<sup>1</sup> Total crop for processing converted to a canned basis by applying factors (cases of 24 No. 303 cans per ton, farm weight): Cucumbers for pickles, 112 cases for 1964, and interim years interpolated; cabbage for kraut, 54.0 cases for 1964, and interim years interpolated.

<sup>2</sup> Equivalent cases of 24 No. 303 cans.

<sup>3</sup> Preliminary.

<sup>4</sup> Includes combination vegetable juices containing at least 70 percent tomato juice.

Economic Research Service. Compiled mainly from reports of the National Food Processors Association.

## FOOTNOTES FOR TABLE 286

<sup>1</sup> Data for asparagus, lima beans, sauerkraut, and spinach are either estimates or interpolations.

<sup>2</sup> Actual cases.

<sup>3</sup> Canners' stocks of sauerkraut converted to cases by using a factor of 18 cases of 24/303's per barrel (of 45 gallons).

Economic Research Service. Compiled mainly from reports of the National Food Processors Association.

## FOOTNOTES FOR TABLE 288

<sup>1</sup> Preliminary.

<sup>2</sup> Included, with leafy, green, and yellow vegetables because most items included are considered to be greens.

Economic Research Service.

Table 283.—Vegetables, canned: Civilian per capita consumption (processed basis, net canned weight), United States, 1966–80<sup>1</sup>

## CHAPTER V

# STATISTICS OF FRUITS, TREE NUTS, AND HORTICULTURAL SPECIALTIES

For most fruits, production is estimated at two levels—total and utilized. Total production is the quantity actually harvested plus quantities not harvested primarily for economic reasons. Utilized production is the amount sold plus the quantities used at home or held in storage. The difference between total and utilized production is the quantity of mature fruit not harvested for economic reasons or excess cullage of harvested fruit. Losses from natural causes, such as windstorms, freezes, etc., are not included in production. Production relates to the crop produced on all farms, except for apples and strawberries. In accordance with Congressional enactment, the Department's estimates of apple production since 1938 have related only to commercial production. The estimates for strawberries cover production on area grown primarily for sale. Statistics on utilization of fruit by commercial processors refer to first utilization, not necessarily final utilization. For example, frozen fruit includes fruit which may later be used for preserves.

The price shown for each crop is a season average price for all methods of sales. Prices for most fresh fruit are the average prices producers received at the point of first sale, commonly referred to as the "average price as sold." Since the point of first sale is not the same for all producers, prices for the various methods of sale are weighted by the proportionate quantity sold. For example, if in a given State part of the fruit crop is sold f.o.b. packed by growers, part sold as bulk fruit at the packinghouse door, and some sold retail at roadside stands, the fresh fruit average price as sold is a weighted average of the average price for each method of sale.

The annual estimates are checked and adjusted at the end of each marketing season on the basis of shipment and processing records from transportation agencies, processors, cooperative marketing associations, and other industry organizations. The estimates are reviewed (and revised if necessary) at 5-year intervals, when the Census of Agriculture data become available. The Department's available statistics are limited to the major tree fruits and nuts and to grapes, cranberries, and strawberries, and exclude some States where census data indicate production is of only minor importance.

<sup>1</sup>For some crops in certain years, production includes some quantities unharvested for economic reasons or excess culage fruit. <sup>2</sup>Estimates of the commercial crop refer to production in orchards of 100 or more bearing-age trees.<sup>3</sup>Preliminary. <sup>4</sup>Year harvest was complete. <sup>5</sup>Prior to 1966, data for pineapple production was not included in this series. <sup>6</sup>Prior to 1970, growers marketing season for California lemons was from Nov. 1 to Oct. 31; beginning with the 1970 crop, it is August 1 to July 31. <sup>7</sup>Year of bloom. <sup>8</sup>Estimates discontinued after 1977 crop.

<sup>1</sup> Net processed weight.<sup>2</sup> Dried apricots are 12½ percent of total dried fruit for salad.<sup>3</sup> Dried fruit converted to unprocessed dry weight by dividing by 1.07. Unprocessed dry weight converted to terms of fresh fruit on the basis that 1 pound dried equals 5.5 pounds fresh. Canned apricots converted to terms of fresh on the basis that 1 pound canned equals 0.717 pounds fresh.<sup>4</sup> Year beginning October.<sup>5</sup> Not available.

## FOOTNOTES FOR TABLE 292

<sup>1</sup>In orchards of 100 or more bearing-age trees.<sup>2</sup>Preliminary.<sup>3</sup>Fresh fruit prices are equivalent packinghouse-door returns for Oregon and Washington, equivalent returns for bulk fruit at first delivery point for California, and the average price as sold for other States. Quantities processed are priced at the equivalent processing plant door level.

<sup>1</sup>Fresh fruit prices are equivalent packinghouse-door returns for Western States except equivalent returns for bulk fruit at the first delivery point for California sweet cherries, and the average price as sold for other States. Quantities processed are priced at the equivalent processing plant door level.

<sup>1</sup>Preliminary. <sup>2</sup>Fresh fruit prices are equivalent packinghouse-door returns for Oregon and Washington, equivalent returns for bulk fruit at the first delivery point for California, and the average price as sold for other States. Quantities processed are priced at the equivalent processing plant door level. <sup>3</sup>Estimates discontinued after 1978 crop.

<sup>1</sup>Season begins with the bloom of the first year shown and ends with completion of harvest the following year. For oranges, harvest in California usually starts in late October of the first year shown and continues into December of the following year. In other States, harvest of oranges begins about Oct. 1 and ends in early summer. Grapefruit harvest for the California Desert and for all other States begins in the fall and ends by early summer. Harvest of other California grapefruit begins in March of the year after bloom through October. California lemons are harvested from Aug. 1 to July 31; Arizona lemons are harvested from Aug. 15 to Feb. 1. Florida limes are picked mostly from April through March. Florida tangelos are harvested largely from October through April.

<sup>2</sup>Preliminary.

<sup>3</sup>Equivalent returns per box at the intake packinghouse door for all methods of sale.

<sup>4</sup>Navel and miscellaneous varieties in Arizona and California; early and midseason varieties in Florida and Texas, including small quantities of tangerines in Texas.

<sup>5</sup>Net content of box varies. Approximate averages are as follows: Oranges—Arizona and California, 75 pounds; Florida, 90 pounds; and Texas, 85 pounds; grapefruit—Arizona and California Desert, 64 pounds; other California areas, 67 pounds; Florida, 85 pounds; Texas, 80 pounds; lemons—76 pounds; limes—80 pounds; tangelos—90 pounds; tangerines—Arizona and California, 75 pounds; Florida, 95 pounds; and temples—90 pounds.

<sup>1</sup> 42° Brix through 1964; 45° Brix thereafter. Includes concentrated juice for manufacture.

Economic Research Service. Based on data obtained from Florida Citrus Processors' Association.

## FOOTNOTES FOR TABLE 318

<sup>1</sup> See footnote 1, table 319.<sup>2</sup> Equivalent returns per box at the intake packinghouse door for all methods of sale.<sup>3</sup> Includes quantities used for juice, concentrates, grapefruit segments, and other citrus products. In some seasons, includes appreciable quantities of oranges and lemons in California delivered to processing plants which were not utilized, but for which growers received payment.<sup>4</sup> Includes small quantities of tangerines in Texas. Excludes Florida temples.<sup>5</sup> Preliminary.

<sup>1</sup> Estimates relate to Massachusetts, New Jersey, Oregon, Washington, and Wisconsin.<sup>2</sup> Derived from total production.<sup>3</sup> Differences between utilized and total production are quantities unharvested for economic reasons or excess cullage and/or set-aside production under provisions of the Cranberry Marketing Order.<sup>4</sup> Average price of utilized production. Equivalent returns at first delivery point, screened basis of utilized production.<sup>5</sup> Mainly for canning.<sup>6</sup> Barrels of 100 pounds.<sup>7</sup> Preliminary.

<sup>1</sup>Fresh fruit prices are equivalent packinghouse-door returns for Washington, equivalent returns for bulk fruit at the first delivery point for California, and the average price as sold for other States. Quantities processed are priced at the equivalent processing plant door level. <sup>2</sup>Dried basis; 1 ton of raisins equivalent to about 4-4.5 tons of fresh grapes. Excludes table varieties dried. <sup>3</sup>Difference between total and utilized production reflects loss of California raisins laid but not harvested due to severe weather damage: 1976—65,000 tons (292,000 tons fresh equivalent); 1978—56,300 tons (248,000 tons fresh equivalent). <sup>4</sup>Preliminary.

<sup>1</sup>Preliminary. <sup>2</sup>Fresh fruit prices are equivalent packinghouse-door returns for Washington, equivalent returns for bulk fruit at the first delivery point for California, and the average price as sold for other States. Quantities processed are priced at the equivalent processing plant door level. <sup>3</sup>Price derived from unrounded data. <sup>4</sup>Fresh equivalent of dried and not dried. Difference between total and utilized production reflects loss of raisins laid but not harvested due to severe weather damage: 1978—56,300 tons (248,000 tons fresh equivalent). <sup>5</sup>Dried basis; 1 ton of raisins is equivalent to 4.40 tons fresh basis for 1978; 4.55 tons for 1979, and 5.22 tons for 1980. <sup>6</sup>Georgia and South Carolina.

<sup>1</sup> Fresh fruit prices are equivalent packinghouse-door returns for Western States except equivalent returns for bulk fruit at the first delivery point for California, and the average price as sold for other States. Quantities processed are priced at the equivalent processing plant door level.<sup>2</sup> Preliminary.

<sup>1</sup> Preliminary. <sup>2</sup> Fresh fruit prices are equivalent packinghouse-door returns for Western States except equivalent returns for bulk fruit at the first delivery point for California, and the average price as sold for other States. Quantities processed are priced at the equivalent processing plant door level. <sup>3</sup>Mainly for canning. Total production includes culls and cannery diversions not utilized as follows (million pounds): 120.0 in 1978, 90.0 in 1979, and 113.0 in 1980.

<sup>1</sup> Preliminary. <sup>2</sup>Fresh fruit prices are equivalent packinghouse-door returns for Oregon and Washington, equivalent returns for bulk fruit at the first delivery point for California, and the average price as sold for other States. Quantities processed are priced at the equivalent processing plant door level.

Statistical Reporting Service.

## FOOTNOTES FOR TABLE 344

<sup>1</sup> Net processed weight. <sup>2</sup>Canned peaches are 40 percent of total canned fruit for salad. <sup>3</sup>Dried peaches are 21 percent of total dried fruit for salad. <sup>4</sup>Beginning June 1965, exports of dried fruit converted to unprocessed dry weight by dividing by 1.08. Unprocessed dry weight converted to terms of fresh fruit on the basis that 1 pound dried equals 6.0 pounds fresh. Canned peaches converted to terms of fresh on basis that 1 pound canned equals about 1 pound fresh; 48 pounds fresh equals 1 bushel. <sup>5</sup>Year beginning October. <sup>6</sup>Not available.

<sup>1</sup> Net processed weight.<sup>2</sup> Dried pears are 16 2/3 percent of total dried fruit for salad.<sup>3</sup> Canned pears are 35 percent of total canned fruit for salad.<sup>4</sup> Canned pears converted to terms of fresh on the basis that 1 pound canned equals about 1.0 pound fresh. Dried pears converted to terms of fresh on the basis that 1 pound dried equals about 6.5 pounds fresh. 50 pounds fresh equals 1 bushel.<sup>5</sup> Year beginning October.<sup>6</sup> Not available.

Economic Research Service. Compiled from reports of the U.S. Department of Commerce.

| 1980 <sup>5</sup> | 76,600           | 76,600              | 180.00                       | 13,777                 | 41,100                         | 14,800                  | 18,500              | 2,200            |

<sup>1</sup> Idaho, Michigan, Oregon, and Washington. Mostly prunes; however, estimates include small quantities of plums in all States.

<sup>2</sup> Includes "Home use."

<sup>3</sup> Some quantities of frozen, dried, or otherwise processed are included in "Canned" to avoid disclosure of individual operations prior to 1969. Beginning 1969, some quantities dried or otherwise processed are included in "Frozen" until 1975. Beginning 1975, other uses included in "Dried."

<sup>4</sup> Not published to avoid disclosure of individual operations.

<sup>1</sup> Michigan, Idaho, Washington, and Oregon. Mostly prunes; however, estimates include small quantities of plums in all States.

<sup>2</sup> Includes "Home use."

<sup>3</sup> Some quantities otherwise processed are included to avoid disclosure of individual operations.

<sup>4</sup> Prices for fresh sales are average prices as sold for Idaho and Michigan; equivalent packinghouse door returns for Oregon and Washington. Quantities processed are priced at the equivalent processing plant door level.

<sup>5</sup> Not published to avoid disclosure of individual operations, but is included in total.

<sup>1</sup>Net processed weight.<sup>2</sup>Exports and imports of dried prunes converted to unprocessed dry weight by dividing by 1.04. Unprocessed dry weight converted to terms of fresh fruit on the basis that 1 pound dried equals 2.7 pounds fresh. "Otherwise prepared or preserved" converted to terms of fresh fruit on the basis that 1 pound equals 0.899 pound fresh.<sup>3</sup>Dried prunes in salad estimated at 43 percent of total dried fruit for salad.<sup>4</sup>Year beginning October.

<sup>1</sup> Use of car/carlot equivalents for reporting unloads of fresh fruits was discontinued at the close of calendar year 1977. Total unloads of specified commodities at 8 markets for 1963-1977 are published in carlot equivalents in *Agricultural Statistics*, 1978, table 369.

<sup>2</sup> Estimated percentages of completeness for reported truck unloads for 1980 are as follows: Atlanta and San Francisco 80; Baltimore 85; Philadelphia, Chicago, and Los Angeles 90; Boston 90-95; New York 95.

<sup>3</sup> Includes Newark.

<sup>4</sup> Includes Washington.

<sup>5</sup> Includes Oakland.

Agricultural Marketing Service.

Table 372.—Fruits, fresh: Total reported domestic rail, truck, and air shipments, 1980<sup>1</sup>

<sup>1</sup> Use of car/carlot equivalents for reporting shipments of fresh fruit was discontinued at the close of calendar year 1977. Rail and boat shipment totals of specified commodities for 1963-1977 are published in carlot equivalents in *Agricultural Statistics*, 1978, table 370. <sup>2</sup> Not otherwise specified.

Agricultural Marketing Service. Compiled from daily reports received from rail carriers, inspection service, and shipping points.

| 1980 <sup>4</sup> ..... | 3,975                      | 17.6                  | 5,140                      | 23.1                  | 651                       | 2.9                   | 2,919                                | 12.9                  |

<sup>1</sup>Fresh citrus fruits are on a crop-year basis. Dried fruits are on a pack-year basis. The per capita civilian consumption was obtained by dividing the total apparent civilian consumption by total population adjusted for members of the Armed Forces not eating out of civilian supplies.

<sup>2</sup>Excludes noncommercial apples.

<sup>3</sup>Apricots, avocados, bananas, cherries, cranberries, figs, grapes, nectarines, peaches, pears, pineapple, papayas beginning 1960, plums and prunes, strawberries, bushberries beginning 1970, and miscellaneous fruit beginning 1970.

<sup>4</sup>Preliminary.

<sup>5</sup>Apples, applesauce, apricots, berries, cherries (including brined), cranberries, figs, fruit cocktail and salad, canned and chilled citrus sections, olives (including brined), pineapple, plums, prunes, peaches (including spiced), and pears. Figs excluded after 1972.

<sup>6</sup>Grapefruit, orange, blended citrus, lemon and lime, tangerine and blends, pineapple, apple, grape, and prune juices, and fruit nectars. Includes canned concentrated citrus juices converted to single-strength basis, but excludes all frozen juices. Includes chilled orange and grapefruit juice.

<sup>7</sup>Dried apples, apricots, dates, figs, peaches, pears, prunes, and raisins. Excludes unmerchantable figs, substandard prunes, and prunes used for juice and concentrate. Data are in terms of processed dried weight.

<sup>8</sup>Principally cherries, apples, peaches, apricots, strawberries, other berries, and citrus juices.

Economic Research Service.

#### FOOTNOTES FOR TABLE 377

- <sup>1</sup>Includes the commercial pack only and does not include quantities produced in frozen food locker plants.  
<sup>2</sup>Connecticut, Maine, Massachusetts, New Jersey, New York, Pennsylvania, and Rhode Island.  
<sup>3</sup>Alabama, Arkansas, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, Missouri, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia.  
<sup>4</sup>Illinois, Indiana, Michigan, Minnesota, Nebraska, Ohio, and Wisconsin.  
<sup>5</sup>Arizona, California, Colorado, Hawaii, Idaho, Montana, Oregon, Utah, and Washington.  
<sup>6</sup>Includes pack in South.  
<sup>7</sup>Includes pack in Northeast.  
<sup>8</sup>Includes pack in Midwest.  
<sup>9</sup>Included with miscellaneous fruits and berries. Data for 1980 includes cantaloups, cranapple, cranberries, gooseberries, mixed fruit, Montmorency cherries, marionberries, and elderberries.  
<sup>10</sup>Calendar year estimate. (See table 323 for packs of concentrated grapefruit and orange juice in gallons, pack-year basis.)  
<sup>11</sup>Florida only.  
<sup>12</sup>Data for 1980 includes purees of apple, apricot, banana, cherry, black and red raspberry, boysenberry, loganberry, grape, melons, nectarine, peach, plum and strawberry.

<sup>1</sup> Equivalent wholesale value of all sales for all crops except foliage plants; for foliage plants, value is based on net value of sales.

<sup>2</sup> Unallocated to avoid disclosure of individual operations.

<sup>3</sup> Data for 1980 included with pompon chrysanthemums to avoid disclosure of individual operations.

<sup>4</sup> Data for 1980 includes small amount of standard chrysanthemums.

<sup>5</sup> Excludes value of sales from "open acreage" grown outdoors.

## CHAPTER VI

# STATISTICS OF HAY, SEEDS, AND MINOR FIELD CROPS

Chapter VI deals with hay, pasture, seeds, and various minor field crops. Table 420 shows the seeding rate for a number of specified crops. The State averages are based on surveys made in 1980. The United States average rates are derived by weighting the average for each State by the area planted to the particular crop. Rates are not shown for states where the crop is not estimated currently.

**Table 405.—Hay, all: Area, yield, production, disposition, and value, United States, 1966–80**

| Year              | Area harvested     | Yield per acre | Production        | Used on farms where produced | Sold              | Season average price per ton received by farmers | Value of production  |
|-------------------|--------------------|----------------|-------------------|------------------------------|-------------------|--|----------------------|

<sup>1</sup> Approximately 1,650 kernels per pound.

<sup>2</sup> Approximately 5,600 seeds per pound.

<sup>3</sup> Shelled basis (multiply by 1.33 to obtain unshelled basis).

<sup>4</sup> Fuzzy, non-delinted equivalent basis.

Statistical Reporting Service. United States average is rate of seeding weighted by final 1980 area planted, by States except for winter wheat and rye which are weighted by preliminary 1981 area planted in 1980.

Table 421.—Vegetable seeds: Imports admitted under the Federal Seed Act into the United States, 1977–80

| Kind of seed                  | Year beginning July |               |                   |                   | Kind of seed                       | Year beginning July |               |                   |                   |

# CHAPTER VII

## STATISTICS OF CATTLE, HOGS, AND SHEEP

This chapter contains information about most kinds of farm livestock and livestock products, with the exception of dairy and poultry. The information relates to inventories, production, disposition, prices, and income for farm animals, and to livestock slaughter (including horse slaughter), meat production, and market statistics for meat animals.

<sup>1</sup> Various dates of enumeration are used by the countries reporting animal numbers. Data presented in this table approximate Jan. 1 as closely as possible.

<sup>2</sup>Preliminary.

<sup>3</sup>50 States.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

## FOOTNOTES FOR TABLE 453

<sup>1</sup>Calves born during the year.

<sup>2</sup>Includes custom slaughter for use on farms where produced and State outshipments, but excludes interfarm sales within the State.

<sup>3</sup>Includes cattle shipped in from other States and from central markets, but excludes cattle for immediate slaughter.

<sup>4</sup>Cattle and calves combined beginning 1967.

<sup>5</sup>Preliminary.

<sup>6</sup>Adjustments made for changes in inventory and for inshipments.

<sup>7</sup>Receipts from marketings and sale of farm slaughter.

<sup>8</sup>"Cash receipts from sales of cattle, calves, beef, and veal" plus "Value of cattle and calves slaughtered for home consumption."

<sup>9</sup>Discontinued.

Table 450.—Calf crop: Cows and heifers that have calved and calves born, by States, 1979 and 1980

<sup>1</sup> Includes custom slaughter for use on farms where produced, State outshipments, but excludes interfarm sales within the State.

<sup>2</sup> Excludes custom slaughter for farmers at commercial establishments.

<sup>3</sup> Adjustment made for changes in inventory and for inshipment.

<sup>4</sup> Includes receipts from marketings and sales of farm-slaughtered meat.

<sup>5</sup> Includes cash receipts from sales of cattle, calves, and beef and veal plus value of cattle and calves slaughtered for home consumption.

Statistical Reporting Service.

<sup>1</sup> Total rail and truck receipts. Saleable receipts 1978 on.

<sup>2</sup> Rounded total of complete figures.

<sup>3</sup> The number of stockyards reporting varies from 41 to 68.

<sup>4</sup> Covers receipts at 14 packing plants and 30 concentration yards.

<sup>5</sup> Data no longer reported.

Agricultural Marketing Service. Compiled from reports received from stockyard companies.

<sup>1</sup> Balance sheet estimates by States; the sum of inventory December 1, 1979, pig crop and inshipments is equal to the sum of marketings, farm slaughter, deaths and inventory December 1, 1980.

<sup>2</sup> Includes custom slaughter for use on farms where produced and State outshipments, but excludes interfarm sales within the State.

<sup>3</sup> Excludes custom slaughter for farmers at commercial establishments.

<sup>4</sup> Adjustments made for changes in inventory and for inshipments.

<sup>5</sup> Includes allowance for higher average price of State inshipments of feeder pigs.

<sup>6</sup> Receipts from marketings and sale of farm-slaughter. Includes allowance for higher average price of State outshipments of feeder pigs.

<sup>7</sup> Cash receipts from sales of hogs, pork, and lard plus value of hogs slaughtered for home consumption.

<sup>1</sup> Number of bushels of corn required to buy 100 pounds of live hogs at local markets, based on average prices received by farmers for hogs and corn. Annual average is a simple average of monthly ratios.<sup>2</sup> Average of midmonth weighted prices.<sup>3</sup> Beginning 1968, marketing year average December through November.

<sup>1</sup> Lamb crop defined as lambs born in the native States, plus lambs docked or branded in the Western States for the period Oct. 1, through Sept. 30.

<sup>2</sup> Preliminary.

Statistical Reporting Service.

#### FOOTNOTES FOR TABLE 495

<sup>1</sup> Includes shearing at commercial feeding yards.

<sup>2</sup> For Texas and California, the weight per fleece is the amount of wool shorn per sheep and lamb during the year.

<sup>3</sup> Production multiplied by annual average price.

<sup>4</sup> Preliminary.

<sup>5</sup> Price per pound calculated by weighting monthly prices by monthly sales of wool for footnoted States. The prices for remaining States are annual averages.

<sup>6</sup> U.S. average price per pound derived using unrounded value and production.

Statistical Reporting Service.

Table 485.—Sheep and lambs: Production, disposition, cash receipts, and gross income, United States, 1966–80

| Year                    | Lamb crop <sup>1</sup> | Marketings <sup>2</sup> |            | Inshipments | Farm slaughter | Quantity produced (live weight) <sup>3</sup> |
|-------------------------|------------------------|-------------------------|------------|-------------|----------------|--|
|                         |                        | Sheep                   | Lambs      |             |                |  |
|                         | 1,000 head             | 1,000 head              | 1,000 head | 1,000 head  | 1,000 head     | 1,000 pounds                                 |
| 1966 .....              | 15,881                 | 2,785                   | 14,674     | 4,679       | 268            | 1,249,097                                    |

<sup>1</sup> Lamb crop defined as lambs born in the Native States, plus lambs docked or branded in the Western States for the period Oct. 1 through Sept. 30. <sup>2</sup> Includes animals custom slaughtered for use on farms where produced, but excludes interfarm sales within the State. <sup>3</sup> Adjustments made for changes in inventory and for inshipments.

<sup>4</sup> Preliminary. <sup>5</sup> Receipts from marketings and sale of farm-slaughtered meat. <sup>6</sup> Cash receipts from sales of sheep, lambs, and mutton and lamb plus value of sheep and lambs slaughtered for home consumption. <sup>7</sup> Discontinued.

Statistical Reporting Service.

<sup>1</sup> Includes custom slaughter for use on farms where produced and State outshipments, but excludes interfarm sales within the State.

<sup>2</sup> Excludes custom slaughter for farmers at commercial establishments.

<sup>3</sup> Adjustments made for changes in inventory and for inshipments.

<sup>4</sup> Receipts from marketings and sale of farm-slaughter.

<sup>5</sup> Cash receipts from sales of sheep, lambs, and mutton and lamb plus value of sheep and lambs slaughtered for home consumption.

<sup>6</sup> Decrease in inventory and the death loss of sheep resulted in a deficit number of pounds produced.

Statistical Reporting Service.

#### FOOTNOTES FOR TABLE 486

<sup>1</sup> Simple average of monthly bulk-of-sales prices from data of the livestock reporting service.

<sup>1</sup> Includes sheep shorn at commercial feeding yards.

<sup>2</sup> Price computed by weighting State average prices for all wool sold during the year by sales of shorn wool.

<sup>3</sup> Production by States multiplied by annual average price.

<sup>4</sup> Preliminary.

<sup>5</sup> Conversion factors from grease basis to clean basis are as follows: Shorn wool production—47.7 percent (Stat. Bull. 362) from 1966–1971, and 52.8 percent (Stat. Bull. 616) from 1972–1980; pulled wool production—72.9 percent.

<sup>6</sup> Includes carpet wool exports.

<sup>7</sup> Apparel wool includes all dutiable wool; carpet wool includes all duty-free wool.

<sup>8</sup> Production minus exports plus imports; stocks not taken into consideration.

Economic Research Service and Statistical Reporting Service. Imports and exports from reports of the U.S. Department of Commerce.

<sup>1</sup> Includes shorn wool, pulled wool, and wool exported on skins, with the latter two converted to a greasy basis. Wool produced in the spring in the Northern Hemisphere is combined with that produced in the season beginning July 1 or Oct. 1 of the same year in the Southern Hemisphere.

<sup>2</sup> Preliminary and subject to revision.

<sup>3</sup> Does not include pulled wool.

<sup>4</sup> Includes pulled wool converted to greasy basis using 1.7 as conversion factor.

<sup>5</sup> Includes Republic of South Africa, Lesotho, and Namibia (South-West Africa).

<sup>6</sup> Totals may not add due to rounding.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

Table 495.—Wool: Number of sheep shorn, weight per fleece, production, average price per pound received by farmers, and value of production, by States, 1978–80

<sup>1</sup> Average needed to bring the return up to the support level. The payment to an individual producer is computed by applying the announced percentage to his receipts from marketings of shorn wool.

<sup>2</sup> For unshorn lambs sold.

<sup>3</sup> Unadjusted for weight of unshorn lambs produced.

<sup>4</sup> Payments for wool produced during the year shown are made after Mar. 31 of the following year.

Agricultural Stabilization and Conservation Service.

<sup>1</sup> Wool grown in the range areas of Oregon, Washington, the intermountain States (including Arizona and New Mexico) and parts of the Dakotas, Kansas, Nebraska, and Oklahoma. These wools vary considerably in shrinkage and color.

<sup>2</sup> Most wool grown in the farm areas of the Dakotas, Nebraska, Kansas, Oklahoma, and parts of Minnesota, Wisconsin, Iowa, and Missouri is somewhat dark in color and of moderately heavy shrinkage. Most of that grown in the States which are east of the Mississippi river and in parts of Minnesota, Iowa, and Missouri is bright in color and of relatively light shrinkage.

<sup>3</sup> Beginning January 1970 reported as Australia Type 62-64's.

<sup>4</sup> Beginning January 1976, the unit designation terminology for wool prices changed to microns. For example, Fine good French combing and staple now reads as 64's (20.60-22.04 microns) Staple 2 1/4" and up French combing 2 1/4"-2 3/4". For fleece 3/8 blood good French combing and staple, there are now two designations as follows: 56's (26.40-27.84 microns) and 58's (24.95-26.39 microns) staple 3 1/4" and up. An average of the two is given in the price data here.

<sup>1</sup>Scoured wool, plus greasy wool converted to a scoured basis, using assumed average yields. Includes both pulled and shorn, foreign and domestic wool. Wool was considered as consumed (1) on the woolen system when laid in mixes and (2) on the worsted system as the sum of top and noil production.

<sup>2</sup>53 weeks.

<sup>3</sup>Preliminary.

<sup>4</sup>Domestic and duty-paid foreign.

<sup>5</sup>Excludes wool consumed on the cotton system and in the manufacture of felt, hat bodies, and other miscellaneous products.

<sup>6</sup>Beginning 1975, 50's up to 60's and 48's and coarser combined.

<sup>7</sup>Duty-free foreign.

Economic Research Service. Compiled from reports of the U.S. Department of Commerce.

<sup>1</sup>Wool not advanced in any manner or by any process of manufacture beyond washed, scoured, or carbonized condition. <sup>2</sup>Preliminary. <sup>3</sup>Beginning November 1977 duty-free wools include and are limited to all 46's and coarser grades of wool by Public Law 95-162. Beginning January 1978 Bureau of Census data combined duty-free 46's and dutiable 48's wools. In recent years prior to the combination, imports of 48's were negligible compared with 46's. <sup>4</sup>Finer than 58's beginning in 1978. <sup>5</sup>50's through 58's beginning in 1978. <sup>6</sup>Beginning in November 1977 duties were suspended through June 30, 1980. <sup>7</sup>Beginning in 1978 through June 30, 1980 the totals include all wools grading 48's and coarser except for named wools.

<sup>1</sup> Average needed to bring the return up to the support level. The payment to an individual producer is computed by applying the announced percentage to his receipts from marketing of mohair.<sup>2</sup> Payments for mohair produced during the year shown are made after Mar. 31 of the following year.

Agricultural Stabilization and Conservation Service.

<sup>1</sup> Carcass weight equivalent of beef and veal, pork, lamb, mutton and goat meat, and horse meat. Excludes fat, offals, and live animals.

<sup>2</sup> Preliminary.

<sup>3</sup> Less than 50 metric tons.

<sup>4</sup> Totals may not add due to rounding, and may include an allowance for missing data for countries shown.

<sup>5</sup> Estimate based on trading partner data.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

<sup>1</sup>Carcass weight equivalent or dressed weight. Beginning 1977, pork production was no longer reported as "pork, excluding lard." This series has been revised to reflect pork production in prior years on a dressed weight basis that is comparable with the method used to report beef, veal, and lamb and mutton. Edible offals are excluded.

<sup>2</sup>Preliminary.

<sup>1</sup> Condemnations for 1966–76 do not include ante-mortem cases of parts of carcasses. Beginning with 1977, condemnations include ante-mortem and post-mortem inspection. Beginning with 1980, condemnations are for the fiscal year ending September 30. Data reported by Food Safety and Inspection Service, USDA.

<sup>1</sup> For method of combining species and weights in construction of these index numbers see Agricultural Handbook No. 365, Volume II, major statistical series of the U.S. Department of Agriculture, April 1970. Weights based on 1977 sales values relative to milk cows are as follows: Milk cows, 1.00; beef cattle and calves, 0.71; hogs, 0.17; sheep and lambs, 0.07; chickens, 0.001; and turkey breeder hens, 0.014. Index computations for Jan. 1 uses turkey breeder hens, all chickens (excluding commercial broilers), and hogs and pigs on hand Dec. 1 preceding year.

<sup>2</sup> Weights for milk cattle are as follows: Milk cows, 1.00; heifers weighing 500 lbs. and over, 0.56.

## CHAPTER VIII

### DAIRY AND POULTRY STATISTICS

Dairy statistics in this chapter include series relating to many phases of production, movement, prices, stocks, and consumption of milk and its products. Two series of number of milk cows on farms are included in this publication. One series is an inventory number of a specific classification estimated as one of the major groups making up the total cattle population on January 1. The other series identified as "milk cows" is an annual average number of milk cows during the year (excluding any not yet fresh) and is used in estimating milk production.

In comparing the several series of milk prices, it is important to note that prices received by farmers for all whole milk sold are for milk or milkfat content as actually sold, while certain prices paid by dealers for milk for fluid purposes or for specified manufacturing purposes may be quoted on a 3.5 percent butterfat basis, or for some types of manufacturing milk on the test of the milk used for that particular purpose.

Poultry and poultry products statistics include inventory numbers of chickens by classes; the production, disposition, cash receipts, and gross income from chickens and eggs; poultry and egg receipts at principal markets; commercial broiler production; turkey production, disposition, and gross income; poultry and eggs under Federal inspection; and the National Poultry Improvement Plan. Estimates relating to inventories, production, and income exclude poultry and eggs produced on places not classified as farms.

<sup>1</sup> Represents multiple milk ring tests each year for the commercial dairy herd.<sup>2</sup> Includes an increasing proportion of herds tested each year because of suspicious milk ring or market cattle test results.<sup>3</sup> Percent of cattle infected based on results of tests conducted on farm and ranch, livestock markets, slaughter plants, and negative cattle represented under the milk ring testing program.<sup>4</sup> Includes the number of market cattle lots tested and found infected.

Animal and Plant Health Inspection Service.

Table 531.—Milk and milkfat production: Number of producing cows, yield per cow, and total quantity produced, United States, 1966–80

| Year              | Number of milk cows <sup>1</sup> | Production of milk and milkfat <sup>2</sup> |               |  |                       |                       |  |

<sup>1</sup>Excludes milk sucked by calves.<sup>2</sup>Includes milk produced by dealers' own herds, except for New York and California, where such milk is included as sold directly to consumers.<sup>3</sup>Sales directly to consumers by producers who sell only milk from their own herds; also includes milk produced by institutional herds.<sup>4</sup>For States not published, sales are nominal. Included in milk sold to plants.<sup>5</sup>Total milk sold plus used on farms does not equal total milk produced due to rounding.

Table 536.—Milk: Production and utilization in specified countries, 1978–80

| Country                  | Production |                    |                                    | Utilization <sup>1</sup> |         |        |
|--------------------------|------------|--------------------|------------------------------------|--------------------------|---------|--------|
|                          | Milk cows  | Production per cow | Total milk production <sup>1</sup> | Fluid milk               | Factory | Feed   |

<sup>1</sup>Preliminary.<sup>2</sup>Whole milk equivalent (milkfat basis) of net imports of dairy manufacturing ingredients such as frozen cream and butterfat-sugar mixtures.<sup>3</sup>Whole milk equivalent of net out-of-storage movement of fluid and plastic cream during the year. A negative figure represents a net movement of cream into storage.<sup>4</sup>Total evaporated and sweetened condensed, beginning 1970.<sup>5</sup>Without adjustment for imported butterfat-sugar mixtures which replaced butter and condensed milk used in ice cream.<sup>6</sup>Whole milk equivalent of dry cream, malted milk powder, part-skim milk, dry or concentrated ice cream mix, dehydrated butterfat, and other miscellaneous products using milkfat.

## utilization, United States, 1966-80

<sup>7</sup>Sales directly to consumers by producers who sell only milk from their own herds; also includes milk produced by institutional herds.

<sup>8</sup>Includes milk used for farm-churned butter, beginning 1970.

<sup>9</sup>Includes some milk used for other purposes on farms or not utilized.

<sup>10</sup>Includes minor miscellaneous uses and any inaccuracies in production and utilization estimates.

Statistical Reporting Service.

<sup>a</sup>Includes the equivalent amounts of milk for cream sold to plants and dealers.<sup>b</sup>Percentage of milk sold to plants and dealers that is eligible for fluid use (Grade A in most States). Includes fluid-grade milk used in manufactured dairy products.<sup>c</sup>Also includes milk produced by institutional herds.<sup>d</sup>Not published to avoid disclosing individual operations.<sup>e</sup>Based on unrounded value. Includes milk sold directly to consumers.<sup>f</sup>Cash receipts divided by milk or milkfat represented in combined marketings.<sup>g</sup>Valued at average returns per 100 pounds of milk in combined marketings of milk and cream.<sup>h</sup>Cash receipts from marketings of milk and cream plus value of milk used for home consumption and producer-churned butter.<sup>i</sup>Includes value of milk fed to calves.

Table 539—Marketings, income and value of milk production, United States, 1966-80

| Year              | Milk sold to plants and dealers       |                              |                      | Cream sold to plants and dealers <sup>1</sup> |                       |  | Milk sold directly to consumers |  |  |  |  |

<sup>1</sup> After 1978 equivalent amounts of milk included in milk sold to plants and dealers.<sup>2</sup> Preliminary.<sup>3</sup> Cash receipts divided by milk or milkfat represented in combined marketings.<sup>4</sup> Valued at average returns per 100 pounds of milk in combined marketings of milk and cream.<sup>5</sup> Cash receipts from marketings of milk and cream plus value of milk used for home consumption and producer-churned butter.<sup>6</sup> Includes value of milk fed to calves. For 1967, also includes value of milk used for other purposes on farms or not utilized.

Statistical Reporting Service.

## FOOTNOTES FOR TABLE 541

<sup>1</sup> All prices are f.o.b. factory. Geographic division prices are straight averages of monthly prices prior to 1977. U.S. prices represent weighted average prices of milk for evaporated milk.

<sup>2</sup> Idaho, Montana, Oregon, Washington, and Wyoming, through 1970.<sup>3</sup> Arizona, California, Colorado, Nevada, New Mexico, and Utah, through 1970.<sup>4</sup> Not shown separately to avoid disclosure of individual operations.<sup>5</sup> Pertains to entire North Central region beginning 1971.<sup>6</sup> Pertains to entire Western region beginning 1971.<sup>7</sup> Includes South Atlantic region beginning 1972.<sup>8</sup> Preliminary.

<sup>1</sup>In-area sales represent total sales in each of the areas by handlers regulated under the respective orders, by handlers regulated under other orders, by partially regulated handlers, and by producer-handlers. Sales routes of handlers may extend outside defined marketing areas; therefore, some handlers' in-area sales are partially estimated.

<sup>2</sup>Plain and flavored whole milk.

<sup>3</sup>Plain, fortified, and flavored skim and lowfat milk and buttermilk.

Agricultural Marketing Service. Compiled from reports of market administrators.

Table 544.—Milk cows, milk, and fat in cream: Average prices received by farmers, United States, 1966–80

| Year | Milk cows, per head <sup>1</sup> | Milk per 100 pounds <sup>2</sup>       |          |                        |          |                    |          | Milkfat in cream, per pound <sup>4</sup> |  |

<sup>1</sup> Simple average of monthly prices, by States, weighted by the number of milk cows on farms Jan. 1 of the current year.

<sup>2</sup> Average price at average fat test for all milk sold at wholesale to plants and dealers, based on reports from milk-market administrators, cooperative milk-market associations, whole-milk distributors, and milk-products manufacturing plants, f.o.b. plant or receiving station (whichever is the customary place for determining prices) before hauling costs are deducted and including all premiums.

<sup>3</sup> Milk eligible for fluid market, including surplus diverted to manufacturing.

<sup>4</sup> Weighted average of monthly prices, by States, weighted by the estimated quantity of fat sold.

<sup>5</sup> Estimate discontinued.

<sup>6</sup> Monthly average prices and tests weighted by estimated production in each month. Price f.o.b. factory or local receiving station (whichever is the customary place for determining prices) before hauling costs are deducted and including all premiums.

<sup>7</sup> Includes milk for canned condensed milk.

Table 545.—Dairy products: Factory production of specified items, by States, 1978–80

<sup>1</sup>Preliminary.<sup>2</sup>Includes full-skim American cheese beginning 1974.<sup>3</sup>Cottage cheese curd includes pot and bakers' cheese. Creamed cottage cheese contains not less than 4 percent milkfat. Lowfat cottage cheese contains less than 4 percent milkfat and has not been legal in interstate commerce, but, beginning 1972, is legal under Federal standards if its content of milkfat is not less than 0.5 percent and not more than 2.0 percent by weight.<sup>4</sup>Includes freezer-made milkshake in most States.

<sup>1</sup> Milk equivalent of fluid items—whole milk, low-fat fluid items, and cream—at the average annual fat test of milk produced. Civilian consumption is total consumption less military takings. Per capita consumption is based on the number of persons eating from civilian supplies.<sup>2</sup> Preliminary.

Economic Research Service.

<sup>1</sup>Total disappearance is based on production, imports, and change in stocks during the year. Production statistics for these commodities appear in other tables in this chapter. The total apparent civilian consumption was obtained by subtracting ending stocks, shipments, exports, and military takings from the total supply. The per capita civilian consumption for each year was obtained by dividing the total apparent civilian consumption by the number of persons eating out of civilian supplies.

<sup>2</sup>Includes both farm and factory-made butter.

<sup>3</sup>Includes all kinds of cheese except cottage and full-skim American.

<sup>4</sup>The evaporated milk is unskimmed, unsweetened, case goods. The condensed milk is unsweetened (plain condensed), unskimmed, bulk goods; and sweetened condensed milk, unskimmed, case and bulk goods.

<sup>5</sup>Preliminary.

<sup>1</sup> Marketing year changed from April–March to October–September on Oct. 1, 1977. <sup>2</sup> Percentage of the parity equivalent price for manufacturing milk and the parity price for butterfat as of the beginning of the marketing year.

<sup>3</sup> Announced purchase prices for products in bulk containers. <sup>4</sup> Indicated price is for Chicago (which represents an approximate U.S. average purchase price) based on New York prices less 80 percent of the lowest rail freight rate from Chicago to New York. <sup>5</sup> U.S. Grade A or higher, standard moisture basis. <sup>6</sup> U.S. Extra Grade, not more than 3.5 percent moisture content. Prices quoted are for product in 100-lb. bags, Nov. 4, 1955 through Aug. 18, 1967 and 50-lb. bags beginning Aug. 19, 1967. <sup>7</sup> Milkfat and nonfat solids content of butter, cheese, and nonfat dry milk purchased under price support and related programs. (Excludes purchases of fluid milk partly paid for by CCC under military and veterans milk program.) Includes purchases at market prices for domestic school lunch and welfare programs beginning with the 1966–67 marketing year and ending in the 1973–74 marketing year under Section 709 of the Food and Agriculture Act of 1965. Includes purchases with Section 32 funds for distribution to needy persons of evaporated milk beginning in the 1968–69 marketing year and purchases of dry whole milk during 1971–72 through 1974–75. Purchases were also made in 1973–74 through 1975–76 marketing year under Section 4 (a) of the Agriculture and Consumer Protection Act of 1973. <sup>8</sup> Effective June 30, 1966. <sup>9</sup> Effective Aug. 19, 1967. <sup>10</sup> Effective for product in 50-lb. bags, beginning Aug. 19, 1967. <sup>11</sup> Effective June 24, 1968. <sup>12</sup> Effective Nov. 28, 1968. <sup>13</sup> Effective Nov. 19, 1969. <sup>14</sup> Effective June 9, 1970. <sup>15</sup> Effective Nov. 20, 1970. <sup>16</sup> Effective Jan. 10, 1971. <sup>17</sup> The requirement to support butterfat was suspended by the Agricultural Act of 1970 and terminated by the Agriculture and Consumer Protection Act of 1973. <sup>18</sup> Effective Mar. 15, 1973. <sup>19</sup> Effective Aug. 10, 1973. <sup>20</sup> Effective Jan. 4, 1975. <sup>21</sup> Effective Oct. 2, 1975. <sup>22</sup> Effective Oct. 1, 1976. <sup>23</sup> Calendar year average. <sup>24</sup> Transition period. <sup>25</sup> Effective Apr. 1, 1978 (80 percent of parity as of that date). <sup>26</sup> Effective Apr. 1, 1979 (78 percent of parity as of that date). <sup>27</sup> Effective Apr. 1, 1980 (79 percent of parity as of that date).

<sup>1</sup> Excludes broilers. Annual production, disposition, cash receipts, and gross income for chickens are for a Dec. 1 through Nov. 30 marketing year.

<sup>2</sup> Loss during year.

<sup>3</sup> The quantity available for utilization during the year, i.e., sales plus home consumption plus or minus the change in inventory.

Statistical Reporting Service.

Table 569.—Chickens: Production, disposition, cash receipts, and gross income, United States, 1966-80<sup>1</sup>

<sup>1</sup> Year beginning July 1, 1979.<sup>2</sup> Not reported.

Animal and Plant Health Inspection Service.

## FOOTNOTES FOR TABLE 573

<sup>1</sup> Broilers are young chickens of the heavy breeds and other meat-type birds, to be marketed at 2-5 pounds live weight, and from which no pullets are kept for egg production. These figures are not included in farm production of chickens.

<sup>2</sup> Live weight equivalent price.<sup>3</sup> Includes value of consumption in households of producers, which is less than 1 percent of total production.<sup>4</sup> Commercial broilers were changed to a Dec. 1 through Nov. 30 marketing year, beginning 1970.<sup>5</sup> Preliminary.

<sup>1</sup> Whole carcass turkeys which have been injected, basted, marinated, smoked, or barbecued, and packaged as such.  
Beginning 1974, "Whole" and "Other" estimated separately.

<sup>2</sup> Poultry parts and fat used in further processing that cannot be identified by class are included in "Other poultry."

<sup>1</sup> Data cover both farm and commercial operations. Annual production, disposition, cash receipts, and gross income estimates for eggs are computed on a Dec. 1 through Nov. 30 marketing year.

<sup>2</sup> Valued at same price as eggs sold.

<sup>3</sup> Cash receipts plus value of home consumption may not add to gross income due to rounding.

<sup>4</sup> Less than one-half million eggs.

Table 593.—Eggs: Supply, distribution, and per capita consumption, United States, 1966–80<sup>1</sup>

| Year                    | Total egg production | Storage at beginning of the year <sup>1</sup> | Imports <sup>2</sup> | Exports and shipments to Territories <sup>2</sup> | Eggs used for hatching | Consumption                             |                       |                      |               |

## CHAPTER IX

### FARM RESOURCES, INCOME, AND EXPENSES

The statistics in this chapter deal with farms, farm resources, farm income, and expenses. Many of the series are estimates developed in connection with economic research activities of the Department.

For convenience the tables have been arranged in general groups. These groups, with the beginning table indicated, are as follows:

Economic trends table 596.

Farm property, table 597.

Population and employment, table 615.

Farm production and distribution, table 624.

Price and income, table 640

Costs and expenses, table 656.

**Table 596.—Economic trends: Data relating to agriculture, United States, 1966–80**

| Year           | Prices paid by farmers                          |                                     | Prices received by farmers          | Farm income                    |                        |                        |                        |  |

<sup>1</sup> A farm is defined as a place having sales of agricultural products of \$1,000 or more.<sup>2</sup> Preliminary.<sup>3</sup> Exclusive of grazing land leased from U.S. Government, Alaska farmland totals about 70,000 acres.

Statistical Reporting Service.

## FOOTNOTES FOR TABLE 601

<sup>1</sup> Cropland harvested, crop failure, and cultivated summer fallow.<sup>2</sup> Grassland and other nonforest pasture and range.<sup>3</sup> Excludes reserved forest land in parks and other special uses of land. Includes forested grazing land.<sup>4</sup> Includes urban and transportation areas. Federal and State areas used primarily for recreation and wildlife purposes, military areas, farmsteads and farm roads and lanes.<sup>5</sup> Remeasurement and increases in reservoirs account for changes in total land area except for the major increase in 1959 when data for Alaska and Hawaii were added.

Economic Research Service. Estimates based on reports and records of the U.S. Departments of Agriculture and Commerce, and public land administering and conservation agencies.

<sup>1</sup> Cropland harvested, crop failure, and cultivated summer fallow.<sup>2</sup> Grassland and other nonforest pasture and range.<sup>3</sup> Excludes reserved forest land in parks and other special uses of land. Includes forested grazing land.<sup>4</sup> Includes rural transportation areas, Federal and States areas used primarily for recreation and wildlife purposes, military areas, farmsteads, and farm roads and lanes.

Economic Research Service. Estimates based on reports and records of the U.S. Departments of Agriculture and Commerce, and public land administering and conservation agencies.

<sup>1</sup>All farmlands with improvements as of Feb. 1.

<sup>2</sup>Indexes for 1979–80 were estimated by combining survey data to obtain an average rate of change for these 4 mountain states.

<sup>3</sup>Indexes for 1981 were estimated using the average of the percentage changes in the Montana, Idaho and Colorado indexes.

<sup>4</sup>Based on an average for the six New England States.

<sup>5</sup>Value indexed up by the average of the percentage change in Alabama and Georgia index values beginning 1973.
