## ACKNOWLEDGMENTS

The *Statistical Abstract of the United States* was prepared under the direction of Edwin D. Goldfield, Chief, Statistical Reports Division. Compilation was under the supervision of William Lerner, Chief, Statistical Abstract Branch, assisted by Dorothy M. Belzer for editorial supervision and Charles S. James, Jr., for planning and review.

The cooperation of the many contributors to this volume is gratefully acknowledged. The list of sources of tables (pp. 953-956) and the source note below each table credit the various government and private agencies which have collaborated in furnishing information for the *Statistical Abstract*.

JUNE 1958.

## SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, *Statistical Abstract of the United States: 1958*. (Seventy-ninth edition.) Washington, D. C., 1958.

## P R E F A C E

The *Statistical Abstract of the United States*, published annually since 1878, is the standard summary of statistics on the social, political, and economic organization of the United States. It is designed to fulfill two functions: First, to serve as a convenient volume for statistical reference; and second, to serve as a guide to other statistical publications and sources. The latter function is served by the introductory text to each section, the source notes appearing below each table, and the Bibliography of Sources (page 957).

This volume includes a selection of data from many important statistical publications, both governmental and private. The publications cited as sources usually contain additional statistical detail and a more complete discussion of relevant definitions and concepts than can be presented here. Where contributing agencies are cited as sources, without mention of publications, more detailed information frequently is available from their unpublished tabulations and records.

Emphasis in the *Statistical Abstract* is given primarily to national data. Data for regions and individual States are presented to a lesser extent. Statistics for Territories and possessions are included in the State tables whenever available and supplemented by specialized information for these areas in section 33. Statistics for cities or other relatively small geographic units appear only in a few instances. Unless otherwise noted, statistics for the United States relate to continental United States.

**1958 edition.**—This edition, the 79th annual issue, was compiled and published in 1958. It presents data for the most recent year or period available during the early part of 1958.

Each year, in addition to the normal bringing up to date of the over 1,200 tables and charts included, new tables containing pertinent data are introduced. Data that are less timely are eliminated and format and text changes are made where considered advisable.

This year special efforts were directed to furthering the development of a section of tables devoted to recreation. Although there is considerable interest in this subject, statistics about it are relatively difficult to obtain. Thirteen tables are now assembled as part of the Public Lands; Parks; and Recreation section. Of this number, four relating to parks have been presented before in the former Public Lands and Park Systems section; three others relating to hunting and fishing have been presented before in the Forests and Forest Products section; the remaining six are entirely new to the *Abstract*.

Important changes have also occurred in section 21, Transportation, Land and Air, and in section 15, State and Local Government Finances and Employment. The presentation of railways statistics in section 21 has been extensively revised by trimming subject and historical detail, by redesign of tables to include information consistent with the more current materials now available, and by inclusion of new tables. In section 15, results from the 1957 Census of Governments have contributed significant additions concerning assessed valuations of taxable property and long-term State and local government debt, and brought up to date the basic count of types of governmental units.

Among the new tables which are of particular current interest in this edition are a number reflecting trends in agriculture, technology, and housing. These include tables relating to the economic level of farms and farm families, the share and governmental support of U. S. agricultural exports in world markets, Federal government obligations for scientific research and development, measures of research and

development in the natural sciences, an inventory of housing units in 1956, and characteristics of home purchasers transacted under veterans loan guarantees.

A total of 62 new tables have been introduced in this edition. Following is a list of subjects covered by some of the new tables:

Personal consumption expenditures for recreation	National housing inventory
Number and facilities of municipal parks	Religious affiliation reported by the civilian population
Summary of selected recreational activities	Private expenditures for medical care
Operating revenues of different types of transport	Level of schooling completed for persons 25 years old and over
Fuel and power consumed by railways	Homicides and suicides
Assessed value of property subject to taxation	Value of military procurement actions
Long-term State and local government debt	Private pension plans
Average acreage per farm, by economic class	Child adoptions
Level-of-living indicators for farm-operator families	Political party composition of State legislatures
Prices received and parity prices for farm products	Commercial and industrial loans of banks, by size of borrowers' assets
Value of agricultural exports under government-financed programs	Characteristics of life insurance policyholders
Research and development in the natural sciences	Sales of books and pamphlets, by subject
	Motor-vehicle operators licenses issued
	United States contributions to international organizations

Among tables shown in the last edition, 50 were omitted from this issue. Major omissions occurred in the section on Transportation, Land and Air, affecting financial statistics of railways; in the Income, Expenditures, and Wealth section affecting discontinued series on income shares of upper and lower groups of the population, and net worth of spending units, and other figures on wage or salary income; in the Federal Government Finances and Employment section affecting data on Federal investment and operating expenditures, distribution by income classes of individual income tax returns, sales of U. S. savings bonds, and Federal employment in selected agencies; and in the Business Enterprise section affecting data on business failures and on firms surviving to specified ages. Some of the information in the omitted tables was absorbed in other tables still present.

**Supplements to the Abstract.**—The *Statistical Abstract*, as an annual one-volume publication, is of necessity limited in amount of detail shown. Businessmen, teachers, librarians, public officials, professional workers, market researchers, and others often require data for individual cities, counties, metropolitan areas, and other small areas as well as for States. Economists, teachers, social scientists, historians, students, and others frequently need more historical information. To meet such requests for more detail, a series of supplements to the *Abstract* have been issued.

The *County and City Data Book, 1956*, is designed to help satisfy the need for statistical information about counties and cities and other relatively small geographic areas. Conveniently assembled are 133 statistical items for each county in the United States and 130 statistical items for each of the 484 cities having 25,000 inhabitants or more in 1950. Information comparable to that for counties is also presented for geographic regions and divisions, States, and standard metropolitan areas. A special feature is an appendix which presents selected data for Congressional Districts. Also included are descriptive text and source notes.

This edition is the fifth in the *County and City Data Book* series. Many of the statistics in this volume were obtained from the results of the 1954 Censuses of Agriculture, Business, and Manufactures. Other subjects covered include births, deaths, and marriages; population characteristics; dwelling units; city government finances and employment; hospitals; bank deposits; and other items of social and economic importance. This volume is on sale by the Superintendent of Documents, Government Printing Office, Washington 25, D. C., for \$4.50.

*Historical Statistics of the United States, 1789-1945*, a historical supplement, was published in July 1949. This volume presents, in compact form, approximately 3,000 statistical time series (mostly on an annual basis) which cover various periods from 1789 to 1945. These time series reflect economic, social, and political aspects of the development of the Nation since the Federal Government was formally established. In the preparation of this supplement the Bureau of the Census had the cooperation of a special committee of the Social Science Research Council set up to advise the Director of the Census on a source book of historical statistics and of the Committee on Research in Economic History under the auspices of the Social Science Research Council. This volume is on sale by the Superintendent of Documents, Government Printing Office, Washington 25, D. C., for \$3.25.

*Continuation to 1952 of Historical Statistics of the United States, 1789-1945*, issued in May 1954, presents data for 1946 to 1952 for the current series shown in *Historical Statistics*, mentioned above. It also contains the latest revisions for many of the series in *Historical Statistics*. This publication is also on sale by the Superintendent of Documents, Government Printing Office, Washington 25, D. C., for 55 cents.

Headnotes to the tables in the *Statistical Abstract* include cross-references to specific series in *Historical Statistics, 1789-1945*, and in its *Continuation to 1952* whenever the tables contain figures related to those series.

Preparation of a revised edition of *Historical Statistics* is presently underway. The new volume expected to be published in 1959 will greatly enlarge the scope of the present volume by adding much new material and by bringing the older material up to date.

**Responsibility.**—The contents of this volume are taken from a large number of sources, as indicated in the list of agencies furnishing material. (See pages 953-956.) The Bureau of the Census cannot accept the responsibility for the accuracy or limitations of the data presented here, other than for those which it collects. However, the responsibility for selection of the material and for proper presentation rests with the Bureau.

Many persons have written offering suggestions for improving the presentation of the material. These letters have been most helpful and users are urged to continue to make their needs known. All suggestions will be carefully considered in planning future editions.

#### FOR ADDITIONAL INFORMATION ON DATA PRESENTED

write to the agency indicated in the source note to the table which covers the desired subject.

#### SUGGESTIONS AND COMMENTS

should be sent to  
The Director  
Bureau of the Census  
Washington 25, D. C.

## STATISTICAL ABSTRACT SUPPLEMENTS

*County and City Data Book, 1956.* A compact presentation of 133 items of statistical data for each county in the United States, and 130 items of statistical data for each of 484 cities having 25,000 inhabitants or more in 1950. Information comparable to that for counties is also presented for geographic regions and divisions, States, and standard metropolitan areas. Items included based largely on results of 1954 Censuses of Agriculture, Business, and Manufactures. Includes 51 maps, explanatory and definitive text, and source notes. Issued 1957. Price \$4.50 (Buckram).

*Historical Statistics of the United States, 1789-1945.* A supplement to the *Statistical Abstract*, prepared with the cooperation of the Social Science Research Council. A compilation of about 3,000 statistical time series, largely annual, extending back through time to the earliest year for which figures are available. Includes definitions of terms and descriptive text. Specific source notes provide a basic guide to original published sources for further reference and additional data. Detailed alphabetical subject index. 363 pages. Issued 1949. Fifth printing. Price \$3.25 (Buckram).

*Continuation to 1952 of Historical Statistics of the United States, 1789-1945.* Carries forward and presents revisions of the statistical time series contained in *Historical Statistics of the United States, 1789-1945*. Designed especially for use in conjunction with the *Historical Statistics* volume. 79 pages. Issued 1954. Price 55 cents.

Purchase orders should be addressed to the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C.

FIG. I.—MAP OF THE UNITED STATES, SHOWING CENSUS REGIONS AND DIVISIONS

Source: Department of Commerce, Bureau of the Census.

## Section I

### Population

This section relates to the population of the United States, its distribution, and its characteristics. The principal source of these data is the Decennial Census of Population, a house-to-house enumeration made by the Bureau of the Census. In accordance with a Constitutional provision for a decennial canvass of the population, the first census enumeration was made in 1790. The primary reason for the Census of Population, as set forth in the Constitution, was to provide a basis for the apportionment of Members of the House of Representatives among the several States. From 1800 to 1900, the census was conducted by the Superintendent of the Census appointed for the duration of each decennial census. In 1902, the Bureau of the Census was established as a permanent agency of the Government charged with responsibility for the decennial census and for compiling statistics on other subjects as needed. Currently, this Bureau supplies intercensal data based on surveys and estimates in addition to making the comprehensive decennial census enumeration.

Related materials are presented in other sections of this volume. Thus, statistics of marriage and divorce are presented in section 2, Vital Statistics, Health, and Nutrition; statistics on family income are given in section 11, Income, Expenditures, and Wealth; and Census data on employment and occupations are given in section 8, Labor Force, Employment, and Earnings. Data on the population in institutions are given in this section, but additional data on persons in mental institutions are given in section 2 and on prisoners in section 5, Law Enforcement, Federal Courts, and Prisons. Tables on nativity and citizenship are included in this section, but related data are included in section 3, Immigration, Emigration, and Naturalization.

**Decennial censuses.**—In accordance with Census practice dating back to 1790, each person enumerated in the 1950 Census was counted as an inhabitant of his usual place of residence or usual place of abode, that is, the place where he lives and sleeps most of the time. This place is not necessarily the same as his legal residence, voting residence, or domicile, although, in the vast majority of cases, the use of these different bases of classification would produce identical results.

Most of the data which are presented are based on complete counts. However, certain of the 1950 data are indicated as being obtained from representative samples of 20 percent or 3½ percent of the population. A few tables also include 1940 data obtained on a sample basis.

Exact agreement is not to be expected among the various samples, nor between them and the complete census count, but the sample data may be used with confidence where large numbers are involved, and may be assumed to indicate patterns and relationships where small numbers are involved. Detailed statements regarding the sampling errors are given in the original sources. In addition, experience has shown that in mass operations two tabulations of a set of punch cards are not likely to yield identical results. These differences are caused by occasional errors in the tabulation processes—machine failure, loss of punch cards, and other types.

**Current Population Survey.**—Several tables present statistics based on the Current Population Survey, conducted monthly by the Bureau of the Census. Until May 1956, the Survey covered a sample of approximately 21,000 interviewed house-

Note.—This section presents data for the most recent year or period available on February 7, 1958, when the material was organized and sent to the printer. In a few instances, more recent data were added later.

holds spread over a sample of areas throughout the United States. Since then, the sample has been expanded to approximately 35,000 interviewed households in a larger number of areas. For a discussion of the reliability of estimates based on this sample, see Technical Note, page 201.

**Population estimates.**—Population estimates for dates after April 1950, which are not the result of sample surveys, are based on data from the 1950 Census; statistics of births and deaths provided by the National Office of Vital Statistics, Public Health Service; statistics of immigration and emigration reported by the Immigration and Naturalization Service, Department of Justice; and statistics on the Armed Forces provided by the Department of Defense. Estimates of State population are based on the same types of data and also make use of school statistics provided by State Departments of Education and parochial school systems throughout the country.

**Urban and rural areas.**—In the course of its history, the Bureau of the Census has employed several definitions of urban area.

According to the new urban-rural definition adopted for the 1950 Census, the urban population comprises all persons living in (1) places of 2,500 inhabitants or more incorporated as cities, boroughs, and villages, (2) incorporated towns of 2,500 inhabitants or more except in New England, New York, and Wisconsin, where "towns" are simply minor civil divisions of counties, (3) the densely settled urban fringe, including both incorporated and unincorporated areas, around cities of 50,000 or more, and (4) unincorporated places of 2,500 inhabitants or more outside any urban fringe. The remaining population is classified as rural.

According to the definition used in 1940, the urban population had been limited to all persons living in incorporated places of 2,500 inhabitants or more and in other areas classified as urban under special rules relating to population size and density. The remaining area of the country was classified as rural. The definition of urban area used in the 1940 Census was adopted substantially as stated above at the time of the 1910 Census.

In this edition, figures by urban and rural residence for all dates prior to the 1950 Census are in accordance with the old definition. Figures for 1950 and subsequent years are in accordance with the new definition unless otherwise stated.

**Farm and nonfarm residence.**—The rural population is divided into the rural-farm population, which comprises all rural residents living on farms, and the rural-nonfarm population, which comprises the remaining rural population. The definition of farm and nonfarm residents used in the 1950 Census differs somewhat from that used in earlier surveys and censuses. Persons on "farms" who were paying cash rent for their house and yard only were classified as nonfarm, as were persons in institutions, summer camps, motels, and tourist camps.

**Household.**—A "household," according to present usage of the Census Bureau, comprises all persons who occupy a dwelling unit, that is, a house, an apartment or other group of rooms, or a room that constitutes "separate living quarters." A household includes the "related persons" (the head of the household and others in the dwelling unit who are related to the head) and also the lodgers and employees, if any, who regularly live in the house. The number of households, thus defined, is the same as the number of "private households" or "families" as used in 1940 Census reports, and approximately the same as the number of "occupied dwelling units" as used in the 1950 Census of Housing. See section 29, Construction and Housing, for definition of dwelling unit. A person living alone or a group of unrelated persons sharing the same dwelling unit as partners is counted as a household.

A quasi-household is a group of persons living in quarters not classified as a dwelling unit, for example, in a house with at least five lodgers, or in a hotel, institution, labor camp, or military barracks.

**Family.**—The term "family," as used here, refers to a group of two or more persons related by blood, marriage, or adoption and residing together, and differs from the

meaning of the term as used in the 1930 and 1940 Censuses. A primary family consists of the head of a household and all (one or more) other persons in the household related to the head. A secondary family comprises two or more persons such as guests, lodgers, or resident employees and their relatives, living in a household or quasi-household (other than the negligible number of such groups among inmates of institutions) and related to each other.

**Subfamily.**—A subfamily is a married couple with or without children, or one parent with one or more children under 18 years old, living in a household and related to, but not including, the head of the household or his wife. Members of a subfamily are also members of the primary family with which they live. The number of subfamilies, therefore, is not included in the number of families.

**Married couple.**—A married couple is defined as a husband and his wife living together, with or without children and other relatives.

**Unrelated individuals.**—The term "unrelated individuals" as used here refers to persons (other than inmates of institutions) who are not living with any relatives. A primary individual is a household head living alone or with persons all of whom are unrelated to him. A secondary individual is a person in a household or a quasi-household such as a guest, lodger, or resident employee (excluding inmates of institutions) who is not related to the head or to any other person in the household or quasi-household.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, 1789-1945*, series B 26-30") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*, and its *Continuation to 1952*. See preface.

<sup>1</sup> Area figures for each census year represent all continental area under jurisdiction of United States on indicated date, including in some cases considerable areas not then organized or settled, and not covered by the census. Area figures have been adjusted to bring them into agreement with remeasurements made in 1940.

<sup>2</sup> Revised to include adjustments for under enumeration in Southern States; unrevised number is 38,558,371.

## No. 2.—ESTIMATED POPULATION: 1900 TO 1958

[In thousands. As of July 1, except where noted. Estimates for 1900 to 1909 are sums of State estimates based on local data indicative of population change. Estimates for 1910 to 1958 are based on decennial censuses and statistics of births, deaths, immigration, emigration, and Armed Forces. See also *Historical Statistics, 1789-1945*, series C 1]

# No. 3.—PROJECTIONS OF THE TOTAL POPULATION, BY AGE AND SEX: 1955 TO 1980

[In thousands. As of July 1. Includes Armed Forces overseas. Series I, II, III, and IV imply the following assumptions as to fertility: I—fertility averages 10 percent above present (1955-57 level throughout projection period); II—1955-57 level continues to 1975-80; III—1955-57 level declines to 1949-51 level by 1965-70, then remains at that level to 1975-80; IV—1955-57 level declines to 1942-44 level by 1965-70, then remains at that level to 1975-80. Series I illustrates the size of the future population under very high fertility conditions; it is unlikely that the fertility level implied will persist throughout the projection period. Comparable figures for 1957 are given in table 21]

YEAR AND SEX	TOTAL	Under 5 years	5 to 9 years	10 to 14 years	15 to 19 years	20 to 24 years	25 to 34 years	35 to 44 years	45 to 54 years	55 to 64 years	65 and over	Under 5 years (adjusted) <sup>1</sup>	14 and over	18 and over

<sup>1</sup> Includes estimated population of the Philippine Islands (1940: 16,356,000; 1930: 13,513,000), not shown separately. Ceded by Spain in 1898, the Philippine Islands constituted a territorial possession of the United States from 1898 to 1946. Granted independence as of July 4, 1946, they then became the Republic of the Philippines.

<sup>2</sup> Excludes inhabitants (36) of Midway Islands which were enumerated with Hawaii in 1930.

<sup>3</sup> Excludes inhabitants (560) of Baker, Canton and Enderbury, Howland, Jarvis, Johnston and Sand, and Midway Islands which were enumerated with Hawaii in 1940.

<sup>4</sup> Census taken as of Oct. 1 of preceding year.

<sup>5</sup> Not enumerated.

<sup>6</sup> Enderbury Island uninhabited at time of enumeration.

<sup>7</sup> Sand Island uninhabited at time of enumeration.

<sup>8</sup> Less than 0.5 square mile.

<sup>9</sup> Little Swan Island uninhabited at time of enumeration.

<sup>10</sup> Includes Caroline, Christmas, Danger (Pukapuka), Flint, Funafuti, Kingman Reef, Malden, Manahiki, Navassa, Nukufetau, Nukulailai, Nurakita, Penrhyn, Quita Sueno Bank, Rakahanga, Roncador Cay, Serrana Bank, Starbuck, Vostok, Phoenix Group (except Canton and Enderbury), and Union (Tokelau) Group, not enumerated in decennial censuses; and Baker, Howland, and Jarvis Islands.

<sup>11</sup> Not enumerated or uninhabited at time of enumeration.

<sup>12</sup> Population of Baker, Howland, and Jarvis Islands. Other islands not enumerated or uninhabited at time of enumeration.

<sup>13</sup> Area figure is for Navassa (area, 2 square miles), and Baker, Howland, and Jarvis (combined area 3 square miles); excludes Kingman Reef, Quita Sueno Bank, Roncador Cay, and Serrana Bank (each less than 0.5 square mile). Area of other islands (listed in footnote 10) not available.

<sup>14</sup> Under jurisdiction of United States in accordance with treaty of Nov. 18, 1903, with Republic of Panama.

<sup>15</sup> Leased (1914) from the Republic of Nicaragua for 99 years.

<sup>16</sup> Figures are those of the 1950 and 1940 Censuses of the Republic of Nicaragua, May 1950 and 1940. Little Corn Island uninhabited at time of both enumerations.

<sup>17</sup> Under trusteeship with the United States as administering authority. See *Trusteeship Agreement for the Former Japanese Mandated Islands (Documentary Supplement No. 1)* of the Security Council of the United Nations which became effective on July 18, 1947.

<sup>18</sup> Population 1930, 69,626; 1940, 131,258 (Censuses of Japan).

<sup>19</sup> U. S. Department of the Navy. *Report on the Administration of the Trust Territory of the Pacific Islands for the Period July 1, 1949 to June 30, 1950*. Washington, D. C., U. S. Government Printing Office, 1950.

<sup>20</sup> U. S. Department of the Navy. *Handbook on the Trust Territory of the Pacific Islands*. Washington, D. C., U. S. Government Printing Office, 1948.

<sup>21</sup> Excludes United States citizens abroad on private business, travel, etc. Many of these were enumerated in the United States at their usual place of residence as absent members of households.

<sup>22</sup> Based on 20-percent sample of reports received and consequently subject to sampling variability. Chances are about 2 out of 3 that the figure that would have been obtained from a complete count would have differed by less than 1,200 from figure shown here.

<sup>23</sup> Not available.

No. 5.—CENTER OF POPULATION: 1790 TO 1950

["Center of population" is that point which may be considered as center of population gravity of the U. S. or that point upon which the U. S. would balance, if it were a rigid plane without weight and the population distributed thereon with each individual being assumed to have equal weight and to exert an influence on a central point proportional to his distance from the point.]

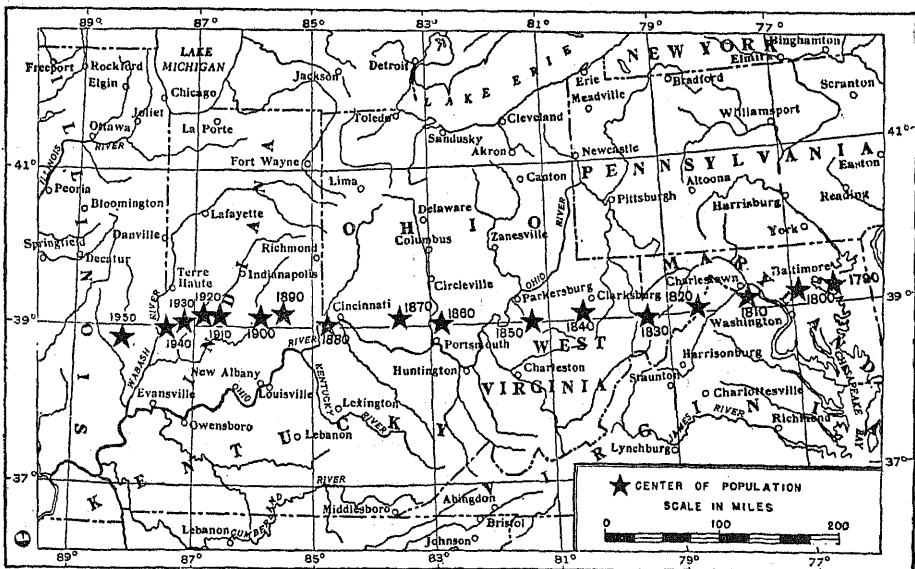

YEAR	North latitude	West longitude	Approximate location
1790.....	39 16 30	76 11 12	23 miles east of Baltimore, Md.
1800.....	39 16 6	76 56 30	18 miles west of Baltimore, Md.
1810.....	39 11 30	77 37 12	40 miles northwest by west of Washington, D. C. (in Virginia).
1820.....	39 5 42	78 33 0	16 miles east of Moorefield, W. Va. <sup>1</sup>
1830.....	38 57 54	79 16 54	19 miles west-southwest of Moorefield, W. Va. <sup>1</sup>
1840.....	39 2 0	80 18 0	16 miles south of Clarksburg, W. Va. <sup>1</sup>
1850.....	38 59 0	81 19 0	23 miles southeast of Parkersburg, W. Va. <sup>1</sup>
1860.....	39 0 24	82 48 48	20 miles south by east of Chillicothe, Ohio.
1870.....	39 12 0	83 35 42	48 miles east by north of Cincinnati, Ohio.
1880.....	39 4 8	84 29 40	8 miles west by south of Cincinnati, Ohio (in Kentucky).
1890.....	39 11 56	85 32 53	20 miles east of Columbus, Ind.
1900.....	39 0 36	85 48 54	6 miles southeast of Columbus, Ind.
1910.....	39 10 12	86 32 20	In the city of Bloomington, Ind.
1920.....	39 10 21	86 43 15	8 miles south-southeast of Spencer, Owen County, Ind.
1930.....	39 3 45	87 8 6	3 miles northeast of Linton, Greene County, Ind.
1940.....	38 56 54	87 22 35	2 miles southeast by east of Carlisle, Haddon township, Sullivan County, Ind.
1950.....	38 50 21	88 9 33	8 miles north-northwest of Olney, Richland County, Ill.

<sup>1</sup> West Virginia was set off from Virginia Dec. 31, 1862, and admitted as a State June 19, 1863.

<sup>1</sup> Base is 1950 total population.<sup>2</sup> Comprises both net immigration from abroad and net interregional, interdivisional, or interstate migration according to the area shown. Includes movements of persons in the Armed Forces between 1950 and 1956.Source: Department of Commerce, Bureau of the Census; *Current Population Reports*, Series P-25, No. 165.

No. 9.—POPULATION, 1790 TO 1950, AND POPULATION RANK AND PERCENT INCREASE,  
1900 TO 1950, BY STATES AND OTHER AREAS

[Population in thousands. Insofar as possible, population shown is that of present area of State. Minus sign (—) denotes decrease. For regional totals, see also *Historical Statistics, 1789-1945*, series B 48-71]

<sup>1</sup> Includes 6,100 persons on public ships in service of the United States, not credited to any region, division, or State.

<sup>2</sup> Revised; unrevised figure is 38,558,371. Census of Southern States considered incomplete but there has been no revision of State figures, hence State and region figures do not add to total shown here.

<sup>3</sup> Includes 325,464 persons in Indian Territory and Indian reservations, specially enumerated.

<sup>4</sup> Territory Northwest of River Ohio.

<sup>5</sup> 1800 includes 3,124 persons in those portions of Indiana Territory which were taken to form Michigan and Illinois Territories in 1805 and 1809, respectively, and that portion which was separated in 1816.

<sup>6</sup> Michigan Territory as then constituted; boundaries changed in 1816, 1818, 1834, and 1836.

<sup>7</sup> Includes that part of Minnesota northeast of Mississippi River.

# No. 10.—POPULATION PER SQUARE MILE, BY STATES AND OTHER AREAS: 1800 TO 1950

[For United States, population of continental U. S. has been divided by total land area. For each State or Territory, population at given census has been divided by land area as then constituted. However, 1930 figures are based on revised land areas used for 1940. Areas of Indian reservations, outside Indian Territory, are included in areas of States and Territories for all years; however, populations of reservations were not ascertained and therefore were not taken into account in computing densities prior to 1890]

## No. 11.—POPULATION OF STANDARD METROPOLITAN AREAS: 1940 AND 1950

[Minus sign (—) denotes decrease. A standard metropolitan area is a county or group of contiguous counties (except in New England) which contains at least one city of 50,000 inhabitants or more in 1950 or subsequently. In addition to the county, or counties, containing such a city, or cities, contiguous counties are included in a standard metropolitan area if according to certain criteria they are essentially metropolitan in character and sufficiently integrated with the central city. In New England, standard metropolitan areas have been defined on a town rather than on a county basis. This list of areas is based on "Standard Metropolitan Area Definitions" issued by the Executive Office of the President, Bureau of the Budget, on Jan. 15, 1957. For detailed explanation of standard metropolitan area concept and data for geographic components of each area, see source and *County and City Data Book, 1956*, a supplement to the *Statistical Abstract*]

<sup>1</sup> Bethlehem and South Bethlehem boroughs consolidated as Bethlehem city between 1910 and 1920. Combined population, 1890, 19,823; 1900, 23,999; 1910, 32,810. <sup>2</sup> Population prior to incorporation.

<sup>3</sup> Estimated.

<sup>4</sup> Population shown is for New York City as now constituted.

<sup>5</sup> Omaha and South Omaha cities consolidated between 1910 and 1920. Combined population, 1890, 148,514; 1900, 128,556; 1910, 150,355.

<sup>6</sup> Allegheny city annexed to Pittsburgh in 1907. Combined population, 1890, 343,904; 1900, 451,512.

<sup>7</sup> Corrected figure; exclusive of population (2,648) of certain territory outside city limits.

<sup>8</sup> Union and West Hoboken towns consolidated as Union City in 1925. Combined population, 1900, 38,281; 1910, 56,426; 1920, 60,725.

<sup>9</sup> Population shown for 1900 through 1950 is for District of Columbia, with which the city has been considered coextensive since 1895.

## No. 32.—SELECTED CHARACTERISTICS OF THE NONWHITE POPULATION, BY RACE: 1950

[Statistics for races other than Negro based on complete count except as noted. Statistics for Negroes obtained by subtracting totals for the other races from the nonwhite totals. Figures may differ from those for corresponding items in other tables, because of different tabulations; see text, p. 1. See also *Historical Statistics, 1789-1945*, series B 40-47]

<sup>1</sup> Standard is the distribution by age of all women of corresponding marital status in the United States in 1950.

<sup>2</sup> Standardized rate not computed where there are fewer than 150,000 women in several component 5-year age groups.

<sup>3</sup> Rate not shown where base is less than 150,000.

Series IV.....	61,584	739	1.33	3.32	—	—	—	—

<sup>1</sup> Computed by compound interest formula.

<sup>2</sup> Obtained by dividing total population by number of households; hence, not strictly average size of household because total population includes members of quasi-households.

<sup>3</sup> Includes small number of hotels, institutions, and other quasi-households.

<sup>4</sup> Based on 20-percent sample of 1950 Census returns. <sup>5</sup> See Technical Note, p. 201.

<sup>6</sup> Series imply the following assumptions: I—Rate of change for 10-year periods, 1955 to 1975, will be equal to rate of change for 8-year period, 1947-1955; II—Average annual rate of change between 1950 and 1955 will continue to 1975; III—Half the average annual rate of change between 1950 and 1955 will continue to 1975; IV—No change in relevant measures will occur after 1955.

<sup>7</sup> Population base from *Current Population Reports*, Series P-25, No. 78. Series A used for household population I and II; Series C used for household population III and IV.

Source: Department of Commerce, Bureau of the Census; Reports of the Thirteenth, Fifteenth, Sixteenth, and Seventeenth Censuses; also *Current Population Reports*, Series P-20, Nos. 69 and 76, Series P-25, No. 153; and records.

## No. 53.—RELIGIOUS BODIES—CHURCH MEMBERSHIP, NUMBER OF PASTORS, AND SUNDAY SCHOOL ENROLLMENT

[Represents latest information available from religious bodies; excludes a few groups giving no data, such as Church of Christ, Scientist. Totals include, substantially, those religious bodies reporting to Bureau of Census for Census of Religious Bodies in 1936. Not all groups follow same calendar year nor count membership in same way; some groups give only approximate figures. Roman Catholics count all baptized persons, including infants; Jews regard as members all Jews in communities having congregations; Eastern Orthodox Churches include all persons in their nationality or cultural groups; most Protestant bodies count only persons who have attained full membership, and previous estimates have indicated that all but a small minority of these are over 13 years of age; however, many Lutheran bodies and Protestant Episcopal Church now report all baptized persons, and not only those confirmed.]

<sup>1</sup> Includes contributions for home and foreign missions.<sup>2</sup> Represents contributions to expenses of local parish or church, including building funds, repairs, fuel, minister's salary—anything that is for local church.<sup>3</sup> 41 bodies.<sup>4</sup> Excluded from total because not comparable.Source: National Council of the Churches of Christ in the United States of America; published in *Statistics of Giving*, November 1957.

## Section 2

### Vital Statistics, Health, and Nutrition

This section presents vital statistics—data on births, deaths, fetal deaths (stillbirths), marriages, divorces—and data on communicable diseases, mental health, medical care, hospitals, and nutrition. Vital statistics are compiled and published by the National Office of Vital Statistics, Public Health Service, in its annual report, *Vital Statistics of the United States*, and its *Monthly Vital Statistics Report*. Reports in this field are also issued by the individual State bureaus of vital statistics.

**Births and deaths.**—The collection of death statistics on an annual basis began in 1900. Then the death-registration States consisted of 10 States and the District of Columbia. In 1915, the collection of birth statistics began with 10 States and the District of Columbia. The changing composition of the two registration areas<sup>1</sup> makes it impossible to obtain geographically comparable birth and death data for the entire United States before 1933. However, the rates for the expanding groups of registration States are approximations of national rates, and general comparisons over a long period of years can be made. Beginning with 1933, the birth and death registration areas have comprised the entire continental United States. National statistics on fetal deaths were compiled for 1918 and annually since 1922.

Birth statistics refer to live births occurring in continental United States unless otherwise noted. Prior to 1951, these data were based on a complete count of the records received in the National Office of Vital Statistics. From 1951 to 1954, the figures were based on a 50-percent sample of all registered births. In 1955, all the records were again counted, but in 1956 the basis reverted to a 50-percent sample. Adjustments shown for underregistration of births are based, for the most part, on the results of nationwide tests of registration completeness in 1940 and 1950.<sup>2</sup>

Death statistics comprise only deaths occurring in continental United States unless otherwise noted; deaths among Armed Forces overseas are excluded. Current figures are based on a 10-percent sample of death certificates filed in State vital statistics offices. Fetal deaths (stillbirths) are excluded from death statistics. Fetal death figures represent only fetal deaths for which the period of gestation was 20 weeks or more, or was not stated, since many States do not require the registration of earlier fetal deaths.

Births, deaths, and fetal deaths are classified by place of occurrence and by place of residence<sup>3</sup> of the mother or of the decedent.

**Marriages and divorces.**—National collections of statistics on marriages and divorces in the United States were made for the years 1867 to 1906, 1916, 1922 to 1932, 1937 to 1940, and 1944 to 1957. Estimates have been made for the intervening years as well as for years in which collections were not complete. A marriage-registration area covering 29 States and 5 independent registration areas was established by the National Office of Vital Statistics on January 1, 1957. A divorce-and-annulment-registration area with 14 States and 3 independent registration areas was inaugurated on January 1, 1958. The establishment of these registration areas represents an attempt to improve national statistics of marriages and divorces.

<sup>1</sup> For coverage of these areas, see *Historical Statistics of the United States, 1789-1945*, series C 1-5.

<sup>2</sup> For a description of these tests and their findings see *Birth Registration Completeness in the United States and Geographic Areas, 1950, Part I, Data for each State*, Vital Statistics—Special Reports, Vol. 39, No. 2.

<sup>3</sup> For a discussion of methods of residence allocation and of significance of residence figures, see *Vital Statistics of the United States, 1950*.

NOTE.—This section presents data for the most recent year or period available on February 7, 1958, when the material was organized and sent to the printer. In a few instances, more recent data were added later.

**Vital statistics rates.**—Vital statistics rates computed by the National Office of Vital Statistics are based upon the enumerated population figures as of April 1 for 1940 and 1950, and upon the estimated midyear population figures for other years, provided by the Bureau of the Census. The special situation created by the changes in size and disposition of the Armed Forces necessitated the use of different types of population bases during the war and postwar period.<sup>4</sup> Birth and divorce rates for 1941 to 1946 for the United States are based on the total population including members of the Armed Forces overseas. Birth and divorce rates for 1940 and 1947 to 1957 and death and marriage rates for 1940 to 1957 for the United States and the individual States are based on total population present in the area, excluding Armed Forces overseas.

**Morbidity.**—Statistics on morbidity are compiled and published by the Public Health Service in its *Morbidity and Mortality Annual Supplement*. The type of diseases reported by individual States depends upon laws or regulations within the various States. However, most of the common communicable diseases are reportable in all States. Data on morbidity in the general population are also obtained occasionally by special surveys conducted in various communities or States. A clearing-house of such surveys is maintained by the Public Health Service.

A new source of health statistics is the U. S. National Health Survey which covers diseases, accidental injuries, impairments, disability, volume of medical and dental care, and hospitalization. Results of the Survey are published by the Public Health Service in a series of reports beginning in October 1957.

Morbidity statistics for members of the Armed Forces are prepared and published by the Departments of the Army, Navy, and Air Force. The Department of Labor compiles statistics of industrial injuries (see pp. 234 and 235).

**Medical care.**—Statistics of hospitals are obtained from the annual survey of hospitals conducted by the American Hospital Association. These statistics are published annually by that organization in *Hospitals*, Guide Issue, and include only hospitals that meet American Hospital Association requirements for listing. A relatively large number of institutions that provide health care, such as nursing and convalescent homes, are not included in the survey. Practically all of the hospitals in the country that meet the following definition of a hospital are included: A hospital is any establishment offering services, facilities and beds for use beyond 24 hours by two or more nonrelated individuals requiring diagnosis, treatment or care for illness, injury, deformity, infirmity, abnormality or pregnancy, and regularly making available at least (1) clinical laboratory services, (2) diagnostic X-ray services, and (3) treatment facilities for (a) surgery, or (b) obstetrical care, or (c) other definitive medical treatment of similar extent. *Hospital Service in the United States*, a publication of the American Medical Association, discontinued in June 1954, presented data on hospital facilities for many years. Statistics supporting comprehensive, long-range plans for construction of hospital facilities authorized under Title VI of the Public Health Service Act are revised annually. Summary data on existing hospital beds from 1948 to 1955 appear in *Public Health Reports* (May 1955 issue, p. 484).

Statistics on institutional population based on the 1950 Census of Population include information on number and characteristics of persons in long-term hospitals, in homes and schools for the mentally and physically handicapped, and in homes for the aged and dependent (*U. S. Census of Population, 1950*, Vol. IV, Part 2C).

Sample surveys are conducted occasionally to provide information on the medical care received by the population of various communities or States, and certain insurance organizations publish statistics on the medical care received by their beneficiaries.

<sup>4</sup> For a discussion of the interpretation of crude rates during wartime, see *Summary of Natality and Mortality Statistics, United States, 1943*, Vital Statistics—Special Reports, Vol. 21, No. 1, and *Marriage and Divorce in the United States, 1937 to 1945*, Vital Statistics—Special Reports, Vol. 23, No. 9.

Another aspect of medical care is provided by statistics on patients in hospitals for mental disease, and in institutions for mental defectives and epileptics. From 1926 to 1946, such data were collected annually by the Bureau of the Census. Beginning with the 1947 report, the data appear in the annual report *Patients in Mental Institutions* issued by the National Institute of Mental Health, Public Health Service.

**Nutrition.**—Statistics on the apparent per capita consumption of food and its nutrient value are estimated by the Department of Agriculture and published quarterly (nutrient value, annually) in the *National Food Situation*. A discussion of methods used to compute these figures and more detailed information appear in Agriculture Handbook No. 62, *Consumption of Food in the United States, 1909-52*, and in the 1956 supplement to that publication.

Statistics on Federal food distribution programs, and data on the quantity and costs of the food commodities distributed and the number of persons participating in the programs are published annually in *Agricultural Statistics*.

**Historical Statistics.**—Tabular headnotes (as "See also *Historical Statistics, 1789-1945*, series C 24, C 45, C 77-78") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*, and its *Continuation to 1952*. See preface.

<sup>1</sup> For 1940 and 1950 based on population enumerated as of April 1, for all other years estimated as of July 1. For 1945 based on population including Armed Forces overseas; for 1940 and 1950-57 based on total population residing in area.

<sup>2</sup> Includes adjustments for States not in the birth-registration area before 1933; see text, p. 53.

<sup>3</sup> Not available. Birth-registration area began in 1915; see text, p. 53.

<sup>4</sup> Not estimated. Differences between estimated numbers of all births and white births do not give reliable estimates for nonwhite births. <sup>5</sup> Based on a 50-percent sample. <sup>6</sup> Estimated.

# NO. 62.—REGISTERED LIVE BIRTHS, BY COLOR, FOR URBAN AND RURAL AREAS, BY STATES: 1955 AND 1956

[By place of residence. Definition of urban and rural based on 1940 Census of Population; see p. 2. Tests made in 1950 indicate that for the country as a whole, errors in residence reporting result in a significant overstatement of births to residents of urban places, and a corresponding understatement in the number to residents of areas classified as rural]

## No. 65.—GROSS AND NET REPRODUCTION RATE, BY COLOR: 1905 TO 1956

[Based on births adjusted for underregistration, and on annual life tables and population estimates by age, except as noted. A net reproduction rate of 1,000 means that each generation would just replace itself, if birth and death rates of a specified period were to continue indefinitely, in the absence of net immigration. A rate above 1,000 implies a potentially gaining population, and a rate below 1,000, a potentially declining population. A gross reproduction rate of 1,000 means that if all women born at the beginning of a generation were to live through their reproductive period and continue birth rates existing at the time of their birth, they would barely reproduce themselves, assuming no migration from outside the area. Where gross reproduction rate is less than 1,000, an improvement in mortality alone would not prevent a potential decline in population. For earlier annual gross reproduction rates, see *Historical Statistics, 1789-1946*, series C 37]

PERIOD OR YEAR	NET REPRODUCTION RATE			GROSS REPRODUCTION RATE		
	Total	White	Nonwhite	Total	White	Nonwhite
1905 to 1910 <sup>1</sup>	1,336	1,339	1,329	1,793	1,740	2,240

<sup>1</sup> Deaths from deliveries and complications of pregnancy, childbirth, and the puerperium. Beginning with 1949, deaths are classified according to sixth revision of *International Lists of Diseases and Causes of Death*. For deaths in United States as a whole, it is estimated that 9 percent fewer deaths were assigned to maternal causes under sixth revision than under fifth revision of *International List* (1939-48).

<sup>2</sup> Includes only fetal deaths (stillbirths) for which period of gestation was 20 weeks (or 5 months) or more, or was not stated.

<sup>3</sup> Not available.

<sup>4</sup> Provisional.

<sup>1</sup> Based on population enumerated as of April 1 for 1940 and estimated as of July 1 for other years. Rates per 100,000 population residing in area.

<sup>2</sup> Estimated; based on a 10-percent sample of death certificates.

<sup>3</sup> Not available.

<sup>4</sup> Includes neoplasms of lymphatic and hematopoietic tissues.

<sup>5</sup> Excludes diarrhea of newborn.

No. 78.—ESTIMATES OF MARRIAGES FOR THE UNITED STATES AND MARRIAGE LICENSES  
ISSUED IN MAJOR CITY AREAS, BY MONTH: 1950 TO 1957

[Provisional data. Figures for major-city areas represent licenses issued in 34 cities with population of 100,000 or more according to the 1950 Census, and in 69 counties containing the remaining 72 cities in that population-size group. These areas contain nearly two-fifths of the total population of the United States]

<sup>1</sup> Represents the difference between expenditures for health insurance premiums (earned income) and amounts returned to consumers as benefits.

<sup>2</sup> Combines amounts received by hospitals from patients and the costs of providing the mechanism of prepaid hospital care.

<sup>3</sup> Combines amounts received by physicians from patients and the costs of providing the mechanism of prepaid physicians' services.

<sup>4</sup> Services of osteopathic physicians, chiropractors, podiatrists, private-duty trained nurses, and miscellaneous curative and healing professions.

<sup>5</sup> Comprises nursing homes with skilled nursing care.

## No. 88.—HOSPITALS—TYPE OF CONTROL AND SERVICE: 1920 TO 1956

[For 1920-1953, covers hospitals and related institutions registered by the American Medical Association. Registration was a basic recognition extended to hospitals and related institutions in accordance with requirements outlined in *Essentials of a Registered Hospital*, officially adopted by the House of Delegates of the A. M. A. Hospital registration series was discontinued by the A. M. A. in 1954. Beginning 1954, represents new series covering hospitals accepted for listing by the American Hospital Association, and may not be entirely comparable. Listing is a basic recognition extended to hospitals and related institutions in accordance with requirements outlined in *Requirements for Accepting Hospitals for Listing*, officially adopted by the House of Delegates of the American Hospital Association. See also *Historical Statistics, 1789-1945*, series C 92-117]

# No. 99.—NUTRITION—NUTRIENTS AVAILABLE FOR CIVILIAN CONSUMPTION PER CAPITA PER DAY: 1910 TO 1957

[Computed on basis of estimates of apparent civilian consumption (retail basis) including consumption from rural and urban home gardens. Based on Bureau of the Census estimated population as of July 1. No deductions have been made in nutrient estimates for loss or waste in home or for destruction or loss of nutrients during preparation of food. Deductions have been made for inedible refuse. Data for iron, thiamine, riboflavin, and niacin include amounts of these nutrients added to prepared cereals, bread, and white flour under enrichment program. See also *Historical Statistics, 1789-1945*, series C 122-127 for unrevised series]

## Section 3

### Immigration, Emigration, and Naturalization

This section presents statistics related to immigration, emigration, naturalization, and alien registration. The principal source of these data is the *Annual Report* of the Immigration and Naturalization Service. Statistics of immigration and emigration are prepared from passenger and crew lists or manifests, and land border station registrations. Statistics for naturalizations are compiled from periodic reports by courts conducting such proceedings, and those for alien registrations are compilations of data from alien address report cards.

Although the reporting of alien arrivals was required in certain of the colonies and original States, the continuous record begins in 1819. Under the Act of March 2, 1819, passenger lists for all vessels arriving from foreign places were to be delivered to the local collector of customs, copies transmitted to the Secretary of State, and the information reported to Congress. Immigration statistics were compiled by the Department of State from 1820 to 1874 and by the Bureau of Statistics of the Treasury Department from 1867 to 1895. Since 1892 there has been a separate office or bureau of immigration, now a part of the Immigration and Naturalization Service. Annual reports were issued by this bureau from 1892 to 1932. From 1933 to 1940, a summary of the work of the Immigration and Naturalization Service was given in the Annual Reports of the Secretary of Labor. For 1941, the *Annual Report of the Attorney General* contained a report on immigration and naturalization. For subsequent fiscal years, Annual Reports of the Immigration and Naturalization Service (submitted by the Commissioner to the Attorney General) were published independently.

**Immigration.**—Since 1820 the official immigration statistics (see table 104) have changed considerably in coverage. The early figures were for arrivals at Atlantic and Gulf coast seaports of the United States. Pacific coast arrivals were first reported in 1850. Aliens arriving at Canadian seaports en route to the United States were included after 1893. The reporting of arrivals over the land borders began in 1904 and was gradually extended up to 1908. For reporting purposes, Hawaii in 1901, Puerto Rico in 1902, and Alaska in 1904 were treated as integral parts of the United States. Travel between the Philippine Islands and the United States was not treated as immigration or emigration between July 1, 1898 and May 1, 1934. Prior to 1868 arriving alien passengers were recorded; thereafter aliens coming for temporary stay were omitted. The passage of the Act of 1891 increased the number of excludable classes. The basis of reporting was then changed from arrivals to admissions, omitting aliens not permitted to enter the United States, except for the period 1895 to 1897 when the reporting of arrivals was resumed. Two classes of alien admissions are now reported, immigrant under either quota or nonquota status, and nonimmigrant.

**Immigrant.**—An immigrant is defined as an alien, other than a returning resident, admitted for permanent residence.

**Quota immigrant.**—Quotas limit immigration from countries other than those of the Western Hemisphere. Until 1920 there was only a qualitative limitation on immigration into this country. The 1921 Act placed the first numerical ceiling upon immigration. Each country's quota was to be 3 percent of the number of people born in that

Note.—This section presents data for the most recent year or period available on February 7, 1958, when the material was organized and sent to the printer. In a few instances, more recent data were added later.

country who were residing in the United States as reported by the 1910 Census of Population. In 1924, a new formula was enacted for computing a country's quota, based on 2 percent of the number of people born in that country who were residing in the United States as determined by the 1890 Census of Population. The 1924 Act also provided that beginning July 1, 1929, the quota of any country shall have the same ratio to 150,000 as the number of persons of that national origin living in the United States had to the total population living in the United States, as determined from the 1920 Census of Population. This Act also established minimum quotas of 100 for all quota areas and thereby raised the total quota authorized to 153,714. By 1952, this figure had become 154,277 by virtue of minor changes. The most recent step in legislation was in the Immigration and Nationality Act of 1952, which simplified the national origins formula of the 1924 Act by basing the annual quota on a flat one-sixth of 1 percent of the population in the 1920 Census. By Presidential proclamation effective January 1, 1953, new quotas were established for each quota area, totaling 154,657. Quotas were further revised during 1957 by Presidential proclamation, and the total now stands at 154,857.

**Nonquota immigrant.**—Nonquota immigrants comprise immigrants born in Canada, Mexico, Cuba, Haiti, the Dominican Republic, the Canal Zone, and countries of Central and South America, and their spouses and children under age 21 if accompanying or following to join such immigrants; spouses and children of citizens of the United States; ministers of religious denominations, their spouses and children, if accompanying or following to join such ministers; refugees; and others.

**Nonimmigrant.**—Nonimmigrants are aliens who enter the United States for temporary periods or resident aliens returning from a temporary stay abroad. Included in the nonimmigrant class are foreign government officials, their families, attendants, servants and employees; temporary visitors for business or pleasure; aliens in continuous transit through the United States; returning resident aliens; students; and others. Certain temporary admissions such as of persons in possession of border-crossing identification cards are not included in the nonimmigrant totals.

**Displaced persons and refugees.**—The Displaced Persons Act of 1948, as amended, authorized the entry of certain displaced persons and other refugees without regard to the current availability of quotas, but subject to charges made against future annual quotas. The major provisions of the Displaced Persons Program expired in December 1951, and the program was nearly completed by June 30, 1952.

The Refugee Relief Act of 1953 authorized the issuance of 214,000 special nonquota visas until the end of 1956 to German, Italian, Greek, Far-Eastern, and other refugees and expellees from the Soviet and other Communist-dominated countries. An act passed September 11, 1957, further provided for the reallocation of 18,000 of these visas which were unused.

**Alien registration.**—The Immigration and Nationality Act provides that each alien required to be registered under the Alien Registration Act of 1940, who is in the United States on January 1, must report to the Attorney General his current address during the month of January. Alien address report cards are distributed through the Post Offices of the United States or the local offices of the Immigration and Naturalization Service.

**Emigration.**—No official record of alien departures was kept prior to July 1, 1907. Alien departures are classified as emigrant and nonemigrant. For statistical purposes an emigrant is an alien departing from the United States after a stay of one year or more with the declared intention of remaining permanently in a foreign country. The nonemigrant category includes both alien residents of the United States departing for a temporary sojourn abroad, and aliens leaving the United States after a stay of less than a year.

**Naturalization.**—Naturalization statistics for the United States began with the fiscal year 1907. Prior to this time each court kept records of naturalizations but no national

data were compiled. The Act of June 29, 1906, effective September 27, 1906, provided for periodic returns by all courts conducting naturalization proceedings, and for the filing with a central Federal agency of a duplicate copy of each declaration of intention and petition for naturalization filed, and of each certificate of naturalization issued. Naturalization statistics were originally compiled by the Bureau of Immigration and Naturalization of the Department of Commerce and Labor, now the Immigration and Naturalization Service of the Department of Justice.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, 1789-1945*, series B 304") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*, and its *Continuation to 1952*. See preface.

### NO. 103.—ANNUAL IMMIGRATION QUOTAS, BY COUNTRY, UNDER SUCCESSIVE IMMIGRATION LAWS: 1921 TO 1952

[Quotas as first proclaimed. See table 107 for quota immigrants admitted. For explanation of the various acts, see text, p. 87]

All others.....	65	400	400	-----

<sup>1</sup> Quota was 153,774 from 1934 to February 8, 1944, when quota of 105 Chinese, authorized by Act of Dec. 17, 1943, increased the maximum quota to 153,879. On July 4, 1946, quota for Philippine Islands was increased from 50 to 100, thereby raising total quota to 153,929. Quota was increased to 154,206 on July 27, 1949, by establishment of separate quotas of 100 each for Israel, Syria, and Lebanon, and abolishment of combined quota of 123 established for Syria and Lebanon. Quota was increased to 154,277 on Oct. 31, 1950, when quota for Italy was reduced to 5,677, quota for Yugoslavia was increased to 938, and a separate quota of 100 was established for Trieste. Quota was changed to 154,657, effective January 1, 1953, in accordance with the Immigration and Nationality Act. During 1957 the total quota was increased by Presidential proclamation by 200 to 154,857. Quotas of 100 each were established for Sudan, Tunisia, and Ghana, and the quota for British Togoland, now part of Ghana, was abolished.

<sup>2</sup> All Ireland included with Great Britain prior to 1925, thereafter, Northern Ireland only.

<sup>3</sup> Includes Philippines.

## Section 4

### Education

Statistics in this section relate to the level, extent, personnel, and finances of formal education in the United States. The principal sources of these data are the Decennial Census of Population (see text, p. 1) and the Biennial Survey of Education conducted by the U. S. Office of Education. Other statistical studies of the U. S. Office of Education, publications of the National Education Association, annual or biennial reports of the individual State agencies which have jurisdiction over education, and the Current Population Survey conducted by the Bureau of the Census (see text, p. 2) are the additional regular sources of data in the field of education.

State laws vary concerning the compulsory school attendance of children. However, most State laws require that formal schooling begin at 7 years of age and extend until 16 years of age.

Data on school enrollment are available from the Decennial Census of Population since the Census of 1840 and on educational attainment from the same source for 1940 and 1950. The Current Population Survey of the Bureau of the Census has reported on school enrollment annually beginning in 1945, and on educational attainment periodically beginning in 1947. The Reports of the Biennial Survey of Education include a variety of information presented in much detail for each school level (kindergarten, elementary, secondary, and college). The Office of Education also issues annually the *Digest of Annual Reports of State Boards for Vocational Education*.

**Enrollment and attainment.**—School enrollment statistics, particularly those of the Bureau of the Census, are based on attendance or enrollment in any school (or college) within a given period. Attainment statistics are based on the last full grade completed by a student. A school as defined in this respect by the Bureau of the Census is any public, private, or parochial school, college or university, but excludes nursery schools or, generally, vocational, trade, business, or correspondence schools; kindergartens were also excluded until October 1950.

The median year of school completed is defined as the year which divides the population into equal parts—one-half completing more, the other half completing less, schooling than the median. In the presentation of median year of school completed, the completion of the first year of high school is uniformly indicated by 9 and of the first year of college by 13, although a few areas have only 7 years of elementary school.

**Schools.**—The school data shown here from the Biennial Survey of Education are reasonably complete for the types of education covered, but do not include figures for private schools of art, music, drama, etc., for private, commercial, trade, and vocational schools, or private correspondence schools.

The comparability of elementary school or secondary school data over a period of years was invalidated by the introduction of the junior high school which includes the 7th and 8th grades of the traditional elementary school and the 9th grade of regular high school. A comparable time series utilizing these data is possible only on the strict basis of grade enrollment, grades 1 through 8 as elementary and grades 9 through 12 as secondary.

**Office of Education data in this section relate to school terms or academic years; except as noted, the year shown refers to the period beginning in September of the prior year and extending to June of the year indicated.**

*Note.*—This section presents data for the most recent year or period available on March 3, 1958, when the material was organized and sent to the printer.

FIG. IX.—CURRENT EXPENDITURE PER PUPIL IN AVERAGE DAILY ATTENDANCE FOR PUBLIC ELEMENTARY AND SECONDARY DAY SCHOOLS: 1954

[See table 146]

No. 124.—SCHOOL ENROLLMENT BY SINGLE YEARS OF AGE FROM 5 TO 20, BY SEX:  
1920 TO 1950

[Statistics for 1940 and 1950 are based on attendance at or enrollment in any regular school or college, including night schools, extension schools, or vocational schools, if part of regular school system. Excludes correspondence schools. In the 2 prior censuses, school enrollment question not restricted as to type of school or college. In 1950, question referred to period between Feb. 1 and Apr. 1, 1950; in 1940, to period between Mar. 1 and Apr. 1, 1940; in 1930, to period between Sept. 1, 1929, and Apr. 1, 1930; and in 1920, to period between preceding Sept. 1 and Jan. 1. Figures for 1950 based on 20-percent sample.]

## No. 127.—ESTIMATES AND PROJECTIONS OF ELEMENTARY AND HIGH SCHOOL ENROLLMENTS, BY GRADE: 1952 TO 1965

In thousands. As of October 1. Data based on projected age-grade specific enrollment rates from the 1950 Census. Series A and B, and C imply the following assumptions regarding the projected number of births between 1953 and 1959: A and B—1953-58 reproductive level continues to at least 1950; C—1953-58 level declines to about the 1940 level by 1975. High school enrollment figures are based on projections of the population already born by July 1953; thus, only one series is shown for all years. These estimates were prepared in 1952 and differ somewhat from data for current years based on Current Population Survey shown in other tables

YEAR	Total enrollment	ELEMENTARY ENROLLMENT (EXCLUDING KINDERGARTEN)										HIGH SCHOOL ENROLLMENT

**No. 138.—ILLITERACY OF PERSONS 14 YEARS OLD AND OVER, BY AGE, COLOR, SEX, AND URBAN AND RURAL RESIDENCE: 1947 AND 1952**

[In thousands. As of October. Data relate to civilian noninstitutional population based on Current Population Survey. Population base was 1940 extended to survey dates; data will differ from results obtained by revised estimating procedure; see Technical Note, p. 201. Persons unable to both read and write in any language were classified as illiterate. Information on illiteracy was obtained in 1952 only for persons completing less than 6 years of school, and in 1947 only for persons completing less than 5 years of school. Persons completing more than that amount were classified as being literate]

<sup>1</sup> Census enumeration as of June 1, 1870 to 1900; Apr. 15, 1910; Jan. 1, 1920; Apr. 1, 1930 and 1940; 1948-1954, Census estimates and excludes Armed Forces overseas.

<sup>2</sup> Excluding population of Indian Territory which is not covered by public-school statistics, and also, for 1890, population of Indian reservations. These were not enumerated at censuses prior to 1890.

<sup>3</sup> Includes other nonsupervisory instructional staff; excludes supervisors and principals.

<sup>4</sup> Beginning 1920, based on total number of teachers, supervisors, and principals.

<sup>5</sup> Current expense, capital outlays, and interest.

<sup>6</sup> Beginning 1920, excludes data for night, summer, part-time, and continuation schools separately reported.

<sup>7</sup> Beginning with the school year 1950, population as of July 1 prior to opening of school year compared with school enrollment data. For example, July 1, 1949, population data compared with 1949-50 school enrollment.

<sup>8</sup> Includes 857 principals in Tennessee.

<sup>9</sup> Estimated.

# NO. 141.—PUBLIC ELEMENTARY AND SECONDARY SCHOOLS—ENROLLMENT, TEACHERS, AND SCHOOLROOMS, BY STATES AND TERRITORIES: FALL 1957

[Enrollment data, compiled in the fall, are not directly comparable with the cumulative statistics on enrollment which, in *Biennial Survey of Education in the United States*, are given for an entire school year. Except as noted, schools are classified by type of organization, rather than by grade-group; elementary includes kindergarten and secondary includes junior high schools. Preliminary data]

<sup>1</sup> As of Oct. 1, 1953. <sup>2</sup> Estimated from school census.

<sup>3</sup> Excludes kindergarten. <sup>4</sup> As of Oct. 31, 1953. <sup>5</sup> As of Mar. 31, 1954.

<sup>6</sup> Because attendance in California includes excused absences and enrollment is not cumulative, the relationship between attendance and enrollment is not strictly comparable with that in other States. <sup>7</sup> Not available.

<sup>1</sup> Comprises full-time and part-time teachers. A teacher serving more than one type of exceptional child is reported only with the type to which she devotes the major portion of her time.

<sup>2</sup> Includes District of Columbia.

<sup>3</sup> Total number of different places reporting a program for one or more of the specified types of exceptional children; not the sum of the figures reported in the column.

<sup>4</sup> Not reported in the 1947-48 survey. Figures for 1948 are the sum of those for "delicate" and "epileptic."

**No. 167.—VOCATIONAL PROGRAMS, FEDERALLY AIDED—NUMBER OF TEACHERS AND STUDENTS, BY TYPE OF PROGRAM AND BY SEX: 1930 TO 1956**

[For years ending June 30. Institutions Federally aided are reimbursed from Federal funds provided under act known as "The Smith-Hughes Act," or the "National Vocational Education Act of 1917," and subsequent acts extending benefits of vocational education to Alaska, Hawaii, Puerto Rico, and Virgin Islands, and providing for further development of vocational education of less-than-college grade. These acts, administered by Office of Education, provide appropriations for reimbursement in part from Federal funds for expenditures by States and local communities for vocational education. Includes Hawaii beginning 1930, Puerto Rico beginning 1940, and Alaska and Virgin Islands beginning 1955]

<sup>1</sup> Includes, in addition to Federally affected areas, funds for support of land-grant colleges, vocational education below college level, vocational rehabilitation, American Printing House for the Blind, value of surplus property transferred to educational institutions, education of Public Health personnel, etc.

<sup>2</sup> Areas affected by Federal activity and employment, e. g., defense production, etc.

<sup>3</sup> Includes, in addition to school-lunch program, funds for Agricultural Experiment Stations, and Cooperative Agricultural Extension Service.

<sup>4</sup> Includes also vocational rehabilitation under Public Laws 16 and 894, and education and training under Public Law 345.

<sup>5</sup> Federal funds allotted to national programs which cannot be reported by States.

<sup>6</sup> Comprises \$4,809,000 paid to educational institutions for preparing reports and \$2,524,000 paid to veterans choosing to attend colleges in other countries.

## Section 5

### Law Enforcement, Federal Courts, and Prisons

This section presents data on crimes, arrests, Federal court cases, the legal profession, Federal and State prisoners, and the use of the death penalty. The more important publications in which figures relating to these subjects appear are: *Uniform Crime Reports*, a semiannual bulletin of the Federal Bureau of Investigation; the Administrative Office of the United States Courts *Annual Report of the Director*; and the Bureau of Prisons annual review, *Federal Prisons*, and periodical bulletins and reports in its *National Prisoner Statistics* series.

In addition, limited information concerning juvenile delinquency and the operation of juvenile courts is collected and published by the Children's Bureau of the Department of Health, Education, and Welfare. Data on prosecution and disposition of persons charged with misdemeanors and other minor offenses may be found for some of the larger cities in the annual reports of their municipal courts or governments. Some information on incarcerated prisoners may be found in the reports of the 1940 and 1950 Censuses of Population.

No centralized information is available on the police activities of the Federal agencies. Some information concerning the work of each Federal agency will be found in its annual report.

**Law enforcement and legal jurisdiction.**—Law enforcement is for the most part a function of State and local officers and agencies. The United States Constitution reserves to the States the general police powers, and only offenses against the United States Government and against its employees while engaged in their official duties, and offenses which involve the crossing of State lines or an interference with interstate commerce are made Federal offenses by act of Congress. Consequently, criminal offenses such as murder, robbery, burglary, theft, assault, and rape are violations of State laws unless they involve Federal property or a Federal officer while engaged in his official duties, or unless they occur in Federal territories or reservations or on the high seas. There are 50 separate criminal law jurisdictions in the United States, 1 in each of the 48 States, 1 in the District of Columbia, and the Federal jurisdiction. Each of these has its own criminal law and procedure and its own law enforcement agencies. Yet the general system of law enforcement is quite similar from State to State, although there are among the States often substantial differences in the penalties provided for like offenses.

Law enforcement can be divided into three parts. The first covers the activities of the police agencies, namely, the investigation of crimes and the apprehension of persons suspected of committing them. This function involves agencies such as municipal police, county police, State police, sheriffs, constables, marshals, Federal agents, and many kinds of special officers. The second phase is the prosecution of those charged with criminal offenses to determine whether they are in fact guilty. The agencies concerned include the courts, justices of the peace, municipal, State, and Federal grand juries, and prosecuting court officers. The third division of administration is concerned with the punishment or treatment of those convicted of crime. While the courts usually determine the sentence after conviction, the application of the penalty is carried out by the prison, reformatory, or jail, or by probation or parole officials.

Note.—This section presents data for the most recent year or period available on March 3, 1958, when the material was organized and sent to the printer. In a few instances, more recent data were added later.

**Crime.**—Nearly all statistical data on crime and criminals are derived from the records and reports of the various agencies engaged in the administration of criminal law. Police statistics present the number of offenses reported, the number of persons arrested, and the offenses cleared by arrest. Arrest records provide data concerning sex, age, race, and other characteristics of the persons arrested and charged with crime. As the police agencies are largely local, a problem is involved in collecting statistical data from the large number of such agencies. The Federal Bureau of Investigation obtains reports from police agencies and publishes summaries for the country as a whole in its semiannual bulletin, *Uniform Crime Reports*. However, in publishing the data submitted by chiefs of police in different cities, the Federal Bureau of Investigation does not vouch for their accuracy. They are issued as information which may throw some light on problems of crime and criminal-law enforcement. The great majority of communities are now reporting to the Federal Bureau of Investigation and the reports received cover about 99 percent of the city (urban) population and 95 percent of the population outside cities (rural) of the United States.

**Courts.**—Court statistics for criminal offenses and the outcome of the prosecutions for the country are quite incomplete. In many States, an annual or biennial publication presents data on the disposition of criminal cases in the trial courts. The only national compilation of such statistics was made by the Bureau of the Census which annually, until 1945, published data in *Judicial Criminal Statistics* on the disposition of criminal cases in the general trial courts.

Comprehensive information is collected on the business of the Federal courts by the Administrative Office of the United States Courts, and is published in the *Annual Report of the Director*. The bulk of civil litigation in the country is commenced and determined in the various State courts, and only when the United States Constitution and acts of Congress specifically confer jurisdiction upon the Federal courts may civil litigation be heard and decided by these courts. The question whether a State court or a Federal court has jurisdiction over a particular civil action is often difficult to determine, but generally speaking the Federal courts have jurisdiction over the following types of cases:

- (1) Suits or proceedings by the United States; (2) Suits or proceedings against the United States; (3) Civil actions between private parties arising under the Constitution, laws, or treaties of the United States; (4) Civil actions between private litigants who are citizens of different States; (5) Civil cases involving admiralty, maritime, or prize jurisdiction; (6) All matters and proceedings in bankruptcy.

The Federal courts of original jurisdiction are known as the United States District Courts, and one or more of these courts is established in every State, Territory, or possession. Appeals from the district courts are taken to intermediate appellate courts of which there are 11. They are known as United States Courts of Appeals. The Supreme Court of the United States is the final and highest appellate court in the Federal system of courts.

**Prisoners.**—Statistics of prisoners committed to penal institutions have been collected and published for a longer period of time than have other criminal statistics. Data on prisoners in Federal and State prisons and reformatories were collected annually by the Bureau of the Census until 1947 when this work was transferred to the Bureau of Prisons. Summary statistics covering persons received and discharged from State prisons and reformatories and from Federal prisons, and persons executed in the United States under civilian authority are now published periodically by the Bureau of Prisons in *National Prisoner Statistics*. Also, nearly every State publishes annual data either for its whole prison system or for each separate State institution.

FIG. X.—FEDERAL PRISONERS RECEIVED FROM THE COURTS, BY MAJOR OFFENSE GROUPS: 1949 TO 1957

[See table 194]

FIG. XI.—PERCENTAGE OF REPEATERS AMONG PRISONERS COMMITTED TO FEDERAL INSTITUTIONS UNDER SENTENCE OF MORE THAN ONE YEAR: 1957

1954	2,267,250	6,850	5,410	18,030	67,420	93,540	419,190	1,340,870	215,940
1955	2,262,450	6,850	5,610	19,100	57,490	92,740	492,530	1,360,980	227,150
1956	2,563,150	6,970	5,660	20,300	56,770	95,430	525,720	1,587,590	263,720
1957	2,796,400	6,920	5,740	21,080	61,410	100,110	590,920	1,721,170	289,950

<sup>1</sup> Includes all willful felonious homicides; excludes suicides and justifiable homicides.

<sup>2</sup> Includes deaths primarily attributable to gross negligence on the part of some individual other than the victim.

<sup>3</sup> Includes forcible, statutory (no force used—victim under age of consent), and attempted rape.

<sup>4</sup> Includes the stealing or taking of anything of value by force or violence or by threat of force or violence; includes attempted robbery.

<sup>5</sup> Includes assault with intent to kill. Excludes simple assault, assault and battery, fighting, etc.

<sup>6</sup> Includes any unlawful entry to commit a felony or a theft. Includes attempted burglary and burglary fol-  
lowed by larceny.

<sup>7</sup> Includes theft of property or articles of value (except auto theft) without the use of force and violence or fraud. Excludes larceny resulting from burglary. Larceny refers to articles \$50 and over in value; theft to those under \$50 in value.

<sup>8</sup> Includes all cases where motor vehicles are driven away and abandoned. Excludes those taken for temporary use when actually returned by the taker.

<sup>1</sup> Data for 1940-1951 based on fingerprint records received by the Federal Bureau of Investigation. Data for 1952-1955 based on report forms (including arrests of children who were not fingerprinted) sent in by city police departments in varying number of reporting cities; for example, covers 232 cities in 1952, 1,174 in 1953, etc.

<sup>2</sup> Beginning 1955, based on data from a representative national sample of juvenile courts; for earlier years, estimated by Children's Bureau. For an explanation of the limitations of juvenile court statistics, see *Juvenile Court Statistics, 1956* (Children's Bureau Statistical Series No. 47).

<sup>3</sup> Estimates of civilian population published by the Bureau of the Census in *Current Population Reports*, Series P-25.    <sup>4</sup> Provisional.

## No. 179.—ARRESTS, BY AGE GROUPS, IN 1,473 CITIES OF 2,500 OR MORE: 1957

[Data for all persons arrested for violations that happened in these reporting cities, covering about 47 percent of the total city population in 1950. Total population 40,176,369, based on 1950 Census. Each person arrested is counted rather than the number of charges that may be filed against one person. Arrest of a juvenile is counted with the offense actually committed even though a technical charge, such as juvenile delinquency, must be filed under local procedure]

No. 180.—U. S. SUPREME COURT—CASES FILED AND DISPOSITION DURING OCTOBER  
TERMS: 1940 TO 1956

[For years beginning in June. Statutory term of Court begins first Monday in October, but for statistical purposes new term begins upon adjournment of preceding term, usually in June]

ACTION	1940	1945	1950	1952	1953	1954	1955	1956
Total cases:								
Filed.....	977	1,316	1,181	1,283	1,302	1,397	1,644	1,802
Disposed of.....	985	1,292	1,202	1,278	1,293	1,352	1,630	1,670
Remaining on docket.....	124	168	119	151	160	205	219	351
Original cases filed.....	4	1		2			4	3
Appeals filed.....	84	64	77	87	81	87	104	123
Pauper appeals filed.....						8	17	24
Petitions for review:								
Filed.....	769	727	582	655	603	626	787	851
Granted.....	174	155	89	104	78	108	123	139
Denied or dismissed.....	592	565	495	541	522	532	643	664
Pauper petitions for review:								
Filed.....	120	393	404	434	528	543	583	639
Granted.....	19	15	17	11	10	12	16	38
Denied or dismissed.....	101	378	386	429	507	494	579	584
Motions for leave to file various writs:								
Filed.....		131	118	105	90	133	149	162
Granted.....							2	
Denied or dismissed.....		131	121	104	92	126	155	153
Method of disposition of cases by—								
Written opinions (number of cases).....	195	170	114	122	84	86	103	112
Number of written opinions.....	165	134	91	104	65	78	82	100
Court opinions not signed by an individual Justice.....	86	45	77	71	86	102	127	134
Fitzel decrees—original cases.....	1		5				4	3
Denial or dismissal of petitions for review.....	693	943	881	970	1,029	1,026	1,222	1,248
Denial or withdrawal of motions to file various writs.....		131	121	104	92	126	155	153
Dismissal of pauper appeals.....						8	16	20
Motion to dismiss or per stipulation.....	10	3	4	11	2	4	3	3

<sup>1</sup> Includes 2 cases argued on rehearing and decided by 1 opinion, not included in total cases filed and disposed of.  
<sup>2</sup> Includes 1 case disposed of on rehearing, not included in total cases filed and disposed of.

# **No. 193.—AVERAGE TIME SERVED BY PRISONERS RELEASED FROM FEDERAL INSTITUTIONS FOR FIRST TIME, BY OFFENSE: 1957**

For year ending June 30. Excludes 402 first releases other than by parole, expiration of sentence, and conditional release, also excludes 325 parole releases of offenders sentenced under the Youth Corrections Act. In computing averages, sentences to life and to more than 45 years were counted as 45 years; minority sentences of juvenile delinquents were counted from date of sentence to 21st birthday.

## Section 6

### Area, Geography, and Climate

Statistics in this section relate to area, climatological, topographic, and hydrologic measurements of the United States. There are few official publications other than those showing area measurements issued infrequently by the Bureau of the Census, which present area and geography statistics of national scope. However, many data are compiled by Federal Government agencies, such as the Geological Survey, the Coast and Geodetic Survey, and the Weather Bureau, which are primarily for particular regions or are collected for internal administrative purposes.

**Area.**—Area measurements in the United States began with measurements for the country as a whole and developed, as mapping progressed, to measurements for the States.

The annual report of the U. S. General Land Office for 1850 contained the first reference to the areas of the several States and Territories, although there was no indication of the method used in obtaining these measurements. The General Land Office was practically the sole source of information concerning the areas of the States and Territories until 1881.

The Bureau of the Census in 1881, as a part of the 1880 Census of Population, laid the foundation for accurate and detailed area measurement in the United States. For the first time an account was given of the method and maps employed, the water bodies included, and the outer limits of the United States used as a basis for measurement.

The same Bureau, in 1940 in its publication *Areas of the United States: 1940* presented the first basic measurement of the United States since its work in 1880. The data presented in that study cover the total land and water areas of the States, counties, cities, and minor civil divisions.

**Geography.**—The Geological Survey, cooperating with State agencies, is responsible for topographic and geologic maps and for basic data concerning the quantity, quality, and movement of surface and ground water.

The Bureau of Land Management conducts cadastral surveys.

The Coast and Geodetic Survey has responsibility for coastal and geodetic surveys and measurement of certain physical phenomena. Authorized in 1807, this agency's original function was to survey and chart the coast of the United States and the outlying islands and fishing banks. In 1871, Congress authorized an extension of the geodetic surveys from coast to coast to provide the States with reference markers for the control of their topographic and geologic mapping and their boundary surveys, and to provide data for use by the Geological Survey and other agencies.

A civil mapping activity of the Corps of Engineers, the United States Lake Survey, was established in 1841. Its primary function is to furnish Great Lakes navigators with reliable charts and information regarding harbor facilities. It also maintains records of the fluctuating levels of the lakes, the flow through connecting rivers, the precipitation over the lakes, and reports on all hydraulic problems relating to the Great Lakes.

**Climate.**—The Weather Bureau is responsible for essentially all meteorologic data. It collects, processes, and publishes climatological data. This Bureau maintains about

---

Note.—This section presents data for the most recent year or period available on March 3, 1958, when the material was organized and sent to the printer.

11,000 weather stations. Of this number nearly 3,000 stations produce autographic precipitation records, about 600 take automatic or hourly readings of a series of weather elements, and the remainder record one observation a day. There are few records in existence for stations before 1871 although some earlier and less detailed records began in the 18th century.

Nearly all weather stations have been moved several times in their history. Consequently, the Weather Bureau has adopted the practice of using "normal" values of temperature and precipitation for comparative purposes rather than long-term means which are derived from records taken at the several different locations the stations may have had over the years.

Normal values of temperature and precipitation are based on records for the 30-year period 1921 to 1950, inclusive. Where a station had a record for the entire 30 years from the same instrument site, monthly precipitation normals are the mean of the monthly values for the 30 years. For such stations, the temperature normals were obtained in a similar manner, using normal maximum and normal minimum values to obtain monthly normals. The annual normal temperature is obtained by dividing the sum of the annual normal maximum value and the annual normal minimum value for temperature by 2.

For stations that did not have continuous records from the same instrument site for the entire 30 years, 1921 to 1950, the means have been adjusted to the record at the present site. In these adjustments, a "difference factor" was used for temperature and a "ratio factor" for precipitation. These factors were determined by parallel comparison, either between records at the actual station sites or through a second station that had a continuous record to compare against both sites for obtaining the resultant adjusting factors. Normals were thereafter obtained as outlined above.

This system of normals has three characteristics: (1) The 30-year period (1921 to 1950) adopted for the computations is consistent with the term of years accepted by the World Meteorological Organization for climatic normals; (2) where the station and exposure for records in a given locality have been changed, the whole record has been carefully studied and adjusted to the latest source of records and reports; (3) the normals for maximum and minimum temperatures are separately tabulated and made available for the first time.

The degree-day normals are derived from the values for the monthly normal maximum and minimum temperatures, and are computed on the standard base 65° F. The degree day has been defined as follows: "A unit, based upon temperature difference and time, used in estimating fuel consumption and specifying nominal heating load in winter. For any one day, when the mean temperature is less than 65° F., there exist as many degree days as there are Fahrenheit degrees difference in the temperature between the average temperature for the day and 65° F."

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, 1789-1945*, series B 24-25") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*, and its *Continuation to 1952*. See preface.

# No. 198.—TERRITORIAL EXPANSION OF CONTINENTAL UNITED STATES AND ACQUISITIONS OF PRINCIPAL TERRITORIES, POSSESSIONS, AND OTHER AREAS

[Boundaries of all territories listed under "Continental United States" were indefinite, at least in part, at time of acquisition. Area figures shown here represent precise determinations of specific territories which have been marked upon maps, based upon interpretations of the several treaties of cession which are necessarily debatable. These determinations were made by a committee consisting of representatives of various governmental agencies in 1912. Subsequently these figures were adjusted to bring them into agreement with remeasurements made in 1940. See also *Historical Statistics, 1789-1945*, series B 24-25]

ACCESSION	Date	Gross area (land and water)	ACCESSION	Date	Gross area (land and water)

<sup>1</sup> Figures are lengths of general outline of seacoast. Measurements made with unit measure of 30 minutes of latitude on charts as near scale of 1:1,200,000 as possible. Shoreline of bays and sounds is included to point where they narrow to width of unit measure, and distance across at such point is included.

<sup>2</sup> Measurements made with unit measure of 3 statute miles on charts of 1:200,000 and 1:400,000 scale when available. Shoreline of bays, sounds, and other bodies of water included to point where they narrow to width of 3 statute miles, and distance across at such point is included.

<sup>3</sup> Figures obtained in 1939-1940 with recording measure on largest scale maps and charts then available. Shoreline of bays, sounds, and other bodies of water included to head of tide-water, or to point where they narrow to width of 100 feet.

<sup>1</sup> Dry land and land temporarily or partially covered by water, such as marshland, swamps, and river flood plains; streams, sloughs, estuaries, and canals less than one-eighth of a statute mile in width; and lakes, reservoirs, and ponds less than 40 acres of area.

<sup>2</sup> Permanent inland water surface, such as lakes, reservoirs, and ponds having 40 acres or more of area; streams, sloughs, estuaries, and canals one-eighth of a statute mile or more in width; deeply indented embayments and sounds, and other coastal waters behind or sheltered by headlands or islands separated by less than 1 nautical mile of water; and islands having less than 40 acres of area. Does not include water surface of the oceans, bays, the Gulf of Mexico, the Great Lakes, Long Island Sound, Puget Sound, and the Straits of Juan de Fuca and Georgia, lying within the jurisdiction of the United States but not defined as inland water.

<sup>3</sup> See table 4, footnote 14.

<sup>4</sup> See table 4, footnote 17.

## No. 209.—INVENTORY OF PUBLIC WATER SUPPLIES FOR COMMUNITY WATER SYSTEMS: 1955

[Includes only systems serving a 1950 population of 25,000 or more. Estimated number of public water systems in continental United States is 17,500 systems serving a population of approximately 113 million. An estimated 16 percent of water used by manufacturing industries is supplied by public water systems]

ITEM	Total communities	COMMUNITIES HAVING A POPULATION SERVED OF—				
		500,000 or more	250,000 to 500,000	100,000 to 250,000	50,000 to 100,000	25,000 <sup>1</sup> to 50,000

FIG. XIII.—ACQUISITION OF THE TERRITORY OF CONTINENTAL UNITED STATES AND ORIGIN OF THE PUBLIC DOMAIN  
[See table 223]

Source: Department of Interior, Bureau of Land Management.

## Section 7

### Public Lands; Parks; and Recreation

Statistics relating to the public domain and the national parks appear principally in two reports of the Department of the Interior: The *Annual Report of the Secretary of the Interior*, and the *Annual Report of the Director*, Bureau of Land Management. The same Department's Fish and Wildlife Service compiles data for hunting and fishing. Data on Federally owned land and real property are collected by the General Services Administration and presented in the *Inventory Report on Federal Real Property in the United States*. The Agricultural Research Service of the Department of Agriculture compiles and issues statistics on land use and land ownership. The Forest Service of the Department of Agriculture issues figures for recreational uses of the national forests.

**Public-domain and acquired lands.**—Sovereignty over its present continental land area was acquired by the United States Government through a series of international agreements and treaties. The United States, however, did not gain title to all of these lands by such agreements. At the time of acquisition of United States sovereignty over the areas involved (now 1,905 million acres) title to about 463 million acres rested in individual States and their political subdivisions or in private owners, which title was not relinquished to the Federal Government. Title to the remaining 1,442 million acres of land area passed to the United States Government. This area, with the exception of lands in the District of Columbia, is known as the original public domain.

In addition to the original public domain, the Federal Government has from time to time acquired, by purchase, condemnation, and gift, tracts of land needed for public purposes. Such lands are referred to as acquired lands, to distinguish them from public-domain lands.

Public-domain lands or public lands refer to those Federally owned lands to which the general body of public land laws apply. In general, these lands include that portion of the original public domain not disposed of under the public land laws, and certain other lands declared by the Congress specifically to be public lands, and exclude acquired lands, as defined above.

**Indian lands.**—Indian lands refer to public-domain lands ceded to the Government by Indian tribes on condition that proceeds from their sale or other disposition would be earmarked into the Treasury in trust for the Indians.

**Entries, selections, patents, and certifications.**—The data on entries, selections, patents, and certifications refer to transactions which involve the disposal, under the public land laws (including the homestead laws), of Federal public lands to non-Federal owners. In general, original entries and selections are applications to secure title to public lands which have been accepted as properly filed. Some types of applications, however, are not reported until the final certificate is issued. Applications become final entries (perfected entries) upon issuance of a final certificate which is given to the applicant after he has complied fully with the requirements of the laws relating to his application. A final certificate passes equitable title to the land to the applicant. Patents are instruments which pass legal title to the land to the applicant. Certifications are issued in lieu of patents in connection with certain State selections.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, 1789-1945*, series F 1-7") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*, and its *Continuation to 1952*. See preface.

Note.—This section presents data for the most recent year or period available on March 3, 1958, when the material was organized and sent to the printer. In a few instances, more recent data were added later.

# No. 223.—ACQUISITION AND EXTENT OF PUBLIC DOMAIN, CONTINENTAL UNITED STATES: 1781 TO 1957

[Areas are as computed in 1912, hence do not agree with figures (in square miles) shown in table 198, which includes later adjustments and reflects subsequent remeasurement. See also *Historical Statistics, 1789-1945*, series F 1-7]

ITEM	ACQUISITION OF THE ORIGINAL PUBLIC DOMAIN			Estimated area of the public domain (selected years) <sup>1</sup>

1803, Louisiana Purchase <sup>3</sup> .....	520,911,680	523,446,400	6,465,280	-----
1802, estimate of public domain.....	-----	-----	-----	200,000,000
1781-1802 (State Cessions).....	236,825,600	233,415,680	3,409,920	-----

<sup>1</sup> Estimated from imperfect data available for indicated years.

<sup>2</sup> Data for Louisiana Purchase exclude area eliminated by Treaty of 1819 with Spain. Such areas are included in figures for Mexican Cession.

<sup>3</sup> Includes 33,920 acres subsequently recognized as part of State of Texas which is not a public domain State.

<sup>4</sup> Represents drainage basin of Red River of the North, south of 49th parallel. Authorities differ as to method and exact date of its acquisition. Some hold it as part of Louisiana Purchase, others maintain it was acquired from Great Britain.

## No. 224.—OWNERSHIP OF LAND, BY CLASS: 1954

[Acreage in millions. Compiled from State and Federal reports and records. See also table 791]

CLASSES	Land area	Percent
Total.....	1,904	100.0
Private land <sup>1</sup> .....	1,345	70.6
Private land assessed as acreage for taxation.....	1,328	69.7
Urban areas assessed as lots.....	12	0.6
Areas not assessed (estimated).....	5	0.3
Indian land.....	56	3.0
Public land <sup>2</sup> .....	504	26.4
Federal land <sup>3</sup> .....	405	21.3
State land.....	81	4.2
County and municipal land (estimated).....	18	0.9

<sup>1</sup> Comprises individually owned, partnership, and corporate owned.

<sup>2</sup> Highway and road rights-of-way are partly covered in public land areas and partly in private land areas.

<sup>3</sup> *Inventory Report on Federal Real Property in the United States as of December 31, 1953*, issued as Senate Doc. No. 32, 84th Congress, 1st Session.

<sup>1</sup> Comprises receipts from such sources as following: Sales of public and ceded Indian lands; fees and commissions; mineral rentals, royalties, and bonuses; sales of timber; grazing fees and rentals; and land rentals. For period prior to 1861, receipts were \$177,230,000.

<sup>2</sup> As of June 30, 1957, process of legal adjudication had not yet been completed for all grants and small changes in data for certain years may occur. For period 1862-60, total land granted to States was 96,977,000 acres. Includes grants for such public purposes as following: Educational, penal, and other public institutions and buildings; bridges, reservoirs, and other internal improvements; reclamation of swamp and arid lands; experiment stations; recreation areas; wildlife and forestry areas; military camps; and payments of bonds issued by local governments. Excludes grants to aid in construction of railroads, wagon roads, canals, and river improvements, or acreage of swamplands lost to States, for which States received indemnity in cash. Excludes data for Alaska and also 10,000 acres because of the rounding process.

<sup>3</sup> Includes homesteads. <sup>4</sup> Includes some classes of final entries and patents prior to 1911.

<sup>5</sup> Excludes commuted homesteads.

<sup>6</sup> 1863-1870 only.

<sup>7</sup> 1920 only.

## No. 232.—VACANT PUBLIC LANDS—ACREAGE, BY STATES: 1900 TO 1957

[As of June 30. Vacant public lands are those which are unappropriated and unreserved. The former represent lands not covered by an entry, the latter, lands not reserved for some public purpose, i. e., available for entry or selection under appropriate laws. Data cover vacant public lands outside Alaska withdrawn for classification in furtherance of Taylor Grazing Act and for conservation and development of natural resources. Figures exclude vacant public lands in Alaska estimated at 270,000,000 acres on June 30, 1957. For U. S. totals, see *Historical Statistics, 1789-1945*, series F 8]

<sup>1</sup> Excludes public domain lands outside reservation boundaries permitted to Indians.

<sup>2</sup> Excludes 495,573 acres of land in litigation apparently lost to A. T. & S. Fe Railroad.

<sup>3</sup> Excludes an estimated 40,000 acres of trust allotted land subject to taxation.

<sup>4</sup> Dakota Territory.

<sup>5</sup> Taxable land per act of June 10, 1896 (29 Stat. 321, 331).

<sup>6</sup> Includes an estimated 40,000 acres of trust allotted land subject to taxation for 1956, and 22,440 acres for 1957.

<sup>7</sup> Includes 947,115 acres of trust allotted land part of which is taxable.

<sup>8</sup> Includes 262,108 acres of taxable trust allotted land.

## Section 8

### Labor Force, Employment, and Earnings

This section presents statistics dealing with the characteristics of the economically active segment of the population, the labor force; its distribution by occupation and industry affiliation; and the supply of, demand for, and conditions of labor.

The chief sources of these data are the Bureau of the Census' Decennial Census of Population (see text, p. 1), and Current Population Survey (see text, p. 2); the Bureau of Labor Statistics' *Monthly Labor Review*; and the Agricultural Marketing Service's monthly report, *Farm Labor*.

Statistics shown in this section are of two types. One type is obtained by the "population approach" represented by the Census of Population and the Current Population Survey of the Bureau of the Census. This approach involves direct enumeration and interrogation of individuals to obtain information on employment activity from workers or members of workers' households. Each employed worker is counted only once, even though he may have held two or more jobs during a given period. This approach encompasses direct enumeration of all employed and unemployed persons including the self-employed, unpaid family workers, domestic servants, and others who do not ordinarily appear on the payrolls of any establishment.

The second type of data is obtained by the "establishment approach" represented by the surveys of the Bureau of Labor Statistics and the Agricultural Marketing Service. These data are based on reports from employers, i. e., farms, businesses, or industrial establishments. Such data as wages, hours worked, labor turnover, and industry affiliation of employees can be more accurately obtained from employers' records than in response to inquiries directed to a worker or a member of his household. Workers appearing on more than one payroll for the same time period are counted more than once in establishment statistics.

The Decennial Census of Population provides detailed data for the United States, and for each State, city, and other area, including personal characteristics (sex, age, race, etc.) of the numbers employed and unemployed, the number reported in each occupation and in each industry, and other items. The Census Bureau's Current Population Survey provides current data published in *Current Population Reports*, "Monthly Report on the Labor Force" and related publications series. Data presented include national totals, by sex and age, of the number of persons in the civilian labor force, the number employed in nonagricultural industries and agriculture, the number unemployed, and the number of nonworkers. Also provided are data on hours of work and major occupation group of those employed and duration of unemployment of those unemployed.

The Bureau of Labor Statistics in the *Monthly Labor Review* provides monthly data on employment, unemployment, and payrolls; labor turnover; earnings, hours, and wage rates; industrial relations; and output per man-hour. Although for the most part data are presented for the United States only, certain of these data are also shown for States and large cities.

**Labor force.**—The labor force as defined by the Bureau of the Census includes persons 14 years old and over who were employed, unemployed, or in the Armed Forces

---

Note.—This section presents data for the most recent year or period available on March 18, 1958, when the material was organized and sent to the printer. In some instances, more recent data were added later.

during a specified week. Employed persons are those who did any work for pay or profit during the week, or who worked without pay for 15 hours or more in a family enterprise (farm or business); also included are persons who did not work or look for work but who had a job or business from which they were temporarily absent during the week. Unemployed persons comprise those who did not work at all during the week but were looking for work, or were on layoff from a job.

In the 1950 Census, the labor force data relate to the first or second week of April for the majority of the population. The "experienced civilian labor force" consists of all employed workers and unemployed workers with previous work experience. Population censuses earlier than 1940 used a concept of "gainful workers." This concept included all persons 10 years old and over who reported a gainful occupation, without regard to their work or work-seeking status, and, in general, excluded new job seekers without previous experience in a gainful occupation.

**Employment and earnings.**—The monthly estimates of nonagricultural employment prepared by the Bureau of Labor Statistics are based on voluntary reports for about 44,000 establishments in manufacturing industries and for about 135,000 establishments in selected nonmanufacturing industries, supplemented by data from other Government agencies and adjusted at intervals to data from tabulations of reports under Government social insurance programs. These estimates exclude proprietors of unincorporated businesses, self-employed persons, domestic servants, unpaid family workers, agricultural workers, and persons in the Armed Forces. The employment data are for all full- and part-time employees who worked or received pay for any part of the period reported.

Estimates are available for total employment for 8 major industry divisions, and for selected nonmanufacturing industries. Both total employment and production-worker estimates are published for 21 major manufacturing groups, 137 manufacturing subgroups, and for mining industries.

Average weekly hours and average weekly and hourly earnings are available for production and related workers for over 300 series in manufacturing; in mining, laundries, and cleaning and dyeing industries; and for nonsupervisory employees and working supervisors in other selected nonmanufacturing industries. The earnings data are gross (before payroll deductions) and include overtime premiums; they exclude irregular bonuses and value of payments in kind. Hours are those actually worked or paid for.

Agricultural employment estimates and wage rates, obtained by means of monthly mail returns, have been issued since 1909 by the Department of Agriculture and appear monthly in *Farm Labor*.

**Output per man-hour.**—The Bureau of Labor Statistics prepares and publishes annual measures of output per man-hour according to two broad concepts. The first, physical output per man-hour, deals with the relationship between production in physical units and man-hours used in production. The indexes measure the relationships between the volume of goods produced and one factor of input—labor time. They do not measure the specific contribution of labor or capital nor do they measure increased efficiency resulting from more economical use of fuels and materials or more efficient integration of industries.

The other concept of productivity measurement, net output per man-hour, deals with the relationship between value added by manufacture (at fixed prices) and man-hours. These indexes reflect not only average productivity change of industry components, but shifts among industries, and savings in materials consumption. Productivity series using gross national product in constant dollars as an output measure are consistent with the net output per man-hour concept. The gross national product estimates consist of the market value of final goods and services produced excluding the value of intermediate products.

**Labor turnover.**—Labor turnover rates are published monthly in the *Monthly Labor Review* for approximately 100 industries on the basis of about 10,000 reports from cooperating establishments. Labor turnover data are available on a monthly basis from January 1930 for manufacturing as a whole. Because of the adoption of the Standard Industrial Classification system beginning with data for January 1950, labor turnover rates for many industries and industry groups are available on a continuous basis only from that date.

**Work stoppages.**—The basic measures of strike statistics compiled by the Bureau of Labor Statistics are the number of stoppages, of workers involved, and of unions involved. Basic statistical data are obtained from the employers and unions involved. Knowledge of strikes come from a variety of sources, including newspapers, State employment services, and State and Federal mediation services. The Bureau prepares annual reports published in the May *Monthly Labor Review* and later in bulletin form, which give the total figures for each month of the year, and also analyses of strikes by industry, State, city, and by causes, labor organizations involved, and other pertinent classifications.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, 1789-1945*, series D 1-10") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*, and its *Continuation to 1952*. See preface.

---

### Technical Note—Current Population Survey

**Source of data.**—The Current Population Survey is a monthly sample survey of the Bureau of the Census. The current sample design, instituted in May 1956, is spread over 330 areas comprising 638 counties and independent cities, with coverage in each of the 48 States and the District of Columbia. Approximately 35,000 households are interviewed each month. Another 1,500 occupied dwelling units, on the average, are visited but interviews are not obtained because the occupants are not found at home after repeated calls or are unavailable for some other reason. There are also about 5,500 sample units in an average month which are visited but are found to be vacant or otherwise not to be enumerated. The previous sample design, in use from January 1954 through April 1956, was spread over 230 sample areas comprising 453 counties and independent cities. Data on the Armed Forces are obtained from the Department of Defense.

**Reliability of the estimates.**—According to rough computations from the 1956 survey, the relative sampling error during 1956 for summary estimates such as civilian labor force, total employment, and nonagricultural employment is about 0.4 percent; for agricultural employment and for unemployment it is roughly 3 to 4 percent. In earlier years the sampling error was somewhat higher. The chances are about 2 out of 3 that an estimate from the sample would differ from a complete census by less than the percentage estimated above for the particular item. The chances are about 19 out of 20 that the difference would be less than twice the specified percentage and about 99 out of 100 that it would be less than  $2\frac{1}{2}$  times the percentage.

The sampling variability indicated above is illustrative of the variability of data based on the Current Population Survey. For specific evaluation of the sampling variability, see the original releases of the Bureau of the Census.

**Comparability with Decennial Population Census data.**—Statistics obtained from the Current Population Survey may differ from Decennial Census data because of sampling variability, as described above. In addition, comparability between the two sets of data may be affected by other factors, such as differences in the training and experience of enumerators and in the enumeration procedures. For further information, see *U. S. Census of Population: 1950*, Vol. II, Part 1.

# No. 252.—GAINFUL WORKERS, 1820 TO 1930, AND EXPERIENCED CIVILIAN LABOR FORCE, 1940 AND 1950, IN FARM AND NONFARM OCCUPATIONS

[For explanation of differences in concept between gainful workers and labor force, see text, p. 199. See also *Historical Statistics, 1789-1945*, series D 1-10]

1950.....	112,354,034	59,015,464	6,837,652	11.6	<sup>8</sup> 52,177,812	<sup>8</sup> 88.4	

<sup>1</sup> Data not adjusted for relatively minor differences in farm-nonfarm occupational classification between (a) 1820-1930 series, (b) figures for 1930 and 1940, and (c) figures for 1950.

<sup>2</sup> Figures estimated on basis of returns covering greater part of population.

<sup>3</sup> Figures based on interpolation between 1820 and 1840.

<sup>4</sup> Includes additions due to estimated underenumeration in 13 Southern States.

<sup>5</sup> Corrected figure; for explanation, see analysis of occupation returns for 1890 in Twelfth Census (1900) Special Reports, *Occupation*, pp. lxxi-lxxiii. Excludes persons in Indian Territory and on Indian reservations, areas specially enumerated at that census, but for which areas no occupation statistics are available.

<sup>6</sup> Figures revised to deduct estimated overreporting of farm workers.

<sup>7</sup> Figures revised to add estimated underreporting of gainful workers, partly due to change in census date to January 1.

<sup>8</sup> Includes persons in experienced civilian labor force who did not report occupation.

# NO. 255.—PROJECTIONS OF TOTAL LABOR FORCE AND OF LABOR FORCE PARTICIPATION RATES, BY AGE AND SEX: 1955 TO 1975

[Annual averages. Rate represents the proportion of each age group in the labor force (employed, unemployed, or in the Armed Forces). Series A—Projection of average annual rates of change in labor force participation rates between 1920 and the average of April 1954, 1955, and 1956. Series B—Projection of average annual rates of change between 1950 and 1955. Series C—Use of Series B rates for men 14 to 24 years and for women 14 to 34 years; use of Series A rates for other age groups. For underlying total population projections, see Series A of *Current Population Reports*, Series P-25, No. 146]

No. 264.—EMPLOYEES IN NONAGRICULTURAL ESTABLISHMENTS (ANNUAL AVERAGE),  
BY INDUSTRY GROUP, BY STATES: 1950 AND 1957

[In thousands. See headnote, table 261. 1957 U. S. figures are preliminary. National totals differ from the sum of the State figures because a few States prepare combinations of industry divisions; some States have more recent benchmarks than others, and methods of computation may vary slightly among the States]

1958, March.....	6, 161	4, 972	1, 189	132. 00	165. 00	5. 40	5. 80	567

<sup>1</sup> Data are arithmetic means of monthly estimates of persons employed during last complete calendar week in each month ending at least one day before last of month.<sup>2</sup> Weighted averages of wage rates as reported quarterly by crop reporters. U. S. estimates affected by importance of rates in particular regions; see table 272.<sup>3</sup> Includes farm operators doing one or more hours of farm work and members of their families doing 15 hours or more of unpaid farm work during survey week.<sup>4</sup> Includes all persons doing one or more hours of farm work for pay during survey week. Members of operators' families doing any farm work for cash wages are counted as hired workers.<sup>5</sup> New series of wage rates began in 1948; for description of series, see *Farm Labor*, Dec. 1949.Source: Department of Agriculture, Agricultural Marketing Service; monthly report, *Farm Labor*.

1957 (prel.).....	137.0	183.8	128.6	132.4	127.1	140.9	183.4	132.6

<sup>1</sup> Includes hours of unpaid family workers in addition to wage and salaried workers and self-employed. Covers paid holidays, vacations, and sick leave.

<sup>2</sup> Differs in concept from Department of Agriculture's productivity series based on requirements of equivalent adult man-hours.

<sup>3</sup> Based on man-hours data covering all persons at work rather than production workers only.

<sup>4</sup> Includes hours of all persons, whether employees or employers, incorporating adjustments designed to eliminate holidays, vacations, and sick leave.

### No. 282.—HOURLY AND WEEKLY EARNINGS AND WEEKLY HOURS OF PRODUCTION WORKERS IN MANUFACTURING INDUSTRIES: 1940 TO 1958

[Net spendable average weekly earnings represent average gross earnings less social security and income taxes for which specified worker is liable. These net spendable earnings are then divided by the BLS consumers' price index adjusted to an average 1947-49 base, to obtain net spendable earnings in 1947-49 dollars. Overtime is defined as work in excess of either the straight-time workday or workweek and paid for at time and one-half. Computation of average hourly earnings exclusive of overtime makes no allowance for special rates of pay for work done on holidays. See also *Historical Statistics, 1789-1945*, series D 117-119]

YEAR	Gross average weekly earnings	NET SPENDABLE AVERAGE WEEKLY EARNINGS				Average weekly hours	AVERAGE HOURLY EARNINGS	
		Worker with no dependents		Worker with 3 dependents			Gross	Exclud- ing overtime
		Current dollars	1947-49 dollars	Current dollars	1947-49 dollars			
1940-----	\$24.20	\$24.69	\$41.22	\$24.95	\$41.65	38.1	\$0.66	-----
1945-----	44.39	36.97	48.08	42.74	55.58	43.4	1.02	<sup>1</sup> \$0.96

# No. 284.—HOURS AND GROSS EARNINGS OF PRODUCTION WORKERS OR NONSUPERVISORY EMPLOYEES, BY INDUSTRY: 1950, 1956, AND 1957

[Data are based upon reports from cooperating establishments covering both full- and part-time employees who worked during, or received pay for, any part of the pay period ending nearest the 15th of the month. For mining, manufacturing, laundries, and cleaning and dyeing plants, data refer to production and related workers only. For contract construction industries, data relate to employees engaged in actual construction work. For other industries, data relate to nonsupervisory employees and working supervisors.]

<sup>1</sup> A week's pay for a year's service applied to 99 percent of the office workers and 98 percent of the plant workers in virtually every area. <sup>2</sup> Full-day holidays provided annually, exclusive of half holidays.

<sup>3</sup> Unduplicated total of workers receiving paid sick leave or sickness and accident insurance or both.

<sup>4</sup> Includes retirement-type profit-sharing plans that provide for regular payments to retirees for the remainder of their lives. <sup>5</sup> Less than 0.5 percent. <sup>6</sup> Data relate to winter 1955-56.

# No. 288.—INDEXES OF UNION WAGE RATES AND WEEKLY HOURS IN SELECTED TRADES: 1945 TO 1957

[1947-49 average=100, except for printing where 1948-49 average=100. Data for 1953 to 1957 were collected as of July 1 and cover 53 cities in printing and 52 in the other trades. From 1949 to 1952, however, data were collected as of October 1 for streetcar and bus operators. Relative rates are percentages which indicate changes in minimum hourly wage scales. Relative hours are percentages showing changes in straight-time weekly hours, account not being taken of loss of time from slack work or other causes, nor of overtime work. Year-to-year changes in union scales are based on comparable quotations for each trade weighted by membership for current year. For indexes based on 1939=100, see *Historical Statistics, 1789-1945*, series D 152-163]

### No. 293.—MEMBERSHIP OF NATIONAL AND INTERNATIONAL UNIONS WITH HEAD-QUARTERS IN THE UNITED STATES: 1933 TO 1956

[Estimates based on average number of dues-paying members. Certain unions did not report as members those unemployed, those involved in work stoppages, those in the Armed Forces, apprentices, and retired workers, who were not required to pay dues. Moreover, membership in noninterstate independent or unaffiliated unions is excluded. See also *Historical Statistics, 1789-1945*, series D 218-223]

1957.....	3,673	19.2	1,390	3.1	16,500	0.14	11.4

<sup>1</sup> Workers counted more than once if involved in more than one stoppage during year.

<sup>2</sup> Total employed workers for 1933-1950 refers to all workers except those in occupations and professions in which there is little if any union organization or in which stoppages rarely if ever occur. In 1951, concept was changed to coincide with the Bureau's figures for nonagricultural employment, excluding Government but including workers in all occupational groups. Tests show that percentage of total idleness computed on basis of these new figures usually differs by less than one-tenth of a point while percentage of workers idle differs by about 0.5 or 0.6 of a point.

<sup>3</sup> Estimated working time computed by multiplying average number of employed workers (see footnote 2) by number of days worked by most employees.

## No. 296.—WORK STOPPAGES—MAJOR ISSUES INVOLVED AND DURATION: 1955 TO 1957

[See headnote, table 295. Data by issues based on stoppages beginning in year; duration data based on stoppages ending in year. See also *Historical Statistics, 1789-1945*, series D 230-238]

MAJOR ISSUES AND DURATION	WORK STOPPAGES			WORKERS INVOLVED <sup>1</sup> (1,000)			MAN-DAYS IDLE DURING YEAR (1,000)

FIG. XV.—FEDERAL GOVERNMENT EXPENDITURES FOR MAJOR NATIONAL SECURITY FUNCTIONS AND VETERANS SERVICES AND BENEFITS, IN RELATION TO TOTAL FEDERAL BUDGET EXPENDITURES: 1941 TO 1959

[See table 299]

Source: Chart prepared by Department of Commerce, Bureau of the Census. Data are from Bureau of the Budget.

## Section 9

### Military Services and Veterans Affairs

This section presents statistics relating to national defense, several measures of its human and financial costs, and indicators of military personnel, ships, aircraft, and Selective Service operations. Also included are statistics on the various programs and benefits sponsored by the Federal Government for veterans. The principal sources of these data are the Department of Defense, Office of Secretary of Defense; annual reports of the separate Departments of the Army, Navy, and Air Force; the Selective Service System; the *Annual Report of the Administrator of Veterans Affairs*, Veterans Administration; and the *Budget of the United States Government* issued by the Bureau of the Budget.

**Department of Defense.**—Until 1947 the Army, Navy, and Air Force operated under independent jurisdiction answering only to the Commander-in-Chief, the President of the United States. In 1947, as a result of the passage of the National Security Act, a new executive department was established, the National Military Establishment. This department was organized to provide for the coordination and unified direction of the Army, Navy, and Air Force under a civilian Secretary of Defense. The Army, Navy, and Air Force, however, were not merged. Each remained separately administered and retained its individual Department status. Amendments to the National Security Act in 1949 added new powers to the Secretary of Defense and redesignated the National Military Establishment as the Department of Defense.

**Selective Service.**—The Selective Service System is responsible for the registration, examination, classification, selection, and delivery for induction into the Armed Forces of all men required to register under the Universal Military and Training Act, as amended. The act requires the registration of all men who are in the United States between the ages of 18 and 26, and makes those between 18½ and 26 years old liable for service in the Armed Forces. Aliens admitted for temporary residence, however, are not liable for service until they have remained in this country for a period exceeding one year. Deferred persons remain liable for service until they attain 35 years of age. Conscientious objectors who are found to be opposed to any service in the Armed Forces are required to perform civilian work in lieu of induction into the Armed Forces. The act also provides exemptions or deferments from service for many persons for reasons of previous service, essential occupation, etc.

**Veterans Administration.**—The Veterans Administration administers laws authorizing benefits for eligible former and present members of the Armed Forces and for the dependents and other beneficiaries of deceased former members of such forces. Veterans benefits available under various acts of Congress include: Compensation for service-connected disability or death; pension for nonservice-connected disability or death; vocational rehabilitation for service-connected disability; education and training; guaranty or insurance of home, farm, and business loans; unemployment compensation; U. S. Government and National Service Life Insurance; servicemen's indemnity in lieu of insurance; hospitalization; domiciliary care; outpatient medical and dental care for service-connected disability; prosthetic and other appliances; special housing for certain seriously disabled veterans; automobiles or other conveyances for certain disabled veterans; burial allowances; and educational assistance to war orphans.

Note.—This section presents data for the most recent year or period available on March 18, 1958, when the material was organized and sent to the printer. In a few instances more recent data were added later.

# No. 299.—FEDERAL GOVERNMENT EXPENDITURES FOR MAJOR NATIONAL SECURITY FUNCTIONS AND VETERANS SERVICES AND BENEFITS, IN RELATION TO TOTAL FEDERAL BUDGET EXPENDITURES: 1915 TO 1959

[In millions of dollars. For years ending June 30. Includes expenditures of agencies other than the Department of Defense and Veterans Administration, for activities primarily related to major national security and veterans' programs. Excludes expenditures for programs which, though closely related to major national security or veterans' services, have a primary relationship to other categories of the functional classification (see table 440). Total budget expenditures have been revised to exclude payments to the railroad retirement trust account other than military service credits. Functional classification revisions for major national security have been carried back through 1939. For further detail as to classification of particular items in 1957, 1958, and 1959, see Special Analysis C of the *Budget of the United States, 1959*, pp. 889-896]

## No. 304.—CIVIL DEFENSE—FEDERAL FUNDS OBLIGATED IN THE FEDERAL CONTRIBUTIONS PROGRAM, BY PROGRAM, AND STATE AND CITY EXPENDITURES: 1952 TO 1958

[In thousands of dollars. Represents funds obligated against a specified appropriation, not necessarily in a given fiscal year. In later years, the funds are obligated against a given appropriation over a 2-year period. Federal funds are obligated to help the State and local governments acquire civil defense materials and equipment. Federal contributions are made on the basis of project applications submitted by the States and approved by the Civil Defense Administration. States and territories generally are required to match Federal funds on an equal basis. For Alaska the matching ratio is 70 percent Federal and 30 percent local.]

ITEM	Cumulative, total	1952 to 1954	1955	1955-56	1956-57	1957-58
FEDERAL FUNDS OBLIGATED <sup>1</sup>

<sup>1</sup> Union forces only. Estimates of the number serving in the Confederate forces range from 600,000 to 1,500,000.

<sup>2</sup> Covers period Dec. 1, 1941, to Dec. 31, 1946.

<sup>3</sup> Covers period June 25, 1950, to July 27, 1953.

<sup>4</sup> Covers period Apr. 21 to Aug. 13, 1898.

<sup>5</sup> Includes Air service.

<sup>6</sup> Includes Army Air Corps.

<sup>7</sup> Not available.

<sup>8</sup> Based on Army and Marines only.

<sup>9</sup> Excludes Navy. See footnote 10.

<sup>10</sup> Covers period July 1950 through January 1955. Represents Far East area only.

<sup>11</sup> During hostilities only.

<sup>12</sup> Covers war personnel who departed from continental U. S. through December 1898.

<sup>13</sup> For periods covered, see footnotes 2, 3, 4, and 10.

<sup>14</sup> Includes gassed in action; Army data includes casualties in northern Russia to Aug. 25, 1919, and in Siberia to Apr. 1, 1920. Marine data represent casualties in Europe only.

<sup>15</sup> Excludes personnel lost in sinking of the *Maine*, which occurred 2 months before hostilities.<sup>1</sup>

<sup>16</sup> Includes casualties incurred in October 1941, due to hostile action.

<sup>17</sup> Covers only Army personnel base of 1,903,800.

<sup>18</sup> Covers only Army personnel base of 246,410.

<sup>19</sup> Covers only Army personnel base of 3,665,600.

<sup>20</sup> Covers all services base of 9,370,986.

<sup>21</sup> Covers all services base of 4,428,939.

<sup>1</sup> Under amendments of June 19, 1951, to Universal Military Training and Service Act, age of military liability was extended to 35 years for certain specified kinds of registrants.

<sup>2</sup> Legally exempted registrants; no longer liable for service because of age. See also footnote 1.

<sup>3</sup> Cumulative since inception of Universal Military Training and Service Act, as amended, September 1948.

<sup>4</sup> Includes enlistments and deferments between time of preinduction examination and notice of induction.

<sup>5</sup> Cumulative net credits resulting from inductions plus home address reports minus separation reports, as reported by the Armed Forces September 1948 through June 1957. Each State is credited with its inductions as well as its enlistments and reserves called to active duty. Because of time lag in reporting to local boards, credits given for each State are not necessarily in complete accord with present strength of Armed Forces contributed by that State.

Other wars and Regular Establishment <sup>5</sup> .....	167	159	152	143	135	128	123

<sup>1</sup> Excludes persons who served in the Armed Forces only in peacetime (Regular Establishment) unless they were receiving Veterans Administration compensation for service-connected disability. A small but unknown number of persons with service in two or more periods prior to the Korean conflict are included more than once. Veterans with service both in World War II and the Korean conflict are counted only once.

<sup>2</sup> Estimated cumulative returns to civil life since June 27, 1950, of all persons who served in the Armed Forces of the United States between that date and January 31, 1955 (including persons who had also served in World War II), less estimated deaths out of service and less estimated returns to active duty from civil life.

<sup>3</sup> Estimated cumulative returns to civil life since September 16, 1940, of all persons who served in the Armed Forces of the United States between that date and July 25, 1947 (including persons who also served in the Korean conflict), less estimated deaths out of service and less estimated returns to active duty from civil life.

<sup>4</sup> Estimated by application of appropriate survival rates to the 1918 age distribution of World War I participants. Includes veterans of Civil War, Indian Wars, Spanish-American War. Only former members of Regular Establishment (peacetime service only) who are receiving Veterans Administration compensation for service-connected disability are included. Spanish-American War totals estimated by application of appropriate survival rates to the 1902 age distribution of living Spanish-American War participants.

1957.....	59	768	36	169	4,885	20

<sup>1</sup> Excludes transfers from appropriations to insurance trust funds from which the actual payments are made. Expenditures from VA Revolving Supply Fund also excluded to avoid duplication.

<sup>2</sup> Includes direct payments to beneficiaries from insurance appropriations, servicemen's indemnities, and benefits and dividends paid from insurance trust funds. Some noncash transactions, e. g., interest credited to dividends left on deposit also included.

<sup>3</sup> Includes subsistence allowances, tuition, supplies, and equipment of veterans training under Public Law 346, education and training allowances of veterans training under Public Law 550, and war orphans educational assistance under Public Law 634.

<sup>4</sup> Includes subsistence allowances, tuition, supplies, and equipment of veterans training under Public Laws 16 and 894, and vocational rehabilitation allowances for World War I veterans.

<sup>5</sup> Total differs from supporting detail by the net of overpayments collected and written-off as uncollectable under the readjustment benefits appropriation amounting to \$1,140,000 in 1956 and \$647,000 in 1957.

<sup>6</sup> Credit of less than \$500,000.

<sup>7</sup> Includes cumulative adjustment for prior years of \$295,650,997.

<sup>8</sup> Less than \$500,000.

<sup>9</sup> Credit.

<sup>10</sup> Includes statutory burial allowances; automobiles and other conveyances for disabled veterans; homes for paraplegics; payments to participants in yellow fever experiments; military and naval family allowances of World War I veterans; marine and seamen's insurance in World War I; adjusted compensation (World War I bonus); withdrawals of the personal funds of patients held by VA as banker and funds due incompetent beneficiaries; soldier's and sailor's civil relief; vocational rehabilitation revolving fund, and other miscellaneous expenditures.

<sup>11</sup> Estimated; includes expenditures for hospital and domiciliary care, outpatient medical and dental treatment, medical research, and grants to Republic of Philippines for medical care and treatment of veterans.

<sup>12</sup> Comprises construction and related costs which include expenditures from funds allotted under NRA of 1933, PWA Act of 1938, grants to Republic of Philippines for construction and equipping of a hospital, and amounts transferred to Dept. of Army, Corps of Engineers, for construction of hospitals.

<sup>13</sup> Includes expenses for vocational counseling, travel for certain programs, reporting allowances paid schools for certifying attendance of veteran trainees, private laws for relief, and all administrative salaries and expenses.

<sup>1</sup> Fund is administered as a trust fund for benefit of policyholders and their beneficiaries. All premiums collected on insurance issued and all interest earned thereon are paid into the fund; disbursements are made from the fund for death claims, dividends, and other benefits. Government, however, bears cost of administration of this fund in addition to expenses for certain types of losses.

<sup>2</sup> Nonparticipating insurance for disabled veterans for whom good health provisions are waived because of disabilities resulting from active service between October 8, 1940, and September 2, 1945.

<sup>3</sup> For veterans discharged on or after April 25, 1951, with service-connected disability which would be compensable, if 10 percent or more in degree.

<sup>4</sup> For veterans who were entitled to indemnity protection under the Servicemen's Indemnity Act of 1951 and who were ordered to active service for a period in excess of 30 days; no medical examination required. Issued only on the 5-year renewable nonconvertible term plan.

### No. 327.—VETERANS RECEIVING HOSPITAL OR DOMICILIARY CARE AUTHORIZED BY VETERANS ADMINISTRATION: 1940 TO 1957

[For years ending June 30. During 1957, 3,066,670 visits made by veterans to staff or fee physicians for outpatient medical care and a daily average of 8,933 veterans were domiciled in State and Territorial homes. For each person, Federal Government reimbursed these States at rate of \$240 per year through December 17, 1943, \$300 per year through May 31, 1948, and \$500 per year thereafter]

FIG. XVI.—SOCIAL WELFARE EXPENDITURES UNDER SELECTED CIVILIAN PUBLIC PROGRAMS: 1935 TO 1956

[See table 331]

Source: Chart prepared by Department of Commerce, Bureau of the Census. Data from Department of Health, Education, and Welfare, Social Security Administration.

## Section 10

### Social Insurance and Welfare Services

This section presents data related to governmental programs for old-age, survivors, and disability insurance, public and railroad employee retirement, unemployment and temporary disability insurance, aid to the needy, and maternal, child, and other welfare services. Also included here are selected data concerning private pension plans and financial data relating to corporate pension funds, the American Red Cross, the Community Chest, and philanthropic trusts and foundations.

There are several principal sources for these data. The *Social Security Bulletin*, an official monthly publication of the Department of Health, Education, and Welfare, presents current data on many of these programs and summarizes annual data for them in a statistical supplement published each year. A large volume of statistics flows from employers' wage reports submitted under the Social Security Act and used in the accounting operations of the Bureau of Old-Age and Survivors Insurance. Information on workers and beneficiaries and on establishments, employment, and payrolls covered by this Act is published in detail in the Social Security Administration's *Handbook of Old-Age and Survivors Insurance Statistics*. Establishment data showing employment and payrolls, by industry, for counties, are also available in the cooperative report of the Bureau of the Census and the Social Security Administration, *County Business Patterns*. Current data on employment security activities are published monthly in the Department of Labor's *Labor Market and Employment Security* and its supplements. Data on retirement and other benefits for railroad workers are published by the Railroad Retirement Board in its *Monthly Review* and *Annual Report*.

**Social insurance under the Social Security Act.**—Social insurance programs established by the Social Security Act provide protection against wage loss resulting from old age, prolonged disability, death, or unemployment. Beginning 1957, under old-age, survivors, and disability insurance, protection against wage loss due to old age, disability, or death is available to nearly all the gainfully employed (excluding chiefly self-employed doctors of medicine and most civilian employees of the Federal Government).

Old-age, survivors, and disability insurance provides monthly retirement benefits to fully insured workers at 65 or over (or, for women workers, at age 62 if they elect to receive a reduced benefit) and supplementary benefits to their wives, if they are aged or have a child of the earner in their care, to aged dependent husbands, and to dependent children under age 18, or older, if the child has a disability that began before 18. Monthly survivor benefits are payable to certain dependents of fully or currently insured workers. Monthly disability benefits are payable to fully and currently insured workers between the ages of 50 and 65 with a disability that meets the definition in the Act. A lump-sum death payment is made in the case of all insured deaths.

Covered workers and their employers each pay contributions of  $2\frac{1}{4}$  percent on the worker's wages, not counting amounts above the first \$4,200 in a year. The rate is scheduled to rise by steps until it reaches  $4\frac{1}{4}$  percent each in 1975. Self-employed persons pay 1.5 times the employee rate. An amount equal to the contributions collected is appropriated for deposit in the old-age and survivors insurance trust fund, from

Note.—This section presents data for the most recent year or period available on March 18, 1958, when the material was organized and sent to the printer.

which benefits and administrative costs are paid. One-fourth of 1 percent of the contributions collected from employees and employers and  $\frac{1}{2}$  of 1 percent of the contributions from the self-employed are allocated to a separate disability trust fund, from which the costs of the disability benefits are paid.

Both unemployment insurance and the public employment (placement) service are administered through the Bureau of Employment Security of the Department of Labor and a State employment security agency in each State or Territory. Under agreements with the Secretary of Labor, the State agencies also administer unemployment compensation for eligible veterans and for Federal employees.

State unemployment insurance laws pay benefits to unemployed covered workers who meet the qualifying conditions specified in the State law. In most States, a waiting period of 1 week must be served before payments begin. Benefits are payable for a maximum number of weeks, ranging from 16 to 30 weeks among the States; maximum weekly benefits without dependents' allowances range from \$25 to \$45 under the several State laws. In 11 States maximum allowances for dependents ranging from \$3 to \$25 raise the range of maximum augmented benefits to \$30 to \$70.

Under the Federal Unemployment Tax Act, a 3-percent tax is levied on the payroll of employers of 4 or more workers in industries covered by the Act, although smaller employers are also covered by some State laws. Principal industries excluded from coverage, as of January 1958, are agriculture, State and local government, domestic service, nonprofit organizations, and railroads (see below). Employers subject to the Federal law are allowed a credit offset of 90 percent of the Federal tax, or 2.7 percent of taxable payrolls, for contributions paid to State agencies under State unemployment insurance laws. The Federal Government, therefore, collects only 0.3 percent, which is earmarked for employment security purposes. The Congress appropriates funds each year to cover administrative costs of the employment security system.

The standard rate of contributions payable by employers in all areas is 2.7 percent of the first \$3,000 a year paid to an employee (except in Delaware, Nevada, Oregon, and Rhode Island, where the 2.7 percent applies to the first \$3,600 and in Alaska to the first \$4,000). All States except Alaska may adjust employer contribution rates according to individual employer experience with the risk of unemployment. Contributions collected by States are deposited to State accounts in the Federal Unemployment Trust Fund, from which States withdraw amounts needed for benefit payments.

**Social insurance for railroad workers.**—The social insurance programs administered by the Railroad Retirement Board under the Railroad Retirement Act and Railroad Unemployment Insurance Act cover employees of railroads or companies and organizations affiliated with railroad transportation, including the Railway Express Agency and the Pullman Company.

The Railroad Retirement Act provides retirement annuities for aged and disabled workers and for wives of retired employees, and benefits to survivors of deceased workers. The credits of employees who die or retire with less than 10 years of railroad service are transferred to old-age, survivors, and disability insurance under the Social Security Act. Funds for the retirement and survivor system come from a tax on earnings up to \$350 a month under the Railroad Retirement Tax Act. The tax, divided equally between the employer and employee, is now at the maximum rate of 12 $\frac{1}{2}$  percent.

The Railroad Unemployment Insurance Act provides benefits for unemployment and sickness, including maternity. The unemployment insurance program is financed entirely by contributions from covered employers, paid directly to the Board. The contribution rate for any year depends upon the balance in the unemployment insurance account and may vary from  $\frac{1}{2}$  to 3 percent of payrolls (exclusive of individual earnings in excess of \$350 a month). Effective January 1, 1958, the contribution rate is 2 $\frac{1}{2}$  percent.

**Social insurance for Federal Government employees.**—One contributory retirement system for Federal civilian employees and two noncontributory systems for special classes of employees are administered by the Civil Service Commission. In addition, there are separate retirement systems in operation for the uniformed services (supplementing old-age, survivors, and disability insurance under which they are covered on a contributory basis) and for special classes of Federal employees.

The Civil Service Retirement Act provides for age, optional, disability, and discontinued service annuities for employees in the executive, judicial, and legislative branches of the United States Government and in the municipal government of the District of Columbia if not subject to another retirement system or excluded by executive order. It also provides annuities for the widows and minor children of deceased employees, and under certain conditions to the survivors of deceased annuitants. The employee contribution rate, computed on base pay, was increased from 6 percent to 6½ percent in October 1956, at which time liberalized benefit provisions became effective. Beginning in July 1957, employing agencies pay into the Retirement Fund amounts equal to the contributions of their employees.

**Workmen's compensation.**—All States now have programs providing protection against work-connected injuries and deaths. In addition to the State laws, there are Federal workmen's compensation laws covering employees of the Federal Government, private employees in the District of Columbia, and longshoremen and harbor workers. Most of the State workmen's compensation laws exempt such employments as agriculture, domestic service, and casual labor; the majority exempt employers who have fewer than a specified number of employees. Occupational diseases, or at least specified diseases, are compensable under most laws.

In most States total payments to injured workers or to survivor families are limited as to time, amount, or both. All compensation acts require that medical aid be furnished to injured employees; in about one-fourth of the laws there are either duration or cost limitations—or both—on the amount of medical benefits provided.

**Public assistance.**—Public assistance is provided through five major programs, all administered by the States and localities. Payments to four groups of needy persons—the aged, the blind, the permanently and totally disabled, and children whose need arises from certain causes—are financed in part from Federal funds granted to States under the Social Security Act. The Federal aspects of these programs are the responsibility of the Bureau of Public Assistance of the Social Security Administration. Aid to other needy persons is furnished for the most part through general assistance, toward which the Federal Government makes no contribution.

To receive a Federal grant for assistance payments and administrative expenses under any of the four programs established by the Social Security Act a State must have a plan approved as meeting the requirements of the Federal act. Each State establishes the conditions under which needy people may receive assistance and determines how much they shall receive.

**Health and welfare service.**—Programs providing health and welfare services are aided through Federal grants to States for maternal and child-health services, services for crippled children, child-welfare services, vocational rehabilitation, and public health services (including water-pollution control, hospital survey and construction, and control of specific diseases). The Children's Bureau, a part of the Social Security Administration, administers the first three of these programs; the others are administered by the Office of Vocational Rehabilitation and the Public Health Service; all are units of the Department of Health, Education, and Welfare.

### No. 331.—SOCIAL WELFARE EXPENDITURES UNDER CIVILIAN PUBLIC PROGRAMS: 1935 to 1956

[In millions. Represents expenditures under public law and from trust accounts. Includes administrative expenditures and capital outlay for hospitals, public elementary and secondary schools, and publicly controlled higher education. Years ending June 30 for Federal Government, most States, and some localities; for other States and localities, years cover various 12-month periods ending within year. Data for education and for workmen's compensation relate to continental U. S. only; other programs include some payments and expenditures outside continental U. S. Corrected to October 1957]

<sup>1</sup> Although social insurance expenditures include non-Federal workmen's compensation benefits payable under law by employers and private insurance carriers, such expenditures have been omitted in computing percentages relating to all government expenditures.

<sup>2</sup> Includes hospital construction and medical research; excludes health and medical services related to veterans' programs, public education, public aid, workmen's compensation, and vocational rehabilitation; also excludes medical expenditures of Military Establishment and Atomic Energy Commission and those provided subordinate to the performance of other functions, such as those of Civil Aeronautics Authority.

<sup>3</sup> Represents vocational rehabilitation, child welfare services, school lunch program, and institutional care.

<sup>4</sup> Excludes Federal bonus payments, appropriations to Government Life Insurance trust fund, and accounts of several small revolving funds.

Surplus food for needy persons.....	61.9	61.9		91.0	91.0	

<sup>1</sup> Excludes refunds of employee contributions to those leaving service. Includes retirement pay of military personnel. Data for administrative expenditures not available for all programs.

<sup>2</sup> State unemployment insurance and employment service programs, Federal unemployment compensation for veterans and Federal civilian employees.

<sup>3</sup> Cash benefits and hospitalization and medical benefits, including those under private plans, in the 4 States with programs, and administrative expenditures of State agencies. Data on administrative expenditures of private plans not available.

<sup>4</sup> Pensions, annuities, burial awards, readjustment allowances, and estimated administrative expenditures. Excludes expenditures from Government Life Insurance fund.

<sup>5</sup> Payments by private insurance carriers, State funds, and self-insurers of benefits payable under State law and estimated State administrative costs.

<sup>6</sup> Excludes all medical expenditures of Military Establishment and Atomic Energy Commission; health services in connection with primary and secondary public education; hospital and medical payments and services included under workmen's compensation, State temporary disability insurance, and vocational rehabilitation, and vendor payments for medical care included under public aid programs; international health activities; and expenditures for medical services and research subordinate to performance of other functions.

<sup>7</sup> Includes hospital and outpatient care in public institutions and expenditures for maintaining existing facilities. Excludes VA expenditures for domiciliary care included under veterans' welfare services and institutions for chronic care (other than mental and tuberculosis) included under institutional care.

<sup>8</sup> Federal are costs of hospital planning and surveys, new construction, and major repairs; State and local are new construction only. <sup>9</sup> Includes services for crippled children.

<sup>10</sup> Federal are those made by the U. S. Public Health Service for community health programs, medical research, and training in special public health fields and by the Food and Drug Administration. State and local represent estimated community health and sanitation operating expenditures of public agencies, including those for medical research and training but excluding those in connection with schools and public welfare, and those classified as hospital and medical care.

<sup>11</sup> Federal are for VA programs for vocational rehabilitation, automobiles and other conveyances for disabled veterans, housing for paraplegic veterans, domiciliary care, beneficiaries' travel, counseling, and loan guarantees. State and local represent State expenditures for bonus payments and veterans' services; local data not available.

<sup>12</sup> Federal are for education of the deaf, the U. S. Soldiers' Home, the U. S. Naval Home, and the value of Federally distributed surplus foods to nonprofit institutions. State and local represent estimated costs of care in welfare institutions, institutions for the handicapped and for long-term chronic care (other than mental and tuberculosis) and other public welfare expenditures.

<sup>13</sup> Federal includes cash apportionment, value of commodities purchased and distributed under the National School Lunch Act and of surplus commodities distributed under other agricultural programs and the Special School milk program.

<sup>14</sup> Estimated by Children's Bureau. Includes payments for foster care and for professional and facilitating services; excludes capital expenditures, expenditures of public institutions and day-care centers and those made by courts and youth authorities, payments from parents and relatives, and direct appropriations by State legislatures to private agencies and institutions.

Self-employment allowances to veterans.....		1.5	(17)	(17)		1.7	(17)	(17)

<sup>1</sup> Average monthly number, except as noted.

<sup>2</sup> Includes benefits paid to dependents of retired-worker beneficiaries.

<sup>3</sup> For 1940 and 1950, includes small but unknown number and amount of disability and survivor benefits. For 1955 and 1956, represents old-age retirement benefits only.

<sup>4</sup> Old-age retirement includes small number and amount of survivor benefits. For 1940, includes significant amount of disability payments.

<sup>5</sup> Benefits for fiscal year (usually ending June 30). For survivorship, number represents families.

<sup>6</sup> Under Veterans Administration.

<sup>7</sup> Data are for veterans of Spanish-American War, Boxer Rebellion, and Philippine Insurrection; for 1955 and 1956, includes all service pensions for this group. <sup>8</sup> Preliminary.

<sup>9</sup> Monthly survivor benefits include a small but unknown amount of lump-sum death payments.

<sup>10</sup> Not available. <sup>11</sup> Payments are for burial of deceased veterans.

<sup>12</sup> Excludes payments for medical care.

<sup>13</sup> Includes pensions and compensation, and subsistence payments to disabled veterans undergoing training.

<sup>14</sup> Benefits payable in only 4 States—Rhode Island, California, New Jersey, and New York. Includes maternity data for Rhode Island. Excludes hospital benefits in California and hospital, surgical, and medical care benefits paid under approved plans in New York. Number represents average weekly number of beneficiaries; excludes private-plan beneficiaries in California and New Jersey.

<sup>15</sup> Beneficiaries are average number during 14-day registration period.

<sup>16</sup> Average weekly number. Beginning 1955, State unemployment insurance includes payments to unemployed Federal workers made by the States as agents of the Federal Government.

<sup>17</sup> Small number and amount of self-employment allowances included with unemployment allowances.

Social insurance and related programs <sup>2</sup> .....	3.6	6.6	7.6	8.5	28.5	47.3	53.4	57.7
Old-age and survivors insurance.....	2.6	5.3	6.2	7.0	20.7	37.9	43.6	47.3
Railroad retirement insurance.....	0.3	0.5	0.5	0.5	2.3	3.3	3.5	3.5
Government employees' retirement programs.....	0.3	0.4	0.5	0.5	2.4	3.1	3.2	3.4
Veterans' compensation and pension programs.....	0.3	0.5	0.6	0.7	2.7	3.9	4.2	5.0
Wives of beneficiaries not in direct receipt of benefits.....	0.2	0.2	0.2	0.2	1.5	1.3	1.4	1.6
Public assistance <sup>3</sup> .....	2.8	2.6	2.5	2.6	22.5	18.4	17.9	17.4
No money income or income solely from other sources.....	3.1	2.2	1.7	1.5	25.2	16.1	11.8	10.1
Income from more than one of specified sources.....	0.9	1.3	1.7	1.9	7.0	9.7	12.0	12.9
Employment and social insurance or assistance.....	0.5	0.8	1.2	1.3	4.3	6.0	8.2	9.1
Social insurance and public assistance.....	0.3	0.5	0.5	0.6	2.7	3.7	3.8	3.9

<sup>1</sup> Total population 65 and over is less than sum of the first 4 major classifications by the number in the fifth; persons with more than 1 major source of income were counted under each appropriate classification and then classified separately. Persons with income from sources specified may also have income from other sources (for example, private pensions or interest, dividends, and other returns on investment).

<sup>2</sup> Persons with income from more than one program counted only once. In addition, about 100,000 aged were receiving benefits under unemployment insurance and an unknown number under workmen's compensation and temporary disability insurance; overlap with other programs cannot be estimated.

<sup>3</sup> Old-age assistance recipients and persons aged 65 and over receiving aid to the blind. Includes about 10,000 persons receiving vendor payments for medical care but no direct cash payment.

Source: Department of Health, Education, and Welfare, Social Security Administration; data appear periodically in *Social Security Bulletin*.

<sup>1</sup> Excludes 2.8 million accounts under railroad retirement.

<sup>2</sup> Represents reported workers with taxable earnings. See footnote 4.

<sup>3</sup> Includes earnings in excess of annual taxable limit. See footnote 4.

<sup>4</sup> The annual limit on taxable wages was \$3,000 prior to 1951, \$3,600 during 1951-54, and \$4,200 beginning 1955.

<sup>5</sup> Includes 17,202,000 accounts established in 1936. <sup>6</sup> Covered employment excludes agricultural labor.

Agriculture.....	5.3	4.3	4.3	1.3	1.3
Wage and salary workers.....	1.3	0.9	0.8	0.1	0.2
Self-employed.....	3.9	3.5	3.5	1.2	1.1
Domestic service.....	2.1	0.8	0.9	0.9	0.9
Unpaid family workers.....	1.3	1.0	1.2	1.4	1.4
Agricultural.....	0.9	0.7	0.6	0.9	0.8
Nonagricultural.....	0.4	0.4	0.5	0.5	0.6
Other <sup>3</sup> .....	9.2	2.4	2.5	2.3	2.1

<sup>1</sup> Beginning 1953, excludes employees of State and local governments and nonprofit organizations who were not actually covered although eligible for coverage; beginning 1955, also excludes ministers not actually covered although eligible for coverage.

<sup>2</sup> Under the 1951 amendments to the Railroad Retirement Act, earnings in railroad service are credited toward benefits under both railroad and old-age and survivors insurance programs.

<sup>3</sup> Beginning 1953, includes noncovered workers in the following partially covered industries: Nonagricultural self-employment; educational institutions and agencies; medical and health services; religious, charitable, and membership organizations; and forestry and fishing. In 1950, also includes noncovered workers in railroad and railway express companies and in banks and trust companies.

### No. 342.—PRIVATE PENSION AND DEFERRED PROFIT-SHARING PLANS—ESTIMATED COVERAGE, CONTRIBUTIONS, RESERVES, BENEFICIARIES, AND BENEFIT PAYMENTS: 1940 TO 1956

[Includes pay-as-you-go plans, nonprofit organization plans, and deferred profit-sharing plans. Excludes railroad plans other than those supplementing Federal Railroad Retirement Act. Under "insured plans," insurance carriers are the mediums through which benefits are provided; sponsors of the plans pay premiums to these carriers. Under "self-insured plans," sponsors perform functions of insurance carriers]

<sup>1</sup> Distribution by State and type of benefit estimated. Supplementary benefits are paid to wives 62 years old or over, wives under age 62 with child beneficiaries in their care, dependent aged husbands, and children of old-age beneficiaries. Survivor benefits are paid to following survivors of deceased insured workers: aged widows, dependent aged widowers, children, widowed mothers or divorced wives with child beneficiaries in their care, or dependent aged parents.

<sup>2</sup> Distribution by State based on 10-percent sample.

<sup>3</sup> Distribution by State based on 10-percent sample; exceeds number of deceased workers with respect to whose earnings records lump-sum death payments were paid. <sup>4</sup> Less than 50.

<sup>1</sup> For July 1940 to December 1950 equals taxes collected; beginning January 1951, equals amounts appropriated (estimated tax collections) and, from May 1951, deposits by States under voluntary coverage agreements. For 1947-51 includes amounts appropriated to meet costs of benefits payable to certain veterans' survivors. Beginning 1952, includes deductions for refund of estimated amount of employee-tax overpayment.

<sup>2</sup> Includes interest transferred from the railroad retirement account under the financial interchange provision of the Railroad Retirement Act, as amended.

<sup>3</sup> Represents net expenditures for administration. Beginning November 1951, adjusted for reimbursements to trust fund of small amounts for sales of services. Beginning October 1953, includes amounts for expenses of plans and preparations for construction authorized by Public Law 170, 83d Congress, 1st session.

<sup>4</sup> Includes accrued interest and repayments on account of accrued interest on bonds at time of purchase.

<sup>5</sup> Established under the Social Security Act, as amended in 1956. <sup>6</sup> Fiscal-year data.

<sup>1</sup> Until January 1945, represents covered employment on last payroll ending in month; thereafter, employment on payroll ending nearest fifteenth of month. Annual figures represent averages of 12 monthly figures.

<sup>2</sup> Total wages in covered employment for all pay periods ending within period.

<sup>3</sup> Wages subject to contributions under State unemployment insurance laws.

<sup>4</sup> Contributions, penalties, and interest from employers, and contributions from employees. Adjusted for refunds of contributions and for dishonored contribution checks.

<sup>5</sup> Includes effect of war-risk contributions. <sup>6</sup> Not available. <sup>7</sup> Represents first payments.

<sup>8</sup> Effective Jan. 1, 1955, includes program for Federal employees; prior years are for State programs only.

<sup>9</sup> Annual figures are adjusted, but quarterly figures are not adjusted, for voided benefit checks. For 1947-50, includes small amounts paid to seamen under the Reconversion Unemployment Benefits for Seamen program. Program expired June 30, 1950.

<sup>10</sup> Sum of balances in State clearing account and benefit-payment account, and in State unemployment trust fund account in U. S. Treasury. State unemployment trust fund accounts include interest credited.

<sup>1</sup> Employer becomes subject to State unemployment insurance law when he has employed specified minimum number of workers on at least 1 day in each of specified number of weeks within current or preceding calendar year; coverage provisions shown in effect for 1955.

<sup>2</sup> Average of 12 monthly figures, each of which is total number of workers in covered employment in pay periods ending nearest 15th of month. <sup>3</sup> Total wages in covered employment for all pay periods ending in year.

<sup>4</sup> Wages subject to unemployment insurance tax; see text, p. 262.

<sup>5</sup> And wages of \$100 in any calendar quarter.

<sup>6</sup> Or 8 in 8 weeks and payroll in excess of \$12,000 in any quarter.

<sup>7</sup> And wages of \$75 in a calendar quarter. <sup>8</sup> Or 25 in 1 week.

<sup>9</sup> Or 4 in 3 quarters of preceding year with wages of at least \$50 to each of at least 4 workers during each of 3 calendar quarters. <sup>10</sup> But 8 in 20 weeks for employers located outside the corporate limits of a city, village, or borough of 10,000 or more population. <sup>11</sup> Or wages of \$500 in a calendar year.

<sup>12</sup> Or wages of \$10,000 in any calendar quarter. <sup>13</sup> And wages of \$225 in any calendar quarter.

<sup>14</sup> Or 1 at any time and wages of \$450 in a calendar quarter. <sup>15</sup> And wages of \$500 in same calendar quarter.

<sup>16</sup> Or \$24,000 in a year. <sup>17</sup> And wages of \$140 in any calendar quarter.

<sup>18</sup> Or wages of \$6,000 in preceding calendar year. Includes employers with wages of \$10,000 in a calendar quarter toward which not more than \$1,000 per employee need be counted.

<sup>19</sup> And wages of \$600 in a calendar year.

\* Comprises insured unemployment under: (a) State programs; (b) veterans' program exclusive of veterans filing at same time under State programs; (c) Federal employee program; and (d) railroad unemployment insurance program, not distributed by State.

<sup>2</sup> Excludes transitional initial claims; Puerto Rico and Virgin Islands take claims as agents for some States.

<sup>3</sup> Represents number of first payments during year; Wisconsin figure represents first payments on "per employer" basis.

<sup>4</sup> Includes data for beneficiaries receiving benefits from from UCFF programs; not segregable by States.

<sup>5</sup> Adjusted for voided benefit checks and transfers under interstate combined wage plan.

<sup>6</sup> For total unemployment.

<sup>7</sup> Cumulative Oct. 15, 1952, through Dec. 31, 1957. Includes 2,000 veterans supplementing railroad unemployment program not distributed by State.

<sup>8</sup> Comprises data for beneficiaries receiving all or part of their benefits from Federal employee programs.

<sup>9</sup> For 2,327,000 compensated weeks; also includes payments to veterans supplementing railroad unemployment program, not distributed by State—1 beneficiary, 6 compensated weeks, and \$9 (gross) paid in benefits.

<sup>10</sup> For 1,186,000 compensated weeks. <sup>11</sup> Less than 500. <sup>12</sup> Not applicable.

<sup>1</sup> Through June 30, 1940, data relate entirely to employees retired voluntarily or involuntarily under various age and length-of-service requirements and to employees with at least 5 years of service who became totally disabled for the position occupied prior to eligibility for retirement. Beginning Jan. 1, 1940, certain employees may elect a joint and survivor annuity, and beginning Feb. 29, 1948, widows and minor children of deceased employees and annuitants are eligible for survivor annuities under certain conditions; number of survivor annuities in force as of June 30 increased from 26 in 1941 to 92,905 in 1957. Beginning Jan. 24, 1942, employees with at least 5 years service who separate voluntarily or involuntarily prior to eligibility for retirement may obtain deferred annuity at age 62. Prior to 1952, excludes annuities purchased by voluntary contributions.

<sup>2</sup> Due to adjustments, number in force at end of fiscal year does not in all cases equal number certified less number terminated in that year, plus number in force at end of preceding fiscal year.

<sup>3</sup> Refunds of amounts to employees' credit in fund paid to employees not eligible for an annuity or who, if eligible, elected to take a refund.

<sup>4</sup> Refunds of amounts to employees' credit paid to designated or other beneficiaries of employees who died in service or after separation.

<sup>5</sup> Refunds of balance of amount to annuitants' credit at time of death paid to designated or other beneficiaries of annuitants. Includes refunds to disability annuitants, whose entitlement to an annuity was terminated, and unexpended balances paid upon termination of survivor annuities.

## No. 360.—WORKMEN'S COMPENSATION PAYMENTS, BY STATES: 1940 TO 1956

[In thousands of dollars. Estimated by Social Security Administration. Payments represent cash and medical benefits and include insurance losses paid by private insurance carriers (compiled from the *Spectator (Insurance by States, of . . . Casualty Lines)*), net disbursements of State funds (from *Spectator* and State reports; estimated for some States), and self-insurance payments (estimated from available State data). Calendar-year data, except fiscal-year data for Federal employees and for a few States with State funds. Includes benefit payments under Longshoremen's and Harbor Workers' Compensation Act and Defense Base Compensation Act for States in which such payments are made]

## No. 378.—FOUNDATIONS—DECADE ESTABLISHED AND LATEST RESOURCE CLASS

[Excludes those which have ceased functioning. A foundation is a non-profit legal entity having a principal fund of its own, or receiving charitable contributions of a living founder or founders, which is governed by its own trustees or directors, and which has been established to serve the welfare of mankind. Excludes endowed religious and educational institutions, those which solicit or appeal for endowment or operating funds, and those which conduct a clinical or other local program or benefit solely a single institution or group. Data are admittedly incomplete in coverage with respect to foundations which meet the above specifications. It is estimated that approximately 7,300 are in existence which would qualify for inclusion under these standards.]

## Section 11

### Income, Expenditures, and Wealth

This section presents statistics relating to two different aspects of income and expenditures: Those which in aggregate reflect the entire complex of the Nation's economic activities and the interaction of its major components (the national income and product system and the flow-of-funds system); and those showing the distribution of families and individuals by income size-classes or type of expenditure. It also includes statistics on national wealth.

The primary source for national income and product information is the Department of Commerce, Office of Business Economics' monthly *Survey of Current Business*. Each July issue of the *Survey* is identified as the *National Income Number* and contains the most recent and detailed statistics on this subject.

A further development of the general body of national income data appears in *Income Distribution in the United States, 1944-50*, a supplement to the *Survey*, which presents personal income data classified by income size-groups. More recent data are presented in the *Survey of Current Business* for March 1955 and June 1956.

The primary source for flow-of-funds data is the Board of Governors of the Federal Reserve System; the *Federal Reserve Bulletin* from time to time presents summarized versions of these data. Detailed historical data appear in *Flow of Funds in the United States, 1939-53*.

A primary source for data on distribution of income by size-class is the Bureau of the Census, *Current Population Reports—Consumer Income*, Series P-60. A brief discussion of the Current Population Survey which is the basis for the data in the above report appears in the Technical Note on page 201 and also on page 2. Another primary source for information in this field is the national Survey of Consumer Finances conducted annually since 1946 for the Board of Governors of the Federal Reserve System by the Survey Research Center of the University of Michigan. This survey consists of a sample of approximately 2,700 family units or 3,000 spending units located in 66 sampling areas. Survey findings are published in the *Federal Reserve Bulletin* and include information regarding debts, instalment credit, purchases, liquid assets, and other financial matters, in addition to income of families.

A national survey of urban family income, expenditures, and savings was made by the Bureau of Labor Statistics for 1950. Preliminary results were published in BLS Bulletin 1097 (Revised), *Family Income, Expenditures, and Savings in 1950*. Final data for this survey appear in *Study of Consumer Expenditures, Income, and Savings* (18 volumes), issued by the Wharton School of Finance and Commerce of the University of Pennsylvania. (See table 396 for selected data from this study.) Family expenditures data for selected cities from 1946 to 1949 have been published in BLS Bulletin No. 1065, *Family Income, Expenditures, and Savings in 10 Cities*.

**National income and product.**—A synoptic view of the economy is provided by the summary of the Nation's income, expenditure, and saving shown in the form of a balancing set of accounts for the major economic categories—consumers, business, and government. (See table 380.) These statistics assembled by the Council of

---

Note.—This section presents data for the most recent year or period available on March 31, 1958, when the material was organized and sent to the printer.

Economic Advisers are based on the "national income and product" accounts of the Department of Commerce. An explanation of the items included in this summation may be found in the 1957 *Historical and Descriptive Supplement to Economic Indicators*, 85th Congress, 1st Session.

**Gross national product.**—Gross national product (called GNP) represents the total national output of goods and services at market prices. It measures this output in terms of the expenditures by which these goods are acquired. These expenditures comprise the purchases of goods and services by consumers and government, gross private domestic investment, and net foreign investment. The goods and services included in GNP are, for the most part, those actually bought for final use (excluding illegal transactions) in the markets. There are a number of inclusions, however, which represent imputed values, the most important of which is the rental value of owner-occupied dwellings. GNP, the total national output, also measures the product attributable to the factors of production—labor and property—supplied by residents of continental United States. GNP differs from "national income," described below, mainly in that GNP includes allowances for depreciation and similar capital consumption and for indirect taxes (such as sales and excise taxes).

**National income.**—National income is the aggregate of earnings by labor and property from the current production of goods and services by the Nation's economy. It is the sum represented by compensation of employees, proprietors' income, rental income, net interest, and corporate profits. Thus, it measures the total factor costs of the goods and services produced by the economy. Earnings are inclusive of taxes on those earnings.

**Personal income.**—Personal income is the current income received by individuals, by unincorporated businesses, and by nonprofit institutions (including pension, trust, and welfare funds) from all sources. It includes transfers (payments not resulting from current production) from government and business such as social-security benefits, military pensions, etc., but excludes transfers among persons. Although most of the income is in monetary form, there are important nonmonetary inclusions—chiefly, estimated net rental value to owner-occupants of their homes and the value of food consumed on farms.

Disposable personal income is equal to personal income less taxes on individuals (including income, property, and other taxes not deductible as business expense), and other general Government revenues (e. g., fines, penalties, etc.) received from individuals as individuals.

**Flow-of-funds accounts.**—Another synoptic view of the economy is provided by a summary of the flow-of-funds accounts. This system of national accounts presents a record designed to picture the flow of funds through the major sectors of the national economy. The system records all transactions that involve at least two separate economic units (e. g., persons, firms) and that are effected through the use of credit or money. The transactions covered include transactions in financial instruments, existing assets, and transfers of various kinds, as well as transactions involving currently produced goods and services. The purpose of the system is to provide an aid in analyzing the flows of funds through the economy and in relating financial developments in the economy to the flows of income and expenditures.

**Distribution of income by size-class.**—These statistics are based on data collected in various field surveys of income conducted since 1936. In each of these field surveys trained enumerators interview representative samples of the population with respect to income received during the previous year. The income here referred to is consumer money income for the calendar year and is before deduction of income taxes or social security taxes. Nonmoney items of income are not covered. None of the aggregate income concepts (gross national product, national income, or personal income) is exactly comparable with consumer money income. The nearest approximation is "personal income."

A size distribution of family "personal income" (less amounts received by institutional residents or retained by private trust, pension, health, and welfare funds) is prepared by the Office of Business Economics based on data from consolidated Federal individual income tax returns and the sample data from the surveys mentioned above. These are described in *Income Distribution in the United States, 1944-1950* mentioned above. Detailed statistics, including information on Federal individual income tax liabilities, are available in the March 1955 and June 1956 issues of the *Survey of Current Business*.

**National wealth.**—National wealth data are not currently compiled by any Federal government agency. The Bureau of the Census prepared estimates of national wealth for selected years from 1850 to 1922. Figures for various dates covering the period 1880 to 1922, based on the Census Bureau reports, are shown in *Historical Statistics of the United States, 1789-1945*. For the same period, 1880-1922, estimates for certain components of wealth (land, real-estate improvements, and equipment), also largely based on Census Bureau figures, appear in *National Product Since 1869*, by Simon Kuznets, issued by the National Bureau of Economic Research in 1946. More recent data on wealth for the period 1922 to 1938 were compiled by the National Industrial Conference Board and published in *Enterprise and Social Progress*, and in the *Economic Record*. Both the Kuznets estimates and the NICB estimates also appear in *Historical Statistics*. The Board of Governors of the Federal Reserve System publishes partial balance sheets, covering financial assets and liabilities, for the various sectors of the economy as part of the flow-of-funds accounts.

The wealth data shown here (tables 412 and 413) represent the most recent attempt to derive a consistent and comprehensive series in this field. They were compiled by Dr. Raymond W. Goldsmith. As is the case in all national wealth estimates, the figures are intended chiefly to indicate the order of magnitudes involved and to permit rough comparisons among types of wealth and of the growth of wealth over long periods. Careful examination of the methods and sources of the estimates, as they are described in the source, *A Study of Saving in the United States*, is therefore advisable before use is made of the figures.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, 1789-1945*, series A 101-116") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*, and its *Continuation to 1952*. See preface.

<sup>1</sup> Differences in total sources and uses of funds for transaction categories result from valuation, timing, and classification differences and from statistical discrepancies.  
<sup>2</sup> Less than \$60 million.  
<sup>3</sup> Consists of purchases of new durable goods (\$33.1 billion) and new houses (\$32.8 billion).  
<sup>4</sup> Financial sources of funds represent net changes in liabilities; financial uses, net changes in financial assets.

<sup>1</sup> Liquid assets comprise U. S. Government savings bonds, checking accounts, savings accounts in banks, postal savings, and shares in savings and loan associations and credit unions; currency is excluded. Data prior to 1957 also include marketable U. S. Government bonds, which were held by about 1 percent of all spending units early in 1957.

**No. 402.—MEAN AND MEDIAN INCOMES WITHIN OCCUPATIONAL GROUPS: 1947 TO 1956**

[In dollars. See text, p. 299. For definition of spending unit, see headnote, table 400. Mean income is the average obtained by dividing aggregate money income before taxes by number of spending units. Median income is that of middle spending unit when units are ranked by size of money income before taxes. Figures beginning 1953 are high relative to prior years owing largely to a change in 1954 questionnaire that improved the reporting of income.]

<sup>1</sup> Not available.

<sup>2</sup> Beginning 1953, not exactly comparable; changes in 1954 questionnaire resulted in overestimates of farm and nonfarm business incomes relative to earlier years. The effect is thought to have been much greater on the mean than on the median.

<sup>3</sup> Median income of skilled workers was \$5,350 and that of semiskilled workers was \$4,400. Mean incomes were \$5,640 and \$4,480, respectively.

<sup>4</sup> Comprises spending units headed by housewives, protective service workers, unemployed persons, and students.

**No. 403.—MONEY INCOME OF FAMILIES AND UNRELATED INDIVIDUALS—PERCENT DISTRIBUTION BY INCOME LEVEL, AND FARM AND NONFARM MEDIAN INCOME: 1944 TO 1956**

[Based on samples of population residing in households only. Includes small number of families and unrelated individuals with no money income. Excludes small number of families and individuals residing in quasi-households (hotels, large rooming houses, etc.). "Family" refers to a group of 2 or more related persons residing in same household. "Unrelated individual" is used to refer to a person living alone or with persons not related to him. See Technical Note, p. 201. For explanation of urban and rural areas, see p. 2]

In Armed Forces or not in labor force.....	11,368	7,708	978	(4)	39,780	12,822	582	2,296

<sup>1</sup> Based on number of persons with income. For definition of median, see headnote, table 24, p. 27.

<sup>2</sup> For definition, see footnote 2, table 406.

<sup>3</sup> Includes a very small number of unpaid family workers.

<sup>4</sup> Fewer than 100 cases in sample reporting with income.

Source: Department of Commerce, Bureau of the Census; *Current Population Reports*, Series P-60, No. 27.

### No. 411.—INCOME OF NONSALARIED PHYSICIANS, LAWYERS, AND DENTISTS: 1929 TO 1954

[Data are based on mail questionnaire surveys of the 3 professions, usually in cooperation with the professional associations. At intervals, large-scale surveys have been conducted to establish benchmark data, most recently in 1949 (dentists), 1950 (physicians), and 1955 (lawyers). For later years, smaller, interim surveys are conducted to obtain indexes for extending the benchmark data forward.]

<sup>1</sup> Estimates obtained by multiplying the constant dollar figures shown in table 413 by the appropriate price index for current year. See also footnote 1 in that table.

<sup>2</sup> Estimates are based on book values.

<sup>3</sup> Estimates for farm land are based on Census or similar data. For other private land, estimates are derived by application of rough ratios of land to structure values for different types of real estate.

<sup>4</sup> 1945 estimates differ from one another not only because of changes in base period (1929 vs. 1947-49) of deflator used but also because of minor changes in sources of data and methods of estimation used.

<sup>5</sup> 1945 estimates differ from one another because of minor changes in sources of data and methods of estimation used.

<sup>1</sup> Estimates derived by "perpetual inventory" method which is intended to reflect reproduction cost of different types of assets. Estimates are obtained by: (1) Reducing each year's gross capital expenditures in current prices to 1929 (or 1947-49) price level by means of appropriate construction cost or wholesale price indices; (2) depreciating gross capital expenditures in accordance with an assumed length of life for different types of assets, thus obtaining net capital expenditures for each year in 1929 (or 1947-49) prices; (3) cumulating net capital expenditures for as many years backwards as corresponds to the assumed length of life of the type of asset involved.

<sup>2</sup> Estimates reflect book values reduced by means of wholesale price indices.

<sup>3</sup> 1945 estimates differ from one another not only because of changes in base period (1929 vs. 1947-49) of deflator used but also because of minor changes in sources of data and methods of estimation used.

Source: For 1900 to 1945 (1929 prices), R. W. Goldsmith, *A Study of Saving in the United States*, Princeton University Press, 1956, Vol. III, Table W-1; for 1945 (1947-49 prices) to 1955, National Bureau of Economic Research, preliminary estimates by Raymond W. Goldsmith.

## Section 12

### Prices

This section presents indexes of wholesale, retail, and consumer prices. Average prices are also shown for selected commodities. The primary sources of these data are the publications of the Department of Labor, Bureau of Labor Statistics, which include: *Monthly Labor Review*; *Handbook of Labor Statistics*; *Consumer Price Index* (monthly); *Retail Food Prices by Cities* (monthly); *Retail Prices and Indexes of Fuels and Electricity* (monthly); *Wholesale (Primary Market) Price Index* (monthly); and *Wholesale Prices* (annually). The Agricultural Marketing Service prepares indexes of prices received and prices paid by farmers (see text, p. 610).

The Bureau of Labor Statistics prepares weekly and monthly indexes of wholesale prices, a daily index based on spot market prices of 22 commodities; and indexes of consumer prices for urban wage-earner and clerical-worker families for the United States, based on 46 cities, and individually for 20 large cities, as well as component indexes for food and other groups.

**Wholesale price index.**—This index, dating from 1890, is the oldest continuous statistical series published by the Bureau of Labor Statistics. It is designed to measure average changes in prices of commodities sold in primary markets in the United States.

The index has undergone 4 major revisions. The latest revised index (see *Monthly Labor Review*, February 1952), based on 1947-49=100, is the official index for January 1952 and all subsequent months. The index beginning with data for 1947 is based on nearly 2,000 commodity price series instead of the 900 included in the earlier index. Prices used in constructing the index are collected directly from sellers, if possible, and apply as nearly as practicable to the first large-volume commercial transaction for each commodity—i. e., the manufacturer's or other producer's selling price, the importer's selling price, the selling price on an organized exchange or at a central market. Respondents are asked to report prices f. o. b. point of production if possible.

For the 1947-54 period, the weights used in the index represent the total net selling value including the value of sales for export, f. o. b. production point, less interplant transfers, but plus the value of imports for consumption, for the producing and processing sector of the economy in continental United States for the year 1947 (adjusted for price change to the average of 1947-49). Beginning in January 1955, the weights used are based on data for the average of the years 1952 and 1953.

The all-commodities wholesale price index series on a base 1947-49=100 has been extended back to 1890. Monthly indexes on the same base are available for most of the major groups of commodities from January 1926. They are available on a 1926=100 base by groups from January 1890 and by subgroups beginning with 1913. The index 1926=100 is the official index for December 1951 and all earlier dates.

**Consumer price index.**—This index measures the average change in prices of goods and services purchased by city wage-earner and clerical-worker families. The weights used in calculating the index are based on studies of actual expenditures by families of wage earners and clerical workers. The quantities and qualities of the items in the "market basket" remain the same between consecutive pricing periods, so that the index measures the effect of price change only on the cost of living of these families.

Note.—This section presents data for the most recent year or period available on March 31, 1958, when the material was organized and sent to the printer. In a few instances, more recent data were added later.

The index does not measure changes in the total amount families spend for living; city indexes do not measure relative differences in prices or living costs between cities.

A study conducted during 1917-19 provided the weights used from 1913 to 1935. Since then, there have been three major revisions of this index, which involved bringing the "market basket" of goods and services up to date and improving the sample and methodology. From 1935 to January 1950, time-to-time changes in retail prices were weighted by 1934-36 average expenditures except for certain temporary wartime adjustments. Weights used from January 1950 to December 1952 represented estimated 1949-50 spending patterns. Beginning January 1953, the weights represent average purchases of urban wage-earner and clerical-worker families in fiscal year 1952, derived from a study of family expenditures in 1950 and estimated changes in income and prices between 1950 and fiscal 1952.

The list of items currently priced for the index includes approximately 300 goods and services. For some items, a number of different qualities are priced. The items priced are described by detailed specifications to insure that, as far as possible, the same quality is priced each time, and that differences in reported prices are measures of price change only. Sales taxes are reflected wherever applicable.

Beginning January 1953, prices are obtained in a sample of 46 cities. Foods, fuels, and a few other items are priced monthly in all cities. Prices of most other goods and services are obtained on a regular rotating cycle—monthly in the 5 largest cities and every 3 months in other cities. Rents are surveyed bimonthly in the 5 largest cities and every 3 months in other cities. Estimates are made for unpriced cities each month. Prior to January 1953, indexes were based on food prices in 56 cities monthly, and prices of other commodities in 34 cities quarterly or monthly.

Price changes for the 46 cities are combined for the United States with weights based on 1950 population of cities represented by each sample city. City indexes are compiled for the 20 largest of the 46 cities.

**Retail food price index.**—Retail food price indexes are computed as a subgroup of the consumer price index. Weights used at various times are consistent with those for the index as a whole. In March 1943, the weights for the food index were revised to take account of changes in food purchases due to wartime shortages and rationing. In January 1946, these wartime weight adjustments were eliminated and certain other revisions made in the calculating procedures. In January 1950 and again in January 1953 the weights were revised as described above for the total consumer price index.

The indexes were computed from prices of 54 foods for the period from January 1935 to March 1943, 61 foods for the period March 1943 to June 1947, 50 foods from June 1947 to January 1950, 60 foods from January 1950 to December 1952, and 90 foods beginning January 1953.

**Comparability with other indexes.**—The National Industrial Conference Board prepares a monthly Consumer Price Index based on 1953=100 (see table 423) for the United States and for selected cities. This index is not fully comparable with that of the Bureau of Labor Statistics.

In comparing the movement of the indexes of consumer prices and of the prices paid by farmers for commodities bought for family living (table 811), it should be noted that the consumer price index includes rents and other services and the farm index does not, and that the list of commodities included in the two indexes and their geographic coverage differ because farm family buying differs considerably from that of city families, and farm and city workers are located in different parts of the country.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, 1789-1945*, series L 50-51") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*, and its *Continuation to 1952*. See preface.

## No. 417.—WHOLESALE PRICE INDEXES, BY STAGE OF PRODUCTION: 1947 TO 1957

[1947-49=100. These indexes are a regrouping of the regular Wholesale Price Index Series to show price movements at various levels of production and in the various sectors of the economy. The new series comprise three major categories: (a) raw or crude materials; (b) intermediate materials for further processing, components, and supplies; (c) finished goods. Each of these three is further divided in accordance with end-use and durability]

STAGE OF PRODUCTION	1947	1950	1951	1952	1953	1954	1955	1956	1957
<b>All commodities.....</b>	<b>96.4</b>	<b>103.1</b>	<b>114.8</b>	<b>111.6</b>	<b>110.1</b>	<b>110.3</b>	<b>110.7</b>	<b>114.3</b>	<b>117.6</b>
Crude materials for further processing.....	98.6	101.8	116.9	107.4	99.2	98.3	94.5	95.0	97.2
Foodstuffs and feedstuffs.....	100.7	97.0	112.3	105.7	94.6	94.7	85.7	84.0	87.7
Nonfood materials, except fuel.....	96.0	111.0	128.1	110.9	106.2	104.2	110.1	114.2	112.5
For manufacturing.....	96.1	111.2	128.6	110.8	105.8	103.6	109.6	113.6	111.5
For construction.....	93.0	106.8	113.0	113.0	117.4	121.0	124.9	130.6	136.0
Fuel.....	89.4	104.6	106.5	107.2	111.0	106.0	105.8	113.3	119.7
For manufacturing.....	89.3	104.5	106.2	106.9	110.5	105.5	105.4	113.0	119.4
For nonmanufacturing industries.....	89.5	104.7	106.9	107.8	111.8	106.7	105.5	113.7	120.1
Intermediate materials, supplies, and components.....	96.2	104.3	116.9	113.5	114.1	114.8	117.0	122.1	125.1
Materials and components for manufacturing.....	96.4	104.5	118.4	113.4	115.2	115.4	118.2	123.7	126.9
Materials for—									
Food manufacturing.....	102.8	94.9	105.7	101.5	101.8	100.9	97.7	98.0	99.9

# No. 419.—CONSUMER PRICE INDEX—ALL ITEMS AND COMMODITY GROUPS: 1913 TO 1958

[1947-49=100. The Consumer Price Index from 1913 to December 1952 is rebased according to new groupings from adjusted series indexes on 1935-39=100 formerly published. For detailed explanation, see text, p. 325. These indexes include a correction of new unit bias in the rent index from 1940 to December 1949 and adjusted population and commodity weights beginning with indexes for January 1950. These adjustments make a continuous comparable series]

## No. 424.—AVERAGE RETAIL PRICES OF SELECTED FOODS: 1913 TO 1958

[Mid-month prices in cents per pound except for milk (cents per quart), eggs and oranges (cents per dozen), and tomatoes (cents per No. 2 can through September 1954, No. 303 can thereafter). Data are averages of prices reported by retail dealers in cities included in the Retail Food Index. (See headnote, table 426.) Number of cities also varies slightly according to availability of prices for each item. Sales taxes not included after 1945. Prices for individual cities combined with use of population weights]

# No. 433.—ANNUAL AVERAGE UNIT VALUES OF IMPORTANT ARTICLES IMPORTED AND EXPORTED: 1930 TO 1956

[Values of goods imported represent values in foreign markets whence exported to United States. Values of goods exported represent value at time and place of exportation. "Ton" signifies long ton of 2,240 pounds except where otherwise specified. Averages obtained by dividing total value of imports (for consumption) and exports of specified article by total quantity. Where, as in some commodities, considerable price variations may exist between different grades, methods of packing, etc., and proportions of grades, etc., may vary from year to year, such averages may show actual price movements only roughly]

## Section 13

### Elections

This section relates to popular participation in, and results of, Presidential, Congressional, and gubernatorial elections. Also presented are several tables concerning Congressional legislation.

Official statistics on Federal elections are collected by the Clerk of the House of Representatives and published biennially in *Statistics of the Presidential and Congressional Election* and *Statistics of the Congressional Election*. Another publication which contains Federal and State election statistics is *America Votes*, issued biennially by the Governmental Affairs Institute. Data on Federal elections also appear in the United States Congress, *Congressional Directory*, and in the official State documents (Registers, Manuals, Reports of the Secretary of State, etc.) of the separate States. Data on campaign expenditures for Federal offices and expenditures by lobbying organizations affecting national legislation are compiled by Congressional Quarterly News Features and published in its *Congressional Quarterly Almanac*.

Almost all Federal, State, and local governmental units in the United States conduct elections at various intervals—annual, biennial, quadrennial, or longer—for different types of offices and other purposes. No regular and complete system exists for reporting either the number of elections held or the numbers of votes cast for candidates, except for Federal offices, and, in most States, for State offices.

The conduct of elections in the United States for Federal, State, and local offices and on State and local issues is regulated by State laws or, in some cities and a few counties, by local charters. An important exception is that the United States Constitution prescribes the basis of representation in Congress and the manner of electing the President of the United States and grants to Congress the right to regulate the times, places, and manner of electing Federal officers.

The election of the President of the United States is provided for in the Constitution, article II, section 1, through the establishment of an electoral college in each State, for each Presidential election. The method of casting the electoral vote was modified in 1804 by the adoption of the 12th Amendment to the Constitution. The number of electors, and therefore of electoral votes, is "equal to the whole number of Senators and Representatives to which the State may be entitled in Congress." The electors are elected by popular vote in all States.

The number of members in the House of Representatives is fixed by the Congress at the time of each apportionment; since 1912 it has remained constant at 435. The 14th Amendment to the Constitution provides that "Representatives shall be apportioned among the several States according to their respective numbers \* \* \*." The Constitution also requires that each State have at least one Representative. Members are elected for 2-year terms, all terms covering the same period.

The Senate is composed of 96 members, 2 from each State, who are elected to serve for a term of 6 years. One-third of the Senate is elected every 2 years. Senators were originally chosen by the State legislatures. Subsequently, the 17th Amendment to the Constitution, adopted in 1913, prescribed that Senators be elected by popular vote.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, 1789-1945*, series P 27-31") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*, and its *Continuation to 1952*. See preface.

Note.—This section presents data for the most recent year or period available on March 31, 1958, when the material was organized and sent to the printer. In some instances more recent data were added later.

FIG. XXI.—PARTICIPATION IN NATIONAL ELECTIONS: 1900 TO 1956

<sup>1</sup> Totals for years prior to 1928 exclude votes cast for names not appearing on electoral tickets for parties specified. Totals for 1928-44 exclude void and blank ballots. <sup>2</sup> Democrat-Populist.

<sup>3</sup> Includes scattering votes; 445 in Iowa; 633 in New Jersey; and 131 in Pennsylvania.

<sup>4</sup> Included with Miscellaneous are 798 Union votes cast in endorsement of Republican candidate.

<sup>5</sup> Included with Miscellaneous are 417,418 American Labor votes cast in endorsement of Democratic candidate.

<sup>6</sup> Included with Miscellaneous are 496,405 American Labor and 329,235 Liberal votes cast in endorsement of Democratic candidate.

<sup>7</sup> Included with Miscellaneous are 1,169,021 votes for Thurmond (States' Rights Democrats) and 1,156,103 votes cast for Wallace (Progressives, etc.); included with Democratic are 222,562 Liberal votes cast for Democratic nominees.

<sup>8</sup> Included with Democratic are 416,711 Liberal party votes cast for democratic candidate.

<sup>9</sup> For 1888, Union Labor Party; 1892, 1900, and 1904, Populist; 1896, National Democrat; 1908, Populist and Independent; 1912, Progressive; 1916 to 1952, miscellaneous. <sup>10</sup> Socialist-Labor only.

<sup>11</sup> Includes 4,822,856 votes cast for La Follette and Wheeler, official candidates of both Socialist and Independent Progressive parties. <sup>12</sup> Workers Party. <sup>13</sup> See also tables 440 and 441.

<sup>14</sup> Includes minor party votes; and for certain years scattering, void, and blank votes.

<sup>15</sup> Excludes votes for Georgia; statistics not furnished by State authorities.

<sup>16</sup> Although the Republican Party received 50.6 percent of the total vote cast, the Democratic Party won a greater number of individual contests for Representatives (221 as against 210 for the Republicans) and thereby retained control of the House of Representatives.

# No. 403.—APPORTIONMENT OF MEMBERSHIP IN HOUSE OF REPRESENTATIVES, BY STATES, FROM ADOPTION OF CONSTITUTION TO 1950

[Population figures used for apportionment purposes are those determined for States by each decennial census. Until 1940, population for apportionment purposes excluded Indians not taxed and until 1870, excluded two-fifths of slaves. Until 1850, apportionment ratios were chosen arbitrarily; 1850 to 1900, ratios were apportionment population of U. S. divided by predetermined number of Representatives; from 1910 on, apportionment ratios shown were computed by dividing fixed number (435) of Representatives into apportionment population but were not used in the original calculations, which were based on priority lists. No reapportionment based on 1920 Population Census. For discussion of apportionment methods, see S. Doc. No. 304, 76th Cong., 3d sess., *A Survey of Methods of Apportionment in Congress*, by Edward V. Huntington. See also *Historical Statistics, 1789-1945*, series P 57-61, which shows apportionment totals under Apportionment Act, *excluding* Representatives assigned after apportionment (footnote 6 below)]

<sup>1</sup> Number of Representatives not to exceed 1 for each 30,000 inhabitants.

<sup>2</sup> See headnote.

<sup>3</sup> Membership increased from 233 to 234 by act of July 30, 1852 (10 Stat. L. 25). See footnote 6.

<sup>4</sup> Membership increased from 233 to 241 by act of Mar. 4, 1862 (12 Stat. L. 353). See footnote 6.

<sup>5</sup> Membership originally fixed at 283 but increased to 292 by act of May 30, 1872 (17 Stat. L. 192). One Member assigned to Colorado after apportionment.

<sup>6</sup> Assigned after apportionment.

<sup>7</sup> Included in apportionment act in anticipation of Statehood.

<sup>8</sup> Included in the 20 Members originally assigned to Massachusetts but credited to Maine after its admission as a State, Mar. 15, 1820 (3 Stat. L. 555).

No. 440.—VOTE CAST FOR UNITED STATES REPRESENTATIVES, AND PERCENT OF VOTE FOR MAJORITY PARTY, BY STATES: 1942 TO 1952

[In thousands. D=Democratic, R=Republican. Majority party vote refers to the party vote representing either a majority or a plurality for the victorious party. For explanation and current figures, see table 441]

<sup>1</sup> See footnote 16, table 434.

<sup>2</sup> Percentage was 48.9 for each major party.

<sup>3</sup> For 1942-1946, no Representatives were elected from districts, but more than one was elected from the State-at-large.

<sup>4</sup> In California, a person may become a candidate of one or more parties for the same office. Inasmuch as votes cast by voters of various parties for the same candidate are not segregable, the vote is counted for the party of which the candidate is a member.

# No. 441.—VOTE CAST FOR UNITED STATES REPRESENTATIVES, BY POLITICAL PARTIES, BY STATES: 1954 AND 1956

[In thousands. In each State, totals represent the sum of votes cast in each Congressional District, except as follows: In Delaware, Nevada, Vermont, and Wyoming, only 1 Representative is elected from the State at large. In New Mexico and North Dakota, 2 Representatives are elected from the State at large. In Connecticut, Texas, and Washington, Representatives are elected by district, except 1 who is elected at large; these at-large votes are not reflected in this tabulation. In numerous States, one or other of the major parties had no candidate in some districts. In those cases where votes of a party, as such, are cast in endorsement of a candidate of another party, the votes are counted as for the endorsing party. See also notes below.]

<sup>1</sup> Includes vote cast for minor parties, not shown separately.

<sup>2</sup> For New York, included in Republican are 17,954 votes cast for Republican-endorsed Democrat in 18th District.

<sup>3</sup> A person may be candidate of one or more parties for same office, so that party votes for candidates are not segregable. Party vote shown is computed by assigning to a party total votes for candidates who are members of that party.

<sup>4</sup> Voters entitled to vote for 2 candidates; total ascertained by adding the highest vote received by a single candidate in each political party.

<sup>5</sup> Includes 171,344 votes cast by minor parties for Liberal-endorsed Democrats.

<sup>6</sup> Includes 230,434 votes cast by minor parties for Democratic-endorsed candidates and 762 for Republican-endorsed.

## Section 14

### Federal Government Finances and Employment

This section presents statistics relating to the financial structure and the civilian employment of the Federal Government. The fiscal data cover the essential apparatus of public financing, namely appropriations, taxes, receipts, expenditures, and debt. The personnel data relate to civil staffing and payrolls for the different public functions and agencies, certain employee characteristics, and civil service status.

Principal sources of the fiscal data are *The Budget of the United States Government* published annually by the Bureau of the Budget and the Treasury Department's annual *Combined Statement of Receipts, Expenditures and Balances*, an abstract of the Treasury books relating to all of the receipt and appropriation accounts which report disbursements under the appropriations made by the Congress. The *Annual Report of the Secretary of the Treasury* is a convenient summary of yearly data relating to somewhat broader fields.

The day-to-day cash operations of the Federal Government clearing through the accounts of the Treasurer of the United States are reported in the *Daily Statement of the United States Treasury*. In the issue for the last day of the month the *Statement* contains information as to the public debt receipts and expenditures for the month and the outstanding public debt as of that day.

Receipts and expenditures of the Government classified as to budgetary and non-budgetary transactions and showing the budget surplus or deficit appear in the *Monthly Statement of Receipts and Expenditures of the United States Government*. The monthly *Treasury Bulletin* contains analytical material on fiscal operations and related Treasury activities. Another special aspect of Federal finances is presented in the Treasury Department's monthly *Circulation Statement of United States Money*.

Tax data are compiled by the Internal Revenue Service of the Treasury Department. The *Annual Report of the Commissioner of Internal Revenue* gives a detailed account of tax collections by kind of tax and geographic area. The agency's annual *Statistics of Income* reports present data from individual and corporate income tax returns. Biennial *Statistics of Income* publications present data from fiduciary income tax, estate tax, and gift tax returns.

Federal employment figures are compiled primarily by the Civil Service Commission. The figures are issued by that agency in its regular *Annual Report* and its *Monthly Report on Employment*. The Commission also publishes an annual report on the pay of Federal employees entitled *Pay Structure of the Federal Civil Service*. Data on Federal employment are also issued by the Bureau of Labor Statistics in its *Monthly Labor Review*.

**Treasury receipts and expenditures.**—All receipts of the Government, with a few exceptions, are deposited to the credit of the Treasurer of the United States, irrespective of their ultimate disposition or availability for expenditure. The Treasury Department currently uses two bases for the reporting of receipts: (1) Latest available reports of deposits in government depositories in the general account of the Treasurer of the United States; and (2) collections as reported by government collecting agencies.

*Note.*—This section presents data for the most recent year or period available on April 17, 1958, when the material was organized and sent to the printer. In some instances more recent data were added later.

Receipts on the first basis are presented in the *Daily Statement of the United States Treasury*, the purpose of which is to report receipts as promptly as possible. Receipts on a collection basis (taxes, customs duties, trust receipts, receipts of certain government corporations and public enterprises) and miscellaneous budget receipts which are on the basis of the latest reports of deposits in government depositaries are presented in the *Monthly Statement of Receipts and Expenditures of the United States Government*. The *Monthly Statement* also includes deposits or collections in cash accounts of Government agencies held outside the Treasury as well as those in the general account of the Treasurer of the United States. The final statement issued after the close of the fiscal year is held open until all reports have been received covering deposits or collections for that year.

Under the Constitution, no money may be withdrawn from the Treasury unless appropriated by the Congress. The Treasury Department reports Government expenditures on two bases: (1) Checks paid or withdrawals affecting the account of the Treasurer of the United States; and (2) checks issued and cash payments made by disbursing officers. Transactions of the first type are reported in the *Daily Statement* referred to above; items representing interfund or intragovernmental payments are not included. Expenditures of the second type are presented in the *Monthly Statement*, mentioned above, and in the annual *Combined Statement of Receipts, Expenditures and Balances*, also cited earlier. These monthly and annual reports include payments from cash accounts of Government agencies held outside the Treasury as well as those from the general account of the Treasurer of the United States.

**Treasury budget and nonbudget accounts.**—All receipts of the Government are recorded by the Treasury in accounts classified generally according to the source and according to whether or not the receipts are earmarked in some degree for expenditure. Disbursements of the Government are similarly classified by accounts reflecting various types of authorizations or conditions under which they may be expended.

Budget accounts include: General fund receipts available for financing the general Government operations to the extent appropriations are made by the Congress (sources of general receipts are income, excise, and employment taxes, customs duties, etc.); special fund receipts (earmarked moneys) received subject to special legal authorizations which may be expended only for the particular purpose specified (examples are the Mineral Leasing Act and the National Forest Fund); expenditure (appropriation) accounts which record the amounts authorized by the Congress and expenditures therefrom, for the general support of the Government; revolving and management fund accounts which record funds authorized by specific provisions of law to finance without further action by the Congress a continuing cycle of operations, with receipts derived from such operations, and to facilitate accounting for and administration of intragovernmental operations.

Nonbudget accounts include: Trust accounts which record the receipt and expenditure of moneys held in trust by the Government for the benefit of individuals or classes of individuals, such moneys being expended only in accordance with the terms of a trust agreement or statute (examples are Civil Service Retirement Fund, Old-Age and Survivors Insurance Trust Fund, the Highway Trust Fund, etc.); deposit fund accounts which record receipts either held in suspense temporarily and later refunded or transferred to another Government account, or held by the Government as banker or agent and paid out at the owners' direction (example is account for the accumulation of taxes withheld from employees' salaries). Funds in nonbudget accounts have no effect on the budget surplus or deficit.

**Public and private debt.**—These data appear annually in the May issue of the monthly *Survey of Current Business* of the Department of Commerce. Net public and private debt outstanding is a comprehensive aggregate of indebtedness of borrowers after elimination of certain duplicating governmental and corporate debt. This meas-

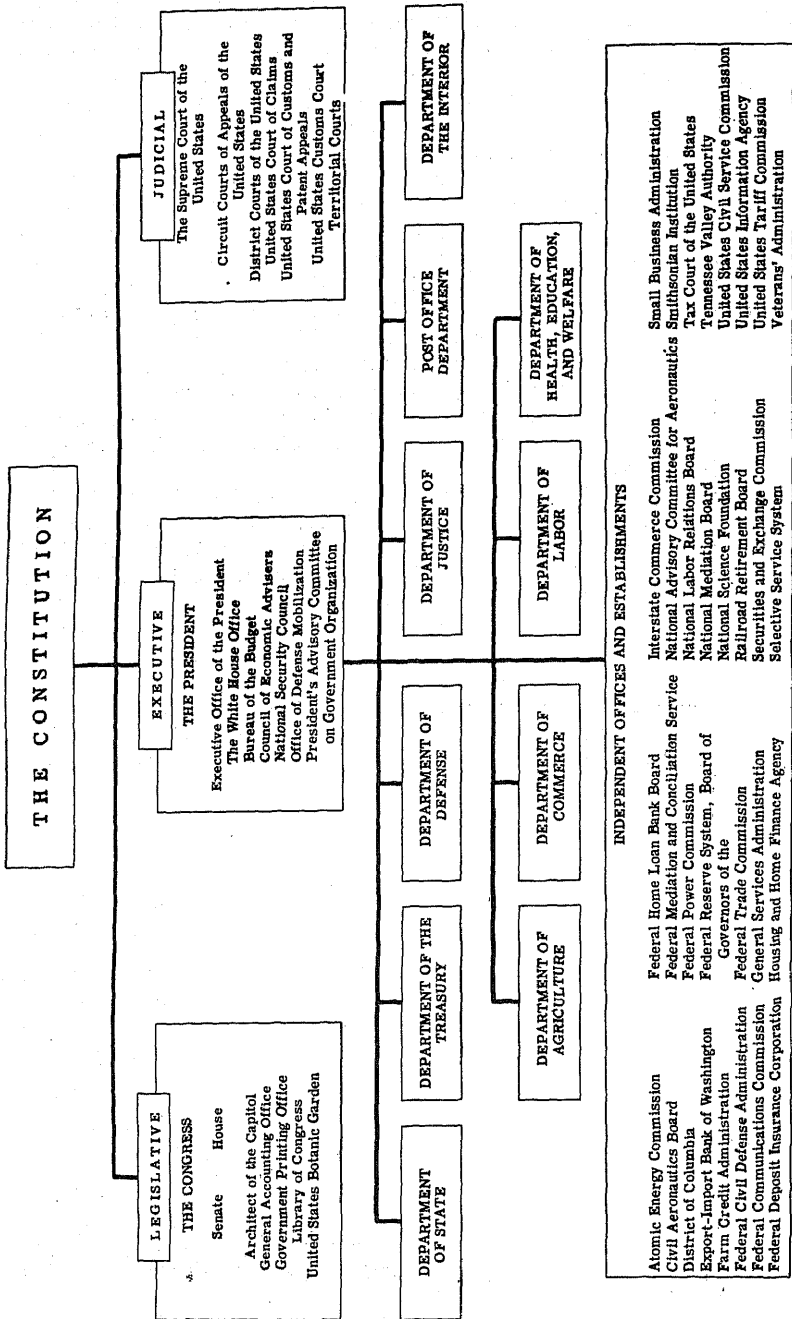

ure of indebtedness provides a more significant indication of trends in debt structure than does gross debt, since effects of nominal changes in financial practices and organization are largely removed. To obtain net figures, gross or total debt is adjusted for specific types of duplications pertaining to the following: (1) Federal Government and its corporations and agencies generally; (2) State and local governments; and (3) within the corporate area, those affiliated but legally distinct corporations which operate under a single management. In the noncorporate private area, data are gross throughout with no adjustments for duplications.

**Employment and payrolls.**—Employment data are collected from all departments and agencies of the Federal Government by the Civil Service Commission. The Commission does not collect personnel statistics from the District of Columbia Government. Employment figures represent the number of persons who occupied civilian positions on the last day of the calendar month shown and who are paid for personal services rendered for the Federal Government, regardless of the nature of appointment or method of payment. Intermittent workers are counted if they performed any service during the report month. Employment totals exclude persons serving without compensation, persons on leave without pay for scheduled periods longer than 30 days, persons in leave status after reduction-in-force, and persons hired informally "on the spot" without formal appointment procedures to cope with fire, flood, or other extreme emergencies.

Federal payrolls include all payments for personal services rendered during the calendar month and payments for accumulated annual leave of employees who separate from the service. Since most Federal employees are paid on a biweekly basis, the calendar month earnings are partially estimated on the basis of the number of work days in each month where payroll periods overlap consecutive months. Monthly payroll totals fluctuate in amount because the number of work days in each month varies from 20 to 23 days. Holidays may be disregarded since Federal employees are paid for the eight national holidays on which they do not work.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, 1789-1945*, series P 89-98") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*, and its *Continuation to 1952*. See preface.

<sup>1</sup> Excludes debt retirements, refunds of receipts and capital transfers, and beginning 1951, investments of wholly owned Government corporations in public debt securities.

<sup>2</sup> Includes all expenditures (including rivers and harbors and Panama Canal), and Air Force prior to 1949, irrespective of original source of funds.

<sup>3</sup> On basis of checks issued. Represents expenditures under appropriation "Army and Navy pensions," administered by Veterans Administration.

<sup>4</sup> Includes expenditures of Office of Secy. of Defense, expenditures for "Govt. corporations (wholly owned), etc. (net)" beginning 1932; expenditures for veterans pensions beginning 1949, and expenditures of Dept. of Defense not segregated as to respective departments beginning 1952.

<sup>5</sup> Represents gross debt as of end of each period; e. g., 1935, 1940, etc.

<sup>6</sup> For comparability with earlier years, all transactions relating to Foreign Economic Cooperation Trust Fund (amounting to \$3,000,000,000) have been consolidated with budget expenditures. <sup>7</sup> Included in All other.

Source of tables 455 and 456: Treasury Department, *Annual Report of the Secretary*; annual and current data published in *Monthly Statement of Receipts and Expenditures of the United States Government*.

# No. 457.—FEDERAL GOVERNMENT EXPENDITURES, BY ORGANIZATION UNIT: 1951 TO 1958

[In millions of dollars. For years ending June 30. Expenditures reported on a checks-issued basis; prior to 1953, adjusted to the *Daily Treasury Statement* basis, which was partly checks issued and partly checks paid. "Budget" receipts, expenditures, and authorizations, as used in this and following tables, are mainly those of general and special accounts. Excluded from both receipts and expenditures are refunds of receipts and transfers from the general fund to trust funds. Budget expenditures also include net transactions (expenditures minus receipts) of wholly owned Government corporations and enterprises; omitted from both expenditures and receipts are transfers of capital between wholly owned Government corporations and the United States Treasury, and debt transactions of Government enterprises (expenditures from public debt authorizations are included). Figures in early years have not been revised to reflect recent changes in organizational structure]

### No. 458.—RECEIPTS FROM AND PAYMENTS TO THE PUBLIC BY THE FEDERAL GOVERNMENT: 1930 TO 1959

[In billions of dollars. For years ending June 30. Receipts from and payments to public exclude intragovernmental financial transactions but include operations of trust (including deposit) accounts and Government-sponsored enterprises as reflected on the books of the Treasurer of the United States as well as budget accounts of Federal Government. Net cash borrowing or repayment of borrowing from the public excludes borrowing by Treasury from Federal trust accounts and Government-sponsored enterprises, and also excludes certain types of public debt transactions like issuance and redemption of Armed Forces leave bonds. The public is defined to comprise individuals; banks (including Federal Reserve and Postal Savings System); private corporations; businesses; State, local, and foreign governments; and international organizations. For additional explanation, see 1959 Budget, pp. 879-882 and headnote to table 457]

YEAR	Receipts from the public <sup>1</sup>	Payments to the public	Excess of receipts from (+) or payments to (-) the public	Receipts from exercise of monetary authority <sup>2</sup>	Decrease (+) or increase (-) in Government cash balances <sup>3</sup>	Decrease (+) or increase (-) in Exchange Stabilization Fund balance	Net cash borrowing(-) or repayment of borrowing (+) from the public

1959 estimate.....	87.3	86.7	+ .6	.1	-----	-----	+ .7

<sup>1</sup> Receipts are net of refunds.

<sup>2</sup> Consists of the increment resulting from reduction in weight of the gold dollar and the seigniorage on silver.

<sup>3</sup> Consists of change in Treasurer's balance through 1953. For years after 1953, also includes change in cash balances held outside the Treasury. Coverage of accounts outside the Treasury is not necessarily complete in 1954 and 1955 as accounting and reporting systems were in process of revision.

<sup>4</sup> Less than \$50 million.

On uninvested funds.....	6	5	5	5	5	6	6	6
<b>Allowance for contingencies</b> .....								209
Adjustment to daily Treasury statement basis.....	-705	-857						
<b>Memorandum:</b>								
Capital transfers from revolving funds to general fund.....	208	208	205	364	695	301	225	132
Investments of revolving funds in United States securities.....	104	101	79	477	126	101	36	127

<sup>1</sup> Includes taxes not otherwise classified.<sup>2</sup> Net of receipts of public enterprise funds. Excludes payments to railroad retirement trust account other than military service credits, formerly included in labor and welfare.<sup>3</sup> Expenditures for Army defense include some expenditures for support of the Air Force financed from 1949 and prior year appropriations.<sup>4</sup> Deduct; excess of repayments and collections over expenditures.Source: Executive Office of the President, Bureau of the Budget; *Budget of the United States Government*, Special Analysis K.

## No. 461.—COMMERCIAL-INDUSTRIAL ACTIVITIES OF THE FEDERAL GOVERNMENT: 1954-55

[Assets in millions of dollars. Represents an inventory of executive agencies of those activities which provided a service or product for the Government's use during fiscal years 1954 or 1955 (determined by availability of data); some activities have been curtailed or terminated since their listing. Covers continental U. S., Alaska, and Hawaii. Excludes those activities with capital assets of less than \$5,000 and production valued at less than \$25,000 a year. Also excludes those activities normally considered a part of management of a private enterprise (personnel work, bookkeeping, accounting) and certain public services and utilities. Dept. of Defense comprises only manufacturing activities of the military functions. Employees are those engaged directly in the activity]

GOVERNMENT FACILITIES	Installations	Capital assets <sup>1</sup>	Government employees
<b>Total</b> .....	19,771	11,864	266,521

## INTERNAL REVENUE COLLECTIONS

373

No. 466.—INTERNAL REVENUE COLLECTIONS, BY STATES AND OTHER AREAS:  
1955 to 1957

[In millions of dollars. For years ending June 30. See headnote, table 464. Tax receipts are credited to States in which collections made. Receipts in the various States do not indicate the tax burden of the respective States, since burden may eventually be borne by persons in other States]

<b>Transferred to Gov't of Guam <sup>6</sup></b> .....			-4			-3			( <sup>5</sup> )

<sup>1</sup> Includes miscellaneous taxes in following amounts (in millions): 1955, \$10,154; 1956, \$11,181; 1957, \$12,031.

<sup>2</sup> Includes taxes withheld on salaries and wages. <sup>3</sup> Includes tax on business income of exempt organizations.

<sup>4</sup> Includes collections for D. C.; separate data not available. <sup>5</sup> Under \$500,000.

<sup>6</sup> Effective Jan. 2, 1957, revised accounting procedures provide for the central reporting, by the Treasury Bureau of Accounts, of amounts of depository receipts issued in national totals only. These amounts included in total tax collections but not in State distribution.

<sup>7</sup> Beginning 1957, collections adjusted to exclude amounts originally deposited in the U. S. Treasury and subsequently transferred to the Government of Guam, in accordance with Public Law 630, approved Aug. 1, 1950.

<sup>1</sup> Actual tax liability on selected net incomes and necessary assumptions.

<sup>2</sup> Provisions of 1926 Act were retroactive to 1925.

<sup>3</sup> Normal tax rates of 1928 Act were reduced for 1929 only by Joint Resolution of Congress, No. 133, approved in Dec. 1929.

<sup>4</sup> Rates and exemptions for 1936 and 1938 Acts were identical and resulted in the same tax liabilities.

<sup>5</sup> Includes defense tax.

<sup>6</sup> Tax liabilities for 1942 and 1943 unadjusted for transition to current payment basis.

<sup>7</sup> Includes net Victory tax. Computed by assuming that deductions are 10 percent of Victory tax net income; i. e., that Victory tax net income is ten-ninths of selected net income.

<sup>8</sup> Individual Income Tax Act of 1944.

<sup>9</sup> Taking into account maximum effective rate limitation of 77 percent.

<sup>10</sup> Excludes self-employment tax.

<sup>11</sup> Internal Revenue Code of 1954.

<sup>12</sup> Split income basis.

<sup>13</sup> Tax liability divided by stated net income.

Source: Treasury Department.

### No. 468.—INDIVIDUAL INCOME AND FIDUCIARY INCOME TAX RETURNS WITH INCOME— SUMMARY: 1925 TO 1955

[Includes data from income tax returns of citizens and resident aliens, based on a sample of returns as filed, un-audited except to insure proper execution. See also *Historical Statistics, 1789-1945*, series P 144-147]

ITEM	1925	1930	1935	1940	1945	1950	1954	1955
Number of individual returns, total <sup>1</sup>								
Taxable.....1,000.....	4,171	3,708	4,575	14,665	49,751	52,656	56,307	57,818

<sup>1</sup> Exemption allowed for income tax purposes; includes the per capita exemption of \$600 for the taxpayer, his spouse on a joint return, and each dependent, together with additional exemptions for taxpayer, and his spouse on a joint return, of \$600 if blind and \$600 for age 65 or over.

<sup>2</sup> This is the income tax base for all taxable returns whether or not reported on the return.

<sup>3</sup> Income tax as percent of taxable income.

## No. 476.—CORPORATION INCOME TAX RETURNS—SUMMARY: 1935 TO 1955

[Money figures in millions of dollars. Includes data for Alaska, District of Columbia, and Hawaii; based on returns as filed, prior to audit adjustments or other changes made after the returns were filed, as the result of carry-backs, relief granted under section 722 of the 1939 Internal Revenue Code, recomputation of amortization of emergency facilities, or renegotiation of war contracts. All corporations are required to file returns except those specifically exempt, such as mutual, fraternal, civic, and charitable organizations not operating for profit. Returns of inactive corporations are excluded from these tabulations, except as noted. In comparing data over a period of years, changes in law must be taken into consideration, especially discontinuance for 1934-41 of privilege of filing consolidated returns (except by railroad corporations and their related holding or leasing companies and, in 1940-41, by Pan American trade corporations) and the restoration of this privilege in 1942. See source publications for effect of changes on statistical items. Beginning 1951, data are based on a probability sample. For other corporation data based on income tax returns, see pp. 491, 492, and 496. See also *Historical Statistics, 1789-1945*, Series P 152-164]

Excess profits net income.....	-----	2, 998	14, 165	25, 654	16, 437	-----	-----
Adjusted excess profits net income.....	-----	912	8, 368	8, 985	5, 835	-----	-----

<sup>1</sup> Total compiled receipts consist of gross sales (less returns and allowances), gross receipts from operations (where inventories are not an income-determining factor), all interest received on Government obligations (less amortizable bond premium), other interest, rents, royalties, excess of net short-term capital gain over net long-term capital loss, excess of net long-term capital gain over net short-term capital loss, net gain from sale or exchange of property other than capital assets, dividends, and other taxable income. Total compiled receipts exclude nontaxable income other than tax-exempt interest received on certain Government obligations.

<sup>2</sup> Net income (or deficit) for 1935, represents taxable income less allowable deductions; beginning 1940, amount shown is before deduction due to net operating loss of prior years. (For amounts of such deductions, see table 612, p. 492). Beginning 1940, dividends received on stock of domestic corporations are included in taxable income. For 1940 and later years, contributions or gifts are deductible in arriving at net income and are limited to 5 percent of net income before deduction.

<sup>3</sup> Includes defense tax.

<sup>4</sup> For tax reported, see above.

<sup>1</sup> A corporation is classified industrially according to the business reported on the return. When diversified activities are reported, the classification is determined by the industry which accounts for the largest percentage of total receipts.

<sup>2</sup> For changes in classification affecting comparability of data, see *Statistics of Income*, Part 2, for 1938 and 1948.

<sup>3</sup> Includes lessors of real property. <sup>4</sup> Less than \$500,000.

<sup>1</sup> A return is required of every citizen or resident who during the calendar year made gifts (or who is considered as having made gifts) to any one donee of more than \$3,000 in value or made gifts of future interests in property regardless of value. A nonresident alien is required to file a return if gifts consist of property situated in the U. S.

<sup>2</sup> By consent of both spouses who are citizens or residents, gifts of husband or wife to third party may be considered as made one-half by each.

<sup>3</sup> Exclusions are the first \$3,000 of gifts (other than gifts of future interests) made to any one donee during calendar year. In case of consent to divide gifts between husband and wife, each spouse is allowed an exclusion against his half of the gift to a common donee.

<sup>4</sup> Deduction allowed citizens or residents for gifts made to the donor's spouse.

<sup>5</sup> The specific exemption of \$30,000 less the sum of amounts allowed in prior years may be taken in one year or spread over a period of years, at option of donor. A nonresident alien donor is not entitled to this exemption.

## No. 480.—FEDERAL ESTATE TAX RETURNS—SUMMARY: 1949 TO 1955

[An estate tax return is required to be filed (1) for estate of every citizen and resident alien who died (a) in period Aug. 31, 1935, through Oct. 21, 1942, the value of whose gross estate exceeds \$40,000; and (b) on or after Oct. 22, 1942, value of whose gross estate exceeds \$60,000; and (2) for estate of every nonresident alien who died (a) prior to Oct. 22, 1942, any part of whose estate is situated in U. S., at date of death; and (b) on or after Oct. 22, 1942, only if gross estate situated in U. S., at date of death exceeds \$2,000. The estate of an individual who died in the period June 6, 1932, through Aug. 16, 1954, is subject to 2 Federal estate taxes—basic and additional. Basic tax is computed at rates provided by Revenue Act of 1926, which rates are embodied in Int. Rev. Code of 1939 as basic estate tax. Additional tax is excess of tentative tax computed at rates provided by act in force at date of death, over basic tax. Under the 1954 Code, basic and additional rates were combined into a single tax rate schedule, applying to taxable estate.]

FILING PERIOD <sup>1</sup>	RETURNS FILED		GROSS ESTATE (\$1,000)		NET TAXABLE ESTATE <sup>4</sup> (\$1,000)		TAX <sup>4</sup> (\$1,000)

<sup>1</sup> No data compiled for 1946, 1952, 1953, or 1956.

<sup>2</sup> Excludes returns for estates of nonresident citizens who died prior to May 11, 1934.

<sup>3</sup> Includes returns for estates of nonresident citizens who died prior to May 11, 1934.

<sup>4</sup> Net taxable estate is net estate for additional tax and regular net estate for returns filed under the 1926 and prior acts. Tax shown is total net estate tax liability—the sum of net basic tax and net additional tax—and includes defense tax (10 percent of net tax) effective only for estates of individuals who died in period June 26, 1940, through Sept. 20, 1941.

<sup>1</sup> Classes are based on the sum of net estate and specific exemption (see note 4), net estate and exemption for additional tax being used if the estate was subject to both basic and additional taxes (1932 act until the 1954 Code).

<sup>2</sup> Allowed estates filed under acts prior to the 1950 act.

<sup>3</sup> Allowed estates subject to the 1948 and later acts.

<sup>4</sup> Specific exemption is \$60,000 under the 1954 Code; and \$60,000 for additional tax under the 1948, and 1942 acts, \$40,000 under the 1941, 1940, and 1935 acts. (No returns filed under earlier acts.)

<sup>5</sup> Allowed estates subject to acts prior to the 1954 Code.

<sup>6</sup> Disallowed amount of funeral and administrative expenses, debts, mortgages and liens, and support of dependents in excess of property subject to claims includable in gross estate, on estates filed under the 1942 and later acts.

<sup>7</sup> Excess of gross estate over allowable deductions exclusive of specific exemption.

<sup>8</sup> Net estate after the exemption of \$100,000 allowed for basic tax, prior to the 1954 Code.

<sup>9</sup> Includes taxable estate for returns filed under the 1954 Code.

<sup>10</sup> Includes gross tax for estates taxed under the 1954 Code.

<sup>11</sup> New tax credit for estates subject to the 1954 Code.

## Section 15

### State and Local Government Finances and Employment

Statistics relating to State and local governments, their numbers, finances, and employment, are compiled on a nationwide basis primarily by the Bureau of the Census.

This Bureau issues annually a *Summary of Governmental Finances* which includes figures for the Federal Government as well as State and local governments. It also issues annual series on State finances, city finances, and public employment. In addition, the Bureau of the Census occasionally issues special reports, such as *Historical Statistics on State and Local Government Finances, 1902-1953*. A descriptive leaflet, *Bureau of the Census Publications on Governments*, is issued annually.

Basic information for Census Bureau statistics on governments is obtained mainly by mail canvass from State and local officials; however, financial data for each of the 48 State governments and the 41 cities of over 250,000 are compiled from their official records and reports by Census Bureau personnel, and classified into uniform categories for statistical reporting. The figures are obtained by a periodic Census of Governments that covers all public units, and by annual surveys covering all 48 State governments but only a sample of local governments.

Statistics regarding particular functions in which State and local governments have an important role are presented in other sections (for example, the sections on Education, Roads and Motor Vehicles, and Social Insurance and Welfare Services).

**Governmental units.**—The governmental structure of the United States includes, in addition to the Federal Government and the 48 States, a total of more than 100,000 distinct units of local government, created or authorized by the States. About half of these are local school districts, but there are large numbers also of county and township governments, municipalities, and numerous kinds of "special districts." The figures for governmental units shown in table 498 include all agencies or bodies having an organized existence, governmental character, and substantial autonomy. While most of these governments can impose taxes, many of the special districts—such as independent public housing authorities, the New York Port Authority, and numerous local irrigation, power, and other types of districts—lack this power but are financed from rentals, charges for services, benefit assessments, grants from other governments, and other nontax sources. The count of governments excludes semiautonomous agencies through which States, cities, and counties sometimes provide for certain functions—for example, "dependent" school systems, State institutions of higher education, and certain other "authorities" and special agencies which are under the administrative or fiscal control of an established governmental unit.

**Finances.**—Unless otherwise stated, financial data in this section relate to the fiscal years of the respective governments. Federal and State government figures are for fiscal years ending on June 30, except for a few States with other closing dates within the calendar year named. Local government figures are for fiscal years ending in the calendar year specified, except for a few units which close their fiscal years in the succeeding January. Most school districts have fiscal years ending on June 30, but a majority of other local governments operate on a fiscal year ending December 31.

Nationwide government finance statistics must be classified and presented in terms of uniform concepts and categories, rather than according to the highly diverse terminology, organization, and fund structure of individual governments. Accordingly,

---

Note.—This section presents data for the most recent year or period available on April 17, 1958, when the material was organized and sent to the printer. In some instances more recent data were added later.

financial statistics which appear here for individual States and large cities, although based upon the official records and reports of these governments, will not agree directly with figures appearing in such original sources except where particular segments of the official accounts conform explicitly to standard reporting categories.

The framework for these statistics on governmental finances makes a basic distinction between general government, utilities and liquor stores, and insurance trust activities. These are distinguished as to revenue according to the nature of the source involved, as to expenditure according to the purpose of the spending, and as to debt and related borrowing and debt redemption according to the purpose (general government or utility) for which the debt was incurred.

The general government sector comprises all activities other than those classified as utility or insurance trust in nature. The utility sector includes only water supply, electric light and power, gas supply, and transit systems operated by local governments, and liquor stores operated by 16 States and by a few local governments. Other kinds of semicommercial activities carried on by some governments are included in the general government category. Insurance trust figures relate to employee retirement, unemployment compensation, and other social insurance systems administered by State and local governments.

Revenue and expenditure reported for each of these sectors and in total, in the basic framework of these statistics, represent only external transactions, and exclude transfers among agencies and funds of the government concerned. Certain internal transactions are shown separately, however, in related tables.

Some of these classification aspects of financial data represent a change from 1950 and earlier years. Therefore, financial data appearing in this section cannot in all respects be directly related to government finance series included in the volume, *Historical Statistics of the United States, 1789-1945*, referred to below.

**Employment and payrolls.**—Public employment and payrolls data are primarily from Census Bureau reports based on mail canvassing of State and local governments. Payroll amounts include all salaries, wages, and individual fee payments for the month specified, and employment numbers relate to all persons on governmental payrolls during a pay period of the month covered—including paid officials, temporary help, and (except where otherwise specified) part-time as well as full-time personnel. As in the case of financial data, figures shown for individual governments, such as States, cover major dependent agencies such as institutions of higher education, as well as the ordinary central departments and agencies of the government.

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, 1789-1945*, series P 189-190") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*, and its *Continuation to 1952*. See preface.

# NO. 498.—GOVERNMENTAL UNITS, BY TYPE OF GOVERNMENT, BY STATES AND OTHER AREAS: 1957

[Limited to governments actually in existence. Excludes, therefore, a few counties and numerous townships and "incorporated places" which exist as areas for which statistics can be presented as to population and other subjects, but which lack any separate organized county, township, or municipal government]

<sup>1</sup> Includes value of property not subject to classification by type, a relatively insignificant portion for most States, but more than 2 percent for Arkansas (3.3%), Illinois (2.2%), Kentucky (2.5%), Maine (5.1%), North Carolina (4.9%), Pennsylvania (2.2%), Rhode Island (2.1%), and Texas (33.4%), mainly comprising separately assessed mineral rights).

<sup>2</sup> Includes property not subject to classification by type, mainly, separately assessed mineral rights.

<sup>3</sup> Distribution based on State-equalized values.

<sup>4</sup> Distribution based on "taxable values" rather than on other types of valuations also locally recorded.

## Section 16

# Banking and Finance

### MONEY AND BANKING

**Banking and monetary system.**—Banks in this country are organized under the laws of both the States and the Federal government. "National" banks organized under Federal law, passed in 1863, are supervised by the Comptroller of the Currency, and State-chartered banks are supervised by officials of the respective States. The Federal Reserve System was established in 1914 to exercise central banking functions, some of which are shared with the United States Treasury. The Reserve System includes national banks and such State banks as voluntarily join the System. The Federal Deposit Insurance Corporation, established in 1934, insures each deposit account up to \$10,000 in banks which are members of the Federal Reserve System and in such nonmember banks as join the insurance fund.

**Condition of banks.**—The Comptroller of the Currency, who has charge of the supervision of national banks, has collected condition reports since 1863 from these banks and since 1897 has tabulated and published summaries of their reports in detail in the *Abstract of Reports of National Banks* (now usually four times a year). The call report data are also summarized in the annual reports of the Comptroller.

After the Federal Reserve System was established in 1914, State bank members of the Federal Reserve System began to submit their statements of condition at the same time and in substantially the same form as national banks. These are consolidated by the Board of Governors of the Federal Reserve System with data for national banks collected by the Comptroller of the Currency into totals for all member banks of the Federal Reserve System, and published in the *Member Bank Call Report* (usually four times a year) and in summary form in the *Federal Reserve Bulletin*.

Beginning with 1947, an all-bank series has been tabulated twice a year by the Federal Deposit Insurance Corporation. Data for noninsured banks are obtained largely through the cooperation of State banking officials. A monthly series, based in part on the all-bank series, is prepared and published by the Board of Governors of the Federal Reserve System.

**Currency.**—Currency, including coin and paper money, represents a relatively small part of the total media of exchange in the United States, as most money payments are made by check. All currency is now issued by the Federal Reserve Banks and the Treasury.

"Currency in circulation" or "money in circulation" (official *Treasury Circulation Statement*) refers to all coin and paper money outside the Treasury and Federal Reserve Banks, with the exception of gold and silver coin known to have been exported and, beginning with 1934, all gold coin. It includes all coin and paper money held by the public in the United States whether in current active use or held idle—also some currency which, strictly speaking, is not a part of the money supply in the hands of the public, that is, cash in vaults of commercial and savings banks, currency lost or destroyed, and currency carried abroad by travelers. The Federal Reserve Board derives a monthly figure for "currency outside banks" by subtracting from the Treasury "circulation" figure an amount representing vault cash held by commercial and mutual savings banks, and this figure more nearly approximates true

Note.—This section presents data for the most recent year or period available on April 17, 1958, when the material was organized and sent to the printer. In some instances, more recent data were added later.

circulation. Historical data on the stock of money and money in circulation may be found in the *Annual Report of the Secretary of the Treasury*.

**Government credit agencies.**—Government corporations and credit agencies, operating under mandates and powers given them by the Congress, make available credit of specified types or to specified groups of private borrowers, either by lending directly or by insuring or guaranteeing loans made by private lending institutions. Some of these agencies were created to meet financial problems precipitated by the depression of the thirties; others are geared to meeting certain broad social problems, particularly in the form of foreign aid and aid to housing.

Foreign loans of Government credit agencies include those of the Export-Import Bank, the Treasury Department, and the International Cooperation Administration. Credit for agricultural purposes is provided by the Rural Electrification Administration; the Commodity Credit Corporation, which makes price support loans on certain farm products; the Farmers Home Administration; and banks and cooperative credit agencies operating under the supervision of the Farm Credit Administration. (See table 552.) Loans for housing purposes represent largely purchases of insured or guaranteed home mortgages by the Federal National Mortgage Association from private lenders, but also include loans of the Federal Home Loan Banks to member institutions, loans of the Public Housing Administration to local housing authorities to aid in the construction of low-cost housing, and direct loans made by the Veterans Administration. Most of the loans guaranteed or insured by Federal credit agencies reflect activities of the Veterans Administration and the Federal Housing Administration.

Statistics on the assets and liabilities of Government credit agencies are published quarterly in the *Treasury Bulletin*. Statistics relating to the operations of Government credit agencies are also available in reports of the individual agencies.

**Private credit agencies other than banks.**—In addition to commercial banks, savings banks, and Government credit agencies, there are a considerable number of other types of credit agencies in the United States. The most important of these are savings and loan associations, insurance companies, finance companies dealing primarily in installment sales financing, credit unions, and personal loan companies. Statistics of savings and loan associations are collected by the Home Loan Bank Board. Statistics on loans, investments, cash, etc., of life insurance companies are collected and published principally by the Spectator Company, which also publishes data on other types of insurance. Federal credit unions are under the supervision of the Bureau of Federal Credit Unions of the Department of Health, Education, and Welfare. Consumer credit data are published currently in the *Federal Reserve Bulletin*.

#### SECURITIES MARKETS

**New issues and retirement of securities.**—Statistical information on new security issues has been provided for many years by the *Journal of Commerce* (since 1906) and the *Commercial and Financial Chronicle* (since 1919).<sup>1</sup> (See table 585.) The statistics of the *Commercial and Financial Chronicle* include, in addition to domestic and foreign corporate issues and State and local government securities, the issues of independent agencies of the United States Government, and of foreign governments and their subdivisions.

A more comprehensive series of new issues with detailed information on the intended uses of net and gross proceeds has been compiled by the Securities and Exchange Commission on a monthly basis since 1934. The data cover substantially all new issues offered for cash sale in the United States in amounts over \$100,000 and with terms to maturity of more than one year. (See tables 583 and 586.) This series is published monthly in the *Statistical Bulletin* of the Securities and Exchange Commission, the *Federal Reserve Bulletin*, and the *Survey of Current Business*.

In addition, the Commission has been compiling statistics since 1933 on changes in security holdings of institutional groups and individuals, and net change in outstanding corporate securities through cash transactions. The latter data are published in the Commission's *Statistical Bulletin* and also in the *Federal Reserve Bulletin*. The Commission also publishes data from time to time on cost of flotation of securities registered under the Securities Act of 1933 and privately placed issues.

**Trading in securities.**—(See tables 575, 577, 578.) Monthly figures on the total value and volume of securities sold on each of the national securities exchanges have been published since October 1934 by the Securities and Exchange Commission. These figures include all sales effected on exchanges except, since March 1944, United States Government issues. They cover odd lots as well as round lots. The Commission also publishes figures on the total daily round-lot volume of trading in stocks on the New York Stock Exchange and the American Stock Exchange, showing short sales and several categories of member and nonmember purchases and sales. Daily odd-lot purchases and sales are reported separately.

Prior to 1934, the only available statistical data on the volume of trading in securities were the daily figures on the number of shares and the principal amount of bonds reported sold on the New York Stock Exchange and on most of the other securities exchanges. "Reported" volume of stock sales on the New York Stock Exchange represents sales in round lots reported on the ticker and does not include certain types of round-lot transactions such as stopped sales, private sales, split openings, cross transactions, and errors of omission, which ordinarily approximate from five to ten percent of total round-lot sales on the Exchange.

**Security price averages.**—Among the most widely known indexes of security prices are the Dow-Jones averages, which provide a continuous series of common stock prices on a daily basis since 1897. This series is now based on 65 common stocks divided into 30 industrial, 20 railroad, and 15 public utility stocks. Indexes of the Standard and Poor's Corporation, available since 1918, are now based on daily closing prices of 500 stocks. (See table 580.) The Securities and Exchange Commission compiles an index of weekly closing prices of 265 stocks listed on the New York Stock Exchange, comprising 37 industry groups. These indexes are published in the Commission's *Statistical Bulletin*, the Council of Economic Advisers' *Economic Indicators*, and the *Federal Reserve Bulletin*.

#### INSURANCE

**Insurance statistics.**—There are a number of sources for statistics on insurance of various classes—life, health, fire, marine, and casualty. Individual States collect statistics on insurers operating within their respective jurisdictions; organizations representing certain classes of insurers, or of insurance, collect statistics for those classes; insurance publishers also gather statistics for various classes of insurance. The regulation of insurance is in the hands of the various States, Territories, and the District of Columbia and these bodies collect a great deal of primary information on insurance. The Federal Government does not collect comprehensive statistics on insurance on a national basis. Basic theories and practice are parallel throughout insurance but application of theory and details of practice, including vocabulary, differ enormously by class of insurance and by class of insurer. Sound combination or comparison of figures is often difficult or impossible.

**Types of insurance.**—Insurance is traditionally classified as life, fire and marine, and casualty. With some overlapping between classes, an insurer is authorized to write insurance falling into one of these three classes, though the States now permit insurers, other than life, to write all kinds of insurance except life. *Life insurance* and *marine insurance* are each fairly homogeneous, the one having to do with life contingencies, and the other with losses connected with transportation. *Fire insurance*, as

such, offers protection against loss by fire, but insurers in that business write several allied classes of insurance, principally against loss by windstorm, by damage to motor vehicles, by damage to aircraft, by sprinkler leakage, by earthquake, and by riot. *Casualty insurance* is a miscellaneous class, the principal subclasses of which are liability insurance (protecting against loss due to claims for damages) and workmen's compensation insurance (protecting an employer against loss due to his obligations under a workmen's compensation law). (See section 10, Social Insurance and Welfare Services.)

**Types of insurer.**—The principal classes of insurer are stock companies and mutual companies or associations. Of less importance are fraternal insurers, reciprocal exchanges, Lloyds, State funds, and savings banks. *Stock companies* are corporations owned and controlled by stockholders, usually for the purpose of making profits. *Mutuals* are owned and controlled by insured members for the purpose of meeting their insurance needs at cost. *Fraternal insurers* emphasize social purposes as well as insurance; *reciprocal exchanges* are organizations of individual insureds operating through an attorney-in-fact; *Lloyds* are groups of individuals writing insurance in syndicates; *State funds* are insurers operated by individual States and are almost entirely devoted to writing workmen's compensation insurance; *savings banks* write life insurance in three States.

---

**Historical statistics.**—Tabular headnotes (as "See also *Historical Statistics, 1789-1945*, series N 172-178") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*, and its *Continuation to 1952*. See preface.

<sup>1</sup> Excludes gold and silver certificates and Treasury notes of 1890 outside Treasury. Beginning 1940, excludes amount (gold certificates) held for Federal Reserve Banks and agents. These items are excluded since gold and silver held as security against them are included.

<sup>2</sup> Both items include reserve against Treasury notes of 1890.

<sup>3</sup> 1940 to date, gold certificates. Amount excluded from total since gold held as security against gold certificates is included in column "In trust against gold and silver certificates."

Federal Reserve Bank notes.....	3	22	527	274	163	147	133
National bank notes.....	651	165	120	86	67	64	62

<sup>1</sup> Totals involve duplication to extent that United States notes and Federal Reserve notes, included in full, are in part secured by gold, also included in full. Gold certificates, silver certificates, and Treasury notes of 1890 excluded, since they are complete duplications of equal amounts of gold or silver held as security therefor and included in totals.

<sup>2</sup> By proclamation of the President dated Jan. 31, 1934, weight of gold dollar reduced from 25.8 to 15 $\frac{1}{4}$  grains of gold, 0.9 fine. Hence, value of gold based on \$35 per fine ounce beginning June 1934; theretofore, based on \$20.67 per fine ounce.

<sup>3</sup> Includes paper currency held outside continental United States.

<sup>4</sup> Gold Reserve Act of 1934, which was culmination of gold actions of 1933, vested in United States title to all gold coin and gold bullion. Gold coin was withdrawn from circulation and formed into bars. Gold coin (\$287,000,000) shown on Treasury records as being then outstanding was dropped from monthly circulation statement as of Jan. 31, 1934.

## No. 533.—DEMAND DEPOSIT ACCOUNTS—BANK DEBITS AND DEPOSIT TURNOVER: 1945 TO 1958

[Data partly estimated for 1945 to 1952 and comprise only debits or charges to demand deposit accounts of individuals, partnerships, and corporations, and of State and local governments, and payments from trust funds on deposit in the banking department. Excludes debits to U. S. Government deposit accounts, debits to time deposit accounts, and payments of certified and officers' checks, payments in settlement of clearing house balances, charges to expense and miscellaneous accounts, corrections, and similar charges, and debits to the accounts of banks, that is, to interbank accounts. For series including time deposits and U. S. Government accounts, see also *Historical Statistics, 1789-1945*, series N 76-85]

# No. 535.—ALL ACTIVE BANKS—PRINCIPAL ASSETS AND LIABILITIES, BY CLASS OF BANKS: 1900 TO 1956

[Money figures in millions of dollars. As of June 30 to 1940; Dec. 31, thereafter. Includes banks in Alaska, Hawaii, Puerto Rico, Philippine Islands (through 1940), and beginning with 1940, those in Virgin Islands, Canal Zone, Guam, and American Samoa. Figures for mutual savings banks include some stock savings banks for years prior to 1910 and also a few in several more recent years. Statistics for private banks cover only banks under State supervision and those voluntarily reporting. See also *Historical Statistics, 1789-1945*, series N 19-34, and N 43-48]

<sup>1</sup> Includes reserve balances and cash items in process of collection.<sup>2</sup> Includes capital notes and debentures and retirement account for preferred stock and capital notes, etc.<sup>3</sup> 2 branches of a national bank and 2 branches of a State member bank in New York. <sup>4</sup> Branch of a national bank in California. <sup>5</sup> Includes data for branches of a national bank and a State member bank in New York.Source: Treasury Department, Comptroller of the Currency; *Annual Report*.

**No. 537.—ALL BANKS—PRINCIPAL ASSETS AND LIABILITIES, AND NUMBER OF BANKS:  
1940 TO 1958**

[Money figures in millions of dollars. As of December 31. In general, data cover national banks, State commercial banks, trust companies, mutual and stock savings banks, and such private, Morris Plan, and industrial banks for which data are available. Data include one member bank in Alaska and one in Virgin Islands that became members on April 15, 1954, and May 31, 1957, respectively. For member bank data, see table 539; for figures on all active banks including those in Territories and possessions, see table 535]

<sup>1</sup> Demand deposits subject to reserve requirements, i. e., total demand deposits minus cash items in process of collection and demand balances due from domestic banks (also minus war loan and series B bond accounts during period Apr. 13, 1943-June 30, 1947, and all U. S. Government demand accounts Apr. 24, 1917-Aug. 22, 1935).

<sup>2</sup> Requirement became effective at country banks.

<sup>3</sup> Requirement became effective at central reserve and reserve city banks.

<sup>1</sup> Assets are shown on a net basis, i. e., after reserve for losses. Figures for trust revolving funds include inter-agency items. <sup>2</sup> Comprises cash, inventories, and all other assets.

<sup>3</sup> Comprises bonds, notes, and debentures payable, privately owned interest (some agencies classified as deposit funds or trust revolving funds have such interest), and other liabilities. Figures for trust revolving funds include interagency items.

<sup>4</sup> Includes investment of the Agricultural Marketing Act revolving fund in the banks for cooperatives; Treasury compilations prior to 1956 classified this item as an interagency asset. <sup>5</sup> Less than \$500,000.

<sup>6</sup> Includes \$1,000 million due under the agreement with Germany signed Feb. 27, 1953, and lend-lease and surplus property balances due the United States in the principal amount of \$2,048 million.

## No. 560.—FEDERAL HOME LOAN BANK SYSTEM—MEMBER INSTITUTIONS: 1945 TO 1957

[Money figures in thousands of dollars. Federal Home Loan Bank System is composed of savings and loan associations, savings banks, and insurance companies engaged in home financing. Federal Home Loan Banks provide a permanent reserve credit system for member institutions. The Banks are privately owned by their members and are entirely self-sustaining. Federal Home Loan Bank Board supervises the operations of the 11 Federal Home Loan Banks, and of the Federal Savings and Loan Insurance Corporation, and charters and regulates Federal savings and loan associations. Includes Alaska, Guam, Hawaii, and Puerto Rico.]

## No. 571.—MONEY MARKET RATES: 1920 TO 1957

[Percent per annum. See also *Historical Statistics, 1789-1945*, series N 185-187, for data on prime commercial paper, stock exchange time loans, and call loan renewals]

YEARLY AVERAGE	Prime commercial paper, 4 to 6 months <sup>1</sup>	Finance company paper placed directly, 3 to 6 months <sup>2</sup>	Prime bankers' accept- ances, 90 days <sup>1</sup>	Stock exchange time loans, 90 days <sup>1</sup>	Stock exchange call loan renewals <sup>2</sup>	U. S. GOVERNMENT SECURITIES (TAXABLE)			
						3-month bills		9- to 12- month issues <sup>4</sup>	3- to 5- year issues <sup>5</sup>
						Market yield	Rate on new issues <sup>3</sup>		
1920.....	7.50	-----	6.06	8.06	7.74	-----	-----	-----	-----
1930.....	3.59	-----	2.48	3.26	2.94	-----	-----	-----	-----
1940.....	0.56	0.75	0.44	1.25	1.00	-----	0.014	-----	-----
1945.....	0.75	0.63	0.44	1.25	1.00	-----	0.375	0.81	1.18
1950.....	1.45	1.41	1.15	1.50	1.63	1.20	1.218	1.26	1.50
1951.....	2.16	1.87	1.60	2.15	2.17	1.52	1.552	1.73	1.08
1952.....	2.33	2.16	1.75	2.42	2.48	1.72	1.766	1.81	2.13
1953.....	2.32	2.33	1.87	2.85	3.06	1.90	1.931	2.07	2.56
1954.....	1.58	1.42	1.35	2.80	3.05	0.94	0.953	0.92	1.82
1955.....	2.18	1.97	1.71	3.01	3.20	1.73	1.753	1.89	2.50
1956.....	3.31	3.06	2.64	3.89	4.03	2.62	2.658	2.83	3.12
1957.....	3.81	3.55	3.45	4.35	4.50	3.23	3.267	3.53	3.62

<sup>1</sup> Beginning with January 1941, data are averages of daily prevailing rates. Prior to that time data are averages of weekly prevailing rates.

<sup>2</sup> Data are averages of daily prevailing rates.

<sup>3</sup> Tax-exempt bills prior to March 1941.

<sup>4</sup> Comprises certificates of indebtedness and selected note and bond issues.

<sup>5</sup> Comprises selected note and bond issues.

<sup>6</sup> Separate quotations for renewals and new loans were discontinued early in 1957; therefore, for "stock exchange call loans" only a going rate is quoted.
