¹ Low type includes soil-surfaced, slag, gravel or stone, and low-type bituminous; high type includes high-type bituminous, Portland cement concrete, brick and block.

² Includes only mileage of roads not forming a part of State or local highway systems.

³ Includes 7,806 miles of State park, forest, institutional and other roads that are not part of State or local highway systems.

⁴ Includes small amount of unsegregated urban mileage.

⁵ Includes 230 miles of State park, forest, and reservation roads not classified by surface type.

⁶ Includes county roads under State control in Delaware, North Carolina, Virginia (all but three counties), and West Virginia.

Source: Department of Commerce, Bureau of Public Roads; *Highway Statistics, 1950*.

No. 592.—DISBURSEMENTS OF STATE-HIGHWAY FUNDS, BY STATES: 1921 TO 1950

[Includes disbursements, whether from current revenues or proceeds of loans, for construction, maintenance, interest and principal payments on highway bonds, transfers to local units, and miscellaneous disbursements. Beginning 1935 covers calendar years; figures for earlier years for many States represent fiscal years. Beginning with 1940, figures not comparable with those for prior years as they include data for certain State income applicable to highways, namely, proceeds of highway-user imposts allotted, without passing through State highway departments, by State treasurer for (1) county and other local roads and streets and for (2) nonhighway purposes. These data not included in prior years]

(In thousands of dollars)

¹ Balances from 1949, totaling \$1,454,800,000; and miscellaneous revenues, totaling \$190,004,000.

² Includes disbursements not shown separately and not elsewhere included: For collection and administration of highway-user revenues, \$100,163,000; for nonhighway purposes, \$226,001,000.

³ Includes some administrative, equipment, and miscellaneous disbursements.

⁴ Disbursements for interest; retirement of debt; local debt assumed; highway police; and those for administration, engineering, and miscellaneous.

⁵ Includes transactions of Port of New York Authority.

⁶ Expenditures on county roads under State control included with those for State-administered highways.

¹ Includes busses. A substantial part of the trucks and busses reported comprises chassis without body; hence value of bodies for these chassis not included. Includes military trucks; total sales for the period Sept. 1, 1930, through 1946, amounted to 2,575,000, valued at \$5,257,588,000. Production for the period Jan. 1, 1940, through 1946 was 2,601,000.

² Prior to 1925, busses included with passenger cars.

³ Beginning 1937, represents standard equipment.

⁴ Less than 500.

¹ Excludes vehicles owned by military services.² As reported. State registration requirements differ widely.³ Includes registration fees, certificates of title, transfer or registration fees, permits, fines, etc.; excludes motor-fuel and motor-carrier taxes; for California, includes \$49,517,000 vehicle license fees and for Washington, \$7,339,000 motor vehicle excise taxes.⁴ Includes fees for registration of automobiles (including taxicabs), busses, and trucks and tractor trucks.⁵ Commercial full trailers included with trucks.⁶ Includes fees for registration of trailers.⁷ Data for trucks under 1,500 pounds capacity included with automobiles.⁸ Includes 1,224 automobiles of the diplomatic corps.⁹ Represents publicly owned only. Heavy semitrailers registered with tractors (as a unit). Automobile trailers not required to register.Source: Department of Commerce, Bureau of Public Roads; *Highway Statistics, 1950*.

MOTOR-VEHICLE ACCIDENT FATALITIES

499

No. 601.—NUMBER OF MOTOR-VEHICLE ACCIDENT FATALITIES BY PLACE OF ACCIDENT, PLACE OF DEATH, AND PLACE OF RESIDENCE: REPORTING AREA AND EACH REPORTING STATE, 1949

[Based on special transcripts supplied through cooperation of State vital statistics offices and State traffic authorities in a reporting area which covered 47 States and the District of Columbia and represented 99.5 percent of population of United States. Reported fatalities represented about 99.8 percent of total motor-vehicle accident fatalities in United States in 1949]

21. Transportation, Air and Land

(Sent to print April 10, 1952)

Steam railways.—Because of the long period in which it has been subject to close Federal regulation and the degree of its consolidation, there is an extensive coverage of important statistical items relating to the railway industry. The *Statistics of Railways in the United States*, published annually by the Interstate Commerce Commission since 1888, is the most important source for steam railway statistics. Various other periodical reports are also issued by the Interstate Commerce Commission. The Association of American Railroads supplements official railway statistics with various releases.

The term "steam railways" as used in this section includes electrified divisions operated by such carriers. The total steam railroad mileage of the United States comprises: (a) Regular interstate carriers (and their nonoperating subsidiaries) reporting to the Interstate Commerce Commission; (b) switching and terminal railroads, also reporting to the Commission; and (c) private railroads (defined by the Commission as "circular" because they report on brief circulars and as "unofficial"). Except in certain mileage data the circular and unofficial companies are not included in any of the statistics. The switching and terminal roads were formerly included with operating railways, but are now separated, and data for them do not appear in most of the tables.

Nonoperating subsidiaries include proprietary companies, which are covered by the reports of operating carriers, and lessor companies which have no traffic and whose reports appear only in statistics of capitalization, dividends, and investment.

Operating railways are divided into three classes, according to the amount of their annual operating revenues, class I, having more than \$1,000,000 of such revenue; class II, from \$100,000 to \$1,000,000; and class III, less than \$100,000. During recent years more detailed reports are required from class I carriers than from smaller companies. The basis of the figures in each table is indicated by notes. Omission of class II and class III railroads affects very little the comparability of statistics with those of earlier years as regards most items, since the bulk of the business is done by class I.

The Interstate Commerce Commission divides railroads geographically into three districts and eight subsidiary regions. Each railroad is treated as a unit and placed wholly in some one district or region. Broadly speaking, the eastern district includes territory east of Chicago and north of the Ohio and Potomac Rivers; southern district, territory east of the Mississippi River and south of the Ohio and Potomac Rivers; and western district, the remainder of the country.

Electric railways.—The Interstate Commerce Commission issues annually an abstract of the annual reports of electric railways, chiefly interurban, which report to it. The American Transit Association publishes street railway statistics in its annual *Transit Fact Book*. The Bureau of the Census has published a quinquennial report on electric railways from 1902 to 1937. In the more recent years the report also covered affiliated trolley-bus and motor bus operations. The last Census of Electrical Industries was for the year 1937.

Motor carriers.—Statistics of class I for-hire carriers (those with \$100,000 or more of gross annual operating revenues) are compiled by the Interstate Commerce Commission from annual and quarterly reports submitted to it by these carriers. Beginning with reports for the year 1950, the Class I minimum became \$200,000. This series begins with 1939 data.

The annual review and statistical number of *Bus Transportation*, a McGraw-Hill publication, summarizes operations of common carriers and school busses.

Civil aeronautics.—Federal promotion and regulation of civil aviation are carried out by two bodies—the Civil Aeronautics Administration and the Civil Aeronautics Board. The Civil Aeronautics Board is an independent agency concerned primarily with the issuance of certificates of public necessity, economic regulation, the formula-

tion of safety regulations and the investigation of accidents to civil aircraft. The Civil Aeronautics Administration is an operating agency of the Department of Commerce. Its principal activities are the building and operation of air navigation aids, the enforcement of safety regulations and promotion of a national airport system.

The *Statistical Handbook of Civil Aviation* is published by the Civil Aeronautics Administration. This *Handbook* brings together all official statistical data on the development of civil aviation in the United States, including summaries of statistics published by the Civil Aeronautics Board in *Annual Airline Statistics*. The Civil Aeronautics Administration has also published a detailed historical record of America's aircraft production during the recent war. This publication is entitled *U. S. Military Aircraft Acceptances, 1940-45—Aircraft, Engine, and Propeller Production*.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series K 28-33") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

¹ Classes I, II, III, circular, and unofficial.

² First track. Covers continental U. S. only, excluding all duplication.

³ Includes some duplication under trackage rights and some mileage in Canada operated by U. S. companies.

⁴ Excludes circular and unofficial, figures for which cover road, first track only.

⁵ Includes 213 operating, 13 lessor, 15 proprietary, 9 circular, and 2 unofficial in 1949, and 215 operating, 13 lessor, 15 proprietary, 9 circular, and 1 unofficial in 1950.

⁶ Figures omitted as "miles of road" of switching and terminal companies is not comparable with that of line-haul companies.

⁷ Excludes proprietary companies in systems which file consolidated reports combining mileage, investment, and other items on a net system basis.

¹ Includes circular and unofficial companies. ² Includes lessors, proprietary, circular, and unofficial companies.

³ For railways reporting track by class. Excludes circular and unofficial, figures for which cover road, first track only.

⁴ Includes switching and terminal companies except as noted.

⁵ Since 1916 represents steam locomotives and freight cars of class I railways, excluding switching and terminal companies.

⁶ Includes lessor companies since 1921; for 1925 and subsequent years, also includes proprietary companies except those which are part of systems filing consolidated annual reports.

⁷ Increase in investment over a period of years cannot be obtained accurately by subtraction of 1 year's investment from that of another owing to reorganization, sale, or abandonment reclassification, etc.

⁸ Includes depreciation on "Miscellaneous physical property" for years prior to 1920. Amortization of defense projects included subsequent to 1940.

⁹ Includes actually outstanding, nominally issued, and nominally outstanding securities, and equipment obligations. ¹⁰ Average for 1908-1910. ¹¹ Average for 1899 and 1900.

¹ Represents mileage operated.² Revised total 240,293 not distributed by States.³ Totals exclude Alaska and Hawaii.⁴ Included in returns for Maryland.⁵ Figures for Dakota.⁶ For total Dakota, see North Dakota.Source: Interstate Commerce Commission; annual report, *Statistics of Railways in the United States*.

No. 608.—STEAM RAILWAYS (ALL REPORTING COMPANIES)—EQUIPMENT IN SERVICE: 1925 TO 1950

["All reporting companies" include switching and terminal but not circular and unofficial lines. Data for tractive effort and capacity of cars exclude switching roads, also smaller roads during recent years; they would not be materially different if all carriers were included. Excludes the large number of cars owned by private car lines. See also *Historical Statistics*, series K 34-38]

¹ Ratio of fuel oil to coal left to experience of each road.

² Includes equivalent of a small amount of miscellaneous fuel.

³ Not available.

⁴ Excludes labor cost of applying rails or ties.

⁵ Excludes 1,435 linear feet of steel ties.

¹ Includes proprietary companies. Increase in investment over a period of years cannot be obtained accurately by subtraction of 1 year's investment from that of another owing to reorganization, sale or abandonment, reclassification, etc.

² Amortization of defense projects included subsequent to 1940.

³ Excludes returns for lessor companies.

⁴ Investment originally published is increased by \$170,000,000, estimated reserve for accrued depreciation, to make figures comparable with those of other years.

⁵ Figure not comparable on account of Federal control accounting requirements.

⁶ Excludes returns for class II and class III companies.

No. 627.—STEAM-RAILWAY ACCIDENTS—NUMBER OF PERSONS KILLED AND INJURED, BY STATUS: 1891 TO 1950

[For various reasons, including fact that returns were required under different acts, statistics are not strictly comparable. Prior to 1921, train accidents were those causing damage to railway property in excess of \$150 or any damage and a resulting casualty. From 1921 to 1947 they were considered as such when damage exceeded \$150 with or without a casualty; for 1948, accidents causing damages in excess of \$250, with or without a casualty, were classified as train accidents; and, beginning January 1, 1949, the damage incurred was raised to \$275, or more. Where damage was less than the amounts specified and there was a reportable casualty it was classified as a train-service accident. Figures for years 1911-15 include industrial and other nontrain accidents to employees only, and for years 1908-10 exclude switching and terminal roads. Otherwise, data cover all reportable accidents, including those due to suicide, mental derangement, and attempting to escape custody. See also *Historical Statistics*, series K 84-93]

NO. 630.—ELECTRIC RAILWAYS—SUMMARY: 1890 TO 1937

[The census of street railways, which was first taken in 1890, and which has been taken at quinquennial intervals through 1937 beginning with the inquiry for 1902, covers (1) all street railways, without regard to kind of motive power, and (2) all interurban railways using other than steam as motive power. The nonelectric railroads included are those operated principally by cable and gasoline engines. Operations of electrified divisions of steam-railway companies are not included. Figures in this table do not include data for motorbus and trolley-bus operations of electric street railways. (For motorbus and trolley-bus statistics from census reports, see source)]

ITEM	1890	1902	1912	1922	1927	1932	¹ 1937
Number of companies.....	789	987	1,200	² 1,200	² 963	² 706	² 478
Miles of line operated ³	5,783	16,045	30,438	31,264	27,948	20,110	14,214
Miles of all track operated ³	8,123	22,577	41,066	43,932	40,722	31,548	23,770
Value of road and equipment (thou- sand dollars).....	389,357	2,167,634	4,596,563	5,058,762	(⁴)	4,143,381	4,399,768

Number of passenger cars.....	32,505	60,290	76,162	77,301	70,309	59,692	44,864
Revenue passengers, including pay- transfer (thousands).....	2,023,010	4,774,212	9,545,555	12,666,558	12,174,592	⁷ 7,955,981	7,485,290
Operating revenues (thousand dol- lars) ⁸	90,617	247,554	507,512	1,016,719	927,774	566,290	513,129
Operating expenses (thousand dol- lars) ⁸	62,011	142,313	332,896	727,795	694,460	442,607	406,119
Operating ratio (percent).....	68.4	57.5	68.7	71.6	74.9	78.2	79.1

¹ Excludes data for 22 companies, operating on a part-year basis. These companies reported 36,810,221 passen-
gers; 9,108,069 car-miles; 1,042,866 car-hours; \$2,388,295, operating revenue; and \$2,412,010, operating expense.

² Includes certain companies in Pennsylvania which maintained separate organizations, though controlled
through stock ownership by other companies. For 1912 these companies were treated as merged and not included
in the number reported.

³ Includes small mileage of track lying outside United States.

⁴ Data incomplete. Some of the companies engaged in both light-and-power and electric-railway operations
were unable to report separately the values of plant and equipment assignable to their railway activities.

⁵ Number reported as of June 30, for 1890, 1922, 1927, and 1932; for 1902, average for the year; for 1912, as of Sept.
16. Figures for 1937 represent an average of numbers reported on June 30 and Dec. 31.

⁶ Includes 334 trolley-bus operators.

⁷ Includes 29,721,000 trolley-bus passengers.

⁸ Includes auxiliary operating revenues of \$8,905,000 for 1927 and \$91,242,000 for 1922; auxiliary expenses, \$7,822,000
for 1927, and \$49,232,000 for 1922. Data for operating revenues and operating expenses of auxiliary operations
excluded so far as possible for earlier years.

Source: Department of Commerce, Bureau of the Census; Census of Electrical Industries, report on Street
Railways and Trolley-Bus and Motorbus Operations. Survey discontinued.

No. 631.—EXPRESS COMPANIES—INCOME ACCOUNT: 1921 TO 1950

Operating statistics and averages:					
Owned revenue vehicles, total.....	100, 165	112, 300	127, 912	151, 027	169, 409
Trucks.....	19, 610	20, 727	22, 233	25, 232	28, 038
Truck-tractors.....	33, 534	36, 308	41, 582	48, 935	54, 202
Semitrailers.....	44, 081	52, 274	60, 804	72, 764	82, 732
Full trailers.....	2, 940	2, 991	3, 293	4, 096	4, 497
Intercity vehicle-miles (millions).....	2, 165	2, 407	3, 059	3, 810	4, 338
Tons of intercity revenue freight carried ⁷ (thousands).....	108, 017	112, 298	135, 426	165, 828	176, 452
Miles per owned vehicle.....	43, 385	46, 147	47, 401	40, 863	48, 053
Revenue per vehicle-mile (intercity).....	\$0. 337	\$0. 359	\$0. 393	\$0. 420	\$0. 420
Expense per vehicle-mile (intercity) ⁸	\$0. 344	\$0. 354	\$0. 384	\$0. 408	\$0. 414

¹ Amortization represents a very small part of this total.

² Does not include Federal or State income taxes.

³ Withdrawals of sole proprietors and partners.

⁴ Beginning 1948, excludes employees of Common Carriers of other than general freight and contract carriers as follows: 1948, 40, 606, compensation \$138,759,000; 1949, 45,603, compensation \$165,600,000.

⁵ Does not include drivers of equipment engaged by these carriers to perform "purchased transportation."

⁶ Includes collection and delivery employees (subsequently included with drivers, etc.) as follows: 1945, 21,444, compensation, \$51,441,000; 1946, 24,630, compensation, \$63,353,000; 1947, 29,000, compensation, \$83,370,000.

⁷ Includes duplications on account of tonnage received from connecting motor carriers.

⁸ Basic figures include expenses of operating vehicles in local services not available separately.

No. 636.—CLASS I INTERCITY MOTOR CARRIERS OF PASSENGERS—SUMMARY OF FINANCIAL AND OPERATING STATISTICS: 1945 TO 1949

[All money figures, except average fare and average revenue and expense per vehicle-mile, in thousands of dollars. Covers carriers with average annual operating revenues of \$100,000 or more engaged wholly or preponderantly in intercity service subject to jurisdiction of Interstate Commerce Commission. This table does not include carriers subject to the Commission's jurisdiction engaged wholly or preponderantly in local or suburban service or carriers engaged in transportation of both property and passengers]

ITEM	1945	1946	1947	1948	1949

Compensation.....	8,097	9,269	9,669	10,389	10,449
Operating statistics and averages:					
Passenger vehicles owned ⁵	12,865	13,108	14,149	15,200	14,863
Vehicle-miles of owned and leased passenger vehicles: ⁶					
Regular route intercity service (thousands).....	860,485	964,227	978,364	1,051,056	987,512
Special, charter, and sightseeing service (thousands).....	15,113	17,620	22,274	27,987	29,410
Local and suburban service ⁷ (thousands).....	54,963	60,798	55,732	50,760	48,760
Number of revenue passengers carried:					
Regular route intercity service (thousands).....	434,614	433,730	412,332	420,758	367,074
Special, charter, and sightseeing service (thousands).....	7,036	7,216	8,667	9,716	9,634
Local service (thousands).....	122,794	121,014	108,454	106,293	92,714
Miles per vehicle ⁸	71,429	77,677	76,655	72,533	66,088
Average fare per passenger, per carrier, intercity service.....	\$0.793	\$0.798	\$0.802	\$0.852	\$0.912
Passenger revenue per vehicle-mile:					
Regular route intercity.....	.401	.359	.338	.341	.339
Special, charter, and sightseeing services.....	.356	.377	.377	.382	.390
Local service.....	.366	.315	.323	.376	.399
Expense per vehicle-mile.....	.285	.287	.296	.310	.324

¹ Regular route intercity and local revenue.

² Amortization represents a very small part of this total.

³ Excludes Federal or State income taxes.

⁴ Withdrawals, small in amount, of sole proprietors and partners.

⁵ Total vehicles owned at close of year.

⁶ Includes bus-miles of vehicles operated under "purchased transportation arrangements."

⁷ Includes only service on local and suburban runs of preponderantly intercity carriers.

⁸ Averages for owned and leased vehicles.

No. 637.—CLASS I INTERCITY MOTOR CARRIERS OF PASSENGERS—SELECTED OPERATING STATISTICS, BY REGIONS: 1944 TO 1949

[See headnote, table 636; for description of regions, see headnote, table 635]

REGION AND YEAR	Number of carriers reporting	Operating revenue (\$1,000)	Total expenses (\$1,000)	PASSENGER VEHICLES		REGULAR-ROUTE INTERCITY			EMPLOYEES	
				Inter-city ¹	Total ²	Vehicle-miles (1,000)	Revenue passengers carried (1,000)	Average fare per passenger, per carrier	Average number	Total compensation (\$1,000)

Intercity	854,981	815,172	844,375
Operating revenue (\$1,000):			
City and city suburban	786,351	798,933	820,432
Intercity	537,575	510,815	533,667
Taxes assignable to operations (\$1,000): ³			
City and city suburban	56,556	62,025	62,257
Intercity	42,880	42,508	43,456
Net operating revenue (\$1,000):			
City and city suburban	—5,908	8,540	—1,757
Intercity	39,912	37,962	48,641
Investment in plant and equipment (Dec. 31) (\$1,000):			
City and city suburban	830,825	855,492	(⁶)
Intercity	459,532	483,842	(⁶)
Number of employees (Dec. 31): ⁴			
City and city suburban	125,096	129,043	131,169
Intercity	66,749	66,570	67,155
Wages and salaries (\$1,000):			
City and city suburban	424,593	458,492	(⁶)
Intercity ⁵	215,085	224,949	(⁶)
SCHOOL BUS OPERATIONS			
Number of schools using busses	45,300	43,813	43,649
Number of busses	97,600	104,179	105,594
Total bus-miles (1,000)			689,593
Children carried daily (1,000)	5,720	6,204	6,410
Cost of service annually (\$1,000)	177,532	180,133	207,718

¹ Includes duplication between carriers. ² Includes revenue transfer passengers. ³ Excludes income taxes.

⁴ Operating companies only. ⁵ Not available. ⁶ Line service only.

**NO. 639.—TROLLEY BUS AND STREET CAR LINES—SUMMARY OF OPERATIONS:
1949 TO 1951**

ITEM	1949	1950	1951 (prel.)
TROLLEY BUS LINES			
Number of operating companies (Dec. 31)	42	42	42
Number of busses owned (Dec. 31)	6,355	6,497	7,059
Miles of highway covered (Dec. 31)	1,425	1,457	1,496
Total bus-miles (millions)	176	182	189
Revenue passengers (millions) ¹	1,149	1,169	1,113
Operating revenue (\$1,000)	102,724	108,960	118,746
Taxes assignable to operations (\$1,000) ²	4,581	4,912	5,343
Net operating revenue (\$1,000)	11,372	18,225	16,174
Number of employees on payroll	15,570	16,105	16,319
STREET CAR LINES			
Number of operating companies	101	88	82
Number of cars owned	15,505	13,800	12,300
Miles of single track	10,700	9,590	8,700
Miles of first main track	5,707	5,110	4,650
Operating revenue (\$1,000)	410,500	361,700	325,000
Number of passengers (millions)	3,480	2,790	2,208
Revenue-miles operated (millions)	555	463	371

¹ Includes revenue transfer passengers. ² Does not include income taxes.

¹ Sub I facilities are those which do not come up to Class I standards.² Airport and airfield type definitions: Commercial—Public use and public services, private control. Municipal—Public use and public services, public control. CAA intermediate—No public services, CAA control. Military—No public services, military control. Private—No public services, private control. Miscellaneous government—No public services, Federal government control (Forest Service, etc.).Source: Department of Commerce, Civil Aeronautics Administration; *Statistical Handbook of Civil Aviation*.

22. Waterways, Water Traffic, and Shipping

(Sent to print May 7, 1952)

Data in this section vary as to area coverage, the variation depending upon the source of compilation. The data from Corps of Engineers, Department of Army, are for continental United States and territories and possessions; data from Bureau of Census, and Bureau of Customs are for United States customs area which includes Alaska, Hawaii, and Puerto Rico and from 1935 through 1939, Virgin Islands; data from Maritime Administration and War Shipping Administration are for continental United States.

Units of measurement.—"Cargo tonnage" represents weight of cargo in long tons (2,240 pounds) or short tons (2,000 pounds). All other tonnage figures refer to capacity of vessels. The terms gross and net tonnage refer to space measurement, 100 cubic feet being called 1 ton. Gross tonnage is the capacity of the entire space within the frames and the ceiling of the hull, together with those closed-in spaces above deck available for cargo, stores, passengers or crew, with certain minor exemptions. Net or registered tonnage is what remains after deducting from the gross tonnage the spaces occupied by the propelling machinery, fuel, crew quarters, master's cabin, and navigation spaces. It represents substantially space available for cargo and passengers. The net tonnage capacity of a ship recorded as "entered with cargo" may bear little relation to actual weight of cargo. Dead weight tonnage is the weight in long tons required to depress a vessel from light water line (that is, with only the machinery and equipment on board) to load line. It is therefore the weight of the cargo, fuel, etc., which a vessel is designed to carry with safety. Displacement tonnage (naval vessels) has reference to weight of the vessel itself with its normal equipment, fuel, etc.

Types of vessel shipments.—Shipments by dry cargo vessels include shipments on all types of watercraft except tanker vessels, and shipments by tanker vessels include all types of cargo both liquid and dry carried by tanker vessels.

Vessel entrances and clearances.—The tables on vessel entrances and clearances show the number and net registered tonnage of American and foreign dry cargo and tanker vessels with cargo and in ballast entering and clearing the United States customs area in the foreign trade and indicate the customs districts at which these vessels first entered and from which they last cleared. With minor exceptions, all types of watercraft engaged in the foreign trade which are required to make formal entrance and clearance under United States customs regulations are included in the statistics. Army and Navy vessels entering or clearing without commercial cargo are not included in the figures. The tons shown in tables 661-666 are net tons of 100 cubic feet carrying capacity of the vessels (as defined in Part 16 of Title 46, "Code of Federal Regulations, Measurements of Vessels") and do not represent the actual weight of cargo carried.

A vessel is reported as entered at the first port in the United States at which entry is made, regardless of whether any cargo is unladen at that port. A vessel is reported as cleared from the last port where outward cargo is completed or where the vessel cleared in ballast.

Vessels touching at a United States port in distress, or for other temporary causes without discharging cargo are not included in the figures.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series K 132-145") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

No. 647.—WATER-BORNE COMMERCE OF THE UNITED STATES—CARGO TONNAGE, FOREIGN AND DOMESTIC: 1945 TO 1950

[In thousands of short tons of 2,000 pounds. See also *Historical Statistics*, series K 132-145]

Approximate net total, domestic	746,812	746,155	578,561	630,229	575,363	651,359

¹ Figures are net for each type of traffic; no adjustments required to arrive at net totals.

² Represents traffic local to seaports, Great Lakes ports, and communities on inland waterways.

³ Represents traffic among ports and communities utilizing inland waterways exclusively.

⁴ Included in other types of domestic traffic prior to 1950.

⁵ Excluding St. Marys Falls Canal traffic and additional Detroit River traffic, data for which are already included in figures for Great Lakes traffic; also excluding duplications relating to rivers and canals themselves.

⁶ Principally coastwise and lake traffic passing through canals and connecting channels other than the St. Marys Falls Canal and Detroit River.

⁷ Estimated from figures in this table on assumption that all deductions represent duplications in domestic traffic; includes some minor duplications in figures for foreign traffic.

Source: Department of the Army, Corps of Engineers, *Annual Report of Chief of Engineers*, Part II, except for 1950 data, which are preliminary.

No. 648.—ESTIMATED EMPLOYMENT ON AMERICAN FLAG MERCHANT VESSELS: 1929 TO 1951

[Represents personnel employed on active steam and motor merchant vessels of 1,000 gross tons and over, engaged in deep-sea trades (overseas foreign, nearby foreign, intercoastal, and coastwise). Includes only freight, combination passenger and freight, and tanker vessels]

YEAR	Average monthly employment ¹	YEAR	Average monthly employment ¹	Date	Number employed ¹

No. 652.—COMMERCE OF PRINCIPAL UNITED STATES OCEAN PORTS: 1950

[In thousands of short tons of 2,000 pounds. In addition to commerce here shown, many ports have (1) commerce with ports on internal rivers and canals; (2) purely local port traffic, including, for New York and San Francisco, what is called intraport traffic between parts of a harbor for which separate statistics are maintained. These forms of traffic, although aggregate tonnage is large, are of much less economic importance than foreign and coastwise traffic.]

¹ Adjusted for overcharges and undercollections.² After deduction of canal earnings repaid to appropriations.³ Italics denote deficit.⁴ No interest charge against the Canal is actually made by the Treasury. In order to present the net results of operation of the Canal, interest on capital invested is computed at a rate considered reasonable for Government borrowings over an indefinite period. Computed interest prior to July 12, 1920, is included in capital investment account.⁵ Includes adjustment of \$15,000 in postal surplus.⁶ Includes adjustment of \$44,000 in postal surplus.⁷ Actual business profits of \$877,000 adjusted by \$669,000 for write-off of reimbursable capital expenditures, public works, Republic of Panama.⁸ Includes \$23,000 for prior fiscal years.⁹ Includes \$292,000 for judgments rendered by Court of Claims for overtime compensation in prior years.¹⁰ Adjusted by a net reduction of \$162,000 for prior fiscal years.Source: The Panama Canal, *Annual Report of the Governor*.

No. 658.—FREIGHT AND PASSENGER TRAFFIC ON ST. MARYS FALLS CANAL (SAULT STE. MARIE): 1890 TO 1950

[Includes both American and Canadian canals and traffic to and from Canadian as well as American ports. Average distances, ton-miles, freight charges, etc., based on total haul from port of origin to port of destination in process of performance by vessels passing through canals]

SEASON	FREIGHT CARRIED (1,000 SHORT TONS OF 2,000 POUNDS)					Total ton- miles (mil- lions)	FREIGHT CHARGES	
	Total	East- bound	West- bound	By Ameri- can vessels	By Canadi- an and other foreign vessels		Amount (1,000 dollars)	Average per ton per mile (mills)

No. 666.—VESSELS ENTERED AND CLEARED AT SEAPORTS IN FOREIGN TRADE—
NET REGISTERED TONNAGE, BY NATIONALITY OF VESSEL: 1921 TO 1947

[In thousands of net tons. Includes only traffic by sea and to and from foreign countries. The large trade with Canada on the Great Lakes and the St. Lawrence is handled primarily by vessels of the United States and of the British (Canadian) flag. British (Canadian) flag vessels predominate in this trade. See tables 663 and 664 in which the columns for northern border represent trade with Quebec and Ontario]

¹ Canal boats and barges included with sailing prior to 1868.² Decrease of tonnage arises principally from registered tonnage having been corrected in 1818, 1829, and 1830 by omitting all vessels with registers granted prior to 1815, which were presumed to have been lost at sea, captured, etc.³ Including Puerto Rico and Virgin Islands.⁴ Including Hawaii and Alaska.Source: Prior to 1942, Department of Commerce, Bureau of Marine Inspection and Navigation; thereafter, Treasury Department, Bureau of Customs; annual report, *Merchant Marine Statistics*.

23. Irrigation, Drainage, and Soil Conservation

(Sent to print May 7, 1952)

Irrigation.—The 17 Western States and Arkansas, Louisiana, and Florida are the States in which most of the irrigated land in the Nation is located. In these States a special census of irrigation was made as part of the 1950 Census of Agriculture. Information on acres irrigated, irrigation works, capital investment, and a number of other items was obtained from the irrigation companies, districts, and other organizations, and from farms that operate their own irrigation supply works. For the remaining eastern and midwestern States information on irrigation was limited to that reported in the farm census.

The definition of irrigated land in the 1950 Census was the net acreage of farm land to which irrigation water was actually applied during 1949. It did not include land that could be irrigated or that usually is irrigated, but that was not irrigated during 1949. Land in irrigated farms that was used for purposes such as roads and farmsteads, to which irrigation water was not applied, was excluded. Also excluded was irrigated land used for purposes other than farming, such as that in rural residential areas, cemeteries, parks, and golf courses.

Drainage.—Drainage works for farm lands are constructed primarily for three purposes, namely, (1) the reclamation or improvement of the land, (2) protection of the land against overflow, and (3) to rid the land of seepage from irrigation ditches or for control or prevention of alkali formation. Ninety percent of all drainage enterprises were organized for reclamation and improvement of land.

The farmers in the Eastern United States need drainage to take surplus rainfall off some of their lands. Most of this is gravity drainage, although pumps are sometimes used. In the Western States drainage is mainly for the purpose of taking seepage water off irrigated lands and to carry off alkali salts.

In the 1950 National Census of Drainage, in general, only those organized enterprises with 500 acres or more of drained farm land were included in the enumeration. A few irrigation enterprises of smaller size which had their own drainage works were also included. In previous Censuses (1910–1940) all organized enterprises draining farm lands were included in the enumeration regardless of size. Privately drained lands of less than 500 acres have not been enumerated in any of the four Drainage Censuses. The change in census procedure for 1950 materially reduced the number of enterprises enumerated, but affected very little the amount of drained land enumerated.

In taking the 1950 Census, differences in form of organization and management of drainage enterprises made it necessary for the Bureau of the Census to divide somewhat arbitrarily the 40 States with drainage enterprises into two groups: the 10 "county-drain" States and the 30 "drainage-district" States. The eight States with no drainage enterprises are the six New England States, Pennsylvania, and West Virginia. In the 10 "county-drain" States (Delaware, Indiana, Iowa, Kentucky, Michigan, Minnesota, North Dakota, Ohio, Oklahoma, South Dakota), statistics were gathered for the county as a unit, rather than for each separate enterprise as for the 30 "drainage-district" States. In most of the "county-drain" States, the management of drainage enterprises is under the county government. Generally, the maintenance work on existing ditches has been done by reorganizing the land of an earlier enterprise into a new project. Since the number of enterprises for "county-drain" States would be meaningless, the number was not obtained for these 10 States.

In the Western States most of the drained land is located in irrigation enterprises which were chartered to do both irrigation and drainage work under one organization. In the case of irrigation enterprises having their own drainage, the cost of construction and operation and maintenance of the irrigation works is usually far greater than that for drainage. Separate records are seldom kept for expenditures for drainage and irrigation. Data were not included in the 1950 Census of Drainage for cost, collections, and indebtedness of irrigation enterprises having their own drainage. Therefore, the data for 1950 are not fully comparable with those for earlier years.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series F 56–59") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789–1945*.

No. 674.—IRRIGATION ENTERPRISES—SUMMARY: 1910 TO 1950

[Data are for the 17 Western States, Arkansas, Louisiana, and, for 1950, Florida. Tables 674 and 676-679 relate to irrigation enterprises of all types, including those operated by individual farmers. They are based on reports of management of enterprises. An enterprise is defined as "an independent irrigation establishment owning or operating works for supplying water to agricultural land." 1950 data are preliminary. See also *Historical Statistics*, series F 56-59]

¹ Warren Act contracts are those which provide for sale of excess water to irrigation districts, i. e., water over and above project requirements. Lands served are usually located outside project proper. The act also provides for joint construction and financing of irrigation works by Federal Government and irrigation districts.

¹ In addition, the Bureau is prepared to supply water to 41,125 acres for which no crop details were reported. Excludes 105,983 acres of temporarily suspended, other leased and water rental lands (crop value \$5,744,967).

² Includes 16,306 acres irrigated from privately constructed facilities.

³ Orchard Mesa Irrigation District is a private project reconstructed with Government funds.

⁴ Water conservation and utilization project. ⁵ Private project reconstructed with Government funds.

No. 687.—GROWTH OF CONSERVATION DISTRICTS, BY FISCAL YEARS, TO JUNE 30, 1951

[Basic soil conservation district legislation has now been enacted in all of the 48 States and 4 of the Territories and possessions. Each of these laws contains an effective date after which soil conservation districts could be organized by local farmers and operators. A soil conservation district is a political subdivision of State which is determined by petition and referendum of farmers residing in area, and approved by State Soil Conservation Committee. Districts, in most cases, have authority to solicit Federal, State, county, and private assistance in carrying on their soil and water conservation program within the area. On request of local governing body of each soil conservation district, Department of Agriculture provides technical and other assistance to districts, through its several agencies. These memorandums of understanding form basis on which any departmental assistance is provided to district for use on farms and ranches within district. After basic memorandum with Department has been signed, Soil Conservation Service signs a supplemental memorandum with each district governing body requesting assistance, to cover activities which Soil Conservation Service will help district carry out.]

¹ For specific procedure on organization of soil conservation districts, see respective State soil conservation district law. By provision of most State district laws, State soil conservation committee has responsibility for organization of districts. Local district governing bodies administer affairs of each individual district.

² Soil Conservation Service furnishes technical and other assistance to practically all districts that have entered into memorandums of understanding with Department of Agriculture.

³ Includes complete farm conservation plans being carried out by farmers in cooperation with districts, as planned. Cancellations caused by death, change in ownership, or mutual consent have been deducted. Data on plans and treated area included only work done through farmer-district cooperative agreements since Aug. 1937 with assistance of Soil Conservation Service.

⁴ Includes Imperial irrigation district.

⁵ Includes 23 State cooperative grazing districts.

⁶ Includes 7 wind-erosion districts.

24. Agriculture—General Statistics

(Sent to print May 7, 1952)

Statistics on agriculture are for the most part prepared by the Bureau of the Census, Department of Commerce, which conducts the Census of Agriculture, and by the Department of Agriculture which prepares current annual estimates.

Beginning with 1840 a Census of Agriculture has been taken every 10 years in conjunction with the Decennial Census of Population. In 1925, 1935, and 1945 a mid-decennial Census of Agriculture has also been taken. Information at each census has been obtained by a personal canvass of individual farms by census enumerators. The first Census of Agriculture, however, was limited in scope. It included such items as an inventory of the principal classes of domestic animals, the production of wool, the value of poultry, the value of products of the dairy, and the production of the principal crops. The number of farms and the acreage and value of farm land were first included in the Census of 1850. In 1880 information was first secured as to the tenure under which the farms were operated. A detailed classification of farm land according to use was first obtained in 1925; in earlier censuses, farm land was classified only as improved land, woodland, and other unimproved land.

A farm as defined by the Bureau of the Census is all the land on which some agricultural operations are performed by one person, either by his own labor alone or with the assistance of members of his household, or hired employees. In 1950, places of 3 or more acres were counted as farms only if agricultural products, exclusive of a home garden, with a value of \$150 or more were produced in 1949. Also, in 1950, places of less than 3 acres were counted as farms only if the value of agricultural products sold amounted to \$150 or more. In each census from 1925 to 1945, places of 3 or more acres were counted as farms if any agricultural products, other than a small home garden, were produced during the preceding year while places of less than 3 acres were counted as farms if the agricultural production was valued at \$250 or more. (For definitions used in earlier censuses, see *1945 Census of Agriculture*, Vol. II, Ch. 1.)

Agricultural operations consist of the production of crops or plants, vines or trees (excluding forestry operations), or of the keeping, grazing, or feeding of livestock for animal products, animal increase, or value enhancement. Included as farms are such agricultural enterprises as nurseries, greenhouses, hothouses, fur farms, mushroom cellars, apiaries, and cranberry bogs. Excluded are fish farms, fish hatcheries, oyster farms, frog farms, kennels, game preserves, parks, and the like. When a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a farm for census purposes. Thus for a plantation each cropper and tenant operation is considered a separate farm even though the entire plantation may be handled essentially as a single farm enterprise.

The land in farms includes considerable areas of land not actually under cultivation or used for pasture or grazing, but all such land must have been under the control of the operator and considered a part of his farm. Land used for grazing or pasture that was neither owned nor leased by the farm operator was not included under land in farms. Thus vast acreages of land used for grazing, such as national forests, Taylor grazing land, State lands, or other public lands, and some railroad and other privately owned lands, are not included as land in farms even though used for agricultural purposes.

Information on prices received by farmers for products they sell and prices paid for articles they buy for production and family living are obtained by the Bureau of Agricultural Economics from about 35,000 farmers, local merchants, and handlers of agricultural products. Season average prices received by farmers are calculated by weighting midmonth prices by monthly sales during the crop marketing season, beginning with the first month when a particular crop harvest begins.

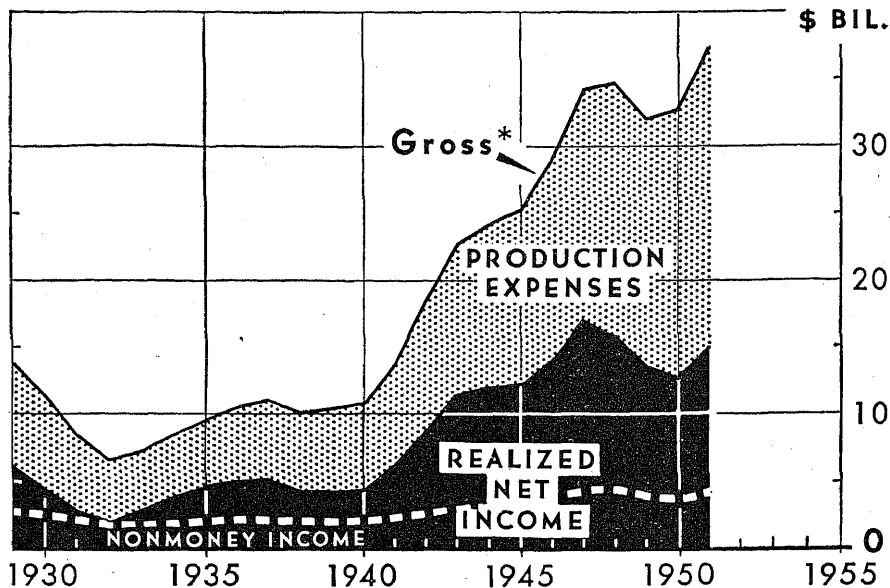

The index numbers of prices received and of prices paid by farmers (see tables 710 and 711) are based on current midmonth prices for these commodities. For information concerning methods of construction of the indexes, see Supplement No. 1 to the January 1950 issue of *Agricultural Prices*, issued by the Bureau of Agricultural Economics. The ratio of the index of prices received to the index of prices paid by farmers measures the monthly variation in the average per unit exchange value of farm products in terms of commodities and services bought by farmers.

Cash income is the cash receipts from farm marketings and represents the quantities of crops, livestock, and livestock products sold by farmers multiplied by the prices received per unit of production at the local market. Gross farm income includes Government payments, value of farm products consumed on the farm, rental value of farm homes, as well as cash receipts from farm marketings.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series E 1-16") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

FIG. XXV.—GROSS FARM INCOME—NET INCOME AND PRODUCTION EXPENSES OF FARM OPERATORS: 1929 TO 1951

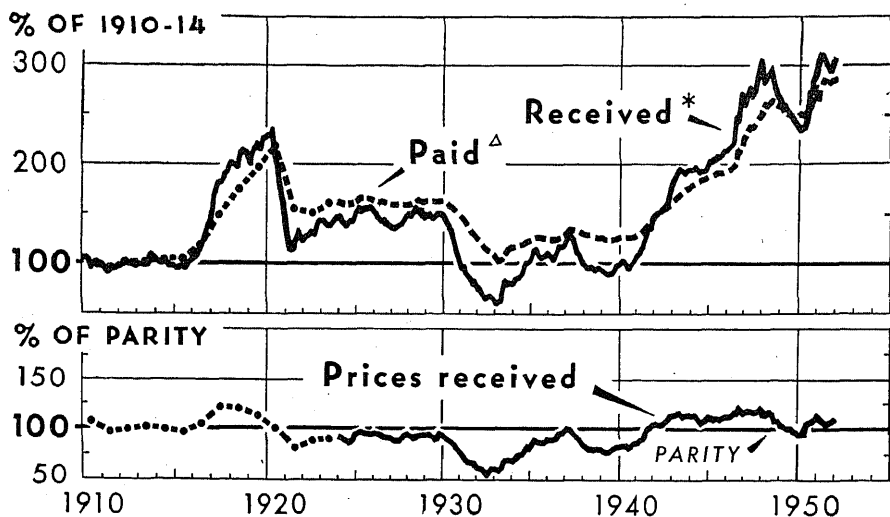

[See table 710]

* Includes Government payments, beginning 1933.

FIG. XXVI.—INDEXES OF PRICES RECEIVED AND PAID BY FARMERS: 1910 TO 1951

[See table 710]

* Monthly data.

△ Includes interest, taxes, and wage rates. Annual average data, 1910-23; by quarters, 1924-36; by months, 1937 to date.

No. 691.—NATIONAL FARM PRODUCT IN CURRENT DOLLARS: 1910 TO 1950

[Millions of dollars. Gross national farm product differs in content and movement from measures of the total output of farm products. As a value-added concept, the gross farm product measures only production actually occurring on farms, without duplications. That is, the value of materials used up by farmers in the production process, such as feed, fertilizer, and motor fuel, is deducted from the value of total farm output to arrive at the gross farm product. It is termed "gross" only because depreciation and other capital consumption allowances are not deducted. Value of materials used up in production, technically known as "intermediate products," has risen greatly in recent decades relative to the value of total farm output. Thus, gross farm product has risen significantly less than total farm output over the period 1910-50]

ITEM	1910	1920	1930	1940	1945	1946	1947	1948	1949	1950

Equals: National farm income	5,038	9,846	5,836	6,419	15,276	17,821	18,949	21,310	16,542	17,131

¹ Includes imputed value of food and firewood consumed on farm where produced.

² Adjustment necessary to convert sales figures to a commodity output basis.

³ Includes current expenses for feed and livestock, seed, fertilizer, operation of motor vehicles, irrigation, and other purchased items. Some intermediate products are direct purchases by one farmer from another. Bulk of purchased materials represents production, or value added, by nonfarm industries.

⁴ Counted as an expense to farmers, since only the rental value of farm-owned property is considered to originate in farm sector.

Other transfers ⁸	-----	17.0	16.9	15.2	15.4	14.5	13.4	12.8
Percentage of voluntary sales and trades:								
Purchased by local residents.....	-----	82	83	82	80	80	79	76
Purchased for operation.....	-----	81	78	74	81	80	80	76
Occupation of purchaser:								
Active farmer.....	-----	72	68	63	68	67	67	63
Retired farmer.....	-----	4	4	3	4	5	5	5
Other occupation.....	-----	24	28	34	28	28	28	32

¹ Total population includes armed forces serving overseas.

² Revised series—intercensal years interpolated on basis of change in farm population.

³ Includes farm land and buildings, implements and machinery and livestock, including poultry. Turkey included from 1929 to date.

⁴ As of March 1.

⁵ Year ending Mar. 15.

⁶ Includes contracts to purchase (but not options).

⁷ Includes loss of title by default of contract, and surrender of title or transfers to avoid foreclosures.

⁸ Includes inheritance and gift transfers; sales in settlement of estates; and miscellaneous and unclassified sales.

Pasture ¹	883	818	625	600	502	437	382	285
Forest land capable of producing timber of commercial quantity and quality.....	368	344	318	301	319	349	325	320

¹ Cropland used for pasture only. Not comparable to previous estimates of plowable pasture.

² Includes 34,000,000 acres of arid woodland and brush land.

³ Estimated. ⁴ Includes idle grassland in first decades and arid woodland (pinon, juniper, chaparral).

⁵ Includes about 90,000,000 to 100,000,000 acres of arid woodland and brush land used for grazing.

⁶ Largely commercial forest land.

¹ Bureau of Agricultural Economics estimates based on average value per acre and land in farms as shown in preliminary State releases of 1950 Census of Agriculture.

² Based on reports for sample of farms. ³ Excludes District of Columbia. ⁴ No estimate.

Source: Department of Commerce, Bureau of the Census (except as noted); 1945 Census of Agriculture, Vol. II, and preliminary data from 1950 Census of Agriculture.

No. 696.—FARM LAND, BY USE, BY STATES: 1944 AND 1949

¹ From farm marketings and Government payments.

² Excludes hired labor.

³ Includes share rent as well as cash rent paid to nonfarm landlords because their share included in cash receipts.

¹ Preliminary.

² Beginning 1945 includes taxes on gasoline used in farm tractors.

³ For 1925-30 includes companies with more than 65 percent of their insurance on farm property; for later years, 50 percent. About 88 percent of their total insurance is on farm property, for both periods.

⁴ Number of companies for which data were obtained; perhaps not entirely complete for any year.

⁵ Estimate based on sample of companies.

⁶ Excess of assets over liabilities. Most of farmers' mutuals are assessment companies and as such are not required to set up unearned premium reserves. Data not compiled prior to 1935.

Amount (\$1,000).....1939..	305, 650	248, 374	14, 362	42, 914	301, 779	3, 872

¹ Exclusive of housework. Inquiry for 1939 and for 1944 specifically excluded contract construction work. No mention was made of wages for this kind of work for 1929.

² Not available.

³ Inquiry specified expenditures for automobiles, tractors, and motortrucks for 1929 and 1939, and trailers for 1939.

⁴ Includes quantities for which the farm operator reported no expenditure or expenditure for freight only.

⁵ Includes expenditures for lumber, roofing materials, hardware, cement, paint, fencing materials, etc.

¹ Preliminary.² Data represent inventory valuations at beginning of year. Includes family share of automobiles.³ For use in United States from domestic manufacture; from Bureau of Census, *Facts for Industry Series M35A*.⁴ Not available.⁵ Excludes family share of automobiles.

Source: Department of Agriculture, Bureau of Agricultural Economics (except as noted).

No. 718.—FERTILIZER CONSUMPTION: 1880 TO 1950

[In thousands of tons of 2,000 pounds. Based on tag sales, records of Government officials, or estimates. Beginning 1935, figures include tonnage distributed by Agricultural Adjustment Administration and by Tennessee Valley Authority, data for the latter representing fiscal years ending June 30. Data for phosphate rock used in Illinois and Florida, available only since 1939, have been excluded from annual comparisons. In addition to tonnage for consumption, fertilizers and fertilizer materials produced in continental U. S. are exported to island possessions]

¹ Represents marketing season during which farm products of a specified year are moved into channels of trade. Marketing seasons overlap.

² For years since about 1935, comprises members, contract members, and shareholders, but excludes patrons not in these categories.

³ Includes value of commodities sold or purchased for patrons and charges for rendering other essential services either in marketing or purchasing. Most duplication in value arising from intra-association transactions has been eliminated.

No. 724.—FARMS—NUMBER AND PERCENT DISTRIBUTION, BY TYPE: 1950

[Type of farm determined on basis of relationship of value of sales from a particular source to total value of products sold for each farm. In general, value of sales from a particular source was 50% or more of total sales when a farm was classified as that type. Part-time farms include those with a value of products sold of \$250-\$1,199 and with operator either reporting 100 days or more of off-farm work or other income exceeding value of farm products sold. Residential farms include those with a value of farm products sold of less than \$250. Abnormal farms include public and private institutional farms, experiment stations, community projects, etc. Data are preliminary]

25. Agriculture—Production and Related Subjects

(Sent to print May 7, 1952)

The data in this section are, for the most part, from the Bureau of the Census, Department of Commerce, and from various bureaus in the United States Department of Agriculture. In general, statistics for agriculture census years are from the Bureau of the Census. Estimates for intervening years, and adjustments, where necessary, to a January 1 basis are from the Bureau of Agricultural Economics, United States Department of Agriculture.

Annual agricultural statistics of a wide variety have been issued currently by the United States Department of Agriculture for over 80 years—the first being as of May 1, 1863. The 41 field offices design the samples and collect data from voluntary reporters. State estimates and other information are sent to the Crop Reporting Board of the Bureau of Agricultural Economics in Washington, where, after review, reports are issued containing State, Regional, and United States data.

Statistics compiled by the Bureau of Agricultural Economics on crops, livestock, and livestock products, agricultural prices, farm employment, and other related subjects are based mainly on data obtained through mail questionnaires. The basic information is obtained from nearly three-quarters of a million reporters, located in every agricultural county in the United States, who report on one or more items during a year. These reporters, mostly farmers, report for their own and nearby farms on some 80 crops and scores of other items pertaining to agricultural production and farm family living.

The most extensive of the current survey data are gathered by the Bureau of Agricultural Economics from questionnaires handled in cooperation with the Post Office Department through its rural mail carriers. These surveys obtain livestock data in June and December and crop acreage data in October. For each survey the rural carrier distributes 10 to 20 cards to farmers on his route. The farmer is asked to complete his questionnaire for his own farm and return the card to his mail box.

In the data prepared by the Bureau of Agricultural Economics, estimates of crop acreage and production for the census years are set up currently on available information. Later, if necessary, these data are revised to a level based largely on the census enumerations. The estimates for intercensal years are based on sample data obtained each year from individual reporters. This information is supplemented by other data, such as State assessors' enumerations of agricultural information, crop meter frontage measurements, reports of carlot shipments, warehouse receipts, local surveys, personal observations by field statisticians as well as reports from other sources having a knowledge of farming, agricultural production, and processing. Cotton acreage and production are also based on sample data and, in large measure, on ginning information gathered by the Bureau of the Census. Usually, all known sources of information pertaining to agriculture in general, from the farm to the consumer's household are tapped for basic facts used in compiling current statistics on agriculture.

For each decade from 1840 through 1900, the Census of Agriculture was taken as of June 1. The five decennial censuses since then have been taken as of April 15, 1910; January 1, 1920; and April 1, 1930, 1940, and 1950. The 1925, 1935, and 1945 quinquennial Censuses of Agriculture were taken as of January 1. Comparison of inventory numbers of livestock from census to census is seriously affected by a change in the date of enumeration. From January to April there are material changes in num-

bers on hand in most parts of the country due to births, marketings, farm slaughter, etc. In an effort to obtain as much comparability as possible the censuses taken in April either excluded recently born animals from the enumeration or provided for their enumeration in a separate age group. Volume II of the 1945 Census of Agriculture Reports shows a complete history of the enumeration of livestock and presents a discussion of the comparability from census to census.

For most kinds of domestic livestock, there are comparatively short, cyclic fluctuations in numbers, even though the trend over a long period of time may be definitely in one direction. A single census may be taken at a time when such a cycle is at the peak or at the trough of numbers and hence gives no true indication of the long-time trend.

Annual inventory numbers of livestock on farms prepared by the Department of Agriculture together with estimates of livestock, dairy, and poultry production are based on information furnished by individual farmers, supplemented by State assessors' data in a number of States, and by such records as brand inspections, rail and truck shipments, and inspected slaughter. The level for these inventories is based in large part on census enumerations for years when census data are available.

Data on imports and exports are now compiled by the Department of Commerce, Bureau of the Census, and are published in the annual report, *Foreign Commerce and Navigation of the United States*. (See also section 31, Foreign Commerce.) The official trade statistics based on the fiscal year are usually preferable to data presented on a calendar year basis, for use in comparing imports and exports with crop production since, for most crops, they coincide more nearly with the crop year.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series E 72-75") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

¹ Measures calendar-year production of all crops and pasture consumed by all livestock, and the product added in conversion of feed and pasture into livestock and livestock products for human use and into farm-produced horse and mule power.

² Estimated value, at 1935-39 average prices, of all feed (including commercial feeds) and pasture consumed by each class of livestock subtracted from total value, at 1935-39 average prices, of livestock and livestock products.

³ Includes miscellaneous crops not included in groups shown.

⁴ Volume of sales and home consumption during calendar year.

⁵ Total crop production, minus quantities retained for feed or seed and quantities not harvested or lost.

¹ Excludes distilled liquor.

² Beginning Jan. 1, 1942, includes food exported for relief or charity; beginning Jan. 1, 1947, also includes exports under Army Civilian Supply Program.

³ Based on total exports of domestic merchandise.

⁴ Imports for consumption beginning 1934; general imports prior thereto.

⁵ Supplementary agricultural imports consist of all imports similar to agricultural commodities produced commercially in the United States, together with all other agricultural imports interchangeable to any significant extent with such United States commodities. Complementary agricultural imports include all others, about 95 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and spices.

⁶ Average not computed; data not available prior to 1929.

Source: Department of Agriculture, Office of Foreign Agricultural Relations, from official records of Bureau of the Census and U. S. Tariff Commission. Published in annual report, *Agricultural Statistics*.

¹ Excludes 14,503,000 acres of corn cut for fodder, valued at \$206,935,000, probably duplicated in acreage of corn harvested for grain; 3,107,000 acres of mature crops hogged off (corn, velvetbeans, soybeans, peanuts, sweet-potatoes, etc.) also excluded.

^{2a} See table 740.

² Total acreage of crops for which figures are available. ³ Not available, or data not comparable.

⁴ Irish and sweet potatoes included with "field crops," not with "vegetables." Acreage of vegetables represents acres of vegetables harvested for sale only; acreage in farm gardens not available. Value includes both vegetables for home use and for sale.

⁵ Excludes acreage of horticultural specialties (not available for 1944); value includes horticultural specialties.

⁶ Excludes acreage for alfalfa, clover, and grass seeds harvested, probably duplicated in hay acreage.

⁷ Only strawberries reported in small fruits; other small fruits included in field crops.

⁸ Vegetables for sale. ⁹ Farm garden vegetables for home use only.

¹⁰ Acreage in fruit orchards, vineyards, and planted nut trees not secured prior to 1930.

¹¹ Excludes acreage for horticultural specialties.

¹ Irish potatoes and sweet potatoes included with "field crops," not with "vegetables."

² Excludes sweet corn, popcorn, "Egyptian corn," kafir, and milo maize.

³ Figures for 1944 are not fully comparable with those for 1939. 1944 totals are for States for which a separate inquiry was carried on schedule. For further discussion, see 1945 *Census of Agriculture*, Vol. II.

⁴ Oat hay included with small grains cut for hay.

⁵ Excludes flax and wheat mixture.

⁶ Clover seed except sweet clover.

⁷ Represents acreage of vegetables harvested for sale only; acreage in farm gardens not available.

⁸ Acreage of horticultural specialties not available for 1944 and therefore excluded for 1939; value includes horticultural specialties.

⁹ Includes blackberries and dewberries, blueberries, boysenberries, loganberries, youngberries, raspberries, and strawberries.

Source: Department of Commerce, Bureau of the Census; 1945 *Census of Agriculture*, Vol. II.

No. 741.—PRINCIPAL CROPS—ACREAGE, PRODUCTION, AND VALUE: 1866 TO 1951

[Tons are of 2,000 pounds. For weights of units of measurement for principal products, see Appendix II. Approximate weights of units of measurement for other products are as follows: Number of pounds to a bushel—sweetpotatoes, 55; sorghums for grain, 56; clover seed, 60. Number of pounds to a barrel of cranberries, 100. Prices and yields for periods are weighted averages except for cotton and cottonseed, which are simple averages of prices and yields for individual years. Acreage, production, and yield of all crops revised to census data. See also *Historical Statistics*, series E 181-230, for acreage harvested, production, and price data for corn, wheat, oats, barley, flaxseed, potatoes, sweetpotatoes, cotton, cottonseed, soybeans, and hay]

YEARLY AVERAGE OR YEAR	Acreage har- vested	Produc- tion	Farm value ¹	Yield per acre	Price ²	Acreage har- vested	Produc- tion	Farm value ¹	Yield per acre	Price ²

¹ Values are based on season average or Dec. 1 prices. See notes on "Price" column.

² Received by farmers. Beginning 1908, prices are season average prices for the crop-marketing season; prior thereto, Dec. 1 prices. Prices for 1937 through 1944 for corn, 1938 through 1944 for wheat, 1940 through 1944 for rye, and 1948 through 1951 for corn, wheat, oats, and rye include an allowance for unredeemed loan and purchase agreement deliveries (beginning 1948) valued at average rate.

**No. 741.—PRINCIPAL CROPS—ACREAGE, PRODUCTION, AND VALUE:

¹ Values are based on season average or Dec. 1 prices. See notes on "Price" column.
⁴ Received by farmers. Beginning with 1903 for potatoes and cotton, 1909 for sweetpotatoes, and cottonseed, prices are season average prices. Figures for prior years are Dec. 1 prices. 1933, 1934, 1937, 1938, and 1940 through 1951, for cotton crop, and 1949 through 1951 for cottonseed season average prices include an allowance for unredeemed loans.
⁶ Average for 8 years. ⁷ Average for 6 years. ⁸ Average for 7 years. ⁹ Average for 4 years.
¹⁰ Includes following quantities not harvested on account of market conditions (1,000 bushels): 1928, 7,462; 1931, 66,193; 1932, 2,175; 1939, 1,240; 1943, 440; and 1950, 1,235. Price and value apply only to the harvested portion of the crop.
¹¹ Includes 1,804,000 bushels unharvested but purchased by the Government under price-support program.
¹² State production figures, which conform with census annual ginning enumeration, with allowance for cross State ginnings, rounded to thousands and added for United States totals. Cotton grown in Baja, California, ginned in California from 1913 to 1924, has been excluded.
¹³ Production is in running bales prior to 1899; 500-pound gross weight bales thereafter.
¹⁴ Data for 1909 and 1910.

¹ Values are based on season average or Dec. 1 prices. See notes on "Price" column.¹⁴ Received by farmers. Prices for 1942 through 1944, 1948 through 1951 for sorghums and 1942 through 1944, 1948 through 1951 for soybeans and 1948 through 1951 for beans include an allowance for unredeemed loans and purchase agreement deliveries (beginning 1948) valued at average rate. See also notes on prices for each crop.¹⁵ Based on the reported price of grain sorghums.¹⁶ Equivalent solid acreage.¹⁷ Prices are season average prices, prices of beans being for cleaned beans.¹⁹ Bags of 100 pounds (uncleaned).²⁰ Farm value of dry edible beans equals the price of cleaned beans applied to the production of cleaned beans rather than to the total production. ²¹ Average for 1924 and 1925.²² Average for 1919 and 1920.²³ Dec. 1 prices, 1916 to 1931; beginning 1932, season average prices.²⁴ Includes 5,436,000 pounds in 1935, 4,865,000 pounds in 1937, 3,140,000 pounds in 1938, 2,813,000 pounds in 1939, not available for marketing because of economic conditions and the marketing agreement allotments. Saleable allotments under marketing agreement were 39,000,000 pounds in 1949, 50,000,000 pounds in 1950, and 46,500,000 pounds in 1951. Prices and values are computed on the marketed crop.

¹ Value based on season average or Dec. 1 prices. See notes on "Price" column.

²⁵ Received by farmers. Prices as of Dec. 1 except as noted. ²⁶ Tame hay only, prior to 1911.

²⁷ Prices are season average prices beginning 1911; Dec. 1 prices thereafter. Beginning 1948, prices are for hay sold baled; prior years, for hay sold loose. Price for hay sold loose in 1948 was \$18.90 per ton.

²⁸ Prices are season average prices beginning 1919; Dec. 1 prices thereafter.

²⁹ Prior to 1942, data are for 7 States. Production figures include fruit consumed on farms, sold locally, and used for manufacturing, as well as that shipped; they exclude fruit which ripened on trees but was destroyed prior to picking. Figures relate to crop produced from bloom of year shown. In California, picking season usually extends from about Oct. 1 to Dec. 31 of following year. In other States, season begins about Oct. 1 and ends in early summer.

³⁰ Prior to 1942, price of sweet sorghums for forage and hay.

³¹ Net content of boxes varies. In California and Arizona, approximate average is 77 lbs.; in other states, 90 lbs. Production includes following quantities donated to charity, unharvested, and/or eliminated on account of economic conditions (1,000 boxes): 1933, 977; 1934, 1,395; 1935, 614; 1936, 1,023; 1937, 1,204; 1938, 2,949; 1939, 1,236; 1940, 1,322; 1941, 762; 1942, 654; 1943, 830; 1944, 1,771; 1945, 731; 1946, 2,639; 1947, 1,563; 1948, 878; 1949, 894; 1950, 608.

Price and value are computed on remaining crop.
³² Season average returns to growers. Price and value apply to entire crop exclusive of that portion donated to charity, unharvested, and/or eliminated on account of market conditions. (See note 31.) Prices are equivalent packing-house-door returns for all methods of sale and are weighted by production to obtain U. S. averages.

³³ Average for 1929 and 1930.

No. 753.—COTTON AND COTTONSEED—ACREAGE, PRODUCTION, AND VALUE, BY STATES: 1936 TO 1951

[Cotton production excludes linters. Figures for production in some States differ slightly from census figures on ginnings due to ginnings in 1 State of cotton grown in another. Values shown are for marketing season or crop year and should not be confused with calendar year income. Yields and prices for periods are simple averages of figures for individual years. Tons are of 2,000 pounds. See also *Historical Statistics*, series E 217-224, for U. S. totals for acres harvested, production, and price]

No. 754.—COTTON (EXCLUDING LINTERS)—PRODUCTION, CONSUMPTION, EXPORTS, IMPORTS, PRICES, AND CARRY-OVER: 1916 TO 1951

[All figures, except average price, in thousands of bales. Production figures relate to crop of preceding calendar year and are compiled from reports of individual growers. Price per pound is average price received by growers. For data prior to 1916, see 1949 and earlier editions of the *Statistical Abstract*]

YEARLY AVERAGE OR YEAR ENDING JULY 31	PRODUCTION		Average price per pound upland cotton (cents)	Con- sumption (running bales)	Exports of do- mestic cotton (running bales)	Imports (equiva- lent 500- pound bales)	Carry- over (running bales)
	Running bales, counting round as half bales	Equivalent 500-pound bales, gross weight

Lemons	do ¹⁰	12,993	11,360	13,400	12,900	3.59	2.83	2.95

¹ Includes some quantities not harvested on account of economic conditions or scarcity of harvest labor or donated to charity.

² Season average prices, except citrus fruit prices, which are equivalent packing-house-door returns for all methods of sale. ³ Preliminary.

⁴ Estimates refer to production of apples in commercial apple areas of each State and include fruit produced for sale to commercial processors, as well as that for sale for fresh consumption.

⁵ California, 48 pounds; other States, 50 pounds.

⁶ Fresh basis for California derived by multiplying dry basis estimate by 2½.

⁷ Data for 5 States; 7 States prior to 1942. See also table 741, p. 619.

⁸ Net content of box varies. In California and Arizona approximate average is 77 pounds; in Florida and other States, 90 pounds.

⁹ In California and Arizona approximate average is 65 pounds net; in Florida and other States, 80 pounds net.

¹⁰ About 79 pounds net.

¹ Growth of 9 months in Louisiana and 12 months in Florida. Sugar campaign usually not ended before February in Louisiana and April in Florida, following season of growth of cane.

² Calculated by the Agricultural Adjustment Administration method. (S. R. Series 1, No. 1.)

³ Based on the ratio of 100 pounds of raw sugar to 93.46 pounds of refined sugar.

⁴ Not including sirup production. See table 764.

⁵ Includes price support payments of \$1.45 per ton in 1945. Excludes Government payments under Sugar Act of \$1.10 per ton in 1945, \$1.15 in 1946, \$1.17 in 1947, \$1.10 in 1948, \$1.13 in 1949, and approximately \$1.20 in 1950.

¹ Age of cane equals 18 to 22 months of growth.

² See note 2, table 765.

³ One ton of raw sugar 96° test is assumed to be equivalent to .9346 ton of refined.

⁴ Based on tonnage of cane used.

¹ Excludes Cuba. Includes Puerto Rico, Hawaii, Phil. Isls., and beginning 1910, Virgin Islands not shown separately.

² Beet sugar not converted to raw prior to 1909. Refined reduced to raw basis by multiplying by 1.07.

³ For 1900 to 1906, shipments to United States.

⁴ Statistics for 1874 to 1880 represents exports. Normal grinding season begins Oct. 1. In 1933, production was from grindings of Oct. 1, 1933, to Dec. 31, 1934; beginning 1934, from grindings of the next calendar year.

⁵ Exports 1871 to 1911, production 1912 and subsequently. Includes production of muscovado and panocha, low grades of sugar mostly for domestic consumption.

⁶ Less than 500 tons.

⁷ One year only.

⁸ Not available.

⁹ Louisiana and Texas 1909 to 1923; Louisiana only 1924 to 1927; Louisiana and Florida beginning 1928.

¹⁰ Beginning 1935, includes centrifugal only.

¹ Data from Sugar Branch, Production and Marketing Administration.

² Beginning 1939 includes mainland cane stocks and beginning 1940 includes raws for processing held by importers other than refiners.

³ Includes sugar used in manufacture of other commodities. 1937-41, exports (Department of Commerce, Foreign Commerce and Navigation); 1942-49, quantities delivered for export (Sugar Branch, Production and Marketing Administration).

⁴ Data based on allocation audits and records kept by armed forces.

⁵ Adjusted for changes in invisible stocks (estimated) held by manufacturers, wholesalers, and retailers. Civilian per capita consumption, 1941-49.

⁶ Includes shipments for civilian relief feeding.

¹ Fiscal years through 1915; calendar years thereafter.

² General imports through 1932; imports for consumption thereafter.

³ Includes artificial silk prior to 1911.

⁴ Raw silk.

⁵ Effective 1948, includes shipments under Army Civilian Supply Program.

No. 773.—ANIMAL AND VEGETABLE FATS AND OILS—PRODUCTION, CONSUMPTION,
AND STOCKS: 1950 AND 1951

[Data cover factory operations only, and therefore exclude considerable quantities of lard, tallow, and grease produced on farms and by local butcheries and small renderers, and quantities consumed and held in homes, hotels, restaurants, bakeries, and quantities consumed and held by painters, building contractors, garages, etc. Stocks include amounts held by and in transit to producers, factory consumers, and public storages, but exclude amounts held in private storages by retailers, wholesalers, and jobbers. Additional data on consumption and stocks of raw materials, such as cottonseed, copra, corn germs, flaxseed, soybeans, etc., and consumption data by process and end-use are contained in Facts for Industry Series M 17-1 and M 17-2]

[In thousands of pounds]

¹ 1950 data from peanut oil producers were collected by U. S. Department of Agriculture.² Included in "Other vegetable oils" to avoid disclosure of individual operations.³ Data are on a commercial stocks basis and do not include figures for stockpiles of strategic oils.⁴ Data on production collected by U. S. Department of Agriculture.⁵ Data not available.⁶ Excludes quantities used in refining.⁷ Held by wool scourers.⁸ Data from fish oil producers were collected by Fish and Wildlife Service, U. S. Department of the Interior.⁹ Included in "Other marine mammal oil."¹⁰ Included in "sperm oil."¹¹ Not shown to avoid disclosure of individual operations.¹² Winterized-deodorized oil, hydrogenated-deodorized oil and cooking and salad oil not included.¹³ Includes edible hydrogenated animal fats and oils for which data were reported separately only since September 1951. For this period of 1951, 12,668,000 pounds of animal fats and oils were produced; 4,739,000 pounds consumed and stocks as of December 31, totaled 1,637,000 pounds.¹⁴ Data collected by Bureau of Internal Revenue, January through June 1950.¹⁵ Includes data for synthetic glycerin.Source: Department of Commerce, Bureau of the Census; annual report, *Animal and Vegetable Fats and Oils* (Facts for Industry, Series M17-1).

¹ Includes inspected, noninspected, retail, and farm slaughter.

² Prices are for beef steers, all grades, excluding western.

³ Excludes animals slaughtered under government account.

⁴ Includes slaughter under Emergency Government Relief Purchase Program in 1934-1935.

⁵ Prices are for lambs only; (sheep represent smaller part of animals slaughtered).

NO. 780.—MEATS AND LARD—PRODUCTION, FOREIGN TRADE, AND CONSUMPTION BY KIND: 1941 to 1949

[All quantities, except per capita, in millions of pounds of carcass weight equivalent. Edible byproducts are excluded. Production of pork excluding lard comprises weight of dressed hog carcass less head bones and less all carcass fat rendered into lard. Lard production represents rendered weight of lard, and lard exports represent rendered lard, including neutral lard. Federally inspected production omits production in Hawaii and Virgin Islands from 1940 to date. Uninspected production is made up of farm and retail slaughter and all wholesale slaughter that is not Federally inspected. Commercial exports include commercial shipments to territories; they do not include USDA exports and shipments for Lend-Lease, UNRRA or other claimants, nor do they include shipments for military civilian feeding or voluntary relief feeding. Civilian consumption is calculated from production and foreign trade, with an allowance for changes in stocks, and with deduction of military takings beginning 1941 and of deliveries to USDA from 1941 to 1947. See also *Historical Statistics*, series E 138, 142, 146, and 150 for total production of beef, veal, lamb and mutton, and pork.]

¹ Price received by farmers.

² Imports for consumption beginning 1934, general imports prior thereto. Apparel wool for all years includes item "not finer than 40's" both free and dutiable. Carpet wool includes only Domsloi, Smyrna, East Indian, Chinese, and similar wool without merino or English blood.

³ For the years 1930-35 the item "not finer than 40's" has been deducted from carpet wool totals reported by Department of Commerce and added to apparel wool, thus making entire series comparable.

⁴ Excludes 222,222 lbs. in 1942; 275,476,308 lbs. in 1943; 2,725,929 lbs. in 1944; 5,372,698 lbs. in 1945; and 14,840 lbs. in 1946, imported free of duty as an act of international courtesy. Wool so imported consisted almost entirely of wool stored in this country for the British Government, and later re-exported. This wool was not available to domestic mills.

⁵ Includes hair of angora goat, alpaca, and other like animals. Includes a small amount of carpet wool beginning 1943.

⁶ Production, minus exports, plus imports; stocks not taken into consideration.

⁷ Preliminary.

⁸ As reported by Bureau of Census. Includes wool stored in bonded warehouses prior to payment of duty. Excludes wool on farms for all years, and wool stored for British Government for re-export, 1946.

⁹ As of April 1.

Source: Department of Agriculture, Bureau of Agricultural Economics; annual report, *Agricultural Statistics*. Exports and imports from Department of Commerce, Bureau of the Census; annual report, *Foreign Commerce and Navigation of the U. S.*

¹ Scoured wool, plus greasy wool reduced to a scoured basis, assuming average yields varying with class, origin, grade, and whether shorn or pulled.

² Wool regarded as more or less suitable for apparel purposes; formerly "Combing and clothing."

³ Includes raw wool consumed on woolsens and worsted systems only. Raw wool consumed on cotton and other systems and by felt and batting manufactures amounted to about 10 million pounds in 1946.

26. Forests and Forest Products

(Sent to print May 7, 1952)

The Bureau of the Census, Department of Commerce, and the Forest Service, Department of Agriculture, are the principal Government agencies engaged in the collection and publication of statistics of forest land, forest industries, and forest products. The Forest Service, through its forest survey activities, makes an inventory of the forest resource and measures rates of forest growth and drain. A number of reports for surveyed areas have been published. A report based on a reappraisal of the Nation's forest situation made during 1945 and 1946 was published in 1948. Statistics from this report are shown in tables 797-800. Other publications of the Forest Service include data on stumpage and log prices, lumber consumption and distribution, lumber used in manufacture, and fire statistics. The *Statistical Supplement to the Annual Report of the Chief of the Forest Service* carries statistics of the administration of the national forests.

The Bureau of the Census, Department of Commerce, publishes information on forest industries and products in reports of the Census of Manufactures, in addition to current *Facts for Industry* reports. The Bureau of the Census also publishes statistics of foreign trade in forest products. Information on the domestic movement of forest products is reported by the Interstate Commerce Commission and the Association of American Railways.

The Bureau of Agricultural Economics of the Department of Agriculture publishes annual reports on the production of turpentine and rosin.

The Bureau of Labor Statistics of the Department of Labor publishes statistics of wholesale lumber prices monthly and annually.

A number of forest products trade associations and trade journals collect and publish statistics of forest products, production, markets, shipments, inventories, etc.

The completeness and reliability of published statistics of forests and forest products vary considerably. The data for forest land area and stand are, of course, much more reliable for areas which have been surveyed than for those areas which have not been covered. Forest fire statistics for federal lands are considered much better than for private lands, though too much reliance should not be placed in any estimates of fire damage or causes of fires.

In the field of forest products, data for lumber production and other manufactured products such as veneer and plywood, pulp and paper, cooperage, naval stores, etc., are much more complete than for the primary forest products such as poles and piling, fuelwood, and fence posts. The data for lumber production are subject to certain limitations because of incomplete coverage. Information for pulp and paper, and plywood, on the other hand, is believed to have practically complete coverage. Statistics relating to average value of lumber sawed may be subject to some special limitations due to under representation of small mills.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series F 145-150") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

¹ In continental U. S.; includes National Forests, Interior, Soil Conservation Service, TVA, Public Domain, etc.

² In continental U. S. and Hawaii. Data reported to Forest Service by its field offices, cooperating agencies, other Government bureaus, and similar sources. Statistics on unprotected areas based on State estimates only.

³ Prior to 1939 forest area included total area needing protection. Beginning with 1939, this area included only forest area needing protection, which accounts for reduction in areas between 1938 and 1939.

No. 811.—LUMBER PRODUCTION, BY KIND OF WOOD, AND AVERAGE MILL VALUE: 1869 TO 1950

[Data not strictly comparable because of incomplete coverage of numerous small mills in the East prior to 1942 and exclusion of mills cutting less than 50 M ft. b. m. for all years prior to 1942 except 1869-1909, and 1919. Exclusion of under 50 M class of mills would affect totals less than 1 percent as reflected by 1942 survey. Data for 1943-46 and for 1949-50 include estimates based on sample surveys. Small production quantities are subject to large sampling errors. See also *Historical Statistics*, series F 109-111 and F 120-122 for similar but not identical figures from Dept. of Agri. Forest Service]

¹Includes 165,305,000 board feet of softwood lumber and 7,605,000 board feet of hardwood lumber sawed by New England mills from timber salvaged from the hurricane of 1938.

²Not available separately.

³California only; for 1909 and 1919 Nevada included with "All other."

⁴Includes Nevada.

No. 814.—LATH AND SHINGLES—PRODUCTION: 1899 TO 1951

[Lath in thousands and shingles in squares. Shingles reported in thousands prior to 1933 and converted to squares on basis of 800 shingles to square. See headnote, table 811 for explanation of lack of comparability of statistics. Data for shingles reasonably comparable over a period of years, because of complete enumeration of Red Cedar Shingle Industry, this industry's production comprising over 90 percent of total shingle production]

YEAR	Lath	Shingles	YEAR	Lath	Shingles
1899	2,523,998	15,127,521	1942	306,959	¹ 5,266,673

¹ Figures for turpentine and rosin from crude gum, beginning 1929-30, and from wood beginning 1933-34, relate to crop year ended Mar. 31. All other figures relate to calendar years.

² Figures compiled from data reported by establishments in turpentine and rosin industry.

³ Figures compiled from data reported by establishments in Wood-Distillation industry.

⁴ Not reported.

⁵ Includes, for 1909 and 1914, 366 barrels and 1,848 barrels respectively, of turpentine and, for 1914, 3,596 drums of rosin, reported by establishments engaged in manufacture of lumber and timber products.

⁶ Estimated by J. E. Lockwood; complete data not available. Figures include estimates of rosin produced from reclaimed gum, as follows: 1932-33, 26,720 drums; 1933-34, 28,048; 1934-35, 27,200.

⁷ Includes estimates by J. E. Lockwood for production of turpentine from steam-distilled wood.

⁸ Includes data for rosin produced from reclaimed gum: For 1935-36, 43,350 drums; 1936-37, 34,155; 1937-38, 21,017; 1938-39, 31,983; 1939-40, 31,414; 1940-41, 20,181; 1941-42, 19,765; 1942-43, 11,207; 1943-44, 9,824; 1944-45, 8,066; 1945-46, 8,538; 1946-47, 8,449; 1947-48, 4,345; 1948-49, 4,230; 1949-50, 2,230; 1950-51, 560.

⁹ Figures do not include data for rosin produced from reclaimed gum. See note 8.

27. Fisheries

(Sent to print May 7, 1952)

The Fish and Wildlife Service, Branch of Commercial Fisheries, in the Department of the Interior, conducts annual surveys for various statistical information on the fishery industries. These data are published in greater detail in publications of the Service and include data on the volume of the catch of individual species of fish and shellfish and their value, employment in the fisheries, quantity of gear operated, the number of fishing and transporting craft employed in the capture and transporting of fishery products, employment in wholesale and manufacturing establishments, and volume and value of the production of manufactured fishery products. In addition to the basic statistics on employment, yield, and the production of manufactured fishery products for individual States and various geographical sections, there are included in reports data on imports and exports of fishery commodities; landings by fishing craft at Boston, Gloucester, New Bedford, and on Cape Cod, Massachusetts; at Maine ports; and Seattle, Washington; shad fisheries of the Hudson and Potomac Rivers; alewife fishery in the Potomac; seed oyster fisheries; a review of the Pacific Coast halibut fishery; a statement on whaling operations by United States firms; data on the sponge fishery; and lists of firms producing various manufactured fishery products. These data are summarized in the *Statistical Abstract*. The more detailed information may be obtained from the Fish and Wildlife Service, Washington 25, D. C.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series F 166-192") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

No. 823.—FISHERIES—SUMMARY OF TOTAL CATCH AND VALUE: 1930 TO 1951

[Includes Alaska beginning with 1941, data partly estimated. See also *Historical Statistics*, series F 155]

No. 827.—FISHERIES—DISPOSITION OF DOMESTIC CATCH: 1945 TO 1951

[Includes Alaska. A large portion of waste derived from canning, filleting, and dressing fish and shellfish is utilized in production of fish meal and oil in addition to whole fish used in manufacture of these products. About 600,000,000 pounds of waste were used in production of meal and oil each year shown. See also *Historical Statistics*, series F 155-159]

28. Mining and Mineral Products

(Sent to print May 23, 1952)

This section summarizes the principal statistics relating to the mineral industries and mineral products. It includes not only crude minerals (such as coal, iron ore), but minerals which have gone through certain stages of preparation (such as refined copper, cement) and minerals such as magnesium whose extraction does not involve mining in the conventional sense. The latter two categories, while part of the mineral-raw-material sector of the economy, include the products of industries which are classified under the Standard Industrial Classification (Bureau of the Budget) as manufacturing. Statistics relating to the manufacture of mineral products are also included in section 30, Manufactures. Additional information relating to the mineral industries and mineral products appear also in other sections of this *Abstract*, such as the sections on labor force, prices, foreign commerce, and others.

The tables in this section are arranged in 4 groups which appear in the following sequence:

1. General summary statistics.
2. Fuels.
3. Nonmetals other than fuels.
4. Metals.

Most of the statistics are from the Bureau of Mines and the Bureau of the Census, with additional material from other Government agencies such as the Bureau of Labor Statistics, Bureau of the Mint, and the Interstate Commerce Commission and from non-Government sources such as the *Engineering and Mining Journal*, and *Metal Statistics*.

Mineral statistics, with principal emphasis on commodity detail, have been collected annually or at more frequent intervals by the United States Geological Survey or by the Bureau of Mines since 1880. The principal statistics have been published annually through 1931 in *Mineral Resources of the United States* and thereafter in the *Minerals Yearbook*. Data available from Bureau of Mines publications include quantities and values of minerals produced, sold or used by producers, or shipped; quantities of minerals stocked; crude materials treated and prepared minerals recovered; and consumption of mineral raw materials. The Bureau of Mines also collects and publishes separate data on employment and accidents.

Censuses of mineral industries have been taken approximately every 10 years since 1840. The most recent Census taken, however, is for 1939. The statistics are collected and published in the Census volumes in such a manner as to relate the statistics on the production of the various minerals as nearly as possible to data on employment, principal expenses, fuels and power consumed, and other information available only for each establishment as a whole. Each establishment is classified according to its most valuable product. The data are also collected and compiled in a manner to permit integration with other Census statistics such as for manufactures and wholesale and retail trade. Commodity statistics on many of the manufactured mineral products are also collected by the Bureau of the Census at monthly, quarterly, or annual intervals.

FIG. XXVII.—VALUE OF MINERAL PRODUCTION: 1935 TO 1950

[This is a rate-of-change chart. The relation between plotting points represents percentage change or relative change in values rather than differences in amounts. The scale focuses attention on rate of increase and decrease. See table 835]

Source: Department of the Interior, Bureau of Mines.

To avoid misinterpretation, it should be noted that the Census of Mineral Industries statistics in table 844 relate to operations primarily engaged in extracting minerals and in such primary mineral-preparation activities (crushing, screening, washing, flotation, etc.) as are needed to render the minerals marketable. Many of the statistics collected by the Bureau of Mines represent products of operations beyond the limits covered by the Census of Mineral Industries. Value totals based on Bureau of Mines publications, as shown in tables 835 and 836, are not wholly comparable with the Census value totals, as shown in table 844. Census values represent crude or prepared minerals f. o. b. the mine, well, or mineral-preparation plant. Bureau of Mines values for most nonferrous metals are based on the recovered value of contained metal rather than the value of the ores and concentrates as such and for certain nonmetals, such as cement, are based on the form in which the mineral is first generally marketed (even if a manufactured form) rather than on the imputed value of the mineral as first extracted.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series G 1-5") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

NO. 835.—VALUE OF MINERAL PRODUCTION IN THE UNITED STATES: 1881 TO 1950.

[All figures in millions of dollars. Principal differences between old basis and new basis are as follows: (1) Totals on the new basis represent continental U. S. only; on the old basis, production in Alaska, Hawaii, Philippine Islands (through 1945) and Puerto Rico was included, but no data were collected for other U. S. possessions now shown in table 837; (2) U. S. totals on the new basis are a better representation than formerly of the production of primary minerals from domestic mines (or concentrating mills); on the old basis, totals include secondary products and mineral products made from foreign materials. However, value on new basis still includes some advanced products, like cement, lime, and natural gas liquids; also, mine value of nonferrous metals is based not on ore, but on value after refining of the recoverable metal content. Revised data for years prior to 1947 on new basis are not yet available for publication. However, preliminary data for 1935-46 on the new basis have been incorporated into the chart on p. 686. See also *Historical Statistics*, series G 1-5]

No. 836.—MINERAL PRODUCTION IN CONTINENTAL UNITED STATES: 1947 to 1950

[Data represent production as measured by mine shipments or mine sales (including consumption by producers), except that fuels and the following additional minerals are strictly production: Gypsum, iodine, magnesite, pyrites, antimony, bauxite, and mercury. Excludes uranium ores and monazite. See headnote to table 835. See also *Historical Statistics*, series G 1-5, 13-18, and 43-130]

		3,576		10,466		6,671		10,217

¹ Includes small quantity of anthracite mined in States other than Pennsylvania.

² Excludes sharpening stones, included with "Other nonmetallic minerals."

³ Weight not recorded.

⁴ Excludes clays sold or used for cement as follows: 1947, 5,335,000 short tons, \$2,987,000; 1948, 6,362,000 tons, \$4,320,000; 1949, 6,676,000 tons, \$4,573,000; 1950, 7,080,000 tons, \$5,574,000.

⁵ Value included with "Other nonmetallic minerals."

⁶ Excludes production from Wyoming, value for which is included with "Other non-metallic minerals."

⁷ Excludes abrasive stone, bituminous limestone, bituminous sandstone, and ground soapstone, all included elsewhere in table. Also excludes limestone for cement and lime.

⁸ Comprises andalusite (1947-49), apatite, brucite, diatomite, dumortierite (1949), epsom salts from serpentine (1947) and esomite (1949-50), iodine, quartz crystal (1950), sharpening stones, sodium carbonate (Wyoming 1948-49), and minerals indicated by footnote 5.

⁹ Value included with "Other metals."

¹⁰ Less than 0.5 ton.

¹¹ Comprises magnesium chloride for magnesium metal, zirconium concentrates, and minerals indicated by footnote 9.

No. 838.—MINERAL PRODUCTION—VALUE, BY STATES AND FOR ALASKA: 1944 TO 1950

[For 1944-46, sum of State totals in table below does not agree with total for United States given in table 835 chiefly because (1) figures for certain products included in United States total are not available by States of origin; (2) use of iron ore values in State totals and pig iron values in United States total; (3) use of mine figures for gold, silver, copper, lead, and zinc in State totals and mint and smelter figures in United States total; (4) inclusion of estimates in United States total for a few products for which no canvass has been conducted for many years and for which no estimate by States is made; and (5) use of natural gas values at wells in State totals and values at point of consumption in United States total. For 1947-50, data on new basis; see headnote, table 835]

[In thousands of dollars]

No. 839.—MINERAL POSITION OF THE UNITED STATES—ESTIMATED COMMERCIAL RESERVES, 1944, AND RELATIVE SELF-SUFFICIENCY, 1935 TO 1949

[There is no standardized concept of reserves. For an explanation and discussion of the reserves estimates shown here, see source. Commercial reserves are broadly defined here as material available under the economic and technologic conditions prevailing in 1944. The term, commercial, has been used broadly and should not be interpreted as implying that the reserve is commercially available in the usual sense. Reserves estimates are restricted to deposits in known mineralized areas as appraised on the basis of current information.]

MINERAL	RATIO OF 1944 RESERVES TO ANNUAL DOMESTIC PRODUCTION AND CONSUMPTION ¹		SELF-SUFFICIENCY: RATIO OF DOMESTIC PRODUCTION TO DOMESTIC CONSUMPTION ² (PERCENT)

¹ Based on 1935-44 averages. Figures indicate only order of magnitude of estimated reserves. They do not imply that production at rates indicated could be maintained for the full period shown. Estimates do not include allowance for future discoveries.

² It should be noted that United States imports certain minerals of which it has over 100 percent self-sufficiency. This is due to economic and geographic reasons which are given in detail in the U. S. Bureau of Mines, *Minerals Yearbook*, 1941-45.

³ Obtained chiefly as byproducts. Output dependent on rate of production of associated metals.

⁴ Reserves of these minerals negligible; quantitative comparisons are not significant.

⁵ Less than 0.5 percent.

⁶ Not available.

⁷ Unlimited.

⁸ "Proved" reserves only; do not include indicated or inferred reserves.

¹ Posted price, Mid-Continent Oklahoma-Kansas, 36°-36.9° gravity (1923, 35°-36.9°; 1924-25, 36°-38.9°).² Run of mine, average wholesale price.³ Lake Superior, Mesabi, non-Bessemer.⁴ 99 percent tin, 1896-1919; Straits tin thereafter.⁵ Prices 1896 to 1929 for pure aluminum (No. 1 virgin 98-99 percent); beginning 1930, for 99 percent+ virgin ingot.⁶ Prices 1896 to 1898 are for Lake copper.⁷ Data are for New York zinc.⁸ Average, 1903-05; average for New York zinc 1901-05, 5.058 cents.⁹ Average for 4 years.¹⁰ Average, 1923-25.¹¹ Not yet available.Source: Compiled from *Engineering and Mining Journal*; *Metal Statistics*; *Petroleum Data Book*; *Wholesale Prices* (Bureau of Labor Statistics); and *Mineral Yearbook* (Bureau of Mines).

No. 844.—MINERAL INDUSTRIES—SUMMARY FOR THE UNITED STATES: 1919, 1929, AND 1939

[Statistics cover producing operations only. In general, those for 1939 cover only those operations (or concerns producing crude petroleum, natural gas, and natural gasoline, and rendering oil- and gas-field services) for which total value of all products, reported principal expenses, cost of buildings, machinery, and equipment during year, or cost of drilling and equipping wells during year amounted to \$2,500 or more. For bituminous coal and lignite an output criterion of 1,000 tons of coal was substituted for value of all products. Statistics for common sand and gravel industry exclude data for operations that produce less than 15,000 tons of sand and gravel unless reported principal expenses or cost of buildings, machinery, and equipment during year amounted to \$15,000 or more. Statistics for 1929 cover, in general, only those "enterprises" for which total value of all products or cost of development work amounted to \$2,500 or more. Bituminous coal and lignite mines that produced less than 1,000 tons of coal and common sand and gravel operations that produced less than 25,000 tons of sand and gravel, were excluded. Statistics for 1919 exclude data for "enterprises" for which value of all products was less than \$500 or cost of development work was less than \$5,000. Noncommercial production of stone and sand and gravel obtained from mines or quarries operated by governmental agencies, public utilities, or by construction companies or contractors producing wholly for their own use or on contract for governmental agencies is excluded for all years. For summary data from 1939 Census of Mineral Industries by type of mineral industry, see 1949 *Statistical Abstract*, table 854]

ITEM	1939 (all industries)	COMPARATIVE STATISTICS FOR 1939 AND 1929		COMPARATIVE STATISTICS FOR 1939 AND 1919	
		1939 ¹	1929	1939 ²	1919
Number of mines and quarries.....	13,395	12,736	11,602	10,888	13,844

¹ Excludes statistics for common clay and shale, crude petroleum and natural gas, greensand, natural gasoline, peat, potash, and rock salt industries, for comparability with 1929.

² Excludes common clay and shale, common sand and gravel, glass-sand, foundry-sand, natural sodium compounds, peat, potash, and rock salt industries, and limestone mines and quarries operated in conjunction with cement and lime plants for comparability with 1919.

³ Includes value of crude minerals produced, value added during year by preparation processes, receipts for services performed for other concerns, and value of electric energy generated and sold.

⁴ Represents statistics for skilled and unskilled employees who perform manual labor, use tools, operate machines, handle materials, and care for property. Average numbers of wage earners were derived by adding numbers reported for each month and dividing sums by 12.

⁵ Represents statistics for salaried employees at operations and at central and branch offices, including officers of corporations, managers, superintendents, and other supervisory personnel, responsible professional and technical employees, and clerical employees. Number of salaried employees represents number receiving pay on a representative or normal day or pay-roll period—for 1939, during normal pay-roll period ending nearest Oct. 14; for 1929, on Dec. 14 or on nearest representative day; for 1919, on Dec. 15 or on nearest representative day. Salaries represent total amount paid to salaried employees during calendar year.

⁶ Represents statistics for proprietors and firm members at operations and at central and branch offices.

⁷ Census statistics not available.

⁸ For 1939 includes installation costs, which are excluded for 1929.

⁹ Statistics for 1939 and 1929 refer to equipment in use or available for use at end of year.

¹⁰ Includes equipment, with rating of 8,865 horsepower, operated by purchased power other than electric energy.

¹ Data relate to mines having output of 1,000 tons a year or more, including lignite and small output of anthracite produced outside Pennsylvania. Includes Alaska. ² Average number of men working daily.³ Capacity of active mines with existing labor force, derived on basis of average output per day.⁴ Not available.⁵ Beginning 1945, production data include some bootleg coal purchased by anthracite industry for preparation and shipment to market. Data on employment, however, exclude such purchased coal as complete employment data on "bootleg" holes are not available. ⁶ Less than 500 tons. ⁷ For 1911.Source: Department of Interior, Bureau of Mines; *Minerals Yearbook* and annual bulletins.

¹ Federal Power Commission. Represents consumption by public-utility power plants in power generation, including a small quantity of coke amounting to approximately 100,000 tons annually.² U. S. Bureau of Census.³ Association of American Railroads. Represents consumption by class I railways for all uses, including locomotive, powerhouse, shop, and station fuel. The I. C. C. reports that in 1950 consumption for all uses by class I line-haul railways, plus purchases for class II and class III railways, plus purchases by all switching terminal companies combined, was 64,009,869 tons of bituminous coal and lignite.⁴ Includes small amount of anthracite.⁵ Estimates based upon reports collected from a selected list of representative manufacturing plants and retailers.⁶ Included in "Other industrials."Source: Department of the Interior, Bureau of Mines; *Minerals Yearbook*.

¹ Formerly designated "strikes and lockouts."

² Wages and hours were important issues also in some of these disputes. This is especially true in recent years.

³ Includes some duplication (where same workers were involved in more than 1 stoppage). This is particularly significant in 1949, since over 60,000 anthracite miners and over 300,000 bituminous coal miners were involved in 3 separate stoppages during year.

No. 856.—NATURAL GAS AND NATURAL GASOLINE—PRODUCTION, BY STATES

[Gas in millions of cubic feet; gasoline in thousands of barrels of 42 gallons. Production figures for gas (except as noted) refer only to that used by the ultimate consumer, in addition to which considerable quantities are used by producers, and large quantities are wasted or lost. Consumption figures by States differ greatly from production figures by reason of interstate transportation]

¹ As billed by the shipper.

² Not available.

³ Figures for residual oils are included with figures for distillate oils.

⁴ Represents residual fuel oils except gas oils and diesel oils.

⁵ Lubricating-oil base stocks are probably included with lubricating oils.

⁶ Includes propane, butane, propane-butane mixtures, pentane, and other liquefied refinery gases. Receipts exclude liquefied petroleum gases from natural-gasoline plants.

⁷ Other finished products include still gas, residuum or tar, acid oil, and other refinery products.

¹ Excludes bonus payments of Office of Metal Reserve.

² Data are for "general imports," i. e., include copper imported for immediate consumption plus material entering country under bond. Comprises copper in ingots, plates, and bars, ores and concentrates, regulus, blister and scrap.

³ Not separately recorded.

⁴ Total exports of copper, exclusive of ore, concentrate, composition metal, and unrefined copper. Exclusive also of "other manufactures of copper," for which quantity figures are not recorded.

⁵ Includes unrefined copper.

⁶ Includes small exports of unrefined black blister and converter copper (bars, pigs, etc.)

⁷ Excludes rods.

⁸ Apparent consumption; consumers' inventories not taken into account.

⁹ New copper and old scrap only.

¹ Excludes lead content of antimonial lead.

² Includes lead imported for immediate consumption plus material entering country for storage under bond.

³ Pigs, bars and anodes. In addition, 17,363 tons of foreign refined lead were re-exported in 1920, 25,324 tons in 1940, 377 tons in 1945, none in 1948, 86 tons in 1949, and 53 tons in 1950.

⁴ Not available.

⁵ Represents pigs, bars, and old.

⁶ Source: American Bureau of Metal Statistics.

⁷ Official maximum price fixed by British Ministry of Supply at £25 per long ton. London Metal Exchange dealings suspended for duration of war.

29. Construction and Housing

(Sent to print May 23, 1952)

Construction.—Monthly estimates of the value of work put in place are probably the most widely used of the current Federal statistics on construction. These estimates are prepared jointly by the Department of Commerce and the Bureau of Labor Statistics.

Estimates of privately financed nonresidential construction are primarily the responsibility of the Department of Commerce. Construction estimates for buildings such as stores, warehouses, and factories are based on F. W. Dodge Corporation reports of construction contracts awarded, supplemented by building permit data for States which the Dodge Corp. does not cover. Public utility construction estimates are derived from data reported by the Interstate Commerce Commission and other Federal regulatory agencies, and by private associations such as the American Gas Association and the American Transit Association.

Estimates of publicly financed construction of all types and housing construction activity are primarily the responsibilities of the Bureau of Labor Statistics. A considerable number of Federal agencies administer construction programs or award contracts for construction; some of them engage in construction themselves. In this field, construction activity data are derived by the Bureau of Labor Statistics from the reports of the respective Federal agencies; data on State and local governmental construction activity are derived from F. W. Dodge Corporation and Engineering News Record reports. Estimates of residential construction activity, including number of housing units started, average construction costs, and number of units per structure, are based primarily upon reports of building permits granted which are received from nearly 6,000 permit-granting authorities. Field surveys on a sample basis are used to obtain data on construction activity in nonpermit areas. Statistics on housing starts in certain metropolitan areas are available from the Bureau of Labor Statistics for 1946 through the first quarter of 1951. The current program of the Bureau of Labor Statistics provides monthly estimates of the number of housing starts in the nation as a whole, but the series on the local area data have been discontinued.

The Bureau of the Census has taken a Census of Construction for 1929, 1935, and 1939. The last census covered all persons or establishments whose principal business in 1939 was utilizing construction materials and labor in construction work for others, or for themselves for speculative and investment purposes on projects located within the limits of continental United States. Because the Census excluded force account work, its coverage was substantially less than current estimates of value of work put in place.

Housing.—The first national Census of Housing was taken in 1940 by the Bureau of the Census as part of the Sixteenth Decennial Census. Housing data, roughly comparable to those collected in the 1940 Census of Housing, were collected on a sample basis in April 1947 by the Bureau of the Census in its current population survey. The 1950 Census of Housing, which was part of the Seventeenth Decennial Census, was the second national census to provide data on housing characteristics. A sample of dwelling units enumerated in the 1950 Census of Housing was used as the basis for preliminary reports on housing. For evaluation of sampling variability, see original releases indicated in source notes. (See tables 906-913.)

For some of the 1950 items, comparability with previous censuses was affected by changes in definitions and procedures. Some of these changes are briefly explained below. For a fuller explanation see Department of Commerce, Bureau of Census, Preliminary Reports, 1950 Census of Housing, *Housing Characteristics of the United States: April 1950*, Series HC-5, No. 1; *Year Built, Household Equipment, and Cooking and Heating Fuel, for Dwelling Units in the United States: April 1950*, Series HC-5, No. 2; and *Housing Characteristics, by Regions: April 1950*, Series HC-5, No. 3.

Urban and rural areas.—According to the new definition adopted for the 1950 Census, urban housing comprises all dwelling units in (a) places of 2,500 inhabitants or more incorporated as cities, boroughs, and villages, (b) incorporated towns of 2,500 inhabitants or more except in New England, New York, and Wisconsin, where "towns" are simply minor civil divisions of counties, (c) the densely settled urban fringe around cities of 50,000 or more, including both incorporated and unincorporated areas, and (d) unincorporated places of 2,500 inhabitants or more outside any urban fringe. The remaining dwelling units are classified as rural. According to the 1940 definition, urban housing was limited to all dwelling units in incorporated places of 2,500 inhabitants or more and in a relatively few areas (usually minor civil divisions) classified as urban under special rules relating to population size and density. For additional explanation, see page 2.

Farm and nonfarm residence.—In the 1950 Census, but not in the 1940 Census, the enumerators in rural areas were specifically instructed to base the farm-nonfarm classification of a dwelling unit on the respondent's answer to the question, "Is this house on a farm?"

Dwelling units located on farmland for which a cash rent was paid for house and yard only, and dwelling units on institutional grounds and in summer camps and tourist courts, were classified as nonfarm, regardless of the answer to this question. Because of changes in procedures, the count of farm units in 1950 is not strictly comparable with the figures for 1940. Urban-farm dwelling units are dwelling units on farms within the boundaries of urban areas.

In rural areas, dwelling units are classified as rural-farm units, which comprise all dwelling units on farms, and rural-nonfarm units, which are the remaining rural units. In most areas virtually all farm housing is in rural areas. Therefore, housing characteristics are shown in this volume for rural farm dwelling units instead of for all farm units.

Dwelling unit.—The number of dwelling units, as shown for 1950 may be regarded as comparable with the number of dwelling units shown for earlier years. The instructions used for identifying a dwelling unit in the 1950 Census were more explicit than those used earlier. As a result, some living quarters may have been classified as separate dwelling units in one census and not in the other. However, the net effect of the change in the instructions is probably small.

Vacant dwelling unit.—The enumeration of vacant units in the 1950 Census of Housing was not entirely comparable with the procedure used in the 1940 Census. In 1950, vacant units were enumerated if they were intended for occupancy as living quarters regardless of their condition.

In 1940, vacant units were enumerated if they were habitable; vacant units which were uninhabitable and beyond repair were omitted from the enumeration. Vacant units for sale and vacant units for rent were enumerated as one combined category, and included all habitable vacant units which were available for occupancy even though not actually being offered for rent or sale at the time of enumeration.

Housing finance.—Data on home mortgages and foreclosures are provided by the Home Loan Bank Board. The Federal Housing Administration compiles data on its real estate financial operations, such as volume of mortgages insured, type of lending institution, etc.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series H 1-26") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

FIG. XXVIII.—NEW CONSTRUCTION ACTIVITY: 1915 to 1951

[See table 891]

Source: Department of Commerce, Bureau of the Census. Data are from National Production Authority.

No. 891.—CONSTRUCTION IN THE UNITED STATES—ESTIMATED EXPENDITURES FOR PRIVATE AND PUBLIC CONSTRUCTION: 1915 TO 1951

[In millions of dollars. Represents value of work put-in-place during year; consequently differs from building permit and construction contract data which measure value of work started. In addition, coverage generally broader than permit and contract data. Includes value and cost of installation of equipment which is integral part of structure, but not that of machinery, shipbuilding, or land costs. For single years, 1915-1938, see 1951 Abstract, table 847. See also *Historical Statistics*, series H 1-26]

No. 893.—NEW PERMANENT DWELLING UNITS STARTED IN NONFARM AREAS, BY TYPE: 1920 TO 1951

[Figures are estimates covering construction of all new permanent family dwelling units in nonfarm area of United States, based upon building-permit reports, and from 1946, on building-permit information, supplemented by data from field surveys in non-permit-issuing places. This area consists of all urban and rural nonfarm places. Urban designation is applied to all incorporated places with a population of 2,500 or more in 1940, and, by special rule, to a small number of unincorporated civil divisions. Rural nonfarm construction includes all construction for nonagricultural use in unincorporated areas and incorporated places of less than 2,500 population. See also *Historical Statistics*, series H 40-45; data for 1941-1945 in historical volume include temporary units]

No. 896.—CONSTRUCTION CONTRACTS AWARDED IN 37 STATES—VALUE OF CONSTRUCTION AND FLOOR SPACE OF BUILDINGS, BY CLASS OF CONSTRUCTION: 1925 TO 1951

[Public works and public utilities cover some projects not measurable in terms of floor space, such as highways, pipe lines, subways, etc. Statistics for the 37 States were not compiled for years prior to 1925, but available figures covering a varying number of States for earlier years have been published in the 1932 and previous issues of the *Statistical Abstract*. Figures for individual States and districts in table 897 represent value of construction contracts awarded in States and districts where work was actually done. See also *Historical Statistics*, series H 51-57]

[Values in millions of dollars; floor space in thousands of square feet]

YEAR	Total	Residential	Commercial ¹	Manufacturing buildings ²	Public works	Public utilities ^{1,2}	Educational	Hospital and institutional	Public buildings	Religious	Social and recreational	Miscellaneous non-residential

No. 898.—CONSTRUCTION CONTRACTS AWARDED—INDEXES OF VALUE: 1920 TO 1951

[1947-49=100. Indexes are derived from monthly figures of construction contracts awarded reported by F. W. Dodge Corporation. Reports covered 37 States beginning with May 1924 and a varying number for earlier years. In order to obtain comparable figures from 1919 to date, total value of construction contracts awarded in 37 States was estimated for January 1919 through April 1924. Seasonal adjustments computed separately for "residential" and "all other" types of construction and the two series combined. Indexes based on a 3-month moving average, centered at middle month. More detailed description of indexes obtainable from the Division of Research and Statistics, Board of Governors of the Federal Reserve System]

No. 899.—ENGINEERING CONSTRUCTION CONTRACTS AWARDED AND BACKLOG OF PROPOSED CONSTRUCTION—VOLUME, BY TYPE: 1930 TO 1951

[In millions of dollars. Covers continental U. S. construction projects of following minimum costs through 1945 (except for 1932-35): Waterworks, excavation, drainage, and irrigation, \$15,000; other public works, \$25,000; industrial buildings, \$40,000; other buildings, \$150,000. For 1946-47, these minimums were raised to \$22,500, \$40,000, \$55,000, and \$205,000, respectively, to account for rise in construction costs. For 1948-50, minimums used were: \$28,000, \$50,000, \$68,000, and \$250,000. For 1951, minimums used were: \$34,000, \$60,000, \$82,000, and \$300,000. For 1932-35, minimums used were: \$10,500, \$17,500, \$28,000, and \$105,000]

¹ American Appraisal Co. Average for 30 cities of 4 types of buildings: Wood frame, brick-wood frame, brick-steel frame, reinforced concrete. Mechanicals not included. Based on actual appraisal costs. Available for individual cities.

² Associated General Contractors of America. Wages and materials for 12 cities combined in 40-60 ratio. Wages, prevailing rates for hod carriers and common labor. Materials, weighted: Sand, gravel and crushed stone, 1; cement, 1; lumber, 1; hollow tile, $\frac{1}{2}$; structural and reinforcing steel, $\frac{1}{4}$.

³ Engineering News Record construction cost index has 4 components: (1) Structural steel shapes, base price; (2) cement, which is 20-cities average but prior to July, 1948, was Chicago price only; (3) lumber, which until 1935 was 12 x 12 long leaf yellow pine wholesale at New York, and since 1935 is 2 x 4 S&S pine and fir in carload lots, ENR 20-cities average; (4) common labor, ENR 20-cities average of wage rates in force, ENR Building Cost index provides a more representative measure of building cost movement, the skilled labor trend having been substituted for the common labor trend in the ENR Construction Cost index, and the ENR Building Cost index computed.

⁴ E. H. Boeckh & Assoc., Inc. Individual series for 10 types of buildings for 20 areas. Weights based on studies of actual building costs—vary with different type of structures. Material prices are those paid by contractors to material dealers. Prevailing skilled and common wage rates from contractors. Base: United States average, 1926-29=100. Series given here is commercial and factory buildings, U. S. average converted to 1913=100 base.

⁵ Aberthaw. Until Mar. 31, 1946, New England, 7-story and basement (62' 4" x 202' 4"), reinforced concrete building built in 1914, repriced quarterly as a construction bid to duplicate original building; labor costs based on current experience with similar construction. Since Mar. 31, 1946, New England, composite of 36 major cost items in 3 multi-story and 2 one-story industrial buildings, including all mechanical trades, repriced using actual and estimated labor and material costs.

⁶ George A. Fuller Company. Composite of 36 major cost elements, in 3 commercial type buildings, including mechanicals, elevators, wiring, heating and ventilating, repriced.

⁷ Turner Construction Co. Eastern Cities. Own building cost experience applied to these factors: Labor rates, material prices, productivity of labor, efficiency of plant and management, competitive conditions.

⁸ Marshall and Stevens. Averages for 4 types of building: Fireproof protected steel, fireproof reinforced concrete, masonry, and frame. Designed to reflect normal costs in line with recognized or published prices of building materials, equipment, and labor. Base: U. S. average, 1926=100, converted to 1913=100 base.

⁹ Smith, Hinchman, and Grylls, Inc. Actual in-place costs, using building material costs, freight rates, skilled and unskilled labor rates and including labor efficiency and premiums, bidding competition, contractor profit margins and overhead. Figured with the contractor overhead are taxes, duration of projects, material expediting and labor procurement. This index is reported monthly on a 1926=100 base, converted to 1913=100 base.

No. 912.—DWELLING UNITS, URBAN AND RURAL NONFARM, CONTRACT AND GROSS MONTHLY RENT OF RENTER-OCCUPIED UNITS: 1950 AND 1940

[In thousands of dwelling units. Based on preliminary sample data; see source for evaluation of sampling variability. Contract monthly rent is rent contracted for regardless of whether it includes furniture, heating fuel, electricity, cooking fuel, water, or other services. Gross monthly rent is contract monthly rent plus reported average monthly cost paid by renters for water, electricity, gas, and other fuel. If furniture is included in contract rent, reported estimated rent of dwelling unit without furniture is used in computation instead of contract rent]

30. Manufactures

(Sent to print May 23, 1952)

Census of Manufactures.—The basic source of comprehensive data on manufacturing production is the Census of Manufactures conducted by the Bureau of the Census. The first Census of Manufactures covered the year 1809 and a census was taken at 10-year intervals in connection with the Decennial Census of Population up to and including 1899, with the exception of 1829. It was conducted at 5-year intervals from 1904 through 1919, and every other year from 1921 through 1939, but was suspended during the war period. The 1947 Census of Manufactures was the first to be taken since 1939. Present legislation provides for a Census of Manufactures to cover the year 1953 and every fifth year thereafter.

The 1947 Census of Manufactures covered all establishments primarily engaged in manufacturing, as defined in the 1945 revision of the Standard Industrial Classification sponsored by the Bureau of the Budget. This Census, as well as the Annual Survey of Manufactures, which is described below, covers operating manufacturing establishments only, omitting separate administrative offices and auxiliary units of operating establishments. Operating establishments, however, account for approximately 98 percent of total manufacturing employment. To the extent possible, this Census was conducted on an establishment basis. As a rule, the term "establishment" signifies a single plant or factory and is not necessarily identical with the business unit or company which may consist of one or more establishments. A company operating establishments at more than one location is required to submit a report for each location; also, companies engaged in distinctly different lines of activity at one location are required to submit separate reports if separate pay roll and inventory records are kept for each activity. Census figures differ, therefore, from those prepared on a company basis. They also differ to some extent from other tabulations based on establishment reports, where the definition of an establishment as to location and line of activity is not so rigidly applied.

In the 1947 census, reports were required from all establishments employing one or more persons at any time during the census year. In other recent censuses, establishments having less than \$5,000 value of products were designated as out of the scope of the census. The change in the minimum size limit in 1947 as compared with 1939 has not appreciably affected the comparability of the figures for these two years, except for data on number of establishments for a few industries.

Each of the establishments covered in the census was classified in one of 458 manufacturing industries in accordance with the industry definitions embodied in the Standard Industrial Classification system. Under this system of classification, an industry is generally defined as a group of establishments producing a single product or a more or less closely related group of products. This product or group of products is in turn said to be "primary" to that industry. Accordingly, an establishment is classified in a particular industry if its production of the primary products of that industry exceeds in value its production of any other group of products. In a few instances, however, the industry classification of an establishment is determined not only by the products it makes but also by the processes employed in making those products.

While some establishments produce only the primary products of the industry in which they are classified, it rarely happens that all the establishments in an industry specialize to this extent. The statistics on employment, pay rolls, value added, inventories, and expenditures, therefore, reflect not only the primary activities of the establishments in that industry but also their activities of a secondary nature. For this reason the industry statistics usually cannot be directly related to statistics on the total shipments of commodities.

Comparative figures shown for 1939 are generally slightly lower than those published in the 1939 reports. The 1939 figures have been revised to exclude retail bakeries, machine-shop repairs, and some other types of establishments also omitted from the 1947 census. Cost of materials and value of products for 1947 were not compiled for summary tables because of the duplication which arises in the combination of individual industries representing successive stages in the production of finished manufactures.

The Bureau of the Census is prohibited by law from publishing any statistics that disclose information reported by individual companies. Figures are, therefore, not shown for an industry or a geographic unit which is represented by only one or two companies, or by more companies when one or two companies produce a very large proportion of the combined output of all the companies. This restriction has no effect upon statistics by industry for the entire United States, or statistics for all industries within States and standard metropolitan areas. There are many instances, however, where this restriction makes it necessary to withhold figures for counties and cities, and for industries within States and areas.

Annual Survey of Manufactures.—This survey, which was conducted for the first time in 1949 and was repeated in 1950, carries forward, for the intercensal years, the key measures of manufacturing activity covered in detail by the quinquennial Census of Manufactures. It is designed to yield estimates of general statistics (employment, pay rolls, value added by manufacture, inventories, and capital expenditures) for industry groups, important individual industries, geographic divisions, States, and important cross-tabulations of major industry groups by division and by State.

The annual survey is based on a sample of approximately 45,000 out of a total of almost 250,000 manufacturing establishments. Included are all large plants and a representative sample of the much more numerous small plants. The large plants in the survey account for approximately two-thirds of total manufacturing employment in the United States.

The annual survey estimates vary from the totals that would have been obtained from a comparable complete canvass of all manufacturing establishments. The relative magnitude of this sampling variation, expressed in percentage form, is given in the table column captioned "Standard error." The standard error should be interpreted to mean that the sample estimates will differ from complete canvass totals by *less than*: (a) the percentage shown in approximately 2 cases out of 3; (b) twice the percentage shown in approximately 19 cases out of 20; and (c) three times the percentage shown in almost every case. It should be noted that standard errors are shown only for selected items. The standard errors of other measures are shown in the source report cited.

In making any study of the historical trend of the 1947, 1949, and 1950 figures, it is important to take account of the effect of the sampling variation on the apparent increase or decrease shown between years. In addition to sampling errors, individual figures may be subject to biases arising from undetected response or procedural errors which are not reflected in the "standard errors." In general, 1949 and 1950 figures are withheld from publication in the original source volumes if (a) the standard error of the estimate exceeds 15 percent, or (b) survey estimates are inconsistent with other census series and related data. It must be noted that any estimate which can be derived by subtraction of one published figure from another may have a standard error considerably in excess of 15 percent.

The basic statistical measures of manufacturing activity, such as employment, pay rolls, value added, etc., were defined in essentially the same way for the annual surveys as for the quinquennial census. Consequently, historical series shown in the following tables may be considered to be comparable except as specifically noted. It should be pointed out that for 1949 and 1950 average employment was calculated from the figures

reported for the pay periods ending nearest the fifteenth of March, May, August, and November, whereas for 1947 such averages were based on twelve monthly employment figures.

Current and other statistics.—Monthly, quarterly, and annual commodity surveys are also conducted by the Bureau of the Census. These data are published currently in the *Facts for Industry* series. This series also includes releases of information collected by or for the War Production Board and successor agencies during the war and reconversion periods by the Census Bureau or other Federal agencies.

Reports on current activities of industries, or current movements of individual commodities, are also compiled by trade associations and trade journals, commercial agencies, and by such governmental bureaus as Labor Statistics, Agricultural Economics, Foreign and Domestic Commerce, Fish and Wildlife Service, Tariff Commission, and Internal Revenue, in addition to the Census Bureau previously mentioned.

Abbreviated balance sheet and income account data on all United States manufacturing corporations are compiled and published annually by the Bureau of Internal Revenue from corporation income and profits tax returns and holding company returns.

Data on financial operations and intercorporate relations of manufacturing corporations are collected from time to time by the Securities and Exchange Commission, the Tariff Commission, the Federal Trade Commission, and special investigating agencies. Financial statistics for certain manufacturing industries in the form of balance sheets, profit and loss statements, analyses of sales and expenses, lists of subsidiaries, types and amounts of security issues, and selected data on the salaries paid to officers and directors, are summarized and published for the leading corporations that are registered with the Securities and Exchange Commission. The Tariff Commission publishes commodity surveys which cover economic and competitive aspects of production, distribution, and international trade in selected important industries. Each survey deals with several products which are related because of the raw materials consumed, or competitive uses. The Federal Trade Commission has made several comprehensive studies of individual industries.

Material in other sections.—In addition to the statistics presented in this section, statistics on the output and activities of manufacturers will be found in various other sections of the *Statistical Abstract*. For example, data on wages and hours appear in section 8, Labor Force, Employment, and Earnings; statistics on manufacturing corporations compiled from corporation income tax returns appear in section 14, Federal Government Finances and Employment, and in section 17, Business Enterprise; and statistics on lumber production in section 26, Forests and Forest Products. For page references to the commodity or industry, consult the index. For references to the important sources of statistics on manufacturing and related activities, see the listings under the appropriate subjects in the "Bibliography of Sources of Statistical Data," page 1009.

Geographic coverage.—Statistics in this section relate to continental United States except as noted.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series J 1-12") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

No. 914.—MANUFACTURES—SUMMARY: 1849 TO 1950

[Figures for 1849 to 1919 include establishments whose products were valued at \$500 or more; for 1921 to 1939, establishments whose products were valued at \$5,000 or more; for 1947, figures cover all establishments employing 1 or more persons at any time during year. See also 1945 *Abstract and Historical Statistics*, series J 1-12, for unrevised data for 1939 and earlier years]

CENSUS YEAR	Number of establishments	Number of proprietors and firm members	ALL EMPLOYEES ¹		PRODUCTION WORKERS		Value added ³ (\$1,000)
			Number (average for year) ²	Salaries and wages (\$1,000)	Number (average for year)	Wages (\$1,000)

1947	240,881	188,948	14,294,304	39,689,527	11,916,188	30,242,343	74,425,825
1949 ⁴	(4)	(4)	13,566,847	41,480,916	11,016,301	30,253,971	75,366,527
1950 ⁵	247,307	(4)	14,369,747	46,599,011	11,706,056	34,565,698	89,675,779

¹ Beginning 1939 includes data for employees of manufacturing establishments engaged in distribution and construction work. Extent to which data for such employees were included in figures for earlier years is not known.

² Data for 1949-50 based on pay periods ending nearest 15th of Mar., May, Aug., and Nov. For 1947, data represent average of 12 monthly figures; for earlier years, sum of average number of production workers for year and number of nonproduction workers reported for 1 pay-roll period (usually in October).

³ Value of products less cost of materials, supplies, fuel, electricity, and contract work. For 1849-1933, cost of contract work was not subtracted from value of products in calculating value added by manufacture.

⁴ Not available. ⁵ Reduced to gold basis.

⁶ Excludes data for salaried officers of corporations and their salaries.

⁷ Revised on basis of retabulation of returns to exclude data for establishments classified as nonmanufacturing in 1947. Value added by manufacture on a basis comparable with 1937 and previous years, was \$24.7 billion.

⁸ Number of proprietors and firm members not revised. Figures for "All employees" revised on basis of estimates rather than by retabulation of 1939 reports. (See footnote 7.)

⁹ Estimates based on sample survey; see text, p. 745. For standard errors of estimates, see subsequent tables.

¹ See text, p. 745, for explanation of standard error. Standard errors for column A are approximately the same as corresponding standard errors for column B for "Number of establishments"; and are 3 percent or less for "All employees" and "Value added." Standard errors for column D are: From 5 to 8 percent for lumber and products, printing and publishing, leather and leather products, and miscellaneous manufactures; and from 1 to 4 percent for food and kindred products, apparel and related products, chemicals and allied products, and all industries total. Other estimates in columns D, E, and F, unless otherwise indicated, are based on reports from all establishments known to be in appropriate size classification.

² Standard error 1 percent.

³ Excludes employees separately reported at central administrative offices and auxiliary establishments. Including such employment, total manufacturing employment for United States in 1950 estimated at 14,683,000.

⁴ Withheld because estimate did not meet publication standards. See text, p. 745.

⁵ Data for any size class which cannot be shown without disclosing information for individual companies have been combined with figures for adjacent size class.

⁶ Data for logging industry and for sawmills producing less than 200,000 board feet of lumber are included in these estimates, but excluded from corresponding figures in table 919.

⁷ Standard error 3 percent for "Number of establishments," 3 percent for "All employees," and 2 percent for "Value added."

⁸ Standard error 10 percent for "Number of establishments," 8 percent for "All employees," and 7 percent for "Value added."

⁹ Standard error 1 percent.

¹ In 1947 Census of Manufactures, smaller establishments submitting "short" form reports were not requested to supply data on fuels and electric energy. Resulting understatement is negligible.

² Includes all purchased fuel used for power and heat, such as anthracite and bituminous coal, natural and manufactured gas, fuel oil, liquefied petroleum gas, gasoline, and wood.

³ Refers to total cost column. Standard errors for other columns are the same or one percent higher. See text, p. 745, for explanation of standard error.

¹ Value of products less cost of materials, supplies, fuel, electric energy, and contract work.

² Data for the logging industry and for sawmills producing less than 200,000 board feet of lumber are included in the estimates for 1949 and 1950, but are excluded from the figures for 1947.

³ See text, p. 745, for explanation of standard error. Refers to columns "All employees—Number (average for the year)"; standard errors of estimates for other columns usually of same magnitude.

¹ Value of products less cost of materials, supplies, fuel, electric energy, and contract work.

² See text, p. 745, for explanation of standard error. Refers to columns "All employees—Number (average for the year)"; standard errors of estimates for other columns usually of same magnitude. ³ Not available.

⁴ Withheld because estimate did not meet publication standards. See text, p. 745.

⁵ There is some undercoverage in 1949 sample, especially in logging industry. Total employment for establishments not sampled is estimated at less than 5 percent.

¹ Includes all full-time and part-time production and related workers, force-account construction workers, clerical and routine office workers, administrative, supervisory, sales, technical, and all other personnel on the pay rolls of manufacturing establishments. Excludes employees of central administrative offices operated by concerns having 2 or more manufacturing establishments. Wages and salaries represent the gross earnings of employees including commissions, dismissal pay, nonproduction bonuses, vacation and sick leave pay, and compensation in kind, and prior to such deductions as employees' social security contributions, withholding taxes, group insurance, union dues, and savings bonds.

² Value of products less cost of materials, supplies, fuel, electricity, and contract work.

³ There were no establishments classified in this industry in 1939.

Source: Department of Commerce, Bureau of the Census; 1947 Census of Manufactures reports.

**NO. 928.—MANUFACTURES—VALUE OF PRODUCTS SHIPPED AND COST OF MATERIALS,
BY INDUSTRY: 1947**

[In thousands of dollars. This table supplements table 927. Cost of materials and value of products were not compiled for industry groups because of the duplication which arises in the combination of individual industries representing successive stages in the production of finished manufactures. For this reason figures are given in this table only for those individual industries in which little or no duplication arises. Value added by manufacture figures shown in table 927 were usually calculated by subtracting cost of materials, etc., from value of products shipped. For a limited number of industries, however, information was requested on quantity of production, as well as on quantity and value of shipments of product items. For most of these industries, value added for the larger establishments (50 or more employees) was calculated by multiplying the quantity of each item produced by a unit value derived from the shipments data, adding these values to obtain a total value of production, and subtracting therefrom the cost of materials. Consequently, for such industries, value added by manufacture in table 927 does not equal the value of products shipped, less cost of materials, etc., as given in this table]

INDUSTRY	Value of products shipped	Cost of materials, fuel, electricity, and contract work	INDUSTRY	Value of products shipped	Cost of materials, fuel, electricity, and contract work
Meat products:			Woolen and worsted manufactures:		
Meat packing, wholesale.....	(1)	(1)	Scouring and combing plants.....	203,255	149,089
Prepared meats.....	(1)	(1)	Yarn mills, wool, except carpet.....	336,956	209,148
Poultry dressing, wholesale.....	481,929	413,769	Woolen and worsted fabrics.....	1,355,209	755,675
Dairy products:			Finishing wool textiles.....	28,889	6,805
Creamery butter.....	844,713	737,465	Yarn and thread mills, except wool:		
Natural cheese.....	457,935	394,678	Yarn throwing mills.....	64,173	18,203
Concentrated milk.....	737,607	588,836	Thread mills.....	154,269	86,897
Ice cream and ices.....	611,755	383,706	Yarn mills, cotton system.....	769,403	442,564
Special dairy products.....	291,451	243,608	Yarn mills, silk system.....	12,494	5,565
Canning, preserving, and freezing:			Cotton and rayon broad-woven fabrics:		
Canned sea food.....	226,519	129,712	Cotton broad-woven fabrics.....	3,294,623	1,732,287
Cured fish.....	31,077	21,129	Rayon and related broad-woven fabrics.....	1,002,923	514,875
Canning and preserving, except fish.....	1,640,754	1,030,815	Narrow fabric mills:	210,908	102,250
Dehydrated fruits and veg.....	51,079	32,924	Knitting mills:

¹ Data not compiled for these items because they contain a substantial amount of duplication arising because certain plants classified in this industry make products which are used as materials by other plants also classified in the industry.

² Includes data for shingle mills.

¹ Value of products less cost of materials, supplies, fuel, electric energy, and contract work.² See text, p. 745, for explanation of standard error. Refers to column "All employees—Number;" standard errors of estimates for other columns usually of same magnitude.³ Withheld because estimate did not meet publication standards. See text, p. 745.⁴ Data for the logging industry and for sawmills producing less than 200,000 board feet of lumber are included in the estimates for 1950, but are excluded from the figures for 1947.⁵ Withheld to avoid disclosing data for individual companies.Source: Department of Commerce, Bureau of the Census; *Annual Survey of Manufactures: 1949 and 1950*.

No. 930.—MANUFACTURES—GENERAL STATISTICS, BY STATES: 1949 AND 1950

¹ Value of products less cost of materials, supplies, fuel, electric energy, and contract work.

² See text, p. 745, for explanation of standard error. Refers to columns "All employees—Number (average for the year)," standard errors of estimates for other columns usually of same magnitude.

³ The data for North Dakota and South Dakota combined because of high standard errors associated with 1949 and 1950 estimates for each State.

¹ Includes all full-time and part-time production and related workers, force-account construction workers, clerical and routine office workers, administrative, supervisory, sales, technical, and all other personnel on pay rolls of manufacturing establishments. Excludes employees of central administrative offices operated by concerns having 2 or more manufacturing establishments. Wages and salaries represent gross earnings of employees including commissions, dismissal pay, nonproduction bonuses, vacation and sick leave pay, and compensation in kind, and prior to such deductions as employees' social security contributions, withholding taxes, group insurance, union dues, and savings bonds.

² Value of products less cost of materials, supplies, fuel, electricity, and contract work.

³ Figures will not add to totals because of rounding.

No. 932.—MANUFACTURES—GENERAL STATISTICS FOR STANDARD METROPOLITAN AREAS: 1947 and 1939

[Money figures in thousands of dollars. Data cover standard metropolitan areas having 40,000 or more manufacturing employees in 1947. These areas replace industrial areas shown in earlier censuses. Industrial areas, as defined in previous years, were groups of contiguous counties having large numbers of manufacturing wage earners. Present standard metropolitan areas are integrated economic and social entities which contain not only highly industrialized counties, but also adjoining counties which, though primarily residential in character, contribute significantly to the industrial counties' labor force. The 53 areas presented in this table represent a part of a larger list of standard metropolitan areas recently established by the Federal Government for the use of all Government statistical collection agencies. Standard metropolitan areas are composed of whole counties in all parts of the U. S., with the exception of New England where they are composed of towns. For definition of each area, see 1947 Census of Manufactures preliminary report, series MC 100-3 or final report, Vol. III.]

¹ Includes all full-time and part-time production and related workers, force-account construction workers, clerical and routine office workers, administrative, supervisory, sales, technical, and all other personnel on the pay rolls of manufacturing establishments. Excludes employees of central administrative offices operated by concerns having 2 or more manufacturing establishments. Wages and salaries represent gross earnings of employees including commissions, dismissal pay, nonproduction bonuses, vacation and sick leave pay, and compensation in kind, and prior to such deductions as employees' social security contributions, withholding taxes, group insurance, union dues, and savings bonds.

² Value of products less cost of materials, supplies, fuel, electricity, and contract work.

No. 933.—MANUFACTURES—EXPENDITURES FOR NEW PLANT AND EQUIPMENT, BY INDUSTRY GROUPS: 1947, 1949, AND 1950

[Dollar figures in thousands. 1949 and 1950 figures based on sample and subject to sampling variation. See text, p. 744. Excludes expenditures: (1) for plant under construction but not in operation; (2) for plants idle throughout year; (3) for nonmanufacturing establishments of manufacturing companies; (4) for plants and equipment leased to manufacturers by owners; and (5) for used plant and equipment acquired from others]

¹ Smaller establishments submitting "short" form reports were not requested to include data on capital expenditures. Resulting understatement is negligible (see Ch. VI of Vol. I, "General Summary, Census of Manufactures, 1947").

² See text, p. 745, for explanation of standard error. Refers to total expenditures columns. Standard errors for new machinery columns approximately same as those for total expenditures; for new structures columns, vary, usually between 1 and 3 times the standard errors shown for total expenditures, up to a maximum of 15 percent for published totals.

³ Not fully represented in sample; capital expenditures understated by approximately 1 to 10 percent; corresponding understatement of "All industries" total is less than 0.5 percent.

⁴ Withheld because estimate did not meet publication standards. See text, p. 745.

¹ Basis 24 No. 2½ cans.

² Not available.

³ Hawaiian pack plus receipts from Puerto Rico, except for 1950-51 which represents Hawaiian pack only.

⁴ Basis 24 No. 2 cans.

⁵ Included in "other fruit juices."

⁶ Succotash, triple succotash, carrots and peas, okra, okra and tomatoes.

⁷ Basis dozen cans.

⁸ Not shown separately to avoid disclosure of individual operations.

Source: Dept. of Commerce, National Production Authority. Data for recent years compiled mainly from annual pack statistics of National Canners Assn., Washington, D. C. Historical series (1944-45 and earlier) from Fruit and Vegetable Canning Industries, 1934-45 (Industrial Series 15), compiled in cooperation with Bureau of Census and Office of Price Administration.

¹ Conversion factor used was 56 pounds per bushel when reported in bushels.

² Wheat, barley, rice, sorghum grain, etc., also mixtures of corn, malt, and rye.

³ Diamalt, sulphite liquors, manioc meal, maguey juice, maple sirup, cider, corn sirup, potatoes, crude alcohols mixtures, cellulose pulp and chemical mixtures, ethylene gas, etc.

⁴ Average for 4 years.

⁵ Average for 3 years.

⁶ 1930 figure.

¹ Includes data for Hawaii for all years and data for Puerto Rico beginning with Aug. 1, 1928.

² Separate accounts for alcohol produced at industrial alcohol plants required commencing May 1, 1920.

³ Through 1940, represents *withdrawals* of all products for denaturation, that is, domestic ethyl alcohol, spirits produced by registered distilleries (redesignated upon receipt at denaturing plants as alcohol), and rum. Beginning 1944, represents all products (except rum) *used* for denaturation, that is, domestic ethyl alcohol, imported ethyl alcohol, and spirits. Rum is included for 1935 and 1940 because denatured rum is included with specially denatured alcohol for those years.

⁴ Prior to 1944 includes denatured rum.

⁵ Represents gross production. Net production (gross production minus products used in redistillation) for 1945, 650,089,874.

¹ Barrels of 31 wine gallons.

² Excludes ethyl alcohol.

³ A tax gallon for spirits of 100 proof or over is equivalent to the proof gallon. For spirits of less than 100 proof the tax gallon is equivalent to the wine gallon.

⁴ Excludes high-proof spirits and unfinished spirits produced at registered distilleries for industrial purposes.

⁵ Includes ethyl alcohol.

⁶ Excludes vermouth and other aperitif wines.

⁷ Production represents total amount removed from fermenters, including distilling material (substandard wines produced with excessive water or residue materials). In 1951, 289,521,298 gallons of distilling materials were produced.

⁸ Standard United States gallon.

⁹ Excludes distilling materials.

¹⁰ Includes champagne, other sparkling wines, and artificially carbonated wines.

¹¹ Tax is payable on each ½ pint or fraction thereof in each bottle or container.

No. 942.—TOBACCO, LEAF—AMOUNTS CONSUMED IN THE MANUFACTURE OF CIGARS, CIGARETTES, CHEWING AND SMOKING TOBACCO, AND SNUFF: 1896 TO 1950

[All figures in thousands of pounds. Figures represent the equivalent in unstemmed leaf tobacco of stemmed leaf or scraps, cuttings, and clippings. In the following table the tobacco used in the manufacture of cigars and cigarettes was converted on the basis of 3 pounds of stemmed leaf or scraps, etc., to 4 pounds of unstemmed beginning 1915 (conversion prior to 1915 was at the ratio of 3 to 5) and of tobacco and snuff beginning 1903. For 1896 to 1902, tobacco used in manufactured tobacco and snuff was shown only under two heads, namely, "leaf" and "scraps." It is probable that stemmed leaf was included with unstemmed tobacco under the head of "leaf" without the one kind being converted to the equivalent in the other. The conversion ratio of 3 to 4 was applied only to "scraps" for these years. Data exclude tobacco used in bonded manufacturing warehouses. See also *Historical Statistics*, series J 171, for annual total consumption]

No. 945.—COTTON-SYSTEM SPINDLES, COTTON CONSUMPTION, AND STOCKS: 1840 TO 1951

[Statistics for 1915 to 1949 relate to 12 months ending July 31 and those for prior years to 12 months ending Aug. 31. For 1946-51, spindles in place include all cotton-system spindles in place regardless of fiber spun. Prior to 1946, "in place" figure represents all spindles in place used exclusively for spinning cotton. Consumption and stocks are expressed in running bales, counting round as half bales, except that all figures, 1840 to 1870, inclusive, and foreign cotton for all years are in equivalent 500-pound bales. See also *Historical Statistics*, series J 179-180 for data on active cotton-system spindles in the U. S. and total cotton consumed including linters]

¹ For 1946 and earlier years data represent sum of greatest number of cotton spindles reported by each mill as active at any time during year, regardless of length of time operated. Beginning with 1946, active figure includes all cotton-system spindles active last day of year, regardless of type of fiber spun. On August 4, 1951, there were 20,834,000 spindles active on cotton, 1,074,000 on synthetics, 182,000 on other fibers and blends, and 1,055,000 idle.

² Includes linters for 1840 to 1908. Figures for all years include foreign and domestic cotton.

³ Not available. ⁴ Cotton mills only.

⁵ Includes stocks held in public storage and at compresses beginning 1938.

⁶ Includes linters for 1906 to 1908. ⁷ Average, 1909 and 1910.

⁸ "Upland" includes "American-Egyptian" beginning 1912 (first year produced).

Carpet and rug looms	9,796	9,821	10,267	6,557	5,683

¹ Data for 1899, 1914, and 1929 include estimates to provide for these machines in knitting mills. 1929 data also include estimates on number of woolen spinning spindles and worsted cards in knitting mills.

² Data not available.

³ 1943 and other years not strictly comparable. Census of Manufactures for 1899, 1914, 1929, and 1947 called for a report on looms from those mills whose principal products were wool and hair goods while 1943 inquiry covered all mills consuming weaving yarns spun on woolen or worsted spinning spindles. Includes pile fabric looms conforming with these definitions.

¹ Represents type of high explosives approved by Bureau of Mines as suitable for safe use in coal mines provided specifications of use are followed.

² Includes 16,562,000 liquid oxygen explosive in 1947, 15,620,000 in 1948, 13,922,000 in 1949, and 13,804,000 in 1950.

³ Includes 13,917,000 liquid oxygen explosive in 1949 and 13,742,000 in 1950.

⁴ Includes 6,000 liquid oxygen explosive in 1949 and 62,000 in 1950.

⁵ Sold by manufacturer but later returned unused.

¹ Includes skeelp beginning 1922.

² Merchant bars include concrete reinforcement bars and, beginning 1934, certain miscellaneous bars previously included in "All other finished rolled production."

³ Average for years 1887-90.

⁴ Average for years 1902-05.

⁵ Average for years 1892-95.

⁶ Average for period July 1, 1897, to Dec. 31, 1900.

⁷ Average for period July 1, 1903, to Dec. 31, 1905.

⁸ Small structural forms not included in 1911.

No. 976.—IRON AND STEEL—AGGREGATE EXPORTS: 1890 TO 1951

[Covers products listed in table 977; excludes data for highly elaborated products of iron and steel. Value figures through 1920 exclude, and those beginning 1923 include data for small items for which quantity figures are not available. Ferromanganese data included for all years. Data for steam and hot-water heating boilers and radiators, formerly classified as heavy iron and steel products, excluded beginning with 1923]

[Quantities in thousands of short tons (2,000 pounds); values in thousands of dollars]

No. 980.—FERROUS CASTINGS—SHIPMENTS AND UNFILLED ORDERS: 1946 TO 1951

[In thousands of short tons. 1947-49 data for steel castings and gray iron castings, and 1951 data for gray iron castings are estimates of complete coverage based on sample of foundries. All other data represent complete coverage]

ITEM	1946	1947	1948	1949	1950	1951
GRAY IRON CASTINGS						
Shipments, total ¹	10,270	12,753	13,207	11,050	13,725	14,989
Pressure pipe and fittings.....	786	1,034	1,155	1,037	1,215	1,473
Soil pipe and fittings.....	409	584	654	582	795	688
All other gray iron castings.....	9,075	11,135	11,398	9,431	11,715	12,828
Unfilled orders, Dec. 31, total ²	2,980	2,826	2,346	931	2,142	1,847
Pressure pipe and fittings.....	775	1,017	961	296	617	537
Soil pipe and fittings.....	355	303	253	65	208	27
All other gray iron castings.....	1,850	1,506	1,132	570	1,317	1,283
MALLEABLE IRON CASTINGS						
Shipments, total.....	752	899	941	723	942	1,085
For sale.....	452	514	527	373	537	656
For own use.....	300	385	414	350	405	429
Unfilled orders, Dec. 31, total ²	268	206	143	64	222	215
STEEL CASTINGS						
Shipments, total ¹	1,432	1,632	1,778	1,260	1,481	2,050
Carbon.....	1,112	1,259	1,408	963	1,130	1,541
Alloy.....	320	373	370	297	351	509
Unfilled orders, Dec. 31, total ²	362	494	360	124	570	846
Carbon.....	292	417	298	86	476	820
Alloy.....	70	77	62	38	94	226

¹ Includes shipments for "own use."

² Unfilled orders for sale only.

No. 981.—COPPER AND COPPER-BASE ALLOY ROLLED, DRAWN AND EXTRUDED PRODUCTS—SHIPMENTS, BY KIND: 1939 AND 1947

[In short tons (2,000 pounds). Covers shipments and interplant transfers of copper and copper-base alloy products, including production of these items consumed by producing plant in manufacturing fabricated products. These figures, therefore, represent gross shipments of copper and copper-base alloy products. 1939 figures for copper-base alloys refer to brass and bronze products only; figures for other copper-base alloys excluded and to this extent data not comparable with 1947. Data on shipments, interplant transfers, and produced and consumed in same plant have been combined since data are not comparable for each of these measures separately. Some establishments which reported rolling mill and fabricating operations at same location in 1939 treated each of these operations as separate establishments in 1947. For this reason some of tonnage reported as produced and consumed in same establishment in 1939 was considered as interplant transfers in 1947]

PRODUCT	1939	1947
Copper and copper-base alloy wire and cable, bare and tinned.....	381,666	911,207
Unalloyed copper.....	336,603	835,927
Copper-base alloy.....	45,063	75,280
Other copper and copper-base alloy rolled, drawn and extruded products.....	842,027	1,526,783
Unalloyed copper:		
Rod and bar.....	¹ 204,903	477,196
Plate, sheet, and strip.....	107,707	165,438
Pipe and tube.....	72,795	185,910
Copper-base alloys:		
Rod.....	¹ 135,156	242,542
Shapes, drawn, and extruded.....	² 6,357	28,611
Plate, sheet, and strip.....	221,224	329,467
Plate and tube.....	93,885	97,619

¹ Excludes tonnage of rods reported as produced and consumed in same establishment, most of which was consumed in production of wire, rather than fabricated products.

² Includes extruded shapes only.

NO. 994.—ALASKA AND HAWAII—SUMMARY OF MANUFACTURES: 1899 TO 1939

[Figures for 1939 do not include data for plants reporting products valued at less than \$2,000; those for earlier years cover all plants having products valued at \$500 or more. This increase in minimum value-of-products limit resulted in some reduction in "Number of establishments" reported as compared with what it would have been had minimum of \$500 been retained, but did not seriously impair comparability of figures for 1939 with those for earlier years]

INDUSTRY	Census year	Number of establishments	Wage earners (average for the year)	Wages	Cost of materials, etc., fuel, electric energy	Value of products	Value added by manufacture ¹

¹ Retabulated to provide industry statistics comparable with those for 1949.

² Computed by subtracting costs of materials and supplies, fuels, electric energy, and contract work from value of products.

³ Includes data for industry groups not shown separately (to avoid disclosing operations of individual companies) as follows: Rubber, primary metal industries, electrical machinery, and transportation equipment, 1 establishment each; and for instruments and related products, 2 establishments.

⁴ Comparable statistics for 1939 not available. Figures for 1949 include statistics for activities of (1) coffee roasting and grinding and (2) tobacco stemming and redrying, which were classified as manufacturing in 1949 but considered nonmanufacturing in 1939.

⁵ This figure may include an undetermined amount of excise taxes.

⁶ Also includes shortening, cooking oils, and flavorings.

⁷ Also includes fabric and combination dress and work gloves.

⁸ Also includes sporting and athletic goods, hand stamps and stencils, needles, pins, and fasteners, plastic products, brooms and brushes, matches, and hair work.

⁹ Withheld to avoid disclosing figures for individual companies.

Source: Department of Commerce, Bureau of the Census; *Puerto Rico Census of Manufactures, 1949*.

31. Foreign Commerce

Including International Accounts and Aid

(Sent to print May 23, 1952)

Balance of payments.—The statistics shown for international balance of payments and the international investment position are compiled in the Balance of Payments Division, Office of Business Economics of the Department of Commerce.

The international accounts of the United States comprise the international balance of payments (tables 996, 998 and 999) and the international investment position (table 997). The balance of payments shows for given time periods, e. g., one year, the transfers of assets and the form of compensation for these transfers between this country and the rest of the world; the international investment position indicates for specific dates the value of United States investments abroad and of foreign investments in the United States. The two types of accounts, however, are not strictly comparable; the transfers of assets between countries as shown in the balance of payments is only one of the factors affecting the value of foreign investments. Other factors not shown in the balance of payments are changes in security values and revaluation of assets, and reinvested earnings and losses. For a detailed discussion and analysis of these accounts, see the Department of Commerce publications, *International Transactions of the United States During the War, 1940-45*, *Economic Series No. 65*, 1948, and *The Balance of International Payments of the United States, 1946-48*, published in 1949. For current data and revisions, see the monthly *Survey of Current Business*.

Foreign assistance.—Statistics on United States Government grants to and credits utilized by foreign countries and reverse grants and credit repayments received by the Government from abroad are prepared by the Clearing Office for Foreign Transactions, Office of Business Economics. These data are obtained from Federal agencies which report such transactions to the Clearing Office. Detailed information on the statistics provided in tables 1000 and 1001, and on other foreign activities of the Government, is provided in the regular quarterly reports of the Clearing Office.

Foreign aid is defined to comprise two categories—grants and credits. Grants are largely outright gifts for which no payment is expected, or which at most involve an obligation on the part of the receiver to extend aid to the United States or other countries to achieve a common objective. Credits are loans or other agreements which give rise to specific obligations to repay, over a period of years, usually with interest. In some instances assistance has been given with the understanding that a decision as to repayment will be made at a later date; such assistance is included in grants. At such time as an agreement is reached for repayment over a period of years, a credit is established. Because such credits cannot, as a rule, be deducted from specific grants recorded in previous periods, they are included in both grants (at the earlier period) and credits (at the time of the agreement), and the amounts of such *credit-agreement offsets to grants* must therefore be deducted from the total of grants and credits in arriving at gross foreign aid. All known returns to the United States Government stemming from grants and credits are also taken into account. The result of gross foreign aid less the returns is net foreign aid, which is shown as net grants and net credits. Net credits for the total war and postwar periods approximate the amount of credit outstanding on December 31, 1951.

The major activities of the Mutual Security Agency are summarized in tables 1002-1005, prepared by the Division of Statistics and Reports of that agency. Data are presented on the European Program and the separate program for the Far East.

In these tables, colonies and overseas territories of European countries are reported with mother countries; the Saar is shown with France. Commodity groups shown are based on the Mutual Security Agency commodity classification. In determining the various reporting groups, an attempt has been made to align the coverage of the summary groups shown in these tables as closely as possible with that of reports on United States exports originating in the Bureau of the Census.

These and other data are published in more detail in the several monthly publications of the Division of Statistics and Reports of the Mutual Security Agency.

Foreign trade.—Statistics on foreign trade are compiled by the Bureau of the Census of the Department of Commerce. Annual statistics through 1946 are published in the annual report, *Foreign Commerce and Navigation of the United States*. Preliminary statistics for later years are from current corrected data. Monthly data are published in the *Summary of Foreign Commerce of the United States* (monthly and quarterly through April 1951, quarterly thereafter) and other monthly reports of the foreign trade series. For a complete list of these reports see *Catalog of United States Foreign Trade Statistical Publications* issued by the Bureau of the Census.

Statistics covering shipments made after World War II under the Department of the Army Civilian Supply Program are included in the export statistics for 1948 but not for earlier years. In addition, export data include United States exports under the Lend-Lease, United Nations Relief and Rehabilitation Administration, Economic Cooperation Administration, Mutual Defense Assistance, and other foreign aid programs. Shipments to United States armed forces for their own use are not included in export statistics for any period.

Certain commodity classifications in the export statistics were grouped for security reasons into special categories beginning with May 1949 and data for the individual commodities withheld from publication. The special category list of commodities was amended in July 1949, July 1950, and January 1951 to include additional commodities. With the adoption of new security regulations, effective July 1950, the publication of the country of destination and Customs District detail for the special category commodities and groups were discontinued. Data for special commodities are included, however, in all total export statistics issued by the Bureau of the Census.

Except as noted (as, for example, in table 1028) the values stated are in United States dollars without reference to changes in the gold content of the dollar. (The statutory price of gold—\$20.67 per ounce—in effect prior to Jan. 31, 1934, was changed on that date by Executive Order to \$35 per ounce. Between Mar. 10, 1933, and Jan. 31, 1934, the foreign exchange value of the dollar was permitted to depreciate as a result of the restriction placed on gold shipments to foreign countries.) The geographic area covered by these statistics, except as noted, is the United States customs area, which includes Alaska, Hawaii, and Puerto Rico, and from Jan. 1, 1935, through Dec. 31, 1939, the Virgin Islands (see headnote, table 1010). Other explanations of the trade tables are given in the introduction to the annual report, *Foreign Commerce and Navigation of the United States*.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series M 14-41") provide cross references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

No. 996.—BALANCE OF INTERNATIONAL PAYMENTS: 1945 TO 1951

[In millions of dollars. 1951 data preliminary. Represents revised presentation. See also *Historical Statistics*, series M 14-41 for data as presented in 1950 Abstract, table 988]

No. 997.—INTERNATIONAL INVESTMENT POSITION OF THE UNITED STATES: 1939 TO 1950

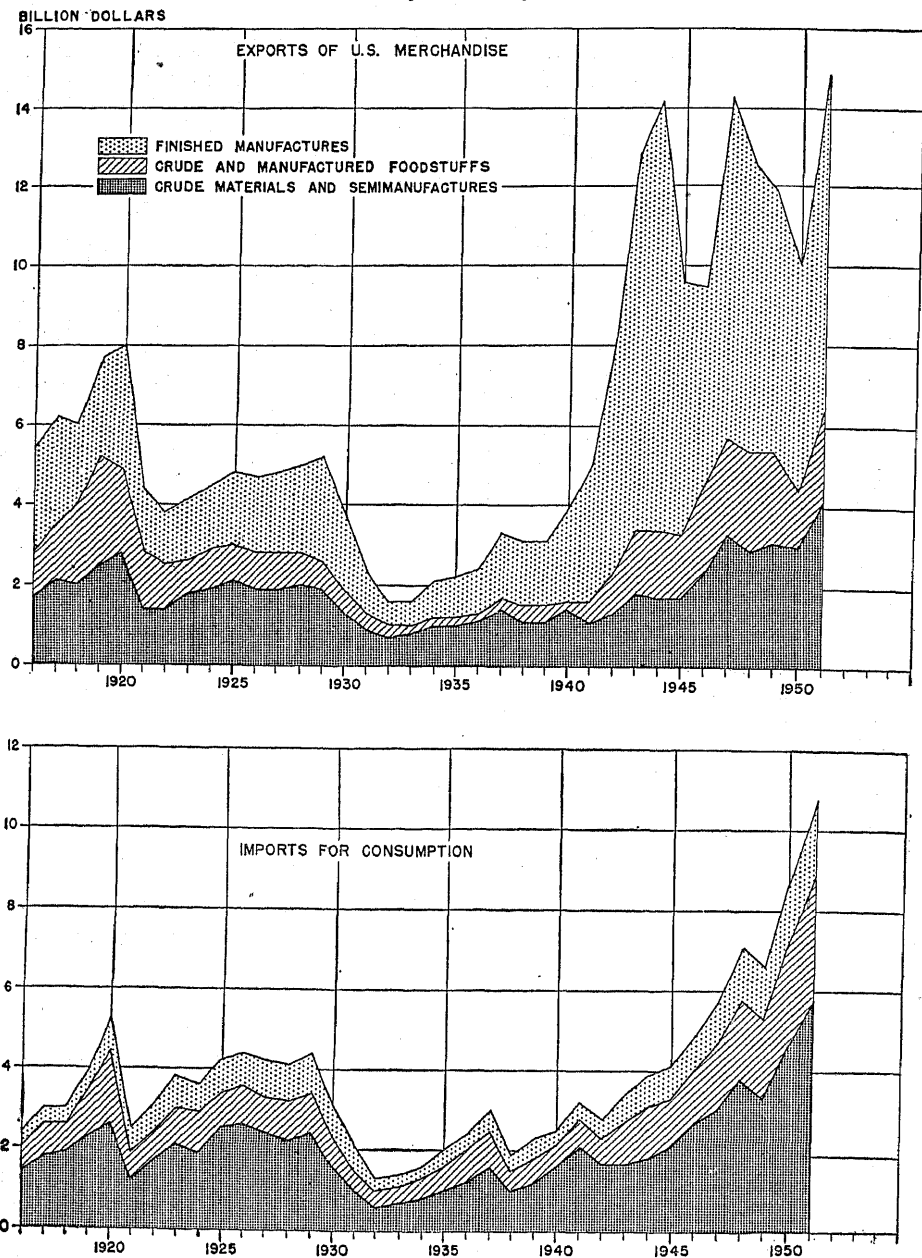

[In millions of dollars. Estimates for end of year; subject to considerable error due to nature of basic data. No allowance for write-offs, war damage, or expropriations without compensation of U. S. direct investments abroad. Direct investments at book value; other types at market or stated values. For 1945-50, value of securities of former enemy countries, or countries where no realistic market can be determined, has been eliminated; not entirely comparable with earlier years due to this and other revisions. See also *Historical Statistics*, series M 1-13]

No. 1000.—U. S. GOVERNMENT FOREIGN AID BY PROGRAM, TO DEC. 31, 1951

In millions of dollars. "Gross foreign aid" represents the gross value of goods, services, and funds furnished to foreign countries through the utilization of U. S. Government grants and credits. In addition, grants unutilized, although appropriated (or authorized) by Congress, amount to \$16,105 million, of which \$11,267 million represents funds for mutual-security program military aid; credits unutilized but authorized amount to \$2,753 million. "Reverse grants and returns on grants" is comprised of (a) goods, services, and funds received through reverse lend-lease or acquired under foreign-currency counterpart provisions of mutual security programs; (b) returned lend-lease naval and merchant ships; and (c) cash received under postwar war-account settlements for grants furnished earlier. "Principal collected on credits" includes goods, services, and funds received in reduction of outstanding credits, excluding repayments on World War I debts. "Funds" includes foreign currency which, with goods and services, is measured in dollar equivalents]

¹ July 1, 1940, through June 30, 1945. All lend-lease and credit-agreement offsets to grants are through VJ-day (Sept. 2, 1945). ² Less than \$500,000.

³ Negative entry of less than \$500,000 results from refunds of cash aid.

⁴ Excludes \$160 million disbursed between date of organization, Feb. 12, 1934, and June 30, 1940.

⁵ Negative entry results from excess of Bank repurchase from agent banks over agent-bank disbursements.

⁶ Excludes \$61 million received between date of organization, Feb. 12, 1934, and June 30, 1940.

¹ July 1, 1940, through June 30, 1945. All lend-lease and credit-agreement offsets to grants are through VJ-day (Sept. 2, 1945).

² Outstanding credits on Dec. 31, 1950, totaled \$10,119 million, exceeding net credits for the war and postwar periods by \$98 million, representing the outstanding (or net) credits resulting from Export-Import Bank operations from date of organization, Feb. 12, 1934, through June 30, 1940. By country, this \$98 million is American Republics, \$32 million; China, \$20 million; Finland, \$11 million; Italy, \$4 million; Portugal, \$3 million; Rumania, \$1 million; Spain, \$13 million; Sweden, \$4 million.

³ Less than \$500,000.

⁴ Net (+) of less than \$500,000.

⁵ Net (-) of less than \$500,000.

⁶ Data include small amounts for Ceylon and Pakistan.

⁷ Gross foreign aid, net foreign aid, and net credits for Netherlands include \$17.2 million ERP credits to Netherlands on behalf of Indonesia (\$5.8 million in 1948; \$10.4 million in 1949; and \$1.0 million in 1950). All other aid to Indonesia, including grants under European Recovery Program, included against Indonesia.

⁸ Data include small amounts for Libya, Nepal, and Syria.

No. 1009.—EXPORTS AND IMPORTS OF MERCHANDISE, PER CAPITA: 1791 TO 1951

[Export figures for 1791 to 1820 are based on total exports including reexports (the latter were then relatively large) and for 1821 to date, on exports of United States merchandise only. Import figures for 1791 to 1820 are based on general imports; for 1821 to 1870, total imports less reexports; and for 1871 to date, imports for consumption. (See tables 1007 and 1029)]

No. 1010.—MERCHANDISE TRADE OF CONTINENTAL UNITED STATES WITH FOREIGN COUNTRIES AND OUTLYING TERRITORIES AND POSSESSIONS: 1903 TO 1949

IMPORTANT NOTE.—This table differs as to its geographic basis from all other foreign trade tables in this section and in other publications: (1) In the case of other tables the data represent the trade of the United States customs area with all foreign countries, including the Philippine Islands and prior to 1935, the Virgin Islands. The U. S. customs area comprises continental U. S., Alaska, Hawaii, Puerto Rico, and during 1935 through 1939, the Virgin Islands. Trade between continental U. S. and the territories mentioned as part of the customs area are therefore excluded from these data. (2) The present table takes continental United States as the basis. In the totals, trade between it and all United States Territories and possessions is included, while the trade between that part of the customs area outside of continental United States and foreign countries is excluded. Practically all other nations calculate their foreign trade in the manner followed in the present table; that is, totaling the trade of the home country with foreign countries and with all outlying areas. Prior to 1901 Alaska was our only outlying area. Therefore, our foreign trade statistics for 1900 and earlier years very nearly represent the trade of continental United States with foreign countries. Data are for years ending June 30 through 1918; thereafter, for years ending Dec. 31. For purposes of continuity of the data in this table, trade with the Republic of the Philippines has been treated as trade with a Territory through calendar year 1946, even though Philippine independence was established in July 1946.

No. 1017.—EXPORTS OF U. S. MERCHANDISE AND IMPORTS—INDEXES OF CHANGES IN QUANTITY, UNIT VALUE (PRICE), AND TOTAL VALUE: 1913 TO 1951

[Quantity and unit value indexes have been constructed by so-called "ideal formula," essential feature of which is use of quantities of several articles as weighting factors of their unit values for each pair of years compared. About 265 commodities were included in direct calculations for both exports and imports. It was then assumed that prices of articles in each economic class not directly covered had moved in parallel with those of articles covered and their value, adjusted by computed price index, was included in aggregative totals from which quantity index for each class was calculated. Index of quantity and unit value of total exports and imports was based on aggregate of adjusted totals of classes. In constructing indexes, data for 1919 were linked directly to 1913, and each subsequent year was compared with that preceding. Resulting year-to-year percentages were made into a series by chain method]

[1923-25 average=100]

IMPORTS BY COMMODITY

851

No. 1019.—IMPORTS OF MERCHANDISE, BY COMMODITY GROUPS: 1936 TO 1951—
Continued

[In thousands of dollars]

COMMODITY	1936- 1940, average	1941- 1945, average	1946- 1950, average	1948	1949	1950	1951
Group 4.—Wood and paper, total.....	261,779	327,821	865,849	987,435	841,894	1,114,086	1,303,833
Wood, unmanufactured.....	7,903	11,182	23,388	29,879	19,382	27,306	29,484
Wood semifinufactures—sawmill products.....	19,328	50,280	142,082	152,078	113,176	265,195	229,203
Wood manufactures.....	11,371	11,569	37,606	38,210	33,515	61,055	66,630
Cork and manufactures.....	5,872	9,023	14,376	14,259	10,295	13,948	20,803
Paper base stocks.....	93,395	101,123	252,303	315,729	212,889	273,809	413,691
Paper and manufactures.....	123,911	144,645	396,004	437,779	452,638	472,774	544,022
Group 5.—Nonmetallic minerals, total.....	137,176	245,052	633,068	679,648	694,101	904,841	977,000
Coal and related fuels.....	4,844	4,207	4,833	4,224	6,408	8,063	4,463
Petroleum and products.....	47,654	93,981	379,027	415,669	477,788	591,905	601,269
Stone, cement, lime, and gypsum.....	3,564	9,547	8,454	10,465	7,174	11,169	13,694
Glass and glass products.....	6,102	1,084	7,564	6,440	7,365	14,357	21,675
Clays and clay products.....	9,515	6,175	10,434	20,838	23,782	29,204	40,971
Other nonmetallic minerals.....	21,466	46,834	67,020	72,873	69,749	94,636	119,324
Precious stones and imitations.....	44,034	84,133	146,736	149,140	101,775	155,509	175,603
Group 6.—Metals and manufactures, except machinery and vehicles, total.....	242,551	519,481	801,041	875,221	963,445	1,183,371	1,433,047
Iron ore and concentrates.....	5,697	3,088	28,107	27,330	36,735	44,027	59,682
Iron and steel semifinufactures.....	4,840	1,764	35,878	30,299	48,344	94,289	217,198
Steel-mill products—manufactures.....	10,807	5,811	15,395	12,262	17,968	37,169	125,084
Iron and steel, advanced manufactures.....	2,882	3,178	5,686	5,370	5,774	8,647	21,281
Ferro-alloys.....	25,513	64,793	80,126	86,898	76,590	111,869	132,772
Nonferrous metals, except precious.....	183,770	427,085	613,381	691,295	759,745	854,819	827,876
Precious metals, jewelry, and plated ware, except gold and silver in ore, bullion, and coin.....	9,042	13,762	22,468	21,766	18,288	32,552	49,176
Group 7.—Machinery and vehicles, total.....	17,532	83,125	111,537	153,775	135,113	157,486	243,002
Electrical machinery and apparatus.....	2,075	14,438	5,189	5,325	4,291	9,443	18,031
Industrial, office and printing machinery.....	9,074	9,999	22,408	21,355	26,742	36,871	70,957
Agricultural machinery and implements.....	4,519	6,051	58,734	81,002	82,993	77,372	96,692
Automobiles and other vehicles, except agricultural.....	1,864	52,638	25,206	46,093	21,087	33,800	57,322
Group 8.—Chemicals and related products, total.....	79,662	130,741	118,702	111,449	106,819	170,382	300,431
Coal-tar chemicals.....	15,501	9,719	14,977	18,169	13,200	25,754	53,791
Medicinal and pharmaceutical preparations.....	4,847	7,920	7,191	6,242	5,925	7,811	11,823
Industrial chemicals.....	19,036	28,835	33,264	22,633	18,288	52,757	120,045
Pigments, paints, and varnishes.....	1,605	780	1,992	2,044	1,425	3,603	5,326
Fertilizers and materials.....	35,250	31,688	54,489	56,180	62,685	74,803	101,923
Explosives.....	621	49,401	1,886	2,617	1,740	1,216	1,677
Soap and toilet preparations.....	2,801	2,398	4,904	3,565	3,557	4,439	5,847
Group 9.—Miscellaneous, total.....	90,412	131,861	214,414	244,361	209,098	257,983	289,562
Photographic goods.....	6,601	1,433	6,327	7,817	7,059	10,092	17,018
Scientific and professional instruments, apparatus, and supplies, n. e. s.....	2,047	1,523	3,337	2,970	4,709	6,869	9,811
Musical instruments.....	3,795	1,211	9,392	9,842	9,728	12,866	13,817
Toys, athletic and sporting goods.....	2,964	800	4,858	4,901	5,584	8,010	8,647
Firearms.....	294	13,080	1,427	1,947	1,597	2,193	4,103
Books and other printed matter.....	8,388	5,394	13,162	13,694	13,650	13,958	20,004
Clocks, watches, etc.....	10,275	38,652	57,387	60,039	50,765	57,320	67,380
Art works.....	19,224	3,678	19,615	17,951	19,725	26,257	21,588
Miscellaneous articles, n. e. s.....	36,824	66,090	98,909	125,201	96,280	120,418	127,194

No. 1020.—EXPORTS OF UNITED STATES MERCHANDISE—VALUE OF SELECTED ARTICLES: 1821 to 1951

[In thousands of dollars. For basis of dollar values, except export figures for 1870-78, see general note, p. 825. Export figures for those years are mixed gold and currency values. Figures are for fiscal years ending Sept. 30 through 1840, and June 30, 1850 through 1915; calendar years thereafter. In some cases blanks represent entire absence of trade; in other cases the item is not available separately]

YEAR OR YEARLY AVERAGE	Meat products	Animal fats and oils ¹	Leather	Rye	Wheat and wheat flour	Oil cake and oil-cake meal	Fruits and nuts ²	Rubber and manufactures ³	Naval stores, gums, and resins	Tobacco, unmanufactured

¹ Includes oleomargarine of vegetable origin through 1948. Excludes inedible fish oils. Excludes "lard compounds" beginning 1921; now classified as "vegetable cooking fats." ² Includes fruit and nut preparations.

³ Natural and synthetic rubber. ⁴ Average for period July 1, 1915, to Dec. 31, 1920.

⁵ Includes semimanufactures. ⁶ Average for 1906-10.

⁷ Box, crate and package shoeks (except fruit and vegetable) included with "Other wood manufactures" beginning 1949; classified as "Sawmill products" in prior years.

⁸ Exclusive of track-laying tractors of 95 and over drawbar horsepower beginning July 1949.

⁹ Exclusive of machinery and vehicles manufactured to military specifications beginning July 1949.

No. 1021.—IMPORTS—VALUE OF SELECTED COMMODITIES: 1821 TO 1951

[In thousands of dollars. For basis of dollar values, see general note, p. 825. Figures represent "general imports" through 1932, "imports for consumption" thereafter. Figures cover fiscal years ending Sept. 30 through 1840, and June 30, 1850 through 1915; calendar years thereafter. In some cases blanks represent entire absence of trade; in other cases the item is not available separately]

YEAR OR YEARLY AVERAGE	Hides and skins	Furs, and manu- factures ¹	Fruits and nuts	Vegetable oils and fats, ex- pressed or ex- tracted	Coffee	Sugar ²	Rub- ber, crude	Tobac- co, un- manu- factured	Cotton manu- factures ³	Burlaps

No. 1024.—EXPORTS (INCLUDING REEXPORTS) AND GENERAL IMPORTS OF MERCHANDISE, BY CONTINENTS: 1821 TO 1951

[In thousands of dollars. For basis of dollar values, see general note, p. 825. Figures cover fiscal years to and including 1915; calendar years thereafter, except as noted. Philippine Islands included with Asia for all years; Turkey in Europe is with Asia beginning 1926; U. S. S. R. in Asia is with Europe beginning 1924; and Hawaiian Islands with Oceania prior to 1901. See also *Historical Statistics*, series M 87-102]

¹ Less than $\frac{1}{10}$ of 1 percent.

² Period July 1, 1915, to Dec. 31, 1920.

³ Percentages for individual continents are understated since basic continent data excludes, under security regulations, exports of Special Category commodities representing 6.2 percent of total exports in 1950, and 10.3 percent in 1951.

¹ Total includes \$632,170,000 in 1950 and \$1,532,141,000 in 1951 not shown by continents due to security regulations. ² Newfoundland and Labrador included with Canada in 1950 and 1951 and for imports in 1949. ³ Canal Zone included for 1936 and 1937. ⁴ Average for 1938-40. ⁵ Bahamas, Leeward and Windward Islands combined as Western British West Indies prior to 1942; average for 1941-45 shown under Other British West Indies. ⁶ Average for 1942-46. ⁷ Less than \$500. ⁸ For statistical purposes, trade with Germany was defined to include (as far as ascertainable) trade with areas under de facto administrative control of Germany from the following dates to the close of World War II: Austria, May 6, 1938; Sudeten area of Czechoslovakia, Nov. 10, 1938; other Czechoslovak provinces (Bohemia, Moravia, and part of Slovakia), Mar. 18, 1939; Memel territory of Lithuania, Mar. 23, 1939; and Danzig and German-occupied

Poland, Nov. 16, 1939. Similarly, trade with that area of Czechoslovakia occupied by Hungary was defined to be trade with Hungary for those portions of Ruthenia and parts of Slovakia occupied Dec. 30, 1938, and Mar. 19, 1939, respectively. Trade with Czechoslovak area occupied by Poland was included with the Polish trade from Dec. 30, 1938, to Nov. 16, 1939. Though country classifications used in this table do not recognize de facto boundaries existing in certain geographic areas after World War II, statistics are primarily in terms of this situation. For example, certain shipments credited to U. S. S. R. should probably be credited to Estonia, Latvia, Russian-occupied Poland, etc., but when the country of ultimate destination or origin of merchandise in terms of prewar boundaries is not readily ascertainable, the de facto situation is reflected in the statistics. ⁹ Average for 1936-38.

[In thousands of dollars]

¹ Customs district data exclude certain commodity shipments under security regulations.

² As reported to Treasury Department by collectors of customs, subject in certain cases to subsequent refund as well as drawback. These figures are somewhat higher than duties as calculated on basis of imports for consumption (see table 1029).

³ Includes \$8,760,255,000 in 1948, \$8,380,874,000 in 1949, and \$7,434,762,000 in 1950, not shown by districts.

⁴ Data not individually reported.

⁵ Less than \$500.

⁶ Duties less cost of collection are turned into the Island's treasury; excluded from totals.

⁷ Excluded from totals; not part of U. S. customs area, assessed under tariff law of Virgin Islands.

⁸ For January-July 1948, export shipments individually valued under \$50, except shipments by air; after July 1948, export shipments individually valued under \$100.

No. 1028.—EXPORTS (INCLUDING REEXPORTS) AND IMPORTS OF MERCHANDISE,
BY PRINCIPAL CUSTOMS DISTRICTS: 1860 TO 1951

[In thousands of dollars. For basis of dollar values, except export figures for 1870-78, see general note, p. 825. Export figures for those years represent mixed gold and currency values. Figures cover fiscal years to and including 1915; thereafter, calendar years. Import data are "general imports" through 1933; "imports for consumption" thereafter. Areas of districts were rearranged July 1, 1913. Prior to that date some of the districts were more restricted. However, in most cases this change only slightly affects the comparability of the figures. Prior to 1914 the statistics given in the table for Buffalo include the (former) districts of Buffalo Creek and Niagara; those for Michigan include the (former) districts of Superior, Huron, and Detroit; and those for Massachusetts and Maryland were the former districts of Boston and Baltimore, respectively.]

No. 1031.—IMPORTS OF MERCHANDISE, FREE AND DUTIABLE, AND PERCENT FREE, BY ECONOMIC CLASSES: 1821 TO 1951

[In thousands of dollars. For basis of dollar values, see general note, p. 825. Figures cover fiscal years ending Sept. 30, 1821 to 1840, and June 30, 1850 to 1915; calendar years thereafter, except as noted. Data are "general imports" through 1933; "imports for consumption" beginning 1934. Percentage free in general imports is normally slightly lower than in imports for consumption because relatively more of dutiable general imports are reported as reexported than of free general imports. Moreover, in the period 1922-1933, there is an understatement of free goods in general imports because, for 1922 to 1933, carpet wool used for making carpets and, for 1922 to 1928, wheat imported for milling in bond for exports were reported as dutiable when entered, although no duty was ultimately paid on these products. For adjusted figures see table 492 of 1935 issue of *Statistical Abstract*. See also *Historical Statistics*, series M 75-86]

32. Commerce of Territories and Possessions

(Sent to print May 23, 1952)

All statistics in this section, except as noted, were compiled by the Department of Commerce, Bureau of the Census. These statistics are published in the Monthly Summary of Foreign Commerce of the United States. In the general foreign trade statistics in the preceding section, the Virgin Islands is treated as a foreign country prior to 1935 and its trade with the United States is included while its trade with other countries is not included. On the other hand, Alaska, Hawaii, and Puerto Rico, and for 1935-39, the Virgin Islands, are treated as integral parts of the United States, so that trade between them and continental United States is not included, while trade between them and foreign countries is included. Each of these territories appears as a separate customs district, but beginning with 1940, trade of the Virgin Islands has been excluded from the merchandise export and import figures. Neither trade of American Samoa and Guam with foreign countries nor shipments between them and the United States are included in the general tables on foreign trade. See also table 1010, p. 843.

The tables in this section present the total foreign trade of each of the U. S. Territories and possessions and show separately the trade with United States (unless otherwise indicated) and with foreign countries. The trade with foreign countries represents exports and imports through the respective territorial Customs Districts and does not necessarily represent exports of commodities originating within the designated territory nor imports for direct consumption within the territory. For basis of dollar values, see general note, p. 826.

No. 1033.—IMPORTS AND EXPORTS OF ALASKA: 1882 TO 1951

[In 1947 Alaska shipped domestic silver valued at \$2,067 to the United States]

¹ Unofficial estimates of value of merchandise shipped from Pacific coast ports to Alaska from 1882 to 1901; from 1903 to date, official figures of shipments to Alaska.

² General imports through 1933; imports for consumption thereafter.

³ 3-year average. ⁴ 4-year average.

⁵ Period July 1, 1915 to Dec. 31, 1920.

⁶ Excludes certain commodity exports under security regulations.

⁷ Not available; legal requirement for filing of export declarations for shipments between U. S. and Alaska and Hawaii was removed in April 1945.

Source: See general note.

33. Distribution and Services Including Advertising

(Sent to print May 23, 1952)

Data in this section relate to continental United States.

For additional or related data on distribution and service trades other than those included in this section, consult the index.

CENSUS OF BUSINESS

The primary source of data on distribution and services is the Census of Business. The first Census of Business covered the calendar year 1929. Although the next was scheduled by law to cover the year 1939, two special censuses covering the years 1933 and 1935 were taken before the regular 1939 census conducted as part of the 16th Census of the United States.

In accordance with the provisions of the act of June 19, 1948, the Business Census has been separated from the decennial censuses and is to be conducted at 5-year intervals. The first Business Census under the new act was taken in 1949 covering the year 1948. The results have been brought together and issued in seven area and subject volumes.

The business establishments covered in the fields included in the Census of Business may be generally described as follows:

Retail trade.—Places of business primarily engaged in selling merchandise for personal, household or farm consumption;

Wholesale trade.—Establishments primarily engaged in selling goods to dealers and distributors for resale or to purchasers who buy for business uses; and,

Service.—Establishments engaged primarily in the sale of services as contrasted with the sale of merchandise.

The censuses taken for 1929, 1935, and 1939 included information on the distribution of manufacturers' sales showing the proportion of manufacturers' output flowing through various distribution channels. Similar information is not available for the 1948 Census.

The 1948 Census of Business, for the first time, incorporates information on retail warehouses and wholesale and retail administrative offices and other auxiliary units in basic tables. In the case of retail and wholesale trade, separate data for these units for States, metropolitan areas, and counties are presented in Area Bulletins. For service trade, no separate data for these units are presented, but statistics for them have been incorporated with data for operating establishments and are an integral part of all tables.

The most important differences in scope among the four Censuses of Business are to be found in the coverage of service enterprises. Service establishments for the most part were not included in the 1929 Census of Business. The 1933 Census of Business was expanded to include certain service enterprises. These can be broadly classified into the following five major groups: (1) personal services, such as barber shops, laundries, etc., (2) selected business services, (3) repair services, (4) places of amusement, and (5) hotels. The 1935 Business Census added a number of important businesses among which were banking and finance, motor transportation, real estate agencies, warehousing, insurance, and radio broadcasting. The types of business added in 1935 were dropped in 1939 along with a number of minor types of service business. The most significant changes in scope of the service phase of the 1948 Census of Business from the scope of the 1939 Census are exclusion (in whole or substantial part) of the 1939 Census groups entitled "Services Allied to Transportation," and "Custom Industries."

It is important, also, to take cognizance of the kind of businesses, broadly defined, not included in any Census of Business. Outstanding in this group are the business activities of doctors, lawyers, dentists, and others performing a professional or scientific service, educational institutions, religious or charitable institutions, hospitals and infirmaries, public utilities, and government operated enterprises. In the past, these types of economic activity have been omitted largely because of problems in obtaining information or because reasonably adequate data were already available from other sources.

Many of the tables shown in this section contain comparative data from the various Censuses of Business. Adjustments have been made in the figures to make allowances for the changes in scope among the various years compared.

CURRENT STATISTICS

Wholesale trade.—Monthly statistics on trends in sales and inventories of merchant wholesalers, by kinds of business and by geographic divisions, are compiled and published by the Bureau of the Census. These data are based on the reports of approximately 4,000 establishments. Using these survey data as a basis, monthly estimates of aggregate sales of wholesalers raised to national totals are prepared by the Bureau of Foreign and Domestic Commerce and published in the *Survey of Current Business*. The Census Bureau also publishes current data on stocks of canned foods at the wholesale level based on reports submitted by warehouses of retail food chains and a sample of food wholesalers.

Financial statistics relating to corporations in wholesale trade are available from the annual reports, *Statistics of Income*, published by the Bureau of Internal Revenue.

Current data on the production, movement, stocks, carry-over, receipts, and disappearances at principal markets, etc., for major agricultural commodities are available from the Production and Marketing Administration, Department of Agriculture.

As part of its investigations, the Federal Trade Commission has collected operating statistics on wholesalers as well as on the wholesale business of chains in various lines. Financial statistics on corporations engaged in wholesale trade whose securities are listed on the national securities exchanges are available from the Securities and Exchange Commission.

Retail trade.—The Bureau of the Census compiles and publishes estimates of the total dollar sales in retail stores by kind of business for the country as a whole. It also publishes data on trends in retail store sales by kind of business for the country as a whole and for selected areas, and for all retail trade combined for an additional group of cities and areas. These data are based on reports secured by mail from retail chain store and mail-order houses and the larger independent retail establishments, supplemented by an area sample of smaller retail establishments. These estimates of dollar volume of retail sales by kind of business are also published currently in the *Survey of Current Business*. The Census Bureau also conducts and publishes the results of an annual survey to determine retail sales-inventory ratios for kind of business for the country as a whole.

Indexes of department store sales and stocks are compiled by the Board of Governors of the Federal Reserve System and by each of the 12 Federal Reserve Banks for its district. These indexes are published monthly in the *Federal Reserve Bulletin* and also in the *Survey of Current Business*. Monthly and annual statistics on consumer credit are compiled by the Board of Governors of the Federal Reserve System and

published currently in the *Federal Reserve Bulletin*. Financial data for corporations engaged in retail trade and filing income tax returns are published by the Bureau of Internal Revenue in its annual report, *Statistics of Income*. Financial statistics on corporations engaged in retail trade whose securities are listed on the national securities exchanges are available from the Securities and Exchange Commission.

Service trades.—Typical of the numerous current statistical reports on personal and business services compiled by private agencies are the *Horwath Hotel Accountant*, *Printers' Ink*, and *National Advertising Records*. Financial statistics of service businesses derived from corporation income tax returns are compiled and published annually by the Bureau of Internal Revenue in its annual report, *Statistics of Income*. Current data on service trades are provided by the Bureau of Foreign and Domestic Commerce in its quarterly and annual estimates of consumption expenditures published in the *Survey of Current Business*.

Advertising.—Statistics shown here on advertising expenditures are compiled by private organizations. McCann-Erickson, Inc., which compiles the data shown on advertising expenditures, defines national advertising as that advertising done for companies whose products are distributed nationally, and for which national media rates are paid. Local advertising is defined as advertising done for companies which market their products locally and may pay special "local" media rates. Monthly figures are published regularly in *Printers' Ink*, in *Tide Magazine*, and also in the Department of Commerce *Survey of Current Business*.

NO. 1039.—WHOLESALE TRADE—SALES AND STOCKS: 1938 TO 1951

[In millions of dollars. Data revised to reflect new concepts used in 1948 Census of Business. For explanation of revisions, see *Survey of Current Business*, October 1951]

¹ Includes sales of certain milk dealers in the amount of \$130,000,000, not included in tables 1049 and 1057. Data for these concerns were received too late for inclusion in summary tables for 1929.

² Much of increase in sales from 1929 to 1939 results from change in classification. Garages primarily selling gasoline and oil were classified separately as garages in 1929 Census of Retail Trade and included in filling station category in 1939 Census of Retail Trade.

³ Not available.

¹ Central cities are those named in title of metropolitan area, with exception of New York-Northeastern New Jersey which includes New York, Newark, and Jersey City.

² Based on advance 1950 population estimates.

³ Per capita sales is ratio of 1948 sales to advance 1950 population estimates.

⁴ Not included in ranking of metropolitan areas by 1950 Census of Population.

No. 1065.—POWER LAUNDRIES, CLEANING AND DYEING ESTABLISHMENTS, AND RUG CLEANING ESTABLISHMENTS—SUMMARY: 1919 TO 1948

All money figures in thousands of dollars. Statistics for 1948 cover establishments reporting receipts of \$500 or more; statistics for 1939 cover establishments reporting receipts of \$100 or more; for preceding specified census years statistics cover establishments reporting receipts of \$5,000 or more. The Business Censuses of 1948 and 1939 classified establishments shown in this table as service establishments. (See also table 1064.) Statistics for 1935 and earlier years were compiled in connection with the Census of Manufactures. Rug cleaning was treated, in general, as an activity of the power laundry industry for 1929 and earlier years]

YEAR	Number of establishments	Proprietors and firm members	Salaried employees	Wage earners ¹ (average for year)	Salaries ¹	Wages ¹	Cost of supplies, fuel, and purchased electric energy	Cost of contract work	Receipts for work done

34. Comparative International Statistics

(Sent to print June 18, 1952)

This section, appearing for the first time in the *Statistical Abstract*, is necessarily preliminary both in content and form. Its purpose is to enable the user to compare the United States currently in a number of significant respects with other leading countries of the world.

Sources of data.—The statistics of the various individual nations may be found primarily in the official publications or compendia, generally in the form of Yearbooks, issued by most of the nations at various intervals in their own national languages, expressed in their customary national units of measurement. For handier reference, especially for international comparisons, the Statistical Office of the United Nations compiles and issues a number of international summary publications, generally in English and French. Among these, the annual *Statistical Yearbook*, the annual *Demographic Yearbook*, and the *Monthly Bulletin of Statistics* may be most helpful for both general and special users. The Statistical Office of the United Nations also publishes a *Yearbook of International Trade Statistics* and the *National Income Statistics of Various Countries*. For international agricultural statistics, the outstanding source is the *Yearbook of Food and Agricultural Statistics* which is published by the Food and Agricultural Organization of the United Nations.

The information shown in this section was obtained almost entirely from the *Statistical Yearbook, 1951*, a United Nations publication, prepared by the Statistical Office of the United Nations. To facilitate comparison in terms of familiar units, items shown in metric units in the source have been converted to U. S. equivalents by means of the conversion factors given in the *Statistical Yearbook* (see table of conversion factors, p. 922).

Countries and items shown.—Problems of space and availability (or nonavailability) of data are restrictive factors in this presentation of statistics for the various nations.

In particular, the space problem made it necessary to limit the number of countries for which statistics are shown on a somewhat arbitrary basis. The list of countries finally included, with the major exception of Japan, comprises all those who are members of the United Nations or are members of the larger agencies affiliated with the U. N. (see table 1085). In a few instances, such member countries were omitted because of an almost complete lack of data. Data for the United Soviet Socialist Republics have been included for those few items for which they were available. For the most part, however, official data for the U. S. S. R. have not been released since the prewar period.

It was further decided to show the statistics for a standardized list of countries, rather than attempt to vary the list according to the relative standing or significance of each country with respect to each specific subject item shown. In consequence, there may be instances, with respect to certain subject items shown, in which one or more of the countries omitted from the list are more important, statistically, than some of the countries included. However, cases of this kind are not believed to be numerous.

A high degree of selection also was necessary with respect to subject items included. The items shown here are believed to be among those more significant in reflecting the general industrial structure and the social level of a country.

Certain subject materials of basic import, such as those on national income, were omitted because of the inability to convert the available statistics, stated in terms of the national currencies, to meaningful consistency in United States measures. Finally, items for which figures were available for a large number of countries were favored over items for which information was scanty in order to broaden the scope of comparison as much as possible.

Quality and comparability of the data.—The quality and the comparability of the data presented here are affected by a number of factors which should be kept in mind:

(1) The data shown are for the latest year available for each country; the latest year, however, may vary from item to item for a particular country and within items for different countries. All such variations have been noted (see table headnotes) and should be taken into account. In most instances, the data shown are for calendar years. In a number of instances, however, the 12-month totals shown do not correspond with the calendar year. Problems of space unfortunately made it impracticable to present the data for a series of years.

(2) The bases, methods of estimating, methods of data collection, extent of coverage, precision of definition, scope of territory, and margins of error may vary from item to item within a particular country and within items for different countries. Footnotes and headnotes to the tables give some measure of the qualifications and differences attached to the figures. Again, the compelling limits of space made necessary some condensation and editing of the more detailed notes appearing in the source. The user is, therefore, cautioned to proceed with care in analysis and comparison, since, at best, many of the measures shown are merely rough indicators of magnitude.

(3) Figures shown in this section for the United States may not always agree with figures shown in the preceding sections. Such differences may be attributable to the use of differing original sources, a difference in the definition of geographic limits (continental United States only, or including certain territories and possessions), or to possible adjustments made in the United States figures by the United Nations in order to improve their comparability with figures from other countries.

Because of the many difficult problems inherent in bringing together summary statistics in this fashion, those readers who are interested in detailed comparisons should consult the publications of the United Nations mentioned above.

CONVERSION FACTORS

Metric units	U. S. equivalents
1 sq. km.....	0.386101 sq. mile
1 metric ton (1,000 kg.).....	1.102311 short tons
1 passenger-km.....	0.621370 passenger-mile
1 ton-km.....	0.684943 short ton-mile

No. 1077.—POPULATION, AREA, AND VITAL STATISTICS

[For many countries, 1950 figures are provisional. Basis and level of reliability of population estimates range from use of a continuous population register (Scandinavian countries, United Kingdom) and census enumerations for a recent date (most countries) to "counting procedures not comparable with a census" (China, Lebanon, Syria) and "conjectural estimates derived by other means than counting" (Ethiopia, Afghanistan). For some countries figures are for censuses taken at various dates during year (Costa Rica, Dominican Republic, Ecuador, El Salvador, Haiti, Honduras, Mexico, Nicaragua, Panama, Paraguay, Poland, Portugal, Turkey). Data, in general, refer to present-in-area population of the present territory. Area figures include inland waters. Crude birth rates, infant mortality rates, and death rates derived from data having complete or virtually complete coverage for many countries and incomplete coverage for others. **Crude birth rate:** Number of live births per 1,000 persons. **Crude death rate:** Number of deaths, exclusive of stillbirths, per 1,000 persons. **Infant mortality rate:** Deaths of infants under 1 year of age per 1,000 live births. Data exclude stillbirths. **Expectation of life:** Average future lifetime (in years) of persons at birth, if subject to mortality conditions of period indicated. See text, p. 921, for general comments concerning quality of the data. Years for which data are shown may vary from column to column and from country to country. Figures which are *not* for the year shown in the "year" column are prefixed by a letter to indicate the year represented as follows: a represents 1949; b, 1948; c, 1947; d, 1946; e, 1945; f, 1944; g, 1943; h, 1942; i, 1941; j, 1940; k, 1939]

¹ Excluding full-blooded aborigines.

² Data refer to Federal District and 13 cities.

³ Registration area only, representing 82.5 percent of total population of 1931 Census.

⁴ Excluding Yukon, Northwest Territories and Newfoundland.

⁵ Taiwan (Formosa).

⁶ Excluding tribal aborigines.

⁷ Excludes the Faeroe Islands.

⁸ Inhabited and cultivated area: 14,661 sq. mile; population per sq. mile 1,393.

⁹ Data relate to Finnish nationals in Finland.

¹⁰ Excluding war losses.

¹¹ Excluding infants dying within 3 days after birth without being registered as live births.

¹² The former British, French, and U. S. Zones of Occupation, except the Saar. Figures for expectation of life represent former British and U. S. Zones only.

¹³ Department of Guatemala only.

¹⁴ Data include Hyderabad (area 82,310 sq. mile; population 18.7 millions at 1951 Census) and Kashmir-Jammu (area 82,255 sq. mile; population estimated at 4.4 millions at March 1, 1950), although the political status of those areas is not yet determined.

¹⁵ Registration area.

¹⁶ Pre-partition India, including Burma.

¹⁷ Indonesian population of Java and Madura only.

¹⁸ Europeans only.

¹⁹ Jewish population only.

²⁰ Territory of Japan proper as of date; Japanese nationals only.

²¹ Excluding inland water.

²² Excludes Elten and Tüddern.

²³ Excluding Maoris.

²⁴ Registration area only; represents about 90 percent of total population.

²⁵ Excluding tribal Indians.

²⁶ Excluding jungle population.

²⁷ Excluding nomads.

²⁸ Bangkok municipal area.

²⁹ Estimate issued in 1946; refers to 1939 territory.

³⁰ In Europe, 1939 territory.

³¹ England and Wales. Data relate to civilian population.

³² Excluding tribal Indians estimated at 100,600 in 1941.

¹ Manufacturing relates to production (including repair work) in factories, and excludes mining, building and construction, and public utilities (gas, electricity and water supply).

² In general, single plants or factories.

³ Includes wage earners and salaried employees and represents average number engaged on production (excluding sales and distribution staff). Salaried employees include working proprietors and directing, managing, clerical, and technical staff.

⁴ Figures expressed in United States dollars of gold content fixed on Jan. 31, 1934, and refer to merchandise, including silver, in all forms, excluding gold and issued paper currency. Imports are generally valued c. i. f.; exports, f. o. b. Postal and governmental trade are generally included; war reparations and restitutions are generally excluded. Figures for United States are for "general trade." For other countries, figures shown are not distinguished here as to "general trade" or "special trade." Roughly half the countries fall into each category; see source publication for distinction as to categories. Comparability between countries is undoubtedly affected by this distinction.

⁵ Refers to gross holdings of gold of central banks, treasuries, exchange stabilization funds, and other official institutions as of end of period indicated. Gold used in payment of subscriptions to International Monetary Fund or International Bank for Reconstruction and Development are not included. Gold holdings reported at 35 dollars per fine troy ounce. U. S. data refer to holdings of treasury, and gold in active portion of stabilization fund.

⁶ In U. S. cents per unit of foreign exchange. Represents domestic par values or basic official rates for single rate countries, and range of significant rates for countries employing multiple rates. For fluctuating or market rates, data represent annual averages. For administratively determined or non-fluctuating rates, data represent, for any given period during which a change occurred, the rate in effect for major portion of that period. The exchange rates shown are not necessarily those used to convert trade figures to U. S. dollars.

⁷ Includes distribution and construction employees on payrolls of manufacturing establishments.

⁸ Imports valued f. o. b.

⁹ United States customs area including Alaska, Hawaii, Puerto Rico.

¹⁰ Wage earners.

¹¹ Establishments employing 4 or more persons or using mechanical power.

¹² Excluding E. R. P.

¹³ Including Luxembourg.

¹⁴ Including gold.

¹⁵ Minerals only.

¹⁶ Establishments in 22 State capitals having annual sales of not less than 100,000 cruzeiros.

¹⁷ Factories employing 20 or more wage earners.

¹⁸ Establishments having a capital of 100,000 pesos or more or production exceeding 250,000 pesos.

¹⁹ Including Formosa and part of Manchuria. January-July only. Excluding silver.

²⁰ Establishments employing 6 or more wage earners and with products valued at 6,000 pesos or more.

²¹ Currency maintained at par with United States dollar.

²² Establishments employing 6 or more wage earners. Excluding dairies and bacon factories but including their preserving and canning plants. Persons employed exclude home workers and working proprietors.

²³ Excluding trade with Anglo-Egyptian Sudan.

²⁴ Including Saar.

²⁵ Establishments employing 10 or more persons. Includes mining.

²⁶ Establishments employing 5 or more persons.

²⁷ Currency maintained at 2 units per United States dollar.

²⁸ Reporting establishments employing 20 or more wage earners and using power. Persons employed includes distribution staff of salaried workers.

²⁹ Excluding land trade.

³⁰ Excluding pipe-line exports of crude petroleum.

³¹ Excluding petroleum.

³² Establishments employing 5 or more wage earners.

³³ Including relief and army surplus.

³⁴ Includes public utilities.

³⁵ Included with Syria.

³⁶ Included with Belgium.

³⁷ Includes mining.

³⁸ Establishments employing 2 or more persons or using mechanical power.

³⁹ Establishments under Royal Office of Industrial Accident Insurance.

⁴⁰ Salaried employees.

⁴¹ Excluding Panama Canal Zone and national exports to the zone.

⁴² Registered establishments.

⁴³ Establishments employing 5 or more wage earners.

⁴⁴ Includes mining.

⁴⁵ Establishments employing more than 10 wage earners or having an installed capacity of more than 20 hp.

⁴⁶ Includes Lebanon. Jan. 1-March 15.

⁴⁷ Quotations for Syria and Lebanon.

⁴⁸ State-aided enterprises. Includes mining.

⁴⁹ Establishments employing 3 or more persons, using any form of mechanical power or using boilers for producing steam.

⁵⁰ Excluding Northern Ireland. Establishments employing 10 or more persons.

⁵¹ Includes United States and Canadian dollar holdings of the Exchange Equalization Account.

⁵² Excluding electrical products, precision instruments and miscellaneous industries.

⁵³ Excluding parcel post and air trade.

⁵⁴ Establishments employing 20 or more wage earners or having an installed capacity of 20 hp or more.

¹ Beet and cane. Figures expressed generally in terms of raw sugar. Most of series relate to a crop year beginning September of year shown.

² In terms of carcass weight; refers to beef and veal (including buffalo meat), pork, mutton, lamb (including, where possible, goat meat). Excludes lard, tallow, and edible offal. Figures relate to commercial and farm slaughter.

³ Represents net supply of foodstuffs, other than alcoholic beverages, available at retail level for human consumption within the country.

⁴ Excluding meat from abattoirs in the interior.

⁵ Commercial slaughter only.

⁶ Includes Luxembourg.

⁷ 22 provinces.

⁸ Excluding Formosa and Manchuria.

⁹ Including allowance for export of live animals.

¹⁰ Includes fat.

¹¹ Main crop only.

¹² Includes Pakistan.

¹³ Included with Belgium.

¹⁴ Included with India.

¹⁵ Excludes palm-sugar production estimated at 127,000 tons annually.

¹⁶ Centrifugal sugar only.

¹⁷ Azores and Madeira.

¹⁸ In provincial capitals.

¹⁹ Excluding meat from animals slaughtered in villages.

¹ Includes utilities (publicly and privately owned plants supplying energy to consumers), plus industrial, transport and other plants generating electricity primarily for their own use. Capacity represents nominal power of all generators available for simultaneous operation in hydroelectric and thermoelectric plants.

² Figures are provisional and refer to gross inland consumption of mineral fuels and water power. Computed mainly from data on production, trade and processing of major sources of energy, with allowance for, as far as possible, changes in stocks, and fuels loaded in bunkers of vessels and aircraft in international trade. Production data employed cover coal and lignite; petroleum, shale oil, natural gasoline and, when available, motor alcohol; natural gas; and hydroelectric power. Trade data include foregoing and derivatives: briquettes, coke (including petroleum coke), motor spirit (petrol, gasoline), kerosene, fuel oils, and, when available, benzols; manufactured and bottled gases; and electric power. In calculating consumption, duplication has been eliminated in all cases. Fuel wood and other vegetal fuels and peat omitted for want of adequate data although believed to provide a major share of energy supply in all but a few countries. Minimum amount of energy obtained from such sources estimated, for most countries, as equivalent to about 0.25 ton of coal per capita per annum.

³ Anthracite and bituminous coal (including semi-bituminous). Excludes lignite and brown coal.

⁴ Excludes natural gasoline and shale oil. In many cases figures represent conversions from original data expressed in units of capacity.

⁵ Including manganiferous iron ores but excluding pyrites. Data are sometimes only rough estimates obtained by applying a fixed percentage to figures for production of crude ores.

⁶ Total production of crude steel, both ingots and steel for castings, whether obtained from pig iron or scrap. Excludes wrought (puddled) iron.

⁷ Covers, as far as possible, both natural and artificial (portland, etc.) cements.

⁸ Excluding manganiferous iron ores.

⁹ Public utility plants only.

¹⁰ Including Luxembourg.

¹¹ Consumption in cities of Rio de Janeiro and Sao Paulo.

¹² Including Newfoundland.

¹³ Data included for Newfoundland cover fewer than 12 months.

¹⁴ Plants under Government control only.

¹⁵ Including lignite.

¹⁶ Excluding Formosa and Manchuria.

¹⁷ Excluding Manchuria.

¹⁸ Production by 3 principal enterprises.

¹⁹ Partial production only; coal transported by rail.

²⁰ Including wrought (puddled) iron.

²¹ Excluding Saar.

²² Including Saar.

²³ Production of the Anglo-Iranian Oil Co;

²⁴ Consumption in Baghdad.

²⁵ Sales.

²⁶ About 90 percent of total production.

²⁷ Excluding private plants of less than 500 kw.

²⁸ January-October.

²⁹ January-July.

³⁰ All of Korea, North and South.

³¹ Included with Belgium.

³² Including ferro-titanium.

³³ Cities of Panama and Colon.

³⁴ Consumption in cities of Lima and Callao.

³⁵ Manila only.

³⁶ Crude ore.

³⁷ Ingots and finished castings.

³⁸ Bangkok only.

³⁹ Including Basutoland, Bechuanaland, Swaziland and South-West Africa.

⁴⁰ Great Britain only; including production of railway and transport stations.

⁴¹ Great Britain only. Excluding coal produced at quarries but including open-cast coal.

⁴² Plants with installed capacity of 100 kw. or more.

No. 1081.—NET GEOGRAPHICAL PRODUCT BY INDUSTRIAL ORIGIN (PERCENT DISTRIBUTION)

[Net geographical product relates to the product of all industry within a nation's boundaries; it is given in this table at factor cost, and therefore equals the sum of factor incomes (wages, rent, profits, interest) paid by industry. Exceptions are listed in the footnotes. Estimates are not fully uniform from country to country in items of income covered and industrial classifications used. Some of the major differences are indicated in footnotes below. In general, "Agriculture" includes also forestry, hunting and fishing; "Manufacturing and construction" includes mining; "Trade" covers wholesale and retail distribution; "Transport and communications" includes public utilities; "Government" includes administration, defense and public services, but not public enterprises, which are classified under relevant industry; category "All others" comprises finance, insurance, real estate and personal and other nongovernment services. See text, p. 921, for general comments concerning quality of the data]

COUNTRY	Year	PERCENT BY INDUSTRIAL ORIGIN					
		Agriculture	Manufacturing and construction	Trade	Transport and communications	Government	All others

¹ Public enterprises classified under "Government."

² Gross geographical product at market prices. Services of dwelling houses excluded.

³ Includes income from black market transactions, interest on government debt paid within the country and miscellaneous transfer payments. Also some double-counting between items. Land rents included under "All others." Includes Southern Dobruja.

⁴ Excludes part of profits of mining industry.

⁵ Gross geographical product at factor cost. Slaughtering and dairy production included under "Agriculture."

⁶ Forestry classified under "Manufacturing and construction," professions and other service industries are under "Trade."

⁷ Private estimate, which should be regarded as very approximative.

⁸ Banking, insurance, restaurants, hotels, movie theaters classified under "Trade."

⁹ Public utilities classified under "Manufacturing and construction."

¹⁰ National product at market prices, including net income from abroad; excludes most personal and government services. Transportation services to business classified under "Trade" and those to persons under "All others." Figures relate to territory as of March 31, 1947, and cover year beginning July 1.

¹¹ Present area including Indian States.

¹² Part of activities of public authorities and transport concerns included under "Manufacturing and construction."

¹³ Postal services and armament expenditure excluded, but armed forces included.

¹⁴ Rent of farms classified under "All others."

¹⁵ Gross geographical product at market prices. Total deduction for intermediate services rendered by banks and insurance companies included under "All others."

¹⁶ Gross geographical product at market prices. Construction and miscellaneous services classified under "Transport and communications."

¹⁷ Net product at 1937 market prices; excludes most personal and government services.

¹⁸ Gross geographical product at factor cost. Trading profits of British companies engaged in extraction, refining and distribution of oil overseas included under "Trade."

¹ Figures relate to merchant fleets on June 30. They are given in gross registered tons (100 cubic feet or 2.83 cubic meters) and represent total volume of all permanently enclosed spaces of vessels to which figures refer. Only vessels of 100 gross tons and over are included. Excludes vessels without mechanical means of propulsion, but includes sailing vessels with auxiliary power. Excludes the following classes of ships, not entered in Lloyd's Register: Ships trading on Caspian Sea; wooden or composite ships trading on Great Lakes of North America.

² In general, represents sum of net registered tonnages of seagoing foreign and domestic merchant vessels (power and sailing) entered with cargo to a foreign port and refer to only 1 entrance for each foreign voyage including foreign commerce on inland waterways, such as Great Lakes. Excludes, if possible, "in ballast," i. e. entering without unloading goods.

³ Represents weight of all goods (including its packing) in external trade loaded to and unloaded from seagoing vessels of all flags at ports of country in question. Excludes mail, bullion, specie, passengers' baggage, bunkers, ships' stores, ballast, floating appliances when delivered as goods without being loaded on other ships, government stores when carried in government vessels or without revenue in merchant vessels, and transshipment (goods transhipped from an importing vessel to an exporting vessel). Includes goods unloaded into or loaded from bonded warehouse.

⁴ Relates to domestic and international traffic on all railway lines within each country shown except railways entirely within an urban unit and plantation, industrial, mining, funicular and cable railways. Passenger miles include all passengers except military, government and railway personnel when carried without revenue; ton miles relate to freight net ton miles and include all goods whether carried by fast or ordinary trains except service traffic, mail, baggage and nonrevenue government stores.

⁵ Covers both domestic and international scheduled services operated by companies registered in each country. Includes supplementary services occasioned by overflow traffic on regularly scheduled trips and preparatory flights for new scheduled services.

⁶ For years in which a census or registration took place, census or registration figure is shown; for other years officially estimated number of vehicles in use is shown. Includes passenger cars and commercial vehicles. Excludes trams, trolley-buses, special and government service vehicles, motorcycles, trailers, farm and road tractors.

⁷ Includes Great Lakes. ⁸ Includes Alaska, Hawaii, Puerto Rico, Virgin Islands.

⁹ Includes international traffic in Great Lakes. Excludes goods in transit and Department of Defense controlled imports and exports and commodities classified as "special category."

¹⁰ Including vessels in ballast. ¹¹ Including service traffic.

¹² Government railways. ¹³ State railways.

¹⁴ Operations of Sabena in Belgian Congo included.

¹⁵ Government vehicles included.

¹⁶ Excluding goods to and from bonded warehouse.

¹⁷ Excluding livestock.

¹⁸ Including nonrevenue traffic. ¹⁹ Including service traffic.

²⁰ Including vessels trading on Great Lakes (672,786 gross tons).

²¹ Great Lakes traffic included. ²² Including Newfoundland.

²³ Gross. ²⁴ Línea Aérea Nacional only.

²⁵ Nonscheduled operations of Civil Air Transport included.

²⁶ January–August. ²⁷ Nonrevenue traffic and non-scheduled flights included.

²⁸ Total imports and exports. ²⁹ All entrances counted. ³⁰ International ferry traffic excluded. ³¹ Danish share of Scandianavian Airways System included.

³² Including bunkers and ships' stores. ³³ Traffic of Air France only.

³⁴ Small vans included. ³⁵ Excluding occupation traffic.

³⁶ Excluding "Franco-Hellenique" lines.

³⁷ Domestic traffic of Hungarian line and foreign lines on Budapest route; foreign traffic of associated foreign lines.

³⁸ Special service vehicles included.

³⁹ Federal area only. ⁴⁰ Principal port only.

⁴¹ 2 principal railways, including some lines in North Ireland. ⁴² Excluding petroleum.

⁴³ Including Trieste. ⁴⁴ Excluding Trieste.

⁴⁵ Excludes wooden or composite ships with auxiliary power under 300 tons.

⁴⁶ Goods carried by steel vessels. Excluding military goods. ⁴⁷ Small size vehicles excluded.

⁴⁸ Including coastwise traffic. ⁴⁹ Port of Beirut only.

⁵⁰ Including floating appliances when delivered as goods without being loaded on ships.

⁵¹ Excluding suburban traffic. ⁵² Taxis included.

⁵³ Port of Manila only. ⁵⁴ Manila Railway Co. only.

⁵⁵ Excluding live animals. ⁵⁶ Including bunkers.

⁵⁷ Including Canary Islands and Spanish Morocco.

⁵⁸ Swedish portion of SAS included.

⁵⁹ Includes nonmilitary government vehicles.

⁶⁰ Foreign vessels only. ⁶¹ Main line railways.

⁶² Including British Colonies (except Hong Kong) and British dependencies (70 percent of gross tonnage).

⁶³ Including South-West Africa and Fryburg-Bulawayo line of Rhodesia railways.

⁶⁴ Including 411,000 tonnage on bare boat charter from U. S. A. and Canada.

⁶⁵ Excluding Northern Ireland.

⁶⁶ Includes service traffic carried on revenue-earning trains.

¹ Figures relate to number of public and private telephones (including extension instruments) connected to a central exchange.

² Figures cover, in general, all types of telegrams including cablegrams and radiograms, but exclude messages in transit.

³ Letters mailed for distribution within national territories. Figures cover letters (airmail, ordinary mail and registered), postcards, printed matter, business papers, small merchandise samples, small packets, and phonopost packets. Includes mail carried without charge, but excludes ordinary packages, and letters and packages with a declared value.

⁴ Publications devoted mainly to recording current events and appearing 6 or 7 times a week.

⁵ Figures relate only to stations broadcasting to the public; excludes service stations (e. g., aeronautical and naval stations). Each station counted for as many units as it possesses different transmitting frequencies (wave lengths).

⁶ Figures shown for most countries relate to number of licenses issued for receiving sets, figures which are estimates of number of sets actually in use are footnoted. In general, figures should be used with considerable caution as number of licenses falls, in varying degree from country to country, to represent full number in use. On the other hand, figures given for estimated number in use may in some cases be overstatements. Data apply to all types of sets for radio broadcasts to the public, including loud-speakers connected to a "radio redistribution system" but excluding television sets.

⁷ Includes messages to Canada, Mexico, St. Pierre, and Miquelon.

⁸ English language dailies only.

⁹ Estimates of number of sets actually in use.

¹⁰ All telegrams sent and received by land are counted as domestic. Letters sent include foreign.

¹¹ Including Faeroe Islands and Greenland.

¹² Number of newspapers appearing 4 to 7 times a week.

¹³ Including Algeria, Guadeloupe, Martinique, French Guianas, and Reunion.

¹⁴ Excluding Saar.

¹⁵ Includes Algeria.

¹⁶ 1951 data.

¹⁷ Excluding free licenses. A single license may cover several sets.

¹⁸ Includes Syria.

¹⁹ Including the Azores and Madeira.

²⁰ Comprising English language dailies and dailies in Afrikaans.

²¹ Includes combined sound-television sets.

No. 1084.—EDUCATION AND HEALTH

[**Education:** Figures usually refer to both official (public) and independent (private) schools, to school year beginning in year stated, and generally exclude adult education, evening classes, apprenticeship courses and correspondence schools; intercountry comparisons are subject to caution owing to variations in definitions employed and in scope of data; usually excludes (unless otherwise stated) nursery schools, kindergarten and other pre-school education. **Health:** Data do not allow of a close comparison between countries which present a similar standard, whether high or low, in respect of strength and character of their medical facilities. However, they may be used to judge approximate difference in standard between advanced and underdeveloped countries. Data for hospital beds usually refer to both private and public hospitals, nursing homes, infirmaries and dispensaries, but are not always quite complete. See text, p. 921, for general comments concerning quality of the data. Years for which data are shown may vary from column to column and from country to country. Figures which are not for the year shown in the "year" column are prefixed by a letter to indicate the year represented, as follows: a represents 1949; b, 1948; c, 1947; d, 1946; e, 1945; f, 1944; g, 1943; h, 1942].

¹ Unofficial percentages, calculated from official unit scale of assessments.

² Includes contributions for the following countries not shown separately: Byelorussian S. S. R., Cambodia, Hashemite Kingdom of Jordan, Laos, Monaco, Saudi Arabia, Southern Rhodesia, Ukrainian S. S. R., Viet Nam, Yemen.

³ Regular 1951 budget less \$6,521,000 estimated miscellaneous income, less \$1,315,573

plus \$2,966,408 adjustments in the 1950 budget and 1949 miscellaneous income, less Indonesia's

assessments of 60 percent less an estimated miscellaneous income of \$25,000.

⁴ Regular 1951 budget less an estimated miscellaneous income of \$25,000.

⁵ Regular 1951 budget less \$8,000 casual revenue, less \$132,000 appropriated from the

working capital fund, less \$90,000 appropriated from the general fund reserve.

⁶ Regular 1951 budget less supplementary receipts of \$50,000. Gross assessments against

which credits with respect to the 1947, 1948, and 1949 balances, and the working capital

fund are to be deducted for certain members in the amount of \$382,642.

⁷ Regular 1951 budget less credits of \$132,405. Certain member states who paid their

deposits to working capital fund in full on December 31, 1950, are due a refund as result

of the reduction in their percentages due to admission of new members.

⁸ Regular 1951 budget less UNRRA grant of \$202,475, and miscellaneous income of

\$8,500.

⁹ Indonesia's assessment was determined after adoption regular 1951 scale, and is, there-

fore, over and above normal scale.

¹⁰ Gross assessment. Due to credit of \$174,000 as result of adjustment of advances to

working capital fund on basis of 1951 scale of assessments, actual United States assess-

ment is \$16,394,244.

¹¹ Gross assessment. Due to credit of \$25,045 in respect of the 1949 balance, and credit

of \$93,420 in respect of the working capital fund, the actual United States assessment

is \$1,493,412.

¹² Gross assessment is \$2,870,000, offset by a credit of \$84,900, due to adjustment of

advances to working capital fund.

APPENDIX I

TABLE A.—HISTORICAL STATISTICS: 1949 TO 1951

[Comprises latest available figures for statistical time series shown in the historical supplement entitled *Historical Statistics of the United States, 1789-1945*. For 1946 figures, see table 1101 of 1949 *Statistical Abstract*; and for 1947 and 1948 figures, see App. I, table A of 1950 and 1951 *Statistical Abstracts*, respectively. In some cases, figures incorporate revisions received too late to make changes elsewhere in volume. Figures for 1951 are generally preliminary; 1949 and 1950 figures are subject to revision. Historical series are listed only where data are available for a year later than 1948. Asterisk (*) denotes series revised for earlier years; for revisions, see: App. I, table B; 1951 and 1950 *Abstracts*, App. I, table B; and 1949 *Abstract*, table 1102. Numbers in boldface (as A 100) are series numbers from historical supplement. "Abstract table No." gives number of table in this edition of the *Statistical Abstract*, in which recent figures appear, usually with more detail than can be shown in this appendix. Where no "Abstract table No." appears, the exactly corresponding series is not shown in this issue. "Earliest date" represents earliest year for which figures are shown in historical supplement. For general sources and qualifications of figures, see *Historical Statistics*]

¹ See revision table B, p. 1000. ² Not available.

³ Includes Corn Islands. ⁴ Based on 20 percent sample of reports received.

⁵ For detailed list, see table 3, p. 9.

⁶ Under jurisdiction of United States in accordance with treaty of Nov. 18, 1903, with Republic of Panama.

⁷ Advance tabulations from 1950 Census of population.

⁸ Refer to p. 2 for description of old and new urban and rural definitions.

⁹ Estimates based on sample of 1950 Census returns.

¹⁰ Includes armed forces outside continental United States.

TABLE A.—HISTORICAL STATISTICS: 1949 TO 1951—Continued

¹ Not available.

² See revision table B, p. 1001.

³ Per 1,000 population.

⁴ Based on population excluding armed forces overseas.

⁵ Estimated.

⁶ Series C 27a is a new series and is a substitute for series C 27 (total) which has been discontinued. For data for years prior to 1949, see table 64, p. 62.

⁷ Per 1,000 female population, computed by relating total births (regardless of age of mother) to female population 15 to 44 years.

⁸ Per 1,000 female population.

⁹ Per 1,000 live births.

¹⁰ Represents all fetal deaths reported, regardless of stated period of gestation.

¹ Includes Alaska except in series F 8.

² Excludes data for Alaska and Hawaii.

³ Excludes recreational demonstration areas.

⁴ Includes approximately 69 million acres of cropland used only for pasture.

⁵ Includes an estimated 34 million acres of arid woodland and brush land pasture.

⁶ Includes approximately 90 to 100 million acres of woodland and other brush land grazed.

⁷ Largely commercial forest land.

⁸ Includes urban areas, farmsteads, parks (including forest land in parks), railroads, roads, and non-agricultural areas, such as sand dunes, rocks, and desert land.

⁹ Excludes commuted homesteads.

¹⁰ Excludes area in Alaska, Hawaii, and Puerto Rico.

¹¹ Travel year is Oct. 1-Sept. 30.

¹² Remeasured in 1950.

TABLE A.—HISTORICAL STATISTICS: 1949 TO 1951—Continued

[Asterisk (*) denotes series revised for earlier years; for revisions, see: App. I, table B; 1951 and 1950 *Abstracts*, App. I, table B; and 1949 *Abstract*, table 1102. Figures for 1951 are generally preliminary; 1949 and 1950 figures are subject to revision. Also, see headnote, p. 940]

¹ Excludes Forest Highway Construction.

² Designated as "Reconstruction" beginning 1950.

³ Fiscal year data.

⁴ Includes cost sales which were shown separately in *Historical Statistics* as Series F 92, F 93.

⁵ Includes free use not reducible to board feet. Value as follows: 1949, \$21,270; 1950, \$20,468; and 1951, \$20,081.

⁶ Excludes payments to State of Minn. representing $\frac{3}{4}$ of 1 percent of appraised value of national forest land in Cook, Lake, and St. Louis Counties. Payments to State of Minn.: 1949, \$43,548; 1950, \$43,548; and 1951, \$44,810.

TABLE A.—HISTORICAL STATISTICS: 1949 TO 1951—Continued

Average per ton-----	G 18	846	Dollars-----	8.38	8.90	(1)	1890

¹ Not available. ² Contains 21 lbs. of solid pack tuna or 18 lbs. of tuna flakes.

³ Contains largely 48 ten-ounce cans of varying net weights. ⁴ Excludes production of acid scrap.

⁵ Series G 1a-5a are new series, substituted for series G 1-5 which have been discontinued. For comparison of series, see table 835, p. 687.

⁶ Coal, natural gas, natural gas liquids, and petroleum.

⁷ Includes some "bootleg" coal purchased by legitimate operators and prepared at their breakers.

TABLE A.—HISTORICAL STATISTICS: 1949 TO 1951—Continued

1 Includes some "bootleg" coal purchased by legitimate operators and prepared at their breakers.

2 Not available. 3 Data on portal-to-portal basis.

4 Series G 160a, G 163a, G 164a, G 166a-169a are new series, substituted for series G 160, G 163, G 164, G 166-169, which have been discontinued. Unit heat values employed are: Anthracite, 12,700 B. t. u. per pound; bituminous coal and lignite, 13,100 B. t. u. per pound; natural gas, 1,075 B. t. u. per cubic foot; and petroleum, 5,800,000 B. t. u. per barrel.

5 Assuming average central station practice for each year.

¹ Comprises substitute series for series H 40-46 for period beginning 1941 as shown in *Historical Statistics*. Whereas H 40a-46a exclude public temporary structures, series H 40-46 included such structures beginning 1941.

² Includes both private and public permanent units. Also includes prefabricated units. Excludes units in public temporary structures; also excludes conversions, dormitory accommodations, trailers, and military barracks. Estimates are based on building-permit records, which, beginning with 1945, have been adjusted for lapsed permits and for lag between permit issuance and start of construction. They are based also on reports of Federal construction contract awards and, beginning in 1946, on field surveys in nonpermit-issuing places.

³ Private construction costs are based on building permit valuation, adjusted for understatement of costs shown in permit applications. Public construction costs are based on contract values or estimated construction costs for individual projects.

⁴ Includes small amount of floor space reported for public works and utilities, not shown separately.

⁵ Not available.

⁶ Total construction and equipment. Average for 5 geographic divisions.

⁷ For payroll period ending nearest 15th of month and cover wage and salaried employees of private firms whose major activity is construction, but exclude self-employed construction workers, working proprietors, and force-account employees of nonconstruction firms and public agencies engaged in construction activities.

TABLE A.—HISTORICAL STATISTICS: 1949 TO 1951—Continued

¹ Data for 1949 are based on sample survey in April, conducted by Bureau of Census in connection with monthly Current Population Survey. Estimates are subject to a sampling variation that is large in relation to year-to-year changes presented, so that changes between successive years are not accurately reflected. Data for 1950 are based on preliminary sample from 1950 Census. Figures for nonfarm and farm units in 1950 not strictly comparable with figures for earlier years because of changes in procedure for determining farm residence. See text, p. 722.

² A "household," according to present usage of the Census Bureau, comprises all persons who occupy a dwelling unit, that is a house, an apartment or other group of rooms, or a room that constitutes "separate living quarters." Number of "occupied dwelling units" thus defined, is same as number of "private households" or "families" as the latter 2 terms were used in 1940 Census reports and in *Historical Statistics*.

³ Not available.

⁴ 1949 includes armed forces overseas; 1950 excludes armed forces overseas. 1950 total represents enumerated population as of Apr. 1; nonfarm and farm population figures based on a preliminary sample from 1950 Census of Population.

⁵ Nonfarm figures include, and farm figures exclude, small numbers of urban-farm dwelling units or households.

TABLE A.—HISTORICAL STATISTICS: 1949 TO 1951—Continued

[Asterisk (*) denotes series revised for earlier years; for revisions, see: App. I, table B; 1951 and 1950 *Abstracts*, App. I, table B; and 1949 *Abstract*, table 1102. Figures for 1951 are generally preliminary; 1949 and 1950 figures are subject to revision. Also, see headnote, p. 940]

¹ Calendar-year data.

² Not available.

³ As of Dec. 31.

⁴ Includes gliders.

⁵ Estimated.

⁶ Includes scheduled cargo carriers.

⁷ Rate computed on basis of total passenger fatalities and passenger-miles flown (revenue and nonrevenue).

⁸ Weights adjusted to current spending patterns.

¹ Not available.

² Although the entire U. S. investment in international institutions, including the subscription of \$687,500,000 in gold to the International Monetary Fund, is included in U. S. investments abroad, the gold held by international institutions or others in the United States is not included as a foreign investment in the United States.

³ No allowance has been made for write-offs and war damage to American properties in foreign countries.

⁴ Amounts include U. S. Government credits as shown in table 998 less net disbursements by agent banks on Export-Import Bank loans plus paid-in U. S. subscription of \$635 million to International Bank for Reconstruction and Development and of \$2,750 million to International Monetary Fund, plus various minor investments not considered Government aid. Loans by agent banks of Export-Import Bank are here included under private long-term portfolio investments abroad (M 7).

⁵ Erroneously shown as "gold stock net increase (+) or decrease (–)" in *Historical Statistics*.

¹ Series N 188a-191a are new series, substituted for series N 188-191 which have been discontinued.

² 1948 data not previously shown are as follows: N 197, 2.03; N 198, 2.53; N 199, 2.73; and N 200, 2.85.

³ More than usually liable to error.

⁴ Average of taxable bonds due or callable in 15 years and over.

⁵ Based on 11 stocks.

⁶ Prices derived from average yields in a list of 15 issues for municipal and 17 issues for corporate, on basis of a 4 percent 20-year bond.

⁷ Less than \$500,000.

TABLE A.—HISTORICAL STATISTICS: 1949 to 1951—Continued

Fermented malt liquors, including special taxes.	P 112	365	do.	690,797	672,195	669,471	1863

¹ All figures monthly averages.

² Series P 82a is a new series and is a substitute for series P 82-83 which are no longer available separately.

³ Average for school term.

⁴ Effective Jan. 3, 1949, amounts refunded by government, principally for overpayment of taxes, are being reported as deductions from total receipts rather than as expenditures. Also, effective July 1, 1948, payments to Treasury, principally by wholly owned Government corporations for retirement of capital stock and for disposition of earnings, have been excluded in reporting both budget receipts and expenditures.

⁵ Net receipts equal total receipts (series P 89) less appropriation to Federal old-age and survivors insurance trust fund and refunds of receipts.

⁶ Comprises railroad unemployment insurance contributions, proceeds of Government-owned securities, Panama Canal tolls, etc., proceeds from sales of surplus property, deposits resulting from renegotiation of war contracts, seigniorage, and other miscellaneous.

⁷ Include net expenditures of wholly owned Government corporations and agencies except, beginning with fiscal year 1951, their net investments in public debt securities.

⁸ For comparability with earlier years, all transactions relating to Foreign Economic Cooperation Trust Fund (amounting to \$3,000,000,000) have been consolidated with budget expenditures.

⁹ Title changed pursuant to act of July 26, 1947; subsequently includes expenditures of Department of Air Force. Expenditures for Office of Secretary of Defense included in series P 103 and P 107.

¹⁰ Figures for series P 109 exclude trust fund receipts; those for series P 109a through P 129 include trust fund receipts. Includes income tax on Alaska Railway.

TABLE B.—REVISIONS IN HISTORICAL STATISTICS FOR 1948 AND EARLIER YEARS

[Series numbers are as shown in table A, this appendix, and in *Historical Statistics of the United States, 1789-1945*. Figures are as provided by source agencies. Revisions for 1948 and earlier years are probably incomplete. In some instances, figures are included to fill cells left blank in *Historical Statistics* because data were not available when that volume went to press. Revisions shown are in addition to those presented in table 1102, 1949 Abstract and App. I, table B, 1951 and 1950 Abstracts. To bring *Historical Statistics* to date, consult table below and table A of this appendix; appendix I, tables A and B, 1951 and 1950 Abstracts; and tables 1101 and 1102, 1949 Abstract. See also Errata Sheet No. 1 (dated Mar. 31, 1950), available on request]

¹ Includes 1,504,000 bushels purchased by the Government under price support program and left in ground; included in computing price and value.

² Includes quantities unharvested or not marketed and excluded in computing price and value (1,000 bushels): 1928, 7,462; 1931, 66; 1932, 2,175; 1939, 1,240; and 1943, 440.

³ Footnote 1 in *Historical Statistics* should read "Estimates of the commercial crop refer to total production of apples in commercial apple areas of each State."

⁴ Footnote 3 should apply to production of both oranges and grapefruit in *Historical Statistics* and should read "Season begins with the bloom of the year shown and ends with the completion of harvest the following year. In California picking usually extends from about Oct. 1 to Dec. 31 of the following year. In other States, the season begins about Oct. 1 and ends in early summer."

Peanuts, green, in shell.....	22	9.98
Castor beans.....	60	22.68

APPROXIMATE WEIGHT OF PETROLEUM AND PRODUCTS

In the United States petroleum and its products are measured by bulk, not weight. Whether handled in containers or without them the quantities are customarily reduced to the equivalent of barrels of 42 United States gallons (barrel thus equals 158.984 liters). In many foreign countries these commodities are measured by weight. The specific gravity of the different grades of crude petroleum and of the finished products varies materially. On the basis of approximate averages the Department of Commerce in converting foreign weight statistics to gallons or barrels of 42 gallons uses the factors shown in the following table:

	WEIGHT OF UNITED STATES GALLON		WEIGHT OF BARREL OF 42 GALLONS	
	Pounds	Kilograms	Pounds	Kilograms
Crude petroleum.....	7.3	3.311	306.6	139.07
Lubricating oils.....	7.0	3.175	294.0	133.36
Illuminating oils (kerosene).....	6.6	2.994	277.2	125.74
Gasoline and related products (motor spirit, benzine, etc.).....	6.1	2.767	256.2	116.21
Fuel and gas oils.....	7.7	3.493	323.4	146.69

¹ Average of daily rates for part of year during which quotations were certified (see previous Abstracts for exact periods).² Based on quotations through Sept. 19, 1951.³ Prior to Nov. 1, 1942, official designation for Brazilian cruzeiro was milreis.⁴ As of Aug. 27, 1951, quotations on Straits Settlements dollar discontinued and quotations on Malayan dollar substituted. The 2 rates had been identical for a considerable period.⁵ Based on quotations through Oct. 26, 1951.⁶ Based on quotations beginning Oct. 29, 1951.⁷ Excludes Pakistan, beginning April 1948.⁸ Beginning October 1948, application depends upon type of merchandise.Source: Board of Governors of the Federal Reserve System; annual and monthly figures published in *Federal Reserve Bulletin*.

BIBLIOGRAPHY OF SOURCES OF STATISTICAL DATA

This bibliography contains under the various subject headings references to the important primary sources of statistical information for the United States. Secondary sources have been referred to if the information contained therein is presented in a particularly convenient form or if primary sources are not readily available. One-time studies presenting compilations or estimates for several years or new types of data not available in regular series are included.

Much valuable information will also be found in State reports and in reports for particular commodities, industries, or similar segments of our economic and social structure. However, because of the large number of such references, they are not included here.

Section references on the right-hand side of each page indicate where data from the report cited appear in the *Statistical Abstract*. Where current reports and a summary volume are both cited in the bibliography the section reference will often appear opposite the summary volume only. Reference to the sections indicated will enable the user to ascertain the type of information presented in the original source. However, it should not be assumed that all of the subjects from that source are summarized in the *Abstract*.

The location of the publisher of the report is given except for Federal governmental agencies located in Washington. Major inquiries, such as the Census of Population, are referred to by name rather than by specific volume references under the various topic headings. The final reports of the Seventeenth Census, which include those on the Censuses of Agriculture, Population, and Housing, are listed at the end of the bibliography together with the final reports of the 1948 Census of Business and the 1947 Census of Manufactures.

 Federal Reserve Bulletin. Monthly. (Also weekly, monthly, and annual releases on department stores; monthly releases on furniture stores, household appliance stores, and jewelry stores.) (Department stores, and consumer credit statistics.)----- 8, 11, 14, 16, 17, 28-31, 33
- U. S. Bureau of the Census:
 Annual Retail Trade Report.
 Census of Business. Decennial, 1930 and 1940; quinquennial, 1948, 1953, etc. Special censuses in 1933 and 1935 and a special survey for 1937-38. (Retail Trade, Wholesale Trade, Distribution of Manufacturers' Sales.)-- 33
 Monthly, Retail Trade Report.
 Monthly Wholesale Trade Report.
- U. S. Bureau of Foreign and Domestic Commerce:
 Consumer Market Data Handbook. 1939.
 Industrial Market Data Handbook of the United States. 1939.
 Industry Reports. Monthly, bimonthly, and quarterly series. Statistics on production, manufacturing, distribution, and consumption of specific commodities.
 Survey of Current Business. Monthly statistics and special articles. Biennial Supplement.----- 11, 14, 16, 17, 24, 26, 28-31, 33
- U. S. Bureau of Foreign and Domestic Commerce in cooperation with Bureau of the Census and Office of Price Administration:
 Fruit and Vegetable Canning Industries, 1934-35----- 30
- U. S. Bureau of Labor Statistics:
 Handbook of Labor Statistics, 1950 Edition----- 8, 12, 29
 Monthly Labor Review----- 8, 9, 11, 12, 16, 29, 33

Wholesale and Retail Trade—ContinuedAbstract
Sec. No.**U. S. Bureau of Labor Statistics—Continued**

Retail Prices. Release and periodic bulletins on annual average prices.

Monthly releases, "Consumers Price Index and Retail Food Prices,"

"Retail Food Prices by Cities," and "Retail Prices of Fuel by Cities"— 12

Wholesale Prices. Monthly release, "Average Wholesale Prices and Index

Numbers of Individual Commodities." Annual bulletin..... 12, 28

U. S. Council of Economic Advisers:

Economic Report of the President..... 11, 17

U. S. Securities and Exchange Commission:Survey of American Listed Corporations. (Individual industry reports
and statistical studies covering periods beginning 1934.)

Work Relief—see Social Security.

PUBLICATIONS OF MAJOR CENSUSES

[Each part of a volume in this list is a separate book or pamphlet. Preliminary bulletins, which were issued in advance of final reports, are not included in the list. A detailed catalog of Census publications is available upon request]

17th DECENNIAL CENSUS**Agriculture:**

Vol. I: Counties and State Economic Areas. Detailed statistics by counties and economic areas. Economic areas within each State comprise groups of counties having similar agricultural, demographic, and other characteristics. A series of 34 separately published parts, one for all New England States, one for all Middle Atlantic States, one for each of the other States, and one for the Territories and possessions.

Vol. II: General Report. Summary data and analyses by subjects for States, for geographic divisions, and for the United States. Subject matter chapters also issued as separate bulletins.

Vol. III: Irrigation of Agricultural Lands. State reports with statistics for counties and drainage basins, and a summary for the United States. State reports also issued as separate bulletins.

Vol. IV: Drainage of Agricultural Lands. Data for States, for counties, and for the United States.

Vol. V: Special Reports (3 parts).

Part 1. Horticultural Specialties.

Part 2. Multiple-Unit Operations.

Part 3. Ranking Agricultural Counties.

Housing:

Vol. I: General Characteristics. State Chapters also issued as separate bulletins.

Vol. II: Nonfarm Housing Characteristics. Chapters also issued as separate bulletins for the United States and the 9 Census divisions, and for each of the 152 standard metropolitan areas of 100,000 or more inhabitants.

Vol. III: Farm Housing Characteristics. Analytical data for the rural-farm segment of the dwelling-unit inventory; for 117 subregions of the United States. Each subregion is a group of two or more counties having relatively homogeneous agricultural conditions.

Housing—Continued

Vol. IV: Residential Financing. Financial characteristics of nonfarm mortgaged residential properties, for the United States, the 4 Census regions, and for the 25 largest standard metropolitan areas as measured by 1940 population figures (2 parts).

Part 1. United States.

Part 2. Standard metropolitan areas.

Vol. V: Block Statistics Bulletins. Separate reports for each of the 209 cities which had a population of 50,000 or more inhabitants in 1940, or in a subsequent special census prior to 1950. (These bulletins *not* bound in a single publication.)

Population:

Vol. I: Number of Inhabitants. General characteristics of the population by States, counties, standard metropolitan areas, urban places, and other constituent areas. State chapters also issued as separate bulletins.

Vol. II: Characteristics of the Population. A series of separately published parts, one for each State and the District of Columbia, a summary for the United States, and other parts for the Territories and possessions. Each part comprised of the following chapters: (A) Number of Inhabitants, (B) General Characteristics, and (C) Detailed Characteristics. Each of these chapters also issued separately as State bulletins.

Vol. III: Census Tract Statistics. Selected population and housing data by census tracts. 64 separate bulletins for tracted cities. (These bulletins *not* bound in a single publication.)

Succeeding volumes will cover the following subjects:

Nativity and Parentage, Nonwhite Population by Race, Persons of Spanish Surname, Institutional Population, Labor Force Characteristics, Occupation, Industry, Income, Mobility of the Population, Education, Characteristics of Families and Households.

1948 CENSUS OF BUSINESS

Subject and area volumes: Subject volumes include a United States Summary chapter, a separate chapter for each subject, a miscellaneous chapter, and a chapter on Territories (Alaska and Hawaii). Area volumes contain statistics for standard metropolitan areas, cities, and counties as well as for the United States, geographic divisions, and States.

Retail Trade:

Vol. I: General Statistics, Part 1.

Vol. II: General Statistics, Part 2, and Merchandise Line Sales Statistics.

Vol. III: Area Statistics.

Wholesale Trade:

Vol. IV: General Statistics and Commodity Line Sales Statistics.

Vol. V: Area Statistics.

Service Trade:

Vol. VI: General Statistics.

Vol. VII: Area Statistics.

Trade Bulletins (data for continental United States only):

The Grocery Trade.
Department Stores.
Variety Stores.
The Electrical Goods Trade.
The Automotive Trade.
The Drug Trade.
The Jewelry Trade.
The Apparel Trade.
The Furniture Trade.
The Lumber Trade.
The Hardware, Plumbing and Heating Equipment Trade.
Marketing by Producers of Basic Iron and Steel Products.
The Motion Picture Trade.
The Optical Goods Trade.

Census monograph: The Manufacturers' Agent as a Marketing Institution.

1947 CENSUS OF MANUFACTURES

Vol. I: General Summary. Detailed comparative statistics for industries and for geographic areas.

Vol. II: Reports for Industries. Also issued as 82 separate bulletins for approximately 460 industries.

Vol. III: Reports for States. Also issued as separate bulletins for each State and the District of Columbia.

Product Supplement. Data on shipments and/or production for more than 6,000 manufactured products.

Indexes of Production. Measures of the physical volume of 1947 production as compared with 1939 production for total manufacturing, for 20 major industry groups, and for approximately 200 individual industries.

Classes of Products, by State. Value of shipments by State for 890 classes of products.

INDEX

	Page		Page
Abrasives:		Agricultural products—Continued	
Manufacture, summary	767, 774	Foreign trade	609-611, 834
