ACKNOWLEDGMENTS

97th Annual Edition

Prepared under the direction of

William Lerner

Chief, Statistical Compendia Staff

Helen E. Teir, Assistant Chief, Statistical Compendia Staff, Data User Services Division, was responsible for general supervision and compilation. She was assisted by **Glenn W. King** and **Elisabeth A. Busse,** especially in the development aspects of new tables and in the preparation of the Recent Trends section and the USA Statistics in Brief insert, and by **Edward C. Jagers** for content and preparation of graphic charts. **Lars B. Johanson** and **David C. Shaw** participated in the research and analytical phases of assigned sections. **Minerva K. Moreland** was responsible for technical editorial supervision, assisted by **Ellen M. Ewell** for editing and clerical operations and by **Mary A. Rahall** for proof markup.

The cooperation of the many contributors to this volume is gratefully acknowledged. The source note below each table credits the various government and private agencies which have collaborated in furnishing information for the *Statistical Abstract.*

In a few instances, contributors have requested that their data be designated as subject to copyright restrictions, as indicated in the source notes to the tables affected. Permission to use copyright material should be obtained directly from the copyright owner.

July 1976

Library of Congress Card No. 4-18089

SUGGESTED CITATION

U.S. Bureau of the Census, *Statistical Abstract of the United States: 1976.* (97th edition.) Washington, D.C., 1976.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, Tel. (202) - 783-3238 or any U.S. Department of Commerce district office. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Price: $10.50 (cloth); $8 (paper) Stock Number 003-024-01173-5 (cloth); 003-024-01174-3 (paper).

PREFACE

The *Statistical Abstract of the United States,* published annually since 1878, is the standard summary of statistics on the social, political, and economic organization of the United States. It is designed to serve as a convenient volume for statistical reference and as a guide to other statistical publications and sources. The latter function is served by the introductory text to each section, the source notes appearing below each table, and Appendix IV, which comprises Guide to Sources of Statistics, Publications of Recent Censuses, and Guide to State Statistical Abstracts.

This volume includes a selection of data from many statistical publications, both governmental and private. Publications cited as sources usually contain additional statistical detail and more comprehensive discussions of definitions and concepts than can be presented here. Data not available in publications issued by the contributing agency but obtained from the agency's unpublished tabulations and records are identified in the source notes as "unpublished data." More information on the subjects covered in tables so noted may generally be obtained from the source.

Except as otherwise indicated, figures are for the United States as presently constituted. Although emphasis in the *Statistical Abstract* is given primarily to national data, many tables present data for regions and individual States and a smaller number for metropolitan areas and cities. A new appendix, Appendix I, Metropolitan Area Concepts and Components, presents explanatory text and a complete current listing of official standard metropolitan statistical areas (SMSA's) and their components. These were formerly a part of section 34 now omitted (see below). Statistics for the Commonwealth of Puerto Rico and for outlying areas of the United States are included in many State tables and are supplemented by information in section 31. Additional information for cities, counties, metropolitan areas, congressional districts, and other small units, as well as more historical data, are available in various supplements to the *Abstract.* (See inside back cover.)

The "Recent Trends" section beginning on p. xiii is also available separately in a reprint, *Recent Social and Economic Trends,* which can be obtained from the Superintendent of Documents, Washington, D.C. 20402. The price per copy is $1.05; a 25-percent discount is allowed on orders of 100 copies or more sent to the same address. Copies can also be purchased at any U.S. Department of Commerce district office located in certain large cities.

USA Statistics in Brief, 1976, the pocket-size loose insert in front of the book, is also available separately for 35 cents per copy at the above addresses.

Changes in the 1976 edition.—A new feature this year is Appendix III, Statistical Methodology and Reliability. This appendix attempts, briefly and in relatively nontechnical language, to provide the user of the statistics in this book with a general appreciation of some of the hazards which ought to be kept in mind when putting the data to work and, in a number of specific cases, with a better understanding of how the data were collected, a measure of their validity, and references to further readings. Plans are to expand this appendix in future editions.

Former sections 33 and 34, presenting statistics for Federal administrative regions and for metropolitan areas, respectively, are omitted from the *Abstract* beginning with this edition. They are to be replaced by a new, biennial *State and Metropolitan Area Data Book* which will be an expanded version of those sections. The first edition of the new *Data Book* is scheduled for issuance in 1978.

Statistics in this edition, the 97th, are for the most recent year or period available by July 1976. Each year the more than 1,400 tables and charts are reviewed and evaluated; new tables and charts of current interest are added, continuing series are brought up to date, and less timely data are condensed or eliminated. Text notes and appendixes are revised as appropriate.

There are a total of 118 new tables introduced in 29 of the 32 sections of this edition. Of special interest, perhaps, are tables devoted specifically to women and to the financial problems of large cities. The former include data on characteristics of female family heads (table 57), contraceptive status of married women (table 80), women in the Armed Forces (table 534), income and earnings of women (table 669), women below the poverty level (table 671), and

women-owned firms (table 832). The latter include finances of city governments by population size and, for selected large cities: Finances per capita, taxes paid by families, residential property tax rates, and city government employment and payrolls.

Among other subjects represented by new tables are the following:

*Vital statistics and health: Six new tables in section 2 on average lifetime, percent of ever-married persons who divorced or separated, malpractice insurance for physicians and surgeons, persons with visual impairments, and sales of drugs and drug products;

*Environment: Three new tables in section 6 on national expenditures for pollution control, national air quality stations, and production and sales of synthetic pesticides;

*Government: Thirteen new tables in sections 8 and 9 on Federal outlays in constant dollars, revenue losses due to Federal tax laws, Federal participation in credit markets, fixed capital formation of State and local governments, and county and city finances, including four tables relating to city finances noted above;

*Defense: Five new tables in section 11 on military sales and assistance to foreign governments, personnel and payroll of military agencies, and veterans benefits;

*Income: Five new tables in section 13 on money earnings and income of various groups of workers, households owning motor vehicles, and sources of personal income;

*Energy: Five new tables in section 19 on world energy consumption, fuels and electricity, the gas utility industry, and commercial nuclear power generation;

*International: Six new tables in section 32 on world population, rates of growth, projections, and characteristics.

Miscellaneous:

Children under 18, by presence of parents, p. 44
Indochina refugees, p. 106
State prison characteristics, p. 171
Percent of satisfied workers, p. 364
Assets of mutual funds, p. 497
Space vehicle systems, p. 578
Gasoline prices in selected countries, p. 596
Farm debt outstanding, p. 647
World commercial fisheries, p. 689
Neighborhood characteristics of homeowner and rental units, p. 748

In addition, graphic charts have been revised or updated and the number of tables showing both customary and metric units has been slightly increased. Many sections have undergone tabular rearrangement and format changes designed to improve the organization of subject matter. Of the tables included in the 1975 edition, 61 were omitted from this issue. The omissions represent primarily tables for which comparable details appear in other tables or for which no recent data are available.

Historical statistics.—The most recent historical supplement to the *Statistical Abstract* is the bicentennial edition, *Historical Statistics of the United States, Colonial Times to 1970* (see inside back cover). Many tables in this *Abstract* are directly linked to earlier data shown there by specific headnote references. (See Appendix II, pp. 910-912.)

Statistical reliability and responsibility.—The contents of this volume were taken from many sources. All data from either censuses and surveys or from administrative records are subject to error arising from a number of factors: Sampling variability (for statistics based on samples), reporting errors in the data for individual units, incomplete coverage, nonresponse, imputations, and processing error. (See also Appendix III, pp. 913-918.) The Bureau of the Census cannot accept the responsibility for the accuracy or limitations of the data presented here, other than for those which it collects. The responsibility for selection of the material and for proper presentation, however, rests with the Bureau.

For additional information on data presented.—Please consult the source publications available in local libraries or write to the agencies indicated in the source notes. Write to the Bureau of the Census only if it is cited as the source.

Suggestions and comments.—Many persons have offered suggestions for improving the presentation of data in the *Statistical Abstract* and its supplements. Their comments have been most helpful. Users of these publications are urged to continue to make their needs known for consideration in planning future editions. Suggestions and comments should be sent to the Director, Bureau of the Census, Washington, D.C. 20233.

Kilowatts (kW)	X	1.3	=	horsepower
Degrees Celsius	X	9/5+32	=	degrees Fahrenheit

UNITS OF LENGTH

Customary		Metric
Inch (in)	=	25.4 millimeters
Foot (ft)	= 12 in	= *0.305 meter*
Yard (yd)	= 36 in or 3 ft	= 0.914 meter
Rod (rd)	= 16 1/2 ft or 5 1/2 yd	= *5.029 meters*
Furlong (fur)	= 660 ft *or* 220 yd or 40 rd	= 201.168 meters
Mile (mi)	= 5,280 ft or 1,760 yd or 320 rd	= 1.609 kilometers

Metric			Customary
Millimeter (mm)	= .001 meter	=	0.039 inch
Centimeter (cm)	= .01 *meter*	=	0.394 inch
Decimeter (dm)	= .1 meter	=	3.937 inches
Meter (m)		=	3.281 feet
Dekameter (dam)	= 10 meters	=	32.808 feet
Hectometer (hm)	= *100 meters*	=	328.083 feet
Kilometer (km)	= 1,000 meters	=	0.621 mile

UNITS OF AREA

Customary		Metric
In^2 (sq in)	=	6.452 cm^2
Ft^2 (sq ft)	= 144 sq in	= 0.093 m^2
Yd^2 (sq yd)	= 1,296 sq in or 9 sq ft	= *0.836 m^2*
Rod^2 (sq rd)	= 272 1/4 sq ft or 30 1/4 sq yd	= 25.293 m^2
Acre	= 43,560 sq ft or 4,840 sq yd *or 160 sq rd*	= 0.405 ha
$Mile^2$ (sq mi)	= 27,878,400 sq ft or 3,097,600 sq yd *or 102,400 sq rd* or 640 acres	= 2.59 km^2

Metric		Customary
Sq millimeter (mm^2) =	.000001 m^2	= 0.002 sq in
Sq centimeter (cm^2) =	.0001 m^2	= 0.155 sq in
Sq decimeter (dm^2) =	.01 m^2	= 15.5 sq in
Sq meter (m^2) or centare (ca)		= 10.764 sq ft
Sq dekameter (dam^2) or acre (a) =	100 m^2	= 3.954 sq rd
Sq hectometer (hm^2) or hectare (ha) ≈	10,000 m^2	= 2.471 acres
Sq kilometer (km^2) ≈	1,000,000 m^2	= 0.386 sq mi

UNITS OF VOLUME

Customary		Metric
In^3 (cu in)		16.387 cm^3
Ft^3 (cu ft)	= 1,728 cu in	= 0.028 m^3
Yd^3 (cu yd)	= 46,656 cu in or 27 cu ft	= 0.765 m^3
Cord (cd)	= 128 cu ft	= 3.625 m^3

Metric		Customary
Cu millimeter (mm^3)	= .000000001 m^3	= 0.00006 cu in
Cu centimeter (cm^3)	= .000001 m^3	= 0.061 cu in
Cu decimeter (dm^3)	= .001 m^3	= 61.023 cu in
Cu meter (m^3) or stere (s)		= 35.315 cu ft

UNITS OF WEIGHT (OR MASS)

Customary		Metric
Avoirdupois Weight[1]		
Grain		= 0.065 gram
Dram (dr avdp)	= 27.343 grains	= 1.772 grams
Ounce (oz avdp)	= 16 drams or 437.5 grains	= 28.350 grams
Pound (lb avdp)	= 7,000 grains or 256 drams or 16 ounces	= 0.454 kilogram
Hundredweight (cwt)	= 100 pounds	= 45.359 kg
Ton, short (tn)	= 2,000 pounds	= 0.907 metric ton
Ton, long	= 2,240 pounds	= 1.016 metric tons
Troy Weight[2]		
Grain		= 0.065 gram
Pennyweight (dwt)	= 24 grains	= 1.555 grams
Ounce (oz t)[3]	= 480 grains or 20 dwt	= 31.104 grams
Pound (lb t)	= 5,760 grains or 12 ounces	= 0.373 kilogram

Metric		Customary
Milligram (mg)	= .001 g	= 0.015 grain, avdp/t
Centigram (cg)	= .01 g	= 0.154 grain, avdp/t
Decigram (dg)	= .1 g	= 1.543 grains, avdp/t
Gram (g)		0.035 oz avdp
Dekagram (dag)	= 10 g	= 0.353 oz avdp or 0.322 oz troy
Hectogram (hg)	= 100 g	= 3.527 oz avdp or 3.215 oz troy
Kilogram (kg)	= 1,000 g	= 2.205 lb avdp or 2.679 lb troy
Metric ton	= 1,000 kg	= 1.102 short tons or 0.984 long ton

[1] Used for weighing ordinary commodities.
[2] Used for weighing precious metals, jewels, etc.
[3] Also known as fine ounces.

UNITS OF CAPACITY

Liquid

Customary		Metric
Minim (min)		= 0.062 ml
Fluid dram (fl dr)	= 60 min	= 3.697 ml
Fluid ounce (fl oz)	= 8 fl dr	= 29.573 ml
Gill (gi)	= 32 fl dr or 4 fl oz	= 118.292 ml
Pint (pt)	= 16 fl oz or 4 gi	= 0.473 liter
Quart (qt)	= 32 fl oz or 2 pt	= 0.946 liter
Gallon (gal)	= 8 pt or 4 qt	= 3.785 liters

Dry

Customary		Metric
Pint (pt)		= .551 dm^3
Quart (qt)	= 2 pints	= 1.101 dm^3
Peck (pk)	= 16 pints or 8 quarts	= 8.810 dm^3
Bushel (bu)	= 64 pints or 32 quarts or 4 pecks	= 35.238 dm^3

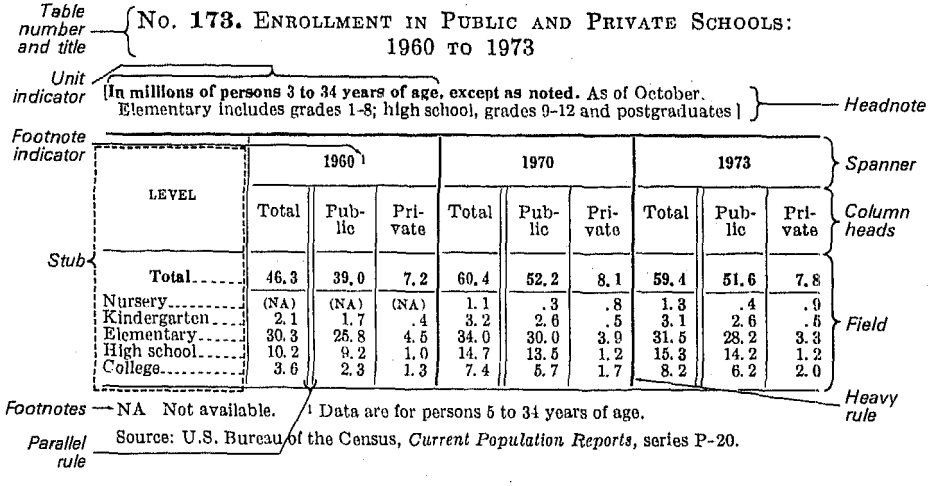
Metric		Customary
Milliliter (ml)	= .001 liter	= 0.034 fl oz (liquid) = 0.002 pt (dry)
Centiliter (cl)	= .01 liter	= 0.338 fl oz (liquid) = 0.018 pt (dry)
Deciliter (dl)	= .1 liter	= 3.382 fl oz (liquid) = 0.182 pt (dry)
Liter (l)[1]		= 1.057 qt (liquid) = 0.908 qt (dry)
Dekaliter (dal)	= 10 liters	= 2.642 gal (liquid) = 1.135 pk (dry)
Hectoliter (hl)	= 100 liters	= 26.418 gal (liquid) = 2.838 bu (dry)

[1] Defined as 1.000028 cubic decimeters.

The following symbols, used in the tables throughout this book, are explained in condensed form in footnotes to the tables where they appear:

—	Represents zero or rounds to less than half the unit of measurement shown.
B	Base figure too small to meet statistical standards for reliability of derived figure.
D	Figure withheld to avoid disclosure of information pertaining to a specific organization or individual.
NA	Data not enumerated, tabulated, or otherwise available separately.
NS	Percent change irrelevant or insignificant.
S	Figure does not meet publication standards for reasons other than that covered by symbol B, above.
X	Figure not applicable because column heading and stub line make an entry impossible, absurd, or meaningless.
Z	Entry would amount to less than half the unit of measure shown.

Example of table structure:



Headnotes immediately below table titles provide information important for correct interpretation or evaluation of the table as a whole or for a major segment of it.

Footnotes below the bottom rule of tables give information relating to specific items or figures within the table.

Unit indicators ("In thousands," "In millions of dollars," etc.) are usually given in boldface type as the first element of the headnote. In tables where several units are used, the unit indicators are generally given in the stub or in the column headings.

Parallel vertical rules are used to the right of a total column to indicate—

(1) that the components which follow add to the total (e.g., tables 1, 3, 28, etc.);

(2) in the case of derived figures, that the underlying data are additive to their total (e.g., table 25 for ratios, table 32 for percentages, table 71 for rates, and table 85 for averages).

Heavy vertical rules are used—

(1) in tables where the stub is continued into one or more additional columns across the table to separate each segment of stub and its accompanying data columns from the continued segments (e.g., tables 2, 5, 34, etc.);

(2) to set off independent sections of a table (e.g., tables 1, 4, 8, etc.).

Median: The value which divides the distribution into two equal parts—one-half the cases falling below this value and one-half exceeding it.

In many tables, details will not add to the totals shown because of rounding.

Note: Average annual percent changes were computed using the compound interest rate formula. Whenever possible, absolute values or values with less rounding than appear here were used in the computations.

The reference table cited for each item generally provides more complete information and notations concerning the item. In a number of instances, figures represent revisions and supersede figures shown elsewhere in this volume.

Symbols: — Represents zero. na Not available. ns Percent change not relevant or significant. x Not applicable. z Less than 0.05 percent or $50 million.

[1] Where na occurs in 1974 column, percent change calculated refers to 1970-1973 period.
[2] These data are as of different dates in the years shown. See reference tables for further information.
[3] Data not strictly comparable year to year because of changes in definition.
[4] Based on 266 standard metropolitan statistical areas (SMSA's).
[5] For 1960, 14 years old and over.
[6] Excludes Armed Forces living in barracks in U.S.
[7] Will not add to total families; estimates derived using different controls.
[8] 1965-1970.
[9] Average daily census per 100 beds.
[10] Average patient stay of 30 days or less.
[11] 1969 data. Percent changes are calculated as 1960-1969 and 1969-1974.
[12] Decline in water use in 1975 reflects the increasing use of recycled water.
[13] Particles of smoke, dust, fumes, droplets of viscous liquid, etc.
[14] Comprises employment taxes and contributions, unemployment insurance taxes, and other contributions.
[15] Excludes utilities, insurance trusts, and government liquor stores.
[16] Old-age, survivors, disability, and health insurance.
[17] Excludes care covered by social welfare programs; e.g. medical assistance under public aid, Medicare under social insurance, etc.
[18] 1967 data. Percent change is calculated 1967-1970.
[19] Federally-administered. Program initiated January 1, 1974.
[20] Beginning 1974, replaced by federally-financed Supplemental Security Income.
[21] 1961 data. Percent change is 1961-1970.
[22] Includes Armed Forces.
[23] Includes deceased veterans whose dependents were receiving pensions and compensation benefits.
[24] 1966 data.
[25] Not strictly comparable with earlier years due to revised procedures.
[26] Full-time equivalent employees; excludes State and local government agencies.
[27] Excludes social scientists.
[28] Includes farm operators doing one or more hours of farm work and unpaid family members doing 15 or more hours of farm work in survey week.
[29] Includes Puerto Rico.
[30] Firms with 11 or more stores.
[31] Not strictly comparable with later years.

Section 1

Population

This section presents statistics on the growth, distribution, and characteristics of the population of the United States. The principal source of these data is the Bureau of the Census, which conducts a decennial census of the population and a monthly current population survey and also prepares periodic population estimates. For a list of publications, see the Guide to Sources in Appendix IV of this book.

Decennial censuses.—The Constitution provides for a census of population within every 10-year period, primarily to establish a basis for apportionment of Members of the House of Representatives among the States. For over a century after the first census in 1790, the census organization was a temporary one. In 1902, the Bureau of the Census was established as a permanent Federal agency, responsible for enumerating the population and also for compiling statistics on other subjects and at other times.

In population censuses, each person is counted as an inhabitant of his usual place of residence. While this place is not necessarily his legal residence, voting residence, or domicile, the use of these different bases of classification would usually produce substantially the same statistics.

In recent censuses, some data were obtained from representative samples of the population rather than from a complete count, as follows: 5 percent in 1940, 20 percent in 1950, 25 percent in 1960, and 5, 15, and 20 percent in 1970. Exact agreement is not to be expected among the various samples, nor between them and the complete count, but sample data may be used with confidence where large numbers are involved and assumed to indicate patterns and relationships where small numbers are involved.

Estimates based on evaluation studies of the 1970 census results indicate a total net underenumeration of about 5.3 million persons, compared with 5.1 million in 1960. Among the persons who were not counted in 1970, about 3.4 million were white and about 1.9 million were Negro. The overall rate of net underenumeration in 1970 was about 2.5 percent, compared with 2.7 percent in 1960 and 3.3 percent in 1950. Data from the 1950, 1960, and 1970 censuses have not been adjusted for the estimated underenumeration. For details, see *Estimates of Coverage of Population by Sex, Race, and Age: Demographic Analysis*, PHC(E)–4.

Current Population Survey.—This is a monthly nationwide survey of a scientifically selected sample representing the noninstitutional civilian population and is subject to sampling error. The sample is located in 461 areas comprising 923 counties and independent cities with coverage in every State and the District of Columbia. About 55,000 housing units and other quarters are designated for the sample at any time, of which about 47,000 are occupied by households eligible for interview; of these, in turn, about 4 to 6 percent are, for various reasons, unavailable for interview. See also text, section 12, Labor Force, Employment, and Earnings.

Population estimates and projections.—National estimates are derived by use of decennial census data as benchmarks and of data available from various agencies as follows: Births and deaths (Public Health Service); immigrants (Immigration and Naturalization Service); the Armed Forces (Department of Defense); net movement between Puerto Rico and the U.S. mainland (Puerto Rico Planning Board); and Federal employees abroad (Civil Service Commission and Department of Defense). State estimates are based on similar data and also on a variety of data series, including school statistics from State departments of education and parochial school systems.

National population projections indicate the approximate future level and characteristics of the population under given assumptions as to future fertility, mortality, and net immigration. The method used to develop the projections involved preparation of projections of each of the components of population change—births, deaths, and net immigration—and the combination of these with July 1 estimates of the current population. Projections for States and metropolitan areas incorporate further assumptions about population redistribution through interarea migration.

Current estimates and projections are generally consistent with official census figures and do not reflect the amount of estimated census underenumeration. For details on methodology, see the source, cited below individual tables.

Standard Metropolitan Statistical Areas (SMSA) and Standard Consolidated Statistical Areas (SCSA).—SMSA's and SCSA's are defined for Federal interagency use by the Office of Management and Budget. Based on these OMB definitions, the entire territory of the United States may be classified as (*a*) metropolitan (inside SMSA's); or (*b*) nonmetropolitan (outside SMSA's). SCSA's are large metropolitan agglomerations consisting of groups of adjacent SMSA's. For descriptive details, tables showing changes in SMSA definitions for various years, and a listing of area titles and components of each SMSA and SCSA, see Appendix I of this book.

Urban and rural areas.—According to the 1970 census definition, the urban population comprises all persons in (*a*) places of 2,500 inhabitants or more incorporated as cities, villages, boroughs (except Alaska), and towns (except in New England, New York, and Wisconsin), but excluding persons living in the rural portions of extended cities; (*b*) unincorporated places of 2,500 inhabitants or more; and (*c*) other territory, incorporated or unincorporated, included in urbanized areas. An urbanized area consists of a central city, or twin cities, with a total of 50,000 inhabitants or more, together with contiguous closely settled territory (urban fringe). Certain incorporated places are designated as "extended cities" because they have one or more large portions with relatively low population density. These portions are classified as rural.

In censuses prior to 1950, the urban population comprised all persons living in incorporated places of 2,500 inhabitants or more, and certain areas (usually minor civil divisions) classified as urban under special rules relating to population size and density. This "previous urban definition" was replaced in 1950 by the current urban definition. Substantially the same definition was used in the 1950 and 1970 censuses except for the introduction of the "extended cities" concept in the latter. In 1960, (but not in 1970) certain towns in New England, townships in New Jersey and Pennsylvania, and Arlington County, Va., were also designated as urban places. In all definitions, the population not classified as urban constitutes the rural population.

Farm and nonfarm residence.—The rural population is divided into "rural-farm," comprising persons living on farms, and "rural-nonfarm," comprising the remainder. According to the 1960 and 1970 census definitions, the farm population consists of persons living in rural areas on places of less than 10 acres yielding agricultural products which sold for $250 or more in the previous year, or on places of 10 acres or more yielding agricultural products which sold for $50 or more in the previous year.

Race.—The population is divided into three major groups on the basis of race: White, Negro or Black, and other. The 1960 and 1970 censuses obtained the information on race principally through self-enumeration; thus, the data represent essentially self-classification by people according to the race with which they identify themselves. Persons of Mexican or Puerto Rican birth or ancestry who did not identify themselves as of a race other than white were classified as white. In 1970, the father's race was used for persons of mixed parentage who were in doubt as to their classification. In 1960, persons who reported mixed parentage of white and any other race were classified according to the other race; mixtures of races other than white were classified according to the father's race. The terms "Negro" and "Black" are interchangeable; specific usage here is dependent on the source of the data.

Mobility status.—Classification of the population by mobility status is based on comparison of an individual's place of residence at the survey or census date with that of a specified earlier date. *Nonmovers* includes all persons living in the same house in the United States at the beginning and end of the period. *Movers* includes all persons living in a different house in the United States at the beginning and at the end of the period. *Migrants* includes all persons who were living in different counties in the United States at the beginning and at the end of the period, and are classified according to whether they moved within the same State or into a different State. *Persons abroad* includes all persons living outside the United States at the beginning of the period.

Nativity.—The category "Native" comprises persons born in the United States, the Commonwealth of Puerto Rico, or an outlying area of the United States. It also includes persons born at sea or in a foreign country who have at least one parent born in the United States. Persons not having any of the foregoing qualifications are classified as "foreign born."

Ethnic origin.—"Ethnic origin" is determined on the basis of a question in the Current Population Survey asking for self-identification of the person's origin or descent and is, therefore, a report on what persons perceive their origin to be. The answers to this question produce results somewhat different from those based on inferences from such characteristics as place of birth, country of origin, language spoken in the home, or surname.

Household.—A "household" comprises all persons who occupy a "housing unit," that is, a house, an apartment or other group of rooms, or a room that constitutes "separate living quarters." A household includes the related family members and all the unrelated persons, if any, such as lodgers, foster children, wards, or employees who share the housing unit. A person living alone or a group of unrelated persons sharing the same housing unit as partners is also counted as a household. See text, section 27, Construction and Housing, for definition of "housing unit."

Group quarters are living arrangements for persons who do not live in housing units. Examples of group quarters are: A rooming house, an institution, a college dormitory, or a military barracks.

Family.—The term "family" refers to a group of two or more persons related by blood, marriage, or adoption and residing together in a household. A primary family consists of the head of a household and all other persons in the household related to the head. A secondary family comprises two or more persons such as guests, lodgers, or resident employees and their relatives, living in a household and related to each other but not to the household head.

Subfamily.—A "subfamily" is a married couple with or without children, or one parent with one or more unmarried children under 18 years old, living in a household and related to, but not including, the head of the household or his wife. Members of a subfamily are also members of the primary family with whom they live. The number of subfamilies, therefore, is not included in the number of families.

Married couple.—A "married couple" is defined as a husband and his wife living together in the same household, with or without children and other relatives.

Unrelated individuals.—"Unrelated individuals" refers to persons (other than inmates of institutions) who are not living with any relatives. A primary individual is a household head living alone or with nonrelatives only. A secondary individual in a household is a person such as a guest, lodger, or resident employee who is not related to any other person in the household. Persons in group quarters, except inmates of institutions, are classified as secondary individuals.

No. 3. Estimated and Projected Population, by Age and Sex, 1950 to 2000, and Illustrative Zero Growth Projections, 1980 to 2050

[In thousands, except percent. As of July 1. Includes Armed Forces abroad. The base date for the projections is 1974. For 1975 figures, see table 28. These projections were prepared using the "cohort-component" method. Series I, II, and III assume a slight improvement in mortality, an annual net immigration of 400,000, and completed cohort fertility rates (i.e., average number of lifetime births per 1,000 women) that move toward the following levels: I–2,700; II–2,100; III–1,700. Series II–X differs from Series II only in that it assumes no net immigration. The Series II and Series II–X fertility assumption represents "replacement level" fertility (i.e., the level of fertility at which the population would exactly replace itself in the absence of net immigration). See p. 1 for derivation of estimates and projections. See also *Historical Statistics, Colonial Times to 1970*, series A 23–25 and A 29–37]

X Not applicable. [1] Series II–X, which would reach zero growth around the middle of the twenty-first century, is one of many possible approaches to zero growth. Immediate cessation of net immigration, combined with replacement level fertility would not lead to immediate zero growth because the U.S. has a relatively young age structure (due to the post-World War II baby boom) which provides momentum for continued growth. Zero growth in 1975 (assuming no dramatic change in mortality) would require an annual total fertility rate of about 1,000 with net immigration at the current level, or about 1,200 with no net immigration. Total fertility rate in 1974 was between 1,800 and 1,900.

[1] See footnote 3, table 1.

[2] Puerto Rico was ceded to the United States by Spain in 1898. On July 25, 1952, pursuant to acts of Congress, it achieved the political status of the Commonwealth of Puerto Rico.

[3] Includes population of Corn Islands (1950, 1,304; 1960, 1,872) not shown separately. Lease of Corn Islands from Republic of Nicaragua was terminated in 1971. Area total excludes area of these islands (4 square miles).

[4] Enderbury Island uninhabited in 1950 and 1960; Canton and Enderbury uninhabited in 1970.

[5] Sand Island uninhabited at time of enumeration.

[6] Area is for Navassa (2 square miles), Baker, Howland, and Jarvis (3 square miles), and Palmyra (4 square miles); uninhabited at time of enumeration.

[7] Under jurisdiction of the United States in accordance with treaty of Nov. 18, 1903, with Republic of Panama.

[8] Administered by United States since July 18, 1947, under United Nations Trusteeship system.

[9] Estimated civilian population as of June 30, 1950.

[10] Census of 1958 conducted by the Office of the High Commissioner, Trust Territory of the Pacific Islands.

[11] Comprises 717 square miles of land area and 7,772 square miles of water area.

[12] Excludes U.S. citizens temporarily abroad on private business, travel, etc. Such persons were enumerated at their usual place of residence in the United States as absent members of their own households.

[13] Based on 20-percent sample of reports received.

[14] Based partially on tabulations provided by Dept. of Defense.

[15] Represents U.S. citizens abroad for extended periods. Since this population was enumerated on a voluntary basis, its coverage is probably less complete than that of other categories of Americans abroad.

No. 6. Center of Population: 1790 to 1970

["Center of population" is that point which may be considered as the center of population gravity of the United States, or that point upon which the United States would balance if it were a rigid plane without weight and the population distributed thereon with each individual being assumed to have equal weight and to exert an influence on a central point proportional to his distance from that point]

YEAR [1]	North latitude			West longitude			Approximate location
	°	′	″	°	′	″	
1790	39	16	30	76	11	12	23 miles east of Baltimore, Md.
1850	38	59	0	81	19	0	23 miles southeast of Parkersburg, W. Va.
1900	39	9	36	85	48	54	6 miles southeast of Columbus, Ind.
1950	38	50	21	88	9	33	8 miles north-northwest of Olney, Richland County, Ill.
1960	38	35	58	89	12	35	In Clinton Co. about 6½ miles northwest of Centralia, Ill.
1970	38	27	47	89	42	22	5.3 miles east-southeast of the Mascoutah City Hall in St. Clair County, Ill.

X Not applicable. Z Less than 0.05 percent. [1] For 1940–1975, includes admissions into, less discharges from, Armed Forces abroad. Through 1970, includes "error of closure" (the amount necessary to make the components of change add to the net change between censuses), for which figures are not shown separately.
[2] Percent of population at beginning of period. [3] Adjusted for underregistration prior to April 1, 1970.
[4] Prior to April 1, 1960, adjusted for underregistration of infant deaths.

[1] 1960 to 1970 based on 1960 population; 1970 to 1975 based on 1970 population.
[2] Comprises both net immigration from abroad and net interdivisional or interstate migration according to the area shown. Includes movements of persons in the Armed Forces.

No. 13. Population Projections—States: 1980 and 1985

[**In thousands.** As of July 1. Preliminary. These projections are consistent with the 1970 census, but do not reflect actual population trends since 1970. Thus, for many States, these projections no longer appear reasonable. See 1975 estimates of State populations in table 10. Roman numerals indicate interstate migration assumptions. Series I assumes 1960–1970 migration patterns will continue. Series III assumes no net interstate migration. Letter E represents national population projection series (since superseded by Series II; see table 3) in which the ultimate average fertility level is 2.1 births per woman]

No. 21. Large Metropolitan Areas—Population, 1960, 1970, and 1974

[In thousands, except as indicated. Covers 159 large SMSA's with estimated population of 200,000 or more as of July 1, 1974, and 13 standard consolidated statistical areas (SCSA's) as defined in *Standard Metropolitan Statistical Areas, 1975, Revised Edition* (Dec. 1975) as issued by the Executive Office of the President, Office of Management and Budget. Figures for 1970 include corrections through May 1975. Change measured from April 1, 1960, to April 1, 1970, and from April 1, 1970, to July 1, 1974; minus sign (—) indicates decrease. Rank based on unrounded figures. For more detailed data on large SMSA's and for definitions and components of SMSA's, SCSA's and New England County Metropolitan Areas (NECMA's), see Appendix I]

No. 26. Components of Population Change, by Race, Between 1960 and 1976

[In thousands, except as indicated. Resident population, excluding Armed Forces abroad; growth, birth, and death rates per 1,000 population estimated as of July 1]

ITEM	Total [1]	White	Negro
APR. 1, 1960, TO APR. 1, 1970			
Pop. at beg. of period	179,323	158,832	18,872
Net change during period	23,912	19,266	3,709
Births [2]	39,073	32,543	5,948
Deaths	18,209	15,986	2,107
Net civilian immig. [3]	3,048	2,709	−132
Pop. at end of period	203,235	178,098	22,581
APR. 1, 1970, TO JAN. 1, 1976			
Pop. at beg. of period	203,235	178,098	22,581
Net change during period	10,718	7,664	2,131
Births	19,102	15,622	3,058
Deaths	11,121	9,750	1,291
Net civilian immig. [3]	2,737	1,792	264
Pop. at end of period	213,953	185,762	24,612

ITEM	Total [1]	White	Negro
1960 (calendar year):			
Net growth rate	16.1	15.1	22.1
Birth rate	23.9	22.7	32.9
Death rate	9.5	9.4	10.3
General fertility rate [4]	118.0	113.2	152.7
1970 (calendar year):			
Net growth rate	12.0	10.6	18.0
Birth rate	18.3	17.3	25.4
Death rate	9.4	9.4	10.0
General fertility rate [4]	87.5	83.5	114.7
1975 (calendar year) [5]:			
Net growth rate	7.9	5.8	13.3
Birth rate	14.8	13.9	20.6
Death rate	9.0	9.0	9.0
General fertility rate [4]	66.8	63.4	88.9

[1] Includes other races not shown separately. [2] Adjusted for underregistration. [3] Includes changes due to movement of Armed Forces to posts overseas and the "error of closure" (the amount necessary to make the components of change add to the net change between censuses.)
[4] Registered births per 1,000 resident females aged 15 to 44 as of July 1. [5] Preliminary.

Negro households, 1,000	2,431	2,804	3,142	[5] 3,633	5,153	6,180	6,809	7,040	7,262
Other households, 1,000	95	118	127	[5] 149		741	824	854	913

[1] Includes small number of hotels, institutions, and other group quarters. [2] Average change from 1910.
[3] Computed by compound interest formula. [4] Obtained by dividing total population by number of households; hence, not strictly average size of household because total population includes members of group quarters.
[5] Population in occupied housing units.

No. 52. Households, Families, and Individuals—Projections: 1976 to 1990

[**In thousands.** As of **July 1.** Includes members of the Armed Forces living off post or with their families on post, but excludes all other members of the Armed Forces. See text, p. 3, for definitions of households and families. Series B assumes that the trends in marital status and household proportions observed over the period 1960 to 1974 will continue to 1990. Series A and Series C are based on weighted averages of the Series B proportions and the 1974 observed proportions. Series K assumes that the levels of proportions observed in 1974 will continue to 1990. For additional explanation, see source]

No. 64. Religious Bodies—Selected Data

[Represents latest information available from religious bodies with memberships of 50,000 or more; excludes a few groups giving no data. Not all groups follow same calendar year nor count membership in same way; some groups give only approximate figures. Roman Catholics count all baptized persons, including infants; Jews regard as members all Jews in communities having congregations; Eastern Orthodox Churches include all persons in their nationality or cultural groups; most Protestant bodies count only persons who have attained full membership, and previous estimates have indicated that all but a small minority of these are over 13 years of age; however, many Lutheran bodies and The Episcopal Church now report all baptized persons, and not only those confirmed. Data which appear in italics are "noncurrent," i.e., they are reported for 1973 or earlier. All other data are "current" and were reported in 1974 or 1975]

Section 2

Vital Statistics, Health, and Nutrition

This section presents vital statistics—data on births, deaths, fetal deaths (stillbirths), marriages, divorces—and data on communicable diseases, mental illness, medical care, hospitals, and nutrition. Vital statistics are compiled and published by the National Center for Health Statistics (NCHS) in the annual report, *Vital Statistics of the United States*, in certain reports of the *Vital and Health Statistics* series, and in the *Monthly Vital Statistics Report*. Reports in this field are also issued by State bureaus of vital statistics. Current data on fertility of the population and on age of persons at first marriage are compiled by the Bureau of the Census from its Current Population Survey (see text, p. 1) and published in *Current Population Reports*, series P–20.

Births and deaths.—The collection of death statistics on an annual basis began in 1900 with 10 registration States and the District of Columbia; the collection of birth statistics began in 1915, also with 10 States and the District of Columbia. The changing composition of the two registration areas [1] makes it impossible to obtain geographically comparable birth and death data for the entire United States before 1933. Beginning 1933, the birth- and death-registration areas have comprised the entire United States, including Alaska (beginning 1959) and Hawaii (beginning 1960). National statistics on fetal deaths were compiled for 1918 and annually since 1922.

Prior to 1951, birth statistics came from a complete count of records received in the Public Health Service (now received in NCHS). From 1951 through 1971, they were based on a 50-percent sample of all registered births (except for a complete count in 1955 and a 20- to 50-percent sample in 1967). Beginning 1972, they have been based on a complete count for States in the Cooperative Health Statistics System and on a 50-percent sample for all other areas. Mortality data have been based on a complete count of records for each area (except for a 50-percent sample in 1972). Beginning 1970, births and deaths to nonresidents of the United States have been excluded from the data. Fetal deaths and deaths among Armed Forces abroad are excluded. Data based on samples are subject to sampling errors; for details, see annual issues of *Vital Statistics of the United States*.

Mortality statistics are compiled in accordance with World Health Organization regulations, which specify that member nations classify causes of death according to the *International Statistical Classification of Diseases, Injuries, and Causes of Death*. The current classification, "Eighth Revision International Classification of Diseases, Adapted for Use in The United States," has been used beginning with 1968.

Marriages and divorces.—Statistics on marriages and divorces in the United States have been collected for each year 1867–1907, various years between 1907 and 1944, and each year since 1944. Estimates have been made for intervening years and for years in which collections were not complete. Marriage- and divorce-registration areas were established by the Public Health Service in 1957 and 1958, respectively. At the beginning of 1976, the marriage-registration area covered 41 States, the District of Columbia, Puerto Rico, and the Virgin Islands; the divorce-registration area, 29 States and the Virgin Islands.

Vital statistics rates.—Vital statistics rates computed by NCHS are based upon the enumerated population figures as of April 1 for 1940, 1950, 1960, and 1970 and upon the estimated midyear population figures for other years, provided by the Bureau of the Census, unless otherwise noted.

[1] For coverage of these areas, see *Historical Statistics of the United States, Colonial Times to 1970*, p. 44.

Medical care.—Data on national health expenditures, by source of funds and by object of expenditures, are compiled by the Social Security Administration and appear annually in the *Social Security Bulletin*. From this series are derived estimates of total personal health care expenditures, private consumer expenditures for health services, and portions of such expenditures met by private health insurance and third-party payments, and the expenditures of employers to maintain in-plant health facilities.

Statistics on hospitals obtained from the American Hospital Association's annual survey of hospitals are published annually in *Hospitals*, Guide Issue (superseded, in part, by *Hospital Statistics* in 1973), and cover all hospitals accepted for registration by the Association. To be accepted for registration, a hospital must meet certain requirements relating to number of beds, construction, equipment, medical and nursing staff, patient care, clinical records, surgical and obstetrical facilities, diagnostic and treatment facilities, laboratory services, etc. Statistics obtained from NCHS cover all hospitals in the United States and are published in the annual *Health Resources Statistics*, DHEW Publication No. (HRA) 1509, and in *Vital and Health Statistics* reports, Series 14. A hospital is defined as a facility with at least six inpatient beds that is licensed by the State as a hospital, or is operated as a hospital by a Federal or State agency and, therefore, not subject to State or local licensing laws.

Statistics on number, geographic distribution, and characteristics of health resources including physicians, dentists, nurses, other health occupations, hospitals, nursing homes, and outpatient facilities appear in *Health Resources Statistics* as well as NCHS Series 14. Statistics based on the 1970 Census of Population are presented on demographic characteristics of persons employed in 28 health occupations in *Decennial Census Data for Selected Health Occupations: 1970*, DHEW Publication No. (HRA) 76-1231. Data on utilization of health manpower and facilities providing long-term care, ambulatory care, hospital care, and family planning services are presented in NCHS Series 13, *Health Resources Utilization Survey*. These data are based on sample surveys of the records of institutions or questionnaires to personnel providing health care. Data on patient visits to providers of health care, as reported in health interviews, appear in NCHS Series 10, *Health Interview Survey*.

The Social Security Administration's *Health Insurance Statistics* is another source of data for hospitals and nursing homes as well as extended care facilities and home health agencies. These data are based on the Health Insurance for the Aged program (Medicare) begun in 1966 and differ from those of other sources because they are limited to facilities meeting Federal eligibility standards for participation in Medicare.

Another aspect of medical care is provided by statistics on patients in hospitals for the mentally ill, psychiatric services of general hospitals, outpatient psychiatric clinics, community mental health centers, institutions for the mentally retarded, and other mental health facilities. These data appear in the *Mental Health Statistics* reports, Series A and B, and the "Statistical Note" series published by the National Institute of Mental Health, and in *Residents in Public Institutions for the Mentally Retarded*, published annually by the U.S. Social and Rehabilitation Service.

Statistics based on the 1960 and 1970 Census of Population include information on persons in hospitals, in homes and schools for the handicapped, in homes for the aged and dependent, and other group quarters (see tables 62 and 63).

Illness and disability.—Annual data on notifiable diseases are compiled by the Public Health Service at its Center for Disease Control in Atlanta, Georgia, and published as a supplement to its *Morbidity and Mortality Weekly Report*. The list of diseases is revised biennially and includes those which, by mutual agreement of the States and the Public Health Service, are communicable diseases of national importance.

General health statistics, including morbidity, disability, growth and development, and findings from physiological and psychological testing, are collected by the National Center for Health Statistics in the Health Interview Survey and in the Health and Nutrition Examination Surveys. They are published in *Vital and Health Statistics*, Series 10 and 11. Morbidity statistics for members of the Armed Forces are prepared and published by the Departments of the Army, Navy, and Air Force. The Department of Labor compiles statistics of industrial injuries (see section 12).

Nutrition.—Statistics on annual per capita consumption of food and its nutrient value are estimated by the Department of Agriculture and published quarterly (nutrient value, annually) in *National Food Situation*. Data beginning with 1909 are published in *Food Consumption, Prices, and Expenditures*, Agricultural Economics Report No. 138, July 1968; they are updated in annual supplements. Data on Federal food distribution programs are published annually in *Agricultural Statistics*. Data on nutrient levels in the population and clinical signs of malnutrition are collected by NCHS and published in *Preliminary Findings of the First Health and Nutrition Examination Survey, United States, 1971–72*, DHEW Publication Nos. (HRA) 76–1219–1 and (HRA) 75–1229.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970*. See preface.

No. 68. Live Births, Deaths, Marriages, and Divorces: 1910 to 1975

NA Not available. [1] Through 1955, figures adjusted for underregistration.
[2] Represents deaths of infants under 1 year old, exclusive of fetal deaths; rates per 1,000 registered live births.
[3] Includes estimates and marriage licenses for some States for all years.
[4] Includes reported annulments and some estimated State figures for all years.
[5] Represents death-registration States only.
[6] Excludes nonresidents of the United States for births and deaths. [7] Preliminary.

No. 70. Total Fertility Rate and Intrinsic Rate of Natural Increase, by Race: 1940 to 1974

[Excludes Alaska prior to 1959 and Hawaii prior to 1960. Prior to 1960, based on births adjusted for underregistration; beginning 1960, on registered births. The *total fertility rate* is the number of births that 1,000 women would have in their lifetime if, at each year of age, they experienced the birth rates occurring in the specified year. A total fertility rate of 2,110 represents "replacement level" fertility for the total population under current mortality conditions. The *intrinsic rate of natural increase* is the rate that would eventually prevail if a population were to experience, at each year of age, the birth rates and death rates occurring in the specified year and if these rates remained unchanged over a long period of time. Minus sign (−) denotes decrease. See also *Historical Statistics, Colonial Times to 1970*, series B 11]

PERIOD OR YEAR	TOTAL FERTILITY RATE			INTRINSIC RATE OF NATURAL INCREASE		
	Total	White	Negro and other	Total	White	Negro and other
Annual average:						
1940–1944	2,523	2,460	3,010	4.6	3.9	9.8
1945–1949	2,985	2,916	3,485	11.7	10.9	17.2
1950–1954	3,337	3,221	4,185	16.8	15.4	25.7
1955–1959	3,690	3,549	4,716	21.1	19.5	30.7
1960–1964	3,459	[1] 3,331	[1] 4,375	18.6	[1] 17.1	[1] 27.7
1965–1969	2,636	2,516	3,447	8.2	6.4	18.6
1965	2,928	2,790	3,891	12.1	10.3	23.1
1966	2,736	2,609	3,615	9.7	7.9	20.4

1960	118.0	113.2	153.6	0.8	89.1	258.1	197.4	112.7	56.2	15.5	0.9
1965	96.6	91.4	133.9	0.8	70.4	196.8	162.5	95.0	46.4	12.8	0.8
1967	87.6	83.1	119.8	0.9	67.9	174.0	142.6	79.3	38.5	10.6	0.7
1968	85.7	81.5	114.9	1.0	66.1	167.4	140.3	74.9	35.6	9.6	0.6
1969	86.5	82.4	114.8	1.0	66.1	166.0	143.0	74.1	33.4	8.8	0.5
1970 [3]	87.9	84.1	113.0	1.2	68.3	167.8	145.1	73.3	31.7	8.1	0.5
1971 [3]	81.8	77.5	109.5	1.1	64.7	150.6	134.8	67.6	28.7	7.1	0.4
1972 [3]	73.4	69.2	100.3	1.2	62.0	131.0	118.7	60.2	24.8	6.2	0.4
1973 [3]	69.2	65.3	94.3	1.3	59.7	120.7	113.6	56.1	22.0	5.4	0.3
1974	[4] 68.4	64.7	91.0	1.2	58.1	119.0	113.3	54.4	20.2	4.8	0.3

[1] Rates computed by relating total births, regardless of age of mother, to women aged 15–44 years.
[2] Through 1960, rates computed by relating births to mothers aged 45 years and over to women aged 45–49 years.
[3] Excludes births to nonresidents of U.S. [4] The live birth rate for 1975 was 66.7. Detailed data not available.

Source: U.S. National Center for Health Statistics, *Vital Statistics of the United States*, annual.

No. 72. Attended Live Births, and Median and Low Birth Weight, by Race: 1950 to 1974

[Prior to 1960, excludes Alaska and Hawaii. Represents registered births. For number of births, see table 69]

YEAR	BIRTHS ATTENDED (1,000)			MEDIAN BIRTH WEIGHT [2]			PERCENT OF BIRTHS WITH LOW BIRTH WEIGHT [3]		
	By physician		By midwife or other [2]	Total	White	Negro and other	Total	White	Negro and other
	In hospital [1]	Not in hospital							
1950	3,126	252	177	7 lb.-5 oz.	7 lb.-5 oz.	7 lb.-3 oz.	7.6	7.2	10.4
1955	3,819	101	128	7 lb.-5 oz.	7 lb.-5 oz.	7 lb.-1 oz.	7.7	6.9	11.8
1960	4,114	49	94	7 lb.-5 oz.	7 lb.-6 oz.	6 lb.-15 oz.	7.7	6.8	12.8
1965	3,661	33	66	7 lb.-4 oz.	7 lb.-5 oz.	6 lb.-14 oz.	8.3	7.2	13.8
1970 [4]	3,708	5	18	7 lb.-4 oz.	7 lb.-5 oz.	6 lb.-14 oz.	7.9	6.8	13.3
1971 [4]	3,524	10	23	7 lb.-4 oz.	7 lb.-6 oz.	6 lb.-15 oz.	7.7	6.6	12.7
1972 [4]	3,234	7	18	7 lb.-5 oz.	7 lb.-6 oz.	6 lb.-15 oz.	7.7	6.5	12.9
1973 [4]	3,115	7	16	7 lb.-5 oz.	7 lb.-6 oz.	6 lb.-15 oz.	7.6	6.4	12.5
1974 [4]	3,134	11	16	7 lb.-5 oz.	7 lb.-7 oz.	6 lb.-15 oz.	7.4	6.3	12.4

[1] Includes all births in hospitals or institutions and in clinics. [2] Includes births with attendant not specified.
[3] Less than 2,500 grams (5 lb.-5 oz.) at birth. [4] Excludes births to nonresidents of the United States.

Source: U.S. National Center for Health Statistics, *Vital Statistics of the United States*, annual.

No. 73. Plural Birth Ratios, by Race and Age of Mother: 1968 and 1974

[Ratios are all plural live births per 1,000 total live births in specified groups]

RACE	Total	AGE OF MOTHER (in years)							
		Under 15	15–19	20–24	25–29	30–34	35–39	40–44	45–49
1968									
Total	**20.1**	**8.2**	**12.7**	**18.0**	**22.6**	**26.6**	**30.4**	**23.2**	**13.2**
White	19.4	9.0	11.9	17.1	21.6	25.4	29.0	23.4	11.2
Negro and other	23.8	7.8	14.8	23.3	29.2	33.3	37.7	22.2	20.9
1974 [1]									
Total	**18.6**	**7.4**	**12.3**	**17.2**	**21.4**	**24.2**	**25.7**	**22.2**	**9.4**
White	18.0	8.5	11.2	16.1	20.8	23.5	24.3	20.6	10.6
Negro and other	21.3	6.7	14.7	21.8	25.6	28.6	31.4	27.9	5.2

[1] Excludes births to nonresidents of the United States.

Source: U.S. National Center for Health Statistics, *Vital Statistics of the United States*, annual.

No. 83. Legal Abortions—Number, Rates per 1,000 Women 15-44 Years Old, and Ratios per 1,000 Live Births, by State of Occurrence: 1973 and 1974

[Numbers of legal abortions are from two surveys of hospitals, clinics, and physicians identified as providers of abortion services, conducted by the Alan Guttmacher Institute. Abortion rates are computed per 1,000 women 15-44 years of age on July 1, 1973, and July 1, 1974, respectively; abortion ratios are computed as the number of abortions per 1,000 live births from July 1, 1973, to June 30, 1974, and from July 1, 1974, to June 30, 1975, respectively, by State of occurrence]

No. 121. Self-Employed Physicians and Dentists—Median Net Earnings From Practice: 1959 to 1974

[Represents net income from practice after payment of tax-deductible professional expenses but before payment of income taxes. Relates to self-employed medical doctors under age 65, except as noted. Based on random sampling of all physicians in this category. Data for dentists cover gross income (total collected fees) minus professional expenses. For definition of median, see p. xii. See *Historical Statistics, Colonial Times to 1970*, series D 918–919, for physicians and dentists]

FIELD OF PRACTICE	1959	1965	1969	1970	1971	1972	1973	1974

No. 135. Patient Care Episodes in Mental Health Facilities, by Type of Treatment Facility: 1955 to 1973

["Patient care episodes" represent the number of times that individuals enter into treatment at a mental health facility. This number is defined as the number of residents in inpatient facilities or the number of persons on the rolls of outpatient facilities, plus the total additions to both types of facilities during the year. Excludes private psychiatric office practice, psychiatric service modes of all types in hospitals or outpatient clinics of Federal agencies other than Veterans Administration, all partial care episodes, and outpatient episodes of VA hospitals]

Item and year	All facilities	Inpatient services						Outpatient psychiatric services		
		Total	Mental		General [2]	VA [3]	Community mental health centers [4]	Total	Community mental health centers [4]	Other
			State and county	Private [1]

[1] A day when a person cut down on his usual activities for the whole day because of illness or injury. Includes bed-disability, work-loss, and school-loss days.
[2] A day when a person was kept in bed either all or most of the day because of illness or injury. Includes those work-loss and school-loss days actually spent in bed.
[3] A day when a person lost the entire work day because of illness or injury. Computed for persons 17 years of age and over in the currently employed population, defined as those who were working or had a job or business from which they were not on layoff during the 2-week period preceding the week of interview.
[4] Child's loss of entire school day because of illness or injury. Computed for children 6–16 years of age.

Unknown	221	86	135	179	66	113	53	25	28

– Represents zero. [1] Impaired vision includes blindness in one or both eyes, cataract, glaucoma, color blindness, detached retina or other condition of the retina, or any other trouble seeing with one or both eyes even when wearing glasses. [2] Severe visual impairment is defined as an inability to read ordinary newsprint with glasses using both eyes, or having no useful vision in either eye, or blindness in both eyes.
[3] Legal blindness is defined as visual acuity for distant vision of 20/200 or less in the better eye, with best correction, or widest diameter of visual field subtending an angle less than 20 degrees.

No. 149. Estimated Alcoholism, by Sex—States: 1970

[Population, 20 years old and over. An "alcoholic" is defined as one who is unable consistently to choose whether he shall drink or not, and who, if he drinks, is unable consistently to choose whether he shall stop or not. "Alcoholics with complications" are those who have developed bodily or mental disorders through prolonged excessive drinking. Data are rough approximations derived by the original Jellinek formula. In the early 1940's, E. M. Jellinek proposed a formula for estimating the number of "alcoholics-with-complications" from statistics on liver cirrhosis deaths. To arrive at the total number of alcoholics (those with and without complications) the results of the formula were multiplied by a factor, R, the value of which was thought to be 4. Subsequently it appeared that the value of R should have been 5. The formula was applicable to the years 1940–1945 but is thought not to have worked reliably after 1945. However, if the rate of the 1940–1945 period has remained substantially the same, then, with a further necessary correction of R to 5.3, applying the 1945 rates of alcoholism to the 1970 population, yields the number of alcoholics. The formula may be less reliable with smaller populations. For Alaska and Hawaii, incomplete base data add uncertainty to the estimates]

No. 152. Nutrition—Nutrients Available for Civilian Consumption per Capita per Day: 1940 to 1975

[Prior to 1960, excludes Alaska and Hawaii. Based on Bureau of the Census estimated population as of July 1. Quantities of nutrients computed by Agricultural Research Service, Consumer and Food Economics Institute, on the basis of estimates of per capita food consumption (retail weight), including estimates of produce of home gardens, prepared by the Economic Research Service. No deduction made in nutrient estimates for loss or waste of food in the home, use for pet food, or for destruction or loss of nutrients during the preparation of food. Civilian consumption. Data include iron, thiamin, riboflavin, and niacin added to flour and cereal products; other nutrients added primarily as follows: Vitamin A value to margarine, milk of all types, milk extenders; vitamin B_6 to cereals, meal replacements, infant formulas; vitamin B_{12} to cereals; ascorbic acid to fruit juices and drinks, flavored beverages and dessert powders, milk extenders and cereals. Quantities for 1960 and 1965 were estimated in part by Consumer and Food Economics Institute. Minus sign (−) denotes decrease. See also *Historical Statistics, Colonial Times to 1970*, series G 849-856 for related data]

No. 155. Civilian Per Capita Consumption of Major Food Commodities: 1950 to 1975

[In pounds, except as indicated. Civilian consumption represents the residual after exports, nonfood use, military procurement, and ending stocks are subtracted from the sum of beginning stocks, domestic production, and imports. For estimating techniques, see Agriculture Handbook No. 365, vol. 5, April 1972. 1950 excludes Alaska and Hawaii, and based on Bureau of the Census population estimates as of July 1; beginning 1960, on estimates based on 1970 Census of Population. See also *Historical Statistics, Colonial Times to 1970*, series G 881-915]

Section 3

Immigration and Naturalization

This section presents statistics related to immigration, naturalization, and alien registration. The principal source of these data is the *Annual Report of the Immigration and Naturalization Service.* Immigration statistics are prepared from entry documents. Statistics for naturalization are compiled from periodic reports by courts conducting such proceedings, and those for alien registrations are compiled from alien address report cards.

The continuous record of immigration into the United States began in 1819, under the Act of March 2. Immigration statistics were compiled by the Department of State from 1820 to 1874 and by the Treasury Department from 1867 to 1895. Since 1892 there has been a separate office or bureau of immigration, now a part of the Immigration and Naturalization Service. Information on immigration and naturalization has been included in annual reports issued by the Office of Immigration from 1892 to 1932, the Secretary of Labor from 1933 to 1940, the Attorney General for 1941, and the Immigration and Naturalization Service since then.

Immigrant.—An immigrant is defined as an alien admitted for permanent residence.

Quota immigrant.—Prior to July 1, 1968, quotas limited immigration only from the Eastern Hemisphere countries. Until 1920 there was only a qualitative limitation into this country, barring convicts, the mentally defective and insane, children under age 16 without their parents, persons likely to become public welfare cases, etc. The 1921 Act placed the first numerical ceiling upon immigration. Each country's quota was to be 3 percent of the number of people born in that country who were residing in the United States as reported by the 1910 Census of Population.

In 1924, a new formula was enacted for computing a country's quota, based on 2 percent of the number of people born in that country who were residing in the United States as determined by the 1890 Census of Population. The 1924 Act also provided that, beginning July 1, 1929, the quota of any country shall have the same ratio to 150,000 as the number of persons of that national origin living in the United States had to the total population living in the United States as determined from the 1920 Census of Population. This Act also established minimum quotas of 100 for all quota areas.

The Immigration and Nationality Act of 1952 simplified the national origins formula of the 1924 Act by basing the annual quota on a flat one-sixth of 1 percent of the U.S. population in the 1920 census. Quotas revised by Presidential proclamation totaled 158,261 in 1967.

Effective December 1, 1965, quotas under the 1952 Act were continued but made subject to a new preference system. Moreover, at the end of each year, until July 1, 1968, the numbers allocated to each country which were not used were transferred to an immigration pool and made available to preference immigrants who could not obtain visas because the quota for their country was exhausted. The allocations from the pool and from existing numbers could not exceed 170,000.

Nonquota immigrant.—Prior to December 1, 1965, nonquota immigrants comprised immigrants born in Western Hemisphere countries, and their spouses and children under age 21 if accompanying or following to join such immigrants; spouses and children of citizens of the United States; ministers of religion, and their spouses and children if accompanying or following such ministers; refugees; and others.

After December 1, 1965, nonquota immigrants are either "immediate relatives" or "special immigrants". Immediate relatives of United States citizens are parents (if the citizen is over age 21), spouses, and children under age 21. They are exempted from numerical ceilings.

Special immigrants include returning resident aliens (although these are often classed as nonimmigrants for statistical purposes), certain former citizens, and certain other specified groups. The spouses and children under age 21 of the following groups are considered special immigrants if they are accompanying or following to join such immigrants: Retired employees of our government abroad and ministers of religion. Special immigrants are also exempt from the numerical ceilings.

Effective July 1, 1968, a ceiling of 120,000 was set for Western Hemisphere natives on a first-come, first-served basis with no limitation on the number from any one country. "Immediate relatives" and "special immigrants" continue to be exempt from numerical ceilings. Effective December 1, 1968, a limit of 170,000 was set for immigrants who are natives of the Eastern Hemisphere, with a 20,000 maximum on natives of any one country. Selection is made on the basis of preferences favoring family reunification and persons with skills and talents needed here.

Nonimmigrant.—Nonimmigrants are aliens who enter the United States for temporary periods. Included in the nonimmigrant class are foreign government officials, their families, attendants, servants, and employees; temporary visitors for business or pleasure; aliens in continuous transit through the United States; students; and others. Resident aliens returning from a temporary stay abroad are classed as nonimmigrants, although they are legally special immigrants. Certain temporary admissions such as of persons in possession of border-crossing identification cards are not included in the nonimmigrant totals.

Displaced persons and refugees.—The Displaced Persons Act of 1948 was the first of eight special acts passed between 1948 and 1960 that provided for the admission of refugees from Communist-dominated countries, victims of natural calamities, and orphan children without regard to the usual numerical ceilings.

Status of Cubans.—Effective November 2, 1966, Cubans admitted or paroled into the United States after January 1, 1959, and present in the United States for at least 2 years may obtain permanent resident status. A record of the alien's admission for permanent residence will be created as of 30 months prior to filing of an application or the date of his last arrival in the United States, whichever is later. Cuban immigrants who have been admitted for permanent residence may also have the date of admission adjusted to a date 30 months prior to the date of this Act.

Alien registration.—The Immigration and Nationality Act provides that each alien who is required to be registered under the Alien Registration Act of 1940, and who is in the United States on January 1, must report his current address to the Attorney General during the month of January. Alien address report cards are distributed through the post offices of the United States or the local offices of the Immigration and Naturalization Service.

Naturalization.—Naturalization statistics for the United States began with the fiscal year 1907. Prior to this time each court kept records of naturalizations but no national data were compiled. The Act of June 29, 1906, effective September 27, 1906, provided for periodic returns by all courts conducting naturalization proceedings, and for the filing with a central Federal agency of a duplicate copy of each declaration of intention and petition for naturalization filed, and of each certificate of naturalization issued. Naturalization statistics were originally compiled by the Bureau of Immigration and Naturalization of the Department of Commerce and Labor, now the Immigration and Naturalization Service of the Department of Justice.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See preface.

Section 4

Education

This section presents data concerning the enrollment, personnel, level, extent, and finances of formal education in the United States. The chief sources are the decennial census of population and the Current Population Survey, both conducted by the Bureau of the Census (see text, p. 1), and annual, biennial, and other periodic surveys conducted by the National Center for Education Statistics.

The census of population has included data on school enrollment since 1840 and on educational attainment since 1940. The Current Population Survey has reported on school enrollment annually since 1945 and on educational attainment and illiteracy periodically since 1947.

The National Center for Education Statistics, located in the office of the Assistant Secretary for Education, U.S. Department of Health, Education, and Welfare, under legislation enacted in 1974, is continuing the traditional pattern of statistical studies and surveys conducted by the U.S. Office of Education since 1870. The annual *Digest of Education Statistics* provides summary data on pupils, staff, finances, and organization at elementary, secondary, and higher education levels. The *Digest* is also the primary source for detailed information on Federal funds for education and related activities. Projections of enrollment, graduates, teachers, and expenditures appear in the annual *Projections of Education Statistics.*

Other regular sources of education data include special studies of the National Center for Education Statistics, publications of the National Education Association, and annual or biennial reports of education agencies in individual States. The quinquennial census of governments, conducted by the Bureau of the Census, provides data on school district finances. Reports published by the Bureau of Labor Statistics contain data relating employment experience to educational attainment. Data on vocational training are available in *Vocational and Technical Education*, issued annually by the National Center for Education Statistics.

Types and sources of data.—The statistics in this section are of two general types. One type, exemplified by data from the Bureau of the Census, is based on direct questioning of individuals to obtain information about their own and their families' education. Data of this type relate to school enrollment and level of education attained, by age, sex, and other characteristics of the population. These school enrollment statistics reflect attendance or enrollment in any regular school within a given period; educational attainment statistics reflect the highest grade completed by an individual.

The second type, exemplified by data from the National Center for Education Statistics and the National Education Association, is based on reports from administrators of educational institutions and of local and State agencies having jurisdiction over education. Data of this type relate to enrollment, attendance, staff, and finances for the Nation, individual States, and local areas, by institutional characteristics.

Neither the National Center for Education Statistics nor the Bureau of the Census regularly include specialized vocational, trade, or business schools, residential schools for exceptional children, and correspondence schools in their surveys. National Center for Education Statistics enrollment data include kindergartens and publicly financed nursery schools; census enrollment data include kindergartens and all nursery schools. At the higher education level, the statistics of both agencies are concerned with institutions granting degrees or offering work acceptable for degree-credit, such as junior colleges. Statistics for certain other types of institutions beyond the high school, such as those offering organized occupational curriculums of nondegree character, are also collected by the National Center for Education Statistics.

State laws.—Although all States except Mississippi have requirements that children attend school, State laws vary as to the ages and circumstances of compulsory attendance. In the majority of States, the laws require that formal schooling begin by age 7 and continue to age 16.

Schools.—The National Center for Education Statistics defines a "school" as "a division of the school system consisting of a group of pupils composed of one or more grade groups, organized as one unit with one or more teachers to give instruction of a defined type, and housed in a school plant of one or more buildings. More than one school may be housed in one school plant, as is the case when the elementary and secondary programs are housed in the same school plant."

"Regular" schools are those which advance a person toward a diploma or degree. They include public and private nursery schools, kindergartens, graded schools, colleges, universities, and professional schools. "Public" schools are schools controlled and supported by local, State, or Federal governmental agencies; "private" or "nonpublic" schools are those controlled and supported mainly by religious organizations or by private persons or organizations.

The Bureau of the Census defines "elementary" schools as including grades 1 through 8; "high" schools as including grades 9 through 12; and "colleges" as including junior or community colleges, regular 4-year colleges, and graduate or professional schools. Statistics reported by the National Center for Education Statistics and the National Education Association by type of organization, as elementary level and secondary level, may not be strictly comparable with those from the Bureau of the Census because the grades included at the two levels vary, depending on the organization of junior high schools. The trend is for the enrollment in grades seven and eight to shift from an elementary to a secondary organization, with resultant changes in grade distribution.

School year.—Except as otherwise indicated in the tables, data relating to enrollment and staff refer to the school year which generally begins in September of the preceding year and ends in June of the year stated. Statistics concerning school finances are for a 12-month period, usually July 1 to June 30.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970*. See preface.

No. 188. Enrollment in Public and Private Schools, by Level: 1965 to 1984

[**In thousands.** As of fall. Elementary school covers kindergarten through 8th grade; secondary, grades 9 through 12. Both are for regular day schools. Data do not include independent nursery schools and kindergartens, residential schools for exceptional children, subcollegiate departments of colleges, Federal schools for Indians, and federally operated schools on Federal installations. College data include degree-credit and non-degree-credit enrollment]

No. 202. Years of School Completed, by Sex, 1975, and Projections to 1990

[**In thousands of persons 25 years old and over.** As of March 1. Excludes Armed Forces overseas and in barracks. Projections are based on the age-grade specific attainment trends between 1957-59 and 1969-70. The projections assume decline in the proportions of the population aged 25-29 terminating their education at a given level, some further attainment by ages 30-34, and a continuation of past attainment ratios for older age cohorts. Series 1 assumes lower rates of termination than indicated by the trends from 1957-59 to 1969-70. Series 2 assumes higher rates of termination. For basis of population projections, see headnote, table 3]

Year, series, and sex	Persons 25 years old and over	Years of school completed

No. 208. Lifetime and Mean Income of Males in Current and Constant (1972 Dollars), by Years of School Completed: 1956 to 1972

[Prior to 1961, excludes Alaska and Hawaii. Includes members of the Armed Forces living off post or with their families on post, but excludes all other members of the Armed Forces. Figures for lifetime income based on application of appropriate life tables to arithmetic mean income, by age, as obtained for a cross section of population in each year shown. See also *Historical Statistics, Colonial Times to 1970*, series H 648–663]

NA Not available.
[1] For 1960 and 1970, enumerated population as of Apr. 1; for all other years, estimated population as of July 1 of preceding year (1939, 1949, etc.). Excludes Armed Forces abroad. [2] As of fall of preceding year.
[3] Includes librarians and other nonsupervisory instructional staff. [4] Beginning 1960, estimated.
[5] Through 1950, includes community services; therefore, not comparable with later years.
[6] Comprises summer schools, community colleges, adult education, and, beginning 1960, community services.
[7] Excludes capital outlay by nonschool agencies.
[8] Based on current expenditures allocable to pupil costs, capital outlay, and interest.
[9] Excludes current expenditures not allocable to pupil costs.

Section 5

Law Enforcement, Federal Courts, and Prisons

This section presents data on crimes, arrests, law enforcement employment and expenditures, Federal court cases, the legal profession, Federal and State prisoners, juvenile delinquency, and use of the death penalty. A major source of data on these subjects is the Law Enforcement Assistance Administration (LEAA) which is the sponsor of the National Crime Panel, a continuing sample survey of households and commercial establishments conducted by the Bureau of the Census. Data based on this survey as reported in *Criminal Victimization in the United States* show the extent to which persons, households, and businesses have been victimized by certain types of crime. Other reports issued by LEAA are *National Prisoner Statistics, Children in Custody,* and the annual *Expenditure and Employment Data for the Criminal Justice System,* issued jointly with the Bureau of the Census. For a more detailed list of LEAA reports, see "Law Enforcement, Federal Courts, and Prisons" in Appendix IV of this book.

Other major sources of data on these subjects are: *Uniform Crime Reports for the United States,* issued annually by the Federal Bureau of Investigation; the *Annual Report of the Director* and *Special Reports on Federal Offenders and Persons Under the Supervision of the Federal Probation System,* issued by the Administrative Office of the U.S. Courts; and *Governmental Finances and Public Employment,* issued annually by the Bureau of the Census. Statistics on lawyers are compiled by the American Bar Foundation, Chicago, Illinois, and on law firms by the Bureau of the Census.

Law enforcement and legal jurisdiction.—Law enforcement is for the most part a function of State and local officers and agencies. The U.S. Constitution reserves general police powers to the States. By act of Congress, Federal offenses include only offenses against the U.S. Government and against or by its employees while engaged in their official duties, and offenses which involve the crossing of State lines or an interference with interstate commerce. Consequently, criminal offenses such as murder, robbery, burglary, theft, assault, and rape are violations of State laws unless they involve Federal property or a Federal officer while engaged in his official duties, or unless they occur in Federal territories or reservations or on the high seas. Excluding the military, there are 52 separate criminal law jurisdictions in the United States: 1 in each of the 50 States, 1 in the District of Columbia, and the Federal jurisdiction. Each of these has its own criminal law and procedure and its own law enforcement agencies. Yet the system of law enforcement is quite similar among the States, although there are often substantial differences in the penalties for like offenses.

Law enforcement can be divided into three parts. The first, covering investigation of crimes and arrest of persons suspected of committing them, involves municipal, county, and State police; sheriffs, constables, marshals, and Federal agents; and many kinds of special officers. The second phase is prosecution of those charged with crime to determine whether they are guilty. The agencies concerned include courts; justices of the peace; municipal, State, and Federal grand juries; and prosecuting court officers. The third is concerned with punishment or treatment of persons convicted of crime. While the courts usually determine the sentence after conviction, the penalty is enforced by the detention facility, or by probation or parole officials.

Crime.—The Federal Bureau of Investigation, through its Uniform Crime Reporting Program, receives monthly and annual reports from law enforcement agencies throughout the country, currently representing 94 percent of the national population. Each month, city police, sheriffs, and State police file reports on the number of offenses

that become known to them in the following seven crime categories—murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, and motor vehicle theft. These categories are the basis of the FBI's Crime Index, a measure of the extent, fluctuation, and distribution of serious crime in the United States. Monthly reports also contain data on the number of these crimes cleared by arrest and on the number of persons arrested for all criminal offenses, by age, sex, and race of the offender. Annual reports provide an accounting of the number of persons formally charged and their disposition. In summarizing and publishing crime data, the FBI does not vouch for the validity of the reports it receives, but presents the data as information useful to persons concerned with the problem of crime and criminal-law enforcement.

Courts.—Court statistics on criminal offenses and the outcome of prosecutions are incomplete for the country as a whole although data are available for many States individually. The only national compilations of such statistics were made by the Bureau of the Census from 1932 to 1945 covering a maximum of 32 States. In 1973, the Law Enforcement Assistance Administration issued *National Survey of Court Organization,* which documents the organization of courts in the 50 States and the District of Columbia as of January 1972; and in 1975, it issued *National Survey of Court Organization: 1975 Supplement to State Judicial Systems.*

Comprehensive information on the business of the Federal courts is collected by the Administrative Office of the U.S. Courts and is published in the *Annual Report of the Director, Court Management Statistics,* and in *Juror Utilization in United States Courts.* The bulk of civil and criminal litigation in the country is commenced and determined in the various State courts. Only when the U.S. Constitution and acts of Congress specifically confer jurisdiction upon the Federal courts may civil litigation be heard and decided by these courts. Generally, the Federal courts have jurisdiction over the following types of cases: Suits or proceedings by or against the United States; civil actions between private parties arising under the Constitution, laws, or treaties of the United States; civil actions between private litigants who are citizens of different States; civil cases involving admiralty, maritime, or prize jurisdiction; all matters and proceedings in bankruptcy.

The 94 Federal courts of original jurisdiction are known as the U.S. district courts. One or more of these courts is established in every State and one each in the District of Columbia, Puerto Rico, the Virgin Islands, the Canal Zone, and Guam. Appeals from the district courts are taken to intermediate appellate courts of which there are 11, known as U.S. courts of appeals. The Supreme Court of the United States is the final and highest appellate court in the Federal system of courts.

Prisoners.—Statistics of prisoners committed to penal institutions have been collected and published for a longer period of time than have other criminal statistics. Data on prisoners in Federal and State prisons and reformatories were collected annually by the Bureau of the Census until 1950. This work was transferred to the Federal Bureau of Prisons in 1950 and to the Law Enforcement Assistance Administration in 1971. Summary statistics covering persons received and discharged from State prisons and reformatories and from Federal prisons and persons executed in the United States under civilian authority are now published periodically by the Law Enforcement Assistance Administration in *National Prisoner Statistics.* The Federal Bureau of Prisons, in its annual *Statistical Report,* publishes summary statistics on the characteristics of individuals confined during the year. Also, nearly every State publishes annual data either for its whole prison system or for each separate State institution.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See preface.

No. 252. Crimes and Crime Rates, by Type: 1960 to 1975

[Data refer to offenses known to the police. Rates are based on Bureau of the Census population data, excluding Armed Forces abroad. For definitions of crimes, see footnotes, table 258. Minus sign (–) denotes decrease. See also *Historical Statistics, Colonial Times to 1970*, series H 952-961]

[1] For definition of standard metropolitan statistical areas, see text, Appendix I. [2] Rate per 100,000 population based on Bureau of the Census estimated population as of July 1, excluding Armed Forces abroad. [3] All willful felonious homicides. Excludes attempts to kill, assaults to kill, suicides, accidental deaths, or justifiable homicides, and deaths caused by negligence. [4] Limited to forcible rapes and attempts. [5] Includes the stealing or taking of anything of value by force or violence or by threat of force or violence; includes attempted robbery. [6] Includes assault with intent to kill. Excludes simple assault, assault and battery, fighting, etc. [7] Includes any unlawful entry to commit a felony or a theft. Includes attempted burglary and burglary followed by larceny. [8] Includes theft of property or articles of value (except auto theft) without the use of force and violence or fraud. Excludes larceny resulting from burglary, embezzlement, "con" games, forgery, worthless checks, etc. [9] Includes all cases where motor vehicles are driven away and abandoned. Excludes those taken for temporary use when actually returned by the taker.

No. 288. Juveniles in Public Custody—Summary: 1971 and 1973

[As of June 30, except expenditures for years ending June 30. Data based on State and local public juvenile detention and correctional facilities in operation when censuses were conducted (Oct. 1971 and Nov. 1973), in existence for at least a month before census reference date of June 30, and with resident population of at least 50 percent juveniles. Excludes juvenile detention centers operated as part of a jail and without a separate staff or budget, non-residential facilities, privately operated facilities, facilities exclusively for drug abusers, facilities exclusively for dependent and neglected children, foster homes, and Federal juvenile correctional facilities]

ITEM	1971	1973	ITEM	1971	1973
Facilities, total	722	794	**Juveniles held** [1]	54,729	45,694
State	318	367	Male	41,781	35,057
Local	404	427	Female	12,948	10,637

No. 289. Juvenile Court—Cases Handled: 1960 to 1973

[Delinquency cases are all cases of youths referred to a juvenile court for violation of a law or ordinance or for seriously antisocial conduct. Dependency and neglect cases are all cases referred to the court for some form of neglect or inadequate care on the part of parents or guardians. See also *Historical Statistics, Colonial Times to 1970*, series H 1119-1124]

No. 290. Admissions to and Departures From Public Training Schools, Ranches, Forestry Camps, and Farms: 1971 and 1973

[Covers State and local public training schools, ranches, forestry camps, and farms in operation at time each census was conducted (October 1971 and November 1973), if they had been in existence for at least a month before census reference date of June 30, and had a resident population of at least 50 percent juveniles. Excludes privately operated facilities and Federal juvenile correctional facilities]

ITEM	1971	1973	ITEM	1971	1973
Facilities reporting	306	290	**Departures**—percent	100.0	100.0
Percent overcrowded on June 30	14.7	16.6	Discharged without further agency supervision	7.9	9.4
Admissions—percent	100.0	100.0	Placed in an aftercare [2] or parole program [4]	70.7	60.4
Committed by court:			Transferred out to another facility	11.4	11.4
First commitment	61.6	55.4	Other	10.0	18.8
Recommitment [1]	7.9	9.5			
Returned from an aftercare [2] or parole program [3]	16.4	10.5			
Transferred in from another facility	8.9	8.3			
Other	5.2	16.3			

[1] For a new offense.
[2] Aftercare: Status of children in legal custody of institution, receiving care and supervision outside institution from its staff or parent agency; and children in legal custody of parents, receiving institutional care and supervision in their own home.
[3] For reasons other than a new offense.
[4] Program operated by facility itself or another agency.

NA Not available. [1] Not included in State figures.
[2] Total excludes, and individual State figures include, transfers.
[3] Beginning 1960, excludes male misdemeanant prisoners in adult correctional institutions. Beginning 1965, excludes female misdemeanants. [4] Beginning 1960, prisoners present include prisoners out of the institution on temporary absences. [5] Fiscal year data.
[6] For 1950, covers only the New Castle County workhouse; thereafter, also includes the Kent and Sussex County workhouses which were united with it to form a State correctional system.
[7] Includes all felony prisoners regardless of age.
[8] Beginning 1960, excludes misdemeanant prisoners received from court.

No. 295. Average Time Served by Prisoners Released From Federal Institutions for First Time: 1965, 1970, and 1975

[For years ending June 30. For 1975, excludes 863 first releases (deaths, escapes, pardons, etc.) other than by parole, expiration of sentence, and mandatory release; also excludes 667 second or subsequent releases. In computing averages, sentences to life and more than 45 years were counted as 45 years; minority sentences of juvenile delinquents were counted from date of sentence to 21st birthday]

No. 299. Prisoners Executed Under Civil Authority: 1930 to 1974

[Includes 3 Federal executions in Alaska, 1 each in 1939, 1948, and 1950. Excludes executions by military authorities. The Army (including the Air Force) carried out 160 (148 between 1942 and 1950, 3 each in 1954, 1955, and 1957, and 1 each in 1958, 1959, and 1961). Of the total, 106 were executed for murder (including 21 involving rape), 53 for rape, and 1 for desertion. The Navy carried out no executions during the period. See also *Historical Statistics, Colonial Times to 1970*, series H 1155-1167]

Section 6
Geography and Environment

This section relates to area, climatologic, topographic, and hydrologic measurements of the United States. There are few official publications other than those showing area measurements (issued infrequently by the Bureau of the Census) which present area and geography statistics of national scope. However, many data are compiled for particular regions or for internal administrative purposes by such Federal agencies as the Geological Survey and the National Oceanic and Atmospheric Administration.

Area.—Area measurements in the United States began with the country as a whole and developed, as mapping progressed, to measurements for the States. The annual report of the U.S. General Land Office for 1850 contained the first reference to the areas of the States and Territories, although there was no indication of the method used in obtaining the measurements. In 1881, as part of the 1880 Census of Population, the Bureau of the Census laid the foundation for accurate and detailed area measurement in the United States. For the first time an account was given of the method and maps employed, the water bodies included, and the outer limits of the United States used as a basis for measurement. As part of the 1940 census, the Bureau published *Areas of the United States: 1940*, presenting data on the total land and inland water areas of the States, counties, places, and minor civil divisions. For reports of the 1950 and 1960 censuses, adjustments in selected area figures were made for reasons of changes in boundaries, development of water reservoirs, or improvement in maps from which measurements are made. In 1964, the Bureau undertook a new measurement of the areas of places with at least 1,000 inhabitants, minor civil divisions, and census county divisions of the 1960 census. The results are published in *Area Measurement Reports, Series GE-20*, the series consisting of one report for each State and a U.S. summary. These reports include the same kinds of data as the 1940 report plus the 1960 population count and density for each area. Land areas as of January 1, 1970, of places with population of 2,500 and over are shown in *1970 Census of Population*, vol. 1, chapter A.

Geography.—The Geological Survey, cooperating with State and local agencies, is responsible for topographic, geologic, and hydrologic maps; basic data on the quantity, quality, and movement of surface and ground water; and classification of Federal lands for mineral and waterpower potential. The Bureau of Land Management conducts surveys and maintains records of the public domain and other public lands.

The National Ocean Survey is responsible for coastal and geodetic surveys and measurement of certain physical phenomena. Currently, its primary functions are to provide charts for marine and air navigation, a basic network of geodetic control, and other basic data for engineering, scientific, commercial, industrial, and defense needs. It also furnishes Great Lakes navigators with charts and information on harbor facilities. It maintains records of the fluctuating levels of the Great Lakes, the precipitation over them, and the flow through connecting rivers, and issues reports on all hydraulic problems relating to them.

Maps prepared by the Bureau of the Census show boundaries of various types of political and statistical areas such as unincorporated places, the urbanized areas around large cities, county subdivisions, and business districts, among others.

Environment.—The Council on Environmental Quality is responsible for coordinating all environmental quality programs and for reviewing all other Federal programs affecting the environment. Duties of the Environmental Protection Agency (EPA) include research and enforcement activities related to pollution abatement and control.

An air sampling network was initially established in 17 communities in 1953 by the U.S. Public Health Service. In 1957, the basic operation of the National Air Surveillance Network began with 94 urban particulate monitors and two rural monitors. The Network expanded through the 1960's to cover about 260 urban and 30 rural stations. The Network's objectives were to determine the extent and nature of air pollution and to study trends in levels of atmospheric contaminants. In 1972, the operation of the stations in this network was decentralized to the 10 regional EPA offices and many of the stations were in turn assimilated into the growing State–and locally operated air monitoring networks.

National Ambient Air Quality Standards for suspended particulate matter, sulfur dioxide, oxidants, carbon monoxide and nitrogen dioxide were set by EPA in April 1971. Responsibility for demonstrating compliance with or progress toward achieving these standards lies with the State agencies. Non-Federal suspended particulate sampling stations increased from approximately 800 in 1969 to over 3,700 in 1974. Data from these State networks are periodically submitted to EPA's National Aerometric Data Bank for summarization in annual reports on the nationwide status of, and trends in, air quality.

Climate.—The National Oceanic and Atmospheric Administration, through the National Weather Service and the Environmental Data Service, is responsible for data on climate. It maintains about 11,000 weather stations, of which nearly 3,000 produce autographic precipitation records, about 600 take automatic or hourly readings of a series of weather elements, and the remainder record one observation a day.

Nearly all weather stations have been moved several times in their history. Consequently, the National Weather Service uses "normal" values of temperature and precipitation for comparative purposes rather than long-term means which are derived from records taken at the different locations the stations may have had over the years.

Normal values of temperature and precipitation are based on records for the 30-year period 1941 to 1970. For stations having records for the entire 30 years from the same instrument site, monthly precipitation and temperature normals are the means of the monthly values for the 30 years; for temperature, the normal maximum and normal minimum values were used to obtain monthly normals. The annual normal temperature is obtained by dividing by 2 the sum of the annual normal maximum value and the annual normal minimum value of temperature.

For stations that did not have continuous records from the same instrument site for the entire 30 years, 1941 to 1970, the means have been adjusted to the record at the present site. In these adjustments, a "difference factor" was used for temperature and a "ratio factor" for precipitation. These factors were determined by parallel comparison, either between records at the actual station sites or through a second station that had a continuous record to compare against both sites for obtaining the resultant adjustment factors. Normals were thereafter obtained as outlined above.

This system of normals has three characteristics: (1) The 30-year period (1941 to 1970) adopted for the computations is consistent with the term of years accepted by the World Meteorological Organization for climatic normals; (2) where the station and exposure for records in a given locality have been changed, the whole record has been carefully studied and adjusted to the latest source of records and reports; (3) the normals for maximum and minimum temperatures are separately tabulated.

The degree-day normals are derived from the values for the monthly normal maximum and minimum temperatures, and computed from the standard base 65° F. The heating degree day has been defined as follows: "A unit, based upon temperature difference and time, used in estimating fuel consumption and specifying nominal heating load in winter. For any one day, when the mean temperature is less than 65° F., there exist as many degree days as there are Fahrenheit degrees difference in the temperature between the average temperature for the day and 65° F."

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970*. See preface.

No. 301. Territorial Expansion of the United States and Acquisitions of Other Areas

[Boundaries of all territories listed under "United States" were indefinite, at least in part, at time of acquisition. Area figures shown here represent precise determinations of specific territories which have been marked upon maps, based upon interpretations of the several treaties of cession, which are necessarily debatable. These determinations were made by a committee consisting of representatives of various governmental agencies in 1912. Subsequently these figures were adjusted to bring them into agreement with remeasurements made in 1960. See *Weights and Measures*, pp. x-xi. See also *Historical Statistics, Colonial Times to 1970*, series J 1-2]

X Not applicable.

[1] Includes that part of drainage basin of Red River of the North, south of 49th parallel, sometimes considered part of Louisiana Purchase.

[2] Not included in total. Ceded by Spain in 1898, the Philippines constituted a territorial possession of the United States from 1898 to 1946. Granted independence as of July 4, 1946, they then became the Republic of the Philippines.

[3] Ceded by Spain in 1898, ratified in 1899, and became Commonwealth of Puerto Rico by Act of Congress on July 25, 1952. [4] Acquired 1898; ratified 1899. [5] Acquired 1899; ratified 1900.

[6] Under jurisdiction of United States in accordance with treaty of Nov. 18, 1903, with Republic of Panama.

[7] Included in total for 1970. Leased (1914) from Republic of Nicaragua for 99 years but returned April 1971.

[8] Under trusteeship. See table 4, footnotes 8 and 11.

[9] Comprises following islands with gross areas as indicated, in sq. mi.: Midway (2), Wake (3), Palmyra (4), Canton and Enderbury (combined area, 27), Swan (1), Navassa (2), Baker, Howland, and Jarvis (combined area, 3), Johnston and Sand (combined area, less than 0.5), Kingman Reef, Quita Sueño Bank, Roncador Cay, and Serrano Bank (each less than 0.5), and other islands for which area figures are not available.

[1] Figures are lengths of general outline of seacoast. Measurements were made with a unit measure of 30 minutes of latitude on charts as near the scale of 1:1,200,000 as possible. Coastline of sounds and bays is included to a point where they narrow to width of unit measure, and includes the distance across at such point.

[2] Statute. [3] Figures obtained in 1939-1940 with a recording instrument on the largest-scale charts and maps then available. Shoreline of outer coast, offshore islands, sounds, bays, rivers, and creeks is included to the head of tidewater or to a point where tidal waters narrow to a width of 100 feet.

– Represents zero. X Not applicable. [1] Dry land and land temporarily or partially covered by water, as marshland, swamps, etc.; streams and canals under one-eighth statute mile wide; and lakes, reservoirs, and ponds under 40 acres of area.

[2] Permanent inland water surface, such as lakes, reservoirs, and ponds having 40 acres or more of area; streams, sloughs, estuaries, and canals one-eighth of a statute mile or more in width; deeply indented embayments and sounds, and other coastal waters behind or sheltered by headlands or islands separated by less than 1 nautical mile of water; and islands having less than 40 acres of area. Excludes areas of oceans, bays, sounds, etc., lying within U.S. jurisdiction but not defined as inland water.

[3] Year of ratification of Constitution; one of the original 13 States. [4] See table 4, footnotes 7, 8, and 11.

No. 305. Lengths of Principal Rivers

[Comprises rivers 600 miles or more in length. Length represents distance to designated outflow from (*a*) original headwater of named river where name applies to entire length of channel, or (*b*) upper limit of channel so named, usually the junction of 2 tributaries or headwater streams. See *Weights and Measures*, pp. x–xi]

[1] Decline in water use in 1975 and 1985 reflects the increasing use of recycled treated effluents and cooling water by industrial water users and steam electric utilities.
[2] Total take, including delivery losses but not including reservoir evaporation.
[3] Rural farm and nonfarm household and garden use, and water for farm stock and dairies.
[4] For 1940-1960, includes manufacturing and mineral industries, rural commercial industries, air-conditioning, resorts, hotels, motels, military and other State and Federal agencies, and other miscellaneous uses; thereafter, includes manufacturing, mining and mineral processing, ordnance, and construction.

No. 311. Federal Funds for Pollution Control and Abatement—Summary: 1970 to 1976

[**In millions of dollars.** For years ending June 30. Obligations refer to liabilities, contracts, and other commitments entered into requiring the payment of money by the Government. Outlays refer to the issuance of checks or disbursements of cash by the Government to liquidate obligations. Outlays during any fiscal year may be payments of obligations incurred in prior years or in the same year]

Solid wastes	20	150	109	174	196						

[1] More than one of media shown above. [2] Funds for "Selected pollutants" included in "media" breakdown above. [3] Environmental Protection Agency. Includes funds for activities carried out by U.S. Departments of Health, Education, and Welfare; Agriculture; Interior; and by Atomic Energy Commission and Federal Radiation Council prior to Dec. 2, 1970.

[4] Atomic Energy Commission was disestablished and ERDA activated on Jan. 19, 1975. Positions and functions were transferred from AEC, EPA, NSF, and Dept. of the Interior to this new agency. 1974 and 1975 amounts for these agencies have been adjusted for comparability.

[5] Beginning 1973, includes expenditures for water and sewer programs.

Section 7

Public Lands, Parks, Recreation, and Travel

Statistics in this section relate to the Federal public domain and other federally owned and leased real property, Indian lands, national parks and forests, State and municipal parks, domestic and foreign travel, and other forms of recreation.

Data on public lands are published primarily by the Department of the Interior, Bureau of Land Management, in *Public Land Statistics*. Data on federally owned land and real property are collected by the General Services Administration and presented in its annual *Inventory Report on Real Property Owned by the United States Throughout the World*. The Economic Research Service of the Department of Agriculture also issues statistics on land use and land ownership.

The Department of the Interior issues various reports relating to recreation, as follows: The National Park Service, in its semiannual *Public Use of the National Park System*, presents information on national parks; in its semiannual *Areas Administered by the National Park Service*, shows breakdowns of acreage; and in its *Index to the National Park System and Affiliated Areas* provides a brief description of each area and also covers nonfederally owned areas administered cooperatively with private and other governmental bodies. The Bureau of Outdoor Recreation administers a land and water conservation fund which provides funds to States, counties, and cities for outdoor recreation purposes and to designated Federal agencies for acquisition of new recreational lands and waters. It also issues statistics on the fund and on other aspects of outdoor recreation. The Fish and Wildlife Service compiles and releases data on sport fishing and hunting and on number and acreage of national wildlife refuges and fish hatcheries. Data for State and municipal parks and playgrounds, as well as for other outdoor recreational activities, are compiled by the National Recreation and Park Association, Arlington, Va., which issues its *Recreation and Park Yearbook* at 5-year intervals. The Department of Agriculture's Forest Service, in its *Annual Report of the Chief*, issues data on recreational uses of the national forests.

Figures on expenditures for recreation and on domestic and foreign travel, compiled by the Department of Commerce's Bureau of Economic Analysis, appear periodically in the monthly *Survey of Current Business*. Domestic travel data by volume and type were collected by the Bureau of the Census in its 1972 Census of Transportation; comparable data appear in its 1963 *Passenger Transportation Survey*, vol. I, and its 1967 *National Travel Survey*, vol. I. Foreign travel data based on analysis of passports are published in the annual *Summary of Passport Statistics*, issued by the Department of State's Passport Office.

Few statistical series are available on activities of a cultural nature—art, music, theater, etc.—and those are generally based on infrequent and incomplete studies by private agencies. The available series in this field are presented in tables 365 and 366.

Public-domain and acquired lands.—The U.S. Government acquired sovereignty over its present land area (2,271 million acres) through a series of international agreements and treaties. At the time of acquisition of sovereignty over the areas involved, title to about 463 million acres rested in individual States and their political subdivisions or in private owners, and was not relinquished to the U.S. Government. Title to the remaining land area passed to the U.S. Government. This area, except for lands in the District of Columbia, is known as the original public domain.

Public-domain lands or public lands are federally owned lands to which the public land laws apply. In general, they include that portion of the original public domain not disposed of under the public land laws, and lands declared by the Congress to be public lands. In addition to the original public domain, the U.S. Government has from time to time acquired, by purchase, condemnation, and gift, tracts of land needed for public purposes. Such lands are referred to as acquired lands.

Indian lands.—Indian lands are the private landholdings of individual Indians or Indian tribes that are subject to special restrictive provisions of Federal law administered by the Bureau of Indian Affairs. They have been set aside for Indian use by treaties, congressional acts, and executive orders. Although most of these lands are in reservations for specific tribes, there are groups of scattered off-reservation allotments in individual ownership and other small tracts of land occupied by Indian groups. Recreational facilities are increasingly being located and operated by Indians on Indian reservations (see table 349).

Entries, selections, patents, and certifications.—The data on entries, selections, patents, and certifications refer to transactions which involve the disposal, under the public land laws (including the homestead laws), of Federal public lands to non-Federal owners. In general, original entries and selections are applications to secure title to public lands which have been accepted as properly filed. Some types of applications, however, are not reported until the final certificate is issued. Applications become final entries (perfected entries) upon issuance of a final certificate to the applicant after he has complied fully with the requirements of the laws relating to his application. A final certificate passes equitable title to the land to the applicant. Patents are instruments which pass legal title to the land to the applicant. Certifications are issued in lieu of patents in connection with certain State selections.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970*. See preface.

No. 336. Area and Acquisition of the Public Domain: 1781 to 1975

[Areas of acquisitions are as computed in 1912, and do not agree with figures in square miles shown in table 301 which include later adjustments and reflect subsequent remeasurement. Excludes area outside the United States, amounting to 637,424 acres (257,962 hectares) in 1975. See *Weights and Measures*, pp. x-xi. See also *Historical Statistics, Colonial Times to 1970*, series J 3-7]

Z Less than 500,000. [1] Owned by Federal Government. Comprises original public domain plus acquired lands. Estimated from imperfect data available for indicated years. Prior to 1959, excludes Alaska, and 1960, Hawaii. Source: Beginning 1955, U.S. General Services Administration, *Inventory Report on Real Property Owned by the United States Throughout the World*, annual.

[2] Data for Louisiana Purchase exclude areas eliminated by Treaty of 1819 with Spain. Such areas are included in figures for Mexican Cession.

[3] Includes 33,920 acres (13,738 hectares) subsequently part of Texas, which is not a public-domain State.

[4] Represents drainage basin of Red River of the North, south of 49th parallel. Authorities differ as to method and date of its acquisition. Some hold it as part of Louisiana Purchase; others, as acquired from Great Britain.

Source: Except as noted, U.S. Dept. of the Interior. Estimated area, Bureau of Land Management; all other data, Office of the Secretary, *Areas of Acquisitions to the Territory of the U.S.*, 1922.

No. 337. Ownership of Land, by Class: 1959 to 1969

[See *Weights and Measures*, pp. x-xi. See also *Historical Statistics, Colonial Times to 1970*, series J 66, J 71, and J 76]

CLASSES	1959			1964			1969		
	Land		Percent	Land		Percent	Land		Percent
	Acres (millions)	Hectares (millions)		Acres (millions)	Hectares (millions)		Acres (millions)	Hectares (millions)	
Total [1]	2,271	919.8	100.0	2,266	917.7	100.0	2,264	916.9	100.0
Private land [2]	1,332	539.5	58.7	1,328	537.8	58.6	1,317	533.4	58.2
Indian land [3]	53	21.5	2.3	50	20.3	2.2	50	20.3	2.2

Federal land [4]	765	309.8	33.7	766	310.2	33.8	763	309.0	33.7
State land [5]	103	41.7	4.5	103	41.7	4.6	114	46.2	5.0
County and municipal land	18	7.3	0.8	19	7.7	0.8	20	8.1	0.9

[1] Changes in total land area are due to variable methods and materials used in periodic remeasurements, and to the construction of artificial reservoirs.

[2] Land owned by individuals, partnerships, and corporations.

[3] Trust land held by tribes and individual owners exclusive of federally owned land used by Indians.

[4] Gross acreage of Federal holdings including highway and road rights-of-way in Federal areas.

[5] Includes the major part of highway and road rights-of-way through predominantly private land areas.

No. 344. Public Lands—Homestead Entries, 1951 to 1975, and Vacant Lands, 1950 to 1975, by States

[**In thousands of acres.** Homestead entries for years ending June 30; vacant lands as of June 30. Excludes States with less than 500 acres in years specified. Vacant public lands are those which are unappropriated and unreserved. The former represent lands not covered by an entry; the latter, lands not reserved for some public purpose, i.e., available for entry or selection under appropriate laws. Data cover vacant public lands other than Alaska withdrawn for classification in furtherance of Taylor Grazing Act and for conservation and development of natural resources. See text, pp. 205 and 206. See also *Historical Statistics, Colonial Times to 1970*, series J 8 for vacant lands excluding Alaska and J 13-15 for homestead entries]

– Represents zero. X Not applicable. Z Less than 500 acres.

[1] Original entries, except as indicated. [2] Includes acreage of public lands within grazing districts, as follows (in thousands): 1950, 134,875; 1960, 141,645; 1970, 132,66); 1973, 132,387; 1974, 132,310; and 1975, 132,265.

[3] Includes 1,000 acres for Missouri. [4] Excludes Alaska; see footnote 5.

[5] Effective Jan. 17, 1969, all unreserved lands in Alaska were withdrawn from all forms of appropriations or disposition under the Public Land Laws; land and resources were reserved until Dec. 31, 1970, for determination and protection of rights of native Aleuts, Eskimos, and Indians of Alaska. The Alaskan Native Claims Act of Dec. 18, 1971, and Public Land Order No. 5418 dated Mar. 25, 1974, withdraws all unreserved lands in Alaska.

No. 345. Public and Indian Land—Entries Under All Acts, by States: 1956 to 1975

[**In thousands of acres.** For years ending June 30. See text, pp. 205 and 206. See also *Historical Statistics, Colonial Times to 1970*, series J 10-12]

No. 870. Passports, by Characteristics of Travel and Travelers: 1950 to 1975

[**In thousands.** Total passports are actual count; all other data based on a sample and prorated to total passports. Data are subject to error because sample has not changed since 1955, but volume of passports has increased over 400 percent. Data refer to number of passports issued, not travelers (except as noted). Prior to 1970, covers new and renewed passports; thereafter, renewals eliminated. A single passport may cover more than one trip and more than one person. See also *Historical Statistics, Colonial Times to 1970*, series H 899-920]

Section 8

Federal Government Finances and Employment

This section presents statistics relating to the financial structure and the civilian employment of the Federal Government. The fiscal data cover the essential apparatus of public financing, namely appropriations, taxes, other receipts, outlays and debt. Principal sources of the fiscal data are *The Budget of the United States Government* and related documents, published annually by the Office of Management and Budget (OMB), and the Department of the Treasury's annual *Combined Statement of Receipts, Expenditures and Balances of the United States Government*, the official report relating to the receipts, appropriations, outlays, and fund accounts. The *Statistical Appendix* to the *Annual Report of the Secretary of the Treasury* is a convenient summary of yearly data relating to somewhat broader fields. Detailed data on tax returns and collections are published annually by the Internal Revenue Service; see p. 226. The personnel data relate to staffing and payrolls for the various public functions and agencies, to employee characteristics, and to civil service status.

Budget concept.—Under the unified budget concept, introduced in the 1969 budget, all Federal programs are included in one comprehensive budget regardless of the manner of funding. In recent years, however, the budget totals have excluded some Federal activities—principally the Federal Financing Bank, the Postal Service, and the lending activities of the Rural Electrification Administration. Data showing unified budget totals of budget receipts and outlays are presented in the 1977 *Budget* for the years 1940 to 1977; more detailed historical summary tables generally show data since 1967.

The *Budget* totals embrace both the federally owned funds and the trust funds administered by the Government, such as the funds for social security, medicare, highways, airports and airways, and the Indian tribal funds. Part 2 of the *Budget* gives a breakdown of the Federal fund and trust fund surplus or deficit.

Receipts arising from the Government's sovereign or compulsory powers are reported as governmental receipts; all other receipts, e.g., from business-type or market-oriented activities, are offset against outlays. Outlays are reported on a checks-issued (net) basis, except for interest which is recorded on an accrual basis.

Transition to new fiscal year.—The Congressional Budget Act of 1974 required a change in the beginning and ending dates of the Federal fiscal year. Since 1843, the fiscal year has extended from July 1 of one year through June 30 of the following year. The 1976 budget is on that basis. Beginning with 1977, the fiscal year will run from Oct. 1 of one year through Sept. 30 of the following year. To facilitate the conversion to the new fiscal year, the Act also provided for a transition quarter, July 1, 1976 through Sept. 30, 1976. Fiscal data covering that quarter are shown in detail in the 1977 *Budget*.

Treasury receipts and expenditures.—All receipts of the Government, with a few exceptions, are deposited to the credit of the U.S. Treasury regardless of ultimate disposition or availability for expenditure. Under the Constitution, no money may be withdrawn from the Treasury unless appropriated by the Congress.

The day-to-day cash operations of the Federal Government clearing through the accounts of the U.S. Treasury are reported in the *Daily Treasury Statement*. Extensive detail on the public debt is published in the *Monthly Statement of the Public Debt of the United States*.

Receipts and outlays of the Government classified as to budget and other transactions appear in the *Monthly Treasury Statement of Receipts and Outlays of the United States Government*. The monthly *Treasury Bulletin* contains analytical material on

fiscal operations and related Treasury activities, including financial statements of Government corporations and other business-type activities.

Receipts such as taxes, customs duties, and miscellaneous budget receipts, which are collected by Government agencies, and outlays represented by checks issued and cash payments made by disbursing officers are reported in the *Monthly Treasury Statement* cited above and in the annual *Combined Statement of Receipts, Expenditures and Balances*. These monthly and annual reports include deposits and collections in, and payments from, accounts of Government agencies held outside the Treasury as well as those of the general account of the United States Treasury and are on the same basis as the unified budget.

Income tax returns and tax collections.—Tax data are compiled by the Internal Revenue Service of the Treasury Department. The *Annual Report of the Commissioner of Internal Revenue* gives a detailed account of tax collections by kind of tax and by regions, districts, and States. The agency's three annual *Statistics of Income* reports present detailed data from individual income tax returns, corporation income tax returns, and business tax returns, respectively. The report on business tax returns presents financial data for sole proprietorships and partnerships and summary data for corporations. Periodic *Statistics of Income* publications present data from fiduciary income tax and estate tax returns, and data on sales of capital assets by individuals, foreign income and tax reported by corporations, and estate tax wealth.

Relation to national income accounts and GNP.—The Federal sector of the *national income and product accounts* focuses upon Federal transactions (comprising both Federal and trust funds) entering into national income, the gross national product, and other parts of the national economic accounts (see table 374). These accounts, however, include only receipts and outlays which directly affect the current flow of income and output, and therefore exclude such transactions as loans. Also, the Federal sector account records many taxes as they accrue, instead of as they are collected, and records most purchases at the time of delivery.

Employment and payrolls.—The Civil Service Commission collects employment and payroll data from all departments and agencies of the Federal Government, except the Central Intelligence Agency and the National Security Agency. Employment figures represent the number of persons who occupied civilian positions on the last day of the calendar month shown and who are paid for personal services rendered for the Federal Government, regardless of the nature of appointment or method of payment. Intermittent workers are counted if they performed any service during the report month.

Federal payrolls include all payments for personal services rendered during the calendar month and payments for accumulated annual leave of employees who separate from the service. Since most Federal employees are paid on a biweekly basis, the calendar month earnings are partially estimated on the basis of the number of work days in each month where payroll periods overlap consecutive months.

Federal employment and payroll figures are published by the Civil Service Commission in its regular *Annual Report* and its *Monthly Release, Federal Civilian Manpower Statistics*. It also publishes semiannual employment data for minority groups; annual reports on salary and wages; geographic distribution; and on occupations of white- and blue-collar workers as well as data on women Federal employees. Data on Federal employment are also issued by the Bureau of Labor Statistics in its *Monthly Labor Review* and in *Employment and Earnings*.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970*. See preface.

No. 379. Federal Budget—Receipts, by Source, and Outlays, by Detailed Function: 1973 to 1976

[**In billions of dollars.** For years ending June 30. Receipts reflect collections; outlays stated in terms of checks issued or cash payments. Covers all Federal agencies and programs and both Federal funds and trust funds. Excludes government-sponsored but privately-owned corporations, Federal Reserve System, District of Columbia government, and money held in suspense as deposit funds. See *Historical Statistics, Colonial Times to 1970*, series Y 335-338, Y 343-351, and Y 457-465 for related data]

No. 382. Federal Domestic Transfer Payments and Grants-in-Aid to State and Local Governments, by Function: 1965 to 1976

[**In billions of dollars.** Domestic transfer payments consist generally of monetary income received by individuals or non-profit institutions in the United States for which no current services are rendered. Payments for retirees out of the social security trust fund are transfer payments. Grants-in-aid to State and local governments represent payments (other than interest) to State and local governments including State and local educational institutions. They include payments to public institutions for research and development contracts, but exclude payments in kind, such as farm donated commodities and payments to State and local enterprises (e.g., to a housing authority)]

No. 383. Federal Government Trust Fund Balances: 1970 to 1976

In millions of dollars. As of June 30. The budget consists of Federal funds and trust funds. The Federal funds are derived mainly from taxes and borrowing; most of them are not restricted by law to any specific Government purpose. The trust funds, on the other hand, collect certain taxes and other receipts for specified purposes, such as payment of social security and unemployment insurance benefits. Balances are that portion of funds authorized for use which have not been spent. Amounts include both open-book balances with Treasury and investments in U.S. securities. Part of the balances is obligated, part unobligated. The balances on an authorization basis exceed the cash balances because, for a few accounts, budget authority is not the same as receipts]

No. 385. Revenue Losses Due to Federal Tax Laws: 1974 and 1975

[**In millions of dollars.** For years ending June 30. Estimate of each tax expenditure made independently of any other tax provision. If 2 or more items were eliminated simultaneously, resulting revenue change might be larger or smaller than the sum of estimates shown for individual items. Change in tax rates or other basic tax provisions would affect estimates for individual items. Therefore, totals are not intended to be exact but only to give estimated order of magnitude. The Congressional Budget Act of 1974 requires a listing of tax expenditures in the budget. Tax expenditures are the estimated revenue losses attributable to provisions of the Federal tax laws which allow a special exclusion, exemption, or deduction from gross income or which provide a special credit, a preferential rate of tax, or a deferral of tax liability. Year-to-year differences in estimates of particular items may be due to changes in tax law or revised estimating techniques]

BUDGET FUNCTION AND ITEM	1974	1975		
		Total	Corporations	Individuals
Total	82,015	90,425	21,865	68,560
National defense:				
Exclusion of benefits and allowances to Armed Forces personnel	650	650	(X)	650
Exclusion of military disability pensions	65	70	(X)	70
International affairs:				
Exclusion of income earned abroad by U.S. citizens	90	130	(X)	130
Exclusion of gross-up on dividends of less developed country corporations	55	55	55	(X)

NA Not available. Z Less than 500.

[1] Beginning 1972, includes a small number of taxable returns with no adjusted gross income.

[2] Income from sources subject to tax, less certain exclusions. Beginning 1972, adjusted gross income less deficit.

[3] Exemptions: 1950–1965, joint return $1,200, single $600, each dependent $600; additional exemption for taxpayer, and his spouse on joint return, of $600 if blind and $600 if age 65 and over. For 1970, each exemption increased to $625; for 1972–1974, to $750.

[4] Represents income tax after credits. Beginning 1970, includes additional tax for tax preferences.

[5] Joint returns counted twice in computing percent.

[6] Salaries after sick pay exclusion. [7] Domestic and foreign. [8] After exclusions.

[9] Farm included with business or profession. [10] Taxable portion.

[11] Comprises all income subject to income tax not elsewhere listed, less adjustments.

No. 396. Federal Income and Payroll Taxes for a Four-Person Family With One Earner, by Selected Earnings Levels: 1963 to 1975

[Tax rate is percent of earnings, or tax liability divided by earnings. Data represent "effective" tax rates and were calculated from statutory individual income and payroll tax rates. Payroll taxes include both employee and employer taxes. For the $5,000, $10,000, and $15,000 categories, it is assumed that the standard deduction was taken. For the $25,000 category, itemized deductions are assumed. Income tax surcharge is included for 1968. 1974 includes income tax rebate]

[1] Excludes returns with no adjusted gross income.
[2] Income from sources subject to tax, less certain exclusions. Includes a small number of taxable returns with no adjusted gross income.
[3] Dividends in adjusted gross income.
[4] Business profit and loss without deduction for net operating loss.
[5] Comprises all income subject to income tax not elsewhere listed, less statutory adjustments.

No. 399. Corporation Income Tax Returns—Summary: 1950 to 1973

[**In billions of dollars, except as indicated.** Beginning 1955, estimates based on samples. All data based on returns for periods ending between July 1 of year shown and July 1 of following year, as filed. All corporations are required to file returns except those specifically exempt, such as fraternal, civic, and charitable organizations not operating for profit. Excludes returns of inactive corporations. See source for changes in law affecting comparability of historical data. Corporate data based on income tax returns appear on pp. 507, 509, and 515–517. See also *Historical Statistics, Colonial Times to 1970*, series Y 381–392]

ITEM	1950	1955	1960	1965	1969	1970	1971	1972 [1]	1973

Deficit [3]	2	3	7	7	13	18	17	16	18
Inactive corporations, number of returns.....1,000..	37	35	47	66	79	82	71	74	76

[1] Beginning 1972, data are after adjustment for work incentive credit.
[2] Consists of business receipts, interest less amortizable bond premium, rents, royalties, net gain from capital assets (as defined by law) and other property, dividends, and other taxable income.
[3] Net income (less deficit) is a tax concept and therefore excludes wholly tax-exempt interest; beginning 1965, includes constructive taxable income from related foreign corporations. See footnote 4, table 824.
[4] Tax liability is before deduction for foreign tax credit. Beginning 1965, data are after investment credit, and beginning 1972, after work incentive credit. Beginning 1965, includes tax from recomputing prior year investment credit; 1963–1971, includes tax surcharge; 1969–1973, includes additional tax for tax preferences; 1973, include tax from recomputing prior year work incentive credit.
[5] Other than own stock.

Z Less than $50 million. [1] Adjusted to exclude nonmarketable issues to the International Monetary Fund and other international institutions for each year as follows (in billions of dollars): 1950, 0.9; 1955, 1.6; 1960, 2.2; 1962, 2.8; 1963, 3.2; 1964, 3.6; 1965, 3.5; 1966, 3.8; 1967, 3.3; 1968, 2.2; and 0.8 from 1969 through 1974.
[2] Change from previous year; e.g., 1900 from 1899, 1905 from 1904, etc. Minus sign (−) denotes decrease.
[3] Based on estimated July 1 population; prior to 1960, excludes Alaska and Hawaii.
[4] Calculated on total expenditures not reduced by interfund transactions representing interest and certain other payments to Treasury through 1950. Beginning 1955, outlays, net of applicable receipts.

No. 415. Salaries of Selected Executive and Legislative Officials in the Federal Government: 1907 to 1976

YEAR (when salary change became effective)	President	Vice President	Cabinet officers	Congressmen
1907	[1] $50,000	$12,000	$12,000	$7,500
1909	75,000	[2]	[2]	[2]
1925	[2]	15,000	[3] 15,000	[3] 10,000
1946	[2]	20,000	[2]	[4] 15,000
1949	[5] 100,000	30,000	22,500	[2]
1955	[2]	35,000	[2]	22,500
1956	[2]	[2]	25,000	[2]
1964	[2]	43,000	35,000	[2]
1965	[2]	[2]	[2]	30,000
1969	[5] 200,000	[6] 62,500	60,000	42,500
1976	[5] 200,000	[6] 65,600	63,000	44,600

[1] Compensation enacted in 1873. [2] No change from prior year shown. [3] Economy legislation reduced amounts by 15, 10, and 5 percent, successively, during 1932-35. Full salary restored Apr. 1, 1935. [4] Includes $2,500 expense allowance that was tax free until 1953. Allowance discontinued Mar. 1, 1955. For income tax, members may deduct up to $3,000 a year for living expenses.
[5] Plus $50,000 for official expenses. [6] Plus $10,000 expense allowance.

Section 9

State and Local Government Finances and Employment

Nationwide statistics relating to State and local governments, their numbers, finances, and employment, are compiled primarily by the Bureau of the Census. Every fifth year (for years ending in "2" and "7") the Bureau conducts a Census of Governments involving collection of data for all governmental units in the United States. A list of reports from the 1972 Census of Governments appears in Appendix IV of this book. The Bureau of the Census also conducts annual surveys which cover all the State governments and a sample of local governments. Publications issued annually by the Bureau of the Census include a report on governmental finances which presents figures for the Federal Government, nationwide totals for State and local governments, by type, and State-local data by States. Also issued annually are series of publications on State, city, and county finances, and on city, county, and other public employment. A leaflet, *Recurrent Publications on Governments*, describes the publication program. There are also three series of quarterly reports covering tax revenue, public construction expenditures, and investment holdings of major public employee retirement systems.

Basic information for Census Bureau statistics on governments is obtained mainly by mail canvass from State and local officials; however, financial data for each of the State governments and for many of the large local governments are compiled from their official records and reports by Census Bureau personnel.

Governmental units.—The governmental structure of the United States includes, in addition to the Federal Government and the States, thousands of local governments—counties, municipalities, townships, school districts, and numerous kinds of "special districts." As shown by table 419, more than 78,000 local governments were identified by the 1972 Census of Governments. The figures for governmental units include all agencies or bodies having an organized existence, governmental character, and substantial autonomy. While most of these governments can impose taxes, many of the special districts—such as independent public housing authorities, the New York Port Authority, and numerous local irrigation, power, and other types of districts—are financed from rentals, charges for services, benefit assessments, grants from other governments, and other nontax sources. The count of governments excludes semi-autonomous agencies through which States, cities, and counties sometimes provide for certain functions—for example, "dependent" school systems, State institutions of higher education, and certain other "authorities" and special agencies which are under the administrative or fiscal control of an established governmental unit.

Finances.—Unless otherwise stated, financial data in this section relate to the fiscal years of the respective governments. Federal and State government figures are for fiscal years ending June 30, except for a few States with other closing dates in the calendar year specified. Beginning 1963, local government figures are for fiscal years which closed at various dates during the 12 months ended June 30 of the year specified; figures for 1962 and earlier years are for fiscal years ended during the calendar year.

Nationwide government finance statistics must be classified and presented in terms of uniform concepts and categories, rather than according to the highly diverse terminology, organization, and fund structure of individual governments. Accordingly, financial statistics which appear here for individual States, although based upon the official records and reports of these governments, will not agree directly with figures appearing in such original sources except where particular segments of the official accounts conform explicitly to standard reporting categories.

Statistics on governmental finances distinguish among general government, utilities, liquor stores, and insurance trusts. General government comprises all activities

except utilities, liquor stores, and insurance trusts. Utilities include local government water supply, electric light and power, gas supply, and transit systems. Liquor stores are operated by 17 States and by local governments in four States. Insurance trusts relate to employee retirement, unemployment compensation, and other social insurance systems administered by State and local governments.

Employment and payrolls.—Public employment and payroll data are mainly based on mail canvassing of State and local governments. Payroll includes all salaries, wages, and individual fee payments for the month specified, and employment relates to all persons on governmental payrolls during a pay period of the month covered—including paid officials, temporary help, and (except where otherwise specified) part-time as well as full-time personnel. Figures shown for individual governments cover major dependent agencies such as institutions of higher education, as well as the basic central departments and agencies of the government.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970*. See preface.

No. 418. All Governments—Revenue, Expenditure, and Debt: 1950 to 1974

[**In billions of dollars, except as indicated.** Prior to 1960, excludes Alaska and Hawaii. Excludes intergovernmental revenue and expenditure. Local government amounts are estimates subject to sampling variation; see source. See also *Historical Statistics, Colonial Times to 1970*, series Y 505-637 and Y 655-848]

No. 419. Local Governments, by Taxing Power and Type, and Public School Systems—States: 1972

[Limited to governments actually in existence. Excludes, therefore, a few counties and numerous townships and "incorporated places" existing as areas for which statistics can be presented as to population and other subjects, but lacking any separate organized county, township, or municipal government]

– Represents zero. Z Less than $500,000.
[1] Funds for this function are now provided to a private institution.
[2] Excludes Office of Child Development.
[3] Grants for these programs prior to 1973 included in "Other" in this function.
[4] Beginning 1971, this program treated as a direct Federal program in President's Budget. Represents administration grants only. For 1971–1974, data do not agree with table 427 which includes payments to individuals in the food stamp program.

X Not applicable. [1] Incorporates 1974 or 1975 administrative or legislative action. [2] Plus tax credit (or additional tax credit). [3] Tax credit. [4] Tax on capital gains and dividends applicable to individual or joint returns with a Federal adjusted gross income in excess of $20,000. [5] Subject to specified limitations. [6] Applies to tax on earned income and annuities; 9 percent (flat rate) imposed on net capital gains, interest, and dividends. Only income in excess of $3,000 for single taxpayers and $5,000 for married taxpayers filing jointly is taxable. [7] Applies as of Jan. 1, 1975. Effective May 1, 1975, new tax is applicable at a 4.6 percent flat rate. [8] A credit equal to tax liability is allowed to taxpayers, with dependents, whose income does not exceed specified minimum income levels. [9] Plus 10 percent surcharge. [10] Based on Federal income tax liability as follows: Nebraska, 12 percent; Rhode Island, 17 percent; Vermont, 25 percent plus 9 percent surcharge. [11] As the Federal tax base on tax liability is used in computing the State tax, in effect the Federal standard deduction and exemption are adopted. [12] Tax on interest and dividends; commuter tax found unconstitutional by U.S. Supreme Court, Mar. 19, 1975. [13] Data apply to New York commuter tax, plus 2.5 percent surcharge; Pennsylvania commuter tax (2.0 percent flat rate) is also levied. [14] Plus a 1 percent tax on net income in excess of $2,000 of individuals or trusts derived from the operation of a business, trade, or profession. [15] Refunds or forgiveness of tax due are based on certain poverty income levels. [16] Tax on interest and dividends.

[1] All assessment is performed by a State agency but assessed values are shown here as "locally assessed" for comparability with data presented for other States.

[2] Two sets of values are locally recorded for taxable property. For comparability with data for other States, the assessed values shown here pertain to the final values against which tax rates are applied, rather than to the preliminary "full and true," "true and full," and "market," or (in Illinois) local unadjusted values.

[3] Assessed values are State equalized values, which are the legal values for the levy of the authorized tax rates within the State.

Section 10

Social Insurance and Welfare Services

This section presents data related to governmental programs for old-age, survivors, disability, and health insurance (OASDHI); public and railroad employee retirement; unemployment and temporary disability insurance; aid to the needy; and maternal, child, and other welfare services. Also included here are selected data on workmen's compensation, including black lung benefits, pension plans and funds, the American Red Cross, United Way campaigns, and philanthropic trusts and foundations.

Principal sources for these data are the Department of Health, Education, and Welfare's monthly *Social Security Bulletin*, which presents current data on many of the programs and summary data in annual statistical supplements. Current data on employment security are published monthly in the Department of Labor's *Unemployment Insurance Statistics*. Data on benefits for railroad workers appear in the Railroad Retirement Board's *RRB Quarterly Review* and *Annual Report*.

Social insurance under the Social Security Act.—Social insurance programs established by the Social Security Act provide protection against wage loss resulting from old age, prolonged disability, death, or unemployment, and protection against the cost of medical care during old age and disability. The Federal OASDHI program provides monthly cash benefits to retired or disabled insured workers and their dependents and to survivors of an insured worker. Retirement benefits are payable to an aged insured worker; to his aged spouse or his spouse at any age caring for his child under age 18 or totally disabled; and to his child under age 18, totally disabled, or a full-time student, age 18 to 21. An aged worker becomes eligible for full benefits at age 65, although he or she may elect reduced benefits up to 3 years earlier; his or her spouse is under the same limitations. Special benefits are also provided the aged, 72 and over, who do not meet insured status requirements. Under certain conditions, survivor benefits are payable to dependents of an insured worker, including aged parents as well as the other dependents enumerated above (widow or widower in place of spouse) as eligible for retirement benefits. Disability benefits are payable to an insured worker under age 65 with a prolonged disability that meets the definition in the Act and to his dependents on the same basis as dependents of retired workers. A lump sum benefit is also payable on the death of an insured worker.

Beginning July 1966, Federal health insurance has been provided under two coordinated plans for nearly all people age 65 and over: A hospital insurance plan which covers hospital and related services and a voluntary supplementary medical insurance plan which covers physicians' services and related medical services. Beginning July 1973, such insurance was extended to disabled beneficiaries of any age under certain circumstances and to persons with chronic kidney disease.

Retirement, survivors, disability, and hospital insurance benefits are paid for by the contributions of workers, employers, and the self-employed on annual earnings up to $15,300 automatically adjusted each year to reflect increasing income levels. Currently (see table 469) workers and their employers each pay 4.95 percent, and the self-employed pay 7.0 percent of covered wages for retirement, survivors, and disability insurance. The special benefits for uninsured persons age 72 and over are financed from general funds. For hospital insurance, workers, employers, and the self-employed each pay 0.9 percent. For persons 65 and over with specified amounts of social security coverage less than that required for cash benefit eligibility, the hospital benefits are financed out of Federal general revenues. The voluntary medical insurance plan is financed by a $7.20 a month premium (effective July 1, 1976) paid by persons age 65 and over and the disabled who choose to enroll in the plan, and by a Federal Government contribution from general revenues.

Both unemployment insurance and the public employment (placement) service are presently administered by the U.S. Employment and Training Administration and each State's employment security agency. By agreement with the U.S. Secretary of Labor, State agencies also administer unemployment compensation for eligible ex-servicemen and Federal employees, unemployment assistance under the Disaster Relief Act of 1970 to individuals unemployed because of major disasters, workers assistance and relocation allowances under the Trade Expansion Act, and direct aid (training and related cash allowances) under Federal manpower and adjustment acts.

State unemployment insurance laws pay benefits, related to the individual's past earnings, to unemployed covered workers meeting the qualifications in those laws. In most States, a waiting period of 1 week must be served before payments begin. Benefits are payable for a maximum of 20 weeks in Puerto Rico, and 26 to 39 weeks in the States and the District of Columbia (most frequently 26 weeks); extended benefits are payable under a Federal-State program to workers who exhaust their regular State benefits during periods of high unemployment. During 1975 and 1976, supplements of these extended benefits were authorized for varying durations, depending on the insured unemployment rate in a State. As of January 5, 1976, the maximum weekly benefits without dependents' allowances ranged from $55 to $139. Ten States and the District of Columbia augment their unemployment benefits with allowances for dependents. Maximum augmented weekly benefits range from $89 to $165. Two-thirds of the States pay maximum weekly benefits that are adjusted automatically to reflect the upward movement of wages.

A 3.2 percent Federal unemployment tax is levied on the taxable payrolls of employers of one or more workers in each of 20 weeks, or with a quarterly payroll of $1,500, with certain exceptions. Taxable payroll under the Federal Act and most State laws is the first $4,200 in wages paid each worker during a year. In 16 States, the taxable payroll ranges from $4,500 to $10,000. Employers are allowed a credit of up to 2.7 percent of taxable payroll for contributions paid to States under State unemployment insurance laws. The net 0.5 percent Federal tax finances administrative costs, the Federal share of extended benefits, and advances to States. In all but 10 States, the standard unemployment insurance contribution rate is 2.7 percent of taxable payroll. Individual employers may receive rates differing from the standard, based on their own experience with the risk of unemployment. In 1975, the average State contribution rate was 2.0 percent of taxable wages.

Excluded from Federal tax coverage are the railroad industry (see below), agricultural and domestic service, nonprofit organizations, and government employment. Separate federally financed programs operated through the States provide coverage for Federal civilian employees and ex-servicemen. The Federal law requires States to provide coverage to most nonprofit organizations and to employees of State hospitals and institutions of higher education. A number of States have broader coverage of State government employment and coverage of local government employment or other services. Through temporary legislation enacted at the end of 1974, workers lacking sufficient covered employment to qualify for regular unemployment insurance benefits are eligible for special unemployment assistance if they had worked in an area with a high unemployment rate.

Social insurance for railroad workers.—The Railroad Retirement Act, administered by the U.S. Railroad Retirement Board, covers railroad employees and companies and provides retirement annuities for aged and disabled workers and for wives of retired employees, and benefits to survivors of deceased workers. Wage credits of railroad workers are combined with social security covered employment at the time of computation of benefits. These annuities and benefits, including hospital insurance, are financed primarily through an employer-employee tax on earnings up to a monthly maximum of one-twelfth of the annual social security tax base. The 1976 tax rates are 15.35 percent for employers and 5.85 percent for employees. Supplemental annui-

ties, which are financed by a special variable quarterly tax on railroad employers for each man-hour compensated, have been provided for career employees since 1966. Also, Federal health insurance is available to railroad workers on the same basis as to workers covered by social security. The Railroad Unemployment Insurance Act provides benefits for unemployment and sickness financed by contributions from covered employers of 5.5 percent (applicable to earnings not over $400 a month).

Social insurance for Government employees.—The civil service retirement program is the major system providing age and service, disability, and survivor annuities for Federal civilian employees. The employee contribution rate is 7 percent of total base pay; employing agencies pay equal amounts. In addition, there are separate retirement systems for the uniformed services (supplementing OASDHI) and for a few special groups of Federal civilian employees.

State and local government employees are covered for the most part by State and local retirement systems similar to the Federal civil service retirement system. In many jurisdictions these benefits supplement OASDHI coverage.

Workmen's compensation.—All States provide protection against work-connected injuries and deaths. Federal laws cover Federal employees, private employees in the District of Columbia, and longshoremen and harbor workers. In addition, the Social Security Administration and the Department of Labor administer a "black lung" benefits program for coal miners disabled by pneumoconiosis and for specified dependents and survivors. Many State laws exempt agriculture, domestic service, and casual labor; about one-fourth exempt employers who have fewer than a specified number of employees. Specified occupational diseases are compensable under most laws. In most States, benefits to injured workers or to survivor families compensate for two-thirds of the wage loss subject to dollar maximums which, in over two-thirds of the States, are automatically adjusted to changes in wage levels. The maximum weekly benefits without dependents' allowances range from $60 to $358 for temporary total disability. All compensation acts require that medical aid be furnished to injured workers but a few State laws have duration and/or cost limitations on the benefits provided or restrictions with respect to specific diseases.

Public Aid.—Needy individuals are assisted through the public assistance program administered by the States and the supplemental security income (SSI) program administered by the Social Security Administration. Until 1974, money payments and social services financed in part from Federal funds granted to States under the Social Security Act were provided to the aged, the blind, the permanently and totally disabled, and families with dependent children (AFDC). Federal grants also assisted States in providing medical assistance (Medicaid) to persons unable to pay their medical bills themselves. Aid to other needy persons was furnished mainly through general assistance, toward which the Federal Government made no contribution.

Beginning 1974, the SSI program replaced Federal grants to States for aid to the aged, blind, and disabled in the 50 States and the District of Columbia. Federal grants continue for the AFDC program, social services, and Medicaid, and for all programs in Guam, Puerto Rico, and the Virgin Islands. The SSI program provides a minimum income for the aged , blind, and disabled and establishes uniform national basic eligibilty requirements and payment standards. States are permitted to supplement the basic Federal payment to the extent they choose, and previous assistance recipients are assured of maintaining their December 1973 income level unless changes in individual circumstances reduce the payments.

Health and welfare services.—Programs providing health and welfare services are aided through Federal grants to States for child welfare services, vocational rehabilitation, aging activities, maternal and child health services, services for crippled children, maternity and infant care projects, comprehensive health services, and a variety of public health activities.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See preface.

NA Not available. X Not applicable.

[1] For old-age, survivors, disability, and health insurance (OASDHI), average monthly number; for railroad retirement program, public employee retirement systems, veterans programs, and the black lung benefit program, number on rolls June 30; for State unemployment and temporary disability insurance, average weekly number; for railroad unemployment and temporary disability insurance, average number during 14-day registration period; Area Redevelopment Act and Manpower Development and Training Act programs, number on rolls December 31. [2] Includes benefits to dependents where applicable.

[3] Excludes payments for medical care. [4] Payable in Calif., N.J., N.Y., R.I., and Puerto Rico under public and private plans. Data for beneficiaries in N.J. not available.

[5] Number represents families for Federal programs under the Uniformed Services Contingency Option Act of 1953 and for State and local government retirement systems. [6] Lump sums are for burial of deceased veterans.

[7] Includes payments made by the States as agents of the Federal Government under the Federal employees' unemployment compensation program and under the Ex-Servicemen's Compensation Act of 1958, and payment under the extended unemployment insurance programs, the Trade Expansion Act of 1962, and the Disaster Relief Act of 1970. Beneficiaries relate to regular State unemployment insurance, Federal employee, and ex-servicemen programs only. Includes Puerto Rico.

[8] Area Redevelopment Act of 1961 (Nov. 1961-June 1966) and Manpower Development Training Act of 1962.

No. 467. Selected Social Insurance Programs—Paid Employment and Coverage Status: 1950 to 1974

[**In millions, except percent.** Prior to 1960, excludes Alaska and Hawaii. OASDHI: Old-age, survivors, disability, and health insurance. Represents civilian noninstitutional population aged 14 and over through 1965, 16 and over thereafter; and Armed Forces. Average employment data based on calendar week in March, June, September, and December for which Current Population Survey was taken, except as noted; see text, p. 1. Coverage status generally determined on basis of job with greatest number of hours worked during survey week. See also *Historical Statistics, Colonial Times to 1970*, series H 51-56 and H 186-196]

COVERAGE STATUS	1950	1955	1960	1965	1968	1969	1970	1971	1972	1973	1974

NA Not available. X Not applicable. [1] Benefit payment actually being made at a specified time with no deductions or with deductions amounting to less than a month's benefits, i.e., the benefits actually being received. [2] 62 years and over, except 1960 for men, 65 years and over. [3] Disabled workers under age 65. [4] Includes wife beneficiaries under age 65 with entitled children in their care and, beginning Sept. 1965, entitled divorced wives. [5] Includes disabled persons aged 18 and over whose disability began before age 18 (22, beginning Jan. 1973) and, beginning Sept. 1965, entitled full-time students aged 18–21. [6] Includes surviving divorced mothers with entitled children in their care, and, beginning June 1975, widowed fathers with entitled children in their care. [7] Beginning Sept. 1965, includes widows aged 60–61 and surviving divorced wives aged 60 and over; beginning March 1968, disabled widows and widowers aged 50 and over; and beginning Jan. 1973, widowers aged 60–61. [8] Benefits for persons aged 72 and over not insured under regular or transitional provisions of Social Security Act. [9] Benefits payable with reduction for early retirement, at ages 62–64. [10] Includes awards suspended chiefly because of earnings of the retired worker and awards converted from disability awards to retirement awards on attainment of age 65. Also includes awards to transitionally insured persons aged 72 and over. [11] Represents total disbursements of benefit checks by the Dept. of the Treasury during the years specified. [12] Distribution by type estimated.

No. 481. Employee-Benefit Plans—Summary: 1950 to 1974

[Coverage data refer to civilian wage and salary workers at end of year; contributions, to amounts subscribed by employers and employees, in total. An "employee-benefit plan" is any type of plan sponsored or initiated unilaterally or jointly by employers or employees and providing benefits that stem from the employment relationship and that are not underwritten or paid directly by government (Federal, State, or local). In general, the intent is to include plans that provide in an orderly predetermined fashion for (1) income maintenance during periods when regular earnings are cut off because of death, accident, sickness, retirement, or unemployment and (2) benefits to meet medical expenses. Excludes workmen's compensation required by statute and employer's liability. See also *Historical Statistics, Colonial Times to 1970*, series H 70-114]

[1] Coverage for disability beneficiaries effective July 1, 1973. All 1973 rates are annualized.
[2] Data reflect date claims approved for payment; incomplete because of lags in claims processing.
[3] Includes outpatient diagnostic services, not shown separately. [4] Amounts paid to providers for covered services; excludes deductibles, coinsurance amounts, and noncovered services as specified by law. [5] Per 1,000 enrollees; enrollment as of July 1. [6] Data reflect date paid claims were recorded in Social Security Administration records. [7] Includes bills for which type of service is unknown.

No. 488. Medical Insurance (Medicare) Under Social Security—Enrollees and Charges for Covered Services: 1969 to 1973

[Covers supplementary medical insurance under the old-age, survivors, disability, and health insurance program; see text, p. 289. For 1969–1971, "Deductible met" refers to enrollees whose charges equaled or exceeded $50 after which supplementary medical insurance makes partial payments; beginning 1972, it refers to enrollees whose charges exceeded the deductible amount of $50. "Deductible not met" refers to enrollees with expenditures less than this amount. See also headnote, table 489]

No. 511. Foundations—Number and Finances, States and Other Areas

[**Money figures in millions of dollars.** Figures are for latest year reported by foundations, usually 1972 or 1973. A foundation may be defined as a nongovernmental, nonprofit organization, with funds and programs managed by its own trustees or directors, and established to maintain or aid social, educational, charitable, religious, or other activities serving the common welfare, primarily by making grants. Excludes organizations which make general appeals to the public for funds, act as trade associations for industrial or other special groups, are restricted by charter solely to aiding one or several named institutions, or which are captive trusts, within colleges, churches, or other organizations, or are small—defined as having neither assets of $1,000,000 nor making grants of at least $500,000 in the latest year of record. There were approximately 23,500 small foundations]

Section 11

National Defense and Veterans Affairs

This section presents statistics on national defense and its human and financial costs; military personnel, ships, and aircraft; Selective Service operations; and various federally sponsored programs and benefits for veterans. The principal sources of these data are the annual *Selected Manpower Statistics* and other reports issued by the Office of the Secretary of Defense; annual reports of the Departments of the Army, Navy, and Air Force, the Defense Civil Preparedness Agency, and the National Guard Bureau; the Selective Service System; *Annual Report of Administrator of Veterans Affairs*, Veterans Administration; and *The Budget of the United States Government*, Office of Management and Budget. Data on veterans also appear in reports of the Census of Population, conducted by the Bureau of the Census.

Department of Defense (DOD).—DOD provides for the security of the United States. It includes the Office of the Secretary of Defense, the Organization of the Joint Chiefs of Staff, the military departments (Army, Navy, Air Force), and the defense agencies (e.g. Defense Supply Agency, Defense Intelligence Agency, etc.). The Secretary of Defense is the principal assistant to the President in all matters relating to DOD. He is appointed from civil life by the President with the approval of the U.S. Senate. The chain of command runs from the President to the Secretary of Defense and through the Joint Chiefs of Staff to the commanders of unified (e.g. the overseas commands in Europe and the Pacific where Army, Navy, and Air Force activities are unified under command of a single person) and specified commands (e.g. Strategic Air Command and North American Air Defense Command).

The Joint Chiefs of Staff are the principal military advisers to the Secretary of Defense as well as the President and the National Security Council. Each member, other than the chairman, is the senior military officer of his respective service and is responsible for keeping the Secretary of his military department fully informed on matters considered or acted upon by the Joint Chiefs of Staff.

Each military department is separately organized under its own Secretary who is responsible to the Secretary of Defense for the operation of that department. Commanders of unified and specified commands are responsible to the President and the Secretary of Defense for the accomplishments of the military missions assigned to them.

Selective Service.—The Selective Service System is responsible for the registration, classification, selection, forwarding for examination, and delivery of men for induction into the Armed Forces whenever inductions are authorized by law. It is also authorized to determine availability of members of the Standby Reserve of the Armed Forces for order to active duty in time of war or national emergency. The termination of examinations and inductions on July 1, 1973, was followed by a suspension of registration on April 1, 1975. All classification actions were terminated on January 27, 1976. Currently, the Selective Service System is in a standby status, with the functions of planning and training a mobilization reserve force.

Military reserves.—Reserve personnel of the Armed Forces consist of the Army National Guard, Army Reserve, Naval Reserve, Marine Corps Reserve, Air National Guard, Air Force Reserve, and Coast Guard Reserve. They provide trained personnel available for active duty in the Armed Forces in time of war or national emergency and at such other times as authorized by law.

The National Guard has dual Federal-State responsibilities and uses jointly provided equipment, facilities, and budget support. In peacetime, the National Guard is State-administered, under command of the State Governors. The President is also

empowered to mobilize the National Guard and to use such of the Armed Forces as he considers necessary to quell insurrection in any State against its government, to enforce Federal authority in any State, and to suppress interference with the execution of State and Federal law in a State by insurrection, violence, or conspiracy.

Veterans Administration.—The Veterans Administration (VA) administers laws authorizing benefits for eligible former and present members of the Armed Forces, and for the beneficiaries of deceased former members. Veterans benefits available under various acts of Congress include: Compensation for service-connected disability or death; pensions for nonservice-connected disability or death; vocational rehabilitation, education, and training; home loan insurance; life insurance; health care; special housing and automobiles or other conveyances for certain disabled veterans; burial and plot allowances; and educational assistance to families of deceased or totally disabled veterans, servicemen missing in action, or prisoners of war.

VA estimates of veterans cover all persons with service during periods of war or armed conflict and include those living outside the United States. Veterans whose only active duty service was during periods of peacetime are eligible for some veterans benefits and, where appropriate, are included in VA estimates. Similar data from the Bureau of the Census relate to civilian males 16 years old and over, who live in the United States and who have served in the Armed Forces, whether in war or peacetime.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See preface.

No. 513. Federal Budget Outlays for National Defense and Veterans Benefits and Services: 1950 to 1976

[**In billions of dollars, except percent.** For years ending June 30. Includes outlays of Department of Defense, Veterans Administration, and other agencies for activities primarily related to national defense and veterans programs. See *Historical Statistics, Colonial Times to 1970,* series Y 472-473 and Y 476, for related data]

No. 519. Estimates of Total Dollar Costs of American Wars, by Rank

[**In millions of dollars, except percent.** Service-connected veterans' benefits estimated at 40 percent of total veterans' benefits except as noted]

War	Estimated ultimate costs	Original incremental costs [1]	Service-connected veterans' benefits: Total cost under present programs	Service-connected veterans' benefits: Cost to July 1, 1974 [2]	Interest payments on war loans: Total cost to 1975 [3]	Interest payments on war loans: Percent of original incremental costs	Estimated current cost to 1975
World War II	(4)	288,000	(4)	42,269	[5] 200,000	(4)	[6] 530,000
Vietnam conflict	(4)	112,100	(4)	2,879	[7] 3,000	(4)	[8] 118,500
Korean conflict	(4)	54,000	(4)	6,057	[9] 7,500	(4)	[10] 67,500
World War I	(4)	26,000	(4)	12,161	11,000	43	49,161
Civil War (Union only)	6,490	[11] 2,000	3,290	3,288	1,200	60	6,488
Spanish-American War	2,510	400	2,050	2,044	60	15	2,504
American Revolution	148	100	28	28	20	20	148
War of 1812	127	93	20	20	14	15	127
Mexican War	109	73	26	26	10	14	109

[1] Except for Korean and Vietnam conflicts, original incremental costs are outlays for national security during war years *minus* average annual outlay for preceding five years. Vietnam conflict estimate is from Dept. of Defense and represents incremental costs from 1965–1974 plus $2 billion for 1975. Korean conflict estimate uses running average of national security outlays from 1948–1950 as a base, and then includes additional outlays over this base for 1951–1952 and one-half increase for 1953. This 50 percent figure for 1953 is used because outlays for the Cold War increased at same time outlays for Korean conflict declined. [2] For World War I and later wars, benefits are actual service-connected figures from 1974 *Annual Report* of Veterans Administration. For earlier wars, service-connected veterans' benefits are estimated at 40 percent of total, the approximate ratio of service-connected to total benefits since World War I. [3] Interest costs use same formula as in footnote 1. [4] Unknown; last official projection of veterans' benefits is now out of date. [5] Midpoint of estimated $180 billion to $220 billion.
[6] Midpoint of estimated $510 billion to $550 billion. [7] Midpoint of estimated $1 billion to $5 billion.
[8] Midpoint of estimated $116 billion to $121 billion. [9] Midpoint of estimated $5 billion to $10 billion.
[10] Midpoint of estimated $65 billion to $70 billion. [11] Data from Goldin and Lewis, *The Economic Cost of the American Civil War, Journal of Economic History*, June 1975. Expenditures by Confederate Government are estimated by this study at $1.0 billion.

No. 520. U.S. Military Sales and Assistance to Foreign Governments: 1950 to 1975

[**In millions of dollars.** For years ending June 30. Department of Defense (DOD) sales deliveries covers deliveries against DOD sales orders authorized under the Foreign Military Sales Act, as well as earlier and applicable legislation. Commercial sales deliveries covers deliveries against orders placed directly by foreign governments to private firms. Military Assistance Program (MAP) and Excess Defense Articles (EDA) program are authorized by the Foreign Assistance Act of 1961, as amended. MAP grant aid deliveries represent military equipment and supplies delivered and expenditures for services. EDA deliveries represent deliveries of defense articles (costs at original acquisition) no longer needed by U.S. Armed Forces]

Year	Military sales: DOD sales orders: Total	DOD sales orders: Cash basis	DOD sales orders: Credit basis	Military sales: Total deliveries	Military sales: DOD sales deliveries	Military sales: Commercial sales deliveries	Military assistance: Total deliveries	Military assistance: MAP grant aid deliveries	Military assistance: EDA deliveries

[1] Includes Civilian Health and Medical Program of the Uniformed Services (CHAMPUS).
[2] Beginning 1965, includes defense agencies except Defense Supply Agency.
[3] Includes contracts awarded for work in U.S. possessions, Commonwealth of Puerto Rico, Trust Territories of the Pacific, and other areas subject to complete sovereignty of U.S.; contracts in a classified location; and any intragovernmental contracts entered into overseas.
[4] Covers firms not dominant in their fields of operation and employing fewer than 1,000, 750, or 500 persons, depending on industry classification. For certain types of firms, other criteria are used, such as yearly gross sales.
[5] 1960 includes interservice purchases; thereafter, covers only purchases from other Federal agencies and reimbursable purchases on behalf of foreign governments.

NA Not available. [1] Military awards for supplies, services, and construction. Net value of contracts of $10,000 or more for work in each State and the District of Columbia (see also "Undistributed"). Figures reflect impact of prime-contracting on State distribution of defense work. Often the State in which a prime contractor is located is not the State in which the subcontracted work is done. See also headnote, table 525.

[2] Includes contracts of less than $10,000; all contracts awarded for work in U.S. possessions, Commonwealth of Puerto Rico, Trust Territories of the Pacific, and other areas subject to complete sovereignty of U.S.; contracts in a classified location; and any intragovernmental contracts entered into overseas.

[1] Union forces only. Estimates of the number serving in the Confederate forces range from 600,000 to 1,500,000. [2] Covers period Dec. 1, 1941, to Dec. 31, 1946. [3] Covers period June 25, 1950, to July 27, 1953. [4] Covers period Aug. 4, 1964, to Jan. 27, 1973. [5] Covers period Apr. 21 to Aug. 13, 1898. [6] Originally organized in 1907; Established as Air Force under the Armed Services Unification Act of 1947. For World War I, known as Aviation Service and included in data for Army; for World War II, known as Army Air Forces and included in data for Army. [7] Included in Army. [8] Established Jan. 28, 1915. [9] Based on Army and Marines only. [10] Excludes Navy. See footnote 11. [11] Covers period July 1950 through January 1955. Represents Far East area only. [12] During hostilities only. [13] Covers war personnel who departed from conterminous United States through December 1898. [14] For periods covered, see footnotes 2, 3, 5, and 11. [15] Covers period Jan. 1, 1961, to Jan. 27, 1973 (date of cease-fire). [16] Includes gassed in action. Army data include casualties in northern Russia to Aug. 25, 1919, and in Siberia to Apr. 1, 1920; Marine data represent casualties in Europe only. [17] Includes casualties incurred in October 1941, due to hostile action. [18] Covers only Army personnel base of 1,908,800. [19] Covers only Army personnel base of 246,410. [20] Covers only Army personnel base of 3,665,000. [21] Covers all services base of 9,370,986. [22] Covers all services base of 4,428,939. [23] Covers all services base of 2,980,666.

– Represents zero.

[1] Excludes transfers from appropriations to insurance trust funds from which the actual payments are made, and expenditures from VA Revolving Supply Fund. Includes expenditures from personal funds of patients.

[2] Includes education and training allowances for veterans and servicemen, and educational assistance for wives, widows, sons, and daughters of deceased or totally disabled veterans.

[3] Includes subsistence allowances, tuition, supplies, and equipment for training of disabled veterans.

[4] Includes payments and allowances for various programs such as unemployment and self employment allowances, automobiles and other conveyances for disabled veterans, etc.

[5] Estimated; includes expenditures for hospital and domiciliary care, outpatient medical and dental treatment, medical research, and grants to Republic of Philippines for medical care and treatment of veterans.

[6] Comprises construction and related costs, and amounts transferred to Dept. of Army, Corps of Engineers, for construction of hospitals.

[7] Includes direct payments to beneficiaries from insurance appropriation, servicemen's indemnities, and benefits and dividends paid from insurance trust funds. Also includes some noncash transactions (e.g., interest credited to dividends left on deposit).

Miscellaneous expenditures [10]	146	124	131	157	189	206	221	17

X Not applicable. Z Less than $500,000.

[1] Excludes expenditures from personal funds of patients. Includes expenditures from VA Revolving Supply Fund and insurance trust funds. [2] Includes expenditures for statutory burial awards, special clothing allowance, mortgage life insurance, invalid lifts, headstones and markers, and other expenses; therefore, total for 1970–1974 differs from that shown in table 557 which excludes these items. [3] Except as noted, comparable with data presented in table 557.

[4] Not comparable with 1965–1969 data in table 557. [5] Program initiated June 1966. [6] Includes changes in receivables. [7] Not comparable with data in table 557. 1966–1970 includes National Cancer Institute expenditures (transfer to Veterans Administration).

[8] Includes construction grants for State extended care facilities. 1975 includes expenditures for health manpower training facilities. [9] Comparable with sum of insurance and servicemen's indemnities, and transfers to insurance trust funds in table 557. [10] Not comparable with data in table 557.

Section 12

Labor Force, Employment, and Earnings

This section presents statistics dealing with the characteristics of the economically active segment of the population, the labor force; its distribution by occupation and industry affiliation; and the supply of, demand for, and conditions of labor.

The chief sources of these data are the census of population conducted by the Bureau of the Census (see text, p. 1); the monthly *Employment and Earnings* and *Monthly Labor Review* of the Bureau of Labor Statistics (BLS); and the quarterly *Farm Labor* of the Statistical Reporting Service (SRS), Department of Agriculture.

Types of data.—Statistics on employment and earnings shown in this section are derived from two bodies of data. Each measures a different aspect of employment. Data based on household interviews conducted by the Bureau of the Census in the census of population and the Current Population Survey (see below) present information on employment status obtained from workers or members of their households. Each employed worker is counted only once, even though he may have held more than one job during a given period.

Data based on establishment or farm reports are used in BLS and SRS surveys. Workers are counted each time they appear on a payroll during the same period. While population characteristics are obtained only from household surveys, detailed data on wages, hours worked, and labor turnover are more readily obtained from establishment reports.

Every tenth year the census of population provides detailed data for the United States and for each State, standard metropolitan statistical area, county, city, and for other areas. The data include characteristics (sex, age, race, occupation, income, etc.) of persons employed and unemployed, and other items.

Monthly data from the Current Population Survey are published by BLS in *Employment and Earnings* and related publications. Data presented include national totals, by sex, race, and age, of the number of persons in the civilian labor force; the number employed, hours of work, and occupational groups; the number unemployed and duration of unemployment; and the number of nonparticipants in the labor force, their work experience, and job-seeking intentions.

Employment and Earnings also presents monthly data from establishment surveys on nonagricultural employment by industry group, labor turnover, and hours worked. These data are shown for broad groupings in the BLS *Monthly Labor Review*, which also presents statistics on wage rates, industrial relations, and output per man-hour. Certain of these data are shown for States and most standard metropolitan statistical areas. Historical data, in geographic detail, are shown in the BLS Bulletin No. 1370-11, *Employment and Earnings, States and Areas, 1939–74*, and in the BLS *Handbook of Labor Statistics*.

Current Population Survey.—Labor force data are collected and compiled for BLS as a part of the Current Population Survey, a monthly nationwide sample survey conducted by the Bureau of the Census. (See text, p. 1.) A detailed discussion of the survey and its methodology appears in *Concepts and Methods Used in Manpower Statistics From the Current Population Survey* (Report No. 313), available on request from BLS. Because the data are derived from a probability sample, they may differ from the figures that would have been obtained if it were possible to take a complete census using the same questionnaire and procedures. Thus, the data are subject to some degree of sampling error which must be taken into account in evaluating changes in the data. According to current computations, the relative sampling error for summary estimates such as civilian labor force, total employment, and nonagricultural employ-

ment is about 0.3 percent; for agricultural employment and for unemployment, it is roughly 2 to 4 percent. The chances are about 2 out of 3 that an estimate from the sample would differ from a complete census by less than the percentage estimated above for the particular item. The chances are about 19 out of 20 that the difference would be less than twice the specified percentage and about 99 out of 100 that it would be less than 2½ times the percentage. This sampling variability is illustrative of the variability of data based on the Current Population Survey. For further details, see the explanatory notes in the BLS *Employment and Earnings.*

Current Population Survey figures may differ from decennial census data because of sampling variability as well as differences in the enumeration process and procedures. For further information, see *U.S. Census of Population: 1970,* vol. I.

Labor force.—Beginning 1967, BLS raised the lower limit for persons in the labor force from 14 to 16 years of age. Data on employment status, collected each month in the Current Population Survey, relate to activity or status during the week which includes the 12th of the month. Annual figures shown here are 12-month averages. Changes in methods of measuring employment and unemployment were also introduced in 1967, clarifying underlying concepts but not substantially altering the statistics. See February 1967 *Employment and Earnings* and *Monthly Report on the Labor Force.*

The *civilian labor force* comprises all civilians classified as employed or unemployed according to the criteria below; the "total labor force" also includes the Armed Forces. *Employed persons* comprise (a) all civilians who, during the survey week, did any work for pay or profit (minimum of an hour's work) or worked 15 hours or more as unpaid workers in a family enterprise, and (b) all persons who were not working but who had jobs or businesses from which they were temporarily absent for noneconomic reasons (illness, bad weather, vacation, labor-management dispute, etc.). *Unemployed persons* comprise all persons not working during the survey week who made specific efforts to find a job within the previous 4 weeks, (such as applying directly to an employer, or to a public employment service, or checking with friends) and who were available for work during the survey week (except for temporary illness). Persons on layoff from a job or waiting to report to a new job within 30 days are also classified as unemployed. All other persons, 16 years old and over, are "not in the labor force."

Beginning in 1972, information from the 1970 Census of Population was introduced into estimation procedures, producing increases in the civilian noninstitutional population, labor force, and employment totals, but having essentially no effect on unemployment levels and rates. A subsequent population adjustment, introduced in March 1973, affected the statistics by race but had little effect on totals or rates. Further changes derived from a comprehensive revision in classification of occupations and industries for the 1970 census, and from inclusion of a question on major activities or duties in the December 1971 Current Population Survey. As a result, meaningful comparisons of occupational employment levels cannot be made between 1971–1972 and prior periods nor between those 2 years. For further explanation of the changes, see the February 1971 and 1972 issues of *Employment and Earnings.*

Employment and earnings.—The monthly estimates and annual averages of nonagricultural employment prepared by BLS are based on voluntary reports from establishments which, in March 1974, employed 12 million manufacturing workers (59 percent of total manufacturing employment at that time), 11 million workers in nonmanufacturing industries except government (26 percent of the total in nonmanufacturing industries), and 9 million Federal, State, and local government employees (61 percent of the total in government). These reports are supplemented by data from other government agencies and adjusted at intervals to data from tabulations of reports from government social insurance programs. The estimates exclude proprietors of unincorporated businesses, self-employed persons, domestic servants, unpaid family workers, agricultural workers, and the Armed Forces. In addition, industrial activity

is presented for the private sector only. Employees of State government hospitals, for example, are included with "State and local government" rather than "Medical and other health services." The employment data are for full- and part-time employees who received pay for any part of the period reported.

Estimates are available on a continuous basis from 1919 for total nonfarm payroll employment and the 8 major industry divisions. Estimates for other periods are available for several hundred selected industries.

Average weekly hours and average weekly and hourly earnings are available for over 360 series covering production and related workers in manufacturing and mining, construction workers in contract construction, and nonsupervisory workers in other selected nonmanufacturing industries. The earnings data are gross (before payroll deductions) and include overtime premiums; they exclude irregular bonuses and value of payments in kind. Hours are those for which pay was received.

Agricultural employment estimates and wage rates, obtained by means of monthly mail returns, have been issued since 1909 by the Department of Agriculture and appear monthly in *Farm Labor*. Annual estimates of persons 14 years old and over who did farm work for cash wages at any time during the year are published in *The Hired Farm Working Force*. Also reported are days employed, earnings from farm and nonfarm work, personal characteristics of hired farm workers, and other pertinent information.

Productivity.—BLS publishes measures of productivity under two major programs which measure the relationship between production and one factor of input, labor time. The first deals with measures for selected individual industries and various functional areas of the Federal civilian government sector; the second is concerned with measures relating to the total private economy and its various sectors. Neither program measures the specific contribution of labor or capital nor the increased efficiency resulting from changes in technology or production procedures. Detailed information on the first program appears in *BLS Handbook of Methods*, BLS Bulletin 1711 (1971), chapter 26, and in a number of individual industry reports; conceptual and background information concerning the Federal sector measures appear in *Monthly Labor Review*, November 1974.

Data for the second program are published quarterly in the BLS press release, *Productivity and Costs in the Private Economy* and *Productivity and Costs in Nonfinancial Corporations*. Detailed information on the methods, limitations, and data sources is contained in *BLS Handbook of Methods*, chapter 25.

Labor turnover.—Labor turnover rates are published monthly in the *Monthly Labor Review* and in *Employment and Earnings* for over 220 industries on the basis of reports from cooperating establishments employing over 10 million workers (about 52 percent of the universe surveyed). Labor turnover data are available on a monthly basis from January 1930 for manufacturing as a whole and, from January 1958, for individual industries and industry groups.

Work stoppages.—Statistics on strikes are compiled by BLS and include stoppages, workers involved, and days of idleness. Basic data are obtained from the employers and unions involved in strikes. Knowledge of strikes comes from a variety of sources, including newspapers, State employment services, and State and Federal mediation services. The Bureau presents annual reports in the *Monthly Labor Review* and later, in bulletin form, giving totals for each month of the year and analysis of strikes by industry, State, city, causes, and other classifications.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970*. See preface.

Source of tables 572 and 573: U.S. Bureau of Labor Statistics, *Employment and Earnings*, monthly.

No. 574. Marital Status of Women in the Civilian Labor Force: 1940 to 1975

Persons 14 years old and over through 1965; 16 years old and over thereafter. As of March, except as indicated. Prior to 1960, excludes Alaska and Hawaii. Figures for 1940 based on complete census revised for comparability with intercensal series. Data for 1944-1972 based on Current Population Survey; see text, p. 1. Beginning 1955, figures not strictly comparable with previous years as a result of introduction into estimating procedure of 1950 census data through 1960, and of 1960 census data beginning 1965. See also *Historical Statistics, Colonial Times to 1970*, series D 49-62]

No. 592. Civilians Employed, by Hours Worked: 1960 to 1975

[**In thousands of persons 14 years old and over, through 1965; 16 years old and over, thereafter.** 1960 and 1965, during the survey week in May; thereafter, annual averages]

ITEM	1960	1965	1970	1971	1972	1973	1974	1975
Nonagricultural employed [1]	61,371	67,278	75,165	75,732	78,230	80,957	82,443	81,403
Worked 1-14 hours	3,578	4,403	3,962	4,036	4,086	4,092	4,200	4,349
Worked 15-34 hours	7,203	7,563	14,260	12,262	12,463	13,381	14,075	14,189
Worked 35 or more hours	48,594	53,008	52,462	54,847	57,114	58,710	59,008	57,857
Percent of total	79.2	78.8	69.8	72.4	73.0	72.5	71.6	71.1
Employed in agriculture [1]	5,887	5,128	3,462	3,387	3,472	3,452	3,492	3,380
Worked 35 or more hours	4,129	3,475	2,255	2,209	2,282	2,265	2,301	2,227
Percent of total	70.7	67.8	65.1	65.2	65.7	65.6	65.9	65.9

[1] Includes persons who had a job or business, but did not work at all during entire survey week because of illness, bad weather, vacation, industrial dispute, or various personal reasons, not shown separately.

No. 593. Class of Worker of Employed Persons, by Sex: 1965 to 1975

[**In thousands of persons 14 years old and over, through 1965; 16 and over, thereafter.** See headnote, table 600]

CLASS OF WORKER	1965		1970		1973		1974		1975	
	Male	Female	Male	Female	Male	Female	Male	Female	Male	Female
Agriculture, employed	3,729	856	2,861	601	2,833	619	2,901	592	2,801	579

No. 594. Nonagricultural Establishments—Employees and Average Weekly Hours: 1960 to 1976

[Excludes Alaska and Hawaii. Based on data from establishment reports. Includes all full- and part-time employees who worked during, or received pay for, any part of the pay period reported. Excludes proprietors, self-employed persons, farmworkers, unpaid family workers, domestic servants, and Armed Forces. Data are annual averages adjusted to March 1972 benchmark levels indicated by data from government social insurance programs. See also *Historical Statistics, Colonial Times to 1970*, series D 127–141]

Z Less than 500. [1] Mining combined with services. [2] Mining combined with contract construction.
[3] Federal employment in the Maryland and Virginia sectors of the Washington Standard Metropolitan Statistical Area is included only in data for the District of Columbia in 1960. Beginning 1970, Federal employment in the Virginia sector is included in both Virginia and the District of Columbia; beginning 1974, Federal employment in both sectors is excluded from data for the District of Columbia.

No. 597 Nonagricultural Industries—Number of Employees, 1965 to 1975, and Number and Earnings of Production Workers, 1970, 1974, and 1975

[Covers all full- and part-time employees who worked during, or received pay for, any part of the pay period including the 12th of the month. For mining and manufacturing, data refer to production and related workers; for contract construction industries, to employees engaged in actual construction work; and for other industries, to nonsupervisory employees and working supervisors. See also headnote, table 594. "N.e.c." means not elsewhere classified. See *Historical Statistics, Colonial Times to 1970*, series D 127–151, D 802–810, and D 877–892, for related data]

[1] Refers to gross national product in 1972 prices. [2] Hours of all persons in private industry engaged in production; includes hours of proprietors and unpaid family workers. Based primarily on establishment data. [3] Wages and salaries of employees plus employers' contribution for social insurance and private benefit plans. Also includes an estimate of wages, salaries and supplemental payments for the self-employed. [4] Change from 1959. [5] Change from 1964. [6] Change from 1969.

No. 602. Experienced Civilian Labor Force, by Sex and Occupation, 1960 and 1970, and by Selected Characteristics, 1970

[1960, covers persons 14 years old and over; 1970, 16 years old and over. For definition, see text, p. 352. "N.e.c." means not elsewhere classified. The medians in this table were derived from a distribution that had $15,000 or more as the highest category. A median of $15,000+ indicates that the median fell in the upper category. See *Historical Statistics, Colonial Times to 1970*, series D 233-682, for male and female combined]

SEX AND OCCUPATION	1960, total (1,000)	1970				
		Total (1,000)	Median earnings, 1969 [1] (dollars)	Negro

No. 609. Percent Increase in Average Salaries for Selected Occupations in Private Industry: 1970 to 1975

[Based on sample and subject to sampling variability. Relates to metropolitan areas and nonmetropolitan counties in U.S. except Alaska and Hawaii. The minimum employment sizes of establishments studied were: 250 or more in manufacturing and retail trade; and 100 or more in transportation, communication, electric, gas, and sanitary services, wholesale trade, engineering and architectural services, commercially operated research, development, and testing laboratories, and finance, insurance, and real estate. When changes were made in survey coverage, year-to-year percent changes were based on data adjusted to represent same coverage in both years]

No. 610. Annual Percent Increase in Average Pay for Selected Occupations and in Consumer Prices: 5-Year Periods, 1965 to 1975

[5-year periods begin and end in January of years shown unless otherwise indicated]

ITEM	1965–1970	1966–1971	1967–1972	1968–1973	1969–1974	1970–1975
Private industry:						
Prof., admin., tech., and clerical employees, average salaries: [1]						
Clerical and beginning technicians	4.8	5.5	5.8	5.9	6.1	6.7
Entry and development professional levels, advanced technical levels, supervisors of nonprofessional levels	5.4	5.9	6.1	5.7	5.6	6.1
Fully experienced professional working levels, supervisors of professional and program administration levels	5.0	5.5	5.8	6.0	6.0	6.5
Production and nonsupervisory workers, nonagric. industries:						
Average hourly earnings adjusted for overtime [2] (manufacturing only) and interindustry employment shifts	5.4	6.1	6.6	6.7	6.7	7.3
Police and firefighters: [3]						
Minimum annual salary scales	7.8	7.6	7.9	7.3	6.5	6.0
Police	8.0	7.6	7.9	7.3	6.5	5.9
Firefighters	7.6	7.6	7.8	7.2	6.5	6.2
Maximum annual salary scales	7.6	7.7	7.7	8.1	7.4	7.1
Police	7.7	7.6	7.7	8.2	7.4	7.1
Firefighters	7.4	7.7	7.7	7.9	7.3	7.1
Urban public classroom teachers, average annual salaries [4]	[5] 6.2	[6] 6.9	[6] 6.9	[7] 6.8	[7] 6.8	(NA)
Federal classified employees: [8] Average annual salary rates	5.2	6.4	6.3	7.4	6.0	5.7
Average annual salaries	6.0	7.5	7.8	9.1	6.5	5.9
Consumer price index	3.9	4.5	4.6	4.6	5.5	6.6

NA Not available. [1] Covers June 1970–March 1975. For further details, see *National Survey of Professional, Administrative, Technical, and Clerical Pay*, Bulletin No. 1891. [2] Data are subject to annual benchmark revision and are not seasonally adjusted. [3] Pertains to cities of 100,000 population or more in 1970. [4] Pertains to cities of 100,000 population or more in 1970, and counties of this size in standard metropolitan statistical areas with county-wide school systems. [5] 1965–69 data. [6] 1967–71 data. [7] 1969–73 data. [8] Covers July 1970–April 1975. Average salary rates show statutory changes and the effect of changes in the proportion of workers at each step within the salary ranges for individual grades. Average salaries measure the effect of statutory changes in basic pay scales and in-grade salary increases, and also changes in the proportion of workers in various grades.

No. 615. Indexes and Averages of Union Wage Rates in Selected Trades: 1960 to 1975

[As of first working day in July. Data for 1960 exclude Alaska. Indexes of rates reflect changes in minimum hourly wage scales. Year-to-year changes in union scales are based on comparable quotations for each trade weighted by membership for current year. Average wage rates show current levels and should not be used for precise year-to-year comparisons because of fluctuations in membership in the classifications studied. See *Historical Statistics, Colonial Times to 1970*, series D 818-829, for printing on 1948-49 base and other trades on 1947-49 base]

Trade	1960	1965	1968	1969	1970	1971	1972	1973	1974	1975

No. 621. Labor Unions—Financial Summary, by Type of Union: 1966 to 1974

[For fiscal years ending during calendar year. Data from annual financial reports of labor organizations filed with Department of Labor under provisions of Labor-Management Reporting and Disclosure Act of 1959 (LMDRA) which covers substantially all labor unions in the United States, except those which are State or local central bodies. Classification by type is based mainly on union's self-classification in filed reports]

Year and type of union	Total number of unions	Number of unions by size of receipts					Assets (mil. dol.)	Liabilities (mil. dol.)	Receipts (mil. dol.)	Disbursements (mil. dol.)
		Under $10,000	$10,000-$49,999	$50,000-$99,999	$100,000-$999,999	$1,000,000 and over				
1966, total	52,272	32,617	13,151	3,074	3,239	191	2,157	143	(1)	(1)
National unions	207	21	22	16	62	86	995	47	728	695

NA Not available. [1] Intl. Union of Mine, Mill, and Smelter Workers, and Intl. Union of District 50 merged with United Steelworkers of America in 1967 and 1972, respectively. [2] Figures for earlier years also represent the union as constituted after merger. [3] In 1968 United Packinghouse, Food and Allied Workers merged with Amalgamated Meat Cutters and Butcher Workmen of North America. [4] United Papermakers and Paperworkers merged with Intl. Brotherhood of Pulp, Sulphite and Paper Mill Workers in 1972 to form United Paperworkers International Union. [5] American Postal Workers Union formed in 1971 by merger of the postal clerks union and 4 other unions. [6] Postal clerks only. [7] Merged with Brotherhood of Railroad Trainmen and three other railroad unions in 1969. [8] Railroad trainmen only. [9] Except 1964, includes Transportation-Communication Employees Union. [10] AFL-CIO per capita reports. [11] American Bakery and Confectionery Workers Intl. Union and Bakery and Confectionery Workers' Intl. Union of America merged in 1969. [12] International Printing and Graphic Communications Union (AFL-CIO) formed in 1973.

No. 623. Work Stoppages: 1950 to 1974

[Prior to 1960, excludes Alaska and Hawaii. Excludes work stoppages involving fewer than 6 workers or lasting less than 1 day. Information obtained directly from companies and unions involved as well as from various Government labor boards, conciliation services, and other neutral parties. See also *Historical Statistics, Colonial Times to 1970*, series D 970-976]

YEAR	WORK STOPPAGES		WORKERS INVOLVED		WORKER-DAYS IDLE DURING YEAR		
	Number beginning in year	Average duration (calendar days)	Number [1] (1,000)	Percent of total employed [2]	Number (1,000)	Percent of estimated working time [3]	Per worker involved
1950	4,843	19.2	2,410	5.1	38,800	0.33	16.1
1955	4,320	18.5	2,650	5.2	28,200	0.22	10.7
1960	3,333	23.4	1,320	2.4	19,100	0.14	14.5
1965	3,963	25.0	1,550	2.5	23,300	0.15	15.1
1967	4,595	22.8	2,870	4.3	42,100	0.25	14.7
1968	5,045	24.5	2,649	3.8	49,018	0.28	18.5
1969	5,700	22.5	2,481	3.5	42,869	0.24	17.3
1970	5,716	25.0	3,305	4.7	66,414	0.37	20.1
1971	5,138	27.0	3,280	4.6	47,589	0.26	14.5
1972	5,010	24.0	1,714	2.3	27,066	0.15	15.8
1973	5,353	24.0	2,251	2.9	27,948	0.14	12.4
1974	6,074	23.6	2,778	3.4	47,991	0.24	17.3

[1] Workers counted more than once if involved in more than 1 stoppage during year.
[2] In 1967, total employed workers were redefined to coincide with U.S. Bureau of Labor Statistics figures for nonagricultural employment, plus agricultural wage and salaried workers. Idleness computed on this basis is lower than the former series.
[3] Estimated working time computed by multiplying average number of employed workers (see footnote 2) by number of days worked by most employees.

No. 626. Occupational Injury and Illness Rates—Selected Industries: 1950 to 1973

[Through 1970, represents frequency of disabling injuries per million man-hours worked. Beginning 1972, represents occupational injury and illness incidence rates per 100 full-time workers. Old series not comparable with new series: 1950 to 1970, rates refer to cases resulting in death, permanent impairment, or one or more days of disability; beginning 1972, rates refer to any occupational injuries or illnesses resulting in (1) fatalities, (2) lost workday cases, or (3) nonfatal cases without lost workdays. Old series and new series also subject to change in industry classification; for explanation, see sources. See also *Historical Statistics, Colonial Times to 1970*, series D 1029–1035]

INDUSTRY	OLD SERIES						NEW SERIES	
	1950	1955	1960	1965	1969	1970	1972	1973
Manufacturing	14.7	12.1	12.0	12.8	14.8	15.2	15.6	15.3

Section 13

Income, Expenditures, and Wealth

This section presents statistics on two different aspects of income and expenditures: One aspect relates to the national income and product system (a summation reflecting the entire complex of the Nation's economic activities and the interaction of its major components) and the other to the distribution of money income to families and individuals, or consumer income. Statistics on national and personal wealth are also included in this section.

The primary source for national income and product information is *Survey of Current Business*, published monthly by the Department of Commerce, Bureau of Economic Analysis. National income and product tables for the 1946–75 period are published in the January 1976 *Survey*. The basic reference sources for concepts and methodology are *National Income, 1954 Edition; U.S. Income and Output, 1958;* the August 1965 *Survey; Readings in Concepts and Methods of National Income Statistics;* and the January 1976 *Survey*.

The major source of income distribution data is the Bureau of the Census (Census of Population and Current Population Survey). Annual data on consumer income distribution by size-class appear in *Current Population Reports—Consumer Income*, series P–60. A brief description of the Current Population Survey, which is the basis for the data in that series, is given on page 1 of this edition of the *Statistical Abstract*.

Gross national product.—Gross national product (GNP) is the total national output of goods and services valued at market prices. It can be viewed in terms of expenditure categories. These categories comprise purchases of goods and services by consumers and government, gross private domestic investment, and net exports of goods and services. The goods and services included are largely those bought for final use (excluding illegal transactions) in the market economy. There are a number of inclusions, however, which represent imputed values, the most important of which is the rental value of owner-occupied dwellings. GNP measures the output attributable to the factors of production—labor and property—supplied by residents of the United States. GNP differs from "national income" mainly in that GNP includes allowances for depreciation and for indirect taxes (such as sales and excise taxes).

The GNP implicit price deflator is the ratio of GNP in current prices to GNP in constant prices. It is a weighted average of the price indexes used to deflate the components of GNP. The implicit weights are expenditures in the current period valued in prices of the base year 1958. The deflator measures the price change of the current period's "market basket" since 1958.

National income.—National income is the aggregate earnings of labor and property which arise in the current production of goods and services by the Nation's economy. It is the sum of compensation of employees, proprietors' income, rental income, net interest, and corporate profits. Thus, it measures the total factor costs of the goods and services produced by the economy. Earnings are inclusive of direct taxes on those earnings.

Personal income.—Personal income is the current income received by persons from all sources net of contributions for social insurance. Not only individuals (including owners of unincorporated enterprises), but nonprofit institutions, private trust funds,

and private health and welfare funds are classed as "persons." Personal income includes transfers (payments not resulting from current production) from government and business such as social security benefits, military pensions, etc., but excludes transfers among persons. Although most of the income is in monetary form, there are important nonmonetary inclusions—chiefly, estimated net rental value to owner-occupants of their homes, the value of services furnished without payment by financial intermediaries, and the value of food consumed on farms.

Disposable personal income is the income remaining to persons after deducting personal tax and nontax payments to general government. It is the income of persons available for spending or saving.

Distribution of money income to families and individuals.—Consumer income statistics are based on data collected in various field surveys of income conducted since 1936. In each of these surveys, trained enumerators interview representative samples of the population with respect to income received during the previous year. The income here referred to is before deduction of income taxes or social-security taxes unless otherwise specified in individual tables. Nonmoney items of income are not included. None of the aggregate income concepts (gross national product, national income, or personal income) is exactly comparable with consumer money income. The nearest approximation is "personal income."

Poverty level (low income) statistics are based on a "poverty index" developed by the Social Security Administration (SSA) in 1964. This index provided a range of income levels adjusted by family size, sex of family head, number of children under age 18, and farm-nonfarm residence and was based primarily on a nutritionally adequate food plan ("economy" plan) designed by the Department of Agriculture for "emergency or temporary use when funds are low." Until 1969, annual revisions of these levels were based on price changes of items in the economy food plan. Deliberations of a Federal Interagency Committee in 1969 resulted in two changes: (1) SSA levels for nonfarm families were retained for the base year 1963 but annual adjustments in the levels were to be based on changes in the Consumer Price Index rather than on economy food plan costs and (2) farm levels were raised from 70 to 85 percent of the corresponding nonfarm levels.

Individuals' saving and assets.—The Board of Governors of the Federal Reserve System issues detailed estimates of individuals' saving based on flow of funds accounts and showing the increase in financial assets, net investment in tangible assets, less increase in debt of individuals. Data back to 1946 are available upon request from the Federal Reserve.

National wealth.—The national wealth data shown in table 695 are intended chiefly to indicate the order of magnitudes involved and to permit rough comparisons among types of wealth and of the growth over long periods. Definitions and analytical details are presented in the source publication.

Current and constant dollars.—Several of the series in this section are expressed both in current dollars and in constant dollars. Data shown in current dollars are unadjusted for comparability with respect to prices over a period of time; that is, the dollars shown are in terms of the level of prices prevailing for each of the years specified. Data shown in constant dollars are computed values which eliminate the effect of price changes. Constant dollars are derived by dividing current-dollar figures by their corresponding price indexes based on a year specified as 100.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See preface.

No. 628. Gross National Product—Summary: 1929 to 1975

Surplus or deficit (−)	8.0	3.1	3.1	.5	−9.4	−3.5	6.3	−4.2	−64.4
Foreign:									
Net exports of goods and services	1.9	2.2	4.4	7.6	3.9	−3.3	7.1	7.5	20.5
Transfer payments to foreigners (net) plus interest paid by Government to foreigners	4.0	2.5	2.6	3.3	4.3	6.5	7.7	8.5	8.5
Capital grants received by the United States (net) less net foreign investment [3]	−2.1	−.3	1.7	4.3	[4] .5	[4] −9.1	.6	1.0	−11.9

[1] Undistributed corporate profits with inventory valuation adjustment, plus corporate capital consumption allowances, plus noncorporate capital consumption allowances with noncorporate capital consumption adjustment, and excess of wage accruals over disbursements.

[2] Government receipts, less transfer payments to persons, transfer payments to foreigners (net), net interest paid, and subsidies less current surplus of government enterprises; plus wage accruals less disbursements.

[3] Net exports minus transfers to foreigners (net) and capital grants received by the U.S.

[4] Includes capital grants received by the U.S. (in billions of dollars): 1970, .9; and in 1972, .7.

No. 635. Personal Consumption Expenditures, by Product: 1950 to 1974

[**In billions of dollars, except percent.** Prior to 1960, excludes Alaska and Hawaii. Represents market value of goods and services purchased by individuals and nonprofit institutions, and value of food, clothing, housing, and financial services received by them as income in kind. Includes rental value of owner-occupied houses, but not purchases of dwellings. See *Historical Statistics, Colonial Times to 1970*, series G 416-469 for single-year figures prior to minor revisions issued in 1976]

No. 647. Money Income—Percent Distribution of Families, by Income Level and Race of Head: 1950 to 1975

[Families as of March of following year. Prior to 1960, excludes Alaska and Hawaii. Based on sample; see text, p. 1. Excludes inmates of institutions and Armed Forces, except Armed Forces living off post or with their families on post. Includes a small number of families with no money income. For definition of family, see text, p. 3. For definition of median, see p. xii. See also *Historical Statistics, Colonial Times to 1970*, series G 2-8]

Race of head and year	Percent distribution by family income level										Median		
	Under $2,000	$2,000–$2,999	$3,000–$3,999	$4,000–$4,999	$5,000–$5,999	$6,000–$6,999	$7,000–$9,999	$10,000–$14,999	$15,000–$24,999	$25,000 and over	Income (dol.)	Index (1947=100) Current dollars	Index (1947=100) 1975 dollars

No. 659. Median Family Income, 1959 and 1969, and Per Capita Income, 1959 to 1972—States, by Per Capita Rank in 1972

[Population and families as of April 1960, April 1970, and July 1973. Ranks for the 50 States based on descending order from highest to lowest income. Ties in one rank are broken by rank in the other income measure. For definition of median, see p. xii. See *Historical Statistics, Colonial Times to 1970*, series G 205–256, for median family income]

State	Median family income					Per capita income

No. 672. Average Poverty Levels for Nonfarm Families and Individuals, by Size of Family and Sex of Head: 1959, 1970, and 1975

[In dollars. Excludes inmates of institutions, members of Armed Forces living in barracks, and unrelated individuals under 14 years of age. Families and unrelated individuals are classified as being above or below the poverty level, using the poverty index adopted by a Federal Interagency Committee in 1969. For explanation of poverty level, see text, p. 392]

Size of family unit	1959			1970			1975 [2]		
	Total nonfarm	Male head [1]	Female head [1]	Total nonfarm	Male head [1]	Female head [1]	Total nonfarm	Male head [1]	Female head [1]
1 person (unrelated individual)	1,467	1,529	1,428	1,954	2,044	1,898	2,724	2,851	2,635
Under 65 years	1,503	1,569	1,451	2,010	2,092	1,935	2,797	2,902	2,685

No. 676. Persons Below Poverty Level and Aggregate Income Deficit, by Race of Head and Family Status: 1959 to 1974

[Families and unrelated individuals as of March of following year. Income deficit defined as the difference between the total income of families and unrelated individuals below poverty level and their respective poverty thresholds. In computing the income deficit, families reporting a net income loss are assigned zero dollars; for such cases, the deficit is equal to the poverty level. For explanation of poverty level, see text, p. 392]

No. 680. Persons and Families Below Poverty Level—States: 1959 and 1969

[**Number in thousands.** Persons and families as of April 1960 and 1970. For 1959, excludes all persons in group quarters. For 1969, excludes unrelated individuals under 14 years of age and specified types of group quarters, i.e. inmates of institutions, persons in Armed Forces living in barracks, and college students living in dormitories. Poverty criteria computed on a national and farm-nonfarm basis only and not adjusted for regional, State, or other local variations in cost of living. For explanation of poverty level, see text, p. 392]

No. 687. Appalachia—Family and Personal Income, by States: 1965 to 1974

[Personal income differs from money income in that personal income consists of both money and nonmoney sources of income, such as wages and salaries, wages in kind, net rental value of owner-occupied homes, food stamps, etc. Money income includes several items not reflected in the personal income series, such as regular contributions for support from persons outside the household, income from roomers and boarders, etc. See sources for additional explanation of the two measures. For definition of median, see p. xii]

No. 688. Federal Outlays Benefiting Persons Below the Poverty Level: 1964 to 1974

[**In billions of dollars.** For fiscal years ending June 30. Represents estimated direct benefits, i.e., cash payments and in-kind transfers, as well as nonincome benefits such as education, manpower training, and employment placement. Excludes benefits to families or individuals who receive cash transfers (e.g. Social Security) which raise their total money income above poverty level. Also excludes benefits to those families and individuals whose full-year cash income is above poverty level, even if they were without income (and therefore eligible for public assistance or food stamps) during part of that year. For explanation of poverty level, see text, p. 392]

ITEM	1964	1966	1968	1970	1971	1972	1973	1974

All others	.3	.3	.4	.5	.6	.6	.6	.6

– Represents zero. Z Less than $0.05 billion. [1] Programs that actively promote the development of work skills, education, and community and economic development. [2] Programs that provide income support and certain non-cash support and services. [3] Programs for which no more than a fixed amount (determined by appropriations action in response to the budget request) may be spent in a given year, no matter how many persons or groups apply for program benefits. [4] "Relatively uncontrollable" programs under which program benefits must be provided to all legally eligible persons applying for the benefits, no matter how much this costs. [5] These figures show an apparent decrease from 1972 to 1973 because the public assistance-Medicaid payment for the first month of 1973 was advanced to the States during the last month of 1972. However, aggregate benefits actually received by assistance recipients did not decrease from 1972 to 1973. [6] Year-to-year increases in total benefits for these programs were more than offset by decreases in the proportion of program beneficiaries estimated to be in poverty, causing estimated program benefit outlays for the poor to show a year-to-year decline. [7] Includes Indian education programs. [8] CETA=Comprehensive Employment and Training Act. A number of programs included in the "Skill training" and "Work support" lines in 1973 and prior years were replaced by State- and locally-operated manpower programs in 1974. (Related programs which continued to be administered on the national level are included in the "Skill training" and "Work support" lines for 1974.) [9] Programs initiated under the authority of the Economic Opportunity Act of 1964. Outlays for these programs appear in the Office of Economic Opportunity, Labor, HEW, and "All others" lines.

Smith, unpublished estimates, The Urban Institute and The Pennsylvania State University

No. 694. Personal Wealth—Total, Top One-Half, and Top One Percent: 1958 to 1972

[**In billions of dollars, except as indicated.** Wealth of all persons derived from national balance sheets. Wealth of top one-half and one percent of all persons estimated by estate multiplier technique. Detailed descriptions of methodology and attendant problems can be found in sources cited for table 693]

NA Not available. X Not applicable. [1] Market value without deduction of mortgages, liens, or other incumbrances. Beginning 1962, includes foreign real estate. [2] Includes all common and preferred issues, shares in domestic or foreign firms, certificates and shares of building and loan and savings and loan associations, Federal Land Bank stock, accrued dividends, and other instruments representing equity interest in an enterprise. Stock held in trust is included, but value is understated. [3] Includes checking and savings balances, currency on hand or in safe deposit boxes, cash balances with stock brokers, and postal savings accounts. Cash in trust is included, but understated. [4] Includes notes and mortgages, security credit, and similar assets. [5] Cash surrender value; i.e., the amount individuals could expect to receive were they to surrender their policies to the carriers. It takes account of policy loans, accrued dividends, and unearned premiums. [6] Includes all assets owned in trust except real estate. Trust classification figures should not be used to arrive at total assets because these data are included in individual asset types. [7] Includes all legal obligations except loans on life insurance policies.

[1] Estimates derived by "perpetual inventory" method which is intended to reflect reproduction cost of different types of assets. Estimates are obtained by: (*a*) reducing each year's gross capital expenditures in current prices to 1958 price level by means of the appropriate construction cost index; (*b*) depreciating gross capital expenditures in accordance with an assumed length of life for different types of assets, thus obtaining net capital expenditures for each year in 1958 prices; (*c*) cumulating net capital expenditures for as many years backwards as corresponds to the assured length of life of the type of asset involved. [2] Owner-occupied only. [3] Current dollar estimates are based on book values; constant dollar estimates reflect book values reduced by means of wholesale price indexes. [4] Includes business and household inventories. [5] Private farm land estimates based on census or similar data. Private nonfarm land estimates are derived by application of rough ratios of land to structure values for different types of real estate. Excludes subsoil assets.

Section 14

Prices

This section presents indexes of wholesale and consumer prices, actual prices for selected commodities and budgets for urban families and retired couples. The primary sources of these data are monthly publications of the Department of Labor, Bureau of Labor Statistics, which include: *Monthly Labor Review; Consumer Price Index; Estimated Retail Food Prices by Cities; Retail Prices and Indexes of Fuels and Utilities;* and *Wholesale Prices and Price Indexes*. The Bureau of Economic Analysis of the Department of Commerce is the source for the gross national product (GNP) implicit price deflator figures; see table 700. The Statistical Reporting Service of the Department of Agriculture prepares indexes of prices received and prices paid by farmers.

The Bureau of Labor Statistics prepares monthly indexes of wholesale prices for a large selection of commodities; monthly indexes of consumer prices for both commodities and services; and weekly indexes of spot market prices for 22 commodities. The single year 1967 is currently the standard reference base period for these and other general purpose index numbers prepared by Federal agencies.

Wholesale price index.—This index, dating from 1890, is the oldest continuous statistical series published by the Bureau of Labor Statistics. It is designed to measure average changes in prices of all commodities produced or imported for sale in primary markets in the United States. "Wholesale" refers to sales in large quantities, not to prices received by wholesalers, jobbers, or distributors.

The index has undergone several revisions (see *Monthly Labor Review*, February 1962). It is now based on approximately 2,700 commodity price series instead of the approximately 1,900 included in the 1947–60 period and the 900 included for the period prior to 1947. Prices used in constructing the index are collected from sellers, if possible, and generally apply to the first significant large-volume commercial transaction for each commodity—i.e., the manufacturer's or other producer's selling price, the importer's selling price, or the selling price on an organized exchange or at a central market.

The weights used in the index represent the total net selling value of commodities produced or processed in this country, or imported. The values are f.o.b. production point and are exclusive of excise taxes, interplant transfers, military products, and goods sold directly at retail from producing establishments. Effective January 1967, the weights are values of net shipments of commodities as derived from the industrial censuses of 1963 and other data.

Consumer price index.—This index measures the average change in prices of all types of consumer goods and services purchased by urban wage earners and clerical workers. Weights used in calculating the index are based on studies of actual expenditures by wage earners and clerical workers. Quantities and qualities of items in the "market basket" remain essentially the same between consecutive pricing periods, so that the index measures the effect of *price change only* on the cost of living. It does not measure changes in the total amount families spend for living; geographic area indexes do not measure relative differences in prices or living costs between areas.

A study conducted during 1917–19 provided the weights used until 1935. Since then, this index has undergone four major revisions, which involved bringing the "market basket" of goods and services up to date, revising the weights, and improving the sample and methodology. The fourth revision, incorporated in a new series beginning in 1964, introduced expenditure weights relating to 1960–61. The most recent revision, scheduled to be completed in 1977, will result in the publication of two indexes:

An updated version of the current consumer price index for urban wage earners and clerical workers, and a broader index which will include items purchased by nonfarm consumer units within standard metropolitan statistical areas and small urban places. However, the description which follows and the tables in this section refer to the present index which is based on the 1964 revision.

The list of items currently priced for the index includes approximately 400 goods and services. For some items, several different qualities are priced. The items priced are described by detailed specifications to insure that, as far as possible, the same quality is priced each time, and that differences in reported prices are measures of price change only. All taxes directly associated with the purchase or continued use of the items priced are included in the index.

Currently, the national index is based on prices collected in 56 areas. These include the urban portions of 37 standard metropolitan statistical areas (SMSA's), the more extensive standard consolidated areas for Chicago and New York-Northeastern New Jersey; and 17 nonmetropolitan urban places. Area definitions are those established for the 1960 census and do not include any subsequent revisions. Foods, fuels, and a few other items are priced monthly in all areas. Prices of most other goods and services are obtained monthly in the 5 largest areas and every 3 months in other areas. Rents are surveyed bimonthly in the 5 largest areas and every 3 months in other areas. Between scheduled survey dates, prices are held at the level of their last pricing for all goods and services except new automobiles. Price data for the 56 areas are combined for the United States with weights based on 1960 population of the several areas represented by each sample area. Indexes are published for areas grouped by size of city and by region of the country, and for 23 separate metropolitan areas.

Consumer price index: Food component.—Food price indexes are computed as a subgroup of the consumer price index. Weights used at various times are consistent with those for the index as a whole. The indexes have been computed from prices of varying numbers of foods during different periods. They were based on 60 foods from 1950–52, 90 foods from 1953–63, and 96 foods beginning January 1964.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See preface.

No. 699. Purchasing Power of the Dollar: 1940 to 1976

[1967=$1.00. Wholesale prices prior to 1961, and consumer prices prior to 1964, exclude Alaska and Hawaii. Obtained by dividing the average price index for the 1967 base period (100.0) by the price index for a given period and expressing the result in dollars and cents]

No. 706. Wholesale Prices of Selected Commodities: 1960 to 1976

[In dollars per unit. Annual averages. See *Historical Statistics, Colonial Times to 1970*, series E 123-134, for selected items]

ITEM	1960	1965	1970	1973	1974	1975	1976, May
Farm products:							
Wheat, hard winter, No. 1, Kansas City [1] bu.	1.99	1.56	1.48	3.58	4.68	3.81	3.52
Steers, choice 100 lb.	26.71	25.72	30.04	44.90	42.24	44.36	40.52
Cotton, raw [2] lb.	.314	.303	.251	.561	.578	.45	.61
Wool, combing and staple lb.	1.16	1.25	1.03	2.50	1.78	1.49	1.78
Eggs, large [3] doz.	.409	.380	.432	.646	.626	.62	.67
Corn, No. 2 yellow, Chicago bu.	1.16	1.30	1.37	2.24	3.22	2.90	2.80
Processed foods:							
Flour, Kansas City 100 lb.	4.99	5.47	5.57	8.52	11.06	9.37	8.71
Beef, choice 100 lb.	44.88	43.05	48.93	[4] 69.18	68.55	74.93	65.75
Sugar, granulated (excl. excise tax) lb.	.087	.095	.112	.133	.320	.311	.222
Coffee, tin lb.	.699	.803	.951	1.07	1.21	1.30	1.96
Lard, 1 and 2 lb. prints lb.	1.35	.176	.168	.254	.345	.352	.215
Textile products:							
Corduroy, corded yd.	.676	.608	.754	.996	1.263	1.273	(NA)
Suits, men's, medium grade each	44.44	(NA)	(NA)	75.98	87.56	96.20	(NA)
Hides, skins, leather, and leather products:							
Cattlehides, packer, heavy native, steer lb.	.138	.143	.129	.343	.236	.233	.390
Lamb garment leather sq. ft.	(NA)	(NA)	.393	.729	.720	.717	.800
Oxfords, men's, elk or kip side upper pair	(NA)	5.89	7.39	9.31	10.72	11.56	12.27
Fuel, power, and lighting materials:							
Coal, anthracite, chestnut sh. ton	13.95	12.98	16.57	20.04	20.07	44.86	46.43
Electric Power Indus., East North Central 200,000 kWh	(NA)	(NA)	(NA)	3,137	4,361	5,281	5,597
Gasoline, regular, dealer tankwagon gal.	(NA)	(NA)	(NA)	(NA)	(NA)	.351	.365
Distillate fuel oil, No. 2, to resellers gal.	(NA)	(NA)	(NA)	(NA)	(NA)	.288	.305
Chemicals and allied products:							
Aspirin lb.	.558	.563	.581	.628	.815	1.000	1.090
DDT lb.	.230	.170	.217	.220	.270	(NA)	(NA)
Paint, outside gal.	4.81	(NA)	[5] 5.67	6.19	8.04	9.56	9.47
Dextrin, white 100 lb.	9.348	8.280	10.570	10.820	13.137	14.945	14.920
Rubber and rubber products:							
Natural rubber, No. 1 ribbed, smoked sheets lb.	.385	.257	.211	.351	.397	.299	.405
Synthetic rubber, butyl, Grade I type lb.	.230	(NA)	(NA)	.262	.317	.375	.410
Reclaimed rubber lb.	.110	.115	.115	.113	.130	.141	(NA)
Lumber and wood products:							
Softwood plywood, interior grade 1,000 sq. ft.	(NA)	(NA)	(NA)	112	126	130	145
Flooring, maple 1,000 bd. ft.	209	211	[5] 282	405	503	534	(NA)
Pulp, paper, and allied products:							
Woodpulp, sulphate, bleached sh. ton	156	148	162	188	285	364	386
Book paper, #3 uncoated [6] 100 lb.	16.85	16.78	21.57	23.21	23.59	24.25	25.48
Liner, 100 lb. test mil. sq. ft.	2,680	2,653	2,553	2,863	3,647	4.32	4.42
Toilet tissue case	7.38	7.08	9.07	9.57	12.20	15.62	16.49
Paper towels case	4.11	4.07	4.46	4.87	6.23	8.23	8.77
Grocery bags 1,000	4.75	4.69	5.30	5.97	6.75	7.60	8.09
Metal and metal products:							
Iron ore, Mesabi long ton	11.45	10.55	10.78	11.84	13.90	17.83	19.25
Iron and steel scrap, No. 1 heavy melting [7] long ton	32.96	35.17	42.04	57.20	104.17	70.92	(NA)
Steel rails, standard [8] 100 lb.	5.83	5.83	6.80	8.35	10.53	12.72	14.50
Copper wirebar, domestic origin lb.	.325	.354	(NA)	.593	.774	.643	.700
Red brass ingot lb.	.295	.411	.562	.662	.844	.65	.78
Aluminum sheet lb.	.468	(NA)	.463	.440	.571	.64	.71
Nails, wire, 8d, common [9] 50 lb.	9.60	4.65	(NA)	6.21	9.15	10.67	10.70
Nonmetallic mineral products:							
Brick, building 1,000	(NA)	30.46	(NA)	45.57	49.94	56.09	61.80
Glass, window, single B 50 sq. ft.	(NA)	5.35	6.60	7.78	9.04	8.93	9.18
Shingles, asphalt roofing, strip square	5.26	5.88	(NA)	8.30	11.56	13.24	13.96
Miscellaneous:							
Cigarettes, nonfilter tip (excl. excise tax) 1,000	4.28	4.62	[5] 5.83	6.25	6.85	7.71	8.35
Soybean meal ton	52.58	(NA)	79.08	234.00	142.42	123.65	146.50
Bran ton	37.40	38.96	43.00	79.88	89.54	79.50	85.00

NA Not available. [1] For 1960, No. 2 hard winter wheat. [2] 1960 price for 1" and 1965, for 15 market average. [3] For 1960, eggs, extras, New York.
[4] 10-month average. [5] 11-month average. [6] Prior to 1970, book paper A grade. [7] Consumers' buying price, including brokerage, delivered, Pittsburgh district. [8] Standard, carbon steel, No. 1 open hearth, 115 lb. per linear yard, control cooled, base quantity, f.o.b. mill. [9] Jan.-Aug. 1960 price packed in fiberboard boxes; Sept. 1960, lots of 30,000 lb.; for 1960, price is for units of 100; thereafter, for units of 50.

No. 707. Average Prices (Unit Values)—Selected Articles Exported and Imported: 1960 to 1975

[**In dollars per unit.** Includes trade of Puerto Rico with foreign countries. Values of goods imported represent market values in foreign country from which imported. Unit values obtained by dividing annual values of imports or domestic exports by annual quantities. Values of goods exported represent values at port of exportation. Unit values may show actual price movements only roughly for commodities subject to considerable price variations among different grades, methods of packing, etc., and to year-to-year variations in proportions of grades, etc. Unit values of agricultural exports also include effects of CCC sales for export, at prices well below U.S. market quotations, and of other Government programs]

ARTICLE	1960	1965	1970	1971	1972	1973	1974	1975
EXPORTS								
Wheat ..... bu.	1.69	1.63	1.58	1.69	1.74	2.94	4.80	4.54
Milled rice, less than 75% broken kernels ..... lb.	.066	.072	.079	.080	.093	.161	.224	.189
Corn ..... bu.	1.27	1.39	1.45	1.46	1.40	2.16	3.20	3.36
Grain sorghums ..... bu.	1.12	1.21	1.32	1.49	1.46	2.12	3.07	3.05

No. 708. Consumer Price Indexes, by Major Groups: 1950 to 1976

[1967=100. Prior to 1965, excludes Alaska and Hawaii. Beginning 1965, index structure revised to reflect buying patterns of urban wage earners and clerical workers in the 1960's, including single workers living alone as well as families of two or more persons; indexes for prior years apply only to families of two or more persons. See also *Historical Statistics, Colonial Times to 1970*, series E 135-173]

No. 709. Consumer Price Indexes for Selected Items and Groups: 1960 to 1976

[1967=100, **except as noted.** Prior to 1965, excludes Alaska and Hawaii. Beginning 1965, index structure revised to reflect buying patterns of urban wage earners and clerical workers in the 1960's, including single workers living alone as well as families of two or more persons; indexes for prior years apply only to families of two or more persons. See also *Historical Statistics, Colonial Times to 1970*, series E 135-173]

No. 714. Urban Budgets for a 4-Person Family, and for a Retired Couple: 1967 to 1975

[**In dollars.** 4-person family refers to annual living costs for a family comprising a 38-year-old employed husband, wife not employed outside the home, 8-year-old girl, and 13-year-old boy. Retired couple refers to retired husband 65 years old or over and his wife. The 3 budget levels reflect costs of different specified types and amounts of goods and services. Each level provides for average inventories of clothing, housefurnishings, major durables, and other equipment. The lower budget is not intended to represent a minimum or subsistence level of living]

[1] Not intended to represent a minimum or subsistence level.
[2] Metropolitan areas as defined in May 1967; for definition, see Appendix I.
[3] Places with 2,500–50,000 population in 1960. [4] Includes the weighted average cost of renter and homeowner shelter, housefurnishings, and household operations. Four-person families in the lower budget are assumed to be renters. A small allowance for lodging away from home city is included in the higher budget. [5] Includes gifts, contributions, life insurance, and occupational expenses. [6] Includes gifts and contributions and, at the intermediate and higher levels, an allowance for life insurance, and except for 1973, 1974, and 1975, personal income taxes.

[1] Includes weighted average cost of renter and homeowner shelter, house furnishings, and household operations.
[2] Includes medical care, clothing and personal care, other family consumption, gifts and contributions, personal income taxes (except for retired couple in 1973, 1974, and 1975), and, for 4-person families, also basic life insurance, occupational expenses, and social security.
[3] Places with population of 2,500–50,000 in 1960.
[4] For components, see U.S. Office of Management and Budget, *Standard Metropolitan Statistical Areas, 1967*.

No. 720. Average Retail Prices of Selected Foods: 1965 to 1976

[**In cents per pound, except as indicated.** Represents averages of prices reported by retail dealers in cities included in the Retail Food Index. Data are estimated averages of prices reported by retail dealers. Number of cities varies according to the number of cities in which an item was priced and the availability of prices within the cities. Excludes sales taxes. Prices for individual cities combined on basis of population weights. See also *Historical Statistics, Colonial Times to 1970*, series E 187–202]

Section 15
Elections

This section relates primarily to presidential, congressional, and gubernatorial elections. Also presented are summary tables on Congressional legislation, population of voting age, voter participation, and campaign expenditures.

Official statistics on Federal elections are collected by the Clerk of the House of Representatives and published biennially in *Statistics of the Presidential and Congressional Election* and *Statistics of the Congressional Election*. Congressional Quarterly Inc., Washington, D.C., publishes a special report, *Complete Returns of the 19— Elections by Congressional District*, in March or April of each odd-numbered year, presenting the results of presidential, congressional, and gubernatorial elections. Federal and State election statistics appear also in *America Votes*, issued biennially by the Elections Research Institute, Washington, D.C.; and data on Federal elections appear in the United States Congress, *Congressional Directory*, and in official State documents.

Almost all Federal, State, and local governmental units in the United States conduct elections at various intervals—annual, biennial, quadrennial, or longer—for different types of offices and other purposes. The conduct of elections is regulated by State laws or, in some cities and counties, by local charter. An exception is that the United States Constitution prescribes the basis of representation in Congress and the manner of electing the President of the United States, and grants to Congress the right to regulate the times, places, and manner of electing Federal officers. The 24th Amendment to the Constitution, adopted in 1964, gave citizens the right to vote in any election for Federal office without payment of tax.

Presidential election.—The election of the President is provided for in the Constitution, article II, section 1, through establishment of an electoral college in each State, for each presidential election. The method of casting the electoral vote was modified in 1804 by the adoption of the 12th Amendment to the Constitution. The number of electors, and therefore of electoral votes, is "equal to the whole number of Senators and Representatives to which the State may be entitled in Congress." The electors are elected by popular vote in all States. The 22d Amendment to the Constitution, adopted in 1951, limits presidential tenure to 2 elective terms of 4 years each, or to 1 elective term for any person who, upon succession to the Presidency, has held the office or acted as President for more than 2 years. The 23d Amendment, adopted in 1961, grants the District of Columbia electors for President and Vice President.

Congressional election.—The number of members in the House of Representatives is fixed by the Congress at the time of each apportionment; since 1912, it has remained constant at 435. However, the legislation granting statehood to Alaska and Hawaii allotted 1 Representative to each of those States and, during 1960 to 1962, increased the total of members to 437. The total reverted to 435 after reapportionment following the 1960 census. The Constitution provides that "Representatives shall be apportioned among the several States according to their respective numbers. . . ." The Constitution also requires that each State have at least 1 Representative. Members are elected for 2-year terms, all terms covering the same period.

The Senate is composed of 100 members, 2 from each State, who are elected to serve for a term of 6 years. One-third of the Senate is elected every 2 years. Senators were originally chosen by the State legislatures. The 17th Amendment to the Constitution, adopted in 1913, prescribed that Senators be elected by popular vote.

Voter eligibility and participation.—A major source of data on population of voting age, on voter participation, and on characteristics of voters and nonvoters

is the U.S. Bureau of the Census. Estimates of the population of voting age in each State classified by age-group and race and the percent of the population casting votes, by State, are presented regularly for Presidential and Congressional election years in *Current Population Reports*, series P–25. Since 1964, voter participation and voter characteristics data have also been issued biennially in *Current Population Reports*, series P–20. These data are based on the sample results of the Current Population Survey (see text, p. 1) conducted during November of election years.

Beginning in 1972, as a result of the 26th Amendment to the Constitution, eligibility to vote in national elections was extended to all citizens, 18 years old and over. A number of persons who meet the age requirement but are not eligible to vote (e.g., aliens and persons committed to prisons and mental hospitals), however, are included as part of the population of voting age. It is estimated that aliens may comprise 2.3 percent of the voting age population in November 1976 in addition to the 500,000 citizens in institutions.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970*. See preface.

No. 726. Vote Cast for President, by Political Parties: 1912 to 1976

[Prior to 1960, excludes Alaska and Hawaii. Vote cast for major party candidates includes the votes of minor parties cast for those candidates. See also *Historical Statistics, Colonial Times to 1970*, series Y 79–83 and Y 135]

No. 733. Apportionment of Membership in House of Representatives, by States: 1790 to 1970

[Total membership includes Representatives assigned to newly admitted States after the apportionment acts. Population figures used for apportionment purposes are those determined for States by each decennial census. No reapportionment based on 1920 population census. For method of calculating apportionment and a short history of apportionment, see House Report 91-1314, 91st Congress, 2d session; *The Decennial Population Census and Congressional Apportionment*. See also *Historical Statistics, Colonial Times to 1970*, series Y 220-271]
