Calvert L. Dedrick, *Coordinator, International Statistics*.

Frank R. Wilson, *Information Assistant to the Director*.

ACKNOWLEDGMENTS

The *Statistical Abstract of the United States* has been published annually for the past 73 years, and its present content and form are the result of the work of many persons during that period. Revisions are made each year to adapt it to meet current needs and uses, and to bring the various statistical series up to date.

The *Statistical Abstract* is prepared in the Office of Morris H. Hansen, Assistant Director for Statistical Standards. This issue was compiled by William Lerner under the supervision of Bruce L. Jenkinson and under the general direction of Morris B. Ullman, Chief, Statistical Reports Section. Elma D. Beynon is editorial supervisor.

The cooperation of many persons acting in either their official positions or as individuals, who contributed to the preparation of this volume, is gratefully acknowledged. The list of tables by source (pp. XII-XV), as well as the source note following each table, indicates the various government and private agencies cooperating in furnishing information, assisting in the selection and preparation of the material, or otherwise contributing to the preparation of the *Statistical Abstract*.

Bruce L. Jenkinson, Chief of the Statistical Abstract Unit, died on July 12. As Chief of the Abstract Unit since July 1946, Mr. Jenkinson had primary responsibility for the planning and preparation of the *Statistical Abstract* and its supplements. His devotion to the maintenance of standards difficult to achieve, and his insistence upon painstaking effort in regard to detail, accuracy, and clarity, improved markedly the quality of the issues with which he was associated and set a standard for future development.

SEPTEMBER 1952.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, *Statistical Abstract of the United States*: 1952. (Seventy-third edition.) Washington, D. C., 1952.

PREFACE

The *Statistical Abstract of the United States*, published annually since 1878, is the standard summary of statistics on the industrial, social, political, and economic organization of the United States. It includes a selection of data from most of the important statistical publications, both governmental and private. Of necessity, it is limited primarily to the presentation of data for the country as a whole, and, to a much lesser extent, to data for regions and individual States. Data for cities or other small geographic units are shown only in a small number of instances.

This book is designed to fulfill two functions: *First*, to serve as a convenient volume for statistical reference; and *second*, to serve as a guide to other statistical publications and sources. The source of each table presented is given at the foot of the table. The publications cited usually contain additional statistical detail relating to the subject matter shown, and a more complete discussion of relevant definitions and concepts than can be presented here. Also, they may supply data for smaller geographic units. Where contributing agencies are cited as sources, without mention of publications, more detailed information frequently is available from their unpublished tabulations and records.

1952 edition.—This edition is the seventy-third annual issue. The statistics shown are the latest which were available in the early part of the 1952 calendar year. The year, 1952, used to designate this edition represents both the year during which compilation occurred and the year of publication.

Each year several sections are subjected to intensive review. This review introduces new subject material of current interest and eliminates data that are less timely or appear in greater detail than seems warranted.

This issue initiates a section entitled "Comparative International Statistics." This new section will enable the user of the *Statistical Abstract* to compare the United States currently in a number of significant respects with other leading countries of the world. New sections of the *Abstract* are necessarily experimental as to content and form. Comments and reactions from users are especially helpful and most welcome in determining their development in future issues.

Special efforts have been made to include as much material as was available, at the time the various sections were sent to print, from the 1950 Censuses of Agriculture, Population, and Housing. Statistics of these censuses will be found in the appropriate sections.

Other changes of importance in this edition involve particularly section 28, Mining and Mineral Products; section 9, Military Services and Veterans' Affairs; section 21, Transportation, Air and Land; and section 30, Manufactures. The Mining and Mineral Products section has been substantially revised and rearranged with the cooperation of the Bureau of Mines. Much completely new material has been added, as well as significant new detail to old material. Also, this section has now been brought into line with the material appearing in *Historical Statistics of the United States, 1789-1945* (see p. IV).

The Military Services and Veterans' Affairs section provides eight new tables including those on Federal expenditures for the military and for veterans, casualties in principal wars, status of Selective Service registrants, and others. In the Transportation section, material on civil aeronautics has been considerably expanded and now includes figures on air carrier revenues and expenses, and civil airplane output, air carrier personnel, and employment in aircraft industries. In the Manufactures

section, new material includes a substantial selection from the *Annual Survey of Manufactures: 1949 and 1950*. This new material brings to date much of the material from the 1947 Census of Manufactures previously included in this section.

Other significant additions are the tables showing disposable personal income in current and constant prices and distribution of income since 1919 among upper and lower income groups; both of these tables appear in section 11, Income and Expenditures. New material is also included in other sections on purchasing power of the dollar; on hourly and weekly earnings in constant and current dollars; on national farm product, and farm labor productivity; on sales of home appliances; on international investments; and on a number of other subjects.

With respect to content other than tabular, efforts to expand the general notes preceding each section were continued. A new feature is the inclusion, on the first page of text in each section, of the date on which the material for the section as a whole was sent to print. This date serves as a reference point both for those statistics which are subject to revision by the issuing agencies and also to indicate the approximate date on which the section was organized from the latest material available. In addition, 3 new charts have been added, making a total of 31 maps and charts now presented.

Integration with historical supplement.—The comparison and mutual adjustment of statistics in the annual *Statistical Abstract* and in *Historical Statistics of the United States, 1789-1945*, has now been completed in all major aspects. In consequence, this annual volume now stresses even more greatly materials of current interest. The practice of cross-referencing tables in this book (in headnotes) to time series in the historical supplement has been continued.

The historical appendix (see appendix I, tables A and B) continues to bring to date the statistical time series shown to 1945 in *Historical Statistics*. In this appendix the user of the annual volume will find the earliest date to which each series is carried in the historical supplement. For the supplement user, the appendixes, in addition to bringing each series to date (where possible), also indicate the table in the present *Statistical Abstract* in which the same or related data may be found. Where figures for 1945 and earlier years are known to have been revised from those shown in the supplement, the revisions have been listed in appendix I, table B. No attempt has been made to list specific sources of data in appendix I because of the space problem. In general, the source agencies are the same as for the same series specified in the supplement or noted at the bottom of the current *Statistical Abstract* table.

A statement on more detailed use of the historical appendixes will be found in the headnotes on the first page of each appendix table.

Supplements to the Abstract.—The *Statistical Abstract*, as an annual one-volume publication, is of necessity limited in amount of detail shown. Businessmen, teachers, librarians, public officials, professional workers, and others often require data for individual cities, counties, metropolitan areas, and other small areas as well as for States. Economists, teachers, students, and others frequently need more historical information. To meet such requests for more detail, a series of supplements to the *Abstract* has been issued.

The most recent supplement, the *County and City Data Book, 1949*, issued in June, 1952, represents both a revision (bringing to date) and a consolidation of two earlier supplements, the *County Data Book*, issued 1947, and the *Cities Supplement*, issued 1944. The *County and City Data Book, 1949*, brings together 101 items of information for each State, each county, and each standard metropolitan area and 92 items for each of about 400 cities having 25,000 or more inhabitants in 1940. Broad subject fields covered include the 1948 Census of Business, 1947 Census of Manufactures, 1945 Census of Agriculture, 1948 vital statistics, 1949 bank deposits, 1948 city government employment and finances and other items of economic and social importance. This volume is on sale by the Superintendent of Documents, Washington 25, D. C.; for \$3.50.

Historical Statistics of the United States, 1789-1945, a historical supplement, was published in July 1949. This volume brings together 3,000 statistical series which extend back through time. Data are shown for each year back to 1789 or to the earliest data available for the series. In the preparation of this supplement the Bureau had the cooperation of a special committee of the Social Science Research Council set up to advise the Director of the Census on a source book of historical statistics and of the Committee on Research in Economic History under the auspices of the Social Science Research Council. This volume is on sale by the Superintendent of Documents, Washington 25, D. C., for \$2.50. The statistics in this supplement are brought to date each year in the appendix of the annual *Statistical Abstract*, beginning with the 1949 edition.

Responsibility.—As implied in the title, the contents of this volume are taken from a large number of sources, as indicated in the list of agencies furnishing material. (See pages XII-XV.) The Bureau of the Census cannot accept the responsibility for the accuracy or limitations of the data presented here, other than for those which it collects. However, the responsibility for selection of the material for the general user and for proper presentation rests with the Bureau, even though carried out with the cooperation of many technicians who have given unselfishly of their time and knowledge in order to assist the Bureau's staff in making the presentation as meaningful and useful as possible.

The cooperation of the users must also be acknowledged. Many persons have written offering suggestions for improving the presentation of the material. These letters have been most helpful and users are urged to continue to make their needs known. All suggestions will be carefully considered in planning future editions.

FOR ADDITIONAL INFORMATION ON DATA PRESENTED

write to the agency indicated in the source note to the table which covers the desired subject.

SUGGESTIONS AND COMMENTS

should be sent to
The Director
Bureau of the Census
Washington 25, D. C.

STATISTICAL ABSTRACT SUPPLEMENTS

County and City Data Book, 1949. A compact presentation of 101 items of statistical data for each county and standard metropolitan area in the United States and 92 items of statistical data for each of about 400 cities having 25,000 inhabitants or more in 1940. Washington, D. C., 1952. 500 pages. Represents both a revision and a consolidation of two earlier small-area supplements, the *County Data Book* issued in 1947, and the *Cities Supplement—Statistical Abstract of the United States* issued in 1944. Price \$3.50 (Buckram).

Historical Statistics of the United States, 1789-1945. A supplement to the *Statistical Abstract*, prepared with the cooperation of the Social Science Research Council. A compilation of about 3,000 statistical time series, largely annual, extending back through time to the earliest year for which figures are available. Includes definitions of terms and descriptive text. Specific source notes provide a basic guide to original published sources for further reference and additional data. Detailed alphabetical subject index. 363 pages. Issued 1949. Third printing. Price \$2.50 (Buckram).

Purchase orders should be addressed to the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C.

CONTENTS

Section	Page
TABLES BY SOURCE -----	XII
1. AREA AND POPULATION -----	1
Area—Number and geographic distribution of inhabitants—Annual and future estimates—Urban and rural population—Sex—Race—Age—Nativity and parentage—Mother tongue—Citizenship—Internal migration—Marital status—Households—Fertility—Population characteristics in the Territories and possessions—Religious bodies.	
2. VITAL STATISTICS, HEALTH, AND NUTRITION -----	57
Registration area—Births—Completeness of birth registration—Deaths—Life table values—Morbidity—Hospitals—Physicians and dentists—Medical and dental schools—Mental patients under institutional care—Marriage and divorce—Nutrition—Federal food-distribution programs.	
3. IMMIGRATION, EMIGRATION, AND NATURALIZATION -----	92
Immigration—Emigration—Immigration quotas—Movement and characteristics of aliens—Arrivals and departures, aliens and citizens—Displaced persons and war brides—Naturalization.	
4. EDUCATION -----	105
School attendance—Years of school completed—Illiteracy—Elementary and secondary schools—Institutions of higher education—Special schools—Vocational schools—Public libraries.	
5. LAW ENFORCEMENT AND FEDERAL COURTS -----	134
Crime rates—Arrests—Federal courts—Prisoners in State and Federal prisons—Prisoners executed.	
6. CLIMATE -----	148
Elevation of stations—Temperature—Precipitation—Snowfall—Sunshine—Wind velocity—Relative humidity—Degree days.	
7. PUBLIC LANDS AND NATIONAL PARK SYSTEM -----	162
Lands in Federal ownership—Public and Indian land—Land grants—National Park System—Visitors to National Parks—Lands under jurisdiction of Office of Indian Affairs.	
8. LABOR FORCE, EMPLOYMENT, AND EARNINGS -----	172
Employment status—Persons not in the labor force—Industry—Occupation—Farm employment and wage rates—Production workers—Average hours and earnings—Output per man-hour—Labor turnover—Industrial injuries—Labor-union membership—Work stoppages.	
9. MILITARY SERVICES AND VETERANS' AFFAIRS -----	198
Army—Air Force—Navy—Marine Corps—War casualties—Airplanes—Ships—Veterans' Administration, including Government insurance—Selective service registrants—Red Cross.	

Section	Page
10. SOCIAL SECURITY AND RELATED PROGRAMS	213
Public expenditures for social security and related purposes—Public assistance—Old-age and survivors insurance—Unemployment insurance—Placements by public employment offices—Railroad retirement—Railroad unemployment and sickness benefits—Workmen's compensation payments—Maternal and child health and welfare services—Vocational rehabilitation—Civil Service retirement.	
11. INCOME AND EXPENDITURES	249
The Nation's economic budget—Gross national product or expenditure—National income—Income payments to individuals—Distribution of families and individuals by income levels—Family income, expenditures, and saving.	
12. PRICES	271
Wholesale prices—Retail prices—Purchasing power of the dollar—Indexes of consumers' prices—Electric energy bills and gas bills of residential consumers—Unit values of commodities exported and imported.	
13. ELECTIONS	290
Electoral and popular vote for President—Votes for U. S. Senators and Representatives—Apportionment of congressional representation—Citizens of voting age—Congressional activity and party affiliations.	
14. FEDERAL GOVERNMENT FINANCES AND EMPLOYMENT	301
Receipts and expenditures—Appropriations—Internal revenue collections—Individual and corporation income tax returns—Public and private debt—Government securities—Assets and liabilities of Government corporations and credit agencies—Employment and pay rolls.	
15. STATE AND LOCAL GOVERNMENT FINANCES AND EMPLOYMENT	352
Governmental units—Aid from Federal Government—General revenues and general expenditures—Public-service enterprises—State tax collections—State unemployment-compensation funds—Debt—Employees and pay rolls—Finances of retirement systems.	
16. BANKING AND FINANCE	381
Currency and gold—Bank clearings—Banks; principal assets, liabilities and other information for all banks, Federal Reserve banks, National banks, mutual savings banks—Savings—Liquid assets—Savings and loan associations—Credit unions—Government credit agencies—Farm credit—Consumer credit—Commodity and stock exchanges—Money rates—Securities markets—Insurance.	
17. BUSINESS ENTERPRISE	439
Business population and turn-over—Corporate assets and liabilities—Corporation income, profits, dividends, and taxes—Sources and uses of corporate funds—Income of unincorporated enterprise—Business expenditures for new plant and equipment—Gross private domestic investment—Business sales and inventories—Industrial and commercial failures—Patents.	

Section	Page
18. COMMUNICATIONS	459
Telephone systems—Telegraph systems—Radio and television networks and broadcast stations—Newspapers, periodicals and books—Registration of copyrights—Postal service.	
19. POWER	476
Supply of energy—Electric energy; capacity of generating plants and production—Financial and operating statistics of electric utility companies—Rural electrification—Income account of natural gas companies—Gas utility industry—Water power.	
20. ROADS AND MOTOR VEHICLES	489
Rural roads—State highway systems—Federal highway projects—Public roads finances—Motor-vehicle production—Motor-vehicle travel—State motor-vehicle registrations and revenues—Motor fuel consumption—Motor-vehicle accident fatalities.	
21. TRANSPORTATION, AIR AND LAND	502
Steam railways: Mileage; equipment; employees; receiverships; capitalization, investment, income, dividends, revenue, expenses; freight and passenger service; accidents—Express companies—Pullman company—Motor carriers of property and passengers—Motorbus lines—Trolley-bus and street-car lines—Civil aeronautics—Airports.	
22. WATERWAYS, WATER TRAFFIC, AND SHIPPING	533
Water-borne commerce, foreign and domestic—Ocean ports—Great Lakes ports—Rivers, canals, and connecting channels—Merchant marine—Panama Canal traffic—Net tonnage of vessels entered and cleared in foreign trade.	
23. IRRIGATION, DRAINAGE, AND SOIL CONSERVATION	555
Irrigation enterprises—Irrigation of agricultural lands—Federal reclamation projects—Drainage on farms—Drainage enterprises—Soil conservation.	
24. AGRICULTURE—GENERAL STATISTICS	568
Balance sheet of agriculture—National farm product—Number and acreage of farms—Land utilization—Value of farm property—Value of farm products—Type of farm—Color and tenure of farm operators—Farm mortgage status and indebtedness—Indexes of farm prices—Farm income and expenditures—Farm labor—Commodity Credit Corporation inventories and acquisitions—Farm facilities, roads, etc.—Farmers' marketing and purchasing associations—Farms and farm property in Territories and possessions.	
25. AGRICULTURE—PRODUCTION AND RELATED SUBJECTS	606
Indexes of volume of farm production—Farm labor productivity—Agricultural products exported and imported—Acreage, production, and value of crops—Average prices of crops and livestock—Animal and vegetable fats and oils—Domestic animals and chickens on farms—Livestock or livestock production—Stockyard receipts and shipments—Meats, lard, and animal products—Oleomargarine—Cold storage holdings—Wool—Farm animals and farm crops in Territories and possessions.	

Section	Page
26. FORESTS AND FOREST PRODUCTS	660
Commercial forest land—Stand and growth of saw timber—Annual drain—National forests—Forest fires—Forest trees planted on farm lands—Lumber and lumber products.	
27. FISHERIES	677
Quantity and value of catch—Canned and frozen fishery products—Exports and imports of fishery products—Fish propagation.	
28. MINING AND MINERAL PRODUCTS	685
Mineral industries—Mineral products—Mineral reserves—Employment and injuries in mineral industries—Fuels—Work stoppages in coal mining—Nonmetals other than fuels—Ferrous and nonferrous metals.	
29. CONSTRUCTION AND HOUSING	722
Expenditures for private and public construction—Construction contracts—Construction and building costs—Public housing—Characteristics and occupants of dwelling units—Rents and values—Facilities and equipment—Persons per room—Nonfarm mortgaged properties.	
30. MANUFACTURES	744
Manufacturing establishments—Wage earners and production—Indexes of industrial production—Concentration of large companies—Fuels and electric energy consumed—Expenditures for plant and equipment—Inventories—Production and related information of selected products and groups of products—Sales and exports of home appliances—Printing and publishing—Motion-picture industry—Manufactures in Alaska, Hawaii, and Puerto Rico.	
31. FOREIGN COMMERCE (INCLUDING INTERNATIONAL ACCOUNTS AND AID)	825
International accounts—Foreign investments—Foreign assistance—Foreign trade—Merchandise, gold and silver—Trade balances—Trade by economic classes and commodity groups—Trade by country of destination and origin—Duties collected.	
32. COMMERCE OF TERRITORIES AND POSSESSIONS	871
Alaska—Puerto Rico—Hawaii—American Samoa—Virgin Islands—Guam.	
33. DISTRIBUTION AND SERVICES (INCLUDING ADVERTISING) ..	875
Wholesale trade—Retail trade—Chain stores and mail-order houses—Consumers' cooperatives—Department stores—Service establishments—Hotels—Places of amusement—Advertising.	
34. COMPARATIVE INTERNATIONAL STATISTICS	921
Population, area, and vital statistics—Manufacturing—Foreign trade and exchange rates—Farm products—Food supply—Mineral products—Electric energy—Geographical product by industrial origin—Transportation—Communications—Education and health—Member contributions to United Nations.

FIG. I.—MAP OF THE UNITED STATES, SHOWING CENSUS DIVISIONS

Source: Department of Commerce, Bureau of the Census.

1. Area and Population

(Sent to print February 15, 1952)

This section relates to the population of the United States, its distribution, and its characteristics. The principal source of these data is the Decennial Census of Population, a house-to-house enumeration made once every ten years beginning with 1790. The data shown here were selected chiefly from the Sixteenth and Seventeenth Censuses (1940 and 1950), and from special census releases and reports, with the object of giving as complete a description of the population of the United States as space permits. Whenever practicable, a historical series is given in order to show changes that have occurred over periods of time. Most of the data presented apply to continental United States, but some figures for Territories and possessions are included.

Related materials are presented in other sections of this volume. Thus, statistics of marriage and divorce are presented in section 2, Vital Statistics, Health, and Nutrition; statistics on family income are given in section 11, Income and Expenditures; and Census data on employment and occupations are given in section 8, Labor Force, Employment, and Earnings. Data on the population in institutions as enumerated in 1940 are given in this section, but additional data on persons in mental institutions are given in section 2 and on prisoners in section 5, Law Enforcement and Federal Courts. Tables on nativity and citizenship are included in this section, but related data are included in section 3, Immigration, Emigration, and Naturalization.

1950 census data.—Figures shown here based on the 1950 Census of Population are those available at the time this section was sent to the printer. Data based on advance tabulations are so noted; these figures may differ slightly in some cases from the final figures.

Where 1950 preliminary sample data are shown, the figures are based on a sample of approximately 150,000 persons for the nation as a whole. For a description of the sample and an evaluation of sampling variability see the original releases indicated in the source notes.

1940 population samples.—Certain tables are based on tabulations of samples of the 1940 population. Sample B is a sample of all individuals from the 1940 Population Schedule; Sample C and Sample W are samples of individual women 15 years old and over from the 1940 and 1910 Population Schedules, respectively; Sample D, a sample of households from the 1940 Population Schedule; and Sample F, a sample of households based for some subjects on 1940 Population Schedule entries, and for other subjects on 1940 Housing Schedule entries. For Sample B, the sample size is 5 percent. Samples C, D, and F are 5 percent in most areas, but they include 2½ percent samples in the most populous areas. Sample W is an 8-percent sample for the North and the South, and about 12 percent for the West.

Exact agreement is not to be expected among the various samples, nor between them and the complete count, but the sample data may be used with confidence when large numbers are involved, and may be assumed to indicate patterns and relationships where small numbers are involved. Specifically, any number of the size of a million or over may be assumed to agree with a complete count within 1½ percent, though most numbers of this size will agree within ¾ of 1 percent. Any number of the size of 100,000 may be assumed to agree with a complete count within 4 percent, though most numbers of this size will agree within 2 percent. Most numbers as small as 10,000 will agree within 10 percent. The sampling errors in subtotals formed by addition of classes are covered by the same statements. More detailed statements regarding the sampling errors are given in the original sources.

Current Population Survey.—For years since 1940, several of the tables present statistics that are based on the Current Population Survey, conducted monthly by the Bureau of the Census. This survey covers a representative sample of about 25,000 households taken in selected areas throughout the United States. A statement indicating the sampling reliability of estimates based on this sample is given in the Sampling Note, p. 174.

Population estimates.—Population estimates for dates after April 1940 which are not the result of sample surveys are based on data from the 1940 Census and, in some cases, the 1950 Census; statistics and estimates of births and deaths provided by the National Office of Vital Statistics, United States Public Health Service; statistics of immigration and emigration reported by the Immigration and Naturalization Service, Department of Justice; and statistics on the armed forces provided by the Department of Defense. Intercensal estimates of State population are based on the same types of data and in addition make use of school statistics, war ration book registrations, and State censuses.

Urban and rural areas.—In the course of its history, the Bureau of the Census has employed several definitions of urban territory.

According to the new urban definition adopted for the 1950 Census, the urban population comprises all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, boroughs, and villages, (b) incorporated towns of 2,500 inhabitants or more except in New England, New York, and Wisconsin, where "towns" are simply minor civil divisions of counties, (c) the densely settled urban fringe, including both incorporated and unincorporated areas, around cities of 50,000 or more, and (d) unincorporated places of 2,500 inhabitants or more outside any urban fringe. The remaining population is classified as rural.

According to the 1940 definition, the urban area was made up for the most part of cities and other incorporated places having 2,500 inhabitants or more. In addition, it included townships and other political subdivisions (not incorporated as municipalities nor containing any areas so incorporated) with a population of 10,000 or more and a population density of 1,000 or more per square mile; and in the States of Massachusetts, Rhode Island, and New Hampshire, those towns (townships) which contain a village of 2,500 or more, comprising either by itself or when combined with other villages within the same town, more than 50 percent of the total population of the town. The remaining area of the country was classified as rural. The definition of urban territory used in the 1940 Census was adopted substantially as stated above at the time of the 1910 Census.

In both the new definition of 1950 and the old definition of 1940, incorporated places of 2,500 or more inhabitants constitute the major component of urban territory. The new definition differs from the old definition in substituting specially delineated urban fringes and unincorporated places of 2,500 inhabitants or more for those political subdivisions which were specified as urban under the special rules given above.

In this edition, figures by urban and rural residence for all dates prior to the 1950 Census are in accordance with the old definition. Figures for 1950 are in accordance with the new definition unless otherwise stated. For dates between 1940 and 1950, figures by urban and rural residence reflect the classification of areas as urban and rural in 1940. Thus, the urban total for 1949 represents the population living in 1949 in areas which were classified as urban in 1940; it does not represent the total which would have been classified as urban had all areas been reclassified as urban or rural on the basis of their 1949 population.

The definition of urban territory used in the Current Population Survey for April 1951 was substantially the same as the 1950 Census definition, while that for March 1950 was similar to the 1950 Census definition with the main exception that unincorporated places of 2,500 or more inhabitants were classified as rural rather than urban.

Farm and nonfarm residence.—The rural population is subdivided into the rural-farm population, which comprises all rural residents living on farms, and the rural-nonfarm population, which comprises the remaining rural population. The method of determining farm and nonfarm residents used in the 1950 Census differs somewhat from that used in earlier surveys and censuses. Persons on "farms" who were paying cash rent for their house and yard only were classified as nonfarm; furthermore, persons in institutions, summer camps, motels, and tourist camps were classified as nonfarm. This definition was also used in the March 1950 survey.

Households.—A "household," according to present usage of the Census Bureau, comprises all persons who occupy a dwelling unit, that is, a house, an apartment or other group of rooms, or a room that constitutes "separate living quarters." A household includes the "related persons" (the head of the household and others in the dwelling unit who are related to the head) and also the lodgers, servants, or hired hands, if any, who regularly live in the house. The number of households, thus defined, is the same as the number of "private households" or "families" as used in 1940 census reports. A person living alone or a group of unrelated persons sharing the same living accommodations as partners is counted as a household.

The term "household," as used here, excludes the small number (about 80,000 in 1940) of institutions, hotels, large lodging houses, and other quasi households which are included as households in the census reports (and in figures shown in this edition) for 1920, 1910, 1890, and earlier years. The figures for 1900 and for 1930 and subsequent years, shown in this edition, are in conformance with the present usage of the term "household" as defined above.

Family.—The term "family," as used here, refers to a group of two or more persons related by blood, marriage, or adoption and residing together, and differs from the meaning of the term as used in the 1930 and 1940 censuses. A primary family consists of the head of a household and all (one or more) other persons in the household related to the head. A secondary family comprises two or more persons such as guests, lodgers or resident employees and their relatives, living in a household or quasi household (other than the negligible number of such groups among inmates of institutions) and related to each other. The two groups previously shown separately as "secondary family" and "family in a quasi household" are now combined in the category "secondary family." In a household, a secondary family is not related to the household head, but in a quasi household, a secondary family may include the head of the quasi household.

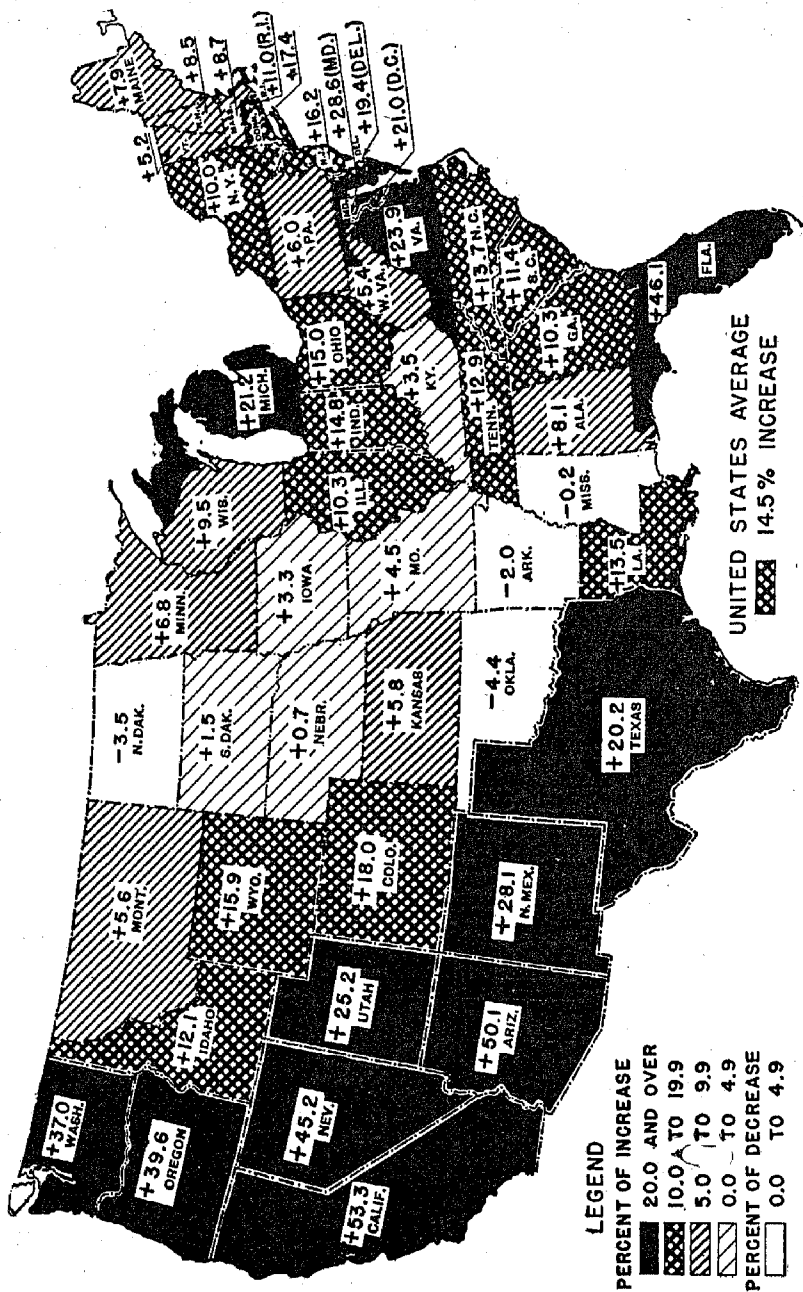

Subfamily.—A subfamily is a married couple with or without children, or one parent with one or more children under 18 years old, living in a household and related to, but not including, the head of the household or his wife. Members of a subfamily are also members of the primary family with which they live. The number of subfamilies, therefore, is not included in the number of families.

Married couple.—A married couple is a husband and his wife living together.

Unrelated individuals.—The term "unrelated individuals" as used here refers to persons (other than inmates of institutions) who are not living with any relatives. This term has the same meaning as the term "individuals not in families" used previously. A primary individual is a household head living alone or with persons all of whom are unrelated to him. A secondary individual is a person in a household or a quasi household such as a guest, lodger or a resident employee (excluding inmates of institutions) who is not related to the head or to any other person in the household or quasi household. This group now includes the categories "secondary individual" and "individual in a quasi household" used in earlier issues of the *Abstract*.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series B 24-25") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

FIG. II.—POPULATION CHANGE FOR STATES: 1940 TO 1950
[See table II]

Source: Department of Commerce, Bureau of the Census.

No. 1.—TERRITORIAL EXPANSION OF CONTINENTAL UNITED STATES AND ACQUISITIONS OF PRINCIPAL TERRITORIES, POSSESSIONS, ETC.

[Boundaries of all territories listed under "Continental United States" were indefinite, at least in part, at time of acquisition. Area figures shown here represent precise determinations of specific territories which have been marked upon maps, based upon interpretations of the several treaties of cession which are necessarily debatable. These determinations were made by a committee consisting of representatives of various governmental agencies in 1912. Adjustments have been made in the areas as remeasured in 1940. See also *Historical Statistics*, series B 24-25]

¹ Includes that part of drainage basin of Red River of the North, south of 49th parallel, sometimes considered part of Louisiana Purchase.

² Ceded by Spain in 1898, the Philippines constituted a territorial possession of the United States from 1898 to 1946. Granted independence as of July 4, 1946, they then became the Republic of the Philippines.

³ Under jurisdiction of United States in accordance with treaty of Nov. 18, 1903, with Republic of Panama.

⁴ Leased (1914) from Republic of Nicaragua for 99 years. ⁵ Under trusteeship. See table 3, footnote 17.

⁶ Includes following islands with gross areas as indicated: Midway (2), Wake (3), Canton and Enderbury (combined area, 27), Swan (1), Navassa (2), Baker, Howland, and Jarvis (combined area, 3), Johnston and Sand (combined area, less than 0.5), Kingman Reef, Quita Suena Bank, Roncador Cay, and Serrano Bank (each less than 0.5) and other islands specified in table 3, footnote 10, for which area figures are not available.

Families of armed forces personnel or of civilian citizen employees-----		107,350	(²³)	(²³)
Crews of merchant vessels-----		45,690	(²³)	(²³)

¹ Includes estimated population of the Philippine Islands (1940: 16,356,000; 1930: 13,513,000), not shown separately. Ceded by Spain in 1898, the Philippine Islands constituted a territorial possession of the United States from 1898 to 1946. Granted independence as of July 4, 1946, they then became the Republic of the Philippines.

² Excludes inhabitants (560) of Baker, Canton and Enderbury, Howland, Jarvis, Johnston and Sand, and Midway Islands which were enumerated with Hawaii in 1940.

³ Excludes inhabitants (36) of Midway Islands which were enumerated with Hawaii in 1930.

⁴ Census taken as of Oct. 1 of preceding year.

⁵ Not enumerated.

⁶ Enderbury Island uninhabited at time of enumeration.

⁷ Less than 0.5 square miles.

⁸ Sand Island uninhabited at time of enumeration.

⁹ Little Swan Island uninhabited at time of enumeration.

¹⁰ Includes Caroline, Christmas, Danger (Pukapuka), Flint, Funafofi, Kingman Reef, Malden, Manihiki, Navassa, Nukufetau, Nukunono, Nurakita, Penrhyn, Quita Suena Bank, Rakahanga, Roncador Cay, Serrana Bank, Starbuck, Vostok, Phoenix Group (except Canton and Enderbury), and Union (Tokelau) Group, not enumerated in decennial censuses; and Baker, Howland, and Jarvis Islands.

¹¹ Area figure is for Navassa (area, 2 square miles), and Baker, Howland, and Jarvis (combined area 3 square miles); excludes Kingman Reef, Quita Suena Bank, Roncador Cay, and Serrana Bank (each less than 0.5 square mile). Area of other islands (listed in footnote 10) not available.

¹² Not enumerated or uninhabited at time of enumeration.

¹³ Population of Baker, Howland, and Jarvis Islands. Other islands not enumerated or uninhabited at time of enumeration.

¹⁴ Under jurisdiction of United States in accordance with treaty of Nov. 18, 1903, with Republic of Panama.

¹⁵ Leased (1914) from the Republic of Nicaragua for 99 years.

¹⁶ Figures are those of the 1950 and 1940 censuses of the Republic of Nicaragua, May 1950 and 1940. Little Corn Island uninhabited at time of both enumerations.

¹⁷ Under trusteeship with the United States as administering authority. See *Trusteeship Agreement for the Former Japanese Mandated Islands (Documentary Supplement No. 1)* of the Security Council of the United Nations which became effective on July 18, 1947.

¹⁸ U. S. Department of the Navy. *Handbook on the Trust Territory of the Pacific Islands*. Washington, D. C., U. S. Government Printing Office, 1948.

¹⁹ U. S. Department of the Navy. *Report on the Administration of the Trust Territory of the Pacific Islands for the Period July 1, 1949 to June 30, 1950*. Washington, D. C., U. S. Government Printing Office, 1950.

²⁰ Population 1940, 131,258; 1930, 69,626 (Censuses of Japan).

²¹ Excludes United States citizens abroad on private business, travel, etc. Many of these were enumerated in the United States at their usual place of residence as absent members of households.

²² Based on 20 percent sample of reports received and consequently subject to sampling variability. Chances are about 2 out of 3 that the figure that would have been obtained from a complete count would have differed by less than 1,200 from figure shown here.

²³ Not available.

¹ Dry land and land temporarily or partially covered by water, such as marshland, swamps, and river flood plains; streams, sloughs, estuaries, and canals less than one-eighth of a statute mile in width; and lakes, reservoirs, and ponds less than 40 acres of area.

² Permanent inland water surface, such as lakes, reservoirs, and ponds having 40 acres or more of area; streams, sloughs, estuaries, and canals one-eighth of a statute mile or more in width; deeply indented embayments and sounds, and other coastal waters behind or sheltered by headlands or islands separated by less than 1 nautical mile of water; and islands having less than 40 acres of area. Does not include water surface of the oceans, bays, the Gulf of Mexico, the Great Lakes, Long Island Sound, Puget Sound, and the Straits of Juan de Fuca and Georgia, lying within the jurisdiction of the United States but not defined as inland water.

AREA AND POPULATION

No. 6.—POPULATION PER SQUARE MILE, BY STATES: 1800 TO 1950

[For United States, population of continental U. S. has been divided by total land area. For each State or Territory, population at given census has been divided by land area as then constituted. However, 1930 figures are based on revised land areas used for 1940. Areas of Indian reservations, outside Indian Territory, are included in areas of States and Territories for all years; however, populations of reservations were not ascertained and therefore were not taken into account in computing densities prior to 1890]

NO. 8.—ESTIMATED POPULATION OF CONTINENTAL UNITED STATES: JULY 1, 1900 TO 1951

[Figures include armed forces stationed in continental United States but exclude U.S. residents serving overseas in armed forces. Estimates for 1900 to 1909 are sums of State estimates based on local data indicative of population change. Estimates for 1910 to 1951 are based on decennial censuses and statistics of births, deaths, immigration, emigration, and armed forces. Figures for 1940 to 1951 represent provisional estimates which take account of 1950 Census]

No. 10.—PROVISIONAL ESTIMATES OF POPULATION BY STATES: JULY 1, 1941 TO 1950

[In thousands. Includes members of armed services stationed in continental United States, but excludes those overseas. Based on data from 1940 and 1950 Federal censuses, State censuses, school statistics, vital statistics, registrations for war ration books, immigration statistics, and data on armed forces. Subject to revision when additional intercensal data and more detailed data from the 1950 Population Census are available. For enumerated population, 1790 to 1950, see table 11]

³ See note 3, p. 12.⁴ See note 4, p. 12.⁵ Revised; unrounded figure is 38,558,371. Census of Southern States considered incomplete but there has been no revision of State figures, hence State figures do not add to total shown here.⁶ Includes 325,464, population of Indian Territory and Indian reservations, specially enumerated.⁷ Figure for 1860 for South Dakota represents entire Dakota Territory. Figures for 1870 and 1880 for North Dakota and South Dakota are for the parts of Dakota Territory which later constituted the respective States.¹⁰ Includes population of Indian Territory, as follows: 1890, 180,182; 1900, 392,000.

¹ Bethlehem and South Bethlehem boroughs consolidated as Bethlehem city between 1910 and 1920. Combined population, 1890, 19,823; 1900, 23,699; 1910, 32,810.

² Population prior to incorporation.

³ Estimated.

⁴ Population shown is for New York city as now constituted.

⁵ Omaha and South Omaha cities consolidated between 1910 and 1920. Combined population, 1890, 148,514; 1900, 128,556; 1910, 150,356.

⁶ Includes population of Allegheny, 1890, 105,287; 1900, 129,896.

⁷ Corrected figure; exclusive of population (2,048) of certain territory outside city limits.

⁸ Union and West Hoboken towns consolidated as Union City in 1925. Combined population, 1900, 38,281; 1910, 56,426; 1920, 60,725.

⁹ Population shown is for District of Columbia, with which the city has been considered coextensive since 1895.

Source: Department of Commerce, Bureau of Census; *U. S. Census of Population: 1950*, Vol. I.

**No. 15.—PROJECTIONS OF THE POPULATION, INCLUDING ARMED FORCES OVERSEAS,
By AGE AND SEX: JULY 1, 1955 AND 1960**

[In thousands. These projections are not based on any data from the 1950 Census of Population but on provisional estimates of population for July 1, 1949, and on assumptions concerning rates of births, deaths, and migration to 1960. For a complete statement of methods and assumptions used, see source. Italicized figures are based in whole or in part on projections of births and, hence, are likely to be less reliable than the remaining figures]

No. 17.—ESTIMATES OF THE FARM POPULATION: APRIL 1910 TO 1951

[In thousands. Figures represent revised estimates to accord with new definition of farm population adopted for the 1950 Census of Population and for current surveys of the Bureau of the Census and the Bureau of Agricultural Economics. New definition excludes from farm population certain groups formerly included. Most important of these groups is population living in houses located on farms, occupants of which pay cash rent for house and yard only without any farm land. Majority of such families have no connection with agriculture and receive no income from agriculture. See also *Historical Statistics*, series B 231]

No. 23.—MEDIAN AGE OF URBAN AND RURAL POPULATION, BY RACE AND SEX: 1930 AND 1940

[DEFINITION OF MEDIAN.—The median may be defined as that item which is in the middle of a series arranged according to size. Thus, the median age is that age which divides a population group into two equal parts, one half being older, and one half younger, than the median. For definition of urban and rural population, see p. 2. See also *Historical Statistics*, series B 72-80]

No. 33.—FOREIGN-BORN WHITE POPULATION, 1910 TO 1940, AND TOTAL FOREIGN BORN, 1900, BY COUNTRY OF BIRTH

[All classifications of 1940 population according to country of birth based on political boundaries of Jan. 1, 1938. Classification of population at earlier censuses based for most part on political boundaries of those years. For most countries of Europe, total foreign-born population given for 1900 is almost entirely white. See also *Historical Statistics*, series B 270-303]

¹ Less than one-tenth of 1 percent.

² Listed as Holland prior to 1910.

³ Persons reported in 1910 as of Polish mother tongue born in Austria, Germany, and Russia have been deducted from their respective countries and combined as Poland.

⁴ Turkey in Asia included with Turkey in Europe prior to 1910.

⁵ Includes 4,635 persons born in Serbia and 5,363 persons born in Montenegro, which became part of Yugoslavia in 1918.

⁶ Turkey in Asia included Armenia, Palestine, and Syria in 1910. Subsequent to 1910 Armenia included with "Other Asia."

⁷ Newfoundland included with Canada in 1900.

No. 41.—GROSS AND NET REPRODUCTION RATES, BY COLOR, URBAN AND RURAL RESIDENCE, AND REGIONS: 1905 TO 1910, 1930 TO 1935, 1935 TO 1940, 1942 TO 1947, AND 1944 TO 1949

[Statistics for 1905 to 1910 based on Sample W, and those for 1930 to 1935 and 1935 to 1940 based on Sample C (see p. 1); statistics for 1942 to 1947 and for 1944 to 1949 based on Current Population Survey made in April 1947 and April 1949, see Sampling Note, p. 174. Urban-rural classification is in accordance with 1940 definitions; see p. 2. A net reproduction rate of 1,000 means that each generation would just replace itself, if birth and death rates of a specified period were to continue indefinitely, in the absence of net immigration. A rate above 1,000 implies a potentially gaining population, and a rate below 1,000, a potentially declining population. A gross reproduction rate of 1,000 means that if all women born at the beginning of a generation were to live through their reproductive period and continue birth rates existing at the time of their birth, they would barely reproduce themselves, assuming no migration from outside the area. Where gross reproduction rate is less than 1,000, no improvement in mortality alone would prevent a potential decline in population]

No. 46.—HOUSEHOLDS, BY COLOR OF HEAD, WITH POPULATION PER HOUSEHOLD: 1890 TO 1951

[Figures for 1890 to 1940 based on complete census. Figures for 1941 to 1945 estimated on basis of number of marriages and divorces and allowances for wartime effects on household formation. Figures for 1946 to 1951 based on Current Population Survey, see Sampling Note, p. 174. Statistics for 1900, 1930, and subsequent years represent (private) households only; those for 1890, 1910, and 1920 include the small number of hotels, institutions, and other quasi households. For definition of households, see p. 3. See also *Historical Statistics*, series B 171-181]

DATE	HOUSEHOLDS				COLOR OF HEAD			
	Number	Annual increase over preceding date		Population per household ²	White		Nonwhite ³

1951 (Apr. 15).....	44,564,000	1,012,000	2.33	3.34	-----	-----	-----	-----

¹ Computed by compound interest formula.

² Obtained by dividing total population by number of households (members of armed forces excluded 1941 to 1951); hence not strictly average size of household because about 2.5 percent of total population are members of quasi households.

³ The number of households with a Negro as head was 1,410,769 in 1890; 1,833,759 in 1900; 2,173,018 in 1910; 2,430,828 in 1920; 2,803,756 in 1930; and 3,141,883 in 1940.

No. 57.—STATISTICS OF RELIGION: 1950

[Represents latest figures available from church bodies; excludes a few groups giving no data, such as Church of Christ, Scientist, and Jehovah's Witnesses. Totals include, substantially, those religious bodies reporting to Bureau of Census for Census of Religious Bodies in 1936. Not all groups follow same calendar year nor count membership in same way; some groups give only approximate figures. In most Protestant bodies, membership figures include only those who actually join the church; Roman Catholics and a few others include members from time of christening; many Eastern Orthodox bodies count only head of family. Membership and clergy data refer to 1950 except as noted; financial data mainly for 1950, or a fiscal year ending in 1950]

2. Vital Statistics, Health, and Nutrition

(Sent to print February 15, 1952)

Vital statistics.—Vital statistics, including statistics of births, deaths, marriages, divorces, and communicable diseases, are compiled and published by the National Office of Vital Statistics, Public Health Service. Reports in this field are also issued by the individual State bureaus of vital statistics.

Births and deaths.—The national collection of mortality statistics on an annual basis was begun in 1900. For that year, the death-registration States consisted of 10 States and the District of Columbia. In 1915, the national collection of birth statistics was begun with 10 States and the District of Columbia. Beginning with 1933, the birth and death registration areas have comprised the entire United States.

Births and deaths are classified by place of occurrence and by place of residence¹ of the mother or of the decedent. In most of the following tables, the data are shown by place of residence.

Marriages and divorces.—National collections of statistics on marriages and divorces in the United States were made for the years 1867–1906, 1916, 1922–32, 1937–40 and 1944–50. Estimates have been made for the intervening years as well as for years in which collections were not complete. At the present time, records of marriage are filed centrally in almost three-fourths of the States, and records of divorce in more than one-half of the States. Marriage and divorce data in the following tables are shown by place of occurrence.

Vital statistics rates.—Vital statistics rates are based upon Bureau of the Census estimates of the midyear population. The special situation created by the changes in size and disposition of the armed forces necessitated the use of different types of population bases during the war and postwar period.² Briefly, birth and divorce rates for 1940–46 for the United States are based on the total population including members of the armed forces overseas; those for States on the civilian population in the States. Birth and divorce rates for 1947–50 and death and marriage rates for 1940–50 for the United States and States are based on total population present in the area, excluding armed forces overseas.

Cause-of-death classification.—Causes of death are classified according to the *International List of Causes of Death*. The sixth and latest decennial revision was put into effect beginning with data for 1949. Data for previous years, classified according to earlier lists, have been estimated to correspond with the new classification.³

Morbidity.—Statistics on morbidity are compiled and published by the Public Health Service. Each State health officer reports lists of selected diseases weekly, monthly, and annually. The diseases reported to the State health officers depend on laws or regulations within the various States; therefore, lists of reportable diseases differ. However, most of the common communicable diseases are reportable in all States. Tables 96 and 97 show selected data on reportable diseases.

In addition, data on illnesses are obtained by special surveys. The most comprehensive survey in this field is the National Health Survey made in 1935–36. Public Health Bibliography Series No. 5 gives extensive annotated citations to publications

¹ For a discussion of methods of residence allocation and of significance of residence figures, see *Vital Statistics of the United States*, 1949, Part II, pp. V–IX.

² For a discussion of the interpretation of crude rates during wartime, see *Summary of Natality and Mortality Statistics, United States, 1943*, Vital Statistics—Special Reports, Vol. 21, No. 1, 1945; and *Marriage and Divorce in the United States, 1937 to 1945*, Vital Statistics—Special Reports, Vol. 23, No. 9, 1946.

³ For details on comparability of causes of death due to revision, see *The Effect of the Sixth Revision of the International Lists of Diseases and Causes of Death Upon Comparability of Mortality Trends*, Vital Statistics—Special Reports, Vol. 36, No. 10, 1951.

based on the National Health Survey. Morbidity studies of specific conditions, such as rheumatism and cancer, are in process. These data are supplemented by more intensive studies in specific localities such as Hagerstown and Baltimore, Md.

Medical care.—Annual statistics of medical care on a Nation-wide basis are limited to data on hospital facilities obtained from the annual census of hospitals and institutions conducted by the American Medical Association. Such censuses include only hospitals, sanatoriums, and related institutions registered by that organization. Therefore, a relatively large number of institutions are not included in the survey. However, practically all of the large institutions in the country are canvassed with the result that most of the hospital bed facilities are usually included.

An index to one aspect of medical care is also provided by the numbers of births and deaths occurring in hospitals and institutions. These data may be found in the Public Health Service publications on vital statistics. Another aspect of medical care is provided by statistics on patients in hospitals for mental disease, and in institutions for mental defectives and epileptics. Beginning with the 1947 report, the annual reports are issued by the National Institute of Mental Health, Public Health Service; from 1926-46, the data were collected annually by the Bureau of the Census.

Nutrition.—Statistics on the apparent consumption of food per capita by civilians are estimated by the Bureau of Agricultural Economics of the Department of Agriculture. On the basis of these estimates, statistics on the nutritive value of the per capita food supply are computed by the Bureau of Human Nutrition and Home Economics. These statistics are published quarterly by the Bureau of Agricultural Economics in the National Food Situation. Methodologies and detailed information back to 1909 are available in Misc. Pub. No. 691, *Consumption of Food in the United States 1909-48*, and its annual supplements.

Statistics on Federal food distribution programs, and data on the quantity and costs of the food commodities distributed and the number of persons participating in the programs are published annually in *Agricultural Statistics*.

Under the provisions of Federal laws, food commodities are distributed for school lunches and to institutions and welfare cases. Statistics on direct distribution, without charge to recipients, of food commodities acquired by the Government and distributed under provisions of Section 32, Public Law 320 approved in 1935, Section 6 of the National School Lunch Act of 1946, Public Law 471, Eighty-first Congress, and commodities distributed under Section 416 of the Agricultural Act of 1949 on which the recipient paid the freight from point of storage, are presented in tables 101-103. Distribution to ultimate recipients is accomplished through cooperating distributing agencies in States. Expenditures represent cost to the government of the commodity as delivered to the State distributing agency and include cost of purchase, handling, warehousing, and transportation charges, but exclude cost of administrative expenses, except that \$8.9 million expended for Section 416 commodities excludes transportation charges which were paid by recipients. Statistics on the indemnity plan, which is a subsidy program to expand markets for agricultural products, maintain outlets for government-owned commodities, and support school-lunch programs, are shown in tables 101 and 103. Sponsors of school-lunch programs are reimbursed by the government for local purchases of food on a basis of quality and quantity of meals served. This program was started in 1943.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series B 1 and C 1-5") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

No. 58.—BIRTHS, DEATHS, MARRIAGES AND DIVORCES AND RATES PER 1,000 POPULATION: 1900 TO 1950

[Births and deaths are for registration States and represent registered births and deaths only; see table 60. For coverage of these areas, see table 59. Marriage and divorce data are for the United States. For additional rates, see *Historical Statistics*, series C 24, C 45, C 77-78]

NO. 61.—PERCENT COMPLETENESS OF BIRTH REGISTRATION, BY RACE AND BY STATES: DEC. 1, 1939, TO MAR. 31, 1940

[Data obtained by matching special infant cards for all infants stated in the 1940 Census to have been born during period Dec. 1, 1939, to Mar. 31, 1940, with birth certificates for children born during this period. For further details, see *Studies in Completeness of Birth Registration, Part I*, Vital Statistics—Special Reports, Vol. 17, No. 18, p. 223. Data are by place of occurrence.]

¹ For 1940 and 1945, rates for the United States based on population including armed forces overseas; rates for States based on civilian population in area. United States rates on civilian population base were: 17.9 (1940); 21.4 (1945). For 1947-49, rates for the United States and States based on total population present in area (excluding armed forces overseas).

¹ Deaths from deliveries and complications of pregnancy, childbirth, and the puerperium. Deaths for 1949 and 1950 were classified according to sixth revision of *International Lists of Diseases and Causes of Death*; deaths for 1930-48 classified according to fifth revision. For 1949 and 1950, 9 percent fewer deaths were assigned to maternal causes under sixth revision than under fifth revision.

² Includes only fetal deaths (stillbirths) for which period of gestation was 20 weeks (or 5 months) or more, or was not stated.

³ Estimated. Based on a 10-percent sample of death certificates received in State vital statistics offices.

⁴ Estimated.

No. 85.—MARRIAGE LICENSES ISSUED—UNITED STATES AND MAJOR CITIES (OR COUNTIES), BY MONTH: 1948 TO 1951

[Figures for U. S., represent marriage licences issued in 39 States and the District of Columbia for 1948, and for 38 States and the District of Columbia for 1949-51; "marriages reported" in remaining States for these years. Figures for major-city areas represent licences issued in 34 cities with 1940 populations of 100,000 or more and 57 counties containing the remaining 58 cities in that population-size group for 1949-50; 34 cities with populations of 100,000 or more according to the 1950 census, and 69 counties containing the remaining 72 cities in that population-size group for 1951.]

No. 96.—REPORTABLE DISEASES—PROVISIONAL NUMBER OF CASES REPORTED FOR SELECTED CAUSES, BY MONTHS: 1950

[Includes cases reported in military establishments in the United States. Figures on number of reported cases of communicable diseases in this and following table should be interpreted with caution. Reporting of most of these diseases is known to be seriously incomplete, with degree of completeness varying from State to State. However, these figures have proved valuable to health authorities by indicating significant changes in disease incidence. They should not be interpreted as measures of total amount of illness caused by the diseases concerned. Names of diseases are in conformity with the *Sixth Revision of the International List*, 1948]

DISEASE	Total ¹	January	February	March	April	May	June	July	August	September	October	November	December
Typhoid fever.....	2,532	147	146	153	117	139	224	357	373	296	251	181	148

¹ Preliminary.

² Data not available.

³ Excludes canned food products containing small quantities of fish such as clam chowder, etc.

⁴ Average for 1937-39.

⁵ In terms of malt equivalent.

⁶ Comprises white, whole wheat, and semolina flour.

⁷ Green bean basis.

No. 100.—NUTRITION—NUTRIENTS AVAILABLE FOR CIVILIAN CONSUMPTION PER CAPITA PER DAY: 1935 TO 1951

[Computed by Bureau of Human Nutrition and Home Economics on basis of estimates of apparent civilian consumption (retail basis) including estimates of consumption from urban gardens, supplied by Bureau of Agricultural Economics. No deductions have been made in nutrient estimates for loss or waste in home or for destruction or loss of nutrients during preparation of food. Deductions have been made for inedible refuse. Data for iron, thiamine, riboflavin, and niacin include amounts of these nutrients added to prepared cereals, bread, and white flour under enrichment program. See also *Historical Statistics*, series C 122-127]

3. Immigration, Emigration, and Naturalization

(Sent to print February 15, 1952)

Aliens or citizens arriving or departing by vessel or airplane at ports other than land border ports of the United States are recorded on passenger and crew lists or manifests by officials of the transportation companies, these lists or manifests being delivered to the Immigration and Naturalization Service of the Department of Justice. Persons going by land or air between Mexico or Canada and the United States are required to enter or depart at land border stations where they are registered by officers of the Immigration and Naturalization Service. Statistics of immigration and emigration are prepared from these and other records by the Immigration and Naturalization Service.

Immigration.—Although the reporting of alien arrivals was required at an early date in certain of the colonies and original States, the continuous record of immigration to the United States begins with the fiscal year ending September 30, 1820. Under the Act of March 2, 1819, passenger lists for all vessels arriving from foreign places were to be delivered to the local collector of customs, copies transmitted to the Secretary of State, and the information reported to Congress. Immigration statistics were compiled by the Department of State from 1820 to 1874 and by the Bureau of Statistics of the Treasury Department from 1867 to 1895. Since 1892 there has been a separate office or bureau of immigration, now a part of the Immigration and Naturalization Service. Annual reports were issued by this bureau from 1892 to 1932. From 1933 to 1940, a summary of the work of the Immigration and Naturalization Service was given in the Annual Reports of the Secretary of Labor. For 1941, the *Annual Report of the Attorney General* contained a report on immigration and naturalization. No report was published for 1942. For subsequent fiscal years, Annual Reports of the Immigration and Naturalization Service (submitted by the Commissioner to the Attorney General) were published in mimeographed form.

Since 1820 the official immigration statistics (see table 104) have changed considerably in completeness and in the basis of reporting. The early figures were for arrivals at Atlantic and Gulf coast seaports of the United States. Pacific coast arrivals were first reported in 1850. Aliens arriving at Canadian seaports en route to the United States were included after 1893. The reporting of arrivals over the land borders began in 1904 and was gradually extended up to 1908. Hawaii, Puerto Rico, and Alaska were treated as integral parts of the United States for purposes of immigration and emigration statistics beginning in 1901, 1902, and 1904 respectively. Travel between the Philippine Islands and the United States was not treated as immigration or emigration between July 1, 1898 and May 1, 1934.

Prior to 1868 arriving alien passengers were recorded, thereafter immigrant arrivals (i. e., omitting aliens coming for temporary stay). Subsequent to the passage of the Act of 1891 which increased the number of excludable classes, the basis of reporting was changed from arrivals to admissions (i. e., omitting aliens not permitted to enter the United States), except for the period 1895 to 1897, inclusive, when the reporting of arrivals was resumed.

Two classes of alien admissions are now reported, immigrant and nonimmigrant (see table 105). Included in the nonimmigrant class are aliens admitted under section 3 of the Immigration Act of 1924 (see table 111), returning resident aliens, students, and others. An immigrant alien is defined as an alien, other than a returning resident, admitted for permanent residence, under either quota or nonquota status. Nonquota

immigrants admitted comprise immigrants born in Canada, Newfoundland, Mexico, Cuba, Haiti, the Dominican Republic, the Canal Zone, and independent countries of Central and South America, and their wives and unmarried children under age 18 if accompanying or following to join such immigrants; relatives of citizens of the United States (wives, husbands, unmarried children under age 21); ministers and professors who enter solely for the purpose of carrying on their vocations, and their wives and unmarried children under age 18, if accompanying or following to join such ministers and professors; and others. Certain temporary admissions such as of persons in possession of border-crossing identification cards are not included either in the immigrant or nonimmigrant totals.

Emigration.—No official record of emigration was kept prior to July 1, 1907. Alien departures are classified as emigrant and nonemigrant (see table 105). For statistical purposes an alien emigrant is an alien resident of the United States departing with the declared intention of residing permanently in a foreign country. The nonemigrant category includes both alien residents of the United States departing for a temporary sojourn abroad, and aliens leaving the United States after a temporary stay.

Naturalization.—Naturalization statistics for the United States began with the fiscal year 1907. Prior to this time each court kept records of naturalizations but no national data were compiled. The Act of June 29, 1906, effective September 27, 1906, provided for periodic returns by all courts conducting naturalization proceedings, and for the filing with a central Federal agency of a duplicate copy of each declaration of intention and petition for naturalization filed, and of each certificate of naturalization issued. Naturalization statistics were originally compiled by the Bureau of Immigration and Naturalization of the Department of Commerce and Labor, now the Immigration and Naturalization Service of the Department of Justice.

Alien registration.—The Act of June 28, 1940, required the registration of all aliens remaining in the United States (including Alaska, Hawaii, Puerto Rico, and the Virgin Islands) for a period of thirty days or longer. Aliens resident in the United States on August 27, 1940, were required to register on or before December 26, 1940. Aliens arriving subsequent to August 27, 1940, and not registered by the consul granting visas were required to register within thirty days of arrival.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series B 304") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

**NO. 107.—ANNUAL QUOTAS ALLOTTED AND QUOTA IMMIGRANTS ADMITTED, BY
QUOTA COUNTRY OR REGION: YEARS ENDING JUNE 30, 1936 TO 1951**

[Number of aliens admitted annually of any nationality subject to the quota law was limited by Immigration Act of 1921 to 3 percent of number of foreign-born of such nationality resident in continental United States as determined by 1910 census; and by population plan of act of 1924, to 2 percent according to 1890 census. National origins clause of 1924 act, effective July 1, 1929, provided that quota of any nationality be computed by applying to 150,000 the ratio between calculated number of inhabitants in continental United States in 1920 owing their origin to nationality concerned and the total inhabitants in the United States of all nationalities subject to quota law. (For estimates of white population by countries of origin, calculated as a basis for immigration quotas, see table 97, *Statistical Abstract*, 1932.) Under 1924 act, minimum quota is 100; for non quota classes, see general note, p. 92]

¹ Persons born in colonies, dependencies, or protectorates, or portions thereof within barred zone, of European countries, who are admissible under immigration laws of United States as quota immigrants, are charged to quota of country to which such colony or dependency belongs or by which it is administered as a protectorate. Aliens who obtain visas during later part of fiscal year may be admitted in following year since visas are valid for period of 4 months. Nationality for quota purposes does not always coincide with actual nationality (Sec. 12, Immigration Act of 1924).

² Quota was 153,774 from 1934 to February 8, 1944, when quota of 105 Chinese, authorized by act of December 17, 1943 increased the maximum quota to 153,879. On July 4, 1946, quota for Philippine Islands was increased from 80 to 100, thereby raising total quota to 153,929. Quota was increased to 154,208 on July 27, 1949, by establishment of separate quotas of 100 each for Israel, Syria, and Lebanon, and abolishment of combined quota of 123 established for Syria and Lebanon. Quota was increased to 154,277 on Oct. 31, 1950, when quota for Italy was reduced to 5,677, quota for Yugoslavia was increased to 938, and a separate quota of 100 was established for Trieste.

³ Number of quota immigrants exceeds quota because 50 percent of quota for future years may be mortgaged where necessary under Displaced Persons Act of 1948.

⁴ For 1938 to 1945, Austrian quota included with German.

¹ Legislation authorizing admission was approved June 25, 1948. Admissions prior thereto were under President's Directive of Dec. 22, 1945.

² Act of Dec. 28, 1945, which facilitated entry of alien wives, husbands, and children of citizen members of armed forces, expired on Dec. 28, 1948. Public Law 51 of Apr. 21, 1949, authorized admission of certain alien fiancées and fiancés and adjustment of their status to that of permanent residence.

4. Education

(Sent to print February 15, 1952)

Data on school attendance and on educational attainment were obtained for individuals in the United States as part of the 1940 and 1950 Censuses of Population. Annually, beginning in 1945, the Bureau of the Census has reported on school enrollment (and in 1947 on educational attainment) of the population, based on sample data obtained in the Current Population Survey. The Biennial Survey of Education, conducted by the U. S. Office of Education, covers enrollment and attendance, teaching staff, finances, and other information on public education facilities at all levels, with less complete information for private schools. Public library statistics are also collected and published by this office. Other statistical studies of the U. S. Office of Education, publications of the National Education Association, Annual or Biennial Reports of the State Departments of Education, and educational journals are the other chief regular sources of statistical materials in the field of education. Many special studies are made by research divisions of city school systems, by schools of education in colleges and universities, and by educational foundations.

Educational statistics for individuals.—The school attendance statistics are based on the replies to the enumerator's inquiry as to whether the person had attended, or had been enrolled in, any regular school or college within a given period. Regular school enrollment does not include enrollment in kindergarten or nursery school or, generally, enrollment in vocational, trade, business, or correspondence schools.

The 1940 and 1950 Censuses included questions on the formal education attainment of each person, that is, the last full grade that the person had completed in the regular school system—public, private, or parochial school, college, or university. This question replaced the inquiry on illiteracy included in previous censuses.

The *median* year of school completed may be defined as the year which divides the population group into equal parts—one-half having completed more schooling and one-half having completed less schooling than the median. In the presentation of median year of school completed, the completion of the first year of high school is uniformly indicated by 9 and of the last year of college by 16, although there are some areas with only 7 years of elementary school.

Statistics for schools.—Working through national committees since 1910, the U. S. Office of Education, in cooperation with the State departments of education, has brought about a considerable degree of uniformity in recording and reporting educational statistics. Since about 1930, a similar movement has been in progress with institutions of higher education, the U. S. Office of Education serving as a clearing house for uniform procedures in records and reports.

The statistics presented in the *Abstract* from the Biennial Survey of Education include current national totals and summaries for a period of years. The national totals are reasonably complete for the types of education covered but data are not included for private schools of art, music, drama, etc., for private trade and vocational schools, or private correspondence schools. The introduction of the junior high school, which includes the 7th and 8th grades from the traditional elementary school and the 9th grade from the regular high school, has made it impossible to compare elementary school or high school data over a period of years except on the basis of grade enrollment, 8 grades as elementary and 4 grades as secondary. Similarly the change in status of a large number of normal schools and teachers' colleges to State colleges and universities makes comparison of normal schools and teachers' colleges over a period of years nonrepresentative of the complete teacher training field. Detailed statistics on the major fields of education are published in the reports of the Biennial Survey of Education. Information on vocational education is compiled by the U. S. Office of Education.

Data in this section relate to continental United States except as noted.

FIG. VII.—AVERAGE CURRENT EXPENSE PER PUPIL IN AVERAGE DAILY ATTENDANCE
FOR PUBLIC ELEMENTARY AND SECONDARY SCHOOLS: 1949

SCHOOL ATTENDANCE

107

No. 121.—PERSONS ATTENDING SCHOOL BY SINGLE YEARS OF AGE FROM 5 TO 20,
BY SEX: 1920 TO 1950

[Statistics for 1940 and 1950 are based on attendance at or enrollment in any regular school or college, including night schools, extension schools, or vocational schools, if part of regular school system. Excludes correspondence schools. In the 2 prior censuses, school attendance question not restricted as to type of school or college. In 1950, question referred to period between Feb. 1 and Apr. 1, 1950; in 1940, to period between Mar. 1, and Apr. 1, 1940; in 1930, to period between Sept. 1, 1929, and Apr. 1, 1930; and in 1920, to period between preceding Sept. 1 and Jan. 1. Leaders indicate data not available]

NO. 157.—VOCATIONAL SCHOOLS AND VOCATIONAL TEACHER-TRAINING COURSES, FEDERALLY AIDED—NUMBER OF TEACHERS AND STUDENTS, BY CLASS OF SCHOOL OR COURSE AND BY SEX: YEARS ENDING JUNE 30, 1920 TO 1950

[Institutions Federally aided are reimbursed from Federal funds provided under act known as "The Smith-Hughes Act," or the "National Vocational Education Act of 1917," and subsequent acts extending benefits of vocational education to Alaska, Hawaii, and Puerto Rico, and providing for further development of vocational education. These acts, administered by Office of Education, provide appropriations for reimbursement in part from Federal funds for expenditures by States and local communities for vocational education. Includes data for Hawaii beginning 1930, for Puerto Rico and Alaska beginning 1940]

5. Law Enforcement and Federal Courts

(Sent to print February 15, 1952)

Criminal justice is administered in the United States for the most part by State and local officers and agencies. The United States Constitution reserves to the States the general police powers, and only offenses against the United States Government or those which involve the crossing of State lines or an interference with interstate commerce can be made Federal offenses by act of Congress. Consequently, unless they occur in Federal territories or reservations, or on the high seas, or are committed by members of the armed forces, the usual criminal offenses such as murder, robbery, burglary, theft, assault, and rape are violations of State laws. There are fifty separate and distinct criminal law jurisdictions in the United States, one in each of the forty-eight States, one in the District of Columbia set up by act of Congress, and the Federal jurisdiction. Each of these has its own criminal law and procedure and its own law enforcement agencies. Yet the general system of law enforcement is quite similar from State to State. Of course, there are among the States differences in detail and often substantial differences in the penalties provided for like offenses.

The administration of criminal justice can be divided into three parts. The first covers the activities of the police agencies, namely the investigation of crimes and the apprehension of persons suspected of committing them. This function involves agencies such as municipal police, county police, State police, sheriffs, constables, marshals, Federal agents, and many kinds of special officers. The second phase of the administration of criminal justice is the prosecution of those charged with criminal offenses to determine whether they are in fact guilty. The agencies concerned include the courts, justices of the peace, municipal, State and Federal grand juries, and prosecuting court officers. The third division of criminal administration is concerned with the punishment or treatment of those convicted of crime. While the courts usually determine the sentence after conviction, the administration of the penalty is carried out by prison, reformatory, jail, probation and parole officials.

Nearly all statistical data on crime and criminals are derived from the records and reports of the various agencies engaged in the administration of criminal law. Police statistics present the number of offenses reported, the number of persons arrested, and the offenses cleared by arrest. Arrest records provide data concerning sex, age, race, and other characteristics of the persons arrested and charged with crime. As the police agencies are largely local, a real problem is involved in collecting statistical data from the large number of such agencies. The Federal Bureau of Investigation obtains reports from police agencies and publishes information for the country as a whole in its semi-annual bulletin, *Uniform Crime Reports*. The great majority of urban communities are now reporting to the Federal Bureau and the reports received cover about three quarters of the population of the United States. Information concerning offenses known to the police and the sex and age of persons arrested are shown by offense. No centralized information is available on the police activities of the Federal agencies. Some information concerning the work of each Federal agency will be found in its respective annual report.

Court statistics for the country as a whole showing the number of persons prosecuted for criminal offenses and the outcome of the prosecutions are quite incomplete. In many States, an annual or biennial publication presents data on the criminal cases disposed of in the trial courts. This information may be published by the State Judicial Council or the Attorney General or some other State agency. The only national compilation of such information was that made by the Bureau of the Census which annually published statistical data on criminal cases disposed of in the general trial courts of

from sixteen to thirty States including the District of Columbia. The latest data collected by the Census Bureau were those for 1945. No national collection is now made.

Comprehensive information is collected on the business of the Federal courts by the Administrative Office of the United States Courts, and is published annually in the *Report of the Director*. The bulk of civil litigation in the country is commenced and determined in the various State courts, and only when the United States Constitution and acts of Congress specifically confer jurisdiction upon the Federal courts may civil litigation be heard and decided by these courts. The question whether a State court or a Federal court has jurisdiction over a particular civil action is often difficult to determine, but generally speaking the Federal courts have jurisdiction over the following types of cases:

(1) Suits or proceedings by the United States; (2) Suits or proceedings against the United States; (3) Civil actions between private parties arising under the Constitution, laws, or treaties of the United States; (4) Civil actions between private litigants who are citizens of different States; (5) Civil cases involving admiralty, maritime, or prize jurisdiction; (6) All matters and proceedings in bankruptcy.

The Federal courts of original jurisdiction are known as the United States District Courts, and one or more of these courts is established in every State, Territory, or possession. Appeals from the district courts are taken to intermediate appellate courts of which there are eleven. They are known as United States Courts of Appeals. The Supreme Court of the United States is the final and highest appellate court in the Federal system of courts.

Statistics of prisoners committed to penal institutions have been collected and published for a longer period of time than have other criminal statistics. A national compilation of data on prisoners in Federal and State prisons and reformatories was made annually by the Bureau of the Census until after the 1947 data were compiled when this work was transferred to the Bureau of Prisons. The last report showing detailed information was published by the Bureau of the Census for 1946. The Bureau of Prisons is now preparing the statistics for 1947 and 1948 for publication and will also publish the data for subsequent years. Statistics covering persons received and discharged from State prisons and reformatories and from Federal prisons are now published periodically in *National Prisoner Statistics* bulletins of the Bureau of Prisons. The Federal Bureau of Prisons, in its annual report, *Federal Prisons*, also provides as complete statistical information on Federal prisoners as has been issued in this country. In addition, nearly every State publishes annual data either for its whole prison system or for each separate State institution.

Information concerning juvenile delinquents and juvenile delinquency and the operation of many juvenile courts is collected and published by the Children's Bureau, Social Security Administration, Federal Security Agency.

Information on the prosecution and disposition of persons charged with misdemeanors and other minor offenses in the justice of the peace and municipal courts of the country is not compiled at the present time. Statistical data on such prosecutions may be found for some of the larger cities in the annual reports of the municipal court or of the municipal government. Likewise, there is no general compilation of statistical data on persons confined to county jails and local workhouses. The Bureau of the Census made a survey of jail prisoners for the calendar year 1933 and some information on incarcerated prisoners was published in connection with the 1940 decennial census but there is at present no regular compilation covering this field.

No. 160.—OFFENSES KNOWN TO THE POLICE—ANNUAL TRENDS, BY POPULATION GROUPS: 1949 AND 1950

[Population figures based on 1950 decennial census preliminary counts]

No. 163.—ARRESTS, BY AGE GROUPS: 1950

[Data from arrest records, evidenced by fingerprint cards received at F. B. I. during year, are limited to instances of arrests for violations of State laws and municipal ordinances. Excludes fingerprint cards representing arrests for violations of Federal laws or representing commitments to any type of penal institution. Data do not represent all persons arrested, as fingerprint cards are not forwarded to Washington for every individual taken into custody. Arrest records in lower age groups probably incomplete because of practice of some jurisdictions not to fingerprint youthful offenders]

No. 177.—PRISONERS EXECUTED, BY RACE AND OFFENSE: 1930 to 1950

[Covers all executions at hands of civil authorities and differs therefore from figures in table 173 which represent only those executed in State and Federal prisons. Excludes executions in military installations. The Army (including the Air Force) carried out 148 executions from 1942 to 1950, of which 95 were for murder (including 18 which also involved rape), 52 for rape, and 1 for desertion. There were no executions in the Navy]

6. Climate

(Sent to print February 15, 1952)

Climatological data are gathered by the United States Weather Bureau at about 10,000 stations. Of this number nearly 3,000 stations have autographic precipitation records, about 600 take automatic or hourly readings of a series of weather elements, and the remainder record one observation a day. There are few records in existence for stations before 1871, although some earlier and less detailed records began in the 18th century. Data shown in these tables include long-time averages and extremes of the several elements for the vicinities indicated. Where the station has moved, but not out of the general vicinity, the data represent combined values for both the previous and the new locations.

The following tables contain data from a list of cities selected to give a general representation of the climate over the United States. The averages represent the arithmetic means of the period of record at the station. The number of degree days as used in table 189 is the average monthly sum of the differences between 65° and the daily mean temperatures below 65°, i. e. (65°-T°). Experience has shown that, in order to heat buildings to a temperature of approximately 70°, the amount of fuel or heat used per day is proportional to the number of degrees the average outside temperature falls below 65°. The degree-day value is based on this assumption.

7. Public Lands and National Park System

(Sent to print March 6, 1952)

Acquisition of original public domain.—Recognition of its sovereignty over its present continental land area was acquired by the United States Government through a series of international agreements and treaties. The United States, however, did not gain title to all of these lands by such agreements. At the time of acquisition of sovereignty over the areas involved, title to about 463 million acres rested in individual States and their political subdivisions or in private owners, which title was not relinquished to the Federal Government. Title to the remaining 1,442 million acres of land area passed to the United States and, with the exception of lands in the District of Columbia, is known as the *original public domain*. Any of such lands which the Government has not disposed of under the public-land laws, are generally referred to as *public-domain lands* or *public lands*.

In addition to the public domain, the United States Government has from time to time acquired, by purchase, condemnation, and gift, tracts of land needed for various public purposes. Such lands are often referred to as *acquired lands*, to distinguish them from public-domain lands. Complete statistics are not available as to the extent of such acquisitions.

Public-domain lands.—*Public-domain lands* or *public lands*, as used here, refers to those Federally owned lands to which the general body of public land laws apply. (See title 43, Code of Federal Regulations.) In general, it includes that portion of the *original public domain* not disposed of under the public land laws, and certain other lands declared by the Congress specifically to be *public lands*. As a general rule, it excludes *acquired lands*, as defined above. The term *Indian lands*, as used in tables 193-195, refers to that portion of the public domain lands that was ceded to the United States by Indian tribes on condition that part or all of the proceeds from their sale or other disposition would be covered into the Treasury in trust for the Indians.

Entries, selections, patents, and certifications.—The data on entries, selections, patents, and certifications refer to transactions which involve the disposal, under the public-land laws (including the homestead laws), of Federal public lands to non-Federal owners. In general, *original entries* and *selections* are applications to secure title to public lands which have been accepted as properly filed. Some types of applications, however, are not reported until the final certificate is issued.

Applications become *final entries* (perfected entries) upon issuance of a *final certificate* which is given to the applicant after he has complied fully with the requirements of the laws relating to his application. These requirements may include, in particular cases, settlement upon and improvement of the lands entered, or payment of statutory fees or purchase money. A *final certificate* passes equitable title to the land to the applicant. *Patents* are instruments which pass legal title to the lands to the applicant. *Certifications* are issued in lieu of patents in connection with certain State selections.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series F 1-7") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

LANDS IN FEDERAL OWNERSHIP

163

No. 191.—LANDS IN FEDERAL OWNERSHIP—ACREAGE, BY STATES: 1949

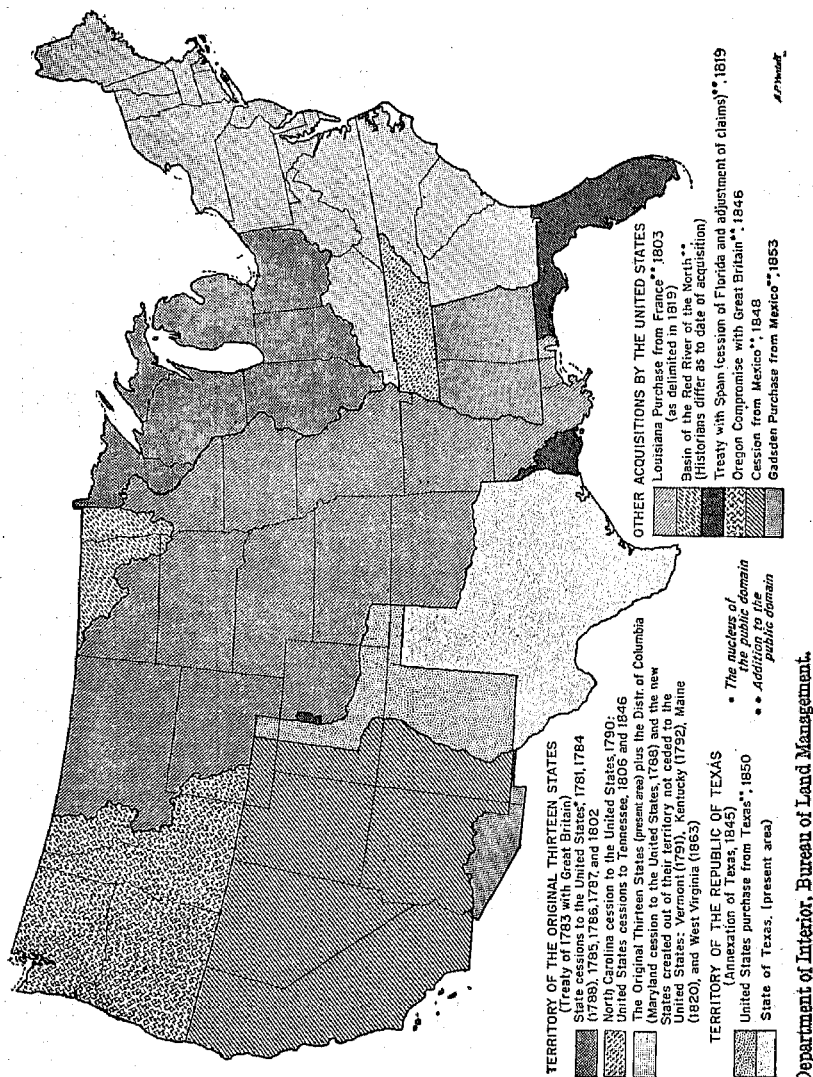

[Submitted by Committee on Public Lands as of September 1950. Compiled from data transmitted by administering agencies during preceding year]

No. 192.—ACQUISITION AND EXTENT OF PUBLIC DOMAIN, CONTINENTAL UNITED STATES: 1781 to 1951

[See also *Historical Statistics*, series F 1-7]

ITEM	ACQUISITION OF THE ORIGINAL PUBLIC DOMAIN			Estimated area of the public domain (selected years) ¹
	Total area	Land area	Water area	
	<i>Acres</i>	<i>Acres</i>	<i>Acres</i>	<i>Acres</i>
Aggregate, 1951.....	1,462,466,500	1,442,200,320	20,266,240	412,000,000
1912, estimate of public domain.....				600,000,000
1880, estimate of public domain.....				800,000,000
1855, Gadsden Purchase.....	18,988,800	18,061,920	20,880	
1850, estimate of public domain.....				1,200,000,000
1850, Purchase from Texas.....	78,920,720	78,842,880	83,840	
1848, Mexican Cession ²	338,680,960	334,479,360	4,201,600	
1846, Oregon Compromise.....	183,880,240	180,644,480	2,741,760	
1819, Cession from Spain.....	40,144,640	48,342,720	³ 2,801,920	
Red River Basin ⁴	29,601,920	29,063,880	538,040	
1803, Louisiana Purchase ²	629,911,680	623,446,400	6,465,280	
1802, estimate of public domain.....				800,000,000
1781-1802 (State Cessions).....	236,825,600	233,415,680	3,409,920	

¹ Estimated from imperfect data available for indicated years.² Data for Louisiana Purchase exclude area eliminated by Treaty of 1819 with Spain. Such areas are included in figures for Mexican Cession.³ Includes 33,920 acres subsequently recognized as part of State of Texas which is not a public domain State.⁴ Represents drainage basin of Red River of the North, south of 49th parallel. Authorities differ as to method and exact date of its acquisition. Some hold it as part of Louisiana Purchase, others maintain it was acquired from Great Britain.Source: Department of Interior. Estimated area, Bureau of Land Management; all other data, Office of the Secretary, *Areas of Acquisitions to the Territory of the U. S., 1922*.

No. 193.—DISPOSAL OF PUBLIC LANDS: 1861 to 1951

[For years ending June 30. Data include Alaska except where noted. Period figures are totals, not averages. See also *Historical Statistics*, series F 8-10]

¹ Includes receipts from such sources as following: Sales of public and ceded Indian lands; fees and commissions; mineral rentals, royalties, and bonuses; sales of timber; grazing fees and rentals; and land rentals. For period prior to 1861, receipts were \$177,230,000.² As of June 30, 1951, process of legal adjudication had not yet been completed for all grants and small changes in data for certain years may occur. For period 1802-60, total land granted to States was 96,977,000 acres. Includes grants for such public purposes as following: Educational, penal, and other public institutions and buildings; bridges, reservoirs, and other internal improvements; reclamation of swamp and arid lands; experiment stations; recreation areas; wildlife and forestry areas; military camps; and payments of bonds issued by local governments. Excludes grants to aid in construction of railroads, wagon roads, canals, and river improvements, or acreage of swamplands lost to States, for which States received indemnity in cash. Excludes data for Alaska and also 10,000 acres which is due to breakage and "less than" items.³ Includes homesteads. ⁴ Includes some classes of final entries and patents prior to 1911.⁵ Excludes commuted homesteads. ⁶ 1868-1870 only.⁷ 1920 only.

No. 201.—VACANT PUBLIC LANDS—ACREAGE, BY STATES: JUNE 30, 1900 TO 1951

[Vacant public lands are those which are unappropriated and unreserved. The former represent lands not covered by an entry, the latter, lands not reserved for some public purpose, i. e., available for entry or selection under appropriate laws. Data cover vacant public lands outside Alaska withdrawn for classification in furtherance of Taylor Grazing Act and for conservation and development of natural resources. Figures exclude vacant public lands in Alaska estimated at 270,000,000 acres on June 30, 1951. For U. S. totals, see *Historical Statistics*, series F 8]

8. Labor Force, Employment, and Earnings

(Sent to print March 6, 1952)

The various series of labor statistics covered in this section may be classified as of one of two types and these types differ somewhat in concept and purpose. One type of labor statistics is obtained by the "population approach," and includes data from the Census of Population and the Current Population Survey of the Bureau of the Census. These surveys involve an enumeration of individual persons and obtain information on employment activity from workers or members of their households. Each employed worker is counted only once, even though he may have held two or more jobs during a given period. The population approach permits a direct enumeration not only of employed persons but also of unemployed workers, the self-employed, domestic servants, service trade workers, and others who are not found on the pay rolls of any establishment.

The second type of labor statistics is obtained by the "establishment approach," and includes data from the monthly series of the Bureau of Agricultural Economics of the Department of Agriculture, and the Bureau of Labor Statistics of the Department of Labor. These data are similar to those provided by the Census of Manufactures and other industrial censuses in that they are based on reports from employers; i. e., farms, businesses, or industrial establishments. In adding together data from the reports of different employers the establishment approach counts twice or more any worker who works for two or more employers during a given pay-roll period, but permits a better analysis of such data as wages, hours, labor turn-over, and industry affiliation which can be more accurately obtained from employers' records than by inquiries directed to a worker or a member of his household. The sampling methods usually used in the collection of statistics from establishments yield estimates of employment that may be subject to some error as well as to a small downward bias arising from inadequate representation of new firms entering business. Accurate estimates are maintained, however, by periodic adjustment to "benchmark" data from tabulations of employer reports obtained in connection with government social insurance programs and other sources, and by correcting current figures for selected industries for bias on the basis of past experience.

1950 Census data.—Figures shown here based on the 1950 Census of Population are those available at the time this section was sent to the printer. Where figures are preliminary they have been so noted; in some cases these figures may differ slightly from the final figures.

Labor force.—The labor force as now commonly defined in surveys utilizing the population approach includes persons 14 years old and over who had a job or were seeking one during a specified week. Population censuses earlier than 1940 used instead a concept of "gainful workers." This differed from the labor force concept in that it included all persons 10 years old and over who reported a gainful occupation, regardless of whether or not they were working or seeking work at the time of the census, and excluded in general new job seekers without previous experience in a gainful occupation. The Decennial Census of Population provides detailed data for the United States as a whole and for each State, city, and other area, including personal characteristics (sex, age, color, etc.) of the labor force, the numbers employed and unemployed, the number reporting themselves in each occupation and in each industry, and other items. The Census Bureau's Current Population Survey, a monthly enumeration of approximately 25,000 households throughout the Nation, provides current data published in *Current Population Reports—Monthly Report on the Labor Force*. Data presented include national totals, by sex and age, of the number of persons in the

civilian labor force, the number employed in nonagricultural industry, the number employed in agriculture, the number unemployed, and the number of nonworkers. Also provided are data on hours of work and major occupational group of those employed and duration of unemployment of those unemployed. (See Sampling Note, p. 174.)

Agricultural employment.—The establishment-type series are available for both agricultural and nonagricultural employment. Agricultural employment estimates, obtained by means of monthly mail returns from crop reporters, have been issued since 1909 by the Department of Agriculture.

Nonagricultural employment.—The monthly estimates of employment in nonagricultural establishments prepared by the Bureau of Labor Statistics are based on voluntary reports from about 42,000 establishments in manufacturing industries and from about 108,000 establishments in selected nonmanufacturing industries, supplemented by data from other government agencies and adjusted at intervals to data from tabulations of reports under government social insurance programs. These estimates exclude proprietors of unincorporated businesses, self-employed persons, domestic servants, and unpaid family workers, most of whom cannot be covered easily by the establishment approach. Persons in the armed forces are also excluded. Estimates are available for *total* employment for 8 major industry divisions, for 21 manufacturing groups, for over 100 manufacturing industries, and for selected nonmanufacturing industries. Employment data as well as average weekly hours, and average weekly and hourly earnings are available for *production and related* workers in close to 200 manufacturing industries; in mining, power laundries, and cleaning and dyeing industries, and for nonsupervisory employees and working supervisors in other selected nonmanufacturing industries.

The employment data are for all full and part-time employees who worked or received pay for any part of the period reported.

The earnings data are gross, before pay-roll deductions and include overtime premiums; they exclude irregular bonuses and value of payments in kind. Hours are those actually worked or paid for.

For government and certain other segments of employment, the employment reports of the Bureau of Labor Statistics are supplemented by data from the Interstate Commerce Commission, the Maritime Commission, the Civil Service Commission, the Bureau of the Census and other agencies.

Because of a major revision, continuous data for many currently published series begin with January 1947. Continuity with data prior to 1947 has been maintained for total employment in nonagricultural establishments and the 8 major industry divisions; for total and production-worker employment in all manufacturing, durable and nondurable goods, the 21 major manufacturing industry groups, and the mining industries; for hours and earnings in all manufacturing, durable and nondurable goods, and the mining industries.

Output per man-hour.—The Bureau of Labor Statistics currently prepares annual measures of output per man-hour (or the reciprocal—unit man-hour requirements) by two methods. One involves the construction of industry-wide measures from secondary source material; the other, from establishment reports for specified products selected to represent industry trends. Data under the first program are published for 24 manufacturing industries, 5 mining industries, 4 public utilities and agriculture. Indexes compiled from direct reports cover 18 manufacturing industries. Output per man-hour refers to production, in physical units, per man-hour of work. The indexes measure the relationships between the volume of goods produced and one factor of input—labor time. The data do not measure the specific contribution of labor or capital nor do they reflect increased efficiency resulting from more economical use of fuel and materials, or more efficient integration of industries.

Labor turn-over.—Labor turn-over estimates are published monthly by the Bureau of Labor Statistics for approximately 100 industries in 20 major divisions in manufacturing and for selected nonmanufacturing industries, on the basis of about 7,000 reports from cooperating establishments. Labor turn-over data are available on a continuous monthly basis from January 1930 for manufacturing as a whole. Because of the adoption of the Standard Industrial Classification beginning with final data for December 1949, labor turn-over rates for many individual industries and industry groups are available on a continuous basis only from December 1949.

Work stoppages.—Statistical data on work stoppages due to labor-management disputes cannot be collected in the same fashion as other labor information since such stoppages are sporadic and cannot be covered by a routine periodic reporting service. The basic measures of strike statistics as now compiled by the Bureau of Labor Statistics are the number of stoppages, the number of workers involved, and the number of unions involved. Basic statistical data are obtained from the employers and unions involved. Leads to where strikes have occurred are obtained from a variety of sources, including newspapers, State employment services, or State and Federal mediation services. From the data given on the schedules, the Bureau prepares annual reports (published in the May *Monthly Labor Review* and later in bulletin form) which give not only the complete and verified total figures for each month of the year but also analyses of strikes by industry, State, city, and by causes, labor organizations involved, and other pertinent classification. Preliminary monthly, semi-annual, and annual figures are issued in press releases.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series D 11-31") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

Sampling Note—Current Population Survey

The sample used for the Current Population Survey (Monthly Report on the Labor Force) consists of approximately 25,000 households living in 125 counties and independent cities grouped in 63 areas. The chances are about 19 in 20 that the relative sampling variability of the estimated totals presented from the labor force survey are less than the following:

SEX	CIVILIAN LABOR FORCE			Not in the labor force
	Total	Employed	Unemployed	
	Percent	Percent	Percent	Percent
Both sexes.....	2	2	18	4
Male.....	2	2	18	4
Female.....	5	5	20	2

The percentages shown in this table represent the maximum differences to be expected between totals estimated from the sample and those that would have been obtained by a complete census following the same procedures. These percentages are themselves subject to variation in different time periods, particularly as the magnitudes being estimated change in level. Estimates of change from one month to the next are subject to somewhat smaller sampling variability for some of the items.

The sampling variability indicated above is illustrative of the variability that is to be expected for other subjects, such as urban-rural distributions, migration, occupation, education, marital status, race, family relationships, income, etc. For specific evaluation of the sampling variability relating to these subjects, see the original releases of the Bureau of the Census.

No. 205.—LABOR FORCE—PERSONS GAINFULLY OCCUPIED IN AGRICULTURAL AND IN NONAGRICULTURAL PURSUITS; AND WOMEN IN LABOR FORCE OR GAINFULLY OCCUPIED: 1820 TO 1940

[Figures for 1940 relate to the labor force; those for earlier years relate to gainful workers. For differences in concepts, see text statement, p. 172. See also *Historical Statistics*, series D 1-10]

YEAR	ALL PERSONS 10 YEARS OLD AND OVER					WOMEN IN LABOR FORCE OR GAINFULLY OCCUPIED, 15 YEARS OLD AND OVER ¹

¹ Figures for 1940 are revised estimates of labor force 14 years old and over during the census week; see Bureau of the Census, *Current Population Reports*, Series P-50, No. 2. Figures for prior years are for gainfully occupied 15 years old and over.

² See U. S. Bureau of the Census, *Supplementary Analysis of Twelfth Census*, p. 408.

³ Includes 9,419 out of 11,130 persons for whom age was not ascertained.

⁴ Final figures, after re-enumeration of Montgomery County, Maryland, in 1841.

⁵ Excludes persons in Indian Territory and on Indian reservations, areas specially enumerated at that census, but for which areas no occupation statistics are available. Figures for the remaining area are corrected figures; for explanation, see analysis of occupation returns for 1890 in *Twelfth Census (1900) Special Reports*, "Occupations," pp. lxxvi-lxxiii.

⁶ May differ from 1940 data in other tables because of following adjustments to improve comparability: New workers have been excluded; children 10 to 13 (estimated) engaged in agricultural and nonagricultural pursuits have been included; persons on public emergency work previously in agricultural pursuits (estimated) have been included; number of persons classified in agricultural pursuits was revised as a result of occupation classification revision in 1940.

¹ Figures for 1910 to 1930 represent gainful workers; those for 1940 and 1950 represent the total labor force. For differences in concepts, see text, p. 172.

² Including data for age unknown.

³ Based on preliminary sample of 1950 Census returns. See source for explanation of sampling variability.

No. 207.—EMPLOYMENT STATUS OF THE NONINSTITUTIONAL POPULATION, BY SEX: 1929 TO 1951

[Thousands of persons 14 years old and over. Unemployed persons include persons looking for work and persons on public emergency work projects. Data in tables 207-209, 220, based on Current Population Survey (see Sampling Note p. 174), are not entirely comparable with those presented in tables 205, 206, 218, 219, 221-223, which are based on decennial census reports. For an explanation of differences, see Department of Commerce, Bureau of the Census; *Current Population Reports—Labor Force Bulletin* (Series P-50, No. 2). See also *Historical Statistics*, series D 11-31]

¹ Persons who had a job or business, but who did not work at all during entire survey week because of illness, bad weather, vacation, labor dispute, or because of temporary lay-off with definite instructions to return to work within 30 days of lay-off. Also persons scheduled to report within 30 days to new job.² Nonagricultural data affected by occurrence of legal holidays in survey weeks and not, therefore, directly comparable with 1947 annual averages.³ Survey week contains legal holiday.Source: Department of Commerce, Bureau of Census; *Current Population Reports*, Series P-50, Nos. 2, 13, and 19, and Series P-57.

No. 210.—EMPLOYEES IN NONAGRICULTURAL ESTABLISHMENTS, BY INDUSTRY DIVISION: 1919 TO 1951

[In thousands. Includes all full- and part-time employees who worked during, or received pay for the pay period ending nearest 15th of month. Excludes proprietors, self-employed persons, domestic servants, and personnel of armed forces. Data have been adjusted to levels indicated by Unemployment Insurance Agencies and Bureau of Old-Age and Survivors Insurance data through 1947]

¹ Data have been revised and are arithmetic means of monthly estimates of persons employed during last complete calendar week in each month ending at least one day before last of month.

² Weighted averages of wage rates as reported quarterly by crop reporters.

³ Includes farm operators doing one or more hours of farm work and members of their families doing 15 hours or more of unpaid farm work during survey week.

⁴ Includes all persons doing one or more hours of farm work for pay during survey week. Members of operator's families doing any farm work for cash wages are counted as hired workers.

⁵ New series of wage rates begun in 1948; not entirely comparable with those of previous years.

No. 228.—GROSS AND NET SPENDABLE AVERAGE WEEKLY EARNINGS OF PRODUCTION WORKERS IN MANUFACTURING INDUSTRIES, IN CURRENT AND 1939 DOLLARS: 1939 TO 1950

[Net spendable average weekly earnings represent average gross earnings of production workers in manufacturing industries less social security and income taxes for which specified worker is liable. Those net spendable average weekly earnings are then divided by the Bureau's consumers' price index adjusted to an average 1939 base, to obtain net spendable weekly earnings in 1939 dollars]

¹ Changes in United States wage rates are affected by relative number of men employed in areas with higher or lower wage rates.

Source: Department of Commerce, Bureau of Public Roads; records.

No. 230.—INDEXES OF UNION WAGE RATES AND WEEKLY HOURS IN SELECTED TRADES: 1942 TO 1951

[Data for recent years cover 77 cities. From 1942 to 1946 study made as of July 1. Since 1947 data collected as of July 1 for all trades except streetcar and bus operators for whom data are shown as of Oct. 1, and printing data for 1948 as of Jan. 2. Relative rates are percentages which indicate changes in minimum hourly wage scales. Relative hours are percentages showing changes in straight-time weekly hours, account not being taken of loss of time from slack work or other causes, nor of overtime work. Year to year changes in union scales are based on comparable quotations for each trade weighted by membership for current year. Comparable data for earlier years available from Bureau of Labor Statistics. For indexes based on 1930=100, see also *Historical Statistics*, series D 152-163]

[1947-49 average=100, except for printing where 1948-49 average=100]

TRADE	1942	1943	1944	1945	1946	1947	1948	1949	1950	1951
Building trades, total:

**No. 231.—AVERAGE HOURS AND EARNINGS ON CONSTRUCTION PROJECTS:
1935 TO 1951**

ITEM	1935	1939	1941	1943	1945	1947	1948	1949	1950	1951
FEDERALLY FINANCED PROJECTS ¹										
Average hours worked per month.....	96.7	124.7	160.3	168.1	168.8	158.8	165.8	150.1	158.0	(2)
Average monthly earnings.....	\$63.06	\$99.39	\$151.23	\$193.96	\$219.58	\$217.83	\$240.00	\$259.00	\$275.29	(2)
Average hourly earnings.....	\$0.661	\$0.797	\$0.943	\$1.154	\$1.301	\$1.372	\$1.484	\$1.628	\$1.743	(2)
PRIVATE BUILDING PROJECTS ²										
Average hours worked per week.....	30.1	32.6	34.8	38.4	39.0	37.6	37.3	36.7	36.3	37.3
Average weekly earnings.....	\$24.51	\$30.39	\$35.14	\$48.13	\$53.73	\$63.30	\$68.85	\$70.95	\$73.73	\$82.10
Average hourly earnings.....	\$0.815	\$0.932	\$1.010	\$1.252	\$1.379	\$1.681	\$1.848	\$1.935	\$2.031	\$2.201

¹ Data on hours and earnings on Federal projects reported by accounting months rather than calendar months, and since pay periods are not uniform in any given month, some contractors report data for 4 weeks and others for 5. Consequently, average hours and earnings cannot be accurately computed by weeks and figures for average monthly hours and earnings tend to show certain irregularities reflecting this method of reporting.

² Series discontinued.

³ Data shown after 1947 include publicly financed projects and off-site construction workers.

Source: Department of Labor, Bureau of Labor Statistics; data on Federal projects published currently in monthly bulletin, *Construction*; private projects in *Monthly Labor Review* and in mimeographed releases.

No. 232.—INDEXES OF PRODUCTIVITY FOR SELECTED INDUSTRIES: 1929 TO 1950

[1939=100. Productivity refers to output in physical units per man-hour of work (or per worker in agriculture and telegraph). Indexes of output per man-hour obtained by dividing indexes of production by indexes of man-hours. For explanation of various indexes used, see *Handbook of Labor Statistics*, 1950, p. 166. See also *Historical Statistics*, series D 213-217]

INDUSTRY	1929	1933	1937	1939	1941	1943	1945	1947	1948	1949	1950
All manufacturing:											
Output per man-hour.....	78.1	81.9	90.0	100.0							
Mining: ¹											
Output per man-hour.....	69.0	78.8	88.0	100.0	103.9	101.5	106.1	111.1	110.9	108.6	117.4

Paper and pulp.....	74.0	86.0	92.6	100.0	106.2	89.9	87.6	91.6	94.6	99.1	109.7
Primary smelting and refining of copper, lead, and zinc.....	89.5	88.5	87.6	100.0	98.5	92.6	89.5	94.2	92.9	96.1	105.7
Rayon and other synthetic fibers.....	30.4	60.7	79.4	100.0	133.7	148.9	170.2	206.9	235.5	239.9	286.1
Tobacco products group.....	63.7	73.7	90.5	100.0	103.7	102.1	115.7	115.8	123.3	131.2	137.1

¹ For 1929 and 1933, covers almost all industries; for 1937 to 1950, represents 6 principal industries (bituminous coal; anthracite; crude petroleum, natural gas and natural gasoline; iron; copper; and lead and zinc).

² Refers to Class I steam line-haul railroads. ³ Refers to privately owned utilities.

⁴ Refers to Class A telephone carriers.

⁵ For principal wire-telegraph and ocean-cable carriers. As satisfactory data on average weekly hours are not available before 1943, an index of output per man-hour is not presented.

Source: Department of Labor, Bureau of Labor Statistics. Published in *Handbook of Labor Statistics*, 1950 edition.

No. 233.—ESTIMATED NUMBER OF DISABLING WORK INJURIES, BY MAJOR INDUSTRY GROUP: 1947 TO 1951

¹ Preliminary.² Does not include domestic service.³ Not strictly comparable with earlier years.⁴ Based on fragmentary data.⁵ Based largely on Bureau of Mines data.⁶ Based on small sample studies.⁷ Based on comprehensive survey.⁸ Includes data for railroads, based on reports of Interstate Commerce Commission.⁹ Data not shown separately, but included in totals for all industries.Source: Department of Labor, Bureau of Labor Statistics; *Monthly Labor Review*.

No. 234.—SELECTED INJURY-FREQUENCY AND SEVERITY RATES: 1945 TO 1950

[Frequency rate is average number of disabling injuries for each million employee-hours worked. Severity rate is average number of days lost for each thousand employee-hours worked. Standard time-loss ratings for fatalities and permanent disabilities are given in *Method of Compiling Industrial Injury Rates*, approved by American Standards Association, 1945]

INDUSTRY	INJURY-FREQUENCY RATES						SEVERITY RATES

No. 235.—MONTHLY LABOR TURN-OVER RATES (PER 100 EMPLOYEES) IN MANUFACTURING INDUSTRIES: 1939 TO 1951

[Month-to-month employment changes as indicated by labor turn-over rates are not precisely comparable to those in table 213, as the former are based on data for entire month while the latter refer to a one-week period ending nearest middle of month. Labor turn-over data, beginning in Jan. 1943, refer to wage and salary workers. The turn-over sample is not so extensive as that of the employment survey—proportionately fewer small plants are included; printing and publishing (since April 1943), canning and preserving, and several other industries are not covered.]

CLASS OF TURN-OVER AND YEAR	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.

¹ Includes duplication where same workers were involved in more than 1 stoppage during year.

² "Total employed workers" includes all workers except those in occupations and professions where strikes rarely if ever occur. In general, "total employed workers" includes all employees except following groups: Government workers, agricultural wage earners on farms employing less than 6 workers, managerial and supervisory employees, and certain groups which because of nature of work cannot or do not strike (such as college professors, clergymen, and domestic servants). Self-employed and unemployed persons are excluded.

³ Obtained by multiplying average number of employed workers each year by number of days worked by most employees during year.

Source: Department of Labor, Bureau of Labor Statistics; *Handbook of Labor Statistics* and other records. Basic data are currently published in May issues of *Monthly Labor Review*.

9. Military Services and Veterans' Affairs

(Sent to print March 6, 1952)

This section includes data on the Army, the Navy, the Air Force, and on the various aspects of government programs for veterans.

Military services.—Data on the activities and status of the military services are compiled from information supplied by the various branches of the Armed Forces, the Bureau of the Budget, the Bureau of Labor Statistics, and the Selective Service System. For additional figures showing Federal Government expenditures on military services by branch of service, see Section 14, Federal Government Finances and Employment.

Veterans' Administration.—The Veterans' Administration administers laws authorizing benefits for former members of the armed forces and for the dependents and other beneficiaries of deceased former members of such forces. The Veterans' Administration benefits available under various acts of Congress include: Compensation for service-connected disability or death; pension for non-service-connected disability or death; emergency officers' retirement pay; vocational rehabilitation for service-connected disability; education and training; guaranty or insurance of home, farm, and business loans and, under certain conditions, direct home loans; readjustment allowances for unemployment or self-employment; U. S. Government and National Service Life Insurance; hospitalization; domiciliary care; outpatient medical and dental care for service-connected disability; prosthetic and other appliances; special housing for certain seriously disabled veterans; automobiles or other conveyances for certain disabled veterans; World War I adjusted service certificates; a guardianship program for the protection of estates derived from Veterans' Administration benefits paid to incompetent or minor beneficiaries; burial allowances; and burial flags.

¹ Excludes pay of retired and inactive reserve personnel.

² Prior to March 1944, includes persons on induction furlough; prior to June 1942 and after April 1945, includes Philippine Scouts.

³ Covers Navy, Marine Corps, and Coast Guard. Includes missing personnel and personnel in hands of enemy.

⁴ Covers Navy, Marine Corps, and Coast Guard. For Navy proper and Coast Guard, includes cash payments for clothing allowance balances.

⁵ Includes men's share of family allowances but excludes Government's contribution. Represents actual expenditures for Army through April 1947 and for Coast Guard for all periods. Other data represent estimated obligations based on monthly personnel count.

⁶ Represents Government's contribution. Excludes men's share.

⁷ Includes leave payments of \$716,313,000 in 1946, \$1,528,227,000 in 1947, \$3,127,000 in 1948, \$639,000 in 1949, and \$140,000 in 1950 (representing face value of bonds and cash payments) to enlisted personnel discharged prior to Sept. 1, 1946, for accrued and unused leave, and to officers and enlisted personnel then on active duty for leave accrued in excess of 60 days.

⁸ Data for January-June only. Starting July 1950, data restricted.

⁹ Family allowances included under pay roll.

Source: Department of Labor, Bureau of Labor Statistics. Current data restricted.

No. 241.—FEDERAL GOVERNMENT EXPENDITURES FOR MILITARY SERVICES AND VETERANS' SERVICES AND BENEFITS, IN RELATION TO TOTAL FEDERAL BUDGET EXPENDITURES: 1915 TO 1952

[Amounts in millions of dollars. For fiscal years ending June 30. Categories are from the functional classification of Budget expenditures (see table 360). Figures include expenditures of agencies, other than military and Veterans' Administration, for activities primarily related to military and veterans' programs. For example, figures for military services include General Services Administration expenditures for stockpiling of strategic and critical materials, and expenditures of the National Advisory Committee for Aeronautics. Similarly, figures for veterans' services and benefits include General Services Administration expenditures for veterans' educational facilities and expenditures of the Department of Labor, Bureau of Veterans' Readjustment Rights. Figures exclude expenditures for programs which, though closely related to military or veterans' services, have a primary relationship to other categories of the functional classification. Examples of expenditures excluded are those by Corps of Engineers for rivers and harbors (included in Transportation and Communication and in Natural Resources), and those by Veterans' Administration for direct loans to veterans to aid in purchase of homes (included in Housing and Community Development). For further detail as to classification of particular items in 1951 and 1952, see Special Analysis B of the *Budget of the United States, 1953*, pp. 1144-57]

1951	783,381	107,099	681,282	10,249	2,735	7,514	13,978	-----

¹ Includes Philippine Scouts; excludes contract surgeons. Data for 1923-47 include personnel in Army Air Forces and its predecessors (Air Service and Air Corps). For 1948 and 1949 includes Air Force personnel assigned to Army command; excludes Army personnel assigned to Air Force Command. Beginning 1950, figures consist entirely of Army Department personnel, since Air Force Department personnel no longer assigned to U. S. Army organizations.

² Nurse Corps included with officers. ³ Includes field clerks in 1923-25.

⁴ Includes 178 Navy medical officers on duty with Army.

⁵ Number of women in services 1923 to 1940 relatively small.

⁶ 1948 and 1949 include Army personnel assigned to Air Force Command; exclude Air Force personnel assigned to Army command. No Air Force personnel assigned to Army command beginning 1950.

⁷ Included in Air Force. ⁸ Included in Army.

1 Estimates on total troops run from 250,000 to 395,000. Greatest strength of Continental Army was about 35,000 in November 1778.

2 Number of battle deaths accounted for on available records. Total number undoubtedly much larger. No figures available on deaths by disease or other causes.

3 Believed to represent enlistments and not individual soldiers, hence is considerably in excess of actual number of troops employed.

4 Number who died of disease cannot be definitely determined. Records show 10,986 "ordinary deaths" and 411 accidental and other deaths. It is believed that many who died of wounds are reported as cases of ordinary deaths.

5 Union only. Number of deaths believed to be somewhat larger as records, especially those of southern prisoners, are far from complete.

6 Not available.

7 Number incurred among 182,674 individuals.

8 Represents Army and Air Force personnel, Dec. 1, 1941 through Aug. 31, 1945.

9 Represents Army and Air Force personnel for period, Dec. 1, 1941 through Dec. 31, 1945. Battle casualties audited as of July 1, 1946, subject to change. Nonbattle casualties based on records through Jan. 31, 1948.

10 Includes 23,042 declared dead, 11,332 died of other causes as a result of battle, and 562 reported dead from missing in action. Includes deaths from accidents, homicide, and suicide.

11 Excludes 26,706 who subsequently died of wounds.

12 Excludes 11,332 who died of other causes (see footnote 10).

13 Excludes 23,042 declared dead, 562 reported dead from missing in action (see footnote 10), and 23,941 who were returned to duty. An audit, as of Sept. 30, 1947, shows a new balance of 12 remaining in a missing status.

No. 250.—CLASSIFICATION STATUS OF SELECTIVE SERVICE REGISTRANTS, AGED 19-25: OCTOBER 31, 1950 AND 1951

[In thousands]

CLASSIFICATION STATUS	1950		1951 ¹	
	Number	Percent	Number	Percent
Total	8,311	100.0	8,108	100.0
Unclassified.....	1,474	17.7	2,220	2.7
Classified.....	6,837	82.3	7,888	97.3
Available for military service (I-A & I-A-O).....	1,462	17.6	1,162	14.3
Inducted or enlisted, including discharges and reserves (I-C).....	460	5.5	1,010	23.6
Member of reserve component or National Guard (I-D).....	153	1.9	247	3.0
Occupational deferments (II-A, II-C, II-S, and I-S) ²	108	2.0	316	3.9
Dependency (II-F-A).....	1,023	12.3	918	11.3
Veteran of World War II (IV-A).....	2,710	32.7	2,691	25.8
Physically, mentally, or morally unfit (IV-F).....	709	9.6	1,171	14.5
Miscellaneous deferments (IV-B, IV-C, IV-D, IV-E) ⁴	59	.7	73	.9

¹ Under Universal Military Training and Service Act, as amended, approved June 19, 1951 (1) age of military liability was extended to 35 years for certain specified kinds of registrants, and (2) registrants under 19 years of age were made eligible for classification. Almost none under 19 had been classified as of Oct. 31, 1951, however, and these data are therefore for ages 19 through 25.

² Derived.

³ Class II-S, college students, and Class I-S, high school and college students, did not come into existence until Sept. 27, 1951; on Oct. 31, 1950, student deferments of II-S type were included with II-A and the I-S type with I-A, postponed students.

⁴ Class IV-E became I-O on Sept. 27, 1951.

No. 263.—VETERANS RECEIVING HOSPITAL OR DOMICILIARY CARE AUTHORIZED BY VETERANS' ADMINISTRATION: 1932 TO 1951

[During fiscal year 1951, 3,072,753 visits were made by veterans to staff or fee physicians for out-patient medical care. On June 30, 1951, 7,372 veterans were domiciled in State and Territorial homes. For each person, Federal Government reimbursed these States at rate of \$120 per year through August 1939, \$240 per year through December 17, 1943, \$300 per year through May 31, 1948, and \$500 per year thereafter]

(Sent to print March 6, 1952)

(Data in this section relate to continental United States, Alaska, and Hawaii, except as noted)

Broadly considered, "social security" includes (1) all public provisions for payments to individuals on an insurance or similar basis to compensate for part of the wage loss resulting from old age, sickness, disability, unemployment, or death (social insurance and related programs); (2) assistance, or payments on a needs basis, to persons with inadequate income (public aid); and (3) medical and hospital care and services to individuals to improve their health, earning power, and welfare (health and medical services and other welfare services).

The *Social Security Bulletin* carries current data on many of these programs, and summarizes annual data for them in an annual Statistical Supplement. See also source notes to the tables in this volume for publications giving more detailed data and analyses of the figures and information on administrative factors that may affect them.

SOCIAL INSURANCE FOR INDUSTRIAL AND COMMERCIAL WORKERS

The two social insurance programs established by the Social Security Act provide protection against wage loss resulting from old age or death (Federal old-age and survivors insurance) or unemployment (Federal-State unemployment insurance). In addition, three States—Rhode Island, California, and New Jersey—administer cash benefits for workers covered by the State unemployment insurance law who suffer a wage loss because of temporary sickness; payments under a New York sickness benefits law on the workmen's compensation pattern, administered by the Workmen's Compensation Agency, became payable on July 1, 1950. These insurance programs cover employment in industry and commerce. Some State unemployment insurance laws, however, limit coverage to workers in firms with a specified minimum number of employees in a specified number of weeks in a year. The coverage of old-age and survivors insurance was broadly extended by the 1950 amendments to the Social Security Act. In general, the coverage extensions became effective on January 1, 1951. The newly covered groups include employees of nonprofit institutions under specified conditions, certain employees of State and local governments under voluntary agreements negotiated between the States and the Federal Security Administrator, most Federal civilian employees who are not under a Federal retirement system, most self-employed persons other than farm operators and certain specified professional people, household workers in private homes and farm workers who are "regularly" employed as defined by law. Employment outside the continental United States and in the Virgin Islands and Puerto Rico is covered on the same basis as employment within continental United States. A revised definition of the term "employee" extends coverage to many persons as employees. The major groups still excluded are self-employed farmers and specified professional persons, and farm and domestic workers who are not "regularly" employed.

Old-age and survivors insurance (tables 269-276) provides monthly retirement benefits to fully insured workers, as defined below, at age 65 or over and supplementary monthly benefits to their wives, if they are aged 65 or have a child of the wage earner in their care, and to dependent children under age 18. Benefits may be paid at age 65 to the dependent husband of a retired woman beneficiary who was currently insured

at the time of her entitlement. Monthly survivor benefits are payable to certain dependents of fully or currently insured workers—children under age 18, and widows who have in their care a child beneficiary of the deceased insured worker. In some cases, the divorced wife of the deceased worker may qualify for survivors benefits if she has their child in her care. If the deceased worker was fully insured, survivor benefits are payable to his widow at age 65. The dependent widower of a deceased woman worker who was both fully and currently insured at her death, may qualify for a widower's benefit at age 65. If the worker died fully insured and leaves no widow, widower or unmarried child immediately or potentially eligible for benefits, benefits are payable to parents aged 65 or over who were chiefly dependent on him. A lump sum is paid to the spouse who was living with the worker at the time of death or, if there is no such spouse, as reimbursement for burial expenses to a person or persons equitably entitled to such payment.

A worker is fully insured if he has at least 1 quarter of coverage—earned at any time after 1936—for every 2 calendar quarters that have elapsed since the end of 1950 (or since attainment of age 21 if later) and before the quarter in which he attains age 65 or dies (with a minimum of 6 such quarters of coverage), or if he has at least 40 quarters of coverage. A quarter of coverage is a calendar quarter in which a worker receives wages of at least \$50 or, after 1950, is credited with at least \$100 of self-employment income. A worker is currently insured if he has at least 6 quarters of coverage within the period of 13 quarters ending with the quarter of death or entitlement to retirement benefits.

Monthly benefits and lump-sum payments are based on the worker's average wage as legally defined. Under the 1950 amendments, World War II veterans are entitled to wage credits of \$160 for each month of military service during the war period, unless a benefit based in whole or in part on such service becomes payable by a Federal agency other than the Veterans' Administration. Benefits are suspended for any month in which the beneficiary, or the person on whose wage record benefits are based, was under age 75 and earned wages of more than \$50 in covered employment or was charged with net earnings from self-employment of more than \$50. Covered workers and their employers each pay contributions of 1.5 percent on the worker's wages, not counting amounts above the first \$3,600 in a year. The rate is scheduled to rise by steps until it reaches 3.25 percent each in 1970. Self-employed persons pay 1.5 times the employee rate. An amount equal to the contributions collected is appropriated for deposit in the old-age and survivors insurance trust fund, from which benefits and administrative costs are paid. The wage credits of a worker—the amounts of wages and self-employment income up to a maximum of \$3,600 a year—are recorded in individual employee accounts maintained by the Bureau of Old-Age and Survivors Insurance.

State unemployment insurance laws (tables 277–281) pay benefits to unemployed covered workers who meet the qualifying conditions specified in the State law. In most States, a waiting period of 1 week must be served before payments begin. Benefits are payable for a maximum number of weeks, amounting to 20 in 16 States, 26 in 18 States at the end of 1951 but ranging from 12 to 25 weeks among the others. In theory, weekly benefit amounts represent about 50 percent of wages, but the maximum limits on individual payments, which range from \$20 to \$30 under the several State laws, cut down the proportion for many workers in many States. Eleven States take account of the unemployed worker's dependents in determining the amount of benefits payable to him. Four States now pay benefits to workers whose unemployment is caused by sickness.

The standard rate of contributions payable by employers for unemployment insurance is 2.7 percent of wages paid, not counting amounts above the first \$3,000 a year paid to an employee. In two States, employees also contribute for unemployment

insurance. All States adjusted employer contribution rates in 1951 in accordance with "experience rating," which is based in general on the extent to which their employees have drawn benefits. The Federal Government imposes a Federal unemployment tax on employers of eight or more in industry or commerce; against this Federal tax, employers credit, up to 90 percent of their Federal liability, contributions they have paid under the State law or would have paid if they had been assessed at the standard rate. Contributions collected by States are deposited to State accounts in the Federal unemployment trust fund, from which States withdraw amounts needed for benefit payments. The Federal Government makes grants to States to cover the necessary administrative costs of State systems that meet statutory Federal requirements.

In the four States which have temporary disability programs, employees pay contributions for these benefits. Other States which now collect or in the past have collected employee contributions for unemployment insurance may use that money to finance cash sickness benefits.

SOCIAL INSURANCE FOR RAILROAD WORKERS

The social insurance programs under the Railroad Retirement Act and Railroad Unemployment Insurance Act cover employees of railroads (including the Railway Express Agency and the Pullman Company) subject to part I of the Interstate Commerce Act, affiliated companies such as refrigerator-car loan companies performing services connected with railroad transportation, organizations such as railroad and traffic associations maintained by two or more covered employers, and standard railway-labor organizations, national in scope. These programs are administered by the Railroad Retirement Board, which publishes operations data in its *Monthly Review* and *Annual Report*.

Retirement and survivor benefits (tables 286 and 288).—The Railroad Retirement Act, as amended October 30, 1951, provides retirement annuities for aged and disabled workers and for wives of retired employees, and monthly and lump-sum benefits to survivors of deceased workers. The most recent changes in the Railroad Retirement Act became effective November 1, 1951; consequently, not all the benefits described here are reflected in the tables that follow.

Old-age annuities are payable at age 65 after 10 years of service, or at reduced rates (full rates for women employees) at ages 60 to 64 after 30 years of service. Total and permanent disability annuities are payable under age 65 after 10 years of service; and occupational disability annuities, at ages 60 to 64 after 10 years of service, or under age 60 after 20 years of service, provided the employee is connected with the industry. Retirement is never compulsory.

Annuities are payable at age 65 to a wife (or dependent husband) of a retired employee and to a wife under age 65 if she has in her care dependent, unmarried children of the employee who are under 18 years of age. In any event, retired employees must be 65 years of age.

Monthly survivor benefits are paid to a qualified widow or dependent widower at age 65 or over; to a widow under 65 if she has in her care dependent, unmarried children of the employee under 18 years of age; to such children themselves; and to dependent parents at age 65 if the employee left no eligible widow, dependent widower, or children. In addition, a lump-sum death benefit is payable when there are no survivors immediately eligible for monthly benefits at the time the employee dies.

A residual payment is payable in certain cases where the total benefits paid is less than the employee's retirement taxes.

The credits of employees who die or retire with less than 10 years of railroad service are transferred to the Social Security Administration, and any benefits which may be due (except a residual payment) are paid by that agency.

Funds for the retirement and survivor system come from a tax on earnings up to \$300 a month under the Railroad Retirement Tax Act. The tax, divided equally

between the employer and employee, is now at the maximum rate of 12½ percent.

Unemployment and sickness benefits (tables 287 and 288).—The Railroad Unemployment Insurance Act provides benefits for unemployment and sickness (including maternity) payable in a benefit year (July 1–June 30) to any employee who earned at least \$150 in covered employment in the “base year” (the calendar year preceding the beginning of the benefit year). Benefits, ranging from \$1.75 to \$5.00 per day, depending upon the employee’s base year earnings, are payable for each day of unemployment or sickness over 7 in the first 14-day registration period, and for each day over 4 in subsequent registration periods, up to a maximum of 130 days in a benefit year for each type of benefit.

The unemployment insurance program is financed entirely by contributions from covered employers, paid directly to the Board. The contribution rate for any year depends upon the balance in the unemployment insurance account and may vary from ½ to 3 percent of payrolls (exclusive of individual earnings in excess of \$300 a month). Since January 1, 1948, the minimum rate has been in effect.

RETIREMENT SYSTEMS FOR FEDERAL GOVERNMENT EMPLOYEES

One contributory retirement system for Federal civilian employees and two non-contributory systems (for special classes of employees) are administered by the Civil Service Commission. In addition, there are separate retirement systems, some contributory and others noncontributory, in operation for the armed forces and special classes of Federal employees.

The Civil Service Retirement Act, as passed in 1920 and amended subsequently, provides for age, optional, disability and discontinued service annuities for employees in the executive, judicial, and legislative branches of the United States Government not subject to another retirement system, except those employees excluded by executive order because the tenure of employment is intermittent or of uncertain duration. It also covers those employees in the municipal government of the District of Columbia not subject to special retirement systems for teachers, firemen, and policemen. The amendment of Feb. 28, 1948, provided annuities for the widows and minor children of deceased employees, and, under certain conditions, to the survivors of deceased annuitants. Approximately 1,767,000 employees were subject to this act as of June 30, 1951. The employee contribution rate, computed on base pay, has been 6 percent since July 1948. The rate had been 5 percent from July 1942–June 1948, 3½ percent from July 1926–June 1942, and 2½ percent from August 1920–June 1926.

The act does not require specific payments from the Government as employer, but implies that the Government will furnish the amounts necessary to finance the fund and to continue the act in full force and effect. Appropriations have been made annually by the Congress to the fund since the fiscal year 1929.

WORKMEN'S COMPENSATION

All States now have programs providing protection against work-connected injuries and deaths. In addition to the State laws, there are Federal workmen’s compensation laws covering employees of the Federal Government, private employees in the District of Columbia, and longshoremen and harbor workers. Most of the State workmen’s compensation laws exempt such employments as agriculture, domestic service and casual labor; the majority exempt employers who have fewer than a specified number of employees. Occupational diseases, or at least specified diseases, are compensable under most laws.

In general, compensation is based on a proportion of wages; for total disability the proportion is commonly between three-fifths and two-thirds. However, all laws place a maximum amount on the weekly benefit payment—including dependents allowances, the maximum is \$25 or more in most laws, with 11 as high as \$35 or more.

In most States, total payments to injured workers or to survivor families are limited as to time, amount, or both. All compensation acts require that medical aid be furnished to injured employees; in about one-third of the laws, there are either duration or cost limitations—or both—on the amount of medical benefits provided.

To ensure that compensation will be paid when due, workmen's compensation laws require that a covered employer obtain insurance or give proof of his qualifications to carry his own risk (self-insurance). In most of the States the employer is permitted to insure with private insurance companies, but in 7 of the 18 States which have State insurance funds, employers are required to insure their risks in the State fund.

Total payments of all types of insurers for compensation and medical benefits, by States and for the years 1941 to 1950, appear in table 289.

PUBLIC ASSISTANCE

Public assistance (tables 290-292) is provided through five major programs, all administered by the States and localities. Payments to four groups of needy persons—the aged, the blind, the permanently and totally disabled, and children whose need arises from certain causes—are financed in part from Federal funds granted to States under the Social Security Act. The program for aid to the permanently and totally disabled, established under the Social Security Act Amendments of 1950 (Public Law 734) became effective October 1, 1950. Aid to other needy persons is furnished for the most part through general assistance, toward which the Federal Government makes no contribution. In addition, one State aids dependent children, and three aid blind persons, without Federal funds.

To receive a Federal grant for assistance payments and administrative expenses under any of the four programs established by the Social Security Act, a State must have a plan approved as meeting the requirements of the Federal act. Each State establishes the conditions under which needy people may receive assistance and determines how much they shall get. The maximum amount in which the Federal Government will share is \$50 per month for old-age assistance, aid to the blind, and aid to the permanently and totally disabled and, for aid to dependent children, \$27 for one needy adult with whom the child is living (beginning October 1950 under Public Law 734), \$27 for the first child and \$18 for each additional child in a family. The Federal Government pays three-fourths of the first \$20 of the average monthly assistance payment for aged, blind, and permanently and totally disabled recipients and three-fourths of the first \$12 for each eligible person in an aid to dependent children case plus one-half the remainder of matchable expenditures. For all four programs the Federal share of the cost of State administration is one-half the sums expended.

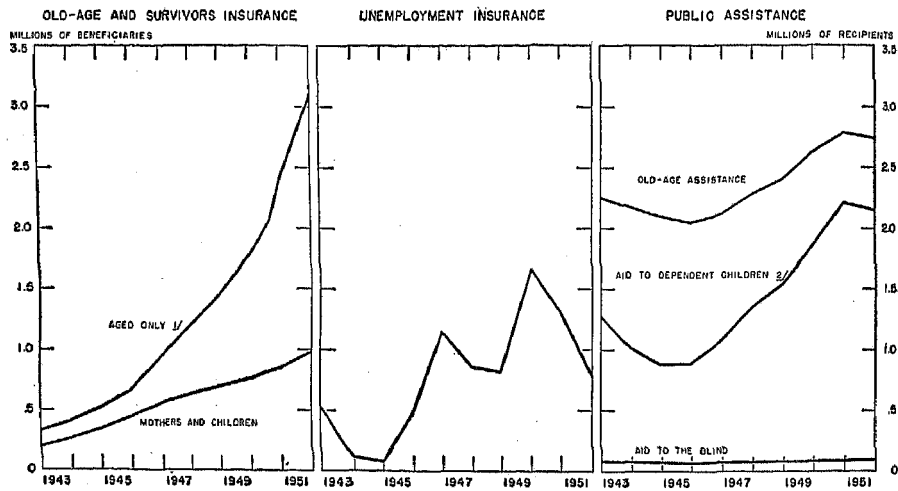

HEALTH AND WELFARE SERVICE

Programs providing health and welfare services are aided through grants to States for maternal and child-health services, services for crippled children, child-welfare services, vocational rehabilitation and public health services, and hospital construction. The Children's Bureau, a part of the Social Security Administration, administers the first three of these programs; the others are administered by the Office of Vocational Rehabilitation and the Public Health Service, both units of the Federal Security Agency.

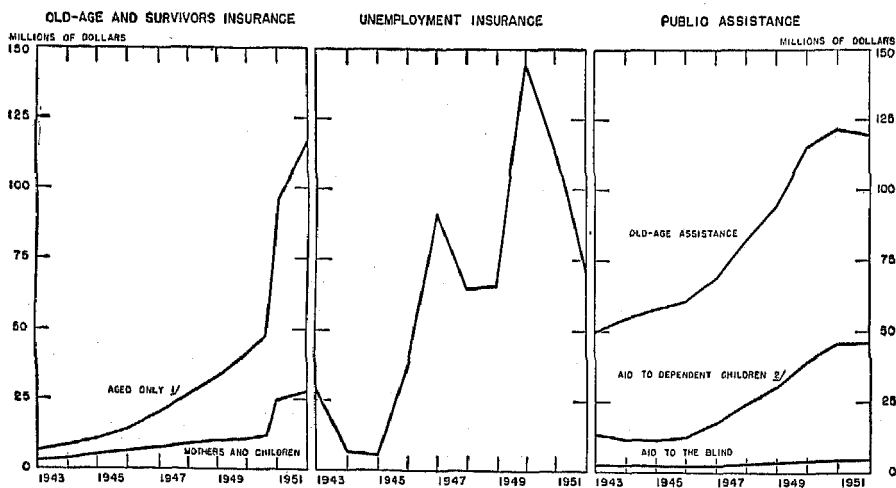

FIG. XI.—SOCIAL SECURITY OPERATIONS: 1943 TO 1951

[Old-age and survivors insurance: Average monthly number and amount of monthly benefits (current payment status). Unemployment insurance: Average weekly number of beneficiaries and average monthly amount of benefits paid under all State laws. Public assistance: Average monthly number of recipients and average monthly amount of payments under all State programs]

INDIVIDUALS RECEIVING PAYMENTS

SOCIAL SECURITY PAYMENTS

¹ Receiving old-age, wife's or husband's, widow's or widower's, or parent's benefit. Beginning September 1950, includes a small proportion of wife beneficiaries under age 65 with child beneficiaries in their care.

² Children plus one adult per family when adults are included in assistance group; before October 1950, partly estimated.

¹ Excludes refunds of employee contributions to employees leaving service.

² State unemployment insurance and employment service programs, reconversion unemployment benefit program for seamen, and administrative expenditures of Bureau of Employment Security.

³ Includes benefits paid by private plans under State law in California and New Jersey; excludes hospital benefits (included under hospital and medical care below) payable in California starting January 1950.

⁴ Represents pensions, annuities, burial awards, and readjustment allowances and estimated administrative expenditures; excludes expenditures from Government life insurance fund.

⁵ Includes expenditures for medical services, approximately \$175 million in 1949 and \$185 million in 1950. Includes payments by employers and private insurance carriers of benefits payable under public law.

⁶ Excludes administrative expenditures.

⁷ Old-age assistance, aid to blind, and aid to dependent children.

⁸ Excludes all medical expenditures (both health services and research) of Military Establishment and Atomic Energy Commission; health services provided in connection with primary and secondary public education; medical services included under public aid programs above; medical care included under workmen's compensation above; international health activities; professional training of nurses, physicians, etc.; and expenditures for medical services and research subordinate to performance of other functions.

⁹ Includes hospital and outpatient care in public institutions and maintenance and improvement of existing facilities. Excludes expenditures included under institutional and other care below.

¹⁰ Federal includes cost of hospital planning and surveys; State and local, new construction only.

¹¹ Includes expenditures of U. S. Public Health Service (except for international activities, National Institutes of Health, medical and hospital care and hospital construction, professional education and training) and Food and Drug Administration; State and local includes all community health and sanitation expenditures by public agencies except those in connection with schools and public welfare and those classified elsewhere as health and medical services.

¹² Federal includes programs for crippled children, and emergency maternity and infant care; State and local expenditures represent required matching of Federal grants for maternal and child health and crippled children.

¹³ Medical care and service expenditures under Vocational Rehabilitation Act.

¹⁴ Represents all expenditures (except for education and training) of National Institutes of Health, U. S. Public Health Service, and estimated amounts appropriated by State and local governments for medical research.

¹⁵ Represents in-service training of Children's Bureau and of National Institutes of Health and other units of U. S. Public Health Service. Excludes professional training of nurses, physicians, etc., and expenditures in State-supported medical schools.

¹⁶ Expenditures under Vocational Rehabilitation Act other than for medical services.

¹⁷ Veterans' Administration programs for vocational rehabilitation, automobiles and other conveyances for disabled veterans, and housing for paraplegic veterans.

¹⁸ Federal expenditures are for Columbia Institute for the Deaf, U. S. Soldiers' Home, and U. S. Naval Home, and for domiciliary care of veterans; State and local expenditures in institutions for chronic care, for handicapped and aged.

¹⁹ Funds are also available from private organizations and payments from parents; in 1949 these nongovernmental funds amounted to \$182 million, and in 1950, \$209 million.

²⁰ Excludes estimated \$40-\$50 million for care of children in foster homes.

¹ Based on Census Bureau estimates of total population, excluding armed forces overseas, as of July 1; data for 1950 for the Territories and possessions based on 1950 Census.

² Old-age assistance, aid to dependent children, and aid to blind.

³ Maternal and child health services, services for crippled children, and public health services; venereal disease control, beginning 1939; emergency maternity and infant care, from 1943 to 1949; tuberculosis control, beginning 1945; cancer control, mental health, and hospital survey and construction, beginning 1948; heart disease control and water pollution control, beginning 1950.

⁴ Vocational rehabilitation and State and Territorial homes for disabled soldiers and sailors; child welfare services, beginning 1939; community war service day care in 1943; and national school lunch program, beginning 1947.

⁵ Colleges of agricultural and mechanic arts, vocational education, education of the blind, and State and municipal marine schools; emergency Office of Education grants from 1939 to 1941; and maintenance and operation of schools in certain areas, beginning 1947.

¹ Average monthly number, except as otherwise noted.

² Includes benefits paid to aged wives, to aged dependent husbands (first payable September 1950), and to dependent minor children of living beneficiaries.

³ Includes a small but unknown number and amount of disability and survivor beneficiaries and benefits.

⁴ Old age retirement data include small amount of survivor payments and, for years prior to 1950, significant amount of disability payments now shown separately.

⁵ Benefits for fiscal year (usually ending June 30); beneficiaries for last month of fiscal year. Data for 1949 and 1950, preliminary.

⁶ Under Veterans' Administration. Retirement data only for veterans of Spanish-American War, Boxer Rebellion, and Philippine Insurrection. Disability data include pensions and compensation, and subsistence payments to disabled veterans undergoing training. Lump-sum payments are for burial of deceased veterans.

⁷ Not available.

⁸ A small but unknown amount of lump-sum death payments included with monthly survivor payments. Disability benefits exclude payments for medical care. Data for 1949 and 1950, preliminary.

⁹ Benefits payable in Rhode Island beginning April 1943, in California beginning December 1946, and in New Jersey beginning January 1949. Excludes New York, first payable July 1950; data not available. Includes private-plan benefits in California and New Jersey and private-plan beneficiaries in California. Maternity data included for Rhode Island; hospitalization benefits excluded for California. Number represents average weekly number of beneficiaries.

¹⁰ Number represents average number of beneficiaries during 14-day registration period. Temporary disability benefits first payable July 1947; includes maternity data.

¹¹ Average weekly number.

¹² Beginning September 1944 for unemployment allowances (beneficiaries represent average weekly number) and beginning November 1944 for self-employment allowances (beneficiaries, average monthly number).

¹ Exclude numbers under railroad-retirement program.

² Partly estimated; adjusted for workers having more than 1 account. Quarterly data unadjusted for workers employed during quarter but not reported after quarter in which they received their first \$3,000 in year prior to 1951, and \$3,000 in year after 1950.

³ Unadjusted for nontaxable wages erroneously reported and wages excluded in benefit computations. Wages in excess of \$3,000 a year prior to 1951 and \$3,000 a year after 1950 paid to worker by any 1 employer are not taxable. From 1940-50, all wages in excess of \$3,000 a year and after 1950 all wages in excess of \$3,000 received by a worker are excluded in benefit computations.

⁴ Partly estimated; adjusted for workers having more than 1 account. Quarterly data adjusted for workers employed during quarter but not reported after quarter in which they received their first \$3,000 in year prior to 1951 and their first \$3,000 in year after 1950.

⁵ Includes all wages in covered industries of workers earning over \$3,000 a year prior to 1951 and \$3,000 a year after 1950.

⁶ Preliminary estimate, except employee accounts established.

⁷ Excludes newly-covered self-employed persons.

¹ Benefit is subject to no deduction or only to deduction of fixed amount which is less than current month's benefit.

² Including both old and new benefit rates.

³ Including net adjustments for 1944-49. Benefit is terminated when a beneficiary dies or loses entitlement to a benefit for some other reason. Adjustments result from operation of maximum and minimum provisions, recomputations, and from other administrative actions. Terminations only are shown for 1950-51.

¹ Distribution by type estimated. Supplementary benefits paid to wives, dependent aged husbands and children of retired (old-age) beneficiaries. Survivor benefits paid to following survivors of deceased insured workers: Aged widows, dependent aged widowers, children, younger widows with child beneficiaries in their care, or dependent aged parents.

² Payable with respect to workers who died after December 1939, and before September 1950, if no survivor could be entitled to monthly benefits for month in which worker died, or with respect to all workers who died after August 1950.

³ Exceeds number of deceased workers with respect to whose wage records payments were certified.

⁴ Less than 50.

⁵ Less than \$500.

No. 276.—OLD-AGE AND SURVIVORS INSURANCE—SAMPLE (1 PERCENT) OF WORKERS WITH WAGE CREDITS AT SOME TIME IN 1937-49, BY CUMULATIVE WAGE CREDITS IN 1937-49, INSURANCE STATUS JANUARY 1, 1950, AND AGE GROUP

[1-percent sample of all workers with wage credits identified for posting by July 1950, only partly adjusted for duplication of workers with more than 1 account. Includes workers who died during period 1937-49 and workers who became entitled to primary insurance benefits before January 1, 1950. Age represents age at birthday in 1949. Since data are derived from a sample they are subject to a sampling variation which may be large where figures shown are small. Because of mechanical processes and extent of adjustments for delayed wage records, data may differ slightly from corresponding data in other published tables. Data corrected to Jan. 8, 1952.]

¹ A worker who is fully insured as of a given date (in this table, Jan. 1, 1950) is one who has had at least 6 calendar quarters of coverage and not less than 1 such quarter for each 2 calendar quarters elapsed after 1936 or after quarter in which he attained age 21, whichever is later, and up to but excluding quarter in which he died, attained age 65, or given date, whichever first occurred. A worker who is currently insured as of a given date is one who has had at least 6 quarters of coverage during the period consisting of the quarter of the date, or the quarter in which he died, and the 12 quarters immediately preceding such quarter. Uninsured workers are those who have some wage credits but are neither fully nor currently insured as of given date. A quarter of coverage is a calendar quarter in which the worker has been paid not less than \$50 in taxable wages.

² Total includes 6,728 workers of unreported age not shown separately, of whom 335 were fully insured, 146 currently insured only, and 6,247 uninsured. Total excludes 54 workers for whom information was incomplete with respect to the characteristics reported in this table.

³ No workers in sample cell. ⁴ Inapplicable under provisions of Social Security Act.

¹ Employer becomes subject to State unemployment insurance law when he has employed specified minimum number of workers on at least 1 day in each of specified number of weeks within current or preceding calendar year; coverage provisions shown are in effect for 1949 and 1950.

² Estimated number of different workers in each State who have earned wages in covered employment sometime during calendar year. Totals adjusted to eliminate duplication due to shifting of workers between States during year.

³ Average of 12 monthly figures each of which is total of number of workers in covered employment in pay period of each type (weekly, semimonthly, etc.) ending nearest 15th of month.

⁴ Total wages in covered employment for all pay periods ending in year.

⁵ And wages of \$100 in any calendar quarter.

⁶ And wages of \$75 in a calendar quarter. ⁷ Or 25 in 1 week.

⁸ Wages of at least \$50 to each of at least 4 workers during each of 3 calendar quarters.

⁹ But 8 in 20 weeks for employers located outside the corporate limits of a city, village, or borough of 10,000 or more population. ¹⁰ Or wages of \$500 in a calendar year. ¹¹ Or wages of \$10,000 in any calendar year.

¹² And wages of \$225 in any calendar quarter. ¹³ Or wages of \$450 in a calendar quarter.

¹⁴ And wages of \$500 in same calendar quarter; prior to Apr. 1, 1949, 4 in 1 day and wages of \$500 in same calendar quarter.

¹⁵ And wages of \$140 in any calendar quarter.

¹⁶ Or wages of \$6,000 in preceding calendar year. Includes employers with wages of \$10,000 in a calendar quarter toward which not more than \$1,000 per employee need be counted. ¹⁷ And wages of \$500 in a calendar year.

¹ Sum of balances in State clearing account and benefit-payment account, and in State unemployment trust fund account in U. S. Treasury. State unemployment trust fund accounts include interest credited.

² Contributions, penalties, and interest from employers and contributions from employees. Adjusted for refunds of contributions and for dishonored contribution checks.

³ Adjusted for voided benefit checks. Excludes \$312,000 paid in 1950 to seamen under the Reconversion Unemployment Benefits for Seamen program which expired June 30, 1950.

¹ Excludes railroads and allied groups subject as of July 1, 1939, to Railroad Unemployment Insurance Act.² Until January 1945, represents covered employment on last pay roll of each type (weekly, semimonthly, etc.) ending in month; thereafter, employment on pay roll of each type ending nearest fifteenth of month. Annual figures represent averages of 12 monthly figures.³ Total wages in covered employment for all pay periods ending within period.⁴ Annual figures represent first payments made to beneficiaries; monthly figures represent average weekly number of weeks of unemployment compensated during month.⁵ Beginning with January 1949, represents weeks claimed by continued claims.⁶ Annual amounts adjusted, but monthly figures not adjusted, for voided benefit checks.⁷ Includes \$1,019,000 for 1947, \$3,331,000 for 1948, \$1,287,000 for 1949, and \$312,000 for 1950 paid to seamen under the Reconversion Unemployment Benefits for seamen program. Program expired June 30, 1950.

No. 289.—WORKMEN'S COMPENSATION PAYMENTS, BY STATES: 1941 TO 1950

[Estimated by Social Security Administration. Payments represent cash and medical benefits and include insurance losses paid by private insurance carriers (compiled from the *Spectator*), net disbursements of State funds (from *Spectator*, *Argus Casualty and Surety Chart*, and State reports; estimated for some States), and self insurance payments (estimated from available State data). Calendar year data, except fiscal year data for Federal employees, for a few States with State funds, and for 1949 and 1950 figures for Montana and Virginia. Includes benefit payments under Longshoremen's and Harbor Workers' Compensation Act and Defense Base Compensation Act for States in which such payments are made]

[In thousands of dollars]

¹ Includes children and 1 parent or other adult relative in families in which requirements of at least 1 such adult were considered in determining amount of assistance.

² Includes 569 recipients of aid to partially self-supporting blind in California and 20 in Washington and payments to recipients; such payments are made without Federal participation. For Pennsylvania includes payments made without Federal participation. In June recipients of these payments numbered about 5,100.

³ Partly estimated; total not as large as sum of State figures because of adjustment for 2 States. See footnote 7.

⁴ Excludes some cases and local funds not administered by State agency. ⁵ Estimated.

⁶ Excludes cases receiving assistance in kind only and, for a few counties, cases receiving cash payments.

⁷ Includes unknown number of cases receiving medical care, hospitalization, or burial only.

⁸ Represents program administered without Federal participation.

⁹ Excludes estimated duplication between programs; 1,544 cases were aided by county commissioners and 6,676 cases under program administered by State Board of Public Welfare.

¹ Through June 30, 1940, data relate entirely to employees retired voluntarily or involuntarily under various age and length of service requirements and to employees with at least 5 years of service who became totally disabled for the position occupied prior to eligibility for retirement. Beginning Jan. 1, 1940, employees may elect a joint and survivor annuity, and beginning Feb. 29, 1948, widows and minor children of deceased employees and annuitants are eligible for survivor annuities under certain conditions; number of survivor annuities in force as of June 30 increased from 26 in 1941 to 30,468 in 1951. Beginning Jan. 24, 1942, employees with at least 5 years service who separate voluntarily or involuntarily prior to eligibility for retirement may obtain deferred annuity at age 62; such annuitants increased from 5 as of June 30, 1942, to 30,110 as of June 30, 1951. Excludes annuities purchased by voluntary contributions.

² Data relate to refunds of amounts to employees' credit in fund paid to employees not eligible for an annuity or who, if eligible, elected to take a refund.

³ Data relate to refunds of amounts to employees' credit paid to designated or other beneficiaries of employees who died while in service or after separation.

⁴ Data relate to refunds of balance of amount to annuitants' credit at time of death paid to designated or other beneficiaries of annuitants. Includes refunds to disability annuitants, whose entitlement to an annuity was terminated, and unexpended balances paid upon termination of survivor annuities.

⁵ Due to adjustments, number in force at end of fiscal year does not in all cases equal number certified less number terminated in that year, plus number in force at end of preceding fiscal year.

11. Income and Expenditures

(Sent to print March 19, 1952)

The income statistics in this section are of two fundamental types: First, those which provide data on aggregate amounts (national income and national product data) and second, those which provide data on the distribution of families or persons by size of their income (size distribution data). Statistics representing the former type are compiled primarily by the Office of Business Economics of the Department of Commerce and are based on a wide variety of data from government and private sources. Statistics representing the latter type of income data are derived from sample surveys of income conducted by several different agencies. Since these surveys were taken at different times and for different purposes, they differ somewhat in the definitions of income and the income-receiving unit. In addition to the income data, expenditures and savings of families and single persons have been included in this section.

Nation's economic budget.—The Nation's Economic Budget is designed to give a synoptic picture of the economy. (See table 301.) It shows the magnitudes of income and expenditure of major economic groups, net additions and absorption of saving by these groups, and the gross national product or income. Statistics are based on the "National income and product" accounts of the Department of Commerce, except that the Federal Government account is based mainly on "Cash receipts from the public" and "Cash payments to the public" as computed by the Bureau of the Budget and State-local cash receipts and payments are rearranged to approximate a cash basis.

Business receipts retained include corporate retained earnings plus inventory valuation adjustment and capital consumption allowances of all business. Government cash loans to the "rest of the world" are considered as a transfer payment and have been entered as a receipt in the international account. However, unilateral transfers or grants to foreign countries are included as a direct expenditure for goods and services of either consumers or government and are netted out of the international account.

The adjustments for receipts relating to gross national product include the statistical discrepancy and the operating surplus of Government enterprises less subsidies. Other adjustments arise from the fact that the basis of accounting for the income and product series differs from that used in Government cash receipts and payments, particularly in the timing of receipts or payments, and that the cash concept of Government operations is somewhat more inclusive than that incorporated in the income and product series.

A fuller explanation of the Nation's Economic Budget may be found in the Annual Review of the Council of Economic Advisors, included in the *Economic Report of the President to Congress*.

Aggregate income.—The aggregate income statistics presented here are of three general types: Gross national product or expenditure, national income (by distributive shares and by industrial origin), and income payments to individuals by States.

Gross national product is the market value of the output of goods and services produced by the Nation's economy, before deduction of depreciation charges and other allowances for business and institutional consumption of durable capital goods.

Other business products used up by business in the accounting period are excluded. The Nation's economy in this context refers to the labor and property supplied by residents of the Nation. Gross national product comprises the purchases of goods and services by consumers and government, gross private domestic investment, and net foreign investment. Gross national product differs from national income mainly in that no allowance is made for depreciation or for indirect business taxes, both of which items constitute expenses in the computation of business net incomes.

National income is the aggregate earnings of labor and property which arise from the current production of goods and services by the Nation's economy. Thus, it measures the total factor costs of the goods and services produced by the economy. Earnings are recorded in the forms in which they accrue to residents of the Nation, inclusive of taxes on those earnings.

National income originating by industry is the sum of factor costs incurred by the industry in production. Hence, it is the net value added to production by the industry, measured at factor costs.

Personal income is the current income received by persons from all sources, inclusive of transfers from government and business but exclusive of transfers among persons.

Income payments to individuals is a measure of income received from all sources during the calendar year by residents of each State. It comprises income received by individuals in form of (1) wages and salaries, after deduction of employees' contributions to social security, railroad retirement, railroad unemployment insurance, and government retirement programs; (2) proprietors' incomes, representing net income of unincorporated establishments, including farms, before owners' withdrawals; (3) property income, consisting of dividends, interest, and net rents and royalties; and (4) "other" income, which includes public assistance and other direct relief; labor income items such as work relief, government retirement payments, veterans' pensions and benefits, workmen's compensation, and social insurance benefits; mustering-out payments to discharged servicemen; family-allowance payments and voluntary allotments of pay to dependents of military personnel; enlisted men's cash terminal leave payments; and State government bonuses to veterans of World War II. For discussion of distribution by State, see headnote, table 309.

Size distribution of income.—The statistics on the size distribution of income are based on data collected in various field surveys of income which have been conducted since 1939. The primary purpose of these field surveys was to show the distribution of families or persons by income levels rather than the aggregate amounts of income received by these families. Whereas the aggregate income data provide an indication of the level of total purchasing power, the field survey size distribution data, by showing the numbers and kinds of families and persons in each income bracket, provide an indication of the distribution of purchasing power in the population. In each of these field surveys trained enumerators interviewed representative samples of the civilian noninstitutional population with respect to the income received by the respondents or their families during the previous year.

The income represented in these tables is consumer money income, defined as the sum of civilian money wages and salaries; net farm entrepreneurial income; net nonfarm entrepreneurial income from business or profession; interest, dividends, and periodic income from estates and trusts; rents and royalties; armed forces pay of persons living in private households at the time of the survey; dependency allotments and contributions from members of the armed forces; veterans payments; social security payments, unemployment and workmen's compensation, pensions and assistance; and miscellaneous items such as periodic contributions for support from persons not

in the household, periodic payments from insurance policies or annuities, and alimony. The income is for the calendar year and is before deduction of income taxes (except for 1944 Bureau of Labor Statistics data in table 315) or social security taxes. Nonmoney items of income are not covered. None of the aggregate income concepts (gross national product, national income, or personal income) is comparable with consumer money income. The nearest approximation is personal income.

Expenditures and savings.—The Bureau of Labor Statistics most recent survey of family income, expenditures, and savings on a Nation-wide basis for which tabulations are available is for the year 1944. The Survey of Prices Paid by Consumers in 1944 was based on a sample of 1,700 families and single persons in 28 metropolitan districts and 20 cities with populations under 50,000 outside of metropolitan districts. These places were selected to represent (with respect to region, State and city size) all cities in the United States with a population of 2,500 or more.

For this study a family is defined as a group of persons dependent on a common or pooled income for the major items of expense and usually living in the same household. A single person is one who lives alone or with unrelated people in a private home, lodging house, or hotel. From 1945 through 1949, the Bureau has made similar surveys of family expenditure in selected cities each year to obtain data necessary to check the prices and weighting patterns used in the consumers' price index; 1945 expenditure data were obtained for Birmingham, Ala.; Indianapolis, Ind.; and Portland, Oreg. (see *Monthly Labor Review*, June 1948); 1946 data for Milwaukee, Wis.; Scranton, Pa., and Savannah, Ga. (available upon request to the Bureau of Labor Statistics); 1947 data for Washington, D. C.; Manchester, N. H.; and Richmond, Va. (see *Monthly Labor Review*, April, June-August, and October 1949); 1948 data for Denver, Colo.; Detroit, Mich.; and Houston, Tex. (see *Monthly Labor Review*, December 1949); and 1949 data for Memphis, Tenn. (see *Monthly Labor Review*, June 1951).

A Nation-wide Consumer Expenditure Survey was made for 1950 by the Bureau of Labor Statistics in 91 cities yielding 12,500 usable schedules from families and single consumers. Data from this survey were not available for inclusion here at the time this section was sent to the printer. For field methods and purposes, see *Monthly Labor Review*, January 1951. For selection of cities for the survey, see *Monthly Labor Review*, April 1951.

1950 Census data.—As a part of the 1950 Census of Population, the Bureau of the Census collected data on the distribution of income from a sample of the population. Figures in this section from the 1950 Census (see table 316) are those available at the time this section was sent to the printer and are preliminary sample data based on a sample of 150,000 persons for the nation as a whole.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series A 117-133") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

No. 309.—INCOME PAYMENTS TO INDIVIDUALS, BY STATES: 1929 TO 1950

"Income payments to individuals" is a measure of income received from all sources during the calendar year by the residents of each State. For six States and the District of Columbia, however, totals shown below are not strictly measures of income received by residents. Totals for District of Columbia, New York, and Maine are too high—and those for Maryland, Virginia, New Jersey, and New Hampshire too low—in terms of measures of total income received by residents. Estimates shown here for D. C. include income paid out to residents of Maryland and Virginia employed in D. C., but exclude income of D. C. residents employed in these 2 States. Estimates for New York include income paid to residents of New Jersey employed in New York, but do not include income of New York residents employed in New Jersey. Similarly, estimates for Maine include income paid to residents of New Hampshire employed in Maine. In computation of per capita income for these 7 States, income totals shown here were first adjusted to a residence basis before division by population. Following are amounts (in millions) of adjustments for 1950: District of Columbia, -488; Maryland, +249; Virginia, +239; New York, -480; New Jersey, +480; Maine, -15; New Hampshire, +15. For definition of income payments to individuals, see text, p. 250]

No. 310.—PERCENT DISTRIBUTION OF FAMILY LIQUID ASSETS AND SAVING, BY INCOME GROUPS: 1950

[National estimate based on sample interview survey of 3,020 families, defined as all (one or more) persons living in same household and related by blood, marriage, or adoption. Universe covered is population of U. S. residing in private households during interview period, which was January through March 1951. Following groups are excluded: (1) Members of armed forces living at military reservations; (2) residents of hospitals and in religious, educational, and penal institutions; and (3) floating population, that is, people living in hotels, large boarding houses, and tourist camps. For liquid asset holdings of individuals and businesses, see table 464, p. 407]

ANNUAL 1950 MONEY INCOME BEFORE TAXES	Liquid assets ¹	Positive saving ²	Negative saving ²	Net saving ²
All income groups	100	100	100	100
Under \$1,000	5	1	19	-14
\$1,000-\$1,999	7	3	10	-2
\$2,000-\$2,999	11	7	18	-2
\$3,000-\$3,999	10	11	16	7
\$4,000-\$4,999	9	11	10	11
\$5,000-\$7,499	25	24	19	28
\$7,500 and over	33	43	8	72

¹ Liquid assets include all U. S. Government securities, checking accounts, savings accounts in banks, postal savings, and shares in savings and loan associations and credit unions held at time of survey in early 1951. Currency is excluded.

² Positive saving comprises the saving of all family units with money incomes in excess of expenditures, negative saving comprises the dissaving of all family units with expenditures in excess of money incomes, and net saving (plus or minus) is positive saving less negative saving for all family units combined. The survey does not undertake to measure directly consumer expenditures and taxes but measures the saving of each family by obtaining detailed information on the changes in the various asset and liability items that make up each unit's balance sheet of saving. The saving of each unit during the year is computed by subtracting algebraically the total change in its liabilities (plus or minus) from the total change in its assets (plus or minus). Positive saving results from a larger increase in assets than in liabilities or a larger decrease in liabilities than in assets. The reverse is true for negative saving. The more important asset and liability items for which information is obtained are changes in liquid asset holdings, changes in consumer indebtedness, net sales or purchases of stocks and bonds, payments of life insurance premiums, payments to retirement funds, net sales and purchases of houses, payments on house mortgages, house improvements, and investment or withdrawal of investment in unincorporated businesses. Capital gains or losses are excluded from saving.

¹ Estimated liability on Federal income tax, excluding tax on capital gains. Tax liability was not obtained directly from interviews or from tax returns, but from comprehensive data on family composition and income obtained in connection with Consumer Finances Surveys. For method of estimating, see *Federal Reserve Bulletin*, Aug. 1950, pp. 961-962.

Source: Board of Governors of the Federal Reserve System. Based on data from 1949, 1950, and 1951 Surveys of Consumer Finances, conducted by Survey Research Center of University of Michigan for Board of Governors.

NO. 312.—PERCENT DISTRIBUTION OF SPENDING UNITS HAVING SPECIFIED CHARACTERISTICS, BY AMOUNT OF NET WORTH, EARLY 1950

[Net worth is defined as difference between total selected assets and total debt reported in interviews during January-March 1950. Selected assets include liquid assets (U. S. Government securities, checking accounts, savings accounts in banks, postal savings, and shares in savings and loan associations and credit unions), owner-occupied homes and farms, other real estate, farm machinery, crops and livestock, automobiles, interests in unincorporated nonfarm businesses and privately held corporations, and common and preferred stock in corporations open to investment by the general public. Liabilities include all forms of debt other than charge accounts. For method of computing net worth, see *Federal Reserve Bulletin*, December 1950, pp. 1610-1611. Net worth figures should be considered as minimum estimates because of omission of assets such as currency, corporate bonds, reserve value of life insurance policies, consumer durable goods other than automobiles, jewelry, etc., and because of under-reporting of assets covered.]

CHARACTERISTIC OF SPENDING UNIT	ALL CASES		AMOUNT OF NET WORTH

NO. 314.—INCOME SHARES OF UPPER AND LOWER GROUPS OF TOTAL POPULATION: 1919 TO 1948

[Data are based on comparisons between Federal tax data and countrywide totals of income receipts by individuals. Individuals' incomes underlying the basic and economic income variants are defined as receipts for the participation of individuals or of their property in the production process; include employee compensation and other payments to labor, entrepreneurial income, rent, interest, dividends; exclude capital gains and other transfers and do not allow deductions except of business expenses. The basic variant is a first approximation to shares in income thus defined. The economic income variant represents an adjustment of the basic variant to take account of some items omitted from the tax data (compensation of nonfederal government employees and imputed rent on owner-occupied houses), to allow for a finer division of tax returns by distinguishing between head of family and nonhead returns, and to allow for the effect of classifying returns by net income, as defined for tax purposes, instead of by economic income. The disposable income variant measures shares in individuals' incomes after deducting Federal income taxes and including gains and losses from sales of assets. See also *Historical Statistics*, series A 105-197]

No. 315.—AVERAGE MONEY INCOME, EXPENDITURES AND SAVINGS OF FAMILIES AND SINGLE PERSONS IN CITIES, BY INCOME CLASS: 1944

(Estimates based on sample survey of 1,700 consumer units in cities of 2,500 inhabitants or more. Data relate to all civilians except inmates of institutions. Families are defined as economic units of two or more persons contributing to or mainly dependent on a common or pooled income. Single persons are those who live alone or as lodgers or servants in private homes, rooming houses or hotels)

¹ Family size based on equivalent persons, with 52 weeks of family membership considered equivalent to 1 person; 26 weeks equivalent to 0.5 person, etc.

² Earner defined as a family member that worked for pay (as wage or salary worker or on his own account) at any time during year.

³ Personal taxes (income, poll and personal property) have been deducted from money income. Total money income may be obtained by combining amounts shown for both items. Inheritances and large gifts are not considered current income; inheritances and gift taxes excluded from personal taxes.

⁴ Includes expenditures for alcoholic beverages.

⁵ Includes rents for tenant-occupied dwellings and for lodging away from home and current operation expenses of home owners. Excludes principal payments on mortgages on owned homes.

⁶ Value of bonds purchased less those cashed.

⁷ Represents differences between income and expenditures plus net war bond purchases and insurance premium payments. Includes amounts deducted for social security, retirement plans, etc., not available separately.

No. 317.—DISTRIBUTION OF FAMILIES AND UNRELATED INDIVIDUALS IN HOUSEHOLDS, BY TOTAL MONEY INCOME, URBAN AND RURAL: 1947 TO 1950

[Based on samples of population residing in households only. Excludes small number of families and individuals residing in quasi households (hotels, large rooming houses, etc.). "Family" not used here with same meaning as in 1940 census. It refers to a group of two or more related persons residing in same household. "Unrelated individual" is used to refer to a person living alone or with persons not related to him. See source for evaluation of sampling reliability. For explanation of urban and rural areas, see p. 2]

No. 319.—PERCENT DISTRIBUTION OF PRIMARY FAMILIES AND UNRELATED INDIVIDUALS WITH WAGE OR SALARY INCOME, BY WAGE OR SALARY INCOME AND RECEIPT OF NONWAGE INCOME, URBAN AND RURAL: 1939 TO 1950

[Based on samples of population residing in households only; see source for evaluation of sampling variability. Excludes small number of families and individuals residing in quasi households (hotels, large rooming houses, etc.). "Primary family" refers to head of household and all persons related to him. A "primary individual" refers to household head who has no relatives living with him. These terms were not used in 1940 Census. Wage or salary income includes all money received in compensation for work or services performed as employees, including commissions, tips, piece-rate payments, bonuses, Armed Forces pay, etc., as well as receipts commonly referred to as wages or salaries. It excludes value of income in kind, such as living quarters, meals, clothing, etc. A primary family was considered to have other income if any person 14 years of age and over in family had \$50 or more of income from sources other than money wages or salaries. For explanation of urban and rural areas, see p. 2.]

No. 324.—MEDIAN WAGE OR SALARY INCOME OF PERSONS 14 YEARS OF AGE AND OVER WITH WAGE OR SALARY INCOME, BY COLOR AND MAJOR INDUSTRY GROUP, BY SEX: 1939 AND 1950

[Data based on sample (see source for evaluation of sampling reliability), and restricted to persons who were wage or salary workers at time of survey. Wage or salary income includes all money received in compensation for work or services performed as employees, including commissions, tips, piece-rate payments, bonuses, armed forces pay, etc., as well as receipts commonly referred to as wages or salaries. Excludes value of income in kind, such as living quarters, meals, clothing, etc. Median wage or salary income based on number of persons reporting \$1 or more of wage or salary income. For definition of median, see headnote, table 23, p.28]

12. Prices

(Sent to print March 19, 1952)

The indexes issued by the Bureau of Labor Statistics have been, since the beginning of the century, the major source of price statistics in summarized form. This agency prepares weekly and monthly indexes of wholesale prices, a daily index based on spot market prices of 28 commodities; indexes of food prices at retail in 56 large cities; and indexes of consumers' prices for moderate-income families in 34 large cities.

Wholesale price index.—Since 1902, the official monthly wholesale price index has been prepared as an indicator of general price trends and average changes in commodity prices at primary market levels. The official series on the base, 1926=100, has been carried back to 1890; separate monthly indexes are available for major groups of commodities from January 1890, and for subgroups of commodities beginning with 1913. This index, based on 1926=100, is the official index for December 1951 and all earlier dates.

A newly-revised index, based on 1947-49=100, is now the official index for January 1952 and all subsequent months. The new index has been computed back to 1947 for purposes of comparison only (see table 327). Weights used represent all sales at the primary market level during the calendar year 1947. Moreover, the new index has expanded the number of commodities covered to 2,000 instead of the 900 measured by the earlier index. For a detailed description of the new index, see the *Monthly Labor Review*, February 1952.

The index (1926=100) measures average changes in commodity prices of about 900 commodities at the primary market level—usually the level at which the commodity is first sold commercially in substantial volume. The prices are ordinarily those charged by representative manufacturers or producers to the types of distributors or industrial consumers who are characteristic buyers of the product. Wherever feasible the prices are f. o. b. point of production or sale. In the case of some commodities, prices quoted in organized commodity markets are used.

The index (1926=100) measures completely the price changes of only the 900 commodities (and others that are closely related) which are specifically defined for pricing both physically and in terms of market structure. It is not an over-all measure of the "general price level" or of "the purchasing power of the dollar"—it does not include all classes of commodities (real estate, securities, services, etc.) which are factors in the "general price level."

Commodities are priced in terms of a given specification at stated terms of trade. Most of the commodities are represented by a single quotation. Since 1934, in computing the index the price of each article is weighted by the quantities marketed during the years 1929-1931, except for agricultural commodities. For agricultural commodities, average market sales in the years 1929, 1930, and 1931 are used. Indexes are computed for 10 major commodity groups, 49 subgroups and 5 economic groups.

Beginning with 1921, in computing indexes for commodity groups, articles falling under more than one group are included under each classification. For example, articles produced on the farm which reach the consumer practically unchanged in form, such as potatoes, milk, and eggs, are included among both farm products and foods. Duplication also occurs between the metals and metal products and building materials groups. However, in computing the index for all commodities, such articles are counted only once.

Consumers' price index.—This index measures average changes in retail prices of goods, rents and services, purchased by wage-earners and lower-salaried clerical workers in large cities. The weights used in calculating the index are based on studies of actual expenditures by families of wage-earners and lower-salaried workers. A study

conducted in 1917-19 provided the weights used from 1913 to 1935. From 1935 to January 1950, time-to-time changes in retail prices were weighted by 1934-36 average expenditures of urban families whose annual incomes averaged \$1,524 in 1934-36. Weights used beginning January 1950 have been adjusted to 1949-50 spending patterns.

The index does not measure changes in the total amount families spend for living or relative differences in prices or living costs between cities. The list of items priced for the index includes approximately 225 goods and services. For many goods a number of different articles or qualities of articles are included in the index. Sales taxes are reflected wherever applicable, but income taxes, social security deductions, and bond deductions are not included. Since March 1943, food indexes have been based upon changes in food prices in 56 cities. From September 1940 through June 1947, consumers' price indexes were computed monthly for 21 cities, and in March, June, September, and December for 13 additional cities; beginning July 1947, indexes have been computed monthly for 10 cities, and once every 3 months for 24 additional cities according to a staggered schedule. Since July 1947, the following schedule has been in effect:

- Food prices and indexes, for 56 cities each month;
- Fuel prices and indexes for 34 cities each month;
- Commodities (other than food and fuel) and services indexes for 10 cities monthly and for 24 additional cities quarterly on a rotating cycle;
- Rents quarterly for 34 cities, on a rotating cycle;
- All items and group indexes for 10 cities monthly, and for 24 additional cities quarterly on a rotating cycle;
- National indexes (average of large cities) for all items and groups, monthly, based upon prices in the cities surveyed and estimated changes in the unpriced cities.

The retail food price indexes presented in this section are one component of the consumers' price index. For periods from January 1935 to March 1943 they are based on the distribution of expenditures as shown by the 1934-36 study of expenditures of wage-earners' and lower-salaried clerical workers' families. In March 1943, the weights for this index were revised to take account of changes in food purchases due to wartime shortages and rationing. In January 1946, these wartime weight adjustments were eliminated and certain other revisions made in the calculating procedures. In January 1950, the weights were adjusted to estimated 1949-50 spending patterns. The indexes are computed from prices of 54 foods for the period from January 1935 to March 1943, 61 foods for the period March 1943 to June 1947, 50 foods from June 1947 to January 1950, and 60 foods thereafter. Aggregate costs of these foods in each of 56 cities (51 cities prior to March 1943), weighted to represent total purchases, have been combined for the United States with the use of population weights. Indexes for all periods prior to January 1935 are converted from indexes computed for corresponding periods on the 1923-25 base.

Other indexes.—The Bureau of Agricultural Economics prepares currently indexes of prices received for farm products and of prices paid by farmers. (See text, p. 569.)

In comparing the movement of the indexes of consumers' prices and of the prices paid by farmers for commodities bought for family living (table 710), it should be noted that the consumers' price index includes rents and other services and the farm index does not, and that the list of commodities included in the two indexes and their geographic coverage differs because farm family buying differs considerably from that of city families, and farm and city workers are located in different parts of the country.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series L 15-25") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

No. 327.—WHOLESALE PRICES—INDEXES, BY MAJOR COMMODITY GROUPS: 1947 TO 1951 AND JANUARY 1952

[1947-49=100. This index is the official wholesale price index, beginning with January 1952. Although the new index has been computed back to 1947 for comparison, the official index for December 1951 and all earlier dates is that based on 1926=100, shown in tables 325 and 326. See also text, p. 271]

COMMODITY GROUP	1947	1948	1949	1950			1951			Jan. 1952
				Avg.	June	Dec.	Avg.	June	Dec.

No. 328.—INDEXES OF SPOT MARKET PRICES OF 28 COMMODITIES: 1939 TO 1951

[August 1939=100. Figures in column heads represent number of commodities. Index is computed daily; represents unweighted geometric average of daily price quotations of 28 commodities, traded on organized exchanges. The index is much more sensitive to changes in market conditions than is monthly or weekly wholesale price index]

PERIOD	General Index	IMPORT AND DOMESTIC		Domestic agricultural	FOODSTUFFS AND INDUSTRIAL	
		Import commodities	Domestic commodities		Food-stuffs	Raw industrial
	(28)	(11)	(17)	(7)	(11)	(16)

1951.....	189.3	197.3	189.1	185.1	194.0	205.0	180.2	207.2	190.5

¹ Perishable and semidurable.

² Sum of number of quotations for producers' and consumers' goods and for durable and nondurable goods is greater than number of all commodities owing to duplication of certain price series in classifications. For example, identical price quotations on flour are used in both producers' goods and consumers' goods.

No. 331.—CONSUMERS' PRICE INDEX FOR MODERATE-INCOME FAMILIES IN LARGE CITIES: 1913 TO 1951

1925-39=100. For detailed explanation, see general note p. 271. The Consumers' Price Index has been adjusted to incorporate a correction of new unit bias in rent index beginning with indexes for 1940 and adjusted population and commodity weights beginning with indexes for January 1950. These adjustments make a continuous comparable series. See also *Historical Statistics*, series L 41-47.

¹ Average of four quarterly indexes.

² Weighted average of two quarterly indexes and six monthly indexes.

³ 12-month average. Price movements in 10 key cities measured monthly; for other cities (surveyed quarterly on a staggered schedule), preceding surveyed index used for each nonsurveyed month.

⁴ Not available.

⁵ Discontinued.

⁶ St. Paul combined with Minneapolis.

No. 342.—ANNUAL AVERAGE UNIT VALUES OF IMPORTANT ARTICLES IMPORTED:
1924 TO 1950

[Values required by law to represent values in foreign markets whence exported to United States. "Ton" signifies long ton of 2,240 pounds except where otherwise specified. Averages obtained by dividing total value of imports of specified article by total quantity. Where, as in some commodities considerable price variations may exist between different grades, methods of packing, etc., and proportions of grades, etc., may vary from year to year, such averages may show actual price movements only roughly]

13. Elections

(Sent to print March 19, 1952)

The conduct of elections in the United States for Federal, State, and local offices and on State and local issues, is regulated by State laws or, in some cities and a few counties, by local charters. An important exception is that the United States Constitution prescribes the basis of representation in Congress and the manner of electing the President of the United States and grants to Congress the right to regulate the times, places, and manner of electing Federal officers. Almost all of the more than 120 thousand governmental units in the United States conduct elections at various intervals—annual, biennial, quadrennial, or longer—for different types of offices and other purposes. No regular and complete system exists for reporting either the number of elections held or the numbers of votes cast for the multitude of candidates, except for Federal offices, and in most States, for State offices. Few States require central reporting on local elections. The numbers of governments holding elections and the numbers of voters participating vary between Presidential and the intervening Congressional election years, and between even-numbered and odd-numbered years.

The tables in this section give summary data, by State, on elections to Federal offices. The number of registered voters in 1942 in each city of 25,000 inhabitants or more is given in the *Cities Supplement to the Statistical Abstract*.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series P 27-31) provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

No. 344.—VOTE FOR PRESIDENTIAL ELECTORS, BY MAJOR POLITICAL PARTIES: 1888 TO 1948

YEAR	Total ¹	Republican	Democratic	Socialist and Socialist-Labor	Miscellaneous independent ²	Prohibition	Communist	PERCENT OF TOTAL

1948.....	48,833,680	21,969,170	24,105,695	168,070	2,487,529	103,216	-----	45.0	49.4

¹ Totals for years prior to 1928 exclude votes cast for names not appearing on electoral tickets for parties specified. Totals for 1928-44 exclude valid and blank ballots.

² For 1888, Union Labor Party; 1892, 1900, and 1904, Populist; 1896, National Democrat; 1908, Populist and Independent; 1912, Progressive; 1916 to 1948, miscellaneous. ³ Democrat-Populist.

⁴ Socialist-Labor only. In 1924 practically all Socialist votes cast for La Follette and Wheeler, official candidates of both Socialist and Independent Progressive parties, included in miscellaneous.

⁵ Includes scattering votes; 445 in Iowa; 633 in New Jersey; and 131 in Pennsylvania. ⁶ Workers.

⁷ Included with miscellaneous are 798 Union votes cast in endorsement of Republican candidate.

⁸ Included with miscellaneous are 417,418 American Labor votes cast in endorsement of Democratic candidate.

⁹ Included with miscellaneous are 496,405 American Labor and 329,235 Liberal votes cast in endorsement of Democratic candidate.

¹⁰ Included with miscellaneous are 1,166,021 votes for Thurmond (States' Rights Democrats) and 1,156,103 votes cast for Wallace (Progressives, etc.); included with Democratic are 222,562 Liberal votes cast for Democratic nominees.

Congress, Clerk of the House; *Statistics of Presidential and Congressional Elections*. 1928-44, Dept. of Commerce, Bureau of Census; Elections, 1944: No. 5, *Vote Cast in Presidential and Congressional Elections, 1888-44*.

No. 345.—APPORTIONMENT OF CONGRESSIONAL REPRESENTATION, BY STATES, FROM ADOPTION OF CONSTITUTION TO 1950

[Until 1940, population for apportionment purposes excluded Indians not taxed and, until 1870, two-fifths of slaves. In 1940, all Indians were held subject to Federal taxation. Until 1850, apportionment ratios chosen arbitrarily; 1850 to 1900, ratios were apportionment population of U. S. divided by number of Representatives; from 1910 on, apportionments computed from priority lists, not from ratios. No apportionment in 1920. For discussion of apportionment methods, see S. Doc. No. 304, 76th Cong., 3d sess., *A Survey of Methods of Apportionment in Congress*, by Edward V. Huntington. See also *Historical Statistics*, series P 57-61, which shows apportionment totals under Apportionment Act, *excluding* Representatives assigned after apportionment (footnote 7 below)]

¹ To be effective in 1953.

² Number of Representatives not to exceed 1 for each 30,000 inhabitants.

³ See headnote.

⁴ Membership increased from 233 to 234 by act of July 30, 1852 (10 Stat. L. 25). See note 7.

⁵ Membership increased from 233 to 241 by act of Mar. 4, 1862 (12 Stat. L. 353). See note 7.

⁶ Membership originally fixed at 233 but increased to 292 by act of May 30, 1872 (17 Stat. L. 192). One Member assigned to Colorado after apportionment.

⁷ Assigned after apportionment.

⁸ Included in apportionment act in anticipation of Statehood.

⁹ Included in the 20 Members originally assigned to Massachusetts but credited to Maine after its admission as a State, Mar. 16, 1820 (3 Stat. L. 555).

Source: 1932-44, Department of Commerce, Bureau of Census; Elections, 1944: No. 5, *Vote Cast in Presidential and Congressional Elections, 1928-44*, 1946, U. S. Congress, Clerk of the House; *Statistics of the Congressional Election of Nov. 5, 1946*, corrected to Feb. 13, 1947.

No. 350.—VOTE FOR UNITED STATES REPRESENTATIVES, BY MAJOR POLITICAL PARTIES, BY STATES: 1948 AND 1950

[In thousands. In each State, totals represent the sum of votes cast in each Congressional District, except as follows: In New Mexico and North Dakota, no representatives were elected from districts, but more than one was elected from the State at large; in these States, each party total represents votes cast for that candidate of the party receiving highest vote. In Delaware, Nevada, Vermont, and Wyoming only one representative is elected. In Connecticut and Ohio, representatives are elected by district except one, who is elected at large; the at-large vote is not reflected in this tabulation. In numerous States, one or other of the major parties had no candidate in some districts. In those cases where votes of a party, as such, are cast in endorsement of a candidate of another party, the votes are here counted as for the endorsing party. See also notes below]

¹ In California a person may be candidate of one or more parties for same office, so that party votes for candidates are not segregable. Party vote shown is computed by assigning to a party total votes for candidates who are members of that party.

² Less than 500.

³ Includes 208,892 blanks.

⁴ Includes 87,673 blanks. ⁵ Democratic-Farmer-Labor party.

⁶ Included in "Other" are endorsing votes cast for major party candidates, as follows: in 1948 for Democrats 263,339 and for Republicans 31,735; in 1950 for Democrats 164,695 and for Republicans 25,355. Republican totals include endorsing votes cast for Democrats: 116,824 in 1948 and 40,575 in 1950.

14. Federal Government Finances and Employment

(Sent to print March 19, 1952)

The Government's proposed budget for the ensuing fiscal year is transmitted to the Congress by the President in January, and contains the President's recommendations for budget appropriations and other authorizations for the maintenance of the various departments and establishments. It includes estimates to carry out both existing laws and proposed legislation. Data from *The Budget of the United States Government* for the fiscal year ending June 30, 1953, are presented in tables 358-363. The Treasury Department publishes a *Digest of Appropriations* each year, which summarizes appropriation legislation enacted by the Congress, and also publishes yearly the *Combined Statement of Receipts, Expenditures and Balances*, an abstract of the Treasury books relating to all of the receipt and appropriation accounts of the Government.

The day-to-day financial operations of the Federal Government are reflected in the *Daily Statement of the United States Treasury*, which covers all of the receipts and expenditures of the Government, including those arising under public debt operations, and also exhibits a *Statement of the Public Debt*, as of the end of the month on the first working day of the next month. The *Treasury Bulletin*, a monthly publication, contains analytical material on fiscal operations and related Treasury activities. The *Annual Report of the Secretary of the Treasury* is a convenient summary of yearly data relating to somewhat broader fields, and, in addition, contains texts of most of the public documents relating to fiscal policy and operations. The *Annual Report of the Commissioner of Internal Revenue* gives a detailed account of tax collections by kind of tax and by geographic area.

Two other special aspects of Federal finances are presented in the Treasury Department's *Circulation Statement of United States Money* (monthly) and *Prices and Yields of Public Marketable Securities* . . . (monthly). See tables 438, 439, and 497.

Data from income tax returns are compiled by the Bureau of Internal Revenue of the Treasury Department. This Bureau's annual report, *Statistics of Income, Part 1*, is compiled from data reported on individual income tax returns, taxable fiduciary income tax returns, Federal estate tax returns, and gift tax returns. *Statistics of Income, Part 2*, also published annually, presents data from corporation income and declared value excess-profits tax returns, corporation excess-profits tax returns, and personal holding company returns. See tables 369-382, 520, 522, 523, and 530.

Federal employment figures are compiled primarily by the Civil Service Commission. The figures are issued by that agency in its regular *Annual Report* and in its *Monthly Report on Employment*. The Commission also publishes an annual report on the pay of Federal employees entitled *Pay Structure of the Federal Civil Service*. Data on Federal employment and pay are also issued by the Bureau of Labor Statistics in its *Monthly Labor Review*.

ACCOUNTS THROUGH WHICH TREASURY OPERATIONS ARE EFFECTED

All receipts of the Government are covered into the general fund of the Treasury, from which all expenditures are made. Receipts and expenditures are classified in the Treasury's records according to the class of accounts through which operations are effected. Transactions are segregated in order to exhibit separately those effected through general and special accounts, as contrasted with those effected through trust accounts. A brief description of the items handled through these accounts is as follows:

1. **General accounts.**—Money represented in the general accounts may be withdrawn from the Treasury only in pursuance of appropriations made by Congress. The principal sources of general account receipts are income taxes, miscellaneous internal revenue, social security taxes, taxes upon carriers and their employees, customs duties, and miscellaneous receipts, such as proceeds from the sale of surplus property.

2. Special accounts.—Receipts in these accounts are generally funds received under special authorization of law which may be expended only for the particular purposes specified therein, and not for general purposes. The larger items are those receipts for the reclamation fund, Alaska Railroad fund, and receipts under the Mineral Leasing Act, under the Department of the Interior, and the national forest funds, under the Department of Agriculture.

3. Trust accounts.—Trust account receipts are those received for the benefit of individuals or groups of individuals and are to be used for the purposes specified in the trust, and are not, therefore, available for general expenditures. An example of a trust account is the Federal old-age and survivors insurance trust fund, to which amounts equivalent to the receipts from the taxes on employment levied for the support of old-age benefits are automatically appropriated.

BASIS OF TABLES

A number of different bases are used in compiling data relating to Federal finances, as explained below, and the basis used is noted at the head of each table.

Daily Treasury Statement.—Most tables at present dealing with Federal fiscal affairs are compiled on the basis of the *Daily Treasury Statement*. This statement is compiled from the latest daily financial reports received from Government depositaries and Treasury offices holding Government funds, and, because of the promptness with which the information is obtained and made public, it has come into general use as reflecting the Government's finances and the condition of the Treasury from day to day. Effective with the beginning of the fiscal year 1947 expenditures of several departments and establishments serviced by the Division of Disbursement, Treasury Department, are reported in the *Daily Treasury Statement* on the basis of checks issued. A clearing account is provided to take care of outstanding checks. Beginning July 1, 1948, such expenditures are reported as of the day on which checks are issued in payment of obligations, through the use of teletype facilities.

Other tables are on bases reflecting the accounts or statistics of the various Treasury offices compiling them for the definite period under review. Such other bases are the following:

Public debt accounts.—Tables on this basis reflect the audited accounts of the Bureau of the Public Debt for the actual transactions of the period under review.

Warrants issued.—Warrants issued (receipts) by the Secretary of the Treasury for certain moneys (primarily revenues and miscellaneous receipts) received by the Treasurer of the United States, represent, as provided by law, the formal covering of receipts into the Treasury. All certificates of deposit for a particular fiscal year must have reached the Treasury before total receipts can be compiled on a warrants-issued basis. Warrants issued (expenditures) by the Secretary of the Treasury represent charges against appropriations provided by law. Certain moneys are disbursed by the Treasurer of the United States upon such warrants. Some warrants do not represent actual payments to claimants but are merely advances of funds to disbursing officers for the payment of Government obligations. Expenditures compiled on this basis necessarily include unexpended balances to the credit of disbursing officers.

Checks issued.—This basis, more than any other, reflects the real expenditures of the Government since it relates to expenditures made on the basis of checks drawn by disbursing officers.

Collection basis.—Statements showing receipts on this basis are compiled from reports received by the various administrative offices from collecting officers in the field, such as actual collections recorded on their books by collectors of internal revenue and collectors of customs but without regard to the time of deposit of such collections to the credit of the Treasurer. Deposits of income taxes and social security taxes withheld by employers, which are made directly with depositaries and not

recorded by collectors of internal revenue until quarterly tax returns are filed, are included in statements of receipts on a collection basis as receipts of the Secretary of the Treasury in the fiscal year in which deposited and as receipts of the collectors in the fiscal year in which returns are filed.

Further details with respect to Treasury accounting bases and procedures are shown on pages 675-678 of the *Annual Report of the Secretary of the Treasury* for the fiscal year 1951.

Public and private debt.—Data from a special study on debt by the Office of Business Economics of the Department of Commerce are presented in this section. (See table 384.) These data are published annually in the *Survey of Current Business*.

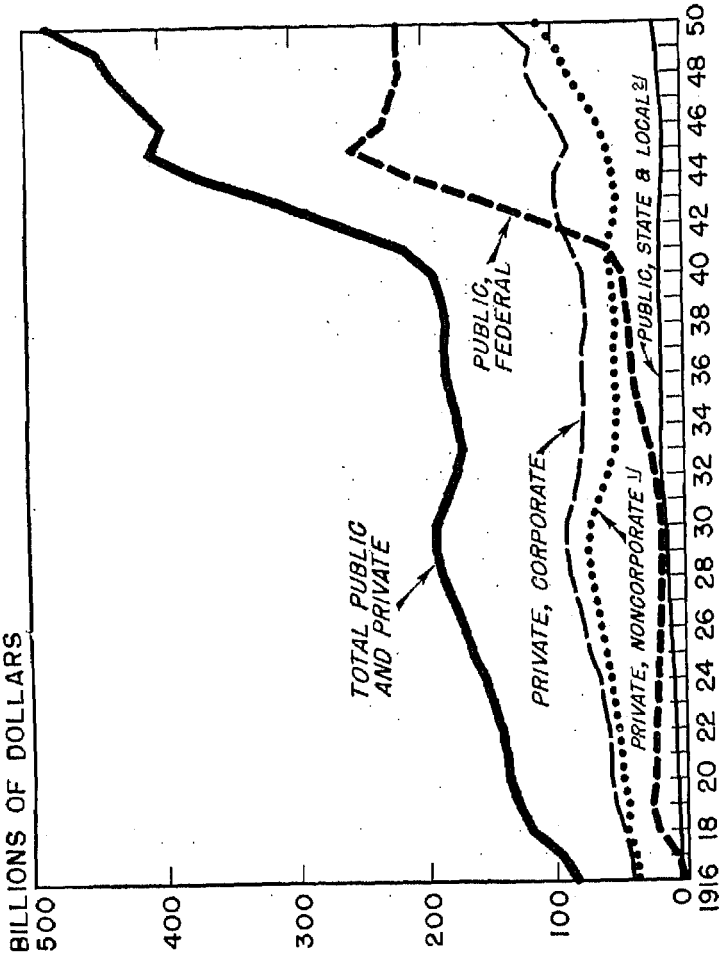

Gross debt, as defined in this study, consists of all classes of legal indebtedness except the following: (1) Deposit liability of banks and the amount of bank notes in circulation; (2) value of outstanding policies and annuities of life insurance carriers; (3) short-term debts among individuals and unincorporated nonfinancial business firms; and (4) nominal debt of corporations, such as bonds which are authorized but unissued or outstanding but reacquired.

Net public and private debt outstanding is a comprehensive aggregate of indebtedness of borrowers after elimination of certain duplicating governmental and corporate debt. This measure of indebtedness provides a more significant indication of trends in debt structure than does gross debt, since effects of nominal changes in financial practices and organization are largely removed. To obtain net figures, gross or total debt is adjusted for specific types of duplications pertaining to the following sectors of the economy: (1) Federal Government and its corporations and agencies generally; (2) State and local governments treated as a single entity; and (3) within the corporate area, those affiliated but legally distinct corporations which operate under a single management, treated here as a unit. In the noncorporate private area, data are gross throughout with no adjustments for duplications.

The net debt concept for each of the four sectors can be summarized as follows: Federal Government net debt is that owed to all other sectors of the economy except the Federal Government proper and its corporations and agencies; State and local government net debt is that owed to all other economic entities except State and local governments; corporate net debt is that owed to all other entities (including corporations) except to corporate members of an affiliated system; and private noncorporate net (or gross) debt is summation of all forms of legal indebtedness except that among individuals and unincorporated nonfinancial business firms. Data represent balances of debts outstanding at end of calendar years, except data for State and local governments which are for June 30 of each year.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series P 109) provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

¹ Net receipts equal total receipts less (a) appropriations to Federal old-age and survivors insurance trust fund beginning 1937 and (b) refunds of receipts beginning 1931.

² Figures adjusted beginning 1931 on account of refunds of receipts and capital transfers.

³ Includes tonnage tax prior to 1932. Beginning 1932, tonnage tax is included in other receipts.

⁴ On basis of warrants issued 1789 through 1930; thereafter, on basis of checks issued.

⁵ Average for period Mar. 4, 1789, through Dec. 31, 1800.

⁶ Averages are for entire period though there were no amounts under these items for certain years.

⁷ Years ending Dec. 31, 1801 to 1842; average for 1841-50 is for period Jan. 1, 1841, through June 30, 1850.

⁸ Average for 1863-65.

⁹ Less than \$500.

¹⁰ Average for 1881 and 1884.

¹¹ One year only, 1895.

¹² One year only, 1910.

¹³ Sales of public lands included in other receipts.

¹ Excludes debt retirements and beginning 1931, refunds of receipts and capital transfers.

² Excludes civil expenditures under War and Navy Depts. in Washington through 1915. Subsequent to 1915 includes all expenditures made by Dept. of Army (including rivers and harbors and Panama Canal) and Dept. of Navy. Dept. of Army includes expenditures of Dept. of Air Force from funds made available prior to 1949. Expenditures of Dept. of Air Force for 1949 were \$1,690,461,000, for 1950, \$3,520,633,000, and for 1951, \$5,358,041,000.

³ On basis of warrants issued through 1930; thereafter, on basis of checks issued. Expenditures for Indians exclude interest accounts, which are included in trust fund expenditures beginning 1940. Veterans' pensions represent expenditures under appropriation "Army and Navy pensions," administered by Veterans' Administration.

⁴ Includes civil expenditures under War and Navy Depts. in Washington through 1915, expenditures of Office of Secy. of Defense, unavailable funds charged off under Act of June 3, 1922, expenditures for "Govt. corporations (wholly owned), etc. (net)" beginning 1932, and expenditures for Indians and veterans' pensions beginning 1949.

⁵ Represents gross debt as of end of each period; e.g., 1800, 1810, etc.

⁶ Years ending Dec. 31 through 1842; average for 1789-1800 begins Mar. 4, 1789; average for 1841-50 is for Jan. 1, 1841-June 30, 1850. See note 5 concerning gross debt. ⁷ Included in all other.

⁸ For comparability with earlier years, all transactions relating to Foreign Economic Cooperation Trust Fund (amounting to \$3,000,000,000) have been consolidated with budget expenditures.

⁹ Beginning 1951, investments of wholly owned Government corporations in public debt securities are excluded from budget expenditures.

No. 358.—FEDERAL GOVERNMENT EXPENDITURES BY ORGANIZATION UNIT: 1944 to 1951

[In millions of dollars. For years ending June 30. Expenditures reported on a checks-issued basis, adjusted in total to daily Treasury statement basis (which is partly checks issued and partly checks paid). "Budget" receipts, expenditures, and authorizations, as used in this and following tables, are mainly those of general and special accounts. Two important exceptions are appropriations from general fund to Federal old-age and survivors trust fund and refunds of receipts, both of which are excluded from expenditures and deducted from receipts. Budget expenditures also include net transactions (expenditures minus receipts) of wholly owned Government corporations and enterprises; omitted from both expenditures and receipts are transfers of capital between wholly owned Government corporations and the United States Treasury, and debt transactions of Government enterprises (expenditures from public debt authorizations are included; see also table 361). Figures in early years have not been revised to reflect recent changes in organizational structure]

¹ Excludes transfer of \$3 billion of 1948 surplus to foreign economic cooperation trust fund for expenditure in 1949.
² Excludes \$1,036,000 representing net purchases of United States securities which is included in Treasury totals (see table 357).

³ Other expenditures are shown under various agencies to which funds are allocated.

⁴ Less than \$600,000. ⁵ Deduct. ⁶ Included with Department of Commerce.

⁷ Includes transactions of mixed-ownership corporations of \$290,515,000 (net) which are shown separately in the Daily Treasury Statement.

⁸ Since 1950, sales and redemptions of obligations of wholly-owned Government corporations have been excluded from this table.

No. 359.—RECEIPTS FROM AND PAYMENTS TO THE PUBLIC BY THE FEDERAL GOVERNMENT: 1929 TO 1951

[In billions. For years ending June 30. Receipts from and payments to public exclude intragovernmental financial transactions but include operations of trust accounts as well as budget accounts of Federal Government. This table therefore shows flow of money on cash basis between Federal Government as a whole and the public. Net borrowing or repayment of borrowing from the public excludes borrowing by Treasury from Federal trust accounts and Government corporations, and also excludes certain types of public debt transactions like issuance and redemption of armed forces leave bonds. The public is defined to include individuals; banks (including Federal Reserve and Postal Savings System); businesses; private corporations; State, local and foreign governments; and international organizations. For additional explanation, see 1953 Budget, pp. 1141-1142, headnote to table 358, and general note, p. 301]

YEAR	Receipts from the public ¹	Payments to the public ¹	Excess of receipts from (+) or payments to (-) the public	Receipts from exercise of monetary authority ²	Excess of Treasury cash income (+) or outgo (-) ³	Decrease (+) or increase (-) in Treasury cash balance	Decrease (+) or increase (-) in Exchange Stabilization Fund balance	Net borrowing (-) or repayment of borrowing (+) from the public

No. 361.—BUDGET APPROPRIATIONS AND OTHER AUTHORIZATIONS FOR FEDERAL AGENCIES, BY ORGANIZATION UNIT: 1951

[In millions of dollars. For year ending June 30. The Budget total of "new obligational authority" represents total of new authorizations enacted for any fiscal year for Federal agencies to incur obligations. This total includes "net new appropriations," "reappropriations," "contract authorizations," and "authorizations to expend from public debt receipts." "Net new appropriations" represent total of all appropriations less appropriations enacted to liquidate prior year contract authorizations. "Reappropriations" continue available in the succeeding fiscal year the unused balance of an appropriation which would otherwise expire for obligation purposes. "Contract authorizations" permit placement of specific obligations or contracts but require subsequent appropriations to "liquidate" them (i. e., to authorize withdrawal of funds from Treasury in payment of obligations). "Authorizations to expend from public debt receipts" authorize use of proceeds of Treasury borrowing to finance certain types of Government programs. See also general note, p. 301, and headnote to table 358]

¹ Includes defense tax.

² Tax liabilities for 1942 and 1943 unadjusted for transition to current payment basis.

³ Includes net Victory tax. Computed by assuming that deductions are 10 percent of Victory tax net income; i. e., that Victory tax net income is ten-ninths of selected net income.

⁴ Individual Income Tax Act of 1944.

⁵ Taking into account maximum effective rate limitation of 77 percent.

⁶ Split income basis.

¹ Includes defense tax.² Tax liabilities for 1942 and 1943 unadjusted for transition to current payment basis.³ Includes net Victory tax. Computed by assuming that deductions are 10 percent of Victory tax net income; i. e., that Victory tax net income is ten-ninths of selected net income.⁴ Individual Income Tax Act of 1944.⁵ Taking into account maximum effective rate limitation of 77 percent.⁶ Split income basis.Source: Treasury Department, Bureau of Internal Revenue; *Annual Report of the Secretary of the Treasury*.

No. 369.—INDIVIDUAL AND TAXABLE FIDUCIARY INCOME TAX RETURNS—SUMMARY.
1925 to 1949

[Includes data for Alaska, District of Columbia, and Hawaii; based on returns as filed, unaudited except to insure proper execution. Under revenue laws, the filing requirements applicable to individuals (citizens or residents of the United States), for the years shown, are as follows: (1) Single, or married and not living with husband or wife: for 1925 and 1930, net income of \$1,500 or over; 1935, \$1,000 or over; 1940, gross income of \$800 or over; (2) Married and living with husband or wife: for 1925 and 1930, combined net income of \$3,500 or over; 1935, \$2,500 or over; for 1940, combined gross income of \$2,000 or over; (3) For 1945-47, every individual with gross income of \$500 or over; and for 1948-49, \$600 or over; for refund purposes, returns are also required with respect to gross incomes under \$500 for 1945-47, or under \$600 for 1948-49, from which taxes have been withheld. (For 1925-35, returns are required to be filed by individuals having gross income of \$5,000 or over if single, or married and not living with husband or wife; or having combined gross income of \$5,000 or over if married and living with husband or wife; regardless of net income.) *Data for returns showing no net income or no adjusted gross income, filed in accordance with these provisions, are not included in statistics given here.* Fiduciaries are required to file returns on same basis as single individuals except that a return is required for every estate or trust of which any beneficiary is a nonresident alien and, beginning 1938, for every trust having net income of \$100 or over. Partnership net profit or net loss is reported on individual returns of copartners according to their shares. See also *Historical Statistics*, series P 144-147]

¹ Taxable fiduciary returns included with individual returns through 1940, shown separately thereafter.

² *Net income (shown for 1940 and prior years)* is total income less statutory deductions, but before deduction of exemption or credits allowable in computing amount subject to tax. *Adjusted gross income (shown for 1945-49)* is defined as gross income minus allowable trade and business deductions, expenses of travel and lodging in connection with employment, reimbursed expenses in connection with employment, deductions attributable to rents and royalties, certain deductions of life tenants and income beneficiaries of property held in trust, and allowable losses from sales of property.

³ Tax tabulated for 1940 and prior years is before deduction of credits for tax paid at source and tax paid to a foreign country or possession of United States, while tax for 1945-49 is after deduction of such credits.

⁴ Includes defense tax.

⁵ For individual returns only, 1945 and later years.

Annuities and pensions ¹⁰	195	231	226	293	442	442	
Income from estates and trusts ¹¹	956	1,120	1,239	1,322	1,452	1,435	16
Miscellaneous income ¹²	612	768	666	768	1,048	1,031	17
Total tax	17,226	16,281	18,249	15,618	14,682	14,538	144
Number of returns (thousands)	49,865	52,722	54,910	51,847	51,402	51,302	100

¹ See note 2, table 369.

² Salaries, wages, commissions, etc., include annuities, pensions, and retirement pay not reported in schedule for annuities and pensions, but exclude wages of not more than \$100 per return from which no tax is withheld, reported on Form W-2 for 1945-47, and on Form 1040A for 1948-49. (See note 12.)

³ Dividends received exclude amounts received through partnerships and fiduciaries; exclude amounts not exceeding \$100 per return reported on Form W-2 for 1945-47 and on Form 1040A for 1948-49. (See note 12.)

⁴ Interest received includes interest on notes, mortgages, bank deposits, corporation bonds before amortization of bond premium, and taxable and partially tax-exempt interest on Government obligations before amortization of bond premium; also includes, when received through partnerships and fiduciaries, partially tax-exempt interest on Government obligations and partially tax-exempt dividends on share accounts in Federal savings and loan associations. Excludes amounts not exceeding \$100 per return reported on Form W-2 for 1945-47 and on Form 1040A for 1948-49. (See note 12.)

⁵ Net profit from rents and royalties is excess of gross rents over depreciation, repairs, interest, taxes, and other rent expenses and excess of gross royalties over depletion and other royalty expenses. Conversely, net loss from these sources is excess of expenses over gross receipts.

⁶ Net profit from business is excess of gross receipts over business expenses and net operating loss deduction due to net operating loss from business, partnership, and common trust funds for two preceding years. Conversely, net loss from business is excess of business expenses and net operating loss deduction over gross receipts from business.

⁷ Partnership profit or loss excludes partially tax-exempt interest on Government obligations, dividends on Federal savings and loan association shares issued prior to Mar. 28, 1942, and net gain or loss from sales of capital assets. In computing partnership profit or loss, charitable contributions are not deductible nor is the net operating loss deduction allowed.

⁸ Capital assets consist of all property held by taxpayer other than (1) stock in trade or other property held primarily for sale to customers, or (2) kinds of property specified in note 9. Net gain or loss reported is a combination of current year capital gains and losses to be taken into account (including those from partnerships or common trust funds in which taxpayer participates) and net capital loss carry-over from five preceding years but not prior to 1942. Allowable net loss is limited to amount of such loss, or to net income (adjusted gross income if taxed under Supplement T) computed without regard to gains and losses from sales of capital assets, or to \$1,000, whichever is smallest. For details as to portion of gains and losses taken into account, description of capital loss carry-over, and special treatment of certain gains and losses, see *Statistics of Income*, Part 1.

⁹ Sales of (1) property used in trade or business of a character which is subject to allowance for depreciation, within 1 year from issue, and (3) real property used in trade or business.

¹⁰ Income shown from annuities and pensions is only the taxable portion of amounts received. Amounts received to extent of 3 percent of cost are reported annually, until aggregate of amounts received and excluded from income equals cost. Thereafter, entire amounts received are taxable and must be included in income. Annuities, pensions, and retirement pay from which tax is withheld may be reported as salaries and wages.

¹¹ Income from estates and trusts excludes partially tax-exempt interest on Government obligations and dividends on Federal savings and loan association shares issued prior to Mar. 28, 1942. Such income is reported in partially tax-exempt interest.

¹² Miscellaneous income includes all taxable income not accounted for elsewhere in this table; also includes wages not subject to withholding, dividends, and interest, not exceeding in total \$100 per return reported on Form W-2 for 1945-47 and Form 1040A for 1948-49.

¹ Preliminary.

² An unequal number of returns of husbands and wives results from use of sampling in certain income areas, from the fact that some returns lack sufficient information to identify the family relationship, and from deferment of filing returns by members of the armed forces for 1944-46.

³ See note 2, table 369.

¹ See note 2, table 369.² Exemption is \$500 for the taxpayer, \$600 for the taxpayer's spouse if not dependent upon another person, and \$600 for each closely related dependent (specified by law) who had less than \$500 income and who received from the taxpayer more than half his support for the year, together with \$600 for blindness and \$600 for age 65 or over of the taxpayer or spouse.³ Less than 0.005 percent.Source: Treasury Department, Bureau of Internal Revenue; *Statistics of Income*, Part 1:

No. 376.—CORPORATION INCOME TAX RETURNS—SUMMARY: 1925 TO 1949

[Includes data for Alaska, District of Columbia, and Hawaii; based on returns as filed, prior to audit adjustments or other changes made after the returns were filed, as the result of carry-backs, relief granted under section 722 of the Internal Revenue Code, recomputation of amortization of emergency facilities, or renegotiation of war contracts. All corporations are required to file returns except those specifically exempt, such as mutual, fraternal, civic, and charitable organizations not operating for profit. Returns of inactive corporations are excluded from these tabulations, except as noted. In comparing data over a period of years, changes in law must be taken into consideration, especially discontinuance for 1934-41 of privilege of filing consolidated returns (except by railroad corporations and their related holding or leasing companies and, in 1940-41, by Pan American trade corporations) and the restoration of this privilege in 1942. See source publications for effect of changes on statistical items. For other corporation data based on income tax returns, see pp. 444-446 and 450. See also *Historical Statistics*, series P 152-164.]

[Money figures in millions of dollars]

Excess profits net income.....				2, 998	14, 165			
Adjusted excess profits net income.....				912	8, 368			

¹ Preliminary.

² Total compiled receipts consist of gross sales (less returns and allowances), gross receipts from operations (where inventories are not an income-determining factor), all interest received on Government obligations (less amortizable bond premium), other interest, rents, royalties, excess of net short-term capital gain over net long-term capital loss, excess of net long-term capital gain over net short-term capital loss, net gain from sale or exchange of property other than capital assets, dividends, and other taxable income. Total compiled receipts exclude nontaxable income other than tax-exempt interest received on certain Government obligations.

³ Net income (or deficit), in general, represents taxable income less allowable deductions, except that for 1925 and 1930, and for 1940-47, amount shown is before deduction due to net operating loss of prior years. (For amounts of such deductions, see table 522, p. 445). Beginning 1936, dividends received on stock of domestic corporations are included in taxable income. For 1936 and later years, contributions or gifts are deductible in arriving at net income and are limited to 5 percent of net income before deduction.

⁴ Includes defense tax.

⁵ Number of returns with no net income, for 1925, includes returns of inactive corporations, not available separately.

⁶ For tax reported, see above.Source: Treasury Department, Bureau of Internal Revenue; *Statistics of Income*, Part 2.

¹ A corporation is classified industrially according to the business reported on the return. When diversified activities are reported, the classification is determined by the industry which accounts for the largest percentage of total receipts.

² For changes in classification affecting comparability of data, see "Statistics of Income for 1938, Part 2."

³ Less than \$500,000.

¹ A return is required of every citizen or resident alien who transferred by gift during calendar year to any one donee property exceeding \$3,000 in value or who, regardless of value, made a gift of future interest in property. A nonresident alien is similarly required to file a return if gift consists of property situated in the United States.

² An exclusion is allowed of the first \$3,000 of gifts, except gifts of future interest in property, made to any one donee during calendar year.

³ The specific exemption of \$30,000 less the sum of amounts allowed in prior years may be taken in one year or spread over a period of years, at option of donor. A nonresident alien donor is not entitled to this exemption.

No. 381.—FEDERAL ESTATE TAX RETURNS—SUMMARY: 1932 to 1948

[All money figures in thousands of dollars. An estate tax return is required to be filed (1) for estate of every citizen and resident alien who died (a) in period Sept. 9, 1916, through 10:24 a. m., Feb. 26, 1926, or in period 5 p. m., June 6, 1932, through Aug. 30, 1935, the value of whose gross estate exceeds \$50,000; (b) in period 10:25 a. m., Feb. 26, 1926, through 4:59 p. m., June 6, 1932, the value of whose gross estate exceeds \$100,000; (c) in period Aug. 31, 1935 through Oct. 21, 1942, the value of whose gross estate exceeds \$40,000; and (d) on or after Oct. 22, 1942, the value of whose gross estate exceeds \$60,000; and (2) for estate of every nonresident alien who died (a) prior to Oct. 22, 1942, any part of whose estate is situated in U. S., at date of death; and (b) on or after Oct. 22, 1942, only if gross estate situated in U. S., at date of death exceeds \$2,000. The estate of an individual who died after 5 p. m., June 6, 1932, is subject to 2 Federal estate taxes—basic tax and additional tax. Basic tax is computed at rates provided by Revenue Act of 1926, which rates are embodied in Internal Revenue Code as basic estate tax. Additional tax is excess of tentative tax computed at rates provided by act in force at date of death, over basic tax]

¹ Net taxable estate for 1933 and subsequent years is net estate for additional tax plus regular net estate for returns filed under the 1926 and prior acts. Tax shown is total net estate tax liability—the sum of net basic tax and net additional tax—and includes defense tax (10 percent of net tax) effective only for estates of individuals who died in period June 28, 1940, through Sept. 20, 1941.

² Excludes returns for estates of nonresident citizens who died prior to May 11, 1934.

³ Includes returns for estates of nonresident citizens who died prior to May 11, 1934.

⁴ No data compiled for 1946.

¹ Net estate classes are based on amount of net estate for additional tax plus specific exemption. (See note 2.)

² The specific exemption tabulated (a) for estates subject to additional tax is \$50,000 under 1942 act; \$40,000 under 1941, 1940, and 1935 acts; \$50,000 under 1934 and 1932 acts; and (b) for estates subject to earlier acts is \$100,000 under 1926 act; and \$50,000 under 1924 and prior acts.

³ Represents excess of total amount of funeral and administration expenses, debts of decedents, mortgages and liens, and support of dependents, over value of property includible in gross estate subject to claims.

⁴ Excess of gross estate over allowable deductions, exclusive of specific exemption.

⁵ Net estate after deducting specific exemption of \$100,000, except for returns filed under 1924 or prior acts for which specific exemption is \$50,000.

⁶ Applies only to estates of individuals who died subsequent to June 6, 1932.

⁷ Credits for (a) estate, inheritance, legacy, or succession taxes paid to States, etc., and (b) gift taxes paid to the Federal Government.

¹ Figures for 1800-50 are as of Jan. 1.

² Revised in accordance with Bureau of Census estimated population for continental United States as of July 1 of each year beginning 1850.

³ Excludes bonds issued to Pacific railways and Navy pension fund.

⁴ Includes old demand notes; U. S. notes (gold reserve deducted since 1900); postal currency and fractional currency less amounts officially estimated to have been destroyed; and also deposits held by Treasury for various purposes. Excludes gold, silver and currency certificates, and Treasury notes of 1890 for redemption of which an exact equivalent of the respective kinds of money or bullion was held in the Treasury.

⁵ Less than \$500,000. ⁶ Includes old Treasury (war) saving securities for 1925.

¹ Holdings of commercial banks and mutual savings banks for 1925 to 1935 are reported book values, and holdings of residual investors therefore deviate from par values in these years. U. S. savings bonds, Series A-F, included at current redemption value.

² Includes all securities issued or guaranteed by U. S. Government, but excludes guaranteed securities held by the Treasury.

³ Includes Postal Savings System.

⁴ Consists of commercial banks, trust companies, and stock savings banks in United States and in Territories and insular possessions. Figures exclude securities held in trust departments.

⁵ Not available separately. Combined totals of these items as follows: 1925, \$13,874,000,000; 1930, \$9,097,000,000; and 1935, \$11,511,000,000.

⁶ Comprises trust, sinking, and investment funds of State and local governments and their agencies, and Territories and insular possessions.

⁷ Includes partnerships and personal trust accounts.

⁸ Includes savings and loan associations, dealers and brokers, corporate pension funds, nonprofit institutions, and investments of foreign balances and international accounts in this country.

¹ Includes partnerships, personal trust accounts. ² Exclusive of banks and insurance companies.

³ Comprises trust, sinking, and investment funds of State and local governments, Territories, and possessions.

⁴ Includes savings and loan associations, non-profit associations, corporate pension trust funds, dealers and brokers, and investment of foreign balances and international accounts in this country.

⁵ Data on daily Treasury statement basis. Since data exclude noninterest bearing debt, they differ slightly from those in table 386. Includes special issues to Federal agencies and trust funds, and excludes guaranteed securities held by Treasury.

⁶ Includes Electric Home and Farm Authority notes, Federal intermediate credit bank debentures, Central Bank for Cooperatives debentures, Federal National Mortgage Association notes, home loan bank debentures, War Finance Corporation bonds (World War I), and joint stock land bank bonds. Includes Federal land bank bonds only through June 30, 1946; on June 27, 1947, the U. S. proprietary interest in these banks ended. Excludes stocks and interagency loans.

⁷ Less than \$50 million. ⁸ Excludes obligations of the Philippine Islands after June 30, 1946.

No. 388.—INTEREST-BEARING SECURITIES ISSUED BY ALL GOVERNMENTAL UNITS IN THE UNITED STATES—ESTIMATED AMOUNTS OUTSTANDING, BY TAX STATUS AND ISSUER: 1913 TO 1951

[U. S. Govt. data on basis of public debt accounts prior to 1920; beginning 1920, on basis of Daily Treasury Statement. "Total amount outstanding" of securities of the several issuers differs from gross indebtedness of these issuers in that former excludes noninterest-bearing debt. "Total privately held securities" differs from net indebtedness of borrowers in several additional respects. Former derived by deducting from total amount of interest-bearing securities outstanding the amount of such securities held by Federal agencies, Federal Reserve Banks, and by public sinking, trust, and investment funds. Net indebtedness derived by deducting from gross indebtedness an amount equivalent to total volume of sinking fund assets of respective borrowers, with no allowance for any other public assets. For exception to par value, see table 387]

[Par value. In millions of dollars]

¹ Includes Government corporations. Based, for the most part, on reports of respective agencies to Civil Service Commission adjusted to improve comparability throughout period. Differs from data in tables compiled by Civil Service Commission in following respects: (1) Excludes seamen and trainees on ships contracted by U. S. Maritime Commission and substitute rural mail carriers; (2) includes temporary employees of Post Office Department hired to handle Christmas mail each year, Federal Reserve banks, and mixed-ownership banks of Farm Credit Administration.

Source: Department of Labor, Bureau of Labor Statistics. Data for executive branch based mainly on reports of Civil Service Commission. Current data published in *Monthly Labor Review* and in mimeographed releases.

No. 395.—PAID CIVILIAN EMPLOYMENT IN THE EXECUTIVE BRANCH OF THE FEDERAL GOVERNMENT, BY AREA AND SEX: JUNE 1941 TO 1951

1941 represents number on pay roll with pay on last regular pay period of month; thereafter, number in active-duty status as of last day of month. 1941 excludes Panama Railroad Co. and Inland Waterways Corp. Prior to 1947, excludes seamen and trainees of U. S. Maritime Commission, and beginning 1948, excludes Central Intelligence Agency. See also *Historical Statistics*, series P 63 for earlier data on Washington, D. C., metropolitan area total]

¹ From geographic study which excluded temporary postal substitutes; distribution for June 1938 not available.² Represents peak of total employment. ³ Not available.⁴ Beginning 1950, Washington, D. C., metropolitan area includes Dist. of Columbia; Alexandria City, Arlington and Fairfax Counties, Virginia; and Montgomery and Prince Georges Counties, Maryland. In 1945, only parts of these counties were included. These areas excluded from data for 48 States.⁵ Relates to District of Columbia only.Source: Civil Service Commission, *Annual Report* and records.

50 years and over..	140	137	3	97.9	(?)	(?)	(?)	4,312	4,366	2,303

¹ Average age is 40.6 years for all employees, 41.6 years for men, and 37.7 years for women. Age is determined by subtracting birth year from year 1947.

² Less than 0.1 percent.

³ Pay rates represent base pay before any deductions for retirement, taxes, or bonds, but exclude overtime, bonuses, night differentials, etc. Pay rates other than annual rates are converted to annual full-time equivalent.

⁴ Average length is 10.2 years for all employees, 11.5 years for men, and 7.2 years for women. Service represents all Federal employment, whether or not retirement deductions were taken from pay, and military service.

15. State and Local Government Finances and Employment

(Sent to print March 19, 1952)

Sources.—Statistics in this section are almost entirely from the Bureau of the Census, Department of Commerce. Most of the tables are based upon recent reports in the regular Census series on *State Finances*, *City Finances*, *Governmental Finances in the United States*, and *Government Employment*. Some of the statistics here are from the most recent decennial Census of Governments, which related to the year 1942 and was designed to obtain and report basic data concerning all governmental units in the United States. A descriptive leaflet, *Census Bureau Publications on Governments*, is issued annually by the Bureau. Summary series of data based on annual and decennial Census reporting for years up to 1946 are available in the publication, *Historical Review of State and Local Government Finances*.

Compilation of data.—Financial statistics of States and large cities (those over 250,000 population) which appear in this section were mainly compiled by representatives of the Bureau of the Census directly from official accounts and records of these governments, with the advice and assistance of local officers and employees. Financial data for other local governments were primarily obtained from the individual units by mail canvass. State and local employment data were also obtained by mail canvass. The Federal Government amounts which appear in certain tables relating to all levels of government are based upon data supplied to the Census Bureau by other Federal agencies.

Relation to State and local records.—Nation-wide statistics on governmental finances and employment must be compiled and presented in accordance with uniform concepts and categories, rather than according to the highly diverse terminology, organization, and fund structure of individual governments. Accordingly, financial statistics which appear in this section for particular States and large cities, although based upon their official records and reports, will not agree directly with specific amounts in such original sources except where particular segments of the government's accounts conform explicitly with standard Census reporting categories.

Terminology.—Financial statistics in this section relate primarily to "general government," as distinct from operation of enterprises and the finances of governmental trust and sinking funds. The terms "general revenue," "general expenditure" and "general debt" are applied accordingly. All tax amounts, however, are reported as general revenue; any tax collections deposited directly into trust or sinking funds are therefore included in general revenue and, as contributions to trust funds or provision for debt retirement, respectively, in general expenditure. As reported here, revenue excludes receipts from borrowings, and expenditure includes provision for debt retirement. The Census reports from which the various tables are drawn include detailed definitions of concepts and terminology.

Fiscal years.—Unless otherwise stated, financial data in this section relate to the fiscal years of the respective governmental units. Federal and State government amounts are for fiscal years ending on June 30 of the year specified, except for 6 States with earlier closing dates—3 in the same calendar year and 3 in the latter part of the preceding calendar year. Local government figures are for fiscal years ending in the specified calendar year except for the few units which close their fiscal years in the succeeding January. Practically all school districts have fiscal years ending on June 30. Other local governments range widely in this regard, with a majority operating on a fiscal year ending December 31.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series P 188-200") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

SUMMARY OF FINANCES

353

No. 405.—STATE AND LOCAL GOVERNMENTS—GENERAL REVENUE AND EXPENDITURE
FOR SELECTED YEARS: 1890 TO 1950

[In millions of dollars. Amounts for "State and local governments" exclude duplicating fiscal aid—that between State and local governments. Thus only fiscal aid transactions with the Federal Government are reflected in the fiscal aid totals. See also *Historical Statistics*, series P 188-200]

¹ Omits revenue and expenditure of incorporated places having less than 2,500 inhabitants, school districts overlying such places, townships, and special districts.

² Not available.

³ A nonsegregable amount of capital outlay is included in "operation."

⁴ Contains contributions to enterprises and to retirement and other trust funds for 1942. Other data refer only to contributions to retirement funds.

⁵ Included in operation; amounts not separable.

⁶ Comprises only school and highway grants; other grants included in "operation."

⁷ Less than \$500,000.

⁸ Pension payments of city corporations and overlying local governments of cities having 30,000 inhabitants or more; originally included in "operation."

¹ Sources: Revenue, U. S. Treasury Department, *Combined Statement of Receipts, Expenditures, and Balances of the U. S. Government, Fiscal Year Ended June 30, 1942*, pp. 25-31; other data, special compilation by Bureau of Accounts, U. S. Treasury Department. Adjustments made in Federal data to conform to Bureau of Census classifications for reporting State and local government finances.

² Represents only those school districts classified by Census Bureau as independent units of government. School figures for other local governments are included with figures for those governments.

³ Each of these Federal-State-local totals and State-and-local totals is less than the sum of amounts shown separately for the several components, because totals exclude duplicating intergovernmental fiscal aid.

⁴ Included in "Earnings and miscellaneous."

⁵ Omits \$94 million for debt retirement reported by U. S. Treasury because payment is only nominally an expenditure and is not a charge against revenue.

⁶ Included in "Other" public safety.

⁷ Includes \$21,111 million for war activities.

⁸ Less than \$0.5 million.

⁹ For cities having populations over 100,000 only. Data for other local governments not available.

¹⁰ Total is less than sum of "State" and "Local" because of exclusion of debts incurred by States for loans to local governments, which duplicate local government obligations held by States.

Source: Department of Commerce, Bureau of the Census; (Federal data) *Governmental Finances in the U. S., 1942*, and (State and local data) *Revised Summary of State and Local Governmental Finances in 1942*. Revisions published in 1948 reports on government finances.

No. 415.—SUMMARY OF STATE AND LOCAL GOVERNMENT FINANCES, BY STATE AREA AND LEVEL OF GOVERNMENT: 1942

[State-and-local aggregates of general revenue and general expenditure are less than the sum of "State" and "Local," because they exclude duplicating intergovernmental aid, i. e., that between State and local levels of government. Thus, both national and State-area aggregates for "Aid received" represent aid from only the Federal Government. See also *Historical Statistics*, series P 188-200, for total general revenue and total general expenditure of all State and local governments]

[In thousands of dollars]

¹ Borrowings are for general-government purposes only, consisting of long-term debt incurred during fiscal year other than by funding or refunding, plus any excess of issuance over redemption (i. e., excluding funding) of short-term debt.

² Includes direct redemption and payments into sinking funds for retirement of general debt, not debt incurred for enterprise purposes.

³ Includes amounts for general control, public safety, natural resources, health, hospitals and institutions for the handicapped, correction, libraries, recreation, and miscellaneous and unallocable, not shown separately.

¹ Includes amounts for types of taxes not shown separately.² Includes unincorporated businesses.³ Combined corporation and individual income taxes as reported by 4 States (Ala., La., Mo., and Ariz.) tabulated with individual income taxes. Amount shown as corporation tax for Ala. and Ariz. represents only taxes on financial institutions.⁴ Back taxes only; not counted with "number of States using tax."⁵ Includes related license taxes.⁶ Excludes amounts for corporation excise taxes and surtaxes measured in part by net income and in part by corporate excess.⁷ Includes corporate excess tax.Source: Department of Commerce, Bureau of the Census; annual report, *State Tax Collections in 1951*.

NO. 423.—DEBT OF STATE GOVERNMENTS OUTSTANDING AT END OF FISCAL YEAR, BY STATES: 1950 AND 1951

[In thousands of dollars, except per capita. Preliminary data. Data are for State fiscal years ending on June 30, except for 6 States with earlier closing dates (in same calendar year—May 31 for Pa., Mar. 31 for N. Y. and Wash.; in previous calendar year—Sept. 30 for Ala. and Wyo., Aug. 31 for Tex.). For 6 States having fiscal years ending prior to June 30, total debt as of June 30, 1951, was as follows: Ala. \$52,233, N. Y. \$930,567, Pa. \$958,524, Tex. \$83,478, Wash. \$224,573, and Wyo. \$3,434]

¹ Including estimates for missing items.

² Includes data for Department of Education as well as State-operated schools, colleges and universities.

³ Includes data for regular highways, toll highways, and bridge facilities. Excludes waterways and other non-highway transportation.

⁴ Includes data for legislature, general administrative and financial agencies, courts, libraries, regulatory agencies, and all other agencies and activities not separately classified. Also includes waterways and other nonhighway transportation (3,400) and State liquor stores (13,000).

⁵ Nonschool data for a previous month.

⁶ Data for police included with highway.

⁷ Data for correction, other than parole boards, included with hospitals and institutions for the handicapped.

⁸ Data for correction included with hospitals and institutions for the handicapped.

⁹ Data for natural resources, except agricultural experiment stations and extension services, included in "All other."

¹⁰ Data for correction and hospitals and institutions for the handicapped included in public welfare.

¹¹ Nonschool employee data and nonschool payroll data (see table 425) from separate sources and therefore not strictly comparable.

¹² Data for correction included with public welfare.

16. Banking and Finance

(Sent to print April 10, 1952)

MONEY AND BANKING .

Banking and monetary system.—Collection of banking and monetary statistics in the United States has been conditioned by the development of our banking and monetary system. Banks in this country are organized under the laws of both the States and the Federal government. "National" banks organized under Federal law, passed in 1863, are supervised by the Comptroller of the Currency, and State-chartered banks are supervised by officials of the respective States. The Federal Reserve System was established in 1914 to exercise central banking functions, some of which are shared with the United States Treasury. The Reserve System includes national banks and such State banks as voluntarily join the System. The Federal Deposit Insurance Corporation, established on January 1, 1934, insures each deposit account up to \$10,000 in banks which are members of the Federal Reserve System and in such nonmember banks as join the insurance fund.

Condition of banks.—Statistics showing the condition of banks are collected by the various agencies responsible for the supervision of banks. Subdivision of the field among these agencies and the increasing adoption of practically uniform report schedules has made it possible for these agencies to compile the data with little duplication.

The Comptroller of the Currency, who has charge of the supervision of national banks, has collected condition reports since 1863 from these banks from three to six times annually and has tabulated and published summaries of these reports, showing the principal assets and liabilities, that is, total loans, United States Government securities, other securities, reserves, bankers' balances, interbank deposits, other demand deposits, and time deposits. National bank statistics are published in detail in the *Abstract of Reports of National Banks* (usually four times a year). The call report data are also published in the annual reports of the Comptroller although the detailed break-down of assets and liabilities is slightly different than in the abstracts.

After the Federal Reserve System was established in 1914, State bank members of the Federal Reserve System began to submit to the Federal Reserve banks their statements of condition at the same time and in substantially the same form as national banks. These have been consolidated by the Federal Reserve Board with data for national banks collected by the Comptroller of the Currency into totals for all member banks of the Federal Reserve System, and are published in detail by the Board of Governors of the Federal Reserve System in the *Member Bank Call Report* (usually three times a year) and in summary form in the *Federal Reserve Bulletin*. *Banking and Monetary Statistics*, which was published in 1943 by the Board of Governors of the Federal Reserve System, makes available in one volume and on a uniform basis statistics of banking, monetary, and other financial developments. The statistics generally cover the period beginning with 1914.

Since the establishment of the Federal Deposit Insurance Corporation in 1934, insured banks not members of the Federal Reserve System have been reporting their condition for the end of June and December in the same manner as member banks, and consolidation of all these reports gives totals for all insured banks, which include nearly all commercial banks in the country. Beginning with June 30, 1947, a revised all-bank series is being tabulated twice a year by the Federal Deposit Insurance Corporation, replacing the three series previously compiled by the three Federal banking supervisory agencies. Data for noninsured banks are obtained largely through the cooperation of State banking officials. A monthly series, based on the

new all-bank series, is prepared and published by the Board of Governors of the Federal Reserve System.

Statistics of the Postal Savings System, which is under the management of the Post Office Department and which performs certain banking functions, are available monthly in the *Federal Reserve Bulletin* and annually in the *Report of Operations of the Postal Savings System*.

Currency.—Currency, including coin and paper money, represents a relatively small part of the total media of exchange in the United States, as most money payments are made by check. All currency is now issued by the Federal Reserve Banks and the Treasury.

"Currency in circulation" or "money in circulation" (official *Treasury Circulation Statement*) refers to all coin and paper money outside the Treasury and Federal Reserve Banks, with the exception of gold and silver coin known to have been exported and, beginning with January 31, 1934, all gold coin. It includes all coin and paper money held by the public in the United States whether in current active use or held idle—also some currency which strictly speaking, is not a part of the money supply in the hands of the public, that is, cash in vaults of commercial and savings banks, currency lost or destroyed, and currency carried abroad by travelers and not appearing in the official gold and silver export figures. The Federal Reserve Board derives a monthly figure for "currency outside banks" by subtracting from the Treasury "circulation" figure an amount representing vault cash held by commercial and mutual savings banks, and this figure more nearly approximates true circulation. Historical data on the stock of money and money in circulation may be found in the *Annual Report of the Secretary of the Treasury*.

Government credit agencies.—Except for the Federal land banks, Federal intermediate credit banks, and a few other agencies, including the war emergency organizations, most of the credit agencies of the United States Government were created in 1932-34 to meet specific financial problems precipitated by the depression. At the present time, there are over 30 agencies, including the Reconstruction Finance Corporation, various agricultural lending institutions, insurance agencies, home mortgage and housing agencies, and certain agencies in liquidation.

There are several lending agencies which are part of, or are supervised by, the United States Department of Agriculture.

The Commodity Credit Corporation is the financial agency used in carrying out price support, supply, and related activities of the Department of Agriculture. As one means of effectuating the price support program, the corporation makes non-recourse loans to farmers, farm cooperatives and to some dealers and processors of farm commodities. Also it guarantees non-recourse loans for such purposes made by commercial banks and other institutions. Collateral for CCC loans are agricultural commodities which may be redeemed upon repayment of the loan.

The Rural Electrification Administration was established on May 11, 1935. It makes loans, with preference to nonprofit and cooperative organizations and to public bodies, to cover full cost of constructing power lines and other electric facilities to serve persons in rural areas who are without central station electric service. In 1949 the agency received authority to make loans to extend or improve rural telephone service. The Congress annually determines the amount of funds REA may lend.

The Farmers' Home Administration which was established in 1946 merged the functions of the Farm Security Administration and the Emergency Crop and Feed Loan Division of the Farm Credit Administration. The FHA is authorized to provide both long- and short-term credit for farmers who cannot get the loans they need at prevailing rates and terms in their communities from banks, cooperative lending agencies, or other similar sources. This agency is also authorized under certain

conditions to insure long-term farm mortgage loans made by private lenders. The amount of loans which FHA may make or insure is determined annually by Congress which appropriates funds for the direct loans.

The Farm Credit Administration supervises a system of lending institutions, the general purpose of which is to provide long- and short-term credit to farmers and farmers' cooperative associations on a sound credit basis through coordinated cooperative credit facilities. In contrast to other Federal credit agencies, for the most part this system does not lend Government funds; its lending operations are financed principally from the sale of securities of the land banks and intermediate credit banks in the investment market. The system at the end of December 1950 included 12 Federal land banks and 1,211 national farm loan associations which provide long-term farm mortgage credit, 12 production credit corporations which supervise 500 production credit associations making short-term loans, 13 banks for cooperatives which extend credit to farmers' cooperative associations, and 12 Federal intermediate credit banks which discount agricultural loans. Also, it includes the Federal Farm Mortgage Corporation which is servicing and liquidating the emergency farm mortgage loans made by the Land Bank Commissioner from 1933 to 1947.

Statistics on the principal assets and liabilities of Government credit agencies are published quarterly in the *Daily Statement of the United States Treasury*. Quarterly statements showing the assets and liabilities of Government corporations and sources and uses of funds for these agencies are published in the monthly *Treasury Bulletin*. Series of yearly, quarterly, and monthly statistics relating to operations of Government credit agencies are available also in the annual and other reports of individual agencies and the annual reports of the Secretary of the Treasury.

Private credit agencies other than banks.—In addition to commercial banks, savings banks, and Government credit agencies, there are a considerable number of other types of credit agencies in the United States. The most important of these are savings and loan associations, insurance companies, finance companies dealing primarily in installment sales financing, credit unions, and personal loan companies. Statistics of savings and loan associations are collected by the Home Loan Bank Board. Statistics on loans, investments, cash, etc., of life insurance companies are collected and published principally by the Spectator Company, which also publishes statistics on other types of insurance. Federal credit unions are under the supervision of the Bureau of Federal Credit Unions of the Federal Security Agency and statistics on them are compiled and published by that organization. These data are combined with information on credit unions other than Federal by the Bureau of Labor Statistics and published in the *Monthly Labor Review*. (See tables 490 and 491.) Consumer credit statistics are published currently in the *Federal Reserve Bulletin*.

SAVINGS AND LIQUID ASSETS

Individuals' saving.—The Securities and Exchange Commission releases quarterly detailed estimates of individuals' saving showing the increase in liquid assets held by individuals less the increase in their debt, exclusive of gains or losses from revaluation of assets. In addition to total saving, these figures show the components contributing to it, such as changes in securities, cash, insurance, consumers' indebtedness, etc. A continuous series starting with 1940 is published quarterly in a special release and in the Commission's *Statistical Bulletin*. (See table 463.) Annual estimates prior to 1940 were published in the *National Income Supplement to the Survey of Current Business*, July 1951, and in the issue of September 1949. The Home Loan Bank Board compiles statistics on changes in selected types of individual long-term savings. (See table 462.) The Board of Governors of the Federal Reserve System releases annual data covering the distribution of liquid assets and positive, negative, and net savings of families, by income groups. These estimates are based on the Board's Survey of Consumer Finances, a nation-wide interview survey of private households. (See table 310, p. 259.)

Liquid asset holdings of individuals and businesses.—The Board of Governors of the Federal Reserve System prepares annual estimates of the amount of currency, demand deposits, time deposits, shares in savings and loan associations, and U. S. Government securities held by individuals and businesses. Separate estimates are shown for financial and nonfinancial corporations, unincorporated businesses, other individuals, and trust fund holdings. The series, published in the *Federal Reserve Bulletin*, gives semi-annual figures from December 1939 to December 1946 and annual figures thereafter. (See table 464.)

SECURITIES MARKETS

New issues and retirement of securities.—Current statistical information on new issues of securities has been provided for many years by the *Journal of Commerce* (since 1906), the *Commercial and Financial Chronicle* (since 1919) (see table 506), and the Standard and Poor's Corporation (since 1924). The statistics of the *Commercial and Financial Chronicle*, the most detailed and most widely used of the aforementioned series, include, in addition to domestic and foreign corporate issues and State and local government securities, the issues of independent agencies of the United States Government, and the issues of foreign governments and their subdivisions. The series does not include detailed information on the uses of the proceeds of new issues, showing totals only for refunding and all other purposes.

A more comprehensive series of new issues with detailed information on the intended uses of net proceeds has been compiled by the Securities and Exchange Commission on a monthly basis beginning with January 1934. (See tables 504 and 507.) This series is published monthly in the *Statistical Bulletin* of the Securities and Exchange Commission, the *Federal Reserve Bulletin*, and the *Survey of Current Business*.

In addition, the Commission has been compiling statistics since 1933 on the volume of retirements of corporate securities and changes in security holdings of institutional groups and the public by type of issue. The Commission has been publishing data on the cost of flotation of securities registered under the Securities Act of 1933.

Trading in securities.—(See tables 496, 499, 500, 502.) Monthly figures on the total value and volume of securities sold on each of the national securities exchanges have been published since October 1934 by the Securities and Exchange Commission. These figures, reported in connection with the fees paid under Section 31 of the Securities Exchange Act of 1934, include all sales effected on exchanges except, since March 1944, United States Government issues. They cover odd lots as well as round lots. The Commission also publishes figures on the total daily round-lot volume of trading in stocks on the New York Stock Exchange and the New York Curb Exchange, showing short sales and several categories of member and nonmember purchases and sales. Daily odd-lot purchases and sales are reported separately.

Prior to 1934, the only available statistical data on the volume of trading in securities were the daily figures on the number of shares and the principal amount of bonds reported sold on the New York Stock Exchange and on most of the other securities exchanges. "Reported" volume of stock sales on the New York Stock Exchange represents sales in round lots reported on the ticker and does not include certain types of round-lot transactions such as stopped sales, private sales, split openings, cross transactions, and errors of omission, which ordinarily amount to from five to ten percent of total round-lot sales on the Exchange.

Security price averages.—A number of indices of security prices are published regularly. Among the most widely known are the Dow-Jones averages, which provide a continuous series of common stock prices on a daily basis since 1897. This series is now based on 65 common stocks divided into 30 industrial, 20 railroad, and 15 public utility stocks. Indices of the Standard and Poor's Corporation, available since 1918, are based on the Wednesday closing prices of approximately 400 stocks. (See table 495.) The Securities and Exchange Commission compiles an index of weekly closing

prices of 265 stocks listed on the New York Stock Exchange, comprising 37 industry groups, conforming with the Standard Industrial Classification. These indices are published in the Commission's *Statistical Bulletin*. (See table 494.)

INSURANCE

Insurance statistics.—There are no complete statistics of insurance for the United States as a whole. Individual States collect statistics on insurers operating within their respective jurisdictions; organizations representing certain classes of insurers, or of insurance, collect statistics for those classes; insurance publishers gather the only statistics approaching comprehensiveness. This situation arises primarily from the fact that the regulation of insurance and the collection of primary information on insurance are in the hands of the various States, Territories, and the District of Columbia. While insurance is now largely subject to Federal regulation, the Federal Government has not exercised its power nor has it taken any steps to collect comprehensive statistics of insurance on a national basis. Basic theory and practice are parallel throughout insurance, but application of theory and details of practice, including vocabulary, differ enormously by class of insurance and by class of insurer. Sound combination or comparison of figures is often difficult or impossible.

Types of insurance.—Insurance is traditionally classified as life, fire and marine, and casualty. With some overlapping between classes, an insurer is authorized to write insurance falling in one of these three classes, though there is now a tendency in the direction of permitting insurers, other than life, to write all kinds of insurance except life. *Life insurance* and *marine insurance* are each fairly homogeneous, the one having to do with life contingencies, and the other with losses connected with transportation. *Fire insurance*, as such, offers protection against loss by fire, but insurers in that business write several allied classes of insurance, principally against loss by windstorm, by damage to motor vehicles, by damage to aircraft, by sprinkler leakage, by earthquake, and by riot. *Casualty insurance* is a miscellaneous class, the principal subclasses of which are liability insurance (protecting against loss due to claims for damages) and workmen's compensation insurance (protecting an employer against loss due to his obligations under a workmen's compensation law). (See section 10, Social Security.) Casualty insurers also write several unrelated kinds of insurance, including fidelity and surety bonds.

Types of insurer.—The principal classes of insurer are stock companies and mutual companies or associations. Of less importance are fraternal insurers, reciprocal exchanges, Lloyds, State funds, and savings banks. *Stock companies* are corporations owned and controlled by stockholders, usually for the purpose of making profits. *Mutuals* are owned and controlled by insured members for the purpose of meeting their insurance needs at cost. *Fraternal insurers* emphasize social purposes as well as insurance; *reciprocal exchanges* are organizations of individual insureds operating through an attorney-in-fact; *Lloyds* are groups of individuals writing insurance in syndicates; *State funds* are insurers operated by individual States and are almost entirely devoted to writing workmen's compensation insurance either as exclusive insurers or in competition with private insurers; *savings banks* write life insurance in three States.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series N 172-178") provide cross-references, where applicable, to *Historical Statistics of the United States*, 1789-1945.

No. 438.—MONEY STOCK AND MONEY IN CIRCULATION: 1800 TO 1951

[All figures except per capita in thousands of dollars. For sake of comparability figures in this table for earlier years have been revised in conformity with revisions in circulation statement in 1922 and 1927. For explanations of these revisions, see annual reports of Secretary of Treasury 1922, p. 433, and 1928, pp. 70-71. Per capita figures for 1800-40 based on Bureau of Census population figures for continental United States on census dates; beginning 1800, based on estimated population as of July 1 and Dec. 31. See also *Historical Statistics*, series N 148-151]

¹ Totals involve duplication to extent that United States notes and Federal Reserve notes, included in full, are in part secured by gold, also included in full. Gold certificates, silver certificates, and Treasury notes of 1890 excluded, since they are complete duplications of equal amounts of gold or silver held as security therefor and included in totals.

² By proclamation of the president dated Jan. 31, 1934, weight of gold dollar reduced from 25.8 to 15 $\frac{1}{2}$ grains of gold, 0.9 fine. Hence, value of gold based on \$35 per fine ounce beginning June 1934; theretofore, based on \$20.67 per fine ounce.

³ Gold Reserve Act of 1934, which was culmination of gold actions of 1933, vested in United States title to all gold coin and gold bullion. Gold coin was withdrawn from circulation and formed into bars. Gold coin (\$287,000,000) shown on Treasury records as being then outstanding was dropped from monthly circulation statement as of Jan. 31, 1934.

No. 440.—BANK DEBITS AND DEPOSIT TURNOVER: 1920 TO 1951

[All figures in millions of dollars. Figures represent debits or charges on books of reporting member and non-member banks of Federal Reserve System to deposit accounts of individuals, firms, and corporations, and of United States, State, county, and municipal governments, including debits to savings accounts, payments from trust accounts, and certificates of deposit paid. Excludes debits to accounts of other banks or in settlement of clearinghouse balances, payment of cashier's checks, charges to expense and miscellaneous accounts, corrections, and similar charges. See also *Historical Statistics*, series N 76-79]

No. 441.—BANK CLEARINGS AT PRINCIPAL CITIES: 1920 TO 1951

[In millions of dollars. Comparability of figures for different years is affected by tendency toward consolidation of banks, eliminating former clearings between 2 or more banks. Debits to individual account (table 440) are a better measure of volume of payment. Cities listed in order of importance according to clearings in 1951. See also *Historical Statistics*, series N 80-89]

¹ Coinage of domestic gold coin discontinued in 1933.

No. 444.—SILVER—PRICES, BULLION VALUE, AND RATIO TO GOLD: 1840 TO 1950

[London price converted to basis of ounce 1.000 fine and converted to American money at par of exchange through 1930; from 1931 through 1944, at current rate of exchange; beginning 1945, (London price) reported on basis of ounce 0.999 fine and converted to American money at current rate of exchange. Commercial ratio computed on basis of London quotations through 1914; thereafter, on basis of New York average price. Beginning 1934, monetary value of gold is \$35.00 per fine ounce, as against \$20.67+ in previous years. Value of fine silver (371.24 grains) in dollar computed on basis of London quotations through 1917; thereafter, on basis of New York average price. See also *Historical Statistics*, series N 183-184, for data on commercial ratio to gold and value of silver in dollar]

[All figures, except "Commercial ratio to gold," expressed in dollars]

No. 445.—ALL ACTIVE BANKS—PRINCIPAL ASSETS AND LIABILITIES, BY CLASS OF BANKS: 1834 TO 1950

[Includes banks in Alaska, Hawaii, Puerto Rico, Philippine Islands (through 1941), and beginning with 1935, those in Virgin Islands and with 1933, those in Canal Zone, Guam (except 1942-44), and American Samoa. Data for banks other than national for earlier years are not as of June 30 and are incomplete, especially through 1885. Figures for mutual savings banks include some stock savings banks for years prior to 1910 and also a few in several more recent years. Private banks are not included prior to 1890; statistics for private banks, except for 1935, cover only banks under State supervision and those voluntarily reporting; for 1935 they include also private banks which submitted reports to the Comptroller of the Currency under provisions of the Banking Act of 1933. See also *Historical Statistics*, series N 10-34, and N 43-48]

[Money figures in millions of dollars]

¹ Reciprocal interbank demand balances with banks in U. S. are reported net, beginning 1942.² Acceptances of other banks and bills of exchange or drafts sold with endorsements are excluded for national and State banks beginning with 1920 and for other banks beginning with 1929.³ Securities borrowed excluded for national banks beginning with 1903 and for other banks beginning with 1920. Not reported separately for prior years.⁴ Includes lawful reserve and exchanges for clearing house. Beginning 1936, excludes cash items not in process of collection.⁵ Beginning 1934, includes capital notes and debentures for banks other than national.⁶ Interest, taxes, and other expenses accrued and unpaid are excluded for national banks beginning with 1920 and for other banks beginning with 1929.⁷ Figures for national banks represent national bank circulation only; comparatively small amounts of State bank notes outstanding for 1870 to 1910, for which national banks converted from State banks or merged with State banks assumed liability, are not included in the figures for national banks or for all banks.⁸ Capital only.⁹ U. S. Government securities only.¹⁰ Includes State bank circulation outstanding.¹¹ Includes loan and trust companies, and with some exceptions (see headnote), stock savings banks.¹² Figures given under capital for 1935 include capital stock of one stock savings bank (see headnote).Source: Treasury Department, Comptroller of the Currency; *Annual Report*.

¹ Beginning with 1942, taxes on net income, previously included in expenses, are reported separately, and recurring depreciation on banking-house furniture and fixtures, previously included in losses and charge-offs, is included in expenses.

² Includes interest on capital notes and debentures beginning 1933, when first issued.

³ Prior to 1949, averages of amounts reported for every call date in year and final call date in preceding year. For 1949 and 1950 averages of amounts reported for call dates at beginning, middle, and end of year were used, plus the last-Wednesday-of-the-month figures for the 10 intervening months.

⁴ Not available on the 13-month basis used for all member banks.

¹ Both direct and guaranteed obligations.

² Prior to Dec. 31, 1935, excludes balances with private banks to extent that such balances were reported in "Other assets." Prior to Dec. 31, 1933, excludes time balances with domestic banks which then amounted to \$62,000,000 and which, prior to that time, were reported in "Other assets." Beginning June 30, 1942, excludes reciprocal bank balances which on Dec. 31, 1942, aggregated \$513,000,000.

³ Beginning with 1940, includes U. S. Treasurer's time deposits, open account.

⁴ Demand deposits other than interbank and U. S. Government, less cash items reported as in process of collection and, prior to Dec. 31, 1935, less cash items reported on hand but not in process of collection.

⁵ Central reserve city banks only.

¹ For rates for 1914 to 1921, see Statistical Abstract 1928, table 240; for 1922 to 1932, Statistical Abstract 1933, table 232; for 1933 and 1934, Statistical Abstract 1942, table 268. For rates on industrial advances authorized by sec. 13b of Federal Reserve Act, which are not shown in this table, see source.

² Rediscounts of notes, drafts, and bills eligible for discount under Federal Reserve Act, and advances secured by such paper, by direct obligations of U. S., by certain obligations guaranteed as to principal and interest by U. S., and by obligations of Federal intermediate credit banks maturing within 6 months.

³ 1 percent on advances secured by Government obligations.

⁴ ½ percent on advances secured by Government obligations maturing or callable in 1 year or less. This preferential rate eliminated in April and May 1946.

⁵ Advances secured to satisfaction of Federal Reserve Bank.

⁶ Rate of 2½ percent to other lenders (than banks) in effect until Apr. 11, 1942.

⁷ Separate rate to banks eliminated.

¹ Excludes figures for banks, insurance companies, savings and loan associations, nonprofit associations, foreigners, and governmental bodies and agencies.

² Estimates of demand deposit balances as they would appear on the records of depositors. They differ from figures based on bank records such as given in regular banking statistics. Depositor-record estimates are lower than bank-record estimates; for example, total demand deposits as of Dec. 31, 1950 on a holder-record basis (see table) amounted to 65.8 billion dollars while on a bank-record basis these deposits amount to 85.7 billion.

³ Private share capital in all operating savings and loan associations including private repurchaseable shares, deposits, and investment certificates.

⁴ Includes outstanding amounts of excess profits tax refund bonds beginning December 1945, as follows: 1945, \$1,128 million; 1946, \$29 million; 1947, \$12 million; 1948, \$7 million; 1949, \$4 million; 1950, \$3 million. Armed forces leave bonds included beginning December 1947. Amount outstanding December 1947 was \$767 million; 1948, \$464 million; 1949, \$343 million; 1950, \$221 million.

⁵ Includes real estate companies, finance and credit companies, insurance agencies (not carriers), investment trusts, security brokers and dealers, holding companies not otherwise classified, etc.

⁶ Includes only amounts administered by corporate trustees.

⁷ Includes holdings of farmers and professional persons.

¹ In some States number reporting is greater than total at end of year because former includes associations which, although transacting some business during year, had ceased operation by end of year.

² Partly estimated.

³ Federal credit unions only; no State-chartered associations in this State or area.

⁴ Excludes loans on real estate, which can be made only from surplus funds.

¹ Straight average of market prices of all taxable bonds due or callable in 15 years and over.² Prices derived from average yields on basis of a 4 percent 20-year bond based on Wednesday closing prices.³ Based on composite of data (including industrial, utility, and railroad) and a conversion of yield indexes, based on yield to maturity of each bond and assuming a 4 percent coupon with 20 years to maturity. From April 1937 to date, prices are averages of weekly data for 17 A1+ bonds; from January 1929 to March 1937, data based on a varying group of A1+ bonds, one price monthly (first of month) being used.⁴ Prices derived from averages of median yields on noncallable high-grade stocks on basis of a \$7 annual dividend. Data from Board of Governors, Federal Reserve System.⁵ Based on Wednesday's closing prices, or last preceding sale price; indexes weighted by number of shares of each stock outstanding in base period. Number of stocks represents number currently used; continuity of series not affected by change in number.⁶ Averages of daily closing figures. Changes have been made in stocks used at various times. However, the number of stocks has remained constant except for public utilities (see note 7).⁷ For 20 stocks prior to June 2, 1938.⁸ Based on prices end of month. 200 stocks used represent for the most part, an identical list, except in public utility group, which is a continuous series composed of 24 electric utilities (representing combined holding and operating electric companies prior to 1942 and operating electric companies thereafter). Data for A. T. & T. Co., included in figures for 200 stocks; excluded from utilities in order to show more clearly the trend for electric operating companies.⁹ Includes also 15 banks and 10 insurance stocks and 1 additional public utility stock (see note 8).Source: Department of Commerce, Office of Business Economics; *Survey of Current Business*, except as noted. (For original sources see table stub.)

No. 504.—SECURITIES—NEW SECURITIES OFFERED FOR CASH SALE, BY TYPE AND ISSUER: 1939 TO 1951

Estimated gross proceeds in millions of dollars. Gross proceeds are derived by multiplying principal amounts or number of units by offering prices, except for municipal issues where principal amount is used. Covers substantially all new issues of securities offered for cash sale in United States in amounts over \$100,000 and with terms of maturity of more than 1 year. Figures represent offerings, not actual sales. Includes issues privately placed, publicly offered, unregistered issues and those registered under Securities Act of 1933]

No. 515.—FIRE LOSSES, TOTAL AND PER CAPITA: 1876 TO 1950

[Amounts, except per capita, in thousands of dollars. Continental United States only. Prior to 1916 figures are as compiled by the New York Journal of Commerce and include losses of \$10,000 or over in the principal cities of the United States, adding 15 percent for small and unreported losses. These figures are not comparable with those shown for later years (the 1916 Journal of Commerce figure being \$214,531,000 as against \$258,378,000) which cover all fires reported to the Actuarial Bureau Committee, adding 25 percent for unreported and uninsured losses prior to 1935 and 30 percent thereafter. Estimated fire losses are based on paid losses]

17. Business Enterprise

(Sent to print April 10, 1952)

Statistics in this section relate in general to the place and the behavior of the business firm and business initiative in the American economy. More specifically, the data show measures of and changes in business population, corporate assets and liabilities, certain types of business income and expenditure, and patents and designs.

Business population and turnover.—These estimates of Office of Business Economics (see tables 518 and 519) are based on data from a number of sources, particularly Bureau of the Census, Bureau of Internal Revenue, and Bureau of Old-Age and Survivors Insurance. A firm is defined here as a business organization under a single management and may include one or more plants or outlets; a firm doing business in more than one industry is counted only in that industry accounting for the highest proportion of its total employment. A self-employed person is considered a firm only if he has either one or more employees or has an established place of business. This count of business population differs from that of the Bureau of the Census which ordinarily represents a count of establishments, i. e., manufacturing plants or retail stores.

The number of new and discontinued businesses is estimated from tabulations prepared by the Bureau of Old-Age and Survivors Insurance, which show the number of employer identification numbers issued and canceled each quarter.

Business transfers represent purchases of going businesses, acquisitions of businesses through inheritance, transfers of businesses to a trustee or executor as well as changes in the form of business organization. The data are not directly comparable with those on new firms and discontinuances.

Information on new incorporations is collected by Dun & Bradstreet and is available monthly, by States, beginning in July 1945. The statistics include both completely new businesses which are incorporated, and changes in existing businesses from the noncorporate to the corporate form of organization, the transfer of an existing corporation to a new State, etc.

Corporate assets and liabilities.—These data are from the Bureau of Internal Revenue and the Securities and Exchange Commission. In its annual report, *Statistics of Income, Part 2*, the Bureau of Internal Revenue presents abbreviated balance sheet and income account data for all United States corporations. In a quarterly release entitled *Net Working Capital of U. S. Corporations*, the Securities and Exchange Commission publishes data on the net working capital position of all United States corporations, exclusive of banks and insurance companies, showing the principal components of current assets and liabilities.

Corporation income, profits, dividends, and taxes.—The Bureau of Internal Revenue, the Office of Business Economics of the Department of Commerce, and the Board of Governors of the Federal Reserve System are the principal sources of statistics on these subjects. The statistics of these agencies overlap in many respects but are not comparable because of differing purposes of compilation.

Corporation statistics based on income tax returns are published by the Bureau of Internal Revenue in the annual *Statistics of Income, Part 2*.

Corporate data of the Office of Business Economics are from statistics on national income and product which may be found in its *Survey of Current Business*. In par-

ticular, see regular February and July monthly issues, and the 1951 *National Income Supplement*. These data are defined as required for purposes of national income estimation.

The primary sources of data for the Office of Business Economics estimates of profits, taxes, dividends, and undistributed profits are the original corporate tax returns submitted to the Bureau of Internal Revenue and summarized in the annual report on *Statistics of Income, Part 2*. Various adjustments of the *Statistics of Income* data have been required by the national income treatment, particularly with respect to depletion, capital gain or loss, and intercorporate dividends and because the original corporate income statements do not represent the final stage of information. For details of these adjustments, see table 38 of the reports on national income and product in the *National Income Supplement* cited above. That table provides a reconciliation between the national income profit series and those reported in *Statistics of Income*.

Unincorporated enterprises.—These data also are from the national income and product statistics of the Office of Business Economics. Net income of these enterprises is a composite income share. It includes return on proprietors' investment and risk, as well as return from proprietors' own labor and any labor contributed by proprietors' families to the business.

Sources and uses of corporate funds.—These data indicate capital requirements of corporations and manner in which they are financed. Sources of funds should be equal to their uses. Certain discrepancies, however, apart from errors in estimation interfere with this equality. These discrepancies are not particularly significant and are due to omission of such factors as (1) money accruing to corporations from an excess of sales over purchases of used plant and equipment (2) transactions in securities held as permanent investments except public offerings, and (3) the fact that net new issues omit entrepreneurial capital for new corporations where no offering or sales of securities are made to the public or to institutions. Liquidation of such corporations is similarly not reflected.

Business sales and inventories.—These data include all companies, both corporate and noncorporate, major activities of which are in manufacturing or trade. Farm and other nonfarm businesses are not included. The manufacturing figures are the sum of (1) totals for corporations from Bureau of Internal Revenue *Statistics of Income* data for 1939-48 and projections of 1948 figures by means of a representative sample of manufacturing corporations for 1947-51, and (2) estimates for unincorporated enterprises projected, by means of sample data, back to 1939 and forward to 1951 from benchmarks on sole proprietorships and partnerships from Bureau of Internal Revenue for the years 1939, 1945 and 1947.

Retail and wholesale trade estimates are based on figures in 1939 and 1948 Censuses of Business, interpolated and carried forward by means of sample data, Bureau of Internal Revenue compilations, and other information.

Net change in business inventories.—To ascertain net physical change in nonfarm inventories, book values of beginning and ending inventories of each year are expressed in terms of constant base year prices by means of selected Bureau of Labor Statistics wholesale price indexes appropriate to each industry. Net increment in deflated book value figures is then converted to a current price basis by index ratios of current prices to base year prices. No inventory valuation adjustment is shown for farm inventories because change in farm inventories is estimated (by Bureau of Agricultural Economics) from physical quantity data.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series P 176-187") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

No. 518.—NUMBER OF FIRMS IN OPERATION, 1929 TO 1951, AND NEW AND DISCONTINUED BUSINESSES, TRANSFERS, AND NEW INCORPORATIONS, 1944 TO 1951

[In thousands except new incorporations. Data are for continental United States. Excludes firms in agriculture, forestry, fishing and the professional services. New businesses include only firms which have been newly established; going concerns which have been purchased are considered business transfers. Discontinued businesses include closures of all kinds without reference to reason for discontinuing—e. g., failure, retirement, illness of proprietor, etc.]

Preferred.....	19,117	19,533	17,138	14,764	14,857	15,007	14,957
Common.....	87,067	82,733	72,292	64,747	68,334	72,463	76,774
Surplus and undivided profits ⁷	61,832	48,838	61,633	83,585	89,840	101,404	113,607
Deficit ⁸	6,734	12,163	12,676	8,571	8,416	8,307	8,113
Net surplus.....	55,098	36,665	48,957	75,014	81,423	93,097	105,489

¹ Excludes returns with fragmentary balance sheet data.² Adjustments are made in tabulating data as follows: (1) Reserves for depreciation, depletion, amortization, and bad debts, when reported under liabilities are used to reduce corresponding asset account, and "Total assets" and "Total liabilities" are decreased by amount of such reserves; and (2) a deficit in surplus, reported under assets, is transferred to liabilities, and "Total assets" and "Total liabilities" are decreased by amount of deficit.³ Cash in till and deposits in banks.⁴ Less reserve for bad debts. Includes loans and discounts of banks.⁵ Consists of obligations of United States or any agency or instrumentality thereof; obligations of States, Territories, and political subdivisions thereof, District of Columbia, and United States possessions.⁶ For balance sheets in which common and preferred stock are not reported separately, combined amount is tabulated as "Common stock."⁷ Consists of sum of positive amounts of "Paid-in or capital surplus," "Earned surplus and undivided profits," and "Surplus reserves."⁸ Consists of negative amounts for "Earned surplus and undivided profits."Source: Treasury Department, Bureau of Internal Revenue; *Statistics of Income*, Part 2.

No. 521.—CURRENT ASSETS AND LIABILITIES OF U. S. CORPORATIONS: 1941 TO 1951

[In billions of dollars. Covers all U. S. corporations excluding banks and insurance companies. 1941-1948 based on Bureau of Internal Revenue Statistics of Income, covering virtually all corporations in United States; for 1949-51 estimated (subject to revision), based on data compiled from many different sources, including data on corporations registered with Securities and Exchange Commission. Figures as of end of specified years]

¹ Receivables from and payables to U. S. Government exclude amounts offset against each other on corporations' books or amounts arising from subcontracting which are not directly due from or to U. S. Government.² Includes marketable securities other than U. S. Government.³ Beginning 1942 includes provisions for renegotiation other than those combined with income tax liabilities.Source: Securities and Exchange Commission; Statistical Series, *Net Working Capital of U. S. Corporations*. Data are published quarterly.

No. 522.—CORPORATION RECEIPTS, DEDUCTIONS, PROFITS, AND TAX: 1925 TO 1948

[Includes data for Alaska, District of Columbia, and Hawaii; based on income tax returns as filed, prior to audit adjustments or other changes made after the returns were filed, as the result of carry-backs, relief granted under section 722 of the Internal Revenue Code, recomputation of amortization of emergency facilities, or renegotiation of war contracts. All corporations are required to file returns except those specifically exempt, such as mutual, fraternal, civic, and charitable organizations not operating for profit. Returns of inactive corporations are excluded from these tabulations, except as noted. In comparing data over a period of years, changes in law must be taken into consideration, especially discontinuance for 1934-41 of privilege of filing consolidated returns (except by railroad corporations and their related holding or leasing companies and, in 1940-41, by Pan American trade-corporations) and the restoration of this privilege in 1942. See source publications for effect of changes on statistical items. Data represent combined totals for returns reporting net income and those reporting no net income. For number of returns, see table 376, p. 327]

[In millions of dollars]

¹ Total compiled receipts consist of gross sales (less returns and allowances), gross receipts from operations (where inventories are not an income-determining factor), all interest received on Government obligations (less amortizable bond premium), other interest, rents, royalties, excess of net short-term capital gain over net long-term capital loss, excess of net long-term capital gain over net short-term capital loss, net gain from sale or exchange of property other than capital assets, dividends, and other taxable income. Total compiled receipts exclude non-taxable income other than tax-exempt interest received on certain Government obligations.

² Not available.

³ Beginning 1936, "Dividends from domestic corporations" are taxable income, tabulated with "other receipts."

⁴ Beginning 1934, includes in addition to the wholly tax-exempt interest, that which is partially tax-exempt. Interest on Treasury notes issued on or after Dec. 1, 1940, and obligations issued on or after Mar. 1, 1941, by the United States or any agency or instrumentality thereof, is wholly taxable and is included in "other receipts" for 1941-48.

⁵ Beginning 1936, includes contributions or gifts (limited to 5 percent of net income before this deduction).

⁶ Excludes (1) Federal income tax and Federal excess-profits taxes; (2) estate, inheritance, legacy, succession, and gift taxes; (3) income taxes paid to a foreign country or possession of United States, if any portion is claimed as a tax credit; (4) taxes assessed against local benefits; (5) Federal taxes paid on tax-free covenant bonds; and (6) taxes reported in "Cost of goods sold" and "Cost of operations."

⁷ Tabulated with "Other deductions."

⁸ Includes amortization of emergency facilities for 1940 and later years.

⁹ Compiled receipts less compiled deductions.

¹⁰ Net income (or deficit), in general, represents taxable income less allowable deductions, except that for 1925 and 1930, and for 1940-48, amount shown is before deduction due to net operating loss of prior years.

¹¹ Deducted by corporations reporting net income.

¹² In addition to income tax, includes: declared value excess-profits tax, 1933-45; defense tax, 1940; and excess profits tax under provisions of Second Revenue Act of 1940, 1940-46.

No. 524.—INCOME OF UNINCORPORATED ENTERPRISES, BY INDUSTRY: 1944 TO 1950

[In millions of dollars. Income of unincorporated enterprises measures monetary earnings and income in kind of sole proprietorships, partnerships, and producers' cooperatives from their current business operations—other than supplementary income of individuals derived from renting property. Income equals business receipts (exclusive of capital gains and expenses) less business expenses (exclusive of capital losses and depletion allowances)]

No. 525.—CORPORATE INCOME BEFORE FEDERAL AND STATE INCOME AND EXCESS PROFITS TAXES, BY INDUSTRY: 1944 TO 1950

[In millions of dollars. Corporate income before taxes, as included in national income statistics, represents earnings of corporations organized for profit which accrue to residents of the Nation, measured before Federal and State profit taxes, without deduction of depletion charges and exclusive of capital gains and losses. Profits accruing to residents are measured by eliminating intercorporate dividends from profits of domestic corporations and by adding net receipts of dividends and branch profits from abroad. In other respects, definition of profits is in accordance with Federal income tax regulations. Corporate income before taxes is measured net of capital gains and losses, dividends received, reorganization refunds, and accelerated emergency amortization charges, but before deduction of depletion charges. Definition with respect to depletion charges has an important effect on data for mining industries]

No. 526.—CORPORATE PROFITS, TAXES AND DIVIDENDS: 1940 TO 1951

[In billions of dollars. These series are as presented in official national income statistics. Corporate profits figures represent earnings of corporations organized for profit which accrue to residents of the Nation. (See also headnote, table 525.) They are given both before and after Federal and State taxes on corporate earnings. Disbursement of tax refunds have been deducted from tax liability in year in which tax liability was incurred. Net corporate dividend payments represent amount of cash dividends disbursed to residents of the Nation, and therefore are measured after elimination of intercorporate dividends. Undistributed corporate profits comprise difference between corporate profits after taxes and net dividend payments. Quarterly data are seasonally adjusted at annual rates]

Farm	-3	-3	.1	-4	-1	-2.2	1.3	-7	.8	1.1

¹ Estimates by Council of Economic Advisers; based on incomplete data.

² Items for 1945 and earlier years are not comparable with those for later years. (See notes 4 and 6.)

³ Total producers' durable equipment less "farm machinery and equipment" and farmers' purchases of "tractors" and "business motor vehicles." These figures assume that farmers purchase 85 and 15 percent, respectively, of all tractors and motor vehicles used for productive purposes.

⁴ Industrial buildings, public utilities, gas- and oil-well drilling, warehouses, office and loft buildings, stores, restaurants, and garages. Includes hotel construction prior to 1946 only.

⁵ Farm construction (residential and nonresidential) plus "farm machinery and equipment" and farmers' purchases of "tractors" and "business motor vehicles." (See footnote 3.)

⁶ Includes construction of hotels, tourist cabins, motor courts, and dormitories since 1946 only.

⁷ Includes religious, educational, social and recreational, hospital and institutional, miscellaneous nonresidential and all other private.

⁸ Less than 50 million dollars.

Source: Department of Commerce, Office of Business Economics (except as noted). Published in *Economic Report of the President*, January 1952.

No. 534.—NET CHANGE IN BUSINESS INVENTORIES: 1929 TO 1950

[Millions of dollars. Net change in business inventories measures change in physical inventories, valued at average prices current during year. Difference between change in business inventories as thus measured and change in book value of inventories constitutes inventory valuation adjustment]

No. 535.—INDUSTRIAL AND COMMERCIAL FAILURES—NUMBER AND LIABILITIES: 1857 TO 1951

[Excludes all railroad failures. Series revised beginning 1933 to exclude real estate and financial companies. These revisions bring failure record more nearly in accordance with type of concerns covered by "Total number of concerns in business," in which no changes were made. Beginning 1939, new series includes voluntary discontinuances with loss to creditors and small concerns forced out of business with insufficient assets to cover all claims, in addition to failures included in former series]

No. 536.—INDUSTRIAL AND COMMERCIAL FAILURES—NUMBER AND LIABILITIES, BY MONTHS: 1946 TO 1951

[Liabilities in thousands of dollars. Current liabilities include all accounts and notes payable and all obligations, whether in secured form or not, known to be held by banks, officers, affiliated companies, supplying companies, or the Government. Deferred liabilities (the difference between current, as defined above, and the total) are therefore long-term obligations held by the public]

¹ Figures include patents for inventions, designs, and reissues of patents. Includes applications without fees from 1918 to date.

² Data are for the year 1925.

³ Figures for 1940 are for the six-months period ended June 30, 1940. On July 1, 1940, jurisdiction of prints and labels was transferred to the Copyright Office, Library of Congress, and data concerning them are compiled by that organization. (See table 563.)

⁴ Excludes 150 trade-mark republications (under Trade-Mark Act of 1946) of trade-marks registered under prior acts for 1947; 19,730 for 1948; 12,983 for 1949; 2,053 for 1950; and 1,297 for 1951.

Source: Department of Commerce, United States Patent Office; records (not published elsewhere). Fiscal year figures published in *Annual Report of the Secretary*.

18. Communications

(Sent to print April 10, 1952)

Statistics shown in this section include financial and operating data for telephone, wire-telegraph, ocean-cable, and radio-telegraph carriers which render domestic and foreign service, data on newspapers, periodicals, and books, and data on the postal service. Also included are financial and statistical data relating to authorized standard (AM), FM and television radio broadcast stations and networks in the continental United States and possessions. Additional statistics on the communication industry as well as statistics on the number of telephones on farms, radios in occupied dwelling units, and the manufacture of communication equipment appear in other sections of this *Abstract*.

In the Census of Electrical Industries, the Bureau of the Census has compiled at 5-year intervals, beginning in 1902, reports on the telephone and telegraph industries covering all systems and lines. The last survey was made for the year 1937. Since the establishment of the Federal Communications Commission in 1934, statistical coverage of communications has been concentrated in that agency. Because of the intrastate character of many mutual, cooperative, and smaller commercial telephone companies, the Federal Communications Commission has not been able to continue the same coverage as shown in the Census of Electrical Industries. Where telephone data are presented by States, such information is incomplete to the extent that only the larger interstate carriers are represented. However, on an industry-wide basis, gross operating revenues of the telephone carriers reporting to the Commission are estimated to include approximately 95 percent of the operating revenues of all telephone carriers in the United States. Reports filed by radio broadcast stations and networks, wire-telegraph, ocean-cable, and radio-telegraph carriers cover substantially all domestically domiciled units in these industries which operate in the United States and its possessions or between the United States and foreign countries. Statistical data compiled from these reports are contained in *Statistics of the Communications Industry in the United States* and in the reports to the Congress of the United States, both of which are published annually by the Federal Communications Commission.

"Bell System" as referred to in this section, consists of the American Telephone & Telegraph Co. and its principal telephone subsidiaries. Data on the postal service are obtained principally from the annual reports of the Postmaster General.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series P 170-175") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

No. 543.—AMERICAN TELEPHONE & TELEGRAPH CO. AND PRINCIPAL TELEPHONE SUBSIDIARIES (BELL TELEPHONE SYSTEM)—SUMMARY: 1920 TO 1951

[Figures are as of December 31]

No. 546.—TELEPHONE SYSTEMS—SUMMARY, CLASS A CARRIERS: 1926 TO 1950

[Covers class A telephone carriers filing annual reports with F. C. C. Class A carriers are those whose average annual operating revenues exceeded \$100,000. Gross operating revenues of class A carriers (excluding inter-company duplications of Bell System) reporting in 1937 represented approximately 94 percent of revenues of all telephone carriers as reported for Census of Electrical Industries for that year. Figures include data for carriers consolidated and merged for which annual data are available]

[All money figures in thousands]

¹ Pole and wire mileages reflect acquisition on Oct. 7, 1943, of facilities of Postal Telegraph Companies.

² Excludes agency and commission offices, numbering 11,562 on Dec. 31, 1951.

³ Figures for 1915 and prior years represent net income before bond interest.

⁴ Effective Jan. 1, 1943, the Federal Communications Commission prescribed a new system of accounts for telegraph carriers, and receipts and expenses as stated above for subsequent years are not fully comparable with results for prior years.

⁵ Net income from current operations, before extraordinary adjustments of income applicable to prior years.

⁶ Excludes controlled pole lines and wires no longer recorded in plant records.

⁷ Deficit.

⁸ After extraordinary credits and charges.

¹ Excluding rural free delivery routes, ocean mail routes, and air-mail routes to foreign countries.

² Audited postal surplus or deficit which is greater or less than excess of receipts or expenditures by the amount of adjusted losses and contingencies.

³ Domestic excludes and international includes foreign countries on domestic basis.

⁴ Continental United States only.

⁵ Postage stamps first issued under act of Mar. 3, 1847, and placed on sale at New York July 1, 1847.

⁶ From Nov. 1, 1864, when money-order system first went into operation, to June 30, 1865.

⁷ From Sept. 1, 1869, to June 30, 1870. International money orders first issued under convention of Oct. 12, 1867.

⁸ Reduced by \$1,747 for repayment of items over 10 years old.

No. 567.—TRANSPORTATION OF DOMESTIC MAILS, BY CLASS OF SERVICE: 1925 TO 1950

[Data as of June 30 or for year ending June 30. See headnote, table 564. Railway mail space units of service vary in size and character and may consist of a car, a section of a car, or a closed pouch carried on a car. Some cars are railway post offices, others are for storage only, about 20 classes of units being distinguished]

CLASS OF SERVICE AND ITEM	1925	1930	1935	1940	1945	1949	1950
Steam railway service: ¹							
Length of routes (miles).....	230, 470	220, 416	199, 016	181, 500	173, 138	165, 363	158, 878
Annual travel (thousand miles).....							
Regular space units.....	579, 256	564, 801	455, 214	455, 836	496, 391	571, 486	552, 555
Priorated to 60-foot car basis.....	226, 305	228, 478	192, 130	220, 113	260, 140	346, 130	341, 085
Annual expenditure (thousand dollars) ²							
Regular authorizations.....	88, 991	103, 970	86, 806	92, 217	114, 614	118, 638	113, 151
Annual cost.....	107, 401	125, 243	90, 670	108, 485	146, 267	223, 863	245, 812
Average rate of cost—							
Per mile of length (dollars).....	386. 12	471. 70	436. 17	508. 09	661. 98	1,128. 66	1, 152. 78
Per unit mile traveled (cents).....	15. 36	18. 41	19. 06	20. 23	23. 09	32. 66	33. 15
Per 60-foot car mile (cents).....	39. 31	45. 70	45. 40	44. 31	44. 01	53. 92	53. 70
Electric railway service:							
Number of routes.....	288	224	135	85	66	38	35
Length of routes (miles).....	8, 042	7, 012	4, 469	2, 690	1, 963	1, 142	1, 040
Annual travel of space units (thousand miles).....	10, 487	9, 829	6, 047	3, 786	3, 140	1, 741	1, 374
Annual rate of obligation (thousand dollars).....	566	671	349	236	224	239	190
Average cost per unit mile traveled (cents).....	5. 39	5. 81	5. 77	6. 24	7. 13	13. 75	13. 81
Power boat service:							
Number of routes.....	284	265	196	175	146	133	125
Length of routes (miles).....	49, 791	40, 130	21, 043	19, 013	8, 701	8, 880	6, 541
Annual travel (thousand miles).....	5, 298	4, 806	2, 860	2, 461	1, 606	1, 324	1, 292
Annual rate of obligation (thousand dollars).....	1, 492	1, 401	1, 085	924	521	826	818
Average cost per mile traveled (cents).....	28. 16	29. 15	37. 95	37. 71	34. 64	62. 35	64. 84
Air mail service:							
Length of routes (miles).....	2, 065	14, 907	28, 884	37, 943	56, 849	155, 814	158, 977
Miles traveled with mail (thousands).....	2, 077	14, 939	31, 149	59, 236	106, 676	331, 240	339, 190
Mail carried (million pound-miles).....	(³)	(⁴)	6, 790	18, 071	122, 909	82, 514	84, 351
Cost of service (thousand dollars).....	2, 744	14, 618	8, 838	19, 426	35, 199	68, 268	64, 596
Average cost per mile (dollars).....	1. 32	0. 98	0. 28	0. 33	0. 21	0. 19	0. 19

¹ Annual expenditure (regular authorizations) represents estimated cost for transporting normal mail traffic over regular routes only, based on contracts outstanding at end of each fiscal year. Annual cost includes emergency and side and transfer service. Average rates based on regular authorizations.

² For expenditures for Railway Mail Service, see table 566.

³ Includes 25 percent interim increase granted participating railroad companies under Railway Mail Pay Case, I. C. C. Docket No. 9200.

⁴ Not computed.

⁵ Subject to revision.

¹ Revenues from money-order business, postal savings, and certain miscellaneous items not included.
² Less than \$500.

19. Power

(Sent to print April 10, 1952)

Energy for supplying mechanical power, heat, light and refrigeration for the complex machinery and processes necessary to maintain productivity and comfort in the United States is derived primarily from coal, oil, water, natural gas, wood and waste, wind, certain basic chemical and physical reactions, and the rays of the sun. Of these an increasing percentage of the coal, oil, water, and gas are being converted to electric energy for application to the energy requirements of our economic system. In 1950 approximately 23 percent of the coal, 8 percent of the oil, practically all of the water power, and 11 percent of the natural gas were consumed in the production of electric energy.

Statistics on these various sources of energy are compiled by numerous agencies but only a few of the series are reasonably complete or arranged to avoid duplication in a manner that permits ready computation of total energy requirements. Oil, coal, natural gas, and wood yield many products as well as power and, consequently, enter into many statistical series.

Data on coal, oil, and natural gas production, utilization, and related subjects are compiled annually by the Bureau of Mines and are published in the *Minerals Yearbook*. For summaries of statistical material from this source, see section 28, Mining and Mineral Products. Data on natural gas utilization and the production of manufactured gas from coal, oil, and related products, its utilization, and related statistics are published by the American Gas Association in its monthly bulletins and annual statistical numbers. Annual summary data are included in this section.

Data on the production of electric energy by type of prime mover and showing the quantities of basic fuels—coal, oil, natural gas, and others—used in production, and the capacity of all generating plants by type of prime mover and related statistics are compiled and published annually by the Federal Power Commission. These data cover both generation for public use by electric utilities and for use by the producer where generated by non-utility establishments. Data on sales, revenues, and customers by classes of service, on rates and typical bills, and related matters are also published by the Commission. Monthly statistics on production, fuels used in production, sales by classes of service, salaries and wages, taxes, and other costs are also published and distributed by the Federal Power Commission in a loose-leaf current data series known as *Electric Power Statistics*. Statistics on the distribution of electric energy by utilities for public use are presented monthly and annually by the Edison Electric Institute in its *Statistical Bulletins*. Summaries of these statistics appear in the following tables.

Data on the use of power by manufacturing, extracting, and related industries are issued from time to time by the Bureau of the Census in its Censuses of Manufactures and Mineral Industries. Statistics based on these studies appear in the sections on manufacturing and mineral industries in this *Abstract*. For the period 1939 to 1946, data on the use of electric power by major industry groups were compiled and published by the Federal Power Commission in a report on Industrial Electric Energy. This series has been discontinued, however, with 1946 the latest data available.

Over-all statistics on water as an actual and potential source of power are compiled by the Federal Power Commission and are shown in table 588.

The Bureau of the Census in the Census of Electrical Industries compiled at five-year intervals beginning in 1902 a report on the Electric Light and Power Industry. The last survey made was for the year 1937. Summary statistics from this report are shown in table 576.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series G 159-170") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

Data in this section relate to continental United States except as indicated.

No. 571.—ENERGY FROM MINERAL FUELS AND WATER POWER—ANNUAL SUPPLY: 1889 TO 1950

[In trillions of British thermal units. Unit heat values employed are: Anthracite, 12,700 B. t. u. per pound; bituminous coal and lignite, 13,100 B. t. u. per pound; petroleum, 5,800,000 B. t. u. per barrel; natural gas, 1,075 B. t. u. per cubic foot. Water power includes installations owned by manufacturing plants and mines, as well as Government- and privately-owned public utilities. Fuel equivalent of water power calculated from kilowatt-hours of power produced wherever available, as is true of all public-utility plants since 1919. Otherwise, fuel equivalent calculated from reported horsepower of installed water wheels, assuming capacity factor of 20 percent for factories and mines and of 40 percent for public utilities. See also *Historical Statistics*, series G 159-170]

YEAR	Total energy	Water power ¹	MINERAL FUELS

Source: Federal Power Commission; based on annual report, *Production of Electric Energy and Capacity of Generating Plants, 1950*.

No. 576.—ELECTRIC LIGHT AND POWER INDUSTRY—SUMMARY: 1902 TO 1937

[Figures cover all establishments engaged either in generation and distribution of electric energy, or distribution or transmission of electric energy, to public or private consumers. Excludes establishments which consume all current generated, such as manufacturing and mining companies, railroads, railways, hotels, and other enterprises not in nature of public utilities, unless a portion of generated output was sold commercially. Plants operated by Federal Government or by States excluded unless energy sold commercially.]

¹ The term "establishment" as here used may represent a single electric station (either generating or distributing or both) or a number of such stations operated under the same ownership. ² Not available.

³ Comprises 1,112 stations operated by steam; 1,283 by internal-combustion; 1,426 by water; and 206 composite (stations having more than 1 type of prime mover).

⁴ Comprises generated output and energy purchased and received from other sources. Since the energy "Received from other sources" was, in a large part, purchased from other electric light and power companies, a considerable duplication is involved, as such energy would also be included in the "Generated."

⁵ Includes "Estimated value of free service."

⁶ Includes cost of fuel purchased and interchanged power, maintenance and other operating expenses.

⁷ Reported by commercial establishments only. No data for municipal establishments.

⁸ Includes value of plant and equipment, \$902,000,000, owned by companies engaged in the operation of electric light and power plants and other public utilities, not distributed among the several utilities.

⁹ Not comparable with other years; includes only salaries and wages chargeable to electric operating service.

Source: Department of Commerce, Bureau of the Census; Census of Electrical Industries, report on Electric Light and Power Industry. Survey discontinued.

No. 577.—ELECTRIC LIGHT AND POWER INDUSTRY—ENERGY GENERATED, SALES, REVENUE, AND CUSTOMERS: 1930 TO 1951

[Figures for energy generated obtained by Edison Electric Institute from Federal Power Commission. Figures for sales, revenue, and customers for 1930 and 1935 not strictly comparable with those for 1940 and subsequent years due to change in classification of sales. See also *Historical Statistics*, series G 225-233.]

¹ Census figures; relate to Apr. 1 for 1930 and 1940 and Jan. 1 for 1935 and 1945.

² Represents cooperatives only and excludes customers of all other agencies (companies and municipals) financed in whole or in part by R.E.A.

³ Customers served by municipal systems and various power districts not financed by R.E.A.

⁴ "Eastern farms" are those located in the area not affected by heavy irrigation pumping and their statistics are a measure of use of electricity on the average farm. "Western farms" are those where irrigation may be involved. Possibly less than one-fifth of farms in irrigation States do actual pumping, but statistics are not available to make a more accurate separation. Figures for "Western farms" therefore, are more a reflection of fluctuation in the energy used than they are of the conventional farm requirements.

No. 585.—GAS UTILITY INDUSTRY—CUSTOMERS AND REVENUES, BY CLASS OF SERVICE: 1933 TO 1951

[Covers natural, manufactured, mixed, and liquid petroleum gas. Based on questionnaire mailed to all privately owned gas utilities and municipally owned gas departments in the United States, except those with annual revenues less than \$25,000, which in the aggregate account for only a negligible portion of the industry]

¹ Includes fuel used in production of manufactured gas during periods of peak demand or emergency only, for use in systems regularly distributing natural gas.

² Oven and retort charge.

³ Less than 500 tons.

⁴ Includes 9,000 tons used as oven and retort charge in 1946, 10,000 tons in 1947, 7,000 tons in 1948, 5,000 tons in 1949, and 7,000 tons in 1950.

⁵ Includes 500,000 gallons used as bench and producer fuel.

Developed water power, 1950, from annual report, *Production of Electric Energy and Capacity of Generating Plants, 1950*.

20. Roads and Motor Vehicles

(Sent to print April 10, 1952)

Public roads.—Federal Government statistics on public roads are compiled and published by the Bureau of Public Roads of the Department of Commerce. Since 1945, such data have been published annually in *Highway Statistics*. For statistics prior to 1945, the same Bureau's publication, *Highway Statistics, Summary to 1945*, shows available public roads data carried back over periods ranging from 20 to 50 years.

The first road mileage survey was made in 1904. Other basic road mileage surveys were made in 1909, 1914, and 1921. Data for these early surveys appear in Department of Agriculture, Bulletin 1279, *Rural Highway Mileage, Income, and Expenditures, 1921-1922*.

The term "rural" as used in this section may be roughly defined as an area which lies outside of communities having 2,500 inhabitants or more. The statistics shown here, which are compiled on the basis of individual reports from the different States, are largely consistent in their adherence to this definition of rural. "Urban extensions" are continuations of designated State-system roads in or through cities or towns of 2,500 inhabitants or more. "County and other local roads" are those rural roads over which the State exercises no direct control.

Motor vehicles and fuel.—Motor-vehicle production data are compiled by the Automobile Manufacturers' Association and published in the annual report, *Automobile Facts and Figures*. The Bureau of the Census of the Department of Commerce compiles and publishes statistics on the motor-vehicles and equipment industry. These data are published in the reports of the Census of Manufactures, and are also included in section 30, Manufactures, in this volume.

Motor vehicle registration figures are based on reports and records of State motor-vehicle registration departments. The statistics are compiled and published by the Bureau of Public Roads in the annual report, *Highway Statistics*. Statistics on motor fuel consumption are also compiled and published by the same agency in the report mentioned.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series K 177-181") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

No. 589.—RURAL ROADS IN THE UNITED STATES—APPROXIMATE MILEAGE: 1921 TO 1950

[In thousands of miles. Rural roads include roads outside of incorporated areas and certain of the more populous unincorporated areas. Figures cover continental U. S. and refer to existing mileage at end of calendar year. See also *Historical Statistics*, series K 177-181]

Disbursements of State-highway funds (\$1,000) ⁵	1,139,677	848,355	1,591,290	1,255,208	2,841,328	3,176,752	3,561,513

¹ No segregation of secondary State highways from primary systems in 1930; figures shown include an undetermined amount of municipal street mileage on State systems or connecting these systems. Not strictly comparable with subsequent years, since county road mileage had not yet been taken over by State highway departments.

² Mileage formerly shown as "Connecting streets not under State control," now included with "Urban extensions of State highway systems," with exception of mileage in Kentucky, Maryland, Mississippi, and District of Columbia. These mileages reclassified as local city streets. ³ Not available.

⁴ Low type includes soil-surfaced; slag, gravel, or stone; bituminous surface-treated; and mixed bituminous surfaces. High type includes bituminous penetration; bituminous concrete and sheet asphalt; Portland cement concrete; brick; and block. Beginning 1950, States reported a segregation of mixed bituminous and bituminous penetration surfaces according to base course. Mixed bituminous and bituminous penetration on "non-rigid base" shown as low type and surfacing on "rigid base" included as high type mileage.

⁵ Includes funds transferred to or from local units. Data for D. C. not included prior to 1940. Beginning 1940, includes proceeds of highway-user imposts allotted by the State treasurer for (1) county and other local roads and streets, and for (2) nonhighway purposes.
