Introduction

Agricultural Statistics brings together each year the more important series of statistics concerning Agriculture and closely related subjects. For the most part, the data included herein were prepared in the U. S. Department of Agriculture, or compiled by the staff for official use. A few of the tables were prepared in other Government agencies. A particular effort has been made to meet the diverse interests and needs of the general public for a reliable reference book on agricultural production, supplies, consumption, facilities, costs, and returns. The tables presented cover a wide variety of facts in forms suited to most common use. Persons needing daily, weekly, and monthly information are served by the current reports of the agencies which prepare the summary statistics appearing in this book and to which the tables are credited. Research workers and others will usually wish to obtain direct from the agencies the latest facts bearing on particular problems associated with data contained in the tables included here. Inquiries concerning more current or more detailed data, the statistical methodology used, past and prospective revisions, etc., should be addressed directly to the agency responsible for the table.

The historical series in this volume have been generally limited to data beginning with 1939 or 1940 or to the most recent 10 years. Agricultural Statistics, 1952 was expanded to carry a longer series of years for most of the tables and should be used as a reference by those who have need for data for the earlier years. A few of the longer time series were included in the 1953 and 1954 issues because of revisions. Many of the tables in this issue carry a reference in the source note to the table in Agricultural Statistics, 1952 or later years where comparable data for earlier years can be found.

Revisions of the basic series on acreage and production of most crops and on inventory numbers of livestock, based on the results of the 1954 Census of Agriculture, have been included in this issue. These revision cover, generally, the period 1949 to 1954 for crops and 1950 to 1955 for livestock inventories. Revisions for the vegetable crops, except potatoes and sweetpotatoes, and some of the supplementary series such as farm disposition, were not completed in time for inclusion. Since the tables were submitted for publication in late October 1956 revisions or changes made after that date are not included. Insofar as possible, these have been mentioned in the notes at the beginning of the chapters or in notes on the particular tables affected. For the State tables on field crops where a 10-year average comparison is shown, the 1945-54 average has been used since the 1944-53 average which would normally be used was on the unrevised basis and time did not permit recomputation following Census revisions.

Per capita consumption data for food items given in this volume are based on the Bureau of Census estimates of population adjusted for underenumeration (as given in table 757). It now seems desirable to base the averages on the unadjusted series, which is used by all other U. S. Government agencies. Therefore, when all changes resulting from the Census of Agriculture and Census of Manufacturers have been incorporated in the aggregates, all series on per capita food consumption will be recomputed using the unadjusted

population data. This will result in raising the averages approximately 1.39 percent for all years, so there will be little effect on indexes for most years except where the 1954 Census of Agriculture caused major revision in production series. Revised data will be published during 1957, but are not available at the time this volume goes to press.

The table of contents indicates the general layout of the book, and page headings show the subdivisions within each chapter. The coverage and organization is much the same as in the 1955 issue.

Department Estimates and Census Data

Estimates of the U. S. Department of Agriculture are made primarily to give timely current State and national totals and averages. They are based on "benchmark" data supplied by the Censuses of Agriculture taken every 5 years and on sample data supplied by farmers and by people who do business with farmers, together with check data from other sources. Being estimates, they are subject to revisions as more data become available from commercial or Government sources. Unless otherwise indicated, the totals for the United States shown in the various tables on acreage, production numbers, price, value, supplies, and disposition are based on official Department estimates and exclude States for which no official estimates are compiled.

Census data are the result of the most nearly complete or actual count that can be made, and are used for many other purposes than determining State and national totals and averages. For example, each census provides much detailed information about counties and minor civil divisions. It also provides data that can be organized into many frequency distributions and cross-classifications for large and small portions of the country or for different segments of the agricultural industry. The definition and manner of handling a census precludes revising census data to bring them in line with other indications, even though in practice it is difficult to obtain a complete enumeration. Any effort to make such revisions or adjustments would produce estimates.

For census years, many tables carry both census totals and this Department's estimates. Generally, where there are appreciable differences between the census totals and this Department's final estimates, the processes of checking and revising estimates have indicated that some sources provide more nearly complete information about some items than the census has been able to obtain. For example, this Department's estimate of tobacco production can be considered more precise than census totals, because the estimates are revised in line with actual production as shown independently by Internal Revenue records and State records of tobacco sales. Sugar beet and sugar cane production and acreage estimates are adjusted to quantities actually reported by sugar factories. Check information on peanuts and rice is available from processors for areas sometimes including several States. In a number of other instances allowances have been made for known incompleteness of coverage by the census.

For livestock and poultry, the Department's estimates of inventory numbers relate to January 1. Most recent censuses have not enumerated numbers on that date. The decennial censuses have usually related to April 1, with the average date of enumeration falling somewhat later. The 1945 census was taken as of January 1, but with the trying wartime conditions, was delayed over a considerable length of time in a number of States with the result that reported inventory numbers did not always represent the actual January 1 inventory. The 1954 census was taken in October and

November. These situations have made it necessary to adjust census totals to a January 1 equivalent basis, taking into account changes that occurred between the January 1 date and the actual date of enumeration.

DEFINITIONS

"Farm Value" as applied to crops in the various tables, is derived by multiplying production by the estimated season average price received by farmers for that portion of the commodity actually sold. In the case of fruits and vegetables, however, quantities not harvested because of low prices or other economic factors are excluded from the computation of farm value. The term is used in the inventory tables on livestock and poultry to mean value of the number of head on farms on January 1. It is derived by multiplying the number of head by an estimated value per head as of that date.

The word "Year" (alone) in a column heading means calendar year. "Ton" when used in this book without qualifications means a short ton of 2,000 pounds.

WEIGHTS, MEASURES, AND CONVERSION FACTORS

The following table on weights, measures, and conversion factors covers the most important agricultural products, or the products for which such information is most frequently asked of the U. S. Department of Agriculture. It does not cover all farm products nor all containers for any one product.

The information has been assembled from various sources within the Department and from State schedules of legal weights. For most products, particularly fruits and vegetables, there is a considerable variation in weight per unit of volume, due to differences in variety or size of commodity, condition and tightness of pack, degree to which the container is heaped, etc. Effort has been made to select the most representative and fairest average for each product. For those commodities which develop considerable shrinkage, the point of origin weight or weight at harvest has been used.

The approximate or average weights, as given in this table do not necessarily have official standing as a basis for packing or as grounds for settling disputes. Not all of them are recognized as legal weights. The table was prepared chiefly for use of workers in the U. S. Department of Agriculture who have need of conversion factors in statistical computations.

WEIGHTS, MEASURES, AND CONVERSION FACTORS

Sunflower seed	Bushel	24 and 32	Wheat		

¹ Standard bushel used in the United States contains 2,150.42 cubic inches; the gallon, 231 cubic inches; the cranberry barrel, 5,826 cubic inches; and the standard fruit and vegetable barrel, 7,056 cubic inches. Such large-sized products as apples and potatoes sometimes are sold on the basis of a heaped bushel, which would exceed somewhat the 2,150.42 cubic inches of a bushel basket level full. This also applies to such products as sweetpotatoes, peaches, green beans, green peas, spinach, etc.

² Approximate inside dimensions, 10^{1/2} by 11^{1/2} by 18 inches.

³ Approximate inside dimensions, 11 by 13 by 17 inches.

⁴ Approximate inside dimensions, 4^{1/2} by 12^{1/2} by 16^{1/2} inches.

⁵ Approximate inside dimensions, 4^{1/2} by 16 by 16^{1/2} inches.

⁶ Approximate inside dimensions, 9^{1/2} by 11 by 20^{1/2} inches.

⁷ Approximate dimensions, 4^{1/2} by 13^{1/2} by 16^{1/2} inches.

⁸ Approximate inside dimensions, 13 by 12 by 32 inches.

⁹ Approximate inside dimensions, 8 by 12 by 22 inches.

¹⁰ Inside dimensions vary. Common sizes are 13 by 22^{1/2} inches, and 13 by 15^{1/2} by 28 inches.

¹¹ Approximate inside dimensions, 13 by 18 by 21^{1/2} inches.

¹² Approximate inside dimensions, 13 by 13 by 22^{1/2} inches.

¹³ This is the weight commonly used in trade practices, the actual weight varying according to temperature conditions.

¹⁴ Approximate inside dimensions, 9^{1/2} by 16 by 20 inches.

¹⁵ Approximate inside dimensions, 4^{1/2} by 11^{1/2} by 14 inches.

¹⁶ The standard weight of 70 pounds is usually recognized as being about 2 measured bushels of corn, husked, on the ear, because it required 70 pounds to yield 1 bushel, or 56 pounds, of shelled corn.

¹⁷ For statistical purposes the bale of cotton is 500 pounds or 480 pounds net weight. Prior to Aug. 1, 1946, the net weight was estimated at 478 pounds. Actual bale weights vary considerably, and the customary average weights of bales of foreign cotton differ from that of the American square bale.

¹⁸ This is the average weight of cottonseed, although the legal weight in some states varies from this figure of 32 pounds.

¹⁹ Approximate inside dimensions, 9^{1/2} by 10^{1/2} by 15 inches.

²⁰ Approximate inside dimensions, 1^{1/2} by 11 by 16^{1/2} inches.

²¹ Approximate inside dimensions, 12 by 12 by 24 inches.

²² Approximate inside dimensions, 11^{1/2} by 11^{1/2} by 24 inches.

²³ Until 1942, these net weights as used in this Department (for figuring quantities and values of bulk fruit in terms of packed boxes) were 60 pounds for grapefruit, 76 pounds for lemons, and 70 pounds for oranges. Grapefruit in California areas other than the Desert Valleys, averages 68 pounds per box compared with 65 pounds in the Valleys.

²⁴ Approximate inside dimensions, 5^{3/4} by 13^{1/2} by 16^{1/2} inches.

²⁵ Approximate inside dimensions, 4^{3/4} by 16 by 16^{1/2} inches.

²⁶ Approximate inside dimensions, 7^{3/4} by 16 by 21^{1/2} inches.

²⁷ Approximate inside dimensions, 9^{1/2} by 13 by 25 inches.

²⁸ Approximate inside dimensions vary. Common size is 4^{1/2} by 11^{1/2} by 16^{1/2} inches.

²⁹ Approximate inside dimensions, 8^{1/2} by 11^{1/2} by 18 inches.

³⁰ Approximate inside dimensions, 13^{1/2} by 11 by 22 inches.

³¹ Approximate inside dimensions, 12 by 10^{1/2} by 33 inches.

³² Inside dimensions vary. Ranges from 4 by 16 by 16^{1/2} inches to 6 by 16 by 16^{1/2} inches.

³³ This average of 55 pounds indicates the usual weight of sweetpotatoes when harvested. Much weight is lost in curing or drying and the net weight when sold in terminal markets may be below 55 pounds.

³⁴ Approximate inside dimensions, 9^{1/2} by 9^{1/2} by 19^{1/2} inches.

(See conversion factors on next page.)

CONVERSION FACTORS

Commodity	Unit	Approximate equivalent
Apples.....	1 pound dried.....	7 pounds fresh; beginning 1943, 8 pounds fresh
Do.....	1 pound chops.....	5 pounds fresh
Do.....	1 barrel.....	3 boxes or 3 bushel baskets
Do.....	1 case canned ³⁴	1.4 bushels fresh
Applesauce.....	1 case canned ³⁴	1.2 bushels fresh
Apricots.....	1 pound dried.....	5½ pounds fresh
Barley flour.....	100 pounds.....	4.59 bushels barley
Beans, lima.....	1 pound shelled.....	2 pounds unshelled
Beans, snap or wax.....	1 case canned ³⁵	0.010 tons fresh
Buckwheat flour.....	100 pounds.....	3.47 bushels buckwheat
Cane syrup.....	1 gallon.....	5 pounds sugar
Cherries, sour.....	1 case canned ³⁴	0.023 tons fresh
Chickens.....	1 pound live weight.....	0.89 pounds New York dressed weight
Do.....	do.....	0.65 pounds ready-to-cook weight
Corn, shelled.....	1 bushel (56 lbs.).....	2 bushels (70 pounds) of husked ear corn ¹
Corn, sweet.....	1 case canned ³⁵	0.038 tons fresh
Cornmeal:		
Degermed.....	100 pounds.....	3.16 bushels corn, beginning 1946
Nondegermed.....	do.....	2 bushels corn, beginning 1946
Cotton.....	1 pound ginned.....	2.68 pounds unginned (with no allowance for trash)
Dairy products:		
Butter.....	1 pound.....	20.6 pounds milk
Cheese.....	do.....	10 pounds milk
Condensed milk, whole.....	do.....	2.3 pounds milk
Evaporated milk, whole.....	do.....	2.14 pounds milk
Ice cream ³⁶	1 gallon.....	15 pounds milk
Ice cream ³⁵ (eliminating fat from butter and concentrated milk).....	1 gallon.....	12 pounds milk
Malted milk.....	1 pound.....	2.6 pounds milk
Powdered milk.....	do.....	7.6 pounds milk
Powdered cream.....	do.....	19 pounds milk
Eggs.....	1 case.....	45 pounds
Eggs, shell.....	1 pound.....	0.87 pounds frozen or liquid whole eggs, since 1950
Do.....	do.....	0.23 pounds dried whole eggs, since 1950
Figs.....	1 pound dried.....	3 pounds fresh in California; 4 pounds fresh elsewhere
Flaxseed.....	1 bushel.....	About 2½ gallons oil
Grapefruit, Florida.....	1 case canned juice ³⁵	0.83 box fresh fruit
Linseed oil.....	1 gallon.....	0.4 bushel flaxseed
Malt.....	1 bushel (34 lbs.).....	1 bushel barley (48 lbs.)
Maple syrup.....	1 gallon.....	8 pounds maple sugar
Nuts:		
Almonds, imported.....	1 pound shelled.....	3½ pounds unshelled
Almonds, California.....	do.....	2.22 pounds unshelled through 1949; 2 pounds thereafter
Brazil.....	do.....	2 pounds unshelled
Cashews.....	do.....	4.55 pounds unshelled
Chestnuts.....	do.....	1.19 pounds unshelled
Filberts.....	do.....	2.22 pounds unshelled through 1949; 2.5 pounds thereafter
Pecans:		
Seedling.....	do.....	2.78 pounds unshelled
Improved.....	do.....	2.50 pounds unshelled
Pignolias.....	do.....	1.3 pounds unshelled
Pistachios.....	do.....	2 pounds unshelled
Walnuts:		
Black.....	do.....	8½ pounds unshelled
Persian (English).....	do.....	2.50 pounds unshelled
Oatmeal.....	100 pounds.....	7.6 bushels oats, beginning 1943
Oranges, Florida.....	1 case canned juice ³⁵	0.63 box fresh
Peaches, California, freestone.....	1 pound dried.....	5½ pounds fresh through 1918; 6 pounds fresh for 1919-28; and 6½ pounds fresh from 1929 to date
Peaches, California, clingstone.....	do.....	7½ pounds fresh
Peaches, clingstone.....	1 case canned ³⁴	1.0 bushels fresh
Do.....	do.....	0.0230 tons fresh
Peanuts.....	1 pound shelled.....	1½ pounds unshelled
Pears.....	1 pound dried.....	5½ pounds fresh
Pears, Bartlett.....	1 case canned ³⁴	1.1 bushels fresh
Do.....	do.....	0.026 tons fresh
Pears, green.....	1 pound shelled.....	2½ pounds unshelled
Do.....	1 case canned ³⁵	0.010 tons fresh (shelled)
Prunes.....	1 pound dried.....	2½ pounds fresh in California; 3 to 4 pounds fresh elsewhere

See footnotes at end of table.

Wool, domestic apparel shorn.....	1 pound greasy.....	0.44 pounds scoured
Wool, domestic apparel pulled.....do.....	0.75 pounds scoured

³⁴ Case of 24 number 2½ cans.

³⁵ Case of 24 number 2 cans.

³⁶ The milk equivalent of ice cream per gallon is 15 pounds. Reports from plants indicate about 81 percent of the butterfat in ice cream is from milk and cream, the remainder being from butter and concentrated milk. Thus the milk equivalent of the milk and cream in a gallon of ice cream is about 12 pounds.

³⁷ This is equivalent to 4.56 bushels of wheat per barrel (196 pounds) of flour and has been used in conversions beginning July 1, 1944. Because of changes in milling processes, the following factors per barrel of flour have been used for earlier periods: 1790–1879, 5 bushels; 1880–1908, 4.75 bushels; 1909–17, 4.7 bushels; 1918 and 1919, 4.5 bushels; 1920, 4.6 bushels; 1921–44, 4.7 bushels. From Mar. 1 to Nov. 1, 1946, the milling rate averaged about 2.20 bushels wheat per 100 pounds flour.

CHAPTER I

STATISTICS OF GRAIN

This chapter deals primarily with estimates of acreage, production, farm disposition, prices, farm value, stocks, and foreign production and trade. Estimates for most of these subjects are published regularly in greater detail by the Crop Reporting Board.

Tables on sorgo sirup, which might be expected in the sorghum group, are included with "sugar crops," and popcorn tables are placed with "minor field crops." Corn sugar and corn sirup, however, are included in the corn tables.

Table 1.—Wheat: Acreage, yield, production, value, and foreign trade, United States, 1939–55

¹Includes acreage seeded in preceding fall for harvest in the year shown.

²Prior to 1947 quoted as No. 2 Hard Winter, and beginning with 1947 to date, No. 2 Hard and Dark Hard Winter, computed by weighting selling prices by number of carlots sold, as reported in the Kansas City Grain Market Review.

³No. 1 Dark Northern Spring, computed by weighting selling prices by number of carlots sold as reported in the Minneapolis Daily Market Record.

⁴Compiled from reports of the U.S. Department of Commerce. Wheat flour converted to grain equivalent on the following basis: Through June 30, 1944, 4.7 bushels of grain to 1 barrel of flour; July 1, 1944–Feb. 28, 1946, 2.33 bushels of grain to 100 pounds of flour; the following months of 1946 as indicated, March 2.28, April 2.17, May 2.18, June 2.17, July 2.18, August 2.22, September 2.20, and October 2.23 bushels; and Nov. 1, 1946 to date, 2.33 bushels of grain to 100 pounds of flour.

⁵Includes flour milled from imported wheat. See also table 8, which includes civilian feeding by the military abroad prior to January 1947.

⁶Includes wheat imported for milling in bond and subsequent export.

⁷Domestic exports minus imports for consumption. Net imports shown by a minus sign.

⁸Includes an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

⁹Excludes some minor producing States and parts of other States where wheat is not asked separately.

¹⁰Preliminary.

Agricultural Marketing Service. Italic figures are census returns. Data for 1866–1938 in Agricultural Statistics, 1952, table 1.

¹ Acreage seeded in preceding fall, for winter wheat only.² Preliminary.³ Includes "Red Durum." Minnesota, North Dakota, and South Dakota from 1946 to 1953 inclusive. Montana added in 1954.⁴ Includes small quantities of durum wheat grown in States other than those specified in footnote 3.⁵ Total of acreage seeded to winter wheat and all spring wheat.⁶ Total acreage seeded less an allowance for winter wheat acreage abandoned and later reseeded to spring wheat for harvest in the same crop year. Occurs principally in the Pacific Northwest.⁷ Revised estimates not available.

Agricultural Marketing Service. Winter wheat and spring wheat data for 1919–45 in Agricultural Statistics, 1952, table 2.

¹ Includes acreage seeded in preceding fall for harvest in the year shown.

² Preliminary.

³ For certain years, prices include an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

Agricultural Marketing Service.

Table 4.—Wheat, by groups: Acreage, production, and season average price per bushel received by farmers, by States, average 1945–54, annual 1954 and 1955

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, the crop harvested in the Northern Hemisphere in 1955 is combined with the Southern Hemisphere harvests which began late in 1955 and ended early in 1956.

² Figures refer to harvested areas as far as possible.

³ Revised estimates for Northern Hemisphere countries; for Southern Hemisphere, revised preliminary forecasts.

⁴ Estimated totals, which in the case of production are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown.

⁵ 1935 only.

⁶ Comprises Albania, Bulgaria, Czechoslovakia, Eastern Germany, Hungary, Poland, and Rumania.

⁷ Average of less than 5 years.

⁸ Estimates for Syria and Lebanon not shown separately during this period.

⁹ Data for the period shown are not strictly comparable since figures for 1953-55 include allowances for non-reporting areas, which were not included for earlier periods shown, but were included in estimated total for Asia.

¹⁰ Production on European holdings only.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research or other information. Prewar estimates for countries having changed boundaries have been adjusted to conform to present boundaries.

Table 6.—Wheat: Production, seed used, and farm disposition, United States, 1946–55

¹ Includes flour expressed in wheat equivalent.² As reported by U.S. Department of Commerce.³ Classified as "unfit for human consumption" or imported for special feeding programs.⁴ Includes flour imported free for export in 1,000 bushels as follows: 1945, 19; 1948, 1; 1949, 29; and 1953, 2.⁵ Reported by the National Military Establishments; financed by the United States.⁶ Usually all from imported wheat, although in some years small quantities of United States wheat were added. Reported by U.S. Department of Commerce.⁷ 142,637,000 reported by U.S. Department of Commerce, plus 11,358,000 unreported January-June 1947 exports to Germany, financed by the United Kingdom.⁸ 154,407,000 reported by the U.S. Department of Commerce, plus 11,884,000 unreported January-June 1947 exports to Germany, financed by the United Kingdom.⁹ 184,324,000 reported by U.S. Department of Commerce, plus 23,038,000 unreported exports to Germany financed by the United Kingdom.¹⁰ 123,546,000 reported by U.S. Department of Commerce, plus 9,539,000 unreported exports to Germany financed by the United Kingdom.

Agricultural Marketing Service. Data for 1929-44 in Agricultural Statistics, 1952, table 8.

FOOTNOTES FOR TABLE 7

¹ Preliminary.² These production estimates are unrevised and do not agree with similar data in most other tables.³ Ground at the mill for home use or exchanged for flour.

Agricultural Marketing Service. Disposition of the crop specified and not disposition within the marketing year. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes.

¹ Includes flour made from United States wheat and shipments to Territories. ² Includes "Red Durum."³ Less than 500,000 bushels. ⁴ Preliminary.

Agricultural Marketing Service. Stocks include only old crop wheat on hand July 1 of year shown and are the total of the following stocks: On farms; in interior mills, elevators, and warehouses; in merchant mills; commercial stocks at terminals; and stocks owned by Commodity Credit Corporation in steel and wooden bins, and in transit. Estimated stocks on farms and in interior mills, elevators, and warehouses by classes, as well as production by classes, are on the basis of the quinquennial wheat-variety surveys. Commercial stocks are reported by classes, and merchant mill stocks are broken down largely on the basis of the distribution by classes of commercial stocks. Exports and shipments by classes are estimated on the basis of "inspection for export," records of the former War Food Administration and the U.S. Department of Agriculture, and export indemnifying agencies. Data for 1939–45 in Agricultural Statistics, 1952, table 10.

¹ Owned by Commodity Credit Corporation and stored in bins or other storage owned or controlled by CCC also in transit to ports and in Canadian elevators. Other Commodity Credit Corporation-owned wheat included in the estimates by positions.

² Includes full-duty wheat, wheat imported for feed, and dutiable flour and other products in terms of wheat. Excludes wheat imported for milling in bond and export as flour.

³ Preliminary.

⁴ Includes flour and other products in terms of wheat.

⁵ Food use is computed as follows: Total grind (commercial and noncommercial) less exports and shipments of flour and other wheat products, less military procurement, plus estimated breakfast food produced outside the flour-milling industry, plus dutiable imports of flour and other wheat products.

⁶ Quantity of wheat ground into granular flour for alcohol production together with wheat grain used for that purpose.

⁷ Balancing item; roughly approximates total use as feed, including that used in commercial feed as well as that fed on farms.

⁸ Includes procurement for both military exports and for military food use; military takings for civilian feeding in occupied areas measured at time of procurement and not at time of shipment overseas.

⁹ Exports as here used, in addition to commercial exports, include USDA flour procurement as distinct from USDA deliveries for export. They exclude exports for civilian feeding by the military abroad, which are included in military procurement. Deliveries for export (actual exports, including those of civilian feeding in occupied areas) of wheat, flour and other products, in million bushels, beginning with 1945 were as follows: 390.6; 397.4; 485.9; 504.0; 299.1; 366.1; 475.3; 317.8; 217.0; 274.3 and 345.0.

¹⁰ Shipments are to Alaska, Hawaii, Puerto Rico, Guam, Samoa, Virgin Islands, and Wake Island; partly estimated. For the war years, USDA shipments for stockpiling in the territories have been added to reported Census totals.

¹¹ Total disappearance plus year-end carryover accounts for total supply.

Agricultural Marketing Service. Foreign trade figures from reports of the U.S. Department of Commerce and U.S. Department of Agriculture. Military procurement figures from the National Military Establishments. Data for 1930–44 in Agricultural Statistics, 1952, table 12.

¹ Markets are Chicago, Minneapolis, Kansas City, St. Louis, Omaha, and Duluth.² Export price, f.o.b. port, bulk.³ August 1946–July 1949, commercial sales to countries other than the Untied Kingdom.⁴ No. 2 Hard and Dark Hard Winter.⁵ Basic export selling price of the Australian Wheat Board.

Beginning August 1949, export price for sales outside of the International Wheat Agreement. Under terms of the International Wheat Agreement the basic maximum price for No. 1 Manitoba Northern, in bulk, in store at Fort William–Port Arthur is .1.80 per bushel. This maximum price has prevailed since beginning of Agreement in August, 1949.

⁷ Beginning March 1952, changed to Spring short patents.

Agricultural Marketing Service. Compiled from following sources: Northwestern Daily Produce News; Bureau of Labor Statistics Wholesale Price Bulletins; reports of the Commodity Stabilization Service; New York Journal of Commerce; Broomhall's Yearbook and Corn Trade News; Canadian Grain Statistics; Statistical Register of New South Wales annual; Summary of the Australian Wheat Situation, and trade papers averages. Foreign prices are compiled in original currencies and units. Prices converted to cents per bushel of 60 pounds at current monthly rates of exchange as reported by the Federal Reserve Board. Data for 1929–45 in Agricultural Statistics, 1952, table 14.

¹ Includes rye sown in the spring of year shown.² Averages of daily prices weighted by carlot sales, as reported in the Minneapolis Daily Market Record.³ Compiled from reports of the U.S. Department of Commerce. Rye flour converted to grain equivalent on the basis of 6 bushels of grain to 1 barrel of flour through 1943; beginning 1944, 4.6 bushels of grain to 1 barrel of flour. Rye malt converted to grain on the basis of 1.1 bushels of grain to 1 bushel of malt through 1942; beginning 1943, 1 bushel of grain to 1 bushel of malt.⁴ Rye malt not separately reported. The period 1942–48 does not include rye and flour used by military services for civilian relief abroad, estimated in thousands of bushels as follows: 435; 484; 1,397; 944; 0; 406; and 0. These exports are included in table 19.⁵ Includes rye malt.⁶ Imports for consumption minus domestic exports with net exports shown by a minus sign.⁷ Includes an allowance for unredeemed loan and purchase agreement deliveries at the average rate.⁸ Less than 500 bushels.⁹ Excludes some minor producing States and parts of other States where rye is not asked separately.¹⁰ Preliminary.

Agricultural Marketing Service. Italic figures are census returns. Data for 1909–38 in Agricultural Statistics, 1952, table 18.

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, the crop harvested in the Northern Hemisphere in 1955 is combined with Southern Hemisphere harvests, which began late in 1955 and ended early in 1956.

² Figures refer to harvested areas as far as possible.

³ Revised estimates for Northern Hemisphere countries; for Southern Hemisphere, revised preliminary forecasts.

⁴ 1935 only.

⁵ Estimated totals, which in the case of production are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown.

⁶ Comprises Albania, Bulgaria, Czechoslovakia, Eastern Germany, Hungary, Poland and Rumania.

⁷ Average of less than 5 years.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, or other information. Prewar estimates for countries having changed boundaries have been adjusted to conform to present boundaries.

¹ Includes stocks on farms, in interior mills, elevators, and warehouses, and in terminals.² Quantity milled for flour (Bureau of the Census).³ 1947 includes rye and flour (rye equivalent) used by military services for civilian relief abroad estimated at 406,000 bushels. These exports are not included in table 15.⁴ Preliminary.

Agricultural Marketing Service. Data for 1934–45 in Agricultural Statistics, 1952, table 24.

Table 20.—Rye: Production, seed used, and farm disposition, United States, 1946–55

¹ Crop year beginning Aug. 1 in Southern States and Oct. 1 in California.² Includes stocks held by Government agencies.³ Includes shipments to the armed forces.

Agricultural Marketing Service. Data for 1932–44 in Agricultural Statistics, 1952, table 31.

FOOTNOTES FOR TABLE 24

¹ Crops harvested in Northern Hemisphere during the latter part of the year, together with those harvested in Asia principally from November to May, are combined with crops harvested in Southern Hemisphere countries during the first part of the following year. ² Preliminary. ³ Subject to revision. ⁴ Statistics of Burma and India in the prewar period are not comparable with those of postwar years. ⁵ Planted acreage. ⁶ Estimates for Center and North Vietnam included in world totals only. ⁷ North and South Korea.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, and other information.

¹ Yield and production represent equivalent grain yield on total acres harvested for all purposes, i.e., grain, silage, fodder, hogged off, grazed, etc. Census yields are corn for grain.

² Prices are the average of daily prices weighted by carlot sales, No. 3 Yellow Corn, as reported in the Chicago Daily Trade Bulletin through May 1942, and the Chicago Journal of Commerce or Wall Street Journal from June 1942 to date.

³ Compiled from reports of the U.S. Department of Commerce. Corn meal converted to grain equivalent on the basis of 4 bushels of grain to 1 barrel of meal through December 1945; beginning January 1946, 3.16 bushels of grain to 100 pounds of meal.

⁴ Beginning January 1954, includes cracked corn not separately reported.

⁵ Domestic exports minus imports for consumption. Net imports shown by a minus sign.

⁶ Includes an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

⁷ Includes shipments under the Army Civilian Supply Program, beginning January 1946, and continuing in later years.

⁸ Preliminary.

⁹ October-August average.

Agricultural Marketing Service. Italic figures are census returns. Data for 1866-1938 in Agricultural Statistics, 1952, table 38.

FOOTNOTES FOR TABLE 37

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which follows; thus the crop harvested in the Northern Hemisphere in 1955 is combined with the Southern Hemisphere harvest which begins early in 1956.
² Figures refer to harvested area as far as possible. ³ Revised estimates for Northern Hemisphere countries; for the Southern Hemisphere, revised preliminary forecasts. ⁴ Average of less than 5 years. ⁵ Estimated totals, which in the case of production are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown. ⁶ Data for the period shown are not strictly comparable, since figures for 1953-55 include estimates for non-reporting areas, which were not included for earlier periods shown, but allowances were included in estimated total for Asia. ⁷ Production of European holdings only. Allowances for native cultivation, not shown, are included in estimated total for Africa.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Agricultural Attachés, results of office research, or other information. Prewar estimates for countries having changed boundaries have been adjusted to conform to present boundaries.

¹ Relates to corn for all purposes, i.e., grain, silage, fodder, hogged off, grazed, etc.

² Preliminary.

³ For certain years, prices include an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

¹ In bins or other storage owned or controlled by Commodity Credit Corporation; additional Government stocks are included in other positions.

² Compiled from reports of the U.S. Department of Commerce. Imports include grain equivalent of corn-meal and flour; exports are grain only.

³ Preliminary.

⁴ Estimated quantities (based on census data) used in making prepared breakfast foods.

⁵ Estimated quantities used in producing cornmeal, flour, hominy grits, and flakes for human food and for the production of fermented malt liquors. Based on reports of the Bureau of the Census and the Bureau of Internal Revenue. Does not include corn processed for livestock feed.

⁶ Starch, syrup, sugar, etc. Compiled from data of Price Waterhouse and Company, New York.

⁷ Compiled from data of the Bureau of Internal Revenue. Does not include corn products used in the production of fermented malt liquors.

⁸ Based on acreage planted to corn the following year.

⁹ Residual; includes small quantities for other uses and waste.

¹⁰ Includes exports for military civilian feeding abroad during the period 1945–49.

¹¹ Total disappearance, minus exports of corn and grain equivalent of corn products.

Agricultural Marketing Service. Data for 1929–44 in Agricultural Statistics, 1952, table 47.

¹ Average of daily prices weighted by carlot sales, as reported in trade papers published at the various markets.² Average of bulk-of-sales price for 1 day each week, compiled by Commodity Stabilization Service.³ Compiled from Boletin Estadístico, Banco Central De La Republica Argentina, Buenos Aires (monthly). Prices converted to cents per bushel of 56 pounds at current monthly rates of exchange as reported by the Federal Reserve Board.⁴ 10-month average.

Agricultural Marketing Service. Data for 1929–45 in Agricultural Statistics, 1952, table 50.

¹ Estimates of seeded acreage relate to the total acreage of oats sown for all purposes, including oats sown in the preceding fall.² Prior to 1949 includes an allowance for oats cut ripe for feeding unthreshed.³ Prices are the average of daily prices for No. 3 White, weighted by carlot sales, as reported in the Chicago Daily Trade Bulletin through May 1942 and the Chicago Journal of Commerce and Wall Street Journal from June 1942 to date.⁴ Compiled from reports of the U.S. Department of Commerce. Oatmeal converted to grain equivalent on the basis of 1 bushel of grain to 18 pounds of meal through December 1942, and 13.17 pounds of meal thereafter.⁵ Includes "oats, unhulled, ground."⁶ Imports for consumption minus domestic exports. Net exports shown by a minus sign.⁷ Includes shipments under the Army Civilian Supply Program, beginning July 1946, and continuing in later years.⁸ Includes an allowance for unredeemed loan and purchase agreement deliveries at the average rate.⁹ Excludes some minor producing States and parts of other States where oats are not asked separately.¹⁰ Preliminary.

Agricultural Marketing Service. Italic figures are census returns. Data for 1866–1938 in Agricultural Statistics, 1952, table 53.

¹ Preliminary.

² These production estimates are unrevised and do not agree with similar data in most other tables.

Agricultural Marketing Service. Disposition of the crop specified and not disposition within the marketing year. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes.

FOOTNOTES FOR TABLE 49

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, the crop harvested in the Northern Hemisphere in 1955 is combined with the Southern Hemisphere harvests which began late in 1955 and ended early in 1956.

² Figures refer to harvested areas as far as possible.

³ Revised estimates for Northern Hemisphere countries; for Southern Hemisphere, revised preliminary forecasts.

⁴ Production reported in bushels of 34 pounds.

⁵ Estimated totals, which in the case of production are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown.

⁶ Average of less than 5 years.

⁷ 1935 only.

⁸ Comprises Albania, Bulgaria, Czechoslovakia, Eastern Germany, Hungary, Poland, and Rumania.

⁹ Includes estimate for Lebanon, and is, therefore, not strictly comparable with estimates shown for later years.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, or other information. Prewar estimates for countries having changed boundaries have been adjusted to conform to present boundaries.

¹ Estimates of seeded acreage relate to the total acreage of barley sown for all purposes, including barley sown in the preceding fall.² Price of No. 3 barley, average of daily prices weighted by carlot sales, as reported in the Minneapolis Daily Market Record.³ Compiled from reports of the U.S. Department of Commerce. Barley flour converted to grain equivalent on the basis of 9 bushels of grain to 1 barrel of flour. Barley malt converted to grain equivalent on the basis of 1.1 bushels of grain to 1 bushel of malt through 1943; beginning 1944, 1 bushel of grain to 1 bushel of malt.⁴ Domestic exports minus imports for consumption, with net imports shown by a minus sign.⁵ Includes an allowance for unredeemed loan and purchase agreement deliveries at the average rate.⁶ Includes shipments under the Army Civilian Supply Program, beginning July 1946 and continuing in later years.⁷ Excludes some minor producing States and parts of other States where barley is not asked separately.⁸ Preliminary.

Agricultural Marketing Service. Italic figures are census returns. Data for 1909-38 in Agricultural Statistics, 1952, table 62.

FOOTNOTES FOR TABLE 57

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, the crop harvested in the Northern Hemisphere in 1955 is combined with the Southern Hemisphere harvests which began late in 1955 and ended early in 1956.

² Figures refer to harvested areas as far as possible.

³ Revised estimates for Northern Hemisphere countries; for Southern Hemisphere, revised preliminary forecasts.

⁴ Estimated totals, which in the case of production, are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown.

⁵ Average of less than 5 years.

⁶ 1935 only.

⁷ Comprises Albania, Bulgaria, Czechoslovakia, Eastern Germany, Hungary, Poland, and Rumania.

⁸ Estimates for Syria and Lebanon not shown separately during this period.

⁹ Data for the period shown are not strictly comparable throughout, since figures for 1953–55 include allowances for non-reporting areas, which were not included for earlier periods shown, but were included in estimated total for Asia.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, or other information. Prewar estimates for countries having changed boundaries have been adjusted to conform to present boundaries.

¹ Owned by the Commodity Credit Corporation in bins owned or controlled by CCC and in Canadian elevators. Additional Government-owned stocks are included in reports for other positions.

² Compiled from reports of the U.S. Department of Commerce. Both imports and exports include grain equivalent of malt.

³ Preliminary.

⁴ Compiled from reports of the Bureau of Internal Revenue. Includes small quantities of barley grain.

⁵ Principally for food. Estimated on basis census reports on malt production after making allowance for quantities exported, imported, and used in alcohol and alcoholic beverages.

⁶ Based on acreage seeded to the following crop.

⁷ Residual; includes small quantities for other uses and waste.

⁸ Includes exports for military relief feeding abroad during the period 1946–54.

Agricultural Marketing Service. Data for 1934–44 in Agricultural Statistics, 1952, table 68.

¹ Consumption data for most grains are measured at the processing level. Total consumption is the grain equivalent of the food products processed from the grains. Excludes quantities used for alcoholic beverages. Beginning 1941, the per capita civilian consumption was obtained by dividing the total apparent civilian consumption by the civilian population adjusted for underenumeration and members of the Armed Forces eating out of civilian supplies.

² Includes white, whole wheat, and semolina flour.

³ Not revised to incorporate 1954 Census of Manufacturers data.

⁴ Rice consumption for year beginning August previous to the year stated. Table rice used by brewers excluded.

⁵ Excludes corn and corn products used in the production of alcoholic beverages. Total corn includes an allowance for the quantity used as hominy and grits and minor

food uses.

⁶ Revised on basis of 1954 Census of Manufacturers.

⁷ Barley consumed in food products, excluding malt beverages, expressed in terms of grain equivalent. Includes quantities used as pearl barley, flour, malt extract, and other food products.

⁸ Malt equivalent of barley grain used for food.

⁹ Preliminary.

Agricultural Marketing Service. All figures are estimates based on data from the Census of Manufacturers, Price Waterhouse and Co., the U.S. Department of Commerce, the Internal Revenue Service, and other sources. Data for 1909-38 in Agricultural Statistics, 1953, table 71.

¹ Total stocks not available prior to 1947. Beginning with 1947, Oct. 1 stocks include the following positions: farms, interior mills, elevators and warehouses, Commodity Credit Corporation grain in its own bins, and terminal elevators.

² Principally alcohol and distilled spirits. Includes an allowance for wet-processing from the middle of 1949 to date.

³ Exports grain only. Imports are very small and are not separately reported.

⁴ Since carryover stocks have been available only since 1947, production has been considered as the disappearance for each season prior to that date.

Agricultural Marketing Service. Data for 1939–44 in Agricultural Statistics, 1952, table 76.

¹ October–September feeding year for all items except oats and barley carryover and production, which are for the July–June marketing year.

² Corn stocks on Oct. 1, oats and barley July 1. Sorghum grain Oct. 1, 1947 to date. Farm, terminal market, and Government-owned stocks 1939–42. Stocks in all positions, including interior mill, elevator, and warehouse stocks, 1943 to date.

³ Corn for all purposes, oats, barley, and sorghum grain.

⁴ Imported grains and domestic wheat and rye.

⁵ Total byproduct feeds available for feeding.

⁶ Total of the grain-consuming animal units, computed by States, fed during the October–September feeding year. For current years the weights for converting United States livestock numbers to grain-consuming animal units are as follows: Number on Jan. 1 of milk cows and heifers 2 years old and over, 1.02; heifers and heifer calves, 0.344; beef cows, 0.167; cattle on feed, 2.0; all other cattle, 0.154; stock sheep, 0.022; sheep and lambs on feed, 0.12; horses and mules 2 years old and over, 1.34; colts, 0.07; hens and pullets, 0.0577; number hogs fed during the year, 0.712; chickens raised, 0.018; commercial broilers raised, 0.008; and turkeys raised, 0.07.

Agricultural Marketing Service. Prices of corn and oats at Kansas City, Chicago, and Minneapolis were computed by weighting selling prices by reported number of carlots sold. Prices of barley and grain sorghum at Kansas City and of barley at Chicago and Minneapolis are average of prices at the close of each day. Prices at San Francisco are the average of prices on one day each week.

⁵ Revised—based on the prices of the following commodities at the leading markets, weighted by average consumption: Bran, middlings and shorts, copra meal, cottonseed meal, linseed meal, peanut meal, soybean meal, gluten feed, hominy feed, brewers' dried grains, distillers' dried grains, alfalfa meal, tankage, meat scrap, fish meal and industrial molasses.

Agricultural Marketing Service. Data for 1929–44 in Agricultural Statistics, 1952, table 82.

CHAPTER II

STATISTICS OF COTTON, SUGAR, AND TOBACCO

In addition to tables on cotton, sugar, and tobacco, this chapter includes tables on fibers other than cotton, sorgo syrup, maple syrup and sugar, honey, and beeswax. Most cottonseed data, however, are in the following chapter on oilseeds, fats, and oils.

Much of the information on cotton lint is given in terms of "running" bales. The term "running bale," when applied to weight, is the average weight of a bale as it comes from the gin; when applied to number, it is the number of bales actually ginned.

Tables on fiber flax, hemp fiber, and hempseed have been dropped, as these estimates have been discontinued.

Table 75.—Cotton: Acreage, yield, production, value, and foreign trade, United States, 1939–55

Year	Cotton								Cottonseed

¹ Census of Agriculture figures for all periods are in running bales. U.S. Department of Agriculture figures are in 500-pound gross-weight bales for all years.

² Gross weight price, including bagging and ties, except that American Egyptian cotton is included at net weight.

³ These central-market prices are for middling grades, $\frac{1}{2}$ -inch staple, through 1939; beginning August 1940, prices are for $\frac{15}{16}$ -inch staple.

⁴ Compiled from reports of the U.S. Department of Commerce. Equivalent bales of 500 pounds gross weight.

⁵ Excluding linters.

⁶ Includes an allowance for unredeemed loan cotton at season average price or average loan rate, whichever was higher.

⁷ Includes an allowance for all cotton put under loan at average loan rate.

⁸ Includes an allowance for unredeemed loan cotton at July 15, 1950, price.

⁹ Includes an allowance for unredeemed loan cotton at average loan rate.

¹⁰ Preliminary.

¹¹ Average price to May 1, 1956, including an allowance for unredeemed loans.

Agricultural Marketing Service. Italic figures are census returns. Production figures conform with census annual ginning enumerations. Data for 1866–1938 in Agricultural Statistics, 1952, table 84.

1955 ³	26,600	33,300	59,900	—	—	—

¹ Includes only raw cotton produced for factory consumption and does not include large quantities grown in India, China, and other countries for consumption on hand spindles or for use in other noncommercial ways.

² American in running bales; foreign in bales of approximately 500 pounds, gross weight.

³ Preliminary.

⁴ Excludes cotton destroyed.

Agricultural Marketing Service. Compiled from reports of the International Cotton Advisory Committee. Data for 1929–45 in Agricultural Statistics, 1952, table 88.

FOOTNOTES FOR TABLE 76

¹ Preliminary.

² Bales ginned, as reported by the Bureau of the Census with an allowance made for interstate movement of seed cotton for ginning, rounded to thousands, by States. Cotton produced but not ginned is not included in production.

³ Gross weight price, including bagging and ties, except that American-Egyptian cotton is included at net weight. Includes an allowance for unredeemed loan cotton.

⁴ Average price to May 1, 1956.

⁵ Sums of acreage and production for "other States" rounded to thousands for inclusion in United States totals. Estimates for these States, except Kansas where cotton production is insignificant, are shown separately.

⁶ Short-time average.

⁷ Included in State and United States totals.

Agricultural Marketing Service.

FOOTNOTE FOR TABLE 77

¹ These estimates represent total acreage and production in each country, including cotton consumed on hand spindles or in other ways without entering commercial channels. For this reason some of them should average somewhat larger than estimates of the "commercial crops." Years refer to crop years beginning August 1 in which major portion of crop was harvested.

² Preliminary.

³ Production in bales of 478 pounds net prior to 1946 and 480 pounds thereafter.

⁴ Includes estimates for minor producing countries not listed above and allowances for other figures not available.

⁵ Estimates for 1943 to date are not comparable with prewar years because of boundary changes.

⁶ Pakistan included with India.

⁷ South Korea only, after 1941.

⁸ Less than 500.

⁹ Exports.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics, reports of United States Agricultural Attachés and other United States representatives abroad, and results of office research.

¹ Crop year beginning August 1. Data for 1946 and 1947 do not include added charges made in some instances for drying and conditioning seed cotton. Data for 1948-55 include added charges for drying and conditioning seed cotton, the practice of assessing such added charges being confined chiefly to Arizona and California. Data for 1953-55 also include any added charges made for lint cleaning, such charges being assessed primarily in Arizona and California. Data for all years exclude added charges made for sterilizing cottonseed in connection with pink bollworm control measures.

² In addition to American Egyptian cotton, small quantities of other extra long staple cotton are produced and ginned on roller gins. The production is too small, however, to affect the United States average ginning rate.

Agricultural Marketing Service.

¹ Simple average of semi-annual and quarterly data. Quantities are annual per-family purchases of 42 cotton articles (from 1934–36 survey of families of wage earners and clerical workers).

² Computed from prices collected by the Bureau of Labor Statistics, weighted by average number of articles (clothing, furnishings, and yard goods) purchased annually (from 1934–36 survey) by families of wage earners and clerical workers. Estimates for 1943–55 based on indexes of retail prices of specified items of cotton clothing and housefurnishings, prepared by the Bureau of Labor Statistics.

³ Estimated prices received by farmers for cotton of grade and staple lengths used in the manufacture of the various articles, weighted by quantities of cotton required in their manufacture.

Agricultural Marketing Service. Data for 1927–38 in Agricultural Statistics, 1952, table 106.

¹ Preliminary.

² Does not include Government payments under the Sugar Act. The United States average for these payments excluding abandonment and deficiency payments amounted to \$2.31 per ton in 1954 and approximately \$2.35 per ton in 1955. (See table 108.)

³ Short-time average.

⁴ Relates to year of harvest. Beginning with 1952, includes some acreage harvested in the beginning of the following year.

⁵ United States totals rounded to hundreds for acreage and to thousands for production.

Agricultural Marketing Service.

Curly-top-resistant varieties	1,303	1,618	1,537	2,904	3,639	2,617	37,840	58,885	³ 50,231

¹ Seed production is almost exclusively from fall plantings overwintered in the field.

² Comprises, in addition to curly-top-resistant varieties, 2,761 bags of commercial seed of "US" varieties resistant to leaf spot and black root; and 63,956 bags of seed of improved non-curly-top-resistant varieties bred by beet sugar companies.

³ 88.7 percent of the production of curly-top-resistant varieties came from Elites bred by the Field Crops Research Branch, Agricultural Research Service.

Agricultural Research Service. Compiled from reports furnished by beet sugar companies and their subsidiaries engaged in sugar-beet seed production.

¹ Support payments were made under the price support programs of the U.S. Department of Agriculture and are reflected in the estimated average prices received by farmers. Program payments represent payments for sugar beets and sugarcane marketed before deducting local administrative expenses charged in the years 1939-44 and before making deductions imposed in 1940 for excess sugarcane acreage. Payments with respect to crop deficiency and acreage abandonment have not been included; see table 715 for these data. Program payments are based upon provisions of the Sugar Acts.

² Revised.

³ Includes price support payments.

⁴ Preliminary.

Agricultural Marketing Service. Data on support and program payments compiled from records of Sugar Division, Commodity Stabilization Service. Data for 1933-38 in Agricultural Statistics, 1952, tables 119 and 122.

¹ Louisiana and Florida.

² The growth of 9 months in Louisiana and 12 months in Florida. Sugar campaign usually ends by December or early January in Louisiana and in Florida by March following the season of growth.

³ Preliminary.

⁴ Prices do not include Government payments under the Sugar Act. Price support payments for 1943–45 are included; see table 108.

⁵ Raw value is the equivalent in terms of 96° sugar as defined in the Sugar Act of 1948.

⁶ Calculated on the basis that 100 pounds of raw sugar is required to produce 93.46 pounds of refined sugar.

⁷ Sirup production not included. See table 125.

Agricultural Marketing Service. Of the total sugar produced in Louisiana about 25 percent consists of direct consumption sugar, marketed "as made" without further refining. Data for 1909–38 in Agricultural Statistics, 1952, table 120.

Table 110.—Sugarcane for sugar and seed: Acreage, yield, production, season average price per ton received by farmers, and production of cane sugar and molasses, by States, average 1945-54, annual 1954 and 1955

¹ Preliminary.² The growth of 9 months in Louisiana and 12 months in Florida. Sugar campaign usually ends by December or early January in Louisiana and in Florida by March following the season of growth.³ Does not include Government payments under the Sugar Act. The United States average for these payments excluding abandonment and deficiency payments amounted to \$1.17 per ton in 1954 and approximately \$1.18 in 1955. See table 108.⁴ Raw value is the equivalent in terms of 96° sugar as defined in the Sugar Act of 1948.⁵ Calculated on the basis that 100 pounds of raw sugar is required to produce 93.46 pounds of refined sugar.⁶ Includes high test molasses made from frozen cane.⁷ Includes 2,820,000 gallons of edible molasses in 1954 and 3,193,000 gallons in 1955.⁸ Edible molasses not produced in Florida; therefore the Florida figures are for blackstrap.

Agricultural Marketing Service.

1955	219	106	92.9	9,868	1,140	231	52,844

¹ The growth of 18–24 months. Only a portion of the total acreage in cane is harvested each year. The harvest takes place throughout the year with a short recess at the end of the year.² Raw value is the equivalent in terms of 96° sugar, as defined in the Sugar Act of 1948.

Commodity Stabilization Service. Data for 1929–38 in Agricultural Statistics, 1952, table 126.

1955 ⁶	500	469	23.35	10,953	1,214	55	222		

¹ Harvesting begins in October, the length of the growing season being about 11 months. ² Production divided by acreage. ³ 1939-49, cane production is the quantity of cane ground for centrifugal sugar estimated on the basis of the reported sugar made per ton of cane. Beginning 1950, reported production. ⁴ 1939-49, reported. Beginning 1950, computed. ⁵ Not available. ⁶ Preliminary.

Foreign Agricultural Service. Data for 1921-38 in Agricultural Statistics, 1952, table 127.

¹ Raw value equivalent in terms of 96° sugar as defined by the Sugar Act of 1948.

² 1939 includes mainland cane sugar stocks, and beginning 1940 includes raw sugar for processing held by importers other than refiners.

³ Includes sugar used in the manufacture of other commodities. 1939-41 exports from U. S. Department of Commerce, Foreign Commerce and Navigation; 1942-54 quantities delivered for export as compiled by Sugar Division, Commodity Stabilization Service.

⁴ Data based on allocation audits and records kept by the armed forces.

⁵ Includes per capita consumption changes in invisible stocks (estimated) held by manufacturers, wholesalers, and retailers.

⁶ Includes exports for civilian feeding by the military abroad.

⁷ Includes 9,000 tons for livestock feed in United States in 1954 and 19,000 tons in 1955.

⁸ Preliminary.

Agricultural Marketing Service. Data for 1929-38 in Agricultural Statistics, 1952, table 129.

					Grand total.....	7,739	8,282	8,240	8,396

¹ Marketings under quotas. These comprise all sugar marketings except small amounts of ex-quota sugar for re-export and for livestock feed. Marketing quotas for 1948-52 established under the provisions of the Sugar Act of 1948; for 1953-55, under the provisions of the 1951 amendment to that Act. Quota charges compensated by quota credits upon exportation excluded; such quota charges amounted to less than 50,000 tons each year during the period 1948-55. Charges to liquid sugar marketing quotas of foreign countries also excluded; such charges amounted to about 37,000 tons, raw value equivalent, annually.

Commodity Stabilization Service.

FOOTNOTES FOR TABLE 117

¹ Years shown are for crop years; generally the harvesting season begins in the fall months of the year shown or in the early month of the following year except in certain cane-sugar-producing countries in the Southern Hemisphere, such as Australia, Argentina, Mauritius, Union of South Africa, etc., when the season begins in May or June of the year shown.² Centrifugal sugar as distinguished from non-centrifugal includes cane and beet sugar produced by centrifugal process, which is the principal kind moving in international trade.³ Preliminary.⁴ Includes a small amount of cane sugar.⁵ Includes sugar from Danish beets processed in Sweden.⁶ Includes both cane and beet sugar.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of Agricultural Attachés and other United States representatives abroad, results of office research, and other information. Estimates of countries having boundary changes have been adjusted to postwar boundaries.

Table 120.—Sugar, cane and beet, refined: Stocks, production or receipts, and deliveries, United States, 1946-56

¹ Stocks include sugar in bond and in customs custody and control.

² Sugar for direct consumption only. All sugars converted to refined basis. Mainland cane sugar mills stocks and production, 1946-52, are estimates of that part of total stocks and production which is later delivered for direct consumption. Estimation discontinued.

³ Excludes raw sugar delivered by refiners for direct consumption as follows: 1946, 3,939 tons; 1937, 9,025 tons; 1948, 2,343 tons; 1949, 2,212 tons; 1950, 2,636 tons; 1951, 1,864 tons; 1952, 2,833 tons; 1953, 2,831 tons; 1954, 1,137 tons; 1955, 2,547 tons.

⁴ Larger than actual deliveries by a small amount representing losses in reprocessing; includes 1,047 tons loss by fire in 1951.

⁵ Includes deliveries for export as follows: 1946, 376,850 tons; 1947, 217,060 tons; 1948, 72,243 tons; 1949, 40,880 tons; 1950, 56,477 tons; 1951, 76,751 tons; 1952, 26,993 tons; 1953, 30,038 tons; 1954, 27,094 tons; 1955, 33,788 tons.

Commodity Stabilization Service. Data for 1934-45 in Agricultural Statistics, 1952, table 130.

¹ Production of cane sirup, sorgo sirup, and edible molasses is of the fall of the preceding year.² 1939 from the Bureau of the Census; 1940–42 quantities are estimated. Data for 1943–55 from the Sugar Division, Commodity Stabilization Service.³ Data for 1939–55 represent molasses from which the liquid sugar has been subtracted.⁴ Preliminary.⁵ Assumed to be largely refiners' sirup.

INDUSTRIAL MOLASSES; HONEY

¹ Production harvested within the calendar year specified.² Preliminary.³ Not available.⁴ Less than a 5-year average.⁵ For Germany, 1945-55 data are for Western Germany only; for Korea, 1945-55 data are for South Korea only; data for Communist China include Manchuria but not Formosa.⁶ Less than 50 acres.⁷ Eastern Europe includes Albania, Bulgaria, Czechoslovakia, Hungary, East Germany, Poland, and Rumania.⁸ Recent methods of estimating acreage and production have been changed in an effort to improve data, therefore 1935-39 estimates are not comparable with later data.

Foreign Agricultural Service. Official estimates of foreign countries, reports of United States Foreign Service Officers, results of office research, and other information.

¹ Stocks as here shown have been converted to a farm-sales-weight basis—the equivalent of weight at the time of sale by growers—thereby making these figures of leaf-tobacco stocks comparable with figures of leaf-tobacco production.

² Stocks on the Island of Puerto Rico are included.

³ Stocks of Types 81 and 90 are not converted to a farm-sales-weight but are shown on the unstemmed weight basis. Stemmed stocks reported have been converted to an unstemmed equivalent. A factor for converting to farm-sales-weight has not been determined.

Agricultural Marketing Service.

Table 145.—Tobacco: Leaf used in the manufacture of cigars, cigarettes, chewing and smoking tobacco, and snuff, United States, 1946-55¹

Year	In cigars		In cigarettes		In chewing and smoking tobacco and snuff	Total
	Large, weighing more than 3 pounds per 1,000 ²	Small, weighing not more than 3 pounds per 1,000	Large, weighing more than 3 pounds per 1,000	Small, weighing not more than 3 pounds per 1,000 ³

1942	2.07	.377	1.69	.85	.84	18.2
1943	2.17	.415	1.75	.94	.81	19.1
1944	2.18	.425	1.76	.90	.86	19.5
1945	2.32	.431	1.89	.98	.91	18.6
1946	2.56	.458	2.10	1.04	1.06	17.9
1947	2.69	.457	2.23	1.11	1.12	17.0
1948	2.85	.486	2.36	1.15	1.21	17.1
1949	2.86	.461	2.40	1.17	1.23	16.1
1950	2.97	.512	2.46	1.18	1.28	17.2
1951	3.09	.504	2.59	1.27	1.32	16.3
1952	3.22	.495	2.72	1.31	1.41	15.4
1953	3.31	.518	2.79	1.32	1.47	15.6
1954	3.32	.509	2.81	1.32	1.49	15.3
1955 ⁵	3.38	.534	2.85	1.34	1.51	15.8

¹ Farm-retail price spreads in this series are calculated from average retail prices for the year beginning July and the average farm prices for the corresponding crop year. Weights used in computing average retail cost and excise taxes for the 4 products are based on July-June tax-paid withdrawals in each year.

² The composite retail cost of the 4 products—cigarettes, cigars, pipe smoking tobacco, and plug chewing tobacco—is a weighted average of the retail cost of the 4 products equivalent to 1 pound of leaf tobacco (farm-sales weight). Retail prices reported by the Bureau of Labor Statistics in September, December, March, and June are averaged for comparison with corresponding crop-year farm prices. Retail prices for 1953 and 1954 are based on indexes of retail prices of cigarettes and cigars, published by the BLS, and upon prices paid by farmers for pipe tobacco.

³ The farm price is a weighted average of prices of several types of leaf tobacco combined in proportion to their estimated utilization in the 4 products.

⁴ Federal Internal Revenue taxes are weighted by annual percentage weights, based on tax-paid withdrawals, and inflated to allow for estimated State revenue taxes; city taxes are not included.

⁵ Preliminary.

1954	23.0	15.9	3.36	10.5	4.5	4.6	9.1	14.6
1955 ⁴	23.3	15.9	3.55	10.6	4.4	4.8	9.2	15.2

¹ Simple average of prices reported by the Bureau of Labor Statistics for September, December, March, and June. Prices were collected in 34 cities 1926-46 and in 18 cities 1947-52. Beginning 1953 quarterly prices are based on indexes of retail prices published by the BLS.

² Bureau of Labor Statistics. Average of list prices of 3 manufacturers for popular brands of cigarettes delivered to wholesalers and jobbers—adjusted for cash and trade discounts.

³ Value of 0.065 pound of leaf tobacco (farm-sales weight), calculated from seasonal prices received by growers for 3 kinds of cigarette-type tobacco. Auction fees have not been deducted.

⁴ Preliminary.

Agricultural Marketing Service. Data for 1926-38 in Agricultural Statistics, 1952, table 160.

Table 150.—Cigarettes: Total output, domestic consumption, tax-free removals, and exports, United States, 1946-55

Year	Total output	Domestic consumption ¹	Tax-free removals ²		Year	Total output	Domestic consumption ¹	Tax-free removals ²	
			Total	Exports				Total	Exports

¹ Preliminary.² Data for 1935-39 all Germany, 1954 and 1955 West Germany only.³ Became a separate country August 14, 1947.⁴ Does not include 1,313 thousand pounds to Kwantung which is included in grand total.⁵ Includes all French possessions in Africa, n.e.i.⁶ Includes Virginia sun-cured tobacco.⁷ Includes all Portuguese possessions in Africa, n.e.i.⁸ Less than 500 pounds.⁹ Class breakdown not established until January 1949.¹⁰ Includes Kawntung.

Foreign Agricultural Service. Compiled from records of the Bureau of the Census.

FOOTNOTES FOR TABLE 152

¹ Preliminary. ² Effective July 1, 1954 Federation of Rhodesia and Nyasaland including Northern and Southern Rhodesia. ³ Includes Indonesian tobacco re-shipped from the Netherlands.

Foreign Agricultural Service. Compiled from records of the Bureau of the Census.

CHAPTER III

STATISTICS OF OILSEEDS, FATS, AND OILS

This chapter includes information on cottonseed, flaxseed, olive oil, peanuts, soybeans, tung nuts, margarine, and fats and oils. Most butter statistics are included in the chapter on dairy and poultry statistics. Lard data are mostly in the chapter on livestock.

Table 154.—Cottonseed: Cotton acreage, cottonseed yield, production, farm disposition season average price per ton received by farmers, and value, United States, 1939–55

Year	Harvested acreage of cotton	Cottonseed					
		Yield of seed per harvested acre	Production	Used on farms ¹	Total sales to oil mills	Price	Farm value
1939	1,000 acres	Pounds	1,000 tons	1,000 tons	1,000 tons	Dollars	1,000 dollars

¹ Quality information not available for cottonseed produced in Arizona and California, prior to 1952.² These 5 basic factors are combined to form indices of quantity and quality which in turn are used to determine the official grade of cottonseed in accordance with the United States Official Standards for Grades.³ The quantity index measures the oil and cake or meal in the cottonseed, taking into account variations in the quantity of oil and protein.⁴ The quality index measures the deterioration in oil and meal and takes into account the excesses of moisture and foreign matter.⁵ The average grade is the product of the quantity index times the quality index. The base grade is 100.0.⁶ Samples graded by licensed chemists under the supervision of the U.S. Department of Agriculture.

Agricultural Marketing Service.

¹ Prices are averages of daily prices weighted by carlot sales, compiled from Minneapolis Daily Market Record.² Compiled from reports of the U.S. Department of Commerce. Linseed oil converted to flaxseed equivalent on the basis of 1 bushel (56 lb.) of flaxseed to 2½ gallons of oil, and a gallon of oil weighs approximately 7½ pounds.³ Imports for consumption minus domestic exports, with net exports shown by a minus sign.⁴ Includes an allowance for unredeemed loan and purchase agreement deliveries at the average rate.⁵ Less than 500 bushels.⁶ Preliminary.⁷ Since refined oil is not separately reported, Jan.–June 1956, this total does not include "refined" for that period. Agricultural Marketing Service. Italic figures are census returns. Data for 1909–38 in Agricultural Statistics, 1952, table 170.

1956 ⁵	4,121										

¹ Included in total used for seed. ² From domestic and imported seed. ³ Total supply minus exports and stocks July 1 following year. ⁴ Less than 500 bushels. ⁵ Preliminary.

Agricultural Marketing Service. Farm disposition relates to the crop specified and not disposition within the marketing year. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes.

FOOTNOTES FOR TABLE 162

¹ Harvests of the Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere countries in 1955 is combined with the Southern Hemisphere harvest which begins late in 1955 and ends early in 1956. Estimates do not include China where annual production probably varies from 1 to 2 million bushels.

² Preliminary.³ Acreage includes area for fiber.⁴ Less than 5 years.⁵ Flax and hemp.⁶ Acreage for seed only.⁷ Includes estimates for the above countries for which data are not available and for minor producing countries.⁸ Sown area.⁹ Officially reported figures plus Indian official estimates for unreported tracts for 1935–39 only. Estimates for unreported tracts for 1945–55 not available.¹⁰ Prior to 1945 figures for India include Pakistan.¹¹ Acreage planted.¹² 1935 only.¹³ Flax grown for seed only.¹⁴ Less than 500 acres and 500 bushels.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of Agricultural Attachés and other U. S. representatives abroad, results of office research, or other information. Prewar estimates for countries having changed boundaries have been adjusted to conform to present boundaries.

¹ Less than 500 tons.² Some linseed oil was imported by the Government for reshipment under Lend-Lease. As no duty was required, this was included by Census with the imports for consumption, but when the oil was shipped out, it was included in re-exports. This amount was added to exports as reported by Census.³ Less than 600,000 pounds.⁴ Preliminary.

Agricultural Marketing Service. Production of linseed cake and meal computed by the U.S. Department of Agriculture through 1948. All other data from Bureau of the Census. Data for 1929–45 in Agricultural Statistics, 1952, table 176.

¹ Peanuts in the shell. Southern Hemisphere peanut crops, which are harvested from April to June, are combined with those of the Northern Hemisphere harvested from September through December of the same year.

² Harvested areas as far as possible. ³ Preliminary. ⁴ Less than 5 years. ⁵ Includes estimates for the above countries for which data are not available and for minor producing countries. ⁶ One year only. ⁷ Java and Madura only. ⁸ Exports. ⁹ Commercial crop. ¹⁰ 1948-50. ¹¹ 1948-50. ¹² Production on European farms only.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of Agricultural Attachés and other United States representatives abroad, results of office research, and other information.

Table 171.—Peanuts: Production, seed used, and farm disposition, United States, 1946–55

¹ Crop year begins about Nov. 1 in the Virginia-North Carolina area; in September in the Southeastern States, and in August in the Southwestern States. Prices are for prompt shipment.

² The Office of Price Administration on Feb. 27, 1943, established per-pound ceiling prices as follows: Virginia-North Carolina cleaned Virginias jumbo and fancy, 15 1/4 cents; shelled Virginias extra large and medium, 16 1/4 cents; No. 1's, 14 1/8 cents; Southeastern shelled No. 1 Spanish, 14 1/4 cents; Runners, 14 cents; Southwestern shelled Spanish No. 1's, 14 1/4 cents. Price ceilings were suspended July 1-26, 1946, and lifted entirely on Sept. 1, 1946.

³ Under peanut program all No. 2's from 1945 crop were crushed. CCC offered to purchase unworked No. 2's at following prices per pound: Spanish, east of Mississippi River, 12.4 cents; west of Mississippi River, 12.65 cents; Runners, 12.15 cents; Virginias, 12.9 cents; or to pay subsidy for No. 2's sold to crushers as follows, per pound: Spanish, east of Mississippi River, 6.75 cents; west of Mississippi River, 7.04 cents; Runners, 6.5 cents; and Virginias, 7.5 cents.

⁴ Under provisions of Price Support Program most shelled No. 2 peanuts were purchased by CCC at the following prices per pound: In 1947, Virginias, 15 1/4 cents; Runners, 14 1/4 cents; Spanish, 14 1/4 cents; in 1948, Virginias, 16 1/4 cents; Runners, 15 1/4 cents; Spanish, 15 1/4 cents; in 1949, Virginias, 16 1/4 cents; Runners, 15 1/4 cents; Spanish, 15 1/4 cents; in 1950, Virginias, 15 1/2 cents; Runners, 15 1/2 cents; Spanish, 15 1/4 cents.

Agricultural Marketing Service.

1950 ²	13.0	10.0	11.1	10.5	1955 ⁴	14.2	10.6	11.6	11.4

¹ Crop year begins about Nov. 1 in the Virginia-North Carolina section; in September in the Southeastern States, and August in the Southwestern States.

² Prices are for "quota" stock only. A portion of crop (approximately 6.5 percent of estimated production) moved as "excess" peanuts to Commodity Credit Corporation for crushing into oil and meal at an overall average price of 7.28 cents per pound for all types in all areas. Virginia-North Carolina Virginia type peanuts were declared in short supply, and the excess of this type were sold by CCC for edible purposes at 105 percent of the applicable support price for edible peanuts plus reasonable carrying charges. Proceeds, after all costs to CCC, were prorated proportionately among all producers of Virginia type peanuts delivering these excess peanuts to CCC at oil prices.

³ Prices are for "quota" stock only. A portion of crop (approximately 10.6 percent of estimated production) moved as "excess" peanuts to CCC for crushing into oil and meal at an overall average price of 5.96 cents per pound for all types in all areas.

⁴ Prices for 1953, 1954, and 1955 crops are for "Base Grade" quality as described in USDA price support announcements. Principal quality factors are as follows: Virginia type, 65 percent sound mature kernels with 15 percent extra large kernels; Spanish type 70 percent sound mature kernels; and Runner type 65 percent sound mature kernels.

¹ Years shown refer to years of harvest. Southern Hemisphere crops which are harvested in the early part of the year are combined with those of the Northern Hemisphere harvested the latter part of the same year.

² Harvested areas as far as possible.

³ Preliminary.

⁴ Less than 5 years.

⁵ Acreage harvested for beans.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of Agricultural Attachés and other United States representatives abroad, results of office research, or other information. Prewar estimates for countries having changed boundaries have been adjusted to conform to present boundaries, except as noted.

Mississippi	34,439	21,500	(⁴)	80.10	58.00	—
Louisiana ⁵	14,645	4,900	(⁴)	76.00	58.00	—
United States	68,279	51,050	6,200	79.65	59.40	64.00

¹ Production of unhusked air-dried nuts.

² Preliminary.

³ Prices for Georgia and Alabama have been combined to avoid the possibility of disclosing individual mill operations.

⁴ Less than 5 tons.

⁵ Includes small quantities of tung nuts produced in Texas.

Agricultural Marketing Service. The Census of Agriculture reported 351,000 tung trees in Southern States in 1930, 12,671,000 tung trees in 1940, and 9,583,000 tung trees in 1945. In addition to the States listed above, the census shows a small production also in Texas and South Carolina. The yield of oil from unhusked tung nuts varies from year to year but is usually estimated at around 16 percent of the weight of the nuts. Production and supply of tung oil appear in table 190.

Table 192.—Margarine, actual weight: Supply and disposition, United States, 1939–55

¹ Preliminary.² Includes edible hydrogenated cottonseed oil, first reported as separate item in 1949.³ Includes edible hydrogenated soybean oil, first reported as separate item in 1949.⁴ Byproduct of winterizing cottonseed, soybean, corn, and peanut oils.⁵ Includes peanut, corn, crude and refined oils not reported separately; and beginning 1949, some edible hydrogenated oil not specified as to kind and deodorized and winterized oils not reported separately by kind. Part of these oils may be foreign. Also includes fish oils in the following amounts: 1946, 1 million pounds; 1947-49, 0; 1950, 8 million pounds; 1951, 2 million pounds; 1952-55, 0.⁶ Mostly coconut oil.

Agricultural Marketing Service. Compiled from reports of the Bureau of the Census. Totals computed from unrounded numbers.

¹ Includes butter (fat content), lard, beef fats, cottonseed, peanut, soybean, corn and olive oils, and minor oils such as sesame. Stocks and exports also include some other items such as margarine.² Production and exports also include oil equivalent of exported soybeans, cottonseed, and peanuts for crushing abroad.³ Chiefly coconut, babassu, palm kernel, and palm oils.⁴ Includes shipments to United States Territories.⁵ In some years disappearance cannot be computed from data contained in this table, as adjustments have been made because additional items have been incorporated in stock data.⁶ Preliminary.

Agricultural Marketing Service. Compiled from reports of the Bureau of the Census and U. S. Department of Agriculture. Totals and per capita estimates computed from unrounded numbers. Data for 1921-45 in Agricultural Statistics, 1954, table 197.

¹ Includes oil equivalent of cottonseed, soybeans, peanuts, and flaxseed exported for crushing abroad.² Includes commercial exports, voluntary or civilian relief, re-exports, shipments to United States Territories. In 1942 and 1943, includes shipments by U.S. Department of Agriculture.³ Excludes an estimate of oil equivalent of soap used in synthetic rubber. This use is included in "Other industrial."⁴ Includes estimated stocks of dehydrated castor oil not previously reported.⁵ Excludes previously reported stocks of wool grease held by other than scourers.⁶ Includes quantities of coconut, palm, castor, and sperm oils held by the Government for stockpiling of strategic materials. Excluded from stocks Jan. 1.⁷ Preliminary.

Agricultural Marketing Service. Computed from reports of the Bureau of the Census, Fish and Wildlife Service, and U.S. Department of Agriculture. Totals computed from unrounded numbers.

¹ Mainly salad and cooking oils. Includes all oils and fats (other than butter, lard, margarine, or shortening) used in mayonnaise and salad dressing, bakery goods, confectionery, commercial roasting and frying, etc.

² Including only the fat content of butter, estimated at 80.5 percent of total weight, and of margarine for which the fat content varies slightly each year.

³ Preliminary.

⁴ Fat equivalent of soap used in synthetic rubber, is included with "Other industrial products." Prior to 1949, most of the fats and oils used in synthetic detergents is believed to have been reported as used in soap. Beginning in 1949, this use of fats and oils is entirely included in "Other industrial products."

⁵ Paints, varnishes, floor coverings, oilcloth, printing inks, core oils, synthetic resins, insulation, linings, packings, coated fabrics (other than oilcloth), caulking, and other protective coatings.

Agricultural Marketing Service. Computed from reports of the Bureau of the Census, Fish and Wildlife Service, and U. S. Department of Agriculture. Totals and per capita estimates computed from unrounded numbers.

CHAPTER IV

STATISTICS OF FRUITS, VEGETABLES, MELONS, TREE NUTS, AND BEVERAGE CROPS

These crops are arranged in two major groups within the chapter: (1) Fruits and berries; and (2) vegetables, melons, tree nuts, and beverage crops (tea, cacao beans, and coffee). Also, toward the end of the second group are included summary tables on unloads and cold-storage holdings of both fruits and vegetables.

Fruits and Berries

Estimates of fruit production, in general, relate to the harvested crop although in some years quantities not harvested because of low prices or other economic factors are included. Losses from natural causes, such as windstorms, freezes, etc., are not included in production. Production relates to the total crop produced on all farms, except for apples and strawberries. In accordance with Congressional enactment, the Department's estimates of apple production since 1938 have related only to the crop in commercial areas. The estimates for strawberries cover production on acreage grown primarily for sale.

The annual estimates are checked and adjusted at the end of each marketing season on the basis of shipment and processing records from transportation agencies, processors, cooperative marketing associations, and other industry organizations. The estimates are reviewed (and revised if necessary) at 5-year intervals, when census data become available. The Department's available statistics are limited to the major tree fruits and nuts and to grapes, cranberries, and strawberries, and exclude some States where census data indicate production is of only minor importance.

The fruit tables by States show prices for 1953, 1954, and 1955; 1953 has been substituted for the usual 10-year average, which was not available on the revised basis in time for inclusion here.

A table on production, disposition, and utilization of nectarines is included for the first time.

The table on world production of grapes is omitted, as recent information is insufficient for estimating.

¹ For some crops in certain years, production includes some quantities unharvested on account of economic conditions and/or excess cullage of harvested fruit. Apples, peaches, pears, citrus fruit, cranberries, and strawberries, which are estimated in units other than tons, are converted to equivalent tons in this table.

² Estimates of the commercial crop refer to the total production of apples in the commercial apple areas of each State.

³ Preliminary.

¹ Estimates of the commercial crop refer to the total production of apples in the commercial apple areas of each State.

² Differences between "Total production" and "Production having value" consists of fruit not harvested on account of economic conditions and/or excess cullage of harvested fruit.

³ Compiled from reports of the U.S. Department of Commerce.

⁴ Dried and canned are converted to terms of fresh apples on following basis: 1 pound of dried is equivalent to about 7 pounds fresh through 1942 (beginning 1943, 1 pound dried is equivalent to 8 pounds fresh); 1 pound of canned is equivalent to about 2 pounds fresh; 48 pounds fresh equal 1 bushel. No re-exports reported.

⁵ Excludes apple waste.

⁶ Includes apple waste.

⁷ Domestic exports minus imports for consumption with net imports shown by a minus sign.

⁸ Census returns of total harvested production of all areas in the United States.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, and other information, on the basis of postwar boundaries. Estimates in original units of approximately 1 bushel in the following countries: Australia, Canada, United States, New Zealand, and South Africa. In other countries original estimates, mostly in metric tons, converted to bushels of 48 pounds, except Argentina and Chile in 44-pound boxes. Harvest in the Southern Hemisphere countries is for the spring of the following year.

¹ Production, price, and value for California, Washington, and Utah. The 1950 census reported these 3 States as having 95.5 percent of the 1949 production.

² Differences between "Total production" and "Production having value" consist of fruit not harvested on account of economic conditions.

³ Net processed weight.

⁴ Dried apricots are 12½ percent of total dried fruit for salad.

⁵ Exports of dried fruit converted to unprocessed dry weight by dividing by 1.07. Unprocessed dry weight converted to terms of fresh fruit on the basis of 5.5 tons fresh to 1 ton dried. Canned converted to fresh at ratio of 55 cases (45 pounds each) packed from 1 ton of fresh fruit through 1938; beginning 1939 at ratio of 60 cases to 1 ton.

⁶ Less than $\frac{1}{2}$ ton.

⁷ Preliminary.

Agricultural Marketing Service. Exports compiled from records of U.S. Department of Commerce. Data for 1909–38 in Agricultural Statistics, 1952, table 229.

Table 218.—Apricots: Production, by States, average 1945–54, annual 1954 and 1955; season average price per ton received by farmers, 1953–55

¹ Season begins with the bloom of the year shown and ends with the completion of harvest the following year. In California, picking usually extends from about Oct. 1 to Dec. 31 of the following year. (15 months). In other States the season begins about Oct. 1 and ends in early summer, except for Florida limes, harvest of which usually starts about Apr. 1.

² Fruit ripened on the trees but destroyed by freezing or storms prior to picking is not included. For weight of boxes see page VII.

³ Differences between "Total production" and "Production having value" consist of fruit unharvested, donated to charity, and/or not utilized on account of economic conditions.

⁴ Equivalent returns per box at the intake packing-house-door for all methods of sale. When sale represents fruit sold at point other than intake packing-house-door, prices of fruit as sold are converted by additions or subtractions of necessary charges to or from prices of fruit as actually sold. Prices are State averages weighted by production rather than by sales to obtain United States average.

⁵ Includes quantities used for juice, concentrates, grapefruit segments, and other citrus products. In some seasons, includes appreciable quantities of oranges and lemons in California delivered to processing plants which were not utilized, but for which growers received payment.

⁶ Year beginning November for oranges and lemons; year beginning September for grapefruit; year beginning July for limes.

⁷ Imports converted to boxes on the following basis: Oranges, 90 pounds per box; grapefruit, 80 pounds per box; lemons, 76 pounds per box; limes, 80 pounds per box.

⁸ Less than 500 boxes.

⁹ Exports reported in pounds beginning Jan. 1 1949. Converted to boxes on the following basis: Oranges, 84 pounds per box; grapefruit, 78 pounds per box; lemons, 79 pounds per box.

¹⁰ Production estimated from prospects on July 1, 1956.

Agricultural Marketing Service. Trade data from official records of the U.S. Department of Commerce. Data for 1919-45 in Agricultural Statistics, 1962, table 242.

¹ Season begins with the bloom of the year shown and ends with the completion of harvest the following year (15 months). In California picking usually extends from about Oct. 1 to Dec. 31 of the following year. In other States the season begins about Oct. 1 and ends in early summer, except for Florida limes, harvest of which usually starts about Apr. 1. Fruit ripened on the trees but destroyed by freezing or storms prior to picking is not included. For some States in certain years, production includes some quantities donated to charity, unharvested, and/or not utilized on account of economic conditions. In 1954, estimates of such quantities were as follows (1,000 boxes): California Navel and miscellaneous oranges, 343; Valencia, 250; Florida tangerines, 200; California, Desert Valleys, grapefruit, 6. ² As estimated from prospects on July 1, 1956.

³ Equivalent returns per box at the intake packing-house-door for all methods of sale. When sale represents fruit sold at point of other than intake packing-house-door, prices of fruit as sold are converted by additions or subtractions of necessary charges to or from prices of fruit as actually sold.

⁴ Includes small quantities of tangerines.

⁵ Net content of box varies. In California and Arizona the approximate average for oranges is 77 pounds and grapefruit 65 pounds in the Desert Valleys; 68 pounds for California grapefruit in other areas; in Florida and other States, oranges, including tangerines, 90 pounds and grapefruit 80 pounds; California lemons, 79 pounds; Florida limes, 80 pounds. ⁶ In California and Arizona, Navel and miscellaneous.

Agricultural Marketing Service.

¹ Production estimates relate to the crop from bloom of year shown. Harvesting in Northern Hemisphere countries begins about November, and in Southern Hemisphere countries about May of the following year. Production in foreign countries converted to boxes of the following weights: Oranges 70 pounds; grapefruit and limes 80 pounds; lemons 76 pounds.

² Preliminary.

³ Does not include 19,800,000 boxes of fruit frozen on trees in February 1956. Of this quantity, 6,300,000 boxes were salvaged in domestic consumption and 13,500,000 boxes were either left on trees or salvaged for livestock feed.

⁴ Includes Syria.

⁵ Produced in Palestine.

⁶ Included in Lebanon.

⁷ Not available.

⁸ Includes small quantities in other countries not separately reported.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, and other information.

¹ Concentrated juices can be converted to approximate single-strength equivalent by multiplying orange and grapefruit concentrate by 7, lemon concentrate by 6, and frozen orange concentrate by 4.

In 1947 an additional 1,440,177 gallons were packed in Florida as a result of a U.S. Department of Agriculture purchase program. It was used for Army relief-feeding in occupied Germany.

² 1,585 gallons produced in Florida, balance in California-Arizona.³ 1,303 gallons produced in Florida, balance in California-Arizona.

Agricultural Marketing Service. Based on data obtained from various canners' associations and individual canners.

¹ Exports of juice may include small quantities of concentrated juice in recent years. In the 1947 pack year approximately 425,000 cases of concentrate were thus shipped for Army relief-feeding in occupied Germany.

² Equivalent cases of 24 No. 2 cans. Domestic export of segments converted to cases at 30 pounds per case; juice at 3.4 gallons per case.

Agricultural Marketing Service. Based on data obtained from various canners' associations and individual canners. Exports from reports of the U.S. Department of Commerce. Data for 1929-38 in Agricultural Statistics, 1952, table 247.

¹ Includes the following quantities unharvested on account of economic conditions (1,000 tons): Other States, 1940–2; 1950–3; 1951–2.

² Equivalent returns per ton for bulk fruit at the first delivery point.

³ The production estimate for California includes 12,000 tons (fresh weight) of raisin varieties lost on the drying trays because of rain damage.

⁴ Preliminary.

⁵ Converted on the basis of country data, using the following weights per cubic foot: Argentina and Chile, 36 pounds; Belgium and Netherlands, 10 pounds; Canada, Italy, and Mexico, 40 pounds; Spain, 24 pounds; Union of South Africa, 16 pounds; and all other, 20 pounds.

⁶ Domestic exports minus imports for consumption.

⁷ Included in total production of grapes, fresh basis; 1 ton of raisins equivalent to about 4 tons of fresh grapes.

⁸ Exports and imports of raisins converted to sweatbox, or production, basis at the ratio of 1 to 1.08.

⁹ January–June 1941; first date reported. 1 pound canned equals 0.741 pound fresh.

¹⁰ Includes currants beginning January 1943.

¹¹ Less than $\frac{1}{2}$ ton.

Agricultural Marketing Service. Foreign trade data compiled from reports of the U.S. Department of Commerce. Data for 1919–38 in Agricultural Statistics, 1952, table 255.

¹ Production, price, value, and utilization for California only. According to the 1950 census there is also some commercial production of olives in Arizona but 99.6 percent of the 1949 production was in California.

² Includes the olives used for California Spanish Green, Greek style, Sicilian style, chopped, minced, and brine.

³ Less than 500 pounds. ⁴ Preliminary.

Agricultural Marketing Service. Imports compiled from reports of U.S. Department of Commerce. About 40 gallons of oil are obtained from 1 ton of olives in California. A gallon of olive oil weighs approximately 7.5 pounds. Data for 1919–38 in Agricultural Statistics, 1952, table 261.

¹ Differences between "Total production" and "Production having value" consists of fruit not harvested on account of economic conditions and/or excess cullage of harvested fruit. ² Compiled from reports of the U. S. Department of Commerce. ³ Net processed weight. ⁴ Canned peaches are 40 percent of total canned fruit for salad. ⁵ Exports of dried fruit converted to unprocessed dry weight by dividing by 1.07. Unprocessed dry weight converted to terms of fresh fruit on the basis that 1 pound dried equals 6.5 pounds fresh. Canned peaches converted to terms of fresh on basis that 1 pound canned equals about 1 pound fresh. 48 pounds of fresh equal 1 bushel. ⁷ Less than 500 pounds.

⁸ Preliminary.

Agricultural Marketing Service. Italic figures are census returns of harvested production. Data for 1909–38 in Agricultural Statistics, 1952, table 262.

¹ For some States in certain years, production includes some quantities unharvested on account of economic conditions. In 1954 and 1955 estimates of such quantities were as follows (1,000 bushels): 1954—Illinois, 80; 1955—Virginia, 14; Idaho, 40; Colorado, 75; California, 1,000.

² Preliminary.

³ Includes excess cullage of harvested fruit (1,000 bushels): 1954—Colorado, 100; Utah, 117; California Clingstone, 833; 1955—Virginia, 30; Colorado, 85.

⁴ Less than 500 bushels.

⁵ Mainly for canning.

Agricultural Marketing Service.

Agricultural Marketing Service.

FOOTNOTES FOR 257

¹ Differences between "Total production" and "Production having value" consist of fruit not harvested on account of economic conditions and/or excess cullage of harvested fruit.² Compiled from reports of the U. S. Department of Commerce.³ Net processed weight.⁴ Dried pears are 10 $\frac{1}{4}$ percent of total dried fruit for salad.⁵ Canned pears are 35 percent of total canned fruit for salad.⁶ Canned pears converted to terms of fresh on the basis that 1 pound canned equals about 1.2 pounds fresh; dried pears converted to terms of fresh on the basis that 1 pound dried equals about 5.5 pounds fresh; 50 pounds fresh equals 1 bushel, except in California, where 48 pounds equals 1 bushel.⁷ Less than 50 pounds.⁸ Preliminary.

Agricultural Marketing Service. Italic figures are census returns of harvested production. Data for 1919–38 in Agricultural Statistics, 1952, table 267.

¹ For some States in certain years, production includes some quantities unharvested on account of economic conditions.

² Preliminary.

³ Less than 500 bushels.

⁴ Includes 60,000 bushels excess cullage of harvested fruit.

⁵ Equivalent returns per bushel for bulk fruit at the first delivery point.

Agricultural Marketing Service.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, and other information. Estimates in original units of approximately 1 bushel in the following countries: Australia, Canada, United States, New Zealand, and South Africa. In other countries original estimates, mostly in metric tons, converted to bushels of 50 pounds, except Argentina and Chile in 44-pound boxes. Harvest in the Southern Hemisphere countries is for the spring of the following year.

4 States	542,770	517,800	426,800	86.20	87.50	101.00

¹ For some States in certain years, production includes some quantities unharvested on account of economic conditions. In 1954 and 1955 estimates of such quantities were as follows (tons): 1954—Prunes, California, 11,250; 1955—Prunes, Idaho, 1,800; Eastern Washington, 1,100; Western Washington, 200; Eastern Oregon, 700.² Preliminary.³ Includes excess cullage of harvested fruit (tons): 1954—Plums, California, 4,000; 1955—Plums, California, 2,000.⁴ The California prune crop (fresh basis) is derived by multiplying the estimate of dried prunes by 2½.

Agricultural Marketing Service.

¹ Production, price, and value for Idaho, Washington, Oregon, and California.² Differences between "Total production" and "Production having value" consist of fruit not harvested on account of economic conditions and/or excess cullage of harvested fruit.³ Net processed weight.⁴ Dried prunes in salad estimated at 43 percent of total dried fruit for salad.⁵ Foreign trade in dried prunes converted to unprocessed dry weight by dividing by 1,025. Unprocessed dry weight converted to terms of fresh fruit on the basis that 1 pound dried equals 2½ pounds fresh. Canned prunes converted to terms of fresh fruit on

the basis that 1 pound canned equals 0.729 pound fresh. Otherwise prepared or preserved converted to terms of fresh fruit on the basis of 1 pound equals 0.899 pound fresh.

⁶ Less than ½ ton.⁷ Preliminary.

Agricultural Marketing Service. Foreign trade data compiled from records of U.S. Department of Commerce. Data for 1919-38 in Agricultural Statistics, 1952, table 279.

¹ Mostly for fresh market but includes some quantities used for processing in States for which processing estimates are not prepared.

² Includes some quantities not marketed and excluded in computing value: 110,000 crates in 1940, 213,000 in 1941, 731,000 in 1942, 20,000 in 1943, 9,000 in 1944, 10,000 in 1945, 50,000 in 1947, 40,000 in 1948, 30,000 in 1949, 80,000 in 1951, and 118,000 in 1954.

³ Equivalent 24-quart crates (fresh market approximately 36 pounds with stems; processing approximately 34 pounds without stems).

⁴ Preliminary.

Agricultural Marketing Service. Data for 1918–38 in Agricultural Statistics, 1952, table 282.

FOOTNOTES FOR TABLE 275

¹ Preliminary. ² Equivalent 24-quart crates (fresh market approximately 36 pounds with stems; processing approximately 34 pounds without stems). ³ Mostly for fresh market but includes some quantities used for processing in States for which processing estimates are not prepared.

¹ Figures for all commodities are on a calendar-year basis, except apples and pears which begin in June of year indicated and end the following spring. Shipments by truck are not included but have become increasingly important during this period. The data are not indicative of total production or total sales.

² Includes Satsumas and tangerines.

Agricultural Marketing Service. Compiled from daily and monthly reports received from officials and local agents of common carriers throughout the country. Shipments shown in carlots include boat shipments reduced to a carlot basis. Data for 1929–45 in Agricultural Statistics, 1952, table 284.

¹ Includes the commercial pack only and does not include quantities of fruit frozen by industrial users or other types of processors who use all or the largest portion of their frozen pack as raw material for the manufacture of jams, jellies, and other fruit spreads, ice cream, bakery goods, or alcoholic beverages. Also does not include custom freezing for industrial users nor quantities produced in frozen-food locker plants.

² Connecticut, Maine, Massachusetts, New Jersey, New York, Pennsylvania, and Rhode Island.

³ Alabama, Arkansas, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, Missouri, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia.

⁴ Illinois, Indiana, Michigan, Minnesota, Nebraska, Ohio, and Wisconsin.

⁵ Arizona, California, Colorado, Idaho, Montana, Oregon, Utah, and Washington.

⁶ Includes some packed in the South.

⁷ Data by regions not available for publication.

⁸ Includes some packed in the Midwest.

⁹ Includes some packed in the Northeast.

¹⁰Includes bananas, cantaloups, coconuts, cranberries, elderberries, melon balls, mixed fruits, nectarines, pears, pineapple, plums, and youngberries.

¹¹ See table 235 for packs of concentrated grapefruit and orange juice in gallons, pack-year basis.

Agricultural Marketing Service. Data on all fruits except citrus juices from National Association of Frozen Food Packers; data on citrus from Florida Canners' Association, Lemon Products Advisory Board, and survey by the U. S. Department of Agriculture.

¹ Fresh deciduous fruits, canned juices, and frozen fruits are on calendar year basis, as are fresh citrus fruits for 1939 and 1940 and canned fruits beginning in 1943. Beginning 1941 fresh citrus fruits are on a crop year basis, beginning in November of the preceding year. Canned fruits are on pack year basis for years 1939–42 and on a calendar year basis since. Dried fruits are on a pack year. The per capita civilian consumption was obtained by dividing the total apparent civilian consumption by total population adjusted for underenumeration of children under 5 years of age, and for members of the armed forces not eating out of civilian food supplies.

² Excludes noncommercial apples.

³ Apricots, avocados, bananas, cherries (including an estimate for noncommercial), cranberries, figs, grapes, peaches, pears, pineapples, plums and prunes (including an estimate for noncommercial), and strawberries (including an estimate for noncommercial).

⁴ Apples, applesauce, apricots, berries, cherries (including brined), cranberries, figs, fruit cocktail and salad, citrus segments, olives (including brined), pineapple, plums, prunes, peaches, and pears.

⁵ Grapefruit, orange, blended citrus, lemon, pineapple, apple, berry, grape, and prune juices, and fruit nectars. Includes canned concentrated citrus juices converted to a single-strength basis, but excludes all frozen juices.

⁶ Dried apples, apricots, Zante currants, dates, figs, peaches, pears, prunes, and raisins except for unmarketable figs and substandard prunes. Data are in terms of processed dried weight.

⁷ Principally cherries, apples, peaches, apricots, strawberries, other berries, and citrus juices.

Agricultural Marketing Service. Data for 1909–38 in Agricultural Statistics, 1953, table 289.

Vegetables and Melons

This section contains statistics on potatoes, sweetpotatoes, vegetables for commercial processing, and commercial vegetables for fresh market (including melons). Except for potatoes and sweetpotatoes, acreage and production data in this section are not revised on the basis of the 1954 census as these revisions were not available in time for inclusion.

Acreage, production, value, and disposition estimates for potatoes and sweetpotatoes pertain to the total crop and include quantities produced both for sale and for use as food, feed, and seed on farms where grown. Potato production and utilization statistics by States are presented on a new seasonal grouping based on the time of harvest. These groupings are winter, early spring, late spring, early summer, late summer, and fall. Some States have production falling in more than 1 group. The former series on early commercial potatoes has been dropped. The hundredweight unit has also replaced the former bushel basis for both potatoes and sweetpotatoes.

Estimates of acreage, production, and value for each of the 11 important vegetables for commercial processing relate to production used by commercial canners, freezers, and other processors, (except dehydrators). These estimates include raw products grown by processors themselves and those grown under contract or purchased on the open market. This production and the actual or equivalent acreage harvested are not duplicated in the fresh market estimates for the same commodities. The production of those vegetables used for processing for which regular processing estimates are not made, is included in the fresh market estimates.

The Department's regular monthly and annual program of estimates of commercial vegetables for fresh market includes 28 principal vegetable and melon crops in the major producing States. These estimates relate to crops which are grown primarily for sale and they do not include vegetables and melons produced in farm and nonfarm gardens. While the bulk of the production of the 28 principal vegetable and melon crops is for consumption in the fresh state, data for some commodities include quantities used by processors. Such crops as broccoli, Brussels sprouts, cabbage (for dehydration), carrots, cauliflower, celery, garlic, and onions, for which separate estimates for commercial processing are not prepared, are in this category. The commercial estimates of the 28 principal crops for the years 1939 to date include local market production from areas near consuming centers as well as production from well-recognized commercial areas which specialize in producing supplies for shipment to distant markets. Estimates of commercial vegetables for fresh market prepared for years prior to 1939 are not strictly comparable with the series for 1939 and later years since the earlier series pertain largely to important commercial shipping areas and for the most part do not include local market production from areas near consuming centers. The estimates for the years prior to 1939 will be found in Agricultural Statistics, 1952.

Annual estimates of national commercial production of all vegetables are presented in table 284. For fresh market vegetables they include production for sale of (1) the 28 principal crops in the major producing States for which regular seasonal estimates are prepared, (2) the principal 28 crops in unimportant producing States (3) greenhouse vegetables in all States, and (4) minor vegetables in all States. These figures show that the regular program of releases of commercial fresh market vegetable estimates for principal crops in major producing States account for about 81 percent of the national commercial output of all fresh vegetables and melons. Production of these 28 principal crops in the less important producing States not included in the regular statistical program, together with greenhouse vegetable production in all States, account for about 6 percent of the national total. The minor vegetables for which separate estimates are not prepared make up the balance of 13 percent. The total national commercial production of each of the 28 principal vegetable and melon crops and aggregate production of minor vegetables has been published by the Agricultural Marketing Service, but production estimates by States, and comparable data on acreage and value, are not available.

The seasonal nature of the production of vegetables and melons for fresh market and their perishability created a need for information on supplies available during specific periods of the year to facilitate orderly marketing. Vegetable and melon estimates for the 28 principal crops are classified according to the season or period within the season when the bulk of each crop is usually harvested. The forecasts and estimates of acreage and production therefore provide a measure of supplies available in specific seasonal periods. The seasonal groupings used are as follows:

Seasonal Groups and Subgroups Used for Vegetable and Melon Crops

Dates refer to period of most active harvest

Classifications Most Commonly Used

Winter: January, February, March.

Spring: April, May, June.

Early Spring: April 1-May 15.

Late Spring: May 16-June 30.

Summer: July, August, September.

Early Summer: July 1-August 15.

Late Summer: August 16-September 30.

Fall: October, November, December.

Early Fall: October 1-November 15.

Late Fall: November 16-December 31.

Classifications Used for Certain Short Season Crops

Early Spring: April.

Mid-Spring: May.

Late Spring: June.

Early Summer: July.

Mid-Summer: August.

Late Summer: September.

In practice the beginning and ending of these seasons are not fixed dates but approximations. There is necessarily some overlapping in the marketing seasons for individual crops, and weather frequently disturbs normal harvesting schedules. Consequently, the classifications employed are frequently less precise than the dates indicated.

¹ Commercial production, including greenhouse production, of all fresh market vegetables in all States. Includes the production shown in table 285 for the 28 principal vegetables. Does not include production for home consumption in farm and nonfarm gardens. Production by States, and acreage and value data not available.

² Production in all States of the 11 principal vegetables for processing shown in table 285. Production of other vegetables processed included in fresh market series of estimates.

³ Preliminary.

Agricultural Marketing Service. Data for 1919-34 in Agricultural Statistics, 1954, table 285.

¹ Acreage for fresh market is acreage for harvest, including any partially harvested or not harvested because of low prices or other economic factors. Acreage for processing is acreage harvested.

² Acreage, production, and farm value of the following 28 crops for which regular seasonal estimates are prepared in major producing States: Artichokes, asparagus, lima beans, snap beans, beets, broccoli, brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, honey ball melons, honey dew melons, kale, lettuce, onions, green peas, green peppers, shallots, spinach, tomatoes, and watermelons. Of these, broccoli was included for 3 States prior to 1949; 10 States since 1949; brussels sprouts was not included prior to 1949; sweet corn was included for 3 States prior to 1948, 4 States in 1948, and 26 States since 1949. Comparable estimates not available prior to 1939.

³ Acreage, production, and farm value of the following 11 crops in all States: Asparagus, lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers (pickles), green peas, pimientos, spinach, and tomatoes. Production of other vegetables processed included in fresh market series of estimates.

⁴ Production for fresh market includes some quantities not marketed because of low prices or other economic factors which are excluded in computing value.

³ Preliminary.

¹ Acreage for fresh market is acreage for harvest, including any partially harvested or not harvested because of low prices or other economic factors. Acreage for processing is acreage harvested.

² Acreage of the following 28 crops for which regular seasonal estimates are prepared in major producing States: Artichokes, asparagus, lima beans, snap beans, beets, broccoli, brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, honey ball melons, honey dew melons, kale, lettuce, onions, green peas, green peppers, shallots, spinach, tomatoes, and watermelons.

³ Preliminary.

⁴ Acreage of the following 11 crops in all States: Asparagus, lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers (pickles), green peas, pimientos, spinach, and tomatoes. Other vegetables processed included in fresh market series of estimates.

¹ Farm value of the following 28 crops for which regular seasonal estimates are prepared in major producing States: Artichokes, asparagus, lima beans, snap beans, beets, broccoli, brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, honey ball melons, honey dew melons, kale, lettuce, onions, green peas, green peppers, shallots, spinach, tomatoes, and watermelons.² Preliminary.³ Farm value of the following 11 crops in all States: Asparagus, lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers (pickles), green peas, pimientos, spinach, and tomatoes. Other vegetables processed included in fresh market series of estimates.

¹ Mostly for fresh market use, but includes some quantities used for processing and dehydration.

² Grower and local dealer stocks.

³ Not available prior to 1945.

⁴ Includes the following quantities not harvested and excluded in computing value: 951,000 sacks in 1939; 90,000 in 1940; 986,000 in 1942; 1,114,000 in 1944; 248,000 in 1945; 2,551,000 in 1946; 396,000 in 1948; 1,338,000 in 1950; 560,000 in 1951; and 2,727,000 in 1953.

⁵ Data compiled from reports of the U. S. Department of Commerce.

⁶ 50-pound sacks.

⁷ Preliminary.

¹ The following quantities were unharvested and/or not marketed and have been excluded in computing price and value (1,000 hundredweight): 1939–744; 1943–264; 1950–741; 1951–656; 1953–3,068; 1955–1,147.

² Prices are of eastern potatoes weighted by unloadings, seasons September–May. Beginning 1951, price data are for Maine and Long Island potatoes only.

³ Compiled from reports of the U. S. Department of Commerce.

⁴ Domestic exports minus imports for consumption, with net imports shown by a minus sign.

⁵ Includes shipments under the Army Civilian Supply Program beginning January 1947.

⁶ Revised July 1956.

⁷ Revised August 1956.

Agricultural Marketing Service. Italic figures are census returns on a hundredweight basis. Data for 1946–38 (in bushels) in Agricultural Statistics, 1952, table 339.

¹ Consists of potatoes sold for all purposes including food, seed, processing, and livestock feed.

Agricultural Marketing Service.

FOOTNOTES FOR TABLE 335

¹ Consists of potatoes sold for all purposes including food, seed, processing, and livestock feed. For 1946-50, includes potatoes removed by the Government from normal market channels under price support programs, and for which growers received payment.

² Merchantable stocks consist of potatoes held by growers, local dealers, and buyers on farms or near areas of production in the 26 fall States for sale or delivery after Dec. 31. They include potatoes held for sale or delivery to starch factories and other processors. Stocks for Jan. 1, 1949-51, include merchantable potatoes which were removed by the Government from normal market channels under price support programs.

³ Includes the following quantities unharvested and/or not marketed (1,000 cwt.): 1950—741; 1951—656; 1953—3,068; 1955—1,147.

⁴ Preliminary.

Agricultural Marketing Service. Data for 1929-45 (in bushels) in Agricultural Statistics, 1953, table 343.

¹ Includes the following quantities not marketed and excluded in computing value: 42,000 bushels in 1940, 51,000 in 1941, 15,000 in 1942, 40,000 in 1943, 342,000 in 1945, 319,000 in 1946, 80,000 in 1948, 200,000 in 1949, 110,000 in 1951, 193,000 in 1954, and 115,000 in 1955.

² Includes "otherwise prepared," if any.

³ Approximately 53 pounds.

⁴ Includes exports for military civilian-feeding abroad beginning January 1947.

⁵ Preliminary.

Agricultural Marketing Service. Imports and exports compiled from reports of the U. S. Department of Commerce.

¹ Figures for all commodities are on a calendar-year basis, except onions which are for a 12-month period beginning in March. Shipments by truck are not included but have become increasingly important during this period. The data are not indicative of total production or total sales.

² Includes casaba, honey ball, honey dew, persian, and mixed melons. Cars of mixed melons may include cantaloupes as well as other muskmelons.

³ Not available.

Agricultural Marketing Service. Compiled from daily and monthly reports received from officials and local agents of common carriers, throughout the country. Shipments shown in carlots include boat shipments reduced to a carlot basis. Data for 1929-45 in Agricultural Statistics, 1952, table 360.

¹ The reported truck receipts for 1955 are estimated to represent approximately the following percentages of the total 1955 truck receipts in these cities: Atlanta and San Francisco, 95 percent; Baltimore, Philadelphia, and Los Angeles, 90 percent; Boston, 85 percent; Chicago and New York, 75 percent.

² Includes casaba, honey ball, honey dew, and persian melons, and mixed melons of these classes.

¹ Fresh vegetables include estimated total commercial production for fresh market including estimated greenhouse production. Does not include production for home use.

² Artichokes, asparagus, broccoli, Brussels sprouts, lima beans, snap beans, cabbage, carrots, kale, lettuce and escarole, green peas, green peppers, spinach, and an estimated quantity of minor vegetables.

³ Beets, cauliflower, celery, sweet corn, cucumbers, eggplant, garlic, onions, shallots, and an estimated quantity of minor vegetables.

⁴ Includes watermelons, cantaloups, honey ball melons, honey dew melons, etc.

⁵ The per capita civilian consumption obtained by dividing the total apparent civilian consumption by total population adjusted for underenumeration of children under 5 years of age and for members of the armed forces not eating out of civilian supplies.

⁶ Preliminary.

Agricultural Marketing Service. The figures in this table are given in terms of production weight, i. e., quantities available for consumption at the farm level.

¹ Total crop for processing converted to a canned basis by applying the following factors (cases of 24 No. 2 cans per ton, farm weight): Cucumbers for pickles, 68 cases; cabbage for kraut, 54 cases; and pimientos (year 1941 to date), 29 cases.

² Equivalent cases of 24 No. 2 cans.

³ Preliminary.

⁴ Data for tomato catsup, chili sauce, paste, and sauce for 1939 and 1940 are either rough estimates or interpolations.

Agricultural Marketing Service. Compiled mainly from reports of the National Canners Association. In addition to the vegetables shown in this table, considerable quantities of the following products also are canned: Baked beans, carrots and peas, corn on the cob, hominy, kidney beans, mixed vegetables, mushrooms, okra, other greens than spinach, potatoes, rhubarb, sauerkraut juice, soups, spaghetti, succotash, sweetpotatoes, and vegetable puree. Data for 1929–38 in Agricultural Statistics, 1952, table 363.

¹ The per capita civilian consumption was obtained by dividing the total apparent civilian consumption by the total population adjusted for underenumeration of children under 5 years of age and for members of the armed forces not eating out of civilian supplies.

² Includes asparagus, lima beans, beets, carrots, Irish potatoes, pickles (including bulk stock), pimientos, pumpkin and squash, sauerkraut (including bulk stock), spinach, succotash, sweetpotatoes, tomato juice, pulp, catsup, paste, sauce, and chili sauce, other greens, and mixed vegetables.

³ Excludes baby foods, baked beans, soups, hominy, and minor vegetables not mentioned above.

⁴ Preliminary.

Agricultural Marketing Service. For data on a pack-year basis, 1909–51, see Agricultural Statistics, 1953, table 371.

¹ Production, price, and value for Oregon and Washington only. The 1950 census reported small quantities of hazelnuts (filberts) produced in several other States in 1949, but 99.9 percent of the total production was in Oregon and Washington.

² Includes the following quantities unharvested on account of economic conditions (tons): Oregon, 1942–100; 1943–100; 1944–100; 1948–200; 1949–100; 1950–650; 1951–250; 1952–220; 1953–100; 1954–150. Washington, 1948–120; 1949–110; 1950–130; 1951–40.

³ Equivalent returns per ton at first delivery point.

⁴ Shelled nuts converted to in-the-shell basis at ratio of 1 to 2.22. Imports from reports of U.S. Department of Commerce.

⁵ Preliminary.

Agricultural Marketing Service. Data for 1927–38 in Agricultural Statistics, 1952, table 373.

CHAPTER V

STATISTICS OF HAY, SEEDS, AND MINOR FIELD CROPS

Chapter V deals with hay, pasture, seeds, and various minor field crops. The reader will note a break in the continuity of some of the hay series; this results from a change in the method of estimating prairie or wild hay, which is explained in the footnotes of the appropriate tables. Table 397 shows the seeding rate for a number of specified crops. The State averages represent the latest information available and are based largely on surveys made annually or every few years. The seeding rates for wheat, rye, buckwheat, rice, potatoes, sweetpotatoes, peanuts, and cotton have been revised from those shown in 1955 Agricultural Statistics, based on current surveys. The United States average rates are derived by weighting the average for each State by the acreage planted to the particular crop. Rates are not shown for States where the crop is not estimated currently.

¹ Table includes, besides the ordinary edible beans and beans grown for seed, blackeyes, and garbanzos in California. Soybeans and mung beans are not included.

² Cleaned basis.

³ Compiled from New York Producers' Price Current, and beginning September 1947 from the New York Journal of Commerce.

⁴ Stocks for 1942–46 and 1950 from official reports, adjusted for U. S. Department of Agriculture holdings. Estimates for other years based on the best sources available.

⁵ Compiled from reports of U. S. Department of Commerce.

⁶ Bags of 100 pounds.

⁷ Census yield and production largely unclean basis.

⁸ Acreage grown alone.

⁹ Includes an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

¹⁰ Preliminary.

Agricultural Marketing Service. Italic figures are census returns; census figures include all States; other figures, principal producing States only. Data for 1909–38 in Agricultural Statistics, 1952, table 404.

¹ Years refer to year of harvest in the Northern Hemisphere and include the harvest immediately following in the Southern Hemisphere.

² Preliminary.

³ Production in Mexico is about 60 percent "porquero" type garbanzos used mostly for livestock feed.

⁴ Includes large quantities of porquero-type garbanzos (see footnote 3).

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Agricultural Attachés, results of office research, and other information.

FOOTNOTES FOR TABLE 401

¹ Years refer to year of harvest in the Northern Hemisphere and include the harvest immediately following in the Southern Hemisphere.

² Preliminary.

³ Subject to adjustment by the Canadian government in line with the 1950 census.

⁴ Garbanzos excluded.

⁵ Included with Syria.

⁶ Includes Lebanon.

⁷ Calendar-year production.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Agricultural Attachés, results of office research, and other information.

¹ Includes 2,813,000 pounds in 1939 not marketed because of economic conditions. Salable allotments under the Marketing Agreement totaled (million pounds): 1949–39; 1950–50; 1951–46.5; 1952–39.2. Price and value apply only to the part of the crop which was sold.

² Includes hops held by growers, dealers, and brewers. Stocks for 1950–52 do not include hops held by growers which were not available for sale under the Marketing Agreement.

³ Compiled from reports of the U.S. Department of Commerce.

⁴ Domestic exports minus imports.

⁵ Records of the Bureau of Internal Revenue.

CHAPTER VI

STATISTICS OF CATTLE, HOGS, SHEEP, HORSES, AND MULES

This chapter contains information about most kinds of farm livestock and livestock products, with the exception of dairy and poultry. The information relates to inventories, production, disposition, prices, and income for farm animals, and to livestock slaughter, meat production, and market statistics for meat animals.

The term "on farms" as used in this chapter includes ranches. Estimated numbers do not include livestock not on farms.

Information on the methods used in making livestock estimates may be found in Miscellaneous Publication No. 703, "The Agricultural Estimating and Reporting Service of the United States Department of Agriculture."

Differences between census inventories and January 1 estimated numbers are large in years when the census relates to a date other than January 1. The census enumerations in 1940 and 1950 were taken as of April 1, the enumerations in 1945 as of January 1, and in 1954 as of October and November. Marketings and slaughter of livestock as well as young stock born during the period between January 1 and the date of enumeration can result in some rather large differences in numbers on farms. For example, hog marketings and slaughter are seasonally big during the first few months of the year and during the last 2 or 3 months of the year. As a result, the number on farms January 1 is substantially different than for either the preceding October or the following April.

Separate series are no longer available for horses and mules. Therefore the U. S. tables on work stock in this issue show only the combined totals, which is the way current estimates are published. Numbers of work stock in foreign countries will be found in Agricultural Statistics, 1955, table 521. Data are not available to bring this table up to date. The series on livestock units at the end of this chapter has been carried back to 1909 because of revisions.

Table 432.—All cattle: Number on farms and value, Jan. 1, United States, 1940–56

Year	All cattle			Year	All cattle

¹ Estimates include only cattle being fattened for market as a more or less distinct agricultural enterprise, and exclude small operations incidental to dairy and general farming. Cattle thus fed are presumed to produce carcasses that will grade good or better. In addition there have been a number of cattle finished on distillery slop, mostly in Kentucky, and on byproduct feeds in other States not shown, as well as large numbers being winter-fed in West Virginia, Virginia, Kentucky, and some other States, to be marketed as "grass fat" cattle in the late summer.² Preliminary.

¹ End of year estimates (October to December) included under following year for comparisons and totals. Thus for Canada the December 1952 estimate of 8,906,000 is shown under 1953.

² Preliminary.

³ 2 to 4 years only.

⁴ June.

⁵ Census or estimate for single year.

⁶ Official statistics; may be underestimate of actual numbers.

⁷ September.

⁸ March.

⁹ Data include buffaloes.

¹⁰ Census December 31, 1934.

¹¹ Cattle 1 year old and older.

¹² October.

¹³ China mainland; excludes Outer Mongolia.

¹⁴ Includes estimates for Outer Mongolia.

¹⁵ Data include only number taxed.

Foreign Agricultural Service. Compiled from official sources, reports of Agricultural Attachés and other U.S. representatives abroad. Data for countries having changed boundaries relate to present territory. Totals include estimates for countries for which official statistics are unavailable.

¹ Calves born during the year.

² Excludes interfarm sales.

³ Includes cattle shipped in from other States and from central markets, but excludes intrastate shipments.

⁴ Preliminary.

⁵ Adjustments were made for cattle shipped in and changes in inventory.

⁶ No adjustments made for cost of cattle shipped in and changes in inventory values. Gross income is

"Cash receipts from sales of cattle, calves, beef, and veal" plus "Value of cattle and calves slaughtered for home consumption."

Agricultural Marketing Service. Data for 1924–45 in Agricultural Statistics, 1952, table 444.

¹ The number of stockyards reporting varies from 64 to 68.² Total rail and truck receipts, unloaded at public stockyards.³ Rounded totals of the complete figures.

Agricultural Marketing Service. Compiled from reports received from stockyards companies. Data for 1930–45 in Agricultural Statistics, 1952, table 449.

FOOTNOTES FOR TABLE 442

¹ Under "Public stockyards" are included stockers and feeders which were bought at stockyards markets. Under "Direct" are included stockers and feeders coming from other States from points other than public stockyards, some of which are inspected at public stockyards while stopping for feed, water, and rest en route.

Agricultural Marketing Service.

¹ Weighted average prices of beef steers, sold out of first hands for slaughter. These grade designations became effective Dec. 30, 1950. Grades used in Agricultural Statistics prior to 1951 compare with these grades as follows: The old Choice and Prime grades were combined as Prime, the old Good was changed to Choice, the old Medium was divided into Good and Commercial, and the old Common was changed to Utility.

² Grade name was changed to Commercial in 1951. Prices shown are approximate equivalent for present grade, estimated as follows: Weighted average of Good 3, Medium 1, 1946-50; reported as Commercial, 1951 to date.

³ This grade designation became effective Mar. 10, 1951.

Agricultural Marketing Service. Data for 1930-45 in Agricultural Statistics, 1953, table 460.

¹ End of year estimates (October to December) included under following year for comparison and totals. Thus for Canada the December 1952 estimate of 5,237,000 is shown under 1953.

² Preliminary.

³ 2 to 4 years only.

⁴ Census or estimate for single year.

⁵ Official statistics; may be underestimate of actual numbers.

⁶ September.

⁷ October.

⁸ Includes 22 provinces, Manchuria, and Sinkiang. Excludes Outer Mongolia.

⁹ National estimate of China mainland. Excludes Outer Mongolia.

¹⁰ 1934.

¹¹ Number taxed only.

Foreign Agricultural Service. Compiled from official sources, reports of Agricultural Attachés and other United States representatives abroad and other information. Data for countries having changed boundaries relate to present territory. Totals include estimates for countries for which official statistics are unavailable.

¹ Excludes interfarm sales.

² Includes hogs shipped in from other States and from central markets but excludes intrastate shipments.

³ Adjustments were made for hogs shipped in and changes in inventory.

⁴ No adjustments made for cost of hogs shipped in and changes in inventory values. Gross income is "Cash receipts from sales of hogs, pork, and lard" plus "Value of hogs slaughtered for home consumption."

Agricultural Marketing Service. Data for 1924–45 in Agricultural Statistics, 1952, table 465.

¹ Excludes interfarm sales.² Includes hogs shipped in from other States and from central markets but excludes intrastate shipments.³ Adjustments were made for hogs shipped in and changes in inventory.⁴ No adjustments made for cost of hogs shipped in and changes in inventory values. Gross income is "Cash receipts from sales of hogs, pork, and lard" plus "Value of hogs slaughtered for home consumption."

¹ The number of stockyards reporting varies from 64 to 68.² Total rail and truck receipts.³ Rounded total of complete figures.⁴ Covers receipts at 16-20 concentration yards and 10 or 11 packing plants in interior Iowa and southern Minnesota in 1946. Since January 1947, represents receipts at 14 packing plants and 30 concentration yards. Segregated truck receipts are not available.

Agricultural Marketing Service. Compiled from reports received from stockyards companies. Data for 1930-45 in Agricultural Statistics, 1952, table 468.

¹ Includes sheep and lambs in commercial feed lots on feed for market.

² Preliminary.

Agricultural Marketing Service.

FOOTNOTES FOR TABLE 477.

¹ Lambs saved during the year.

² Excludes interfarm sales.

³ Includes sheep and lambs shipped in from other States and from central markets but excludes intrastate shipments.

⁴ Preliminary.

⁵ Adjustments were made for sheep and lambs shipped in and changes in inventory.

⁶ No adjustments made for cost of sheep and lambs shipped in and changes in inventory values. Gross income is "Cash receipts from sales of sheep, lambs, mutton, and lamb" plus "Value of sheep and lambs slaughtered for home consumption."

Agricultural Marketing Service. Data for 1924–45 in Agricultural Statistics, 1952, table 486.

¹ End of year estimates (October to December) included under following year for comparisons and totals; thus, for Canada the December 1, 1952 estimate of 1,108,000 head is shown under 1953.

² Preliminary.

³ Census or estimate for single year.

⁴ June.

⁵ 2 to 4 years.

⁶ Official estimate; may be underestimate of actual numbers.

⁷ September.

Foreign Agricultural Service. Compiled from official sources, reports of Agricultural Attachés and other United States representatives abroad. Data for countries having changed boundaries relate to present territory. Totals include estimates for countries for which no official estimates are available.

¹ Excludes slaughter in Hawaii and Virgin Islands. Includes slaughter in war-duration or "Fulmer" plants, 1942-46, representing an increase in the number of federally inspected slaughter plants.

² Preliminary.

Agricultural Marketing Service. Data for 1910-39 in Agricultural Statistics, 1952, table 492.

FOOTNOTES FOR TABLE 478

¹ Excludes interfarm sales.

² Includes sheep and lambs shipped in from other States and from central markets but excludes intrastate shipments.

³ Adjustments made for cost of sheep and lambs shipped in and changes in inventory.

⁴ No adjustments made for cost of sheep and lambs shipped in and changes in inventory values. Gross income is "Cash receipts from sales of sheep, lambs, mutton, and lamb" plus "Value of sheep and lambs slaughtered for home consumption."

Agricultural Marketing Service.

¹ Includes sheep shorn at commercial feeding yards.

² Preliminary. Weighted average price for wool sold April 1955 through January 1956.

³ For Texas and California the weight per fleece is the amount of wool shorn per sheep and lamb during the year.

⁴ Price per pound relates to the marketing season April-March.

⁵ Production multiplied by season average price.

Agricultural Marketing Service.

Table 491.—Wool: Number of sheep shorn, weight per fleece, production, average price per pound received by farmers, value of sales, pulled wool production, exports, imports, total new supply of apparel wool, and imports of carpet wool, United States, 1940–55

1955 ⁴	274,970	10,6,338	169,054	437,686	185,958

¹ Includes sheep shorn at commercial feeding yards.

² Beginning with 1943 the average price is for the marketing season April–March. Prior to 1943 average prices relate to the calendar year.

³ Production multiplied by season average price.

⁴ Preliminary.

⁵ Weighted average price for wool sold April 1955 through January 1956.

⁶ Includes hair of the angora goat, alpaca, and other like animals.

⁷ For years prior to 1942, apparel wool includes all wools except Donskoi, Smyrna, etc., and similar wools without merino or English blood; for 1942 and thereafter, it includes all dutiable wool. For years prior to 1942, carpet wool includes only Donskoi, Smyrna, etc., and similar wools without merino or English blood; for 1942 and thereafter, it includes all duty-free wool.

⁸ Production minus exports plus imports; stocks not taken into consideration.

⁹ Does not include 222,222,220 pounds in 1942; 275,476,308 pounds in 1943; 2,725,929 pounds in 1944; 5,372,698 pounds in 1945; and 14,840 pounds in 1946, imported free of duty as an act of international courtesy. Wool so imported consisted almost entirely of wool stored in this country for the British Government, and later re-exported. This wool was not available to domestic mills.

¹⁰ Clean content.

Agricultural Marketing Service. Imports and exports from Foreign Commerce and Navigation of the United States and other reports of the U. S. Department of Commerce. Data for 1909–39 in Agricultural Statistics, 1952, table 499.

¹ Scoured wool, plus greasy wool converted to a scoured basis, using assumed average yields. Includes both pulled and shorn, foreign and domestic wool. Wool was considered as consumed (1) on the woolen system when laid in mixes and (2) on the worsted system when entering scouring bowls. From August 1948 forward, consumption on the worsted system is taken as the sum of top and noil production.

² 53 weeks.

³ Preliminary.

⁴ Domestic and duty-paid foreign.

⁵ Excludes wool consumed on the cotton system and in the manufacture of felt, hat bodies, and other miscellaneous products.

⁶ Duty-free foreign.

Agricultural Marketing Service. Compiled from reports of the Bureau of the Census.

FOOTNOTES FOR TABLE 492

¹ For summary purposes wool produced mostly in the spring in the Northern Hemisphere is combined with that produced in the season beginning July 1 or October 1 of the same year in the Southern Hemisphere. Pulled wool is included for most countries at its greasy equivalent.

² Preliminary.

³ Includes estimates for Newfoundland, Netherland West Indies, Guatemala, and El Salvador.

⁴ Rounded to fives of millions.

⁵ Includes the Iron Curtain countries (Albania, Bulgaria, Czechoslovakia, Hungary, Poland, Rumania, and Eastern Germany).

⁶ Based on present boundaries.

⁷ Includes estimates for countries producing 2 million pounds or less, namely Belgium, Denmark, Iceland, Sweden, and Switzerland.

⁸ Includes China proper (22 provinces), Manchuria, Jehol, and Sinkiang (Turkestan).

⁹ Includes Pakistan.

¹⁰ Includes estimates for Afghanistan, Cyprus, Palestine, Transjordan, Outer Mongolia, Tibet, Nepal, and China.

¹¹ Includes relatively small production in Bolivia, Colombia, Ecuador, Paraguay, and Venezuela.

¹² Excludes karakul wool; includes Union of South Africa, Union Protectorate, and South West Africa.

¹³ Includes estimates for Kenya, French West Africa, and Togo.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of Agricultural Attachés and other U.S. representatives abroad, results of office research and other information. Estimates for countries having changed boundaries have been adjusted to present boundaries except as noted.

1955	142	117	108	140	142	105

¹ Wools grown in the range areas of Washington, Oregon, the intermountain States (including Arizona and New Mexico) and parts of the Dakotas, Nebraska, Kansas, and Oklahoma. These wools vary considerably in shrinkage and color.

² Open market prices except for 1946–May 1947, which are Commodity Credit Corporation selling prices.

³ Open market prices except for 1946–August 1948, which are Commodity Credit Corporation selling prices.

⁴ Wools grown east of the Mississippi River and in the farm areas of the Dakotas, Nebraska, Kansas, Oklahoma, Minnesota, Iowa, and Missouri.

⁵ No quotations January–August 1946. London wool auctions were suspended at outbreak of war. Supplies and prices under Government control.

⁶ 10-month average.

Agricultural Marketing Service. Prices for foreign wools from Kreglinger and Fernau market reports. Data for 1930–45 in Agricultural Statistics, 1952, table 503.

¹ Meats canned under Federal inspection include the largest part of the canned meat produced in the United States. Net product weight; including weight of nonmeat ingredients of products; for civilian use only.

² Canned loins and picnics and chopped beef not reported separately prior to January 1955. Canned loins and picnics were probably reported principally in the canned ham category with part being reported as "all other 20% or more". Chopped beef was included with luncheon meat prior to January 1955.

³ Liver product and bacon not reported separately since January 1955; included in "all other 20% or more."

Agricultural Marketing Service. Compiled from data of the Agricultural Research Service.

¹ Carcass meat basis—excludes offal and lard.² Includes horsemeat in addition to types shown in other columns, if it is produced in quantity.³ Preliminary.⁴ Includes carcass weight equivalent of live animals exported.⁵ Average for less than 5 years.⁶ Excludes farm production.⁷ Years ending September 30.

Foreign Agricultural Service. Compiled from official sources, reports of Agricultural Attachés and other United States representatives abroad. Data for countries having changed boundaries relate to present territory.

FOOTNOTES FOR TABLE 507

¹ All meats converted to carcass weight equivalent; includes beef and veal, pork, mutton and lamb, goat and horse meat; excludes live animals, edible variety meat, lard, rabbit, and poultry meat.

² Preliminary.³ Includes Newfoundland beginning April 1, 1949.⁴ 1935–39.⁵ Not available. ⁶ Partially estimated. ⁷ Includes carcass meat equivalent of live cattle exports prior to 1953.

⁸ Western Germany, beginning Oct. 1, 1949. ⁹ 1931–35. ¹⁰ Includes edible variety meat. ¹¹ Present territory for postwar years. ¹² Estimated, based on imports into receiving countries reporting imports by origin. ¹³ Estimated, based on exports for supplying countries reporting exports by destination.

Foreign Agricultural Service. Compiled from official sources, and reports of Agricultural Attachés and other United States representatives abroad. Data for countries having changed boundaries relate to present territory. Totals include estimates for countries for which statistics are unavailable.

¹ Carcass weight equivalent: Dressed weight of cattle, calves, sheep and lambs; pork excluding lard⁴; carcass equivalent weight of hog products minus an allowance for carcass fat rendered for lard. Edible offals are excluded. Civilian consumption through 1940 is assumed to be the same as total consumption; for 1941 to date military takings are excluded.

² Preliminary.

³ Includes lard entering into manufacturing products.

Agricultural Marketing Service. Data for 1909–38 in Agricultural Statistics 1953, table 522.

Table 509.—Meat: United States exports and shipments to Territories, and imports into the United States, carcass weight equivalent, 1940–55¹

¹ Carcass weight equivalent of all meat, including the meat content of minor meats and of mixed products. Exports exclude shipments for military-civilian feeding in United States occupied areas. Shipments to Territories include shipments to all Territories through 1948, from 1949–51 shipments to Puerto Rico and Virgin Islands, and for 1952–55 shipments to Puerto Rico, Virgin Islands, and Guam.

² Includes exports and shipments to Territories by U. S. Department of Agriculture, 1941–49.

³ Includes boneless beef 1948 to date, as estimated 1948–53, and reported beginning 1954.

⁴ Less than 500,000 pounds.

⁵ 1952–55 data are computed with slightly revised conversion factors.

⁶ Apparent reduction from earlier years is due to change in reporting of data.

⁷ Includes beef procured by USDA and shipped abroad by CARE.

⁸ Preliminary.

Agricultural Marketing Service. Data on imports and commercial exports and shipments are computed from records of Bureau of the Census; those on exports and shipments by U. S. Department of Agriculture are separately estimated from deliveries and stocks. Data for 1910–39 in Agricultural Statistics, 1952, table 516.

¹ Revised series. Includes poultry; excludes livestock and poultry not on farms and minor livestock on farms. Animal units for the 6 principal kinds of livestock were added to give the total shown in each column.

² The animal units of grain and roughage-consuming livestock is a separate computation in which the total feed (grain, hay, and pastures) used by the average milk cow in a year is one unit. It measures the requirements of all livestock for all feed.

³ Preliminary.

Agricultural Research Service.

CHAPTER VII

DAIRY AND POULTRY STATISTICS

Dairy statistics in this chapter include series relating to many phases of production, movement, prices, stocks, and consumption of milk and its products. The two distinct series of numbers of milk cows on farms included in this publication should not be confused. One series entitled "Cows and heifers 2 years old and older kept for milk, January 1" is an inventory number of this specific age-sex classification which is estimated as one of the major groups making up the total cattle population at the beginning of the year. The other series, identified as "Milk cows on farms," is an annual average number of milk cows during the year (excluding any not yet fresh) which is used in connection with determining milk production. More animals are represented in the first series than the latter because heifers 2 years of age which have not freshened are included.

In comparing the several series of milk prices, it is important to note that prices received by farmers for all whole milk sold are for milk or butterfat content as actually sold, while certain prices paid by dealers for milk for fluid purposes or for specified manufacturing purposes may be quoted on a 3.5 percent butterfat basis, or for some types of manufacturing milk on the test of the milk used for that particular purpose.

Poultry and poultry products statistics include inventory numbers of chickens by classes; the production, disposition, cash receipts, and gross income from chickens and eggs; poultry and egg receipts at principal markets; commercial broiler production; turkey production, disposition, cash receipts, and gross income; liquid and dried egg production; and the National Poultry Improvement Plan.

The estimates of chickens and turkeys on farms in census years differ from the census figures to the extent of the seasonal disappearance in numbers from January 1 to the average date of the enumeration. Estimates relating to inventories, production, and income exclude poultry and eggs which are produced on places not classified as farms.

Table 518.—Cows, heifers, and heifer calves kept for milk purposes: Number on farms Jan. 1, value, and number eliminated during year, United States, 1940–56

¹ Number of cows and heifers 2 years old and over Jan. 1, plus number of heifers 1–2 years Jan. 1, less number of cows and heifers 2 years old and over on Jan. 1 of the following year.

² Italic figures are from Census of Agriculture. Figures for census years 1940 and 1945 represent number of cows milked in 1939 and 1944; for 1950 and 1954 number of milk cows on place at time of census enumeration. Census dates were Apr. 1, 1940, Jan. 1, 1945, Apr. 1, 1950, and October–November, 1954.

³ Preliminary.

Agricultural Marketing Service. Data on cows and heifers 2 years old and over for 1867–1939 and on other series for 1920–39 in Agricultural Statistics, 1952, tables 527 and 528.

¹ Includes records of sires with 5 unselected daughter-dam comparisons (preliminary proof) as well as records of sires proved with 10 or more comparisons.

² Lactation records converted to 305-day, twice-a-day milking, mature-equivalent basis.

³ Prior to 1946 data represent cows enrolled.

Agricultural Research Service.

FOOTNOTES FOR TABLE 521

¹ Averages for the October-May feeding period, as reported by about 9,000 dairy correspondents.

² In computing hay equivalents, 3 tons of silage or 2 tons of other roughage were considered equal to 1 ton of hay.

³ Seasonal average condition for Apr. 1-Oct. 1 period.

⁴ Includes citrus pulp fed.

⁵ Data insufficient for stable average.

Agricultural Marketing Service.

¹ All counties in the United States and all areas in Puerto Rico and the Virgin Islands are in the modified accredited area. Areas or counties so designated are those in which tuberculosis does not exist among more than 0.5 percent of the cattle as determined by official tuberculin testing and from which all reactors to the test have been removed.

Agricultural Research Service. Data for 1930-45 in Agricultural Statistics, 1952, table 537.

1955 ³	3,304	8,257	3,365	14,926	90,613	15,180	2,735	108,528		

¹ Estimates include milk delivered to creameries, condenseries, cheese factories and market milk receiving stations, but exclude market milk sold to other farmers for local delivery.² Approximations based on health officers' reports of sources of fluid milk in villages, towns, and small cities, and information on sales by producer-distributors.³ Preliminary.

Agricultural Marketing Service. Similar data for 1924-45 in Agricultural Statistics, 1952, table 544, except that the milk used for farm-churned butter was separated between that consumed in the farm household and that sold. Resulting totals for farm use and for products sold are consequently not entirely comparable.

¹ Estimates include milk delivered to creameries, condenseries, cheese factories, and market milk receiving stations, but exclude market milk sold to other farmers for local delivery.

² Approximations based on health officers' reports of sources of fluid milk in villages, towns, and small cities and information on sales by producer-distributors.

Agricultural Marketing Service.

¹ Preliminary.² Includes an allowance for milk produced by cows not on farms.³ Milk sherbet, ice milk, and miscellaneous minor frozen products.⁴ Milk equivalent of butter and condensed milk used in ice cream.⁵ Includes dry cream, malted milk, dry part skim milk, dry ice cream mix, and cottage cheese.⁶ Includes net milk equivalent of butter and frozen dairy products to avoid double counting of milk from which fat was reused in making a second dairy product.⁷ Includes an allowance for fluid consumption on farms not producing milk in addition to the consumption on farms where milk is produced.⁸ Net movement of whole milk or cream into export or storage channels. A negative figure represents net imports or net out-of-storage movement during the year.⁹ Residual, including miscellaneous minor uses and any inaccuracies of independently determined production and use items.

Agricultural Marketing Service. Data for 1939-44 in Agricultural Statistics, 1954, table 537.

¹ Includes milk for cream. ² Includes milk used for ice cream, dried whole milk, minor products, waste and balance. ³ Includes cows kept mainly for milk. ⁴ Less than 5 years. ⁵ Canned milk included with other uses.

⁶ Includes both hand-fed milk and milk sucked by calves. ⁷ Production and utilization include goat milk.

⁸ Excludes milk fed to calves. ⁹ Years ending June 30. ¹⁰ Dried milk utilization included with canned milk.

¹¹ Production and utilization include sheep and goat milk. ¹² Years ending March 31.

Foreign Agricultural Service. Prepared or estimated from official statistics, reports of Agricultural Attachés and other United States representatives abroad, and other information.

FOOTNOTES FOR TABLE 536

¹ Milk sold to plants and dealers and retailed by farmers, plus milk skimmed for sale as cream.

² Computed from the value of milk and cream sold divided by the quantity of milk or milkfat utilized in preparation of these products for market.

³ Milk used for fluid consumption and home-made butter on farms where produced valued at average per unit returns for milk utilized in all forms of sale.

⁴ Value of sales of milk and cream plus value of milk used for farm consumption and farm butter churned.

⁵ Milk produced on farms valued in each State at average returns per 100 pounds for milk utilized in dairy products sold. In addition to gross income, it includes the value of whole milk fed to calves.

Agricultural Marketing Service.

¹ Preliminary.² Data not available.³ Totals for 1951-55 do not include farm butter sold since this was not estimated separately.⁴ Milk sold at wholesale and retail, plus milk skimmed for sale as cream, and milk equivalent of farm butter sold.⁵ Computed from the value of milk, cream, and farm butter sold divided by the quantity of milk or milkfat used in the preparation of these products for market.⁶ For 1951-55 includes milk used for all butter churned on farms, including a small quantity which was sold but for which separate data were not available.⁷ Milk utilized for household consumption valued in each State at average returns per 100 pounds for milk utilized in dairy products sold.⁸ Value of milk, cream, and farm butter sold, plus the value of these products consumed in the household on farms where produced.⁹ Milk produced on farms valued in each State at average returns per 100 pounds for milk utilized in dairy products sold. In addition to gross income, it includes the value of whole milk fed to calves.

Agricultural Marketing Service. Data for 1924-45 in Agricultural Statistics, 1952, table 547.

Table 536.—Farm dairy products: Quantity sold, price, value of sales and farm use, gross income, and farm value, by States, 1955 (preliminary)

¹ Annual price is simple average of United States prices for 12 months.² Average price for all milk sold at wholesale to plants and dealers, based on reports from milk-market administrators, cooperative milk-marketing associations, whole-milk distributors, and milk-products manufacturing plants. Annual prices, by States, weighted by estimated volume of all milk sold at wholesale to plants and dealers.³ Based on reports of special price reporters. Annual prices, by States, weighted by estimated volume of cream sold.⁴ Dealers' weighted average buying prices (f.o.b. city) for standard grade milk used for city distribution as milk. This series weighted by population of individual markets replaces the series showing straight average prices of all markets reporting (Agricultural Statistics 1955, table 545).⁵ Includes milk for canned condensed milk. Prices f.o.b. factory.⁶ Does not include Government dairy production payments, January-June 1946.⁷ Series discontinued January 1953.⁸ Preliminary.⁹ Price f.o.b. factory or local receiving station, whichever is the customary place for determining prices.¹⁰ Monthly price and butterfat test obtained by weighting together milk for canning, milk for butter and by-products, and milk for American cheese. Annual averages are simple averages of monthly prices.

Agricultural Marketing Service. Data for 1930-45 in Agricultural Statistics, 1952, table 550.

¹ "Standard" refers to the grade of milk commonly sold in each market. Grades may vary from market to market because of variation of the factors which enter into grade determination.

² Changed from New Haven; prices identical at time of change in 1950.

³ Simple average.

⁴ Revised.

Agricultural Marketing Service. Compiled from reports secured through the cooperation of milk distributors, producers' associations, and municipal officers.

Table 542.—Milk: Average price per 100 pounds paid producers by condenseries for milk of actual milk fat content, to be used primarily for evaporated milk, by geographic divisions, 1948-55¹

Year	Middle Atlantic	South Atlantic	East North Central	West North Central	South Central	North-western ²	South-western ³	United States

Agricultural Marketing Service. Imports compiled from records of Bureau of Foreign and Domestic Commerce and Bureau of the Census. Data for 1932-39 in Agricultural Statistics, 1952, table 560.

FOOTNOTES FOR TABLE 545

¹ Preliminary.

² Includes colby, washed curd, high and low moisture jack, monterey, and granular cheese.

³ Excludes full-skim American and cottage cheese.

⁴ Includes data for individual States which have less than 3 plants and are not shown separately.

Agricultural Marketing Service.

¹ Preliminary.² Not available.³ Excluding American full-skim cheese and cottage, pot, and bakers' cheese.⁴ Cottage cheese curd includes cottage, pot, and bakers' cheese with a butterfat content of less than 4 percent, made by reporting plants. Creamed cottage cheese includes cheese with a butterfat content of 4-19 percent. Cottage cheese curd and creamed cottage cheese should not be added together to get a total cottage cheese figure, for, while some of the cottage cheese curd is sold direct for consumption without further processing, a considerable part is creamed within the plant or shipped to another plant for creaming prior to sale.

¹ Includes fluid milk equivalent of cream. The total apparent civilian consumption for the years 1941-55 was obtained by subtracting military takings from total fluid milk use. The per capita civilian consumption rates were obtained by dividing the total apparent civilian consumption by the number of persons eating out of civilian supplies, unadjusted for underenumeration. Revisions in aggregate consumption data were offset by the shift to unadjusted population basis and the per capita use rates were unchanged.² Preliminary.

Agricultural Marketing Service. Estimates for per capita civilian consumption, 1909-23, in Agricultural Statistics, 1953, table 569.

¹ Total disappearance is based on production, imports, and change in stocks during the year. Production statistics for these commodities appear in other tables in this chapter. The total apparent civilian consumption was obtained by subtracting ending stocks, shipments, exports, and military takings from the total supply. The per capita civilian consumption for each year was obtained by dividing the total apparent civilian consumption by the total population adjusted for underenumeration, and for members of the Armed Forces not eating out of civilian food supplies.

² Includes both farm and factory-made butter.

³ Includes all kinds of cheese except cottage, pot, and bakers' cheese, and full-skim American.

⁴ The evaporated milk is unskimmed, unsweetened, case goods. The condensed milk is unsweetened (plain condensed) unskimmed, bulk goods; and sweetened condensed milk, unskimmed, case and bulk goods.

⁵ Preliminary.

Agricultural Marketing Service. Data for 1909–38 in Agricultural Statistics, 1953, table 570.

¹ Preliminary. Does not include commercial broiler production.

² Total chicks hatched less death loss of chicks and young chickens during the year.

³ Death loss during the year of mature chickens on hand Jan. 1.

⁴ Chickens raised less death loss during the year of mature chickens on hand Jan. 1.

⁵ Change in Jan. 1 inventory numbers during the year.

⁶ Chickens consumed in households of farm producers.

⁷ Value of sales plus value of those consumed in households of producers.

¹ For hatcheries and supply flocks, year began July 1, 1955 and ended June 30, 1956. For U. S. Record of Performance the year covers either 300 or 365 days from date of first egg of each bird. Most candidates begin laying in the late summer or early fall.

² Manufacturer's rating of the number of eggs the incubators will hold, including both incubating and hatching trays.

¹ Data on cross-mated flocks are not truly indicative of the situation since in several States birds in such flocks are reported under the respective purebred heading and in some States those flocks are cross-mated only for a portion of the year to produce broilers; for the remainder of the year they are mated as purebreds for the production of purebred chicks.

² Data not available prior to 1951.

Agricultural Research Service.

¹ Commercial broilers are young chickens of the heavy breeds to be marketed at 2–5 pounds live weight and from which no pullets are kept for egg production. These figures are not included in farm production of chickens.

² Includes value of consumption in households of producers, which is less than 1 per cent of total production.

³ Preliminary.

Agricultural Marketing Service.

¹ Farm production, plus nonfarm production estimated at 10 percent of farm production through 1954. Thereafter, a one-percentage-point decrease is assumed for each succeeding year.

² Shell-egg equivalent of eggs and egg products.

³ Shell eggs and shell equivalent of frozen and dried egg products; includes exports made from Government-owned stocks acquired for price support and other purposes.

⁴ Estimated.

⁵ Beginning 1941, consumption figures apply only to civilian population.

¹ Includes stocks of turkeys and other poultry.

Agricultural Marketing Service.

CHAPTER VIII

FARM RESOURCES, INCOME, AND EXPENSES

The statistics in this chapter deal with farms, farm practices, and the financial aspects of farming. Many of the series are estimates developed in connection with the research activities of the department. Others are primarily records of operations, such as certain data from agricultural credit agencies.

For convenience, the tables have been arranged in general groups. These groups, with the beginning table indicated, are as follows:

Farm property, table 601.

Population and employment, table 618.

Farm production and distribution, table 623.

Prices and income, table 648.

Costs and expenses, table 663.

Credit and loan programs, table 686.

The State tables on numbers of specified machines on farms and on farm consumption of motor fuels and liquid petroleum have been replaced by tables on hay harvesting methods and straw handling methods and on fertilizer application. The table on FHA borrower progress has been dropped. FHA soil and water conservation loans are listed separately under FHA real estate loans instead of being included with FHA non-real estate loans. A new table on farm wage workers has been added.

Table 601.—Economic trends: Data relating to agriculture, United States, 1939–55

Year	Prices paid by farmers		Prices received by farmers ²	Parity ratio ³	Farm income

5,859,169	1,141,615	59.9	352,866	—	53,889
5,352,162	1,158,566	60.9	344,399	—	57,261
4,782,416	1,158,192	60.8	332,870	—	57,583

¹ Acreages are for preceding year except for 1954. Prior to 1925, this column shows the total acreage of crops for which figures are available, except for 1920, when 14,502,932 acres of corn cut for forage were excluded (most of this was probably duplicated in the acreage of corn harvested as grain). Beginning with 1925, the figures represent the total cropland harvested.² Estimate derived from the index of farm real estate values applied to 1940 and 1950 Census values. 1945 Census reported a total value of land and buildings of \$46,389 million.³ Based on sample data from 1950 and 1954 Censuses. The 1954 Census was enumerated in October and November of that year.

Agricultural Research Service. Compiled from reports of Census of Agriculture, Bureau of the Census.

Total	1,024	947	979	916	848	844	763	745	746
Grand total ⁸	1,903	1,903	1,903	1,903	1,903	1,905	1,905	1,904	1,904

¹ Compiled from census reports, and publications and records of the former Bureau of Agricultural Economics and public land administering and conservation agencies. See U. S. Bureau of the Census, Historical Statistics of the United States 1789–1945 (pp. 115 and 121); U. S. Dept. of Agriculture, Agricultural Statistics, 1954 (p. 430); and U. S. Dept. Agr. Tech. Bul. 1082.

² Total acreages of farmland and nonfarm land are for the calendar year indicated. Except in 1954, acreages of cropland and pastureland usually relate to the preceding year.

³ Cropland used for crops includes cropland harvested, crop failure, and cultivated summer fallow. To find land available for crops in recent years add cropland used for crops, cropland idle or in cover crops, and cropland used only for pasture. In 1949, cropland used only for pasture was 69 million acres. In 1954 it amounted to 66 million acres.

⁴ Grassland pasture consists of all open or nonforested pasture in farms, including cropland used only for pasture in 1945–54, and plowable pasture in earlier years.

⁵ Grazing land not in farms consists of land used chiefly for grazing and includes open or nonforested grazing land, idle grassland in first decades, forest and arid woodland, and shrub and brush grazing land in all years.

⁶ Forest land outside farms not used for grazing excludes forested areas in parks, wildlife refuges, military areas, recreation sites, and arid woodland, brushland, and forest land used for grazing.

⁷ Other land outside farms includes urban, industrial, and residential areas outside farms; parks and wildlife refuges; military lands; roads; railroads; ungrazed desert, rock, swamp, and other unused and waste land.

⁸ Remeasurement of the land area of the United States in connection with the 1950 census indicated an approximate total land area of 1,904 million acres. Total areas previously were reported as 1,905 million acres in 1940 and 1945; 1,903 million acres 1860 to 1935; and 1,884 million acres in 1850.

¹ Federal and State rural land used for farming and grazing under lease or permit or otherwise used for farming or grazing. Includes Federal and State land used for farming and grazing which is reported in farms, as well as land not in farms and ranches.

² Includes grassland, shrub and brush land and forest land used for grazing.

³ Does not include 48 million acres of Indian land used for farming and grazing.

⁴ Less than 500 acres.

¹ Indexes are based on deposits of member banks of the Federal Reserve System located in places of less than 15,000 population. Annual indexes are simple averages of monthly indexes which are based on average amounts of daily deposits. In preparing indexes for groups of State the amounts of monthly deposits for each State are weighted by the cash farm income of each State in the base period.

² Arkansas, Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Nebraska, New York, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, South Dakota, Texas, Washington, and Wisconsin.

³ Michigan, Wisconsin, and Minnesota.

⁴ Ohio, Indiana, Illinois, Missouri, and Iowa.

¹ Revised.² Includes all crops held on farms for whatever purpose and crops held off farms as security for Commodity Credit Corporation loans. On January 1, 1956, the latter totaled 1,381 million dollars.³ Estimated valuation for 1940, plus purchases minus depreciation since then.⁴ Although these are nonrecourse loans, they are included as liabilities because borrowers must either pay them in cash or deliver the commodities on which they were based. The values of the underlying commodities are included among the assets; hence the loans must be included as liabilities to avoid overstating the amount of proprietors' equities.⁵ Includes individuals, merchants, dealers, and others. Estimates based on fragmentary data.

Agricultural Research Service.

¹ Includes in 1939, 30,516 6-foot and under combines; in 1940, 41,450; in 1941, 44,001; in 1942, 36,701; in 1943, 25,362 in 1944, 33,169; in 1945, 39,257; in 1946, 38,127; in 1947, 58,965; in 1948, 68,018; in 1949, 75,351; in 1950, 89,149; in 1951, 79,726; in 1952, 55,863; in 1953, 45,865; in 1954, 24,285; and in 1955, 26,435.

² Includes in 1940, 6,140 two-wheel spreaders; in 1941, 21,032; in 1942, 17,087; in 1943, 5,729; in 1944, 12,834; in 1945, 19,982; in 1946, 26,466; in 1947, 42,516; in 1948, 88,073; in 1949, 103,652; in 1950, 78,529; in 1951, 88,500; in 1952, 85,480; in 1953, 79,770; and in 1954, 54,909.

³ Row cultivators, tractor-drawn or mounted; beet or field cultivators not included.

⁴ Not including rice binders.

⁵ Figures omitted to avoid disclosure of operations of individual establishments.

⁶ Figures combined with other harvesting machinery.

⁷ Includes 1,100 self-propelled combines in 1944, 3,287 in 1945, 3,110 in 1946, 5,506 in 1947, 10,198 in 1948, 13,671 in 1949, 10,772 in 1950, 14,207 in 1951, 18,575 in 1952, 20,795 in 1953, 19,073 in 1954, and 17,727 in 1955. Not called for by the Census prior to 1944.

⁸ 1941 and later figures for milking machines include only the number of vacuum-pump units for stationary and portable milking machines. Figures for previous years combine the single and double milker units, and the vacuum-pump units.

Agricultural Research Service. Compiled from reports of the U. S. Department of Commerce. Data for 1923–38 in Agricultural Statistics, 1952, table 651.

¹ Estimates of the armed forces overseas were not available for 1939 and the total population for this year therefore, relates to continental United States; the number in the armed forces overseas during this year was fairly negligible.

Agricultural Marketing Service and Bureau of the Census. Data for 1910–38 in Agricultural Statistics, 1953, table 661.

Table 619.—Farm Employment: Average number of persons employed and indexes, United States, 1939-55¹

¹ Data relate to persons 14 years of age and over in the civilian non-institutional population at or near the end of the year. This series represents all persons who did any farm wage work during the year. It differs from the hired workers series shown in table 619 which gives an annual average based on employment during the last week of each month.

² Comparable estimates not available for 1953.

¹ Includes harvested acreage of 43 crops for which separate planted estimates are not available. See footnote 6 in table 624.

² Includes all corn, all wheat, oats, barley, rye, buckwheat, flaxseed, rice, sorghum grain, sorghum forage and silage, cotton, hay, timothy seed, sweetclover seed, dry edible beans, dry field peas, soybeans for beans, cowpeas for peas, peanuts picked and threshed, sorgo for sirup, sugarcane, sugar beets, potatoes, sweetpotatoes, tobacco, broomcorn, artichokes, asparagus, lima beans, snap beans, beets, broccoli, Brussels sprouts (since 1949), cabbage, cantaloups, carrots, cauliflower, celery, sweet corn (all major States included only since 1949), cucumbers, eggplant, escarole, garlic, Honey Ball melons, Honey Dew melons, kale, lettuce, onions, green peas, green peppers, pimientos, shallots, spinach, tomatoes, and watermelons. Red clover seed, alsike clover seed, lespedeza seed, and alfalfa seed are included in the count of crops, but the acreage is not included because it is mostly duplicated in the hay acreage. See footnote 4 in table 625.

1955 ⁴	17,506	1,647	313	1,460.5	351.8	798	97,812	354,502

¹ Includes acreage planted in preceding fall for harvest in the year shown.² Grain and sweet sorghums for all uses, including syrup.³ Acreage seeded in preceding fall.⁴ Preliminary.⁵ Acreage in cultivation July 1.

⁶ Includes harvested acreage of the following crops: Rye, hay, sweetclover seed, timothy seed, soybeans for beans, cowpeas for peas, peanuts picked and threshed, tobacco, sugarcane, broomcorn, and 29 commercial vegetables (11 for processing: Asparagus, lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers, green peas, pimientos, spinach, and tomatoes; 28 for fresh market: Artichokes, asparagus, lima beans, snap beans, beets, broccoli, Brussels sprouts (since 1949), cabbage, cantaloups, carrots, cauliflower, celery, sweet corn (all major States included only since 1949), cucumbers, eggplant, escarole, garlic, Honey Ball melons, Honey Dew melons, kale, lettuce, onions, green peas, green peppers, shallots, spinach, tomatoes, and watermelons). Alfalfa seed, red clover seed, alsike clover seed, and lespediza seed are included in the count of crops, but the acreage is not included because mostly duplicated in the hay acreage; the acreage of peanut hay, largely duplicated in peanuts picked and threshed, has been deducted. The harvested instead of the planted acreage of rye is included because most of the rye acreage not harvested is planted to other crops or used for pasture. Excludes grains cut for hay because part of the acreage shown as planted to wheat, oats, and barley is included in grain hay.

⁷ Includes crops listed separately in this table, plus those mentioned in footnote 6. (Sorghums counted as 3 crops, grain, forage, and syrup.)

Agricultural Marketing Service. Data for 1929–38 in Agricultural Statistics, 1952, table 665.

FOOTNOTES FOR TABLE 625

¹ Preliminary.² Asparagus, lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers, green peas, pimientos, spinach, and tomatoes.³ Artichokes, asparagus, lima beans, snap beans, beets, broccoli, Brussels sprouts (since 1949), cabbage, cantaloups, carrots, cauliflower, celery, sweet corn (all major States included only since 1949), cucumbers, eggplant, escarole, garlic, Honey Ball melons, Honey Dew melons, kale, lettuce, onions, green peas, green peppers, shallots, spinach, tomatoes, and watermelons. Excludes farm gardens. Acreage for harvest, including mature acreage abandoned or only partially harvested because of low prices or other economic factors.⁴ Totals are for crops shown in preceding columns. Alfalfa seed, red clover seed, alsike clover seed, and lespediza seed are included in the count of crops, but the acreage is not included because mostly duplicated in the hay acreage; the acreage of peanut hay, largely duplicated in peanuts picked and threshed, has been deducted. Other crops not included are hops, spelt, hemp, velvetbeans, various legumes and other crops harvested by livestock, minor crops, and fruits and nuts. The acreages shown include some crops harvested in succession from the same land.⁵ Commercial apples, peaches, pears, grapes, cherries, plums, prunes, apricots, figs, nectarines, olives, avocados, cranberries, dates, persimmons, pomegranates, oranges (including tangerines), grapefruit, lemons, limes, walnuts, almonds, and filberts.

Agricultural Marketing Service. Data for 1929–38 in Agricultural Statistics, 1952, table 666.

¹ Includes all corn, all wheat, oats, barley, rye, buckwheat, rice, sorghum grain, sorghum forage and silage, cotton, hay, timothy seed, sweetclover seed, dry edible beans, dry field peas, soybeans for beans, cowpeas for peas, peanuts picked and threshed, potatoes, sweetpotatoes, tobacco, sorgo for sirup, sugarcane, sugar beets, broomcorn, artichokes, asparagus, lime beans, snap beans, beets, broccoli, Brussels sprouts (since 1949), cabbage, cantaloups, carrots, cauliflower, celery, sweet corn (all major States included only since 1949), cucumbers, eggplant, escarole, garlic, Honey Ball melons, Honey Dew melons, kale, lettuce, onions, green peas, green peppers, pimientos, shallots, spinach, tomatoes, and watermelons. Alfalfa seed, red clover seed, alsike clover seed, and lespedeza seed are included in the count of crops, but the acreage is not included because it is mostly duplicated in the hay acreage. Farm value also includes apples (commercial crops), peaches, pears, grapes, cherries, cranberries, oranges, grapefruit, lemons, limes, plums, prunes, apricots, figs, olives, almonds, walnuts, pecans, maple products, and hops. ² Preliminary.

³ Unrevised. Differs from tables 623, 625, and 627 which show revisions made after December 1955.

¹ Preliminary.² Includes acreage seeded in preceding fall.³ Acreage seeded in preceding fall.⁴ Acreage in cultivation July 1.⁵ Bags of 100 pounds (cleaned.)⁶ Acres grown alone, plus $\frac{1}{2}$ the interplanted acres.⁷ All purposes.⁸ Averages 1949-54.⁹ 1,000 trees tapped.¹⁰ Includes some quantities not harvested.¹¹ Fresh basis.¹² For breakdown between fresh market and processing, see individual crop tables.¹³ Includes fresh market production equivalent tons in the shell and processing production equivalent tons shelled.¹⁴ Includes all corn, all wheat, oats, barley, rye, buckwheat, flaxseed, rice, sorghum

grain, sorghum forage and silage, cotton, hay, timothy seed, sweetclover seed, dry edible beans, soybeans for beans, cowpeas for peas, peanuts, picked and threshed dry field peas, sorgo for sirup, sugarcane, sugar beets, potatoes, sweetpotatoes, tobacco, broomcorn, artichokes, asparagus, snap beans, lima beans, beets, broccoli, Brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, Honey Ball melons, Honey Dew melons, kale, lettuce, onions, green peas, green peppers, pimientos, shallots, spinach, tomatoes, and watermelons.

Red clover seed, alsike clover seed, lespedeza seed, and alfalfa seed are included in the count of crops, but the acreage is not included because it is mostly duplicated in the hay acreage. Farm value also includes apples (commercial crop), peaches, pears, grapes, cherries, cranberries, oranges, grapefruit, lemons, limes, plums, all prunes, apricots, figs, olives, almonds, walnuts, pecans, maple products, and hops.

¹⁵ Total values do not include revisions made after December 1955, which are shown in this table.

¹ Acreages for producing export products and horse and mule feed include acreages used to produce the seed used to grow the crops exported and the feed used to produce export livestock products and to keep horses and mules.

² Area in crops harvested (excluding duplication) plus acreages in fruits, tree nuts, and farm gardens.

³ Acreages for crop exports for 1939 relate to exports for year beginning July 1, or month representing beginning of crop season. Acreages for producing livestock exports for 1939 relate to livestock products exported during the specified year, beginning July 1. Acreages for crop exports and lend-lease, beginning with 1940, are for calendar years as are livestock exports and lend-lease.

⁴ Includes products used by our military forces in this country and abroad, and by our domestic civilian population.

⁵ Includes persons in our military forces in this country and abroad.

⁶ Preliminary.

¹ Covers food and nonfood farm commodities. Relationships were developed from quantitative data on supply and use of unprocessed and processed farm commodities multiplied by average prices in 1947-49. All values were adjusted to farm values.

² Includes seed, feed, industrial alcohol, alcoholic beverages, etc.

³ Excludes deliveries for export of the U. S. Department of Agriculture.

⁴ Deliveries of the U. S. Department of Agriculture plus change in USDA stocks. Represents net quantities withdrawn from commercial channels.

⁵ Includes civilian feeding in areas occupied by our Armed Forces.

⁶ Preliminary.

Agricultural Marketing Service. Data for 1924-43 in Agricultural Statistics, 1955, table 635.

Table 633.—Land and livestock productivity: Index numbers of cropland used, crop production per acre, animal units of breeding livestock, and livestock production per breeding unit, United States, 1939-55¹

¹ Production of livestock and livestock products for human use, horses and mules excluded.

² Includes clipped wool, mohair, and for 1940 to date, honey and beeswax. These items are not included in the separate groups of livestock and products shown.

³ Cattle and calves, sheep and lambs, and hogs.

⁴ Butter, butterfat, wholesale milk, retail milk, and milk consumed on farms.

⁵ Chicken eggs, commercial broilers, chickens, and turkeys.

⁶ Includes production of hay seeds, pasture seeds and cover-crop seeds, and some miscellaneous crop production not included in separate groups of crops shown. Coverage of production of seed and miscellaneous crops is more complete for 1940 to date than for prior years. ⁷ All corn, oats, barley, and sorghum grain.

⁸ All hay, sorghum forage, and for 1940 to date, sorghum silage. ⁹ All wheat, rye, buckwheat, and rice.

¹⁰ Potatoes, sweetpotatoes, dry edible beans, dry field peas, truck crops for processing, truck crops for fresh market, and farm gardens. ¹¹ Fruits, berries, and tree nuts.

¹² Sugar beets, sugarcane for sugar and seed, sugarcane syrup, sorghum syrup, maple sugar, and maple syrup.

¹³ Cotton lint and cottonseed.

¹⁴ Soybeans, peanuts picked and threshed, peanuts hogged, flaxseed, and for 1940 to date, tung nuts.

¹⁵ Hay and concentrates only.

¹⁶ Basic data for livestock, 1954-55, were revised on the basis of information from the 1954 census of agriculture and other data. Comparable revised data for crops not available. Data for 1955 are preliminary.

Agricultural Research Service. Data for 1910-38 in Agricultural Statistics, 1954, table 642.

¹ Total persons supplied with agricultural products from United States farm production divided by farm employment. Total persons supplied in the United States is obtained by dividing value of farm production minus value of agricultural exports by per capita level of support. Total persons supplied abroad is calculated by dividing value of United States agricultural exports by per capita level of support in the United States. Per capita level of support is derived by dividing total population into value of farm production minus value of agricultural exports plus value of agricultural imports.

² Includes persons in our military forces in this country and abroad.

³ Preliminary.

Agricultural Research Service. Data for 1820–1930 by decades in Agricultural Statistics, 1954, table 646.

FOOTNOTES FOR TABLE 641—Continued.

¹ The estimated net business figures for 1950–51 and subsequent years cannot be compared with the estimated business for previous years because previous figures included some supply sales at the wholesale level for other cooperatives and some terminal market sales for local cooperatives. Estimated net business represents the value at the first level at which cooperatives transact business for farmers. It does not include the wholesale business of farm supply cooperatives with other cooperatives or terminal market sales for local cooperatives.

² Preliminary.

Farmer Cooperative Service. Based on records from cooperatives reporting to the Service. Data for 1929–38 in Agricultural Statistics, 1952, table 684.

¹ Reports of cooperatives are included either for the calendar year or for fiscal years ending between July 1 of the calendar year shown and June 30 of the following calendar year, with limited exceptions.

² Includes independent local cooperatives, centralized cooperatives, and federations of cooperatives. Cooperatives are classified according to their major activity. If, for example, more than 50 percent of a cooperative's business is derived from marketing activities, it is included as a marketing cooperative. Prior to 1950 total dollar volume of the marketing cooperatives was classified as marketing business even though a portion of this volume was derived from handling supplies or performing services for patrons. Similarly, the total volume of farm supply cooperatives was classified as farm supply business even though a portion of their business originated from the sale of various farm commodities or from performing trucking and other services for patrons. In 1950, the method of reporting was revised so that cooperatives reported sales of each major commodity marketed, the value of each major type of supply purchased, and receipts from major types of services performed for patrons. Beginning with 1950, the total marketing volume, therefore, consists only of the value of products actually marketed and farm supply volume consists only of the value of individual supplies purchased.

³ In 1950 a separate category was set up for cooperatives whose major activity is providing services related to marketing and farm supply activities.

⁴ Includes members (those entitled to vote for directors) but does not include nonvoting patrons. (Some duplication exists because some farmers belong to more than one cooperative.)

⁵ Charges for services in which no duplication occurs.

⁶ Includes the value of farm supplies sold to or purchased for patrons and service receipts for cooperatives rendering essential services either in marketing or farm supply purchasing. See Agricultural Statistics 1953, page 588, footnote 6, for additional information.

⁷ The estimated gross business figures for 1950-51 and subsequent years cannot be compared with the estimated business for previous years because in previous figures not all of the supply sales at wholesale level for other cooperatives or terminal market sales for local cooperatives were included. Estimated gross business, however, includes all business reported between cooperatives, such as the wholesale business of farm supply cooperatives with other cooperatives or terminal market sales for local cooperatives.

Continued on page 452.

Table 643.—Farmers' Cooperatives: Number of marketing, farm supply, and related service cooperatives and business volume, 1953-54¹

Item	Cooperatives handling	Gross business of all local and regional cooperatives	Net business after adjusting for duplication ²
Products marketed for patrons:		1,000 dollars	1,000 dollars
Beans and peas (dry edible)	72	39,125	31,526
Cotton and cotton products	581	597,697	522,610
Dairy products	2,027	2,896,666	2,408,408
Fruits and vegetables	777	957,704	609,379
Grain, soybeans, soybean meal and oil	2,715	2,220,335	1,492,307
Livestock and livestock products	629	1,389,827	1,295,521
Nuts	94	114,761	83,880
Poultry products	683	400,787	356,414
Rice	58	182,952	141,818
Sugar products	65	129,484	129,484
Tobacco	30	158,850	158,850
Wool and mohair	296	34,456	32,259
Miscellaneous ³	249	72,868	66,510
Total farm products	4,7258	9,195,512	7,328,936
Supplies purchased for patrons:			
Building materials	1,329	89,634	61,809
Containers and packaging supplies	1,103	52,792	25,474
Farm machinery and equipment	1,819	96,682	69,567
Feed	4,288	1,065,962	809,671
Fertilizer	3,621	372,096	232,117
Meats and groceries	960	57,251	45,050
Petroleum products	2,660	705,527	448,131
Seed	3,439	126,663	94,487
Sprays and dusts (farm chemicals)	1,689	37,863	26,583
Other supplies	4,164	235,493	160,399
Total farm supplies	4,7235	2,839,963	1,976,288
Receipts for services:			
Trucking, storage, grinding, locker plants, miscellaneous	3,884	134,342	134,342
Cotton ginning	470	21,681	21,681
Livestock trucking	194	1,738	1,738
Total service receipts	4,4,489	157,761	157,761
Total business	4,10,058	12,193,236	9,462,985

¹ Preliminary.² This figure represents value at the first level at which cooperatives transact business for farmers. It does not include wholesale business of farm supply cooperatives with other cooperatives or terminal market sales for local cooperatives.³ Includes forest products, fur pelts, hay, hops, nursery stock, tung oil, and other farm products not separately classified.

Because many cooperatives are engaged in more than one type of business, these totals are less than the number that would be obtained by adding the number of cooperatives handling individual items or performing individual services.

⁴ Charges for services in which no duplication occurs.

Farmer Cooperative Service. Based on records from cooperatives reporting to the Service.

FOOTNOTES FOR TABLE 642

¹ Preliminary.² These figures include cooperatives doing business in States other than those in which their headquarters are located and cannot be totaled because of duplication.³ This figure represents value at the first level at which cooperatives transact business with farmers. It does not include wholesale business of farm supply cooperatives with other cooperatives or terminal market sales performed for local cooperatives.

Farmer Cooperative Service.

Table 644.—Farmers' Cooperatives: Types, number, and memberships, United States

Type	Year or date of data	Associations	Estimated memberships or participants
		Number	Number
Production:			
Mutual irrigation companies ¹	1950	9,374	137,880
Dairy herd improvement associations	Jan. 1, 1956	2,266	40,984
Dairy-cattle artificial breeding associations	Jan. 1, 1956	1,502	661,497
Marketing and farm supply:			
Marketing	1953-54	² 6,445	4,272,902
Farm supply	1953-54	³ 3,372	3,252,731
Miscellaneous services ⁴	1953-54	⁵ 241	82,026
Services:			
National farm loan associations	June 30, 1956	1,081	⁶ 357,029
Production credit associations	June 30, 1956	498	480,832
Banks for cooperatives	June 30, 1956	13	⁷ 3,155,512
Rural federal credit unions ⁸	June 30, 1956	⁹ 230	⁹ 35,000
Rural electric cooperatives ⁹	June 30, 1956	905	4,071,123
Rural health cooperatives ¹⁰	1954	13	38,883
Farmers' mutual fire insurance companies	1954	1,750	3,750,000

¹ Seventeenth Census of the United States, 1950; estimated membership from Sixteenth Census of the United States, 1940.

² When associations marketing farm products but principally engaged in providing some other services are included, the total is 7,258.

³ When associations purchasing farm supplies but principally engaged in providing some other services are included, the total is 7,225.

⁴ Includes general trucking, storage, grinding, locker plant and other services.

⁵ When associations providing miscellaneous services but principally engaged in marketing or farm supply activities are included, the total is 4,489.

⁶ Represents the number of Federal Land Bank loans outstanding.

⁷ Estimated members of associations borrowing from banks for cooperatives.

⁸ Bureau of Federal Credit Unions, Department of Health, Education and Welfare.

⁹ Revised estimates.

¹⁰ Public Health Service, Department of Health, Education and Welfare. Estimate of number of associations in which farmers have controlling interest.

Farmer Cooperative Service.

Table 645.—Purchase and indemnity operations: Obligations to encourage the exportation and domestic consumption of agricultural commodities, years beginning July 1, 1954 and 1955

1955 ⁶	104.72	68.88	35.84	66	41.33	6.86	34.47	17
Miscellaneous products								

¹ These estimates are for a market basket containing quantities of farm food equal to the average annual purchases per wage-earner and clerical-worker family in 1952. The market basket contains 7 groups of commodities.

² The market basket values have not been revised to take account of revisions in the meat products group data, so they differ slightly from the totals of commodity groups.

³ Retail costs are calculated from retail prices published by the Bureau of Labor Statistics.

⁴ The farm values, or payments received by farmers for products equivalent to the foods in the market basket, are calculated from prices received by farmers. The farm values of processed products are adjusted by subtracting imputed values of byproducts. Government subsidy payments to producers in 1946 and payments to producers under provisions of the Sugar Act are not included. Farm values including Government payments in 1946 were: Market basket, \$405.48; meat products, \$128.43; dairy products, \$87.99; bakery and cereal products, \$28.20; and miscellaneous products, \$6.94. Payments to producers of sugar beets amounted to about 23 cents for sugar in the bakery and cereal products group and not more than 63 cents for sugar in the miscellaneous products group—about 86 cents for the market basket.

⁵ The marketing margin is the difference between retail cost and farm value. Marketing margins plus Government payments to processors, less Government taxes paid by sugar manufacturers in 1946 were: Market basket, \$883.32; meat products, \$56.98; dairy products, \$61.92; bakery and cereal products, \$65.15; fruits and vegetables, \$116.45; fats and oils, \$25.53; and miscellaneous products, \$27.35. Taxes paid by sugar manufacturers on the quantity of sugar in the market basket amount to 54 cents each year.

⁶ Preliminary.

Agricultural Marketing Service. Not comparable with data published in Agricultural Statistics, 1952, and earlier.

¹ The retail-cost estimates represent the cost at retail-store prices of all domestic farm foods that were both sold by farmers and bought by civilian consumers in this country. Farm food products sold in the form of meals are included but are valued at what the food would have cost in retail stores. Farm value is adjusted to eliminate imputed value of nonfood by-products. The marketing bill, or total marketing margin, is equal to the difference between the farm value and retail cost except for the years 1943–46 in which the marketing bill for some groups is adjusted for Government payments to processors.

² Includes vegetable-oil products, sugar, and other miscellaneous food products in addition to the five commodity groups given in this table.

³ The estimated farm values of milk, eggs, fruits, lard, and vegetable shortening used in bakery products were deducted from the farm values of other commodity groups and added to the farm value of the bakery and cereal products group.

⁴ Preliminary.

Agricultural Marketing Service. Data for 1913–38 in Agricultural Statistics, 1952, table 691.

¹ This summary of the average prices at which the Commodity Credit Corporation has supported agricultural commodities is limited to mandatory commodities and to certain others for which price support has been in effect several years.

² Support shown is for commercial area only. Average support level outside the commercial area was 75 percent (82.5 percent for corn in 1956) of the rate which would reflect the United States average level, because acreage limitations were in effect.

³ Support also was provided to farmers in the commercial area who were not in compliance with acreage limitations at a United States average level of \$1.25 per bushel.

⁴ Support levels for grade No. 2½ inch staple Amsak and Pima 32 varieties in 1948-52, and for average grade in 1953-56.

⁵ Includes types 42-44 and 51-55; and also Puerto Rican, type 46, through 1950.

⁶ Average support price for year not available.

⁷ Standard barrel, gross basis.

⁸ Support level announced on different basis (production unit) 1948-50.

Commodity Stabilization Service. Data for 1933-47 in Agricultural Statistics, 1952, table 693.

FOOTNOTES FOR TABLE 650

¹ Season average prices for crops and wool; weighted calendar year averages for livestock and livestock products other than wool. Unless otherwise noted these are averages for marketing season or calendar year computed by weighting State prices by quantities sold, or by production for those commodities for which virtually all of the production is sold.

² Effective parity prices as of the 15th of the month computed in accordance with procedure and index numbers applicable currently. Parity prices shown are those used in connection with a price support determination when applicable, otherwise for the month preceding the start of the crop marketing season for crops and for December 15 of the previous year for livestock and livestock products. ³ Preliminary for most commodities.

⁴ Average price to May 1, 1956. ⁵ Following year.

⁶ Types 42-46 and 51-56 included in base period price. ⁷ Weighted calendar year averages.

⁸ Previous year. ⁹ State prices weighted by production to obtain United States average.

¹⁰ Average local market price for wool sold; does not include incentive payment to bring season average return to 62 cents per pound.

¹¹ December 1 price.

¹² Equivalent on-tree returns for all methods of sale.

¹³ Season averages relate to all methods of sale. Parity prices are primarily for fresh use.

¹⁴ Equivalent per unit returns for bulk fruit at first delivery point.

¹⁵ Prices for fresh use for important processing States and average prices for all methods of sale for other States.

¹⁶ Equivalent packing-house door returns for fresh consumption for Pacific Coast States, average prices for fresh use for Michigan, and average prices for all methods of sale for other States.

¹⁷ Includes California dried prunes.

¹⁸ Prices include average Government payments to farmers authorized by the Sugar Acts.

¹⁹ Continental United States only.

²⁰ December 1 prices for all States except Louisiana which is a season average. ²¹ Shelled basis.

²² Simple calendar year average. ²³ Sold by farmers directly to consumers.

Agricultural Marketing Service.

¹ This does not replace the former index (1926=100) as the official index of primary market prices prior to January 1942. The data from January 1947 forward represent the revised sample and the 1947-49 weighting pattern. Prior to January 1947 they are based on the month-to-month movement of the various individual products price series included in the former index.

Agricultural Marketing Service. Compiled from data of the Bureau of Labor Statistics.

¹ The over-all index is known as the Parity Index which is the Index of Prices Paid by Farmers including Interest, Taxes, and Wage Rates.

² Simple average of quarterly indexes seasonally adjusted.

Agricultural Marketing Service. Data for 1910-38 in Agricultural Statistics, 1952, table 696.

FOOTNOTES FOR TABLE 653

³ Milk, wholesale; milk, retail; and butterfat. Wartime subsidy payments on butterfat and milk made to producers under programs designed to maintain ceiling prices as established under the Emergency Price Control Act of 1942 are included for the period October 1943-June 1946.

⁴ Wartime subsidy payments made to producers under programs designed to maintain ceiling prices as established under the Emergency Price Control Act of 1942 are included.

⁵ Including interest, taxes, and wage rates. This ratio will not necessarily be identical to a weighted average percent of parity for all farm products largely because, pursuant to law, parity prices for some products are on the modernized formula, others are on the old formula, and some are on a transitional basis.

Agricultural Marketing Service. Compiled from prices reported to the U. S. Department of Agriculture by dealers purchasing agricultural commodities in local farm markets. The price series for individual commodities are averages for all classes and grades of the commodity being sold in local farm markets on or about the 15th of each month. In computing the group indexes, prices of individual commodities have been weighted by average quantities sold during the period 1937-41. Data for 1910-38 in Agricultural Statistics, 1954, table 660.

Table 655.—Prices paid by farmers: Prices, by commodities, United States, average 1947-49, annual 1952-55¹

Commodity and unit	Average 1947-49	1952	1953	1954	1955
	Dollars	Dollars	Dollars	Dollars	Dollars
Food:					
Sugar, per 10-pound bag	0.997	1.06	1.06	1.05	1.05
Sirup, table, per pound ²	.138	.154	.156	.161	.162
Candy, non-chocolate, without nuts, per pound ²	.356	.332	.336	.338	.339
Bread, white, loaf, per pound ³	.138	.163	.168	.176	.180
Flour, per 25-pound sack	2.02	2.15	2.12	2.15	2.16
Baking-powder, canned, per pound ³	.180	.216	.222	.222	.226
Corn meal, per pound	.0678	.0760	.0788	.0727	.0711
Rolled oats, packaged, per pound ³	.123	.139	.140	.141	.144
Soda crackers, packaged, per pound ²	.252	.264	.266	.274	.276
Macaroni, packaged, per pound ⁴	.191	.214	.221	.232	.237
Corn flakes, packaged, per pound ³	.231	.295	.299	.299	.299
Wheat flakes, packaged, per pound ³	.267	.312	.317	.320	.324

Corn, canned, per pound ²	.152	.183	.183	.174	.169
Peas, canned, per pound ²	.144	.170	.174	.175	.176
Apples, fresh, per pound	.122	.143	.155	.155	.153
Bananas, per pound ³	.165	.173	.173	.176	.176
Lemons, 360's, per dozen ³	.487	.510	.518	.504	.503
Oranges, 216's, per dozen	.418	.459	.443	.486	.476
Grapefruit, each ³	.0677	.0881	.0882	.0835	.0861
Lard, per pound	.280	.188	.216	.259	.204
Vegetable shortening, per pound ³	.378	.299	.309	.324	.321
Salad dressing, per pound ²	.368	.341	.358	.346	.337
Peanut butter, per pound ⁴	.378	.456	.458	.475	.511
Margarine, per pound ³	.399	.288	.294	.297	.285
Coffee, per pound	.533	.879	.914	1.12	.946
Tea, Orange Pekoe, packaged, per pound ³	1.18	1.33	1.35	1.39	1.58
Tobacco:					
Cigarettes, per package of 20 ²	.189	.214	.225	.226	.231
Smoking tobacco, packaged, per pound ²	1.03	1.14	1.16	1.18	1.18
Clothing and yard goods:					
Men's clothing:					
Overalls, bib, per pair	3.23	3.53	3.51	3.48	3.46
Shirts, cotton, work, each	1.87	1.93	1.90	1.91	1.92
Undershirts, sleeveless, each	.628	.655	.646	.656	.662
Shorts, per pair	.745	.772	.769	.780	.786
Union suits, heavy, cotton, each ⁴	2.35	2.72	2.68	2.68	2.72
Gloves, canvas, work, per pair	.359	.376	.370	.369	.367
Jackets, leather, each ⁴	20.10	21.50	21.60	21.50	20.90
Jackets, wool, each ⁴	9.67	11.80	12.10	12.60	13.00
Socks, cotton, work, per pair	.269	.302	.301	.306	.309
Shoes, work, per pair	5.93	6.98	6.88	7.01	7.05
Boots, rubber, knee-length, per pair	5.13	6.17	6.16	6.24	6.37
Suits, wool, 1 pair pants, each	40.10	43.60	42.80	43.10	43.20
Trousers, extra, woolen, per pair	10.00	11.20	11.00	11.10	11.10
Trousers, cotton, per pair	3.52	4.06	4.00	4.02	3.98
Shirts, broadcloth, each	3.05	3.03	3.03	3.08	3.09
Overcoats, all wool, each ⁴	35.40	38.90	39.00	38.70	39.00
Hats, felt, each ⁴	6.00	6.00	5.99	6.03	6.23
Shoes, dress, per pair	7.69	8.68	8.62	8.81	8.87
Boys' clothing:					
Suits, wool, 6-12 years, each	14.40	16.40	16.50	16.80	16.80
Overalls, waist, per pair	2.06	2.18	2.21	2.19	2.20
Sweaters, pull-over, part-wool, each	2.95	3.04	3.11	3.12	3.21
Shoes, sizes 2½-6, per pair	4.63	5.32	5.36	5.48	5.53
Women's clothing:					
Dresses, house, percale, each	3.21	3.06	3.10	3.14	3.19
Dresses, street, cotton, each	5.82	5.94	6.06	6.12	6.27
Dresses, rayon, each	7.43	7.78	7.87	8.04	8.17
Panties or briefs, rayon	.732	.653	.637	.637	.632
Slips, rayon, each	2.61	2.43	2.44	2.48	2.48
Nightgowns, cotton, each	2.61	2.43	2.41	2.46	2.46

See footnotes at end of table.

Table 655.—Prices paid by farmers: Prices, by commodities, United States, average 1947-49, annual 1952-55¹—Continued

Crawler, under 25 db. hp., each ²	2,130.00	2,400.00	2,460.00	2,560.00	2,640.00
Crawler, 25-34.9 db. hp., each ²	3,910.00	4,380.00	4,620.00	4,780.00	4,880.00
Crawler, 35-49.9 db. hp., each ²	5,130.00	5,720.00	6,160.00	6,380.00	6,550.00
Farm Machinery:					
Plows, tractor, moldboard, one-bottom, each ²	122.00	140.00	136.00	136.00	132.00
Plows, tractor, moldboard, two-bottom, each ²	196.00	255.00	248.00	249.00	252.00
Plows, tractor, moldboard, three-bottom, each ²	269.00	364.00	358.00	360.00	365.00
Disk harrows, single, each ²	106.00	137.00	139.00	139.00	142.00
Disk harrows, tandem, each ²	202.00	257.00	260.00	263.00	268.00
Spiketooth harrows, steel bar, per section ²	19.70	27.80	28.20	28.40	29.30
Cultivators, 2-row, tractor, each ⁴	195.00	253.00	253.00	253.00	262.00
Manurespreaders, 2-wheel, rubber tires, each ²	332.00	422.00	423.00	428.00	438.00
Planters, corn, 2-row, no fertilizer attachment, each ⁴	148.00	218.00	223.00	231.00	234.00
Grain drills, tractor-drawn, 12-tube, each ²	332.00	476.00	484.00	482.00	485.00
Grain drills, tractor-drawn, 20-tube, each ²	475.00	662.00	674.00	684.00	
Mowers, 5-feet, each ⁴	164.00	227.00	224.00	223.00	225.00
Mowers, tractor, 7-ft., each ⁴	235.00	309.00	312.00	316.00	318.00
Hay rakes, side delivery, each ⁴	236.00	348.00	365.00	369.00	384.00
Hay loaders, each ⁴	246.00	319.00	321.00	315.00	312.00
Combines, self-propelled, 12 ft., each	4,310.00	5,290.00	5,420.00	5,400.00	5,520.00

See footnotes at end of table.

Table 655.—Prices paid by farmers: Prices, by commodities, United States, average 1947-49, annual 1952-55 ¹—Continued

Commodity and unit	Average 1947-49	1952	1953	1954	1955
Farm machinery—Continued					
Combines, auxiliary engine, 12-ft. cut, each	\$ 2,580.00	\$ 2,380.00	\$ 2,380.00	\$ 2,3,460.00	\$ 3,540.00
Combines, 5-6 feet cut, PTO, each	4,140.00	2,140.00	2,140.00	2,1,500.00	2,1,500.00
Corn picker-huskers, 2-row, each ⁴	1,210.00	1,500.00	1,530.00	1,540.00	1,670.00
Hammer mills, each ⁴	174.00	203.00	206.00	208.00	219.00
Cream separators, electric, 551 lb. capacity, each	128.00	\$ 146.00	\$ 150.00	\$ 152.00	154.00
Cream separators, electric, 750 lb. capacity, each	188.00	\$ 216.00	\$ 230.00	\$ 236.00	245.00
Single milker units, each ²	96.90	112.00	116.00	116.00	119.00
Milker pumping installations, each ²	135.00	156.00	160.00	159.00	162.00
Farm wagons, for rubber tires, less tires, each	143.00	157.00	157.00	160.00	163.00
Power sprayers, boom type, tr. mtd., each	147.00	\$ 185.00	\$ 188.00	\$ 188.00	\$ 183.00
Gas engines, 1½ horsepower, each ²	88.60	69.00	67.60	65.20	64.30
Electric motors, ¼ horsepower, each ²	22.10	19.60	19.20	19.20	19.40
Farm supplies:					
Axes, each ⁴	3.33	4.33	4.53	4.85	5.38
Hammers, each ⁴	1.84	2.42	2.46	2.62	2.86
Pitchforks, 3-time, each ⁴	1.82	2.41	2.52	2.66	2.82
Pitchforks, 4-time, each ⁴	2.19	2.85	2.97	3.14	3.38
Hoes, each ⁴	1.28	1.78	1.83	1.93	2.02
Seythes, each ⁴	4.79	5.86	6.03	6.07	6.22
Hand sprayers, each	7.77	\$ 8.68	\$ 8.66	\$ 8.73	\$ 8.74
Milk cans, each	8.24	11.10	11.40	11.70	12.20
Milk pails, each	1.31	1.76	1.79	1.80	1.86
Brooders, oil-burning, each ²	24.20	29.80	30.00	29.60	31.00
Brooders, electric, each ²	38.50	45.70	45.40	44.60	45.10
Rope, manila, per pound ⁴	.548	.722	.714	.705	.709
Binder twine, per pound ⁴	.251	.355	.320	.280	.249
New baskets, round stave, bushel, with cover, per dozen	3.53	3.94	4.16	4.07	4.01
Horse collars, leather, each	8.99	9.67	9.37	9.12	9.03
Lead arsenate, per pound	.315	\$ 4.401	\$ 3.75	\$ 3.63	\$ 3.60
Paris green, per pound ⁴	.545	.615	.618	.614	.616
Calcium arsenate, per pound ⁴	.142	.153	.136	.133	.123
Fertilizer: ²					
Mixed fertilizer:

¹ Annual average prices at independent stores based on Mar. 15, June 15, Sept. 15, and Dec. 15 prices unless otherwise indicated. Prices paid by farmers are collected for the most part from retail establishments located in small cities, towns, and in rural areas through using questionnaires sent and returned by mail. Prices for different specifications prior to 1955 adjusted to current basis where necessary.

² Average based on prices for 2 months.

³ Average based on prices for 3 months.

⁴ Based on price for 1 month only.

⁵ 2-door for all models except Buick prior to 1955.

⁶ 8-cylinder prior to 1955.

⁷ Average based on prices for 4 months.

⁸ 6-cylinder prior to 1955.

⁹ 1½-ton, stake body prior to 1955.

¹⁰ Revised.

¹¹ Average based on prices for 12 months.

¹² Average based on prices for 6 months.

¹³ Average based on prices for 5 months.

Agricultural Marketing Service.

¹ Amount of money received by farmers during the calendar year from the sale of farm products and from Government payments.

² Quantities of farm products consumed directly in farm households, valued at the average price received by farmers for the sale of similar commodities.

³ Cash receipts include value of home consumption, which is less than 1 percent of total production.

⁴ Ducks, geese, guineas, pigeons, quail, pheasants, turkey hatching eggs, and all other.

⁵ Value of home consumption determined by applying milk-equivalent price received for products sold to total home-consumed milk; not available for separate items.

⁶ Horses, mules, honey, beeswax, bees, goats and kids, rabbits, and fur animals and their pelts.

⁷ Turnips, okra, radishes, squash, green onions, parsley, collards, mustard greens, parsnips, turnip greens, rhubarb, hot peppers, horseradish, pumpkins, rutabagas, dandelion greens, Chinese cabbage, salsify, kohlrabi, watercress, and Swiss chard.

⁸ Not available for individual commodities except where shown.

⁹ Boysenberries, blackberries, dewberries, loganberries, youngberries, currants, gooseberries, and all other.

¹⁰ Persimmons, pineapples, pomegranates, nectarines, bananas, guavas, jujubes, mangoes, papayas, prickly pears, quinces, sapodillas, and loquats.

¹¹ Hemp fiber, hemp seed, and flax fiber.

¹² Payments under Agricultural Conservation and Sugar Act.

Agricultural Marketing Service.

FOOTNOTES FOR TABLE 656

¹ Payments under rental and benefit, soil conservation, price adjustment, price parity, Sugar Act, and production programs.

² Value of farm products consumed directly in farm households.

³ Includes an allowance for maintenance and interest on the value of farm dwellings and for a proportionate share of taxes on farm real estate and insurance on farm buildings. In most years the rental value is 9-11 percent of the estimated value of farm dwellings.

⁴ Cash receipts from farm marketings, Government payments, value of home consumption and rental value of farm homes.

⁵ Includes Government payments. For number of farms, see table 602.

⁶ Preliminary.

Agricultural Marketing Service. Not comparable with data for 1910-38 in Agricultural Statistics, 1952, table 698.

¹ The series on income of the nonfarm population and total national income are those previously developed for use in comparison with income of the farm population. They are based on U. S. Department of Commerce estimates of nonagricultural income, with appropriate adjustments to improve their comparability with farm income.

² Preliminary.

Agricultural Marketing Service.

¹ Cash wages and value of perquisites.² An adjustment to realized net income to deduct sales out of inventories or to add increases in inventories from current production. Computed by valuing changes during the year in numbers of livestock and in quantities of crops on farms (excluding crops under Commodity Credit Corporation loan), at average calendar-year prices.³ Interest charges payable during the calendar year on outstanding farm-mortgage debt.⁴ Gross rent to nonfarm landlords minus their share of expenses.⁵ Preliminary.

Agricultural Marketing Service. Not comparable with data for 1910–38 in Agricultural Statistics, 1952, table 703.

¹ Twenty-three of the 27 types of farms represent the average of the most common sizes of farms of the type in the general region indicated. The averages are thus not affected by the activities of operators on farms larger or smaller than the group described. Four of the farms represent commercial family-operated farms larger or smaller than the average size of the type in the area. These are the large-scale and small cotton farms in the Mississippi Delta area and the small tobacco and large tobacco-cotton farms in the Coastal Plain, North Carolina. The data for these farms pertain to the size and type of farm specified.

² Total sales plus Government payments, perquisites, and change in inventory of livestock and crops.

³ Includes all cash production expenditures plus depreciation and change in inventory of service buildings, machinery, and equipment.

⁴ Estimated average value Jan. 1 of land and buildings times average farm mortgage interest rates in the specified area plus average value Jan. 1 of livestock, machinery and equipment, and inventory of feed grains and hay times average short-term interest rates.

⁵ Not applicable.

Agricultural Research Service.

¹ Includes bulbs, plants, and trees.

² Includes expenditures for repairs and maintenance of farm buildings; petroleum fuel and oil, other motor vehicle operation, and repairs on other machinery.

³ Estimated outlay necessary, at current prices, for the replacement of capital equipment that has been used up during the year.

⁴ Cash wages and the value of perquisites supplied to hired farm laborers.

⁵ Includes taxes levied against farm real estate and farm personal property.

⁶ Interest charges payable during the calendar year on outstanding farm-mortgage debt.

⁷ Gross rent paid to nonfarm landlords, including Government payments, minus the expenses of agricultural production charged against them.

⁸ Short-term interest, pesticides, ginning, electricity and telephones (business share), livestock marketing charges, containers, irrigation, grazing, binding materials, tolls for syrup, horses and mules, harness and saddlery, blacksmithing and hardware, veterinary services and medicines, net insurance premiums (fire, wind, and hail), and miscellaneous dairy, nursery, greenhouse, ap ary, and other supplies. ⁹ Preliminary.

Agricultural Marketing Service. Not comparable with data for 1910–38 in Agricultural Statistics, 1952, table 705.

¹ Man-hours are in terms of the time used by average adult males to perform various farm tasks. As many women, children, and older workers accomplish less in an hour than an average adult male, actual hours of work by all workers are in excess of those shown.

² Preliminary.

³ Includes labor used on chickens raised, hens and pullets for egg production, broilers, and turkeys.

⁴ Includes, in addition to the livestock listed above, the labor used on minor live-stock enterprises, such as goats, bees, ducks, and geese.

⁵ Includes, in addition to the crops listed above, the labor used on minor crops, such as broomcorn, hops, and popcorn.

⁶ Includes labor used for fencing, repairs to buildings, machinery and equipment, farm woods, pastures, general land maintenance, farm business, and other miscellaneous work.

Agricultural Research Service.

¹ Includes Government distribution and secondary- and trace-nutrient fertilizers but not liming materials.

² Calculated from the quantities of each grade and kind of fertilizer shipped and the analyses published by fertilizer control authorities for the respective States.

³ Does not include gypsum, sewage sludge, other than activated sludge, soil sulphur, nor materials containing less than 5 percent total plant nutrients classed by this State as "minerals."

⁴ Not available.

⁵ Alaska, Hawaii, and Puerto Rico; 1953 and 1954 totals do not include Alaska. The consumption of commercial fertilizers in other Territories is negligible.

Table 669.—Fertilizers: Quantities of commercial fertilizers consumed and their average plant-nutrient content, United States, 1939–55¹

Weed killers	(³)	(³)	(³)	9,820	11,954	14,829	15,799
Agricultural insecticides, fungicides, etc., not elsewhere classified ⁷	60,579	88,990	165,015	87,606	66,788	94,571	111,366

¹ These statistics only partially cover production of pesticides, since a number of commodities are not reported either to the Bureau of the Census or to the U. S. Tariff Commission.

² Production of the gamma isomer content in benzene hexachloride totaled 17.1 million pounds in 1951, 12.8 million pounds in 1952, 8.8 million pounds in 1953, 11.5 million pounds in 1954, and 10.7 million pounds in 1955.

³ Not available.

⁴ Partly estimated. Includes such commodities as allethrin, aramite, aldrin, chlordane, dieldrin, dithiocarbamate fungicides, lindane, malathion, methoxchlor, toxaphene, endrin, captan, etc.

⁵ In 1953 and 1954 pyrethrum extract also was imported; data on amounts are not available.

⁶ Benzene hexachloride and composition, containing 1 percent or more gamma isomer, reported on a gamma isomer content basis.

⁷ Prior to 1952, DDT, benzene hexachloride, and weed killers were included in this category. Beginning Jan. 1, 1953, "Sulfur formulations 20% and over sulfur," and "Agricultural sulfur, not elsewhere classified," were reported separately; in 1953 these items totaled, respectively, 26.9 million pounds, and 23.3 million pounds; in 1954, 13.5 million pounds, and 31.9 million pounds; and in 1955, 10.8 million pounds and 26.4 million pounds.

U. S. Department of Commerce. Compiled from data supplied by the Bureau of the Census, the U. S. Tariff Commission, and the Bureau of Mines. Data for 1939-48 in Agricultural Statistics, 1952, table 714.

1947	.57	276	.83				

¹ Data indicate year of levy but not necessarily year of payment.² Index numbers computed before rounding taxes per acre to nearest cent.³ Derived from tax-per-acre figures in Column 1 and value-per-acre figures reported by Bureau of the Census for census years and estimated by Agricultural Research Service for intercensal years. Value-per-acre figures reported by the Bureau of the Census adjusted to exclude the value of public and Indian lands included in census figures. No taxes are levied on public and Indian lands. Taxes levied in any particular year are related to values for the next succeeding year.⁴ Revised.

Agricultural Research Service. Data for 1909-38 in Agricultural Statistics, 1953, table 724.

United States.....	868,421	927,243	.82	.87	395	422	.89	.92

¹ Data indicate year of levy but not necessarily year of payment.

² Taxes levied in each region were computed before rounding. State figures to nearest thousand dollars.

³ Index numbers were computed before rounding taxes per acre to nearest cent.

⁴ Derived from tax-per-acre figures in columns 3 and 4 and value-per-acre figures reported by Bureau of the Census for census years and estimated by Agricultural Research Service for intercensal years. Value-per-acre figures reported by the Bureau of Census adjusted by Agricultural Research Service to exclude the value of public and Indian lands included in census figures. No taxes are levied on public and Indian lands. Taxes levied in any particular year are related to values for the next succeeding year.

Agricultural Research Service.

Table 677.—Motor vehicles: Registrations, motor-fuel consumption, and road-user taxes (levied by the States), United States, 1939-55

¹ Farm Credit Administration.

² In computing rates, each Farm Credit district is given equal weight, but within each district the rate is weighted by number of days it is in force.

³ Contract rates on loans through national farm loan associations. Reduced rate in effect from 1939–June 30, 1944, was 3.5 percent.

⁴ Weighted average face rate of bonds outstanding on Dec. 31 each year, excluding bonds owned by the issuing agency.

⁵ Average yield on representative outstanding issues.

⁶ These rates represent interest on loans (less patronage refunds) plus loan service fees, costs of record searches, filing and releasing mortgages, etc., paid by borrowers, expressed as a percent of the average balance of loans outstanding during the year.

⁷ New series computed by expressing the interest income on loans, discounts, and notes receivable as a per annum rate on the average daily balance of such items outstanding during the year.

⁸ Weighted average face rate of debentures issued during the year.

⁹ Board of Governors of Federal Reserve System.

¹⁰ Annual averages of prevailing open-market rates in New York City.

¹¹ Annual ranges in discount rates on advances secured by Government obligations maturing or callable beyond 1 year and discounts of and advances secured by eligible paper.

¹² Comparable representative data not available.

¹³ A rate of 3/8 percent was effective from Oct. 30, 1942–Apr. 23, 1946, on advances secured by Government obligations maturing or callable in 1 year or less.

Agricultural Research Service. Data for 1917–38 in Agricultural Statistics, 1952, table 722.

Table 681.—Farm fire losses: Amount of loss, United States, 1940–55¹

¹ Continental United States only.² Includes regular mortgages, purchase-money mortgages, and sales contracts. Federal land bank and Federal Farm Mortgage Corporation mortgages in process of foreclosure were estimated for 1951 and 1952.³ Loans held by Federal Farm Mortgage Corporation were made on its behalf by Land Bank Commissioner. Authority to make new loans, except incidental to liquidation, expired July 1, 1947. On June 30, 1955, loans of the Federal Farm Mortgage Corporation were sold to the 12 Federal land banks.⁴ Includes regular mortgages, purchase-money mortgages, and sales contracts. Includes United States legal reserve companies only.⁵ Joint stock land banks began liquidation May 12, 1933, and completed it Apr. 26, 1951. Also includes banks in receivership.⁶ Prior to 1942, includes tenant purchase loans only. Beginning with 1942, includes farm development (special real estate) loans; beginning with 1944, includes farm enlargement loans; beginning with 1945, includes project liquidation loans; beginning with 1951, includes farm housing loans; and beginning in 1955, includes building improvement loans. Loans made for these purposes from State Corporation trust funds are included. Beginning in 1956, includes direct soil and water conservation loans to individuals; see table 702 for data on these loans for prior years. Loans insured by Farmers Home Administration are not included.⁷ 1939–47, insured commercial banks and 1948 to date, all operating banks. Beginning 1956, includes soil and water conservation loans insured by the Farmers Home Administration.⁸ Estimates of farm-mortgage debt held by individual and miscellaneous lenders for 1951 and later years should be regarded only as general indicators of trend.

Agricultural Research Service. Data for 1910–38 in Agricultural Statistics, 1952, table 727.

FOOTNOTES FOR TABLE 684

¹ Preliminary. Includes companies with more than half of their insurance on farm property. In recent years, about 85 percent of their total insurance has been on farm property. Data for some companies not available at time of publication.² Number of companies for which data were obtained; not necessarily complete for any year.³ Excess of assets over liabilities. Most farmers' mutuals are assessment companies and as such are not required to set up unearned premium reserves.⁴ No mutual fire insurance company with more than half its insurance on farm property.

Agricultural Research Service.

¹ Continental United States only.² Loans on regular mortgages only, excluding purchase money mortgages and sales contracts.³ Loans by the Land Bank Commissioner were made on behalf of the Federal Farm Mortgage Corporation. Authority to make Land Bank Commissioner loans expired July 1, 1947, except for the limited purpose of re-financing loans previously made by the Land Bank Commissioner. Liquidation of Commissioner loans was completed June 30, 1955.⁴ Includes tenant purchase, farm enlargement, farm development, and project liquidation farm ownership loans and similar loans from State Corporation trust funds. Figures represent amounts advanced for project liquidation loans and amounts obligated for all other types of loans. Data for 1944 include all project liquidation loans made from inception of program through Dec. 31, 1944, no breakdown by years being available for such loans prior to that date.⁵ Amount obligated. Data for 1950 include all loans obligated from beginning of farm housing program in November 1949-Dec. 31, 1950.⁶ Amount obligated.⁷ Figures are estimates of the Farm Credit Administration, based on reports from counties including 30-50 percent of the farms in the United States.⁸ Includes National and State banks, both commercial and savings.

Farm Credit Administration. Data for 1910-38 in Agricultural Statistics, 1952, table 728.

FARM MORTGAGES

¹ Continental United States only.² Loans on regular mortgages only, excluding purchase money mortgages and sales contracts.³ Loans by the Land Bank Commissioner were made on behalf of the Federal Farm Mortgage Corporation. The authority to make Land Bank Commissioner loans expired July 1, 1947, except for the limited purpose of refinancing loans previously made by the Land Bank Commissioner. Liquidation of Commissioner loans was completed June 30, 1955.⁴ Includes purchase money mortgages and sales contracts to the extent they were recorded.

Farm Credit Administration.

FOOTNOTES FOR TABLE 689.

¹ Includes regular mortgages, purchase-money mortgages, and sales contracts. Mortgages in process of foreclosure were estimated by States. Loans held by Federal Farm Mortgage Corporation were made on its behalf by Land Bank Commissioner. On June 30, 1955, loans of the Federal Farm Mortgage Corporation were sold to the 12 Federal Land Banks.

² Includes United States legal reserve companies only. Includes regular mortgages, purchase-money mortgages, and sales contracts.

³ Includes tenant-purchase, farm-enlargement, farm-development, project-liquidation, and farm-housing loans, and loans made for these purposes from State Corporation trust funds. Beginning January 1, 1956, also includes direct soil and water conservation loans to individuals; see table 702 for United States data on these loans for prior years.

⁴ Includes loans held by all operating banks, individuals, and miscellaneous lenders. State estimates are approximate and should be used only as general indicators of the amount of mortgage debt held by this group. See table 693 for State data on loans held by all operating banks (classified by location of bank rather than by location of security).

⁵ Includes District of Columbia.

Agricultural Research Service.

¹ Continental United States only.² All operating banks. Includes loans to individuals guaranteed by the Commodity Credit Corporation; beginning 1942, includes certificates of interest in pool of growers' notes. Beginning 1954 excludes certificates based on loans to cooperatives which are included in table 693. For 1956 no such certificates were reported.³ Excludes loans from the Agricultural Marketing Act revolving fund. This program is in liquidation and no loans were outstanding on Jan. 1, 1954 or Jan. 1, 1955. For data for years 1930-54, see Agricultural Statistics, 1952 and 1954.⁴ Loans "made" include renewals.⁵ Excludes loans guaranteed by CCC. Beginning 1947, also excludes loans held by associations in liquidation.⁶ Excludes loans to and discounts for production credit associations, regional agricultural credit corporations and banks for cooperatives. Includes loans guaranteed by CCC.⁷ Excludes loans guaranteed by CCC.⁸ Also includes rural rehabilitation, construction, and wartime adjustment loans, and such loans from State Corporation trust funds beginning Apr. 1, 1942.⁹ Includes production and economic emergency, special livestock, flood and windstorm restoration, flood damage, fur, and orchard loans; and loans of the Regional Agricultural Credit Corporation.¹⁰ Also includes drought relief and orchard rehabilitation loans.¹¹ Loans "outstanding" also include loans made from State corporation trust funds. Loans "made" during 1947-54, were exclusively to water facility cooperative associations.¹² Loans "outstanding" are cumulative net advances minus principal repayments; loans "made" are net advances to borrowers.¹³ Approximately $\frac{2}{3}$ of the individuals served by these cooperatives are farmers.¹⁴ Principally loans to public bodies and to power companies.¹⁵ Loans to commercial telephone companies.¹⁶ Excludes pooled loans against which certificates of interest were issued and loans guaranteed by CCC held by other lending agencies.¹⁷ Not available.

Agricultural Research Service. Data for 1929-38 in Agricultural Statistics, 1952, table 732.

¹ Includes loans of national and state commercial, mutual savings, stock savings, and private banks. Loans are classified according to location of bank and therefore, are not strictly comparable with data for other lenders, which are classified according to location of farm.

² Includes soil and water conservation loans insured by the Farmers Home Administration.

³ Also includes loans guaranteed by the Commodity Credit Corporation and certificates of interest in pool of C.C.C. loans. \$483,665,000, \$1,351,276,000, \$309,093,000 and \$362,127,000 of the certificates held on Jan. 1, 1954, July 1, 1954, Jan. 1, 1955, and July 1, 1955, respectively, were reported by C.C.C. as based on pooled loans to cooperatives. There were no such certificates outstanding on Jan. 1, 1956.

⁴ Alaska, Hawaii, Mariana Islands, Puerto Rico, and Virgin Islands.

Agricultural Research Service. Data from Federal Deposit Insurance Corporation.

¹ Includes tenant purchase, farm enlargement, farm development (special real estate), building improvement, and project liquidation loans. Loans from Corporation trust funds and farm development loans from "loans, grants, and rural rehabilitation" funds are also included.

² Amount advanced for project liquidation loans and obligated for all other types of loans. Includes subsequent loans to borrowers who received an initial loan in a prior year.

³ Loan advances less principal repayments.

⁴ Includes tenant purchase, farm enlargement, farm development, and building improvement loans.

⁵ Amount obligated. Includes subsequent loans to borrowers who received an initial loan in a prior year.

⁶ Amount obligated less principal repayments for Jan. 1, 1949 and 1950; loans advanced less principal repayments for Jan. 1, 1951–56.

⁷ In addition to farm housing loans reported in this table, farm housing grants in the amount of \$363,674 were made.

⁸ Includes project liquidation loans advanced from beginning of program through 1944.

⁹ Loans obligated from beginning of insured program in October 1947—December 1948.

¹⁰ Loans obligated from beginning of farm housing program in November 1949—December 1950.

Farmers Home Administration.

¹ In addition to loans reported, grants in the amount of \$96,216,000 were made from 1938 through 1946.

² Includes rural rehabilitation, construction, and wartime adjustment loans, and loans from Corporation trust funds.

³ In addition to production, economic and special emergency loans, includes fur, orchard, flood damage, and flood and windstorm restoration loans and loans made by Farm Credit Administration prior to transfer of Regional Agricultural Credit Corporation funds to Farmers Home Administration on April 16, 1949.

⁴ Includes direct and insured soil and water conservation loans.

Farmers Home Administration.

¹ State totals represent data for borrowers incorporated within the State.

² United States totals for other types of borrowers are: Public power districts, 48 borrowers, \$132,368,636; municipalities and other Government authorities, 26 borrowers, \$29,745,339; power companies, 24 borrowers, \$13,634,102.

³ Funds loaned to corporate borrowers for relending to individuals. Includes wiring, plumbing, and refrigeration installations.

⁴ Includes miles energized and consumers served, shown in tables 707 and 708.

Table 706.—Rural Electrification Administration: Annual revenues and expenses reported by REA electric borrowers, 1941–55

¹ Actual funds advanced out of loans, as shown in table 705.

² Includes data at time of repayment of loan for borrowers whose loans have been repaid in full. As of Jan. 1, 1956 there were 44 such borrowers, with 10,395 miles energized and 46,903 consumers connected.

³ Includes energy sales and revenues of power sold by one REA borrower to another.

Rural Electrification Administration.

Table 708.—Rural Electrification Administration: Amount of advances to electric borrowers from organization (May 11, 1935) to Jan. 1, 1956, and statistics on electric borrowers' operations, 1955, by States and Territories¹

¹ Includes loans made directly by Commodity Credit Corporation and loans made by banks and other lending agencies under CCC obligation to purchase. As far as possible, loans have been distributed according to the location of producers receiving the loans. Direct loans to cooperative associations for the benefit of members have been distributed according to the location of the association.

² Includes loans to cotton cooperatives and the 1933 cotton loan for which State data are not available.

Commodity Stabilization Service.

CHAPTER IX

AGRICULTURAL CONSERVATION AND FORESTRY STATISTICS

Statistics in this chapter concern conservation of various resources, particularly soil, water, and timber. Data on the production, supply, and distribution of Naval Stores is included because of its close association with forestry statistics.

Two tables on the farmland restoration program have been dropped and two tables on the emergency wind erosion control program have been substituted. A table has been added showing Soil Conservation Service assistance with referrals from the Agricultural Conservation Program Service.

Table 717—Agricultural conservation program: Assistance to farmers for carrying out conservation practices, United States and Territories, by program years, 1936–55¹

¹ Turpentine places under Naval Stores Conservation Program not included in "Participating farms" but number of payees included in "Payees." Farms participating in manager-type pooling agreements are included in "Participating farms" but only the managers are included in "Payees." Also includes data with respect to Emergency Programs.

² Cropland on participating farms as percentage of the cropland acreage in States. Includes data with respect to Emergency Programs.

³ Totals are rounded from complete figures.

⁴ Does not include program funds used for nondeductible services, SCS 5 percent agreements, or Naval Stores Conservation Program.

Table 719.—Agricultural conservation program: Selected conservation practices carried out, by States and Territories, 1954

¹ Standard ground limestone equivalent.

² Includes Emergency Program.

³ Includes seedings for annual cover, permanent cover on erosive land or for land-use adjustments, green manure crops, pasture seedings and reseedings, and permanent cover in orchards. A portion of the acreage starting in 1950 is on an increased acreage basis only.

⁴ Includes operations on cropland and noncrop pasture.

⁵ Includes stubble mulch and leaving stalks or stubble.

⁶ Includes dams for livestock water, erosion control (storage-type), and irrigation.

⁷ Includes contour stripcropping and stripcropping not on the contour.

⁸ 500 acres or less.

Agricultural Conservation Program Service.

534 AGRICULTURAL CONSERVATION AND FORESTRY STATISTICS

Table 721.—Emergency wind erosion control program: Type of practice and extent, 1954

Practice	Unit	Extent
Protective tillage of cropland	Acre	9,172,864
Establishment of protective cover	do	893,416
Field stripcropping	do	268,612
Contour stripcropping	do	11,816
Contour seeding close-sown crops	do	56,447
Spreading wind-blown soil	do	89,719
Rebuilding standard terraces	1,000 lin. ft.	93
Leaving stalks of sorghums, etc.	Acre	156,736
Stubble mulching	do	516,709
Surfacing clod-forming subsoil	do	2,711
Deferred grazing	do	1,272,800
Restoration of wind-damaged irrigated land	do	1,130
Protective tillage of noncrop pasture or range	do	79,630
Fencing pasture or range treated by protective tillage	Rod	636

¹ For specific procedure on organization of soil conservation districts, reference should be made to each State's soil conservation district laws. ² Upon request, the U. S. Department of Agriculture enters into memoranda of understanding with districts for such assistance from the departmental agencies as may be available.

³ Includes 1 wind-erosion district. ⁴ Includes 19 State cooperative grazing districts. ⁵ Includes the Imperial Irrigation District.

¹ Soil surveys of the Soil Conservation Service showing kinds of soil, slope, degree of erosion, and present land use are used to determine land capabilities for conservation planning and treatment of entire farms and ranches and of group enterprises, including about 75 million acres of standard soil surveys.

Soil Conservation Service.

Table 727.—Soil conservation practices: Newly applied in soil conservation districts, with Soil Conservation Service assistance, 1951-55¹

Practice	Unit	1951	1952	1953	1954	1955
Contour farming.....	Acres.....	3, 003, 449	2, 891, 991	3, 923, 547	3, 274, 225	2, 933, 728
Cover cropping.....	do.....	2, 876, 210	3, 241, 038	4, 813, 326	4, 555, 724	4, 094, 088
Stripcropping.....	do.....	838, 005	793, 517	811, 102	981, 965	939, 834
Seeding range and pasture.....	do.....	2, 571, 713	2, 872, 987	2, 769, 310	3, 148, 321	3, 062, 129
Pond construction.....	Number.....	52, 671	64, 268	58, 766	86, 421	75, 965
Tree planting.....	Acres.....	162, 106	173, 583	235, 259	276, 029	320, 18
Terrace construction.....	Miles.....	72, 685	60, 717	46, 850	50, 698	44, 95
Diversion construction.....	do.....	5, 534	5, 221	4, 381	5, 179	7, 079
Drainage.....	Acres.....	1, 258, 753	1, 568, 433	1, 508, 062	1, 602, 474	1, 441, 945
Irrigation land preparation.....	do.....	410, 925	452, 253	404, 685	474, 687	480, 054
Improved water application.....	do.....	598, 586	567, 741	1, 031, 684	1, 101, 292	1, 850, 415

¹ These data are for first-time application only and do not include duplication of acreage for reapplication or maintenance of those same practices year after year.

Soil Conservation Service.

538 AGRICULTURAL CONSERVATION AND FORESTRY STATISTICS

Table 728.—Soil conservation practices: Applied through farmer-district cooperation, with Soil Conservation Service assistance, by States and Territories, 1955¹

¹ Forest land area includes (a) lands which are at least 10 percent stocked by trees of any size and capable of producing timber or other wood products, or of exerting an influence on the climate or on the water regime; (b) land from which the trees described in (a) have been removed to less than 10 percent stocking and which have not been developed for other uses; (c) afforested areas; and (d) chaparral areas. Does not include orchard land. The minimum area that qualifies as forest land is one acre in the East and 10 acres in the West. Roadside, streamside, and shelterbelt strips of timber, in addition to meeting above requirements, must be at least 120 feet wide to qualify as forest land.

² Commercial forest land area is forest land which (a) is producing, or physically capable of producing, usable crops of wood (usually sawtimber), (b) economically available now or prospectively, and (c) not withdrawn from timber utilization.

Forest Service.

FOOTNOTES FOR TABLE 733.

¹ Covers work in following watersheds, Coosa River, Little Tallahatchie, Los Angeles, Potomac, Santa Ynez, and Yazoo.

² These principal physical works of improvement have been installed and major fire protection equipment items acquired for watershed improvement purposes under the Flood Control Acts by the Forest Service and cooperating State agencies.

Forest Service.

¹ Net volume in cubic feet of live sawtimber trees and live poletimber trees from stump to a minimum 4-inch top (of central stem) inside bark.

² Net volume in board feet, International $\frac{1}{4}$ -inch rule, of live sawtimber trees of commercial species. Sawtimber trees of commercial species contain at least one merchantable sawlog as defined by regional practice and which are of the following minimum diameters at breast height: Eastern region; Softwoods 9.0 inches and Hardwoods 11.0 inches. Western regions; all species 11.0 inches.

Forest Service.

FOOTNOTES FOR TABLE 738

¹ Estimates of timber cut include logging residues as well as growing stock material removed as timber products. Volumes refer to growing stock inventory and are in cubic feet roundwood excluding bark and in board feet log scale International $\frac{1}{4}$ -inch rule and represent the net cubic foot volume of live sawtimber and poletimber trees from stump to minimum 4-inch top (of central stem) inside bark and the net board foot volume of the sawlog portion of live sawtimber trees (from stump to merchantable top) cut or killed in logging. Individual columns may not add to total because of rounding.

² Includes box and shingle bolts, excisor bolts, turnery, dimension and handle stock, chemical wood, and other such miscellaneous products.

Forest Service.

¹ Timber cut refers to net inventory volume cut or killed in logging and converted to timber products or left as logging residues.

² The considerable excess of cut over growth for most western softwoods is not entirely due to overcutting. Growth is at a low level partly because 40 percent of the commercial forest area consists of old-growth timber which contributes little to net annual growth.

³ Less than 0.5 million cubic feet.

¹ Includes National forests, purchase units, experimental areas and land utilization projects.

National forests.—Areas established as national forests by legislative or executive action. Acres shown as national forest land, and other land administered by the Forest Service include small administrative sites outside of proclaimed boundaries and those portions of land utilization projects and other areas over which the Forest Service has supervision located within the national-forest boundaries. Land utilization and other areas located outside the national forests and under Forest Service supervision are not included; such areas are listed under the classifications "Land utilization projects" and "Other areas."

Purchase units.—Areas established by the Secretary of Agriculture with the concurrence of the National Forest Reservation Commission but not formalized by legislative or executive action. Acreage shown as national forest land, and other land administered by the Forest Service include all administrative sites outside the established boundaries and those portions of the land utilization projects and other areas over which the Forest Service has supervision located within the established purchase unit boundaries. Land utilization and other areas located outside the boundaries and under Forest Service supervision are not included; such areas are listed under the classification "Land utilization projects" and "Other areas."

Experimental areas.—Areas outside of the exterior boundaries of national forests or purchase units which have been reserved and dedicated to forest or range research and experimentation by legislative or executive action. The Massabesic Experimental Forest in Maine and the McNeill Division of the Harrison Experimental Forest in Mississippi, which have both purchase unit and experimental area status, are included only in the experimental area summaries.

Land utilization projects.—Lands outside the national forests and purchase units that are administered by the Forest Service in pursuance of certain national programs of land utilization and adjustment. Does not include land utilization project lands that are managed by the States or State agencies under lease or cooperative license agreement.

² Lands within the unit boundaries in private, State, county, and municipal, etc., ownership, and Federal lands over which the Forest Service has no jurisdiction.

Forest Service.

¹ Payments are 25 percent of total receipts remaining after deducting (a) payments to Arizona and New Mexico on account school-section lands administered by Forest Service, (b) appropriations of receipts under laws authorizing such appropriations for acquisition of lands in specified national forests or portions thereof, and (c) receipts from an area of the Superior National Forest, Minnesota, on account of which the State (for the counties) is paid $\frac{3}{4}$ percent of the appraised valuation in lieu of 25 percent of the receipts. States may not add to totals because of rounding.

Forest Service.

¹ Includes "B wood resin" produced in refining FF wood rosin to paler grades. Beginning Sept. 1, 1950, "B wood resin" used in making paper size is included in paper and paper size. All other "B wood resin" is included in chemicals and pharmaceuticals.

² Barrels of 50 gallons.

³ Drums of 520 pounds net weight.

⁴ Prior to 1950, turpentine used in making Beta pinene for consumption in manufacturing synthetic resins is included in ester gum and synthetic resins. For the other years this turpentine is shown in chemicals and pharmaceuticals.

⁵ Consumption of turpentine and rosin by railroads, primarily for maintenance, is omitted. Consumption by shipyards is included in "Other industries."

Agricultural Marketing Service.

¹ Rosin, not for violins; imports for consumption, as reported by the Bureau of the Census.

² Drums of 520 pounds net weight.

³ Reports of Bureau of the Census.

⁴ Total supply less exports and Mar. 31 stocks.

⁵ Due partly to unreported industrial consumption and partly to failure of some consumers to distinguish in their reports between gum rosin, wood rosin, and modified or derived rosin.

Agricultural Marketing Service. Data for 1932–45 in Agricultural Statistics, 1952 table 810.

CHAPTER X

CONSUMPTION AND FAMILY LIVING

The statistics in this chapter deal with the consumption of food by both rural and urban people, retail price levels, and other aspects of family living of farm people. Data presented here on quantities of food available for consumption are based on material presented in the earlier commodity chapters, but they are shown here at the retail level, a form that is more useful for an analysis of the demand situation faced by the producer. Data on quantities of farm-produced food consumed directly by farm households are presented in the commodity chapters. Its value and the rental value of the farm home are given in the section on farm income, tables 656-658.

A new table gives farm-operator family level-of-living indexes. Tables on quantity and value of food used at home and nutritive value of diets of rural families in the North Central region and on average food expenditures by families in the United States, by regions, have been substituted for tables for the North Central region on value of food obtained without direct expense by rural families, quantity and value of home-produced foods of farm families, and on canning and freezing of foods by rural families.

Revisions of per capita consumption owing to changes in population estimates, not completed in time for inclusion here, may affect the figures given in tables 759, 760, and 761. See Introduction.

Agricultural Marketing Service. Estimates compiled from data of Federal agencies. The basic population estimates are from the Bureau of the Census, with adjustments for underenumeration. Figures for 1939 and January 1940 refer to the total population resident in the U. S. For the period Jan. 1, 1941-Jan. 1, 1946, adjustments have been made to allow for members of the armed forces eating out of civilian supplies; the adjustments were originally estimated by OPA on the basis of data from several official sources. Estimates for dates subsequent to Jan. 1, 1946 refer to the civilian population. Data for 1909-38 in Agricultural Statistics, 1954, table 756.

¹ Indexes based on data from the appropriate Censuses of Agriculture. The index for a given area is the unweighted average of the index values for all counties or combinations of counties in that area except where otherwise noted. These indexes are based on the following items: (1) Percentage of farms with electricity; (2) percentage of farms with telephones; (3) percentage of farms with automobiles; and (4) average value of products sold or traded in the year preceding the census (adjusted for changes in purchasing power of farmer's dollar). The index has a mean value of 100 for the United States in 1945 and a value of zero when all of the items in a county have a value of zero.

² Indexes were not computed for several counties in Arizona and New Mexico, and 1 in Utah for certain years because the treatment of Indians on reservations was not comparable. Therefore, State averages are not shown for Arizona and New Mexico and the averages for Utah do not take 1 county into account.

Agricultural Marketing Service.

FOOD CONSUMPTION

559

¹ Derived from data on per capita consumption of individual foods, using estimates of retail weights multiplied by average retail prices in 1947-49. Civilian consumption only, 1941 to date. Data for livestock and poultry products revised to incorporate changes resulting from the 1954 Census of Agriculture.² Fat cuts of pork are in the "Meats, poultry, fish" group.³ Preliminary.⁴ Includes frozen vegetables, canned soups, and canned baby foods.

Agricultural Marketing Service. Data for 1909-38 in Agricultural Statistics, 1953, table 824.

FOOTNOTES FOR TABLE 761

¹ Quantities of nutrients computed on the basis of estimates of apparent per capita consumption (retail basis), including estimates of produce of rural and urban home gardens. No deduction has been made in nutrient estimates for loss or waste of food in homes, public eating places, and institutions or for destruction or loss of nutrients during the preparation of food. Civilian per capita only, 1941 to date. Data for iron, thiamine, riboflavin, and niacin include estimates of the quantity of these nutrients added to prepared cereals, white flour, and bread.² Preliminary.

Agricultural Research Service. Data for 1909-38 in Agricultural Statistics, 1953, table 827.

														98

¹ Estimated from per capita data by means of average loss factors with the addition of estimates of supplies from rural and urban home gardens and of minor food items. Civilian consumption only, beginning 1941. Data for livestock and poultry products revised to incorporate changes resulting from the 1954 Census of Agriculture.

² Fluid whole milk equivalent based on calcium content. One quart of fluid milk weighs 2.15 pounds.

³ Sum of approximate retail weights.

⁴ Allows for breakage from farm to retail.

⁵ Excludes bacon and other fat pork cuts; includes edible offal, game, and small quantity of noncommercial fish; poultry on eviscerated basis.

⁶ Product weight except for "other edible fats and oils," which represents oils used in salad dressings, etc.

⁷ Nuts on a shelled basis.

⁸ Includes fresh and processed items and produce of rural and urban home gardens. Product weight except for concentrated citrus juices which are on a single strength basis in the citrus and tomato group.

⁹ Excludes corn sugar and syrup.

¹⁰ Excludes sugar used in condensed milk, frozen dairy products (except ice cream), and processed fruits and vegetables.

¹¹ Includes coffee on roasted basis and chocolate liquor equivalent of cocoa and chocolate products.

¹² Preliminary.

Agricultural Marketing Service. Except for milk equivalent of dairy products (calcium basis), comparable data for 1909-38 in Agricultural Statistics, 1953, table 825.

¹ Housekeeping families of 2 or more persons. Represents the nutritive value of food brought into the kitchen for household use, making allowance for inedible waste such as bones, pits, stems, peels, and skins, and some fat normally trimmed away, and for average cooking losses of thiamine, riboflavin, niacin, and ascorbic acid. The nutritive value of small quantities of edible foods estimated by families to have been discarded or fed to animals during the survey week has also been deducted. No deduction was made for losses due to spoilage, poor handling, excessive peeling and trimming, or during storage of leftovers. There is likewise no allowance for small quantities of minerals (especially calcium) that were probably obtained from drinking water and baking powder.

² Net money income after taxes, 1951.

³ Purchased, home-produced, and received as gift or pay.

⁴ Includes those from whom no income data were obtained.

⁵ The recommended allowances of the National Research Council per nutrition unit (man of moderate physical activity) per day are: Calories 3,000, protein 70 gm., calcium 0.8 gm., iron 12.0 mg., vitamin A value 5,000 I.U., thiamine 1.5 mg., riboflavin 1.8 mg., niacin 15 mg., ascorbic acid 75 mg. These represent the 1953 revision for calcium, and the 1948 revision for other nutrients. There is no recommendation for fat.

Agricultural Research Service. Compiled from survey of food consumption of rural households of 2 or more persons in 12 North Central States, spring 1952. Data for money value of family food in 1951, and quantities of food home-produced, canned, or frozen during the year in Agricultural Statistics, 1955, tables 766, 767, and 768. See also companion table 763 in this book.

FOOTNOTES FOR TABLE 763

¹ Housekeeping families of 2 or more persons.

² Net money income after taxes, 1951.

³ Includes nuts, soup, pickles, relishes, pie filling, leavening agents, seasonings not shown separately.

⁴ Approximately the quantity of fluid milk to which dairy products (except butter) are equivalent in minerals and protein.

⁵ Purchased, home-produced, and received as gift or pay. For farm families the difference between the averages shown for food from all sources and purchased gives a satisfactory estimate of home production because little food was received as gift or pay; for nonfarm families food from all sources was mainly purchased.

⁶ Includes those from whom no income data were obtained.

⁷ Foods obtained without direct expense and eaten at home by farm and nonfarm families were valued at prices reported respectively by farm and nonfarm families in the survey group purchasing a similar item.

Agricultural Research Service. Compiled from survey of food consumption of rural households of 2 or more persons in 12 North Central States, spring 1952. See table 764 for number of households.

¹ A subsidy program to expand markets for agricultural products, maintain outlets for Section 32 commodities, and support school lunch programs. Sponsors of school lunch programs are reimbursed by the Government for local purchases of food on a basis of the quality and quantity of meals served. The program was started in February 1943. The figure for 1946 does not include the sum of \$9,694,703, expended under authority contained in Section 5 of the National School Lunch Act to provide nonfood assistance for the school lunch programs. Approximately 39,000 schools purchased luncheon equipment under this program. Total cost in subsidy payments by the Government; does not include costs of administration of the program.

² Provides for distribution, without charge to recipients, of food commodities acquired by the Government and distributed under provisions of Section 32, Public Law 329, 74th Congress, approved Aug. 24, 1935, as amended. Beginning in 1949, data include Commodity Credit Corporation commodities distributed pursuant to Section 416, Public Law 439, 81st Congress, approved Oct. 31, 1949. In the fiscal year beginning July 1, 1949, schools received potatoes in accordance with Section 3, Public Law 471, 81st Congress, approved Mar. 31, 1950.

³ Total cost to the Government of the commodity as delivered to the distributing agency; includes cost of purchase, handling, warehousing, and transportation, but does not include costs of administration of the program.

⁴ Distribution of commodities acquired by the Government and distributed under provisions of Section 6 of the National School Lunch Act, Public Law 396, 79th Congress, approved June 4, 1946.

⁵ Distribution, without charge to recipients, of food commodities acquired by the Government and distributed under provisions of Section 32, Public Law 329, 74th Congress, approved Aug. 24, 1935, as amended. Beginning in 1949, data include Commodity Credit Corporation commodities distributed pursuant to Section 416, Public Law 439, 81st Congress, approved Oct. 31, 1949. In the fiscal year beginning July 1, 1949, potatoes were distributed under provisions of Section 3, Public Law 471, 81st Congress, approved March 31, 1950. Distribution to ultimate eligible recipients is accomplished through cooperating distributing agencies in States.

⁶ Preliminary.

Agricultural Marketing Service. Data for 1939-42, for the school milk plan in Agricultural Statistics 1948, table 657. Data for 1938-42, covering the food stamp and relief milk programs, in Agricultural Statistics, 1948, table 658.

FOOTNOTES FOR TABLE 768

¹ In this tabulation, "peak participation" is the participation during the month of the year when the largest number of persons participated in the program; "average participation" is the average for the 12 months of the fiscal year.

² Distribution, without charge to recipients, of food commodities acquired by the Government and distributed under provisions of Section 32, Public Law 320, 74th Congress, approved Aug. 24, 1935, as amended, under Section 416, Public Law 439, 81st Congress, as amended; and under Section 6 of the National School Lunch Act, Public Law 396, 79th Congress, approved June 4, 1946. Distribution to ultimate eligible recipients is accomplished through cooperating distributing agencies in States. Eligible recipients include school lunch programs, eleemosynary institutions, and households receiving public assistance from State or local welfare agencies.

³ A subsidy program to expand markets for agricultural products, maintain outlets for Section 32 commodities, and support school lunch programs. Sponsors of school lunch programs are reimbursed by the Government for local purchases of food on basis of the quality and quantity of meals served. The program was started in February 1943.

¹ Preliminary. Distribution, without charge to recipients, of food commodities acquired by the Government and distributed under provisions of Section 32, Public Law 320, 74th Congress, approved August 24, 1935, as amended. Part of the distribution to school lunch programs, 87,453,422 pounds costing \$14,802,020, consisted of commodities distributed under provisions of Section 6 of the National School Lunch Act. The data also include distribution under Section 416 of the Agricultural Act of 1949, Public Law 439, 81st Congress, approved October 31, 1949, for schools, institutions, and welfare cases. Section 416 distribution to these outlets was 258,824,024 pounds, at a cost to the Government of \$91,384,483. Distribution to ultimate eligible recipients is accomplished thru cooperating distributing agencies in States. Eligible recipients include school lunch programs, eleemosynary institutions, and households receiving public assistance from State or local welfare agencies.

² Total cost to the Federal Government of the commodity as delivered to the distributing agency; it includes the cost of purchase, handling, warehousing, and transportation, but does not include costs of administration of the program.

Agricultural Marketing Service.

¹ The consumers' price index calculated on the base period (1935-39=100), has been converted to the new base (1947-49=100). This index reflects retail prices of goods and services commonly bought by average families with moderate income in 46 urban areas of the United States. Beginning January 1953 this index became the official index released monthly by the Bureau of Labor Statistics.

Agricultural Marketing Service. Compiled from data of the Bureau of Labor Statistics. Data for 1913-51 on 1935-39=100 base in Agricultural Statistics, 1952, table 827.

1946	1,669	3.58	4,474	1.99	1955	3,650	2.76	8,180	1.79
1947	1,802	3.41	4,815	1.79					

¹ These rates do not include charges for the amortization of investment in lines or charges for line extensions where such are levied by the utility.

² The data on energy used for farms west of the 100th meridian vary year by year, depending on the proportion of the total consumption used for irrigation pumping. As more nonirrigation consumers are served the average consumption is reduced. Hence, the figures for the West are not strictly comparable to those for the East.

Agricultural Research Service. Compiled from reports of the Edison Electric Institute. Data for 1929-38 in Agricultural Statistics, 1952, table 834.

¹ The number of farms receiving Central-station electric service from REA borrowers and all other suppliers as of June 30, 1956, is based on the annual estimates of unelectrified farms made by REA. Although not strictly comparable, this estimate is shown as a percentage of the total number of farms reported by the 1954 Census of Agriculture.

Rural Electrification Administration.

¹ State totals represent data for borrowers incorporated within the State.

² Cumulative net loan allocations (rescissions deducted). Includes amounts not yet under loan contract.

³ Includes pole miles of line to be constructed or rebuilt.

⁴ Excludes pole miles of line to be rebuilt.

Rural Electrification Administration.

CHAPTER XI

MISCELLANEOUS AGRICULTURAL STATISTICS

This chapter contains miscellaneous data which do not fit into the preceding chapters. Included here are summary tables on foreign trade in agricultural products; weather data pertaining to farming; statistics on fishery products; refrigerated warehouse space; and freight rates on transportation of agricultural products. Only two tables are carried on weather but more complete information can be secured from the Weather Bureau, U. S. Department of Commerce.

Foreign Trade in Agricultural Products

The term "foreign trade" applies to trade between the United States, including its Territories, and foreign countries. Trade between continental United States and its Territories is referred to as "shipments." Alaska, Hawaii, Puerto Rico, and, since January 1, 1935, the Virgin Islands are Territories. Beginning January 1, 1940, trade with foreign countries through the customs district of the Virgin Islands is not included in United States trade statistics. Figures for shipments out of the Territories include small quantities to other Territories. In statistics of foreign trade, forest products and distilled liquors are considered nonagricultural products, as distinct from strictly agricultural products.

Separate figures are not being compiled by the Bureau of the Census on exports under various special economic-aid programs but these exports are included in figures appearing in this publication. Excluded from the export figures are shipments to the United States armed forces abroad for their own use, shipments between continental United States and the Territories and possessions, and shipments between the Territories and possessions. Effective January 1, 1950, also excluded from the dollar value is the export subsidy paid to private United States exporters on shipments of domestically produced agricultural commodities. The export subsidy programs have included the following commodities: Wheat, wheat flour, raisins, prunes, apples, oranges, canned juice, honey, cotton, unshelled filberts, and fresh pears. These subsidies have applied only on exports to certain countries or under certain programs and are usually in effect for limited periods.

Imports for consumption include imports for immediate consumption plus withdrawals from bonded warehouses. In the classification of agricultural imports into supplementary and complementary groups, all those similar to agricultural commodities produced commercially in the United States and all others that are interchangeable in use to any significant extent with such United States commodities are considered supplementary. Complementary includes all others, about 95 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and spices.

Table 775.—Foreign trade: Value of total agricultural exports and imports, United States 1939-54

1953 ³	15,226	2,936	19	62	10,498	4,176	1,694	2,482	57	41
1954 ⁴	14,870	3,143	21	70	10,422	3,787	1,515	2,271	48	40

¹ Beginning January 1942, the value of agricultural exports includes "food exported for relief or charity by individuals and private agencies." These figures, for which separate commodity detail is not available, include a small amount of certain foodstuffs other than agricultural. They were not included in census reports as agricultural prior to 1949.

² Supplementary agricultural imports consist of all imports similar to agricultural commodities produced commercially in the United States, together with all other agricultural imports interchangeable to any significant extent with such United States commodities. Complementary agricultural imports include all others, about 95 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and spices.

³ Excess of imports.

⁴ Preliminary.

Total supplementary ²								1,552,540	2,289,283	1,970,878	1,910,622	1,693,760
Total complementary ²								1,624,851	2,857,903	2,727,942	2,392,852	2,482,132

¹ Preliminary.

² Supplementary agricultural imports consist of all imports similar to agricultural commodities produced commercially in the United States, together with all other agricultural imports interchangeable to any significant extent with such United States commodities. Complementary agricultural imports include all other, about 95 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea and spices.

³ Imports include horses and mules for immediate slaughter and teams owned by immigrants.

⁴ Less than 500.

⁵ Includes "olives in brine" and "pineapples prepared and preserved" only.

⁶ Prior to 1950–51 corn flour included in cornstarch.

⁷ Not separately classified prior to January 1, 1952.

⁸ January–June.

⁹ Excludes corn, barley, oats, grain sorghums, and wheat (unfit for human consumption).

¹⁰ Exports include palm-kernel oil.

¹¹ Not separately classified.

¹² Imports, beginning 1953 includes coffee imported through the custom district of Puerto Rico.

¹³ These figures for which separate commodity detail is not available, include a small amount of certain food stuffs other than agricultural. They were not included in census reports as agricultural prior to 1949.

1955 ⁵	3.59	131	130	117	126	128	124

¹ Transportation bill for all years and revised railroad freight rate indexes beginning 1945 are on a calendar year basis. Earlier freight rate indexes are on crop years beginning July. They differ from those previously published primarily because of changes from crop year to calendar year in the base period 1947-49. The change from crop to calendar year (1945 to date) was made to increase comparability with other index series.

² Estimates of total expenditures by shippers for transportation (except local hauling) of farm products for civilian consumption by rail and truck, including private trucks. Year-to-year variations are caused by changes in rates, changes in volume shipped, length of haul, and some additional minor factors.

³ All index number series beginning with 1945, and those for livestock, meats, and fruits and vegetables prior to 1945 are of the weighted aggregative type. They are based upon averages of rates in effect during the year. Annual averages are computed by weighting the applicable monthly rates by the estimated proportion of annual shipments moved thereon, assuming an average seasonal distribution of shipments. In constructing the combined index, group indexes were weighted by average revenues for 1947-49.

⁴ New index series with postwar weights used for years after 1945. Linkage with original indexes made in 1945.

⁵ Preliminary.

Agricultural Marketing Service. Data for 1913-38 in Agricultural Statistics, 1953, table 844.
