Introduction

Agricultural Statistics is published each year to meet the diverse needs for a reliable reference book on agricultural production, supplies, consumption, facilities, costs, and returns. Its tables of annual data cover a wide variety of facts in forms suited to most common use.

Inquiries concerning more current or more detailed data, past and prospective revisions, or the statistical methodology used should be addressed directly to the agency credited with preparing the table. Most of the data were prepared or compiled in the U.S. Department of Agriculture. A few tables were prepared in other Government agencies.

The historical series in this volume have been generally limited to data beginning with 1949 or 1950 or the most recent 10 years. However, many of the series carry a reference in the source note to the table in Agricultural Statistics, 1962, where comparable data for earlier years can be found. In the 1962 issue, historical tables showing totals for the United States begin with 1866 for the principal crops and with 1867 for January 1 livestock numbers, and most other basic tables showing national totals begin with 1929, 1934, 1939, or 1944 (livestock and poultry tables 1 year later) depending in part on the relative need for a long series.

These two publications should provide data for enough years to meet the needs of most users.

Agricultural data for Alaska and Hawaii are included in the appropriate tables, where available. Limited information is available for Alaskan agricultural production. Certain statistics for Hawaii are found in chapter XII.

U.S. foreign agricultural trade statistics include Government as well as non-Government shipments of merchandise from the United States and Territories to foreign countries. They do not include U.S. shipments to the U.S. Armed Forces abroad for their own use or shipments between the States and U.S. territories. The world summaries of production and trade of major farm products are prepared by the U.S. Department of Agriculture from reports of the U.S. Department of Commerce, official statistics of foreign Governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, and the result of office research.

Three types of data are included in this volume. Statistics presented in many of the tables represent actual counts of the items covered. Most of the statistics relating to foreign trade and to Government programs, such as numbers and amounts of loans made to farmers, and amounts of loans made by the Commodity Credit Corporation, etc., are data of this type. A large number of other tables, however, contain data that are estimates made by the Department of Agriculture, which in many cases are supplemented by a third type of data obtained in census enumerations.

The estimates for crops, livestock, and poultry made by the U.S. Department of Agriculture are prepared mainly to give timely current State and national totals and averages. They are based on "bench mark" data supplied by the Censuses of Agriculture taken every 5 years and on sample data supplied by farmers and by people who do business with farmers, together with check data from other sources. Being estimates, they are subject to revisions as more data become available from commercial or Government sources. Unless otherwise indicated, the totals for the United States shown

in the various tables on acreage, production, numbers, price, value, supplies, and disposition are based on official Department estimates. They exclude States for which no official estimates are compiled.

For census years, many tables carry both census totals and this Department's estimates. Generally, where there are appreciable differences between the census totals and this Department's final estimates, the processes of checking and revising estimates have indicated that some sources provide more nearly complete information about some items than the census has been able to obtain. For example, this Department's estimates of tobacco production can be considered more precise than census totals, because the estimates are revised in line with actual production as shown independently by Internal Revenue records and State records of tobacco sales. Sugarbeet and sugarcane production and acreage estimates are adjusted to quantities actually reported by sugar factories. Check information on peanuts and rice is available from processors for areas sometimes including several States. In a number of other instances allowances have been made for known incompleteness of coverage by the census.

For livestock and poultry, the Department's estimates of inventory numbers relate to January 1. Most recent censuses have not enumerated numbers on that date. The 1945 census was taken as of January 1, but with the trying wartime conditions, was delayed over a considerable length of time in a number of States with the result that reported inventory numbers did not always represent the actual January 1 inventory. The 1950 census was taken as of April 1 and the 1954 and 1959 censuses were taken in October and November. These situations have made it necessary to adjust census totals to a January 1 equivalent basis, taking into account changes that occurred between the January 1 date and the actual date of enumeration.

DEFINITIONS

"Farm value" as applied to crops in the various tables, is derived by multiplying production by the estimated season average price received by farmers for that portion of the commodity actually sold. In the case of fruits and vegetables, however, quantities not harvested because of low prices or other economic factors are excluded from the computation of farm value. The term is used in the inventory tables on livestock and poultry to mean value of the number of head on farms on January 1. It is derived by multiplying the number of head by an estimated value per head as of that date.

The word "Year" (alone) in a column heading means calendar year. "Ton" when used in this book without qualifications means a short ton of 2,000 pounds.

WEIGHTS, MEASURES, AND CONVERSION FACTORS

The following table on weights, measures, and conversion factors covers the most important agricultural products, or the products for which such information is most frequently asked of the U.S. Department of Agriculture. It does not cover all farm products nor all containers for any one product.

The information has been assembled from various sources within the Department and from State schedules of legal weights. For most products, particularly fruits and vegetables, there is a considerable variation in weight per unit of volume, due to differences in variety or size of commodity, condition and tightness of pack, degree to which the container is heaped, etc.

Effort has been made to select the most representative and fairest average for each product. For those commodities which develop considerable shrinkage, the point of origin weight or weight at harvest has been used.

The approximate or average weights as given in this table do not necessarily have official standing as a basis for packing or as grounds for settling disputes. Not all of them are recognized as legal weight. The table was prepared chiefly for use of workers in the U.S. Department of Agriculture who have need of conversion factors in statistical computations.

CONVERSION FACTORS

Commodity	Unit	Approximate equivalent
Apples	1 pound dried	7 pounds fresh; beginning 1943, 8 pounds fresh
Do	1 pound chops	5 pounds fresh
Do	1 case canned ³²	1.4 bushels fresh
Applesauce	1 case canned ³²	1.2 bushels fresh
Apricots	1 pound dried	6 pounds fresh
Barley	1 metric ton ²³	45.9296 bushels
Barley flour	100 pounds	4.59 bushels barley
Beans, lima	1 pound shelled	2 pounds unshelled
Beans, snap or wax	1 case canned ³⁴	0.008 tons fresh
Buckwheat flour	100 pounds	3.47 bushels buckwheat
Calves	1 pound live weight	0.557 pounds dressed weight, 1954-63 average
Cattle	do	0.561 pounds dressed weight, 1954-63 average
Cane syrup	1 gallon	5 pounds sugar
Cherries, sour	1 case canned ³²	0.023 tons fresh
Chickens	1 pound live weight	0.72 pound ready-to-cook weight
Corn	1 metric ton ²³	39.368 bushels
Corn, shelled	1 bushel (56 lbs.)	2 bushels (70 pounds) of husked ear corn
Corn, sweet	1 case canned ³⁴	0.030 tons fresh
Cornmeal:		
Degерmed	100 pounds	3.16 bushels corn, beginning 1946
Nondegermed	do	2 bushels corn, beginning 1946
Cotton	1 pound ginned	3.26 pounds seed cotton including trash ¹¹
Cottonseed meal	1 pound	2.10 pounds cottonseed
Cottonseed oil	do	5.88 pounds cottonseed
Dairy products:		
Butter	1 pound	21.1 pounds milk
Cheese	do	10 pounds milk
Condensed milk, whole	do	2.3 pounds milk
Dry cream	do	19 pounds milk
Dry milk, whole	do	7.6 pounds milk
Evaporated milk, whole	do	2.14 pounds milk
Malted milk	do	2.6 pounds milk
Nonfat dry milk	do	11 pounds liquid skim milk
Ice cream ³⁵	1 gallon	15 pounds milk
Ice cream ³⁵ (eliminating fat from butter and concentrated milk)	1 gallon	12 pounds milk
Eggs	1 case	47 pounds
Eggs, shell	do	39.5 pounds frozen or liquid whole eggs
Do	do	10.3 pounds dried whole eggs
Figs	1 pound dried	3 pounds fresh in California; 4 pounds fresh elsewhere
Flaxseed	1 bushel	About 2½ gallons oil
Grapefruit, Florida	1 case canned juice ³⁴	0.64 box fresh fruit
Hogs	1 pound live weight	0.579 pounds dressed weight excluding lard, 1954-63 average
Linseed meal	1 pound	1.51 pounds flaxseed
Linseed oil	1 pound	2.77 pounds flaxseed
Malt	1 bushel (34 lbs.)	1 bushel barley (48 lbs.)
Maple syrup	1 gallon	8 pounds maple sugar
Nuts:		
Almonds, imported	1 pound shelled	3½ pounds unshelled
Almonds, California	do	2.22 pounds unshelled through 1949; 2 pounds thereafter
Brazil	do	2 pounds unshelled
Cashews	do	4.55 pounds unshelled
Chestnuts	do	1.19 pounds unshelled
Filberts	do	2.22 pounds unshelled through 1949; 2.5 pounds thereafter
Pecans:		
Seedling	do	2.78 pounds unshelled
Improved	do	2.50 pounds unshelled
Pignolias	do	1.3 pounds unshelled
Pistachios	do	2 pounds unshelled
Walnuts:		
Black	do	5.88 pounds unshelled
Persian (English)	do	2.67 pounds unshelled
Oats	1 metric ton ²³	68.8944 bushels
Oatmeal	100 pounds	7.6 bushels oats, beginning 1943
Oranges, Florida	1 case canned juice ³⁴	0.63 box fresh
Peaches, California, freestone	1 pound dried	5½ pounds fresh through 1918; 6 pounds fresh for 1919-28; and 6½ pounds fresh from 1929 to date
Peaches, California, clingstone	do	7½ pounds fresh
Peaches, clingstone	1 case canned ³²	1.0 bushels fresh
Do	do	0.0230 tons fresh
Peanuts	1 pound shelled	1½ pounds unshelled
Pears	1 pound dried	6½ pounds fresh
Pears, Bartlett	1 case canned ³²	1.1 bushels fresh
Do	do	0.026 tons fresh
Peas, green	1 pound shelled	2½ pounds unshelled
Do	1 case canned ³⁴	0.009 tons fresh (shelled)

See footnotes on page VIII.

CONVERSION FACTORS—Continued

Commodity	Unit	Approximate equivalent
Prunes.....	1 pound dried.....	2.7 pounds fresh in California; 3 to 4 pounds fresh elsewhere
Raisins.....	1 pound.....	4.3 pounds fresh grapes
Rice, milled (excluding brewers).....	100 pounds.....	152 pounds rough or unhulled rice
Rye.....	1 metric ton ³³	39,368 bushels
Rye flour.....	100 pounds.....	2.23 bushels rye, beginning 1947
Sheep and lambs.....	1 pound live weight.....	0.482 pounds dressed weight, 1954-63 average
Soybeans.....	1 metric ton ³³	36,7437 bushels
Soybean meal.....	1 pound.....	1.27 pounds soybeans
Soybean oil.....	do.....	5.49 pounds soybeans
Sugar.....	1 ton raw.....	0.9346 tons refined
Tobacco.....	1 pound farm-sales weight.....	Various weights of stemmed and unstemmed, according to aging and the type of tobacco. (See circular 435, U.S. Dept. of Agr.)
Tomatoes.....	1 case canned ³⁴	0.018 tons fresh
Turkeys.....	1 pound live weight.....	0.80 pounds ready-to-cook weight
Wheat.....	1 metric ton ³³	36,7437 bushels
Wheat flour.....	100 pounds.....	2.30 bushels wheat ³⁷
Wool, domestic apparel shorn.....	1 pound greasy.....	0.48 pounds scoured
Wool, domestic apparel pulled.....	do.....	0.73 pounds scoured

¹ Standard bushel used in the United States contains 2,150.42 cubic inches; the gallon, 231 cubic inches; the cranberry barrel, 5,826 cubic inches; and the standard fruit and vegetable barrel, 7,056 cubic inches. Such large-sized products as apples and potatoes sometimes are sold on the basis of a heaped bushel, which would exceed somewhat the 2,150.42 cubic inches of a bushel basket level full. This also applies to such products as sweet-potatoes, peaches, green beans, green peas, spinach, etc.

² Approximate inside dimensions, 10 $\frac{1}{2}$ by 11 $\frac{1}{2}$ by 18 inches.

³ Approximate inside dimensions, 4 $\frac{1}{2}$ by 12 $\frac{1}{2}$ by 16 $\frac{1}{2}$ inches.

⁴ Approximate inside dimensions, 4 $\frac{1}{2}$ by 16 by 16 $\frac{1}{2}$ inches.

⁵ Approximate dimensions, 4 $\frac{1}{2}$ by 13 $\frac{1}{2}$ by 16 $\frac{1}{2}$ inches.

⁶ Approximate inside dimensions, 13 by 12 by 32.

⁷ Inside dimensions vary. Common sizes are 13 by 13 by 22 $\frac{1}{2}$ inches, and 13 by 15 $\frac{1}{2}$ by 23 inches.

⁸ Approximate inside dimensions, 13 by 18 by 21 $\frac{1}{2}$ inches.

⁹ Approximate inside dimensions, 13 by 13 by 22 $\frac{1}{2}$ inches.

¹⁰ This is the weight commonly used in trade practices, the actual weight varying according to temperature conditions.

¹¹ Approximate inside dimensions, 9 $\frac{1}{2}$ by 16 by 20 inches.

¹² Approximate inside dimensions, 4 $\frac{1}{2}$ by 11 $\frac{1}{2}$ by 14 inches.

¹³ The standard weight of 70 pounds is usually recognized as being about 2 measured bushels of corn, husked, on the ear, because it requires 70 pounds to yield 1 bushel, or 56 pounds, of shelled corn.

¹⁴ For statistical purposes the bale of cotton is 500 pounds or 480 pounds net weight. Prior to Aug. 1, 1946, the net weight was estimated at 478 pounds. Actual bale weights vary considerably, and the customary average weights of bales of foreign cotton differ from that of the American square bale.

¹⁵ This is the average weight of cottonseed, although the legal weight in some States varies from this figure of 32 pounds.

¹⁶ Approximate inside dimensions, 9 $\frac{1}{2}$ by 10 $\frac{1}{2}$ by 15 inches.

¹⁷ Approximate inside dimensions, 1 $\frac{1}{2}$ by 11 by 16 $\frac{1}{2}$ inches.

¹⁸ Approximate inside dimensions, 11 $\frac{1}{2}$ by 11 $\frac{1}{2}$ by 24 inches.

¹⁹ In California and Arizona from 1942 through 1953 the net weights as used by this Department were 77 pounds for oranges, 79 pounds for lemons, and 65 pounds for Desert Valleys grapefruit. Grapefruit in California areas other than the Desert Valleys averaged 68 pounds. The new weights effective in 1954 reflect the shift from the "box" to the $\frac{1}{2}$ box carton as the container used.

²⁰ Approximate inside dimensions, 10 $\frac{1}{2}$ by 10 $\frac{1}{2}$ by 16 $\frac{1}{2}$ inches for oranges or lemons, and 9 $\frac{1}{2}$ by 10 $\frac{1}{2}$ by 16 $\frac{1}{2}$ inches for grapefruit.

²¹ Approximate inside dimensions, 5 $\frac{1}{2}$ by 13 $\frac{1}{2}$ by 16 $\frac{1}{2}$ inches.

²² Approximate inside dimensions, 4 $\frac{1}{2}$ by 16 by 16 $\frac{1}{2}$ inches.

²³ Approximate inside dimensions, 7 $\frac{1}{2}$ by 16 by 21 $\frac{1}{2}$ inches.

²⁴ Approximate inside dimensions, 9 $\frac{1}{2}$ by 13 by 25 inches.

²⁵ Approximate inside dimensions, 12 by 12 by 24 inches.

²⁶ Approximate inside dimensions vary. Common size is 4 $\frac{1}{2}$ by 11 $\frac{1}{2}$ by 16 $\frac{1}{2}$ inches.

²⁷ Approximate inside dimensions, 8 $\frac{1}{2}$ by 11 $\frac{1}{2}$ by 18 inches.

²⁸ Approximate inside dimensions, 12 by 10 $\frac{1}{2}$ by 33 inches.

²⁹ Inside dimensions vary. Ranges from 4 by 16 by 16 $\frac{1}{2}$ inches to 6 by 16 by 16 $\frac{1}{2}$ inches.

³⁰ Includes both sorghum grain (kafr, milo, hegari, etc.) and sweet sorghum varieties.

³¹ This average of 55 pounds indicates the usual weight of sweetpotatoes when harvested. Much weight is lost in curing or drying and the net weight when sold in terminal markets may be below 55 pounds.

³² Case of 24 number 2 $\frac{1}{2}$ cans.

³³ 1 metric ton is equivalent to 2,204.6 pounds.

³⁴ Case of 24 number 303 cans.

³⁵ Varies widely by method of harvesting.

³⁶ The milk equivalent of ice cream per gallon is 15 pounds. Reports from plants indicate about 81 percent of the butterfat in ice cream is from milk and cream, the remainder being from butter and concentrated milk. Thus the milk equivalent of the milk and cream in a gallon of ice cream is about 12 pounds.

³⁷ This is equivalent to 4.51 bushels of wheat per barrel (196 pounds) of flour and has been used in conversions beginning July 1, 1957. Because of changes in milling processes, the following factors per barrel of flour have been used for earlier periods: 1790-1879, 5 bushels; 1880-1908, 4.75 bushels; 1909-17, 4.7 bushels; 1918 and 1919, 4.5 bushels; 1920, 4.6 bushels; 1921-44, 4.7 bushels; July 1944-Feb. 1946, 4.57 bushels; March 1946-Oct. 1946, average was about 4.31 bushels; and Nov. 1946-June 1957, 4.57 bushels.

CHAPTER I

STATISTICS OF GRAIN

This chapter contains tables for wheat, rye, rice, buckwheat, corn, oats, barley, sorghum grain, and feed stuffs. Estimates are given of acreage, production, farm disposition, prices, farm value, stocks, foreign production and trade, and price support operations. The United States tables on acreage, yield, production, value and foreign trade for the most part extend back to 1949. Data on earlier years are available from the 1962 Agricultural Statistics. Estimates in greater detail are published regularly by the Crop Reporting Board for commodities treated in this chapter.

Tables on popcorn are placed in chapter VI with "minor field crops". Corn sugar and corn sirup, however, are included in the corn tables.

Table 1.—Wheat: Acreage, yield, production, value, and foreign trade, United States, 1949–65

Year	Acreage seeded ¹	Acreage harvested	Yield per harvested acre	Production	Season average price per bushel received by farmers ²	Farm value	Average price per bushel, year beginning July, at—		Foreign trade, including flour, year beginning July ⁴

¹ Includes acreage seeded in preceding fall for harvest in the year shown.

² Obtained by weighting State prices by quantity sold. Includes allowance for unredeemed loans and purchases by the Government valued at the average loan and purchase rate, by States.

³ No. 2 Hard and Dark Hard Winter; computed by weighting selling prices by number of carlots sold, as reported in the Kansas City Grain Market Review.

⁴ No. 1 Dark Northern Spring; computed by weighting selling prices by number of carlots sold, as reported in the Minneapolis Daily Market Record.

⁵ Compiled from reports of the U.S. Department of Commerce. Wheat flour converted to grain equivalent on the following basis: 1949-June 30, 1957, 2.33; July 1, 1957-June 30, 1964, 2.30; and July 1, 1964 to date, 2.28 bushels of grain to 100 pounds of flour.

⁶ Includes flour milled from imported wheat. Excludes exports for relief or charity by individuals and private agencies.

⁷ Includes wheat imported for milling in bond and subsequent export.

⁸ Excludes some minor producing States and parts of other States where wheat was not asked separately.

⁹ Preliminary.

Statistical Reporting Service and Economic Research Service. Italic figures are census returns. Data for 1966-1948 in *Agricultural Statistics*, 1962, table I.

¹ All wheat acreage seeded includes winter wheat acreage abandoned and later reseeded to spring wheat for harvest in the same crop year.

² Acreage seeded in preceding fall for winter wheat.

³ Preliminary.

⁴ Includes Minnesota, North Dakota, South Dakota, Montana, and California.

⁵ Includes small quantities of durum wheat grown in States other than those mentioned in footnote 4.

Statistical Reporting Service. Winter wheat and spring wheat data for 1934–55 in *Agricultural Statistics, 1962*, table 2.

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere in 1965 is combined with preliminary forecasts for the Southern Hemisphere harvests which begin late in 1965 and end early in 1966.

² Harvested acreage as far as possible.

³ Preliminary.

⁴ Yield per acre calculated from acreage and production data shown.

⁵ Estimated totals include allowances for producing countries not shown.

⁶ Includes spelt (approximately 16,000 acres and 500,000 bushels).

⁷ Tentative unofficial estimates for production.

⁸ Previous estimates were on acreage planted. These and future estimates will be based on harvested acreage.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source material, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

Table 6.—Wheat: Production, seed used, and farm disposition, United States, 1956–65

¹ Ground at the mill for home use or exchanged for flour. Discontinued after 1960.² Preliminary.

Statistical Reporting Service. Disposition of a given year's production regardless of time of actual disposition. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes. Data for 1934–55 in *Agricultural Statistics, 1962*, table 6.

Table 7.—Wheat: Production, seed used, and farm disposition, by States, crop of 1965 (preliminary)

Statistical Reporting Service. Disposition of a given year's production regardless of time of actual disposition. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes.

Table 8.—Wheat and wheat flour: United States imports, 1955–64

Year beginning July	Wheat		Flour (wheat equivalent) *	Other products (wheat equivalent) *	Total wheat, flour, and other products	Wheat for mill- ing in bond and export as flour
	Suitable for milling ¹	Unfit for human consumption				
1955	<i>1,000 bushels</i> 960	<i>1,000 bushels</i> 8,710	<i>1,000 bushels</i> 90	<i>1,000 bushels</i> 173	<i>1,000 bushels</i> 9,933	<i>1,000 bushels</i> 75
1956	916	6,536	92	239	7,783	115
1957	838	9,722	94	293	10,947	41

1961	819	4,612	92	362	5,885	0
1962	802	4,251	90	413	5,556	0
1963	710	2,877	89	653	4,329	0
1964	747	96	73	1,042	1,958	0

¹ Imports of wheat of milling quality have been limited to a quota of 800,000 bushels per year since May 29, 1941, of which 795,000 may come from Canada. Quantities in excess of the 800,000-bushel quota represent quota-free imports of seed wheat authorized by Presidential Proclamation 2550, April 16, 1942.

² Imports of flour have been limited to a quota of 4,000,000 pounds per year since May 29, 1941, of which 3,815,000 pounds may come from Canada (total quota is 93,200 bushels, wheat equivalent). Flour for special experimental purposes may be imported ex-quota.

³ Consist of such products as macaroni, spaghetti and similar products, wheat cereal breakfast foods, bread and biscuits, semolina, and prepared mixes.

Economic Research Service. Data for 1939–54 in *Agricultural Statistics, 1962*, table 8.

¹ Represents recorded sales by signatory exporting countries to signatory importing countries during August 1964–July 1965 under terms of the International Wheat Agreement.

² Mexico is a signatory country, but no purchases were reported in 1964–65. The U.S.S.R. ceased to export to member importing countries after small sales at the beginning of the crop year.

³ Based on shipments, not sales.

⁴ For half the crop year only, beginning with accession Feb. 1, 1965.

⁵ Less than 500 bushels.

Agricultural Stabilization and Conservation Service.

¹ Owned by Commodity Credit Corporation and stored in bins or other storage owned or controlled by CCC. Other Commodity Credit Corporation-owned wheat included in the estimates by positions.

² Include full-duty wheat, wheat imported for feed, and dutiable flour and other products in terms of wheat. Exclude wheat imported for milling in bond and export as flour.

³ Included with "Interior mill, elevator, and warehouse."

⁴ Preliminary.

⁵ Includes flour and other products in terms of wheat.

⁶ Food use is computed as follows: Total grind (commercial and noncommercial) less exports and shipments of flour and other wheat products, less military procurement, plus estimated breakfast food produced outside the flour milling industry, plus dutiable imports of flour and other wheat products.

⁷ Quantity of wheat used for the production of distilled spirits and beer.

⁸ Residual item; roughly approximates total use as feed, including that used in commercial feed as well as that fed on farms.

⁹ Procurement for military food use at home and abroad.

¹⁰ Include exports for relief or charity by individuals and private agencies.

¹¹ Total disappearance represents total supply minus year-end carryover.

¹² Includes an allowance for donations of bulgur and rolled wheat not reported by Bureau of the Census.

Economic Research Service. Foreign trade data from reports of the U.S. Department of Commerce and U.S. Department of Agriculture. Military procurement from the National Military Establishments. Data for 1939-54 in *Agricultural Statistics*, 1962, table 11.

¹ Markets are Chicago, Minneapolis, Kansas City, St. Louis, Omaha, and Duluth.² Basic export selling price of Australian Wheat Board, bulk f.o.b. basis. Prices are for both International Wheat Agreement quota and "free" wheat.³ Prior to 1960, short patents.

Economic Research Service. Compiled as follows: Grain Market News (C&MS); Minneapolis Daily Market Record; St. Louis Daily Market Reporter; Kansas City Grain Market Review; Chicago Board of Trade; New York Journal of Commerce; Canadian Grain Statistics; The Wheat Industry of Australia and Bureau of Labor Statistics Wholesale Price Bulletin. Minneapolis, St. Louis, Kansas City, and Chicago are weighted averages. Foreign prices are compiled in original currencies and units. Prices converted to cents per bushel of 60 pounds at current monthly rates of exchange as reported by the Federal Reserve Board. Data for 1939–54 in *Agricultural Statistics*, 1962, table 15.

Table 17.—Wheat: Price support operations, United States, 1956–66

¹ Includes rye sown in preceding fall and in the spring of year shown.² Obtained by weighting State prices by quantity sold. Includes allowance for unredeemed loans and purchases by the Government valued at the average loan and purchase rate, by States.³ Averages of daily prices weighted by carlot sales, as reported in the Minneapolis Daily Market Record.⁴ Compiled from reports of the U.S. Department of Commerce. Rye malt converted to grain on the basis of 1 bushel of grain to 1 bushel of malt.⁵ Rye malt not separately reported.⁶ Includes rye malt.⁷ Excludes some minor producing States and parts of other States where rye was not asked separately.⁸ Preliminary.Statistical Reporting Service and Economic Research Service. Italic figures are census returns. Data for 1924-48 in *Agricultural Statistics, 1962*, table 17.

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere in 1965 is combined with preliminary forecasts for the Southern Hemisphere harvests which began late in 1965 and ended early in 1966.

² Refers to harvested acreage as far as possible.

³ Preliminary.

⁴ Yields per acre calculated from acreage and production data shown.

⁵ Estimated totals, which in the case of production are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown.

⁶ U.S.S.R. official reports of production appear to be overestimated and have been adjusted.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

Statistical Reporting Service. Disposition of a given year's production regardless of time of actual disposition. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes.

Table 25.—Rye: Price support operations, United States, 1956–66

¹ Estimates discontinued in 1965.² Obtained by weighting State prices by quantity sold.³ Compiled from reports of the U.S. Department of Commerce. Buckwheat flour converted to grain equivalent on the basis of 7 bushels of grain to 1 barrel of flour.⁴ Includes shipments under the Army Civilian Supply Program.⁵ Excludes some minor producing States.⁶ Beginning January 1958, not separately reported.Statistical Reporting Service and Economic Research Service. Italic figures are census returns. Data for 1924–48 in *Agricultural Statistics*, 1962, table 34.

¹ Preliminary.Statistical Reporting Service. Disposition of a given year's production regardless of time of actual disposition. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes. Data for 1934–55 in *Agricultural Statistics, 1962*, table 44.

FOOTNOTES FOR TABLE 42

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which follow; thus the crop harvested in the Northern Hemisphere in 1965 is combined with preliminary forecasts for the Southern Hemisphere harvest which began early in 1966.² Refers to harvested acreage as far as possible.³ Preliminary.⁴ Yield per acre calculated from acreage and production data shown.⁵ Estimated totals, which in the case of production are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown.⁶ Production on European holdings only.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

¹ Owned by CCC and stored in bins or other storage owned or controlled by CCC.² Compiled from reports of the U.S. Department of Commerce. Imports include grain equivalent of corn-meal and flour; exports are grain only.³ Beginning Oct. 1, 1960, terminal market and interior mill, elevator, and warehouse stocks combined.⁴ Preliminary. Rough allowance for 1965-66 imports.⁵ Estimated quantities (based on Census data) used in making prepared breakfast foods.⁶ Estimated quantities used in producing cornmeal, flour, hominy grits and flakes for human food and for the production of fermented malt liquors. Based on reports of the U.S. Department of Commerce and the Internal Revenue Service. Does not include corn processed for livestock feed.⁷ Starch, sirup, sugar, etc. Compiled from data of Price Waterhouse and Company and Dun and Bradstreet. New York.⁸ Compiled from data of the Internal Revenue Service. Data derived by converting grain and products to bushel equivalent.⁹ Based on acreage planted to the following crop.¹⁰ Residual; includes some other minor uses and waste.¹¹ Total disappearance, minus exports of corn and grain equivalent of products.¹² Beginning 1961, not reported.Economic Research Service. Data for 1939-54 in *Agricultural Statistics*, 1962, table 47.

¹ Estimates of seeded acreage relate to the total acreage of oats sown for all purposes, including oats sown in the preceding fall.

² Obtained by weighting State prices by quantity sold. Includes allowance for unredeemed loans and purchases by the Government valued at the average loan and purchase rate, by States.

³ Compiled from reports of the Chicago Board of Trade; average of daily quotations for No. 2 white, weighted by carlot sales.

⁴ Compiled from reports of the Department of Commerce. Oatmeal converted to grain equivalent on the basis of 1 bushel of grain to 13.17 pounds of meal.

⁵ Includes shipments under the Army Civilian Supply Program.

⁶ Includes "oats, unhulled, ground."

⁷ Excludes some minor producing States and parts of other States where oats were not asked separately.

⁸ Preliminary.

Statistical Reporting Service and Economic Research Service. Italic figures are census returns. Data for 1866-1948 in *Agricultural Statistics, 1962*, table 52.

¹ Preliminary.

Statistical Reporting Service. Disposition of a given year's production regardless of time of actual disposition. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes. Data for 1934–55 in *Agricultural Statistics, 1962*, table 55.

Statistical Reporting Service. Disposition of a given year's production regardless of time of actual disposition. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes.

FOOTNOTES FOR TABLE 53

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere in 1965 is combined with preliminary forecasts for the Southern Hemisphere harvests which will begin late in 1965 and end early in 1966.

² Refers to harvested acreage as far as possible.

³ Preliminary.

⁴ Yield per acre calculated from acreage and production data shown.

⁵ Production and yield reported in bushels of 34 pounds.

⁶ Estimated totals, which in the case of production are rounded to millions, includes allowances for any missing data for countries shown and for other producing countries not shown.

⁷ U.S.R.R. official reports of production appear to be overestimated and have been adjusted.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

¹ Owned by CCC and stored in bins or other storage owned or controlled by CCC. Additional CCC stocks are included in other off-farm positions.² Compiled from reports of the U.S. Department of Commerce. Imports include grain equivalent of oatmeal; exports are grain only.³ Beginning July 1, 1961, terminal market and interior mill, elevator, and warehouse stocks combined.⁴ Preliminary. Rough allowance for 1965–66 imports.⁵ Used in production of oatmeal and other cereal preparations. Based on reports of the U.S. Department of Commerce.⁶ Based on area seeded to the following crop.⁷ Residual; includes other minor uses and waste.⁸ Total disappearance minus exports of oats and grain equivalent of oatmeal.Economic Research Service. Data for 1939–54 in *Agricultural Statistics, 1962*, table 58.

¹ Estimates of seeded acreage relate to the total acreage of barley sown for all purposes, including barley sown in the preceding fall.

² Obtained by weighting State prices by quantity sold. Includes allowance for unredeemed loans and purchases by the Government valued at the average loan and purchase rate, by States.

³ Price of No. 3 barley; average of daily prices weighted by carlot sales, as reported in the Minneapolis Daily Market Record.

⁴ Compiled from reports of the U.S. Department of Commerce. Barley flour converted to grain equivalent on the basis of 22.032 pounds of flour to 1 bushel of grain. Barley malt converted to grain equivalent on the basis of 1 bushel of grain to 1 bushel of malt.

⁵ Includes shipments under the Army Civilian Supply Program.

⁶ Excludes some minor producing States and parts of other States where barley was not asked separately.

⁷ Preliminary.

Statistical Reporting Service and Economic Research Service. Italic figures are census returns. Data for 1924-48 in *Agricultural Statistics, 1962*, table 61.

Statistical Reporting Service. Disposition of a given year's production regardless of time of actual disposition. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes.

FOOTNOTES FOR TABLE 62

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere in 1965 is combined with preliminary forecasts for the Southern Hemisphere harvests which begin late in 1965 and end early in 1966.

² Refers to harvested acreage as far as possible.

³ Preliminary.

⁴ Yield per acre calculated from acreage and production data shown.

⁵ Estimated totals, which in the case of production, are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown.

⁶ U.S.R. official reports of production appear to be overestimated and have been adjusted.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

¹ Owned by CCC and stored in bins or other storage owned or controlled by CCC. Additional CCC stocks are included in other off-farm positions.

² Compiled from reports of the U.S. Department of Commerce. Both imports and exports include grain equivalent of barley products.

³ Beginning July 1, 1961, terminal market and interior mill, elevator, and warehouse stocks combined.

⁴ Preliminary. Rough allowance for 1965–66 imports.

⁵ Compiled from reports of the Internal Revenue Service. Includes small quantities of barley grain.

⁶ Principally for food uses.

⁷ Based on acreage seeded to the following crop.

⁸ Residual; includes other minor uses and waste.

⁹ Total disappearance, minus exports of barley grain and grain equivalent of malt exported.

Economic Research Service. Data for 1939–54 in *Agricultural Statistics, 1962*, table 66.

¹ Canadian oats in bushels of 34 pounds; data for other countries in bushels of 32 pounds.² Preliminary.³ Production small, and remaining stocks believed negligible.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information. Data for 1949-55 in *Agricultural Statistics, 1962*, table 71.

¹ All series, except flour and milled rice, revised from 1958 to date on the basis of the 1963 Census of Manufacturers. Beginning 1960, includes Alaska and Hawaii.

² Excludes quantities used in alcoholic beverages.

³ Includes white, whole wheat, and semolina flour.

⁴ Rice consumption for year beginning August previous to the year stated.

⁵ Corn used in food products, excluding alcoholic beverages. Includes an allowance for the quantity used as hominy and grits.

⁶ Oats used in oatmeal, prepared breakfast foods, infant foods, and minor food products.

⁷ Barley used in malt for human food and as pearl barley, excluding quantities used in alcoholic beverages.

⁸ Malt equivalent of barley food products.

⁹ Preliminary.

Economic Research Service. All figures are estimates based on data from private industry sources, the U.S. Department of Commerce, the Internal Revenue Service, and other government agencies. Data for 1909–48 in *Agricultural Statistics*, 1962, table 72.

¹ Grain and sweet sorghums for all uses, including sirup.

² Includes both grain sorghums for grain, and sweet sorghums for grain or seed.

³ Based on the reported price of grain sorghums. Obtained by weighting State prices by quantity sold. Includes allowance for unredeemed loans and purchases by the Government valued at the average loan and purchase rate, by States.

⁴ Dec. 1 price.

⁵ Dry weight.

⁶ Green weight.

⁷ Preliminary.

Statistical Reporting Service. Italic figures are census returns. Data for 1929–48 in *Agricultural Statistics*, 1962, table 73.

¹ October–September feeding year for all items except oats and barley carryover and production, which are for the July–June marketing year.

² Corn and sorghum grain Oct. 1; oats and barley July 1.

³ Corn (for grain only), oats, barley, and sorghum grain.

⁴ Imported grains and domestic wheat and rye.

⁵ Total byproduct feeds available for feeding.

⁶ Animal units fed during the October–September feeding year. For method of calculation, see Animal Units of Livestock Fed Annually, 1909–1964, U.S. Department of Agriculture Statistical Bulletin No. 337, September 1966.

⁷ Preliminary.

Economic Research Service. Data for 1926–48 in *Agricultural Statistics, 1962*, table 83.

¹ Beginning 1961, prices in Stockton, California.

Consumer and Marketing Service. Prices of corn and oats at Kansas City, Chicago, and Minneapolis were computed by weighting selling prices by reported number of carlots sold. Prices of barley and grain sorghum at Kansas City and of barley at Chicago and Minneapolis are average of prices at the close of each day. Prices at San Francisco and Stockton are the average of prices on one day each week. Data for 1939-54 in *Agricultural Statistics, 1962*, table 84.

¹ Based on prices of the following commodities at leading producing markets, weighted by average consumption: Soybean, cottonseed, linseed, copra, and peanut meals; bran, middlings, shorts and millrun; gluten feed and meal; hominy feed; brewers' and distillers' dried grains; alfalfa meal; rice bran, and feeding molasses.

Consumer and Marketing Service. Data for 1939-54 in *Agricultural Statistics, 1962*, table 85.

CHAPTER II

STATISTICS OF COTTON, SUGAR, AND TOBACCO

In addition to tables on cotton, sugar, and tobacco, this chapter includes tables on fibers other than cotton, sirups, sugar, honey, and beeswax. Most cottonseed data, however, are in the following chapter on oilseeds, fats, and oils.

Much of the information on cotton lint is given in terms of "running" bales. The term "running bale," when applied to weight, is the average weight of a bale as it comes from the gin; when applied to number, it is the number of bales actually ginned.

One new table has been added to this chapter showing micronaire readings in cotton classing.

Table 86.—Cotton: Acreage, yield, production, value, and foreign trade, United States, 1949–65

Year	Cotton							Cottonseed

¹ Census of Agriculture figures for all periods are in running bales. U.S. Department of Agriculture figures are in 500-pound gross-weight bales for all years.

² Gross weight price, including bagging and ties, except that extra long staple cotton is included at net weight. Includes allowance for unredeemed loans and purchases by the Government valued at the average loan and purchase rate, by States.

³ Prices for middling grades; 1½-inch staple, through July 1956; 1-inch staple beginning August 1956.

⁴ Compiled from reports of the U.S. Department of Commerce. Equivalent bales of 500 pounds gross weight.

⁵ Excluding linters.

⁶ Preliminary.

⁷ Average price to Apr. 1, 1966, including an allowance for unredeemed loans.

Statistical Reporting Service and Economic Research Service. Italic figures are census returns. Production figures conform with census annual ginning enumerations. Data for 1866–1948 in *Agricultural Statistics, 1962*, table 86.

Table 88.—Cotton: Price support operations for American upland, United States, 1956–66

Year beginning August	Support price ¹		Season average price per pound received by farmers	Amount put under support ²		Acquisi- tions under support program ³	Owned by CCC July 31
	Per pound	Percent of parity		Quantity	Percent of production		
1956	Cents 29.34	Percent 82	Cents 31.63	1,000 bales ⁴ 4,829	Percent 36.9	1,000 bales ⁴ 3,676	1,000 bales ⁴ 4,829
1957	28.81	73	29.46	3,612	33.4	2,420	937
1958	31.23	81	33.09	6,776	59.7	5,993	984
1959	30.40	60	31.56	8,952	62.0	8,652	4,987
1960	28.97	75	30.08	8,320	58.6	7,790	1,678
1961	31.88	82	32.80	4,833	33.9	3,243	1,449
1962	31.88	82	31.74	6,809	46.2	4,719	3,750
1963	31.72	79	32.02	7,969	52.5	5,779	4,303
1964	32.80	—	29.62	7,289	48.5	4,824	6,605
1965	32.60	—	29.20	7,690	46.5	—	—
1966	29.63	—	—	—	—	—	—

¹ Basis $\frac{1}{4}$ -inch Middling through 1960; average of crop for later years. The percent of the parity price is as of the beginning of the marketing year, except 1959, 1960, 1961, and 1963 as of Feb. 1, and 1962 as of Jan. 1.

² Includes loans made and direct purchases.

³ Acquisitions from crop harvested in year indicated.

⁴ Running bales.

⁵ For cotton grown by farmers electing choice A acreage allotments. Corresponding support level for choice B for 1959 is 24.70 cents which is 65 percent of parity; for 1960 it is 23.18 cents which is 60 percent of parity.

⁶ Includes price support payment to producers planting within their domestic allotment: 3.5 cents in 1964, 4.35 cents in 1965, and 9.42 cents in 1966. Price support levels established by legislation without reference to parity.

⁷ Preliminary.

Agricultural Stabilization and Conservation Service. Data for 1949–55 in *Agricultural Statistics, 1962*, table 105.

FOOTNOTES FOR TABLE 87

¹ Preliminary.

² Bales ginned, as reported by the U.S. Department of Commerce with an allowance made for interstate movement of seed cotton for ginning, rounded to thousands, by States. Cotton produced but not ginned is not included in production.

³ Gross weight price, including bagging and ties, except that American-Egyptian cotton is included at net weight. Includes allowance for unredeemed loans and purchases by the Government valued at the average loan and purchase rate, by States.

⁴ Average price to Apr. 1, 1966.

⁵ Sums of acreage and production for "other States" rounded for inclusion in U.S. totals. Estimates for these States are shown separately.

⁶ Included in State and U.S. totals.

Statistical Reporting Service.

FOOTNOTES FOR TABLE 89

¹ Years refer to crop years beginning Aug. 1 in which major portion of crop was harvested.

² Production in bales of 480 pounds net.

³ Preliminary and partly estimated.

⁴ Includes estimates for minor-producing countries not listed above and allowances for countries where data are not yet available.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

¹ All prices are averages of weekly quotations, 52 weeks or less. These quotations do not include export taxes of varying amounts in effect in all of the countries listed herein during the past 5 or more years.

² Prices for Alexandria are Egyptian Cotton Commission official export selling prices since May 31, 1962. Effective July 9, 1964, Menoufi replaced Karnak, which is no longer being produced. Effective Aug. 5, 1965, Giza 66 replaced Ashmouni.

³ Effective Sept. 2, 1965, Vidarbha, Fine "6" replaced Jarila, Fine as the base variety.

⁴ Matamoros District cotton in standard density bales ex-warehouse Brownsville, Texas, Mexican export taxes paid. For shipside H/D, add 0.04 cent a pound. Prices are for gross weight.

Foreign Agricultural Service.

¹ The cost to consumers for 25 items of clothing and household textiles divided by the number of pounds of lint cotton estimated to be required for their manufacture. Annual averages are simple averages of retail costs in March, June, September, and December.

² Estimated farm value of cotton of grades and staple lengths suitable for manufacture of the products, less allowance for value of salable spinning waste, divided by the number of pounds of cotton required. Farm value is based on average prices of cotton in central markets less one-half cent per pound estimated to be the difference between central-market price and price received by farmers.

³ Farm-retail spread for 1964–65 does not include Federal payments made through issuance of payment-in-kind certificates to domestic users of eligible U.S. raw upland cotton. This payment amounted to 6.5 cents per pound of raw cotton from April 1964 through July 1965, and 5.75 cents beginning in August 1965.

Economic Research Service. Data for 1939–48 in *Agricultural Statistics*, 1962, table 106.

¹ Estimates for Southern Hemisphere countries include unginned cotton.

² Preliminary.

³ In bales of 480 pounds net, except United States which is in running bales.

⁴ Running bales.

⁵ Mostly U.S.S.R., Mozambique, and Nigeria.

⁶ Mostly China and Eastern Europe.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U. S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

FOOTNOTES FOR TABLE 109

¹ Estimates for Southern Hemisphere countries include unginned cotton.

² Includes cotton destroyed or unaccounted for.

³ Bales of 480 pounds net (500 pounds gross)

⁴ Formerly French West Africa.

⁵ Running bales, except imports which are in bales of 480 pounds net.

⁶ Includes 70,651 bales released from National Stockpile.

⁷ Ginnings in season of 15,176,000 running bales, plus city crop of 70,000.

⁸ Imports for consumption.

⁹ Includes 18,307 bales Egyptian released from stockpile.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U. S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

¹ Including raw silk processed but not made into yarns.

² Includes waste of fibers of silk processed but not spun.

³ Beginning 1963, not entirely comparable with preceding years because of changes in schedule classifications.

⁴ Includes weights of all classes added without conversion to an equivalent fiber basis.

⁵ Includes coir vegetal, New Zealand or phormium fiber, broomroot, rice straw and rice fiber, coir, and other unmanufactured vegetable fibers.

⁶ Tons of 2,240 pounds.

⁷ Preliminary.

Foreign Agricultural Service. Compiled from reports of the U.S. Department of Commerce. Data for 1944-1955 in *Agricultural Statistics*, 1962, table 111.

¹ Includes Hawaii beginning 1949 for acres harvested, yield per acre and production of sugarcane for sugar and sugar production; molasses production for Hawaii beginning in 1950. Also includes Hawaii from 1959 to date for acres harvested, yield, and production of sugarcane for seed. Price and value not available for Hawaii.

² The growth of 9 months in Louisiana, 12 months in Florida, and 18-24 months in Hawaii. Sugarcane harvest usually ends by December or early January in Louisiana; in Florida by March following the season of growth; and in Hawaii the harvest takes place throughout the year.

³ Preliminary.

⁴ Prices do not include Government payments under the Sugar Act.

⁵ Raw value is the equivalent in terms of 96° sugar as defined in the Sugar Act of 1948.

⁶ Calculated on the basis that 100 pounds of raw sugar is required to produce 93.46 pounds of refined sugar.

⁷ Syrup production not included. See table 139.

Statistical Reporting Service. Of the total sugar produced in Louisiana about 25 percent consists of direct consumption sugar, marketed "as made" without further refining. Data for 1924-48 in *Agricultural Statistics*, 1962, table 122.

FOOTNOTES FOR TABLE 125

¹ Preliminary.

² The growth of 9 months in Louisiana, 12 months in Florida, and 18-24 months in Hawaii. Sugar campaign usually ends by December or early January in Louisiana; in Florida by March following the season of growth; and in Hawaii the harvest takes place throughout the year. Yield of cane for sugar used in computing production for seed in Florida and Louisiana.

³ Does not include Government payments under the Sugar Act. See table 123.

⁴ Raw value is the equivalent in terms of 96° sugar as defined in the Sugar Act of 1948.

⁵ Calculated on the basis that 100 pounds of raw sugar is required to produce 93.46 pounds of refined sugar.

⁶ Blackstrap (80° Brix), high-test molasses from frozen cane, and edible molasses.

Statistical Reporting Service.

¹ Harvesting begins in October. The length of the growing season being about 11 months.² Total harvested acreage includes acreage for both centrifugal and noncentrifugal sugar. The acreage for noncentrifugal sugar has been estimated on the assumption 1 acre of cane yields about 1.5 tons of noncentrifugal sugar for the year 1949.³ Cane production divided by harvested acreage.⁴ Prior to 1950, calculated cane production is the quantity of cane ground for centrifugal sugar, estimated on the basis of the reported yield of sugar per ton of cane. From 1950 to date, the cane production is reported.⁵ As reported prior to 1950 and from 1952 to 1957. Other years computed.⁶ Preliminary.Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information. Data for 1934-48 in *Agricultural Statistics, 1962*, table 128.

¹ Raw value is the equivalent in terms of 96° sugar. Importations of domestic marketings under annual sugar requirements determinations and quotas, pursuant to the Sugar Act of 1948, as amended. These comprise all sugar marketings except importations for re-export and for livestock feed which were 62,000 tons average for 1955-59, 38,000 tons in 1963, 36,000 tons in 1964, and 186,000 tons in 1965.

² Less than 500 tons.

Agricultural Stabilization and Conservation Service.

FOOTNOTES FOR TABLE 130

¹ Years shown are crop-harvesting years. Campaigns beginning not earlier than May of year shown, nor later than April of following year are included in the same crop year. The entire season's production of each country is credited to the May/April year in which harvesting and sugar production began.

² Preliminary.

³ Centrifugal sugar, as distinguished from noncentrifugal, includes cane and beet sugar produced by the centrifugal process, which is the principal kind moving in international trade.

⁴ Includes Antigua, St. Kitts, and St. Vincent.

⁵ No sugar produced prior to 1961-62.

⁶ Production refers to calendar year for the first of the two years indicated.

⁷ Formerly Tanganyika; beginning 1964-65, includes Zanzibar.

⁸ Prior to 1964-65, included Malawi and Zambia.

⁹ Beginning 1962-63, Swaziland reported separately.

¹⁰ Other Africa includes Algeria, French Somaliland, Somali Republic, Sudan, Angola, Congo (Brazzaville), Liberia, and Tunista.

¹¹ Includes Khandbari.

¹² Prior to this issue, included in "Other Asia."

¹³ Other Asia includes Afghanistan, Israel, Syria, South Vietnam, Iraq, Lebanon, Ceylon, and Nepal.

¹⁴ Noncentrifugal sugar includes all types of sugar produced by other than centrifugal process which is largely for consumption in the relatively few areas where produced. The estimates include such kinds known as piloncillo, panela, papelon, chancaca, rapadura, jaggery, gur, muscovado, panocha, etc.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

¹ Puerto Rican direct consumption sugar included in "Importers of direct consumption sugar"; Hawaiian direct consumption sugar included in "Cane sugar refineries". Stocks include sugar in bond and in customs custody and control.² All sugars converted to refined basis.³ Sugar for direct consumption only. Mainland cane sugar mills stocks and production for direct consumption not separately reported.⁴ Includes deliveries for export, either in the form of sugar or as sugar contained in manufactured products in thousand tons, as follows: 1956, 114; 1957, 28; 1958, 56; 1959, 54; 1960, 43; 1961, 52; 1962, 59; 1963, 30; 1964, 19; and 1965, 83.Agricultural Stabilization and Conservation Service. Data for 1939–55 *Agricultural Statistics, 1962*, table 133.

¹ Production of cane sirup, sorghum sirup, and edible molasses is of the fall of the preceding year.² Does not include varying quantities produced on nonfarm lands in Somerset County, Maine.³ U.S. Department of Commerce series, molasses and sugar sirups, less liquid sugar as reported to Sugar Division, Agricultural Stabilization and Conservation Service.⁴ Beginning 1951, discontinued.⁵ Preliminary.⁶ Assumed to be largely refiners' sirup. Beginning 1965, data not available because of change in export classification.

¹ Production harvested within the calendar year specified. Farm sales weight is about 10 percent above dry weight which is normally reported in trade statistics.

² Preliminary.

³ Estimated.

⁴ Less than 500 acres.

⁵ Formerly Northern Rhodesia.

⁶ Formerly Nyasaland.

⁷ Formerly Tanganyika and Zanzibar.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

¹ July 1 for flue-cured types 11–14 and cigar types 61 and 62; Oct. 1 for all other types.

² Farm sales weight of exports is subject to revision. Exports by rehandling trade included in totals of types from which they are made.

³ Preliminary.

⁴ Domestic disappearance adjusted to take account of some 1962 tobacco still at farm level at the end of marketing year.

⁵ Puerto Rican crop planted in the fall of the year shown and harvested the following spring.

⁶ Includes Perique.

Economic Research Service. Basic export data from the official reports of the Department of Commerce. Data for 1949–60 in *Agricultural Statistics, 1962*, table 156.

1961	57.2	(3)	66.5	10	1.8
1962	57.8	(3)	58.6	64	9.4
1963	58.3	(3)	59.2	202	26.8
1964	58.9	(3)	60.3	111	17.8
1965	59.5	(3)	67.0	42	7.2
1966	60.6	(3)			

¹ This table does not show total support operations for tobacco. Only burley and flue-cured are shown because they are substantially more important in the total tobacco picture than other types which are also supported.

² Title to tobacco obtained under the price support program is retained in most cases by the Producer's Cooperative Association handling price support loans.

³ Parity price no longer used to determine support level.

⁴ Preliminary.

Agricultural Stabilization and Conservation Service. Data for 1949-55 in *Agricultural Statistics, 1962*, table 163.

¹ Includes Alaska, Hawaii, and consumption by overseas forces.² Weighing over 3 pounds per 1,000.³ Unstemmed-processing weight equivalent.⁴ Preliminary.

Economic Research Service. No adjustments made for quantities lost, destroyed, bartered, etc., under war and postwar conditions, but such adjustments probably would be small in relation to totals.

Table 160.—Cigarettes: Average retail and wholesale prices per package, farm value of equivalent leaf tobacco, taxes, and farm-retail spread, 1955-64

Year begin- ning July	Retail price ¹	Wholesale price ²	Farm value ³	Federal and State excise taxes	Farm-retail spread			Farmer's share of retail price
					Manu- facturer and leaf dealer ⁴	Distribu- tor ⁵	Total	
	Cents	Cents	Cents	Cents	Cents	Cents	Cents	Percent
1955	23.3	15.9	3.56	10.7	4.3	4.7	9.0	15.3
1956	23.8	15.9	3.64	10.9	4.3	5.0	9.3	15.3
1957	25.1	16.6	3.71	11.0	4.9	5.5	10.4	14.8
1958	25.4	16.6	3.97	11.2	4.6	5.6	10.2	15.6
1959	27.1	16.6	3.85	12.0	4.8	6.5	11.3	14.2
1960	27.3	16.6	4.02	12.1	4.6	6.6	11.2	14.7
1961	27.6	16.6	4.23	12.4	4.4	6.6	11.0	15.3
1962	28.2	16.7	3.87	12.5	4.8	7.0	11.8	13.7
1963	29.7	17.2	3.78	12.9	5.4	7.6	13.0	12.8
1964 ⁶	29.9	17.2	3.85	13.0	5.4	7.7	13.1	12.9

¹ Annual retail cost per pack is simple average of prices for September, December, March, and June. The consumer price index for regular-size cigarettes, U.S. Department of Labor, is applied to December 1952 price per pack to compute quarterly prices.

² U.S. Department of Labor. Average of list prices of three manufacturers for popular brands of cigarettes delivered to wholesalers and jobbers—adjusted for cash and trade discounts.

³ Value of 0.065 pound of leaf tobacco (farm-sales weight), calculated from seasonal prices received by growers for three kinds of cigarette-type tobacco. Auction fees have not been deducted.

⁴ Spread between farm value and wholesale price less Federal excise tax.

⁵ Retail-wholesale spread less average State tax.

⁶ Preliminary.

Economic Research Service. Data for 1939-54 in *Agricultural Statistics, 1962*, table 160.

Table 161.—Cigarettes and cigars: Total output, domestic consumption, tax-exempt removals, and exports, United States, 1956-64

Year	Cigarettes				Cigars ⁴			
	Total output	Domestic consump- tion ¹	Tax-exempt removals ²		Total output ³	Domestic consump- tion ¹	Tax-exempt removals ²

1964	539.9	497.4	42.6	25.1	9,566	8,959	193	44
1965 ⁵	557.6	511.5	44.2	23.1	8,814	8,513	180	55

¹ As indicated by taxable removals and imports.

² In addition to exports, tax-exempt removals include principally shipments to forces overseas, to United States possessions, and ships' stores.

³ Includes cigars shipped to mainland United States from Puerto Rico.

⁴ Includes cigarillos but excludes small (approximately cigarette-size) cigars.

⁵ Preliminary.

Economic Research Service. Compiled from annual and monthly reports of Internal Revenue Service, U.S. Treasury, and Commerce Departments. Cigarette data for 1944-55 in *Agricultural Statistics, 1962*, table 161.

CHAPTER III

STATISTICS OF OILSEEDS, FATS, AND OILS

This chapter includes information on cottonseed, flaxseed, olive oil, peanuts, soybeans, tung nuts, margarine, and fats and oils. Most butter statistics are included in the chapter on dairy and poultry statistics. Lard data are mostly in the chapter on livestock.

Table 165.—Cottonseed: Cotton acreage, cottonseed yield, production, farm disposition, season average price per ton received by farmers, and value, United States, 1949–65

¹ United States averages not fully representative of entire crop because of relatively small volume of seed graded in some areas.² These basic factors are combined to form indexes of quantity and quality which in turn are used to determine the official grade of cottonseed in accordance with the United States Official Standards for Grades.³ The quantity index measures the oil and cake or meal in the cottonseed, taking into account variations in the quantity of oil, protein, and linters.⁴ The quality index measures the deterioration in oil and meal and takes into account the excesses of moisture and foreign matter.⁵ The average grade is the product of the quantity index times the quality index. The base grade is 100.0.⁶ Samples graded by licensed chemists under the supervision of the U.S. Department of Agriculture.Consumer and Marketing Service. Data for 1944-54 in *Agricultural Statistics, 1962*, table 168.

¹ Harvests of the Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere in 1965 is combined with the Southern Hemisphere harvest which began late in 1965 and ended early in 1966. Estimates do not include China, where annual production probably varies from 1 to 2 million bushels. ² Preliminary. ³ Estimate of harvested acreage based on seeded acreage officially estimated at 3.2 million acres. ⁴ Planted acreage. ⁵ Includes fiber flax acreage and seed production. ⁶ Acreage includes that harvested for seed and that portion of fiber acreage which is harvested for seed as well as fiber. Production includes seed from fiber flax. ⁷ Less than 5 years. ⁸ Estimated. ⁹ Less than 500 acres. ¹⁰ Includes estimates for the above countries for which data are not available and for minor producing countries. ¹¹ Flaxseed from acreage grown for seed only.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

¹ Data on tung nuts in Georgia, Florida, Alabama, Mississippi, and Louisiana.

² Preliminary.

Statistical Reporting Service and Economic Research Service. Data on tung oil from reports of the U.S. Department of Commerce. Data for 1939–48 in *Agricultural Statistics, 1962*, table 207.

Table 207.—Tung nuts: Production and season average price per ton received by growers, 4 principal States, average 1959–63, annual 1964 and 1965

State	Production ¹			Price ¹ for crop of—		
	Average 1959–63	1964	1965 ²	Average 1959–63	1964	1965 ²
		Tons	Tons	Tons	Dollars	Dollars
Florida	17,780	20,400	24,000	\$ 89.00	64.00	65.00
Alabama	1,600	1,800	1,200	\$ 82.90	62.00	60.00
Mississippi	40,600	79,500	7,000	78.80	61.00	62.00
Louisiana	12,160	21,600	2,000	77.20	62.00	60.00
United States	72,208	123,300	34,200	77.90	61.70	63.90

¹ Production and price in terms of air-dried nuts in the husk.

² Preliminary.

³ Less than 5 years.

Statistical Reporting Service. The yield of oil from unhusked tung nuts varies from year to year but is usually estimated at around 16 percent of the weight of the nuts. Production and supply of tung oil appear in table 206.

¹ Includes butter (fat content), lard, beef fats, cottonseed, peanut, soybean, corn and olive oils, and minor oils such as sesame. Stocks and exports also include margarine, shortening, vegetable stearine, and secondary edible oils.

² Production and exports also include oil equivalent of exported soybeans, cottonseed, and peanuts for crushing abroad.

³ Chiefly coconut, palm kernel, and palm oils.

⁴ Includes shipments to United States territories.

⁵ In some years disappearance cannot be computed from data contained in this table, as adjustments have been made because additional items have been incorporated in stock data.

⁶ Preliminary.

Economic Research Service. Compiled from reports of the Commerce and Agriculture Departments. Totals and per capita estimates computed from unrounded numbers. Data for 1934-55 in *Agricultural Statistics*, 1962, table 213.

¹ Years indicated are those in which the predominant share of the given oil or fat was produced from its related raw material.

² Preliminary.

³ Estimated.

⁴ Exports from producing countries.

⁵ Estimates of U.S. oil production include oil produced plus the oil equivalent of exported oilseeds; estimates for other countries are based upon the production of various oilseeds times the estimated normal proportions crushed for oil.

⁶ Includes exports of "edible vegetable oils" from the U.S.S.R. and Romania believed to be mainly sunflower-seed oil.

⁷ 1955-58 average.

⁸ Net exports.

⁹ Production estimated on the basis of exports and information available on consumption in the various producing areas.

¹⁰ Less than 500 tons.

¹¹ Production relates to rendered lard only in most countries.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

¹ Includes inedible tallow, inedible animal oils not otherwise specified, animal greases and fats, neat's-foot oil and stock, oleic acid or red oil, and stearic acid.

² Preliminary.

³ Includes the following estimated quantities exported under Title III, P.L. 480 (Foreign Donations) (thousand pounds): 12,232 in 1960, 69,932 in 1961, 39,207 in 1962, 1,438 in 1963, and 107,689 in 1964.

⁴ Includes an estimated 10,192 thousand pounds exported under Title III, P.L. 480 (Foreign Donations).

⁵ Includes the following estimated quantities exported under Title III, P.L. 480 (Foreign Donations) (thousand pounds): 18,128 in 1960, 152,781 in 1961, 92,466 in 1962, 18,004 in 1963, and 71,738 in 1964.

⁶ Includes food exported for relief or charity.

Foreign Agricultural Service. Compiled from reports of the Commerce and Agriculture Departments. Data for 1944–54 in *Agricultural Statistics, 1962*, table 217.

¹ Mainly salad and cooking oils. Includes all oils and fats (other than butter, lard, margarine, or shortening) used in mayonnaise and salad dressing, bakery goods, confectionery, commercial roasting and frying, etc.

² Including only the fat content of butter, estimated at 80.5 percent of total weight, and of margarine for which the fat content varies slightly each year.

³ Preliminary.

⁴ Fat equivalent of soap used in synthetic rubber is included with "Other industrial products."

⁵ Paints, varnishes, floor coverings, oilcloth, printing inks, core oils, synthetic resins, insulation, linings, packings, coated fabrics (other than oilcloth), caulking, and other protective coatings.

Economic Research Service. Computed from reports of the Commerce, Interior, and Agriculture Departments. Totals and per capita estimates computed from unrounded numbers. Data for 1939-55 in *Agricultural Statistics*, 1962, table 221.

CHAPTER IV

STATISTICS OF VEGETABLES AND MELONS

This chapter contains statistics on potatoes, sweetpotatoes, and commercial vegetables and melons.

For potatoes and sweetpotatoes, the estimates of acreage, production, value, and farm disposition pertain to the total crop and include quantities produced both for sale and for use as food, feed, and seed on farms where grown. Potato statistics are shown on a within-year seasonal grouping of winter, early spring, late spring, early summer, late summer, and fall crops, by States. Some States have production in more than one seasonal group.

For processing vegetables, the estimates of acreage, production, and value for each of the 10 crops relate to production used by commercial canners, freezers, and other processors, except dehydrators. These estimates include raw products grown by processors themselves and those grown under contract or purchased on the open market. This production and the actual or equivalent acreage harvested are not duplicated in the fresh market estimates for the same commodities. The production of those vegetables used for processing for which regular processing estimates are not made, is included in the fresh market estimates.

The Department's regular monthly and annual program of estimates of commercial vegetables for fresh market includes 27 principal vegetable and melon crops in the major producing States. These estimates relate to crops which are grown primarily for sale and they do not include vegetables and melons produced in farm and nonfarm gardens. Although the bulk of the production of the 27 principal vegetable and melons crops is for consumption in the fresh state, data for some commodities include quantities used by processors. Such crops as artichokes, broccoli, brussels sprouts, carrots, cauliflower, celery, garlic, kale, onions, and green peppers for which separate estimates for commercial processing are not prepared, are in this category. The commercial estimates of the principal crops for the years 1939 to date include local market production from areas near consuming centers as well as production from well-recognized commercial areas which specialize in producing supplies for shipment to distant markets. Estimates of commercial vegetables for fresh market prepared for years prior to 1939 are not strictly comparable with the series for 1939 and later years as the earlier series pertain largely to important commercial shipping areas and for the most part do not include local market production from areas near consuming centers.

Annual estimates of national commercial production of all vegetables are presented in table 225. For fresh market vegetables they include production for sale of (1) the 27 principal crops (28 prior to 1954) in the major producing States for which regular seasonal estimates are prepared, (2) the principal 27 crops in unimportant producing States, (3) greenhouse vegetables in all States, and (4) minor vegetables in all States. These figures show that the regular program of releases of commercial fresh market vegetable estimates for principal crops in major producing States account for over four-fifths of the national commercial output of all fresh vegetables and melons. The total national commercial production of each of the principal vegetable and melon crops and aggregate production of minor vegetables is published by the Statistical Reporting Service, but production estimates by States, and comparable data on acreage and value, are not available.

For fresh market vegetables and melons, season average price and value beginning in 1954 are on a f.o.b. basis. For processed vegetables prior to 1964, season average price and value refer to average price received by growers at receiving point; beginning in 1964, season average price and value is at processing plant door.

The seasonal nature of the production of vegetables and melons for fresh market and their perishability created a need for information on supplies available during specific periods of the year to facilitate orderly marketing. Vegetable and melon estimates are classified according to the season or period within the season when the bulk of each crop is usually harvested. The forecasts and estimates of acreage and production therefore provide a measure of supplies available in specific seasonal periods. The seasonal groupings used are as follows:

Seasonal Classifications Used for Vegetable and Melon Crops

Dates refer to period of most active harvest

Classifications Most Commonly Used

Winter: January, February, March.
 Spring: April, May, June.
 Early Spring: April 1-May 15.
 Late Spring: May 16-June 30.
 Summer: July, August, September.

Early Summer: July 1-August 15.
 Late Summer: August 16-September 30.
 Fall: October, November, December.
 Early Fall: October 1-November 15.
 Late Fall: November 16-December 31.

Classifications Used for Certain Short Season Crops

Early Spring: April.
 Mid-Spring: May.
 Late Spring: June.

Early Summer: July.
 Mid-Summer: August.
 Late Summer: September.

In practice, the beginning and ending of these seasons are not fixed dates but approximations. There is necessarily some overlapping in the marketing seasons for individual crops, and weather frequently disturbs normal harvesting schedules. Consequently, the classifications employed are less precise than the dates indicate.

¹ Commercial production, including greenhouse production, of all fresh market vegetables and melons in all States. Includes the production shown in table 226 for the 27 principal vegetables (28 prior to 1954). Does not include production for home consumption in farm and nonfarm gardens. Production by States, and acreage and value data not available.

² Production in all States of the 10 principal vegetables for processing shown in table 228 plus pimiento peppers through 1953. Production of other vegetables processed included in fresh market series of estimates.

³ Beginning 1954, includes Hawaii.

⁴ Beginning 1960, includes Alaska.

⁵ Preliminary.

Statistical Reporting Service. Data for 1919-48 in *Agricultural Statistics, 1962*, table 304.

¹ Acreage for fresh market is acreage for harvest, including any partially harvested or not harvested because of low prices or other economic factors. Acreage for processing is acreage harvested.

² Acreage, production, and farm value of the following 27 crops (28 prior to 1954), for which regular seasonal estimates are prepared in major producing States: Artichokes, asparagus, lima beans, snap beans, beets, broccoli, brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, honeydew melons prior to 1954, honeydew melons, kale, lettuce, onions, green peas, green peppers, shallots, spinach, tomatoes, and watermelons.

³ Acreage, production, and farm value of the following 10 crops in all States: Asparagus, lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers (pickles), green peas, pimientos prior to 1954, spinach, and tomatoes. Production of other vegetables processed included in fresh market series of estimates.

⁴ Production for fresh market includes some quantities not marketed because of low prices or other economic factors which are excluded in computing value.

⁵ Beginning 1954, value for all fresh market vegetables except garlic on f.o.b. basis. For processed vegetables, beginning 1954, value is based on average price received at processing plant door.

⁶ Beginning 1960, includes Alaska and Hawaii.

⁷ Preliminary.

Statistical Reporting Service. Data for 1939–48 in *Agricultural Statistics, 1962*, table 305.

¹ Production for fresh market includes some quantities not marketed which are excluded in computing value.² Production of the following 27 crops for which regular seasonal estimates are prepared in major producing States: Artichokes, asparagus, lima beans, snap beans, beets, broccoli, brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, honeydew melons, kale, lettuce, onions, green peas, green peppers, shallots, spinach, tomatoes, and watermelons.³ Preliminary.⁴ Production of the following 10 crops in all States: Asparagus, lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers (pickles), green peas, spinach, and tomatoes. Other vegetables processed included in fresh market series of estimates.

¹ Fresh market and processing asparagus is frequently harvested from the same acreage; therefore it is not practical to make individual acreage estimates for these segments.

² Preliminary.

³ Includes some quantities not marketed.

⁴ Mostly for processing. Includes New York, Indiana, Minnesota, Iowa, Missouri, Nebraska, Virginia, Arkansas, and Tennessee.

⁵ Fresh market includes Pennsylvania, Ohio, and Iowa. Processing includes New York, Pennsylvania, Ohio, Indiana, Minnesota, Iowa, Missouri, Nebraska, Virginia, Arkansas, and Tennessee.

¹ Includes the following quantities not marketed which are excluded in computing value (1,000 hundredweight): 105 in 1949, 59 in 1951, 102 in 1954, 110 in 1955, 100 in 1956, 541 in 1958, 1 in 1962, 1 in 1963, 1 in 1964, and 58 in 1965.

² Includes "otherwise prepared," if any.

³ Includes exports for military civilian-feeding abroad.

⁴ Beginning 1954, fresh market price and value on f.o.b. basis.

⁵ Beginning 1960, includes Hawaii.

⁶ Beginning 1964, processing price and value at processing plant door.

⁷ Preliminary.

Statistical Reporting Service and Economic Research Service. Foreign trade data from reports of the U.S. Department of Commerce. Data for 1939-48 in *Agricultural Statistics, 1962*, table 370.

¹ Shipments by truck are not included but have become increasingly important during this period. The data are not indicative of total production or total sales.

² Beginning 1963, reports of rail shipments for beets, turnips, and rutabagas discontinued.

³ Includes casaba, honeydew, persian, and mixed melons. Cars of mixed melons may include cantaloupes as well as other muskmelons.

Consumer and Marketing Service. Compiled from daily and monthly reports received from officials and local agents of common carriers, throughout the country. Shipments shown in carlots include boat shipments reduced to a carlot basis. Data for 1939–55 in *Agricultural Statistics, 1962*, table 373.

FOOTNOTES FOR TABLE 294

¹ Includes air receipts in carlot equivalents.

² Estimated percentage of completeness for reported truck unloads for 1965: Baltimore and Chicago, 85%; Atlanta, Boston, Los Angeles and New York, 90%; Philadelphia, 90–95%; San Francisco, 95%.

³ Beginning 1958, includes Newark.

⁴ Includes romaine.

⁵ Beginning 1958, includes Oakland.

Consumer and Marketing Service.

¹ Pickle and sauerkraut packs are total crops for processing converted to canned basis by applying factors (cases of 24/303 cans per ton farm weight): Cucumbers for pickles, 83 cases; cabbage for kraut, 65.9 cases. All other packs as reported by National Canners Association.

² Equivalent cases of 24 No. 303 cans.

³ Preliminary.

⁴ Includes combination vegetable juices containing at least 70 percent tomato juice.

Economic Research Service. Data for 1939–55 in *Agricultural Statistics, 1962*, table 377.

FOOTNOTES FOR TABLE 296

¹ Fresh vegetable consumption computed from total commercial production for fresh market including greenhouse production. Does not include production for home use. Civilian consumption—obtained by dividing the total apparent civilian consumption by total civilian population as reported by the Census. All data for calendar year except dry field peas on crop year basis.

² Preliminary.

³ Close trim basis since 1954; slight trim basis in prior years.

⁴ Includes 0.1 pound of shallots through 1958; since 1958 less than 0.05 pound.

⁵ Includes farm weight equivalent of potatoes used in mixtures, flour, dehydration, chips and shoestring potatoes; these uses for the past 3 years amounted to 16 to 18 percent of the totals shown; excludes canned and frozen.

Economic Research Service. Data for 1919–48 in *Agricultural Statistics, 1962*, table 375.

¹ Excludes soups and baby food.² Preliminary.³ Based on information available for 1944–46, tomato juice comprises approximately 85 percent of the total, combination vegetable juices 13 percent, and other vegetable juices 2 percent. Combination vegetable juice contains approximately 70 percent or more tomato juice.⁴ Includes miscellaneous greens, pimientos, potatoes, mixed vegetables, and all items for which no separate data are available.Economic Research Service. Data for 1909–48 in *Agricultural Statistics, 1962*, table 376.

¹ Data for asparagus, lima beans, sweet corn, and sauerkraut are either estimates or interpolations.² Actual cases.³ Canners' stocks of sauerkraut converted to cases by using a factor of 14 cases of 24/2^{1/2} per barrel (of 45 gallons).

Consumer and Marketing Service. Compiled mainly from reports of the National Canners Association, the Canners League of California, the National Kraut Packers Association, and the U.S. Department of Commerce.

CHAPTER V

STATISTICS OF FRUITS, TREE NUTS, AND BEVERAGE CROPS

Estimates of fruit production, in general, relate to the harvested crop although in some years quantities not harvested because of low prices or other economic factors are included. Losses from natural causes, such as windstorms, freezes, etc., are not included in production. Production relates to the total crop produced on all farms, except for apples and strawberries. In accordance with Congressional enactment, the Department's estimates of apple production since 1938 have related only to the crop in commercial areas. The estimates for strawberries cover production on acreage grown primarily for sale.

The annual estimates are checked and adjusted at the end of each marketing season on the basis of shipment and processing records from transportation agencies, processors, cooperative marketing associations, and other industry organizations. The estimates are reviewed (and revised if necessary) at 5-year intervals, when census data become available. The Department's available statistics are limited to the major tree fruits and nuts and to grapes, cranberries, and strawberries, and exclude some States where census data indicate production is of only minor importance.

¹ Years shown refer to years of harvest in Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere in 1964 is combined with preliminary forecasts for the Southern Hemisphere harvests which began late in 1964 and ended early in 1965.

² Preliminary.

³ Basic production data reported in units other than bushels converted to 48 pound equivalents.

⁴ Commercial crop.

⁵ Excludes cider apples reported separately.

⁶ Deciduous Fruit Board handlings.

⁷ May include some cider apples in countries not reported separately.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

¹ Includes some quantities unharvested on account of economic conditions as follows (tons): Sweet cherries, 1964—New York, 320; Montana, 30; Colorado, 60; Washington, 200; 1965—New York, 100; Pennsylvania, 20; Montana, 9; Idaho, 22; California, 500; sour cherries, 1964—New York, 2,580; Pennsylvania, 500; Michigan, 41,100; Wisconsin, 3,300; Montana, 70; Colorado, 55; Utah, 70; Oregon, 850; 1965—New York, 700; Pennsylvania, 300; Michigan, 13,000; Wisconsin, 800; Montana, 55; Colorado, 50; Utah, 200; Washington, 40; Oregon, 300.

² Preliminary.

³ Beginning 1963, quantities processed are priced at the equivalent processing plant door level.

⁴ Includes excess culage of harvested fruit as follows (tons): Sweet cherries, 1964—Montana, 200; Colorado, 10; Washington, 600; 1965—Montana, 1; Idaho, 297; Colorado, 60; Washington, 30; sour cherries, 1964—Montana, 8; Colorado, 15; 1965—New York, 90; Ohio, 10; Montana, 2; Idaho, 36.

⁵ Includes some States for which estimates have been discontinued.

Statistical Reporting Service.

FOOTNOTES FOR TABLE 327

¹ Season begins with the bloom of the year shown and ends with the completion of harvest the following year. In California, picking usually extends from about Oct. 1 to Dec. 31 of the following year (15 months). In other States, the season begins about Oct. 1 and ends in early summer, except for Florida limes, harvest of which usually starts about Apr. 1.

² Fruit ripened on the trees but destroyed by freezing or storms prior to picking is not included. For weight of boxes, see pages V and VI.

³ Excludes fruit unharvested, donated to charity, or not utilized on account of economic conditions.

⁴ Equivalent returns per box at the intake packinghouse-door for all methods of sale. When sale represents fruit sold at point other than intake packinghouse-door, prices of fruit as sold are converted by additions or subtractions of necessary charges to or from prices of fruit as actually sold. Obtained by weighting State prices by quantity sold.

⁵ Includes quantities used for juice, concentrates, grapefruit segments, and other citrus products. In some seasons, includes appreciable quantities of oranges and lemons in California delivered to processing plants which were not utilized, but for which growers received payment.

⁶ Year beginning November for oranges and lemons; year beginning September for grapefruit; year beginning July for limes. Tangerines included with oranges.

⁷ Exports reported in pounds. Converted to boxes on the following basis: Oranges, 84 pounds per box; grapefruit, 78 pounds per box; lemons, 79 pounds per box.

⁸ Imports converted to boxes on the following basis: Oranges, 90 pounds per box; grapefruit, 80 pounds per box; lemons, 76 pounds per box; limes, 80 pounds per box.

⁹ Estimates for oranges include small quantities of tangerines in California, Arizona, and Texas. Estimates for tangerines are for Florida only.

¹⁰ Production estimated as of June 1, 1966.

¹¹ Less than 500 boxes.

Statistical Reporting Service and Economic Research Service, Foreign trade data from reports of the U.S. Department of Commerce. Data for 1929–54 in *Agricultural Statistics*, 1962, table 248.

¹ New York, Pennsylvania, Ohio, Michigan, Wisconsin, Montana, Idaho, Colorado, Utah, Washington, Oregon, and California.

² Differences between "Production" and "Production having value" are economic abandonment.

³ Sour varieties: Includes small quantities used for juice, wine, preserves, and candied cherries. Beginning 1954, includes small quantities brined.

⁴ Sweet varieties: Includes small quantities used for juice, wine, brandy, canning, etc. Beginning 1955, small quantities frozen are also included.

⁵ Some quantities canned are included with fresh sales to avoid disclosure of individual operations.

⁶ Preliminary.

¹ Season begins with the bloom of the year shown and ends with completion of harvest the following year. For oranges, harvest in California usually starts in early November of the year shown and continues into November of the following year. In other States, harvest of oranges begins about Oct. 1 and ends in early summer. Grapefruit harvest for the California Desert Valleys and for all other States, begins in the fall and ends by early summer. Harvest of other California grapefruit extends from early summer of the year after bloom through September. California lemons are harvested from November through the following calendar year. Florida limes are picked mostly from April through December. Florida tangelos are harvested largely from October through April. Fruit ripened on the trees but destroyed by freezing or storms prior to picking is not included. For some States in certain years, production includes quantities unharvested or harvested and not utilized on account of economic conditions, and quantities donated to charity. In 1964, estimates of such quantities were as follows (1,000 boxes): California—Navel and miscellaneous oranges, 300; Valencia, 180; grapefruit—California, Desert Valleys, 3; tangerines—Florida, 150.

² As estimated from prospects on June 1, 1966.

³ Equivalent returns per box at the intake packinghouse-door for all methods of sale. When sale represents fruit sold at point of other than packinghouse-door, prices of fruit as sold are converted by additions or subtractions of necessary charges to or from prices of fruit as actually sold.

⁴ Navel and miscellaneous varieties in California and Arizona. Early and midseason varieties in Florida and Texas. All varieties in Louisiana. For all States, except Florida, includes small quantities of tangerines.

⁵ Production too small to warrant a quantitative estimate.

⁶ Net content of box varies. Approximate averages are as follows: Oranges, California and Arizona, 75 pounds, Florida and other States, 90 pounds; tangerines, 90 pounds; grapefruit, California, Desert Valleys, and Arizona, 64 pounds, other California areas, 67 pounds, Florida and Texas, 80 pounds; lemons, 76 pounds; limes, 80 pounds; tangelos, 90 pounds.

Foreign Agricultural Service. Compiled from reports of U.S. Department of Commerce.

FOOTNOTES FOR TABLE 329

¹ Harvesting in Northern Hemisphere countries begins in November of the year shown, and in Southern Hemisphere countries begins in May following the year shown. Production in foreign countries converted to boxes of the following weights: Oranges 70 pounds; grapefruit and limes 80 pounds; lemons 76 pounds.

² Preliminary.

³ Production from the bloom of indicated years is harvested the two following years: for example, the crop from the bloom of 1964 is harvested in 1965-66.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

¹ Includes Canary Islands.² Year beginning July 1.³ Does not include imports into Soviet Bloc countries.⁴ Includes grapefruit.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

FOOTNOTES FOR TABLE 339

¹ Production, price, and value for California only. The 1950 census reported date production in California and Arizona, but of the total production 99.0 percent was in California.

² Equivalent returns per ton for bulk fruit at the first delivery point. Beginning 1963, quantities processed are priced at the equivalent processing plant door level.

³ Includes 2,300 tons not harvested on account of economic conditions.

⁴ Preliminary.

Statistical Reporting Service and Economic Research Service. Imports from reports of the U.S. Department of Commerce. Data for 1929-48 in *Agricultural Statistics, 1962*, table 260.

1957	21,240	49.4	1,050,000	11.20	11,722	618,900							

¹ Estimates relate to Massachusetts, New Jersey, Wisconsin, Washington, and Oregon.² Includes the following quantities unharvested on account of economic conditions and/or excess cullage of harvested fruit (1,000 barrels): 26 in 1949, 62.4 in 1950, 18 in 1956, 4 in 1960, 1 in 1961. In 1959, includes 18,900 barrels unharvested, confiscated, and dumped which did not qualify for payment under the Cranberry Payment Program, AMM, 181a. Includes cranberries dumped, used for charity, or used for experimental purposes under provisions of the Cranberry Marketing Order as follows (1,000 barrels): 143 in 1962, 44 in 1963, 18 in 1964, and 14 in 1965.³ Obtained by weighting State prices by quantity sold. Equivalent returns for fruit at the first receiving station. For 1959, includes returns to growers for cranberries dumped which qualified for payment under the Cranberry Payment Program, AMM, 181a.⁴ Mainly for canning.⁵ Preliminary.Statistical Reporting Service. Data for 1929–48 in *Agricultural Statistics, 1962*, table 258.

¹ Production, price, and value for California and Texas only. Texas discontinued in 1952.

² Equivalent returns per ton for bulk fruit at the first delivery point. Beginning 1963, quantities processed are priced at the equivalent processing plant door level.

³ California dried figs converted to fresh basis at ratio of 3 pounds fresh to 1 pound dried.

⁴ Obtained by weighting utilization group or State prices by quantity sold.

⁵ Preliminary.

⁶ 1949–52 includes in-brine and fresh; 1952 to date, dried only.

⁷ Includes shipments under the Army Civilian Supply Program.

Statistical Reporting Service and Economic Research Service. Foreign trade data from reports of the U.S. Department of Commerce. Data for 1929–48 in *Agricultural Statistics*, 1962, table 261.

1965 ⁵			272		

¹ Includes the following quantities unharvested on account of economic conditions and/or excess carriage of harvested fruit (1,000 tons): California, 12 in 1966; other States, 3 in 1960, 2 in 1951, 6 in 1957, 200 in 1962, 25 in 1965.

² Beginning 1963, quantities processed are priced at the equivalent processing plant door level.

³ Equivalent returns per ton for bulk fruit at the first delivery point.

⁴ Obtained by weighting State prices by quantity sold.

⁵ Preliminary.

⁶ Converted on the basis of country data, using the following weight per cubic foot: Argentina and Chile, 36 pounds; Belgium and Netherlands, 10 pounds; Canada, Italy, and Mexico, 40 pounds; Spain, 24 pounds; Union of South Africa, 16 pounds; and all other, 20 pounds.

⁷ Included in total production of grapes, fresh basis; 1 ton of raisins equivalent to about 4.77 tons of fresh grapes for 1965, 4.49 tons for 1964, 4.25 tons for 1963, 4.13 tons for 1962, and 4.0 tons for years prior to 1962.

⁸ Exports and imports of raisins converted to sweatbox, or production basis at the ratio of 1 to 1.08.

⁹ Includes currants.

Statistical Reporting Service and Economic Research Service. Foreign trade data from reports of the U.S. Department of Commerce. Data for 1929–48 in *Agricultural Statistics*, 1962, table 262.

¹ Excludes fruit not harvested on account of economic conditions and/or excess cullage of harvested fruit.² Obtained by weighting State prices by quantity sold. Beginning 1963, quantities processed are priced at the equivalent processing plant door level.³ Net processed weight.⁴ Canned peaches are 40 percent of total canned fruit for salad.⁵ Dried peaches are 21 percent of total dried fruit for salad.⁶ Exports of dried fruit converted to unprocessed dry weight by dividing by 1.07. Unprocessed dry weight converted to terms of fresh fruit on the basis that 1 pound dried equals 6.5 pounds fresh. Canned peaches converted to terms of fresh on basis that 1 pound canned equals about 1 pound fresh.⁷ Preliminary.Statistical Reporting Service and Economic Research Service. Italic figures are census returns of harvested production. Foreign trade data from reports of the U.S. Department of Commerce. Data for 1924–48 in *Agricultural Statistics, 1962*, table 270.

¹ Includes some quantities unharvested on account of economic conditions as follows (1,000 bushels): 1964—Maryland, 10; Tennessee, 10; Louisiana, 6; Idaho, 58; Colorado, 60; Utah, 38; 1965—New Jersey, 70; Pennsylvania, 110; Illinois, 6; Virginia, 85; North Carolina, 240; South Carolina, 300; Georgia, 1,220; Tennessee, 7; Alabama, 70; Colorado, 20; Oregon, 15.

² Preliminary.

³ Beginning 1963, quantities processed are priced at the equivalent processing plant door level.

⁴ Production too small to warrant quantitative estimate.

⁵ Includes excess cullage of harvested fruit (1,000 bushels): 1964—Maryland, 10; Idaho, 9; Colorado, 346; Washington, 160; California, Clingstone, 3,175; 1965—South Carolina, 400; Georgia, 300; Colorado, 195; California, Clingstone, 3,317.

⁶ Mainly for canning.

⁷ Includes States no longer estimated.

Statistical Reporting Service.

¹ Excludes fruit not harvested on account of economic conditions and/or excess cullage of harvested fruit.

² Obtained by weighting State prices by quantity sold. Beginning 1963, quantities processed are priced at the equivalent processing plant door level.

³ Net processed weight.

⁴ Dried pears are 16½ percent of total dried fruit for salad.

^b Canned pears are 33 percent of total canned fruit for salad.

^a Preliminary.

Statistical Reporting Service and Economic Research Service. Italic figures are census returns of harvested production. Foreign trade data from reports of the U.S. Department of Commerce. Data for 1924–48 in *Agricultural Statistics, 1962*, table 276.

¹ Years shown refer to years of harvest in Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere in 1964 is combined with preliminary forecasts for the Southern Hemisphere harvests which began late in 1964 and ended early in 1965.

² Preliminary.

³ Basic production data reported in units other than bushels converted to 50 pound equivalents.

⁴ Commercial crop.

⁵ Excludes cider pears reported separately.

⁶ Deciduous Fruit Board handlings.

⁷ May include some cider pears in countries not reported separately.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

United States.....	410,880	521,800	480,100	131.00	91.80	87.90

¹ Includes some quantities unharvested on account of economic conditions as follows (tons): Plums—California, 1,000 in 1964 and 3,000 in 1965; prunes—Idaho, 10,105 in 1964 and 412 in 1965.

² Preliminary.

³ Beginning 1963, quantities processed are priced at the equivalent processing plant door level.

⁴ Includes excess cullage of harvested fruit as follows (tons): Plums—California, 4,000 in 1964 and 5,000 in 1965; prunes—Idaho, 1,607 in 1964 and 202 in 1965; Washington, 1,900 in 1964 and 1,000 in 1965.

⁵ In California, the drying ratio is approximately 2½ pounds of fresh fruit to 1 pound dried.

¹ Production, price, and value for Idaho, Washington, Oregon, and California.² Excludes fruit not harvested on account of economic conditions and/or excess culage of harvested fruit.³ Obtained by weighting State prices by quantity sold. Beginning 1963, quantities processed are priced at the equivalent processing plant door level.⁴ Net processed weight.⁵ Dried prunes in salad estimated at 43 percent of total dried fruit for salad.⁶ Exports and imports of dried prunes converted to unprocessed dry weight by dividing by 1.025. Unprocessed dry weight converted to terms of fresh fruit on the basis that1 pound dried equals $2\frac{1}{4}$ pounds fresh. Canned prunes converted to terms of fresh fruit on the basis that 1 pound canned equals 0.729 pound fresh. Otherwise prepared or preserved, converted to terms of fresh fruit on the basis that 1 pound equals 0.899 pound fresh.⁷ Preliminary.Statistical Reporting Service and Economic Research Service. Foreign trade data from reports of the U.S. Department of Commerce. Data for 1929-48 in *Agricultural Statistics*, 1962, table 287.

¹ The drying ratio in Washington and Oregon ranges from 3 to 4 pounds of fresh fruit to 1 pound dried; in California, the drying ratio is approximately 2½ pounds to 1 pound dried.

² Some quantities frozen, dried, and otherwise processed are included with canned in order to avoid disclosing individual operation.

³ For 1964 and 1965, equivalent processing plant door returns.

⁴ Dried basis.

¹ Data for all commodities are on a calendar-year basis, except apples and pears which begin in June of year indicated and end the following year. Shipments by truck are not included but represent a large proportion of total movement, especially for some commodities. The data are not indicative of total production or total sales.

² Includes satsumas and tangerines.

Consumer and Marketing Service. Compiled from daily and monthly reports received from officials and local agents of common carriers throughout the country. Shipments shown in carlots include boat shipments reduced to a carlot basis. Data for 1939–55 in *Agricultural Statistics*, 1962, table 294.

¹ Series discontinued.² Beginning 1959, boysenberries only.Statistical Reporting Service. Data for 1939–55 in *Agricultural Statistics, 1962*, table 302.

FOOTNOTES FOR TABLE 381

¹ Canners' stocks for canned fruits in equivalent cases of 24 No. 2½ cans; canned juice in equivalent cases of 24 No. 2 cans. Distributors' stocks in actual cases.

² As of July 1.³ Stocks of sweet cherries as of June 1; red, sour, pitted cherries as of July 1.⁴ As of Nov. 1.⁵ Purple plums only.⁶ Fruit cocktail, fruits for salad, and mixed fruits (excluding citrus).⁷ Florida and Texas only, data not available for California-Arizona.

Consumer and Marketing Service. Compiled from reports of the National Canners Association, the Canners League of California, Northwest Canners and Freezers Association, and the U.S. Department of Commerce.

¹ Fresh citrus fruits are on a crop year basis. Dried fruits are on a pack year. The per capita civilian consumption was obtained by dividing the total apparent civilian consumption by total population adjusted for members of the Armed Forces not eating out of civilian supplies.

² Excludes noncommercial apples.

³ Apricots, avocados, bananas, cranberries, figs, grapes, nectarines, peaches, pears, pineapples; and (including an estimate for noncommercial) cherries, papayas beginning 1960, plums and prunes, and strawberries.

⁴ Apples, applesauce, apricots, berries, cherries (including brined), cranberries, figs, fruit cocktail and salad, citrus sections, olives (including brined), pineapple, plums, prunes, peaches (including spiced), and pears.

⁵ Grapefruit, orange, blended citrus, lemon and lime, tangerine and blend, pineapple, apple, grape and prune juices, and fruit nectars. Includes canned concentrated citrus juices converted to single-strength basis, but excludes all frozen juices.

⁶ Dried apples, apricots, dates, figs, peaches, pears, prunes, and raisins, except for unmerchantable figs, standard prunes, and prunes used for juice and concentrate. Data are in terms of processed dried weight.

⁷ Principally cherries, apples, peaches, apricots, strawberries, other berries, and citrus juices.

⁸ Beginning 1955, includes chilled citrus juices.

⁹ Beginning 1956, includes chilled sections and salad.

Economic Research Service. Data for 1909-48 in *Agricultural Statistics, 1962*, table 303.

¹ Includes almonds, filberts, pecans, walnuts, Brazil nuts, pignolias, pistachios, chestnuts, cashews, and miscellaneous tree nuts. Beginning 1960, includes macadamias.

² Almonds, filberts, walnuts, pecans, and macadamias; no reports on other nuts. Excludes quantities unharvested and culls not used or used for oil.

³ Foreign trade data on a fiscal year basis, beginning July 1 of year indicated.

⁴ Adjusted to allow for 80 million pounds of pecans (in the shell) carried over from 1963 to 1964.

⁵ Preliminary.

Economic Research Service. Data for 1939-48 in *Agricultural Statistics, 1962*, table 384.

¹ Preliminary.² Bags of 132.276 pounds each.³ Formerly a part of French Equatorial Africa.⁴ Prior to 1960, shown as Belgium Congo including Ruanda-Urundi.⁵ Average is for Ethiopian year (September 11–September 10).⁶ Prior to October 1964, shown as Tanganyika; now includes Zanzibar.⁷ Not a major producing country; exports include coffee produced in neighboring countries.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

CHAPTER VI

STATISTICS OF HAY, SEEDS, AND MINOR FIELD CROPS

Chapter VI deals with hay, pasture, seeds, and various minor field crops. Table 419 shows the seeding rate for a number of specified crops. The State averages represent the latest information available and are based largely on surveys made annually or every few years. The United States average rates are derived by weighting the average for each State by the acreage planted to the particular crop. Rates are not shown for States where the crop is not estimated currently.

Two new tables have been added to this chapter showing stocks of hay on farms on January 1 and May 1 and data relating to the international trade for dry edible beans.

One table has been dropped from this chapter relating to the acreage, yield, production, price, and value of velvetbeans. Estimates for this commodity were discontinued effective with the 1965 crop.

Table 397.—Hay, all: Acreage, yield, production, value, and foreign trade, United States, 1949–65

¹ Table includes, besides the ordinary edible beans and beans grown for seed, blackeyes, and garbanzos in California. Soybeans and mung beans are not included.

² Clean basis.

³ Obtained by weighting State prices by quantity sold. Includes allowance for unredeemed loans and purchases by the Government valued at the average loan and purchase rate, by States.

⁴ Compiled from the New York Journal of Commerce.

⁵ Stocks for 1950 from official reports adjusted for U.S. Department of Agriculture holdings. Estimates for other years based on the best sources available.

⁶ Census yield and production largely uncleansed basis.

⁷ Preliminary.

Statistical Reporting Service and Economic Research Service. Italic figures are census returns; census figures include all States; other figures, principal producing States only. Foreign trade data from reports of the U.S. Department of Commerce. Data for 1924–48 in *Agricultural Statistics, 1962*, table 420.

¹ Includes the following quantities not marketed because of economic conditions and/or the marketing agreement (1,000 pounds): 1,384 in 1959 and 324 in 1960. Sable allotments under the Marketing Agreement totaled (million pounds): 39 in 1949, 50 in 1950, 46.6 in 1951, and 40.4 in 1952. Price and value apply only to the part of the crop which was sold.

² Prices obtained by weighting State prices by quantity sold.

³ Includes hops held by growers, dealers, and brewers. Stocks for 1950–52 do not include hops held by growers which are not available for sale under the Marketing Agreement.

⁴ Records of the Bureau of Internal Revenue.

CHAPTER VII

STATISTICS OF CATTLE, HOGS, AND SHEEP

This chapter contains information about most kinds of farm livestock and livestock products, with the exception of dairy and poultry. The information relates to inventories, production, disposition, prices, and income for farm animals, and to livestock slaughter (including horse slaughter), meat production, and market statistics for meat animals.

The term "on farms" as used in this chapter includes ranches. Estimated numbers do not include livestock not on farms.

Differences between census inventories and January 1 estimated numbers are large in years when the census relates to a date other than January 1. The census enumerations in 1940 and 1950 were taken as of April 1, the enumerations in 1945 as of January 1, and in 1954 and 1959 as of October and November. Marketings and slaughter of livestock as well as young stock born during the period between January 1 and the date of enumeration can result in some rather large differences in numbers on farms. For example, hog marketings and slaughter are seasonally big during the first few months of the year and during the last 2 or 3 months of the year. As a result, the number on farms January 1 is substantially different than for either the preceding October or the following April.

One new table has been added to this chapter showing hay supply and disappearance, number of animal units fed annually, and the supply and disappearance per animal unit.

¹ Excludes interfarm sales.² Includes cattle shipped in from other States and from central markets but excludes intrastate shipments.³ Adjustments were made for cattle shipped in and changes in inventory.⁴ No adjustments made for cost of cattle shipped in and changes in inventory values. Gross income is "Cash receipts from sales of cattle, calves, beef, and veal" plus "Value of cattle and calves slaughtered for home consumption."

¹ Data in this report are obtained from offices of State Veterinarians and include only inshipments reported monthly to these offices. Since there are other shipments into some of these States, these data do not represent total inshipments. Totals are based on unrounded numbers.

² Includes stockers and feeders which were bought at stockyards.

³ Includes stockers and feeders from points other than public stockyards, some of which are inspected at public stockyards while stopping for feed, water, and rest en route.

¹ Factory and warehouse stocks as reported by the U.S. Department of Commerce. 1951 includes stocks held or in transit by U.S. Department of Agriculture.

² Includes imports, which were less than 500,000 pounds in all years except 1952, when 7 million pounds were imported.

³ 1950–53 include shipments by CARE.

⁴ Preliminary.

Economic Research Service. Compiled from reports of the U.S. Department of Commerce and the U.S. Department of Agriculture. Totals and per capita estimates computed from unrounded numbers. Data for 1920–49 in *Agricultural Statistics, 1962*, table 493.

Statistical Reporting Service.

FOOTNOTES FOR TABLE 501

¹ Excludes interfarm sales.² Includes sheep and lambs shipped in from other States and from central markets but excludes intrastate shipments.³ Adjustments made for cost of sheep and lambs shipped in and changes in inventory.⁴ No adjustments made for cost of sheep and lambs shipped in and changes in inventory values. Gross income is "Cash receipts from sales of sheep, lambs, mutton, and lamb" plus "Value of sheep and lambs slaughtered for home consumption."

Statistical Reporting Service.

¹ Data in this report are obtained from offices of State Veterinarians and include only inshipments reported monthly to these offices. Since there are other shipments into some of these States, these data do not represent total inshipments. Totals are based on unrounded numbers.

² Includes stockers and feeders which were bought at stockyards.

³ Includes stockers and feeders from points other than public stockyards, some of which are inspected at public stockyards while stopping for feed, water, and rest en route.

¹ Includes Alaska and Hawaii for apparel and carpet wool. Beginning 1961, includes Alaska for sheep shorn, weight per fleece, production, price, and value of sales.

² Includes sheep shorn at commercial feeding yards.

³ Average price is April–March, except 1963 which is April–December. Beginning with 1964, price is for calendar year.

⁴ Production by States multiplied by season average price.

⁵ Preliminary.

⁶ Actual weight through 1951.

⁷ Apparel wool includes all dutiable wool; carpet wool includes all duty-free wool.

⁸ Production minus exports, plus imports; stocks not taken into consideration.

⁹ Beginning 1965, includes carpet wool exports.

Statistical Reporting Service and Economic Research Service. Imports and exports from reports of the U.S. Department of Commerce. Data for 1930–49 in *Agricultural Statistics, 1962*, table 515.

Table 513.—Wool: Number of sheep shorn, weight per fleece, 1959–63 average price per pound received by farmers, and value of sales, by States, average 1959–63, annual 1964 and 1965

¹ Includes sheep shorn at commercial feeding yards.

² Preliminary.

³ For Texas and California, the weight per fleece is the amount of wool shorn per sheep and lamb during the year.

⁴ Price per pound relates to marketing season April-March, except 1963 which was April-December. Beginning 1964, price is for calendar year.

⁵ Production multiplied by season average price.

Statistical Reporting Service.

¹ For summary purposes, wool produced mostly in the spring in the Northern Hemisphere is combined with that produced in the season beginning July 1 or Oct. 1 of the same year in the Southern Hemisphere. Pulled wool is included for most countries at its greasy equivalent.

² Preliminary.

³ Converted "pulled wool" to greasy basis at 1.7.

⁴ Includes estimates for other producing countries.

⁵ Includes Basutoland and South West Africa.

⁶ Includes mainland China.

⁷ Rounded to nearest five million.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

¹ Scoured wool, plus greasy wool converted to a scoured basis, using assumed average yields. Includes both pulled and shorn, foreign and domestic wool. Wool was considered as consumed (1) on the woolen system when laid in mixes (2) on the worsted system when entering scouring bowls. Consumption on the worsted system is taken as the sum of top and noil production.

² 53 weeks.

³ Preliminary.

⁴ Domestic and duty-paid foreign.

⁵ Excludes wool consumed on the cotton system and in the manufacture of felt, hat bodies, and other miscellaneous products.

⁶ Duty-free foreign.

Economic Research Service. Compiled from reports of the U.S. Department of Commerce.

¹ Wools grown in the range areas of Washington, Oregon, the Intermountain States (including Arizona and New Mexico) and parts of the Dakotas, Nebraska, Kansas, and Oklahoma. These wools vary considerably in shrinkage and color.

² Open market prices.

³ Wools grown east of the Mississippi River and in the farm areas of the Dakotas, Nebraska, Kansas, Oklahoma, Minnesota, Iowa, and Missouri.

Economic Research Service. Data for 1940–55 in *Agricultural Statistics*, 1962, table 518.

¹ For calendar years, carcass weight basis: Beef and veal, pork, mutton, lamb and goat meat; horse meat is included in the total meat figure for Western and Eastern Europe, Japan, Philippines, China (Taiwan), Mexico, and U.S.S.R. Excludes variety, rabbit, and poultry meat.

² Production for Canada, United States, and Eastern Europe, which excludes lard and rendered pork fat, is not comparable with that for some other countries which excludes only commercial lard.

³ Preliminary.

⁴ Slaughter from domestic animals only.

⁵ Includes variety meats.

⁶ Less than a 5 year average.

⁷ Year ending June 30.

⁸ Includes allowance for any missing data for countries shown.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

¹ Carcass weight equivalent of all meat, including the meat content of minor meats and of mixed products. Exports exclude shipments for military-civilian feeding in United States occupied areas. Shipments to Territories include shipments to Puerto Rico, Virgin Islands, and Guam. Beginning 1963, includes Wake Island.

² Less than 500,000 pounds.

* Preliminary.

Economic Research Service. Data on imports and commercial exports and shipments are computed from records of the U.S. Department of Commerce; those on exports and shipments by the U.S. Department of Agriculture are separately estimated from deliveries and stocks. Data for 1940–55 in *Agricultural Statistics, 1962*, table 534.

¹ A feed unit is the equivalent in feeding value of a pound of corn (or a ton of corn if data are in tons).² Feed consumed by all grain-fattened cattle divided by the number on feed Jan. 1. The total number fattened in the year has been increasing relative to the number on feed Jan. 1 and is now about 88 percent larger than the number on feed Jan. 1.³ Feed for all cattle, except milk cows, divided by the net live weight production of cattle and calves. It includes the growth on dairy heifers and calves as well as all beef cattle.⁴ For each 100 pounds live weight production, about 19 pounds of wool was produced.⁵ Preliminary.⁶ This should not be used as a measure of increased efficiency of feeding, as much feed was salvaged from waste feed in the early years.Economic Research Service. Data for 1940-49 in *Agricultural Statistics*, 1962, table 544.

Table 543.—High-protein feeds: Quantity available for feeding, high-protein feed-consuming animal units, and quantity per animal unit, United States, annual 1955–64

CHAPTER VIII

DAIRY AND POULTRY STATISTICS

Dairy statistics in this chapter include series relating to many phases of production, movement, prices, stocks, and consumption of milk and its products. The two distinct series of numbers of milk cows on farms included in this publication should not be confused. One series entitled "Cows and heifers 2 years old and older kept for milk, January 1" is an inventory number of this specific age-sex classification which is estimated as one of the major groups making up the total cattle population at the beginning of the year. The other series, identified as "Milk cows on farms," is an annual average number of milk cows during the year (excluding any not yet fresh) which is used in connection with determining milk production. More animals are represented in the first series than the latter because heifers 2 years of age which have not freshened are included.

In comparing the several series of milk prices, it is important to note that prices received by farmers for all whole milk sold are for milk or milkfat content as actually sold, while certain prices paid by dealers for milk for fluid purposes or for specified manufacturing purposes may be quoted on a 3.5 percent butterfat basis, or for some types of manufacturing milk on the test of the milk used for that particular purpose.

Poultry and poultry products statistics include inventory numbers of chickens by classes; the production, disposition, cash receipts, and gross income from chickens and eggs; poultry and egg receipts at principal markets; commercial broiler production; turkey production, disposition, cash receipts, and gross income; liquid and dried egg production; and the National Poultry Improvement Plan.

The estimates of chickens and turkeys on farms in census years differ from the census figures to the extent of the seasonal disappearance in numbers from January 1 to the average date of the enumeration. Estimates relating to inventories, production, and income exclude poultry and eggs produced on places not classified as farms.

¹ Reflects difference in value of the various kinds of hay fed as well as the difference in value of baled, chopped, and loose hay.

Statistical Reporting Service.

FOOTNOTES FOR TABLE 549

¹ In computing hay equivalents, 3 tons of silage are considered equal to 1 ton of hay.

² Seasonal average condition for Apr. 1-Oct. 1 period.

³ Includes citrus pulp fed.

⁴ Data insufficient for stable average.

Statistical Reporting Service.

1965 ^b	3.41	3.89	3.35	3.68	3.35	3.76	3.37	3.74

¹ Simple average of monthly prices, by States, weighted by the number of milk cows on farms Jan. 1 of the current year.

² Average price at average fat test for all milk sold at wholesale to plants and dealers, based on reports from milk market administrators, cooperative milk-marketing associations, whole-milk distributors, and milk-products manufacturing plants, f.o.b. plant or receiving station, whichever is the customary place for determining prices, before hauling costs are deducted and including all premiums.

³ Milk eligible for fluid market, including surplus diverted to manufacturing.

⁴ Weighted average of monthly prices, by States, weighted by the estimated quantity of fat sold.

^b Preliminary.

^c Monthly average prices and tests weighted by estimated sales in each month. Price f.o.b. factory or local receiving station, whichever is the customary place for determining prices, before hauling costs are deducted and including all premiums.

^d Includes milk for canned condensed milk.

Statistical Reporting Service. Data for 1940–55 in *Agricultural Statistics*, 1962, table 569.

Table 568.—Milk markets under Federal marketing programs: Blend and Class I milk prices at 3.5 percent fat test, f.o.b. city plant, unless indicated otherwise; number of producers, deliveries by producers, average daily deliveries per producer, and average fat test of milk delivered by markets, 1964 and 1965

¹ Excludes producer-handlers who purchase no milk from other producers.

² Minimum blend price in market pools; weighted average of dealers' blend prices in individual-handler pools; weighted average of base and excess payments where such payments are used.

³ Bristol, Tennessee. ⁴ Zone I—New Braunfels, Texas (Austin 7.5¢ less).

⁵ Rapid City, South Dakota. ⁶ Phoenix. ⁷ Little Rock. ⁸ Abilene.

⁹ Mercedes (Corpus Christi 9¢ less). ¹⁰ Philadelphia. ¹¹ Denver.

¹² Sioux Falls. ¹³ Salt Lake City, Utah. ¹⁴ Spokane, Washington.

¹⁵ 201-210 miles from Boston. ¹⁶ Class I price at Zone II (Marquette).

¹⁷ January-August 1964 prices are the weighted average of the former Mississippi Delta, Central Mississippi, and Mississippi Gulf Coast orders. September-December 1964 prices are for the former Mississippi Delta market at Greenville.

¹⁸ January-April 1965 prices are for the former Mississippi Delta market at Greenville. May-December 1965 prices are for Mississippi at Gulfport (Jackson 10¢ less and Greenville 26¢ less).

¹⁹ Eastern zone (Omaha). ²⁰ Pittsburgh, Kansas.

²¹ 201-210 miles from New York metropolitan area.

²² Base zone (Waterloo), January 1964-August 1965 and Zone I (Waterloo), September-December 1965.

²³ Dallas and Fort Worth. ²⁴ Cleveland. ²⁵ Green Bay.

²⁶ Monroe and Shreveport. ²⁷ Gary.

²⁸ Class I price at Mansfield (Toledo 4¢ less).

²⁹ Oklahoma City (Tulsa 10¢ less).

³⁰ Springfield, Missouri. ³¹ District I (Seattle).

³² Rock Island, Illinois (Dubuque 10¢ less).

³³ Wichita Falls, Texas.

³⁴ Prices at Albuquerque and Santa Fe, January 1964-June 1965; Albuquerque, Santa Fe, and El Paso, July-December 1965.

³⁵ Rockford, Illinois. ³⁶ Miami. ³⁷ Detroit. ³⁸ Dodge City.

³⁹ Base zone (Carbondale). ⁴⁰ Amarillo.

⁴¹ Charleston-Huntington, West Virginia; Class I prices, January 1964-December 1965 and blend prices, October-December 1965.

⁴² Baltimore. Blend price does not include noncomplying handlers.

⁴³ Traverse City. ⁴⁴ Grand Junction.

Consumer and Marketing Service. Compiled from reports of market administrators.

¹ Grades may differ by market.² Simple average.³ Includes estimated price for Metropolitan New York and Dallas.

Statistical Reporting Service. Compiled from reports secured through the cooperation of milk distributors, producers' associations, and agricultural officials.

FOOTNOTES FOR TABLE 569

¹ Includes flavored whole milk.² Includes plain and fortified skim and part skim milk, buttermilk and cultured specialities, and flavored milk drinks.³ Annual sales based on marketing area as defined prior to Feb. 1, 1965, Quad Cities-Dubuque, St. Louis, and Louisville-Lexington-Evansville; Mar. 1, 1965, Nashville and Red River Valley; Apr. 1, 1965, Nebraska-Western Iowa, Northwestern Indiana, Paducah, and Chicago.⁴ Annual sales based on marketing area as defined after May 1, 1964, Columbus; Oct. 1, 1964, Massachusetts-Rhode Island.⁵ Annual sales represent the marketing area after the merger of Toledo and North Central Ohio, Jan. 1, 1965; Eastern South Dakota and Sioux Falls-Mitchell, May 1, 1965; Southern Michigan and Muskegon, Aug. 1, 1965; Eastern Colorado and Colorado Springs-Pueblo, Dec. 1, 1965.⁶ Annual sales represent the Mississippi Delta marketing area as defined prior to the amendment of May 1, 1965.

Consumer and Marketing Service. Compiled from reports of market administrators.

FOOTNOTES FOR TABLE 576

¹ Preliminary.² Includes colby, washed curd, high and low moisture jack, Monterey, and granular cheese.³ Excludes full-skim American and cottage cheese.⁴ Includes data for individual States which have less than 3 plants and are not shown separately.

Statistical Reporting Service.

Table 573.—Fluid milk: Dealers' average buying prices per hundredweight for milk for fluid milk use (3.5 percent milkfat basis), by regions, 1956–65¹

Year	New England	Middle Atlantic	East North Central	West North Central	South Atlantic	East South Central	West South Central	Mountain	Pacific	United States
	Dollars	Dollars	Dollars	Dollars	Dollars	Dollars	Dollars	Dollars	Dollars	Dollars
1956	5.93	5.84	4.46	4.46	6.08	5.15	5.78	5.68	5.05	5.32
1957	6.28	6.19	4.42	4.31	6.14	5.15	5.58	5.74	5.22	5.45
1958	6.13	6.16	4.28	4.24	6.16	5.11	5.55	5.67	5.17	5.40
1959	6.23	6.16	4.27	4.23	6.08	5.15	5.43	5.50	5.28	5.40
1960	6.16	6.17	4.54	4.31	6.05	5.30	5.52	5.48	5.34	5.48
1961	5.94	5.98	4.62	4.35	6.00	5.34	5.56	5.45	5.34	5.43
1962	5.96	5.89	4.57	4.20	5.94	5.27	5.33	5.24	5.35	5.35
1963	6.00	5.80	4.48	4.26	5.88	5.34	5.45	5.25	5.31	5.31
1964	6.02	5.82	4.52	4.33	5.91	5.48	5.55	5.33	5.32	5.35
1965 ²	5.95	5.83	4.58	4.39	5.94	5.49	5.54	5.37	5.34	5.39

¹ Includes Class I prices (with premiums above minimum prices in Federal Order markets) and flat prices where effective. In some markets the prices paid for fluid milk and cream are the same. All prices, f.o.b. city. Regional and United States prices are weighted by population of individual markets.

² Preliminary.

Statistical Reporting Service. Compiled from reports secured through the cooperation of milk distributors, producers' associations, and agricultural officials. Data for 1940–55 in *Agricultural Statistics, 1962*, table 573.

Table 574.—Milk: Average price per 100 pounds paid producers by condenseries for milk of actual milkfat content, to be used primarily for evaporated milk, by geographic divisions, 1956–65¹

Year	Middle Atlantic	South Atlantic	East North Central	West North Central	South Central	North-western ²	South-western ³	United States

¹ Beginning 1960, includes Alaska and Hawaii.² Preliminary.³ Excluding American full-skim cheese and cottage, pot, and bakers' cheese.⁴ Cottage cheese curd includes pot and bakers' cheese; creamed cottage cheese contains not less than 4 percent milkfat; whereas partially creamed cottage cheese contains less than 4 percent milkfat and is not legal in interstate commerce and in many States. Cottage cheese curd and creamed or partially creamed cottage cheese should not be added together to obtain a total cottage cheese figure. While a small quantity of cottage cheese curd is sold direct for consumption without further processing, a considerable part is creamed within the plant or shipped to another plant where creaming mixture is added prior to sale. Data for partially creamed cottage cheese not reported separately prior to 1957.⁵ Less than 3 plants reporting.⁶ Includes freezer-make milkshake in most States.

¹ Includes fluid milk equivalent of cream. Beginning 1960, includes Alaska and Hawaii. The total apparent civilian consumption was obtained by subtracting military takings from total fluid milk use. The per capita civilian consumption rates were obtained by dividing the total apparent civilian consumption by the number of persons eating out of civilian supplies. ² Preliminary.

Economic Research Service. Data for 1909-48 in *Agricultural Statistics, 1962*, table 584.

¹ Beginning 1960, includes Alaska and Hawaii. Total disappearance is based on production, imports, and change in stocks during the year. Production statistics for these commodities appear in other tables in this chapter. The total apparent civilian consumption was obtained by subtracting ending stocks, shipments, exports, and military takings from the total supply. The per capita civilian consumption for each year was obtained by dividing the total apparent civilian consumption by the number of persons eating out of civilian supplies.

² Includes both farm and factory-made butter.

³ Includes all kinds of cheese except cottage and full-skim American.

⁴ The evaporated milk is unskimmed, unsweetened, case goods. The condensed milk is unsweetened (plain condensed) unskimmed, bulk goods; and sweetened condensed milk, unskimmed, case, and bulk goods.

^b Preliminary.

¹ Milkfat and nonfat solids content of butter, cheese, and nonfat dry milk purchased under dairy price support and related programs. Excludes milk solids content of fluid milk partly paid for by Commodity Credit Corporation under Military and Veterans milk program.

² Price increase effective Apr. 18, 1956.

³ Price increase effective Sept. 17, 1960.

⁴ Price increase effective Mar. 10, 1961.

⁵ Price increase effective July 18, 1961.

⁶ Purchase price 0.2 cents higher for delivery in tape-sealed bags. Beginning Jan. 1, 1966, purchases in non-sealed bags discontinued.

Agricultural Stabilization and Conservation Service.

¹ Data on cross-mated flocks are not truly indicative of the situation since in several States birds in such flocks are reported under the respective purebred heading, and in some States those flocks are cross-mated only for a portion of the year to produce broilers; for the remainder of the year they are mated as purebreds for the production of purebred chicks.

Agricultural Research Service. Data for 1941-54 in *Agricultural Statistics*, 1962, table 602.

Table 603.—Chickens: Broiler production, and gross income, United States, 1950–65

¹ Broilers are young chickens of the heavy breeds and other meat-type birds, to be marketed at 2-5 pounds live weight, and from which no pullets are kept for egg production. These figures are not included in farm production of chickens. Beginning 1961, includes Hawaii.

² Includes value of consumption in households of producers, which is less than 1 percent of total production.

Preliminary.

Statistical Reporting Service. Data for 1934-49 in *Agricultural Statistics*, 1962, table 603.

FOOTNOTES FOR TABLE 605

¹ Broilers are young chickens of the heavy breeds and other meat-type birds, to be marketed at 2-5 pounds live weight, and from which no pullets are kept for egg production.

² Includes consumption which is less than 1 percent of total production.

³ Preliminary.

⁴ Colorado and Arizona combined to avoid disclosing individual operations.

CHAPTER IX

FARM RESOURCES, INCOME, AND EXPENSES

The statistics in this chapter deal with farms, farm practices, and the financial aspects of farming. Many of the series are estimates developed in connection with the research activities of the Department. Others are primarily records of operations, such as certain data from agricultural credit agencies.

For convenience, the tables have been arranged in general groups. These groups, with the beginning table indicated, are as follows:

Farm property, table 630

Population and employment, table 649

Farm production and distribution, table 655

Prices and income, table 679

Costs and expenses, table 694

Credit and loan programs, table 745

Stabilization and price support programs, table 751

Five new tables have been added to this chapter showing acreage diverted and payments earned under Feed Grain and Wheat programs, cropland diverted under specified programs, tobacco and peanut allotment distribution by size groups and by States, and number of farm allotments for basic commodities by States.

Six tables have been dropped from this issue relating to wheat acreage diverted and payments earned by States, Feed Grain Program distribution of farms by size of base acreage by States, acreage diverted and payments earned for corn, barley, and grain sorghums under the Feed Grain Program, and farmers' mutual fire insurance companies data.

1959	3,703,894	1,120,158	58.9	311,285	128,988

¹ 48 States, excluding Alaska and Hawaii.² Acreages are for preceding year except for 1954 and 1959. Prior to 1925, this column shows the total acreage of crops for which figures are available, except for 1920, when 14,502,932 acres of corn cut for forage were excluded (most of this was probably duplicated in the acreage of corn harvested as grain). Beginning with 1925, the figures represent the total cropland harvested.³ Estimates for 1950, 1954, and 1959 are based on a sample of farms.⁴ Estimate derived from the index of farm real estate values applied to 1940 and 1950 Census values. 1945 Census reported a total value of land and buildings of \$46,389 million.

Economic Research Service. Compiled from reports of Census of Agriculture, U.S. Department of Commerce.

¹ Indexes are based on deposits of member banks of the Federal Reserve System located in places of less than 15,000 population. Annual indexes are simple averages of monthly indexes which are based on average amounts of daily deposits. In preparing indexes of groups of States, the amounts of monthly deposits for each State are weighted by the cash farm income of each State in the base period. Beginning with December 1959, U.S. Government deposits are excluded from the data on which the indexes for demand deposits are based. This change in method of reporting slightly lowers the levels of the indexes.

² Arkansas, Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Nebraska, New York, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, South Dakota, Texas, Washington, and Wisconsin.

³ Michigan, Wisconsin, and Minnesota.

⁴ Ohio, Indiana, Illinois, Missouri, and Iowa.

⁵ North Carolina, South Carolina, Georgia, Alabama, Mississippi, Arkansas, Louisiana, and Oklahoma.

⁶ Mississippi, Arkansas, and Louisiana.

⁷ North Dakota, South Dakota, Nebraska, and Kansas.

⁸ Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, and Nevada.

¹ Row cultivators, tractor-drawn or mounted; beet or field cultivators not included.² Includes only the number of vacuum-pump units for stationary and portable milking machines.Agricultural Research Service. Compiled from reports of the U.S. Department of Commerce. Data for 1944-54 in *Agricultural Statistics*, 1962, table 644.

FOOTNOTES FOR TABLE 650

¹ Average number of persons employed during one survey week each month. Survey weeks selected are the latest calendar week that excludes the last day of the month.² Includes farm operators doing one or more hours of farm work and members of their families working 15 hours or more during the survey week without cash wages.³ Includes all persons doing farm work for pay in survey weeks.

¹ Average number of persons employed during one survey week each month. Survey weeks selected are the latest calendar week that excludes the last day of the month.

² Includes farm operators doing 1 or more hours of farm work and members of their families working 15 hours or more during the survey week without cash wages.

³ Includes all persons doing farm work during the survey week for pay.

Statistical Reporting Service. Data for 1910-48 in *Agricultural Statistics, 1962*, table 648.

¹ Data relate to persons 14 years of age and over in the civilian noninstitutional population at or near the end of the year. No survey conducted in 1953 and 1955. This series differs from the hired workers series shown in table 651 which gives an annual average based on employment during the last week of each month.

² Beginning 1960, includes Alaska and Hawaii.

Economic Research Service. Based on data from enumerative sample surveys made by the U.S. Department of Commerce for the Economic Research Service. Data for 1946-48 in *Agricultural Statistics, 1962*, table 649.

MIGRATORY FARM WORKERS; FARM WAGE RATES

¹ Data relate to persons 14 years of age and over in the civilian noninstitutional population at or near the end of the year. Estimates not available for all intervening years. Migratory workers are those who leave their homes temporarily to do farm wage work in another county or counties. Does not include foreign nationals brought into the United States to do farm work who have left the country before the time of the survey.

² Beginning 1960, includes Alaska and Hawaii.

Economic Research Service. Based on data from enumerative sample surveys made by the U.S. Department of Commerce for the Economic Research Service.

	354,776	338,184		324,941	316,248			

¹ Includes harvested acreage of 43 crops for which separate planted estimates are not available. See footnote 7 in table 656.

² Count of 59 crops based on crops included from 1949–53. These are as follows: All corn, all wheat, oats, barley, rye, buckwheat, flaxseed, rice, sorghum grain, sorghum forage and silage, cotton, hay, timothy seed, sweet-clover seed, dry edible beans, dry field peas, soybeans for beans, cowpeas for peas, peanuts harvested for nuts, sorghum for syrup (through 1959), sugarcane, sugarbeets, potatoes, sweetpotatoes, tobacco, broomcorn, artichokes, asparagus, lima beans, snap beans, beets, broccoli, brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, honeyball melons, honeydew melons, kale, lettuce, onions, green peas, green peppers, pimientos, shallots, spinach, tomatoes, and watermelons. Honeyball melons were dropped in 1954 and pimientos in 1956. The addition or dropping of crops generally has little effect on the total. Red clover seed, alsike clover seed, lespediza seed, and alfalfa seed are included in the count of crops, but the acreage is not included because it is mostly duplicated in the hay acreage.

³ Preliminary.

Statistical Reporting Service. Data for 1909–48 in *Agricultural Statistics, 1962*, table 653.

FOOTNOTES FOR TABLE 657

¹ Does not include Alaska and Hawaii.

² Preliminary.

³ Asparagus, lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers, green peas, pimientos, spinach, and tomatoes. Estimates for pimientos discontinued beginning with the 1956 crop.

⁴ Count of 28 crops based on crops included from 1949–53. These are as follows: Artichokes, asparagus, lima beans, snap beans, beets, broccoli, brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, honeyball melons, honeydew melons, kale, lettuce, onions, green peas, green peppers, shallots, spinach, tomatoes, and watermelons. Honeyball melons were discontinued beginning with the 1954 crop. The addition or dropping of crops generally has little effect on the total. Excludes farm gardens. Acreage for harvest, including mature acreage abandoned or only partially harvested because of low prices or other economic factors.

⁵ Totals are for crops shown in preceding columns. Alfalfa seed, red clover seed, alsike clover seed, and lespediza seed are included in the count of crops, but the acreage is not included because it is mostly duplicated in the hay acreage; the acreage of peanut hay, largely duplicated in peanuts harvested for nuts, has been deducted. Other crops not included are hops, various legumes and other crops harvested by livestock, minor crops, and fruits and nuts. The acreage shown includes some crops harvested in succession from the same land.

⁶ Commercial apples, peaches, pears, grapes, cherries, plums, prunes, apricots, figs, nectarines, olives, avocados, cranberries, dates, persimmons, pomegranates, oranges, tangerines, grapefruit, lemons, limes, tangelos (beginning with the 1955 crop), walnuts, almonds, and filberts.

Statistical Reporting Service. Data for 1934–48 in *Agricultural Statistics, 1962*, table 655.

¹ Does not include Alaska and Hawaii.² Includes acreage planted in preceding fall for harvest in the year shown.³ Grain and sweet sorghums for all uses, including sirup, from 1949 through 1959; excluding sirup beginning with 1960.⁴ Acreage seeded in preceding fall.⁵ Preliminary.⁶ Count of 43 crops based on crops included from 1949–53. These are as follows: Rye, hay, sweetclover seed, timothy seed, soybeans for beans, cowpeas for peas, peanuts harvested for nuts, tobacco, sugarcane, broomcorn, and 29 commercial vegetables [11 for processing: asparagus, lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers, green beans, pimientos, spinach, and tomatoes; 28 for fresh market: artichokes, asparagus, lima beans, snap beans, beets, brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, honeyball melons, honeydew melons, kale, lettuce, onions, green peas, green peppers, shallots, spinach, tomatoes, and watermelons]. Honeyball melons were dropped in 1954 and pimientos in 1956. The addition or dropping of crops generally has little effect on the total. Alfalfa seed, red clover seed, alsike clover seed, and lespedeza seed are included in the count of crops, but the acreage is not included because it is mostly duplicated in the hay acreage; the acreage of peanut hay, largely duplicated in peanuts harvested for nuts, has been deducted. The harvested instead of the planted acreage of rye is included because most of the rye acreage not harvested is planted to other crops or used for pasture. Excludes grains cut for hay because part of the acreage shown as planted to wheat, oats, and barley is included in grain hay.⁷ Includes crops listed separately in this table, plus those mentioned in footnote 6. (Sorghums counted as 3 crops—grain, forage, and sirup.)Statistical Reporting Service. Data for 1934–48 in *Agricultural Statistics*, 1962, table 654.

Total 78 crops ¹²												

¹ Alaska and Hawaii included in commercial vegetables and sugarcane, but excluded from other crops. Total of 59 crops harvested does not include Alaska and Hawaii.

² Preliminary.

³ Includes acreage seeded in preceding fall.

⁴ Acreage seeded in preceding fall.

⁵ Clean basis.

⁶ All purposes. Estimated discontinued in 1965.

⁷ Includes some quantities not harvested.

⁸ Does not include Hawaii.

⁹ Includes syrup later made into sugar. Does not include production in nonfarm lands in Somerset County, Maine.

¹⁰ Fresh basis.

¹¹ For breakdown between fresh market and processing, see individual crop tables.

¹² Shelled basis. For lima beans, 2 pounds in the shell produce approximately 1 pound of shelled beans; for green peas, 2½ pounds in the shell produce approximately 1 pound of shelled peas.

¹³ Includes crops listed in footnote 2, table 655. Farm value also includes apples, (commercial crop), peaches, pears, grapes, cherries, cranberries, oranges, grapefruit, lemons, limes, plums, all prunes, apricots, figs, olives, almonds, walnuts, pecans, maple products, and hops.

¹⁴ Total values do not include revisions made after December 1965 which are shown in this table.

Statistical Reporting Service.

¹ For cattle, sheep, and hogs, the quantity of net production is the live weight actually produced during the year, adjustments having been made for animals shipped in and changes in inventory.

² Excludes Alaska and Hawaii.

³ Preliminary.

⁴ Including commercial broiler production.

Statistical Reporting Service.

¹ Area in 59 principal crops harvested as reported by Statistical Reporting Service, plus acreages in fruits, tree nuts, and farm gardens.

² Acreages for exports relate to exports for year beginning July 1, or month representing beginning of crop season. Acreage includes seeds for crops and feed for livestock that are exported.

³ Includes products used by our military forces in this country and abroad, and by our domestic civilian population.

⁴ Includes persons in our military forces in this country and abroad.

⁵ Preliminary.

Economic Research Service. Data for 1910-48 in *Agricultural Statistics, 1962*, table 658.

¹ Quantity index using U.S. average farm prices in base period for weights among commodities; 1957-59 prices used starting with 1955; 1947-49 used earlier.

² Excludes domestic use of feed (which will appear in farm value of livestock) and seed (which is not available for other utilization).

³ Includes shipments from the mainland to Alaska and Hawaii when data are available.

⁴ Minus indicates decrease in stocks.

⁵ Preliminary.

Economic Research Service. Data for 1934-48 in *Agricultural Statistics, 1962*, table 660.

Table 663.—Agricultural productivity: Index numbers of farm output per unit of input, United States, 1949-65

[1957-59 = 100]

Year	Productivity ¹	Year	Productivity ¹	Year	Productivity ¹
1949	86	1955	94	1961	106
1950	85	1956	96	1962	107
1951	86	1957	96	1963	110
1952	89	1958	103	1964	109
1953	90	1959	101	1965 ²	112
1954	91	1960	105		

¹ Productivity is the output-input ratio. The ratio is obtained by dividing the index of farm output in table 665 by the index of total inputs in table 664.

² Preliminary.

Economic Research Service. Data for 1910-48 in *Agricultural Statistics, 1962*, table 661.

FOOTNOTES FOR TABLE 665

¹ Production of livestock and livestock products for human use, horses and mules excluded.

² Includes clipped wool, mohair, honey, and beeswax. These items are not included in the separate groups of livestock and products shown.

³ Cattle and calves, sheep and lambs, and hogs.

⁴ Butter, butterfat, wholesale milk, retail milk, and milk consumed on farms.

⁵ Chicken eggs, commercial broilers, chickens, and turkeys.

⁶ Includes farm gardens, production of hayseeds, pasture seeds and cover-crop seeds, and some miscellaneous crop production not included in separate groups of crops shown.

⁷ Corn for grain, oats, barley, and sorghum grain.

⁸ All hay, sorghum forage, corn silage, and sorghum silage.

⁹ All wheat, rye, buckwheat, and rice.

¹⁰ Potatoes, sweetpotatoes, dry edible beans, dry field peas, truck crops for processing, and truck crops for fresh market having value.

¹¹ Fruits, berries, and tree nuts having value.

¹² Sugarbeets, sugarcane for sugar and seed, sugarcane sirup, and maple syrup.

¹³ Cotton lint and cottonseed.

¹⁴ Soybeans, peanuts picked and threshed, peanuts hogged, flaxseed, and tung nuts.

¹⁵ Preliminary.

Economic Research Service. Data for 1934-48 in *Agricultural Statistics, 1962*, table 663.

¹ Total persons supplied with agricultural products from United States farm production divided by farm employment. Total persons supplied in the United States is obtained by dividing value of farm production minus value of agricultural exports by per capita level of support. Total persons supplied abroad is calculated by dividing value of United States agricultural exports by per capita level of support in the United States. Per capita level of support is derived by dividing total population into value of farm production minus value of agricultural exports plus value of agricultural imports.

² Includes persons in our military forces in this country and abroad. Excludes Alaska and Hawaii.³ Preliminary.

Economic Research Service. Data for 1820-1948 in *Agricultural Statistics, 1962*, table 672.

1963 ⁷	14,557	11,234	4,394	2,831	19,264	14,378

¹ Includes Alaska and Hawaii.² Reports of cooperatives are included either for the calendar year or for fiscal years ending between July 1 of the calendar year shown and June 30 of the following calendar year, with limited exceptions.³ Includes independent local cooperatives, centralized cooperatives, and federations of cooperatives. Cooperatives are classified according to the activity in which they do more than 50 percent of their business.⁴ Cooperatives providing services related to marketing or purchasing activities.⁵ Includes members (those entitled to vote for directors). Duplication exists as some farmers belong to more than one cooperative.⁶ Receipts for services related to marketing and purchasing activities, but not included in the volumes reported for these activities.⁷ Preliminary.⁸ Cooperatives report sales of each major commodity marketed, the value of each major type of supply purchased, and receipts from major types of services performed for patrons. Total marketing volume, therefore, consists only of the value of products actually marketed, and farm supply volume consists only of the value of supplies purchased.⁹ Includes intercooperative business.¹⁰ Excludes intercooperative business.Farmer Cooperative Service. Based on reports from cooperatives reporting to the Service. Data for 1934-49 in *Agricultural Statistics*, 1962, table 673.

Table 676.—Farmers' cooperatives: Number of marketing, farm supply, and related service cooperatives and business volume, United States, 1963-64¹ (preliminary)

Item	Cooperatives handling	Gross business (includes intercooperative business)	Net business (excludes intercooperative business) ²
	Number	1,000 dollars	1,000 dollars
Products marketed for patrons:			
Beans and peas (dry edible).....	66	41,448	28,627

Other supplies ⁴	4,648	372,018	215,750
Total farm supplies.....	4 6,872	4,393,864	2,831,586
Receipts for services:			
Trucking, cotton ginning, storage, grinding, locker plants, miscellaneous.....	4 5,364	4 313,103	4 313,103
Total business.....	4 8,847	19,264,149	14,378,387

¹ Includes Alaska and Hawaii.

² Represents value at the first level at which cooperatives transact business for farmers.

³ Includes coffee, forest products, fur pelts, hay, hops, nursery stock, tung oil, and other farm products not separately classified.

⁴ Because many cooperatives do more than one type of business, these totals are less than the number that would be obtained by adding the number of cooperatives marketing individual products, handling individual supplies, or providing individual services.

⁵ Includes plant equipment, automotive supplies, hardware, chicks, and other supplies not separately classified.

⁶ Receipts for services related to marketing and purchasing activities, but not included in the volumes reported for these activities.

Farmer Cooperative Service. Based on records from cooperatives reporting to the Service.

¹ Farmer Cooperative Service, Department of Agriculture.

² When associations marketing farm products but principally engaged in providing some other services are included, the total is 6,152.

³ When associations purchasing farm supplies but principally engaged in providing some other services are included, the total is 6,872.

⁴ Includes general trucking, storage, grinding, locker plant, and other services.

⁵ When associations providing miscellaneous services but principally engaged in marketing or farm supply activities are included, the total is 5,364.

⁶ Farm Credit Administration.

⁷ Represents the number of Federal Land Bank loans outstanding as of June 30, 1965.

⁸ Estimated members of associations borrowing from banks for cooperatives as of June 30, 1965.

⁹ Credit Union National Associations, Inc., revised.

¹⁰ Rural Electrification Administration, Department of Agriculture.

¹¹ Includes only associations that are REA borrowers.

¹² Number receiving service.

¹³ Farmer Cooperative Service, Department of Agriculture estimates.

¹⁴ Census of Irrigation, Department of Commerce, Preliminary.

¹⁵ Dairy Husbandry Research Branch, Department of Agriculture.

¹⁶ Number of cooperative bull studs and herds.

Farmer Cooperative Service.

¹ The market basket contains the average quantities of farm-originated foods purchased annually per household in 1960-61 by wage-earner and clerical-worker families and single persons living alone.

² Retail costs are calculated from retail prices published by the U.S. Department of Labor.

³ The farm values, or payments received by farmers for products equivalent to the foods in the market basket, are calculated from prices received by farmers. The farm values of processed products are adjusted by subtracting imputed values of byproducts.

⁴ Beginning July 1964, the farm value and farmer's share for bakery products are based on the market price of wheat received by farmers plus the cost of the marketing certificate to processors.

¹ The total marketing bill is the difference between total civilian expenditures for domestic farm-originated food products and the farm value or payment farmers received for the equivalent farm products. It relates only to domestic food bought by civilian consumers and not to that sold to the Armed Forces or exported. Beginning 1960, includes Alaska and Hawaii.

¹ For domestic farm foods bought by civilian consumers in this country.

² Includes wages, salaries, and supplements of employees and also imputed earnings by proprietors and family workers not receiving stated remuneration. Does not include the cost of labor employed in intercity for-hire transportation.

³ Includes charges for heating and refrigeration; does not include local hauling; charges for intercity transportation by water and air are a part of the "other" or residual component of the marketing bill.

⁴ Does not include profits of unincorporated firms, or firms engaged in intercity transportation.

⁵ Residual component; includes other costs such as advertising, depreciation, fuel, electric power, containers, packaging materials, air and water transportation, interest on borrowed capital, rents, noncorporate profits, and taxes other than Federal income taxes.

¹ All index number series are of the weighted aggregative type. They are based upon averages of rates in effect during the year. Annual averages are computed by weighting the rates by the number of days they are in effect. In constructing the combined index, group indexes were weighted by average revenues for 1957–59.

² Beginning 1957, combined index includes soybeans, corn, small grains, wool, and tobacco.

³ Beginning 1957, weights for annual average freight rates are based on 1957–59 quantity data. Indexes for 1957–64 have been revised.

¹ Season average prices for crops; weighted calendar year average for livestock and livestock products. Unless otherwise noted, these are averages for marketing season or calendar year computed by weighting State prices by quantities sold, or by production for those commodities for which virtually all the production is sold.

² Parity prices as computed, currently using base prices in effect and indexes for months indicated. Parity prices shown are those used in connection with a support price determination, when applicable, otherwise for the most recent month available preceding the start of the crop marketing season for crops and the calendar year for livestock and livestock products. ³ Preliminary. ⁴ Previous year. ⁵ Following year. ⁶ State annual average price weighted by production to obtain U.S. averages. ⁷ Average local market price for wool sold excluding incentive payment. ⁸ Average local market price for mohair sold excluding incentive payment.

⁹ Price to December 1. ¹⁰ Based on equivalent packinghouse-door returns for Pacific Coast States and prices as sold for other States. ¹¹ Equivalent per unit returns for bulk fruit at first delivery point. ¹² Prices for fresh use for important producing States and average prices for all methods of sale for other States. ¹³ Packinghouse-door returns for fresh consumption for Pacific Coast States, average prices for fresh use for New York and Michigan, and average prices for all methods of sale for other States. ¹⁴ Includes California dried prunes.

¹⁵ Prices include average conditional payments to farmers authorized by the Sugar Act. ¹⁶ Continental United States only. ¹⁷ Average price to Dec. 1 for all States, except Louisiana which is a season average. ¹⁸ Includes some processing. ¹⁹ Simple average of States weighted by estimated Jan. 1 head for U.S. average.

²⁰ Sold by farmers directly to consumers.

¹ Average level during the marketing year beginning in the year shown. The summary excludes gum naval stores, surplus almonds (1961 only), and some crops which have not been supported in recent years.

² Represents the average loan rate or purchase price plus any direct price support payment (or in the case of wheat the value of domestic marketing certificates) received by participants in the production adjustment program for the commodity. The basis of such payments varies among the crops and from year to year.

³ National average loan rate for all grades and locations.

⁴ Basis 1-inch Middling, except 1959 and 1960 which are $\frac{1}{4}$ -inch Middling.

⁵ Choice A. Choice B support: 1959—\$0.2470, and 1960—\$0.2818.

⁶ Grade No. 2 or better, except for oats which is Grade No. 3. Support was nonmandatory in 1959.

⁷ Basis grade (100) for purchases from producers with appropriate differentials for purchases from ginners to reflect normal handling costs beginning 1963; prior to 1963, loan rates to ginners basis grade (100).

Agricultural Stabilization and Conservation Service. Data for 1944–58 in *Agricultural Statistics, 1968*, table 682.

¹ The over-all index is known as the Parity Index which is the Index of Prices Paid by Farmers including Interest, Taxes, and Wage Rates.

² Simple average of quarterly indexes seasonally adjusted.

Statistical Reporting Service. Data for 1934-48 in *Agricultural Statistics, 1962*, table 685.

FOOTNOTES FOR TABLE 686

¹ Fresh market for noncitrus, and fresh market and processing for citrus.

² Ratio of index of prices received to index of prices paid including interest, taxes, and farm wage rates.

³ Preliminary.

Statistical Reporting Service. The price series for individual commodities are averages for all classes and grades of the commodity being sold in local farm markets on or about the 15th of each month. In computing the group indexes, prices of individual commodities have been weighted by average quantities sold during 1937-41 through September 1952. From September 1952 forward, average quantities sold during 1953-57 were used. Data for 1934-48 in *Agricultural Statistics, 1962*, table 684.

Table 688.—Prices paid by farmers: Prices, by commodities, United States, average 1957-59, annual 1962-65¹

Commodity and unit	Average 1957-59	1962	1963	1964	1965
	Dollars	Dollars	Dollars	Dollars	Dollars
Food:					
Round steak, per pound.....	0.892	0.952	0.933	0.917	0.958
Hamburger (beef), per pound.....	.526	.543	.532	.520	.542
Bologna, per pound.....	.556	.564	.560	.556	.608
Bacon, sliced, per pound.....	.638	.623	.597	.594	.781
Ham, whole, per pound.....	.642	.616	.600	.593	.605
Pork chops, per pound.....	.738	.758	.726	.722	.898
Pork sausage, per pound.....	.512	.524	.510	.507	.664
Salmon, pink, per 16 ounce can.....	.632	.774	.712	.668	.687
Lard, per pound.....	.211	.197	.195	.202	.231
Vegetable shortening, per 3 pound can.....	.915	.821	.766	.764	.846
Margarine, per pound.....	.271	.259	.250	.250	.266
Milk, fluid, per quart.....	.242	.247	.246	.247	.246
Milk, evaporated, per 14½ ounce can.....	.156	.163	.160	.160	.164
Butter, packaged, per pound.....	.756	.770	.766	.774	.796
Cheese:					
American, per pound.....	.587	.626	.630	.634	.634
Processed, American, per pound.....					.660
Natural cheddar, American, per pound.....					.519
Eggs, per dozen.....	.516	.494	.525	.505	.519
Flour, per 25-pound sack.....	2.15	2.19	2.19	2.22	2.28
Bread, white, loaf, per pound.....	.187	.202	.206	.207	.212
Soda crackers, packaged, per pound.....	.292	.301	.305	.305	.317
Cornmeal, per pound.....	.0751	.0779	.0775	.0780	.0821
Corn flakes, packaged, per pound.....	.322	.359	.376	.388	.393
Roiled oats, packaged, per pound.....	.164	.185	.191	.194	.199
Rice, packaged, per pound.....	.185	.193	.191	.194	
Baking powder, canned, per pound.....	.249	.283	.287	.292	.299
Corn, per standard #303 can.....	.174	.189	.182	.180	.189
Peas, per standard #303 can.....	.179	.192	.192	.196	.202
Beans, dry, Navy, per pound.....	.168	.168	.168	.171	.193
Potatoes, Irish, per 10-pound bag.....	.539	.536	.526	.701	.792
Cabbage, per pound.....	.0862	.102	.0907	.0950	.104
Lettuce, per head.....	.210	.225	.214	.244	.224
Tomatoes, fresh, per pound.....	.271	.285	.189	.206	.331
Apples, per pound.....	.156	.168	.164	.159	.160
Bananas, per pound.....	.170	.166	.165	.170	.166
Lemons, 300's, per dozen.....	.524	.602	.634	.561	
Oranges, per dozen.....	.550	.609	.679	.638	.632
Sugar, per 10-pound bag.....	1.10	1.14	1.38	1.25	1.20
Syrup:					
Table, pint (16 fl. oz.).....	.178	.214	.234	.255	
Cane blend with corn and sugar syrup, per pint (16 fl. oz.).....					.262
Maple blend with corn and sugar syrup, per pint (16 fl. oz.).....					.389
Candy, non-chocolate, without nuts, per pound.....	.343	.366	.388	.399	.413
Coffee, ground, per pound.....	.866	.717	.708	.840	.856
Tea, Orange Pekoe, packaged, per pound.....	1.67	1.70	1.71	1.72	1.74
Tobacco:					
Smoking tobacco, packaged, per pound.....	1.39	1.79	1.81	1.82	1.83
Cigarettes, per package of 20.....	.246	.265	.266	.271	.288
Clothing and yard goods:					
Men's clothing:					
Overalls, each.....	3.51	3.74	3.82	3.90	3.96
Shirts, cotton, work, each.....	2.02	2.21	2.25	2.31	2.40
Undershirts, sleeveless, each.....	.085	.743	.742	.747	.754
Shorts, each.....	.808	.849	.857	.863	.867
Union suits, heavy, cotton, each.....	2.79	3.03	3.07	3.14	3.22
Gloves, canvas, work, per pair.....	.360	.377	.384	.392	.399
Jackets:					
Wool, each.....	13.70	15.10	15.30	15.80	
Chore, lined, each.....					6.85
Socks, cotton, work, per pair.....	.326	.350	.356	.363	.369
Shoes, work, per pair.....	7.87	8.68	8.74	8.84	9.11
Boots, rubber, knee-length, per pair.....	6.86	7.16	7.10	7.06	7.12
Suits, wool, 1 pair pants, each.....	43.60	46.70	47.40	48.60	50.40
Trousers, extra, woolen, each.....	11.00	11.40	11.50	11.70	12.00
Trousers, cotton, each.....	4.15	4.64	4.73	4.82	5.02
Shirts, broadcloth, each.....	3.12	3.34	3.36	3.38	3.44
Overcoats, all wool, each.....	38.40	39.40	39.20	40.00	41.20
Hats, felt, each.....	6.88	7.54	7.58	7.67	7.97
Shoes, dress, per pair.....	9.42	10.20	10.20	10.30	10.50
Overshoes, rubber, per pair:					
With buckles or zipper.....	6.04	6.02	5.98	5.90	6.12
Without buckles or zipper.....	3.30	3.70	3.79	3.81	3.67
Boys' clothing:					
Suits, wool, 6-12 years, each.....	19.70	20.20	19.80	19.70	20.00

Household furnishings:					
Floor lamps, medium quality, each	16.80	17.40	17.60	18.20	18.70
Radios, table model, 4 tubes, plus rectifier, each	26.20	23.10	22.30	21.50	20.80
Radio-phonographs, console, each	136.00	176.00	182.00		
Refrigerators, 10 cu. ft. capacity, each	255.00	217.00	210.00	205.00	203.00
Washing machines, wringer type, elec., each	144.00	145.00	146.00	145.00	
Washing machines, automatic, elec., each	267.00	246.00	242.00	238.00	235.00
Sewing machines, portable, incl. carrying case, each	98.4	87.20	86.10	84.30	83.20
Vacuum cleaners, canister type, each	63.5	56.50	53.50	51.60	50.60
Irons, electric, standard size, each	11.80	12.30	12.40	12.30	12.20
Stoves, 4-top heating units, elec., each	241.00	226.00	224.00	222.00	222.00
Stove, gas, 4-burner, each	177.00	170.00	173.00	175.00	176.00
Stoves, wood or coal burning, 6-hole, each	128.00	141.00	141.00	142.00	142.00
Kitchen cabinets, top cupboard, each	62.20	64.30	65.20	65.80	
Kitchen wall cabinet unit, double-door, each	23.10	23.80	24.10	24.20	24.20
Dinner plates, plain, per ½ dozen	1.30	1.54	1.60	1.66	1.69
Water glasses, plain, per ¼ dozen	.664	.731	.735	.750	
Brooms, each	1.44	1.42	1.45	1.46	1.48
Fruit jars, Mason, 1 quart, per dozen	1.35	1.50	1.53	1.54	1.55
Mattresses, 54 in., innerspring, each	44.00	43.60	43.90	44.40	45.00
Mattresses, 54 in., all-felted, cotton, each	23.20	22.80	23.00	22.80	
Bedsprings, double bed, sagless, each	22.60	23.40	22.10	22.60	
Hollywood bed sets, 39", incl. spring and mattress, each	73.4	71.00	73.60	74.50	74.80
Bedroom suites, 3 pieces, per suite	184.00	181.00	182.00	186.00	190.00
Living-room suites, 2 pieces per suite	196.00	194.00	195.00	198.00	202.00
Lounge chairs, upholstered	72.60	76.00	73.20	74.60	76.50
Dining-room suites, 8 pieces, per suite	269.00	279.00	286.00	290.00	300.00
Rugs, 9 by 12 feet, tufted, each	77.10	72.50	72.20	73.60	73.60
Rugs, felt-base, 9 by 12 feet, each	11.80	11.10	10.90	10.90	10.80
Sheets, 81 by 99 inches, medium quality, each	2.24	2.27	2.29	2.34	2.38
Blankets, single, each:					
All wool, 72 by 90 inches	11.30	10.90	10.70	10.80	10.90
Cotton, 72 by 84 inches	2.59	2.80	2.85	2.92	3.05
Bath towels, 20 by 40 inches, each	.693	.773	.798	.823	.852
Muslin, unbleached, 36 inch width, per yard	.307	.321	.320	.323	.326
Curtains, kitchen, ready-made, per pair	2.16	2.31	2.36	2.36	2.40
Building materials:					
Framing lumber, 2" x 4", per 1,000 board feet:					
Pine, No. 2 and better	125.00	125.00	125.00	126.00	126.00
Pine, under No. 2	105.00	104.00	104.00	104.00	105.00
Fir, No. 2 and better	144.00	142.00	142.00	142.00	143.00
Fir, under No. 2	117.00	110.00	109.00	110.00	109.00

See footnotes at end of table.

Table 688.—Prices paid by farmers: Prices, by commodities, United States, average 1957-59, annual 1962-65 1—Continued

Commodity and unit	Average 1957-59	1962	1963	1964	1965
	Dollars	Dollars	Dollars	Dollars	Dollars
Building materials—Continued					
Birds, per 1,000 board feet:					
Rough, No. 2 and better 1.....	130.00	130.00	129.00	129.00	131.00
Rough, under No. 2 1.....	108.00	104.00	103.00	104.00	106.00
Dressed, No. 2 and better 2.....	156.00	158.00	157.00	157.00	159.00
Dressed, under No. 2 1.....	122.00	118.00	115.00	116.00	117.00
Ship-lap, pine, per 1,000 board feet:					
No. 2 and better 2.....	135.00	132.00	132.00	133.00	133.00
Under No. 2 1.....	122.00	114.00	112.00	114.00	114.00
Drop-siding, per 1,000 board feet:					
Pine, C and better.....	210.00	206.00	206.00	206.00	206.00

Fir, under C.....	183.00	184.00	184.00	188.00	
Bevel-siding, per 1,000 board feet:					
Pine, C and better.....	185.00	181.00	178.00	181.00	
Pine, under C.....	142.00	143.00	142.00	143.00	
Cedar, clear.....	176.00	172.00	173.00	184.00	196.00
Cedar B.....	147.00	139.00	142.00	154.00	
Flooring, per 1,000 board feet:					
Yellow pine, B and better.....	221.00	218.00	218.00	217.00	218.00
Yellow pine, under B.....	158.00	158.00	159.00	160.00	
Fir, V. G., B and better.....	263.00	272.00	276.00	286.00	
Fir, V. G., under B.....	206.00	212.00	216.00	224.00	231.00
Shingles, wood, cedar, 16 inches per square.....	14.40	14.80	15.40	16.20	16.70
Doors, fir, 2-panel, each.....	11.50	11.60	11.60	12.40	12.80
Doors, flush, hollow-core, each.....	11.10	9.62	9.33	9.14	8.84
House windows, D. H. Unit with frames and sashes.....	20.90	22.30	22.30	22.80	23.10
Barn sash, 4 light, each.....	3.02	3.10	3.15	3.35	
Nails, 8d, common, per pound.....	.166	.177	.174	.174	.175
Screen wire, galvanized, 16-mesh, 30-inch width, per linear foot.....	238	.241	.237	.235	.234
Roofing, galvanized steel, per 100 square feet.....	13.00	12.90	12.90	12.90	13.00
Roofing, composition, per 100 square feet.....	4.32	4.28	4.20	4.16	4.16
Gypsum board, 36-inch, per 1,000 square feet.....	59.00	59.30	59.20	59.20	58.70
Shingles, asphalt, per square.....	9.01	8.85	9.28	9.21	9.22
Insulating board, per 1,000 square feet.....	85.10	88.20	87.70	87.60	87.70
Bricks, common, per 1,000.....	52.50	56.20	57.60	58.50	59.60
Concrete blocks, per 100.....	25.00	25.50	25.80	25.80	25.90
Portland cement, per 94 pounds.....	1.47	1.52	1.54	1.54	1.55
Paint, house, per gallon.....	6.34	6.45	6.38	6.35	6.38
Linseed oil, per gallon.....	2.84	3.01	3.04	3.05	3.10
Barbed wire, 2-point, per spool of 80 rods.....	9.93	9.73	9.57	9.56	9.57
Barbed wire, 4-point, per spool of 80 rods.....	11.00	10.80	10.70	10.70	10.70
Poultry netting, 60-inch, per roll of 150 feet.....	10.80	11.10	11.00	11.20	
Posts, wood, line fence, each.....	.750	.797	.786	.804	.806
Posts, steel, each.....	1.15	1.17	1.16	1.13	1.13
Gates, farm, steel, 14 feet, each.....	28.90	31.00	31.60	32.10	
Woven wire fencing, 32-inch, per 20 rod roll.....	22.70	23.40	22.90	22.60	22.60
Windmills, without tower, each.....	141.00	157.00	168.00	176.00	
Iron pipe, galvanized, 1 1/4-inch diameter, per foot.....	.445	.460	.458	.459	.461
Motor supplies:					
Gasoline, regular, filling station, per gallon.....	.309	.315	.314	.310	.314
Gasoline, tank truck, per gallon.....	.268	.274	.274	.272	.273
Kerosene, per gallon.....	.183	.188	.188	.187	.189
Tractor fuel, diesel, per gallon.....	.165	.164	.163	.164	.165
Motor oil, regular, nondetergent, per gallon.....	1.22	1.17	1.18	1.22	1.23
Motor oil, heavy duty detergent, per gallon.....	1.54	1.47	1.49	1.53	1.54
Motor oil, all weather high detergent, per gallon.....	1.82	1.77	1.78	1.83	1.86
Grease, per pound.....	.231	.222	.226	.229	.231
Tires, 6.70x15, 4 ply tubeless, each.....	23.20	20.50	20.30	20.40	20.50
Tires, 6.70x15, 4 ply tube type, each.....	19.40	17.00	16.80	16.90	17.00
Inner tubes, 6.70x15, each.....	3.84	3.52	3.41	3.38	3.33
Tires, truck, 7.50x20, 10 ply, each.....	77.80	67.20	64.30	63.90	63.00
Spark plugs, each.....	.909	.936	.930	.933	.935
Storage batteries, 45 plates, 6 volt, each.....	16.70	15.20	15.00	15.30	15.80
Storage batteries, 51 plates, 6 volt, each.....	19.80	18.80	18.50	18.70	19.20
Motor vehicles:					
Autos, 4-door sedans:					
6-cylinder, each 1.....	2,300.00	2,180.00	2,200.00	2,220.00	2,250.00
8-cylinder, each 1.....	2,910.00	2,760.00	2,720.00	2,740.00	2,750.00
Trucks:					
2-ton, cab and chassis, each 1.....	3,000.00	3,130.00	3,180.00	3,220.00	3,270.00
1/2-ton, pickup 1.....	1,970.00	2,050.00	2,060.00	2,060.00	2,080.00

See footnotes at end of table.

Table 688.—Prices paid by farmers: Prices, by commodities, United States, average 1957-59, annual 1962-65.—Continued

Commodity and unit	Average 1957-59	1962	1963	1964	1965
	Dollars	Dollars	Dollars	Dollars	Dollars
Motor vehicles—Continued					
Tractors:					
Wheel, under 20 belt horsepower, each	1,610.00	1,660.00	1,620.00	1,580.00	-----
Wheel, 20-29 belt horsepower, each	2,350.00	2,630.00	2,660.00	2,720.00	-----
Wheel, 30-39 belt horsepower, each	3,070.00	3,280.00	3,340.00	3,470.00	3,680.00
Wheel, 40-49 belt horsepower, each	3,980.00	4,210.00	4,420.00	4,500.00	4,810.00
Wheel, 50-59 belt horsepower, each	5,050.00	5,390.00	5,620.00	5,770.00	5,980.00
Wheel, 60-69 belt horsepower, each	5,720.00	6,210.00	6,360.00	6,380.00	6,478.00
Crawler, under 25 db. hp., each	3,280.00	3,730.00	3,730.00	3,880.00	4,070.00
Crawler, 25-34.9 db. hp., each	5,230.00	5,140.00	5,150.00	5,350.00	5,590.00
Crawler, 35-49.9 db. hp., each	7,260.00	7,620.00	7,720.00	7,990.00	8,240.00
Farm machinery:					
Plows, tractor, moldboard, two bottom, each	280.00	314.00	315.00	328.00	334.00
Plows, tractor, moldboard, three bottom, each	418.00	500.00	518.00	540.00	558.00
Disk harrows, tandem, 7 ft., each	321.00	359.00	368.00	374.00	382.00
Spike-tooth harrows, steelbar, one section	36.00	43.70	45.20	47.00	48.40
Cultivators, 2-row, tractor, each	312.00	344.00	344.00	360.00	362.00
Corn planters, 2-row, plain, each	272.00	314.00	323.00	337.00	-----
Grain drills, tractor-drawn, 16-tube, plain, each	634.00	732.00	757.00	786.00	821.00
Grain drills, tractor-drawn, 20-tube, plain, each	724.00	829.00	846.00	902.00	937.00
Mowers, tractor, 7-ft., each	394.00	468.00	485.00	502.00	521.00
Pick-up balers, automatic tie, P.T.O., each	1,820.00	1,950.00	1,940.00	1,960.00	-----
Combines, self-propelled, 12 ft., each	6,320.00	6,930.00	7,010.00	7,280.00	7,590.00
Combines, 5-6 feet, P.T.O., each	1,800.00	2,150.00	2,220.00	2,300.00	2,410.00
Corn picker—huskers, 2-row, each	2,120.00	2,700.00	2,710.00	2,850.00	2,860.00
Hammer mills, each	273.00	276.00	289.00	292.00	-----
Cream separators, electric, 750 pound capacity, each	267.00	294.00	303.00	310.00	-----
Single milker units, each	131.00	137.00	137.00	142.00	144.00
Farm wagons, for rubber tires, less tires, each	184.00	192.00	193.00	196.00	198.00
Power sprayers, boom type, tr. mid., each	196.00	234.00	246.00	261.00	278.00
Gas engines, 1½ horsepower, each	61.70	50.10	48.90	47.50	-----
Electric motors, ¼ horsepower, each	20.70	20.60	20.50	20.50	20.40
Farm supplies:					
Axes, with handle, each	6.03	6.08	6.01	6.09	6.16
Hammers, nail, with handle, each	3.28	3.58	3.63	3.72	3.81
Pitchfork, 3-tine, each	3.66	4.16	4.22	4.36	4.54
Pitchfork, 4-tine, each	4.41	4.88	4.97	5.09	5.27
Hoes, 7-inch blade, each	2.38	2.58	2.61	2.59	2.71
Milk cans, 10 gallons, each	13.60	14.80	15.00	15.10	15.40
Milk pails, 12 quarts, each	2.21	2.55	2.48	2.56	2.55
Rope, manila, per pound	.755	.826	.849	.849	.870
Binder twine, per pound	.235	.243	.247	.281	.279
New baskets, round stave, bushel, with cover, per dozen	4.67	4.78	4.96	5.11	5.37
Lead arsenate, per pound	.377	.375	.372	.365	.370
Fertilizer:					
Mixed fertilizer:					
0-20-20, per ton	64.30	66.90	66.30	66.60	67.40
2-12-12, per ton	42.70	46.00	46.00	48.30	46.80
3-9-9, per ton	42.40	53.80	54.70	55.80	57.00
3-12-6, per ton	45.90	48.80	48.60	49.20	-----
3-12-12, per ton	50.60	52.00	51.80	52.00	53.40
4-8-8, per ton	36.90	38.60	40.60	39.20	44.80
4-8-12, per ton	47.80	49.90	51.30	52.20	53.00
4-12-8, per ton	47.10	48.40	49.00	48.90	48.70
4-12-12, per ton	39.60	40.20	40.60	40.80	41.40
5-10-5, per ton	45.80	48.60	48.60	49.20	52.70
5-10-10, per ton	60.10	60.80	50.50	50.50	50.80
6-8-8, per ton	42.80	41.90	42.60	42.80	42.20
Nitrate of soda, per ton	59.80	59.90	60.00	60.00	60.20
Sulphate of ammonia, per ton	59.30	56.90	52.00	52.60	53.20
Ammonium nitrate, per ton	81.80	81.40	80.40	79.20	78.50
Superphosphate, 20% P ₂ O ₅ , per ton	37.00	38.40	40.30	40.20	40.80
Superphosphate, 45% P ₂ O ₅ , per ton	78.40	79.90	80.80	80.50	80.80
Phosphate rock, per ton	21.40	20.80	20.60	20.30	21.00
Ammonium phosphate, 16-20, per ton	89.60	85.90	81.90	82.00	81.10
Muriate of potash, 55% and over, per ton	52.10	53.20	53.80	53.60	53.60
Agricultural limestone, spread on field, per ton	4.55	4.75	4.78	4.74	5.00
Livestock:					
Feeders and stockers:					
Cattle and calves, per 100 pounds	23.10	24.50	22.90	19.80	22.10
Lambs, per 100 pounds	20.70	16.60	17.20	18.30	21.40
Hogs (100-160 lbs. av.), per 100 pounds	18.50	18.20	17.00	16.70	19.20
Baby chicks, straight run, per 100	13.00	13.00	13.10	12.30	12.40
Turkey poult, each	.590	.565	.562	.572	.568
Feed:					
Alfalfa hay, baled, per ton	30.30	30.60	32.90	32.80	33.10
Other hay, baled, per ton	28.20	29.50	32.20	32.00	31.80

See footnotes at end of table.

Table 688.—Prices paid by farmers: Prices, by commodities, United States, average 1957-59, annual 1962-65¹—Continued

Commodity and unit	Average 1957-59	1962	1963	1964	1965
	Dollars	Dollars	Dollars	Dollars	Dollars
Feed—Continued					
Cottonseed meal, per 100 pounds.....	3.95	4.29	4.62	4.46	4.36
Soybean meal, per 100 pounds.....	4.06	4.61	4.95	4.93	4.96
Linseed meal, per 100 pounds.....	4.14	5.04	5.20	4.92	-----
Meat scrap, per 100 pounds.....	5.37	5.62	5.87	5.64	-----
Tankage, per 100 pounds.....	5.57	5.81	6.10	5.83	5.88
Bran, per 100 pounds	2.86	3.03	3.14	3.08	3.24
Middlings, per 100 pounds.....	2.96	3.09	3.22	3.16	3.30
Mill run, per 100 pounds.....	2.73	2.92	2.99	2.98	3.10
Cornmeal, per 100 pounds.....	3.27	3.08	3.21	3.24	3.29
Corn gluten, per 100 pounds.....	3.26	3.30	3.48	3.43	-----
Hominy feed, per 100 pounds.....	3.26	3.21	3.34	3.31	3.31
Scratch grain, per 100 pounds.....	3.95	3.87	3.96	3.92	3.92
Layer feed, per 100 pounds.....	4.43	4.38	4.48	4.41	4.41
Broiler grower, per 100 pounds.....	4.90	4.67	4.80	4.79	4.83
Poultry ration cost, per 100 pounds.....	3.43	3.42	3.54	3.40	3.43
Chick starter, per 100 pounds.....	4.97	4.86	5.01	4.99	5.04
Dairy feed:					
Under 29 percent protein, per 100 pounds.....	3.71	3.73	3.81	3.68	3.70
14 percent protein, per 100 pounds.....	3.75	3.59	3.62	3.43	3.46
16 percent protein, per 100 pounds.....	3.66	3.68	3.77	3.71	3.75
18 percent protein, per 100 pounds.....	3.63	3.71	3.86	3.82	3.86
20 percent protein, per 100 pounds.....	3.92	4.03	4.15	4.00	4.02
24 percent protein, per 100 pounds.....	4.02	4.17	4.31	4.22	4.30
29 percent and over, protein, per 100 pounds.....	4.40	4.58	4.80	4.78	4.94
Stock salt, per 100 pounds.....	1.58	1.63	1.65	1.65	1.65
Seeds:					
Barley, per bushel.....	1.88	1.88	1.96	1.96	1.92
Cowpeas, per bushel.....	5.97	6.73	7.43	7.28	6.68
Corn, hybrid, per bushel.....	11.00	11.70	11.70	12.00	12.20
Oats, per bushel.....	1.49	1.44	1.57	1.52	1.58
Potatoes, per 100 pounds.....	3.34	2.39	2.52	2.91	5.61
Rye, per bushel.....	2.46	2.36	2.48	2.27	2.26
Soybeans, per bushel.....	3.43	3.56	3.78	4.05	4.22
Wheat, per bushel.....	2.70	2.82	2.81	2.86	2.57
Alfalfa, common, per 100 pounds.....	37.70	49.40	57.90	40.90	41.80
Alfalfa, certified Grimm, per 100 pounds.....	45.90	57.40	69.30	56.40	55.80
Astilke clover, per 100 pounds.....	39.00	32.20	32.50	32.80	35.70
Red clover, per 100 pounds.....	45.70	46.10	51.40	50.30	40.10
Sweetclover, per 100 pounds.....	17.70	22.10	27.50	20.20	16.40
Lespedeza, Korean, per 100 pounds.....	12.80	20.40	19.80	23.00	22.80
Sudangrass, per 100 pounds.....	10.40	12.40	14.20	12.40	12.40
Timothy, per 100 pounds.....	24.20	17.30	25.80	37.20	33.20

¹ Annual average of prices at independent and chain stores. Prices paid by farmers are collected for the most part from retail establishments located in small cities, towns, and in rural areas through using questionnaires sent and returned by mail.

² Sheets 72" x 108", beginning 1965.

³ Includes standard and better.

⁴ Includes utility and economy.

⁵ 1957-59 average is for 4-door sedans. 1965 model designations include Ford Falcon, Chevrolet II, Plymouth Valiant, and Rambler. Comparable model designations are included for earlier years.

⁶ 1957-59 average is for 4-door sedans. 1965 model designations include Ford Custom 500, Chevrolet Bel Air, Plymouth Fury I, and Buick, Special. Comparable model designations are included for earlier years.

⁷ Coverage includes Ford and Chevrolet.

⁸ Coverage includes Ford, Chevrolet, International, and Dodge.

⁹ One-way.

¹⁰ Average price January through June. Price series based on prices for 100-160 lbs. feeder hogs. Beginning July 1965, price series changed to reflect prices paid for feeder pigs weighing 40-60 lbs.

Statistical Reporting Service.

Table 689.—Farm income: Gross and net income from farming, United States, 1949–65¹

Year	Cash receipts			Nonmoney income					Gross income		Production expenses	Net income of farm operators		
	Farm marketings	Government payments	Total	Realized			Change in inventory	Total	Realized	Total		Realized	Total

¹ Excludes Alaska and Hawaii.² Includes returns from farming operations to resident farm operators for their capital, labor, and management, after deduction of farm production expenses. (There is no allowance in the item farm production expenses for a return on investment of farm capital.) Also includes farm wages and other labor income received by hired farm-resident workers.³ Includes all income received by farm residents from nonfarm sources such as wages and salaries from nonfarm employment, nonfarm business and professional income, rents from nonfarm real estate, dividends, interest, royalties, unemployment compensation, and Social Security payments.Economic Research Service. ¹ All except cotton farms in California and large-scale cotton farms in the Mississippi Delta are family-operated.

² Total sales plus Government payments, perquisites, and change in inventory of livestock and crops.

³ Includes all cash production expenditures plus depreciation and change in inventory of service buildings, machinery, and equipment.

⁴ Total value of farm capital Jan. 1 at current interest rates in effect Jan. 1 for new loans by the Federal land bank in the respective area plus production credit at short-term interest rates charged by production credit associations on loans outstanding.

⁵ Total value of farm capital Jan. 1 at 4.1 percent, the average interest rate (1945-58) charged by Federal land banks on farm mortgage loans outstanding plus production credit at short-term interest rates charged by production credit associations on loans outstanding.

⁶ Less than one.

Economic Research Service.

¹ All except cotton farms in California and large-scale cotton farms in the Mississippi Delta are family-operated.

² Total sales plus Government payments, perquisites, and change in inventory of livestock and crops.

³ Includes all cash production expenditures plus depreciation and change in inventory of service buildings, machinery, and equipment.

⁴ Total value of farm capital Jan. 1 at current interest rates in effect Jan. 1 for new loans by the Federal land bank in the respective area plus production credit at short-term interest rates charged by production credit associations on loans outstanding.

⁵ Total value of farm capital Jan. 1 at 4.1 percent, the average interest rate (1945-58) charged by Federal land banks on farm mortgage loans outstanding plus production credit at short-term interest rates charged by production credit associations on loans outstanding.

Economic Research Service.

¹ Includes labor used on crops, livestock, and overhead. Farm maintenance or overhead work includes time spent on fencing, repairs to buildings, machinery and equipment, farmwoods, pastures, general land maintenance, farm business, and other miscellaneous work.

² Excludes horses and mules; includes wool and minor livestock which are excluded from separate enterprises shown.

³ Cattle and calves, sheep and lambs, and hogs.

⁴ Chickens, broilers, and turkeys.

⁵ Includes hay seeds, pasture seeds, and cover-crop seeds; farm gardens; and minor crops which are excluded from separate crops shown.

⁶ Corn for grain, oats, barley, and sorghum grain.

⁷ All hay, corn silage, and sorghum forage and silage.

⁸ All wheat, rye, buckwheat, and rice.

⁹ Potatoes, sweetpotatoes, dry edible beans, dry field peas, and truck crops.

¹⁰ Fruits, berries, and tree nuts.

¹¹ Sugarbeets, sugarcane for sugar and seed, sugarcane syrup, and maple products.

¹² Soybeans, peanuts, flaxseed, and tung nuts.

¹³ Preliminary.

¹ Includes Government distribution and secondary and micronutrient fertilizers, but not liming materials.

² Calculated from the quantities of each grade and kind of fertilizer shipped and the analyses published by Fertilizer Control Authorities for the respective States.

³ Includes Puerto Rico. The consumption of commercial fertilizer in other possessions is negligible.

Table 699.—Fertilizers: Quantities of commercial fertilizers consumed and their average primary plant-nutrient content, United States, 1949–64¹

Year beginning July	Mixed fertilizers				All fertilizers containing primary nutrients				Other fertil- izers ²
	Quantity	Nitrogen (N)	Available phos- phoric oxide (P ₂ O ₅)	Potash (K ₂ O)	Quantity	Nitrogen (N)	Available phos- phoric oxide (P ₂ O ₅)	Potash (K ₂ O)

¹ Contract rates on loans through Federal land bank associations. Beginning 1961, some land banks have charged temporary rates that were lower than the contract rates. In computing the average rates, each Farm Credit district is given equal weight; within districts, rates are weighted by the number of days in force.

² Based on bonds outstanding at end of each year. Beginning 1950, represents net cost to banks. Based on face rates prior to 1950. Excludes bonds owned by issuing agency.

³ Average market yields on representative outstanding issues.

⁴ Rates represent interest (less patronage refunds), service fees, cost of record searches, filing and releasing mortgages, etc., paid by borrowers, as percent of average loans outstanding during year.

⁵ Annual interest income on loans, discounts, and notes receivable as a percentage of average balance of such items outstanding during the year.

⁶ Beginning 1950, represents weighted average net cost to banks of debentures issued each year. Based on face rates of debentures prior to 1950.

⁷ Excludes rates on loans secured by CCC documents.

⁸ Represents weighted average net cost to banks of debentures outstanding at end of each year. No debentures issued prior to 1950.

⁹ Board of governors of Federal Reserve System. Annual averages of prevailing open-market rates in New York City.

¹⁰ Board of governors of Federal Reserve System. Annual ranges in discount rates on advances secured by Government obligations maturing or callable beyond 1 year and discounts of and advances secured by eligible paper.

Economic Research Service and Farm Credit Administration. Data for 1929–48 in *Agricultural Statistics*, 1962, table 709.

¹ Data for 1965 are preliminary.² Number of farms on which the insured crop was planted, including duplication where both the landlord and tenant are insured. Insured farms on which no insured crop was planted are not included.³ The insured's share of the planted acreage on the farm.⁴ Less than 500 acres.⁵ Includes a combination of commodities varying by counties.⁶ Thousands of tons insured for raisins (not included in total of all commodities).Federal Crop Insurance Corporation. Data for 1948-60 in *Agricultural Statistics, 1962*, table 716.

¹ Excludes Alaska, Hawaii, Puerto Rico, and U.S. possessions.

² Loans on regular mortgages only for 1958 and earlier years. Beginning June 30, 1959, includes purchase-money mortgages and sales contracts. Includes loans by the Land Bank Commissioner made on behalf of the Federal Farm Mortgage Corporation. Authority to make Land Bank Commissioner loans expired July 1, 1947, except for the limited purpose of refinancing loans previously made by the Land Bank Commissioner. Liquidation of Commissioner loans was completed June 30, 1955. For 1955 and earlier years, the data in this table on Federal land bank loans made differ from the data in table 731 only because Puerto Rico is excluded. Prior to 1956, the data on Federal land bank loans made in both this table and table 731 included the outstanding loan balance as well as new money advanced in a part of the cases where existing borrowers obtained additional loans. Beginning in 1956, however, an effort was made to include the outstanding balance in loans made for a larger number of existing borrowers obtaining additional loans. By 1958, the data in this table include all outstanding loan balances in cases where borrowers obtained additional financing.

³ Estimates based on reports from counties including a substantial sample of farms in the United States. Includes purchase-money mortgages and sales contracts to the extent they were recorded.

⁴ Includes farm-mortgage loans made by the Farmers Home Administration, and by miscellaneous lenders.

Farm Credit Administration. Prepared in cooperation with the 12 Federal land banks.

¹ For States included in regions, see table 723.² Excludes Alaska and Hawaii.³ Preliminary.Economic Research Service. Data for 1949–56 in *Agricultural Statistics, 1969*, table 722.

FOOTNOTES FOR TABLE 718

¹ Excludes Alaska and Hawaii, except as indicated in footnote 9.² Includes regular mortgages, purchase-money mortgages, and sales contracts. Federal land bank and Federal Farm Mortgage Corporation mortgages in process of foreclosure were estimated for 1951 and 1952.³ Loans were made by the Land Bank Commissioner. Lending authority expired July 1, 1947. On June 30, 1955, loans of the FFFMC were sold to the Federal land banks.⁴ Liquidation of the joint-stock land banks was completed April 26, 1951.⁵ Includes tenant-purchase, farm-enlargement, farm-development, project-liquidation, and direct soil and water conservation loans to individuals, and loans for these purposes from State Corporation trust funds. Includes rural-housing loans to farmers. Beginning October 1961, rural-housing loans were made on nonfarm tracts; these loans are included in the amount outstanding reported for Jan. 1, 1962, but excluded for 1963 to date.⁶ Compiled from reports of life insurance companies, "Best's Life Insurance Reports," "Spectator Life Insurance Yearbook," and data from Life Insurance Association of America and Institute of Life Insurance. Includes legal reserve companies only. Includes regular mortgages, purchase-money mortgages, and sales contracts; beginning 1965, excludes sales contracts.⁷ Includes all operating commercial, savings, and private banks. Also includes bank holdings of soil and water conservation loans and farm-ownership loans insured by the Farmers Home Administration.⁸ Amounts are residuals or differences between amounts reported by institutional lenders and estimates of total farm-mortgage debt. They roughly measure the farm-mortgage debt held by individuals and other non-reporting lenders.⁹ Beginning 1960, data for reporting lending institutions in Alaska and Hawaii are included. No estimates of total farm-mortgage debt for these States are available.¹⁰ Preliminary.Economic Research Service. Data for 1929–48 in *Agricultural Statistics, 1962*, table 718.

FOOTNOTES FOR TABLE 721

¹ Includes mortgages in process of foreclosure.² Includes United States legal reserve companies only. Includes regular mortgages, purchase-money mortgages, and sales contracts; beginning 1965, excludes sales contracts.³ Preliminary.⁴ Includes direct farm-ownership loans, direct soil and water conservation loans to individuals, and rural-housing loans to farmers. Also includes direct farm-ownership loans made from State Corporation trust funds.⁵ Includes loans held by all operating commercial, savings, and private banks, individuals, and miscellaneous lenders. State estimates are approximate and should be used only as general indicators of the amount of mortgage debt held by this group. See table 726 for State data held by all operating banks (classified by location of bank rather than by location of security).⁶ Includes District of Columbia.

Economic Research Service.

¹ 48 States only. Real estate mortgages or deeds of trust are taken as supplemental security for some of these loans.

² All operating banks. Includes loans to individuals guaranteed by the Commodity Credit Corporation and certificates of interest in pool of growers' notes.

³ Loans "made" include renewals.

⁴ Excludes loans guaranteed by CCC, and loans held by associations in liquidation.

⁵ Excludes loans secured by CCC documents.

⁶ For separate data on operating loans and emergency crop and feed loans, 1949-65, see *Agricultural Statistics, 1965*, table 722.

⁷ Loans "outstanding" are cumulative net advances minus principal repayments; loans "made" are net advances to borrowers.

⁸ Approximately $\frac{2}{3}$ of the individuals served by these cooperatives are farmers.

⁹ Principally loans to public bodies and to power companies.

¹⁰ Loans to commercial telephone companies.

¹¹ Excludes pooled loans against which certificates of interest were issued and loans guaranteed by CCC held by other lending agencies.

Economic Research Service. Data for 1939-48 in *Agricultural Statistics, 1962*, table 725.

¹ Includes loans of national and State commercial, mutual savings, stock savings, and private banks. Loans are classified according to location of bank and, therefore, are not strictly comparable with data for other lenders which are classified according to location of farm.

² Includes bank holdings of farm-ownership loans and soil and water conservation loans insured by the Farmers Home Administration.

³ Includes loans guaranteed by the Commodity Credit Corporation and certificates of interest in pool of CCC loans.

⁴ Mariana Islands, Puerto Rico, Samoa (American), and Virgin Islands.

Economic Research Service. Data from Federal Deposit Insurance Corporation.

¹ State totals represent data for borrowers incorporated within the State.

² United States totals for other types of borrowers are as follows: Public Power Districts, 53 borrowers, \$221,315,368; municipalities and other Government authorities, 31 borrowers, \$138,653,339; power companies, 25 borrowers, \$24,690,862.

³ Funds loaned to corporate borrowers relending to individuals. Includes wiring, plumbing, and refrigeration installations.

⁴ Includes miles energized and consumers served, shown in tables 743 and 744.

¹ Includes data at time of repayment of loan for borrowers whose loans have been repaid in full. As of Jan. 1, 1966 there were 61 such borrowers with 22,197 miles energized and 120,200 consumers served.

² Excludes energy sales and revenues of power sold by one REA borrower to another. Includes patronage capital.

³ Includes rural nonfarm and farm consumers.

⁴ Actual funds advanced out of loans, as shown in table 741.

Rural Electrification Administration. Data for 1936–48 in *Agricultural Statistics, 1962*, table 740.

Table 744.—Rural Electrification Administration: Amount of advances to electric borrowers, from organization (May 11, 1935) to Jan. 1, 1966 and statistics on electric borrowers' operations, 1965, by States and Territories¹

¹ State totals represent data for borrowers incorporated within the State.

² Actual funds advanced out of loans on table 741.

³ Includes data at time of repayment of loan for borrowers whose loans have been repaid in full. As of Jan. 1, 1966 there were 61 such borrowers with 22,197 miles energized and 120,200 consumers served.

⁴ Includes 13,961,712,394 kwh sold by one REA borrower to another.

⁵ Excludes energy sales and revenues of power sold by one REA borrower to another.

⁶ Includes rural nonfarm and farm consumers.

¹ Includes loans made directly by Commodity Credit Corporation and loans financed by financial institutions. As far as possible, loans have been distributed according to the location of producers receiving the loans. Direct loans to cooperative associations for the benefit of members have been distributed according to the location of the association.

² Includes storage facility and equipment loans.

³ Denotes negative figure due to adjustment of previous year's activity.

⁴ Includes loans to cotton cooperatives and the 1933 cotton loan for which State data are not available.

Agricultural Stabilization and Conservation Service.

¹ Sales do not reflect commodity donations.² Processed from price support butter.³ Transferred to CCC at no cost from National Stockpile, pursuant to Public Law 85-96 and 87-548. Proceeds from sales less costs incurred by CCC are covered into the Treasury as miscellaneous receipts; therefore such proceeds and costs are not reported in the operating accounts.

Agricultural Stabilization and Conservation Service.

¹ Includes some sales which may be applied subsequently to barter contracts or P.L. 480 Title I authorizations. Any such reclassification will cause downward adjustments in "Sales For Dollars—Export."

² Includes donations under Sections 202, 416, and miscellaneous donations under various other authorizations.

³ Commodities delivered as payment in kind for exportation under P.L. 480 are included in P.L. 480 (Export) Titles I and IV columns and are not included in this column.

⁴ Includes sales to Section 32 at lower of cost or market for distribution to relief or welfare outlets.

⁵ Denotes negative item which results from adjustment of prior activity.

⁶ Less than \$500.

¹ National acreage allotments proclaimed by the Secretary under the Agricultural Adjustment Act of 1938, except as follows: Cotton, peanuts, and rice national acreage allotments have been adjusted in certain years to include increases provided by special legislation; tobacco figures are a total of individual allotments, since a national allotment is not proclaimed for tobacco. In the case of wheat, entries do not include special adjustments, such as those for durum, and in 1964 and 1965 increased allotment acreages for small wheat farms, required by special legislative provisions.

² The commercial corn area included the following number of counties: 1950–837, 1954–834, 1955–806, 1956–840, 1957–894, and 1958–932.

³ Other types of tobacco generally have been and are subject to allotments.

⁴ Acreage allotments terminated.

⁵ Suspended and replaced by 51 million acres base acreage.

⁶ Marketing quotas not in effect.

Agricultural Stabilization and Conservation Service. Data for 1938–48 in *Agricultural Statistics, 1962*, table 742.

CHAPTER X

AGRICULTURAL CONSERVATION AND FORESTRY STATISTICS

Statistics in this chapter concern conservation of various resources, particularly soil, water, and timber. Data on the production, supply, and distribution of Naval Stores is included because of its close association with forestry statistics.

Table 763.—Agricultural Conservation Program: Assistance to farmers for carrying out conservation practices, United States, by program years 1949–64¹

Program year	Assistance	Program year	Assistance
	<i>1,000 dollars</i>		<i>1,000 dollars</i>

¹ Turpentine places under Naval Stores Conservation Program not included in "participating farms" but number of payees included in "payees." Farms participating in pooling agreements are included in "participating farms," but only the managers are included in "payees." Also includes data with respect to supplemental (emergency) practices.

² Cropland on participating farms as percentage of cropland acreage in States. Includes data with respect to supplemental (emergency) practices.

³ Does not include funds for Naval Stores Conservation Program.

¹ Includes supplemental (emergency) practices. ² Includes only the acreage across which terraces have been constructed. ³ Includes surfacing clay-forming subsoil to control wind erosion. ⁴ 0.5 acre or less. ⁵ Extent applies only to that acreage on which the practice performance completed under the 1964 Agricultural Conservation Program provided adequate drainage facilities. Does not include data relative to drainage systems damaged by flood which were restored under the Agricultural Conservation Program. ⁶ All liming materials have been converted to a standard limestone equivalent.

Table 766.—Agricultural Conservation Program: Selected conservation measures performed by program years, United States and Territories, annual 1955–64 and total 1936–64

Practice	Unit	1955	1956	1957	1958	1959	1960	1961	1962	1963	1964	Total 1936–1964 ¹
Construction of dams, pits, or ponds (storage-type) ²	Number	69,716	77,493	69,711	62,590	58,827	51,946	49,768	48,567	56,790	63,815	1,873,956
Construction of nonstorage-type dams, checks, and drops	do	8,102	11,612	11,886	12,800	9,088	6,562	4,529	1,739	1,690	2,452	3,044,737
Construction of standard terraces	1,000 acres	744	926	857	856	781	703	689	694	651	594	28,070
Construction of standard terraces	1,000 miles	37	47	44	44	38	34	33	33	32	28	1,506
Establishment of soil waterways ²	Million sq. ft.	1,553	1,968	1,951	2,129	2,011	1,861	1,937	1,843	1,816	1,606	36,943
Construction of diversion and spreader terraces	Miles	5,131	5,107	5,378	4,826	4,191	4,040	3,575	3,201	3,040	3,134	138,542
Field stripcropping ²	1,000 acres	939	932	521	313	273	288	298	225	198	260	105,774
Contour stripcropping ²	do	223	278	211	173	162	168	169	144	157	156	6,421
Emergency tillage operations to control erosion on cropland ²	do	12,975	10,285	3,641	1,531	1,530	1,246	3,908	1,243	1,911	1,974	146,947
Crop residue management ²	do	6,373	6,626	7,263	6,802	6,159	7,135	7,614	6,829	5,157	2,612	169,023
Regular subsoiling	do	153	237	134	109	116	88	93	115	220	220	12,472
Tillage operations on range or pastureland ²	do	336	319	337	171	142	121	171	140	132	135	4,562
Protection of outlets, inlets, and water channels	Number	3,889	4,432	4,629	5,849	8,084	10,920	14,095	16,378	15,005	14,197	109,961
Protection of streambanks or shores	Projects	1,885	3,222	2,768	3,339	2,668	2,266	2,365	1,840	1,883	2,014	26,183
Leveling irrigable land to control erosion and conserve water ²	1,000 acres	375	404	324	346	341	317	341	352	313	340	8,503
Lining irrigation ditches ²	1,000 rods	242	230	282	319	326	364	497	432	429	443	4,386
Drainage to permit a system of conservation farming	1,000 acres	1,362	1,261	1,069	1,637	1,598	1,658	1,520	1,483	1,302	1,177	45,631
Construction of wells for livestock water as a means of protecting established vegetative cover ²	Number	8,054	21,158	15,416	8,824	12,117	9,976	12,633	8,506	9,813	9,770	223,210
Developing springs or seeps for livestock water as a means of protecting established vegetative cover ²	do	2,321	2,214	1,900	2,262	2,793	3,056	3,947	2,727	3,293	3,711	86,285
Installing pipelines for livestock water to improve grassland management ²	1,000 lin. ft.	2,131	2,275	2,489	2,291	2,996	3,608	4,355	4,456	4,888	4,691	58,775
Deferred grazing to permit natural seed to increase vegetative cover ²	1,000 acres	2,742	4,234	6,289	5,265	4,313	3,378	3,308	3,186	2,665	1,295	228,609
Control of competitive shrubs on range or pastureland	do	1,661	1,552	1,280	1,494	1,841	1,921	2,209	1,978	1,663	1,669	49,983
Constructing fireguards to protect established cover on grazing land ²	1,000 lin. ft.	6,856	10,637	1,421	2,731	1,292	4,267	14,213	15,676	21,295	9,628	1,045,784
Constructing stock trails through natural barriers to improve grassland management	do	1,341	1,520	1,593	1,843	1,717	2,041	2,095	1,650	2,067	2,608	44,879
Establishment of permanent vegetative cover ²	1,000 acres	1,221	1,801	2,242	2,475	2,462	2,586	2,882	2,726	3,629	27,451	
Establishment of additional acreages of vegetative cover in crop rotation ²	do	2,052	3,052	2,169	1,400	1,124	1,160	1,376	1,059	801	673	251,470
Establishment of annual cover and green manure crops ²	do	7,666	7,506	7,596	6,908	5,460	5,982	9,936	7,198	6,055	5,880	451,245
Improvement of established vegetative cover for soil protection ²	do	2,165	2,266	1,945	1,816	1,713	1,750	1,852	1,829	2,008	2,274	97,633
Application of liming materials to permit use of conserving crops ^{2,3}	1,000 tons	15,125	16,524	15,920	16,845	15,173	16,249	16,746	17,163	17,185	18,566	492,462
Planting trees and shrubs	1,000 acres	150	195	283	324	361	358	336	283	224	205	4,039
Improvement of a stand of forest trees for erosion control, watershed protection, or forestry purposes	do	133	199	228	321	304	266	256	213	183	158	3,152

¹ Rounded totals of unrounded data.

² Includes supplemental (emergency) practices.

³ Standard ground limestone equivalent.

Data for 1944–54 in *Agricultural Statistics, 1962*, table 762.

Agricultural Stabilization and Conservation Service.

Table 767.—Agricultural Conservation Program supplemental (emergency) practices: Type of practice and extent, 1964

Practice	Extent	
	Unit	Amount
Permanent cover	Acres	300,806
Wells for livestock water	Number	20
Spring developments for livestock water	do	8
Pipelines for livestock water	1,000 lin. ft.	157
Replacement of fences	Rods	85,369
Storage tanks or troughs for livestock water	Number	17
Restoration of sod waterways and healing gullies	1,000 sq. ft.	31,012
Restoration of cover on dikes, levees, dams, etc.	do	21,664
Restoration of terraces	1,000 lin. ft.	1,470
Restoration of diversions	do	142
Reorganization of damaged irrigation systems	Dollars ¹	44,427
Reorganization of damaged irrigation systems (pools)	do	47,917
Leveeling or releveling irrigated land	Acres	750
Lining irrigation ditches	Rods	707
Removal of debris, smoothing, and leveling	Acres treated	55,902
Restoration of stream channels and banks	1,000 lin. ft.	1,210
Removal of debris from stream channels and waterways	do	1,059
Restoration of dikes or levees	do	143
Spreading earth slides	1,000 sq. ft.	79
Restoration of drainage systems	Acres drained	191,024
Restoration of irrigation structures other than dams	Number	7
Restoration of erosion control structures (except dams)	do	178
Restoration of livestock reservoirs	do	995
Construction or restoration of irrigation reservoirs	do	41
Restoration of outlets or inlets	do	57

¹ Report unit is expressed in "dollars of assistance."

¹ Soil surveys of the Soil Conservation Service showing kinds of soil, slope, degree of erosion, and present land use are used to determine land capabilities for conservation planning and treatment of agricultural and non-agricultural lands, including about 577 million acres of standard soil surveys.

² Puerto Rico and Virgin Islands.

Soil Conservation Service.

¹ As authorized by the Act of Congress August 7, 1956 (Public Law 1021, 84th Congress).

Soil Conservation Service.

FOOTNOTES FOR TABLE 778

¹ Covers work in following watersheds: Buffalo Creek, Coosa River, Little Tallahatchie, Los Angeles, Potomac, Santa Ynez, and Yazoo.² These principal physical works of improvement have been installed and major fire protection equipment items acquired for watershed improvement purposes under the Flood Control Acts by the Forest Service and cooperating State agencies.³ Involves seeding of watersheds following fire or other disaster under the provisions of Section 216 of the Flood Control Act of 1950.

Forest Service.

FOOTNOTES FOR TABLE 779

¹ As authorized by the Soil Conservation Act of 1935 (Public Law 46, 74th Congress) implemented by the watershed protection item in the Department of Agriculture Appropriation Act of 1954 and Watershed Protection and Flood Prevention Act P.L. 556 as amended.² Work in 11 watersheds was authorized by the Flood Control Act of December 22, 1944. As of June 30, 1965, work in one watershed was completed.³ Includes some basins constructed as structural measures.

Soil Conservation Service.

Table 778.—Flood prevention: Improvement works completed in authorized watersheds with assistance of the Forest Service, years ending June 30, 1964 and 1965, and cumulative to June 30, 1965¹

¹ Forest land is land at least 10 percent stocked by forest trees of any size, or formerly having had such tree cover and not currently developed for non-forest use. Includes chaparral areas in the West and afforested areas. The minimum area for classification of forest land is 1 acre. Roadside, streamside, and shelterbelt strips of timber must have a crown width at least 120 feet wide to qualify as forest land. Unimproved roads and trails, streams, and clearings in forest areas are classed as forest if less than 120 feet in width.

² Commercial forest land is forest land which is producing or is capable of producing crops of industrial wood and not withdrawn from timber utilization by statute or administrative regulation. Includes areas suitable for management to grow crops of industrial wood, generally capable of producing in excess of 25 cubic feet per acre of annual growth. Includes both accessible and inaccessible areas.

Forest Service. Data for 1952 in *Agricultural Statistics, 1960*, table 769.

All regions.....	627,882	434,082	193,800	2,536,799	2,058,022	478,777

¹ Net volume in cubic feet of live sawtimber and poletimber trees from stump to a minimum 4-inch top (of central stem) outside bark or to the point where the central stem breaks into limbs.

² Net volume of the saw-log portion of live sawtimber trees in board feet log scale, International $\frac{1}{4}$ -inch rule. Live trees of commercial species containing at least one saw log. Softwoods must be at least 9.0 inches in diameter breast height, except in California, Oregon, Washington, and coastal Alaska where the minimum diameter is 11.0 inches. Hardwoods must be at least 11.0 inches in diameter in all States.

Forest Service. Data for Jan. 1, 1963 in *Agricultural Statistics, 1960*, table 770.

¹ Timber cut refers to net inventory volume cut or killed in logging and converted to timber products or left as logging residues.

² The considerable excess of cut overgrowth for most western softwoods is not entirely due to overcutting. Growth is at a low level partly because 8 percent of the commercial forest area consists of old-growth timber which contributes little to net annual growth, and an excess of cut overgrowth is necessary to achieve a more regulated forest containing a desirable balance of growing stock by age classes.

³ Includes Alaska.

⁴ Includes Hawaii.

Forest Service. Data for 1952 in *Agricultural Statistics, 1960*, table 774.

FOOTNOTES FOR TABLE 787

¹ Includes Hawaii and Puerto Rico.

¹ Includes national forests, purchase units, experimental areas and land utilization projects.

National forests.—Areas established as national forests by legislative or executive action. Acres shown as national forest land, and other land administered by the Forest Service include small administrative sites outside of proclaimed boundaries and those portions of land utilization projects and other areas over which the Forest Service has supervision located within the national forest boundaries. Land utilization and other areas located outside the national forests and under Forest Service supervision are not included; such areas are listed under the classifications "Land utilization projects" and "Other areas."

Purchase units.—Areas established by the Secretary of Agriculture with the concurrence of the National Forest Reservation Commission but not formalized by legislative or executive action. Acreage shown as national forest land and other land administered by the Forest Service includes all administrative sites outside the established boundaries and those portions of the land utilization projects and other areas over which the Forest Service has supervision located within the established purchase unit boundaries. Land utilization and other areas located outside the boundaries and under Forest Service supervision are not included; such areas are listed under the classification "Land utilization projects" and "Other areas."

Experimental areas.—Areas outside of the exterior boundaries of national forests or purchase units which have been reserved and dedicated to forest or range research and experimentation by legislative or executive action. The Massabesic Experimental Forest in Maine and the McNeill Division of the Harrison Experimental Forest in Mississippi, which have both purchase unit and experimental area status, are included only in the experimental area summaries.

Land utilization projects.—Lands outside the national forests and purchase units that are administered by the Forest Service in pursuance of certain national programs of land utilization and adjustment. Does not include land utilization project lands that are managed by the States or State agencies under lease or cooperative license agreement.

² Lands within the unit boundaries in private, State, county, and municipal, etc., ownership, and Federal lands over which the Forest Service has no jurisdiction.

Forest Service.

¹ Includes all products, except fuelwood, commonly cut from round sections of trees.² Includes small quantities of imported fuelwood.³ Includes cooperage logs, poles and piling, fence posts, hewn ties, round mine timbers, box bolts, excelsior bolts, chemical wood, shingle bolts, and a miscellaneous assortment of similar items.⁴ Net imports of lumber converted to cubic feet roundwood. Small quantities of imported saw logs (roundwood form) are included under domestic production.⁵ Data may not add across because of rounding.⁶ Net imports of veneer logs represent the equivalent net imports of veneer and plywood converted to board feet log scale, and then to cubic feet roundwood. The small

volume of veneer logs imported (roundwood form) are included under domestic production.

⁷ Includes net pulpwood imports (in roundwood form) and the pulpwood equivalent of the net woodpulp and paper and paperboard imports.⁸ Includes changes in stocks.⁹ Less than 2.5 million cubic feet.¹⁰ Preliminary.Forest Service. Data for 1944–48 in *Agricultural Statistics, 1962*, table 779.

¹ Rosin, not for violins; imports for consumption, as reported by the U.S. Department of Commerce.

² Drums of 520 pounds net weight for wood; 517 pounds for gum.

³ Less than 500 drums.

⁴ The breakdown between gum and wood rosin imports not available.

⁵ Reports of the U.S. Department of Commerce. Includes some modified rosin.

⁶ Total supply less exports and Mar. 31 stocks.

⁷ The difference between domestic disappearance and reported industrial consumption is due to unreported industrial consumption; failure of some consumers to distinguish in their reports between gum, wood, and modified or derived rosins; and the inclusion of modified rosins in exports.

CHAPTER XI

CONSUMPTION AND FAMILY LIVING

The statistics in this chapter deal with the consumption of food by both rural and urban people, retail price levels, and other aspects of family living of farm people. Data presented here on quantities of food available for consumption are based on material presented in the earlier commodity chapters, but they are shown here at the retail level, a form that is more useful for an analysis of the demand situation faced by the producer. Data on quantities of farm-produced food consumed directly by farm households are presented in the commodity chapters. Its value and the rental value of the farm home are given in the section on farm income, table 689.

Table 807.—Population: Number of people eating from civilian food supplies, Jan. 1 and July 1, 1949-66

Year	Jan. 1	July 1	Year	Jan. 1	July 1
	<i>Millions</i>	<i>Millions</i>		<i>Millions</i>	<i>Millions</i>

1957	167.0	168.4	1966	192.9	-----

¹ Beginning 1960, includes Alaska and Hawaii. Totals excluding Alaska and Hawaii are as follows: Jan. 1963, 184.6; July 1963, 185.8; Jan. 1964, 187.3; July 1964, 188.5; Jan. 1965, 189.9; July 1965, 191.0; and Jan. 1966, 192.1.

Economic Research Service. Estimates based on published and unpublished records of the U.S. Department of Commerce. Data for 1910-48 in *Agricultural Statistics, 1962*, table 794.

FOOTNOTES FOR TABLE 808

¹ Beginning 1955, quantities of individual foods, measured in pounds equivalent to the form sold at retail food stores, are combined using average retail prices in 1957-59; prior to 1955, average prices in 1947-49 were used; indexes were linked at 1955. Civilian consumption only. Beginning 1960, includes Alaska and Hawaii.

² Includes edible offal.

³ Preliminary.

⁴ Data for melons, fresh vegetables, potatoes, sweetpotatoes, and dry beans and peas include consumption from home garden produce.

⁵ Corn sugar and syrup are included with sugars and other sweeteners.

⁶ Excludes sugar used in production of canned and frozen fruit, canned fruit juices, canned vegetables, and unskimmed sweetened condensed milk.

⁷ Excludes spices and herbs.

Economic Research Service.

1965	3,130	96	144	372	.96	1.50	16.5	7,700	1.80	2.25	21.4	104

¹ Quantities of nutrients computed by Agricultural Research Service, Consumer and Food Economics Research Division on the basis of estimates of per capita food consumption (retail weight), including estimates of produce of home gardens, prepared by the Economic Research Service. No deduction has been made in nutrient estimates for loss or waste of food in the home, use for pet food, or for destruction or loss of nutrients during the preparation of food. Civilian only.

² Includes estimates of quantities added to flour and cereal products.

³ Includes estimates of quantities added to margarine and to milk of all types.

⁴ Includes estimates of quantities added to fruit juices and drinks.

^a Preliminary.

Agricultural Research Service.

FOOTNOTES FOR TABLE 809

¹ Quantity data used in computing the per capita food consumption index, table 808. Final consumer products that are derived from a combination of primary food groups, such as bakery products, are measured and reported in the form of their primary ingredients, such as flour, shortening, and eggs. Civilian consumption only. Beginning 1960, includes Alaska and Hawaii.

² Includes game and edible offal.

³ Includes 2.0 pounds per capita of game fish 1949–51, increasing 0.1 pound annually to 3.0 pounds in 1961 and thereafter.

⁴ Includes product weight of butter and margarine; other items in terms of fat content.

^b Preliminary.

^c Data for melons, fresh vegetables, potatoes, sweetpotatoes, and dry beans and peas include consumption of home garden produce.

^d Excludes estimated quantities of meat, poultry, and fish base soups duplicated elsewhere.

^e Since 1958, approximations for soya products are continued at 1.3 pounds.

^f Corn sugar and sirups are with sugars and other sweeteners.

^g Excludes sugar used in production of canned and frozen fruit, canned fruit juices, canned vegetables, and unskimmed sweetened condensed milk.

^h Includes spices and herbs.

Economic Research Service.

Table 811.—Food nutrients: Percentage of total contributed by major food groups, average 1957–59, annual 1965¹

¹ Percentages were derived from nutrient data which include quantities of iron, thiamine, riboflavin, and niacin added to flour and cereal products; quantities of vitamin A value added to margarine and milk of all types; and quantities of ascorbic acid added to fruit juices and drinks.

² Less than 0.05.

³ Chocolate liquor equivalent of cocoa beans.

⁴ Components may not add to total due to rounding.

⁵ Preliminary.

Agricultural Research Service.

¹ Estimated from food quantities shown in *Agricultural Statistics, 1963*, table 807, slightly revised in 1964, and prices paid by nonfarm families. The prices per pound of each food group are averages of those paid by families in selected income levels surveyed in 1955 adjusted to current levels by use of Retail Food Prices by Cities (50 cities combined for the United States; Boston for Northeast Region; St. Louis for North Central; Atlanta for the South; and Los Angeles for the West) released periodically by the Bureau of Labor Statistics. Revisions in food quantities in 1964 resulted in insignificant changes in cost, except for about 10 percent increase in cost for women 20-55 years and 10 percent decrease for men 55 years and over.

² Age groups include the persons of the first age listed up to but not including those of the second age listed.

³ Ten percent added for family size adjustment.

⁴ Man and woman, 20 to 35 years; children, 1 to 3 and 3 to 6 years.

⁵ Man and woman, 20 to 35 years; child, 6 to 9 and boy, 9 to 12 years.

⁶ The costs given are for individuals in 4-person families. For individuals in other size families, the following adjustments are suggested: 1-person—add 20 percent; 2-person—add 10 percent; 3-person—add 5 percent; 5-person—subtract 5 percent; 6-or-more person—subtract 10 percent.

¹ A subsidy program to expand markets for agricultural products, maintain outlets for Section 32 commodities, and support school lunch programs. Sponsors of school lunch programs are reimbursed by the Government for local purchases of food on basis of the quality and quantity of meals served. The program was started in February 1943.

² Distribution, without charge to recipients, of food commodities acquired by the Government and distributed under provisions of Section 32, Public Law 320, 74th Congress, approved Aug. 24, 1935, as amended; under Section 416, Public Law 439, 81st Congress, as amended; and under Section 6 of the National School Lunch Act, Public Law 396, 79th Congress, approved June 4, 1946. Distribution to ultimate eligible recipients is accomplished through cooperating distributing agencies in States. Eligible recipients include school lunch programs, eleemosynary institutions, and households receiving public assistance from State or local welfare agencies, or other needy persons.

³ A subsidy program to expand consumption of milk by children.

¹ The number of farms receiving central station electric service from REA borrowers and all other suppliers as of June 30, 1965, is based on the annual estimate of electrified farms made by REA. This estimate is shown as a percentage of the total number of farms estimated for 1965 by the Statistical Reporting Service, U.S. Department of Agriculture.

Rural Electrification Administration.

¹ State data are for cooperatives and commercial telephone companies which are borrowers headquartered in the State even where borrowers operate in more than one State.

CHAPTER XII

MISCELLANEOUS AGRICULTURAL STATISTICS

This chapter contains miscellaneous data which do not fit into the preceding chapters. Included here are summary tables on foreign trade in agricultural products; tables on acreage and production of world crops; weather data pertaining to farming; statistics on fishery products; tables on refrigerated warehouses; and data on Hawaiian statistics on land utilization, marketings and value of crops and livestock, and livestock numbers. One weather table is included in this issue; the two tables showing monthly and annual 30-year normals, by climatic divisions, for precipitation and for average temperature, carried in the 1962 issue will be repeated about every five years. The current table showing annual averages for precipitation and temperature, by climatic divisions, will be carried annually. More complete information can be secured from the Weather Bureau, U.S. Department of Commerce.

Foreign Trade in Agricultural Products

The term "foreign trade" applies to trade between the United States, including its Territories, and foreign countries. Trade between continental United States, and its Territories is referred to as "shipments." Puerto Rico, Guam, and the Virgin Islands are Territories. Beginning January 1, 1940, trade with foreign countries through the customs district of the Virgin Islands is not included in United States trade statistics. Data for shipments out of the Territories include small quantities to other Territories. In statistics of foreign trade, forest products and distilled liquors are considered nonagricultural products, as distinct from strictly agricultural products.

Separate data are not being compiled by the U.S. Department of Commerce on exports under various special economic-aid programs, but these exports are included in data appearing in this publication. Excluded from the export figures are shipments to the United States armed forces abroad for their own use, shipments between continental United States and the Territories and possessions, and shipments between the Territories and possessions. Effective January 1, 1950, also excluded from the dollar value is the export subsidy paid to private United States exporters on shipments of domestically produced agricultural commodities. The export subsidy programs have included the following commodities during one or more of the years beginning July 1, 1949-64: Wheat, wheat flour, feed grains, rye, rice, cotton, tobacco, flaxseed, and linseed oil, peanuts, tung oil, nonfat dry milk, butter and milkfat, cheese, eggs, poultry, and certain fruits and juices. The export value—the value at the port of exportation—is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port.

Imports for consumption include imports for immediate consumption plus withdrawals from bonded warehouses. In the classification of agricultural import products into supplementary and complementary groups, all those similar to agricultural commodities produced commercially in the United States and all others that are interchangeable in use to any significant extent with such United States commodities are considered supplementary. Complementary includes all others, about 95 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and spices. The import value is defined generally as the market value in the foreign country, and excludes import duties, ocean freight, and marine insurance.

¹ Agricultural exports include food exported for relief or charity by individuals and private agencies. These figures include a small amount of certain foodstuffs other than agricultural.

² Supplementary agricultural imports consist of all imports similar to agricultural commodities produced commercially in the United States, together with all other agricultural imports interchangeable to any significant extent with such United States commodities. Complementary agricultural imports include all others, about 95 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and spices.

³ Preliminary.

¹ Based on 409 classifications.

² Supplementary agricultural imports consist of all imports similar to agricultural commodities produced commercially in the United States, together with all other agricultural imports interchangeable to any significant extent with such U.S. commodities. Complementary agricultural imports include all others, about 95 percent of which consist of rubber, coffee, tea, cacao beans, raw silk, wool for carpets, bananas, and spices.

³ Included in animals and animal products.

Economic Research Service. Compiled from reports of the U.S. Department of Commerce. Data for 1929–48 in *Agricultural Statistics, 1962*, table 816.

¹ Preliminary.

² Supplementary agricultural import products consist of all products similar to agricultural commodities produced commercially in the United States, together with all other agricultural products interchangeable to any significant extent with such United States commodities. Complementary agricultural products include all others, about 95 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and spices.

³ Imports include horses and mules for immediate slaughter and teams owned by immigrants.

⁴ Less than 500.⁵ Includes olives in brine; pineapples, prepared and preserved; and mandarin oranges.⁶ Excludes corn, barley, oats, grain sorghums, and wheat (unfit for human consumption).⁷ Includes imports through customs district of Puerto Rico.⁸ Includes crude allied gums.⁹ Includes a small amount of certain foodstuffs other than agricultural.

¹ Sales for foreign currency, donations for disaster relief and economic aid, donations through voluntary relief agencies, barter, and long-term supply and dollar credit sales under P.L. 83-480, the Agricultural Trade Development and Assistance Act of 1954 as amended, and other legislation; and sales for foreign currency and economic aid under P.L. 665, the Mutual Security Act of 1954 as amended, and under P.L. 87-195, the Act for International Development of 1961 as amended. Development loans (1964) under P.L. 87-195.

² "Agricultural exports outside specified government-financed programs" (sales for dollars) include, in addition to unassisted commercial transactions, shipments of some commodities with governmental assistance in the form of (1) extension of credit and credit guarantees for relatively short periods, (2) sales of government-owned commodities at less than domestic market prices, and (3) export payments in cash or in kind.

³ Includes the estimated value of U.S. exports to Canada of grains and soybeans for finishing the loading at Canadian ports of vessels moving through the St. Lawrence Seaway as follows: 1963, \$161 million; 1964, \$139 million.

⁴ Includes Trieste.

⁵ Less than 5 years. Prior to 1958, not separately classified.

⁶ Prior to 1964-65, not separately classified.

¹ Supplementary agricultural import products consist of all products similar to agricultural commodities produced commercially in the United States, together with all other agricultural products interchangeable to any significant extent with such United States commodities. Complementary agricultural products include all others, about 95 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and spices.

² Includes the former Federation of Malaya and State of Singapore.

³ Less than \$50,000.

⁴ Prior to 1964, not separately classified.

Economic Research Service. Compiled from reports of the U.S. Department of Commerce.

¹ Preliminary.² Grains, poultry, and pork were subject to variable levies beginning on July 30, 1962; rice on Sept. 1, 1964; and beef and dairy products on Nov. 1, 1964. The variable levy classification is designed to show overall changes in exports rather than to measure the impact of the variable levies.³ Lard for food is a variable levy commodity while lard for industrial use is bound in the General Agreement on Tariffs and Trade (GATT) at 3 percent ad valorem. U.S. lard is for food use.⁴ Although canned poultry, tallow, and variety meats are subject to variable levies, the import duties are bound in GATT.

Economic Research Service. Compiled from reports of the U.S. Department of Commerce.

¹ Unless otherwise indicated, the years shown refer to years of harvest in the Northern Hemisphere countries. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crops harvested in the Northern Hemisphere in 1964 are combined with Southern Hemisphere harvests which begin late in 1964 and end in the first half of 1965.

² Preliminary.

³ Excludes Communist China and U.S.S.R.

⁴ Converted by weight and feeding value.

⁵ Year beginning Jan. 1.

⁶ 32 countries.

⁷ 34 countries.

⁸ 21 countries; excludes mainland China, which is the world's largest producer.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.
