from "national income" mainly in that GNP includes allowances for depreciation and for indirect taxes (such as sales and excise taxes).

National income.—National income is the aggregate earnings of labor and property which arise in the current production of goods and services by the Nation's economy. It is the sum of compensation of employees, proprietors' income, rental income, net

interest, and corporate profits. Thus, it measures the total factor costs of the goods and services produced by the economy. Earnings are inclusive of direct taxes on those earnings.

Personal income.—Personal income is the current income received by persons from all sources net of contributions for social insurance. Not only individuals (including owners of unincorporated enterprises), but nonprofit institutions, private trust funds, and private health and welfare funds are classed as "persons." Personal income includes transfers (payments not resulting from current production) from government and business such as social-security benefits, military pensions, etc., but excludes transfers among persons and Federal military pay in kind. Although most of the income is in monetary form, there are important nonmonetary inclusions—chiefly, estimated net rental value to owner-occupants of their homes, the value of services furnished without payment by financial intermediaries, and the value of food consumed on farms.

Disposable personal income is the income remaining to persons after deducting personal tax and nontax payments to general government. It is the income of persons available for spending or saving.

Distribution of income by size-class.—Money income statistics are based on data collected in various field surveys of income conducted since 1936. In each of these field surveys trained enumerators interview representative samples of the population with respect to income received during the previous year. The income here referred to is consumer money income for the calendar year and is before deduction of income taxes or social-security taxes unless otherwise specified in individual tables. Nonmoney items of income are not covered. None of the aggregate income concepts (gross national product, national income, or personal income) is exactly comparable with consumer money income. The nearest approximation is "personal income."

Individuals' saving and assets.—The Board of Governors of the Federal Reserve System issues detailed estimates of individuals' saving based on flow of funds accounts and showing the increase in financial assets, net investment in tangible assets, less increase in debt of individuals. (See table 522.) Data back to 1946 are available upon request from the Federal Reserve.

The Survey Research Center of The University of Michigan also collects annual data on assets, usually including the distribution of liquid assets, and occasional data covering positive, negative, and net savings of families, by income groups.

National wealth.—The national wealth data shown in table 553 are drawn from Supplementary Volume I of the *Institutional Investor Study Report of the Securities and Exchange Commission.* They are, in large part, an updating of data from R. W. Goldsmith, *A Study of Saving in the United States* and *The National Wealth of the United States in the Postwar Period.* As is the case in all national wealth estimates, the figures are intended chiefly to indicate the order of magnitudes involved and to permit rough comparisons among types of wealth and of the growth over long periods. Definitions and analytical details are presented in the source publication.

Current and constant dollars.—Several of the series in this section are expressed both in current dollars and in constant dollars. Data shown in current dollars are unadjusted for comparability with respect to prices over a period of time; that is, the dollars shown are in terms of the level of prices prevailing for each of the years specified. Data shown in constant dollars are computed values which eliminate the effect of price changes. Constant dollars are derived by dividing current-dollar figures by their corresponding price indexes based on a year specified as 100.

Implicit price deflator.—The implicit price deflator is the ratio of GNP in current prices to GNP in constant prices. It is a weighted average of the price indexes used to deflate the components of GNP, the implicit weights being expenditures in each period.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957.* See preface.

No. 518. National Income, by Industrial Origin: 1950 to 1971

[**In billions of dollars, except percent.** Prior to 1960, excludes Alaska and Hawaii. Originating in each industry is the sum of factor costs incurred by the industry in production. Hence it is net value added to production by industry, measured at factor costs. See also *Historical Statistics, Colonial Times to 1957*, series F 22-33]

X Not applicable.

[1] Comprises employer contributions to private pension, health, and welfare funds; compensation for injuries; pay of military reservists; directors' fees; and several other minor items.

[2] Net income of farm wages and farm "other" labor income, less personal contributions under the old-age, survivors, disability, and health insurance program.

[3] Income disbursed directly to persons by Federal, State, and local governments. Comprises wages and salaries (net of employee contributions for social insurance), other labor income, interest, and transfer payments.

No. 523. Money Income—Percent Distribution of Families, by Income Level, by Race of Head: 1947 to 1970

[Families as of March of following year. Prior to 1960, excludes Alaska and Hawaii. Based on sample; see text, p. 1. Includes members of the Armed Forces living off post or with their families on post but excludes all other Armed Forces; the 1971 survey includes about 1,164,000 members. Includes small number of families with no money income. For definition of family, see text, p. 3. For definition of median, see preface]

Race of head and year	Income level (percent distribution)											Median	
	Total	Under $1,000	$1,000–$1,999	$2,000–$2,999	$3,000–$3,999	$4,000–$4,999	$5,000–$5,999	$6,000–$6,999	$7,000–$9,999	$10,000–$14,999	$15,000 and over	Income	Index (1947=100)

No. 538. AverageLow Income Level for Families and Unrelated Individuals, by Size of Family and Sex of Head: 1959, 1969, and 1970

[**In dollars.** The low income (poverty) data exclude inmates of institutions, members of Armed Forces living in barracks, and unrelated individuals under 14 years of age. Families and unrelated individulas are classified as being above or below the low income level, using the poverty index adopted by a Federal Interagency Committee in 1969. This index centers around the Department of Agriculture's Economy Food Plan and reflects the differing consumption requirements of families based on their size and composition, sex and age of the family head, and farm-nonfarm residence. The low income cutoffs for farm families have been set at 85 percent of the nonfarm levels. These cutoffs are updated every year to reflect the changes in the Consumer Price Index. For further details, see source]

SIZE OF FAMILY	1959			1969			1970		
	Total nonfarm	Male head [1]	Female head [1]	Total nonfarm	Male head [1]	Female head [1]	Total nonfarm	Male head [1]	Female head [1]

No. 541. Persons Below Low Income Level and Aggregate Income Deficit, by Race of Head and Family Status: 1959 to 1970

[Number in thousands; amounts in millions of 1970 dollars, except percent. Families and unrelated individuals as of March of year following year shown. Income deficit defined as the difference between the total income of families and unrelated individuals below low income level and their respective low income thresholds. In computing the income deficit, families reporting a net income loss are assigned zero dollars; for such cases, the deficit is equal to the low income level. See headnote, table 538]

Family status and race	Number below low income level					Aggregate income deficit

No. 542. Persons and Families Below Low Income Level—States: 1959 and 1969

[**Number in thousands.** Persons and families as of April 1960 and 1970. For 1959, excludes all persons in group quarters. For 1969, excludes unrelated individuals under 14 years of age and specified types of group quarters, i.e. inmates of institutions, persons in Armed Forces living in barracks, and college students living in dormitories. Low income criteria computed on a national and farm-nonfarm basis only and not adjusted for regional, State, or other local variations in cost of living. See headnote, table 538]

No. 551. Personal Wealth—Top Wealthholders, by Characteristics and by Size of Gross Estate, and Asset Composition: 1953, 1958, and 1962

[Estimates based on estate tax returns showing gross assets of $60,000 or more, filed with Internal Revenue Service]

ITEM	1953		1958		1962	
	Total	Percent	Total	Percent	Total	Percent
NUMBER OF TOP WEALTHHOLDERS (1,000)						
Total	1,979	100.0	3,009	100.0	4,132	100.0
Male [1]	1,330	67.2	1,936	64.3	2,539	61.4
Under 50 years	491	36.9	741	38.3	988	38.9
50–69 years	648	48.7	923	47.7	1,173	46.2
70 years and over	151	11.4	232	12.0	332	13.1
Female [1]	648	32.7	1,073	35.7	1,594	38.6
Under 50 years	197	30.4	299	27.9	471	29.5
50–69 years	306	47.2	530	49.4	758	47.6
70 years and over	120	18.5	209	19.5	324	20.3
TOP WEALTHHOLDERS BY SIZE OF GROSS ESTATE (1,000)						
$60,000–$99,999	(NA)	(NA)	1,193	39.6	1,593	38.6
$100,000–$199,999	(NA)	(NA)	1,179	39.2	1,627	39.4
$200,000–$499,999	(NA)	(NA)	488	16.2	692	16.7
$500,000–$999,999	(NA)	(NA)	102	3.4	149	3.6
$1,000,000–$9,999,999	(NA)	(NA)	45	1.5	69	1.7
$10,000,000 or more	(NA)	(NA)	2	0.1	2	(Z)
ASSET COMPOSITION OF TOP WEALTHHOLDERS (bil. dol.)						
Total assets	355.9	100.0	542.0	100.0	752.0	100.0
Real estate	81.8	23.0	132.6	24.5	188.0	25.0
Bonds	35.6	9.9	35.6	6.6	47.9	6.4
Corporate stock	140.9	39.6	231.1	42.6	325.8	43.3
Cash	33.8	9.5	45.9	8.5	70.7	9.4
Notes and mortgages	12.5	3.5	20.5	3.8	30.4	4.0
Insurance equity	7.1	2.0	10.8	2.0	15.6	2.1
Other	44.2	12.4	65.5	12.1	73.5	9.8
Debts	31.8	8.9	49.6	9.2	82.7	11.0
Net worth (less deficit)	324.1	91.1	492.4	90.8	669.3	89.0

NA Not available. Z Less than 0.05 percent. [1] Includes persons of unknown age.

X Not applicable.

[1] Estimates derived by "perpetual inventory" method which is intended to reflect reproduction cost of different types of assets. Estimates are obtained by: (*a*) reducing each year's gross capital expenditures in current prices to 1958 price level by means of appropriate construction cost or wholesale price indexes; (*b*) depreciating gross capital expenditures in accordance with an assumed length of life for different types of assets, thus obtaining net capital expenditures for each year in 1958 prices; (c) cumulating net capital expenditures for as many years backwards as corresponds to the assured length of life of the type of asset involved.

[2] Current dollar estimates are based on book values; constant dollar estimates reflect book values reduced by means of wholesale indexes.

[3] Estimates are based on census or similar data. For other private land, estimates are derived by application of rough ratios of land to structure values for different types of real estate. Excludes subsoil assets.

Section 12

Prices

This section presents indexes of wholesale, retail, and consumer prices, as well as prices for selected commodities. The primary sources of these data are monthly publications of the Department of Labor, Bureau of Labor Statistics, which include: *Monthly Labor Review; Consumer Price Index; Estimated Retail Food Prices by Cities; Retail Prices and Indexes of Fuels and Electricity;* and *Wholesale Prices and Price Indexes.* The Statistical Reporting Service of the Department of Agriculture prepares indexes of prices received and prices paid by farmers; see section 23, Agriculture.

The Bureau of Labor Statistics prepares monthly indexes of wholesale prices for a large selection of commodities; monthly indexes of consumer prices for both commodities and services; and weekly indexes of spot market prices for 22 commodities. The single year 1967 is now the standard reference base period for these and other general purpose index numbers prepared by Federal agencies. It was adopted in March 1970 by the U.S. Office of Management and Budget and replaces the 1957–59 base period which had been in use since 1960. Indexes on the 1957–59 base appear, through 1969, in the 1970 edition of the *Statistical Abstract;* price indexes for later years on a 1957–59 base may be obtained from the Bureau of Labor Statistics.

Wholesale price index.—This index, dating from 1890, is the oldest continuous statistical series published by the Bureau of Labor Statistics. It is designed to measure average changes in prices of commodities sold in primary markets in the United States.

The index has undergone several revisions (see *Monthly Labor Review,* February 1962). It is now based on approximately 2,450 commodity price series instead of the approximately 1,900 included in the 1947–60 period and the 900 included for the period prior to 1947. Prices used in constructing the index are collected directly from sellers, if possible, and generally apply to the first significant large-volume commercial transaction for each commodity—i.e., the manufacturer's or other producer's selling price, the importer's selling price, or the selling price on an organized exchange or at a central market.

The weights used in the index represent the total net selling value of commodities produced or processed in this country, or imported. The values are f.o.b. production point and are exclusive of excise taxes, interplant transfers, military products, and goods sold directly at retail from producing establishments. Effective January 1967, the weights are values of net shipments of commodities as derived from the industrial censuses of 1963 and other data.

Consumer price index.—This index measures the average change in prices of goods and services purchased by families of urban wage earners and clerical workers and by single persons living alone. Prior to the most recent revision, completed in December 1963, the coverage of the index was restricted to families of two or more persons. The weights used in calculating the index are based on studies of actual expenditures by wage earners and clerical workers. The quantities and qualities of the items in the "market basket" remain the same between consecutive pricing periods, so that the index measures the effect of *price change only* on the cost of living of these families. The index does not measure changes in the total amount families spend for living; city indexes do not measure relative differences in prices or living costs between cities.

A study conducted during 1917–19 provided the weights used until 1935. Since then, this index has undergone four major revisions, which involved bringing the "market basket" of goods and services up to date, revising the weights, and improving the

sample and methodology. From 1935 through 1949, time-to-time changes in retail prices were weighted by 1934–36 average expenditures except for certain temporary wartime adjustments. Weights used for 1950 through 1952 represented estimated 1947–49 spending patterns. Beginning 1953, the weights represented average purchases of urban wage-earner and clerical-worker families in 1950. The most recent revision, incorporated in a new series beginning in 1964, introduced expenditure weights relating to 1960–61. The description which follows and the tables in this section refer to the new series.

The list of items currently priced for the index includes approximately 400 goods and services. For some items, several different qualities are priced. The items priced are described by detailed specifications to insure that, as far as possible, the same quality is priced each time, and that differences in reported prices are measures of price change only. Sales taxes are reflected wherever applicable.

The national index is based on prices collected in 56 areas. These include the urban portions of 37 standard metropolitan statistical areas (SMSA), the more extensive standard consolidated areas for Chicago and New York-Northeastern New Jersey; and 17 nonmetropolitan urban places. Area definitions are those established for the 1960 census and do not include any subsequent revisions. Foods, fuels, and a few other items are priced monthly in all areas. Prices of most other goods and services are obtained monthly in the 5 largest areas and every 3 months in other areas. Rents are surveyed bimonthly in the 5 largest areas and every 3 months in other areas. Estimates are made for unpriced areas each month. Price changes for the 56 areas are combined for the United States with weights based on 1960 population of the several areas represented by each sample area. Separate indexes are compiled for 23 of the 56 areas.

Retail food price index.—Retail food price indexes are computed as a subgroup of the consumer price index. Weights used at various times are consistent with those for the index as a whole. The indexes have been computed from prices of varying numbers of foods during different periods. They were based on 60 foods for January 1950 to December 1952, 90 foods from January 1953 to December 1963, and 96 foods beginning January 1964.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 563. Wholesale Prices of Selected Commodities: 1950 to 1971

[**In dollars per unit.** Annual averages. See also *Historical Statistics, Colonial Times to 1957*, series E 101–112, for selected items]

Item	1950	1955	1960	1965	1969	1970	1971
Farm products:							
Wheat, hard winter, No. 2, Kansas City [1]—bu.	2.226	2.256	1.993	1.560	1.392	1.483	1.578
Steers, choice [2]—100 lb.	30.258	24.052	26.708	25.719	30.385	30.042	32.188
Cotton, raw [3]—lb.	.362	.336	.314	.303	.255	.251	(NA)
Wool, combing and staple—lb.	1.981	1.423	1.163	1.251	1.223	1.031	.666
Eggs, fancy, heavy weight [4]—doz.	.447	.449	.409	.380	[5] .456	.432	.343
Corn, No. 2 yellow, Chicago—bu.	1.507	1.413	1.157	1.302	1.237	1.370	1.400
Processed foods:							
Flour, Kansas City—100 lb.	5.427	5.935	4.992	5.465	5.438	5.569	5.446
Beef, choice—100 lb.	47.424	40.280	44.881	43.048	48.617	48.929	53.505
Milk, Chicago—qt.	.175	.199	.238	.265	(NA)	(NA)	(NA)
Sugar, granulated (excl. excise tax)—lb.	.078	.084	.087	.095	.107	.112	.117
Coffee, tin—lb.	(NA)	.907	.699	.803	.786	.951	[6] .925
Lard, refined, cartons, Chicago—lb.	.157	.151	.135	.176	.154	.168	[5] .157
Textile products:							
Cotton sheeting, Class A—yd.	.259	[7] .213	.223	.225	.235	(NA)	.261
Suits, men's, medium grade—each	(NA)	40.640	44.442	(NA)	60.173	(NA)	67.947
Hides, skins, leather, and leather products:							
Cattlehides, packer, heavy native, steer—lb.	.256	.125	.138	.143	.146	.129	.144
Cattlehide leather, upper workshoe, elk—sq. ft.	.489	.339	.375	.464	(NA)	(NA)	(NA)
Oxfords, men's, elk or kip side upper—pair	4.857	[7] 5.113	(NA)	5.891	7.095	7.386	(NA)
Fuel, power, and lighting materials:							
Coal, anthracite, chestnut—sh. ton	12.583	(NA)	13.948	12.982	15.017	16.565	17.673
Coal, bituminous, large domestic sizes—sh. ton	(NA)	6.331	(NA)	6.926	(NA)	[6] 9.269	(NA)
Gasoline, Oklahoma—gal.	.100	.108	.117	.112	.116	.118	.120
Distillate fuel oil, No. 2 N.Y. harbor—gal.	.083	.101	.095	.090	.101	.108	.116
Chemicals and allied products:							
Sulfuric acid—ton	18.054	22.350	22.350	23.513	32.300	32.300	31.452
Benzene—gal.	.253	.360	.340	.263	.250	.243	.228
Paint, outside—gal.	3.749	4.349	4.806	(NA)	5.534	[5] 5.669	5.847
Turpentine [8]—gal.	.531	.640	.489	.545	1.090	(NA)	[5] 1.200
Rubber and rubber products:							
Natural rubber, No. 1 ribbed, smoked sheets—lb.	.413	[7] .390	.385	.257	.262	.211	.180
Synthetic rubber, butyl, Grade I type—lb.	.186	.230	.230	(NA)	.250	(NA)	.250
Reclaimed rubber—lb.	.090	.101	.110	.115	.115	.115	(NA)
Lumber and wood products:							
Softwood plywood, interior grade [9]—1,000 sq. ft.	88.126	[7] 80.884	(NA)	(NA)	77.474	(NA)	(NA)
Flooring, maple—1,000 bd. ft.	180.271	181.477	208.948	210.541	275.448	[5] 282.371	304.459
Pulp, paper, and allied products:							
Woodpulp, sulphate, bleached—sh. ton	126.156	147.625	156.208	147.500	147.500	161.500	164.667
Book paper, A grade—100 lb.	11.661	14.300	16.853	16.873	18.661	19.505	[6] 18.939
Newsprint, standard—ton	101.625	125.938	134.400	132.400	146.100	150.500	157.000
Toilet tissue—case	6.147	[7] 7.050	7.383	7.083	8.590	9.069	(NA)
Paper towels—case	3.263	[7] 3.742	4.110	4.074	[6] 4.380	4.461	(NA)
Grocery bags—1,000	3.151	3.408	4.752	4.689	4.906	5.301	4.715
Metal and metal products:							
Iron ore, Mesabi, non-Bessemer—long ton	7.717	10.067	11.450	10.550	(NA)	10.779	11.170
Iron and steel scrap, No. 1 heavy melting [10]—long ton	39.133	40.542	32.958	35.167	31.500	42.042	36.813
Steel rails, standard [11]—100 lb.	3.417	4.663	5.825	5.825	6.575	6.800	7.592
Copper ingot, electrolytic—lb.	.216	.373	.325	.354	.476	(NA)	.525
Aluminum ingot—lb.	.177	.237	(NA)	.245	.271	.288	.290
Aluminum sheet—lb.	(NA)	(NA)	.468	(NA)	.459	.463	.472
Nails, wire, 8d, common [12]—50 lb.	6.343	8.180	9.596	4.646	4.674	(NA)	5.511
Nonmetallic mineral products:							
Brick, building—1,000	25.671	[7] 29.151	(NA)	30.458	36.167	(NA)	(NA)
Glass, window, single B—50 sq. ft.	(NA)	(NA)	(NA)	5.349	6.472	6.595	(NA)
Shingles, asphalt roofing, strip—square	(NA)	5.305	5.261	5.883	6.441	(NA)	7.340
Miscellaneous:							
Cigarettes, nonfilter tip (excl. excise tax)—1,000	3.443	3.938	4.281	4.624	5.461	[5] 5.829	5.951

No. 564. Average Prices (Unit Values)—Selected Articles Exported and Imported: 1950 to 1971

[**In dollars per unit.** Includes trade of Puerto Rico with foreign countries. Values of goods imported represent market values in foreign country from which imported. Unit values obtained by dividing annual values of imports or domestic exports by annual quantities. Values of goods exported represent values at port of exportation. Unit values may show actual price movements only roughly for commodities subject to considerable price variations among different grades, methods of packing, etc., and to year-to-year variations in proportions of grades, etc. Unit values of agricultural exports also include effects of CCC sales for exports, at prices well below U.S. market quotations, and of other Government programs]

ARTICLE	Unit	1950	1955	1960	1965	1969	1970	1971

No. 565. Consumer Price Indexes, by Commodity Groups: 1920 to 1971

[1967=100. Prior to 1964, excludes Alaska and Hawaii. Beginning 1964, index structure revised to reflect buying patterns of urban wage earners and clerical workers in the 1960's, including single workers living alone as well as families of two or more persons; indexes for prior years apply only to families of two or more persons. See *Historical Statistics, Colonial Times to 1957*, series E 113-139, for indexes on 1947-49 base]

[1] Metropolitan areas as defined in May 1967; for definition, see text, p. 2.
[2] Places with 2,500-50,000 population in 1960.
[3] Includes the weighted average cost of renter and homeowner shelter, housefurnishings, and household operations. Four-person families in the lower budget are assumed to be renters. A small allowance for lodging away from home city is included in the higher budget. [4] Includes gifts, contributions, life insurance, and occupational expenses. [5] Includes gifts and contributions and, at the intermediate and higher levels, an allowance for life insurance and personal income taxes.

No. 571. Retail Price Indexes of Food—Selected Areas for Urban Wage Earners and Clerical Workers: 1950 to 1971

[1967=100. See text, p. 340, and headnote, table 565. Through 1960, indexes applied only to families of 2 persons or more in urbanized area. Beginning 1965, area indexes represent entire urban portion of standard metropolitan statistical area, except that standard consolidated area is used for Chicago and New York; see text, p. 2. See *Historical Statistics, Colonial Times to 1957*, series E 114–120, for indexes on a 1947–49 base]

No. 572. Average Retail Prices of Selected Foods: 1950 to 1972

[**In cents per pound, except as indicated.** Prior to 1965, excludes Alaska and Hawaii, and represents averages of prices reported by retail dealers in cities included in the Retail Food Index. Beginning 1965, data are estimated averages of prices reported by retail dealers. Number of cities varies according to the number of cities in which an item was priced and the availability of prices within the cities. Excludes sales taxes. Prices for individual cities combined on basis of population weights. See also *Historical Statistics, Colonial Times to 1957*, series E 161-176]

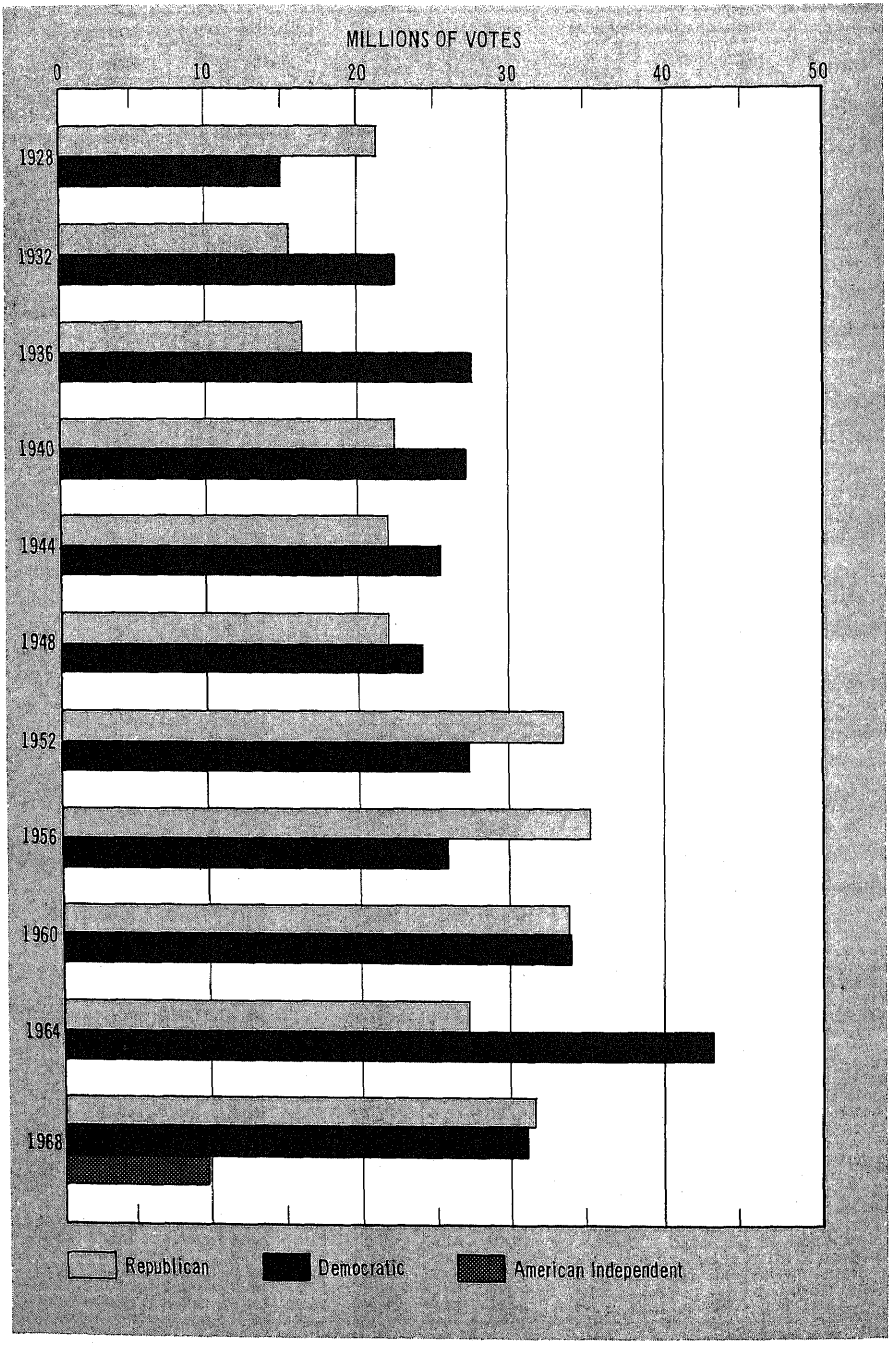
FIG. XXIII. POPULAR VOTE CAST FOR PRESIDENT, BY MAJOR PARTY: 1928 TO 1968

[See table 578]



Source: Chart prepared by U.S. Bureau of the Census.

Section 13

Elections

This section relates primarily to presidential, congressional, and gubernatorial elections. Also presented are summary tables on Congressional legislation, population of voting age, voter participation, and campaign expenditures.

Official statistics on Federal elections are collected by the Clerk of the House of Representatives and published biennially in *Statistics of the Presidential and Congressional Election* and *Statistics of the Congressional Election.* Congressional Quarterly Inc., Washington, D.C., publishes a special report, *Complete Returns of the 19—Elections by Congressional District,* in March or April of each odd-numbered year, presenting the results of presidential, congressional, and gubernatorial elections. Federal and State election statistics appear also in *America Votes,* issued biennially by the Governmental Affairs Institute, Washington, D.C.; and data on Federal elections appear in the *Congressional Directory,* United States Congress, and in official State documents.

Almost all Federal, State, and local governmental units in the United States conduct elections at various intervals—annual, biennial, quadrennial, or longer—for different types of offices and other purposes. No regular and complete system exists for reporting either the number of elections held or the numbers of votes cast for candidates, except for Federal offices and, in most States, for State offices. The conduct of elections is regulated by State laws or, in some cities and counties, by local charter. An exception is that the United States Constitution prescribes the basis of representation in Congress and the manner of electing the President of the United States, and grants to Congress the right to regulate the times, places, and manner of electing Federal officers. The 24th Amendment to the Constitution, adopted in 1964, gave citizens the right to vote in any election for Federal office without payment of tax.

Presidential election.—The election of the President is provided for in the Constitution, article II, section 1, through establishment of an electoral college in each State, for each presidential election. The method of casting the electoral vote was modified in 1804 by the adoption of the 12th Amendment to the Constitution. The number of electors, and therefore of electoral votes, is "equal to the whole number of Senators and Representatives to which the State may be entitled in Congress." The electors are elected by popular vote in all States. The 22d Amendment to the Constitution, adopted in 1951, limits presidential tenure to 2 elective terms of 4 years each, or to 1 elective term for any person who, upon succession to the Presidency, has held the office or acted as President for more than 2 years. The 23d Amendment, adopted in 1961, grants the District of Columbia electors for President and Vice President.

Congressional election.—The number of members in the House of Representatives is fixed by the Congress at the time of each apportionment; since 1912, it has remained constant at 435. However, the legislation granting statehood to Alaska and Hawaii allotted 1 Representative to each of those States and, during 1960 to 1962, increased the total of members to 437. The total reverted to 435 after reapportionment following the 1960 Census. The Constitution provides that "Representatives shall be apportioned among the several States according to their respective numbers . . . . " The Constitution also requires that each State have at least 1 Representative. Members are elected for 2-year terms, all terms covering the same period.

The Senate is composed of 100 members, 2 from each State, who are elected to serve for a term of 6 years. One-third of the Senate is elected every 2 years. Senators were originally chosen by the State legislatures. The 17th Amendment to the Constitution, adopted in 1913, prescribed that Senators be elected by popular vote.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957.* See preface.

No. 578. Vote Cast for President, 1900 to 1968, and for Representatives, 1930 to 1970, by Political Parties

[Prior to 1958, excludes Alaska and Hawaii. Includes vote cast for major party candidates endorsed by minor parties. See also *Historical Statistics, Colonial Times to 1957*, series Y 27-31 and Y 146-149]

– Represents zero.
[1] Includes votes for minor party candidates, independents, unpledged electors, and scattered write-in votes.
[2] Includes District of Columbia.
[3] Mainly Progressive in 1912 and 1924, States Rights and Progressive in 1948, and American Independent in 1968.
[4] Socialist Labor only.
[5] Includes 4,831,000 votes cast for La Follette, candidate for the Progressive Party.
[6] Workers Party. [7] Includes 9,906,000 votes cast for George Wallace, American Independent Party.
[8] See also table 585. [9] Includes minor party votes. [10] Includes Hawaii figures for July 1959.

X Not applicable.
[1] Membership increased from 233 to 234 by act of July 30, 1852 (10 Stat. L. 25). See *footnote* 4.
[2] Membership increased from 233 to 241 by act of Mar. 4, 1862 (12 Stat. L. 353). See footnote 4.
[3] Membership originally fixed at 283 but increased to 292 by act of May 30, 1872 (17 Stat. L. 192).
[4] Assigned after apportionment.
[5] Included in apportionment act in anticipation of statehood.
[6] Included in the 20 members originally assigned to Massachusetts but credited to Maine after its admission as a State, Mar. 15, 1820 (3 Stat. L. 555).

No. 585. Vote Cast for United States Representatives, by Major Political Parties, by States: 1966, 1968, and 1970

[**In thousands, except percent.** In each State, totals represent the sum of votes cast in each Congressional District, except as follows: In Alaska, Delaware, Nevada, Vermont, and Wyoming, only 1 Representative was elected from the State at large. In numerous States, one or other of the major parties had no candidate in some districts. In those cases where votes of a party as such are cast in endorsement of a candidate of another party, votes are counted as for the endorsing party. See also footnotes below]

State	1966				1968				1970

[1] Includes vote cast for minor parties.
[2] Arkansas law does not require tabulation of votes for unopposed candidates. 1966 data for 3d and 4th Districts; 1968 data for 1st and 3d Districts; 1970 data for 3d District only.
[3] As of 1970, Florida and Oklahoma do not require tabulation of votes for unopposed candidates.
[4] In 1966 and 1968, voters entitled to vote for any 2 candidates; total ascertained by adding the highest vote received by a single candidate in each political party; in 1970 there were two separate Districts.
[5] At-large election in 1966; by districts in 1968 and 1970.
[6] Includes endorsing votes cast by other parties for Democratic and Republican candidates.
[7] In 1970, includes "provisional votes".

No. 599. Participation in National Elections, by Population Characteristics: 1968 and 1970

[**Persons in thousands.** As of November. Covers civilian noninstitutional population 18 years old and over in Georgia and Kentucky, 19 and over in Alaska, 20 and over in Hawaii, and 21 and over elsewhere. Includes aliens. Figures are based on a population sample (see text, p. 1) and differ from those in tables 597 and 601 based on population estimates and official vote counts. Differences in percentages may also be due to overreporting of voting by persons in the sample. Excludes persons who did not report whether or not they had voted]

No. 606. Election Campaign Costs for National Offices: 1960 to 1968

[**Money figures in thousands of dollars.** Covers expenditures officially reported to the Clerk of the House and the Secretary of the Senate. Cost of political activities at all levels, including primaries and intrastate committees, estimated by Citizens' Research Foundation at $200 million for 1964 and $300 million for 1968. Known campaign debts not actually reported are added to reported expenditures to determine total spending]

Expenditures	7,981	12,149	12,578	Percent of national spending	3.1	5.5	7.8
Debt	3,820	1,200	[2] 1,000				

– Represents zero. X Not applicable.
[1] Lateral fund transfers between national level committees have been deducted from expenditures and receipts except for the labor and miscellaneous committees expenditures, which represent total reported spending, even when some of the funds were transferred to other committees. The lateral transfers by labor committees, $1,035,000, and by miscellaneous groups, $214,000, are subtracted to avoid counting them twice in total "campaign costs."
[2] Democratic National Committee debt: Covers only unpaid post-convention presidential campaign expenses; excludes some $5 million in unpaid loans.

Section 14

Federal Government Finances and Employment

This section presents statistics relating to the financial structure and the civilian employment of the Federal Government. The fiscal data cover the essential apparatus of public financing, namely appropriations, taxes, other receipts, expenditures, and debt. Principal sources of the fiscal data are *The Budget of the United States Government* and related documents, published annually by the Office of Management and Budget, and the Department of the Treasury's annual *Combined Statement of Receipts, Expenditures, and Balances*, the official report relating to the receipts, appropriations, expenditures, and fund accounts. The *Statistical Appendix* to the *Annual Report of the Secretary of the Treasury* is a convenient summary of yearly data relating to somewhat broader fields. The personnel data relate to civil staffing and payrolls for the various public functions and agencies, to employee characteristics, and to civil service status.

Major budget concepts.—The unified, comprehensive budget concept was introduced in the 1969 budget. Data showing unified budget totals of budget receipts and outlays are presented in the 1973 *Budget* for the years 1954 to 1973; more detailed historical summary tables generally show data since 1963.

The *budget* totals embrace both the federally owned funds and the trust funds administered by the Government, such as the funds for social security, medicare, highways, airports and airways, and the Indian tribal funds. In addition, the budget shows, in part 2, a breakdown of the Federal fund and trust fund surplus or deficit.

Within the unified budget totals, an *expenditure account* and a *loan account* are distinguished. The loan account reflects net lending except for certain nonrecourse domestic loans and the foreign loans which are made on noncommercial terms. Receipts of the Government arising from its sovereign or compulsory powers are reported as receipts; all other receipts, i.e., from business-type or market-oriented activities, are offset against expenditures. Outlays (expenditures and net lending) are reported on a checks-issued basis except for interest, which is recorded on an accrual basis.

Treasury receipts and expenditures.—All receipts of the Government, with a few exceptions, are deposited to the credit of the Treasurer of the United States, regardless of ultimate disposition or availability for expenditure. Under the Constitution, no money may be withdrawn from the Treasury unless appropriated by the Congress.

The day-to-day cash operations of the Federal Government clearing through the accounts of the Treasurer of the United States are reported in the *Daily Statement of the United States Treasury*. The issue for the last day of the month contains information as to the public debt receipts and expenditures for the month, the public debt outstanding, and related data.

Receipts and expenditures of the Government classified as to budget and other transactions and showing the budget surplus or deficit appear in the *Monthly Statement of Receipts and Expenditures of the United States Government*. The monthly *Treasury Bulletin* contains analytical material on fiscal operations and related Treasury activities, including financial statements of Government corporations and business-type enterprises. Another special aspect of Federal finances is presented in the Treasury Department's monthly *Statement of United States Currency and Coin*.

Receipts such as taxes, customs duties, and miscellaneous budget receipts, which are collected by Government agencies, and expenditures represented by checks issued and cash payments made by disbursing officers are reported in the *Monthly Statement of Receipts and Expenditures of the United States Government* and in the annual *Combined Statement of Receipts, Expenditures, and Balances*. These monthly and annual reports include deposits and collections in, and payments from, accounts of Government agencies held outside the Treasury as well as those of the general account of the Treasurer of the United States and are on the same basis as the unified budget.

Tax collections.—Tax data are compiled by the Internal Revenue Service of the Treasury Department. The *Annual Report of the Commissioner of Internal Revenue* gives a detailed account of tax collections by kind of tax and by regions, districts, and States. The agency's three annual *Statistics of Income* reports present detailed data from individual income tax returns, corporation income tax returns, and business tax returns, respectively. The report on business tax returns presents financial data for sole proprietorships and partnerships and summary data for corporations. Periodic *Statistics of Income* publications present data from fiduciary income tax, estate tax, and gift tax returns, and data on sales of capital assets by individuals, foreign income and tax reported by corporations, depletion and related expenditures, and estate tax wealth.

Relation to national income accounts and GNP.—The Federal sector of the *national income and product accounts* focuses attention upon the Federal transactions entering into national income, the gross national product, and other portions of the national economic accounts (see table 612). The figures include transactions of both Federal and trust funds. However, they include only receipts and expenditures which directly affect the current flow of income and output, and therefore exclude such transactions as loans. Also, the Federal sector account records many taxes as they accrue, instead of as they are collected, and records most purchases when delivery is made.

Employment and payrolls.—The Civil Service Commission collects employment and payroll data from all departments and agencies of the Federal Government but not from the District of Columbia Government. Employment figures represent the number of persons who occupied civilian positions on the last day of the calendar month shown and who are paid for personal services rendered for the Federal Government, regardless of the nature of appointment or method of payment. Intermittent workers are counted if they performed any service during the report month.

Federal payrolls include all payments for personal services rendered during the calendar month and payments for accumulated annual leave of employees who separate from the service. Since most Federal employees are paid on a biweekly basis, the calendar month earnings are partially estimated on the basis of the number of work days in each month where payroll periods overlap consecutive months.

Federal employment and payroll figures are published by the Civil Service Commission in its regular *Annual Report* and its *Monthly Release, Federal Civilian Manpower Statistics*. It also publishes semiannual employment data for minority groups; annual reports on salary and wages; geographic distribution; and on occupations of white-collar workers as well as data on women Federal employees. Reports on occupations of Federal blue-collar workers are published biennially. Data on Federal employment are also issued by the Bureau of Labor Statistics in its *Monthly Labor Review* and in *Employment and Earnings*.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 609. Federal Budget Receipts, Outlays, and Debt: 1960 to 1972

[**In billions of dollars.** For years ending June 30, except as indicated]

DESCRIPTION	1960	1965	1966	1967	1968	1969	1970	1971	1972 est.
RECEIPTS, EXPENDITURES, AND NET LENDING									
Total budget surplus or deficit (−)	.3	−1.6	−3.8	−8.7	−25.2	3.2	−2.8	−23.0	−38.8
Receipts	92.5	116.8	130.9	149.6	153.7	187.8	193.7	188.4	197.8
Outlays	92.2	118.4	134.7	158.3	178.8	184.5	196.6	211.4	236.6
Expenditure account, surplus or deficit (−)	2.2	−.3	(Z)	−3.6	−19.1	4.7	−.7	−21.9	−37.8
Receipts	92.5	116.8	130.9	149.6	153.7	187.8	193.7	188.4	197.8
Expenditures, excluding net lending	90.3	117.2	130.8	153.2	172.8	183.1	194.5	210.3	235.6
Loan account, net lending	1.9	1.2	3.8	5.1	6.0	1.5	2.1	1.1	1.0
Loan disbursements	8.3	10.9	14.6	17.7	20.3	13.1	8.3	8.1	8.3
Loan repayments	6.4	9.7	10.8	12.6	14.3	11.6	6.2	7.0	7.2
BUDGET FINANCING									
Total	−.3	1.6	3.8	8.7	25.2	−3.2	2.8	23.0	38.8
Net borrowing from the public or repayment of borrowing (−)	2.2	4.1	3.1	2.8	23.1	−1.0	3.8	19.4	39.5
Other means of financing	−2.4	−2.5	.7	5.9	2.1	−2.2	−1.0	3.6	−.7
OUTSTANDING DEBT, END OF YEAR									
Gross Federal debt	290.9	323.2	329.5	341.3	369.8	367.1	382.6	409.5	455.8
Held by the public	237.2	261.6	264.7	267.5	290.6	279.5	284.9	304.3	343.8
OUTLAYS AS PERCENT OF GNP [1]									
Total	18.6	18.1	18.7	20.6	21.6	20.6	20.6	21.0	21.7
National defense	9.3	7.6	7.9	9.1	9.7	9.0	8.4	7.7	7.2
Human resources [2]	5.1	5.4	5.8	6.6	6.9	7.1	7.6	8.8	9.5
All other	4.2	5.1	5.0	4.9	5.0	4.4	4.6	4.5	5.1

Z Less than $50 million. [1] Gross national product.
[2] Comprises outlays for education and manpower, health, income security, and veterans benefits and services.

No. 610. Federal Budget Receipts, by Major Source, and Outlays, by Function—Percent Distribution: 1960 to 1972

[For years ending June 30. For basic data and explanation of terms, see table 615]

No. 615. Federal Budget—Receipts, by Source, and Outlays, by Detailed Function: 1970 to 1972

[**In millions of dollars.** For years ending June 30. Receipts reflect collections; outlays stated in terms of checks issued or cash payments. Covers all Federal agencies and programs and both Federal funds and trust funds. Excludes government-sponsored but privately-owned corporations, Federal Reserve System, District of Columbia government, and money held in suspense as deposit funds. See *Historical Statistics, Colonial Times to 1957*, series Y 254–256 and Y 356–367 for related data]

$100,001 or more	92–94	78–82	90–92	89–91	77	70	75	77	72	70	70

[1] Income after exclusions, deductions, and exemptions. For 1948–72, joint returns, in effect, double the tax on one-half of their taxable income. For 1954–72, the same treatment is provided for a surviving spouse. For 1952–72 heads of households compute their tax by use of a rate schedule which provides for about one-half the split income benefits allowed married couples filing joint returns. There was a maximum effective rate: 1944–53 on net income; 1954–63 on taxable income. [2] Includes effect of percentage reductions of tentative tax, which is tax computed from rate schedule before application of percentage reductions. [3] Includes effect of 7.5 percent, 10 percent, and 2½ percent tax surcharge imposed for 1968, 1969, and 1970, respectively.

No. 622. Individual Income Tax Liability and Effective Rates, for Selected Income Groups: 1954 to 1972

[Refers to income after exclusions but before deductions and exemptions. 1954–1963 figures assume deduction of 10 percent of adjusted gross income; 1964 figures assume larger of minimum standard deduction or 10 percent of adjusted gross income; 1970–1972 figures assume larger of low-income allowance, standard deduction, or 10 percent of adjusted gross income. Excludes self-employment tax. See *Historical Statistics, Colonial Times to 1957*, series Y 319–332, for similar data based on net income]

No. 629. Corporation Income Tax Returns—Summary: 1940 to 1969

[**Number of returns in thousands; money figures in billions of dollars.** Based on returns for periods ending between July 1 of year shown and July 1 of following year, as filed, prior to audit adjustments and other changes made after filing. All corporations are required to file returns except those specifically exempt, such as fraternal, civic, and charitable organizations not operating for profit. Excludes returns of inactive corporations. See source publications for changes in law affecting comparability of historical data. Beginning 1955, based on a probability sample. Corporate data based on income tax returns appear on pp. 470, 471, 477, 478, 480, and 483. See also *Historical Statistics, Colonial Times to 1957*, series Y 280–291]

ITEM	1940	1950	1955	1960	1965	1967	1968	1969
Returns with and without net income:								
Number of returns	473	629	807	1,141	1,424	1,534	1,542	1,670
Total receipts [1]	148	458	642	849	1,195	1,375	1,508	1,688
Net income less deficit [2]	9	43	47	44	74	78	86	81
Returns with net income:								
Number of returns	221	426	513	670	915	989	999	1,051
Total receipts [1]	125	431	585	724	1,080	1,221	1,350	1,469
Net income [2]	11	44	50	50	81	87	95	94
Total tax liability [3]	3	17	22	22	30	31	37	38
Income tax [3]	2	16	22	22	30	31	37	38

Distributions to stockholders [4]	6	11	13	17	25	27	31	32
Returns without net income:								
Number of returns	252	203	294	470	509	545	542	620
Total receipts [1]	23	27	57	125	115	153	158	219
Deficit [2]	2	2	3	7	7	8	9	13
Distributions to stockholders [4]	(Z)	(Z)	(Z)	1	1	1	1	2
Inactive corporations, number of returns	44	37	35	47	66	76	73	79

X Not applicable. Z Less than $500 million. [1] Consists of business receipts, interest less amortizable bond premium, rents, royalties, net gain from capital assets (as defined by law) and other property, dividends, and other taxable income. [2] Net income (less deficit) is a tax concept and therefore excludes wholly tax-exempt interest; beginning 1965, includes constructive taxable income from related foreign corporations.
[3] For 1940, includes defense tax. Beginning 1965, data are after adjustments for investment credit. Beginning 1967, includes tax surcharge. [4] Other than own stock.

1955	274.4	1,660	6.4	9.9	1971	398.1	1,923	21.0	9.9

Z Less than $50 million. [1] Based on estimated July 1 population; prior to 1960, excludes Alaska and Hawaii. [2] Calculated on total expenditures not reduced by interfund transactions representing interest and certain other payments to Treasury. Beginning 1968, expenditures are net of applicable receipts and Federal loan account repayments.

Section 15

State and Local Government Finances and Employment

Nationwide statistics relating to State and local governments, their numbers, finances, and employment, are compiled primarily by the Bureau of the Census. Each five years, the Bureau conducts a Census of Governments involving collection of data for all governmental units in the United States. The most recent is the 1967 Census of Governments; a summary of reports from that census appears in Appendix III of this book. The Bureau of the Census also conducts annual surveys which cover all the State governments and a sample of local governments. Publications issued annually by the Bureau of the Census include a report on governmental finances which presents figures for the Federal Government, nationwide totals for States and local governments, by type, and State-local data by States. Also issued annually are series of publications on State finances, city finances, and public employment and a descriptive leaflet, *Recurrent Publications on Governments*. There are also three series of quarterly reports: on tax revenue, on public construction expenditures, and on investment holdings of major public employee retirement systems.

Basic information for Census Bureau statistics on governments is obtained mainly by mail canvass from State and local officials; however, financial data for each of the State governments and for many of the large local governments are compiled from their official records and reports by Census Bureau personnel, and classified into uniform categories for statistical reporting.

Statistics regarding particular functions in which State and local governments have an important role are presented in other sections of this book (for example, Education, Social Insurance and Welfare Services, and Transportation—Land).

Governmental units.—The governmental structure of the United States includes, in addition to the Federal Government and the States, thousands of local governments—counties, municipalities, townships, school districts, and numerous kinds of "special districts." As shown by table 648, more than 81,000 local governments were identified by the 1967 Census of Governments. The figures for governmental units include all agencies or bodies having an organized existence, governmental character, and substantial autonomy. While most of these governments can impose taxes, many of the special districts—such as independent public housing authorities, the New York Port Authority, and numerous local irrigation, power, and other types of districts—are financed from rentals, charges for services, benefit assessments, grants from other governments, and other nontax sources. The count of governments excludes semi-autonomous agencies through which States, cities, and counties sometimes provide for certain functions—for example, "dependent" school systems, State institutions of higher education, and certain other "authorities" and special agencies which are under the administrative or fiscal control of an established governmental unit.

Finances.—Unless otherwise stated, financial data in this section relate to the fiscal years of the respective governments. Federal and State government figures are for fiscal years ending June 30, except for a few States with other closing dates in the calendar year specified. Beginning 1963, local government figures are for fiscal years which closed at various dates during the 12 months ended June 30 of the year specified; figures for 1962 and earlier years are for fiscal years ended during the calendar year.

Nationwide government finance statistics must be classified and presented in terms of uniform concepts and categories, rather than according to the highly diverse terminology, organization, and fund structure of individual governments. Accordingly, financial statistics which appear here for individual States, although based upon the

official records and reports of these governments, will not agree directly with figures appearing in such original sources except where particular segments of the official accounts conform explicitly to standard reporting categories.

The statistics on governmental finances distinguish among general government, utilities and liquor stores, and insurance trust activities. The general government sector comprises all activities other than those classified as utilities, liquor stores, and insurance trusts. The utility sector includes only water supply, electric light and power, gas supply, and transit systems operated by local governments. Liquor stores are operated by 17 States and by a few local governments. Insurance trust figures relate to employee retirement, unemployment compensation, and other social insurance systems administered by State and local governments.

Employment and payrolls.—Public employment and payroll data are mainly based on mail canvassing of State and local governments. Payroll amounts include all salaries, wages, and individual fee payments for the month specified, and employment numbers relate to all persons on governmental payrolls during a pay period of the month covered—including paid officials, temporary help, and (except where otherwise specified) part-time as well as full-time personnel. As in the case of financial data, figures shown for individual governments, such as States, cover major dependent agencies such as institutions of higher education, as well as the ordinary central departments and agencies of the government.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 647. Government Finances—Revenue, Expenditure, and Debt: 1950 to 1970

[**In billions of dollars, except as indicated.** Prior to 1960, excludes Alaska and Hawaii. Excludes intergovernmental revenue and expenditure. Local government amounts are estimates subject to sampling variation; see source. See also *Historical Statistics, Colonial Times to 1957*, series Y 384–681]

X Not applicable. Z Less than $500,000.

[1] Preliminary. [2] Includes amounts for types of taxes not shown separately.

[3] Excludes State-collected supplemental local sales taxes imposed by local governments under State enabling legislation, as well as locally administered taxes. [4] Municipalities may impose a tax up to the amount of the State tax, with full credit given by State against State-imposed tax. [5] Motor vehicle licenses only.

[6] 40 percent of wholesale price. [7] State rate per gallon in Hawaii County, 8 cents. Combined State and local rates per gallon, in cents: Hawaii 8; Honolulu, 8.5; Kauai, 9; and Maui, 10. [8] Includes a mandatory State-imposed 1 percent county sales tax. [9] 34 percent of retail price until July 1, 1971; 42 percent thereafter.

– Represents zero. X Not applicable.

[1] 16 percent based on Federal income tax at rates in effect on December 31, 1963.

[2] Tax credit. [3] Nonresident; not general. [4] Plus surtax of 2 percent on intangibles income over $5,000. Tax credit of one-half of 1 percent is applicable to the first $9,000.

[5] A tax is imposed at the rate of 6 percent on an individual's net capital gains of $2,000 or more.

[6] Subject to specified limitations. [7] Incorporates 1971 legislative actions.

[8] Plus $10 filing fee for each return; tax credit of $10 for each personal exemption allowed.

[9] Residents or nonresidents are not subject to income tax if their net income is $3,000 or less.

[10] Interest and dividends, and capital gains on intangibles, taxed at 8 percent; annuities at 2 percent.

[11] Minimum allowance; on earned income, actual amount up to $4,000. [12] Plus 10 percent surcharge.

[13] Individuals, estates, and trust taxed at rate of 10 percent of adjusted Federal income tax liability.

[14] Income from interest and dividends taxed at 4.25 percent. [15] Tax imposed on N.Y. resident individuals deriving income from N.J. sources and N.J. residents deriving income from N.Y. sources.

[16] Plus tax credit of $10 for single person and $25 for married persons or head of household.

[17] Plus additional 1 percent on income derived from a business, trade, or profession, other than as an employee.

[18] Plus additional $300 for joint returns and head of household. [19] Tax at 20 percent for Jan.–June and 15 percent for July–Dec. based on half of Federal income tax liability for each period; thereafter, 15 percent of Federal tax liability. [20] Person 65 or over is exempt from tax if his gross income is $2,800 or less; or $4,000 or less if he has a dependent. [21] Dividends and interest taxed at 6 percent; 4 percent on dividends from corporations with 75 percent of property taxable in State. [22] Individuals taxed at rate of 25 percent of Federal income tax liability, exclusive of the Federal surcharge, plus a 15-percent State surcharge.

Section 16

Banking, Finance, and Insurance

Flow of funds.—The flow of funds accounts of the Federal Reserve System (see tables 680 to 686) bring together statistics on all of the major forms of financial transactions and financial claims to present an economy-wide view of asset and liability relationships. In flow form, the accounts relate borrowing and lending to one another and to the nonfinancial activities that generate income and production. Each claim outstanding is included simultaneously as an asset of the lender and as a liability of the debtor. The accounts also indicate the balance between asset totals and liability totals over the economy as a whole. Data included here present end-of-year asset and liability positions in financial claims rather than flows that occurred during the year. Quarterly data are available in the *Federal Reserve Bulletin;* a discussion of the concepts and organization of the accounts appears in *Flow of Funds Accounts, 1945–1968,* published by the Board of Governors of the Federal Reserve System.

Banking system.—Banks in this country are organized under the laws of both the States and the Federal Government. State-chartered banks are supervised by officials of the respective States. "National" banks are supervised by the Comptroller of the Currency. *Reports of Condition* have been collected from national banks since 1863. Summaries of these reports are published in the Comptroller's *Annual Report,* which also presents data on the structure of the national banking system.

The Federal Reserve System was established in 1914 to exercise central banking functions, some of which are shared with the U.S. Treasury. It includes national banks and such State banks as voluntarily join the System. Statements of State bank members are consolidated by the Board of Governors of the Federal Reserve System with data for national banks collected by the Comptroller of the Currency into totals for all member banks of the System. Balance sheet data for member banks are published in condensed form in the *Federal Reserve Bulletin.*

The Federal Deposit Insurance Corporation, established in 1933, insures each depositor up to $20,000 in banks which are members of the Federal Reserve System and in such nonmember banks as join the insurance fund. From 1947 through 1968, a balance sheet for all banks in the country was published semiannually by the Corporation in *Assets, Liabilities, and Capital Accounts—Commercial and Mutual Savings Banks.* Since mid-1969, this volume has been a joint publication of the Federal Deposit Insurance Corporation, the Board of Governors of the Federal Reserve System, and the Comptroller of the Currency. An abbreviated balance sheet for all commercial banks has been published monthly by the Board of Governors of the Federal Reserve System.

Savings and loan and other credit agencies.—Government corporations and credit agencies make available credit of specified types or to specified groups of private borrowers, either by lending directly or by insuring or guaranteeing loans made by private lending institutions. Data on operations of Government credit agencies, along with other Government corporations, are available in reports of individual agencies; data on their assets and liabilities are published quarterly in the *Treasury Bulletin.*

Among other types of credit agencies, the most important are savings and loan associations, insurance companies, finance companies dealing primarily in installment sales financing, credit unions, and personal loan companies. Statistics of savings and loan associations are collected by the Federal Home Loan Bank Board. Statistics on loans, investments, cash, etc., of life insurance companies are published principally by The Spectator and by the Institute of Life Insurance in its *Life Insurance Fact Book.* Consumer credit data are published currently in the *Federal Reserve Bulletin.*

Federally chartered credit unions are under the supervision of the National Credit Union Administration, established in 1970. That agency also administers the Federal program under which savings accounts of members of all Federal credit unions and of qualified State-chartered credit unions are insured up to a maximum of $20,000. State-chartered credit unions are supervised by the respective State supervisory authorities.

Currency.—Currency, including coin and paper money, represents almost one-fourth of all media of exchange in the United States, with most payments made by check. All currency is now issued by the Federal Reserve Banks and the Treasury.

"Currency in circulation" or "money in circulation" (official *Statement of United States Currency and Coin*) refers to all coin and paper money outside the Treasury and Federal Reserve Banks, except gold and silver coin known to have been exported and, beginning with 1934, all gold coin. It includes all coin and paper money held by the public in the United States, whether in current active use or held idle. It also includes cash in vaults of commercial and savings banks, currency lost or destroyed, and currency carried abroad by travelers. Historical data on the stock of money and money in circulation appear in the *Statistical Appendix* to the *Annual Report of the Secretary of the Treasury.*

Securities.—A comprehensive series, new corporate securities offerings by type of issues and type of security, has been compiled by the Securities and Exchange Commission on a monthly basis since 1934. The data cover substantially all new issues offered for cash sale in the United States in amounts over $100,000 and with terms to maturity of more than one year. (See table 713.) This series is published monthly in the *Statistical Bulletin* of the Securities and Exchange Commission, the *Federal Reserve Bulletin*, and the *Survey of Current Business.*

In addition, the Commission has been compiling statistics since 1933 on the net change in outstanding corporate securities through cash transactions. The latter data are published in the Commission's *Statistical Bulletin* and also in the *Federal Reserve Bulletin.*

Monthly figures on the total value and volume of securities sold on each of the national securities exchanges have been published since October 1934 by the Securities and Exchange Commission. These figures include all sales effected on exchanges except, since March 1944, U.S. Government issues. They cover odd lots as well as round lots. The Commission also publishes figures on the total daily round-lot volume of trading in stocks on the New York Stock Exchange and the American Stock Exchange, showing short sales and several categories of member and nonmember purchases and sales. Daily odd-lot purchases and sales are reported separately.

Insurance.—Insuring companies are classified as either life or property. Companies which underwrite accident and health insurance only are included with life insurance; those which underwrite accident and health insurance in addition to one or more property lines are included with property insurance. Insuring companies, other than those classified as life, are permitted to underwrite one or more property lines provided they are so licensed and have the necessary capital and/or surplus.

Insurance is regulated by the various States and the District of Columbia, which collect a great deal of primary information on it. The Federal Government does not collect comprehensive statistics on insurance on a national basis.

There are a number of published sources for statistics on the various classes of insurance—life, health, fire, marine, and casualty. Individual States collect data on all insurers operating within their respective jurisdictions, and many of the States publish an annual insurance report giving individual company data and aggregates of certain items for the companies operating within the State. Organizations representing certain classes of insurers publish reports for these classes. Among them are the annual *Life Insurance Fact Book* of the Institute of Life Insurance, and the annual *Source Book of Health Insurance Data* of the Health Insurance Institute. Other sources are

the commercial publishers, such as The Spectator and the Alfred M. Best Company. The annual *Spectator Health Insurance Review* contains financial and operating data for individual health and accident insurance companies, including Blue Cross and Blue Shield Plans. *Best's Life Insurance Reports* and *Best's Insurance Reports*, fire and casualty edition, both annual publications, give individual company data for all types of life and fire and casualty insurance companies.

Public and private debt.—These data appear annually in the May issue of the monthly *Survey of Current Business* of the Department of Commerce. Net public and private debt outstanding is a comprehensive aggregate of indebtedness of borrowers after elimination of certain duplicating governmental and corporate debt. To obtain net figures, gross or total debt is adjusted for specific types of duplications pertaining to the following: (1) the Federal Government and its corporations and agencies generally; (2) State and local governments; and (3) within the private area, those affiliated corporations which operate under a single management. In the noncorporate private area, data are assumed to be net, since interpersonal debts are not measured in this series.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

– Represents zero or rounds to zero. X Not applicable. [1] Assets shown at market value, nonbank finance liability is redemption value of shares of open-end investment companies. No specific liability is attributed to issuers of stocks other than open-end investment companies for amounts outstanding. [2] Includes savings bonds, other nonmarketable debt held by the public, issues by agencies in the budget and by sponsored credit agencies in financial sectors, and loan participation certificates. [3] Business asset is corporate only. Noncorporate trade credit is deducted in liability total to conform to quarterly flow tables.
[4] Includes federally sponsored credit agencies not shown separately.

No. 690. Federal Reserve System—Member Bank Reserve Requirements: 1967 to 1972

[**Percent of deposits.** Since Oct. 16, 1969, member banks have been required to maintain reserves against balances above a specified base due from domestic offices to their foreign branches. Effective Jan. 7, 1971, the applicable reserve percentage was increased from the original 10 percent to 20 percent. A similar reserve requirement is imposed on borrowings above a specified base from foreign banks by domestic offices of a member bank. See also *Historical Statistics, Colonial Times to 1957*, series X 262-265]

Effective date of change [1]	Net demand deposits [2]				Time deposits [3] (all classes of banks)		
	Reserve city banks		Country banks		Savings deposits	Other time deposits	
	First $5 million	Over $5 million	First $5 million	Over $5 million		First $5 million	Over $5 million
In effect Jan. 1, 1967	16½		12		4	4	6
1967—Mar. 2	16½		12		3½	3½	6
Mar. 16	16½		12		3	3	6
1968—Jan. 11, 18	16½	17	12	12½	3	3	6
1969—Apr. 17	17	17½	12½	13	3	3	6
1970—Oct. 1	17	17½	12½	13	3	3	5
In effect Apr. 30, 1972	17	17½	12½	13	3	3	5
Legal requirements as of Apr. 30, 1972:							
Minimum	10		7		3	3	3
Maximum	22		14		10	10	10

[1] When two dates are shown, the first applies to the change at reserve city banks and the second to the change at country banks. [2] Demand deposits subject to reserve requirements are gross demand deposits minus cash items in process of collection and demand balances due from domestic banks. [3] Effective Jan. 5, 1967, time deposits such as Christmas and vacation club accounts became subject to same requirements as savings deposits.

No. 691. Federal Reserve System, All Member Banks—Income, Expenses, and Dividends: 1940 to 1971

[**Money figures in millions of dollars; ratios in percentages.** Prior to 1960, excludes all member banks in Alaska (except for one bank in 1955) and Hawaii; beginning 1960, includes one member bank in the Virgin Islands]

Item	1940	1945	1950	1955	1960	1965	1970 [1]	1971

No. 692. Federal Reserve System—Maximum Interest Rates Payable on Time and Savings Deposits: 1962 to 1972

[**Percent per year.** Maximum rates payable by Federal Reserve member banks; may not exceed maximum rates payable by State banks or trust companies on like deposits under laws of State where member bank is located]

Type of deposit	Jan. 1962	July 1963	Nov. 1964	Dec. 1965	July 1966	Sept. 1966	Apr. 1968	Jan. 1970–June 1972
Savings	[1] 4	[1] 4	4	4	4	4	4	4½
Multiple maturity:								
90 days or more	[2] 4	[2] 4	[2] 4½	[2] 5½	5	5	5	[3] 5–5¾
Less than 90 days (30–89 days)					4	4	4	4½
Single maturity:								
Less than $100,000					5½	5	5	[4] 5–5¾
$100,000 or more					5½	5½	[5] 5½–6¼	[6] 6¼–7½

[1] 3½ percent for deposits of less than 12 months maturity.
[2] Prior to July 20, 1966, time deposits other than savings were not segregated as to multiple or single maturity or by denomination. Rates shown for Dec. 1965 are for all maturities of 30 days or more; rates for July 1963 and Nov. 1964 are for deposits with maturities of 90 days or more and for Jan. 1962 for maturities of 12 months or more; for rates applicable to shorter maturities, see *Annual Report* of the U.S. Board of Governors of the Federal Reserve System, 1970, p. 232.
[3] 5 percent, 90 days to 1 year; 5½ percent, 1 to 2 years; 5¾ percent, 2 years and over.
[4] 5 percent, 30 days to 1 year; 5½ percent, 1 to 2 years; 5¾ percent, 2 years and over.
[5] 5½ percent, 30–59 days; 5¾ percent, 60–89 days; 6 percent, 90–179 days; 6¼ percent, 180 days and over.
[6] 6¼ percent, 30–59 days; 6½ percent, 60–89 days; 6¾ percent, 90–179 days; 7 percent, 180 days to 1 ye percent, 1 year or more. Effective June 24, 1970, maximum interest rates on maturities of less than 90 day suspended.

No. 703. Federal and State-Chartered Credit Unions—Summary: 1950 to 1971

[As of December 31. Includes District of Columbia, Puerto Rico, Canal Zone, Guam, and Virgin Islands, except as noted. See also *Historical Statistics, Colonial Times to 1957*, series X 403–414]

YEAR	NUMBER				AMOUNT (mil. dol.)					
	Credit unions reporting [1]		Members (1,000)		Assets		Loans outstanding		Savings	
	Federal	State [2]	Federal	State [2]	Federal	State [2]	Federal	State [2]	Federal	State [2 3]
1950	4,984	5,587	2,127	2,483	406	600	264	416	362	522
1955	7,806	8,258	4,032	4,121	1,267	1,476	863	1,071	1,135	1,312
1960	9,905	10,151	6,087	5,971	2,670	2,989	2,021	2,381	2,344	2,637
1965	11,543	10,521	8,641	8,115	5,166	5,385	3,865	4,233	4,538	4,682
1970	12,977	10,679	11,966	10,853	8,861	9,089	6,969	7,137	7,629	7,894
1971 (prel.)	12,754	10,579	12,869	11,454	10,582	10,450	7,946	8,031	9,264	9,055

[1] Does not represent total number chartered; reports are not received from all credit unions in operation, and some are inactive. However, the number of Federal unions reporting is same as number in operation.
[2] Alaska, Delaware, Hawaii, Nevada, South Dakota, Wyoming, Canal Zone, Guam, Virgin Islands, and, beginning 1965, District of Columbia have no State or local credit union law. [3] Includes members' deposits.

Source: 1950–1969, U.S. Social Security Administration, *Federal Credit Union Program*, annual, and *Social Security Bulletin*, monthly. Beginning 1970, National Credit Union Administration, *Annual Report of the Administration* and *State-Chartered Credit Unions*, annual.

No. 704. Savings and Loan Associations—Financial Items: 1950 to 1971

[**Money figures in millions of dollars.** As of December 31, except as indicated. Includes Puerto Rico and Guam. See headnote, table 705. Beginning 1965, excludes associations which have either liquidated or converted to banks; for details, see source. See also *Historical Statistics, Colonial Times to 1957*, series N 196–203]

[1] Net Federal Government and agency debt is the outstanding debt held by the public, as defined in *the Budget of the United States Government, Fiscal Year 1973*.

[2] Comprises debt of federally sponsored agencies in which there is no longer any Federal proprietary interest. Includes obligations of the Federal Land Banks, beginning 1950; debt of the Federal Home Loan Banks, beginning 1955; and debts of the Federal National Mortgage Association, Federal Intermediate Credit Banks, and Banks for Cooperatives, beginning 1968.

[3] Farm mortgages and farm production loans. Farmers' financial and consumer debt is included in the nonfarm categories.

[4] Financial debt is debt owed to banks for purchasing or carrying securities, customers' debt to brokers, and debt owed to life insurance companies by policyholders.

– Represents zero. [1] Excludes gold deposited with United States by International Monetary Fund.
[2] Beginning 1965, excludes bullion carried at monetary value but released for coinage use. Silver certificates were not redeemable in silver after June 24, 1968. Bullion held as security on that date, $289,694,144, was transferred to General Services Administration stockpile, $213,333,333, or released for coinage use or for sale, $76,360,811.
[3] Gold certificates outside Treasury, credits payable in gold certificates, and redemption fund for Federal Reserve notes. Excludes amounts held by Federal Reserve agents for Federal Reserve notes.
[4] Based on U.S. Bureau of the Census estimates of population.

No. 718. Production of U.S. Coins, by Denomination: 1960 to 1971

[**In millions of pieces.** Includes numismatic and uncirculated coins, as well as those produced for issue to the public. No gold coins have been minted since 1933; no standard silver dollars, since 1935. Cupronickel and silver-clad dollars were first minted and issued in 1971]

YEAR	Total	DOLLARS [1]		Half dollars	Quarter dollars	Dimes	5-cent pieces	1-cent pieces
		Non-silver	Silver-clad					
1960	2,811	(X)	(X)	26	94	272	250	2,169
1965	7,920	(X)	(X)	186	1,339	1,315	2,016	3,064
1968	6,534	(X)	(X)	250	325	908	195	4,856
1969	7,151	(X)	(X)	133	293	712	326	5,687
1970	7,904	(X)	(X)	5	556	1,103	757	5,483
1971	7,285	116	8	461	371	544	426	5,369

X Not applicable. [1] Public Law 91-607, Dec. 31, 1970, authorized the Secretary of the Treasury to mint and issue dollar coins for general circulation and half dollars of the same composition as the 25-cent and 10-cent pieces. It also authorized production of not more than 150 million numismatic silver-clad dollars to be sold to the public at premium prices.

[1] For 1950, average yield on taxable bonds due or callable after 15 years; thereafter, on those due or callable in 10 years or more. Data from U.S. Board of Governors of the Federal Reserve System.
[2] For 1950, estimated yields prevailing on highest grade issues in first quarter of year; thereafter, in February only. Through 1955, from National Bureau of Economic Research, New York, N.Y.; thereafter, Scudder, Stevens & Clark, New York, N.Y. [3] More than usually liable to error.
[4] Number of issues as of Aug. 13, 1971; number varies for earlier years.
[5] Yields based on number of stocks and determined from average of median yields as follows: 1950 to 1965 (Sept. 8), 14 stocks, 8 yields; beginning Sept. 9, 1965, 10 stocks, 4 yields. Issues converted to a price equivalent to $100 par and a 7 percent annual dividend before averaging.
[6] Yields are obtained by dividing the average per-share dividend by the average per-share price in each group.

No. 727. Securities—New Securities Offered for Sale: 1950 to 1971

[**In millions of dollars.** Estimated gross proceeds are derived by multiplying principal amounts or number of units by offering prices, except for municipal issues where principal amount is used. Covers substantially all new issues of securities offered for cash sale in United States in amounts over $100,000 and with terms of maturity of more than 1 year. Includes privately placed and publicly offered issues, unregistered issues, and those registered under Securities Act of 1933. See also *Historical Statistics, Colonial Times to 1957*, series X 355, X 359-362, and X 372]

No. 728. Securities—Net Change in Corporate Securities Outstanding: 1940 to 1971

[**In millions of dollars.** Covers estimated cash transactions only. New issues exclude foreign and investment companies, and include sales of securities held by affiliated companies, special offerings to employees, and also new stock issues and cash proceeds connected with conversions of bonds into stocks. Retirements include the same types of issues, and also securities retired with internal funds or with proceeds of issues for that purpose. See *Historical Statistics, Colonial Times to 1957*, series X 363-365, for related but not comparable data]

NA Not available. [1] For 1955, includes $1.9 billion group life insurance for Federal employees and for 1968, $3.4 billion.

[2] Includes servicemen's group life insurance of $27.4 billion for 1965, and $16.8 billion for 1970.

[3] The rate is the ratio of the number of policies lapsed or surrendered (for cash, extended term, or reduced paid-up insurance), less reinstatements, to the mean number of policies in force.

[4] Total income and payments to policyholders include data on operations of accident and health departments of life insurance companies; since these data are not shown separately, components do not add to totals.

[5] Beginning 1955, accidental death benefits included with death payments.

No. 739. Major Medical Expense Insurance—Persons Covered: 1955 to 1970

[**In thousands.** As of December 31. For 1955, persons of all ages; thereafter, persons under 65 years of age only. Represents persons covered by insurance companies only. Excludes members of the Blue Cross-Blue Shield, medical-society sponsored, and all other independent plans. Major medical expense insurance provides protection against especially heavy medical bills resulting from "catastrophic" or prolonged illness, and is used as a supplement to basic medical care insurance or as a comprehensive integrated program providing both basic and major medical protection, including charges for private duty nursing, drugs, and medical appliances]

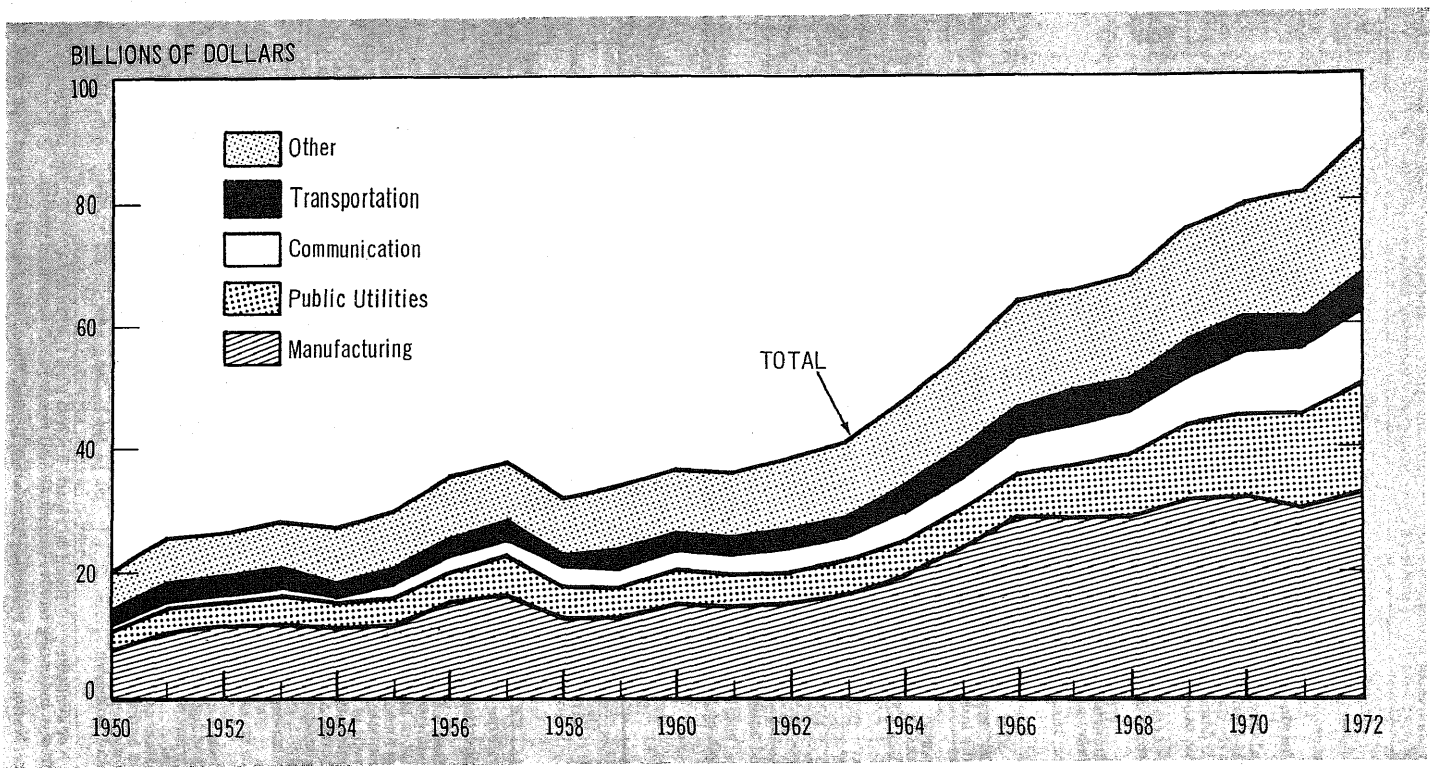
FIG. XXXIII. BUSINESS EXPENDITURES FOR NEW PLANT AND EQUIPMENT: 1950 TO 1972

[See table 756]



[1] Estimated; see footnote 1, table 756.

Source: Chart prepared by U.S. Bureau of the Census. Data from U.S. Bureau of Economic Analysis.

Section 17

Business Enterprise

This section relates to the place and behavior of the business firm and of business initiative in the American economy. It includes data on the number and types of businesses; assets and liabilities of corporations; types of business income and expenditures; business sales and inventories; employment and payrolls for businesses subject to the Federal Insurance Contributions Act; consumer cooperatives; mergers, acquisitions, and business failures.

The principal sources of these data are the *Survey of Current Business* and *The National Income and Product Accounts of the United States, 1929–1965*, published by the Bureau of Economic Analysis (formerly the Office of Business Economics); *County Business Patterns* issued by the Bureau of the Census; the *Federal Reserve Bulletin* issued by the Board of Governors of the Federal Reserve System; the annual *Statistics of Income* reports of the Internal Revenue Service; *The Failure Record Through (Year)*, issued by Dun & Bradstreet, Inc., New York; and *Fortune* and *The Fortune Directory*, issued by Fortune, New York. Other sources are publications of the Securities and Exchange Commission, the Federal Trade Commission, and the Administrative Office of the United States Courts.

Business firms.—A business firm is generally defined as a business organization under a single management and may include one or more plants or outlets; a firm doing business in more than one industry is classified by industry according to the major activity of the firm as a whole. The Internal Revenue Service concept of business firm relates primarily to the legal entity used for tax reporting purposes. Its *Statistics of Income* reports present data separately for proprietorships, partnerships, and corporations. While a few corporations file consolidated tax returns (i.e., one return for the parent firm and all its subsidiaries), most corporate tax returns represent individual corporations, some of which are affiliated through common ownership or control with other corporations filing separate returns.

Corporate assets and liabilities.—In its annual report, *Statistics of Income, Corporation Income Tax Returns*, the Internal Revenue Service presents balance sheet and income data for all active U.S. corporations. The *Quarterly Financial Report for Manufacturing Corporations*, published by the Federal Trade Commission, presents current quarterly income account and balance sheet data for manufacturing industries. In a quarterly release, *Net Working Capital of U.S. Corporations*, the Securities and Exchange Commission publishes data on components of current assets and liabilities of all U.S. corporations exclusive of banks, savings and loan associations, insurance companies, and investment companies.

Corporate income, profits, dividends, and taxes.—Several agencies, among them the Internal Revenue Service, the Bureau of Economic Analysis, and the Federal Reserve Board, compile corporate income account data. These data, however, are not comparable because of differing methods of compilation.

The Internal Revenue Service publishes financial data for all business enterprises, based on income tax returns filed by proprietorships, partnerships, and corporations. These data appear in *Statistics of Income—Business Income Tax Returns* and *Corporation Income Tax Returns*. Supplemental reports published periodically present data on foreign income and taxes reported by U.S. corporations.

The corporate data issued by the Bureau of Economic Analysis (BEA) are a part of its national income and product accounts and are defined as required for purposes of national income estimation. The primary sources of data for the estimates of pro-

fits, taxes, dividends, and undistributed profits are the original corporate tax returns submitted to the Internal Revenue Service. Various adjustments of the *Statistics of Income* data are required by the national income treatment, particularly with respect to depletion, capital gain or loss, treatment of bad debts, measurement of income received from abroad, and intercorporate dividends, and because the original corporate income statements do not represent the final stage of information. BEA's corporate profits data also include the net earnings of several federally sponsored credit agencies which are not included in *Statistics of Income.*

Federal Reserve Board data relating to profits and dividends apply to particular industrial segments only, such as large manufacturing and public utility corporations.

Sources and uses of corporate funds.—These data indicate capital requirements of corporations and the manner in which they are financed. Sources of funds are equal to their uses. Certain discrepancies, however, interfere with this equality due to omission of such factors as (1) money accruing to corporations from an excess of sales over purchases of used plant and equipment, and (2) transactions in securities held as permanent investments except public offerings. Also, the balance sheet data upon which many of the financial flow estimates are based are not fully comparable with the tax-return based estimates of internal sources, or the establishment series underlying the figures on inventory change.

Business sales and inventories.—Business sales and inventories as defined by the Bureau of Economic Analysis are the sum of data for manufacturing, merchant wholesalers, and retail trade. Sales are estimated aggregate values and inventories are book values at the end of the period. Sales signifies sales or shipments for retail and wholesale trade and billings or shipments for manufacturing. Trade inventories are valued at cost of merchandise on hand, while manufacturers' inventories are valued at approximate current costs or at book values, as reported by the manufacturer. Inventories data for manufacturing (see table 757) are based on data from the *Census of Manufactures* and the *Annual Survey of Manufactures.*

To ascertain net physical change in nonfarm inventories, book values of beginning and ending inventories of each year are expressed in terms of constant base year prices by means of selected Bureau of Labor Statistics wholesale price indexes appropriate to each industry. Net increment in deflated book value figures is then converted to a current price basis by index ratios or current prices to base year prices. Change in farm inventories is estimated by the Department of Agriculture from physical quantity data; therefore, no inventory valuation adjustment is shown.

Plant and equipment expenditures.—A survey by the Bureau of Economic Analysis (prior to 1971, a joint survey by the Securities and Exchange Commission and the Department of Commerce) presents quarterly data on actual and expected plant and equipment expenditures. In addition, at the end of each year, a survey is made of plans of business regarding capital expenditures during the next year. The data are based on reports submitted by transportation companies under Interstate Commerce Commission jurisdiction and by a large sample of other companies reporting to the Department of Commerce.

Industrial and commercial failures.—These data, collected by Dun & Bradstreet, are available by years since 1857 and by months since 1900. The number of failures includes concerns involved in court proceedings or voluntary actions likely to end in loss to creditors; discontinuances with outside obligations paid in full are not included. Data cover manufacturers, wholesalers, retailers, building contractors, and certain types of commercial service, but do not encompass finance, insurance, and real estate companies; railroads and steamship lines; and amusement enterprises. Failures data are published monthly in DUN'S.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957.* See preface.

[1] 1965, U.S. Social Security Administration; 1970, National Credit Union Administration. "Business" refers to loans outstanding.

[2] U.S. Dept. of Agriculture, Rural Electrification Administration. Electric distribution cooperatives currently borrowing from REA, average number of consumers served, and total revenues.

[3] U.S. Dept. of Agriculture, Rural Electrification Administration. Cooperatives currently borrowing from REA, number of subscribers at end of year, annual revenues.

[4] U.S. Social Security Administration. Estimated enrollees and annual income of plans. Enrollment is for most frequent type of benefit (surgical-medical). [5] 1968 data.

[6] Data cover fiscal years 1964–65 and 1969–70. 1969–70, preliminary. Since many cooperatives do more than one type of business, totals are less than would be obtained by adding number of cooperatives handling individual items or performing individual services. Figures for members refer to estimated number of memberships; some persons hold more than one.

No. 753. Gross Private Domestic Investment and Its Components: 1950 to 1971

[**In billions of dollars.** Prior to 1960, excludes Alaska and Hawaii. Consists of net acquisitions of fixed capital goods by private business and nonprofit institutions including commissions arising in sale and purchase of new and existing fixed assets, principally real estate, and value of change in volume of inventories held by business. Covers all private dwellings, including those acquired by persons for their own occupancy]

CLASS	1950	1955	1960	1965	1967	1968	1969	1970	1971 (prel.)
Gross private domestic investment	54.1	67.4	74.8	108.1	116.6	126.0	137.8	135.3	151.6
Nonfarm nonresidential structures and equipment [1]	24.2	34.8	45.2	66.4	77.3	83.2	92.9	96.0	100.4
Equipment [2]	15.7	21.2	27.7	41.6	50.0	53.6	59.2	60.0	63.1
Structures	8.5	13.6	17.4	24.9	27.3	29.6	33.7	35.9	37.3
Farm nonresidential structures and equipment [3]	3.7	3.3	3.3	4.9	6.0	5.7	5.7	6.2	8.4
Residential structures	19.4	23.3	22.8	27.2	25.1	30.1	31.8	30.4	40.6
Nonfarm	18.6	22.7	22.2	26.7	24.5	29.5	31.2	29.7	40.1
Farm	.8	.6	.6	.5	.6	.5	.6	.6	.5
Net change in business inventories [4]	6.8	6.0	3.6	9.6	8.2	7.1	7.4	2.8	2.2
Nonfarm	6.0	5.5	3.3	8.6	7.5	6.9	7.3	2.5	1.7
Farm	.8	.5	.2	1.0	.7	.1	.1	.3	.5

[1] Items for nonfarm producers' structures and equipment are not comparable with those shown in table 734 principally because the latter exclude investment by real estate industry, nonprofit organizations, and professional persons.
[2] Total producers' durable equipment less farmers' purchases of equipment, including business motor vehicles.
[3] Farm nonresidential structures plus farmers' purchases of equipment, including business motor vehicles. See footnote 2.
[4] After inventory valuation adjustment.

[1] Data represent number of names listed in July issue of *Dun & Bradstreet Reference Book*. See table 783 for class of industries covered.

[2] Includes concerns discontinuing following assignment, voluntary or involuntary petition in bankruptcy, attachment, execution, foreclosure, etc.; voluntary withdrawals from business with known loss to creditors; also enterprises involved in court action, such as receivership and reorganization or arrangement which may or may not lead to discontinuance; and businesses making voluntary compromise with creditors out of court.

[3] Liabilities exclude long-term publicly held obligations; offsetting assets are not taken into account.

Section 18
Communications

This section presents statistics on usage, finances, and operations of the various communications media: Postal service, telephone, telegraph, radio, television, newspapers, and books. Data on the postal service are included in the *Annual Report of the Postmaster General.* Statistics on revenues, volume of mail, and distribution of expenditures are presented in the U.S. Postal Service's annual *Revenue and Cost Analysis Report.* Principal sources of wire, radio, and television data are the Federal Communications Commission's *Annual Report,* its annual *Statistics of Communications Common Carriers,* and its annual releases of financial data reported by radio and television stations and networks. Statistics on number and circulation of newspapers and periodicals and on sales of books and pamphlets are issued by the Bureau of the Census in reports of the Census of Manufactures. Annual data on number and circulation of daily and Sunday newspapers appear in *International Yearbook Number,* issued by Editor and Publisher, New York. Monthly data on new books and new editions of books are presented by R. R. Bowker Company, New York, in *Publishers' Weekly.*

Postal service.—"Revenue and cost analysis" is the term used by the Postal Service to describe its system of cost ascertainment. This system utilizes random sampling for observation of the time required to handle various classes of mail and services. The sample results are applied to accounting records to estimate cost by class of service. Incremental cost estimates are also obtained and are used as the basis for postal rate recommendations.

Telephone and telegraph systems.—Statistical coverage of wire and radio communications has been concentrated in the Federal Communications Commission since its establishment in 1934. According to the Communications Act of 1934, as amended, the Commission has jurisdiction over carriers engaged in interstate or foreign communications service by means of wire or radio. The Commission requires all except the smallest of these carriers to file annual and monthly reports and requires the companies controlling any but the smallest to file annual reports. Full jurisdiction applies to practically all domestic and overseas telegraph carriers and to the Communications Satellite Corporation but not to a large number of telephone carriers which are engaged in interstate or foreign service only by connection with the facilities of another unaffiliated carrier. However, the gross operating revenues of the telephone carriers reporting annually to the Commission are estimated to cover over 90 percent of the revenues of all telephone carriers in the United States.

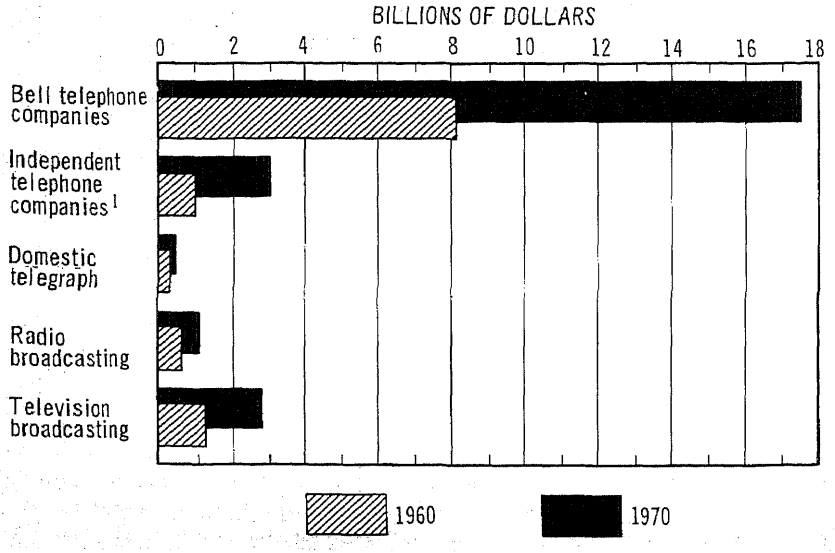
Broadcast.—The number of broadcast stations authorized refers to the number licensed or holding construction permits. Total broadcast revenues are defined as total sales of time, talent, programs, and services of all networks and stations, less commissions to agencies. Reports filed with the Federal Communications Commission by broadcast stations and networks cover substantially all units operating in the United States and its outlying areas.

Nonbroadcast radio.—Most of the nonbroadcast radio services are grouped together as the safety and special radio services, which constitute the greatest number of radio stations licensed by the Federal Communications Commission. Utilization of these services by individuals, industry, commerce, and State and local government covers broad fields of operations in connection with protection of life and property, industrial and agricultural production, transportation, disaster, and civil defense.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957.* See preface.

FIG. XXXIV. OPERATING REVENUES OF SELECTED COMMUNICATIONS MEDIA: 1960 AND 1970

[See tables 792, 793, 795, 805, and 806]



[1] Includes estimates for nonreporting companies.

NA Not available.

[1] After allowance for reimbursements, embossed envelope purchases, indemnity claims, and miscellaneous revenue and expenditure offsets. Revenues, expenditures, and deficits through 1950 include payments and receipts in a year applicable to prior years; beginning 1955, expenditures are shown in year in which obligation was incurred, and revenues in year which gave rise to the earnings, whether collected or accrued. During fiscal 1954, the Postal Service began receiving reimbursement for penalty and franked mail, and discontinued payment of subsidies to airlines. Revenues for 1960 include $37.4 million reimbursement from the Treasury General Fund for statutory public services. These and other changes affect comparability of figures.

[2] Includes capital expenditures for plant and equipment and cost of materials and supplies, but no provision for depreciation. Also includes costs of certain services rendered to other agencies without reimbursement but excludes costs of certain services rendered to the Postal Service by other agencies. Beginning 1955, represents obligations incurred. Beginning 1965, represents accrued expense including depreciation on fixed assets, reimbursable work for others, and expenses paid by certain other agencies without reimbursement by the Postal Service.

[3] Based on Bureau of the Census estimated total population as of Jan. 1, including Armed Forces abroad.

[4] Estimates. [5] Service not inaugurated. [6] Includes postal notes issued under act of Congress.
