[**In thousands, except percent.** In each State, totals represent the sum of votes cast in each Congressional District, except as follows: In Alaska, Delaware, Nevada, Vermont, and Wyoming, only 1 Representative was elected for the State at large. In numerous States, one or other of the major parties had no candidate in some districts. In those cases where votes of a party as such are cast in endorsement of a candidate of another party, votes are counted as for the endorsing party. See also footnotes below]

X Not applicable. [1] Includes vote cast for minor parties. [2] Excludes District of Columbia.
[3] State law does not require tabulation of votes for unopposed candidates.
[4] 1970 and 1972 data for 3d District only; 1974 data for 1st, 2d and 3d Districts.
[5] In 1972, Districts 1, 2, and 9 were unopposed; in 1974, Districts 1, 2, 3, 7, 11, and 13 were unopposed.
[6] Includes endorsing votes cast by other parties for Democratic and Republican candidates.
[7] In 1972, District 3 was unopposed; in 1974, Districts 3 and 4 were unopposed. [8] In 1970, includes "provisional votes," votes cast by new residents whose eligibility to vote was tested in a law suit.

No. 749. Participation in National Elections, by Population Characteristics: 1968, 1972, and 1974

[As of November. Covers civilian noninstitutional population. For 1968, persons 18 years old and over in Georgia and Kentucky, 19 and over in Alaska, 20 and over in Hawaii, and 21 and over elsewhere; for 1972 and 1974, persons 18 years old and over in all States. Includes aliens. Figures are based on a population sample (see text, p. 1) and differ from those in tables 748 and 752 based on population estimates and official vote counts. Differences in percentages may also be due to overreporting of voting by persons in the sample]

No. 755. Election Campaign Costs for National Offices: 1960 to 1968

[**Money figures in thousands of dollars.** Covers expenditures officially reported to the Clerk of the House and the Secretary of the Senate. Cost of political activities at all levels, including primaries and intrastate committees, estimated by Citizens' Research Foundation at $200 million for 1964 and $300 million for 1968. Known campaign debts not actually reported are added to reported expenditures to determine total spending. Data in this table not comparable with those in table 756. See headnote, table 756]

ITEM	1960	1964	1968 [1]	ITEM	1960	1964	1968 [1]
Campaign costs	32,896	47,763	69,999	Republican committees:			
				Number reporting	43	41	46
National spending	28,074	38,601	62,765	Spending	12,950	19,315	29,443
Expenditures reported	23,504	37,401	61,765	Percent of national spending	46.1	50.0	46.9
Debt	4,570	1,200	1,000	Expenditures	12,200	19,315	29,443
				Debt	750	–	–
Congressional spending	4,822	9,162	8,483	Wallace campaign:			
Democratic	2,250	5,736	4,974	Spending	(X)	(X)	7,243
Republican	2,524	3,369	3,184	Percent of national spending	(X)	(X)	11.5

Number reporting	29	49	97	Percent of national spending	8.7	9.9	12.2
Spending	11,801	13,349	13,578	Misc. committees:			
Percent of national spending	42.0	34.6	21.6	Number reporting	22	34	66
Expenditures	7,981	12,149	12,578	Spending	873	2,121	4,869
Debt	3,820	1,200	[2] 1,000	Percent of national spending	3.1	5.5	7.8

– Represents zero. X Not applicable. [1] Lateral fund transfers between national level committees have been deducted from expenditures and receipts except for the labor and miscellaneous committees expenditures, which represent total reported spending, even when some of the funds were transferred to other committees. The lateral transfers by labor committees, $1,035,000, and by miscellaneous groups, $214,000, are subtracted to avoid counting them twice in total "campaign costs." [2] Democratic National Committee debt: Covers only unpaid post-convention presidential campaign expenses; excludes some $5 million in unpaid loans.

No. 756. Election Campaign Costs for National Offices: 1972

[Covers some prenomination expenditures. Data are provided by the U.S. General Accounting Office, Office of Federal Elections (O.F.E.), created to administer the Federal Elections Campaign Act of 1971, effective as of April 7, 1972. Previously, only committees operating in two or more States were required to report receipts and expenditures. In 1968 there were 222 such committees, not all of which contributed to a presidential campaign. The new requirement of comprehensive disclosure resulted in 1,785 committees filing reports with the O.F.E. in 1972, all of which contributed in some way, but not exclusively to a presidential candidate. Except for Congressional spending, all other figures are from the O.F.E.]

Section 16

Banking, Finance, and Insurance

Flow of funds.—The flow of funds accounts of the Federal Reserve System (see tables 759 to 765) bring together statistics on all of the major forms of financial transactions and financial claims to present an economy-wide view of asset and liability relationships. In flow form, the accounts relate borrowing and lending to one another and to the nonfinancial activities that generate income and production. Each claim outstanding is included simultaneously as an asset of the lender and as a liability of the debtor. The accounts also indicate the balance between asset totals and liability totals over the economy as a whole. Data included here present end-of-year asset and liability positions in financial claims rather than flows that occurred during the year. Three publications of the Board of Governors of the Federal Reserve System contain information on the flow of funds accounts: Summary data on flows, in the *Federal Reserve Bulletin* and in *Flow of Funds Accounts, 1945-1973* (September 1974); and a discussion of the concepts and organization of the accounts, in *Introduction to Flow of Funds* (February 1975).

Banking system.—Banks in this country are organized under the laws of both the States and the Federal Government. State-chartered banks are supervised by officials of the respective States. "National" banks are supervised by the Comptroller of the Currency. *Reports of Condition* have been collected from national banks since 1863. Summaries of these reports are published in the Comptroller's *Annual Report*, which also presents data on the structure of the national banking system.

The Federal Reserve System was established in 1914 to exercise central banking functions, some of which are shared with the U.S. Treasury. It includes national banks and such State banks as voluntarily join the System. Statements of State bank members are consolidated by the Board of Governors of the Federal Reserve System with data for national banks collected by the Comptroller of the Currency into totals for all member banks of the System. Balance sheet data for member banks are published in condensed form in the *Federal Reserve Bulletin*.

The Federal Deposit Insurance Corporation, established in 1933, insures each depositor up to $40,000 and also provides additional insurance coverage of up to $100,000 for certain time and savings deposits of official custodians of public funds in banks that are members of the Federal Reserve System and in such nonmember banks as join the insurance fund. A balance sheet for all banks in the country is published semiannually in *Assets, Liabilities, and Capital Accounts—Commercial and Mutual Savings Banks*, a joint publication of the Federal Deposit Insurance Corporation, the Board of Governors of the Federal Reserve System, and the Comptroller of the Currency. Major item balance sheets for all commercial banks are published monthly in the *Federal Reserve Bulletin*.

Savings and loan and other credit agencies.—Government corporations and credit agencies make available credit of specified types or to specified groups of private borrowers, either by lending directly or by insuring or guaranteeing loans made by private lending institutions. Data on operations of Government credit agencies, along with other Government corporations, are available in reports of individual agencies; data on their assets and liabilities are published in the *Treasury Bulletin*.

Among other types of credit agencies, the most important are savings and loan associations, insurance companies, finance companies dealing primarily in installment sales financing, credit unions, and personal loan companies. Statistics of savings and loan associations are collected by the Federal Home Loan Bank Board. Statistics on loans, investments, cash, etc., of life insurance companies are published principally by the American Council Life Insurance in its *Life Insurance Fact Book*. Consumer credit data are published currently in the *Federal Reserve Bulletin*.

Federally chartered credit unions are under the supervision of the National Credit Union Administration, established in 1970. That agency also administers the Federal program under which savings accounts of members of all Federal credit unions and of qualified State-chartered credit unions are insured up to a maximum of $40,000. State-chartered credit unions are supervised by the respective State supervisory authorities. Comprehensive program and statistical information on all Federal and federally-insured State credit unions is published each year in the *Annual Report of the National Credit Union Administration*. The Administration, through the cooperation of the State supervisory authorities, also compiles and publishes an *Annual Report* on the operations of all State-chartered credit unions. In addition, monthly series on major balance sheet items and other information are published in the monthly release, *Credit Union Statistics*. Data from 1956 to the present are available on request.

Currency.—Currency, including coin and paper money, represents almost one-fourth of all media of exchange in the United States, with most payments made by check. All currency is now issued by the Federal Reserve Banks and the Treasury.

"Currency in circulation" or "money in circulation" (official *Statement of United States Currency and Coin*) refers to all coin and paper money outside the Treasury and Federal Reserve Banks, except gold and silver coin known to have been exported and, beginning with 1934, all gold coin. It includes all coin and paper money held by the public in the United States, whether in current active use or held idle. It also includes cash in vaults of commercial and savings banks, currency lost or destroyed, and currency carried abroad by travelers. Historical data on the stock of money and money in circulation appear in the *Statistical Appendix to the Annual Report of the Secretary of the Treasury*.

Securities.—A comprehensive series, new corporate securities offerings by type of issues and type of security, has been compiled by the Securities and Exchange Commission on a monthly basis since 1934. The data cover substantially all new issues offered for cash sale in the United States in amounts over $100,000 and with terms to maturity of more than one year. (See table 794.) This series is published monthly in the *Statistical Bulletin* of the Securities and Exchange Commission, the *Federal Reserve Bulletin*, and the *Survey of Current Business*. In addition, the Commission has been compiling statistics since 1933 on the net change in outstanding corporate securities through cash transactions. They are published in the Commission's *Statistical Bulletin* and also in the *Federal Reserve Bulletin*.

Monthly figures on the total value and volume of securities sold on each of the national securities exchanges have been published since October 1934 by the Securities and Exchange Commission. These figures include all sales effected on exchanges except, since March 1944, U.S. Government issues. They cover odd lots as well as round lots. The Commission also publishes figures on the total daily round-lot volume of trading in stocks on the New York Stock Exchange and the American Stock Exchange, showing short sales and several categories of member and nonmember purchases and sales. Daily odd-lot purchases and sales are reported separately. These series appear monthly in the Commission's *Statistical Bulletin*.

A section of the *Annual Report* of the Securities and Exchange Commission is devoted to statistics of the securities industry.

Insurance.—Insuring companies are classified as either life or property. Companies which underwrite accident and health insurance only are included with life insurance; those which underwrite accident and health insurance in addition to one or more property lines are included with property insurance. Insuring companies, other than those classified as life, are permitted to underwrite one or more property lines provided they are so licensed and have the necessary capital and/or surplus.

Insurance is regulated by the various States and the District of Columbia, which collect a great deal of primary information on it. The Federal Government does not collect comprehensive statistics on insurance on a national basis.

There are a number of published sources for statistics on the various classes of insurance—life, health, fire, marine, and casualty. Individual States collect data on all insurers operating within their respective jurisdictions, and many of the States publish an annual insurance report giving individual company data and aggregates of certain items for the companies operating within the State. Organizations representing certain classes of insurers publish reports for these classes. Among them are the annual commercial publishers, such as The National Underwriter Company and the Alfred M. Best Company. The National Underwriter's *Argus Chart* (annual) contains financial and operating data for individual health and accident insurance companies, including Blue Cross and Blue Shield Plans. The *Argus F.C. & S. Chart* summarizes property and liability business of 924 companies and *Life Reports* provides information on 1,200 leading life insurers. *Best's Life Insurance Reports* and *Best's Insurance Reports*, fire and casualty edition, both annual publications, give individual company data for all types of life and fire and casualty insurance companies. The American Council of Life Insurance publishes statistics on industry performance in its annual *Life Insurance Fact Book.*

Public and private debt.—These data appear annually in the May or June issues of the monthly *Survey of Current Business* of the Department of Commerce. Net public and private debt outstanding is a comprehensive aggregate of indebtedness of borrowers after elimination of certain duplicating governmental and corporate debt. To obtain net figures, gross or total debt is adjusted for duplications pertaining to the following: (1) the Federal Government and its corporations and agencies generally; (2) State and local governments; and (3) within the private area, those affiliated corporations which operate under a single management. In the noncorporate private area, data are assumed to be net, since interpersonal debts are not measured in this series.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See preface.

– Represents zero. X Not applicable. [1] Assets shown at market value; nonbank finance liability is redemption value of shares of open-end investment companies. No specific liability attributed to issuers of stocks other than open-end investment companies for amounts outstanding. [2] Includes savings bonds, other nonmarketable debt held by public, issues by agencies in the budget and by sponsored credit agencies in financial sectors, and loan participation certificates.

[3] Asset is corporate only; noncorporate credit deducted in liability total to conform to quarterly flow tables.

[4] Includes federally sponsored credit agencies not shown separately.

No. 769. Federal Reserve System—Member Bank Reserve Requirements: 1972 to 1976

[Effective Nov. 9, 1972, new criterion adopted to designate reserve cities. Presence of a Federal Reserve Bank or branch or of head office of a bank having net demand deposits of more than $400 million constitutes designation as a reserve city bank. Banks having net demand deposits of $400 million or less are considered banks outside reserve cities and may maintain reserves at ratios set for banks not in reserve cities. Reserves required against net balances due from domestic offices of member banks to their foreign branches, against foreign branch loans to U.S. residents, and against borrowings from foreign banks by domestic offices of a member bank. Applicable reserve percentage in Nov. 1972 was 20, reduced to 8 percent effective June 21, 1973, and to 4 percent effective May 22, 1975. See also *Historical Statistics, Colonial Times to 1970*, series X 813-820]

Effective date of change	Percent of net demand deposits [1]					Percent of time deposits							
							$5 million and under, maturing in—			Over $5 million, [4] [6] maturing in—		
	Under $2 million	$2–$10 million	$10–$100 million	$100–$400 million	Over $400 million [2]	Savings [3]	30–179 days	180 days to 4 yr.	4 yr. or more	30–179 days	180 days to 4 yr.	4 yr. or more
1972—Nov. 9	8	10	12	[6] 16½	17½	3	3			5		
Nov. 16	8	10	12	13	17½	3	3			5		
1973—July 19	8	10½	12½	13½	18	3	3			5		
1974—Dec. 12	8	10½	12½	13½	17½	3	3			6	3	
1975—Feb. 13	7½	10	12	13	16½	3	3			6	3	
Oct. 30	7½	10	12	13	16½	3	3		[7] 1	6	3	[7] 1
1976—Jan. 8	7½	10	12	13	16½	3	3	[7] 2½	[7] 1	6	[7] 2½	[7] 1
In effect Apr. 30, 1976	7½	10	12	13	16½	3	3	[7] 2½	[7] 1	6	[7] 2½	[7] 1

Legal requirements as of Apr. 30, 1976:	Minimum	Maximum
Net demand deposits, reserve city banks	10	22
Net demand deposits, other banks	7	14
Time deposits	3	10

[1] Demand deposits subject to reserve requirements are gross demand deposits minus cash items in process of collection and demand balances due from domestic banks. [2] Reserve city banks. [3] Includes Christmas, vacation club, and like accounts. [4] Other than savings.
[5] Requirements on certain large time deposits increased by marginal reserve requirements of 3 to 5 percent during June 21, 1973, through Dec. 11, 1974. [6] Applied only to former reserve city banks for one week. Other banks continued requirement of 13 percent. [7] Average reserves on all time deposits must be at least 3 percent.

No. 783. Selected Federal Credit Agencies—Major Balance Sheet Items: 1960 to 1975

[**In millions of dollars.** As of Dec. 31. Excludes capital accounts except for stock of home loan banks. Bonds, debentures, and notes valued at par; include only publicly offered securities (excluding, for home loan banks, bonds held within FHLB System), and are not guaranteed by U.S. Government. Loans are gross of valuation reserves and represent cost for FNMA and unpaid principal for other agencies. See *Historical Statistics, Colonial Times to 1970*, series N 300, for FHLB advances]

Item	1960	1965	1970	1971	1972	1973	1974	1975

– Represents zero. [1] Valued at $35 per fine ounce until May 7, 1972; valued at $38 per fine ounce until October 18, 1973; $42.22 thereafter. Excludes gold deposited with U.S. by International Monetary Fund from September 1965 to February 1972. [2] Includes standard silver dollars.
[3] Includes gold certificates outside Treasury, credits payable in gold certificates, and redemption fund for Federal Reserve notes. [4] Beginning 1975, not comparable with earlier years because of decision by Federal Reserve Banks to pledge substantially all gold certificates against Federal Reserve notes outstanding.

X Not applicable. [1] Public Law 91-607, Dec. 31, 1970, authorized Secretary of Treasury to mint and issue dollar coins for general circulation and half dollars of same composition as 25-cent and 10-cent pieces; and production of not more than 150 million numismatic silver-clad dollars to be sold to public at premium prices.
[2] Includes production of 5 million silver-clad Bicentennial coins. Public Law 93-127, Oct. 18, 1973, authorized the Secretary to mint and issue, after July 4, 1975, dollar, half-dollar, and quarter-dollar coins with designs emblematic of the Bicentennial, dated 1776-1976, for general circulation; and production of 45 million numismatic silver-clad coins of same designs and denominations to be sold at premium prices.

[1] For 1950, average yield on taxable bonds due or callable after 15 years; thereafter, on those due or callable in 10 years or more. Data from Board of Governors of the Federal Reserve System. [2] For 1950, estimated yields prevailing on highest grade issues in first quarter of year; thereafter, in February only. Through 1955, from National Bureau of Economic Research, New York, N.Y.; thereafter, Scudder, Stevens & Clark, New York, N.Y. [3] More than usually liable to error. [4] Number of issues as of Jan. 28, 1974; number varies for earlier years. [5] Yields based on number of stocks and determined from average of median yields as follows: 1950 to 1965 (Sept. 8), 14 stocks, 8 yields; beginning Sept. 9, 1965, 10 stocks, 4 yields. Issues converted to a price equivalent to $100 par and a 7 percent annual dividend before averaging.

No. 809. Securities—New Securities Registered With the Securities and Exchange Commission and Offered for Sale: 1950 to 1975

[**In millions of dollars.** Estimated gross proceeds derived by multiplying principal amounts or number of units by offering prices, except municipal issues where principal amount is used. Covers substantially all new Securities offered for cash sale in U.S. in amounts over $100,000 and with terms of maturity of more than 1 year. Included in the new sale data are some unregistered securities offered privately for sale mainly to insurance companies as well as securities registered with the Securities and Exchange Commission under the terms of the Securities Act of 1933. In addition, State and municipal securities offered for sale and not registered under the Securities Act of 1933 are shown. See also *Historical Statistics, Colonial Times to 1970*, series X 499-500 and X 505-506]

No. 810. Securities—Net Change in Corporate Securities Issued: 1950 to 1975

[**In millions of dollars.** Covers estimated cash transactions only. New issues exclude foreign companies, and include sales of securities held by affiliated companies, special offerings to employees, and also new stock issues and cash proceeds connected with conversions of bonds into stocks. Closed-end investment company issues are included from 1971 forward. Retirements include the same types of issues, and also securities retired with internal funds or with proceeds of issues for that purpose. See also *Historical Statistics, Colonial Times to 1970*, series X 507-509]

No. 811. Life Insurance in Force—Summary: 1950 to 1975

[As of December 31 or for years ending December 31. Prior to 1960, excludes Alaska and Hawaii. Covers life insurance with life insurance companies only. Represents all life insurance in force on lives of U.S. residents issued by U.S. companies. "Families" includes families, subfamilies, and unrelated individuals; see definitions, p. 3. See also *Historical Statistics, Colonial Times to 1970*, series X 879-889]

NA Not available. [1] Includes servicemen's group life insurance of $27.4 billion for 1965, $16.8 billion for 1970, $28.8 billion in 1974, and $1.7 billion in 1975.
[2] For 1955, includes $1.9 billion group life insurance for Federal employees.
[3] The rate is the ratio of the number of policies lapsed or surrendered (for cash, extended term, or reduced paid up insurance), less reinstatements, to the mean number of policies in force.
[4] Total income and payments to policyholders include data on operations of accident and health departments of life insurance companies; since these data are not shown separately, components do not add to totals.
[5] Accidental death benefits included with disability benefits.

Section 17

Business Enterprise

This section relates to the place and behavior of the business firm and of business initiative in the American economy. It includes data on the number, types, and size of businesses; financial data of domestic and multinational corporations; business investment, expenditures, and profits; business sales and inventories; consumer cooperatives; minority-owned firms; mergers, acquisitions, and business failures.

The principal sources of these data are the *Survey of Current Business*, published by the Bureau of Economic Analysis (BEA); the *Federal Reserve Bulletin*, issued by the Board of Governors of the Federal Reserve System; the annual *Statistics of Income* reports of the Internal Revenue Service (IRS); *The Failure Record Through (Year)*, issued by Dun & Bradstreet, Inc., New York; and *Fortune* and *The Fortune Directory*, issued by Fortune, New York. Other sources are publications of the Securities and Exchange Commission (SEC), the Federal Trade Commission (FTC), Interstate Commerce Commission, Federal Power Commission, and the Administrative Office of the United States Courts. For a comprehensive list of reports, see "Business" in Appendix IV of this book.

Business firms.—A business firm is generally defined as a business organization under a single management and may include one or more plants or outlets; a firm doing business in more than one industry is classified by industry according to the major activity of the firm as a whole. The IRS concept of business firm relates primarily to the legal entity used for tax reporting purposes. (See page 756 for explanation of difference between "firm" or "company" and "establishment.") The IRS *Statistics of Income* reports present data separately for sole proprietorships, partnerships, and corporations. While many corporations file consolidated tax returns (i.e., one return for the parent firm and all its subsidiaries), most corporate tax returns represent individual corporations, some of which are affiliated through common ownership or control with other corporations filing separate returns.

Corporate assets and liabilities.—In its annual report, *Statistics of Income, Corporation Income Tax Returns*, the IRS presents balance sheet and income data for all active U.S. corporations. The *Quarterly Financial Report for Manufacturing Corporations*, published by the FTC, presents current quarterly income account and balance sheet data for manufacturing industries. In a quarterly compilation, *Working Capital of U.S. Nonfinancial Corporations*, the SEC publishes data on components of current assets and liabilities of all nonfinancial U.S. corporations. Broker-dealer financial data are detailed in the *Annual Report* of the SEC.

Corporate income, profits, dividends, and taxes.—Several agencies, among them the IRS and the BEA, compile corporate income account data. These data, however, are not comparable because of differing methods of compilation.

The IRS publishes financial data for all business enterprises, based on income tax returns filed by sole proprietorships, partnerships, and corporations. These data appear in *Statistics of Income—Business Income Tax Returns* and *Corporation Income Tax Returns*. Supplemental reports published periodically present data on foreign income and taxes reported by U.S. corporations.

The corporate data issued by the BEA are a part of its national income and product accounts and are defined as required for purposes of national income estimation. The primary sources of data for the estimates of profits, taxes, dividends, and undistributed

profits are the original corporate tax returns submitted to the IRS. Various adjustments of the *Statistics of Income* data are required by the national income treatment, particularly with respect to depletion, capital gain or loss, treatment of bad debts, measurement of income received from abroad, and intercorporate dividends, and because the original corporate income statements do not represent the final stage of information. BEA's corporate profits data also include the net earnings of several federally sponsored credit agencies which are not included in *Statistics of Income.*

Sources and uses of corporate funds.—These data indicate capital requirements of corporations and the manner in which they are financed. Sources of funds are equal to their uses. Certain discrepancies, however, interfere with this equality due to omission of such factors as (1) money accruing to corporations from an excess of sales over purchases of used plant and equipment, (2) transactions in securities held as permanent investments except public offerings, and (3) net purchases of land. Also, the balance sheet data upon which many of the financial flow estimates are based are not fully comparable with the tax-return based estimates of internal sources, or the establishment series underlying the figures on inventory change.

Plant and equipment expenditures.—Estimates of actual and expected expenditures for new plant and equipment in the United States by private, nonagricultural business firms are based on quarterly sample surveys conducted jointly by the Bureau of Economic Analysis and the Interstate Commerce Commission.

The sample was designed for complete coverage of all companies with gross assets of $50 million or more, and a random selection of companies with assets of less than $50 million. There are approximately 10,000 firms in the sample, with response rates varying from 70 to 75 percent. In 1972, the responding companies accounted for 68 percent of total capital expenditures in the United States.

For quarterly data, see current issues of the *Survey of Current Business;* for discussion of coverage, concepts, and methodology, see the January 1970 issue for actual expenditures and the February 1970 issue for expectations.

Business sales and inventories.—Business sales and inventories as defined by the BEA are the sum of data for manufacturing, merchant wholesalers, and retail trade. Sales are estimated aggregate values and inventories are book values at the end of the period. Sales signifies sales or shipments for retail and wholesale trade and billings or shipments for manufacturing. Trade inventories are valued at cost of merchandise on hand, while manufacturers' inventories are valued at approximate current costs or at book values, as reported by the manufacturer. Inventories data for manufacturing (see tables 839 and 840) are based on data from the *Census of Manufactures* and the *Annual Survey of Manufactures.* Data for manufacturing also appear in *Manufacturers' Shipments, Inventories, and Orders,* published by the Bureau of the Census in its Current Industrial Reports, series M3–1.

To ascertain net physical change in nonfarm inventories, book values of beginning and ending inventories of each year are expressed in terms of constant base year prices by means of selected Bureau of Labor Statistics wholesale price indexes appropriate to each industry. Net increment in deflated book value figures is then converted to a current price basis by index ratios or current prices to base year prices.

Industrial and commercial failures.—These data, collected by Dun & Bradstreet, are available by years since 1857 and by months since 1900. The number of failures includes concerns involved in court proceedings or voluntary actions likely to end in loss to creditors; discontinuances with outside obligations paid in full are not included. Data cover manufacturers, wholesalers, retailers, building contractors, and certain types of commercial service, but do not encompass finance, insurance, and real estate companies; railroads and steamship lines; and amusement enterprises. Failures data are published monthly in the monthly *Failure Report* by the Business Economics Department of Dun & Bradstreet, Inc.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See preface.

[4] Total taxable receipts before deduction of cost of goods sold, cost of operations, and net loss from sales of property other than capital assets. Includes nontaxable interest; excludes all other nontaxable income.
[5] Beginning 1965, includes constructive taxable income from related foreign corporations, and excludes tax-exempt interest.

No. 824. Proprietorships, Partnerships, and Corporations—Number, Receipts, and Net Profit, by Industry: 1973

[Figures are estimates based on sample of unaudited tax returns filed for accounting periods ending between July 1 of year shown and June 30 of following year. Proprietorships are individually-owned businesses and farms. See *Historical Statistics, Colonial Times to 1970*, series V 42–53, for number of active corporations]

INDUSTRY	NUMBER [1] (1,000)			BUSINESS RECEIPTS [1 2] (bil. dol.)			NET PROFIT (less loss) [1 3] (bil. dol.)		
	Proprietorships	Active partnerships	Active corporations	Proprietorships	Active partnerships	Active corporations	Proprietorships	Active partnerships	Active corporations

Services	2,821	178	368	48.8	23.6	97.6	17.0	6.9	2.7

– Represents zero. [1] Includes business not allocable to individual industries. [2] See footnote 1, table 827.
[3] Net profit (or income) is defined differently by legal form of organization, basically as follows: (a) Proprietorships: Total taxable receipts less total deductions, including cost of sales and operations; investment and other income are not included; (b) Partnerships: Total taxable receipts less total deductions, including cost of sales and operations; investment and other income, except capital gains, are included; (c) Corporations: Total taxable receipts less total deductions, including cost of sales and operations; investment and other income, including capital gains and constructive income from foreign corporations, are included.
[4] Net loss exceeds net profit. [5] Includes sanitary services.

NA Not available. [1] 1965, U.S. Social Security Administration; 1970 and 1974, National Credit Union Administration. "Business" refers to loans outstanding.
[2] U.S. Dept. of Agriculture, Rural Electrification Administration. Electric distribution cooperatives currently borrowing from REA, average number of consumers served, and total revenues.
[3] U.S. Dept. of Agriculture, Rural Electrification Administration. Cooperatives currently borrowing from REA, number of subscribers at end of year, annual revenues.
[4] U.S. Social Security Administration. Estimated enrollees and annual income of plans. Enrollment is for most frequent type of benefit (surgical-medical). [5] 1968 data.
[6] Data cover fiscal years 1964–65, 1969–70, and 1973–74 preliminary. Since many cooperatives do more than one type of business, totals are less than would be obtained by adding number of cooperatives handling individual items or performing individual services. Figures for members refer to estimated number of memberships; some persons hold more than one.

Section 18
Communications

This section presents statistics on usage, finances, and operations of the various communications media: Postal service, telephone, telegraph, radio, television, newspapers, and books. Data on the postal service are included in the *Annual Report of the Postmaster General.* Statistics on revenues, volume of mail, and distribution of expenditures are presented in the U.S. Postal Service's annual *Revenue and Cost Analysis Report.* Principal sources of wire, radio, and television data are the Federal Communications Commission's *Annual Report,* its annual *Statistics of Communications Common Carriers,* and its annual releases of financial data reported by radio and television stations and networks. Statistics on number and circulation of newspapers and periodicals and on sales of books and pamphlets are issued by the Bureau of the Census in reports of the census of manufactures. Annual data on number and circulation of daily and Sunday newspapers appear in *International Yearbook Number,* issued by Editor and Publisher Co., Inc., New York. Monthly data on new books and new editions of books are presented by R. R. Bowker Company, New York, in *Publishers' Weekly.*

Postal Service.—"Revenue and cost analysis" is the term used by the Postal Service to describe its system of attributing revenues and costs to classes of mail and service. This system draws primarily upon probability sampling techniques to develop estimates of revenues, volumes, and weights as well as costs by class of mail and special service. The costs attributed to classes of mail and special services are primarily incremental costs which vary in response to changes in volume; they account for roughly one-half of the total costs of the Postal Service. Postal rates are set sufficiently above these incremental cost levels to recover all costs of the Postal Service.

Wire and radio communication.—Statistical reporting of interstate or foreign wire and radio communications has been concentrated in the Federal Communications Commission since its establishment in 1934. All except the smallest carriers file annual and monthly reports and the companies controlling any but the smallest file annual reports. Full regulatory jurisdiction of the Commission applies to practically all domestic and overseas telegraph carriers and to the Communications Satellite Corporation but not to a large number of telephone carriers which are engaged in interstate or foreign service only by connection with the facilities of another unaffiliated carrier. However, the gross operating revenues of the telephone carriers reporting annually to the Commission are estimated to cover over 90 percent of the revenues of all telephone companies in the United States. Financial and other reports filed by the broadcasting industry cover substantially all commercial AM and FM, VHF and UHF commercial and educational television, and educational FM units operating in the United States and its outlying areas. Total broadcasting revenues are defined as sales of time, talent, programs, and services of all networks and stations less commissions to agencies. Statistics covering the number of operating licenses issued is compiled from Federal Communications Commission records. Those covering the safety and special radio services represent the largest and most diverse group of licensees regulated by the Commission. These services are utilized by individuals, businesses, and State and local governments primarily to provide two-way radio communication for emergency, business, and personal purposes in the aviation, marine, land transportation, and other industries; police, fire, and other public safety programs; and amateur and citizen operations.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See preface.

NA Not available.

[1] After allowance for reimbursements, embossed envelope purchases, indemnity claims, and miscellaneous revenue and expenditure offsets. Through 1950 includes some payments and receipts applicable to services in prior years; beginning 1955, expenditures are shown in year in which obligation was incurred, and revenues in year which gave rise to the earnings, whether collected or accrued. In 1954, the Postal Service began receiving reimbursement for penalty and franked mail, and discontinued payment of subsidies to airlines. Revenues for 1960 include $37.4 million reimbursement from the Treasury General Fund for statutory public services. These and other changes affect comparability of figures.

[2] Includes capital expenditures for plant and equipment and cost of materials and supplies, but no provision for depreciation. Also includes costs of certain services rendered to other agencies without reimbursement but excludes costs of certain services rendered to the Postal Service by other agencies. Beginning 1955, represents obligations incurred; beginning 1965, represents accrued expense including depreciation on fixed assets, reimbursable work for others, and expenses paid by certain other agencies without reimbursement by the Postal Service.

[3] Operating revenue only; based on Bureau of the Census estimated total population as of Jan. 1, including Armed Forces abroad. [4] Service not inaugurated. [5] Includes postal notes issued under act of Congress.

[1] Net revenue after refunds of postage. Beginning 1965, includes operating reimbursements. [2] The U.S. Postal Service was established July 1, 1971. Revenues prior to that date are those of the Post Office Department. Revenues for 1970 and 1971 have been restated to be consistent with subsequent years. [3] Beginning 1955, includes controlled circulation publications. [4] Includes $37.4 million appropriated to postal revenues for public services as provided by the Postal Policy Act of 1958. [5] Discontinued April 1966.

– Represents zero. NA Not available.

[1] Includes 456,600 service telephones (non-company telephones for which switching service is provided) in 1965, 463,200 in 1970, and 406,374 in 1974.

[2] Households with service are sum of residence main, apartment house private branch exchange and residence service main telephones, and other residence private branch exchange systems. There tends to be a slight overstatement of the proportion of households with telephone service.

No. 899. New Books and New Editions Published, by Subject: 1960 to 1975

[Comprises new books (those published for the first time) and new editions (those published with changes in text or format). Excludes State and Federal publications; subscription books, except encyclopedias; dissertations; second, third, or fourth printings or impressions; periodicals and quarterlies; and pamphlets of under 49 pages. Beginning 1965, data not strictly comparable with earlier years because of internal shifts in classifications. See also *Historical Statistics, Colonial Times to 1970*, series R 191–216]

X Not applicable.

[1] Includes receipts not specified by kind, as follows (in millions of dollars): Textbooks, 1963, 3.1; 1967, 14.7; and 1972, 19.2; general reference, 1972, 3.4; technical, scientific, and professional, 1963, 6.2; 1967, 11.6; and 1972, 19.9; religious, 1963, 2.6; 1967, 12.9; and 1972, 11.3; general, 1963, 7.3; 1967, 14.3; and 1972, withheld; other, excluding pamphlets, 1972, 25.2.

[2] Includes private business and secretarial school, post high vocational schools, and institutes and training courses of college grade. [3] Objective tests, manuals, etc.; includes answer sheets.

[4] Represents books sold direct to the consumer through agents or distributors, usually on installment plan of payment. Includes multivolume encyclopedias, children's literature, biblical sets, etc. Copies sold represent number of volumes rather than sets. [5] Includes nursing and dental subjects.

[6] Includes missals and prayer books.

[7] For adults and juveniles.

[8] Digest size 4¼"x 6½"; distributed 75 percent or more through magazine wholesalers in 1963, and 50 percent or more in 1967 and 1972.

[9] Sold primarily through booksellers or book dealers (retail and wholesale) at trade discounts. Juvenile books represent hardbound and paperbound books, excluding toy books.

Section 19
Energy

This section presents statistics on power and energy. The principal sources are the Federal Power Commission, the U.S. Bureau of Mines, the U.S. Energy Research and Development Administration, the Edison Electric Institute, New York, and the American Gas Association, Arlington, Va.

The Federal Power Commission, in its *Annual Report* and in periodic publications and surveys, issues information on the electric power and natural gas industries, and on water power. Among annual reports are *Statistics of Privately Owned Electric Utilities in the United States; Statistics of Publicly Owned Electric Utilities in the United States; Sales of Firm Electric Power for Resale; Steam-Electric Plant Construction Cost and Annual Production Expenses; Hydroelectric Plant Construction Cost and Annual Production Expenses; Statistics for Interstate Natural Gas Pipeline Companies; Sales by Producers of Natural Gas to Natural Gas Pipeline Companies;* and *World Power Data.* Monthly reports include *Electric Power Statistics* and *Statistics of Major Interstate Natural Gas Pipeline Companies.* Principal surveys are the *National Power Survey, 1964,* and *1970.* These various publications contain national and State data on production of electricity, capacity of generating plants, fuels used in energy production, energy sales and consumption, hydroelectric power, construction costs and production expenses of power plants, and depreciation practices.

The Commission also issues data on electric utility charges in its annual *All-Electric Homes* and *Typical Electric Bills;* projections for the future in its periodic *Electric Power Requirements and Supply of the United States, by Regions, Present and Future;* and maps showing principal natural gas pipelines and electric facilities.

The *United States Energy Through the Year 2000* prepared by the U.S. Bureau of Mines presents indicators of current and projected energy consumption; the Bureau of Mines' *Minerals Yearbook* contains data on coal, oil, and natural gas production and utilization. *Energy Facts,* prepared for the Subcommittee on Energy of the House Committee on Science and Astronautics by the Library of Congress, has a comprehensive selection of U.S. and foreign energy statistics obtained from primary sources.

The Edison Electric Institute's monthly bulletin and annual *Statistical Year Book of the Electric Utility Industry for the Year* contain data on the distribution of electric energy by public utilities; information on the electric power supply, expansion of electric generating facilities, and the manufacture of heavy electric power equipment in the annual *Year End Summary of the Electric Power Situation in the United States.* The American Gas Association, in its monthly and quarterly bulletins and its yearbook, *Gas Facts,* presents data on gas utilities, including sales, revenues, customers, prices, and other financial and operating statistics.

The *Annual Statistical Review* of the American Petroleum Institute contains statistics on supply and demand, production, imports, stocks, and sales of crude petroleum, petroleum products, and natural gas.

Other sources include the Rural Electrification Administration's *Annual Statistical Report—Rural Electric Borrowers* and the *Annual Report of the Energy Research and Development Administration* containing data on atomic energy, equipment, finances, and licenses.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See preface.

No. 902. Total Horsepower of All Prime Movers: 1940 to 1975

[**In millions.** As of January, except as noted. Prior to 1960, excludes Alaska and Hawaii, except as noted. Prime movers are mechanical engines and turbines, and work animals, which originally convert fuels or force (as wind or falling water) into work and power. Electric motors, which obtain their power from prime movers, are excluded to avoid duplication. See also *Historical Statistics, Colonial Times to 1970*, series S 1-14]

No. 903. Mineral Fuel Resources and Electricity—Production and Consumption, by Major Source: 1940 to 1975

[**In trillions of British thermal units, except percent.** For definition, see headnote, table 907. Prior to 1960, excludes Alaska and Hawaii, except data for bituminous coal include Alaska for all years. Unit heat values used are, Btu per pound: Anthracite, 12,700; bituminous coal and lignite through 1950, 13,100; bituminous coal and lignite production: 1960, 12,830; 1965, 12,710; 1967, 12,580; 1968, 12,530; 1969, 12,450; 1970, 12,290; 1971, 12,180; 1972, 12,025; 1973, 12,005; 1974 and 1975, 12,000; bituminous coal and lignite consumption: 1960, 12,740; 1965, 12,610; 1967, 12,470; 1968, 12,430; 1969, 12,330; 1970, 12,110; 1971, 12,010; 1972, 11,875; 1973, 11,825; 1974, 11,800; 1975, 11,787. Crude petroleum, in Btu per barrel: 5,800,000 through 1950; 1970, 5,695,000; 1965, 5,592,300; 1967, 5,628,540; 1968, 5,585,010; and 1969-75, 5,800,000. Nautral gas: total production multiplied by 1,075 Btu minus repressuring vent and waste gas multiplied by 1,035 through 1960; thereafter, dry natural gas production which excludes gas used for repressuring, vented, or flared multiplied by 1,032 Btu per cubic foot for 1965 through 1968; 1,031 in 1969-71; 1,027 in 1972; 1,021 in 1973; 1,024 in 1974 and 1975, to which is added the computed energy equivalent of the heat value of natural gas liquids production for each year. For electricity series, hydropower and nuclear power converted to theoretical energy inputs calculated from national average heat rates for fossil fueled steam-electric plants using 10,760 Btu per net kilowatthour in 1960; 10,453 in 1965; 10,432 in 1967; 10,398 in 1968; 10,447 in 1969; 10,494 in 1970. Energy inputs for hydropower converted at an average heat rate of 10,478 Btu for 1971; 10,379 for 1972, and 10,389 for 1973 through 1975 per net kilowatthour generated; for nuclear power at an average heat rate of 10,660 Btu per net kilowatthour based on information from the Energy Research and Development Administration. See also *Historical Statistics, Colonial Times to 1970*, series M 76-92]

YEAR	PRODUCTION					YEAR	CONSUMPTION

[1] Includes commingled condensate. Beginning 1950, consumption includes petroleum products (net imports). [2] Marketed production; represents natural gas, wet (unprocessed) and includes amount stored and lost in transmission. Consumption includes dry and liquid gas. Beginning 1965, on pressure base of 14.73 pounds per square inch absolute; formerly, on base of 14.65. [3] From hydropower and nuclear power.

[1] Includes electricity, not shown separately.
[2] Dry gas only. Marketed production minus shrinkage caused by liquids extraction (34 cubic feet per gallon produced).
[3] Includes bituminous coal and lignite and anthracite coal.
[4] Includes petroleum products and, beginning 1950, natural gas liquids.

No. 914. Annual Energy Requirements of Electric Household Appliances

Type of appliance	Average wattage	Estimated kilowatt-hours consumed
Food preparation:		
Blender	300	1
Broiler	1,140	85
Carving knife	92	8
Coffee maker	894	106
Deep fryer	1,448	83
Dishwasher	1,201	363
Egg cooker	516	14
Frying pan	1,196	100
Hot plate	1,200	90
Mixer	127	2
Oven, microwave	1,450	190
Range:		
With oven	12,200	1,175
With self-cleaning oven	12,200	1,205
Roaster	1,333	60
Sandwich grill	1,161	33
Toaster	1,146	39
Trashcompactor	400	50
Food preparation:—Con.		
Waffle iron	1,200	20
Waste disposer	445	7
Food preservation:		
Freezer (15–21 cu-ft.)	(NA)	1,320
Frostless	(NA)	1,985
Refrig./freezer (10-15 cu. ft.)	(NA)	700
Frostless (16–18 cu. ft.)	(NA)	1,795
Frostless (20 cu. ft. and up)	(NA)	1,895
Laundry:		
Clothes dryer	4,856	993
Iron (hand)	1,100	60
Washing machine:		
Automatic	512	103
Nonautomatic	286	76
Laundry—Con.		
Water heater	2,475	4,219
Quick-recovery	4,474	4,811
Comfort conditioning:		
Air cleaner	50	216
Air-conditioner, room	860	860
Bed covering	177	147
Dehumidifier	257	377
Fan:		
Attic	370	291
Circulating	88	43
Rollaway	171	138
Window	200	170
Heater, portable	1,322	176
Heating pad	65	10
Humidifier	177	136

No. 919. Utility Electric Energy Use, 1960 to 1975, and Projected Requirements, 1980 to 1990

[Excludes generation by industrial facilities and railways having generating facilities of their own]

ITEM	1960	1965	1970	1973	1974 (prel.)	1975 (prel.)	1980	1985	1990
Energy use, bil. kWh	764	1,060	1,534	1,873	1,867	1,916	2,717	3,687	4,980
Average annual percent change [1]	6.9	6.8	7.7	6.9	−0.3	2.6	7.2	6.3	6.2
Kilowatt-hr. per capita [2]	4,229	5,457	7,487	8,902	8,811	8,969	12,196	15,753	20,320
Peak load, mil. kW	138	189	276	335	340	345	514	704	951
Average annual percent change [1]	7.1	6.5	7.9	6.7	1.5	1.5	8.3	6.5	6.2

[1] Represents average for period of intervals shown here; for 1960, change from 1955. [2] Based on U.S. Bureau of the Census population data including Armed Forces abroad for July 1, except 1970. Projection figures used are for series II (see table 3, 1976 *Statistical Abstract*), based on 1974 estimates of the population.

Net income [1]	317	509	830	1,107	1,427	1,977	2,303	2,502
Dividends	(NA)	376	581	781	1,006	1,335	1,803	1,509

- Represents zero. NA Not available. [1] Beginning 1973, not comparable with earlier years due to Federal Power Commission ruling requiring adoption of the equity method in reporting earnings of subsidiaries. [2] Includes capital stock discount and expense and reacquired securities. Beginning 1960, reacquired securities are deducted from the appropriate capital account. [3] Includes reserves for deferred income taxes and accumulated deferred income taxes. [4] Included in other liabilities and credits. [5] Includes expenses not shown separately.

No. 931. Gas Utility Industry—Summary: 1950 to 1975

[Excludes Hawaii through 1955 and Alaska through 1960. Covers natural, manufactured, mixed, and liquid petroleum gas. Based on questionnaire mailed to all privately owned gas utilities and municipally owned gas departments in the United States, except those with annual revenues less than $25,000, which, in the aggregate, account for only a negligible portion of the industry. See also *Historical Statistics, Colonial Times to 1970*, series S 190–204]

Section 20

Science

This section presents statistics relating to various aspects of scientific and technical activity. Major topics are research and development, training and employment of scientists and engineers, space program outlays and accomplishments, and patents and trademarks. Principal sources of these data are the National Science Foundation and the National Aeronautics and Space Administration.

The National Science Foundation gathers data chiefly through recurring statistical surveys. Some current Foundation publications containing data on funds for research and development and on scientific and engineering personnel include the occasional bulletin series, *Reviews of Data on Science Resources* and *Science Resources Studies Highlights;* and annual and biennial reports such as *Federal Funds for Research, Development, and Other Scientific Activities; Research and Development in Industry; National Patterns of R & D Resources; Manpower Resources for Scientific Activities at Universities and Colleges; Expenditures for Scientific Activities at Universities and Colleges; An Analysis of Federal R & D Funding by Function; Scientists, Engineers, and Physicians From Abroad; Federal Scientific, Technical, and Health Personnel; Graduate Science Education: Student Support and Postdoctorals; Federal Support to Universities, Colleges, and Selected Nonprofit Institutions; Characteristics of Doctoral Scientists and Engineers in the U.S.; Characteristics of the National Sample of Scientists and Engineers;* and policy reports relating to national allocation of manpower and funds to science and technology. Statistical surveys in these areas pose particularly difficult problems of concept and definition and the data should, therefore, be regarded as broad estimates rather than precise quantitative statements. Detailed discussions of the scope and limitations of the data appear in the source publications.

The National Aeronautics and Space Administration does not publish any statistical reports as such. NASA's *Semiannual Report* contains current data on finances and its biweekly *Satellite Situation Report* presents information on artificial satellites, including both objects in orbit and decayed objects.

Other sources of statistics on scientific and technical activities include *The Budget of the United States Government,* which contains summary financial data on all Federal research and development programs and the *Annual Report of the Commissioner of Patents,* issued by the Department of Commerce's Patent Office and presenting data on patent applications and issuances and on trademark registrations and renewals.

Research and development.—The National Science Foundation defines research as a "systematic and intensive study directed toward a fuller knowledge of the subject studied" and development as "the systematic use of scientific knowledge directed toward the production of useful materials, devices, systems, methods, or processes." The data on outlays of funds are presented within the framework of a national economic structure composed of four sectors: (*1*) The *government sector,* made up primarily of Federal executive agencies; (*2*) the *industry sector,* consisting of manufacturing and nonmanufacturing firms and the Federally Funded Research and Development Centers they administer; (*3*) the *colleges and universities sector,* composed of colleges, universities, and their affiliated institutions, agricultural experiment stations and associated schools of agriculture, and Federally Funded Research and Development Centers administered by educational institutions; and (*4*) the *other nonprofit institutions sector,* consisting of such organizations as private philanthropic foundations, nonprofit research institutes, voluntary health agencies, and Federally Funded Research and Development Centers administered by nonprofit organizations. The federally funded centers are

research and development organizations which are exclusively or substantially financed by the Federal government and which, in most instances, were originally established to meet a particular research and development need of the Government. They are administered on a contractual basis, by companies, educational institutions, or other nonprofit organizations. The research and development funds reported consist of current operating costs, including those for planning and administration, except as otherwise noted. They exclude funds for routine testing, mapping and surveying, collection of general-purpose data, dissemination of scientific information, and training of scientific manpower.

Scientists, engineers, and technicians.—Scientists and engineers are defined as persons engaged in scientific and engineering work at a level requiring a knowledge of sciences equivalent at least to that acquired through completion of a 4-year college course. They are generally classified according to the fields of their employment and not according to the discipline in which they received their major training. Technicians are defined as persons engaged in technical work at a level requiring knowledge acquired through a technical institute, junior college, or other type of training less extensive than 4-year college training. Craftsmen and skilled workers are excluded.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970*. See preface.

No. 938. Research and Development—Defense, Space, and Other Outlays: 1955 to 1976

[Includes basic research, applied research, and development. Defense-related outlays comprise all research and development spending by Dept. of Defense including space activities, and a portion of Energy Research and Development Administration funds. Space related outlays are those of the National Aeronautics and Space Administration; they exclude space activities of other Federal agencies, estimated at less than 5 percent of all space research and development spending]

Year	Research and development outlays				As percent of total research and development					
	Total (mil. dol.)	Annual percent change	Defense-space related (mil. dol.)	Other (mil. dol.)	Defense-space related			Other outlays

Section 21

Transportation—Land

This section presents statistics relating to the mileage, control, and financing of public roads and to the transportation of persons and goods by land. The modes of transport included are passenger car, truck, railroad, bus and streetcar, and pipeline.

The principal compiler of data on public roads and on ownership and operation of motor vehicles is the Department of Transportation's Federal Highway Administration. The annual *Highway Statistics* and the historical *Highway Statistics, Summary to 1965*, are publications of the Federal Highway Administration; *Accidents of Large Motor Carriers of Property* and *Accidents of Class I Motor Carriers of Passengers*, which present data on accidents involving intercity trucks and buses, respectively, are annual publications of the Bureau of Motor Carrier Safety. The department's Federal Railroad Administration presents data on accidents involving railroads in its annual *Accident Bulletin*.

Another major source of data on land transport is the Interstate Commerce Commission. Among its publications are the quarterly *Transport Economics* and the *Annual Report*, containing operating data on all types of domestic transport, and the annual *Transport Statistics in the United States*, which is issued in separate parts. Part 1 is devoted to railroads, part 6 to oil pipelines, and part 7 to motor carriers.

Various censuses conducted by the Bureau of the Census also provide data relating to transportation. Data from the 1963, 1967, and 1972 censuses of transportation are presented in *Commodity Transportation Survey*, *National Travel Survey*, and *Truck Inventory and Use Survey*. The *Annual Survey of Manufactures* and reports of the Census of Manufactures and the Census of Business contain statistics on the motor-vehicle and equipment industry and on retail, wholesale, and services aspects of this industry. Additional data from those reports are included in sections 28 and 29. Data on persons commuting to work are contained in the 1970 Census of Population subject report, *Journey to Work*.

Nongovernmental data can be found in the weekly and annual *Cars of Revenue Freight Loaded* and the annual *Yearbook of Railroad Facts*, both published by the Association of American Railroads, Washington, D.C.; *Bus Facts*, issued annually by the National Association of Motor Bus Owners, Washington, D.C.; the *Transit Fact Book*, containing street railway and motorbus statistics, published annually by the American Public Transit Association, Washington, D.C.; and *Transportation Facts and Trends*, issued by the Transportation Association of America, Washington, D.C. Useful annual handbooks in the field of motor-vehicle transport are *Automobile Facts and Figures* and *Motor Truck Facts*, both issued by the Motor Vehicle Manufacturers Association of the United States, Inc., Detroit; *American Trucking Trends*, issued by the American Trucking Association, Washington, D.C.; and *Accident Facts*, issued by the National Safety Council, Chicago.

Highway systems.—The Federal-Aid Highway Act of 1916 provides for the sharing of highway construction costs between the States and the Federal Government with the initiative retained by each State for choosing projects and carrying them out. The planning and development of Federal-aid systems began in 1921. Federal funds share with State funds in costs of engineering, construction, and right-of-way acquisition on the designated systems while other charges, such as maintenance and policing, are borne entirely by the States and local agencies.

The Federal-aid primary system connects all of the principal cities, county seats, ports, manufacturing areas, and other traffic generating areas. In general, these are the same as the State trunklines. The Federal-aid secondary system consists of important feeder roads linking the farms, factories, distribution outlets, and smaller communities with the primary system.

Motor carriers.—Prior to 1950, class I for-hire motor carriers were classified by the Interstate Commerce Commission as those with $100,000 or more of gross annual operating revenue. For 1950–1956, the gross revenue minimum for class I carriers was raised to $200,000; for 1957–1973, to $1,000,000; and, beginning 1974, to $3,000,000.

Railroads.—The total railroad mileage of the United States comprises companies reporting to the Interstate Commerce Commission, grouped as follows: (1) Regular line-haul (intercity) railroads (and their nonoperating subsidiaries); (2) switching and terminal railroads; (3) private railroads prior to 1964 (identified by the Commission as "circular" because they reported on brief circulars); and (4) unofficial railroads, so designated when their reports are received too late for tabulation. For the most part, the last 3 groups are not included in the statistics.

Nonoperating subsidiaries comprise proprietary companies, which are covered by the reports of operating carriers, and lessor companies, which have no traffic and whose reports appear only in statistics of capitalization, dividends, and investment.

Operating railroads are classified on the basis of operating revenues. Prior to 1956, the classification was: Class I, those having more than $1,000,000 gross annual operating revenue; class II, from $100,000 to $1,000,000; and class III, less than $100,000. From 1956 to 1964, the classification was: Class I, $3,000,000 or more; and class II, under $3,000,000. Since 1965, the classification has been: Class I, $5,000,000 or more; and class II, under $5,000,000.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970*. See preface.

No. 969. Operating Revenues, by Type of Transport: 1950 to 1974

[1] Through 1965, data are after deducting payments to others for express privileges. [2] Includes pullman (for 1950 to 1965), line-haul, and switching and terminal companies. [3] Beginning 1960, includes Alaska and Hawaii. [4] Includes only revenues from domestic traffic of carriers under jurisdiction of Interstate Commerce Commission. [5] Beginning 1960, includes one pipeline operating in Alaska. [6] Source: U.S. Federal Aviation Administration, *FAA Statistical Handbook of Aviation*. Beginning 1970, includes Alaska and Hawaii. Revenues for scheduled passenger cargo operations.

Source: Except as noted, U.S. Interstate Commerce Commission, *Annual Report, Statistics of Class I, II, and III Motor Carriers, 1939–1956* (Statement No. 589); *Transport Economics*, issued monthly until April 1974, quarterly thereafter; and unpublished data.

No. 970. Volume of Domestic Intercity Freight Traffic, by Type of Transport: 1950 to 1974

[**In billions of ton-miles, except percent.** Motor vehicles and airways, prior to 1959, and other types of transportation, prior to 1960, exclude Alaska and Hawaii, except as noted. A ton-mile is the movement of 1 ton (2,000 pounds) of freight for the distance of 1 mile. Comprises public and private traffic, both revenue and nonrevenue. See also *Historical Statistics, Colonial Times to 1970*, series Q 12-22]

No. 972. Commodity Shipments, by Means of Transport—Selected States: 1972

[Excludes pipeline and parcel post shipments, commodities moved by own power or towed, commodities shipped less than 25 miles from plant, and shipments within same city. Includes shipments to Alaska and Hawaii from the 48 conterminous States and District of Columbia. Estimates based on probability sample; subject to sampling variability and response errors; for details, see source. Ton-miles equal weight times distance on a straight-line distance basis. Average length of haul based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e. ton-miles divided by tons)]

- Represents zero. X Not applicable.

[1] Includes 28,868 miles of State park, forest, institutional, and other roads, and 2,290 miles of toll facilities that are not a part of the State or local highway system. Also includes mileage of county roads under State control in all counties of Delaware, North Carolina, and West Virginia; 10 counties in Alabama; rural boroughs in Alaska; all but 2 counties in Virginia; some county mileage in Kentucky and Nevada; farm-to-market mileage in Louisiana; and the State-aid system in Maine.

[2] Mileage in Federal parks, forests, and reservations that are not a part of the State highway system.

– Represents zero. [1] Excludes highway planning and research work financed with 1½ percent Federal-aid highway funds available pursuant to 23 U.S.C. 307(c)(2). (Completed, $72 million total cost, $45 million Federal funds; underway, $362 million total cost, $251 million Federal funds.) [2] The "–" mileage reserve, temporarily indicated, results from system measurements. The final mileage measurements will provide an adequate reserve for all designated routes on the system.

[1] Weighted average, based on net gallons taxed. For 1950, excludes Alaska and Hawaii. [2] No tax.
[3] State tax rate per gallon is 8 cents in Hawaii County and 5 cents in other counties.
[4] Trucks or combinations with more than 2 axles pay motor-fuel tax of 2 cents per gallon higher than that shown in Kentucky and Virginia. (Prior to July 1960, the tax in Virginia was 8 cents.)
[5] Gasoline containing a grain alcohol additive in place of lead is taxed at 3 cents per gallon less than other gasoline.

[1] As of Dec. 31; for wholesale trade and manufacturing represents only establishments employing one or more workers at any time during year. [2] For manufacturing, data represent value added in manufacture.
[3] Comprises salaries, wages, commissions, bonuses, vacation pay, and other remuneration.
[4] Workweek including Mar. 12, except quarterly average for manufacturing.
[5] Subtotals are corrected figures, total is uncorrected; therefore, breakdown will not add to total.

[1] Beginning 1965, excludes tactical vehicles. [2] A substantial part of the trucks and buses reported comprises chassis without body; hence, excludes the value of bodies for these chassis. [3] Includes value of standard equipment. [4] Averages do not indicate price changes since total values may reflect changes in number of makes, models, and/or body types from year to year.
[5] Includes publicly owned vehicles. Excludes vehicles owned by military services.
[6] Total includes, components exclude, Hawaii. [7] Estimate.

[1] For 1976, includes lubrications, repacking wheel bearings, flushing cooling system, and aiming headlamps; replacement of minor parts such as spark plugs, fan belts, radiator hoses, distributor cap, fuel filter, and pollution control filters; minor repairs such as brake jobs, water pump, carburetor overhaul and universal joints; and major repairs such as a complete "valve job."

[2] For 1976, covers 3 new regular tires and 4 new snow tires during life of car.

[3] For 1976, includes a set of vinyl floor mats, seat covers, and a pair of extra wheels.

[4] For 1976, gasoline use set at 15.0 miles per gallon; associated oil use at 1 gallon oil to 167 gallons gas.

[5] For 1976, includes $50,000 combined public liability ($15,000/$30,000 bodily injury, and $5,000 property damage), $2,500 personal injury protection, uninsured motorist coverage, and full comprehensive coverage for the 10-year period; $100 deductible collision insurance was assumed for the first 5 years.

[6] For 1976, includes monthly charges of $12 for garage rental or cost of owner's garaging facility, parking fee average of $70 per year, and toll average of $6.88 per year. [7] For 1976, includes Federal excise taxes on tires of 10 cents per pound, lubricating oil of 6 cents per gallon, and gasoline of 4 cents per gallon; plus the Maryland tax on gasoline of 9 cents per gallon, titling tax of 4 percent of retail price, and registration fee of $20.00 for 3,700 pounds or less shipping weight, or $30.00 for vehicles over 3,700 pounds. Maryland sales tax of 4 percent included on certain items.

No. 1007. Transit Industry—Summary: 1950 to 1975

[Prior to 1960, excludes Alaska and Hawaii. Comprises all privately and publicly owned organized local passenger transportation agencies except taxicabs, suburban railroads, and sightseeing and school buses. Covers (*a*) local motorbus lines, (*b*) light rail lines, (*c*) heavy rail lines, and (*d*) trolley coach lines. Based on financial and statistical reports received by American Public Transit Association from transit systems representing more than 85 percent of the industry. See also *Historical Statistics, Colonial Times to 1970*, series Q 235-250]

No. 1010. Truck and Bus Carriers, by Kind of Business: 1972

[Includes only establishments with payroll and not subject to economic regulation by the Interstate Commerce Commission; excludes bus carriers operated by municipalities or other governmental bodies]

KIND OF BUSINESS	Establishments	Operating revenue ($1,000)	PAYROLL		Paid employees [1]
			Entire year ($1,000)	First quarter, ($1,000)	
Passenger transportation, total [2]	1,345	408,769	224,202	53,992	29,849
Local scheduled carriers [3]	693	293,499	174,525	42,489	21,681
Airport bus or limousine	70	18,045	9,186	2,178	1,366
Sightseeing bus	246	34,764	12,000	2,723	2,098
Intercity scheduled bus carrier	130	25,741	13,976	3,310	2,010
Charter or special bus carrier	206	36,720	14,515	3,292	2,694
Motor freight transportation, total	62,924	7,793,484	2,685,955	595,336	327,770
Local truck or draying	51,366	5,792,762	2,001,985	445,708	240,655
Trucking, except local	6,871	1,176,763	345,266	77,302	41,717
Local trucking and storage, including household goods	4,687	823,959	338,704	72,326	45,398

[1] For week including March 12. [2] Excludes taxicabs, ambulance services, other nonscheduled carriers, school buses, and terminal and service facilities. [3] Excludes airport bus or limousine.

No. 1011. Truck Carriers—Operating Revenue, by Source and Type of Carrier: 1972

[Covers only carriers (with payroll) not subject to Interstate Commerce Commission (ICC) regulations]

TYPE OF CARRIER	Establishments [1]	OPERATING REVENUE [2] (mil. dol.)					
		Total	Motor carrier revenues [3]	Warehousing and storage revenue	Other services [4]	Sale of merchandise	All other services
Total	62,924	7,793	7,321	178	145	65	84
General freight	10,947	1,692	1,637	25	14	4	12
Household goods	7,891	987	707	142	107	6	24
Sand and gravel	10,661	1,269	1,214	1	7	33	15
Trash or garbage collection	8,292	945	939	(Z)	1	1	4
Package or parcel delivery	1,410	155	153	(Z)	1	(Z)	(Z)
Agricultural products and other ICC exempt commodities	10,812	1,182	1,156	2	4	12	8
Mail, contract	2,685	200	198	1	(Z)	(Z)	1
Timber	1,878	192	189	(Z)	(Z)	1	2
Other commodities	8,348	1,171	1,126	7	12	8	18

Z Less than $500,000. [1] Establishments reporting represent between 50 and 59 percent of all establishments. [2] Operating revenue of establishments reporting its source represents between 60 and 69 percent of total operating revenue. Operating revenue of establishments reporting its source and type of carrier represents between 50 and 59 percent of total operating revenue. [3] Includes local trucking, moving, and storage. [4] Relates to motor carrier and storage activities.

Source of tables 1010 and 1011: U.S. Bureau of the Census, *1972 Census of Selected Service Industries*, subject report, SC 72-S-7.

No. 1012. Railroads—Summary Statistics: 1950 to 1974

[As of December 31, or calendar year data, except as noted. Prior to 1960, excludes Alaska and Hawaii. Covers class I and II railroads, *excluding* switching and terminal companies, except as noted. Includes intercorporate duplications. See also *Historical Statistics, Colonial Times to 1970*, series Q 284–312, Q 330, Q 356–363, and Q 367–377]

Persons injured—number	33,255	27,832	19,577	25,789	21,327	17,930	18,245	20,818

NA Not available. [1] Includes unofficial companies and, through 1960, circular companies; see text, p. 582.
[2] Average mid-month count.
[3] Includes lessors, proprietary, unofficial, and, through 1960, circular companies.
[4] Includes mileage in Canada.
[5] Includes switching and terminal companies, except average tractive effort and average capacity.
[6] For 1950, steam locomotives of class I railroads; beginning 1960, all locomotives of class I railroads.
[7] Represents horsepower. [8] Excludes caboose cars. [9] Class I railroads only. [10] Includes lessors.
[11] Increase in investment over a period of years cannot be obtained accurately by subtraction of 1 year's investment from that of another owing to reorganization, sale or abandonment, reclassification, etc. Also includes proprietary companies. [12] Includes *amortization* applicable to proprietary companies.
[13] Comprises common stock, preferred stock, and funded debt unmatured.
[14] After extraordinary and prior period items.
[15] Includes highway grade crossing casualties.

Section 22

Transportation—Air and Water

This section presents statistics on civil air transportation, both passenger and cargo, and on water transportation, including inland waterways, oceanborne commerce, the merchant marine, cargo and vessel tonnages, and shipbuilding. The principal sources of these data are the annual *FAA Statistical Handbook of Aviation*, issued by the Federal Aviation Administration; the annual *Waterborne Commerce of the United States* and the *Annual Report of the Chief of Engineers*, Part 2, issued by the Corps of Engineers of the Department of the Army; the monthly and annual *U.S. Waterborne Foreign Trade, U.S. Airborne Foreign Trade*, the annual *Vessel Entrances and Clearances*, and the monthly *Highlights of U.S. Export and Import Trade*, issued by the Bureau of the Census; and data from the Bureau of Customs and U.S. Coast Guard.

Data on air transportation are also presented in *Air Transport Facts and Figures*, published annually by the Air Transport Association of America, Washington, D.C. Additional sources of data on water transportation include *A Statistical Analysis of the World's Merchant Fleets*, issued periodically by the Maritime Administration of the Department of Commerce; *The Bulletin*, issued monthly by the American Bureau of Shipping, New York; and the *Annual Summary of Merchant Ships Launched in the World* and the *Register Book* published by Lloyd's Register of Shipping, London, England. Data relating to merchandise exports and imports are in section 30 of this *Abstract*, Foreign Commerce and Aid.

Civil aviation.—Federal promotion and regulation of civil aviation are carried out by the Federal Aviation Administration and the Civil Aeronautics Board. The Board issues certificates permitting persons to engage in air transportation as a business, fixes air mail rates which they may charge, and may establish either maximum, minimum, or specific rates for transportation of passengers and goods. The responsibility for investigation of aviation accidents, formerly held by the Civil Aeronautics Board, resides with the National Transportation Safety Board.

The principal activities of the Federal Aviation Administration are: Controlling the use of navigable airspace; prescribing regulations dealing with the competency of airmen, airworthiness of aircraft, and air traffic control; operation of air route traffic control centers, airport traffic control towers, and flight service stations; the design, construction, maintenance, and inspection of navigation, traffic control, and communications equipment for the airways; and promotion of air safety.

These agencies publish monthly and quarterly financial and traffic statistical data on the use of airway facilities; data related to the location of airmen, aircraft, and airports; the activity volume in the field of non-air carrier (general aviation) flying; and aircraft production and registration.

Air carriers and service.—The term *certificated route air carrier* refers to air carriers holding certificates of public convenience and necessity, issued by the Civil Aeronautics Board, authorizing the performance of scheduled service over specified routes and a limited amount of nonscheduled service. This general carrier grouping includes the so-called passenger/cargo carriers and the all-cargo carriers, and comprises all of the airlines certificated by the board, except the supplemental air carriers. Certificated route air carriers are often referred to as "scheduled airlines," although they may also perform nonscheduled service. *Nonscheduled service* comprises revenue flights that are not operated in regular scheduled service, such as charter flights, and all nonrevenue flights incident to such flights. *Scheduled service* is transport service operated over an air carrier's certificated routes, based on published flight schedules, including extra sections.

Vessel shipments, entrances, and clearances.—Shipments by dry cargo vessels comprise shipments on all types of watercraft, except tanker vessels; shipments by tanker vessels comprise all types of cargo, liquid and dry, carried by tanker vessels.

A vessel is reported as entered only at the first port which it enters in the United States whether or not cargo is unloaded at that port. A vessel is reported as cleared only at the last port at which clearance is made to a foreign port, whether or not it takes on cargo. Army and Navy vessels entering or clearing without commercial cargo are not included in the figures.

Units of measurement.—Cargo tonnage and shipping weight both represent the gross weight of the cargo including the weight of containers, wrappings, crates, etc. However, shipping weight excludes lift and cargo vans and similar substantial outer containers. Other tonnage figures generally refer to stowing capacity of vessels, 100 cubic feet being called 1 ton. Gross tonnage comprises the space within the frames and the ceiling of the hull, together with those closed-in spaces above deck available for cargo, stores, passengers, or crew, with certain minor exceptions. Net or registered tonnage is the gross tonnage less the spaces occupied by the propelling machinery, fuel, crew quarters, master's cabin, and navigation spaces. It represents substantially space available for cargo and passengers. The net tonnage capacity of a ship may bear little relation to weight of cargo. Dead-weight tonnage is the weight in long tons required to depress a vessel from light water line (that is, with only the machinery and equipment on board) to load line. It is, therefore, the weight of the cargo, fuel, etc., which a vessel is designed to carry with safety.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See preface.

No. 1027. Scheduled Passenger/Cargo Air Carriers—Number, Operating Revenues, and Expenses: 1955 to 1975

– Represents zero. NA Not available.

[1] Existing airports and airfields recorded with FAA. Includes military airports with joint civil and military use. Includes U.S. outlying areas.

[2] Airport type definitions: Public—public use and public services, public control; Private—(*a*) public use and public services, private control, and (*b*) no public services, private control, military control, or Federal Government control. [3] Includes U.S. outlying areas. [4] Prior to July 1, 1970, data are for Federal-Aid Airport Program (FAAP). [5] Includes gliders, dirigibles, balloons, and blimps.

[6] Registered, not necessarily in operation. Includes helicopters. [7] See headnote, table 1029.

[8] Includes autogiros; excludes air carrier helicopters.

[9] Includes nonpilot technicians and flight instructors, not shown separately.

[10] Includes helicopter, glider, and other pilots, not shown separately.

[11] Corporation and individual business transportation, not for hire.

[12] Passenger and cargo transportation for hire, aerial application (crop dusting, spraying, seeding, etc.), patrol, survey, and other miscellaneous work use. [13] Comprises express and freight ton-miles.

[14] Includes some military ton-miles and may include a small amount of international traffic.

[15] Civil and military. [16] Beginning 1969, data not strictly comparable due to change of definition.

[17] Hijacker controls flight and reaches destination or objective.

No. 1039. United States Receipts and Payments for International Transportation: 1960 to 1975

[**In millions of dollars.** Data are international transportation transactions recorded for balance of payment purposes (see table 1391). Receipts include freight on exports carried by U.S. operated carriers and foreign carrier expenditures in U.S. ports. Payments include freight on imports carried by foreign carriers and U.S. carrier port expenditures abroad. Freight on exports carried by foreign carriers is excluded since such payments are directly or indirectly for foreign account. Similarly, freight on U.S. imports carried by U.S. carriers is a domestic rather than an international transaction. Minus sign (−) denotes excess of payments over receipts. See *Historical Statistics, Colonial Times to 1970*, series U 3 and U 10, for totals]

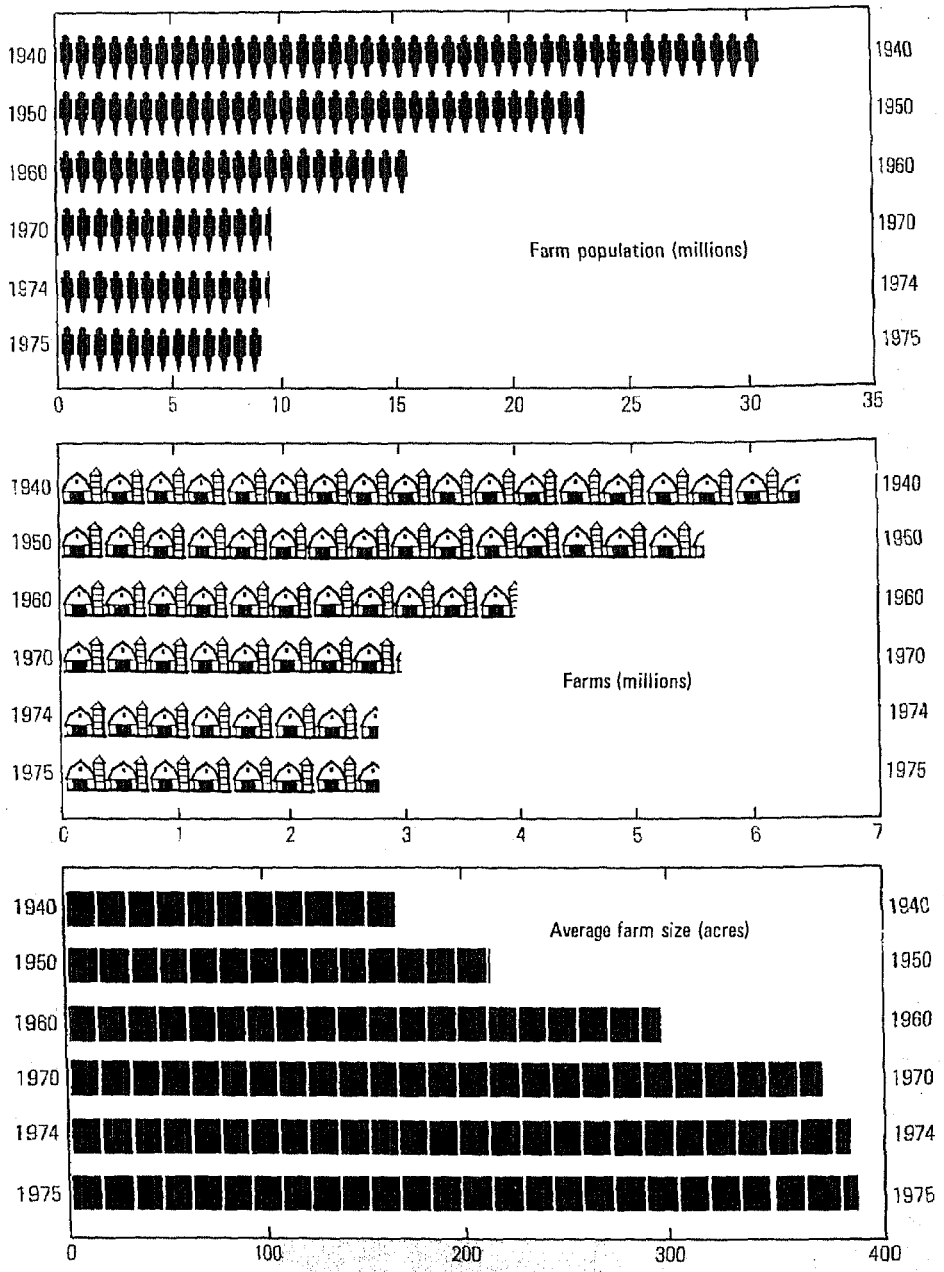
Fig. 23-1. CHANGES IN FARMING: 1940 TO 1975

(See tables 1063 and 1065)



Source: Chart prepared by U.S. Bureau of the Census. Data from U.S. Department of Agriculture, Statistical Reporting Service and Economic Research Service.

Section 23

Agriculture

This section presents statistics on farms and farm population; land use and conservation; farm income, expenditures, and debt; farmer cooperatives; farm output and marketings; foreign trade in agricultural products; specific crops; and livestock, poultry, and their products.

The principal sources of these data are reports issued by the U.S. Bureau of the Census, which conducts a census of agriculture every 5 years and censuses of irrigation and of drainage every 10 years; and three annual reports, *Agricultural Statistics*, *Crop Production*, and *Crop Values*, issued by the Statistical Reporting Service, U.S. Department of Agriculture. Other important sources include *The Balance Sheet of Agriculture*, *Changes in Farm Production and Efficiency*, *Farm Income Statistics*, and *Situation* reports, issued by the Economic Research Service, U.S. Department of Agriculture. Sources of current data on agricultural exports and imports include *Foreign Agricultural Trade of the United States*, also published by the Economic Research Service, and the reports of the Bureau of the Census, particularly Report FT 135, *U.S. Imports, General and Consumption, Schedule A Commodity and Country*, and Report FT 410, *U.S. Exports, Schedule B Commodity and Country*.

A census of agriculture has been taken by enumeration of individual farms every 10 years since 1840 and every 5 years since 1920. The 1969 Census of Agriculture is the most recent one for which complete data are available; preliminary results from the 1974 census became available during 1976.

Annual agricultural statistics of a wide variety have been issued by the Department of Agriculture for over 100 years. The 44 field offices of the Statistical Reporting Service collect data on crops, livestock and livestock products, agricultural prices, farm employment, and other related subjects from over 1.1 million voluntary reporters, mostly farmers, who report for their own and nearby farms on some 150 crops and 50 livestock items, and scores of other items pertaining to agricultural production and farm family living. State estimates and other information are sent to the Crop Reporting Board of the Statistical Reporting Service, which issues reports containing State and national data.

Farms and farmland.—Over time, the Bureau of the Census has used varying definitions of a farm. In the 1959, 1964, and 1969 censuses, places of less than 10 acres were counted as farms if estimated sales of agricultural products for the year amounted to at least $250, and places of 10 or more acres if such sales amounted to at least $50. In the 1950 and 1954 censuses, places of 3 or more acres were counted as farms if the annual *value* of agricultural products, exclusive of home-garden products, amounted to $150 or more; places of less than 3 acres were counted as farms only if the annual *sales* amounted to $150 or more. For definitions used in earlier censuses, see *U.S. Census of Agriculture: 1964*, vol. II, Introduction.

The 1969 census was the first for which data were primarily collected by mail and provided by farm operator self-enumeration (farm operators filled in the forms themselves). As a result, the universe for the 1969 census differed to some extent from those of prior, direct interview, censuses. Interviewers in earlier censuses tended to overlook some of the farms operated by nonresidents, and some of the agricultural operations located in urban areas. The 1969 mailing list included almost everyone who identified agriculture as a source of income or was a participant in government-

sponsored agricultural programs, but tended to omit persons who did not identify any of their income as agricultural. All operators of farms with sales of $2,500 or more in 1969 were asked to complete the regular census form. Those with sales of less than $2,500 were included in the census on a 50-percent sample basis, and were sent an abbreviated form.

Currently included as farms are such agricultural enterprises as nurseries, greenhouses, hothouses, sod farms, mushroom houses, and cranberry bogs; excluded are business enterprises engaged in forest production and in production of fish, oysters, fowl, etc. from the ocean, game preserves, parks, and the like, when not grown in captivity. In the case of landowners who had one or more tenants, renters, croppers, or managers, the land operated by each was counted as a separate farm.

Farmland refers to all land under the control of a farm operator and considered as part of his farm, including land not actually under cultivation or not used for pasture or grazing. Rent-free land was included as part of the farm only if the operator had sole use of it. Land used for pasture or grazing on a per head basis that was neither owned nor leased by the farm operator is not included except for grazing lands controlled by grazing associations leased on a per acre basis.

Estimates based on evaluation studies of the 1969 census results indicate a net underenumeration of 52,000 farms with value of products $2,500 or more (about 3 percent of all such farms) and 355,000 farms with value of products less than $2,500 (about 32 percent). These 407,000 farms represent about 15.0 percent of the estimated total number of farms, compared with 8.4 percent estimated net underenumeration in 1959 and 11.3 percent in 1964. In both the 1959 and the 1964 censuses, the estimated net underenumeration of farms with value of products $2,500 or more was about 4 percent. The estimated net underenumeration of farms with value of products less than $2,500 was about 13.7 percent in 1959 and 19.3 percent in 1964. Published census data were not adjusted for the estimated underenumeration. Additional details are given in *U.S. Census of Agriculture: 1969*, vol. V, Part 16.

Irrigation.—Irrigated land is defined by the Bureau of the Census as the acreage in farms to which water is artificially applied during the census year. Beginning with 1920, irrigated land has included cropland, pasture, and any other farm land irrigated. In addition to collecting information on irrigation from individual farms in the quinquennial census of agriculture, the Bureau of the Census collects data on the operation of irrigation water supply organizations at 10-year intervals. In 1969, irrigation information was collected from farms and irrigation organizations for all States.

Farm income.—Cash income is the cash receipts from farm marketings and Government payments made directly to farmers for farm related activities. Farm marketings represent agricultural products sold by farmers multiplied by prices received per unit of production at the local market. Gross farm income includes cash income, value of farm products consumed in farm homes, rental value of farm homes, and other farm-related income.

Information on prices received is obtained by the Statistical Reporting Service from over 4,200 voluntary reporters, including farmers, local merchants, and handlers of agricultural products. Season average prices received by farmers are calculated by weighting midmonth prices by monthly sales during the crop marketing season, beginning with the first month in which a particular crop harvest begins.

Crops.—Estimates of crop acreage and production by the Department of Agriculture's Statistical Reporting Service are based on current sample survey data obtained from individual reporters and objective yield counts which are supplemented by State assessors' enumerations of agricultural information, reports of carlot shipments, warehouse receipts, personal field observations by field statisticians, and reports from other sources. Cotton acreage and production are based on sample survey data and

on ginning information gathered by the Bureau of the Census. Following receipt of the U.S. census of agriculture information, the estimates made since the previous census year are reviewed on the basis of the data that were currently used and other data that became available later, including the census of agriculture. If necessary, revisions are made in the estimates based on this historical review.

Livestock.—Each census of agriculture from 1840 through 1900 was taken as of June 1. The various censuses since then have been taken as of January, April, or the fall, as specified in the published results. For the 1969 and 1974 censuses, inventories were as of December 31 and purchases, production, and sales data were for the calendar year. Comparison of livestock inventories from census to census is seriously affected by changes in date of enumeration. Volume II of *U.S. Census of Agriculture: 1964* gives a complete history of the enumeration of livestock and analyzes comparability from census to census.

Annual inventory numbers of livestock on farms and estimates of livestock, dairy, and poultry production prepared by the Department of Agriculture are based on information from farmers, using probability survey sampling methods.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970*. See preface.

No. 1063. Farm Population and Components of Change: 1930 to 1975

[In thousands, except as indicated. Prior to 1959, excludes Alaska and 1960, Hawaii. Minus (—) sign denotes decrease. See also *Historical Statistics, Colonial Times to 1970*, series C 76-78 and K 1-3]

Woodland not pastured	57	3.0	86	3.8	70	3.1	64	2.8	50	2.2
Farmsteads, roads, and other land	44	2.3	46	2.0	37	1.6	30	1.3	28	1.2
Not in farms	844	44.3	1,111	48.9	1,147	50.5	1,156	51.0	1,200	53.0
Grazing land[3]	504	26.4	402	17.7	319	14.0	293	12.9	288	12.7
Forest land not grazed[4]	203	10.7	368	16.2	438	19.3	443	19.5	475	21.0
Other land[5]	137	7.2	341	15.0	390	17.2	420	18.5	437	19.3

[1] Comprises cropland used for crops, soil improvement crops, and idle cropland.
[2] Includes cropland used only for pasture.
[3] Includes grassland, arid woodland, and shrub and other forested land grazed.
[4] Excludes forest areas in parks and most other special uses.
[5] Comprises urban, industrial, and residential areas; rural parks; wildlife refuges; highway, road, and railroad rights-of-way; ungrazed desert; rocky, barren, swamp, tundra, and other land not otherwise counted.

No. 1084. Conservation Districts—Number and Area: 1950 to 1975

[For years ending June 30. Soil conservation district legislation has been enacted in all 50 States, Puerto Rico, and the Virgin Islands. Soil conservation districts have broad authority for conservation and development of soil, water, and related resources and, in most cases, can accept Federal, State, county, and private assistance for their programs. Minus sign (−) denotes decrease]

No. 1098. Commodity Credit Corporation—Summary: 1960 to 1975

[As of June 30 or for years ending June 30. The Commodity Credit Corporation (CCC) is a wholly government-owned corporation established by Congress in 1933. Its purpose is stabilizing, supporting, and protecting farm income and prices; assisting in maintenance of balance adequate supplies of agricultural commodities; and facilitating orderly distribution of agricultural commodities. See also *Historical Statistics, Colonial Times to 1970*, series K 330-343]

Item	1960	1965	1969	1970	1971	1972	1973	1974	1975

No. 1099. Civilian Consumer Expenditures for Food—Farm Value and Marketing Bill: 1960 to 1975

[**In billions of dollars.** See *Historical Statistics, Colonial Times to 1970*, series K 358-360, for data before revisions]

ITEM	1960	1965	1970	1971	1972	1973	1974	1975
Farm foods, consumer expenditures	66.9	81.1	106.0	110.7	117.8	133.6	149.3	159.0
Farm value	22.3	27.1	34.8	35.3	39.3	51.1	56.0	55.3
Marketing bill [1]	44.6	54.0	71.2	75.4	78.4	82.5	93.3	103.7
Labor cost [2]	19.7	23.3	32.3	34.5	37.6	40.4	46.7	53.6
Railroad truck transport [3]	4.1	4.2	5.2	6.0	6.1	6.1	7.3	8.5
Corporate profits: [4]								
Before taxes	2.1	3.0	3.6	3.9	3.5	4.6	5.3	6.7
After taxes	.9	1.6	1.6	2.0	2.1	2.6	3.0	4.0
Other [5]	18.7	23.5	30.1	31.0	31.2	31.4	34.0	34.9

[1] The difference between total civilian expenditures for domestic farm-originated food products and the farm value or payment farmers received for the equivalent farm products. It relates only to domestic food bought by civilian consumers and not to that sold to the Armed Forces or exported. [2] Includes imputed earnings of proprietors, partners, and family workers not receiving stated remuneration, supplements to wages and salaries such as social security and unemployment insurance taxes and health insurance premiums; excludes cost for for-hire transportation. [3] Includes charges for protective services, heating, and refrigeration; excludes local hauling. [4] Excludes profits of unincorporated firms or transportation firms. [5] Includes advertising depreciation, fuel, electric power, containers, packaging materials, air and water transportation, interest on borrowed capital, taxes other than income, and noncorporate profits.

No. 1100. Farm-Retail Spreads for Farm-Originated Food Products, by Commodity Group: 1957 to 1975

[**In dollars, except as indicated.** These estimates are for a market basket of domestic farm-originated food products purchased annually per household in 1960-61 by urban wage-earner and clerical-worker families and single workers living alone. Quantities of food valued do not change from year to year. See *Historical Statistics, Colonial Times to 1970*, series K 354-357, for earlier market basket totals]

COMMODITY GROUP AND VALUE	1957-1959 avg.	1960	1965	1970	1971	1972	1973	1974	1975 (prel.)

[1] Sources of values for Government financed programs are different from those for total exports; therefore, not fully comparable in regard to valuation, shipping period, etc. Entries for "outside Government programs" are the residuals of the other 2 series. [2] Exports outside specified Government financed programs include, in addition to unassisted commercial transactions, shipments of some commodities with governmental assistance in the form of (*a*) barter for overseas procurement for other U.S. agencies, (*b*) short-term credits extended by the Commodity Credit Corporation and the Export Import Bank, (*c*) sales of Government owned commodities below domestic market prices, and (*d*) export payments in cash or in kind.

[1] Values are based on season average prices; see footnote 2.

[2] Season average price received by farmers. State prices weighted by production to obtain U.S. price prior to 1958, but weighted by sales beginning 1958. For certain years, prices for wheat, rice, corn for grain, grain sorghums, oats, soybeans, and cotton include an allowance for unredeemed loans and purchase agreement deliveries.

[3] Based on reported price of grain sorghums.

[4] State production figures, which conform with U.S. Bureau of the Census annual ginning enumeration with allowance for cross-State ginnings, rounded to thousands and added for U.S. totals.

[5] Bales of 500 pounds, gross weight. Beginning 1970, bales of 480 lb., net weight.

[6] Average price to April 1, 1976. [7] Prices are for hay sold baled.

[8] Includes some quantities not harvested and/or not marketed on account of economic conditions.

Per capita consumption [4]	100.6	96.3	97.6	96.6	102.5	103.0	102.1	97.0	88.7

[1] Sugar quotas govern the supply of sugar from all sources, foreign and domestic, available to the conterminous United States. The formulas for allocating the quotas among the supplying areas are established by Congress; the size of the quotas is determined by the Secretary of Agriculture. [2] Beginning 1973, includes Texas.
[3] Through 1965, includes Virgin Islands. Beginning 1970, Puerto Rico included in U.S. total.
[4] Adjusted for changes in invisible stocks (estimated) held by manufacturers, wholesalers, and retailers.

Source: U.S. Dept. of Agriculture, Statistical Reporting Service, *Agricultural Statistics*, annual; and U.S. Agricultural Stabilization and Conservation Service, *Sugar Reports*, monthly.

No. 1132. Sugar, Beet and Cane—U.S. and World Production: 1950 to 1975

[In thousands of short tons, raw value. Covers centrifugal only]

Yearly average or crop year	Total	United States				World	
		Beet	Cane		Puerto Rico [2]	Total	Percent U.S.
			La. and Fla. [1]	Hawaii			
1950–1954	4,624	1,784	566	1,031	1,243	39,141	11.8
1955–1959	4,720	2,088	572	1,013	1,047	49,673	9.5
1960–1964	5,810	2,777	935	1,086	1,012	60,742	9.6
1960	5,133	2,450	630	936	1,117	60,050	8.5
1965	6,103	2,894	1,104	1,218	887	69,283	8.8
1970	6,060	3,322	1,252	1,162	324	77,758	7.8
1973	6,003	3,200	1,420	1,129	254	88,799	6.8
1974	5,718	2,916	1,471	1,041	290	89,383	6.4
1975 (prel.)	6,980	3,840	1,734	1,104	302	86,372	8.1

[1] Includes Texas cane area with production of 74 thousand tons in 1974 and 105 thousand tons estimated for 1975.
[2] Includes Virgin Islands prior to 1970.

Source: U.S. Dept. of Agriculture, Statistical Reporting Service, in *Agricultural Statistics*, annual; and U.S. Agricultural Stabilization and Conservation Service, *Sugar Reports*, monthly.

No. 1133. Sugarcane, Cane Sugar, and Molasses—Acreage, Production, and Value: 1950 to 1975

[*Prior to 1960 and as noted*, excludes Hawaii. See *Historical Statistics, Colonial Times to 1970*, series K 542 and 543, for raw sugar produced]

Year	Sugarcane for sugar and seed					Sugar produced			Molasses made	
	Acreage harvested	Yield per acre [1]	Production	Price per ton [2 3]	Farm value [3]	Raw value [4]	Equivalent refined [5]	Per ton of cane, raw value [4]	Total, excl. sirup	Blackstrap (80° Brix)

Section 24

Forests and Forest Products

This section presents basic statistics on the area and ownership of commercial forest land, and on the annual growth, cut, and volume of timber on this land; forestry statistics covering the National Forests and Forest Service cooperative programs; product statistics for lumber, pulpwood, wood pulp, paper and board, turpentine, rosin, and veneer logs; and other similar data.

The principal sources of these data are *The Outlook for Timber in the United States*, issued in 1973 by the Forest Service of the Department of Agriculture, and *The Demand and Price Situation for Forest Products, National Forest System,* and *Wildfire Statistics,* issued annually by the Forest Service; and reports of the quinquennial census of manufactures and the monthly and annual *Current Industrial Reports,* issued by the Bureau of the Census. Additional information in this field is published in the *Annual Report* of the National Forest Reservation Commission, the *Annual Naval Stores Report* of the Department of Agriculture's Statistical Reporting Service, the monthly *Survey of Current Business* of the Bureau of Economic Analysis, and the monthly *Fingertip Facts and Figures* of the National Forest Products Association, Washington, D.C.

The Bureau of the Census also collects statistics on foreign trade of forest products. The Bureau of Labor Statistics publishes monthly and annual statistics of wholesale lumber prices. Information on the domestic movement of forest products is collected by the Interstate Commerce Commission and the Association of American Railroads, Washington, D.C.

The completeness and reliability of statistics on forests and forest products vary considerably. The data for forest land area and stand volumes are, of course, much more reliable for areas which have been recently surveyed than for those for which only estimates are available. Estimates of fire damage or causes of fires for Federal lands are considered much better than those for private lands. In general, much more data are available for lumber and other manufactured products such as veneer and plywood, pulp and paper, naval stores, etc., than for the primary forest products such as poles and piling, fuelwood, and fence posts.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See preface.

No. 1147. Forest Land—Total and Commercial Area, Volume of Sawtimber, and Growing Stock: 1953, 1963, and 1970

No. 1150. Sawtimber and Growing Stock—Growth, Removals, and Volume on Commercial Timberland, by States: 1970

[Sawtimber comprises all live trees of commercial species which contain at least 1 saw log defined as follows: Softwoods must be at least 9.0 inches in diameter, breast height, except in California, Oregon, Washington, and coastal Alaska where the minimum diameter is 11.0 inches. Hardwoods must be at least 11.0 inches in diameter in all States. Growing stock comprises all live sawtimber trees, poletimber trees, saplings, and seedlings meeting specified standards of quality or vigor; excludes cull trees]

NA Not available.
[1] Comprises national forests, public domain, land administered by U.S. Dept. of the Interior, Soil Conservation Service, Tennessee Valley Authority, etc.
[2] Beginning 1965, includes nonforest watershed areas under U.S. Dept. of the Interior protection.
[3] For 1960, excludes Alaska. [4] Includes nonforest watershed areas.
[5] For fire protection on State and private forest lands only, years ending June 30. [6] Excludes Alaska.
[7] For 1965, represents "Machine use." Data for later years not comparable due to change of definition.
[8] Included in various other classifications. [9] Prior to 1965, lumbering included in "Miscellaneous"; thereafter, in various other classifications; no previous breakdown was shown for fires caused by children.

Section 25
Fisheries

This section presents statistics relating to commercial fishing and the fish processing industry. The principal source of these data is the National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), of the U.S. Department of Commerce. For a list of publications, see "Fisheries" in Appendix II of this book.

The NMFS publishes monthly data on commercial landings of fish and shellfish, freezings, and holdings of fishery products, fish meal and oil production, and foreign trade in fishery products. Quarterly data are published on U.S. output of fish sticks, fish portions, and breaded shrimp. Annual reports for fisheries include data on quantity and value of commercial landing, of fish and shellfish (by species, region, State, and type of fishing gear), disposition of landings, number of fishermen, and number and kinds of fishing vessels and fishing gear. Reports for the fish-processing industry include annual data on output of canned, packaged, and industrial products and, for wholesaling and fish processing establishments, annual and seasonal employment, and number of firms, by product and State. Annual data are published on foreign trade in fishery products and per capita consumption of edible fishery products.

The first comprehensive survey of U.S. fisheries and fishery industries, made for the year 1880, did not include the Mississippi River and its tributaries. A complete survey was conducted in 1908 by the Bureau of the Census and in 1931 by the Bureau of Fisheries. For 1963 and 1967, the Bureau of the Census, in cooperation with the Bureau of Commercial Fisheries, conducted a Census of Commercial Fisheries.

Various sections of the country have been surveyed from time to time. A complete survey of all sections, including manufacturing and wholesaling operations, was made for 1950. Beginning in 1954, complete data have been collected annually, except for a portion of the Mississippi River and its tributaries in 1961.

The Water Quality Office of the U.S. Environmental Protection Agency publishes *Pollution-Caused Fish Kills* annually.

The value of catch as presented in various tables is in "ex-vessel" terms. It represents the price received by fishermen for fish, shellfish, and other aquatic plants and animals landed at the dock.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970*. See preface.

No. 1172. Fisheries—Quantity and Value of Catch: 1930 to 1975

Source: U.S. National Oceanic and Atmospheric Administration, *Fishery Statistics of the United States*, annual.

No. 1173. Fisheries—Disposition of Domestic Catch: 1950 to 1975

[**Round weight of catch in millions of pounds.** Prior to 1960, excludes Hawaii. In addition to whole fish, a large portion of waste derived from canning, filleting, and dressing fish and shellfish is utilized in production of fish meal and oil. From 400 to 500 million pounds of waste were used in meal and oil production in each year shown. See *Historical Statistics, Colonial Times to 1970*, series L 305-310, for similar but not entirely comparable data]

Section 26

Mining and Mineral Products

This section presents data relating to mineral industries and their products, general summary measures of production and employment, and more detailed data on production, prices, imports and exports, consumption, and distribution for specific industries and products. Data on mining and mineral products may also be found in sections 28, 31, and 32 of this *Abstract*.

"Mining" comprises the extraction of minerals occurring naturally (coal, ores, crude petroleum, natural gas) and quarrying, well operation, milling, and other preparation customarily done at the mine site or as a part of mining activity.

The principal source of these data is the three-volume *Minerals Yearbook*, published by the Bureau of Mines, Department of the Interior. Another major government source is the census of mineral industries, conducted every 5 years by the Bureau of the Census. Non-government sources include the *Annual Statistical Report* of the American Iron and Steel Institute, Washington, D.C.; *Metals Week* and the monthly *Engineering and Mining Journal*, issued by the McGraw-Hill Publishing Co., New York; *The Iron Age*, issued weekly by the Chilton Co., Philadelphia; and the *Joint Association Survey of the U.S. Oil and Gas Industry*, conducted by the American Petroleum Institute, Independent Petroleum Association of America, and Mid-Continent Oil and Gas Association.

Mineral statistics, with principal emphasis on commodity detail, have been collected by the Geological Survey or by the Bureau of Mines since 1880. Current data in Bureau of Mines publications include quantity and value of minerals produced, sold or used by producers, or shipped; quantity of minerals stocked; crude materials treated and prepared minerals recovered; and consumption of mineral raw materials. The U.S. Mining Enforcement and Safety Administration also collects and publishes data on man-hours, employment, and accidents and injuries in the mineral industries.

Censuses of mineral industries were conducted decennially by the Bureau of the Census from 1840 to 1940 and subsequently for the years 1954, 1958, 1963, 1967, and, most recently, for 1972. The censuses provide, for the various types of mineral establishments, information on operating costs, capital expenditures, labor, equipment, and energy requirements in relation to their value of shipments and other receipts. Commodity statistics on many manufactured mineral products are also collected by the Bureau at monthly, quarterly, or annual intervals and issued in its *Current Industrial Reports* series.

In general, figures shown in the individual commodity tables include data for outlying areas, and may therefore not agree with summary table 1196. Except for crude petroleum, the export and import figures include foreign trade passing through the customs districts of Alaska, Hawaii, and Puerto Rico, but exclude shipments between conterminous United States and outlying areas.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970*. See preface.

No. 1190. National Income Originating in Mining: 1950 to 1975

[**In millions of dollars.** 1950 excludes Alaska and Hawaii. Data are without capital consumption adjustment. For definition of national income, see text, p. 392. See also *Historical Statistics, Colonial Times to 1970*, series F 228]

ITEM	1950	1960	1965	1970	1972	1973	1974	1975
Total mining	5,259	5,613	6,013	7,810	8,700	10,149	15,406	18,804
Metal mining	658	807	856	1,179	1,073	1,480	1,539	1,693
Coal mining	2,006	1,286	1,372	2,231	2,493	2,869	5,189	6,732
Oil and gas extraction	2,053	2,606	2,670	3,069	3,563	3,907	6,602	8,180
Nonmetallic minerals, except fuels	542	914	1,115	1,301	1,571	1,883	2,076	2,199

– Represents zero. D Withheld to avoid disclosing individual company data. NA Not available. X Not applicable. Z Less than $50,000.

[1] Includes small quantity of anthracite mined in States other than Pennsylvania.

[2] 1960, refined only; thereafter, crude and refined.

[3] Grindstones, pulpstones, millstones (weight not recorded), grinding pebbles, sharpening stones, and tube-mill liners.

[4] Value included in "Nonmetallic minerals, undistributed."

[5] Excludes abrasive stone, bituminous limestone and sandstone, and ground soapstone, all included elsewhere in table. Includes calcareous marl and slate.

[6] Comprises value of items that cannot be disclosed: Aplite, brucite (1965), calcite (optical grade, 1965), calcium-magnesium, natural, and slag cement, chloride, diatomite (1960–65), graphite, iodine, kyanite, lithium minerals, magnesite, greensand marl, olivine, staurolite, and wollastonite and values indicated by footnote 4.

[7] Included with "Metals, undistributed."

[8] 1960, uranium ore.

[9] Comprises value of items that cannot be disclosed: Cobalt (1960–70) magnesium chloride for magnesium metal, manganiferous residuum (1960–1970) platinum-group metals (crude), rare-earth metal concentrates, titanium concentrate (rutile) (1960, 1965, and 1974), zirconium concentrate, and values indicated by footnote 7.

Nonmetal mills	(NA)	20	86	71	62	[7] 47	[5 7] 52	[5 7] 50

NA Not available. [1] No estimates of men or man-hours were made to cover nonrespondent establishments. [2] Average number of men at work each day mines were active. [3] Includes Alaska. [4] Preliminary. [5] Includes office workers. [6] Beginning 1960, includes Hawaii. [7] Excludes extraction of potash, salt, sulfur, and saline minerals. [8] Includes manufacture of cement and lime, except, beginning 1972, excludes cement manufacturing. Beginning 1960, includes Alaska and Hawaii.

No. 1201. Mineral Industries—Injuries and Fatalities: 1950 to 1974

[Prior to 1972, excludes Alaska and Hawaii, except as noted. Excludes data on iron smelting and steel industries. See also *Historical Statistics, Colonial Times to 1970*, series M 271-286]

Z Less than 500 or 500,000.
[1] Includes single-unit establishments without paid employees.
[2] Gross earnings paid to all employees on payroll.
[3] Computed by subtracting cost of supplies, minerals received for preparation, purchased fuel and electric energy, contract work, and purchased machinery from the value of shipments and capital expenditures.
[4] Excludes proprietors and firm members of unincorporated concerns.
[8] Represents employees up through the working foreman level engaged in manual work. Includes development and exploration workers.

SUMMARY: 1963, 1967, AND 1972

"N.e.c." means not elsewhere classified. See also *Historical Statistics, Colonial Times to 1970*, series M 1-12]

[6] Excludes paid vacations, holidays, and sick leave; includes actual overtime hours (not straight-time equivalent).

[7] Represents value of shipments of primary and secondary products of the industry and amount received for services performed for other establishments on a contract, fee, or other basis.

[8] Not strictly comparable with data for earlier years because of change in reporting procedures for crude petroleum and natural gas companies.

[9] Excludes data for dimension stone quarries operated in conjunction with dressing plants.

[10] Excludes data for mining included in establishments classified in manufacturing industries.

Z Less than 500,000 short tons or $500,000. [1] The demonstrated coal reserve base for the United States on Jan. 1, 1974, was 437 billion tons. Recoverability varies between 40 and 90 percent for individual deposits. Fifty percent or more of the overall coal reserve base in the U.S. is recoverable. [2] Preliminary. [3] Relates to mines having an output of 1,000 tons a year or more, including lignite and small output of anthracite produced outside Pennsylvania. [4] Beginning 1965, includes anthracite. [5] Includes coal consumed by railroads (two million short tons in 1960) excluded in distribution. [6] Average number of men working daily.

No. 1213. Crude Petroleum and Natural Gas—Sales Volume and Lease Revenues, 1967 to 1974, and Drilling Expenditures, 1973 and 1974

[Figures on a gross operator basis, under which individual companies responsible for management and operation of oil and gas field leases reported on all properties operated for their own account and the account of others. Lease revenues represent the revenues generated from the sales of either crude petroleum or natural gas, comparable to the sales volume reported and including production payment, royalty, and nonoperating working interest shares]

NA Not available. Z Less than 500 million cubic feet.
[1] Comprises gas sold or consumed by producers, including loss due to natural-gas liquids recovery, losses in transmission, amounts added to storage, and increases in gas in pipelines. Beginning 1965, data on pressure base of 14.73 pounds per square inch absolute; prior years, 14.65.
[2] Estimated recoverable proved reserves as of Dec. 31. Offshore reserves included for California, Louisiana, and Texas. Excludes gas loss due to natural-gas liquids recovery. Source: American Gas Association, Arlington, Va. (Copyright.)
[3] Excludes Alaska.

Source of tables 1217 and 1218: Except as noted, U.S. Bureau of Mines, *Minerals Yearbook*.

No. 1219. Cement—Summary: 1950 to 1974

[**In thousands of short tons, except as indicated.** Includes Puerto Rico. Excludes Alaska and, prior to 1960, Hawaii, except that imports and exports include Alaska and Hawaii for all years. See *Historical Statistics, Colonial Times to 1970*, series M 188-189, for related data]

[1] Prior to 1965, silvery pig iron included in "Foundry"; thereafter, in "All other."
[2] Ferromanganese only. [3] Materials consumed in manufacture of pig iron only.
[4] Includes agglomerated products.
[5] Based on total limestone and dolomite charged directly into blast furnace, plus tonnage consumed in the production of agglomerates.
[6] Includes Massachusetts.

Section 27

Construction and Housing

This section presents data on the construction industry and on various indicators of its activity and costs; on housing units and their characteristics, occupants, and financing; and on low-rent public housing and urban renewal.

The principal source of these data is the Bureau of the Census, which issues the monthly *Construction Reports* series (see below); the *Current Housing Reports* series, which comprises the quarterly *Housing Vacancies*, the quarterly *Market Absorption of Apartments*, the *Annual Housing Survey*, and the irregularly-issued *Housing Characteristics;* and various reports of the censuses of housing and of construction industries. *Construction Review*, published monthly by the Bureau of Domestic Commerce, contains many of the census series and other construction statistics series from the Federal Government and private agencies. Other sources include the monthly *Dodge Construction Potentials* of F. W. Dodge Division, *McGraw-Hill Information Systems* Company, New York, N.Y., which presents State data on construction contracts, the Bureau of Economic Analysis for data on residential capital, and the Federal Home Loan Bank Board and Veterans Administration for financial data, and the *Statistical Yearbook* of the Department of Housing and Urban Development.

Construction.—The first three censuses of the construction industry were conducted by the Bureau of the Census for 1929, 1935, and 1939 as part of the censuses of business; the next census was taken for 1967 as part of the economic censuses. The latest census covers the year 1972.

The 1972 Census of Construction Industries covered construction establishments as defined in the *Standard Industrial Classification Manual.* A construction establishment was defined as a relatively permanent place of business where the usual business activities related to construction were conducted. Reports were required from all establishments with a payroll equivalent of 10 or more employees and all establishments operated by multi-establishment companies. Single unit companies with a payroll equivalent of less than 10 employees were selected on the basis of a probability sample survey. In addition, limited data for more than 400,000 construction establishments without payroll were developed from Government administrative records. For information on 1967 published reports, see "1967 Census of Business" in Appendix IV of this book.

Current construction statistics compiled by the Bureau of the Census appear in the *Construction Reports* series. Monthly statistics supplemented by quarterly or annual data are issued as parts of this series under the following subtitles: *Housing Starts* and *Housing Completions*, which presents data by type of unit and by 4 major census regions; *Sales of New One-Family Homes*, which includes also data on homes available for sale and provides statistics annually on physical and financial characteristics for all new one-family homes by the 4 major census regions; *Value of New Construction Put in Place*, which also includes monthly composite construction cost indexes, and a special supplement which contains historical data, 1947 to 1974; *Price Index of New One-Family Houses Sold*, which presents quarterly figures and annual regional data; *Housing Authorized by Building Permits and Public Contracts*, which covers approximately 14,000 permit-issuing jurisdictions in the United States and *Housing Units Authorized for Demolition in Permit-Issuing Places*, which covers approximately 4,000 jurisdictions issuing permits for demolition. Statistics on expenditures by owners of residential properties are issued quarterly and annually in *Expenditures on Residential Additions, Alterations, Maintenance and Repairs, and Replacements.* Historical data on housing starts and building permits appear in *Housing Construction Statistics, 1899 to 1964*, and in *Housing Starts, 1959 to 1971.*

Housing.—From 1850 through 1930, the Bureau of the Census collected some housing data as part of its censuses of population and agriculture. Beginning in 1940, separate censuses of housing have been taken at 10-year intervals. For the 1970 census, data on year-round housing units were collected and issued on occupancy and structural characteristics, plumbing facilities, value, and rent.

Evaluation studies of the 1950, 1960, and 1970 censuses estimated erroneous omissions of occupied housing units at 2.9 percent, 2.4 percent, and 1.7 percent, respectively. These errors in the counts were partially offset by overenumeration of occupied housing units. In the 1950 and 1960 censuses, the net undercount of occupied units was estimated at 2.3 percent and 2.0 percent, respectively. The net undercount in the 1970 census is estimated at approximately 1.5 million housing units. The estimates for the various censuses are not strictly comparable due to differences in timing, procedures, and other factors. The census figures have not been adjusted to reflect the estimated undercounts.

The Annual Housing Survey (*Current Housing Reports*, Series H–150) is designed to provide a current and ongoing series of data on selected housing and demographic characteristics. It is based on a national sample and on independent samples for 60 SMSA's scientifically selected to represent a cross section of the housing stock in these areas. The 60 SMSA's are divided into three groups and data for each group are collected and published once every three years on a rotation basis. The samples were selected from 1970 census records and were updated to include new construction. Estimates based on data collected in the Annual Housing Survey are subject to both sampling and nonsampling errors and, therefore, caution should be used in making comparisons with 1970 census data.

Housing units.—In general, a housing unit is a group of rooms or a single room occupied or intended for occupancy as separate living quarters, that is, the occupants do not live and eat with any other persons in the structure, and there is either (1) direct access from the outside or through a common hall, or (2) complete kitchen facilities for the exclusive use of the occupants. Transient accommodations, barracks for workers, and institutional-type quarters are not counted as housing units.

Residential financing.—The Bureau of the Census began collection of detailed statistics on residential mortgages in 1890. In the 1920 and 1940 censuses, mortgage questions were asked of owners who occupied their own homes. In 1950, the census included a separate survey covering nonfarm residential mortgaged properties, both owner and renter. As part of the 1956 National Housing Inventory, data were collected on the financing of owner-occupied nonfarm properties. In 1960 and 1970, the Residential Finance Survey covered financing of both homeowner and rental properties and characteristics of nonmortgaged as well as mortgaged properties. Data on mortgage status for 1973 and subsequent years are found in the Annual Housing Survey and are limited to single family homes on less than ten acres with no business on the property.

Data on home mortgages and foreclosures are provided by the Federal Home Loan Bank Board. The Department of Housing and Urban Development provided data on the gross flow of long-term mortgage loans in its study, *The Supply of Mortgage Credit, 1970–1974*. Data on FHA-insured mortgages and VA-guaranteed loans is also presented.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970*. See preface.

No. 1244. Value of New Construction Put in Place: 1960 to 1975

[**In millions of dollars, except percent.** Represents value of construction put in place during year; differs from building permit and construction contract data in timing and coverage. Includes installed cost of normal building service equipment and selected types of industrial production equipment (largely site fabricated). Excludes cost of shipbuilding, land, and most types of machinery and equipment. See also *Historical Statistics, Colonial Times to 1970*, series N 1-29 and N 66-69]

No. 1250. Selected Construction Industries—Summary, by Industry: 1972

[Based on a probability sample of about 167,000 construction establishments with payroll. "N.e.c." means not elsewhere classified]

Industry	Establishments with payroll (number)	Employees (1,000)		Payroll (mil. dol.)		Receipts (mil. dol.)		Value added [2] (mil. dol.)
		Total	Construction workers	Total	Construction workers	Total	Net construction [1]	
Total	437,941	4,146	3,487	40,005	32,187	155,850	111,232	68,197
Contract construction	430,027	4,083	3,464	39,528	32,036	152,722	110,716	67,810
General building contractors	133,054	1,150	938	10,159	7,740	64,350	33,245	17,884
Heavy construction contractors	27,991	827	709	9,255	7,537	31,461	25,357	16,200
Highway and street construction	9,232	278	244	2,846	2,365	11,326	8,986	5,838
Heavy construction, n.e.c.	18,759	549	465	6,409	5,173	20,135	16,371	10,362
Special trade contractors	268,982	2,107	1,817	20,114	16,759	56,911	52,114	33,726
Plumbing, heating, air conditioning	53,301	456	371	4,788	3,810	15,615	13,594	7,795
Painting, paperhanging, decorating	29,011	137	126	1,081	961	2,406	2,290	1,839
Electrical work	32,455	324	271	3,793	3,151	9,608	9,229	5,797
Masonry and other stonework	23,896	166	156	1,311	1,199	3,105	2,978	2,057
Plastering, drywall, insulation	13,415	170	152	1,685	1,446	4,195	3,839	2,585
Terrazzo, tile, marble, mosaic work	4,270	31	27	260	213	717	685	419
Carpentering	23,524	124	115	925	842	2,356	2,128	1,505
Floor laying and floor work, n.e.c.	9,052	44	36	367	291	1,210	1,132	649
Roofing and sheet metal work	18,535	158	134	1,406	1,137	4,000	3,752	2,348

No. 1251. Construction Contracts—Value of Construction and Floor Space of Buildings, by Class of Construction: 1965 to 1975

[Prior to 1970, excludes Alaska and Hawaii. Includes new structures and alterations to existing structures (both value and floor area), and major alterations to existing structures which affect only valuation, since there is no additional floor area created by an "alteration" project. See also *Historical Statistics, Colonial Times to 1970*, series N 78-100]

Class of construction	Value of construction (bil. dol.)						Floor space of buildings [1] (mil. sq. ft.)					
	1965	1970	1972	1973	1974	1975	1965	1970	1972	1973	1974	1975
Total	49.3	68.3	88.9	99.3	93.1	90.0	2,843	2,938	3,960	4,013	2,939	2,410

Electric light and power [11]	58	74	89	94	119	128	135	144	171	200

NA Not available. [1] Includes value of site.

[2] Covers materials incorporated as integral part of a building or normally installed during construction and not readily removable. Excludes consumer durables, such as kitchen ranges, refrigerators, etc. Beginning 1965, applies to Alaska and Hawaii. Source: U.S. Bureau of Labor Statistics, unpublished data.

[3] Based on minimum wage rates agreed upon through collective bargaining; excludes overtime. As of July 1. Source: U.S. Bureau of Labor Statistics, *Union Wages and Hours: Building Trades*, annual.

[4] Covers both building and nonbuilding construction, excluding maintenance and repair. Represents a weighted average of various indexes used for different types of construction.

[5] Based on average contract unit bid prices for composite mile (involving specific average amounts of excavation, paving, reinforcing steel, structural steel, and structural concrete).

[6] Average for 30 cities of 4 types of buildings: Wood-frame, brick-wood frame, brick-steel frame, and reinforced concrete. Covers materials and labor costs in structural portion of buildings but excludes those for plumbing, heating, lighting, sprinklers, and elevators. Reflects employee-benefit costs, and allows for contractors' overhead and profit.

[7] Average of 20 cities for types shown. Weights based on surveys of building costs. Wage rates used for both common and skilled labor. Reflects payment of sales taxes and social security payroll taxes.

[8] Building construction index computed on basis of hypothetical unit of construction requiring 6 bbl. of portland cement, 1,088 M bd. ft. of 2″ x 4″ lumber, 2,500 lb. of structural steel, and 68.38 hours of skilled labor. General construction index based on same materials components combined with 200 hours of common labor.

[9] Eastern cities. Based on firm's cost experience with respect to labor rates, materials prices, competitive conditions, efficiency of plant and management, and productivity. Reflects payment of sales taxes and employee-benefit costs.

[10] Based on data covering public utility construction costs for 95 items in 6 geographic regions. Covers skilled and common labor; does not reflect tax payments nor employee-benefit costs.

[11] As derived by U.S. Bureau of the Census. Covers steam production plants only; excludes hydraulic plants.

Source: Except as noted, U.S. Bureau of the Census. In U.S. Bureau of Domestic Commerce, *Construction Review*.

No. 1254. Construction Materials—Indexes of Wholesale Prices: 1970 to 1975

[1967=100. For discussion of wholesale price index, see text, p. 431. See also *Historical Statistics, Colonial Times to 1970*, series N 140-155]

NA Not available. [1] Includes farm housing. [2] Type of ownership under which the owners of the individual housing units are also joint owners of the common areas of the building or community. [3] A mobile home is a vehicular portable structure built on a chassis and designed to be used without a permanent foundation as a year-round dwelling when connected to utilities. The homes are defined as units more than 8 feet wide and 35 feet or longer and weighing over 4,500 pounds.

No. 1263. Percent of New Privately-Owned One-Family Houses with Various Characteristics: 1970 to 1975

[**Percent distribution, except total houses.** Data beginning 1972 show percent distribution of characteristics for all houses completed (includes new houses completed, houses built for sale completed, contractor-built and owner-built houses completed, and houses completed for rent). Data for 1970 cover contractor-built, owner-built, and houses for rent for year construction started and houses sold for year of sale. Percents exclude houses for which characteristics specified were not reported. See also headnote, table 1264]

No. 1266. Vacancy Rates—Inside and Outside Standard Metropolitan Statistical Areas, and Regions: 1965 to 1976

[**In percent.** Annual averages, except as indicated. Based on Current Population Survey; see text, p. 1. Rate is relationship between vacant housing for rent or for sale and the total supply, which comprises occupied units, units already rented or sold and awaiting occupancy, and vacant units available for rent. For composition of regions, see fig. I, inside front cover; for definition of standard metropolitan statistical areas, see Appendix I. See also *Historical Statistics, Colonial Times to 1970*, series N 249-258]

RATE AND PERIOD	United States	Inside SMSA's [1]	Outside SMSA's [1]	North-east	North Central	South	West
Rental/vacancy rate:							
1965	8.3	8.0	8.8	5.6	7.2	9.0	11.9
1970	5.3	4.9	6.4	2.7	5.8	7.2	5.6
1971	5.4	5.1	6.4	3.0	5.7	7.3	5.7
1972	5.6	5.4	6.1	3.3	6.1	7.0	6.0
1973	5.8	5.7	6.1	3.9	5.9	7.1	6.3
1974	6.2	6.2	6.2	4.2	6.1	8.0	6.2
1975	6.0	6.1	5.7	4.1	5.7	7.7	6.2
1976, Jan.–June	5.7	5.9	5.1	4.6	5.9	6.6	5.5
Homeowner vacancy rate:							
1965	1.5	1.6	1.6	1.0	1.2	2.0	1.9
1970	1.0	1.0	1.1	0.8	1.0	1.2	1.1
1971	1.0	1.0	1.0	0.7	0.9	1.2	1.2
1972	1.0	1.0	1.0	0.5	1.0	1.1	1.2
1973	1.0	1.1	1.0	0.6	1.0	1.2	1.4
1974	1.2	1.2	1.1	0.8	1.0	1.5	1.5
1975	1.2	1.3	1.1	1.0	1.0	1.5	1.5
1976, Jan.–June	1.2	1.3	1.1	1.0	1.0	1.6	1.2

[1] For 1965–1971, 212 SMSA's as defined at time of 1960 census; for 1972 and 1973, based partially on 1960 census and partially on 243 SMSA's as defined at time of 1970 census; for 1974–1976, based on 1970 census definition.

No. 1267. Vacant Housing Units—Percent, by Type of Vacancy and Inside and Outside Standard Metropolitan Statistical Areas: 1970 to 1975

					Leased housing [7]	165.6	116.8	12.5	36.3
					New	73.4	44.5	10.4	18.5

– Represents zero. [1] Occupied or available for occupancy.
[2] Units to be constructed and units to go directly "under management" because no rehabilitation needed.
[3] Covers units designed specifically for persons 62 years old or over, disabled, or handicapped.
[4] New housing constructed on the Local Housing Authority (LHA) site pursuant to a contract let by the LHA.
[5] New housing purchased by the LHA from a private developer upon completion of construction pursuant to an earlier agreement. [6] Existing housing acquired by the LHA.
[7] Existing housing leased by LHA from an owner under a contract permitting LHA to sub-lease the units.

NA Not available.

[1] Statistics on the number of occupied units are essentially comparable although identified by various terms—the term "family" applies to figures for 1930 and earlier; "occupied dwelling unit," 1940 and 1950; and "occupied housing unit," 1960, 1970, and 1974. For 1910 and 1920, includes the small number of quasi-families; 1900 and 1930 represent private families only.

[2] From 1950 to 1970, population in occupied housing units was determined by dividing population in housing units by number of occupied housing units.

[3] Not comparable with data for earlier censuses because of a basic change in definition of farm residence. For definitions used in 1960 and 1970, see text, p. 2.

[4] For 1900 to 1920, includes a small proportion of urban-farm families in addition to rural-farm.

[1] For definition of median, see p. xii. [2] Includes hot and cold piped water, as well as a flush toilet and bathtub or a shower inside the structure for exclusive use of the people in the unit.
[3] Base is total of units occupied by owners and vacant units for sale.
[4] Base is total of units occupied by renters and vacant units for rent.

No. 1277. First Homes, 1967, 1970, and 1974, and Second Homes, 1967

[As of April. Based on sample of households. A second home is a residence other than the one where the household usually lives, which was owned or rented by the household for the entire year. The home must have been reserved for the occasional use of the owner during the entire year. Includes homes shared with co-owners or co-renters. Excludes homes outside the United States, those used for income and investment purposes only, trailers, tents, etc.]

No. 1286. Mortgage Status of Nonfarm Dwelling Units: 1920 to 1974

[**In thousands, except percent.** Prior to 1960, excludes Alaska and Hawaii. For 1920, mortgage data are for owner-occupied units in all types of structures; for 1940 and 1950, for owner-occupied dwelling units in 1- to 4-dwelling unit structures without business; for 1960, for properties with 1- to 4-dwelling units, and for 1971 and 1974, for properties with 1 housing unit. See also *Historical Statistics, Colonial Times to 1970*, series N 302-307]

CENSUS YEAR	Owner-occupied units	Reporting mortgage status	MORTGAGED		Not mortgaged	CENSUS YEAR	Owner-occupied units	Reporting mortgage status	MORTGAGED		Not mortgaged
			Number	Percent					Number	Percent	
1920	7,041	6,868	2,736	39.8	4,132	1960	27,862	27,862	15,816	56.8	12,046

No. 1287. Estimated Nonfarm Real Estate Foreclosures: 1940 to 1975

[Old series (discontinued after 1968) excludes Alaska and Hawaii. Based on data from approximately 1,700 counties, cities, townships, or other government divisions. Represents number of properties acquired through foreclosure proceedings. Excludes voluntary deeds of sale in lieu of foreclosure and defaults on real estate contracts. See also *Historical Statistics, Colonial Times to 1970*, series N 301]

YEAR	Foreclosures (old series)	YEAR	Foreclosures (old series)	YEAR	Foreclosures (new series) [1]	YEAR	Foreclosures (new series) [1]
1940	75,556	1965	116,664	1968	110,404	1972	132,335
1950	21,537	1966	117,473	1969	95,856	1973	135,803
1955	28,529	1967	110,541	1970	101,070	1974	140,496
1960	51,353	1968	90,941	1971	116,704	1975	142,803

[1] Based on 1967 benchmark and, to a minor degree, also differs conceptually from old series; difference largely due to understated reports and underestimating in old series. Includes farm foreclosures, relatively small.

Section 28

Manufactures

This section presents measures of the manufacturing segment of the economy and its component inputs and outputs. The input data include figures for establishments; employment and wages; raw materials, fuels, and electricity consumed; plant and equipment expenditures; and water use. The output data include figures for value and quantity of production and shipments; and value added by manufacture. Both types of data are shown for manufacturing as a whole, for major product groups, and for specific selected products.

The principal sources of these data are the Bureau of the Census reports of the quinquennial census of manufactures; the *Annual Survey of Manufactures;* and the *Current Industrial Reports* series, which presents monthly, quarterly, or annual data on production, shipments, and stocks for particular commodities. Indexes of industrial production are presented monthly in the Federal Reserve Board's *Federal Reserve Bulletin*. Reports on current activities of industries, or current movements of individual commodities, are also compiled by such government agencies as Bureau of Labor Statistics, Economic Research Service and Statistical Reporting Service of the Department of Agriculture, Bureau of Domestic Commerce, and International Trade Commission; and by private research or trade associations such as The Conference Board, Inc., New York, the American Iron and Steel Institute and the National Canners Association, both in Washington, D.C., and the National Association of Hosiery Manufacturers, Charlotte, N.C.

Data on financial aspects of manufacturing industries are collected from time to time by the Securities and Exchange Commission (SEC), the Bureau of Economic Analysis (BEA), and the Federal Trade Commission (FTC). Financial statistics for certain manufacturing industries in the form of balance sheets, profit and loss statements, analyses of sales and expenses, lists of subsidiaries, and types and amounts of security issues are summarized and published for the leading corporations registered with the SEC. The BEA issues data on capital in manufacturing industries and capacity utilization rates in manufacturing. The FTC has made several comprehensive studies of individual industries.

Censuses and annual surveys.—The first census of manufactures covered the year 1809. Thereafter, a census was taken at 10-year intervals to 1899, with the exception of 1829. It was conducted at 5-year intervals from 1904 through 1919, and at 2-year intervals from 1921 through 1939. It was suspended during the World War II period until the 1947 census. Thereafter, censuses were taken covering 1954, 1958, 1963, 1967, and 1972.

The *Annual Survey of Manufactures,* conducted for the first time in 1949, carries forward, for the intercensal years, measures of manufacturing activity covered in detail by the quinquennial census of manufactures. It provides statistics on employment, payrolls, value added by manufacture, value of shipments, inventories, new capital expenditures, and value of fixed assets for industry groups, individual industries, geographic divisions, States, and large standard metropolitan statistical areas.

The most recent annual survey is based on a sample of about 70,000 of an approximate total of 320,000 manufacturing establishments (see Technical Note, p. 757). It comprises all large plants, which account for approximately two-thirds of total manufacturing employment in the United States, and a representative selection of the more numerous small plants. Government-owned and -operated establishments are excluded.

The basic statistical measures of manufacturing activity, such as employment, payrolls, value added, etc., are defined in essentially the same way for the annual surveys as for the census of manufactures. However, beginning with 1949, average employment was calculated from the figures reported for the pay periods ending nearest the fifteenth of March, May, August, and November, whereas for 1947 such averages were based on 12 monthly employment figures. In 1967 and 1972, the average employment calculation was revised to the pay periods which include the 12th of March, May, August, and November in order to provide data more comparable with other statistical series. The 1954 figures are an average of reported employment totals for the four specified months, except for highly seasonal industries, where a 12-month average was obtained. For 1958 and later censuses, averages of production workers for the four specified months plus the March figure for "all other employees" were used for all industries.

Establishments and classification.—The census of manufactures for 1947 through 1972 covered operating manufacturing establishments as defined in the *Standard Industrial Classification Manual* issued by the Office of Management and Budget. The 1972 edition of the *Manual* was used for the 1972 census. For the 1947–1963 censuses, reports were required from all establishments employing one or more persons at any time during the census year. In the 1967 and 1972 censuses, reports were required only from establishments with 10 or more employees and establishments operated by multi-establishment companies. Data for single unit companies with less than 10 employees were estimated on the basis of Government administrative records and industry averages. Each of the establishments tabulated was classified in one of the more than 450 manufacturing industries as defined by the Standard Industrial Classification system in 1972, as compared to 400 industries in the 1967 census. This system defines an industry as a number of establishments producing a single product or a closely related group of products. An establishment is classified in a particular industry if its production of this product or product group exceeds in value its production of any other product group. In a few instances, the industry classification of an establishment is determined not only by its product group but also by the processes employed in making the products.

While some establishments produce only the products of the industry in which they are classified, it rarely happens that all the establishments in an industry specialize to that extent. The statistics on employment, payrolls, value added, inventories, and expenditures, therefore, reflect not only the primary activities of the establishments in that industry but also activities of a secondary nature. For this reason the industry statistics usually cannot be directly related to statistics on the total shipments of products primary to the industry.

The censuses for 1947 through 1972 were conducted on an establishment basis. The term "establishment" signifies a single physical plant site or factory. It is not necessarily identical with the business unit or company, which may consist of one or more establishments. A company operating establishments at more than one location is required to submit a separate report for each location. An establishment engaged in distinctly different lines of activity and maintaining separate payroll and inventory records is also required to submit separate reports.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970*. See preface.

Technical Note—Annual Survey of Manufactures

The annual survey data are estimates derived from a scientifically selected sample of manufacturing companies. The estimates are apt to differ somewhat from the results of a census covering all manufacturing companies. Measures of the potential differences between the estimates obtained and the results theoretically obtainable from a comparable complete coverage survey—"Relative standard errors"—are presented in the Annual Survey of Manufactures reports. In addition to the errors due to sampling, individual figures may be subject to biases arising from undetected response or procedural errors. Such nonsampling errors are partly reflected in the "standard errors" as derived, which are usually of the same order of size or only moderately lower than the total error. For particular estimates, however, the total error may considerably exceed the "standard error."

No. 1294. Manufactures—Summary: 1947 to 1973

[Prior to 1958, excludes Alaska and Hawaii. Census data, except as noted. Covers all establishments employing 1 or more persons at any time during year. See also *Historical Statistics, Colonial Times to1970*, series P 1-12]

NA Not available. [1] Estimated data based on *Annual Survey of Manufactures;* see text, p. 755.
[2] Includes administrative and auxiliary units.
[3] Excludes administrative offices and auxiliary units.
[4] Includes data for employees of manufacturing establishments engaged in distribution and construction work.
[5] Data for most industries in 1954 and for all industries since 1954 are based on pay periods ending nearest 15th of March, May, August, and November. For 1947, and industries of a seasonal type in 1954, data represent average of 12 monthly figures.
[6] Unadjusted for 1947; thereafter, adjusted. Unadjusted value added is obtained by subtracting cost of materials, supplies, containers, fuel, purchased electric energy, and contract work from value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) net change in finished goods and work-in-process inventories between beginning and end of year. [7] Includes extensive and unmeasurable duplication from shipments between establishments in the same industry classification.
[8] Beginning 1954, includes plants under construction and not yet in operation.

No. 1298. Index of Manufacturing Capacity and Relation of Output to Capacity: 1950 to 1976

[1967 output=100. Annual figures are averages of quarterly data. Capacity represents estimated quantity of output, relative to output in 1967, which the *current* stock of plant and equipment in manufacturing industries was capable of producing. Primary processing industries comprise textiles, lumber, paper and pulp, petroleum, rubber, stone, clay, glass, primary metals, fabricated metals, and a portion of chemicals. Advanced processing industries comprise chemical products, food, beverages, tobacco, apparel, furniture, printing and publishing, leather, machinery, transportation equipment, instruments, ordnance, and miscellaneous industry groups]

YEAR	Index of capacity	RELATION OF OUTPUT TO CAPACITY (percent)			YEAR	Index of capacity	RELATION OF OUTPUT TO CAPACITY (percent)		
		All manufacturing	Primary processing	Advanced processing			All manufacturing	Primary processing	Advanced processing

No. 1302. U.S. Share of World Exports of Manufactures: 1960 to 1975

[World exports=exports from 15 major trading countries: U.S., Austria, Belgium-Luxembourg, Canada, Denmark, France, Fed. Rep. of Germany, Italy, Japan, Netherlands, Norway, Sweden, Switzerland, and U.K.]

Percents are calculated from the values of exports of the six commodity groups from each of the 15 countries. Incorporated in the calculations are the changing relationships between each supplier's currency and the currencies of its trading partners. For this purpose, export-weighted exchange rate indices are calculated for each supplier, using official rates of exchange in 67 principal markets

Item	1960	1965	1970	1971	1972	1973	1974	1975 (prel.)
U.S. exports of manufactures, total [1] bil. dol.	12.7	17.6	29.7	30.8	34.3	45.6	64.6	72.2
Percent of world exports	25.3	22.8	21.3	20.0	19.2	19.5	20.3	21.3

No. 1310. Percent of Shipments Accounted for by Large Manufacturing Companies, Selected Industries: 1947 to 1972

[Prior to 1967, excludes Alaska and Hawaii. First 50 industries as determined by value added by manufacture in 1972. Industry codes and descriptions are based on the 1972 *Standard Industrial Classification Manual* (SIC). Determination of company affiliation of establishment is based on census reports and publicly available records. "Largest" companies are determined by each company's value added by manufacture *in the specified industry*. Industries in the "not elsewhere classified" category are omitted, regardless of their value added]

Industry code [1]	INDUSTRY AND YEAR	Number of companies	Value added by manufacture [2] (mil. dol.)	VALUE OF SHIPMENTS				
				Total [3] (mil. dol.)	Percent of total, ranked by company size

D Withheld to avoid disclosure. NA Not available.
S Withheld because data did not meet publication standards. X Not applicable.

[1] Standard Industrial Classification code.

[2] Derived by subtracting total cost of materials, supplies, fuel, electric energy, cost of resales, and contract work done by others from value of shipments including resales, and other receipts and adjusting resulting amount by net change in finished products and work-in-process inventories between beginning and end of year.

[3] Comprises for all manufacturing establishments classified in an industry value of (a) products primary to the industry, (b) secondary products which are primary to other industries, (c) miscellaneous receipts such as those for contract and commission work on materials owned by others, scrap, salable refuse, repair, etc., and (d) resales, i.e., products resold in the same condition as bought.

[4] Percent computed on value added as there was substantial duplication in data for value of shipments.

[5] A number of small establishments were misclassified into this industry affecting the number of companies, but having no appreciable effect on value or percentage of shipments.

[6] Value of work done reported instead of value of shipments; therefore, value added not adjusted for inventory change.

[7] Includes foundries producing gray-iron castings for other plants of the same company. Accordingly, percentages do not reflect market shares in industry as such.

[8] Value of production reported instead of value of shipments; therefore, formula for computing adjusted value added modified to include only changes in work-in-process inventories between beginning and end of year.

No. 1311. Manufactures Summary

[See headnote,

	INDUSTRY GROUP	Industry code [1]	1963			1967			
			All employees		Value added by manufacture [3]	Establishments	All employees		Value added by manufacture [3]
			Number [2]	Payroll			Number [2]	Payroll	
			1,000	*Mil. dol.*	*Mil. dol.*	*Number*	*1,000*	*Mil. dol.*	*Mil. dol.*
1	**Fabricated metal products** [10]	34	[6] 1,131	[6] 6,834	[6] 12,691	[6] 27,418	[6] 1,342	[6] 9,320	[6] 18,043
2	Metal cans, shipping containers	341	53	377	831	299	60	474	1,142
3	Cutlery, handtools, hardware	342	137	800	1,708	1,939	156	1,043	2,318
4	Plumbing and heating, ex. electric [10]	343	68	391	791	838	65	428	872
5	Fabricated structural metal prod	344	326	1,923	3,220	10,151	388	2,687	4,934
6	Screw machine products, bolts, etc	345	95	584	1,054	2,536	116	847	1,621
7	Metal forgings, stampings [10]	346	182	1,225	2,281	2,710	226	1,686	3,031
8	Metal services, n.e.c	347	66	331	555	4,684	81	481	864
9	Ordnance and accessories, n.e.c	348	(NA)	(NA)	(NA)	(NA)	(NA)	(NA)	(NA)
10	Misc. fabricated metal products [10]	349	150	907	1,714	2,711	189	1,309	2,591
11	**Machinery, exc. electrical**	35	1,460	9,571	17,495	37,892	1,865	14,226	27,836
12	Engines and turbines	351	87	609	1,114	182	100	820	1,598
13	Farm and garden machinery	352	113	689	1,328	1,618	136	947	2,042
14	Construction and related machinery	353	211	1,381	2,732	2,305	273	2,041	4,130
15	Metalworking machinery	354	259	1,842	3,038	9,439	337	2,860	5,091
16	Special industry machinery	355	172	1,095	1,917	3,312	207	1,570	2,880
17	General industrial machinery	356	233	1,542	2,813	3,760	279	2,137	4,107
18	Office and computing machines	357	137	945	1,818	594	190	1,462	3,332
19	Refrigeration, service machinery	358	113	674	1,369	1,573	140	947	2,125
20	Misc. machinery, except electrical [10]	359	136	794	1,366	15,109	208	1,443	2,531
21	**Electric and electronic equip** [10]	36	1,512	9,284	17,011	10,706	1,875	12,968	24,487
22	Electric distributing equipment [10]	361	132	822	1,535	1,218	176	1,230	2,509
23	Electrical industrial apparatus	362	161	1,005	1,889	1,316	207	1,420	2,792
24	Household appliances	363	146	864	2,097	637	169	1,101	2,540
25	Electric lighting and wiring equip	364	133	710	1,560	1,868	157	950	2,214
26	Radio and TV receiving equipment	365	91	459	1,037	661	130	720	1,587
27	Communication equipment	366	477	3,395	5,342	1,402	525	4,397	6,993
28	Electronic components, accessories	367	288	1,536	2,508	2,439	403	2,435	4,359
29	Misc. electrical equipment, supplies	369	84	495	1,042	1,165	107	715	1,494
30	**Transportation equipment** [10]	37	1,548	11,381	21,818	7,483	1,834	15,174	28,174
31	Motor vehicles and equipment [10]	371	644	4,741	11,869	2,675	739	5,930	13,666
32	Aircraft and parts [10]	372	677	5,228	7,831	1,273	802	7,209	11,327
33	Ship and boat building and repairing	373	140	898	1,193	2,011	169	1,239	1,705
34	Railroad equipment	374	45	302	541	123	57	427	788
35	Guided missiles, space vehicles	376	(NA)	(NA)	(NA)	(NA)	(NA)	(NA)	(NA)
36	Motorcycles, bicycles, and parts	375	10	48	82	91	12	70	136
37	Misc. transportation equipment [10]	379	34	163	301	1,310	55	298	551
38	**Instruments and related prod** [10]	38	305	1,913	3,992	4,453	394	2,822	6,418
39	Engineering, scientific instruments	381	33	208	359	677	46	327	617
40	Measuring and control devices [10]	382	94	581	1,112	766	104	732	1,392
41	Optical instruments and lenses [10]	383	12	79	132	303	21	163	284
42	Medical instruments and supplies	384	51	291	635	1,466	67	427	966
43	Ophthalmic goods	385	20	96	178	461	26	143	284
44	Photographic equip. and supplies	386	65	499	1,270	557	95	820	2,481
45	Watches, clocks, and watchcases	387	30	158	307	223	35	209	393
46	**Misc. manufacturing** [10 11]	39	639	3,795	6,481	14,489	824	5,819	10,189
47	Jewelry, silverware, and plated ware	391	43	226	416	2,212	52	320	641
48	Musical instruments	393	20	103	179	343	25	144	238
49	Toys and sporting goods	394	113	461	979	2,435	116	559	1,205
50	Pens, pencils, office and art supplies	395	32	160	338	959	35	200	412
51	Costume jewelry and notions	396	53	214	415	1,608	52	252	528
52	Misc. manufactures [10 11]	399	379	2,631	4,155	6,932	544	4,345	7,163
53	**Administrative and auxiliary** [12]	60	728	6,615	(X)	5,460	831	8,728	(X)

NA Not available. X Not applicable.

[1] Standard Industrial Classification code.

[2] "All employees" represents the average of "production workers" plus all other employees for the payroll period ended nearest the 15th of March.

[3] Value of shipments less cost of materials, supplies, containers, fuels, purchased electricity, and contract work, plus net change in finished goods and work-in-process inventory, and value added in merchandising activities of manufacturing establishments.

[6] Includes extensive duplication arising from shipments between establishments in the same industry classification.

[5] Includes expenditures for plants in operation and plants under construction but not yet in operation.

[6] Includes industries not shown separately.

FOR INDUSTRY GROUPS: 1963 TO 1973—Continued

[7] Due to changes in industry classification, 1963 data not comparable with 1967, 1972, and 1973 data.

[8] Value of production. The formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[9] Represents value of production.

[10] Due to changes in industry classification, 1963 and 1967 data not comparable with 1972, and 1973 data.

[11] Through 1967, includes ordnance from privately owned and/or operated establishments classified in "Ordnance and accessories." Excludes government-owned and operated equipment.

[12] Manufacturing concerns often reported separately for central offices or auxiliaries which serve the manufacturing establishments of a company, rather than the general public. Separate reports were obtained from such units if at a different location or if they serviced more than one establishment.

[1] Includes central administrative offices and auxiliary units.
[2] Includes employment and payroll at administrative offices and auxiliary units.
[3] "Production workers" represents the average of the employment for the payroll periods ended nearest the 12th of March, May, August, and November. "All employees" represents the average of "production workers" plus all other employees for the payroll period ended nearest the 12th of March.

BY STATES: 1967 TO 1973

because figures were independently derived]

[1] Barrels of 31 wine gallons (see footnote 10). [2] Source: U.S. Bureau of Domestic Commerce. Based on U.S. Bureau of the Census estimated population 18 years old and over, as of Jan. 1, including Armed Forces abroad. Prior to 1960, excludes Alaska and Hawaii.

[3] Prior to 1960, represents registered distilleries, fruit distilleries, and industrial alcohol plants. In some instances, a plant was operated at different times in more than one of these categories and was counted in each.

[4] Prior to 1960, represents internal revenue bonded warehouses and industrial alcohol bonded warehouses.

[5] Prior to 1960, net production obtained by deducting total products used in redistillation from gross production of neutral product (spirits); thereafter, each kind of distilled spirits used in redistillation was deducted from gross production of same kind. [6] Excludes alcohol produced for industrial use.

[7] A tax gallon for spirits of 100 proof or over is equivalent to the proof gallon; for spirits of less than 100 proof, to the wine gallon. (See *footnotes* 8 and 10.) [8] A proof gallon is the alcoholic equivalent of a U.S. gallon at 60° F, containing 50 percent of ethyl alcohol by volume. [9] Includes ethyl alcohol.

[10] A wine gallon is the U.S. gallon, equivalent to the volume of 231 cubic inches.

[11] Production represents total amount removed from fermenters, including distilling material, and, beginning 1970, includes increase after fermentation (by amelioration, sweetening, and addition of wine spirits). In 1972, 407 million gallons of distilling materials were produced; in 1973, 258 million gallons; in 1974, 389 million gallons; and in 1975, 359 million gallons. [12] Includes special natural wines. [13] Excludes distilling materials.

[14] Includes champagne, other effervescent wines, and artificially carbonated wines.

No. 1331. Chemicals—Production, by Kind: 1960 to 1975

[Data for chemicals shown are restricted to a selected group composed for the most part of inorganic chemicals and related products which are sufficiently important economically to justify publication. Includes data for chemicals produced by Tennessee Valley Authority, and by Government-owned privately operated plants. See *Historical Statistics, Colonial Times to 1970*, series P 248, 249, and 251, for sodium hydroxide, ammonia (anhydrous), and sulfuric acid, respectively]

CHEMICAL	Unit	1960	1965	1970	1973	1974	1975 (prel.)
Acetylene [1]	Mil. cu. ft.	12,143	16,659	14,834	8,278	7,807	6,697
Aluminum chloride:							
Anhydrous (100% $AlCl_3$)	1,000 sh. tons	24	33	31	37	37	27
Liquid and crystal (32° Bé)	1,000 sh. tons	26	26	23	(D)	(D)	(D)
Aluminum sulfate (17% Al_2O_3): [2]							
Commercial	1,000 sh. tons	879	1,063	1,191	1,252	1,278	1,163
Iron free	1,000 sh. tons	52	59	71	230	232	252
Ammonia, synthetic anhydrous	1,000 sh. tons	4,818	8,869	13,824	15,093	15,732	16,393
Ammonium nitrate, original solution (100% NH_4NO_3)	1,000 sh. tons	3,122	4,663	6,456	7,157	7,542	7,087
Ammonium sulfate, synthetic (technical) [3]	1,000 sh. tons	859	1,947	1,894	2,054	2,060	1,715
Argon (refined)	Mil. cu. ft.	570	1,286	2,742	4,382	4,688	4,457
Calcium carbide (commercial)	1,000 sh. tons	1,093	1,098	791	290	324	253
Calcium phosphate, dibasic (100% $CaHPO_4$)	1,000 sh. tons	235	263	594	540	611	522
Carbon, activated [4]	1,000 sh. tons	60	85	80	84	75	76
Carbon dioxide (liquid, gas, and solid) [5]	1,000 sh. tons	898	1,080	1,136	1,568	1,804	1,851
Chlorine, gas [6]	1,000 sh. tons	4,637	6,517	9,764	10,402	10,753	9,104
Chrome, yellow and orange (C.P.)	1,000 sh. tons	21	29	32	37	38	26
Chrome orange, molybdate (C.P.)	1,000 sh. tons	6	9	11	14	15	10
Hydrochloric acid (100% HCl)	1,000 sh. tons	970	1,370	2,014	2,516	2,451	1,989
Hydrofluoric acid, anhydrous and aqueous (100% HF)	1,000 sh. tons	118	150	240	269	282	213
Hydrogen, high purity (99.5–100%) [7]	Bil. cu. ft.	13	30	60	65	82	74
Hydrogen, lower purity (less than 99.5%) [7]	Bil. cu. ft.	52	92				
Hydrogen peroxide (100% by weight)	1,000 sh. tons	29	53	61	80	94	78
Nitric acid (100% HNO_3)	1,000 sh. tons	3,315	4,893	6,679	8,441	8,120	7,527
Nitrogen, high purity (99.5–100%)	Bil. cu. ft.	19	72	151	[8] 228	[8] 243	[8] 253
Nitrogen solutions (100% N)	1,000 sh. tons	804	1,112	1,721	1,947	2,102	2,013
Oxygen, high purity (99.5–100% O)	Bil. cu. ft.	58	182	284	392	390	352
Oxygen, lower purity (less than 99.5%)	Bil. cu. ft.	1,479	2,170	1,899			
Phosphoric acid (100% P_2O_5)	1,000 sh. tons	2,087	3,905	5,683	6,848	7,213	7,671
Phosphorus (white and red)	1,000 sh. tons	409	555	597	526	524	449
Potassium hydroxide (88–92% KOH)	1,000 sh. tons	103	181	175	220	208	234
Potassium pyrophosphate (100% $K_4P_2O_7$)	1,000 sh. tons	26	55	40	42	40	41
Sodium bichromate and chromate	1,000 sh. tons	122	141	154	159	179	124
Sodium carbonate: Synthetic (58% Na_2O): [9]							
Total crude bicarbonate equivalent [10]	1,000 sh. tons	4,558	4,926	4,393	3,813	3,507	2,802
Finished light [11]	1,000 sh. tons	2,238	2,272	1,771	1,768	1,711	1,284
Finished dense	1,000 sh. tons	1,998	2,399	2,483	1,920	1,643	1,396
Natural [12]	1,000 sh. tons	790	1,494	2,678	3,707	4,048	4,353
Sodium chlorate (100% $NaClO_3$)	1,000 sh. tons	92	134	198	174	203	173
Sodium hydroxide (caustic soda):							
Liquid (100% NaOH)	1,000 sh. tons	4,972	6,842	10,141	9,307	11,189	9,583
Sodium phosphate:							
Tribasic (100% Na_3PO_4)	1,000 sh. tons	51	55	53	54	52	56
Meta (100% $NaPO_3$)	1,000 sh. tons	63	81	87	74	80	54
Tetra (100% $Na_4P_2O_7$)	1,000 sh. tons	90	107	56	46	46	34
Acid pyro (100% $Na_2H_2P_2O_7$)	1,000 sh. tons	17	24	26	30	30	24
Tripoly (100% $Na_5P_3O_{10}$)	1,000 sh. tons	690	923	1,208	961	903	770
Sodium silicate (soluble silicate glass, liquid and solid) (anhydrous) [13]	1,000 sh. tons	497	588	628	723	770	724
Sodium sulfate:							
High purity (more than 99% Na_2SO_4)	1,000 sh. tons	303	428	812	754	783	706
Glauber's salt (100% $Na_2SO_4 \cdot 10H_2O$)	1,000 sh. tons	32	[14] 976	561	551	565	431
Lower purity (99% or less Na_2SO_4)	1,000 sh. tons	738					
Sulfuric acid, gross (100% H_2SO_4) [15]	Mil. sh. tons	18	25	30	32	34	32
Titanium dioxide (composite and pure) (100% TiO_2)	1,000 sh. tons	456	577	655	785	787	603

D Withheld to avoid disclosing figures for individual companies.

[1] Excludes quantities of acetylene produced and consumed by railroad shops, shipyards, and small establishments using portable generators. [2] Excludes quantities produced and consumed by municipalities.

[3] Excludes byproduct coke-oven production.

[4] Includes data for decolorizing and water purification grades only.

[5] Excludes quantities produced and consumed in plants manufacturing soda ash or urea.

[6] Total production, including quantities liquefied for use, storage, or shipment.

[7] Beginning 1960, excludes quantities produced and consumed in manufacture of methanol and ammonia, produced by ammonia dissociation process, or disposed of as waste, e.g., vented, used as fuel, etc. Beginning 1970, excludes amounts of hydrogen produced in petroleum refineries for captive use. [8] Combined with low purity.

[9] Includes quantities used to manufacture caustic soda, sodium bicarbonate, finished light and dense soda ash.

[10] Ammonia soda and caustic carbonation processes.

[11] Excludes quantities converted to finished dense soda ash.

[12] Collected by or in cooperation with Bureau of Mines.

[13] Excludes amounts produced and consumed in making meta-, ortho-, and sesquisilicates.

[14] Includes Glauber's salt converted to 100% Na_2SO_4. [15] Includes sulfuric acid of oleum grades.

Section 29

Domestic Trade and Services

This section presents statistics relating to retail and wholesale trades and selected service industries. Data shown for the trades, classified by kind of business, and for the various categories of services (personal, business, repair, amusement, hotel, etc.) cover sales or receipts, establishments, employees, payrolls, proprietorships, and other items. Also included are data for public warehousing facilities and for advertising expenditures.

The principal sources of these data are the census reports and the annual and monthly survey reports of the Bureau of the Census. Data on national income originating in trade and services appear in the monthly *Survey of Current Business*, issued by the Bureau of Economic Analysis. Financial data for firms engaged in retail, wholesale, or service activities appear in the annual *Statistics of Income*, published by the Internal Revenue Service.

Censuses and current surveys.—Censuses of business have been taken at intervals since 1929. Beginning with the 1967 census, legislation provides for a quinquennial census to be conducted for years ending in "2" and "7." For the most recent census reports issued, see "1972 Census of Business" in Appendix IV of this book.

Current sample surveys conducted by the Bureau of the Census cover various aspects of the retail and wholesale trades and selected service industries. Estimates of weekly sales in retail stores are shown for the United States, by kind of business, in the Bureau's *Weekly Retail Sales Report*. Its *Monthly Retail Trade Report* contains monthly estimates of sales and end-of-month accounts-receivable balances of all retail stores, and of retail organizations operating 11 or more stores, for the United States, by kind of business, as well as monthly retail sales data for census regions and divisions, 15 large States, and 20 large standard metropolitan statistical areas. Also included are data on the number of department stores and the monthly sales of these stores in 212 selected areas; these data are subsequently republished in *Monthly Department Store Sales in Selected Areas*. Annual figures on sales, sales-stock ratios, merchandise purchases, and year-end inventories and accounts-receivable balances, by kind of business, appear in the *Annual Retail Trade Report*.

Statistics from the Bureau's monthly wholesale trade survey include merchant wholesalers' sales, inventories, and stock-sales ratios by kind of business, for the United States, as well as sales and inventory trends by kind of business and by geographic divisions. Monthly sales estimates are also shown by geographic divisions for the summary groups—durable and nondurable goods wholesalers and all wholesalers combined. These data, based on reports submitted by a sample of firms, appear in the *Monthly Wholesale Trade Report*. The monthly *Selected Services Receipts Report* provides monthly estimates of receipts for six major kind-of-business groups and seven kind-of-business categories for the United States as a whole; these estimates appear also in the *Survey of Current Business*, cited above.

Estimates obtained from annual and monthly surveys are based on sample data and are not expected to agree exactly with results that would be obtained from a complete census of all establishments. Data include estimates for establishments not reporting. Measures of sampling variability, shown in the source reports, exclude biases arising from differences of response or from nonreporting.

Establishments and coverage.—The establishments covered in the business censuses are classified into 3 groups as follows: (1) *Retail trade*, places of business primarily engaged in selling merchandise for personal or household consumption; (2) *Wholesale trade*, establishments primarily engaged in selling goods to dealers and distributors for

resale or to purchasers who buy for business and farm uses; and (3) *Selected services*, establishments engaged primarily in the sale of services as contrasted with the sale of merchandise. Figures for establishments refer to those in business at the end of the year.

The censuses exclude the activities of doctors, dentists, and others performing a professional or scientific service except that dental laboratories, law firms, architects, and engineers were covered in the 1967 and 1972 censuses (see table 281 for legal services, 1972). Also excluded are educational institutions; religious or charitable institutions; hospitals and infirmaries; public utilities; and Government-operated enterprises, except wholesale and retail liquor operations.

Data from the 1958 census exclude retail and service nonemployer establishments which had receipts of less than $2,500 and $1,000, respectively. In the 1963, 1967, and 1972 censuses, nonemployer establishments which did not operate the entire year were included if, during the period they operated, their receipts were at a rate which would have reached the annual totals specified had they operated the entire year. Wholesale trade establishments with no paid employment are excluded.

For the current sample survey programs, retail trade coverage is the same as for the census; wholesale trade coverage is limited to merchant wholesalers; and selected services coverage is less inclusive than the census.

Advertising.—The statistics on advertising expenditures are compiled primarily by private organizations. McCann-Erickson, Inc., which compiles certain of the data shown, defines national advertising as the advertising done for companies whose products are distributed nationally, and for which national media rates are paid; and local advertising as the advertising done for companies which market their products locally and which may pay special "local" media rates. Monthly figures are published regularly in *Advertising Age* and in the *Survey of Current Business*. Total corporate expenditures for advertising, by industry, appear in *Statistics of Income*, cited above.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970*. See preface.

No. 1354. National Income Originating in Domestic Trade and Service Industries: 1950 to 1974

[**In billions of dollars.** Prior to 1960, excludes Alaska and Hawaii. Data represent net value added at factor costs. See *Historical Statistics, Colonial Times to 1970*, series F 231 and F 235, for single-year data prior to minor revisions issued in 1976]

Section 30

Foreign Commerce and Aid

This section presents data on the flow of goods, services, and capital between the United States and other countries; changes in official gold reserves of the United States; international investments; foreign assistance programs; and import duties.

The Bureau of Economic Analysis publishes current figures on U.S. international transactions and international investment position in its monthly *Survey of Current Business*, and on total foreign aid by the Federal Government in its periodic *Foreign Grants and Credits by the United States Government*. Figures for earlier periods are presented in *Balance of Payments—Statistical Supplement*, 1963 revised edition, and in the June issues of the *Survey of Current Business*. Statistics for the foreign aid programs are presented by the Agency for International Development in its annual *Operations Report* and its annual *U.S. Overseas Loans and Grants, and Assistance from International Organizations;* and by the Department of Agriculture in its *Foreign Agricultural Trade of the United States*.

The principal sources of import and export data are publications of the Bureau of the Census. Current data are presented monthly in Report FT 135, *U.S. General Imports, Schedule A Commodity by Country;* Report FT 410, *U.S. Exports, Schedule B Commodity by Country;* and Report FT 990, *Highlights of U.S. Export and Import Trade*. Historical data appear in *Foreign Commerce and Navigation of the United States*, issued annually through 1946 and resumed in 1965 with a volume covering the years 1946 to 1963, followed by volumes for 1964 and 1965. For a complete list of the Bureau's monthly and annual reports in this field, consult the *Bureau of the Census Catalog* and the *Guide to Foreign Trade Statistics* (issued for most years since 1967). In addition, the Bureau of International Economic Policy and Research and the Bureau of Economic Analysis present summary and selected commodity and country data for U.S. foreign trade in the *Overseas Business Reports* and the *Survey of Current Business*, respectively. The Treasury Department's *Annual Report of the Secretary* contains information on import duties.

International accounts.—The international transactions table (No. 1391) shows, for given time periods, the transfer of goods, services, grants, and financial assets and liabilities between the United States and the rest of the world.

The international investment position table (No. 1393) presents for specific dates the value of U.S. investments abroad and of foreign investments in the United States. The movement of foreign and U.S. capital as presented in the balance of payments is not the only factor affecting the total value of foreign investments. Among the other factors are: Changes in the valuation of assets or liabilities, including securities; defaults; expropriations; write-offs; and reinvested earnings of subsidiaries operating abroad and of foreign subsidiaries operating in the United States.

Foreign aid.—Foreign assistance is divided into three major categories—grants (military supplies and services, and other grants), credits, and other assistance (through net accumulation of foreign currency claims from the sale of agricultural commodities). The U.S. Government's capital investments in the international financial institutions constitute an additional measure taken by the Government to promote foreign economic recovery and development.

Grants are transfers for which no payment is expected (other than a limited percentage of the foreign currency "counterpart" funds generated by the grant), or which at most involve an obligation on the part of the receiver to extend aid to the United States or other countries to achieve a common objective. *Credits* are loan disbursements or transfers under other agreements which give rise to specific obligations to repay, over a period of years, usually with interest. In some instances, assistance

has been given with the understanding that a decision as to repayment will be made at a later date; such assistance is included in grants. At such time as an agreement is reached for repayment over a period of years, a credit is established. Such credits cannot, as a rule, be deducted from specific grants recorded in previous periods; an adjustment for grants converted into credits is made at the time of agreement. All known returns to the U.S. Government stemming from grants and credits (reverse grants, returns of grants, and payments of principal) are taken into account in net grants and net credits, but no allowance is made for interest or commissions. *Other assistance* represents the transfer of U.S. farm products in exchange for foreign currencies (plus, since enactment of Public Law 87–128, currency claims from principal and interest collected on credits extended under the farm products program), *less* the Government's disbursements of the currencies as grants, credits, or for purchases. The net acquisition of currencies represents net transfers of resources to foreign countries under the agricultural programs, in addition to those classified as grants or credits.

Figures as published in *Foreign Grants and Credits by the United States Government* are not identical with figures shown for Government unilateral transfers and capital in the balance of payments, mainly because of differences in treatment of particular items by the two sets of accounts. Such items include: Contributions to the multilateral construction program of the North Atlantic Treaty Organization; Government investments in certain productive enterprises abroad; Government receipts on funded claims; and net changes in foreign currency holdings resulting from transactions other than those under the farm products program, such as by collection of principal and interest and by purchase for dollars. Some transactions treated as military in *Foreign Grants and Credits* data (such as funds made available under Public Law 93–199 to release Israel from its contractual liability to pay for defense articles and services purchased through military sales contracts), are not included in military unilateral transfers, but in other unilateral transfers, in the balance of payments accounts.

The basic instrument for extending military aid to friendly nations has been the Mutual Defense Assistance Program authorized by the Congress in 1949. Prior to 1952, economic and technical aid was authorized in the Foreign Assistance Act of 1948, the 1950 Act for International Development, and other legislation which set up programs for specific countries. In 1952, these economic, technical, and military aid programs were combined under the Mutual Security Act, which in turn was followed by the Foreign Assistance Act passed in 1961. Appropriations to provide military assistance to certain countries in Southeast Asia were made in the Department of Defense Appropriation Act (rather than the Foreign Assistance Appropriation Act) beginning in 1966 and in other legislation concerning programs for specific countries (such as Israel). Figures on activity under the Foreign Assistance Act as reported in *Foreign Grants and Credits* differ from data published by the Agency for International Development or its immediate predecessors due largely to differences in reporting, timing, and treatment of particular items.

Exports.—Export data are compiled by the Bureau of the Census primarily from Shipper's Export Declarations which are required to be filed with customs officials for shipments leaving the United States. Export data include shipments made after World War II under the Department of the Army Civilian Supply Program for 1948 and subsequent years and, in addition, U.S. exports under mutual security programs. They exclude shipments to U.S. Armed Forces for their own use.

The value reported in the export statistics is generally equivalent to a free alongside ship (f.a.s.) value at the U.S. port of export, based on the transaction price, including inland freight, insurance, and other charges incurred in placing the merchandise alongside the carrier at the U.S. port of exportation. This value, as defined, should exclude transportation and other costs beyond the U.S. port of exportation. The country of destination is defined as the country of ultimate destination or country where the merchandise is to be consumed, further processed, or manufactured, as known to the shipper at the time of exportation. In the event the shipper does not

have definite information as to the country of ultimate destination, the shipment is credited (for statistical purposes) to the last country to which the shipper knows the merchandise will be shipped in the same form as exported.

Certain export commodity classifications were grouped for security reasons into special categories beginning with May 1949, with periodic amendments to include additional commodities or to remove commodities from the special category list. With the adoption of new security regulations, effective July 1950, publication of the country of destination and customs district detail for special category commodities and groups was discontinued. Data for such commodities are included in all total export statistics and, beginning 1973, in all country, continent, and area totals shown here.

Through the years and continuing to date, the export statistics include estimated data for certain low-valued shipments, based upon selected samples of such shipments. In general, shipments valued $100–$499 were estimated for July 1953 through September 1969. For Canada, the upper value limit of the sampled shipments was increased from $499 to $1,999, effective January 1963. Effective October 1969, data are estimated for shipments valued $251–$1,999 to Canada and $251–$499 to other countries, except for January–August 1970 when the data were fully compiled. The statistics also include estimates for shipments valued under $100 prior to October 1969 and shipments valued under $251 effective October 1969, not classified by commodity. The over-$251 sampled shipments represent about 3 percent of the total value of exports, and the under-$251 shipments about 1.5 percent.

Imports.—Import data are compiled by the Bureau of the Census from import entries (various customs forms) which are required to be filed with customs officials. Effective January 1974, import values published by the Bureau of the Census are presented on three bases: The transaction values f.a.s. (free alongside ship) at the foreign port of export, the c.i.f. (cost, insurance, and freight), and the previously reported customs import value. The customs import value is the value of imports as appraised by the U.S. Customs Service in accordance with the legal requirements of Sections 402 and 402a of the Tariff Act of 1930, as amended. It may be based on the foreign market value, export value, constructed value, American selling price, etc. It generally represents a value in the foreign country, and therefore excludes U.S. import duties, freight, insurance, and other charges incurred in bringing the merchandise to the United States. This valuation is primarily used for collection of import duties and frequently does not reflect the actual transaction value. The country of origin is defined as the country where the merchandise was grown, mined, or manufactured. If the country of origin is unknown, the country of shipment is reported.

Imports are classified either as "General Imports" or "Imports for Consumption." General imports are a combination of entries for immediate consumption and entries into customs bonded warehouses, and thus generally reflect total arrivals of merchandise. Imports for consumption are a combination of entries for immediate consumption and withdrawals from warehouses for consumption, and thus generally reflect the total of the commodities entered into U.S. consumption channels.

The import statistics include estimated data for certain low-valued shipments. From July 1953 through June 1965, data for informal entries (generally containing items valued under $251) and various types of formal entries valued under $100, in general, were estimated, while data for formal and informal entries valued under $251 have been estimated since July 1965. The estimates, although not compiled in terms of individual commodities, are included in country and continent figures and in total import figures. The total value of the estimated low-valued shipments generally amounts to about 1 percent of the monthly or annual import total.

Area coverage.—Except as noted, the geographic area covered by the export and import trade statistics is the United States customs area, which includes the 50 States, the District of Columbia, and Puerto Rico.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See preface.

Balance on current account	1,732	4,251	−356	−3,957	−9,802	22	−3,598	11,650

− Represents zero. [1] Excludes transfers of goods and services under U.S. military grant programs. [2] Excludes exports of goods under U.S. military agency sales contracts identified in Bureau of the Census export documents, excludes imports of goods under direct defense expenditures identified in Census import documents, and reflects various other adjustments (for valuation, coverage and, timing) of census statistics to a balance of payments basis. [3] Consists of interest, dividends, and branch earnings. [4] Excludes reinvested earnings of foreign incorporated affiliates of U.S. firms or of U.S. incorporated affiliates of foreign firms. [5] Includes sales of foreign obligations to foreigners.

– Represents zero. [1] International Monetary Fund (IMF). [2] Excludes holdings of dollars by IMF derived from payments of U.S. subscription and from exchange transactions and other transactions of the IMF. (Liabilities representing "gold investment" of IMF included until Feb. 1972, when investment was terminated.) Also, excludes holdings of U.S. Treasury letters of credit and nonnegotiable, non-interest-bearing special U.S. notes by other international and regional organizations. Excludes Bank for International Settlements and European Fund; see footnote 3. [3] Represents liabilities to foreign central banks, foreign central governments and their agencies, Bank for International Settlements, and European Fund, through Dec. 1972.

No. 1400. U.S. Government Foreign Grants and Credits: 1945 to 1975—Con.

[In millions of dollars. See headnote, p. 831]

PROGRAM	Post World War II period [1]	July 1945–Dec. 1955	1956–1965	1966–1970	1971	1972	1973	1974	1975 (prel.)
Other assistance (through net accumulation of foreign currency claims) [11]	2,052	541	2,802	−564	−246	−213	−49	−247	29
Developed countries [7]	317	190	330	−83	−23	−30	−17	−21	−28
Developing countries [7]	1,736	351	2,472	−481	−224	−183	−32	−226	57
Currency claims acquired	19,198	813	11,498	3,440	339	345	361	2,214	188
Sales of farm products	14,996	813	11,170	2,763	164	75	5	1	5
Second-stage operations [12]	4,202	–	329	678	175	270	356	2,213	183
Less: Currencies disbursed	17,146	272	8,696	4,004	585	558	410	2,461	159
Economic grants and credits to purchasing country	13,282	182	6,863	2,999	375	317	207	2,319	21
Other uses	3,863	90	1,833	1,005	211	241	203	143	138

– Represents zero. Z Less than $500,000. [1] July 1, 1945, through Dec. 31, 1975. All lend-lease and conversions of prior grants to credits are from V–J Day (Sept. 2, 1945). [2] For details, see table 1401.
[3] Foreign Assistance Act of 1961 (P.L. 87-195), as amended. Also includes predecessor and related programs.
[4] Includes military assistance under Dept. of Defense Appropriation Act, 1966 (P.L. 89-304) and later acts.
[5] Represents funds made available under Public Law 93-199 and subsequent legislation to release Israel from its contractual liability to pay for defense articles and services purchased under other legislation. [6] Net new grants not adjusted for settlements, postwar release and other grants under agreements, and net new credits exclude prior grants converted into credits, which were as follows: July 1945–December 1955, $2,198 million; 1956–66, $491 million; 1972, $994 million. Repayments on these settlements are included in net new credits.
[7] Developed countries include Australia, Canada, Japan, New Zealand, Republic of South Africa, all countries listed under "Western Europe" in table 1401, except Portugal, Spain, Yugoslavia, and Malta and all countries listed under "Eastern Europe" in table 1401. Developing countries include all other countries listed in table 1401.
[8] Agricultural Trade Development and Assistance Act. [9] Outstanding credits on Dec. 31, 1975, totaled $35,589 million representing net credits extended since organization of Export-Import Bank, Feb. 12, 1934, less chargeoffs, and net adjustments due to exchange rates ($1,423 million), and excluding World War I debts. The amount repayable in dollars at U.S. Government option was $32,599 million; the remainder was repayable in foreign currencies, commodities, or services, at the option of the borrowers.
[10] Commodity Credit Corporation Charter Act.
[11] Equivalent value of currencies still available to be used, including some funds advanced from foreign governments and after loss by exchange rate fluctuations ($1,352 million), was $700 million on Dec. 31, 1975.
[12] Includes foreign currencies acquired from triangular trade operations and principal and interest collections on credits, originally extended under P.L. 83-480, which—since enactment of P.L. 87-128—are available for the same purposes as P.L. 83-480 currencies.

No. 1402. Foreign Economic and Military Aid Programs: 1946 to 1975

[**In millions of dollars.** For years ending June 30. The figures for economic aid shown in this table represent total U.S. economic aid—not just the aid under the Foreign Assistance Act. Major components in recent years include the Agency for International Development, Food for Peace, the Peace Corps, and paid-in subscriptions to international financial institutions, such as IBRD, and IDB. The cumulative totals for 1946–1975 are true totals net of deobligation; annual figures however, are gross unadjusted program figures. The military aid data include Military Assistance Program (MAP) grants, foreign military credit sales, service-funded programs, and excess defense articles. More detailed data and a more detailed description of the data, both economic and military, are contained in the source documents]

YEAR	Total economic and military aid	ECONOMIC AID			MILITARY AID		
		Total	Loans	Grants	Total	Loans	Grants

No. 1404. Foreign Aid—Commitments for Economic Assistance Under the Foreign Assistance and Predecessor Acts: 1948 to 1975

[**In millions of dollars.** For periods ending June 30. Falls under the economic portion of the Foreign Assistance Act. The economic aid data cover commitments for economic and technical assistance by the Agency for International Development and predecessor agencies. The 1948–1975 cumulative totals are on a *net* basis, representing total new obligations entered into during the entire period, adjusted for any deobligations. Data for the period 1948–1952 also are net; but data for the two periods 1953–1961 (beginning with 1955) and 1962–1975, are on a gross basis, i.e., representing total new obligations entered into, not adjusted for deobligations of prior years' funds]

Region and country	Net cumulative total, 1948–1975		Period

No. 1405. Foreign Economic and Military Aid Programs, by Selected Country: 1974 and 1975

[**In millions of dollars.** For years ending June 30. Annual figures represent gross unadjusted program figures. Economic aid figures represent total U.S. economic aid. Major components of economic aid include aid under the Foreign Assistance Act, the Agency for International Development, Food for Peace, the Peace Corps, and paid-in-subscriptions to international financial institutions, such as IBRD and IDB. The military aid data include Military Assistance Program (MAP) grants, foreign military credit sales, service-funded programs, and excess defense articles]

Special category [8]	5	(X)	(X)	–	–	–	(X)	(X)	(X)	(X)	(X)	(X)

– Represents zero. X Not applicable. Z Less than $500,000.

[1] For 1960, reflects declassification of Special Category commodities as authorized January 5, 1968; area and country totals reflect relaxation of security restrictions as authorized July 17, 1969.

[2] Includes estimates for low-valued shipments from countries which could not be identified because of illegible reporting on import entries.

[3] Includes unidentified countries, not shown separately.

[4] Developed countries include Canada, Western Europe, Japan, Australia, New Zealand, and Republic of South Africa; developing countries include rest of the world excluding Communist areas in Europe and Asia. Assignment of countries generally follows that made by United Nations.

[5] As of January 1, 1973, United Kingdom, Denmark, and Ireland became members of EEC. For consistency, data for all years are shown on same basis.

[6] Finland included in other Western Europe for 1960, and in OECD thereafter.

[7] Excludes special category exports, if any, for 1960; thereafter includes special category exports, if any.

[8] Prior to 1973, security regulations required that information on exports of Special Category commodities be excluded from the totals for certain countries. See text, p. 823.

No. 1414. Exports and Imports of Merchandise, by Continent, Area, and Country: 1960 to 1975—Continued

[In millions of dollars. Beginning 1965, includes uranium, thorium, and related products; beginning 1970, includes silver ore and bullion. See *Historical Statistics, Colonial Times to 1970*, series U 317-352, for selected countries]

[1] For 1960, reflects declassification of Special Category commodities as authorized Jan. 5, 1968; area and country totals reflect relaxation of security restrictions as authorized July 17, 1969.

[6] Finland included in Other Western Europe for 1960 and in OECD thereafter.

[7] Excludes Special Category exports, if any, for 1960; thereafter, includes Special Category exports, if any.

[8] Prior to 1973, security regulations required that information on exports of Special Category commodities be excluded from the totals for certain countries. See text, p. 823.

[9] Includes Special Category exports, if any, for 1960; excludes Special Category exports, if any, thereafter, except for 1973.

[10] Excludes Special Category exports, if any, for all years except 1973.

No. 1415. Domestic Exports, by Selected Commodity Groups: 1960 to 1975

[In millions of dollars, except as indicated. Totals and subtotals include data for commodities not shown separately. Total exports of silver ore and bullion included through 1965, domestic merchandise shipments thereafter. Beginning 1965, data not comparable with 1960 due to change in U.S. export classification effective January 1, 1965; however, to achieve best comparability possible with 1965, 1960 data have been retabulated on the basis of ma jor content of commodity items. "N.e.c." means not elsewhere classified. See also *Historical Statistics, Colonial Times to 1970*, series U 274-294]

Section 31

Outlying Areas Under the Jurisdiction of the United States

This section presents summary statistics on the industrial, social, and agricultural organization of the Commonwealth of Puerto Rico, and similar data for the principal possessions of the United States (Virgin Islands, Guam, and American Samoa), the Canal Zone, and, wherever possible, the Trust Territory of the Pacific Islands.

Primary sources of these data are the decennial censuses of population, housing, and agriculture, and the quinquennial censuses of business and manufactures conducted by the Bureau of the Census; the annual *Vital Statistics of the United States*, issued by the National Center for Health Statistics; the biennial *Statistics of State School Systems* of the National Center for Education Statistics; and the *Minerals Yearbook* of the Bureau of Mines.

Jurisdiction.—The United States gained jurisdiction over these areas as follows:

The islands of Puerto Rico and Guam, surrendered by Spain to the United States in October 1898, were ceded to the United States by the Treaty of Paris, ratified in 1899. Puerto Rico became a commonwealth on July 25, 1952.

The Virgin Islands were purchased by the United States from Denmark in 1917.

American Samoa was acquired by the United States in accordance with a convention among the United States, Great Britain, and Germany, ratified in February 1900.

The use, occupation, and control of the Canal Zone were granted to the United States under the terms of a treaty with the Republic of Panama, ratified in 1904.

The Trust Territory of the Pacific Islands is comprised of 2,141 atolls and islands, about 96 of which are inhabited. This territory, formerly under Japanese mandate, was placed under the United Nations trusteeship system by an agreement approved by the Security Council and the United States in 1947.

For a brief summary of the territorial development of the United States, see tables 4 and 301.

Censuses.—Because of differences in the population and housing characteristics and the varieties of agricultural products among the outlying areas, the presentation of census data is not uniform for all areas. The 1960 Census of Population covered all of the places listed above except the Trust Territory of the Pacific Islands (the census of which was conducted in April 1958 by the Office of the High Commissioner), whereas the 1960 Census of Housing covered only Puerto Rico, Guam, and the Virgin Islands. The 1970 Census of Population and Housing covered all six areas. The 1959 and 1969 censuses of agriculture covered Puerto Rico, American Samoa, Guam, and the Virgin Islands; the 1964 census covered the same areas except American Samoa. Beginning in 1967, Congress authorized the economic censuses, covering business, manufactures, and, for Guam and the Virgin Islands, mineral industries, to be taken at 5-year intervals, for years ending in 2 and 7. Prior economic censuses were conducted in Puerto Rico for 1954, 1958, and 1963, and in Guam and the Virgin Islands for 1958 and 1963. In 1972, the census of construction industries was added for the first time for these three areas.

For definition and explanation of terms used, see section 1, Population; section 23, Agriculture; section 27, Construction and Housing; section 28, Manufactures; and section 29, Domestic Trade and Services.

Information in other sections.—In addition to the specialized statistics presented in this section, other data are included as integral parts of many tables showing distribution by States in various sections of the *Abstract*.

Section 32

Comparative International Statistics

This section presents summary statistics on the industrial, social, and agricultural developments of the various nations and on finances of international agencies.

The principal source for the data presented in this section is the United Nations' *Statistical Yearbook*. Statistics of the individual nations may be found primarily in official publications, generally in the form of yearbooks, issued by most of the nations at various intervals in their own national languages, expressed in their own or customary units of measure. For handier reference, especially for international comparisons, the Statistical Office of the United Nations compiles and issues a number of international summary publications, generally in English and French. Among these are the *Statistical Yearbook;* the *Demographic Yearbook;* the *Yearbook of International Trade Statistics;* the *Yearbook of National Accounts Statistics:* Vol. III, *International Tables; Population and Vital Statistics Reports* (quarterly); the *Monthly Bulletin of Statistics; World Energy Supplies;* and *The Growth of World Industry:* Vol. I, *General Industrial Statistics,* and Vol. II, *Commodity Production Data.*

Other sources for foreign agricultural, labor, and education statistics are publications of specialized agencies of the United Nations, such as the *Production Yearbook* issued by the Food and Agriculture Organization, the *Yearbook of Labour Statistics* issued by the International Labour Office, and the *Statistical Yearbook* issued by the Educational, Scientific, and Cultural Organization. The Bureau of the Census, in *Country Demographic Profiles,* series ISP–30, presents detailed data on individual countries for both a recent census year and the current period; and in *World Population: 1975,* presents estimates of basic demographic measures for the countries and regions of the world. The *International Population Statistics Reports,* series P–90 and P–91, issued by the Bureau of Economic Analysis, also present population figures for many foreign countries.

Statistical coverage and country names.—Problems of space and availability of data limit the number of countries and the extent of statistical coverage shown here. The list of countries included is based almost entirely on a U.S. Department of State list of sovereign nations, dependencies, and areas of special sovereignty. This list can be found in *Status of the World's Nations,* published annually by the U.S. Department of State. Country names are shown here as specified in this publication.

In the few cases where a lack of comparability exists between State Department and United Nations' terminology, the State Department's preferences are used.

Economic associations.—The Organisation for European Economic Co-operation (OEEC), a regional grouping of Western European countries established in 1948 for the purpose of harmonizing national economic policies and conditions, was succeeded on September 30, 1961, by the Organisation for Economic Co-operation and Development (OECD). The member nations of the OECD are the United States, Austria, Belgium, Denmark, Finland, France, Germany (Federal Republic), Greece, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, the United Kingdom, Canada, Japan, and Australia, plus Yugoslavia and New Zealand in special status categories.

The European Economic Communities (EEC), or "Common Market," consists of Belgium, France, Germany (Federal Republic), Italy, Luxembourg, the Netherlands, and, as of January 1, 1973, Denmark, Ireland, and the United Kingdom. The EEC was formed in 1958 as the European Economic Community for the purpose of promoting European economic integration. It is based on agreement among the member

nations to stimulate their economic growth, primarily through the gradual elimination of trade barriers among themselves, the establishment of a common external tariff, the coordination of monetary, fiscal, and agricultural policies, and the removal of restrictions on movement of services, labor, capital, and business enterprises within the community.

The European Free Trade Association (EFTA), established in late 1959, consists of Austria, Finland, Iceland, Norway, Portugal, Sweden, Switzerland and, prior to 1973, Denmark and the United Kingdom. It represents an agreement among the member nations to promote free trade and economic cooperation in Europe through gradual elimination of tariffs and quotas among themselves but without establishment of a common external tariff.

Quality and comparability of the data.—The quality and comparability of the data presented here are affected by a number of factors:

(1) The year for which data are presented may not be the same for all subjects for a particular country, or for a given subject for different countries, though the data shown are the most recent available. All such variations have been noted. The data shown are for calendar years except as otherwise stated in headnotes or footnotes.

(2) The bases, methods of estimating, methods of data collection, extent of coverage, precision of definition, scope of territory, and margins of error may vary for different items within a particular country, and for like items for different countries. Footnotes and headnotes to the tables give a few of the major time-period and coverage qualifications attached to the figures; considerably more detail is presented in the source publications. Many of the measures shown are, at best, merely rough indicators of magnitude.

(3) Figures shown in this section for the United States may not always agree with figures shown in the preceding sections. Disagreements may be attributable to the use of differing original sources, a difference in the definition of geographic limits (the 50 States, conterminous United States only, or the United States including certain outlying areas and possessions), or to possible adjustments made in the United States figures by the United Nations or other sources in order to make them more comparable with figures from other countries.

Conversion factors.—To facilitate comparison in terms of familiar units, some items shown in metric units in the source have been converted to U.S. equivalents by means of the abbreviated conversion factors shown below. Additional conversion factors appear on pages x and xi.

CONVERSION FACTORS

Metric units	*U.S. equivalents*
1 square kilometer	0.3861 sq. mile
1 metric ton (1,000 kilograms)	1.1023 short tons
1 hectolitre	26.4172 U.S. gallons
1 cubic meter	35.3147 cubic feet

No. 1445. Population and Area, by Country

[Population data generally are present-in-area estimates for the present territory. For some countries, however, estimates include national armed forces and diplomats stationed outside the country and exclude alien armed forces, foreign diplomats, and enemy prisoners of war stationed within the country. See text, p. 864, for general comments concerning the data. For details of methodology, coverage, and reliability, see source]

No. 1447. Birth, Fertility, and Death Rates, and Expectation of Life, by Country

[**Crude birth rate:** Number of live births per 1,000 persons. **Fertility rate:** Births per 1,000 female population 10-49 years old. **Crude death rate:** Number of deaths per 1,000 persons; excludes stillbirths. **Infant death rate:** Deaths of infants under 1 year of age per 1,000 live births; excludes stillbirths. Rates based on complete or virtually complete registration data. For details of methodology, coverage, and quality, see United Nations *Demographic Yearbook*]

Country	Rate per 1,000 population						Expectation of life at birth (years)

No. 1448. Housing and Health, by Country

[**Housing:** Data generally intended to refer to conventional (permanent) dwellings only. For some countries, however, data include nonpermanent structures, improvised shelters, and mobile trailers, or, as noted, refer to housing units and to household accommodation (the space *occupied by a private household*) rather than to dwellings. **Health:** Hospital data refer to *hospitals* and other medical establishments with beds but exclude old people's homes and establishments for custodial or preventive care only; personnel data refer to persons fully qualified from medical or dental schools and working within the country. See text, p. 864, for general comments concerning the data. For additional qualifications of data for individual countries, see *source*]

No. 1448. Housing and Health, by Country—Continued

[**Housing:** Data generally intended to refer to conventional (permanent) dwellings only. For some countries, however, data include nonpermanent structures, improvised shelters, and mobile trailers, or, as noted, refer to housing units and to household accommodation (the space occupied by a private household) rather than to dwellings. **Health:** Hospital data refer to hospitals and other medical establishments with beds but exclude old people's homes and establishments for custodial or preventive care only; personnel data refer to persons fully qualified from medical or dental schools and working within the country. See text, p. 864, for general comments concerning the data. For additional qualifications of data for individual countries, see source]

[1] Schools providing basic training and education to children within compulsory or customary ages of full-time education; length of this education may vary from 4 to 9 years from country to country. Excludes nursery school and kindergarten. [2] Middle, secondary, or high schools providing general instruction more advanced than primary level. [3] Population age 14 and over. [4] Ministry of Education expenditure only. [5] Includes evening and correspondence courses. [6] Population age 9 and over. [7] Current expenditure only. [8] Population all ages. [9] Includes special education. [10] French language schools only. [11] Central or Federal government expenditure only. [12] For 1972. [13] Excludes expenditures of municipalities. [14] Percent of net material product. [15] Percent of gross domestic product at market prices. [16] Population age 10 and over in 2,131 village tracts. [17] For 1958. [18] Public education only. [19] Excludes foreign aid. [20] For 1971. [21] Percent of gross material product. [22] Excludes data for Turkish education. [23] Expenditure by Office of Greek Education only. [24] Data for 2d level are included in 1st level. [25] Includes evening schools. [26] For 1970. [27] Population age 10 and over. [28] Illiteracy defined as never attended school. [29] Includes pre-primary education. [30] Includes private expenditure relating to private education. [31] School data for East Bank only. [32] Includes persons with unknown literacy status. [33] Excludes expenditures for universities. [34] African population. [35] Excludes nomad population. Illiterate population excludes persons who can only read. [36] Population age 13 and over. [37] Population age 7 and over. [38] Pakistani nationals only. [39] Excludes Indian jungle population. [40] Population age 17 and over. [41] Excludes expenditures for State universities and colleges. [42] Population ages 9 through 49. [43] Education and expenditure data cover England and Wales only.

No. 1451. Average Annual Rates of Change of Gross Domestic Product, by Kind of Economic Activity

[In percent. Based on gross domestic product at constant prices. Methods used to obtain estimates of gross domestic product at constant prices and the years to which these prices relate vary widely among countries. *In general*, "Agriculture" includes forestry, hunting, and fishing; "Industrial activity" covers mining, manufacturing, electricity, gas, and water; and "Other" comprises financing, insurance, real estate, and business services; community, social, and personal services; and public administration and defense. Unless otherwise stated, data are calculated on the former System of National Accounts (see *Yearbook of National Accounts Statistics*, 1960). Minus sign (−) denotes decrease]

[1] Refers to calendar year in which all or most of the harvest took place, generally 1974. All commodities index relates to food, fibers, tobacco, industrial oilseeds, and rubber; food index relates to crops and livestock products for human consumption. Deduction made for feed and seed used in production process. 1961–65=100.
[2] Components of these indexes vary considerably among countries; for details, see source. [3] *Refers, in general,* to salaried employees and wage earners in manufacturing. Includes workers on holiday or vacation; excludes employers, self-employed, and workers on strike, on temporary military leave, or temporarily laid off.
[4] *In many instances,* represents index only for principal city (or cities) of particular country.
[5] *General wholesale price index numbers usually weighted by gross value of sales on wholesale markets.*
[6] Year beginning July 1. [7] Building materials. [8] Year ending June 30. [9] Includes mining and quarrying.
[10] Data for 1 month. [11] For 1972. [12] Wage earners only. [13] For 1973. [14] For 1970.
[15] 1965=100. [16] 1971=100. [17] Averages of less than 12 months.
[18] July 1969–June 1970=100. [19] Area of San Salvador. [20] Industrial products. [21] 1972=100.
[22] Year beginning March 21. [23] Includes working proprietors. [24] Excludes Okinawa.
[25] May 1972–April 1973=100. [26] Year beginning April 1. [27] For 1971.
[28] Includes sea fishing. [29] For 1969. [30] Basic materials.
[31] Establishments with 10 or more workers.

NA Not available. [1] Generally, data are for a specific date in the 1960's and 1970's. [2] Comprises utilities generating primarily for public use. Relates to production at generating centers, including station use and transmission losses. [3] Based on apparent consumption of coal, lignite, petroleum products, natural gas, and hydro and nuclear electricity. [4] Production of manufactured goods, including assembly of component parts and, except in the case of consumer goods, repair services. Excludes gas manufacture and electricity. [5] Coverage varies widely. For most countries, refers to single plants or factories with more than a specified number of employees, as noted. For additional or alternative qualifications, see source.

[6] Comprises average number of employees, working proprietors, and unpaid family workers, except as noted.

[7] Covers merchandise including silver (except current coin); excludes gold and issued paper currency. Imports generally valued c.i.f. (cost, insurance, and freight); exports, f.o.b. (free on board). Generally includes government trade (including foreign aid, war reparations, and military goods), trade of foreign concessionaires, and postal trade. See source for "general trade" or "special trade" distinctions. Roughly half the countries shown fall into each category, thus affecting comparability.

[8] Excludes trade of People's Republic of China, Mongolia, Democratic People's Republic of Korea, and Democratic People's Republic of Vietnam with one another.

[9] Includes trade between the Federal Republic of Germany and German Democratic Republic.

[10] Excludes Armed Forces abroad. [11] Net production (excluding station use).

[12] Establishments with 1 or more employees. [13] For 1972.

[14] Paid employees, excluding working proprietors. [15] For 1973. [16] Includes foreign aid.

[17] Year ending June 30. [18] F.o.b. [19] Establishments with 20 or more employees.

[20] Luxembourg included with Belg um. [21] All enterprises in socialist sector except publishing.

[22] Excludes armed services. [23] Establishments with 50 or more engaged.

[24] Source: U.S. Bureau of the Census, International Statistical Programs Center.

[25] Establishments with 10 or more engaged. [26] Establishments with 6 or more employees.

[27] Establishments with 5 or more employees. [28] Establishments with 7 or more engaged.

[29] For 1970. [30] Private establishments with 10 or more engaged and all public establishments.

[31] Includes trade with Syrian Arab Republic. [32] Year ending Sept. 10.

[33] Establishments with 10 or more employees.

[34] Establishments with 5 or more engaged, or equivalent in installed power equipment.

[35] Total mining and manufacturing. [36] Total mining, electricity, gas, and water.

[37] Includes trade with Federal Republic of Germany. [38] Includes trade with German Democratic Republic.

[39] Establishments with 30 or more engaged. [40] Includes Armed Forces abroad.

[41] Establishments with 5 or more engaged. [42] Registered establishments.

[43] For 1971. [44] Year beginning April 1. [45] Year ending March 31.

[46] Establishments with 10 or more persons engaged using power or with 20 or more persons engaged not using power.

[47] Public utility plants. [48] Includes peat. [49] Establishments with 3 or more engaged.

[50] Enterprises with 20 or more engaged. [51] Includes trade for Okinawa. [52] Man-years.

[53] Includes small net purchases from private plants. [54] Establishments with 2 or more engaged.

[55] Excludes Bangladesh. [56] State enterprises under direction of central government.

[57] Walvis Bay included in Namibia. [58] Includes data for Botswana, Lesotho, Namibia, and Swaziland.

[59] Year ending Sept. 30. [60] Establishments subject to labor laws.

[61] Includes trade with Egypt. [62] For England and Wales only.

– Represents zero. NA Not available. Z Less than 50,000. [1] Includes shale oil, but excludes natural gasoline. [2] Excludes lignite and brown coal, except as noted. [3] Total production of crude steel, both ingots and steel for castings. Excludes wrought (puddled) iron. [4] Data represent apparent consumption (i.e., production plus imports minus exports) and do not take into account changes in stocks. [5] Excludes steel for castings made in foundries operated by companies not producing ingots. [6] Year ending June 30. [7] Prior to 1972, Bangladesh included with Pakistan. [8] Luxembourg included with Belgium. [9] Excludes alloy steel. [10] Ingots only. [11] Includes lignite. [12] Includes brown coal. [13] Source: U.S. Bureau of the Census, International Statistical Programs Center. [14] For 1973. [15] For 1972. [16] Includes slurries. [17] Year beginning March 21. [18] Includes Okinawa. [19] Production in East Malaysia; Sarawak only. [20] Svalbard: Norwegian operated mines only. [21] 53 weeks.

NA Not available.

[1] Beef and veal (incl. buffalo meat), pork (incl. bacon and ham), and mutton and lamb (incl. goat meat). Except as noted, relates to commercial and farm slaughter and excludes lard, tallow, and edible offals.

[2] Beet and cane. Data generally in terms of raw sugar. [3] Excludes Alaska and Hawaii.

[4] Year beginning July. [5] Year ending June 30. [6] For meat, production from indigenous animals only, including, where applicable, meat equivalent of exported live animals. [7] Polarization or grade unknown. For Brazil, 1967 and 1970; for Uganda, 1967 and 1968. [8] FAO estimate. [9] Includes slaughter fat. [10] Includes edible offals. [11] Commercial production. [12] Crop year. For Thailand, prior to 1968 only. [13] Inspected production. [14] For 1973. [15] Year ending Sept. For Southern Rhodesia, 1967–1971, on farms and estates. [16] Prior to 1972, data for Bangladesh included with Pakistan. [17] Year beginning March 1.

NA Not available. Z Less than 50,000. * Except as indicated for world total and United States.

[1] Refers to production of milk (cow, sheep, goat, and buffalo) for consumption fresh or for conversion into butter, cheese, condensed milk, etc. Excludes milk sucked by, but includes milk fed to, young animals. Data include estimates of Food and Agriculture Organization.

[2] Covers malt liquors (beer, ale, stout, porter, etc.) of varying specific gravity of alcoholic strength. Excludes tax-free malt beverages of very low alcoholic content.

[3] Refers generally to iron content of marketable ores mined, including manganiferous iron ores but excluding pyrites. Some data are rough estimates obtained by applying a fixed percentage to figures for crude ore production.

[4] Covers, as far as possible, all hydraulic cements used for construction (portland, metallurgic, aluminous, natural, etc.).

[5] Covers both sea and inland fisheries, in terms of live weight. Includes shellfish; excludes whales, dolphins, etc.

[6] Excludes tire cord yarn, except as noted. [7] Refers to carded and combed (worsted) yarn.

[8] Covers production of non-cellulosic man-made continuous filaments, excluding spun fibers and textile glass continuous strands. These filaments are best known as nylon, terylene, orlon, and saran.

[9] In thousands of gallons. [10] Year ending June 30. [11] Excludes manganiferous iron ores containing 5 percent or more of manganese. [12] Excludes landings by foreign craft in domestic ports.

[13] Includes tire cord yarn. [14] For 1973. [15] Excludes liquid malt.

[16] Year beginning July 1. [17] Includes milk sucked by young animals. [18] For 1971.

[19] Includes landings by domestic craft in foreign ports and excludes landings by foreign craft in domestic ports.

[20] Production in Sao Paulo only. [21] Includes yarn of man-made staple. [22] For 1969.

[23] Includes both landings by domestic craft in foreign ports and by foreign craft in domestic ports. [24] Factory production only. [25] Government production only.

[26] Shipment from mines. [27] For 1972. [28] Includes landings by foreign craft in domestic ports.

[29] Data for Taiwan Province are included with China. [30] For 1970.

[31] Year ending Sept. 30. [32] Year ending Sept. 10. [33] Excludes yarn made from waste.

[34] Excludes both landings by domestic craft in foreign ports and by foreign craft in domestic ports.

[35] Year beginning March 21. [36] Excludes landings by domestic craft in foreign ports and includes landings by foreign craft in domestic ports. [37] Year beginning April 1. [38] Includes iron content of iron sand and pyrites. [39] Includes some carbonated drinks. [40] Year ending in May.

[41] For 1966. [42] For 1967. [43] Includes iron content of iron pyrites.

[44] Production for sale only. [45] Includes Walvis Bay.

[46] Includes Ceuta, Melilla, Balearic Islands, and Canary Islands. [47] For 1968.

NA Not available.

[1] As of June 30. Represents gross registered tons (see text, p. 612) for vessels of 100 gross tons and over. Excludes vessels without mechanical means of propulsion; includes sailing vessels with auxiliary power.

[2] In general, represents sum of net registered tonnages (see text, p. 612) of seagoing foreign and domestic merchant vessels (power and sailing) entered with cargo from a foreign port and refers to only one entrance for each foreign voyage. Except as noted, excludes vessels "in ballast," i.e., entering without unloading goods.

[3] Represents weight of all goods (including their packing) in external trade loaded to and unloaded from seagoing vessels of all flags at ports of country specified. For most countries, excludes bunkers, ships stores, ballast, and transshipment (goods transshipped from an importing vessel to an exporting vessel).

[4] Relates to domestic and international traffic on all railway lines within each country shown, excluding railways entirely within an urban unit and plantation, industrial mining, funicular and cable railways. In general, passenger miles include all passengers except military, government, and railway personnel when carried without revenue; ton-miles relate to freight net ton-miles and include all goods whether carried by fast or ordinary trains except service traffic, mail, baggage, and nonrevenue governmental stores.

[5] Covers both domestic and international scheduled services operated by companies registered in each country. Includes supplementary services occasioned by overflow traffic on regularly scheduled trips and preparatory flights for new scheduled services.

[6] Represents officially estimated number of vehicles in use. Includes passenger cars and commercial vehicles. For most countries shown, excludes 2- and 3-wheeled cycles and motorcycles, trams, trolley buses, ambulances, hearses, military vehicles, police and special purpose or government security vehicles, trailers, and farm tractors.

[7] Includes Great Lakes. [8] After time adjustment, loaded approximately same as unloaded. [9] Excludes People's Republic of China, U.S.S.R. (which became a member of ICAO on Nov. 14, 1970), and other nonmembers of International Civil Aviation Organization as of Dec. 31, 1970.

[10] Excludes People's Republic of China, Democratic Republic of Vietnam, and Democratic People's Republic of Korea.

[11] Includes Great Lakes international traffic. [12] For 1973.

[13] Includes vessels in ballast. [14] Year ending June 30. [15] All entrances counted.

[16] Includes service traffic. [17] Year beginning October 1.

[18] Includes Great Lakes and St. Lawrence international traffic. [19] For 1972.

[20] For 1971. [21] For 1970. [22] Source: U.S. Bureau of the Census, International Statistical Programs Center.

[23] Year beginning April 1. [24] Includes Faeroe Islands. [25] For 1969.

[26] For 1968. [27] Year beginning March 21. [28] Year ending March 31.

[29] Year beginning July 1. [30] Buses and trucks only. [31] Includes Namibia.

[32] Year ending September 30. [33] Excludes Northern Ireland.

– Represents zero. NA Not available. * Year ending March 31. [1] Comprises public and private telephones installed which can be connected to a central exchange. [2] Items mailed for distribution within national territories. Comprises letters, postcards, printed matter, merchandise samples, small packets, and phonopost packets. Includes mail carried without charge, but excludes ordinary packages, and insured letters and boxes. [3] Publications containing general news and appearing at least 4 times a week; may range in size from a single sheet to 50 or more pages. Circulation data include copies sold outside the country. [4] Data cover estimated number of receivers in use, except as noted, and apply to all types of receivers for radio broadcasts to the public, including loudspeakers connected to a radio "redistribution system" but excluding television sets.
[5] Estimated number of sets in use, except as noted. [6] Includes ordinary packages as well as insured letters and boxes. [7] For 1973. [8] Number of licenses issued. [9] For 146 dailies only. [10] For 1971.
[11] Year ending June 30. [12] Year beginning July 1. [13] For 1972. [14] For 1968. [15] For 9 dailies only.
[16] For 1970. [17] Year beginning April 1. [18] Source: U.S. Bureau of the Census, International Statistical Programs Center. [19] For 38 dailies only. [20] For 11 dailies only. [21] Domestic and foreign. [22] Includes Faeroe Islands and Greenland. [23] For 6 dailies only. [24] For 10 dailies only. [25] German language dailies only, but includes 807 regional editions. [26] For 8 dailies only. [27] For 20 dailies only. [28] Includes Okinawa.
[29] For 1969. [30] For 16 dailies only. [31] For 3 dailies only. [32] For 7 dailies only. [33] For 4 dailies only.
[34] Includes Namibia. [35] For 23 dailies only. [36] For 18 dailies only. [37] Includes non-daily newspapers.
[38] For 5 dailies only. [39] For 26 dailies only. [40] For 25 dailies only.

No. 1467. Military Expenditures, in Current and Constant (1973) Dollars: 1965 to 1974

[In millions of dollars, except per capita and percent, and as noted. See also table 517. Data for expenditures and for GNP were based on local currencies which were deflated to constant 1973 local currency values before conversion to U.S. dollar equivalents. In general the rates used for conversion are the trade conversion factors shown in the Dec. 1974 issue of *International Financial Statistics* (see *Abstract* table 1473). Data by country exclude countries with 1974 military expenditures less than 300 million dollars]

No. 1473. Foreign Exchange Rates, by Country: 1973, 1974, and 1975

[**National currency units per U.S. dollar.** As of December 31. Represents mid-point market quotations to extent available. For countries with fixed relationships to a third currency, represents exchange rates of the third currency times the fixed relationships. For currencies not quoted in exchange markets, represents par values, central rates, or official rates. For countries with multiple exchange rate systems, represents rate applicable to principal trade transactions]

APPENDIX I

Metropolitan Area Concepts and Components

Statistics for metropolitan areas shown in the *Statistical Abstract* represent areas officially designated by the U.S. Office of Management and Budget (OMB) as standard Metropolitan Statistical Areas (SMSA's). Definitions of the SMSA's in terms of their geographic components are presented in Office of Management and Budget, *Standard Metropolitan Statistical Areas,* 1975, Revised Edition. OMB issues amendments to update this publication when changes in SMSA definitions are made. See also U.S. National Bureau of Standards, *Metropolitan Statistical Areas,* Federal Information Processing Standards Publication (FIPS Pub. 8-4, June 30, 1974).

Recent previous editions (1967–1975) of the *Statistical Abstract* have included a section entitled "Metropolitan Area Statistics," which presented numerous items of statistical information for SMSA's. That section is omitted beginning with this edition. In its place, a much more comprehensive *State and Metropolitan Area Data Book* will be issued on a biennial basis; the first issue is scheduled for release in 1978.

The complete list of areas, their components, and population totals, which follows tables A, B, and C below (see p. 904) is based on the SMSA definitions as amended by OMB to March 31, 1976. On that date, there were 276 SMSA's (including 4 in Puerto Rico).

Standard definitions of metropolitan statistical areas were first issued by the then Bureau of the Budget (predecessor of OMB) in 1949, under the designation "Standard Metropolitan Areas"; the present designation was adopted in 1959. The general concept of a metropolitan area is one of an integrated economic and social unit with a large population nucleus.

The criteria for the establishment and definition of SMSA's have undergone several modifications since 1949. The current criteria were adopted in March 1976; they provide that each SMSA must include at least:

(a) One city with 50,000 or more inhabitants, or

(b) A city with at least 25,000 inhabitants, which, together with contiguous places (incorporated or unincorporated) having population densities of at least 1,000 persons per square mile, has a combined population of 50,000 and constitutes for general economic and social purposes a single community, provided that the county or counties in which the city and contiguous places are located has a total population of at least 75,000. (In New England, the cities and towns qualifying for inclusion in an SMSA must have a total population of at least 75,000.)

In addition to the central city or cities, the criteria provide that the SMSA include the county in which the central city is located, and adjacent counties that are determined to be metropolitan in character and economically and socially integrated with the county of the central city, according to specific rules. (In New England, as noted below, the units comprising the area are cities and towns rather than counties.) The largest city in each SMSA is designated a "central city"; in addition, there may be up to two additional central cities if certain criteria are met. With two exceptions (Nassau-Suffolk, N.Y. and Northeast Pennsylvania), the title of each SMSA includes the names of its central city or cities. An SMSA may include other cities of 50,000 or more besides its central cities, and may include territory in more than one State.

New England SMSA's and NECMA's. Because SMSA's in New England are defined in terms of cities and towns, rather than counties, some statistical data that are available only for counties cannot be compiled for individual New England SMSA's. Therefore, for New England areas data are shown for both New England County Metropolitan Areas (NECMA's) and SMSA's wherever possible. The NECMA's

provide a county version of the New England areas defined following criteria adopted by OMB in March 1976 which are identical to those used to define SMSA's in the other States. NECMA's do not replace New England SMSA's as the standard areas.

Standard Consolidated Statistical Areas.—Standard consolidated statistical areas (SCSA's), defined under criteria adopted by OMB in August 1975, include two or more contiguous SMSA's which meet certain criteria of size, urban character, integration, and contiguity of urbanized areas.

Effect of changes in SMSA definitions.—Changes in the definitions of SMSA's since 1949 have included the recognition of new areas as, for example, cities reached 50,000 population, and large counties (or towns in New England) were added to existing SMSA's. Also, several formerly separate SMSA's have been merged, and occasionally territory has been transferred from one SMSA to another or (in rare instances) from an SMSA to nonmetropolitan territory. Comparisons of SMSA figures over time may be affected in cases where the SMSA definitions were changed. To maintain comparability, data for an earlier period have been revised in this volume, where possible, to reflect the SMSA boundaries of the more recent period. However, this could not always be done. For data based on a sample survey, in particular, it is usually not possible to reflect changes in SMSA definitions that occured after the survey was made.

In the three tables that follow, data are given for SMSA's as defined for specified dates, thereby indicating the extent of change in population and land area resulting from revisions in definitions.

TABLE A. NUMBER, POPULATION, AND LAND AREA OF SMSA'S AS DEFINED AT SPECIFIED DATES: 1940 TO 1970

[The differences in population shown here for each census year (in the successive columns of the table) result entirely from net expansion of metropolitan territory through changes in the SMSA definitions. The differences in population shown for each SMSA definition (on the successive lines of the table) result entirely from population changes within that territory, unaffected by changes in SMSA definitions. The changes in 1970 land area result entirely from net expansion of SMSA territory. All data include Alaska and Hawaii and exclude Puerto Rico. Subtraction of any line of the table from the line below will show the net effect of change in population and land area undergone by the SMSA's as the result of changes in definitions between the specified dates. Such changes typically occurred throughout the period, not on any single date, and may have included subtractions from, as well as additions to, SMSA territory. The area data for the 1950 and 1960 census definitions of SMSA's differ from the data published in those censuses because they are based on a remeasurement of land areas made during the 1960's, and also reflect changes in inland water area occurring up to 1970]

SMSA DEFINITION AS OF—	Number of SMSA's	POPULATION (1,000)				Land area, 1970 (1,000 sq. mi.)
		1940	1950	1960	1970

1968 (Jan. 31) [6]	230	76,408	93,630	118,414	137,915	378
1970 census (Feb. 28, 1971)	243	77,155	94,579	[7] 119,593	[8] 139,419	[9] 388
1974 (Apr. 30) [10]	265	[11] 82,038	[12] 100,220	[13] 126,614	148,132	491
1976 (Mar. 31)	272	82,455	100,695	127,168	148,819	503

[1] Corresponds to total 1940 population for 1950 SMSA's published in 1950 census (69,279,675), with addition of Honolulu SMSA and corrected by subtracting population (3,194) of Colonial Heights town erroneously included in Richmond SMSA.

[2] Corresponds to total SMSA population for 1950 published in 1950 census (84,500,680) plus Honolulu SMSA.

[3] Corresponds to total 1940 population for 1960 SMSA's published in 1960 census (72,834,468), corrected by adding population (13,277) erroneously omitted from Stamford SMSA (remainder of Stamford town), and subtracting population (3,194) of Colonial Heights town erroneously included in Richmond SMSA.

[4] Corresponds to total SMSA population for 1960 published in 1960 census (112,885,178), corrected by subtracting population (39) erroneously included in Franklin County, Ohio (Columbus SMSA).

[5] SMSA's as defined for the 1963 economic censuses. [6] SMSA's as defined for the 1967 economic censuses.

[7] Corresponds to total 1960 population for 1970 SMSA's published in 1970 census (119,594,754), corrected by subtracting 1,256 population from Lawrence-Haverhill SMSA; this represented an addition to the 1960 population of Andover town made subsequent to the original census tabulations, and therefore not reflected in State or national totals. [8] Corresponds to total SMSA population for 1970 published in 1970 census.

[9] Corresponds to total SMSA land area published in 1970 census (387,616 square miles), corrected by subtracting 15 square miles erroneously included in Roanoke SMSA and 7 square miles included due to erroneous addition of area data. [10] SMSA's as defined for the 1972 economic censuses. [11] Includes estimated 1939 population (4,429) of Anchorage Census Division, as defined in 1970. [12] Includes estimated 1950 population (32,060) of Anchorage Census Division, as defined in 1970. [13] Includes 1960 population (82,833) of Anchorage Census Division, as defined in 1970.

TABLE B. NONMETROPOLITAN POPULATION AND LAND AREA AT SPECIFIED DATES: 1940 TO 1970

[See headnote for table A, p. 902. Nonmetropolitan population and land area are equivalent to that portion of the total national population and land area not included within SMSA's at the dates specified]

NONMETROPOLITAN POPULATION AS OF—	POPULATION (1,000)				Land area, 1970 (1,000 sq. mi.)
	1940	1950	1960	1970	
1950 census (Mar. 1952)	62,630	66,472	72,979	81,080	3,329
1960 census (Nov. 1960)	59,320	62,009	66,438	72,287	3,227
1964 (Aug. 31)	57,295	59,682	63,447	68,573	3,187
1968 (Jan. 31)	55,756	57,696	60,910	65,297	3,159
1970 census (Feb. 28, 1971)	55,010	56,747	59,730	63,793	3,149
1974 (Apr. 30)	50,127	51,106	52,709	55,080	3,046
1976 (Mar. 31)	49,709	50,631	52,155	54,393	3,034

APPENDIX I

Standard Metropolitan Statistical Areas as of March 31, 1976

	1974 Population[1]
Abilene, Tex.	128,400
Callahan County	8,900
Jones County	16,300
Taylor County	103,200
Akron, Ohio	671,300
Portage County	131,200
Summit County	540,100
Albany, Ga.	100,700
Dougherty County	91,500
Lee County	9,200
Albany-Schenectady-Troy, N.Y.	799,400
Albany County	288,700
Montgomery County	56,200
Rensselaer County	153,800
Saratoga County	140,700
Schenectady County	159,900
Albuquerque, N. Mex.	378,900
Bernalillo County	356,800
Sandoval County	22,100
Alexandria, La.	136,100
Grant Parish	14,000
Rapides Parish	122,100
Allentown-Bethlehem-Easton, Pa.-N.J.	616,600
Carbon County, Pa.	52,300
Lehigh County, Pa.	263,300
Northampton County, Pa.	222,600
Warren County, N.J.	78,400
Altoona, Pa.	135,600
Blair County	135,600
Amarillo, Tex.	150,200
Potter County	89,900
Randall County	60,300
Anaheim-Santa Ana-Garden Grove, Calif.	1,660,900
Orange County	1,660,900
Anchorage, Alaska	148,800
Anchorage Census Div.	148,800
Anderson, Ind.	139,400
Madison County	139,400
Ann Arbor, Mich.	250,100
Washtenaw County	250,100
Anniston, Ala.	105,900
Calhoun County	105,900
Appleton-Oshkosh, Wis.	281,800
Calumet County	28,300
Outagamie County	122,100
Winnebago County	131,400
Asheville, N.C.	166,300
Buncombe County	150,000
Madison County	16,400
Atlanta, Ga.	1,776,000
Butts County	11,900
Cherokee County	38,000
Clayton County	127,900
Cobb County	234,100
De Kalb County	457,000
Douglas County	43,400
Fayette County	16,700
Forsyth County	21,300
Fulton County	580,200
Gwinnett County	108,400
Henry County	28,800
Newton County	31,900
Paulding County	21,600
Rockdale County	26,200
Walton County	28,500
Atlantic City, N.J.	190,000
Atlantic County	190,000
Augusta, Ga.-S.C.	273,800
Columbia County, Ga.	26,200
Richmond County, Ga.	153,900
Aiken County, S.C.	93,700
Austin, Tex.	388,600
Hays County	35,100
Travis County	353,500
Bakersfield, Calif.	337,600
Kern County	337,600
Baltimore, Md.	2,140,400
Baltimore city	864,100
Anne Arundel County	337,100
Baltimore County	632,500
Carroll County	79,500
Harford County	134,200
Howard County	93,000
Baton Rouge, La.	407,200
Ascension Parish	40,000
East Baton Rouge Parish	309,000
Livingston Parish	40,600
West Baton Rouge Parish	17,600
Battle Creek, Mich.	181,900
Barry County	41,000
Calhoun County	140,900
Bay City, Mich.	119,400
Bay County	119,400
Beaumont-Port Arthur-Orange, Tex.	344,600
Hardin County	33,000
Jefferson County	238,300
Orange County	73,200
Billings, Mont.	94,500
Yellowstone County	94,500
Biloxi-Gulfport, Miss.	173,200
Hancock County	18,100
Harrison County	146,400
Stone County	8,800
Binghamton, N.Y.-Pa.	300,400
Broome County, N.Y.	216,900
Tioga County, N.Y.	47,700
Susquehanna County, Pa.	35,900
Birmingham, Ala.	785,000
Jefferson County	641,900
St. Clair County	32,600
Shelby County	47,400
Walker County	63,200
Bloomington, Ind.	89,100
Monroe County	89,100
Bloomington-Normal, Ill.	114,400
McLean County	114,400
Boise City, Idaho	131,500
Ada County	131,500
Boston, Mass. (See NECMA list, p. 909.)	
Bridgeport, Conn. (See NECMA list, p. 909.)	
Bristol, Conn. (See Hartford NECMA, p. 909.)	
Brockton, Mass. (See Boston NECMA, p. 909.)	
Brownsville-Harlingen-San Benito, Tex.	168,300
Cameron County	168,300
Bryan-College Station, Tex.	67,900
Brazos County	67,900
Buffalo, N.Y.	1,330,700
Erie County	1,093,400
Niagara County	237,300
Burlington, N.C.	99,400
Alamance County	99,400
Canton, Ohio	404,500
Carroll County	24,600
Stark County	380,000
Cedar Rapids, Iowa	164,600
Linn County	164,600
Champaign-Urbana-Rantoul, Ill.	163,000
Champaign County	163,000
Charleston-North Charleston, S.C.	362,000
Berkeley County	60,400
Charleston County	260,000
Dorchester County	41,700

APPENDIX II

Historical Series—Index to Tables in Which *Historical Statistics* Series Appear

[Listed below are statistical time series (identified by number) appearing in *Historical Statistics of the United States, Colonial Times to 1970*, for which tables in the *Statistical Abstract* present comparable figures. Historical series are listed only where related or comparable data are available for one or more years later than 1970. In a few instances, it may be necessary to combine figures shown in the *Abstract* to obtain totals comparable to the series shown in *Historical Statistics*]

APPENDIX III

Statistical Methodology and Reliability

Introduction—Data in this *Statistical Abstract* came from many sources and may be based on complete counts, administrative records, sample surveys, estimates, unpublished data, and even informed guesses. The collecting agencies include Federal and State statistical agencies, Federal and State regulatory agencies, private research agencies, trade associations, insurance companies, health associations, and private organizations such as the American Red Cross and philanthropic foundations.

Consequently, the data vary considerably as to reference periods, methods of collection, definitions of terms, and, for continuing series, the number and frequency of time periods for which data are available. Also, all the data are subject to errors of various kinds, some due to the sponsoring or collecting agencies, others due to, collection and processing methods. Even censuses and/or surveys which purport to cover a "complete" population are subject to response errors, errors from failure to obtain information from all units in the population, processing and tabulating errors, and disagreements as to the meaning of the data when interpreted by different interests. The introduction of sampling introduces sampling error, and perhaps some other errors which might not occur with a complete coverage.

Following are definitions of some statistical terms, and of the types of errors which may be present in the tables.

True value—An idealized concept of a quantity which is to be measured; in some cases it can be achieved, but in others there is disagreement as to the definition of the quantity. Illustrations are the number of persons who are "unemployed", and the "dollar value of farm sales."

In most surveys an approximation to the "true" value is used, defined in such a way that one would expect to be able to measure it provided there were sufficient time, money, knowledge of techniques, etc., and no errors in the reporting, collection, and processing of the data.

Parent population—The population from which data are to be collected, or summarized, according to definitions which have been agreed upon as being useful. For example, for sales of farm products, it is necessary to define a "farm" and also a "sale" made by a farm.

Survey value—A value obtained in a complete survey which is intended to be the "true" value, but which may not be the same because the "true" data cannot be collected, the population cannot be defined exactly, or there are uncontrollable biases in the process of collecting and assembling the data. For example, age may be poorly reported if someone other than the person involved responds; sometimes the person himself does not know his age.

Sample—A subset or part of the population, selected according to accepted statistical procedures, with the object of investigating the properties of the parent population. With *random sampling*, each possible sample has a fixed and determinate probability of selection.

Sample survey—A survey carried out by a sampling method; that is, only a portion of the whole population is surveyed.

Sample estimate—An estimate, based on a sample, of the result which could have been obtained if the entire population could have been surveyed by the same methods, under the same auspices, in the same time period. If there are no errors other than sampling error, the estimate will be unbiased.

Sampling error—That part of the difference between a population value and an estimate of that value, derived from a random sample, the difference being due to the fact that only a sample of values is observed.

Nonsampling errors—Errors which arise from sources other than sampling, such as defects in the list (or "frame") from which the sample was selected, faulty selection of the sample, mistakes in data collection such as nonresponse, response bias and response variance, inability to answer the questions, and processing errors such as errors in editing and tabulation.

Nonresponse—Failure to obtain information from a designated unit (sample or population) for any reason, such as refusal, not at home, inability of respondent to answer question. This includes *item nonresponse*, in which some questions, but not all, are answered for a particular unit.

Total error—The combined effect of all the errors which are present in the survey results. The statistician attempts to balance the various types of errors in order to obtain the smallest total error possible for the money expended for the survey.

Standard error of a survey estimate—A measure of the variation among the estimates which would be made from all possible samples. It is a measure of the *precision* with which an estimate from a particular sample approximates the average result of all possible samples.

Relative standard error—The standard error of the estimate divided by the sample estimate itself. Another term for this concept is the *coefficient of variation* of the estimate.

The sample estimate and an estimate of its standard error permit construction of interval estimates with prescribed confidence that the interval includes the average result of all possible samples for a given sampling rate.

Bias—The difference between the average of all possible sample estimates and the "true" value. *Bias* in a complete coverage survey may be illustrated by the phenomenon of heaping at ages ending in 0 and 5, a frequent occurrence in the reporting of age in a population census.

The accuracy of a survey result depends on both sampling and nonsampling errors. The total survey error is the figure which enables the user to know how valid the data in a particular table are. The preferred presentation of the data would have statements of total error accompanying each table in this volume. Obviously this is impossible. The explanatory notes which follow discuss the methodology and reliability of the data for some of the major Federal statistical agencies which are the original sources for data presented in this edition of the *Abstract*. These discussions will be extended to other agencies in future issues.

For a discussion of standards for presentation of errors see "Standards for Discussion and Presentation of Errors in Survey and Census Data", by Maria Gonzalez, Jack L. Ogus, Gary Shapiro, and Benjamin J. Tepping, *Journal of the American Statistical Association*, September 1975, volume 70, number 351, part II. (Also published as a separate report with the same title by U.S. Dept. of Commerce, Bureau of the Census, *Technical Paper 32*, March 1974.

Notes on methodology and reliability

U.S. BUREAU OF THE CENSUS

Brief discussions of procedures followed, area concepts, and terminology used in the major demographic and economic censuses and in the various current surveys and of the bases for sample data and estimates appear in this *Statistical Abstract* in the introductory text to the following sections: 1, 4, 9, 12, 13, 23, 26, 27, 28, 29, 30, and 31. For additional information, the source cited below each table should be consulted. See also below under "Sources."

U.S. DEPT. OF AGRICULTURE, STATISTICAL REPORTING SERVICE (SRS)

Most of the SRS statistics are derived from sample surveys, based on a variety of sample designs. The June Enumerative Survey, subsamples of that survey, and objective yield surveys (crop cutting) provide most of the statistics produced by SRS.

Descriptions of the methods used for most of the SRS farm tables in the *Statistical Abstract* may be found in U.S. Dept. of Agriculture, SRS, *Scope and Methods of the Statistical Reporting Service*, Miscellaneous Publication No. 1308, July 1975. Chapters 2 and 3, "Sampling Methodology and Estimation" and "Methods of Collecting and Processing Data," describe the procedures used. Individual chapters describe the surveys and methods for obtaining information on particular types of crops and livestock, prices, and other items. While probability sampling is used for most of the surveys, tables of sampling errors are not readily available; non-sampling errors are mentioned only indirectly, as in a discussion of revisions of the data.

1. June Enumerative Survey

The June Enumerative Survey is conducted in about 16,300 segments, having more than 20,000 farms and 60,000 agricultural tracts. An area sample which takes into account land use and type of farming is used; State estimates can be made for most of the 48 conterminous States. Segments vary in size from 1/10 square mile in residential areas, to 1 square mile in intensively cultivated areas, to several square miles or more in open farming and ranch areas. Typically, 20 percent of the SRS segments are rotated annually to relieve respondent burden.

About June 1, all selected segments are visited by an SRS interviewer, who collects information on crop acres, land use, livestock inventories, farm labor, farm population, and farm operators. Estimates are based on data from all agricultural operations within the sample segments, with a relative sampling error of about 1 percent for national statistics.

Smaller samples of segments selected from the segments in the June Survey are used to collect information on intentions to plant crops, crop condition, crops harvested, and year-end inventories of livestock.

2. Farm labor surveys

Surveys based on a list of farm labor employers are conducted quarterly, supplemented by a sample of small areas of land where data for employers not on the list are collected. About 10,000 farms are included. The relative standard error for the number of hired farm workers is about 3 percent at the national level; for a State, the relative standard error ranges from 10 percent to 20 percent. See table 1108.

3. Indexes of prices received and paid by farmers

Monthly mail surveys of farmers, businesses providing farm services, and firms purchasing and processing farm products are used to collect data on prices. The methodology is described in Chapter 10 of publication No. 1308. Various sources and voluntary reporting are used; there are no sampling error statements. See table 1091.

Other tables in this *Statistical Abstract* for which methodology is described in publication No. 1308 are: Tables 1065, 1080, 1117, 1119, 1120, 1122, 1124, 1126, 1128, 1130–1135, 1139, 1141–1143, 1145, 1146, and 1322.

U.S. DEPT. OF HEALTH, EDUCATION, AND WELFARE, NATIONAL CENTER FOR HEALTH STATISTICS (NCHS)

The National Center for Health Statistics has several important sample surveys, from which a number of tables in the *Statistical Abstract* are derived. Other surveys, such as the Master Facility Inventory and the Health Insurance Studies, are based on data reported for regulatory purposes ("administrative records"), or on complete

coverages. Several sources may be used in a single table and the data presented may, therefore, have different degrees of completeness and reliability.

1. Health Interview Survey (HIS)

The HIS is a household sample survey which produces a continuous sampling of the civilian noninstitutional population of the United States. The households interviewed each week represent the entire population, and the weekly samples are additive over time.

Details on methodology and the determination of standard errors for particular statistics are presented in the Technical Notes section (appendix I) of the report cited as the source. For unpublished data, see NCHS Series 10 "Current Estimates" report for the particular data year. See tables 124, 138–143, 150 (Current Population Survey sample), 224.

2. Hospital Discharge Survey

This survey covers patients discharged from noninstitutional hospitals having 6 or more beds in the 50 States and the District of Columbia. About 500 hospitals were selected from 7,500, with varying probabilities; all hospitals having 1,000 or more beds being in the sample with certainty. The sample of discharges was at rates such that each discharged patient had about the same probability of being selected.

The base populations used in computing rates are unpublished estimates from the U.S. Bureau of the Census. Relative standard errors for estimates in the table for a few items are:

Total discharges, 1973—32,125,000 ± 3.0 percent
Discharges, ages 5–14—2,139,000 ± 3.4 percent
Discharges, under 1 year—580,000 ± 4.5 percent

For an interpretation of the errors quoted, see the definition of the relative standard error in the introduction of this Appendix. See table 131.

3. Health and Nutrition Examination Survey (HANES)

In this first survey, 75 percent of the persons in a probability sample of 28,000 persons selected from the total U.S. civilian noninstitutional population were examined. The sampling rate was larger for certain segments of the population believed more likely to be undernourished; the data were weighted to produce unbiased estimates for the entire population. For a detailed description of the content, sample design, and plan of operation see NCHS: *Plan and Operation of the Health and Nutrition Examination Survey, United States, 1971–73. Vital and Health Statistics*, Series 1, Nos. 10a and 10b, DHEW Pub. No. (HSM) 7301310, Government Printing Office, Washington, D.C., February 1973. See table 154.

4. Master Facility Inventory (MFI)

The MFI Survey includes all inpatient health facilities in the United States. Data were collected in 1973 by the Bureau of the Census and American Hospital Association, with response rates of 96 percent for nursing homes and 92 percent for hospitals. See *Vital and Health Statistics*, Series 14, No. 16, for methodology. See tables 115–117, 126, 132, 134.

U.S. DEPT. OF HEALTH, EDUCATION, AND WELFARE, NATIONAL CENTER FOR EDUCATION STATISTICS (NCES)

Generally, tables from the National Center for Education Statistics are based on reports from administrators of individual institutions of higher education, both public and private, or, for publicly controlled elementary and secondary schools, from State Departments of Education. Data for privately controlled elementary and secondary schools involve some sampling. Data on participation in adult education is also based on sampling procedures.

Methods of collection and coverage are discussed in the sources quoted for the tables, particularly in the annual *Digest of Education Statistics*, and its predecessor, the *Biennial Survey of Education in the United States*.

Current data on vocational and technical education and other specialized topics are generally collected on a sample basis, under contract, by non-Federal agencies. See tables 181–184, 186, 187, 197, 209–211, 216, 218, 219, 223, 225–231, 233–235, 237, 238, 240, 242–247, 249, 251.

Sources—Additional information on methodology and reliability of data presented in tables from selected agencies can be found in the reports cited below. Table references are to this *Abstract*.

APPENDIX IV

Guide to Sources of Statistics

Alphabetically arranged by subject, this guide contains references to the important primary sources of statistical information for the United States. Secondary sources have been included if the information contained in them is presented in a particularly convenient form or if primary sources are not readily available. Nonrecurrent publications presenting compilations or estimates for years later than 1966 or types of data not available in regular series are also included.

Much valuable information may also be found in State reports (see pp. 977–980) and in reports for particular commodities, industries, or similar segments of our economic and social structure, many of which are not included here.

Publications listed under each subject are divided into two main groups: "U.S. Government" and "Other." The location of the publisher of each report is given except for Federal agencies located in Washington, D.C. Most Federal publications may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, tel. (202) 783-3238, or from Government Printing Office bookstores in certain major cities. In some cases, Federal publications may be obtained from the issuing agency.

Major reports, such as the Census of Population, which consist of many volumes, are listed by their general, all-inclusive titles. Specific volume numbers and subtitles of the major census publications are listed on pp. 971–976.

Publications of Recent Censuses

Listed below are major reports of the most recent censuses. In most cases, separate reports are available for each State, subject, industry, etc. Preliminary reports which have been issued are not included in the list.

Complete information on publications of all the censuses appears in the *Bureau of the Census Catalog*, which is published quarterly and cumulated to the annual issue. A list of data files (computer tapes and punchcards) and unpublished materials is also included, beginning with the 1964 issues. A sample copy of the *Catalog* is available from the Bureau of the Census on request. The annual subscription price is $14.40 for 4 quarterly issues and 12 monthly supplements ($3.60 additional for foreign mailing).

1974 CENSUS OF AGRICULTURE

Vol. I. State Reports. A separate report for each State, Puerto Rico, Guam, and the Virgin Islands, presenting data for the area and its subdivisions. The State reports include separate data for all farms and for farms with sales of $2,500 or more.

Vol. II. U.S. Summary. Statistics by subject presented in separate chapters with totals for the United States, regions, geographic divisions, and States. Data for all farms and for farms with sales of $2,500 or more. The subject matter chapters will be issued as individual reports as follows:

Introduction
1. General Farm Information; Procedures for Collection, Processing, Classification
2. Farms: Number, Use of Land, Size of Farm
3. Farm Management, Farm Operators
4. Equipment, Labor, Expenditures, Chemicals
5. Livestock, Poultry, Livestock and Poultry Products
6. Crops, Nursery and Greenhouse Products, Forest Products
7. Value of Products, Economic Class, Contracts
8. Type of Farm
9. Irrigation and Drainage on Farms

Vol. III. Agricultural Services. Data by State and county and for the United States relating to establishments whose primary activities are providing agricultural services.

Vol. IV. Special Reports.

Part 1. Graphic Summary. Computer-generated dot maps and pattern maps depicting many characteristics of agriculture in 1974.

Part 2. Ranking Agricultural Counties. The top ranking counties in descending order of importance for various agricultural characteristics and items of production, with comparable data and rank for 1974.

Part 3. Coverage Evaluation. Estimates of completeness of census counts.

1972 CENSUS OF BUSINESS

Retail Trade

RC72-A-1 to 52.—Area Series. A separate report is published for each State, the District of Columbia, and the United States. Each State report presents data on number of establishments, sales, payroll, employment, and number of proprietorships and partnerships, for the State, standard metropolitan statistical areas (SMSA's), and area outside SMSA's, by detailed kinds of business; and for counties and cities with 500 retail establishments or more, by varied kind-of-business detail. For cities of 2,500 inhabitants or more and for all counties, statistics are furnished on number of establishments and sales for 10 major kind-of-business

groups in addition to the above data items for total retail trade.

RC72-S-1.—Size Report. Presents data based on size of establishment, size of firm, and legal form of organization. Establishment statistics are presented by sales size and by employment size; statistics for firms are presented by sales size, including concentration by largest firms, and by number of establishments operated (single units and multiunits). Statistics are presented by kind of business on number of establishments, sales, payroll, and employment, for the United States.

RC72-C-1 to 50.—Major Retail Centers. A separate report is published for each State having one or more SMSA's, the District of Columbia, and the United States. Each report presents statistics on number, sales, payroll, and employment for all retail stores.

Number of stores is shown by kinds of retail business for each SMSA in the State, each city of 100,000 inhabitants or more and its central business district (CBD), and each major retail center (MRC) in the SMSA. Also, for each SMSA with one or more cities of 100,000 inhabitants or more, statistics are presented on number of establishments, sales, payroll, employment, and number of proprietorships and partnerships. Percent change in sales, 1967 to 1972, and percent distribution of 1972 sales are presented by kind of business for CBD's, cities, and SMSA's. Maps show the total area covered, define the CBD's, and locate the MRC's in the SMSA.

Wholesale Trade

WC72-A-1 to 52.—Area Series. A separate report is published for each State, the District of Columbia, and the United States. Each State report presents data on number of establishments, sales, payroll, employment, and end-of-year inventories, for all wholesale trade establishments. Data on number of establishments and sales are also presented separately for the following types of wholesale operation: Merchant wholesalers, manufacturers' sales branches and sales offices, and merchandise agents and brokers. For the State, and for standard metropolitan statistical areas with 2,000 establishments or more, these statistics are presented for detailed kinds of business; for standard metropolitan statistical areas with less than 2,000 establishments and for counties with 200 establishments or more, they are presented by less kind-of-business detail. For cities of 5,000 inhabitants or more and for all counties, statistics are furnished separately on number of establishments and sales for merchant wholesalers in addition to the above data items for total wholesale trade.

WC72-S-1.—Size Report. Presents data based on size of establishment, size of firm, and legal form of organization. Establishment statistics are presented by sales size and by employment size; statistics for firms are presented by sales size, including concentration by largest firms, and by number of establishments operated (single units and multiunits). Statistics are presented by kind of business on number of establishments, sales, payroll, and employment, for the United States.

Selected Service Industries

SC72-A-1 to 52. A separate report is published for each State, the District of Columbia, and the United States. Each report represents data for the State, for standard metropolitan statistical areas, and for counties and cities with 300 selected services establishments, on receipts, payroll, employment, and number of proprietorships and partnerships by detailed kinds of business. Statistics are furnished by five major kind-of-business categories for each city of 2,500 inhabitants or more and for all counties.

SC72-S-1.—Size Report. Presents data based on size of establishment, size of firm, and legal form of organization.

Establishment statistics are presented by receipts size and by employment size; statistics for firms are presented by receipts size, including concentration by largest firms, and by number of establishments operated (single units and multiunits). Statistics are presented by kind of business on number of establishments, receipts, payroll, and employment, for the United States.

1972 CENSUS OF GOVERNMENTS

Vol. 1. Governmental Organization. Number of governmental units and public school systems, by States and counties. Includes data on governmental structures and characteristics.

Vol. 2. Taxable Property Values. Data on valuations set for general property taxation, including statistics by State, county, and selected cities; and results of a sample survey of real estate sales.
- Part 1—Taxable and Other Property Values.
- Part 2—Assessment—Sales Price Ratios and Tax Rates.

Vol. 3. Public Employment.
- No. 1. Employment of Major Local Governments.
- No. 2. Compendium of Public Employment.
- No. 3. Management-Labor Relations in State and Local Governments.

Vol. 4. Governmental Finances.
- No. 1. Finances of School Districts.
- No. 2. Finances of Special Districts.
- No. 3. Finances of County Governments.
- No. 4. Finances of Municipalities and Township Governments.
- No. 5. Compendium of Government Finances. A comprehensive summary of Federal, State, and local governmental finances.
- No. 6. Finances of the Commonwealth of Puerto Rico.

Vol. 5. Local Government in Metropolitan Areas. Data on local governments, employment, and finances.

Vol. 6. Topical Studies.
- No. 1. Employee-Retirement Systems of State and Local Governments.
- No. 2. State Reports on State and Local Government Finances.
- No. 3. State Payments to Local Governments.
- No. 4. Historical Statistics on Governmental Finances and Employment.
- No. 5. Graphic Summary of the 1972 Census of Governments.

Vol. 8. Guide to 1972 Census of Governments.

1972 CENSUS OF MANUFACTURES

Vol. I. Summary and Subject Statistics, Series MC72(1). In addition to a general summary, presents data on type of organization, manufacturers' inventories, capital expenditures, materials consumed, water use in manufacturing, gross value of assets and rental payments, fuels and electric energy, data on manufacturing activity in Government establishments, selected metalworking operations, and textile machinery in place.

Vol. II. Industry Statistics, Series MC72 (2). Data for 420 manufacturing industries on quantity and value of products shipped and materials consumed; cost of fuels and electric energy; capital expenditures; inventories; employment; payrolls; man-hours; value added by manufacture; number of establishments; and number of companies. Data for the United States, geographic regions and States, employment-size class of establishment, and degree of primary product specialization. Separate summary chapters are also shown for each of the 20 major industry groups.

Vol. III. Area Statistics, Series MC72(3). A separate chapter for each State and the District of Columbia presenting general statistics (number of establishments, employment, payrolls, value added by manufacture, and capital ex-

penditures) for each State and selected standard metropolitan statistical areas and counties, by industry groups and important individual industries. Totals for all manufacturing are shown for all counties and for cities with 450 or more employees.

MC72(SR)-2. Concentration Ratios. Information on the share of industrial activity accounted for by the 50, 100, 150, and 200 largest companies for the United States and for each manufacturing industry. Also shows the value of shipments of approximately 1,200 classes of products and the proportion accounted for by the 4, 8, 20, and 50 largest companies manufacturing each class of product.

1972 CENSUS OF MINERAL INDUSTRIES

MIC72(1)-1 to 7. Subject reports. Included are general summary, type of operation, capital expenditures, water use, fuels and electric energy consumed, and type of organization in mineral industries.

MIC72(1)-10A to 14E. 14 Industry reports. Data for 42 mineral industries on quantity and value of products shipped and supplies used, quantity and cost of fuels and electric energy, capital expenditures, employment, payrolls, man-hours, cost of contract work, cost of purchased machinery, value added in mining, number of establishments, and number of companies. Detailed data shown by geographic region and State and by type of operation.

MIC72(2)-1 to 49. 49 Area reports. A separate report for each State (Delaware, Maryland, and District of Columbia combined in a single binding). Data shown for each of 42 mining industries for industry groups by type of operation and county, and for number of establishments by size and county. Data also shown for value of shipments, value added by mining, employment, payrolls, man-hours, capital expenditures, cost of supplies, and purchased machinery installed.

1972 CENSUS OF TRANSPORTATION

TC72-N1 to N3. National Travel Survey. Data presented on seasonal and summary basis for 1972. Trips, person-trips, person-nights, person-miles, and accommodations used, by such travel characteristics as means of transport, purpose, duration, origin, destination, distance of trip, size of party, vacation, and weekend, and by such socio-economic characteristics as family income level, residence, occupation, and education.

TC72-T1 to T52. Truck Inventory and Use Survey. Data presented for each of the 50 States, the District of Columbia, and the United States. Data cover the characteristics and uses of private and commerical truck resources; number of vehicles and such characteristics as major use, body type, vehicle-size class, year model, type of fuel, range of operation, vehicle type and axle arrangement, acquisition, and cab type.

TC 72C1-1 to 14. Commodity Transportation Survey. Commodity Series. Data on tons and ton-miles of commodity shipments from manufacturing plants, by geographic division, for approximately 80 three-digit Transportation Commodity Classification (TCC) groups, by means of transport, distance and weight of shipment, and origin and destination.

TC72C2-1 to 8. Area Series. Data on flow of commodities from each of 27 production areas (each consisting of one or more standard metropolitan statistical areas) and approximately 25 selected States. Data for tons and ton-miles of commodities shipped, by means of transport, length of haul, and area of destination. A "U.S. Summary" report, issued as the last number in the series, presents flow of commodities at the various TCC levels for tons and

ton-miles, by means of transport, distance and weight of shipments, and origin and destination.

TC72C3-1 to 3. Statistical Report Series. Data for specialized subjects. National and regional data are shown in reports covering "Printing, Publishing, and Allied Industries (except Newspapers and Periodicals)" and "Traffic Patterns of Small Manufacturing Plants," by means of transport and distance shipped for industry classes in value of shipments. A report on shipper groups presents data on an industry-group basis, for each of 24 shipper group classifications for tons and ton-miles by means of transport, distance of shipment, and plant-employment size.

1970 CENSUS OF POPULATION

Vol. I. Characteristics of Population. Separate reports for the United States, each State, the District of Columbia, and Puerto Rico; Guam, Virgin Islands, American Samoa, Canal Zone, and Trust Territory of the Pacific in one report. Each report issued first as four separate paper-bound chapters, then assembled and issued in hard-cover:

Number of Inhabitants, Series PC(1)-A. Population counts for States, counties, SMSA's, urbanized areas, county subdivisions, all incorporated places, and unincorporated places of 1,000 inhabitants or more.

General Population Characteristics, Series PC(1)-B. Statistics on age, sex, race, marital status, and relationship to head of household for States, counties, SMSA's, urbanized areas, county subdivisions, and places of 1,000 or more inhabitants.

General Social and Economic Characteristics, Series PC(1)-C. Sample population data presented for the following areas: States, counties, SMSA's, urbanized areas, and places of 2,500 or more inhabitants.

Detailed Characteristics, Series PC(1)-D. Sample population data cross-classified by age, race, etc., and presented for some or all of the following areas: States, SMSA's, and large cities.

Vol. II. Subject Reports. Detailed information and cross-relationships for the United States, regions, and some States and SMSA's on such subjects as national origin and race, fertility, families, marital status, migration, education, disability, employment, occupation, industry, journey to work, and income.

Census Tract Reports. Series PHC(1). Population and housing data by census tract for each SMSA.

General Demographic Trends for Metropolitan Areas, 1960-1970, Series PHC(2). Comparative 1960 and 1970 data on population and housing subjects presented for the State and for SMSA's and their central cities and constitutent counties.

1970 CENSUS OF HOUSING

General Housing Characteristics, Series HC(VI) (Advance reports). One report for each State, the District of Columbia, and the United States. Selected data for States, standard metropolitan statistical areas (SMSA's), counties, and places of 10,000 or more inhabitants.

Vol. I. Housing Characteristics for States, Cities, and Counties. Separate reports for the United States, each State, the District of Columbia, Puerto Rico, and each outlying area. Each report issued first as two separate paper-bound chapters, then assembled and issued in hardcover:

General Housing Characteristics for States, Cities, and Counties, Series HC(1)-A. Data for States, counties, SMSA's, urbanized areas,

and places of 1,000 or more inhabitants.

Detailed Housing Characteristics for States, Cities, and Counties, Series HC(1)-B. Sample data for some or all of the following areas: States, counties, SMSA's, urbanized areas, and places of 2,500 or more inhabitants.

Vol. II. Metropolitan Housing Characteristics, Series HC(2). Detailed and cross-classified data. One report for each SMSA and a national summary report.

Vol. III. Block Statistics, Series HC(3). One report for each urbanized area showing data for individual blocks on selected housing and population subjects. Also includes reports for certain communities outside urbanized areas.

Vol. IV. Components of Inventory Change, Series HC(4). A report for the United States and each of 15 SMSA's based on a sample survey covering such components of change as new construction, conversion, merger, and demolition.

Vol. V. Residential Finance, Series HC(5). A report for the United States, by region, based on a sample survey. Data on financing and characteristics of homeowner properties and rental and vacant properties.

Vol. VI. Plumbing Facilities and Estimates of Dilapidated Housing, Series HC(6). A report for the United States presenting data on substandard housing units for States, counties, and cities, based on the number of units lacking plumbing facilities combined with estimates of units with all plumbing facilities but in dilapidated condition.

Vol. VII. Subject Reports, Series HC(7). Each of the nine reports in this volume concentrates on a particular subject. Detailed information and cross-classifications are generally provided on a national and regional level; in some reports, data for States or SMSA's may also be shown. Some of the subjects covered are housing of minority groups and senior citizens, households in mobile homes, and housing characteristics by household composition.

1967 CENSUS OF COMMERCIAL FISHERIES

FC67-1. Census of Commercial Fisheries. Data on number of operators, employment, payroll, operating costs, and receipts, by major type of catch and by regions and selected States. Data also shown for monthly employment, value of catch, and characteristics of vessels operated.

Guide to State Statistical Abstracts

This bibliography includes the most recent statistical abstracts for States and Puerto Rico published since 1967 plus those that will be issued in late 1976 or early 1977. For some States, a near equivalent has been listed in substitution for, or in addition to, a statistical abstract. All sources contain statistical tables on a variety of subjects for the State as a whole, its component parts, or both. The page counts given for publications cited as "In process" are approximate.

Alabama

University of Alabama, University, Center for Business and Economic Research

Economic Abstract of Alabama. 1975. 244 pp.

Alaska
