ACKNOWLEDGMENTS

99th Annual Edition

Prepared under the direction of
William Lerner
Assistant Division Chief
for Statistical Reports

Helen E. Teir, Chief, Statistical Compendia Staff, Data User Services Division, was responsible for general supervision and compilation. She was assisted in research and analytical phases of assigned sections and in the developmental aspects of new tables by **Glenn W. King, Elisabeth A. Busse, Lars B. Johanson,** and **Edward C. Jagers,** who was also responsible for content and preparation of graphic charts. **Minerva K. Moreland** was responsible for technical editorial supervision, assisted by **Mary A. Rahall** for editing and clerical operations.

The cooperation of the many contributors to this volume is gratefully acknowledged. The source note below each table credits the various government and private agencies which have collaborated in furnishing information for the *Statistical Abstract.*

In a few instances, contributors have requested that their data be designated as subject to copyright restrictions, as indicated in the source notes to the tables affected. Permission to use copyright material should be obtained directly from the copyright owner.

SUGGESTED CITATION

U.S. Bureau of the Census, ***Statistical Abstract of the United States: 1978.***
(99th edition.) Washington, D.C., 1978.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, Tel. (202) - 783-3238, or any U.S. Department of Commerce district office.
Stock Number: 003-024-01648-6 (cloth); 003-024-01647-8 (paper).

PREFACE

The *Statistical Abstract of the United States,* published annually since 1878, is the standard summary of statistics on the social, political, and economic organization of the United States. It is designed to serve as a convenient volume for statistical reference and as a guide to other statistical publications and sources. The latter function is served by the introductory text to each section, the source note appearing below each table, and Appendix IV, which comprises Guide to Sources of Statistics and Guide to State Statistical Abstracts.

This volume includes a selection of data from many statistical publications, both governmental and private. Publications cited as sources usually contain additional statistical detail and more comprehensive discussions of definitions and concepts than can be presented here. Data not available in publications issued by the contributing agency but obtained from unpublished records are identified in the source notes as "unpublished data." More information on the subjects covered in tables so noted may generally be obtained from the source.

Except as otherwise indicated, figures are for the United States as presently constituted. Although emphasis in the *Statistical Abstract* is given primarily to national data, many tables present data for regions and individual States and a smaller number for metropolitan areas and cities. Appendix II, Metropolitan Area Concepts and Components, presents explanatory text and a complete current listing of official standard metropolitan statistical areas (SMSA's), standard consolidated statistical areas (SCSA's), and New England county metropolitan areas (NECMA's). Statistics for the Commonwealth of Puerto Rico and for outlying areas of the United States are included in many State tables and are supplemented by information in section 32. Additional information for cities, counties, metropolitan areas, congressional districts, and other small units, as well as more historical data, are available in various supplements to the Abstract (see inside back cover).

The "Recent Trends" section, beginning on p. xiii, is available separately in a reprint, *Recent Social and Economic Trends;* and *USA Statistics in Brief,* 1978, the pocket-size loose insert in front of the book, is also available separately. Price information can be obtained from, and orders sent to, the Superintendent of Documents, Washington, D.C. 20402, or any U.S. Department of Commerce district office located in certain large cities. A 25-percent discount will be allowed on orders of 100 copies or more sent to the same address.

Changes in the 1978 edition.—This year, Appendix III, Statistical Methodology and Reliability, first introduced in the 1976 *Abstract,* has undergone a major revision. The information about the censuses and surveys has been reorganized in columnar form into 7 major categories (e.g. universe, frequency, type of data, data collection and imputation procedures). This was done to achieve a more compact and uniform presentation. In addition, to facilitate reference, the description of each of the censuses and/or surveys now appears under the title of the section to which it is most relevant. This appendix attempts, in relatively nontechnical language, to provide the user of statistics in this book with an appreciation of some hazards to be kept in mind when using the data and, in specific cases, with a better understanding of how the data were collected, a measure of their validity, and references to further information.

Statistics in this edition, the 99th, are for the most recent year or period available by mid-September 1978. Each year the more than 1,500 tables and charts are reviewed and evaluated; new tables and charts of current interest are added, continuing series are updated, and less timely data are condensed or eliminated. Text notes and appendixes are revised as appropriate.

In all, there are 88 new tables, distributed among 30 of the 33 sections. In addition, graphic charts have been revised or updated and many sections have undergone tabular rearrangement and format changes designed to improve the organization of subject matter. Of the tables included in the 1977 edition, 33 were omitted from this issue. The omissions represent primarily tables for which comparable details appear in other tables or for which no recent data are available, or tables for which the subject matter shown was considered relatively less important in the light of the space required for presentation.

Preface

Many new tables reflect current public interest in the behavior and activities of people and the workings of government and industry.

Among new tables relating to people are those on:

- Household characteristics, by race and Spanish origin, p. 44
- Persons living alone, by age and sex, p. 50
- Characteristics of widows, by age, p. 51
- First births, at intervals from woman's first marriage, p. 64
- Death rates from heart disease and cancer, p. 77
- Fees for office visits, by medical specialty, p. 106
- Medical malpractice insurance premiums, p. 107
- Average weights and heights, p. 119
- Children immunized against specific diseases, p. 121
- Earned degrees below bachelor's, p. 170
- Societal dependency ratios, p. 338
- Characteristics of volunteer workers, p. 365
- Unemployment, by industry of last job, p. 411
- Nobel prize laureates, p. 627
- Licensed drivers and traffic deaths, p. 648
- Income of farm and nonfarm families, p. 687

New tables reflecting Government concerns include:

- Alien deportation, p. 91
- Public school employment, p. 153
- Expenditures for environmental quality control, p. 213
- Assessed property values and property tax revenue, p. 309
- Effect of changes in social security contribution rates, p. 338
- Military reserve costs, p. 384
- Real growth rates of GNP, p. 442
- Congressional campaign finances, p. 525

Business and industrial activities are covered in new tables on:

- Major collective bargaining settlements, p. 425
- Foreign lending by large U.S. banks, p. 544
- Funds raised in credit markets by nonfinancial sectors, p. 545
- Determinants of business fixed investment, p. 568
- Energy consumption, by source and sector, p. 607
- Motor vehicle safety defect recalls, p. 653
- Interstate natural gas pipelines summary, p. 665
- Characteristics of corporate farms, p. 689
- Fish catch in new U.S. Fishery Conservation Zone, p. 744
- Petroleum industry expenditures for new plant and equipment, p. 763
- Sales prices of new one-family homes, p. 800
- Total and per capita retail sales, p. 841
- U.S. liabilities to foreigners, p. 863

Historical statistics.—Specific headnote references in this *Abstract* link many tables to earlier data shown in *Historical Statistics of the United States, Colonial Times to 1970.* (See pp. 932-934.)

Statistical reliability and responsibility.—The contents of this volume were taken from many sources. All data from either censuses and surveys or from administrative records are subject to error arising from a number of factors: Sampling variability (for statistics based on samples), reporting errors in the data for individual units, incomplete coverage, nonresponse, imputations, and processing error. (See also Appendix III, pp. 945-963.) The Bureau of the Census cannot accept the responsibility for the accuracy or limitations of the data presented here, other than for those which it collects. The responsibility for selection of the material and for proper presentation, however, rests with the Bureau.

For additional information on data presented.—Please consult the source publications available in local libraries or write to the agencies indicated in the source notes. Write to the Bureau of the Census only if it is cited as the source.

Suggestions and comments.—Users of the *Statistical Abstract* and its supplements (see inside back cover) are urged to make their data needs known for consideration in planning future editions. Suggestions and comments for improving coverage and presentation of data should be sent to the Director, Bureau of the Census, Washington, D.C. 20233.

UNITS OF LENGTH AND AREA

Customary				Metric
Inch (in)			=	25.4 millimeters
Foot (ft)	=	12 in	=	.305 meter
Yard (yd)	=	36 in	=	.914 meter
		or 3 ft		
Mile (mi)	=	5,280 ft	=	1.609 kilometers
(in^2) (sq in)			=	6.452 cm^2
Ft^2 (sq ft)	=	144 sq in	=	.093 m^2
Yd^2 (sq yd)	=	1,296 sq in	=	.836 m^2
		or 9 sq ft		
Acre	=	43,560 sq ft	=	.405 ha
$Mile^2$ (sq mi)	=	640 acres	=	2.59 km^2

Metric				Customary
Millimeter (mm)	=	.001 meter	=	.039 inch
Centimeter (cm)	=	.01 meter	=	.394 inch
Decimeter (dm)	=	.1 meter	=	3.937 inches
Meter (m)			=	3.281 feet
Kilometer (km)	=	1,000 meters	=	.621 mile
Sq millimeter (mm^2)	=	.000001 m^2	=	.002 sq in
Sq centimeter (cm^2)	=	.0001 m^2	=	.155 sq in
Sq decimeter (dm^2)	=	.01 m^2	=	15.5 sq in
Sq meter (m^2)			=	10.764 sq ft
Hectare (ha)	=	10,000 m^2	=	2.471 acres
Sq kilometer (km^2)	=	1,000,000 m^2	=	.386 sq mi

UNITS OF WEIGHT (OR MASS)

Customary				Metric
Avoirdupois Weight[1]				
Grain			=	.065 gram
Ounce (oz avdp)	=	437.5 grains	=	28.350 grams
		or 16 drams		
Pound (lb avdp)	=	7,000 grains	=	.454 kilogram
		or 16 ounces		
Hundredweight (cwt)	=	100 pounds	=	45.359 kg
Ton, short (tn)	=	2,000 pounds	=	.907 metric ton
Ton, long	=	2,240 pounds	=	1.016 metric tons
Troy Weight[2]				
Ounce (oz t)[3]	=	480 grains	=	31.104 grams
Pound (lb t)	=	5,760 grains	=	.373 kilogram
		or 12 ounces		

Metric				Customary
Gram (g)			=	.035 oz avdp
				or .032 oz t
Dekagram (dag)	=	10 g	=	.353 oz avdp
				or .322 oz t
Hectogram (hg)	=	100 g	=	3.527 oz avdp
				or 3.215 oz t
Kilogram (kg)	=	1,000 g	=	2.205 lb avdp
				or 2.679 lb t
Metric ton	=	1,000 kg	=	1.102 short tons or .984 long ton

[1]For weighing ordinary commodities. [2]For weighing precious metals, jewels, etc. [3]Also known as fine ounces.

UNITS OF CAPACITY

Customary				Metric
Liquid				
Fluid ounce (fl oz)			=	29.573 ml
Pint (pt)	=	16 fl oz	=	.473 liter
Quart (qt)	=	32 fl oz or 2 pt	=	.946 liter
Gallon (gal)	=	8 pt or 4 qt	=	3.785 liters

Customary				Metric
Dry				
Pint (pt)			=	.551 dm^3
Quart (qt)	=	2 pints	=	1.101 dm^3
Peck (pk)	=	8 quarts	=	8.810 dm^3
Bushel (bu)	=	32 quarts	=	35.238 dm^3

Metric				Customary		
Milliliter (ml)	=	.001 liter	=	.034 fl oz (liquid)	=	.002 pt (dry)
Liter (l)			=	1.057 qt (liquid)	=	.908 qt (dry)
Hectoliter (hl)	=	100 liters	=	26.418 gal (liquid)	=	2.838 bu (dry)

The following symbols, used in the tables throughout this book, are explained in condensed form in footnotes to the tables where they appear:

—	Represents zero or rounds to less than half the unit of measurement shown.
B	Base figure too small to meet statistical standards for reliability of derived figure.
D	Figure withheld to avoid disclosure of information pertaining to a specific organization or individual.
NA	Data not enumerated, tabulated, or otherwise available separately.
NS	Percent change irrelevant or insignificant.
S	Figure does not meet publication standards for reasons other than that covered by symbol B, above.
X	Figure not applicable because column heading and stub line make an entry impossible, absurd, or meaningless.
Z	Entry would amount to less than half the unit of measure shown.

In many tables, details will not add to the totals shown because of rounding.

Example of table structure:

Table number and title — NO. 215. ENROLLMENT IN PUBLIC AND PRIVATE SCHOOLS: 1960 TO 1977

Unit indicator — [**In millions of persons 3 to 34 years of age.** As of **October.** Elementary includes grades 1-8; high school, grades 9-12. College data represent degree-credit enrollment] — *Headnote*

Footnote indicator

LEVEL	1960 [1]			1970			1977		
	Total	Public	Private	Total	Public	Private	Total	Public	Private
Total	46.3	39.0	7.2	60.4	52.2	8.1	60.0	51.6	8.4
Nursery	(NA)	(NA)	(NA)	1.1	.3	.8	1.6	.6	1.1

Elementary	30.3	25.8	4.5	34.0	30.0	3.9	29.2	26.0	3.3
High school	10.2	9.2	1.0	14.7	13.5	1.2	15.8	14.5	1.2
College	3.6	2.3	1.3	7.4	5.7	1.7	10.2	7.9	2.3

Spanner — *Column heads* — *Stub* — *Field* — *Heavy rule*

Footnotes — NA Not available. [1] Data are for persons 5 to 34 years of age.

Parallel rule

Source: U.S. Bureau of the Census, *Current Population Reports*, series P-20.

Headnotes immediately below table titles provide information important for correct interpretation or evaluation of the table as a whole or for a major segment of it.

Footnotes below the bottom rule of tables give information relating to specific items or figures within the table.

Unit indicators ("In thousands," "In millions of dollars," etc.) are usually given in boldface type as the first element of the headnote. In tables where several units are used, the unit indicators are generally given in the stub or in the column headings.

Parallel vertical rules are used to the right of a total column to indicate—

(1) that the components which follow add to the total (e.g., tables 1, 5, 29, etc.);

(2) in the case of derived figures, that the underlying data are additive to their total (e.g., table 28 for ratios, table 49 for percentages, table 81 for rates, and table 98 for averages).

Heavy vertical rules are used—

(1) in tables where the stub is continued into one or more additional columns across the table to separate each segment of stub and its accompanying data columns from the continued segments (e.g., tables 2, 4, 26, etc.);

(2) to set off independent sections of a table (e.g., tables 1, 3, 8, etc.).

Averages. An average is a single number or value that is often used to represent the "typical value" of a group of numbers. It is regarded as a measure of "location" or "central tendency" of a group of numbers.

The *arithmetic mean* is the type of average used most frequently. It is derived by summing the individual item values of a particular group and dividing the total by the number of items. The arithmetic mean is often referred to as simply the "mean" or "average."

The *median* of a group of numbers is the middle number or value when each item in the group is arranged according to size (lowest to highest or vice versa); it generally has the same number of items above it as below it. If there is an even number of items in the group, the median is taken to be the average of the two middle items.

Per capita (or per person) quantities. A per capita figure represents an average computed for every person in a specified group (or population). It is derived by taking the total for an item (such as income, taxes, or retail sales) and dividing it by the number of persons in the specified population.

Index numbers. An index number is a measure of difference or change, usually expressed as a percent, relating one quantity (the variable) of a specified kind to another quantity of the same kind. Index numbers are widely used to express changes in prices over periods of time but may also be used to express differences between related subjects for a single point in time.

To compute a price index, a base year or period is selected. The base year price (of the commodity or service) is then designated as the base or reference price to which the prices for other years or periods are related. Many price indexes use the year 1967 as the base year; in tables, this is shown as "1967 = 100." A method of expressing the price relationship is:

$$\frac{\text{Price of a set of one or more items for related year}}{\text{Price of the same set of items for base year}}$$

The result multiplied by 100 provides the index number. When 100 is subtracted from the index number, the result equals the percent change in price from the base year.

Average annual percent change. Unless otherwise stated in the *Abstract* (as in Section 1, Population), average annual percent change is computed by use of a *compound interest formula.* This formula assumes that the rate of change is constant throughout a specified compounding period (one year for average annual rates of change). The formula is similar to that used to compute the balance of a savings account which receives compound interest. According to this formula, at the end of a compounding period the amount of accrued change (e.g., school enrollment or bank interest) is added to the amount which existed at the beginning of the period. As a result, over time (e.g., with each year or quarter) the same rate of change is applied to a larger and larger figure.

The *exponential formula,* which is based on continuous compounding, is often used to measure population change. It is preferred by population experts because they view population and population-related subjects as changing without interruption, ever ongoing. Both exponential and compound interest formulas assume a constant rate of change. The former, however, applies the amount of change continuously to the base rather than at the end of each compounding period.

When the average annual rates are small (e.g., less than 5 percent) both formulas give virtually the same results. For an explanation of these two formulas as they relate to population, see U.S. Bureau of the Census, *The Methods and Materials of Demography,* Vol. 2, 3d printing (rev.), 1975, pp. 372-381.

Note: Average annual percent changes were computed using the compound interest rate formula. Whenever possible, absolute values or values with less rounding than appear here were used in the computations.

The reference table cited for each item generally provides more complete information and notations concerning the item. In a number of instances, figures represent revisions and supersede figures shown elsewhere in this volume.

Symbols: – Represents zero or rounds to zero. na Not available. ns Percent change not relevant or significant. x Not applicable. z Less than .05 percent or half the unit of measure shown.

[1]Where na occurs in 1977 column, percent change calculated refers to 1975–1976 period.
[2]These data are as of different dates in the years shown. See reference tables for further information.
[3]Data not strictly comparable year to year because of changes in definition.
[4]Based on 277 standard metropolitan statistical areas (SMSA's) as defined in 1977.
[5]Excludes Armed Forces living in barracks in U.S. [6]For 1960, 14 years old and over.
[7]Will not add to total families; estimates derived using different controls. [8]Excludes Federal practitioners. [9]1965–1970.
[10]Average daily census per 100 beds. [11]Average patient stay of 30 days or less.
[12]1971 data. Percent changes are calculated for 1965–1971 and 1971–1975. [13]Peak month for each year.
[14]In average daily attendance in public day schools. [15]1966 data.
[16]1974 data. Percent changes are calculated for 1970–1974 and 1974–1976. [17]Beginning 1970, includes nursery school.
[18]1965 not strictly comparable with other years; decline in water use in 1975 reflects the increasing use of recycled water.
[19]Particles of smoke, dust, fumes, droplets of viscous liquid, etc.
[20]Comprises employment taxes and contributions, unemployment insurance taxes, and other contributions.
[21]Excludes utilities, insurance trusts, and government liquor stores. [22]Old-age, survivors, disability, and health insurance.
[23]Excludes care covered by social welfare programs; e.g. medical assistance under public aid, Medicare under social insurance, etc.
[24]1967 data. Percent change is calculated for 1967–1970.
[25]Beginning 1975, refers to federally financed Supplemental Security Income.
[26]Includes Military Assistance Service Funded Program and excess defense articles delivered. [27]Includes Armed Forces.
[28]Includes deceased veterans whose dependents receive pensions and compensation benefits. [29]Output per paid hour.
[30]For nonfarm workers as prescribed by Federal legislation. Represents rate in effect on Jan. 1 of year stated.
[31]Beginning 1975, not strictly comparable with earlier years due to revised procedures.
[32]1966 data. Percent change is calculated for 1966–1970.
[33]Includes home purchase, mortgage, interest, taxes, insurance, maintenance, and repairs. [34]1961 data.
[35]Beginning 1975, refers to earned income. [36]Excludes benefit payments resulting from accidents.
[37]Excludes natural gas liquids. [38]Includes natural gas liquids. [39]Federally funded.
[40]Full-time equivalent employees; excludes State and local government agencies.
[41]1961 data. Percent change is calculated for 1961–1970.
[42]Excludes social scientists. [43]Excludes domestic models produced in Canada.
[44]Includes farm operators doing one or more hours of farmwork and unpaid family members doing 15 or more hours of farmwork in survey week. [45]Single-family.
[46]Not strictly comparable with later years. [47]Based on December-adjusted sales and yearend inventory estimates.

Section 1

Population

This section presents statistics on the growth, distribution, and characteristics of the U.S. population. The principal source of these data is the Bureau of the Census, which conducts a decennial census of population, a monthly population survey, a program of population estimates and projections, and a number of other periodic surveys relating to population characteristics. For a list of publications, see the Guide to Sources in Appendix IV.

Decennial censuses.—The U.S. Constitution provides for a census of the population every 10 years, primarily to establish a basis for apportionment of Members of the House of Representatives among the States. For over a century after the first census in 1790, the census organization was a temporary one, created only for each decennial census. In 1902, the Bureau of the Census was established as a permanent Federal agency, responsible for enumerating the population and also for compiling statistics on other subjects.

The census of population is a complete count. That is, an attempt is made to account for every person, for each person's residence, and for other characteristics (sex, age, family relationships, etc.). Since the 1940 census, however, some data have been obtained from representative samples of the population rather than from a complete count, as follows: 5 percent in 1940, 20 percent in 1950, 25 percent in 1960, and 5, 15, and 20 percent in 1970. Exact agreement is not to be expected among the various samples, nor between them and the complete census count. Sample data may be used with confidence where large numbers are involved and assumed to indicate patterns, trends, and relationships where small numbers are involved. For tables of sampling errors for sampled data, see *Census of Population: 1970*, PC(1)-C, *General Social and Economic Characteristics*, Appendix C.

Estimates based on evaluation studies of the 1970 census results indicate a total net underenumeration of about 5.3 million persons, compared with 5.1 million in 1960. Among the persons who were not counted in 1970, about 3.4 million were White and about 1.9 million were Black. The overall rate of net underenumeration in 1970 was about 2.5 percent, compared with 2.7 percent in 1960 and 3.3 percent in 1950. Data from the 1950, 1960, and 1970 censuses have not been adjusted for the estimated underenumeration. For details, see *Estimates of Coverage of Population by Sex, Race, and Age: Demographic Analysis*, PHC(E)-4, February 1974.

In an attempt to estimate the extent of underenumeration in the 1970 census for areas within the United States, such as States, the Bureau has developed several alternate sets of estimates for each State. These estimates suggest variations in the extent of coverage by a number of factors (e.g. region, sex, race). While the State data presented here are not adjusted for underenumeration, detail concerning the Bureau's estimates may be found in *Developmental Estimates of the Coverage of the Population of the United States in the 1970 Census: Demographic Analysis*, series P–23, No. 65.

Current Population Survey (CPS).—This is a monthly nationwide survey of a scientifically selected sample representing, in most cases, the noninstitutional civilian population 14 years old and over. The sample is drawn from about 600 areas comprising approximately 1,100 counties and independent cities with coverage in every State and the District of Columbia and is subject to sampling error. At the present time (1978), about 65,000 housing units or other living quarters are designated for the sample at any time, of which about 55,000 are occupied by households eligible for interview; of these, in turn, about 4 to 6 percent are, for various reasons, unavailable for interview.

While the primary purpose of CPS is to obtain monthly statistics on the labor force, it also serves as a vehicle for inquiries on other subjects. Using CPS data, the Bureau issues a series of publications under the general title of *Current Population Reports*, which cover population characteristics (series P–20), consumer income (series P–60), special studies (series P–23), and other topics.

Population estimates and projections.—National population estimates are derived by use of decennial census data as benchmarks and of data available from various agencies as follows: Births and deaths (National Center for Health Statistics); immigrants (Immigration and Naturalization Service); Armed Forces (Department of Defense); net movement between Puerto Rico and the U.S. mainland (Puerto Rico Planning Board); and Federal employees abroad (Civil Service Commission and Department of Defense). State estimates are based on similar data and also on a variety of data series, including school statistics from State departments of education and parochial school systems.

National population projections indicate the approximate future level and characteristics of the population under given assumptions as to future fertility, mortality, and net immigration. The method used to develop the projections involves preparation of projections of each of the components of population change—births, deaths, and net immigration—and the combination of these with July 1 estimates of the current population. Projections for States and metropolitan areas incorporate further assumptions about the redistribution of population as a consequence of migration.

Population estimates and projections are published in the P–25 series of *Current Population Reports*. These estimates and projections are generally consistent with official decennial census figures and do not reflect the amount of estimated census underenumeration. For details on methodology, see the sources cited below the individual tables.

Standard Metropolitan Statistical Areas (SMSA) and Standard Consolidated Statistical Areas (SCSA).—The general concept of an SMSA is one of an integrated economic and social unit with a large population nucleus; SCSA's are large metropolitan agglomerations consisting of groups of adjacent SMSA's. SMSA's and SCSA's were defined by the Office of Management and Budget (OMB) for several years. However, this function was transferred to the Department of Commerce in October 1977. According to the criteria, the entire territory of the United States is classified as *metropolitan* (inside SMSA's), or *nonmetropolitan* (outside SMSA's). SMSA's and SCSA's are defined in terms of entire counties except in New England, where the definitions are in terms of cities and towns. To summarize data for New England that are available only by counties, New England County Metropolitan Areas (NECMA's) have been developed as a convenience for data users. Periodically, changes in SMSA definitions are made. New SMSA's may be created and the boundaries of others may change. As a result, data for SMSA's over time may not be comparable. For descriptive details, tables showing changes in SMSA definitions, and a listing of area titles and components of each SMSA, SCSA, and NECMA, see Appendix II.

Urban and rural areas.—According to the 1970 census definition, the urban population comprises all persons in (a) places of 2,500 inhabitants or more incorporated as cities, villages, boroughs (except Alaska), and towns (except in New England, New York, and Wisconsin), but excludes persons living in the rural portions of "extended cities" (places with relatively low population density in one or more large parts of their area); (b) unincorporated places of 2,500 inhabitants or more; and (c) other territory, incorporated or unincorporated, included in urbanized areas. An urbanized area consists of a central city, or twin cities, with a total of 50,000 inhabitants or more, together with contiguous closely settled territory (urban fringe).

In censuses prior to 1950, the urban population comprised all persons living in incorporated places of 2,500 inhabitants or more, and certain areas (usually minor civil divisions) classified as urban under special rules relating to population size and density. The previous urban definition was replaced in 1950 by the current definition except for

minor modifications and the introduction of the "extended cities" concept in 1970. In all definitions, the population not classified as urban constitutes the rural population.

Residence.—In determining residence, the Bureau of the Census counts each person as an inhabitant of a usual place of residence (i.e. the place where one usually eats and sleeps). While this place is not necessarily a person's legal residence or voting residence, the use of these different bases of classification should produce the same results in the vast majority of cases.

Race.—For census purposes, the population is divided into three major groups on the basis of race: White, Black or Negro, and other. For the 1960 and 1970 censuses, data were obtained on race principally through self-enumeration; thus, the data represent essentially self-classification by people according to the race with which they identify themselves. Persons of Mexican or Puerto Rican birth or ancestry who did not identify themselves as of a race other than White were classified as White. In 1970, the father's race was used for persons of mixed parentage who were in doubt as to their classification. In 1960, persons who reported mixed parentage of White and any other race were classified according to the other race; mixtures of races other than White were classified according to the father's race.

In the Current Population Survey and other household sample surveys in which data are obtained through personal interview, race is determined by interviewer observation except for persons unrelated to the household head, in which case race is specifically asked for. Race of the father is reported for persons of mixed parentage where such mixture is given by the respondent.

Ethnic origin.—"Ethnic origin" is determined on the basis of a question in the Current Population Survey asking for self-identification of the person's origin or descent and is, therefore, a report on what persons perceive their origin to be. The answers to this question produce results somewhat different from those based on inferences from such characteristics as place of birth, country of origin, language spoken in the home, or surname. Persons of Spanish origin may be of any race.

Nativity.—The native population consists of all persons born in the U.S., the Commonwealth of Puerto Rico, or an outlying area of the U.S. It also includes persons born at sea or in a foreign country who have at least one parent born in the U.S. All others are classified as "foreign born."

Living arrangement.—Living arrangements may be in households or in group quarters. A "household" comprises all persons who occupy a "housing unit," that is, a house, an apartment or other group of rooms, or a room that constitutes "separate living quarters." A household includes the related family members and all the unrelated persons, if any, such as lodgers, foster children, wards, or employees who share the housing unit. A person living alone or a group of unrelated persons sharing the same housing unit as partners is also counted as a household. See text, section 28, Construction and Housing, for definition of "housing unit."

All persons not living in households are classified as living in *group quarters*. These individuals may be *institutionalized*, e.g. under care or custody in jails, correctional centers, hospitals, or rest homes; or they may be residents in college dormitories, military barracks, rooming houses, etc. (see table 72).

Mobility status.—The U.S. population is classified according to mobility status on the basis of a comparison between the place of residence of each individual at the time of the survey or census and the place of residence at a specified earlier date. *Nonmovers* are all persons who were living in the same housing unit at the end of the period as at the beginning of the period. *Movers* are all persons who were living in a different housing unit in the U.S. at the end of the period from that which they were living in at the beginning of the period. *Movers from abroad* include all persons, either citizens or aliens, whose place of residence was outside the U.S. at the beginning of the period, that is, in an outlying area under the jurisdiction of the U.S. or in a foreign country.

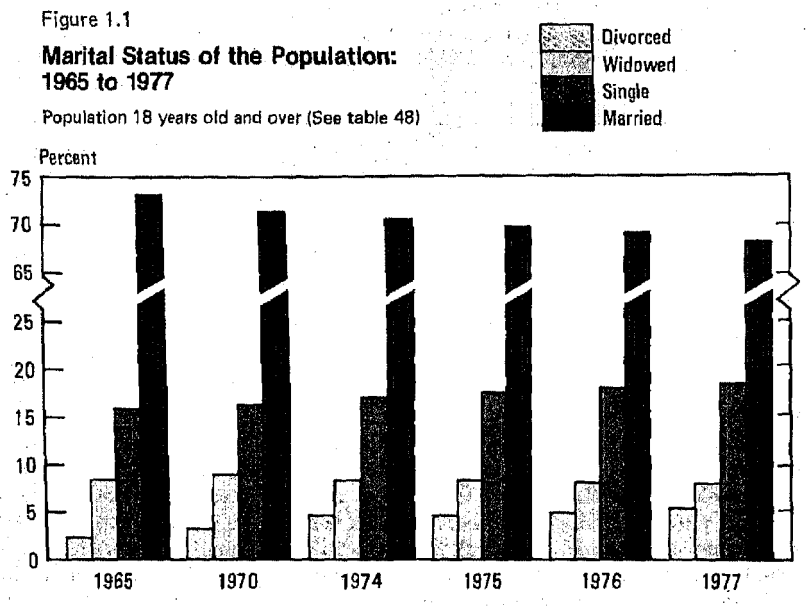
Family.—The term "family" refers to a group of two or more persons related by blood, marriage, or adoption and residing together in a household. A primary family consists of the head of a household and all other persons in the household related to the head. A secondary family comprises two or more persons such as guests, lodgers, or resident employees and their relatives, living in a household and related to each other but not to the household head.

Subfamily.—A "subfamily" consists of a married couple and their children, if any, or one parent with one or more unmarried children under 18 years old, living in a household and related to the head of the household (husband or wife). Members of a subfamily are also members the of primary family with whom they live. The number of subfamilies, therefore, is not included in the number of families.

Married couple.—A "married couple" is defined as a husband and wife living together in the same household, with or without children and other relatives.

Unrelated individuals.—"Unrelated individuals" refers to persons (other than inmates of institutions) who are not living with any relatives. A primary individual is a household head living alone or with nonrelatives only. A secondary individual in a household is a person such as a guest, lodger, or resident employee who is not related to any other persons in the household. Persons in group quarters, except inmates of institutions, are classified as secondary individuals.

Average annual change.—In this section, average annual percent change is computed by the exponential or continuous-compounding method; see p. xii.



Statistical reliability.—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970*. See Appendix I.

Other citizens	(NA)	[16] 187,834	[16] 236,336	25.8	(X)

– Represents zero. NA Not available. X Not applicable. Z Less than .5 square mile.

[1] Figures corrected after 1970 final reports were issued. [2] See footnote 3, table 1.

[3] Puerto Rico was ceded to the United States by Spain in 1898. On July 25, 1952, pursuant to acts of Congress, it achieved the political status of the Commonwealth of Puerto Rico.

[4] Includes population of Corn Islands (1950, 1,304; 1960, 1,872) not shown separately. Lease of Corn Islands from Republic of Nicaragua was terminated in 1971. Area total excludes area of these islands (4 square miles).

[5] Enderbury Island uninhabited in 1950 and 1960; Canton and Enderbury uninhabited in 1970.

[6] Sand Island uninhabited at time of enumeration.

[7] Area is for Navassa (2 square miles), Baker, Howland, and Jarvis (3 square miles), and Palmyra (4 square miles); uninhabited at time of enumeration.

[8] Under jurisdiction of the United States in accordance with treaty of Nov. 18, 1903, with Republic of Panama.

[9] Administered by United States since July 18, 1947, under United Nations Trusteeship system.

[10] Estimated civilian population as of June 30, 1950.

[11] Census of 1958 conducted by the Office of the High Commissioner, Trust Territory of the Pacific Islands.

[12] Comprises 717 square miles of land area and 7,772 square miles of water area.

[13] Excludes U.S. citizens temporarily abroad on private business, travel, etc. Such persons were enumerated at their usual place of residence in the United States as absent members of their own households.

[14] Based on 20-percent sample of reports received.

[15] Based partially on tabulations provided by Dept. of Defense.

[16] Represents U.S. citizens abroad for extended periods. Since this population was enumerated on a voluntary basis, its coverage is probably less complete than that of other categories of Americans abroad.

No. 5. Estimated and Projected Population, by Age and Sex, 1950 to 2000, and Zero Growth Projections, 1980 to 2050

[**In thousands, except percent.** As of **July 1.** Includes Armed Forces abroad. The base date for the projections is 1976. These projections were prepared using the "cohort-component" method. Series I, II, and III assume a slight improvement in mortality, an annual net immigration of 400,000, and completed cohort fertility rates (i.e., average number of lifetime births per 1,000 women) that move toward the following levels: I–2,700; II–2,100; III–1,700. Series II–X differs from Series II only in that it assumes no net immigration. The Series II and Series II–X fertility assumption represents "replacement level" fertility (i.e., the level of fertility at which the population would exactly replace itself in the absence of net immigration). See p. 2 for derivation of estimates and projections. See also *Historical Statistics, Colonial Times to 1970*, series A 23–25 and A 29–41]

X Not applicable. [1] Series II–X, which would reach zero growth around the middle of the twenty-first century, is one of many possible approaches to zero growth. Immediate cessation of net immigration, combined with replacement level fertility would not lead to immediate zero growth because the U.S. has a relatively young age structure (due to the post-World War II baby boom) which provides momentum for continued growth. Immediate zero growth in 1977 (assuming no dramatic change in mortality) would require an annual total fertility rate of about 900 with net immigration at the current level, or about 1,000 with no net immigration. Total fertility rate in 1977 was about 1,800.

No. 6. Center of Population: 1790 to 1970

["Center of population" is that point which may be considered as the center of population gravity of the United States, or that point upon which the United States would balance if it were a rigid plane without weight and the population distributed thereon with each individual being assumed to have equal weight and to exert an influence on a central point proportional to his distance from that point]

YEAR [1]	North latitude			West longitude			Approximate location
	°	′	″	°	′	″	
1790	39	16	30	76	11	12	23 miles east of Baltimore, Md.
1850	38	59	0	81	19	0	23 miles southeast of Parkersburg, W. Va.
1900	39	9	36	85	48	54	6 miles southeast of Columbus, Ind.
1950	38	50	21	88	9	33	8 miles north-northwest of Olney, Richland County, Ill.
1960	38	35	58	89	12	35	In Clinton Co. about 6½ miles northwest of Centralia, Ill.
1970	38	27	47	89	42	22	5.3 miles east-southeast of the Mascoutah City Hall in St. Clair County, Ill.

X Not applicable. Z Less than .05 percent. [1] Except as indicated. [2] For 1940–1976, includes admissions into, less discharges from, Armed Forces abroad. Through 1970, includes "error of closure" (the amount necessary to make the components of change add to the net change between censuses), for which figures are not shown separately. [3] Percent of population at beginning of period. [4] Adjusted for underregistration prior to April 1, 1970. [5] Prior to April 1, 1960, adjusted for underregistration of infant deaths.

[1] 1960 to 1970 based on 1960 population; 1970 to 1977 based on 1970 population.
[2] Comprises both net immigration from abroad and net interdivisional or interstate migration according to the area shown. Includes movements of persons in the Armed Forces.

No. 13. Population Projections—States: 1985 to 2000

[**In thousands.** As of **July 1.** National population projections series II assumes that cohort fertility will approach 2.1 births per woman. Letters represent various interstate migration assumptions: A assumes that the 1965 to 1975 migration patterns will continue; B assumes that the 1970 to 1975 migration patterns will continue; and C assumes no interstate migration after 1975. For further description of series assumptions, see also table 3]

No. 20. Large Metropolitan Areas—Population: 1960 to 1976

[**In thousands, except as indicated.** Covers 163 large SMSA's with estimated population of 200,000 or more as of July 1, 1976, and 13 standard consolidated statistical areas (SCSA's) as defined in *Standard Metropolitan Statistical Areas, 1975, Revised Edition* (Dec. 1975), issued by the Executive Office of the President, Office of Management and Budget. Figures for 1970 include corrections through December 1977. Change measured from April 1, 1960, to April 1, 1970, and from April 1, 1970, to July 1, 1976; minus sign (−) denotes decrease. Rank based on unrounded figures. For definitions and components of SMSA's, SCSA's, and New England County Metropolitan Areas (NECMA's), see Appendix II]

NA Not available. X Not applicable. Z Less than 500 or .05 percent. [1] Land area information supplied by the individual cities. [2] Anchorage city merged with Greater Anchorage Area Borough in 1975. [3] For 1976, the only estimate available (302) is for Baton Rouge which includes all of East Baton Rouge Parish (except Baker City and Zachary Town). [4] Columbus and the unincorporated balance of Muscogee County consolidated on Jan. 1, 1971. [5] Not incorporated in 1950. [6] Hampton and Elizabeth City County consolidated between 1950 and 1960. [7] For 1976, the only estimate available (715) is for the entire county of Honolulu. [8] Indianapolis and the unincorporated balance of Marion County consolidated between 1960 and 1970. [9] Jacksonville and the unincorporated balance of Duval County consolidated between 1960 and 1970. [10] Lexington and Fayette County consolidated between 1970 and 1975. [11] Nashville and the unincorporated balance of Davidson County consolidated between 1960 and 1970. [12] Newport News and Warwick consolidated between 1950 and 1960. [13] Virginia Beach and Princess Anne County consolidated between 1960 and 1970.

No. 25. Components of Population Change, by Race, Between 1960 and 1978

[In thousands, except as indicated. Resident population, excluding Armed Forces abroad. Growth, birth, and death rates per 1,000 population estimated as of **July 1]**

Item	Total [1]	White	Black	Item	Total [1]	White	Black
Apr. 1, 1960, to Apr. 1, 1970				**1960 (calendar year):**			
Population, beg. of period	179,323	158,832	18,872	Net growth rate	16.1	15.1	22.1
Net change during period [2]	23,912	19,266	3,709	Birth rate	23.0	22.7	32.9
Births [3]	39,073	32,543	5,948	Death rate	9.5	9.4	10.3
Deaths	18,209	15,986	2,107	General fertility rate [4]	118.0	113.2	152.7
Net civilian immigration	3,887	3,362	234	**1970 (calendar year):**			
Population, end of period	203,235	178,098	22,581	Net growth rate	12.0	10.6	18.0
				Birth rate	18.3	17.3	25.4
Apr. 1, 1970, to Jan. 1, 1978				Death rate	9.4	9.4	10.0
Population, beg. of period	203,235	178,098	22,581	General fertility rate [4]	87.5	83.5	114.7
Net change during period [2]	14,068	9,921	2,731	**1977 (calendar year): [5]**			
Births	25,578	20,850	4,125	Net growth rate	7.9	6.2	14.3
Deaths	14,913	13,080	1,723	Birth rate	15.3	14.3	21.7
Net civilian immigration	2,793	1,564	304	Death rate	8.8	8.9	8.6
Population, end of period	217,303	188,019	25,312	General fertility rate [4]	67.5	63.7	90.2

[1] Includes other races not shown separately. [2] Includes changes due to movement of Armed Forces to posts overseas and the "error of closure" (the amount necessary to make the components of change add to the net change between censuses). [3] Adjusted for underregistration. [4] Registered births per 1,000 resident females aged 15 to 44 as of July 1. [5] Preliminary.

– Represents zero. B Not shown; for 1960 to 1970, base less than 10,000; for 1970 to 1975, base less than 25,000.
Z Less than 500 or .05 percent. [1] Births minus deaths. [2] Comprises net immigration from abroad and net interdivisional or interstate migration according to the area shown. Includes Armed Forces.
[3] For 1960–1970, base is 1960 resident population; for 1970–1975, base is 1970 resident population.

[1] Average change from 1920. [2] Average annual change since 1970.
[3] Computed using the formula for continuous compounding; see p. xii.
[4] Obtained by dividing resident population by number of households; hence, not strictly average size of household because resident population includes members of group quarters. See table 1 for population 1930–1970; table 48 for population thereafter. [5] Occupied housing units from U.S. Census of Housing reports.

No. 59. Households, Families, and Individuals—Projections: 1978 to 1990

[**In thousands.** As of **July 1.** Includes members of the Armed Forces living off post or with their families on post, but excludes all other members of the Armed Forces. See text, pp. 3 and 4, for definitions of households and families. Series B assumes that the trends in marital status and household proportions observed over the period 1960 to 1974 will continue to 1990. Series A and Series C are based on weighted averages of the Series B proportions and the 1974 observed proportions. Series K assumes that the levels of proportions observed in 1974 will continue to 1990. For additional explanation, see source]

No. 74. Religious Bodies—Selected Data

[Represents latest information available from religious bodies with memberships of 50,000 or more; excludes a few groups giving no data. Not all groups follow same calendar year nor count membership in same way; some groups give only approximate figures. Roman Catholics count all baptized persons, including infants; Jews regard as members all Jews in communities having congregations; Eastern Orthodox Churches include all persons in their nationality or cultural groups; most Protestant bodies count only persons who have attained full membership, and previous estimates have indicated that all but a small minority of these are over 13 years of age; however, many Lutheran bodies and The Episcopal Church now report all baptized persons, and not only those confirmed. Data which appear in italics are "noncurrent," i.e., they are reported for 1975 or earlier. All other data are "current" and were reported in 1976 or 1977]

Section 2

Vital Statistics

This section presents vital statistics—data on births; deaths; abortions; fetal deaths, including still-births; fertility; life expectancy; marriages; and divorces. Vital statistics are compiled for the country as a whole by the National Center for Health Statistics (NCHS) and published in its annual report, *Vital Statistics of the United States*, in certain reports of the *Vital and Health Statistics* series, and in the *Monthly Vital Statistics Report*. Reports in this field are also issued by the various State bureaus of vital statistics. Data on fertility, on age of persons at first marriage, and on marital status and marital history are compiled by the Bureau of the Census from its Current Population Survey (see text, p. 1) and published in *Current Population Reports*, series P-20.

Registration of vital events.—The registration of births, deaths, fetal deaths, and other vital events in the United States is primarily a State and local function. The civil laws of every State provide for a continuous and permanent birth and death registration system. Many States also provide for marriage- and divorce-registration systems.

Births and deaths.—The live-birth, death, and fetal-death statistics prepared by NCHS are based on copies of vital records received from registration offices of all States, of certain cities, and of the District of Columbia. The annual collection of death statistics on a national basis began in 1900 with a national death-registration area of 10 States and the District of Columbia; a similar annual collection of birth statistics for a national birth-registration area began in 1915, also with 10 reporting States and the District of Columbia. Since 1933, the birth- and death-registration areas have comprised the entire U.S., including Alaska (beginning 1959) and Hawaii (beginning 1960). National statistics on fetal deaths were first compiled for 1918 and annually since 1922.

Prior to 1951, birth statistics came from a complete count of records received in the Public Health Service (now received in NCHS). From 1951 through 1971, they were based on a 50-percent sample of all registered births (except for a complete count in 1955 and a 20- to 50-percent sample in 1967). Beginning in 1972, they have been based on a complete count for States in the Cooperative Health Statistics System (for details, see the technical appendix in *Vital Statistics of the United States*) and on a 50-percent sample of all other areas. Mortality data have been based on a complete count of records for each area (except for a 50-percent sample in 1972). Beginning in 1970, births to, and deaths of, U.S. nonresidents have been excluded from the data. Fetal deaths and deaths among Armed Forces abroad are excluded. Data based on samples are subject to sampling error; for details, see annual issues of *Vital Statistics of the United States*.

Mortality statistics by cause of death are compiled in accordance with World Health Organization (WHO) regulations, which specify that member nations classify causes of death according to the *International Classification of Diseases* (ICD). The current classification, the eighth revision of the ICD, has been in use since 1968.

Fertility and life expectancy.—Fertility rates, narrowly defined as the number of births that 1,000 women would have in their lifetime if, at each year of age, they experienced the birth rates occurring in the specified year, are compiled and published by NCHS. Other data relating to social and medical factors which affect fertility rates, such as contraceptive use and birth expectations, are collected and made available by both NCHS and the Bureau of the Census. NCHS figures are based on information in birth and fetal death certificates and on the 1973 and 1976 National Surveys of Family Growth; Bureau of the Census data are based on decennial censuses and periodic surveys.

255-500 O - 78 - 6

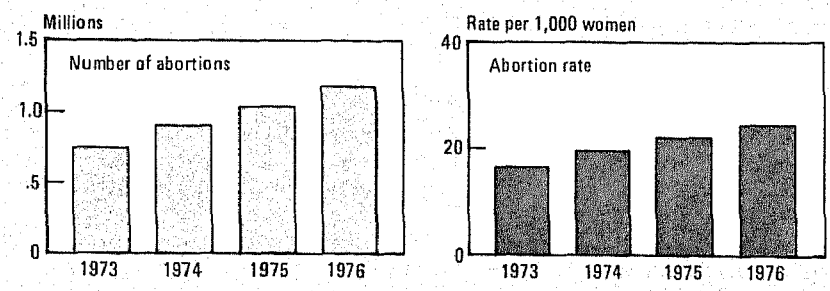
Life expectancy rates are computed and published by NCHS. Age-at-time-of-death data are obtained by examination of death certificates sent to NCHS. The population data on which the rates are based are supplied by the Bureau of the Census and consist of decennial census figures and annual population estimates. For details, see the technical appendix in *Vital Statistics of the United States.*

Marriage and divorce.—The compilation of nationwide statistics on marriages and divorces in the U.S. began in 1887–1888 when the National Office of Vital Statistics prepared estimates for the years 1867–1886. Although periodic updates took place after 1888, marriage and divorce statistics were not collected and published annually until 1944 by that Office. In 1957 and 1958, respectively, the same Office established marriage- and divorce-registration areas. At the beginning of 1957, the marriage-registration area comprised 32 States, the Virgin Islands, and Puerto Rico; by 1977, it also included nine additional States and the District of Columbia. The divorce-registration area, starting with 16 States and the Virgin Islands in 1958, included a total of 29 States and the Virgin Islands by early 1977. Procedures for estimating the number of marriages and divorces in the registration States are discussed in *Vital Statistics of the United States*, vol. III—*Marriage and Divorce.* Data for nonregistration States are gathered mainly by collecting already summarized data on marriages and divorces reported by nonregistration State offices of vital statistics and by county offices of registration.

Another important source of data on marriage and divorce trends in the United States is the Current Population Survey carried out monthly by the Bureau of the Census. For further details, see text, p. 1.

Vital statistics rates.—Vital statistics rates computed by NCHS are based on decennial census population figures as of April 15, 1910; January 1, 1920; and April 1 for 1930, 1940, 1950, 1960, and 1970; and on midyear population figures for other years, as estimated by the Bureau of the Census (see text, p. 2).

Race.—Data by race for births, deaths, marriages, and divorces from NCHS are based on information contained in the certificates of registration. In NCHS's National Survey of Family Growth and the Census Bureau's Current Population Survey, race is determined by interviewer observation. The terms "Negro" and "Black" are interchangeable. With some exceptions, specific usage here is dependent on the source of the data.



Statistical reliability.—For discussion of statistical collection, estimation, and sampling procedures and measures of statistical reliability applicable to Census Bureau and NCHS data, see Appendix III.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See Appendix I.

Figure 2.3

Legal Abortions—Number and Rate per 1,000 Women 15-44 Years Old, 1973 to 1976

(See table 97)

1976	3,168	1,909	48	2,155	1,083	14.8	8.9	15.2	10.0	5.0
1977 [5]	3,313	1,898	47	2,176	1,090	15.3	8.8	14.0	10.1	5.0

NA Not available. [1] Through 1955, figures adjusted for underregistration.
[2] Infants under 1 year old, exclusive of fetal deaths; rates per 1,000 registered live births.
[3] Includes estimates and marriage licenses for some States for all years.
[4] Includes reported annulments and some estimated State figures for all years. [5] Preliminary.

No. 79. Births and Birth Rates: 1940 to 1976

[**Births in thousands and rates per 1,000 population, except as indicated.** Prior to 1960, excludes Alaska and Hawaii. For 1940–1955, births adjusted for underregistration; thereafter, registered births. Beginning 1970, excludes births to nonresidents of U.S. Minus sign (−) denotes decrease. For population bases used to derive these data, see text, p. 57. See also *Historical Statistics, Colonial Times to 1970*, series B 1, B 5-7, and B 20]

No. 80. Total Fertility Rate and Intrinsic Rate of Natural Increase, by Race: 1940 to 1976

[Excludes Alaska prior to 1959 and Hawaii prior to 1960. Prior to 1960, based on births adjusted for underregistration; thereafter, registered births only. The *total fertility rate* is the number of births that 1,000 women would have in their lifetime if, at each year of age, they experienced the birth rates occurring in the specified year. A total fertility rate of 2,110 represents "replacement level" fertility for the total population under current mortality conditions (assuming no net immigration). The *intrinsic rate of natural increase* is the rate that would eventually prevail if a population were to experience, at each year of age, the birth rates and death rates occurring in the specified year and if these rates remained unchanged over a long period of time. Minus sign (—) denotes decrease. See also *Historical Statistics, Colonial Times to 1970*, series B 11]

Annual average and year	Total fertility rate			Intrinsic rate of natural increase			Year	Total fertility rate			Intrinsic rate of natural increase		
	Total	White	Black and other	Total	White	Black and other		Total	White	Black and other	Total	White	Black and other
1940–1944	2,523	2,460	3,010	4.6	3.9	9.8	1968	2,477	2,368	3,197	5.9	4.2	16.0

No. 97. Legal Abortions—Number, Rate per 1,000 Women 15–44 Years Old, and Ratio per 1,000 Live Births, by State of Occurrence: 1974 to 1976

[Numbers of legal abortions are from two surveys of hospitals, clinics, and physicians identified as providers of abortion services, conducted by the Alan Guttmacher Institute. Abortion rates are computed per 1,000 women 15–44 years of age on July 1 of specified year; abortion ratios are computed as the number of abortions per 1,000 live births from July 1, 1974, to June 30, 1975, from July 1, 1975, to June 30, 1976, and from July 1, 1976, to June 30, 1977, respectively, by State of occurrence]

No. 102. Deaths and Death Rates, by Sex, Race, and Age: 1940 to 1976

[**Rates are per 1,000 population for specified groups.** Prior to 1960, excludes Alaska and Hawaii. Beginning 1970, excludes deaths of nonresidents of the U.S. Excludes fetal deaths. 1972 figures based on 50-percent sample of deaths. Rates based on enumerated population as of Apr. 1 for 1940 to 1960 and 1970, and July 1 estimates for other years. See text, p. 57. See also *Historical Statistics, Colonial Times to 1970*, series B 167–173 and B 181–192]

Section 3

Immigration and Naturalization

This section presents statistics related to immigration, naturalization, and alien registration. The principal source of these data is the *Annual Report of the Immigration and Naturalization Service.* Immigration statistics are prepared from entry visas and change of immigration status forms. Statistics for naturalization are compiled from periodic reports by Federal courts and specially designated State courts conducting such proceedings. Alien registration data are compiled from alien address report cards.

The continuous recording of U.S. immigration statistics began in 1819 with the collection of data on immigrants arriving in ports. Under the Act of 1819, the captain or master of a vessel arriving from abroad was required to deliver to the local officials of the U.S. collector of customs a list containing information such as age and sex of all passengers taken on board. Copies of these lists were transmitted to the U.S. Secretary of State, who reported the information periodically to Congress. Subsequently, the Act of 1855 prescribed quarterly reports to the Secretary of State and annual reports to Congress. Later acts were expanded to include gathering data on immigrants arriving at land borders. Beginning in 1906, those arriving were divided into two groups (immigrants and nonimmigrants) depending on how long they intended to remain in the United States (see below).

Immigration statistics were compiled by the Department of State for 1820–1870; by the Treasury Department for 1867–1895; and, since 1892, by a separate Office or Bureau of Immigration, presently a part of the Immigration and Naturalization Service (INS), a unit of the Department of Justice. For 1892–1932, the data appeared in annual reports of the Bureau of Immigration; for 1933–1940, in the *Annual Report of the Secretary of Labor;* for 1941, in the *Annual Report of the Attorney General;* and, since then, in the *Annual Report of the Immigration and Naturalization Service.*

Immigrants.—Immigrants are nonresident aliens admitted to the United States for permanent residence (one year or longer).

Nonimmigrants.—Nonimmigrants are nonresident aliens admitted to the United States for a temporary period. Included in this group are visitors for business and pleasure, students and their spouses and children, foreign and government officials, exchange visitors and their spouses and children, international representatives, treaty traders and investors, representatives of foreign information media, fiances(ees) of U.S. citizens and their children, officials of the North Atlantic Treaty Organization (NATO), aliens in transit, and, for statistical purposes, permanent resident aliens returning after short trips abroad. Excluded are border crossers, crewmen, and insular travelers. Certain temporary admissions such as of persons in possession of border-crossing identification cards are not included in the nonimmigrant totals.

Quota and nonquota immigrants.—Between May 1921, and July 1968, immigrants were required by Federal law to be classified as quota and nonquota immigrants. Quota immigrants were those subject to congressionally-mandated quotas for Eastern Hemisphere countries and their dependencies. Nonquota immigrants included natives of the Western Hemisphere and their spouses and children, immediate relatives of U.S. citizens, and certain groups of special immigrants.

Prior to 1921, Federal law prohibited from entry into the United States only particular categories of persons (convicts, the mentally defective and insane, children under age 16 unaccompanied by parents, persons likely to become public welfare dependents, etc.), usually without respect to country of origin. (The Chinese exclusion law of 1882 which was repealed in 1943 and the automatic exclusion sections of the 1917 Act which barred entry to certain peoples from the geographic regions of Asia and Pacific Islands are

important exceptions.) In 1921, Congress enacted the first numerical ceiling on immigration (357,000 per year) into the United States, although it applied only to Eastern Hemisphere countries and their dependencies. The 1921 Act also established a quota system whereby the total number of immigrants from any individual country was not to exceed 3 percent of that country's U.S. residents in 1910.

For 1925–1929, the congressionally-mandated annual quota of 164,667 was based on 2 percent of foreign-born U.S. residents as determined by the 1890 census. The "national origins" formula which determined quotas from 1929 until 1965, provided that the annual quota equal one-sixth of one percent of the number of White inhabitants in the continental United States in 1920, less Western Hemisphere immigrants and their descendants. The annual quota for each nationality was then determined by the same ratio to 150,000 as the number of inhabitants of each nationality living in the continental United States in 1920 to the total inhabitants, although a minimum quota for any nationality was 100.

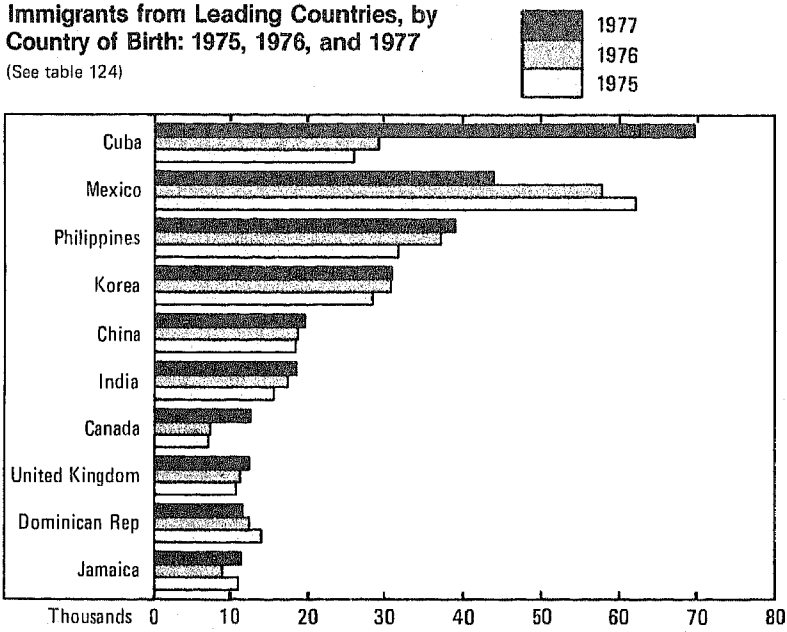
The Act of Oct. 1965 abolished the quota system and in its place set up an annual *numerical* limitation of 170,000 immigrants from the Eastern Hemisphere, with no more than 20,000 immigrants to come from any one country. In July 1968, the new law and the system of numerical limitations went fully into effect. At that time a numerical limitation of 120,000 per year was imposed on Western Hemisphere immigration, which had previously been unrestricted. The 1965 Act thereby abolished the "national origins" system and gave persons from every country within each hemisphere an equal chance to immigrate to the United States. Since 1968, immigrants have been classified as those subject to numerical limitations of the Eastern Hemisphere and to numerical limitations of the Western Hemisphere, and those exempt from numerical limitations (see table 122). Those exempt include immediate relatives (parents, spouses, and children) of U.S. citizens and various classes of special immigrants.

Displaced persons and refugees.—The Displaced Persons Act of 1948 was the first of a number of special acts passed to provide for the admission of refugees from Communist-dominated countries, victims of natural calamities, and orphan children without regard to quotas or the numerical ceilings specified above.

Status of Cubans.—Effective November 2, 1966, Cubans admitted or paroled (i.e. admitted without an immigration visa) into the United States after January 1, 1959, and present in the United States for at least 2 years may obtain permanent resident status. The Act was last amended in 1976; for details, see Public Law 94–571, signed on October 20, 1976.

Alien registration.—The Immigration and Nationality Act of 1952 provides that each alien who is required to be registered under the Alien Registration Act of 1940, and who is in the United States on January 1, must report his current address each year to the U.S. Attorney General during the month of January.

Naturalization.—Prior to 1907 each Federal court and each specially designated State court which conducted naturalization proceedings kept records of naturalizations but no national data were compiled. The Act of June 29, 1906, provided for periodic returns by all courts conducting naturalization proceedings, and for the filing with a central Federal agency of a duplicate copy of each declaration of intention and petition for naturalization filed, and of each certificate of naturalization issued.



Most aliens acquire U.S. citizenship under the general provisions of the Immigration and Nationality Act of 1952, as amended. As specified by that Act, the requirements which must be met by a prospective citizen relate to residency, language proficiency, moral character, loyalty to the United States, attachment to the principles of the Constitution, etc. Spouses and children of U.S. citizens can be naturalized under less stringent conditions. In certain cases, an administrative, judicial, legislative, or executive waiver of the requirements may be obtained. Naturalization statistics are also maintained by INS.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970*. See Appendix I.

No. 120. Immigration: 1820 to 1977

[**In thousands, except rate.** Through 1976, for years ending **June 30**, except as noted; beginning 1977, ending **Sept. 30** For definition of immigrants, see text, pp. 83–84. For 1820–1867, alien passengers arriving; 1868–1891 and 1895–1897, immigrants arriving; 1892–1894 and 1898 to the present, immigrants admitted. Rates based on Bureau of the Census estimates as of July 1 for resident population through 1929, and for total population thereafter (excluding Alaska and Hawaii prior to 1959). See also *Historical Statistics, Colonial Times to 1970*, series C 89]

Section 4
Health and Nutrition

This section presents statistics on health expenditures and insurance coverage; medical personnel; hospitals; nursing homes and other care facilities; incidence of health handicaps and diseases; nutritional intake of the population; per capita food consumption; and Federal food programs. Data on national health expenditures, medical costs, insurance coverage, and hospital costs, which, prior to 1977, were collected by the Social Security Administration (SSA) are now collected by the Health Care Financing Administration (HCFA), and appear in the *Social Security Bulletin,* issued monthly. Statistics on health personnel and inpatient and outpatient facilities are published annually by the U.S. National Center for Health Statistics (NCHS) in *Health Resources Statistics.* Additional data on health personnel are collected by NCHS and are published in the annual *Vital and Health Statistics.* Statistics on hospitals are published annually by the American Hospital Association in *Hospital Statistics.* Primary sources for data on nutrition and Federal food programs are the quarterly *National Food Review* and the annual *Agricultural Statistics,* both issued by the U.S. Department of Agriculture. In addition, NCHS conducts periodic surveys of nutrient levels in the population and clinical signs of malnutrition.

National health expenditures.—Estimates of national health care expenditures prior to 1977 were compiled by type of expenditure and source of funds by the U.S. Social Security Administration. Beginning in 1977, the HCFA has derived these estimates. Estimates for total outlays are drawn from a number of sources of data such as the American Hospital Association; the Veterans Administration; the Department of Defense; the Internal Revenue Service; the Department of Commerce national income accounts in the *Survey of Current Business;* the National Center for Health Statistics; the Social Security Administration; the Bureau of the Census, *Government Finances;* the U.S. Office of Education; the Occupational Safety and Health Administration; the National Aeronautics and Space Administration; and the National Institutes of Health. For details, see the section on "Definitions, Methodology, and Sources of Data" in the annual report on national health expenditures published in the *Social Security Bulletin.*

The general method for arriving at national private health expenditures is to estimate the *total* national outlays (public and private) for each type of medical service or expenditure. From these outlays are then deducted the amounts paid to public and private hospitals, physicians in private practice, etc., under the various Federal, State, and local programs identified as components of total welfare expenditures.

Since 1974, data on public (Federal, State, and local governmental) expenditures have been organized and reported under 10 broad categories of health programs: Health insurance for the aged and disabled (Medicare); temporary disability insurance (medical benefits); workmen's compensation (medical benefits); public assistance (vendor medical payments); general hospital and medical care; Defense Department hospital and medical care (including military dependents); maternal and child health services; other public health activities; veterans' hospital and medical care; and medical vocational rehabilitation. For several Federal health programs, the data are taken from the Office of Management and Budget (OMB) special analysis of health programs. For the remainder, the data are supplied by various Federal, State, and local agencies.

Health resources.—Hospital statistics based on data from the American Hospital Association's yearly survey are published annually in *Hospital Statistics,* and cover all hospitals accepted for registration by the Association. To be accepted for registration, a hospital must meet certain requirements relating to number of beds, construction, equipment, medical and nursing staff, patient care, clinical records, surgical and obstetrical

facilities, diagnostic and treatment facilities, laboratory services, etc. Data obtained from NCHS cover all U.S. hospitals which meet certain criteria for inclusion. They are published in the annual *Health Resources Statistics*, DHEW Publication No. (HRA) 1509, and in *Vital and Health Statistics* reports, series 14. In these reports, a hospital is defined as a facility with at least six inpatient beds that is licensed as a hospital by a State, or is operated as a hospital by a Federal or State agency.

These last two reports also present statistics on the number, geographic distribution, and characteristics of health resources including physicians, dentists, nurses, other health occupations, hospitals, nursing homes, and outpatient facilities. Statistics on the demographic characteristics of persons employed in the health occupations are based on data compiled by the U.S. Bureau of Labor Statistics and reported in *Employment and Earnings* (monthly). Data based on sample surveys of health personnel and utilization of health facilities providing long-term care, ambulatory care, hospital care, and family planning services are presented in NCHS series 13, *Health Resources Utilization Survey*. Statistics on patient visits to health care providers, as reported in health interviews, appear in NCHS series 10, *Health Interview Survey*.

The Social Security Administration's *Health Insurance Statistics* presents data for hospitals and nursing homes as well as extended care facilities and home health agencies. These data are based on records of the Federal Health Insurance for the Aged program (Medicare) begun in 1966 and differ from those of other sources because they are limited to facilities meeting Federal eligibility standards for participation in Medicare.

Data on patients in hospitals for the mentally ill and on mental health facilities are collected by the National Institute of Mental Health (NIMH) and appear in the *Mental Health Statistics* reports, Series A and B, and the Mental Health Statistical Note series.

Institutional population data based on the 1960 and 1970 censuses of the population include information on persons in hospitals, in homes for the aged and dependent, and other group quarters (see tables 72 and 73). Data concerning long-term institutional care are available from the Survey of Institutionalized Persons conducted by the Bureau of the Census for the U.S. Department of Health, Education, and Welfare.

Disability and illness.—General health statistics, including morbidity, disability, injuries, preventive care, and findings from physiological and psychological testing, are collected by NCHS in its Health Interview Survey and its Health and Nutrition Examination Surveys and appear in *Vital and Health Statistics*, series 10 and 11. Morbidity data for members of the Armed Services are prepared and published by the Departments of the Army, Navy, and Air Force. The Department of Labor compiles statistics on industrial injuries (see Section 13). Annual incidence data on notifiable diseases are compiled by the Public Health Service (PHS) at its Center for Disease Control in Atlanta, Georgia, and published as a supplement to its *Morbidity and Mortality Weekly Report*. The list of diseases is revised biennially and includes those which, by mutual agreement of the States and PHS, are communicable diseases of national importance.

Nutrition.—Statistics on annual per capita consumption of food and its nutrient value are estimated by the U.S. Department of Agriculture and published quarterly (nutrient value, annually) in *National Food Review*. Historical data can be found in *Food Consumption, Prices, and Expenditures*, issued annually. Data on the Federally Funded Food Distribution Program for Needy Families and Children, the National School Lunch Program, the Special Milk Program, and the Food Stamp Program are published annually in *Agricultural Statistics*.

Statistical reliability.—For discussion of statistical collection, estimation, and sampling procedures and measures of statistical reliability applicable to data from NCHS and the Health Care Financing Administration, see Appendix III.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970*. See Appendix I.

No. 162. Self-Employed Physicians and Dentists—Median Net Earnings from Practice: 1959 to 1976

[Represents net income from practice after payment of tax-deductible professional expenses but before payment of income taxes. For 1959–1970, data relate to self-employed physicians under age 65; 1971 and 1972, to office-based, patient care physicians under age 65; 1973–1976, to office-based, patient care physicians, all ages. Based on random sampling of all physicians in this category. For 1976 survey, number of usable questionnaires returned represented about 28 percent of the questionnaires mailed. Number of responses to specific questions may be fewer than questionnaires returned. Data for dentists cover gross income (total collected fees) minus professional expenses and include incorporated dentists. For definition of median, see p. xii. See *Historical Statistics, Colonial Times to 1970*, series D 918-919, for physicians and dentists]

No. 172. Long-Term Care Institutions—Summary: 1976

[Covers facilities which offer residential care to persons for an average stay of 30 days or more. Based on Survey of Institutionalized Persons (S.I.P.) which contained samples of institutions, of selected residents in sample institutions, and of families of sample residents. Data differ from tables 164 and 173-175, which list each facility with a separate license as a separate institution. In the S.I.P., a facility was counted as a separate institution for each type of care provided. Thus, a facility providing several types of care was counted as several separate institutions. Resident is any person who was on the patient roster and who was living at the institution or for whom a bed was being held. For definition of median, see p. xii]

INSTITUTIONS AND RESIDENTS	Total	Percent of total	Nursing homes	Physically handicapped	Psychiatric [1]	Mentally handicapped [2]	Children's [3]	Other [4]
Total institutions	23,608	100.0	18,261	387	1,567	1,705	1,324	363

NA Not available. [1] A day when a person cut down on his usual activities for the whole day because of illness or injury. Includes bed-disability, work-loss, and school-loss days. [2] Excludes those with unknown income. [3] A day when a person was kept in bed either all or most of the day because of illness or injury. Includes those work-loss and school-loss days actually spent in bed.

[4] A day when a person lost the entire work day because of illness or injury. Computed for persons 17 years of age and over in the currently employed population, defined as those who were working or had a job or business from which they were not on layoff during the 2-week period preceding the week of interview.

[5] Child's loss of entire school day because of illness or injury. Computed for children 6–16 years of age.

– Represents zero. [1] Impaired vision includes blindness in one or both eyes, cataract, glaucoma, color blindness, detached retina or other condition of the retina, or any other trouble seeing with one or both eyes even when wearing glasses. [2] Severe visual impairment is defined as an inability to read ordinary newsprint with glasses using both eyes, or having no useful vision in either eye, or blindness in both eyes.

[3] Legal blindness is defined as visual acuity for distant vision of 20/200 or less in the better eye, with best correction, or widest diameter of visual field subtending an angle less than 20 degrees.

No. 191. Estimated Alcoholism, by Sex—Total, 1970 and 1975, and by States, 1970

[**Population, 20 years old and over.** An "alcoholic" is defined as one who is unable consistently to choose whether he shall drink or not, and who, if he drinks, is unable consistently to choose whether he shall stop or not. "Alcoholics with complications" are those who have developed bodily or mental disorders through prolonged excessive drinking. Data are rough approximations derived by the original Jellinek formula. In the early 1940's, E. M. Jellinek proposed a formula for estimating the number of "alcoholics-with-complications" from statistics on liver cirrhosis deaths. To arrive at the total number of alcoholics (those with and without complications) the results of the formula were multiplied by a factor, R, the value of which was thought to be 4. Subsequently it appeared that the value of R should have been 5. The formula was applicable to the years 1940–1945 but is thought not to have worked reliably after 1945. However, if the rate of the 1940–1945 period has remained substantially the same, then, with a further necessary correction of R to 5.3, applying the 1945 rates of alcoholism to the 1970 and 1975 population, yields the number of alcoholics. The formula may be less reliable with smaller populations. For Alaska and Hawaii, incomplete base data add uncertainty to the estimates]

No. 196. Four Indexes of Civilian Per Capita Food Consumption: 1950 to 1977

[1967=100. Represents retail weight equivalent of products shown in table 200 along with other minor products. See also *Historical Statistics, Colonial Times to 1970*, series B 444–447]

Index	1950	1955	1960	1965	1970	1972	1973	1974	1975	1976	1977, prel.
Food consumption [1]	95	97	96	97	103	104	102	103	102	105	104
Food use [2]	96	98	96	97	102	104	100	102	101	104	104
Food consumed, pounds [3]	106	104	101	99	101	102	101	100	100	102	102
Calories per capita [4]	102	99	98	98	103	104	103	102	101	105	105

[1] Retail weight equivalent, weighted by constant retail prices.
[2] Farm weight equivalent, weighted by constant prices received by farmers (or equivalent).
[3] Retail weight equivalent. [4] Available for consumption at retail level.

No. 197. Nutrition—Nutrients Available for Civilian Consumption per Capita per Day: 1950 to 1977

[For 1950, excludes Alaska and Hawaii. Based on Bureau of the Census estimated population as of **July 1**. Quantities of nutrients computed by Science and Education Administration, Consumer and Food Economics Institute, on the basis of estimates of per capita food consumption (retail weight), including estimates of produce of home gardens, prepared by the Economics, Statistics, and Cooperatives Service. No deduction made in nutrient estimates for loss or waste of food in the home, use for pet food, or for destruction or loss of nutrients during the preparation of food. Data include iron, thiamin, riboflavin, and niacin added to flour and cereal products; other nutrients added primarily as follows: Vitamin A value to margarine, milk of all types, milk extenders; vitamin B_6 to cereals, meal replacements, infant formulas; vitamin B_{12} to cereals; ascorbic acid to fruit juices and drinks, flavored beverages and dessert powders, milk extenders, and cereals. Minus sign (−) denotes decrease. See *Historical Statistics, Colonial Times to 1970*, series G 851-856, for related data]

No. 200. Civilian Per Capita Consumption of Major Food Commodities: *1960 to 1977*

[In pounds, except as indicated. Civilian consumption represents the residual after exports, nonfood use, military procurement, and ending stocks are subtracted from the sum of beginning stocks, domestic production, and imports. For estimating techniques, see Agriculture Handbook No. 365, vol. 5, April 1972. Based on Bureau of the Census estimates of the civilian population as of July 1. See also *Historical Statistics, Colonial Times to 1970*, series G 881-915]

Section 5

Education

This section presents data primarily concerning formal education as a whole, at various levels, and for public and private schools. Data shown relate to the school-age population and school enrollment, educational attainment, education personnel, and financial aspects of education. In addition, data are shown for libraries, adult education, and vocational training. The chief sources are the decennial census of population and the Current Population Survey (CPS), both conducted by the Bureau of the Census (see text, page 1), and annual, biennial, and other periodic surveys conducted by the National Center for Education Statistics.

The census of population has included data on school enrollment since 1840 and on educational attainment since 1940. The CPS has reported on school enrollment annually since 1945 and on educational attainment and illiteracy periodically since 1947.

The National Center for Education Statistics (NCES), created in 1974 as part of the U.S. Department of Health, Education, and Welfare, is continuing the pattern of statistical studies and surveys conducted by the U.S. Office of Education since 1870. The annual *Digest of Education Statistics* provides summary data on pupils, staff, finances, and organization at elementary, secondary, and higher education levels and is also the primary source for detailed information on Federal funds for education and related activities. Projections of enrollment, graduates, teachers, and expenditures appear in the annual *Projections of Education Statistics. The Condition of Education*, also issued annually, presents a summary of educational information.

Other sources of data include special studies by NCES, publications of the National Education Association, and annual or biennial reports of education agencies in individual States. The census of governments, conducted by the Bureau of the Census every 5 years (for the years ending in "2" and "7"), provides data on school district finances. Reports published by the Bureau of Labor Statistics contain data relating employment experience to educational attainment. Data on vocational training are available in *Vocational and Technical Education*, issued annually by the U.S. Office of Education.

Types and sources of data.—The statistics in this section are of two general types. One type, exemplified by data from the Bureau of the Census, is based on direct interviews with individuals to obtain information about their own and their families' education. Data of this type relate to school enrollment and level of education attained, classified by age, sex, and other characteristics of the population. The school enrollment statistics reflect attendance or enrollment in any regular school within a given period; educational attainment statistics reflect the highest grade completed by an individual.

The second type, exemplified by data from NCES and the National Education Association, is based on reports from administrators of educational institutions and of local and State agencies having jurisdiction over education. Data of this type relate to enrollment, attendance, staff, and finances for the Nation, individual States, and local areas.

Unlike NCES, the Census Bureau does not regularly include specialized vocational, trade, business, or correspondence schools in its surveys. Both the Bureau of the Census and NCES include kindergartens in enrollment figures; the Census Bureau also includes all nursery schools, while NCES includes only publicly financed ones. At the higher education level, the statistics of both agencies are concerned with institutions granting degrees or offering work acceptable for degree-credit, such as junior colleges.

School attendance.—All States except Mississippi require that children attend school. While State laws vary as to the ages and circumstances of compulsory attendance, generally they require that formal schooling begin by age 7 and continue to age 16.

Schools.—NCES defines a *school* as "a division of the school system consisting of a group of pupils composed of one or more grade groups, organized as one unit with one or more teachers to give instruction of a defined type, and housed in a school plant of one or more buildings. More than one school may be housed in one school plant, as is the case when the elementary and secondary programs are housed in the same school plant."

Regular schools are those which advance a person toward a diploma or degree. They include public and private nursery schools, kindergartens, graded schools, colleges, universities, and professional schools. *Public* schools are schools controlled and supported by local, State, or Federal governmental agencies; *private* or *nonpublic* schools are those controlled and supported mainly by religious organizations or by private persons or organizations.

The Bureau of the Census defines *elementary* schools as including grades 1 through 8; *high* schools as including grades 9 through 12; and *colleges* as including junior or community colleges, regular 4-year colleges, and graduate or professional schools. Statistics reported by NCES and the National Education Association by type of organization, such as elementary level and secondary level, may not be strictly comparable with those from the Bureau of the Census because the grades included at the two levels vary, depending on the organization of junior high schools.

School year.—Except as otherwise indicated in the tables, data relating to enrollment and staff refer to the school year which generally begins in September of the preceding year and ends in June of the year stated. For the most part, statistics concerning school finances are for a 12-month period, usually July 1 to June 30.

Statistical reliability.—For a discussion of statistical collection, estimation, and sampling procedures and measures of statistical reliability applicable to Census Bureau and NCES data, see Appendix III.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See Appendix I.

No. 208. Public and Private Schools—Number, by Level: 1940 to 1977

[Prior to 1960, excludes Alaska and Hawaii. Schools classified by type of organization, rather than by grade-group; elementary excludes kindergarten and secondary includes junior high schools. See Appendix III and also *Historical Statistics, Colonial Times to 1970*, series H 413–417 and H 689]

No. 225. Years of School Completed, by Age and Race: 1940 to 1977

[Through 1960, as of **April 1.** 1940 based on complete count; 1950, on 20-percent sample; and 1960, on 25-percent sample. Beginning 1970, as of **March,** based on Current Population Survey; see text, p. 1. Includes members of Armed Forces living off post or with families on post, but excludes all other members of Armed Forces. Beginning 1975, excludes inmates of institutions. For definition of median, see p. xii]

No. 234. High School Graduates Not Enrolled in College, and School Dropouts, 16 to 21 Years Old—Employment Status, by Sex and Race: 1965 to 1977

[In thousands, except percent. As of **October**. Data for high school graduates relate to those not enrolled in college and include those who attended college prior to survey date; data for dropouts relate to persons not in regular school and not high school graduates. Based on samples and subject to sampling variability]

Employment status, sex, and race	Graduates					Dropouts

NA Not available. [1] For 1960 and 1970, enumerated population as of Apr. 1; for all other years, estimated population as of July 1 of preceding year (1939, 1949, etc.). Excludes Armed Forces abroad.
[2] As of fall of preceding year. [3] Preliminary.
[4] Includes librarians and other nonsupervisory instructional staff. [5] Beginning 1960, estimated.
[6] Through 1950, includes community services; therefore, not comparable with later years.
[7] Comprises summer schools, community colleges, adult education, and, beginning 1960, community services.
[8] Excludes adult education and community colleges.
[9] Through 1960, excludes capital outlay by State and local schoolhousing authorities.
[10] Based on current expenditures allocable to pupil costs, capital outlay, and interest.
[11] Excludes current expenditures not allocable to pupil costs. [12] 1975 data.

No. 244. Black Enrollment in Public Elementary and Secondary Schools, by Minority-Group School Enrollment—States: 1974

[As of fall. Excludes Hawaii. "Minority group" refers to Blacks, American Indians, Asian Americans, and Spanish-surnamed Americans. Data are based on a survey of public school districts with a substantial minority-group enrollment. Extent of undercoverage (districts not included) will vary by State. As of fall 1974, there were a total of 7.1 million Black students enrolled in public elementary and secondary schools according to the U.S. Bureau of the Census (see Current Population Report, series P-23, No. 286]

[1] Intermediate and local. Intermediate sources are administrative units or political subdivisions located between school districts and the State. Includes receipts from gifts and tuition, and transportation fees paid by patrons.
[2] Includes salaries of clerical assistants, free textbooks, school library books, and supplies.
[3] Plant maintenance included in plant operation. [4] Comprises current expenditures for summer schools, adult education, community colleges, and community services. [5] Excludes current expenditures for adult education and community colleges. [6] Excludes capital outlay by State and local schoolhousing authority.

Section 6

Law Enforcement, Federal Courts, and Prisons

This section presents data on crimes committed and victims of crimes, arrests, law enforcement employment and expenditures, the legal profession, courts and judges, Federal court cases, Federal and State prisoners, juveniles in court custody, and use of the death penalty. A major source of data on these subjects is the Law Enforcement Assistance Administration (LEAA) which issues several reports including *Criminal Victimization in the United States, Prisoners in State and Federal Institutions, Children in Custody, National Survey of Court Organization,* and *Capital Punishment.* In addition, the annual *Expenditure and Employment Data for the Criminal Justice System* is issued jointly by LEAA and the Bureau of the Census. For other LEAA reports, see "Law Enforcement, Federal Courts, and Prisons" in Appendix IV.

Other major sources of these data include: *Uniform Crime Reports for the United States,* issued annually by the Federal Bureau of Investigation (FBI); the *Annual Report of the Director* and *Special Reports on Federal Offenders and Persons Under the Supervision of the Federal Probation System,* issued by the Administrative Office of the U.S. Courts; *Governmental Finances and Public Employment,* issued annually by the Bureau of the Census; the *Statistical Report,* issued annually by the Federal Bureau of Prisons; and the annual *Juvenile Court Statistics* issued by the U.S. Office of Human Development and the U.S. Office of Youth Development. Statistics on lawyers and law firms are compiled by the American Bar Foundation, Chicago, Illinois, and the Bureau of the Census, respectively.

Legal jurisdiction and law enforcement.—Law enforcement is, for the most part, a function of State and local officers and agencies. The U.S. Constitution reserves general police powers to the States. By act of Congress, Federal offenses include only offenses against the U.S. Government and against or by its employees while engaged in their official duties, and offenses which involve the crossing of State lines or an interference with interstate commerce. Consequently, criminal offenses such as murder, robbery, burglary, theft, assault, and rape are violations of State laws unless they involve Federal property or a Federal officer while engaged in his official duties, or unless they occur in Federal territories or reservations or on the high seas. Excluding the military, there are 52 separate criminal law jurisdictions in the United States: 1 in each of the 50 States, 1 in the District of Columbia, and the Federal jurisdiction. Each of these has its own criminal law and procedure and its own law enforcement agencies. While the systems of law enforcement are quite similar among the States, there are often substantial differences in the penalties for like offenses.

Law enforcement can be divided into three parts. The first, covering investigation of crimes and arrest of persons suspected of committing them, involves municipal, county, and State police; sheriffs, constables, marshals, and Federal agents; and many kinds of special officers. The second phase is prosecution of those charged with crime to judge whether they are legally guilty or innocent. The agencies concerned include courts; justices of the peace; municipal, State, and Federal juries; and prosecuting court officers. The third phase is concerned with the punishment or treatment of persons convicted of crime. While the courts usually determine the sentence after conviction, the penalty is enforced by the detention facility, or by probation or parole officials.

Crime.—There are two major approaches taken in determining the extent of crime. One perspective is provided by the FBI through its Uniform Crime Reporting Program. The FBI receives monthly and annual reports from law enforcement agencies throughout the country, currently representing 95 percent of the national population. Each month,

city police, sheriffs, and State police file reports on the number of offenses that become known to them in the following seven crime categories—murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, and motor vehicle theft. These categories are the basis of the FBI Crime Index and are defined as follows: *Murder and nonnegligent manslaughter*, which is based on police investigations, as opposed to the determination of a medical examiner or judicial body, includes willful felonious homicides and excludes attempts and assaults to kill, suicides, accidental deaths, justifiable homicides, and deaths caused by negligence; *forcible rape* includes forcible rapes and attempts; *robbery* includes stealing or taking anything of value by force or violence or threat of force or violence and includes attempted robbery; *aggravated assault* includes assault with intent to kill; *burglary* includes any unlawful entry to commit a felony or a theft and includes attempted burglary and burglary followed by larceny; *larceny* includes theft of property or articles of value without use of force and violence or fraud and excludes embezzlement, "con games," forgery, etc.; *motor vehicle theft* includes all cases where vehicles are driven away and abandoned, but excludes vehicles taken for temporary use and returned by the taker.

The monthly Uniform Crime Reports also contain data on crimes cleared by arrest and on persons arrested for all criminal offenses, by age, sex, and race of the offender. Annual reports provide an accounting of the number of persons formally charged and their disposition. In summarizing and publishing crime data, the FBI does not vouch for the validity of the reports it receives, but presents the data as information useful to persons concerned with the problem of crime and criminal-law enforcement.

A second perspective on crime is provided by LEAA through the National Crime Survey conducted by the Bureau of the Census. This series of surveys, based on representative samples of households and commercial establishments, are designed to elicit information about experiences, if any, with selected crimes of violence and theft. The surveys, conducted nationally on a continuous basis and for selected cities periodically, focus on victims of crime. The results, published in a series of *Criminal Victimization* reports, present types of crime, frequency of victimization, characteristics of victims, victim-offender relationship (stranger-nonstranger), and whether or not police were notified about the incident.

Courts.—Court statistics on criminal offenses and the outcome of prosecutions are incomplete for the country as a whole, although data are available for many States individually. The only national compilations of such statistics were made by the Bureau of the Census for 1932 to 1945 covering a maximum of 32 States.

The bulk of civil and criminal litigation in the country is commenced and determined in the various State courts. Only when the U.S. Constitution and acts of Congress specifically confer jurisdiction upon the Federal courts may civil litigation be heard and decided by them. Generally, the Federal courts have jurisdiction over the following types of cases: Suits or proceedings by or against the United States; civil actions between private parties arising under the Constitution, laws, or treaties of the United States; civil actions between private litigants who are citizens of different States; civil cases involving admiralty, maritime, or prize jurisdiction; and all matters and proceedings in bankruptcy.

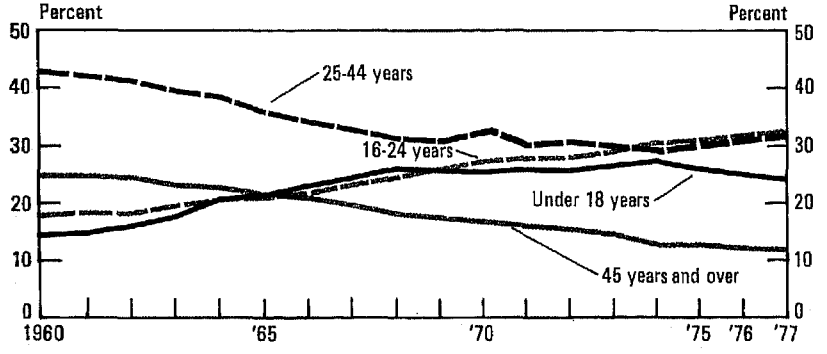
There are several types of courts with varying degrees of legal jurisdiction. These jurisdictions include original, appellate, general, and limited or special. A *court of original jurisdiction* is one having the authority initially to try a case and pass judgment on the law and the facts; a *court of appellate jurisdiction* is one with the legal authority to review cases and hear appeals; a *court of general jurisdiction* is a trial court of unlimited original jurisdiction in civil and/or criminal cases, also called a "major trial court"; a *court of limited or special jurisdiction* is a trial court with legal authority over only a particular class of cases, such as probate, juvenile, or traffic cases.

The 94 Federal courts of original jurisdiction are known as the U.S. district courts. One or more of these courts is established in every State and one each in the District of Columbia, Puerto Rico, the Virgin Islands, the Canal Zone, and Guam. Appeals from the district courts are taken to intermediate appellate courts of which there are 11, known as U.S. courts of appeals. The Supreme Court of the United States is the final and highest appellate court in the Federal system of courts.

Juvenile offenders.—For statistical purposes, the FBI and most States classify as juvenile offenders persons under the age of 18 years who have committed a crime or crimes.

Delinquency cases are all cases of youths referred to a juvenile court for violation of a law or ordinance or for seriously "antisocial" conduct. This broad definition includes conduct which violates the law only when committed by children (e.g. ungovernable behavior); such offenses are termed "juvenile offenses." Several types of facilities are available for those adjudicated delinquent, ranging from the short-term physically unrestricted environment (e.g. a shelter or halfway house) to the long-term very restrictive atmosphere (e.g., a training school).

Prisoners.—Statistics of prisoners have been collected and published for a longer period of time than have other criminal statistics. Data on prisoners in Federal and State prisons and reformatories were collected annually by the Bureau of the Census until 1950, transferred then to the Federal Bureau of Prisons and, in 1971, to LEAA. Adults convicted of criminal activity may be given a prison or jail sentence. A *prison* is a confinement facility having custodial authority over adults sentenced to confinement of more than one year. A *jail* is a facility, usually operated by a local law enforcement agency, holding persons detained pending adjudication and/or persons committed after adjudication to one year or less. Nearly every State publishes annual data either for its whole prison system or for each separate State institution.



Statistical reliability.—For discussion of statistical collection, estimation, and sampling procedures and measures of statistical reliability pertaining to the National Crime Survey, see Appendix III.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970*. See Appendix I.

NO. 326. JUVENILES HELD IN CUSTODY, BY TYPE OF FACILITY—SUMMARY: 1974 AND 1975

[As of June 30, except expenditures for years ending June 30. Data based on private and State and local public juvenile detention and correctional facilities in operation when censuses were initiated (November 1974 and February 1976); also must have been in existence for at least a month before census reference date of June 30, and with a resident population at least 50 percent juvenile. However, a facility was included if it was considered a juvenile facility, even though the youthful offenders outnumbered juveniles at the time of the census. Further, at least 10 percent of a private facility's population had to have been adjudicated delinquent, in need of supervision, voluntarily admitted, awaiting court disposition, or awaiting transfer to another jurisdiction. Excludes juvenile detention centers operated as part of a jail and without a separate staff or budget, nonresidential facilities, facilities exclusively for drug abusers or for alcoholics, facilities exclusively for dependent and neglected children, foster homes, and Federal juvenile correctional facilities. For definition of terms, see source]

No. 332. Average Time Served by Prisoners Released From Federal Institutions for First Time: 1965 to 1977

[For years ending June 30. For 1977, excludes 993 first releases (deaths, escapes, pardons, etc.) other than by parole, expiration of sentence, and mandatory release; also excludes 400 second or subsequent releases. In computing averages, sentences to life and more than 45 years were counted as 45 years; minority sentences of juvenile delinquents were counted from date of sentence to 21st birthday]

Year and offense	Releases, excluding prisoners sentenced under the Youth Corrections Act [1]												Youth Corrections Act releases	
	All first releases				Parole				Expiration of sentence and mandatory release					
	Number	Average sentence (months)	Average time served		Number	Average sentence (months)	Average time served		Number	Average sentence (months)	Average time served		Number	Average time served (months)

NA Not available. [1] Prisoners found guilty of murder or of murder and some other crime(s). [2] Differences in figures for Jan. 1 and Dec. 31 of following year result from revisions. [3] Includes commutations, resentencings, reversals of judgment, grants for new trial, deaths, etc. [4] Period between first imposition of death sentence and date of other disposition. [5] Period between first imposition of death sentence and Dec. 31 of year stated.

No. 337. Prisoners Executed Under Civil Authority: 1930 to 1977

[Excludes executions by military authorities. The Army (including the Air Force) carried out 160 (148 between 1942 and 1950, 3 each in 1954, 1955, and 1957, and 1 each in 1958, 1959, and 1961). Of the total, 106 were executed for murder (including 21 involving rape), 53 for rape, and 1 for desertion. The Navy carried out no executions during the period. See also *Historical Statistics, Colonial Times to 1970*, series H 1155-1167]

Section 7

Geography and Environment

This section presents data on land and water areas, physical geography, and climate of the United States. Statistics on the quality of air and water, on environmental pollutants, and on expenditures for pollution abatement and control are also shown.

There are few publications other than those showing area measurements (issued irregularly by the Bureau of the Census) which present area and geography statistics of a national scope. However, many data are compiled for particular regions or for internal administrative purposes by such Federal agencies as the Geological Survey and National Oceanic and Atmospheric Administration (NOAA). Data on air and water quality and on types and sources of pollutants are compiled by various agencies under the general direction of the U.S. Council on Environmental Quality (CEQ); for details, see the annual report of CEQ, *Environmental Quality*.

Area.—Area measurements were first conducted for the United States as a whole, and gradually were extended to the individual States. The annual report of the U.S. General Land Office for 1850 contained the first reference to measurements of areas of the States and Territories. In 1881, as part of the 1880 Census of Population, the Bureau of the Census laid the foundation for accurate and detailed area measurement in the United States. For the first time an account was given of the methods and maps employed, the water bodies included, and the outer limits of the United States used as a basis for measurement. As part of the 1940 census, the Bureau published *Areas of the United States: 1940*, in which data were presented on the total land and inland water areas of the States, counties, places, and minor civil divisions. In the 1950 and 1960 census reports, adjustments in selected area figures were made because changes in boundaries, development of water reservoirs, or improvements in the maps from which measurements are made had taken place. In 1964, the Bureau undertook a new measurement of the areas of places with at least 1,000 inhabitants, minor civil divisions, and census county divisions of the 1960 census. The results are published in *Area Measurement Reports, Series GE-20*. The series consists of one report for each State and a U.S. summary. These reports include the same kinds of data as the 1940 report. Land areas of places with populations of 2,500 and over as of 1970 are shown in *Census of Population, 1970*, vol. 1, chapter A; data for counties are shown in the separate State reports.

Geography.—The Geological Survey, cooperating with State and local agencies, is responsible for topographic, geologic, and hydrologic maps; basic data on the quantity, quality, and movement of surface and ground water; and classification of Federal lands for mineral and waterpower potential. Data on water usage are published every five years in *Estimated Use of Water in the United States* (the most recent for 1975).

The National Ocean Survey, a division of NOAA, is responsible for coastal and geodetic surveys and measurement of certain physical phenomena. Currently, its primary functions are to provide charts for marine and air navigation, to maintain a basic network of geodetic control, and to compile other basic data for engineering, scientific, commercial, industrial, and defense needs.

Maps prepared by the Bureau of the Census show boundaries of various types of political and statistical areas, such as unincorporated places, the urbanized areas around large cities, county subdivisions, and census tracts.

Environment.—The CEQ is responsible for coordinating all environmental quality programs and for reviewing all other Federal programs affecting the environment. It

reports on its activities in its annual publication, *Environmental Quality*. The principal Federal agency responsible for research and enforcement activities related to pollution abatement and control is the Environmental Protection Agency (EPA). It is also responsible for establishing and monitoring national air quality standards.

Air sampling, conducted by the Public Health Service, began in 17 communities in 1953; in 1957 the National Air Surveillance Network was established and, by the late 1960's, covered approximately 260 urban and 30 rural stations. The operation of the stations was decentralized in 1972 to the 10 regional EPA offices and many of the stations were in turn assimilated into State and locally operated air monitoring networks. The Network determines the extent and nature of air pollution and studies trends in levels of atmospheric contaminants.

National Ambient Air Quality Standards for suspended particulate matter, sulfur dioxide, oxidants, carbon monoxide, and nitrogen dioxide were set by EPA in April 1971. Responsibility for demonstrating compliance with or progress toward achieving these standards lies with the State agencies. Non-Federal sampling stations for suspended particulates increased from approximately 800 in 1969 to over 4,000 in 1975. Data from these State networks are periodically submitted to EPA's National Aerometric Data Bank for summarization in quarterly reports on the nationwide status of, and trends in, air quality; for details, see *National Air Quality Emission Trends*.

Pollution abatement and control expenditures.—Data on expenditures for pollution abatement and control are compiled and published by the Office of Management and Budget (OMB), the U.S. Bureau of Economic Analysis (BEA), the U.S. Bureau of the Census, and the CEQ as part of ongoing programs. OMB collects and publishes figures annually on Federal funds spent for pollution abatement and control in *Special Analyses: Budget of the United States Government*. BEA conducts surveys on national expenditures for pollution abatement and control and presents the data in its *Survey of Current Business*. The U.S. Bureau of the Census collects data on State and local government and industry expenditures for water and air quality control. Data on government expenditures are reported in the annual *Environmental Quality Control: Government Finances*. Industry data are reported periodically in *Current Industrial Reports*. CEQ publishes data in *Environmental Quality*.

Climate.—NOAA, through the National Weather Service and the Environmental Data Service, is responsible for data on climate. NOAA maintains about 11,500 weather stations, of which over 3,000 produce autographic precipitation records, about 600 take automatic or hourly readings of a series of weather elements, and the remainder record data once a day. These data are reported on monthly, with an annual summary, in *Climatological Data: National Summary* and *Local Climatological Data*.

Nearly all weather stations have been moved several times in their history. Consequently, NOAA uses "normal" values of temperature and precipitation for comparative purposes rather than the daily, monthly, and yearly averages which have been derived from records accumulated at the different locations the stations may have had over the years. "Normal" values are obtained by adding the high and the low values recorded for a specified period of time and dividing by 2.

The base period for the normal values of temperature and precipitation is the 30-year period, 1941 through 1970. For stations having records for the entire 30 years from the same instrument site, monthly precipitation and temperature normals are the arithmetic averages of the monthly values for the 30 years. The annual normal temperature is obtained by dividing the sum of the monthly normals by 12.

For stations that did not have continuous records from the same instrument site for the entire 30 years, 1941 through 1970, the means have been adjusted to the record at the present site. In these adjustments, a "difference factor" was used for temperature and a "ratio factor" for precipitation. These factors were determined by parallel comparison with other nearby stations that have a continuous record for the 30-year period

to obtain the resultant adjustment factors. Normals were thereafter obtained by the method described above.

The heating degree-day normals are derived from the monthly mean temperatures, and computed to base 65°F. The heating degree day has been defined as follows: "A unit, based upon temperature difference and time, used in estimating fuel consumption and specifying nominal heating load in winter. For any one day, when the mean temperature is less than 65°F., there exist as many degree days as there are Fahrenheit degree differences in the temperature between the average temperature for the day and 65°F."

Conversion factors.—For information concerning factors for converting figures to the metric system, see page x.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See Appendix I.

No. 339. Territorial Expansion of the United States and Acquisitions of Other Areas

[One square mile = 2.59 square kilometers. Boundaries of all territories listed under "United States" were indefinite, at least in part, at time of acquisition. Area figures shown here represent precise determinations of specific territories which have been marked upon maps, based upon interpretations of the several treaties of cession, which are necessarily debatable. These determinations were made by a committee consisting of representatives of various governmental agencies in 1912. Subsequently these figures were adjusted to bring them into agreement with remeasurements made in 1960. See also *Historical Statistics, Colonial Times to 1970*, series J 1-2]

[1] Figure for Alaska corrected after 1970 Census of Population final reports were issued.

[2] Includes that part of drainage basin of Red River of the North, south of 49th parallel, sometimes considered part of Louisiana Purchase.

[3] Not included in total. Ceded by Spain in 1898, the Philippines constituted a territorial possession of the United States from 1898 to 1946. Granted independence as of July 4, 1946, they then became the Republic of the Philippines.

[4] Ceded by Spain in 1898, ratified in 1899, and became Commonwealth of Puerto Rico by Act of Congress on July 25, 1952. [5] Acquired 1898; ratified 1899. [6] Acquired 1899; ratified 1900.

[7] Under jurisdiction of United States in accordance with treaty of Nov. 18, 1903, with Republic of Panama.

[8] Included in total for 1970. Leased (1914) from Republic of Nicaragua for 99 years but returned April 1971.

[9] Under trusteeship. See table 3, footnotes 9 and 12.

[10] Comprises following islands with gross areas as indicated, in sq. mi.: Midway (2), Wake (3), Palmyra (4), Canton and Enderbury (combined area, 27), Swan (1), Navassa (2), Baker, Howland, and Jarvis (combined area, 3), Johnston and Sand (combined area, less than .5), Kingman Reef (less than .5), and other islands for which area figures are not available.

– Represents zero. X Not applicable. [1] Dry land and land temporarily or partially covered by water, as marshland, swamps, etc.; streams and canals under one-eighth statute mile wide; and lakes, reservoirs, and ponds under 40 acres of area. [2] Permanent inland water surface, such as lakes, reservoirs, and ponds having 40 acres or more of area; streams, sloughs, estuaries, and canals one-eighth statute mile or more in width; deeply indented embayments and sounds, and other coastal waters behind or sheltered by headlands or islands separated by less than 1 nautical mile of water, and islands having less than 40 acres of area. Excludes areas of oceans, bays, sounds, etc., lying within U.S. jurisdiction but not defined as inland water. [3] Figures for Alaska corrected after 1970 Census of Population final reports were issued. [4] Year of ratification of Constitution; one of the original 13 States. [5] See table 3, footnote 8. [6] See table 3, footnotes 9 and 12.

[1] Figures are lengths of general outline of seacoast. Measurements were made with a unit measure of 30 minutes of latitude on charts as near the scale of 1:1,200,000 as possible. Coastline of sounds and bays is included to a point where they narrow to width of unit measure, and includes the distance across at such point.

[2] Figures obtained in 1939–1940 with a recording instrument on the largest-scale charts and maps then available. Shoreline of outer coast, offshore islands, sounds, bays, rivers, and creeks is included to the head of tidewater or to a point where tidal waters narrow to a width of 100 feet.

[1] Beginning 1975, decline in water use reflects the increasing use of recycled treated effluents and cooling water by industrial water users and steam electric utilities.
[2] Total take, including delivery losses but not including reservoir evaporation.
[3] Includes domestic central and commercial water withdrawals.
[4] Rural farm and nonfarm household and garden use, and water for farm stock and dairies.
[5] For 1940–1960, includes manufacturing and mineral industries, rural commercial industries, air-conditioning, resorts, hotels, motels, military and other State and Federal agencies, and other miscellaneous uses; thereafter, includes manufacturing, mining and mineral processing, ordnance, construction, and other miscellaneous uses.

No. 351. Federal Funds for Pollution Abatement and Control—Summary: 1974 to 1978

[In millions of dollars. Through 1975, for years ending June 30; thereafter, for years ending Sept. 30. except as noted. Obligations refer to liabilities, contracts, and other commitments entered into requiring payment of money by the Government. Outlays refer to the issuance of checks or disbursements of cash by the Government to liquidate obligations. Outlays during any fiscal year may be payments of obligations incurred in prior years or in same year:

Media or pollutant	Obligations					Agency	Outlays				
	1974	1975	1976 [1]	1977	1978, est.		1974	1975	1976 [1]	1977	1978, est.

No. 353. Governmental Expenditures for Water, Land, and Air Quality Control Activities: 1974 to 1976

[**In millions of dollars.** For fiscal years ending in year stated. Covers regulatory, administrative, operational, and other activities directly related to the prevention, control and abatement of water pollution, land pollution caused by improper disposal of solid and hazardous wastes, and air pollution]

LEVEL OF GOVERNMENT	WATER QUALITY CONTROL			LAND QUALITY CONTROL [1]			AIR QUALITY CONTROL		
	1974	1975	1976	1974	1975	1976	1974	1975	1976

No. 356. National Ambient Air Quality Stations—Total Stations Reporting, and Number Exceeding Air Quality Standards, by Pollutant: 1970 to 1976

["Exceeding" refers to the number of times when volume of pollution measured in air samples was greater than the standard. Minimal data consist of at least three 24-hour samples or 400 hourly values. Valid annual data records must contain at least five of the scheduled 24-hour samples or 75 percent of possible hourly values in all four quarters. See text, p. 204. $\mu g/m^3$=micrograms of pollutant per cubic meter of air; mg/m^3=milligrams of pollutant per cubic meter of air]

ITEM	1970	1972	1973	1974	1975	1976	
						Total	Exceeding by 50 percent
Suspended particulates:							
Stations reporting at least minimal data	1,283	2,972	3,762	4,270	4,177	4,205	(X)
Exceeding 24-hour secondary standard (150 $\mu g/m^3$)	668	1,275	1,458	1,421	1,269	1,360	520
Exceeding 24-hour primary standard (260 $\mu g/m^3$)	212	311	355	319	276	347	89
Stations with valid annual data	763	1,889	2,024	2,571	2,464	2,691	(X)
Exceeding annual secondary guide (60 $\mu g/m^3$)	550	1,060	996	1,060	984	1,206	267
Exceeding annual primary standard (75 $\mu g/m^3$)	385	626	521	537	453	595	106
Sulfur dioxide:							
Stations reporting at least minimal data	403	1,311	2,008	2,465	2,449	2,500	(X)
Exceeding 24-hour primary standard (365 $\mu g/m^3$)	33	42	103	113	88	74	41
Exceeding 3-hour secondary standard (1,300 $\mu g/m^3$)	13	26	52	76	54	44	25
Stations with valid annual data	184	588	716	1,398	1,374	1,552	(X)
Exceeding annual primary standard (80 $\mu g/m^3$)	29	20	24	40	35	34	4
Carbon monoxide:							
Stations reporting at least minimal data	73	191	299	407	431	432	(X)
Exceeding 1-hour standard (40 mg/m^3)	14	16	33	28	25	8	–
Exceeding 8-hour standard (10 mg/m^3)	60	114	192	233	237	216	76
Total oxidants or ozone:							
Stations reporting at least minimal data	51	162	265	368	492	549	(X)
Exceeding 1-hour standard (160 $\mu g/m^3$)	45	115	217	302	412	472	320
Nitrogen dioxide:

– Represents zero. [1] A violent, rotating column of air descending from a cumulonimbus cloud in the form of a tubular- or funnel-shaped cloud, characterized usually by movements along a narrow path and wind speeds from 100 to over 300 miles per hour. Also known as a "twister" or "waterspout." [2] Preliminary estimate.
[3] Tropical cyclones have maximum winds of 39 to 73 miles per hour; hurricanes have maximum winds of 74 miles per hour or higher.

Section 8

Public Lands, Parks, Recreation, and Travel

This section presents statistics on the Federal public domain and federally owned and leased real property, Indian lands, public outdoor recreation acreage, national parks and forests, State and municipal parks, recreational activities, the performing arts, and domestic and foreign travel.

The primary source for data on public lands is *Public Land Statistics*, published annually by the Department of the Interior, Bureau of Land Management. Data on federally owned land and real property are collected by the General Services Administration and presented in its annual *Inventory Report on Real Property Owned by the United States Throughout the World.* The Economics, Statistics, and Cooperatives Service of the Department of Agriculture also issues statistics on land use and land ownership.

Public domain and acquired lands.—"Original public-domain land" refers to land which was untitled at the time the U.S. Government acquired sovereignty over it; that is, no claim of legal ownership had been established over it by a private individual, or by any State or political subdivision. Title to this land passed directly to the U.S. Government at the time sovereignty was acquired. (Federally owned land within the District of Columbia is not considered to be original public-domain land).

Any original public-domain land which the government has not disposed of under the public-land laws are "public domain lands," as are those lands declared by the Congress to be public lands. Acquired lands are lands the U.S. Government has gained by purchase, condemnation, and gift, for various public purposes, such as sites for public buildings, defense installations, and natural resources conservation activities. Such lands are referred to as "acquired lands."

Indian lands.—Indian lands are the private landholdings of individual Indians or Indian tribes that are subject to special restrictive provisions of Federal law administered by the Bureau of Indian Affairs. They have been set aside for Indian use by treaties, congressional acts, and executive orders. Although most of these lands are in reservations for specific tribes, there are groups of scattered off-reservation allotments in individual ownership and other small tracts of land occupied by Indian groups.

Entries, selections, patents, and certifications.—The data on entries, selections, patents, and certifications refer to transactions which involve the disposal, under the public land laws (including the homestead laws), of Federal public lands to non-Federal owners. In general, original entries and selections are applications to secure title to public lands which have been accepted as properly filed. Some types of applications, however, are not reported until issuance of the final certificate, which passes equitable title to the land to the applicant. Applications become final entries (perfected entries) upon issuance of a final certificate to the applicant after he has complied fully with the requirements of the laws relating to his application. Patents are instruments which pass legal title to the land to the applicant. Certifications are issued in lieu of patents in connection with certain State selections.

Parks and recreation.—The Department of the Interior has responsibility for administering the national parks. As part of this function, it compiles data on and issues various reports relating to the usage of public parks for recreation purposes. The National Park Service publishes information on visits to national parks in its monthly report (also issued cumulatively), *Public Use of the National Parks*; its semiannual report, *Areas Administered by the National Park Service*, presents data on acreage in public

parks; and its *National Parks and Landmarks* gives brief descriptions of each area administered by the Service and also covers sites eligible for registry as natural or national historic landmarks and non-federally owned national historic sites.

The Heritage Conservation and Recreation Service (formerly Bureau of Outdoor Recreation) in the Department of the Interior administers a land and water conservation fund which provides grants to States, counties, and cities for outdoor recreation purposes and to designated Federal agencies for acquisition of new recreational lands and waters. It also issues statistics on the fund and on other aspects of outdoor recreation. The Fish and Wildlife Service compiles and releases data on sport fishing and hunting and on the number and acreage of national wildlife refuges in its annual *Federal Aid in Fish and Wildlife Restoration*, and its *National Survey of Fishing and Hunting*, published every 5 years.

Statistics for State and municipal parks and playgrounds, as well as for other outdoor recreational activities, are compiled by the National Recreation and Park Association, Arlington, Va., which issues its *Recreation and Park Yearbook* at 5-year intervals, and its *Parks & Recreation* monthly. The Department of Agriculture's Forest Service, in its *Annual Report of the Chief*, issues data on recreational uses of the national forests.

Statistics on recreation other than usage of public lands have not generally been compiled and published in a systematic way. In general, many more data are available in the files of public and private bodies than have been published; and much of the publication is in forms not physically permanent nor likely to be preserved in libraries and other reference sources. The series presented here represent only the more readily available data.

Domestic and foreign travel.—Data on the volume and characteristics of domestic travel are collected and published by the Bureau of the Census as part of its Census of Transportation carried out every five years. The most recent data now available are from the 1977 census. Comparable data appear in the Bureau's 1963 *Passenger Transportation Survey*, vol. I, and its 1967 and 1972 *National Travel Survey*, vol. I.

Information on foreign travel and personal expenditures abroad, as well as expenditures by foreign citizens traveling in the United States, is compiled by the U.S. Bureau of Economic Analysis and published in the monthly *Survey of Current Business*. Data on the number of passports issued annually to U.S. citizens are to be found in the annual *Summary of Passport Statistics* issued by the U.S. Passport Office. Statistics on arrivals to and departures from the United States by air are reported by the Department of Transportation in cooperation with the U.S. Immigration and Naturalization Service in *International Air Travel Statistics*. Prior to 1976, data on sea travel were published by the U.S. Immigration and Naturalization Service in its *Annual Report*.

Statistical Reliability.—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability pertaining to the Census of Transportation, see Appendix III.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970*. See Appendix I.

No. 378. Area and Acquisition of the Federal Public Domain: 1781 to 1977

One acre=.4 hectare. Areas of acquisitions are as computed in 1912, and do not agree with figures in square miles shown in table 339 which include later adjustments and reflect subsequent remeasurement. Excludes outlying areas of the United States amounting to 647,655 acres (262,102 hectares) in 1977. See also *Historical Statistics, Colonial Times to 1970*, series J 3–6:

YEAR	LAND AREA [1]		YEAR AND ACQUISITION	ACRES (mil.)			HECTARES (mil.)

1976	762	308							
1977	742	300							

Z Less than 500,000.

[1] Owned by Federal Government. Comprises original public domain plus acquired lands. Estimated from imperfect data available for indicated years. Prior to 1959, excludes Alaska, and 1960, Hawaii. Source: Beginning 1955, U.S. General Services Administration, *Inventory Report on Real Property Owned by the United States Throughout the World*, annual.

[2] Data for Louisiana Purchase exclude areas eliminated by Treaty of 1819 with Spain. Such areas are included in figures for Mexican Cession.

[3] Includes 33,920 acres (13,738 hectares) subsequently part of Texas, which is not a public-domain State.

[4] Represents drainage basin of Red River of the North, south of 49th parallel. Authorities differ as to method and date of its acquisition. Some hold it as part of Louisiana Purchase; others, as acquired from Great Britain.

Source: Except as noted, U.S. Dept. of the Interior. Estimated area, Bureau of Land Management; all other data, Office of the Secretary, *Areas of Acquisitions to the Territory of the U.S.*, 1922.

No. 379. Ownership of Land, by Class: 1959 to 1974

[One acre=.4 hectare. See also *Historical Statistics, Colonial Times to 1970*, series J 66, J 71, and J 76]

CLASS	1959			1969			1974		
	Land		Percent	Land		Percent	Land		Percent
	Acres (millions)	Hectares (millions)		Acres (millions)	Hectares (millions)		Acres (millions)	Hectares (millions)	
Total [1]	**2,271**	**919.8**	**100.0**	**2,264**	**916.9**	**100.0**	**2,264**	**916.9**	**100.0**
Private land [2]	1,332	539.5	58.7	1,317	533.4	58.2	1,317	533.4	58.2

County and municipal land	18	7.3	.8	20	8.1	.9	20	8.1	.9

[1] Changes in total land area are due to variable methods and materials used in periodic remeasurements, and to the construction of artificial reservoirs.

[2] Land owned by individuals, partnerships, and corporations.

[3] Trust land held by tribes and individual owners exclusive of federally owned land used by Indians.

[4] Gross acreage of Federal holdings including highway and road rights-of-way in Federal areas.

[5] Includes the major part of highway and road rights-of-way through predominantly private land areas.

No. 386. Public Domain Lands—Homestead Entries, 1951 to 1977, and Vacant Lands, 1950 to 1977, by States

[**In thousands of acres.** Homestead entries for years ending **June 30** through **1976, Sept. 30** thereafter; vacant lands as of **June 30** through **1976, Sept. 30** thereafter. Excludes States with less than 500 acres in years specified. Vacant public lands are those which are unappropriated and unreserved. The former represent lands not covered by an entry; the latter, lands not reserved for some public purpose, i.e., available for entry or selection under appropriate laws. Data cover vacant public lands other than Alaska, withdrawn for classification in furtherance of Taylor Grazing Act and for conservation and development of natural resources. See text, p. 233. See *Historical Statistics, Colonial Times to 1970*, series J 8 for vacant lands excluding Alaska and J 14 for homestead entries]

– Represents zero.
[1] Original homestead entries. [2] Includes acreage of public lands within grazing districts, as follows (in thousands): 1950, 134,875; 1960, 141,645; 1970, 132,669; 1975, 132,265; 1976, 132,517 and 1977, 133,555.
[3] Includes 4,200 acres for Bureau of Land Management. [4] Excludes Alaska; see footnote 5.
[5] Effective Jan. 17, 1969, all unreserved lands in Alaska were withdrawn from all forms of appropriations or disposition under the Public Land Laws; land and resources were reserved until Dec. 31, 1970, for determination and protection of rights of native Aleuts, Eskimos, and Indians of Alaska. The Alaskan Native Claims Act of Dec. 18, 1971, and Public Land Order No. 5418 dated Mar. 25, 1974, withdraws all unreserved lands in Alaska.

No. 387. Public Domain Land—Entries Under All Acts, by States: 1951 to 1977

[**In thousands of acres.** For years ending **June 30** except, beginning **1977, Sept. 30.** Covers homestead, desert land, and mineral entries, public auction sales, Indian and State selections, and other disposal transactions. See text, p. 233. See also *Historical Statistics, Colonial Times to 1970*, series J 10–12]

No. 406. Gambling Outlays, by Type, and Percent of Adults Participating: 1974

[Covers gambling by persons 18 years old and over for types listed. The standard errors of the estimated total volume of legal and illegal betting are about 17 percent and 25 percent, respectively, of the mean values shown. Therefore, the chances are about 68 out of 100 that the true total lies within a range of $17.3 billion ± $3.0 billion for legal betting and $5.1 billion ± $1.3 billion for illegal. See also headnote, table 407]

NA Not available. [1] Source: *Variety*, New York, N.Y., June 8, 1977 issue (copyright). [2] All shows (new productions and holdovers from previous seasons). [3] Eight performances are normally given in a playing week. [4] Source: Central Opera Service, New York, N.Y., *Directory of American Opera Producing Organizations*. Major companies have annual budgets of $100,000 or more and issue American Guild of Musical Artists (AGMA) contracts to all soloists. Community companies have annual budgets of less than $100,000, issue AGMA contracts to some soloists, and give regularly scheduled performances. Workshops are primarily college and university opera companies. [5] Source: American Symphony Orchestra League, Inc., Vienna, Va. For years ending Aug. 31. Orchestras other than college are principally defined by their annual budgets: Community, $100,000 or under prior to 1967, $50,000 or under thereafter; urban $50,000–$99,999; metropolitan, $100,000–$499,999; and major, $500,000 and over prior to 1976, $1,500,000 and over, thereafter. Prior to 1976, metropolitan included a few orchestras over $500,000. For 1976 and 1977 metropolitan includes 16 and 24 regional orchestras, respectively, with budgets between $500,000 and $1,499,999. [6] Classification began in 1967.

Section 9

Federal Government Finances and Employment

This section presents statistics relating to the financial structure and the civilian employment of the Federal Government. The fiscal data cover taxes, other receipts, outlays, and debt. The principal sources of fiscal data are *The Budget of the United States Government* and related documents, published annually by the Office of Management and Budget (OMB), and the Department of the Treasury's annual *Combined Statement of Receipts, Expenditures and Balances of the United States Government*, the official report relating to the receipts, appropriations, outlays, and fund accounts. The *Statistical Appendix* to the *Annual Report of the Secretary of the Treasury* is a convenient summary of yearly data relating to somewhat broader fields. Detailed data on tax returns and collections are published annually by the Internal Revenue Service. The personnel data relate to staffing and payrolls for the various public functions and agencies, to employee characteristics, and to civil service status; they are published by the Civil Service Commission and the Bureau of Labor Statistics (see p. 254).

Budget concept.—Under the unified budget concept, introduced in the 1969 budget, all Federal monies are included in one comprehensive budget. These monies comprise both Federal funds and trust funds. Federal funds are derived mainly from taxes and borrowing and are not restricted by law to any specific government purpose. Trust funds collect certain taxes and other receipts for specified purposes such as unemployment insurance. In recent years, however, the budget totals, under provisions of law, have excluded some Federal activities—including the Federal Financing Bank, the Postal Service, and the lending activities of the Rural Electrification Administration. For fiscal year 1978, these activities (i.e. off-budget Federal entities) are estimated to equal 2.5 percent of the unified budget. In addition, several privately owned, Government-sponsored activities which primarily perform lending functions are excluded (e.g. the Student Loan Marketing Association). These activities are estimated to equal 3.6 percent of the unified budget in 1978. Data showing unified budget totals of budget receipts and outlays are presented in the 1979 *Budget* for the years 1940 to 1978; more detailed tables generally show data since 1969.

Receipts arising from the Government's compulsory powers are reported as governmental receipts; all other receipts, e.g., from business-type or market-oriented activities, are offset against outlays. Outlays are reported on a checks-issued (net) basis.

Debt concept.—For most of U.S. history, the total debt consisted of debt borrowed by the Treasury (i.e. public debt); it did not include monies which agencies were authorized to borrow without going through the Treasury (e.g. the Postal Service). The new debt series, also introduced in 1969, includes both public debt and agency debt. The *gross Federal debt* includes money borrowed by the Treasury and by various Federal agencies; it is the broadest generally used measure of the Federal debt. *Total public debt* is restricted to borrowing by the Treasury and the value of savings bonds at current redemption value.

Treasury receipts and outlays.—All receipts of the Government, with a few exceptions, are deposited to the credit of the U.S. Treasury regardless of ultimate disposition or availability for expenditure. Under the Constitution, no money may be withdrawn from the Treasury unless appropriated by the Congress.

The day-to-day cash operations of the Federal Government clearing through the accounts of the U.S. Treasury are reported in the *Daily Treasury Statement*. Extensive detail on the public debt is published in the *Monthly Statement of the Public Debt of the United States*.

Budget receipts and outlays of the Government and other transactions appear in the *Monthly Treasury Statement of Receipts and Outlays of the United States Government.* The monthly *Treasury Bulletin* contains analytical material on fiscal operations and related Treasury activities, including financial statements of Government corporations and other business-type activities.

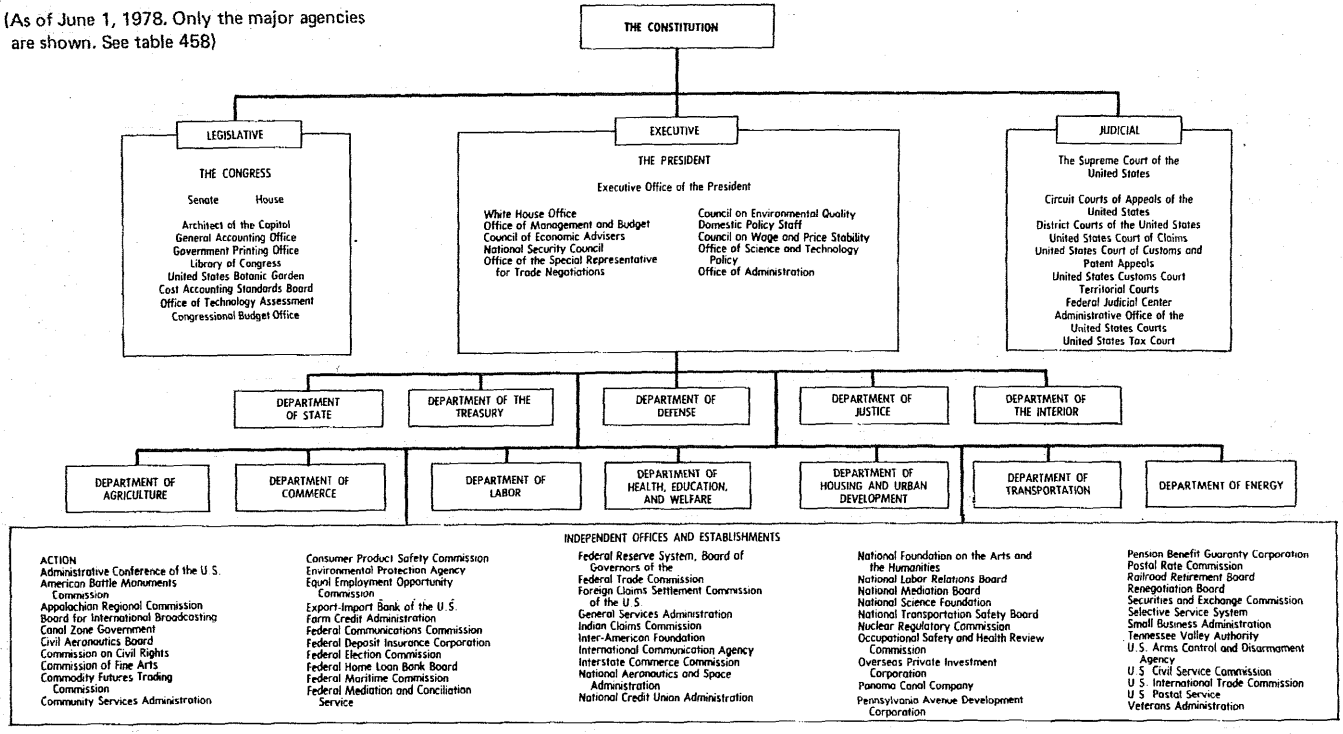
Receipts such as taxes, customs duties, and miscellaneous budget receipts, which are collected by Government agencies, and outlays represented by checks issued and cash payments made by disbursing officers are reported in the *Monthly Treasury Statement* cited above and in the annual *Combined Statement of Receipts, Expenditures and Balances.* These monthly and annual reports include deposits and collections in, and payments from, accounts of Government agencies held outside the Treasury as well as those of the general account of the United States Treasury and are on the same basis as the unified budget.

Income tax returns and tax collections.—Tax data are compiled by the Internal Revenue Service of the Treasury Department. The *Annual Report of the Commissioner of Internal Revenue* gives a detailed account of tax collections by kind of tax and by regions, districts, and States. The agency's three annual *Statistics of Income* reports present detailed data from individual income tax returns, corporation income tax returns, and business tax returns, respectively. The report on business tax returns presents financial data for sole proprietorships and partnerships. Periodic *Statistics of Income* publications present local area data for individuals as well as data from fiduciary income tax and estate tax returns, and data on sales of capital assets by individuals, foreign income and tax reported by corporations, and estate tax wealth.

Relation to national income accounts and GNP.—The Federal sector of the *national income and product accounts* focuses upon Federal transactions (comprising both Federal and trust funds) entering into national income, the gross national product, and other parts of the national economic accounts (see table 419). These accounts, however, include only receipts and outlays which directly affect the current flow of income and output, and therefore exclude such transactions as loans. Also, the Federal sector account records many taxes as they accrue, instead of as they are collected, and records most purchases at the time of delivery.

Employment and payrolls.—The Civil Service Commission collects employment and payroll data from all departments and agencies of the Federal Government, except the Central Intelligence Agency and the National Security Agency. Employment figures represent the number of persons who occupied civilian positions on the last day of the calendar month shown and who are paid for personal services rendered for the Federal Government, regardless of the nature of appointment or method of payment. Intermittent workers are counted if they performed any service during the reporting month.

Federal payrolls include all payments for personal services rendered during the calendar month and payments for accumulated annual leave of employees who separate from the service. Since most Federal employees are paid on a biweekly basis, the calendar month earnings are partially estimated on the basis of the number of work days in each month where payroll periods overlap consecutive months.



Federal employment and payroll figures are published by the Civil Service Commission in its *Annual Report* and its *Monthly Release, Federal Civilian Workforce Statistics.* It also publishes semiannual employment data for minority groups; annual reports on salary and wages; geographic distribution; and data on occupations of white- and blue-collar workers as well as data on women Federal employees. Data on Federal employment are also issued by the Bureau of Labor Statistics in its *Monthly Labor Review* and in *Employment and Earnings.*

No. 426. Federal Government Trust Fund Balances: 1970 to 1978

[**In billions of dollars.** As of **June 30** except, beginning **1977**, as of **Sept. 30.** Balances are that portion of funds authorized for use which have not been spent. Amounts include both open-book balances with Treasury and investments in U.S. securities. Part of the balances is obligated, part unobligated. The balances on an authorization basis exceed the cash balances because, for a few accounts, budget authority is not the same as receipts. See text, p. 253, for discussion of the budget concept and of trust funds.

No. 432. Revenue Losses (Tax Expenditures) Due to Federal Tax Laws: 1975 to 1977

[**In millions of dollars.** For years ending **June 30** except, beginning **1977**, ending **Sept. 30.** Tax expenditures are the estimated revenue losses attributable to provisions of the Federal tax laws which allow a special exclusion, exemption, or deduction from gross income or which provide a special credit, a preferential rate of tax, or a deferral of tax liability. Estimates of each tax expenditure are made independently of any other tax provision. If 2 or more items were eliminated simultaneously, resulting revenue change might be larger or smaller than the sum of estimates shown for individual items. Change in tax rates or other basic tax provisions would affect estimates for individual items. Therefore, totals give only estimated orders of magnitude. Year-to-year differences in estimates of particular items may be due to changes in tax law or revised estimating techniques]

BUDGET FUNCTION AND ITEM	1975	1976			1977 [1]		
		Total	Corporations	Individuals	Total	Corporations	Individuals
National defense:							
Exclusion of benefits and allowances to Armed Forces personnel	650	1,020	(X)	1,020	1,095	(X)	1,095

No. 437. Federal Individual Income Tax Returns with Adjusted Gross Income—Summary: 1950 to 1976

[Includes Puerto Rico and Virgin Islands. Includes returns of resident aliens; based on a sample of unaudited returns as filed. Taxability or nontaxability is determined by presence or absence of income tax *after credits* (exemptions, deductions, etc.). Classification as "nontaxable" generally based on each return as originally filed and does not reflect subsequent changes (amended returns, audits, etc.). Adjusted gross income is gross income from all sources subject to tax reduced by legally permitted subtractions such as: Expenses of operating a business or trade, losses from sales of capital assets, etc. See *Historical Statistics, Colonial Times to 1970*, series Y 393-411, for related data]

No. 444. Federal Income and Payroll Taxes for a Four-Person Family With One Earner, by Selected Earnings Levels: 1963 to 1977

[**Tax rate is percent of earnings, or tax liability divided by earnings.** Data represent "effective" tax rates and were calculated from statutory individual income and payroll tax rates. Payroll taxes include both employee and employer taxes. For the $5,000, $10,000, and $15,000 categories, it is assumed that the standard deduction was taken. For the $25,000, $35,000, and $50,000 categories, itemized deductions are assumed. Income tax surcharge is included for 1968 and 1970]

Year and item	Tax (dol.) for earnings level of—						Tax rate (percent) for earnings level of—					
	$5,000	$10,000	$15,000	$25,000	$35,000	$50,000	$5,000	$10,000	$15,000	$25,000	$35,000	$50,000

No. 447. Corporation Income Tax Returns—Summary: 1950 to 1975

[In billions of dollars, except as indicated. Beginning 1955, estimates based on samples. All data based on returns for periods ending between **July 1** of year shown and of following year, as filed. All corporations are required to file returns except those specifically exempt, such as fraternal, civic, and charitable organizations not operating for profit. Excludes returns of inactive corporations. See source for changes in law affecting comparability of historical data. Corporate data based on income tax returns appear on pp. 561–563 and 570–573. See also *Historical Statistics, Colonial Times to 1970*, series Y 381–392]

ITEM	1950	1955	1960	1965	1970	1971	1972	1973	1974	1975

Total receipts [1]	458	642	849	1,195	1,751	1,906	2,171	2,558	3,090	3,199
Net income less deficit [2]	43	47	44	74	66	80	97	120	146	143
Returns with net income:										
Number of returns.....1,000..	426	513	670	915	1,008	1,064	1,140	1,203	1,207	1,226
Total receipts [1]	431	585	724	1,080	1,453	1,621	1,895	2,266	2,647	2,703
Net income [2]	44	50	50	81	84	97	113	138	171	169
Total tax liability [3]	17	22	22	30	32	36	40	49	62	60
Distributions to stockholders [4]	11	13	17	25	30	31	34	40	46	43
Returns without net income:										
Number of returns.....1,000..	203	294	470	509	657	669	673	702	759	797
Total receipts [1]	27	57	125	115	298	285	276	292	443	496
Deficit [2]	2	3	7	7	18	17	16	18	25	27
Inactive corporations, number of returns.....1,000..	37	35	47	66	82	71	74	76	77	76

[1] Consists of business receipts, taxable and nontaxable interest, rents, royalties, net gain from capital assets (as defined by law) and other property, dividends, and other taxable income. Includes nontaxable interest.
[2] Net income (less deficit) is a tax concept and therefore excludes wholly tax-exempt interest; beginning 1965, includes constructive taxable income from related foreign corporations.
[3] Tax liability is before deduction for foreign tax credit. Beginning 1965, data are after investment credit, and beginning 1972, after work incentive (WIN) credit. Beginning 1965, includes tax from recomputing prior year investment credit; 1970 and 1971, includes tax surcharge; 1970–1975, includes additional tax for tax preferences; beginning 1973, includes tax from recomputing prior year work incentive (WIN) credit. [4] Other than own stock.

No. 462. Salaries of Selected Executive and Legislative Officials in the Federal Government: 1907 to 1978

Year [1]	President	Vice President	Cabinet officers	Congressmen	Year [1]	President	Vice President	Cabinet officers	Congressmen
1907	[2] $50,000	$12,000	$12,000	$7,500	1964	[3]	$43,000	35,000	[3]
1909	75,000	[3]	[3]	[3]	1965	[3]	[3]	[3]	30,000
1925	[3]	15,000	[4] 15,000	[4] 10,000	1969	[5] $200,000	[7] 62,500	60,000	42,500
1946	[3]	20,000	[3]	[5] 15,000	1975	[3]	[7] 65,600	63,000	44,600
1949	[6] 100,000	30,000	22,500	[3]	1976	[3]	[7] [8] 68,800	[8] 66,000	[8] 46,800
1955	[3]	35,000	[3]	22,500	1977	[3]	[7] 75,000	66,000	57,500
1956	[3]	[3]	$25,000	[3]	1978	[3]	[3]	[3]	[3]

[1] When salary change became effective. [2] Compensation enacted in 1873. [3] No change from prior year shown. [4] Legislation reduced amounts by 15, 10, and 5 percent, successively, during 1932–35. Full salary restored Apr. 1, 1935. [5] Includes $2,500 expense allowance that was tax free until 1953. Allowance discontinued Mar. 1, 1955. For income tax, members may deduct up to $3,000 a year for living expenses. [6] Plus $50,000 for official expenses. [7] Plus $10,000 expense allowance. [8] Pursuant to Legislative Branch Appropriation Act, 1977, funds were not available to pay a salary at a rate which exceeded the rate in effect on Sept. 30, 1976; therefore, these officials were paid at the rate in effect on that date.

Section 10

State and Local Government Finances and Employment

This section presents data on revenues, expenditures, debt and government employment within State and local governments. Nationwide statistics relating to State and local governments, their numbers, finances, and employment, are compiled primarily by the Bureau of the Census through a program of censuses and surveys. Every fifth year (for years ending in "2" and "7") the Bureau conducts a Census of Governments involving collection of data for all governmental units in the United States. In addition, the Bureau conducts annual surveys which cover all the State governments and a sample of local governments.

Publications issued annually by the Bureau of the Census include a report on governmental finances which presents figures for the Federal Government, nationwide totals for State and local governments, by type, and State-local data by States. Also issued annually are a series of publications on State, city, and county finances, and on city, county, and other public employment. Financial data are published in the GF publication series; employment data in the GE series. There are also a series of quarterly reports covering tax revenue, and finances of major public employee retirement systems, as well as a series of special studies. *Recurrent Publications on Governments* describes the publication program.

Basic information for Census Bureau statistics on governments is obtained mainly by mail canvass from State and local officials; however, financial data for each of the State governments and for many of the large local governments are compiled from their official records and reports by Census Bureau personnel. Financial data on the Federal Government are obtained by the Bureau from the Office of Management and Budget and are published in the *Budget* (see page 253).

Governmental units.—The governmental structure of the United States includes, in addition to the Federal Government and the States, thousands of local governments—counties, municipalities, townships, school districts, and numerous kinds of "special districts." As shown by table 493, more than 79,800 local governments were identified by the 1977 Census of Governments. As defined by the census, governmental units include all agencies or bodies having an organized existence, governmental character, and substantial autonomy. While most of these governments can impose taxes, many of the special districts—such as independent public housing authorities, the New York Port Authority, and numerous local irrigation, power, and other types of districts—are financed from rentals, charges for services, benefit assessments, grants from other governments, toll charges, and other nontax sources. The count of governments excludes semi-autonomous agencies through which States, cities, and counties sometimes provide for certain functions—for example, "dependent" school systems, State institutions of higher education, and certain other "authorities" and special agencies which are under the administrative or fiscal control of an established governmental unit.

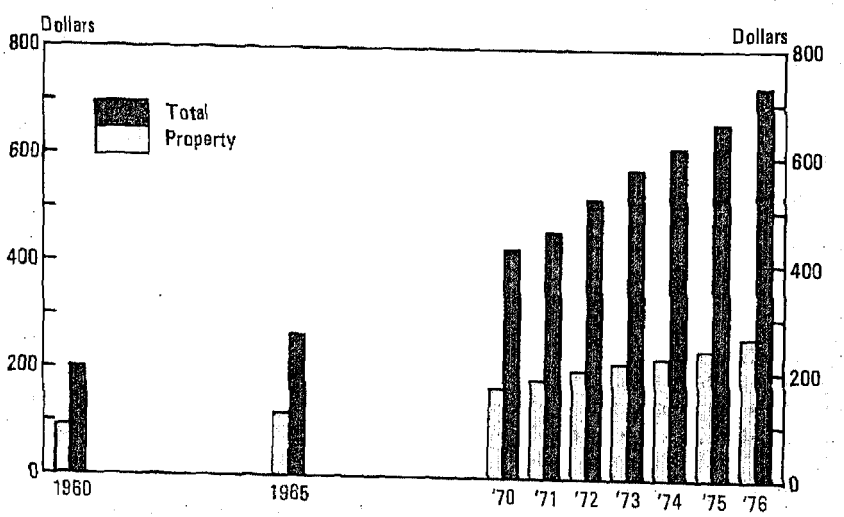
Finances.—Unless otherwise stated, financial data relate to fiscal years. Most States end their fiscal year June 30. This was also the practice of the Federal Government until 1976 when its fiscal year, by an act of Congress, began to extend from Oct. 1 to Sept. 30. A three month quarter (July 1 to Sept. 30, 1976) facilitated the transition. Beginning 1963, local government figures are for fiscal years which closed at various dates during the 12 months ended June 30 of the year specified; figures for 1962 and earlier years are for fiscal years ended during the calendar year.

Nationwide government finance statistics must be classified and presented in terms of uniform concepts and categories, rather than according to the highly diverse terminology,

organization, and fund structure utilized by individual governments. Accordingly, financial statistics which appear here for the Federal Government and for individual States have been standardized and may not agree directly with figures appearing in the original sources.

Statistics on governmental finances distinguish among general government, utilities, liquor stores, and insurance trusts. General government comprises all activities except utilities, liquor stores, and insurance trusts. Utilities include local government water supply, electric light and power, gas supply, and transit systems. Liquor stores are operated by 17 States and by local governments in four States. Insurance trusts relate to employee retirement, unemployment compensation, and other social insurance systems administered by State and local governments.

Employment and payrolls.—These data are mainly based on mail canvassing of State and local governments. Payroll includes all salaries, wages, and individual fee payments for the month specified, and employment relates to all persons on governmental payrolls during a pay period of the month covered—including paid officials, temporary help, and (unless otherwise specified) part-time as well as full-time personnel. Figures shown for individual governments cover major dependent agencies such as institutions of higher education, as well as the basic central departments and agencies of the government.



Statistical reliability.—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970*. See Appendix I.

X Not applicable. [1] Many States also commonly allow other types of exemptions, such as physical or mental disability exemptions, and tax credits for items such as specified contributions or taxes paid to other jurisdictions. [2] Tax credit. [3] Effective minimum rate is 2.5% due to application of a tax reduction credit. [4] Tax on capital gains and dividends applicable to taxpayers (individual or joint) with a Federal adjusted gross income in excess of $20,000. [5] $20,000 to $21,999. [6] Subject to specified limitations. [7] Minimum exemption is $1,000; maximum exemption is $2,000. [8] All exemptions and deductions are incorporated into tax tables which must be used when filing State tax returns. [9] Incomes of husbands and wives filing joint returns are treated separately for purposes of taking the standard deduction; therefore, minimum deduction is $500 and maximum deduction is $1,000. [10] Data apply to tax on earned income and annuities; 10% (flat rate) imposed on net capital gains, interest, and dividends. Only income in excess of $3,000 for single taxpayers and $5,000 for married taxpayers filing jointly is taxable. A 7.5% surtax on tax liability is additional. [11] No tax is due at specified minimum levels of income because an allowance is made for a tax credit equal to tax liability. [12] Incomes of husbands and wives filing joint returns are treated separately for purposes of taking the standard deduction; therefore, minimum deduction is $750 and maximum deduction is $1,500. [13] 10% surtax on tax liability is additional. [14] Based on Federal income tax liability as follows: Nebraska, 18%; Rhode Island, 17%; Vermont, 25% plus 9% surtax. Since State tax is computed as a percentage of the Federal tax liability, in effect the Federal standard deduction and exemptions are adopted. As of January 1, 1977, the Federal standards comparable to the ones presented in this table were: Personal exemptions, single-$750, married filing joint return-$1,500, dependents-$750; standard deduction, percent-zero, single $2,200, married filing joint return-$3,200. [15] Tax on interest and dividends. [16] Each spouse having taxable income is eligible for $600 deduction; maximum exemption is, therefore, $1,200. [17] Data apply to recently adopted personal income tax applicable July 1, 1976. Provisions vary for New York, Pennsylvania, and Delaware commuter taxes. [18] No tax is due if adjusted gross income is below $2,500 for single taxpayers and $5,000 for married taxpayers filing jointly. [19] Joint returns are inapplicable; however, a husband and wife may elect to file separate returns on a combined form. [20] Plus a 1% tax on net income in excess of $2,000 of taxpayers who derive income from the operation of a business, trade, or profession other than as an employee. A 2% surtax on tax liability is additional. [21] Refunds or forgiveness of tax due are based on specified poverty income levels.

No. 497. Gross Assessed Value of Property Subject to Local General Property Taxation—States: 1976

[**In billions of dollars, except percent.** Excludes value of totally exempt property. U.S. figures excluding partially exempt property amounted to a net value of $1,190 million in 1976. Excluded from property tax base were: (1) Property owned by nonprofit and other qualifying groups or institutions (used for government, religion, nonprofit medical care, and education); (2) new industrial plants exempt for stated periods of time as inducement to new industry; and (3) property exempted by specific legislative action]

[1] All assessment is performed by a State agency but assessed values are shown here as "locally assessed" for comparability with data presented for other States. [2] Two sets of values are locally recorded for taxable property. For comparability with data for other States, the assessed values shown here pertain to the final values against which tax rates are applied, rather than to the preliminary "full and true," "true and full," and "market," or (in Illinois) local unadjusted values. [3] Assessed values are State equalized values, which are the legal values for the levy of the authorized tax rates within the State.

Section 11

Social Insurance and Welfare Services

This section presents data related to governmental expenditures on social welfare; governmental programs for old-age, survivors, disability, and health insurance (OASDHI); governmental and railroad employee retirement; private pension and employee benefit plans; government unemployment and temporary disability insurance; Federal supplemental security income payments and aid to the needy; and maternal, child, and other welfare services. Also included here are selected data on workmen's compensation, including black lung benefits; vocational rehabilitation; the American Red Cross; United Way campaign; and philanthropic trusts and foundations.

The principal source for these data is the Department of Health, Education, and Welfare's (HEW) monthly *Social Security Bulletin*, which presents current data on many of the programs and summary data in annual statistical supplements. Current data on employment security are published monthly in the Department of Labor's *Unemployment Insurance Statistics*. Data on benefits for railroad workers appear in the Railroad Retirement Board's *RRB Quarterly Review* and *Annual Report*. Statistics on aid to families with dependent children (AFDC) are presented in the U.S. Social Security Administration's monthly publication, *Public Assistance Statistics*.

Social insurance under the Social Security Act.—Programs established by the Social Security Act provide protection against wage loss resulting from retirement, prolonged disability, death, or unemployment, and protection against the cost of medical care during old age and disability. The Federal OASDHI program provides monthly cash benefits to retired or disabled insured workers and their dependents and to qualified survivors of insured workers. To be eligible, a worker must have had a specified period of employment in which OASDHI taxes were paid. A worker becomes eligible for full benefits at age 65, although reduced benefits may be obtained up to 3 years earlier; the worker's spouse is under the same limitations. Special benefits are also provided to those persons 72 and over who do not meet insured status requirements. Under certain conditions, survivor benefits are payable to dependents of an insured worker, including aged parents and other qualifying dependents (widow or widower in place of spouse) who are eligible for retirement benefits. Disability benefits are payable to an insured worker under age 65 with a prolonged disability and to the worker's dependents on the same basis as dependents of retired workers. A lump sum benefit is also payable on the death of an insured worker.

Beginning in July 1966, a Federal health insurance program (medicare) has provided two coordinated plans for nearly all people age 65 and over: (1) A hospital insurance plan which covers hospital and related services and (2) a voluntary supplementary medical insurance plan, financed partially by monthly premiums paid by participants, which covers a portion of physicians' services and related medical services. Beginning July 1973, such insurance was extended to disabled beneficiaries of any age under certain circumstances and to persons with chronic kidney disease.

Retirement, survivors, disability, and hospital insurance benefits are paid for by a payroll tax on annual earnings (up to a maximum of earnings set by law) of workers, employers, and the self-employed. These taxes are adjusted periodically through Federal legislation to reflect increasing income levels (see table 527). Tax receipts and benefit payments are administered by Federal trust funds. The special benefits for uninsured persons, age 72 and over, and hospital benefits for persons 65 and over with specified amounts of social security coverage less than that required for cash benefit eligibility, are financed from Federal general revenues.

Both unemployment insurance and the public employment (placement) service are presently administered by the U.S. Employment and Training Administration and each State's employment security agency. By agreement with the U.S. Secretary of Labor, State agencies also administer unemployment compensation for eligible ex-servicemen and Federal employees, unemployment assistance under the Disaster Relief Act of 1970 to individuals unemployed because of major disasters, workers assistance and relocation allowances under the Trade Expansion Act, and direct aid (training and related cash allowances) under Federal manpower and adjustment acts.

State unemployment insurance laws pay benefits, related to the individual's past earnings, to unemployed eligible workers. State laws vary concerning the length of time one may collect benefits and their amount. In most States, benefits are payable for 26 weeks and, with Congressional approval during periods of high unemployment, extended benefits are payable under a Federal-State program to those who have exhausted their regular State benefits. The amount of the basic benefit can vary among States by over 100 percent. In addition, some States may adjust the basic benefit upward with allowances for dependents.

Funds for the payment of unemployment insurance are derived by a Federal unemployment tax levied on the taxable payrolls of most employers. Taxable payroll under the Federal Act and most State laws is the first $8,000 in wages paid each worker during a year. Employers are allowed a percentage credit of taxable payroll for contributions paid to States under State unemployment insurance laws. The remaining percent of the Federal tax finances administrative costs, the Federal share of extended benefits, and advances to States.

Excluded from Federal tax coverage are the railroad industry (see below), agricultural and domestic service, nonprofit organizations, and government employment although they may be covered by State law. Through temporary legislation, enacted in 1974, workers lacking sufficient covered employment to qualify for regular unemployment insurance benefits are eligible for special unemployment assistance if they had worked in an area with a high unemployment rate.

Social insurance for railroad workers.—The Railroad Retirement Act, administered by the U.S. Railroad Retirement Board, covers railroad employees and companies and provides retirement annuities for aged and disabled workers and for spouses of retired employees, and benefits to survivors of deceased workers. Wage credits of railroad workers are combined with social security covered employment at the time of computation of benefits. These annuities and benefits, including medicare hospital insurance, are financed primarily through an employer-employee tax on earnings up to a monthly maximum of one-twelfth of the annual social security tax base. The 1978 tax rates are 15.55 percent for employers and 6.05 percent for employees. Supplemental annuities, which are financed by a special variable quarterly tax on railroad employers for each employee-hour compensated, have been provided for career employees since 1966. Also, medicare health insurance is available to railroad workers on the same basis as to workers covered by social security. The Railroad Unemployment Insurance Act provides benefits for unemployment and sickness financed by contributions from covered employers on earnings not over $400 a month. Contribution rates vary from year to year according to a graduated schedule based on account balances; the 8 percent maximum rate is applicable in 1978.

Social insurance for Government employees.—The civil service retirement program is the major system providing age and service, disability, and survivor annuities for Federal civilian employees. The employee contribution rate is 7 percent of total base pay; the Federal Government contributes the remainder of the cost. In addition, there are separate retirement systems for the uniformed services (supplementing OASDHI) and for a few special groups of Federal civilian employees.

State and local government employees are covered for the most part by State and

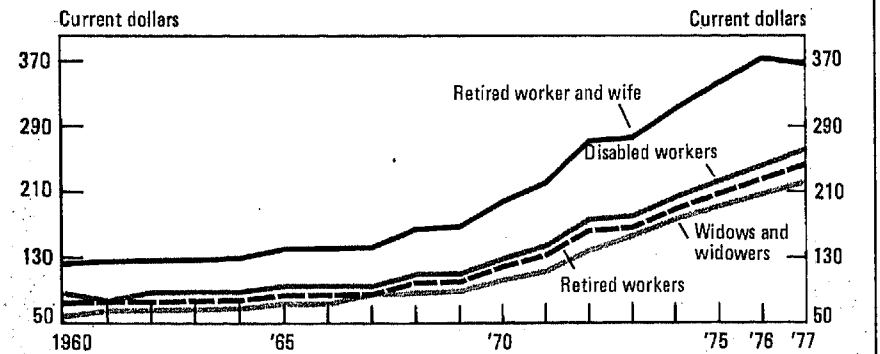
local retirement systems similar to the Federal civil service retirement system. In many jurisdictions these benefits supplement OASDHI coverage.

Workmen's compensation.—All States provide protection against work-connected injuries and deaths although some States exclude certain workers (e.g. domestic help). Federal laws cover Federal employees, private employees in the District of Columbia, and longshoremen and harbor workers. In addition, the Social Security Administration and the Department of Labor administer a "black lung" benefits program for coal miners disabled by pneumoconiosis and for specified dependents and survivors. Specified occupational diseases are compensable under most laws. In most States, benefits are related to the worker's salary. The benefits may or may not be augmented by dependents' allowances or automatically adjusted to prevailing wage levels.

Public aid.—Individuals who qualify are assisted through public assistance programs administered by the States and the supplemental security income (SSI) program administered by the Social Security Administration. Prior to 1974, States, assisted by Federal funds in the form of grants, provided social services and money payments to those eligible (e.g. the aged, blind, disabled, and families with dependent children). The Emergency Assistance program and general assistance were also available.

Beginning 1974, the SSI program replaced Federal grants for aid to the aged, blind, and disabled in the 50 States and the District of Columbia. Federal grants continue for the AFDC program, Emergency Assistance Program, social services, and Medicaid, and for all programs in Guam, Puerto Rico, and the Virgin Islands. The SSI program provides a minimum income for the aged, blind, and disabled and establishes uniform national basic eligibility requirements and payment standards. States are permitted to supplement the basic Federal payment to the extent they choose.

Health and welfare services.—Programs providing health and welfare services are aided through Federal grants to States for child welfare services, vocational rehabilitation, activities for the aged, maternal and child health services, maternity and infant care projects, comprehensive health services, and a variety of public health activities.



Statistical reliability.—For discussion of statistical collection, estimation, and sampling procedures and measures of statistical reliability applicable to HEW and Census Bureau data, see Appendix III.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See Appendix I.

X Not applicable. [1] Excludes refunds to those leaving service. Federal data include military retirement. [2] Includes compensation for Federal employees and ex-servicemen, trade adjustment and cash training allowance, and payments under extended, emergency, disaster, and special unemployment insurance programs. [3] Unemployment and temporary disability insurance. [4] Cash and medical benefits in 5 areas. [5] Benefits by private insurance carriers, State funds, and self-insurers. Beginning 1970, Federal includes Black Lung benefit programs. [6] Includes payments under State general assistance programs and, beginning 1970, work incentive activities, not shown separately. [7] Medical vendor payments are those made directly to suppliers of medical care. [8] Refugee assistance, surplus food for the needy, and work-experience training programs under the Economic Opportunity Act and the Comprehensive Employment and Training Act. [9] Includes medical care for military dependent families. [10] Excludes servicemen's group life insurance. [11] Federal expenditures for administrative costs (Office of Education) and research not shown separately, but included in total.

[12] Construction costs of vocational and adult education programs included under elementary-secondary expenditures. [13] Federal expenditures represent primarily surplus foods for nonprofit institutions. 1960 State and local expenditures for welfare, n.e.c., included in Institutional care. [14] Represents primarily child welfare services under title V of the Social Security Act. [15] Includes domestic programs consolidated in 1972 under ACTION (former VISTA, Foster Grandparents, and other domestic volunteer programs) and OEO programs such as community action and migrant workers. [16] Federal expenditures include administrative expenses of the Secretary of Health, Education, and Welfare and of the Social and Rehabilitation Service; Indian welfare; and aging and juvenile delinquency activities. State and local include antipoverty and manpower programs, child care and adoption services, legal assistance, and other unspecified welfare services.

Source: U.S. Social Security Administration, *Social Security Bulletin*, January 1977.

No. 517. Social Welfare Expenditures Under Public Programs: 1950 to 1976

[**In millions of dollars, except percent.** For Federal Government, most States, and some localities, years ending June 30. Represents outlays from trust funds (mostly social insurance funds built up by earmarked contributions from insured persons, their employers, or both) and budgetary outlays from general revenues. Includes administrative expenditures, capital outlay, and some expenditures and payments outside U.S. See table 516 for program detail. See *Historical Statistics, Colonial Times to 1970*, series H 1-47, for related but not comparable data]

[1] For old-age, survivors, disability, and health insurance (OASDHI), average monthly number; for railroad retirement program, public employee retirement systems, veterans programs, and the black lung benefit program, number on rolls June 30; for State unemployment and temporary disability insurance, average weekly number; for railroad unemployment and temporary disability insurance, average number during 14-day registration period; Area Redevelopment Act and Manpower Development and Training Act programs, number on rolls Dec. 31. [2] Includes benefits to dependents where applicable.

[3] Excludes payments for medical care. [4] Payable in Calif., N.J., N.Y., R.I., and Puerto Rico under public and private plans. Data for beneficiaries in N.J. not available.

[5] Number represents families for Federal programs under the Uniformed Services Contingency Option Act of 1953 and for State and local government retirement systems. [6] Lump sums are for burial of deceased veterans.

[7] Includes payments made by the States as agents of the Federal Government under the Federal employees' unemployment compensation program and under the Ex-Servicemen's Compensation Act of 1958, and payment under the extended unemployment insurance programs, the Trade Expansion Act of 1962, and the Disaster Relief Act of 1970. Beneficiaries relate to regular State unemployment insurance, Federal employee, and ex-servicemen programs only. Includes Puerto Rico.

[8] Area Redevelopment Act of 1961 (Nov. 1961–June 1966) and Manpower Development Training Act of 1962 (Aug. 1962–June 1975).

NA Not available. X Not applicable. [1] Benefit payment actually being made at a specified time with no deductions or with deductions amounting to less than a month's benefits, i.e., the benefits actually being received. [2] 62 years and over, except 1960 for men, 65 years and over. [3] Disabled workers under age 65. [4] Includes wife beneficiaries under age 65 with entitled children in their care and, beginning Sept. 1965, entitled divorced wives. [5] Includes disabled persons aged 18 and over whose disability began before age 18 (22, beginning Jan. 1973) and, beginning Sept. 1965, entitled full-time students aged 18-21. [6] Includes surviving divorced mothers with entitled children in their care and, beginning June 1975, widowed fathers with entitled children in their care. [7] Beginning Sept. 1965, includes widows aged 60-61 and surviving divorced wives aged 60 and over; beginning March 1968, disabled widows and widowers aged 50 and over; and beginning Jan. 1973, widowers aged 60-61. [8] Benefits for persons aged 72 and over not insured under regular or transitional provisions of Social Security Act. [9] Benefits payable with reduction for early retirement, at ages 62-64. [10] Includes awards suspended chiefly because of earnings of the retired worker and awards converted from disability awards to retirement awards on attainment of age 65. Also includes awards to transitionally insured persons aged 72 and over. [11] Represents total disbursements of benefit checks by the U.S. Dept. of the Treasury during the years specified. [12] Distribution by type estimated.

No. 542. Employee-Benefit Plans—Summary: 1960 to 1975

[Coverage data refer to civilian wage and salary workers at end of year; contributions, to amounts subscribed by employers and employees, in total. An "employee-benefit plan" is any type of plan sponsored or initiated unilaterally or jointly by employers or employees and providing benefits that stem from the employment relationship and that are not underwritten or paid directly by government (Federal, State, or local). In general, the intent is to include plans that provide in an orderly predetermined fashion for (1) income maintenance during periods when regular earnings are cut off because of death, accident, sickness, retirement, or unemployment and (2) benefits to meet medical expenses. Excludes workmen's compensation required by statute and employer's liability. See also *Historical Statistics, Colonial Times to 1970*, series H 70-114]

ITEM AND TYPE OF PLAN	1960	1965	1970	1972	1973	1974	1975

No. 546. Medical Insurance (Medicare) Under Social Security—Enrollees and Charges for Covered Services: 1969 to 1974

[Covers supplementary medical insurance under the old-age, survivors, disability, and health insurance program; see text, p. 323. For 1969–1972, "Deductible met" refers to enrollees whose charges equaled or exceeded $50 after which insurance makes partial payments; beginning 1973, it refers to enrollee charges over $60. "Deductible not met" refers to enrollees with expenditures less than these amounts]

ITEM	ENROLLEES AND CHARGES					PERCENT				
	1969	1970	1972	1973	1974	1969	1970	1972	1973	1974

X Not applicable. [1] Employer subject to State unemployment insurance law when he has employed at least one worker on at least 1 day in each of specified number of weeks within current or preceding calendar year and or specified wages as indicated. [2] Source: U.S. Bureau of Labor Statistics, *Employment and Wages*, quarterly. [3] For pay period including the 12th of the month. [4] Wages subject to unemployment insurance tax. Includes State and local government coverage as well as private industry coverage; see text, p. 324.
[5] Percent of workers covered by insurance. [6] Weeks compensated divided by first payments.
[7] Based on first payments for 12-month period ending June 30.
[8] Contributions from employers; also employees in States which tax workers.

1960 TO 1977, AND STATES AND PUERTO RICO, 1977

employees where covered by State law; excludes unemployment compensation for Federal employees

[9] Includes payments under State (not Federal) temporary extended unemployment insurance provisions.
[10] Sum of balances in State clearing accounts, benefit-payment accounts, and State accounts in Federal unemployment trust funds. Minus sign (−) denotes deficit. [11] For one quarter. [12] Also covers employers of 20 or more agricultural workers in 20 weeks. [13] For four quarters. [14] For three quarters.

Source: Except as noted, U.S. Employment and Training Administration, *Unemployment Insurance Statistics*, monthly, and *Annual Report of the Secretary of Labor*.

No. 558. Workmen's Compensation Payments, by States: 1950 to 1976

[**In millions of dollars.** Payments represent cash and medical benefits and include insurance losses paid by private insurance carriers (compiled from the *Spectator* (*Insurance by States . . . of Casualty Lines*), from reports of State Insurance commissions, and from A. M. Best Co.); net disbursements of State funds (from the *Spectator*, from *Argus Casualty and Surety Chart*, and from State reports), estimated for some States; and self-insurance payments, estimated from available State data. Calendar-year data, except fiscal-year data for Federal civilian and other programs and for a few States with State funds. Includes benefit payments under Longshoremen's and Harbor Workers' Compensation Act and Defense Bases Compensation Act for States in which such payments are made]

No. 559. Workmen's Compensation Payments: 1950 to 1976

[Prior to 1960, excludes Alaska and Hawaii. See headnote, table 558. See also *Historical Statistics, Colonial Times to 1970*, series H 332–345]

ITEM	1950	1960	1965	1970	1972	1973	1974	1975	1976
Workers covered [1]—mil.	37	45	51	59	62	66	68	67	69
Annual benefits paid—mil. dol.	**615**	**1,295**	**1,814**	**3,031**	**4,039**	**5,092**	**5,765**	**6,520**	**7,463**
By private carriers [2]—mil. dol.	381	810	1,124	1,843	2,179	2,514	2,971	3,412	3,976
From State funds [3]—mil. dol.	149	325	445	755	1,358	1,987	2,081	2,324	2,589
Employers' self-insurance [4]—mil. dol.	85	160	244	432	502	592	713	784	898
Type of benefit:									
Medical/hospitalization—mil. dol.	200	435	600	1,050	1,240	1,470	1,750	2,000	2,330
Compensation payments—mil. dol.	415	860	1,214	1,981	2,799	3,622	4,015	4,520	5,133
Disability—mil. dol.	360	755	1,074	1,751	2,339	2,962	3,345	3,800	4,328
Survivor—mil. dol.	55	105	140	230	460	660	670	720	805
Percent of covered payroll:									
Workmen's compensation costs [5]	.89	.93	1.00	1.20	1.13	1.19	1.25	1.32	1.48
Benefits [6]	.54	.59	.61	.66	.67	.71	.76	.82	.88

[1] Estimated per month. [2] Net cash and medical benefits paid under standard workmen's compensation policies. [3] Net cash and medical benefits paid by competitive and exclusive State funds and by Federal workmen's compensation programs, including black lung benefit program beginning 1970. [4] Cash and medical benefits paid by self-insurers, plus value of medical benefits paid by employers carrying workmen's compensation policies that exclude standard medical coverage. [5] Premiums written by private carriers and State funds, and benefits paid by self-insurers increased by 5–10 percent to allow for administrative costs. Also includes benefits paid and administrative costs of Federal system for government employees. [6] Excludes programs financed from general revenue—black lung benefits and supplemental pensions in some States.

– Represents zero. NA Not available. [1] Includes payment to the blind, not shown separately.
[2] Total includes payments to Indochina refugees (U.S. total, 5.7 million). In addition, the total was reduced to reflect returned checks and overpayment refunds in some States. [3] Federal SSI payments only; State has State-administered supplementation. [4] Includes federally administered State supplementation as follows: for Ill., months prior to Oct. 1974; for Miss. and Vt., for July–Dec. 1974; for S.C. and Utah, for months prior to July 1975; for Minn., prior to October 1975; for Ind. and Wyo., prior to October 1976.
[5] Federal SSI payments only; State supplementary payments not made.

No. 581. Foundations—Number and Finances, States and Other Areas

[Figures are for latest year reported by foundations, usually 1975 or 1976. A foundation may be defined as a non-governmental, nonprofit organization, with funds and programs managed by its own trustees or directors, and established to maintain or aid social, educational, charitable, religious, or other activities serving the common welfare, primarily by making grants. Excludes organizations which make general appeals to the public for funds, act as trade associations for industrial or other special groups, are restricted by charter solely to aiding one or several named institutions, or which are captive trusts, within colleges, churches, or other organizations, or are small—defined as having neither assets of $1,000,000 nor making grants of at least $100,000 in the latest year of record. There were approximately 23,500 small foundations]

Section 12

National Defense and Veterans Affairs

This section presents statistics on national defense and its human and financial costs; active and reserve military personnel, ships, and aircraft; Selective Service operations; and various federally sponsored programs and benefits for veterans. The principal sources of these data are the annual *Selected Manpower Statistics* and other reports issued by the Office of the Secretary of Defense; annual reports of the Departments of the Army, Navy, and Air Force, the Defense Civil Preparedness Agency, and the National Guard Bureau; the Selective Service System; *Annual Report of Administrator of Veterans Affairs*, Veterans Administration; and *The Budget of the United States Government*, Office of Management and Budget.

Department of Defense (DOD).—The Department of Defense is responsible for providing the military forces of the United States. It includes the Office of the Secretary of Defense, the Organization of the Joint Chiefs of Staff, the military departments (Army, Navy, Air Force), and the defense agencies (e.g. Defense Logistics Agency). The Secretary of Defense is appointed from civil life by the President with the approval of the U.S. Senate. The President serves as Commander in Chief of the Armed Forces; from him, the authority flows to the Secretary of Defense and through the Joint Chiefs of Staff to the commanders of unified (e.g. the overseas commands in Europe and the Pacific where Army, Navy, and Air Force activities are unified under command of a single person) and specified commands (e.g. Strategic Air Command).

The Joint Chiefs of Staff are the principal military advisers to the Secretary of Defense, the President, and the National Security Council. Members who are the senior military officers of their respective services are responsible for keeping the Secretary of their respective military departments fully informed on matters considered or acted upon by the Joint Chiefs of Staff. The chairman is the highest ranking U.S. military officer.

Each military department is separately organized under its own Secretary who is responsible to the Secretary of Defense for the operation of that department. Commanders of unified and specified commands are responsible to the President and the Secretary of Defense for missions assigned to them.

Selective Service.—The Selective Service System (SSS) is responsible for the registration, classification, selection, forwarding for examination, and transporting of men for induction into the Armed Forces whenever inductions are authorized by law. It is also authorized to determine availability of members of the Standby Reserve of the Armed Forces for order to active duty in time of war or national emergency. In addition, the SSS is responsible for determining whether a person's legal obligation may be fulfilled by alternative service (e.g. hospital work). The termination of examinations and inductions on July 1, 1973, was followed by a suspension of registration on April 1, 1975. All classification actions were terminated on January 27, 1976. Currently, the SSS is in a standby status.

Reserve Components.—Reserve personnel of the Armed Forces consist of the Army National Guard, Army Reserve, Naval Reserve, Marine Corps Reserve, Air National Guard, Air Force Reserve, and Coast Guard Reserve. They provide trained personnel available for active duty in the Armed Forces in time of war or national emergency and at such other times as authorized by law.

The National Guard has dual Federal-State responsibilities and uses jointly provided equipment, facilities, and budget support. In peacetime, the National Guard is State-administered, under the authority of the State Governors. The President is also empowered to mobilize the National Guard and to use such of the Armed Forces as he

considers necessary to enforce Federal or State authority in any State.

Veterans Administration.—The Veterans Administration (VA) administers laws authorizing benefits for eligible former and present members of the Armed Forces, and for the beneficiaries of deceased members. Veterans benefits available under various acts of Congress include: Compensation for service-connected disability or death; pensions for nonservice-connected disability or death; vocational rehabilitation, education, and training; home loan insurance; life insurance; health care; special housing and automobiles or other conveyances for certain disabled veterans; burial and plot allowances; and educational assistance to families of deceased or totally disabled veterans, servicemen missing in action, or prisoners of war. Since these benefits are legislated by Congress, the dates they were enacted and the dates they apply to veterans may be different from the actual dates the conflicts occurred.

VA estimates of veterans cover all persons with service during periods of war or armed conflict and include those living outside the United States. Veterans whose active duty service was during periods of peacetime are eligible for some veterans benefits and, where appropriate, are included in VA estimates.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See Appendix I.

No. 584. Federal Budget Outlays for National Defense and Veterans Benefits and Services: 1950 to 1978

[**In billions of dollars, except percent.** Through **1976**, for years ending **June 30**, except as noted; beginning **1977**, ending **Sept. 30**. Includes outlays of Department of Defense, Veterans Administration, and other agencies for activities primarily related to national defense and veterans programs. See *Historical Statistics, Colonial Times to 1970*, series Y 472-473 and Y 476, for related data]

No. 590. Estimates of Total Dollar Costs of American Wars, by Rank

[In millions of dollars, except percent. Service-connected veterans' benefits estimated at 40 percent of total veterans' benefits except as noted]

War	Original incremental costs [1]		Service-connected veterans' benefits		Interest payments on war loans		Estimated current cost to 1977
	Constant dollars (1967)	Current dollars	Total cost under present programs	Cost to July 1, 1976 [2]	Total cost to 1977 [3]	Percent of original incremental costs	
World War II	546,490	288,000	(4)	47,463	200,000	69	535,463
Vietnam conflict	106,526	111,000	(4)	4,835	3,000	3	118,835
Korean conflict	67,925	54,000	(4)	7,222	7,500	14	68,722
World War I	57,650	26,000	(4)	12,630	11,000	43	49,630
Civil War (Union only)	6,957	[5] 3,200	3,300	3,288	1,200	60	7,688
Spanish-American War	1,600	400	2,500	2,067	60	15	2,527
American Revolution	(4)	100	28	28	20	20	148
War of 1812	182	93	20	20	14	15	127
Mexican War	270	73	26	26	10	14	109

[1] Except for Korean and Vietnam conflicts, original incremental costs are outlays for national security during war years minus average annual outlay for preceding five years. Vietnam conflict estimate is from Dept. of Defense and represents incremental costs from 1965–1977. Korean conflict estimate uses running average of national security outlays from 1948–1950 as a base, and then includes additional outlays over this base for 1951–1952 and one-half increase for 1953. This 50 percent figure for 1953 is used because outlays for the Cold War increased at same time outlays for Korean conflict declined. [2] For World War I and later wars, benefits are actual service-connected figures from 1976 *Annual Report* of Veterans Administration. For earlier wars, service-connected veterans' benefits are estimated at 40 percent of total, the approximate ratio of service-connected to total benefits since World War I. [3] Interest costs use same formula as in footnote 1. [4] Unknown. [5] Data from Goldin and Lewis, *The Economic Cost of the American Civil War, Journal of Economic History*, June 1975. Expenditures by Confederate Government are estimated by this study at $1 billion.

Source: Originally presented in U.S. Congress, Joint Economic Committee, *The Military Budget and National Economic Priorities*, Part 1, 91st Congress, 1st session (statement of James L. Clayton); subsequently revised and updated by James L. Clayton, University of Utah, Salt Lake City, Utah.

No. 591. U.S. Military Sales and Assistance to Foreign Governments: 1950 to 1977

[In millions of dollars, except as indicated. For years ending June 30 except, beginning 1977, ending Sept. 30. Department of Defense (DOD) sales deliveries covers deliveries against DOD sales orders authorized under the Arms Export Control Act, as well as earlier and applicable legislation. Commercial exports covers deliveries against orders placed directly by foreign governments to private firms. Military Assistance Program (MAP) and Excess Defense Articles (EDA) program are authorized by the Foreign Assistance Act of 1961, as amended. MAP grant aid deliveries represent military equipment and supplies delivered and expenditures for services. EDA deliveries represent deliveries of defense articles (costs at original acquisition) no longer needed by U.S. Armed Forces. Military Assistance Service Funded Program (MASF) aid, for 1966–1975, was used for providing military equipment and related services and training to countries engaged in hostilities in Southeast Asia. International Military Education and Training (IMET) program data, pursuant to new legislation under Foreign Assistance Act, as amended, show grant aid training of foreign military personnel as an independent program as of fiscal year 1976; training data, formerly provided under MAP and MASF, have been removed from MAP/MASF programs and included as an integral part of IMET]

– Represents zero. Z Less than $500,000. [1] Includes transition quarter, July–Sept. 1976. [2] For some programs, principally Agency for International Development (AID), includes obligations by year on a gross basis, that is, total new obligations entered into during each year, not adjusted for deobligations of prior year funds. The cumulative totals shown, however, are on a net basis, reflecting total deobligations during the entire span of years. [3] Indochina comprises Vietnam, Cambodia, Laos, and Indochina, undistributed. [4] Includes data not shown separately. [5] Military Assistance Program. [6] Program termination costs. [7] Includes $6 million obligated in fiscal year 1946.

[1] Administrative discharge. [2] Based on proper military behavior and proficient performance of duty; honest and faithful service. [3] Discharge under honorable conditions; satisfactory service; military record not sufficiently meritorious for honorable discharge. [4] Unsatisfactory service (misconduct, security or resignation/request for discharge). [5] Punitive, resulting from trial by court-martial. [6] Usually punishment for repeated convictions of minor offenses. [7] Granted after conviction of offenses usually recognized by civil law as felonies, or of military offenses requiring severe punishment.

No. 619. Military Reserve Personnel not on Active Duty: 1960 to 1977

[**In thousands.** As of **June 30** except, beginning **1977**, as of **Sept. 30.** Reservists serve in one of three categories—ready, standby, or retired. The ready reserve includes selected reservists who are intended to assist active forces in a war and the individual ready reserve who, in a major war, would be used to fill out active and reserve units and later would be a source of combat replacements. The standby reserve cannot be called to active duty unless the Congress gives its explicit approval. The retired reserve represents a low potential for mobilization]

RESERVE STATUS AND BRANCH OF SERVICE	1960	1965	1970	1971	1972	1973	1974	1975	1976	1977
Total reserves	4,147	2,577	3,639	3,856	3,711	3,413	3,065	2,656	2,419	2,249
Ready reserve	2,418	1,802	2,574	2,571	2,495	2,148	1,856	1,629	1,308	1,183

No. 629. Living Veterans—States and Other Areas: 1970 to 1977

[**Estimates in thousands.** As of **June 30** except, beginning 1977, as of **Sept. 30.** These estimates were developed from benchmark veteran population statistics for the States as of June 30, 1970, based on 1970 Census of Population data on veterans place of residence, extended to Sept. 30, 1977, on the basis of (1) 1965–1970 veteran interstate migration statistics from the 1970 census; (2) Bureau of the Census provisional estimates of 1970–1971 net civilian migration of States, *Current Population Reports*, series P–25, No. 468, Oct. 5, 1971; *and mobility of U.S. population*, 1970–1971, *Current Population Reports*, series P–20, No. 235, April 1972. They are independent of, and not directly comparable with, estimates for June 30, 1970, through June 30, 1974, previously published by the VA]

X Not applicable. Z Less than $500,000.

[1] Excludes expenditures from personal funds of patients. Includes expenditures from VA Revolving Supply Fund and insurance trust funds. [2] Includes expenditures for statutory burial awards, special clothing allowance, mortgage life insurance, invalid lifts, headstones and markers, and other expenses; therefore, total for 1970–1974 differs from that shown in table 633 which excludes these items.

[3] Except as noted, comparable with data presented in table 633.

[4] Not comparable with 1965–1969 data in table 633. [5] Program initiated June 1966. Includes Post-Vietnam veterans. [6] Includes changes in receivables. [7] Not comparable with data in table 633. 1966–1970 includes National Cancer Institute expenditures (transfer to Veterans Administration).

[8] Includes construction grants for State extended care facilities. 1975 and later years include expenditures for health manpower training facilities. [9] Comparable with sum of insurance and servicemen's indemnities, and transfers to insurance trust funds in table 633. [10] Not comparable with data in table 633.

Source: U.S. Veterans Administration, *Annual Report of Administrator of Veterans Affairs.*

No. 633. Veterans Benefits—Expenditures: 1940 to 1974

[**In millions of dollars, except as indicated.** For years ending **June 30.** Refers to expenditures of Veterans Administration and includes trust, deposit, and working funds. This form of presentation discontinued by VA; for current data, see table 632. See also *Historical Statistics, Colonial Times to 1970,* series Y 984–997]

– Represents zero.

[1] Excludes transfers from appropriations to insurance trust funds from which the actual payments are made, and expenditures from VA Revolving Supply Fund. Includes expenditures from personal funds of patients.

[2] Includes education and training allowances for veterans and servicemen, and educational assistance for wives, widows, sons, and daughters of deceased or totally disabled veterans.

[3] Includes subsistence allowances, tuition, supplies, and equipment for training of disabled veterans.

[4] Includes payments and allowances for various programs such as unemployment and self employment allowances, automobiles and other conveyances for disabled veterans, etc.

[5] Estimated; includes expenditures for hospital and domiciliary care, outpatient medical and dental treatment, medical research, and grants to Republic of Philippines for medical care and treatment of veterans.

[6] Comprises construction and related costs, and amounts transferred to Dept. of Army, Corps of Engineers, for construction of hospitals.

[7] Includes direct payments to beneficiaries from insurance appropriation, servicemen's indemnities, and benefits and dividends paid from insurance trust funds. Also includes some noncash transactions (e.g., interest credited to dividends left on deposit).

Section 13

Labor Force, Employment, and Earnings

This section presents statistics on the characteristics of the labor force; its distribution by occupation and industry affiliation; and the supply of, demand for, and conditions of labor.

The chief sources of these data are the census of population and the Current Population Survey conducted by the Bureau of the Census; and the monthly *Employment and Earnings*, the *Monthly Labor Review*, the annual *Handbook of Labor Statistics*, and the periodic *Special Labor Force Reports*, all published by the Bureau of Labor Statistics (BLS).

Types of data.—Most of the statistics in this section are obtained by two methods: household interviews or questionnaires and reports of establishment payroll records. Each method provides data which the other cannot suitably supply. Population characteristics, for example, are readily obtainable only from the household survey, while detailed industrial classification can be readily derived only from establishment records.

Data based on households are obtained from the decennial population census and from a monthly sample survey of the population. The decennial census provides detailed labor force information nationally and for each State, metropolitan area, county, and city, and for other areas. The data include characteristics (e.g. age, sex, race) of persons employed and unemployed. The Current Population Survey (CPS) is conducted during the week including the 12th of the month and provides current comprehensive data on the labor force (see text, p. 1). This household approach provides information on the work status of the population without duplication since each person is classified as employed, unemployed, or not in the labor force. Employed persons holding more than one job are counted only once, according to the job at which they work the most hours during the survey week.

Monthly data from CPS are published by the Bureau of Labor Statistics in *Employment and Earnings* and the related reports mentioned above. Data presented include national totals, by sex, race, and age, of the number of persons in the civilian labor force; the number employed, hours of work, and industry and occupational groups; the number unemployed, reasons for, and duration of, unemployment; and the number and work experience of nonparticipants in the labor force. Annual data shown in the tables in this section are monthly averages for each year, unless otherwise specified.

In addition to monthly national data, annual average estimates of employment and unemployment for each State and the 30 largest standard metropolitan statistical areas (SMSA's) are also produced from the Current Population Survey. They are published by the BLS in its annual *Geographic Profile of Employment and Unemployment.*

Current Population Survey figures may differ from decennial census data because of sampling variability as well as differences in the enumeration process and procedures. For further information, see *U.S. Census of Population: 1970*, vol. I.

Data based on establishment records are compiled by the BLS and cooperating State agencies as part of the ongoing Current Employment Statistics Program. Data are gathered from a sample of employers who voluntarily complete mail questionnaires monthly. These reports are supplemented by data from other government agencies and adjusted at intervals to data from government social insurance program reports. The estimates exclude proprietors of unincorporated businesses, self-employed persons, domestic servants, unpaid family workers, agricultural workers, and the Armed Forces. In March 1974, reporting establishments employed 12 million manufacturing workers (59 percent of the total manufacturing employment at the time), 11 million workers

in nonmanufacturing industries (26 percent of the total in nonmanufacturing) and 9 million Federal, State, and local government employees (61 percent of total government).

The establishment survey counts workers each time they appear on a payroll during the survey week (as with CPS, the week including the 12th of the month). Thus, unlike CPS, a person with 2 jobs is counted twice.

The establishment survey is designed to provide detailed industry information on nonagricultural wage and salary employment, average weekly hours, average hourly and weekly earnings, and labor turnover of the Nation, States, and metropolitan areas.

Similar to CPS data, data from the establishment survey are published in *Employment and Earnings* and *Monthly Labor Review*. Historical data, in geographic detail, are shown in *BLS* Bulletin No. 1370–13, 1939–1977; *Employment and Earnings, States and Areas, 1939–75;* and in the *Handbook of Labor Statistics*.

Labor force.—According to CPS definitions, the *civilian labor force* comprises all civilians classified as employed or unemployed according to the criteria below; the "total labor force" also includes the Armed Forces. *Employed persons* comprise (a) all civilians who, during the survey week, did any work for pay or profit (minimum of an hour's work) or worked 15 hours or more as unpaid workers in a family enterprise, and (b) all persons who were not working but who had jobs or businesses from which they were temporarily absent for noneconomic reasons (illness, bad weather, vacation, labor-management dispute, etc). *Unemployed persons* comprise all civilians who had no employment during the survey week, who made specific efforts to find a job within the previous 4 weeks (such as applying directly to an employer, or to a public employment service, or checking with friends) and who were available for work during the survey week. Persons on layoff from a job or waiting to report to a new job within 30 days are also classified as unemployed. All other persons, 16 years old and over, are "not in the labor force."

Beginning in 1972, information from the 1970 Census of Population was introduced into estimation procedures, producing increases in the civilian noninstitutional population, labor force, and employment totals, but having essentially no effect on unemployment levels and rates. A subsequent population adjustment, introduced in March 1973, affected the statistics by race but had little effect on totals or rates. Further changes derived from a comprehensive revision in classification of occupations and industries for the 1970 census, and from inclusion of a question on major activities or duties in the December 1971 Current Population Survey. As a result, comparisons of occupational employment levels between 1971–1972 and prior periods and between those 2 years should be made with caution. For further explanation of the changes, see the February 1971 and 1972 issues of *Employment and Earnings*. The 1972 data are comparable with those for later years.

In order to produce more reliable State estimates, 9,000 additional occupied housing units in 24 States and the District of Columbia were added to the national sample beginning January 1978; adjustments were also made to incorporate this supplemental sample into the national sample. These changes added approximately one-quarter of a million people to the civilian labor force; unemployment levels and rates were unchanged. For more detail see the February 1978 issue of *Employment and Earnings*.

Hours and earnings.—Average hourly earnings, based on establishment data, are gross earnings (i.e. earnings before payroll deductions) and include overtime premiums; they exclude irregular bonuses and value of payments in kind. Hours are those for which pay was received. Persons who worked 35 hours or more are classified as working full time; those working less than 35 hours are considered part-time workers.

Industrial and occupational groups.—Establishments responding to the payroll survey are classified into industries on the basis of their principal product or activity (determined by annual sales volume) in accordance with the *Standard Industrial Classification (SIC) Manual*, Office of Management and Budget, 1972. The SIC is a classification structure for the entire national economy. The structure provides data on a division and industry

code basis, according to the level of industrial detail. For example, manufacturing is a major industrial division; food and kindred products (code 20) is one of its major groups. One of the ways this group is further divided is into meat products (code 201) and meat packing plants (code 2011). Periodically, the SIC is revised to reflect changes in the industrial composition of the economy. The most recent revision was made in 1972.

The occupational and industrial groups used in classifying data from the CPS household interviews are defined as in the 1970 Census of Population. A comprehensive revision of the data and a change in the monthly questionnaire, as stated previously, resulted in a "break in series" of many groups in the CPS in 1971. As a result, comparisons must be made cautiously.

Productivity.—Measures of productivity reflect the relationship between production and output and labor input. Although the measures relate output to hours paid for, they do not measure the specific contribution of labor nor any other factor of production. Rather, they reflect the joint effect of a number of interrelated influences, such as changes in technology, capital investment per worker, and capacity utilization. Industry output per hour measures are limited to the extent that they do not account for quality change, and often do not reflect adequately changes in the degree of plant integration and specialization. In addition, there is not always strict comparability between output and labor input estimates. Finally, year-to-year changes in output per hour are irregular, and therefore not necessarily indicative of basic changes in long-term trends. Conversely, long-term trends are not necessarily applicable in any one year or period in the future.

Labor turnover.—Labor turnover is the gross movement of wage and salary workers into and out of employed status with respect to individual establishments. This movement, relating to a calendar month, is divided into two broad types: Accessions (new hires and rehires), and separations (quits, layoffs, and terminations). The data cover all workers, temporary or permanent, and full- or part-time.

Unions.—As defined here, unions include all affiliates of the AFL-CIO, all unaffiliated national unions, and all unaffiliated unions which are party to collective bargaining agreements with different employers in more than one State. The definition excludes unions whose activities are confined to a single locality or to a single employer. In addition, BLS accounts for all unions of Federal Government employees that have received exclusive recognition. Collective bargaining settlements data are available for unions of 1,000 members or more.

Work stoppages.—Work stoppages include all strikes and lockouts known to the Bureau of Labor Statistics and its cooperating agencies which last for at least one full day or shift and involve six or more workers. All stoppages, whether or not authorized by a union, legal or illegal, are counted. Excluded are work slowdowns and instances where employees report to work late, or leave early, to attend mass meetings or mass rallies.

Seasonal adjustment.—Many economic statistics reflect a regularly recurring seasonal movement which can be estimated on the basis of past experience. By eliminating that part of the change which can be ascribed to usual seasonal variation (e.g. climate or school openings and closings), it is possible to observe the cyclical and other nonseasonal movements in the series. However, in evaluating deviations from the seasonal pattern—that is, changes in a seasonally adjusted series—it is important to note that seasonal adjustment is merely an approximation based on past experience. Seasonally adjusted estimates have a broader margin of possible error than the original data on which they are based, since they are subject not only to sampling and other errors, but in addition, are affected by the uncertainties of the seasonal adjustment process itself.

Statistical reliability.—For discussion of statistical collection, estimation, and sampling procedures and measures of statistical reliability applicable to Census Bureau and BLS data, see Appendix III.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970*. See Appendix I.

No. 664. Employment, by Industry: 1970 to 1977

[In thousands, except as indicated. Persons 16 years old and over. Annual averages of monthly figures. Based on household survey; see text, pp. 395 and 396]

Industry	1970	1972	1974	1975	1976	1977		
						Total	Percent	
							Female	Other than White
Total employed	78,627	81,702	85,936	84,783	87,485	90,546	40.5	10.8
Agriculture, forestry, fisheries	3,566	3,585	3,588	3,476	3,417	3,383	18.5	7.8
Mining	515	597	655	732	770	814	8.5	3.9
Construction	4,814	5,246	5,454	5,015	5,162	5,504	6.4	7.9
Manufacturing	20,737	19,866	20,879	19,275	20,044	20,637	29.8	11.0
Transportation, communication, and other public utilities	5,317	5,462	5,716	5,623	5,652	5,833	22.3	12.0
Wholesale and retail trade	14,996	16,470	17,253	17,470	18,025	18,706	44.3	7.6
Wholesale trade	2,670	3,060	3,323	3,333	3,462	3,597	23.6	7.2
Retail trade	12,327	13,410	13,930	14,137	14,563	15,109	49.2	7.7
Finance, insurance, and real estate	3,942	4,327	4,697	4,665	4,793	5,038	54.1	8.0
Banking and other finances	1,695	1,766	1,935	1,918	1,954	2,061	63.2	8.5
Insurance and real estate	2,246	2,561	2,763	2,747	2,840	2,977	47.8	7.7
Services [1]	20,266	21,749	23,041	23,759	24,829	25,658	60.5	13.8
Business services	1,402	1,456	1,656	1,668	1,763	1,924	43.0	10.1
Automobile services	599	664	659	697	746	794	11.9	10.6
Personal services [1]	4,273	4,059	3,810	3,719	3,789	3,826	73.6	21.8
Private households	1,781	1,685	1,430	1,378	1,382	1,406	86.1	33.6
Hotels and lodging places	978	923	991	973	1,015	1,068	68.2	17.0
Entertainment and recreation	716	724	830	849	922	968	36.4	10.1
Professional and related services [1]	[2] 12,894	14,454	15,636	16,373	17,158	17,644	64.5	13.1
Hospitals	2,841	3,026	3,269	3,394	3,568	3,646	76.0	18.9
Health services, exc. hospitals	1,626	2,017	2,285	2,471	2,554	2,683	72.9	11.4
Elementary, secondary schools	6,123	4,578	4,845	5,034	5,180	5,106	70.6	12.8
Colleges and universities		1,667	1,770	1,830	1,935	2,016	47.9	12.5
Welfare and religious agencies	827	1,049	1,147	1,231	1,321	1,429	57.5	16.4
Public administration [3]	[2] 4,473	4,400	4,654	4,770	4,793	4,972	32.9	14.7

[1] Includes industries not shown separately. [2] Not strictly comparable with later years due to reclassifications between "Professional and related services" and "Public administration." [3] Includes workers involved in uniquely governmental activities, e.g., *judicial* and *legislative*.

No. 665. Civilians Employed, by Hours Worked: 1965 to 1977

[In thousands of persons 16 years old and over, except 1965, 14 and over. Annual averages of monthly figures, except 1965 for May]

Hours worked	1965	1970	1972	1973	1974	1975	1976	1977
Nonagriculture employed [1]	67,278	75,165	78,230	80,957	82,443	81,403	84,188	87,302
Worked 1–14 hours	4,403	3,962	4,086	4,092	4,200	4,349	4,376	4,500
Worked 15–34 hours	7,503	14,260	12,463	13,381	14,075	14,189	15,239	15,756
Worked 35 or more hours	53,008	52,462	57,114	58,710	59,008	57,857	59,410	61,742
Percent of total	78.8	69.8	73.0	72.5	71.6	71.1	70.6	70.7
Agriculture, employed [1]	5,128	3,462	3,472	3,452	3,492	3,380	3,297	3,244
Worked 35 or more hours	3,475	2,255	2,282	2,265	2,301	2,227	2,186	2,149
Percent of total	67.8	65.1	65.7	65.6	65.9	65.9	66.3	66.2

[1] Includes persons who had a job or business, but did not work at all during survey week because of illness, bad weather, vacation, industrial dispute, or various personal reasons, not shown separately.

No. 666. Class of Worker of Employed Persons, by Sex: 1965 to 1977

[In thousands of persons 16 years old and over, except 1965, 14 and over. See headnote, table 679]

Class of worker	1965		1970		1975		1976		1977	
	Male	Female	Male	Female	Male	Female	Male	Female	Male	Female
Nonagriculture, employed	43,304	24,289	46,099	29,066	48,429	32,974	49,675	34,513	51,222	36,080
Wage and salary workers	38,434	22,331	42,116	27,330	44,205	31,093	45,456	32,585	46,819	33,986
Self-employed workers	4,794	1,419	3,929	1,288	4,171	1,456	4,168	1,520	4,348	1,658
Unpaid family workers	77	540	53	449	54	424	51	407	55	437
Agriculture, employed	3,729	856	2,861	601	2,801	579	2,716	582	2,639	605

No. 676. Nonagricultural Industries—Number of Employees, 1970 to 1977, and Number and Earnings of Production Workers, 1975 to 1977

[Annual averages of monthly figures. Covers all full- and part-time employees who worked during, or received pay for, any part of the pay period including the 12th of the month. For mining and manufacturing, data refer to production and related workers; for contract construction industries, to employees engaged in actual construction work; and for other industries, to nonsupervisory employees and working supervisors. See also headnote, table 673. "N.e.c." means not elsewhere classified. See *Historical Statistics, Colonial Times to 1970*, series D 127–151, D 802–810, and D 877–892, for related data]

[1] Refers to gross domestic product originating in the sector, in 1972 prices. [2] Hours of all persons engaged in the private business and nonfarm business sectors (employees, proprietors, and unpaid family workers); employees' and proprietors' hours in manufacturing; and employees' hours in nonfinancial corporations, where there are no self-employed. [3] Output per hour paid for. [4] Wages and salaries of employees plus employers' contributions for social insurance and private benefit plans. Also includes an estimate of same for self-employed. [5] Hourly compensation divided by productivity. [6] Changes for 1960, 1965, and 1970 are from immediately prior year. Minus sign (−) denotes decrease.

No. 688. Major Collective Bargaining Settlements—Average Percent Change in Wages and Benefits Negotiated: 1969 to 1977

[**In percent, except as indicated.** Data represent private nonfarm industry settlements affecting production and related workers in manufacturing and nonsupervisory workers in nonmanufacturing industries. Data exclude possible adjustments in wages under cost-of-living escalator clauses, except increases guaranteed by the contract. Includes all settlements, whether wages and benefits were changed or not]

ITEM	1969	1970	1971	1972	1973	1974	1975	1976	1977
Wage-rate adjustments: [1]									
All industries:									
First year changes	9.2	11.9	11.6	7.3	5.8	9.8	10.2	8.4	7.8
Contracts with escalator clauses	(NA)	(NA)	12.9	7.9	5.7	9.5	12.2	8.4	8.0
Contracts without escalator clauses	(NA)	(NA)	10.3	7.2	5.8	10.2	9.1	8.3	7.6
Over life of contract [2]	7.6	8.9	8.1	6.4	5.1	7.3	7.8	6.4	5.8

No. 690. Minimum Hourly Union Wage Rates—Indexes and Averages, Selected Trades: 1960 to 1976

[As of first working day in July. Data for 1960 exclude Alaska. Indexes of rates reflect changes in minimum hourly wage scales. Year-to-year changes in union scales are based on comparable quotations for each trade weighted by membership for current year. Average wage rates show current levels and should not be used for precise year-to-year comparisons because of fluctuations in membership in the classifications studied. See *Historical Statistics, Colonial Times to 1970*, series D 818-829]

No. 692. Percent Increase in Average Salaries for Selected Occupations in Private Industry: 1969 to 1977

[Based on sample and subject to sampling variability. Relates to metropolitan areas and nonmetropolitan counties in U.S. except Alaska and Hawaii. Minimum employment sizes of establishments studied were: 250 or more in mining, construction, retail trade, most manufacturing industries, and selected transportation industries; and 100 or more in selected manufacturing industries, most transportation, communication, electric, gas, and sanitary services, and in wholesale trade, finance, insurance, and real estate, and selected services. When changes made in survey coverage, year-to-year percent changes were based on data adjusted to represent same coverage in both years]

[1] For further details, see *National Survey of Professional, Administrative, Technical, and Clerical Pay*, Bulletin No. 1980. [2] Data are subject to annual benchmark revision and are not seasonally adjusted. [3] For cities of 100,000 population or more in 1970. [4] For cities of 100,000 population or more in 1970, and counties of this size in standard metropolitan statistical areas with county-wide school systems. [5] 1967–71 data. [6] 1969–73 data. [7] 1971–75 data. [8] For 1966 and for 1968 to 1971, as of July 1; for 1967, as of October 1; and for 1972 to 1977, as of April 1. Rates show statutory changes and effect of changes in proportion of workers at each step within salary ranges for individual grades. Salaries measure effect of statutory changes in basic pay scales and in grade salary increases, and also changes in proportion of workers in various grades.

No. 701. Labor Unions—Financial Summary, by Type of Union: 1966 to 1976

[**For fiscal years** ending during **calendar year.** Data from annual financial reports of labor organizations filed with Department of Labor under provisions of Labor-Management Reporting and Disclosure Act of 1959 (LMRDA) which covers substantially all labor unions in the United States, except those which are State or local central bodies. Classification by type is based mainly on union's self-classification in filed reports]

Year and type of union	Total number of unions	Number of unions by size of receipts					Assets (mil. dol.)	Liabilities (mil. dol.)	Receipts (mil. dol.)	Disbursements (mil. dol.)
		Under $10,000	$10,000–$49,999	$50,000–$99,999	$100,000–$999,999	$1,000,000 and over				
1966, total	**52,272**	**32,617**	**13,151**	**3,074**	**3,239**	**191**	**2,157**	**143**	(1)	(1)

No. 702. Work Stoppages: 1950 to 1976

[Prior to 1960, excludes Alaska and Hawaii. Excludes work stoppages involving fewer than 6 workers or lasting less than 1 day. Information obtained directly from companies and unions involved as well as from various Government labor boards, conciliation services, and other neutral parties. See also *Historical Statistics, Colonial Times to 1970*, series D 970-976]

YEAR	WORK STOPPAGES		WORKERS INVOLVED		WORKER-DAYS IDLE DURING YEAR		
	Number beginning in year	Average duration (calendar days)	Number [1] (1,000)	Percent of total employed [2]	Number (1,000)	Percent of estimated working time [3]	Per worker involved
1950	4,843	19.2	2,410	5.1	38,800	.33	16.1
1955	4,320	18.5	2,650	5.2	28,200	.22	10.7
1960	3,333	23.4	1,320	2.4	19,100	.14	14.5
1965	3,963	25.0	1,550	2.5	23,300	.15	15.1
1967	4,595	22.8	2,870	4.3	42,100	.25	14.7
1968	5,045	24.5	2,649	3.8	49,018	.28	18.5
1969	5,700	22.5	2,481	3.5	42,869	.24	17.3
1970	5,716	25.0	3,305	4.7	66,414	.37	20.1
1971	5,138	27.0	3,280	4.6	47,589	.26	14.5
1972	5,010	24.0	1,714	2.3	27,066	.15	15.8
1973	5,353	24.0	2,251	2.9	27,948	.14	12.4
1974	6,074	27.1	2,778	3.5	47,991	.24	17.3
1975	5,031	26.8	1,746	2.2	31,237	.16	17.9
1976	5,648	28.0	2,420	3.0	37,859	.19	15.6

[1] Workers counted more than once if involved in more than 1 stoppage during year. [2] In 1967, total employed workers were redefined to coincide with U.S. Bureau of Labor Statistics figures for nonagricultural employment, plus agricultural wage and salaried workers. Idleness computed on this basis is lower than the former series. [3] Estimated working time computed by multiplying average number of employed workers (see footnote 2) by number of days worked by most employees.

– Represents zero. Z Less than 500. [1] Includes other functions, not shown separately. [2] Full-time employees only. [3] Represents period from October 16 of previous year to October 15 of year stated. [4] Contains duplication; each work stoppage is counted separately for each function affected, but only once in the total work stoppages.

Section 14

Income, Expenditures, and Wealth

This section presents data on gross national product (GNP), rates of economic growth, per capita income, national and personal income, saving and investment, money income, poverty, national and personal wealth, and fixed business capital. The data on income and expenditure measure two aspects of the U.S. economy. One aspect relates to the national income and product accounts (NIPA), a summation reflecting the entire complex of the Nation's economic activities and the interaction of its major components; the other relates to the distribution of money income to families and individuals, or consumer income.

The primary source for data on GNP, national and personal income, gross savings and investment, and business capital is the *Survey of Current Business*, published monthly, with supplements, by the Department of Commerce, Bureau of Economic Analysis (BEA). Detailed historical data and a discussion of the conceptual framework of NIPA and of the statistical sources and methods used to derive the estimates appear in *The National Income and Product Accounts of the United States, 1929–74*, a Supplement to the *Survey of Current Business*, January 1976.

Sources of income distribution data are the decennial censuses of population and the Current Population Survey, both products of the Bureau of the Census (see text, page 1). Annual data on income of families, individuals, and households, by income class, are presented in *Current Population Reports—Consumer Income*, series P-60.

Data on individuals' saving and assets are published by the Board of Governors of the Federal Reserve System in the quarterly *Flow of Funds Accounts*; and detailed information on personal wealth is published periodically by the Internal Revenue Service in *Statistics of Income*, Supplemental Report, *Personal Wealth*.

National income and product.—*Gross national product* (GNP) is the total national output of goods and services valued at market prices. GNP can be viewed in terms of expenditure categories. These categories comprise purchases of goods and services by consumers and government, gross private domestic investment, and net exports of goods and services. The goods and services included are largely those bought for final use (excluding illegal transactions) in the market economy. There are a number of inclusions, however, which represent imputed values (estimates of "income in kind"), the most important of which is the rental value of owner-occupied dwellings. GNP, in this broad context, measures the output attributable to the factors of production—labor and property—supplied by U.S. residents. GNP differs from "national income" mainly in that GNP includes allowances for depreciation and for indirect taxes (such as sales and excise taxes); see table 716. *Gross domestic product* is GNP minus gross product originating outside the U.S.

National income is the aggregate of labor and property earnings which arise in the current production of goods and services by the Nation's economy. It is the sum of employee compensation, proprietors' income, rental income, net interest, and corporate profits. Thus, it measures the total factor costs of the goods and services produced by the economy. Earnings include direct taxes on earnings.

Capital consumption adjustment for corporations and nonfarm sole proprietorships and partnerships is the difference between capital consumption (i.e. depreciation charges and accidental damage to fixed business capital) claimed on income tax returns and capital consumption allowances that are measured at straightline depreciation, consistent service lives, and replacement cost. The tax return data are valued at historical costs and reflect changes over time in service lines and depreciation patterns as permitted by tax regulations. *Inventory valuation adjustment* represents the difference

between the book value of inventories used up in production and the cost of replacing them.

Personal income is the current income received by persons from all sources minus contributions for social insurance. Not only individuals (including owners of unincorporated enterprises), but nonprofit institutions, private trust funds, and private health and welfare funds are classed as "persons." Personal income includes transfers (payments not resulting from current production) from government and business such as social security benefits, military pensions, etc., but excludes transfers among persons. Although most of the income is in monetary form, there are important nonmonetary inclusions—chiefly, estimated net rental value to owner-occupants of their homes, the value of services furnished without payment by financial intermediaries, and the value of food consumed on farms.

Disposable personal income is personal income less personal tax and nontax payments. It is the income available to persons for spending and saving. Personal tax and nontax payments are tax payments (net of refunds) by persons (except personal contributions for social insurance) that are not chargeable to business expense, and certain personal payments to general government that are treated like taxes. Personal taxes include income, estate and gift, and personal property taxes. Nontax payments include passport fees, fines and penalties, donations, and tuitions and fees paid to schools and hospitals operated mainly by government.

Distribution of money income to families and individuals.—Money income statistics are based on data collected in various field surveys of income conducted since 1936. Since 1947, the Bureau of the Census has collected the data on an annual basis and published them in *Current Population Reports*, series P-60. In each of the surveys, enumerators interview representative samples of the population with respect to income received during the previous year. Money income as defined by the Bureau of the Census differs from the concept of "personal income" (see above) as defined and reported by the Bureau of Economic Analysis (BEA). Money income is income before the deduction of income taxes and social security taxes unless otherwise specified in the individual tables. *Nonmoney items of income*, such as wages received in kind, the value of food and fuel produced and consumed on farms, the net rental value of owner-occupied homes, the property income received by mutual life insurance companies, and the value of the services of banks and other financial intermediaries rendered to persons without the assessment of specific charges, *are not included*. None of the aggregate income concepts (gross national product, national income, or personal income) is exactly comparable with money income, although personal income is the closest.

In 1976, the method of collecting and processing the Current Population Survey money income data for 1975 and later years was revised. Data for 1974 were reprocessed using the revised method to provide a basis of comparison with the data for 1975. Revisions to the 1974 data resulted in an *overall* decrease in the estimated number of persons living in poverty by 3.7 percent (24.3 to 23.4 million) and an increase in the estimate of median family income by .5 percent ($12,836 to $12,902). Differences within most subgroups, however, are more pronounced. For example, family money income for Black and other races (excluding White) increased by 3.8 percent (see tables 729 and 756).

Poverty.—Unless otherwise specified, poverty level statistics represent measures of *money income* and are based on a "poverty index" first developed by the Social Security Administration (SSA) in 1964 and modified by a Federal Interagency Committee in 1969. At the core of this index is the 1961 Economy Food Plan designed by the Department of Agriculture. This index, based on food consumption requirements, provides a range of income cutoffs or "poverty income thresholds" adjusted by such factors as family size, sex and age of the family head, number of children under age 18, and farm-nonfarm residence. Until 1969, annual revisions of these levels were based on price changes of items in the economy food plan. In 1969, two changes were made: (1) SSA levels for nonfarm families were retained for the base year 1963, but annual adjustments in the

levels were to be based on changes in the Consumer Price Index rather than on economy food plan costs, and (2) farm levels were raised from 70 to 85 percent of the corresponding nonfarm level.

Individuals' saving and assets.—The Board of Governors of the Federal Reserve System issues detailed estimates of individuals' saving as part of flow of funds accounts, showing the increase in financial assets, net investment in tangible assets, less increase in debt of individuals. Data back to 1946 are available upon request from the Federal Reserve.

Personal and national wealth.—Personal wealth estimates, issued by the Internal Revenue Service (IRS), are based on a sample of Federal estate tax returns which must be filed for deceased persons. Estimates are weighted to adjust for age, sex, and "social class" (as determined by IRS through insurance holdings). Gross estate is the gross value of all assets, including the full face value of life insurance (reduced by policy loans), before reduction by the amount of debts. Total assets are obtained by using the cash value of the insurance policy. Net worth is one's level of worth after all debts have been removed.

The national wealth data shown in table 777 are intended chiefly to indicate the order of magnitudes involved and to permit rough comparisons among types of wealth and of the growth over long periods. Definitions and analytical details are presented in the source publication.

Current and constant dollars.—Figures in a number of tables in this section are expressed in both current dollars and constant dollars. Current dollar figures reflect prices prevailing during the specified period. Constant dollar figures are computed values which eliminate the effect of price changes and are derived from prices of a specified base period. The constant dollar values are obtained by dividing current dollar values for a given period by the price indexes for the same period.

The national income and product account data are deflated to constant dollars by implicit price deflators for GNP and its components. The implicit price deflator for GNP is the ratio of GNP in current dollars to GNP in constant dollars after each of the components of GNP has been converted to base-year (i.e., 1972) prices. The money income statistics are deflated by means of the consumer price index prepared by the Bureau of Labor Statistics; see tables 792–793.

Statistical reliability.—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability pertaining to Census Bureau data, see Appendix III.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970*. See Appendix I.

No. 708. Gross National Product—Summary: 1929 to 1977

[**In billions of dollars.** Prior to 1960, excludes Alaska and Hawaii. See *Historical Statistics, Colonial Times to 1970*, series F 1 and F 32–70, for single-year figures prior to minor revisions issued in 1976]

ITEM	1929	1930	1933	1940	1945	1950	1955	1960	1965
Gross national product	103.4	90.7	55.8	100.0	212.3	286.2	399.3	506.0	688.1

Personal saving	17.1	30.3	50.6	49.4	70.3	71.7	80.2	65.9	67.3
Business:									
Gross retained earnings [2]	58.7	84.6	101.4	131.0	140.2	137.9	179.2	206.6	226.5
Gross private domestic investment	76.4	112.0	140.8	188.3	220.0	214.6	189.1	243.3	294.2
Excess of investment (−)	−17.7	−27.4	−39.5	−57.3	−79.8	−76.7	−9.9	−36.8	−67.7
Government: [3]									
Receipts less transfer payments, etc. [4]	103.4	138.9	209.5	249.6	275.8	299.5	274.6	325.8	374.7
Purchases of goods and services	100.3	138.4	218.9	253.1	269.5	302.7	338.9	361.4	395.0
Surplus or deficit (−)	3.1	.5	−9.4	−3.5	6.3	−3.2	−64.3	−35.6	−20.3
Foreign:									
Transfer payments to foreigners (net) plus interest paid by Gov't to foreigners	2.6	3.3	4.3	6.5	7.7	8.5	8.5	8.7	10.0
Net exports of goods and services	4.4	7.6	3.9	−3.3	7.1	6.0	20.4	7.8	−10.9
Capital grants received by U.S. (net) [5]	−1.7	−4.3	.3	9.8	.6	2.5	−11.9	.9	20.9
Statistical discrepancy	−.7	.9	−2.1	1.7	2.6	5.8	5.9	5.5	−.2

[1] Less interest paid by consumers to business and personal transfers to foreigners (net). [2] Undistributed corporate profits with inventory valuation and corporate capital consumption adjustments plus corporate and noncorporate capital consumption allowances with capital consumption adjustment, plus private wage accruals less disbursements. [3] Federal, State, and local. [4] Government receipts, less transfer payments to persons, transfer payments to foreigners (net), net interest paid, and subsidies less current surplus of government enterprises; plus wage accruals less disbursements. [5] Less net foreign investment.

No. 712. Rates of Economic Growth: 1940 to 1977

[**Percent.** Figures represent average annual compounded rates of change in real gross national product, based on estimates by Department of Commerce of gross national product (expressed in constant 1972 dollars). Minus sign (−) denotes decline. To obtain annual rate of change between any 2 years shown, find column for initial year at top of table and read figure in that column opposite terminal year shown at left. See *Historical Statistics, Colonial Times to 1970*, series F 31, for single-year figures prior to minor revisions issued in 1976]

No. 724. Personal Income In Current and Constant (1972) Dollars—States: 1960 to 1977

[Represents a measure of income received from all sources during the calendar year by the residents of each State. Data exclude Federal employees overseas and totals may differ from those in tables 716 and 722. See text, pp. 437-438. See *Historical Statistics, Colonial Times to 1970*, series F 297-348, for single-year figures prior to minor revisions issued in 1976]
