INTRODUCTION

Agricultural Statistics brings together each year the more important series of statistics concerning Agriculture and closely related subjects. For the most part, the data included herein were prepared in the U. S. Department of Agriculture, or compiled by the staff for official use. A few of the tables were prepared in other Government agencies. A particular effort has been made to meet the diverse interests and needs of the general public for a reliable reference book on agricultural production, supplies, consumption, facilities, costs, and returns. The tables presented cover a wide variety of facts in forms suited to most common uses. Persons needing daily, weekly, and monthly information are served by the current reports of the agencies which prepare the summary statistics appearing in this book and to which the tables are credited. Research workers and others will usually wish to obtain direct from the agencies the latest facts bearing on particular problems associated with data contained in the tables included here. Inquiries concerning more current or more detailed data, the statistical methodology used, past and prospective revisions, etc., should be addressed direct to the agency responsible for the table.

The historical series in this volume have been generally limited to data beginning with 1939 or 1940, or to the most recent 10 years. Last year's issue, *Agricultural Statistics, 1952*, was expanded to carry a longer series of years for most of the tables and should be used as a reference by those who have a need for data for the earlier years. Many of the tables in this issue carry a reference in the source note to the page and table in *Agricultural Statistics, 1952* where comparable data for earlier years can be found.

The table of contents indicates the general layout of the book, and page headings show the subdivisions within each chapter. Chapter XI, Consumption and Family Living, which was instituted last year has been continued and an attempt made to expand the series relating to these phases of the agricultural industry.

RECENT REVISIONS

Most of the revisions in data for recent years occasioned by the receipt and review of data from the 1950 Census of Agriculture were included in *Agricultural Statistics, 1952*. However, there were items for which revisions were not completed when the volume went to press and these are included here. Revisions in the estimates for the various truck crops and a few other commodities and in the per capita consumption series are examples. The per capita series have been carried back to 1909 or the beginning of the series in most cases since revisions of population data caused changes in many of the years prior to 1940. The 10-year averages in this volume have also been computed from the revised estimates, something that time and facilities did not permit for the 1952 issue.

DEPARTMENT ESTIMATES AND CENSUS DATA

Estimates of the Department of Agriculture are made primarily to give timely current State and national totals and averages. They are based on "benchmark" data supplied by the Censuses of Agriculture taken every 5 years and on sample data supplied by farmers and by people who do business with farmers, together with check data from other sources. Being estimates, they are subject to revisions as more data become available from commercial or Government sources. Unless otherwise indicated, the totals for the United States shown in the various tables on acreage, production, numbers, price, value, supplies, and disposition are based on official Department estimates and excludes States for which no official estimates are compiled.

Census data are the result of the most nearly complete enumeration or actual count that can be made, and are used for many other purposes than determining States and national totals and averages. For example, each census provides much detailed information about counties and minor civil divisions. It also provides data that can be organized into many frequency distributions and cross-classifications for large and small portions of the country or for different segments of the agricultural industry. The definition and manner of handling a census precludes revising census data to bring them in line with other indications, even though in practice it is difficult to obtain a complete enumeration. Any effort to make such revisions or adjustments would produce estimates.

For census years, many tables carry both census totals and this Department's estimates. Generally, where there are appreciable differences between the census totals and this Department's final estimates, the processes of checking and revising estimates have indicated that some sources provide more nearly complete information about some items than the census has been able to obtain. For example, this Department's estimates of tobacco production can be considered more precise than census totals, because the estimates are revised in line with actual production as shown independently by Internal Revenue records and State records of tobacco sales. Sugar beet and sugar cane production and acreage estimates are adjusted to quantities actually reported by sugar factories. Check information on peanuts and rice is available from processors for areas sometimes including several States. In a number of other instances allowances have been made for known incompleteness of coverage by the census.

For livestock and poultry, the Department's estimates of inventory numbers relate to January 1. Most recent censuses have not enumerated numbers on that date. The decennial censuses have usually related to April 1, with the average date of enumeration falling somewhat later. The 1945 census was taken as of January 1, but with the trying wartime conditions, was delayed over a considerable length of time in a number of States with the result that reported inventory numbers did not always represent the actual January 1 inventory. These situations have made it necessary to adjust census totals to a January 1 equivalent basis, taking into account changes that occurred between the January 1 date and the actual date of enumeration.

DEFINITIONS

"Farm Value" as applied to crops in the various tables, is derived by multiplying production by the estimated season average price received by farmers for that portion of the commodity actually sold. In the case of fruits and vegetables, however, quantities not harvested because of low prices or other economic factors are excluded from the computation of farm value. The term is used in the inventory tables on livestock and poultry to mean value of the number of head on farms on January 1. It is derived by multiplying the number of head by an estimated value per head as of that date.

The word "Year" (alone) in a column heading means "calendar year." "Ton" when used in this book without qualification means a short ton of 2,000 pounds.

WEIGHTS, MEASURES, AND CONVERSION FACTORS

The following table on weights, measures, and conversion factors covers the most important agricultural products, or the products for which such information is most frequently asked of the Department of Agriculture. It does not cover all farm products nor all containers for any one product. The table this year contains a number of revisions.

The information has been assembled from various sources within the Department and from State schedules of legal weights. For most products, particularly fruits and vegetables, there is a considerable variation in weight per unit of volume, due to differences in variety or size of commodity, condition and tightness of pack, degree to which the container is heaped, etc. Effort has been made to select the most representative and fairest average for each product. For those commodities which develop considerable shrinkage, the point of origin weight or weight at harvest has been used.

The approximate or average weights, as given in this table do not necessarily have official standing as a basis for packing or as grounds for settling disputes. Not all of them are recognized as legal weights. The table was prepared chiefly for use of workers in the Department of Agriculture who have need of conversion factors in statistical computations.

WEIGHTS, MEASURES, AND CONVERSION FACTORS

[See explanatory text just preceding this table]

WEIGHTS AND MEASURES

| Commodity | Unit ¹ | Approximate net weight | Commodity | Unit ¹ | Approximate net weight |
|-----------------------------|---------------------------------|------------------------|------------------------|------------------------------|------------------------|
| | | <i>Pounds</i> | | | <i>Pounds</i> |
| Alfalfa seed | Bushel | 60 | Grapes: | | |

¹Standard bushel used in the United States contains 2,150.42 cubic inches; the gallon, 231 cubic inches; the cranberry barrel, 5,826 cubic inches; and the standard fruit and vegetable barrel, 7,056 cubic inches. Such large-sized products as apples and potatoes sometimes are sold on the basis of a heaped bushel, which would exceed somewhat the 2,150.42 cubic inches of a bushel basket level full. This also applies to such products as sweetpotatoes, peaches, green beans, green peas, spinach, etc.

- ² Approximate inside dimensions, 10½ by 11½ by 18 inches.
³ Approximate inside dimensions, 11 by 13 by 17 inches.
⁴ Approximate inside dimensions, 4¾ by 12½ by 16½ inches.
⁵ Approximate inside dimensions, 4½ by 16 by 16½ inches.
⁶ Approximate inside dimensions, 9¾ by 11 by 20¾ inches.
⁷ Approximate dimensions, 4½ by 13½ by 16½ inches.
⁸ Approximate inside dimensions, 13 by 12 by 32 inches.
⁹ Approximate inside dimensions, 8 by 12 by 22 inches.
¹⁰ Inside dimensions vary. Common sizes are 13 by 13 by 22½ inches, and 13 by 15½ by 23 inches.
¹¹ Approximate inside dimensions, 13 by 18 by 21¾ inches.
¹² Approximate inside dimensions, 13 by 13 by 22½ inches.
¹³ This is the weight commonly used in trade practices, the actual weight varying according to temperature conditions.
¹⁴ Approximate inside dimensions, 9¾ by 16 by 20 inches.
¹⁵ Approximate inside dimensions, 4½ by 11½ by 14 inches.
¹⁶ The standard weight of 70 pounds is usually recognized as being about 2 measured bushels of corn, husked, on the ear, because it requires 70 pounds to yield 1 bushel, or 56 pounds, of shelled corn.
¹⁷ For statistical purposes the bale of cotton is 500 pounds or 480 pounds net weight. Prior to Aug. 1, 1946, the net weight was estimated at 478 pounds. Actual bale weights vary considerably, and the customary average weights of bales of foreign cotton differ from that of the American square bale.
¹⁸ This is the average weight of cottonseed, although the legal weight in some states varies from this figure of 32 pounds.
¹⁹ Approximate inside dimensions, 9¼ by 10¼ by 15 inches.
²⁰ Approximate inside dimensions, 1¾ by 11 by 16½ inches.
²¹ Approximate inside dimensions, 12 by 12 by 24 inches.
²² Approximate inside dimensions, 11½ by 11½ by 24 inches.
²³ Until 1942, these net weights as used in this Department (for figuring quantities and values of bulk fruit in terms of packed boxes) were 80 pounds for grapefruit, 76 pounds for lemons, and 70 pounds for oranges. Grapefruit in California areas other than the Desert Valleys, averages 68 pounds per box compared with 65 pounds in the Valleys.
²⁴ Approximate inside dimensions, 5¾ by 13½ by 16½ inches.
²⁵ Approximate inside dimensions, 4¾ by 16 by 16½ inches.
²⁶ Approximate inside dimensions, 9¾ by 13 by 25 inches.
²⁷ Approximate inside dimensions vary. Common size is 4½ by 11½ by 16½ inches.
²⁸ Approximate inside dimensions, 8½ by 11½ by 18 inches.
²⁹ Approximate inside dimensions, 13¾ by 11 by 22 inches.
³⁰ Approximate inside dimensions, 12 by 10½ by 33 inches.
³¹ Inside dimensions vary. Ranges from 4 by 16 by 16½ inches to 6 by 16 by 16½ inches.
³² This average of 55 pounds indicates the usual weight of sweetpotatoes when harvested. Much weight is lost in curing or drying, and the net weight when sold in terminal markets may be below 55 pounds.
³³ Approximate inside dimensions, 9½ by 9½ by 19½ inches.

(See conversion factors on next page.)

CONVERSION FACTORS

| Commodity | Unit | Approximate equivalent |
|---|-----------------------------------|---|
| Apples | 1 pound dried | 7 pounds fresh; beginning 1943, 8 pounds fresh |
| Do | 1 pound chops | 5 pounds fresh |
| Do | 1 barrel | 3 boxes or 3 bushel baskets |
| Do | 1 case canned ³⁴ | 1.4 bushels fresh |
| Applesauce | 1 case canned ³⁴ | 1.2 bushels fresh |
| Apricots | 1 pound dried | 5½ pounds fresh |
| Barley flour | 100 pounds | 4.69 bushels barley |
| Beans, lima | 1 pound shelled | 2 pounds unshelled |
| Beans, snap or wax | 1 case canned ³⁶ | 0.010 tons fresh |
| Buckwheat flour | 100 pounds | 3.47 bushels buckwheat |
| Cane sirup | 1 gallon | 5 pounds sugar |
| Cherries, sour | 1 case canned ³⁴ | 0.023 tons fresh |
| Chickens | 1 pound live weight | 0.89 pounds New York dressed weight |
| Do | do | 0.85 pounds ready-to-cook weight |
| Corn, shelled | 1 bushel (56 lbs.) | 2 bushels (70 pounds) of husked ear corn |
| Corn, sweet | 1 case canned ³⁶ | 0.038 tons fresh |
| Cornmeal: | | |
| Degermed | 100 pounds | 3.16 bushels corn, beginning 1946 |
| Nondegermed | do | 2 bushels corn, beginning 1946 |
| Cotton | 1 pound ginned | 2.68 pounds unguined (with no allowance for trash) |
| Dairy products: | | |
| Butter | 1 pound | 20.6 pounds milk |
| Cheese | do | 10 pounds milk |
| Condensed milk, whole | do | 2.3 pounds milk |
| Evaporated milk, whole | do | 2.14 pounds milk |
| Ice cream ³⁸ | 1 gallon | 15 pounds milk |
| Ice cream ³⁶ (eliminating fat from butter and concentrated milk) | 1 gallon | 12 pounds milk |
| Malted milk | 1 pound | 2.6 pounds milk |
| Powdered milk | do | 7.6 pounds milk |
| Powdered cream | do | 19 pounds milk |
| Eggs | 1 case | 45 pounds |
| Eggs, shell | 1 pound | 0.87 pounds frozen or liquid whole eggs, since 1950 |
| Do | do | 0.23 pounds dried whole eggs, since 1950 |
| Figs | 1 pound dried | 3 pounds fresh in California; 4 pounds fresh elsewhere |
| Flaxseed | 1 bushel | About 2½ gallons oil |
| Grapfruit, Florida | 1 case canned juice ³⁶ | 0.83 box fresh fruit |
| Linseed oil | 1 gallon | 0.4 bushel flaxseed |
| Malt | 1 bushel (34 lbs.) | 1 bushel barley (48 lbs.) |
| Maple sirup | 1 gallon | 8 pounds maple sugar |
| Nuts: | | |
| Almonds, imported | 1 pound shelled | 3¼ pounds unshelled |
| Almonds, California | do | 2.22 pounds unshelled through 1949; 2 pounds thereafter |
| Brazil | do | 2 pounds unshelled |
| Cashews | do | 4.55 pounds unshelled |
| Chestnuts | do | 1.19 pounds unshelled |
| Filberts | do | 2.22 pounds unshelled through 1949; 2.5 pounds thereafter |
| Pecans: | | |
| Seedling | do | 2.78 pounds unshelled |
| Improved | do | 2.50 pounds unshelled |
| Pignollas | do | 1.3 pounds unshelled |
| Pistachios | do | 2 pounds unshelled |
| Walnuts: | | |
| Black | do | 8¼ pounds unshelled |
| Persian (English) | do | 2.56 pounds unshelled |
| Oatmeal | 100 pounds | 7.6 bushels oats, beginning 1943 |
| Oranges, Florida | 1 case canned juice ³⁶ | 0.63 box fresh |
| Peaches, California, freestone | 1 pound dried | 5½ pounds fresh through 1918; 6 pounds fresh for 1919-23, and 6½ pounds fresh from 1929 to date |
| Peaches, California, clingstone | do | 7½ pounds fresh |
| Peaches, clingstone | 1 case canned ³⁴ | 1.0 bushels fresh |
| Do | do | 0.0230 tons fresh |
| Peanuts | 1 pound shelled | 1½ pounds unshelled |
| Pears | 1 pound dried | 5½ pounds fresh |
| Pears, Bartlett | 1 case canned ³⁴ | 1.1 bushels fresh |
| Do | do | 0.026 tons fresh |
| Peas, green | 1 pound shelled | 2½ pounds unshelled |
| Do | 1 case canned ³⁶ | 0.010 tons fresh (shelled) |
| Prunes | 1 pound dried | 2½ pounds fresh in California; 3 to 4 pounds fresh elsewhere |

See footnotes at end of table.

CONVERSION FACTORS—Continued

| Commodity | Unit | Approximate equivalent |
|----------------------------------|-----------------------------|---|
| Raisins | 1 pound | 4 pounds fresh grapes |
| Rice, milled (excluding brewers) | 100 pounds | 152 pounds rough or unhulled rice |
| Rye flour | do | 2.23 bushels rye beginning 1947 |
| Sugar | 1 ton raw | 0.9346 tons refined |
| Tobacco | 1 pound farm-sales weight | Various weights of stemmed and unstemmed, according to aging and the type of tobacco. (See circular 435, U. S. Dept. of Agr.) |
| Tomatoes | 1 case canned ³⁶ | 0.027 tons fresh |
| Turkeys | 1 pound live weight | 0.90 pounds N. Y. dressed weight |
| Do | do | 0.75 pounds ready-to-cook weight |
| Wheat flour | 100 pounds | 2.33 bushels wheat ³⁷ |
| Wool, domestic apparel shorn | 1 pound greasy | 0.44 pounds scoured |
| Wool, domestic apparel pulled | do | 0.75 pounds scoured |

³⁴ Case of 24 number 2½ cans.

³⁵ Case of 24 number 2 cans.

³⁶ The milk equivalent of ice cream per gallon is 15 pounds. Reports from plants indicate about 81 percent of the butterfat in ice cream is from milk and cream, the remainder being from butter and concentrated milk. Thus the milk equivalent of the milk and cream in a gallon of ice cream is about 12 pounds.

³⁷ This is equivalent to 4.56 bushels of wheat per barrel (196 pounds) of flour and has been used in conversions beginning July 1, 1944. Because of changes in milling processes, the following factors per barrel of flour have been used for earlier periods: 1790-1879, 5 bushels; 1880-1908, 4.75 bushels; 1909-17, 4.7 bushels; 1918 and 1919, 4.5 bushels; 1920, 4.6 bushels; 1921-44, 4.7 bushels. From Mar. 1 to Nov. 1, 1946, the milling rate averaged about 2.20 bushels wheat per 100 pounds flour.

CHAPTER I

STATISTICS OF GRAIN

This chapter deals primarily with estimates of acreage, production, farm disposition, prices, farm value, stocks, and foreign production and trade. Estimates in greater detail are published regularly by the Crop Reporting Board.

Tables on sorgo sirup, which might be expected in the sorghum group, are included with "sugar crops", and popcorn tables are placed with "minor field crops." Corn sugar and corn sirup, however, are included in the corn tables.

TABLE 1.—Wheat: Acreage, yield, production, value, and foreign trade, United States, 1939-52

| Year | Acreage | | Yield per harvested acre | Production | Season average price per bushel received by farmers | Farm value | Average price per bushel, year beginning July, at— | | Foreign trade, including flour, year beginning July ⁴ | | |

| 1952 ⁸ | 77,447 | 70,585 | 18.3 | 1,291,447 | * 209 | 2,699,275 | 237 | 252 | | | |

¹ Includes acreage seeded in preceding fall for harvest in the year shown.

² Prior to 1947 quoted as No. 2 Hard Winter, and beginning with 1947 to date, No. 2 Hard and Dark Hard Winter, computed by weighting selling prices by number of carlots sold, as reported in the Kansas City Grain Market Review.

³ No. 1 Dark Northern Spring, computed by weighting selling prices by number of carlots sold as reported in the Minneapolis Daily Market Record.

⁴ Compiled from reports of the Department of Commerce. Wheat flour converted to grain equivalent on the following basis: Through June 30, 1944, 4.7 bushels of grain to 1 barrel of flour; July 1, 1944, to Feb. 28, 1946, 2.33 bushels of grain to 100 pounds of flour; the following months of 1946 as indicated, March 2.23, April 2.17, May 2.18, June 2.17, July 2.18, August 2.22, September 2.20, and October 2.23 bushels; and Nov. 1, 1946, to date, 2.33 bushels of grain to 100 pounds of flour.

⁵ Includes flour milled from imported wheat. See also table 8, which includes civilian feeding by the military abroad prior to January 1947.

⁶ Includes wheat imported for milling in bond and subsequent export.

⁷ Domestic exports minus imports for consumption. Net imports shown by a minus sign.

⁸ Includes an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

⁹ Preliminary.

Bureau of Agricultural Economics. Italic figures are census returns. Data for 1866-1938 in Agricultural Statistics, 1952, table 1.

| 1952 ² | 77,447 | 77,318 | 70,585 | 16.7 | 18.3 | 1,291,447 | | | | |

¹ Acreage seeded in preceding fall, for winter wheat only.² Preliminary.³ Minnesota, North Dakota, and South Dakota. Includes "Red Durum."⁴ Includes small quantities of durum wheat grown in States other than the 3 which are specified in footnote 3.⁵ Total of acreage seeded to winter wheat and all spring wheat.⁶ Total acreage seeded less an allowance for winter wheat acreage abandoned and later reseeded to spring wheat for harvest in the same crop year. Occurs principally in the Pacific Northwest.

Bureau of Agricultural Economics. Winter wheat and spring wheat data for 1919-42 in Agricultural Statistics, 1952, table 2.

¹ Acreage seeded in preceding fall.

² Preliminary.

³ For certain years, prices include an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

⁴ Includes "Red Durum." Small additional quantities of durum wheat are grown in other than the 3 States shown here, but included with "other spring" wheat.

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, the crop harvested in the Northern Hemisphere in 1952 is combined with preliminary forecasts for the Southern Hemisphere harvests which began late in 1952 and ended early in 1953. ² Figures refer to harvested areas as far as possible. ³ Revised estimates for Northern Hemisphere countries; for Southern Hemisphere, revised preliminary forecasts. ⁴ Estimated totals, which in the case of production are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown. ⁵ Average of less than 5 years. ⁶ 1935 only. ⁷ Comprises Albania, Bulgaria, Czechoslovakia, Eastern Germany, Hungary, Poland, and Rumania. ⁸ Estimates for Syria and Lebanon not shown separately during this period. ⁹ Figures for the period shown are not strictly comparable since figures for 1950-52 include allowances for nonreporting areas, which were not included with earlier figures shown, but were included in estimated total for Asia. ¹⁰ Production on European holdings only.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, or other information. Prewar estimates for countries having changed boundaries have been adjusted to conform to present boundaries.

TABLE 6.—Wheat: Production, seed used, and farm disposition, United States, 1943-52

| Crop of— | Production | Total used for seed | Farm disposition | | | |
|-------------------------|------------|---------------------|---------------------------|------------------|-----------------------|-----------|
| | | | Used on farms where grown | | | Sold |
| | | | For seed | Fed to livestock | Home use ¹ | |

| 1952 ² | 1,291,447 | 86,997 | 66,383 | 68,054 | 2,603 | 1,154,407 |

¹ Ground at the mill for home use or exchanged for flour.

² Preliminary.

Bureau of Agricultural Economics. Disposition of the crop specified and not disposition within the marketing year. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes. Data for 1919-42 in Agricultural Statistics, 1952, table 6.

¹ For importing countries, the figures represent quantities which indicated importers were obligated to purchase at minimum prices under the terms of the International Wheat Agreement of 1949. For exporting countries, the figures represent quantities which the indicated exporters were obligated to sell at maximum prices under the terms of that Agreement.

² Figures represent actual recorded sales by signatory exporting countries to signatory importing countries during 1951-52 (August-July) under the terms of the International Wheat Agreement.

³ The reduction in the 1951-52 guaranteed export quota for Australia from 88,700,000 to 72,000,000 bushels, and the increase in the Canadian guaranteed quota from 232,979,000 to 241,613,000 bushels, as compared with 1950-51, resulted from action by the International Wheat Council under the provisions of Article X of the Agreement.

Foreign Agricultural Service.

¹ Includes flour made from United States wheat and shipments to territories.

² Includes "Red Durum." ³ Preliminary.

Bureau of Agricultural Economics. Stocks include only old crop wheat on hand July 1 of year shown and are the total of the following stocks: On farms; in interior mills, elevators, and warehouses; in merchant mills; commercial stocks at terminals; and stocks owned by Commodity Credit Corporation in steel and wooden bins, and in transit. Estimated stocks on farms and in interior mills, elevators, and warehouses by classes, as well as production by classes, are on the basis of the quinquennial wheat-variety surveys. Commercial stocks are reported by classes, and merchant mill stocks are broken down largely on the basis of the distribution by classes of commercial stocks. Exports and shipments by classes are estimated on the basis of "inspection for export" records of the former War Food Administration and the Department of Agriculture, and report indemnifying agencies.

¹ Owned by Commodity Credit Corporation and stored in bins or other storage owned or controlled by CCC; in transit to ports and in Canadian elevators. Other Commodity Credit Corporation-owned grain included in the estimates by positions.

² Includes full-duty wheat, wheat imported for feed, and dutiable flour in terms of wheat. Excludes wheat imported for milling in bond and export as flour.

³ Preliminary.

⁴ Includes flour and other products in terms of wheat.

⁵ Food use is computed as follows: Total grind (commercial and noncommercial) less exports and shipments of flour and other wheat products, less military procurement, plus estimated breakfast food produced outside the flour-milling industry, plus dutiable imports of flour.

⁶ Quantity of wheat ground into granular flour for alcohol production together with wheat grain used for that purpose.

⁷ Balancing item; roughly approximates total use as feed, including that used in commercial feed as well as that fed on farms.

⁸ Includes procurement for both military exports and for military food use; military takings for civilian feeding in occupied areas measured at time of procurement and not at time of shipment overseas.

⁹ Exports as here used, in addition to commercial exports, include USDA flour procurement as distinct from USDA deliveries for export. They exclude exports for civilian feeding by the military abroad, which are included in military procurement. Deliveries for export (actual exports, including those of civilian feeding in occupied areas) of wheat, flour, and other products, in million bushels, beginning with 1943 were as follows: 42.6; 144.4; 390.6; 397.4; 485.9; 504.0; 299.1; 366.1; 475.3; and 317.2.

¹⁰ Shipments are to Alaska, Hawaii, Puerto Rico, Guam, Samoa, Virgin Islands, and Wake Island; partly estimated. For the war years, USDA shipments for stockpiling in the territories have been added to reported Census totals.

¹¹ Total disappearance plus year-end carryover accounts for total supply.

Bureau of Agricultural Economics. Foreign trade figures from reports of the Department of Commerce and Department of Agriculture. Military procurement figures from the National Military Establishments.

¹ Markets are Chicago, Minneapolis, Kansas City, St. Louis, Omaha, and Duluth.

² Export price to the United States and neutral countries from Oct. 19, 1943 to July 31, 1946.

³ Beginning July 1943, export price, f.o.b. port, bulk.

⁴ August 1946-July 1949, commercial sales to countries other than the United Kingdom.

⁵ No. 2 Hard and Dark Hard Winter.

⁶ Basic export selling price of the Australian Wheat Board.

⁷ Beginning August 1949, export price for sales outside of the International Wheat Agreement.

Under terms of the International Wheat Agreement the basic maximum price for No. 1 Manitoba Northern, in bulk, in store at Fort William/Port Arthur is \$1.80 per bushel. This maximum price has prevailed since beginning of Agreement in August 1949.

⁸ July-May average.

Bureau of Agricultural Economics. Compiled from following sources: Northwestern Daily Produce News; Bureau of Labor Statistics Wholesale Price Bulletins; reports of the Production and Marketing Administration; New York Journal of Commerce; Broomhall's Yearbook and Corn Trade News; Canadian Grain Statistics; Statistical Register of New South Wales, annual; Summary of the Australian Wheat Situation, and trade papers published at various markets. Wheat prices at Minneapolis, St. Louis, Kansas City, and Chicago are weighted averages. Foreign prices are compiled in original currencies and units. Prices converted to cents per bushel of 60 pounds at current monthly rates of exchange as reported by the Federal Reserve Board. Data for 1929-42 in Agricultural Statistics, 1952, table 14.

¹ Includes rye sown in the spring of year shown.

² Averages of daily prices weighted by carlot sales, as reported in the Minneapolis Daily Market Record.

³ Compiled from reports of the Department of Commerce. Rye flour converted to grain equivalent on the basis of 6 bushels of grain to 1 barrel of flour through 1943; beginning 1944, 4.6 bushels of grain to 1 barrel of flour. Rye malt converted to grain on the basis of 1.1 bushels of grain to 1 bushel of malt through 1942; beginning 1943, 1 bushel of grain to 1 bushel of malt.

⁴ Rye malt not separately reported. The period 1942-48 does not include rye and flour used by military services for civilian relief abroad, estimated in thousands of bushels as follows: 435; 484; 1,397; 944; 0; 406; and 0. These exports are included in table 23.

⁵ Includes rye malt.

⁶ Imports for consumption minus domestic exports with net exports shown by a minus sign.

⁷ Less than 500 bushels.

⁸ Includes an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

⁹ Preliminary.

Bureau of Agricultural Economics. Italic figures are census returns. Data for 1909-38 in Agricultural Statistics, 1952, table 18.

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, the crop harvested in the Northern Hemisphere in 1952 is combined with preliminary forecasts for the Southern Hemisphere harvests, which began late in 1952 and ended early in 1953. ² Figures refer to harvested areas as far as possible. ³ Revised estimates for Northern Hemisphere countries; for Southern Hemisphere, revised preliminary forecasts. ⁴ Average of less than 5 years. ⁵ 1935 only. ⁶ Estimated totals, which in the case of production are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown. ⁷ Comprises Albania, Bulgaria, Czechoslovakia, Eastern Germany, Hungary, Poland, and Rumania.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, or other information. Prewar estimates for countries having changed boundaries have been adjusted to conform to present boundaries.

¹ Preliminary.² For certain years, prices include an allowance for unredeemed loan and purchase agreement deliveries at the average rate.³ A bag is equivalent to 100 pounds.

Bureau of Agricultural Economics.

FOOTNOTES FOR TABLE 29

¹ Crops harvested in Northern Hemisphere countries during the latter part of the year, together with those harvested in Asia principally from November to May, are combined with crops harvested in Southern Hemisphere countries during the first part of the following year. ² Preliminary. ³ Average 1931-37. ⁴ The area formerly known as French Indochina is now comprised of the Kingdom of Laos, the Kingdom of Cambodia, and the State of Vietnam. ⁵ Average 1936-37 to 1939-40. ⁶ Korea. In the 1935-39 period, production in South Korea averaged about 6,750 million pounds annually.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, and other information.

¹ Yield and production represent equivalent grain yield on total acres harvested for all purposes, i.e., grain, silage, fodder, hogged off, grazed, etc. Census yields are corn for grain.

² Prices are the average of daily prices weighted by carlot sales, No. 3 Yellow Corn, as reported in the Chicago Daily Trade Bulletin through May 1942, and the Chicago Journal of Commerce or Wall Street Journal from June 1942 to date.

³ Compiled from reports of the Department of Commerce. Corn meal converted to grain equivalent on the basis of 4 bushels of grain to 1 barrel of meal through December 1945; beginning January 1946 3.16 bushels of grain to 100 pounds of meal.

⁴ Includes corn meal. Excludes cracked corn.

⁵ Domestic exports minus imports for consumption. Net imports shown by a minus sign.

⁶ Includes an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

⁷ Includes shipments under the Army Civilian Supply Program, beginning January 1946, and continuing in later years.

⁸ Preliminary.

⁹ October-May average.

Bureau of Agricultural Economics. Italic figures are census returns. Data for 1866-1938 in Agricultural Statistics, 1952, table 38.

FOOTNOTES FOR TABLE 41

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which follow; thus the crop harvested in the Northern Hemisphere in 1952 is combined with preliminary forecasts for the Southern Hemisphere harvest which begins early in 1953. ² Figures refer to harvested area as far as possible. ³ Revised estimates for Northern Hemisphere countries; for the Southern Hemisphere, revised preliminary forecasts. ⁴ Average of less than 5 years. ⁵ Estimated totals, which in the case of production are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown. ⁶ Figures for the period shown are not strictly comparable since figures for 1950-52 include estimates for nonreporting areas, which were not included with earlier figures shown, but allowances were included in estimated total for Asia. ⁷ Production on European holdings only. Allowances for native cultivation, not shown, are included in estimated total for Africa.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, or other information. Prewar estimates for countries having changed boundaries have been adjusted to conform to present boundaries.

¹ In bins or other storage owned or controlled by Commodity Credit Corporation; additional Government stocks are included in reports for other positions.

² Not available prior to 1943.

³ Compiled from reports of the Bureau of Foreign and Domestic Commerce and Bureau of the Census. Imports include grain equivalent of cornmeal and flour; exports are grain only.

⁴ Preliminary.

⁵ Estimated quantities (based on census data) used in making prepared breakfast foods.

⁶ Estimated quantities used in producing cornmeal, flour, hominy grits, and flakes for human food and for the production of fermented malt liquors. Based on reports of the Bureau of the Census and the Bureau of Internal Revenue. Does not include corn processed for livestock feed.

⁷ Starch, sirup, sugar, etc. Compiled from data of Price, Waterhouse, and Company, New York.

⁸ Compiled from data of the Bureau of Internal Revenue. Does not include corn products used in the production of fermented malt liquors.

⁹ Based on acreage planted to corn the following year.

¹⁰ Residual, includes small quantities for other uses and waste.

¹¹ Total disappearance, minus exports of corn and grain equivalent of cornmeal and flour.

¹² Stocks at the end of the 1942-43 marketing year, excluding grain at interior mills, elevators, and warehouses, are used in computing 1942-43 disappearance.

¹³ Includes exports for military civilian feeding abroad.

Bureau of Agricultural Economics. Data for 1929-41 in Agricultural Statistics, 1952, table 47.

¹ Estimates of seeded acreage relate to the total acreage of oats sown for all purposes, including oats sown in the preceding fall.

² Prices are the average of daily prices for No. 3 White, weighted by carlot sales, as reported in the Chicago Daily Trade Bulletin through May 1942 and the Chicago Journal of Commerce and Wall Street Journal from June 1942 to date.

³ Compiled from reports of the Department of Commerce. Oatmeal converted to grain equivalent on the basis of 1 bushel of grain to 18 pounds of meal through December 1942, and 13.17 pounds of meal thereafter.

⁴ Includes "oats, unhulled, ground."

⁵ Imports for consumption minus domestic exports. Net exports shown by a minus sign.

⁶ Includes shipments under the Army Civilian Supply Program, beginning July 1946, and continuing in later years.

⁷ Includes an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

⁸ Preliminary.

Bureau of Agricultural Economics. Italic figures are census returns. Data for 1866-1938 in Agricultural Statistics, 1952, table 53.

¹ Old crop only.

² Stocks at interior mills, elevators, and warehouses, commercial stocks reported by Grain Branch, Production and Marketing Administration, at terminals, and those owned by Commodity Credit Corporation which are in transit to ports, in bins and other storages under C.C.C. control.

³ Preliminary.

Bureau of Agricultural Economics. Data for 1925-42 in Agricultural Statistics, 1952, table 58.

FOOTNOTES FOR TABLE 55

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow: thus, the crop harvested in the Northern Hemisphere in 1952 is combined with preliminary forecasts for the Southern Hemisphere harvests which began late in 1952 and ended early in 1953. ² Figures refer to harvested areas as far as possible. ³ Revised estimates for Northern Hemisphere countries; for Southern Hemisphere, revised preliminary forecasts. ⁴ Production and yield reported in bushels of 34 pounds. ⁵ Estimated totals, which in the case of production are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown. ⁶ Average of less than 5 years. ⁷ 1935 only. ⁸ Comprises Albania, Bulgaria, Czechoslovakia, Eastern Germany, Hungary, Poland, and Rumania. ⁹ Includes estimate for Lebanon, and is, therefore, not strictly comparable with estimates shown for later years.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, or other information. Prewar estimates for countries having changed boundaries have been adjusted to conform to present boundaries.

¹ Preliminary.

Bureau of Agricultural Economics. Disposition of the crop specified and not disposition within the marketing year. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes.

¹ Not available prior to 1943.² Compiled from reports of the Bureau of Foreign and Domestic Commerce and Bureau of the Census. Imports include grain equivalent of oatmeal; exports are grain only.³ Includes 165,000 bushels in 1951, 178,000 bushels in 1952, and 324,000 bushels in 1953 in bins owned or controlled by Commodity Credit Corporation.⁴ Preliminary.⁵ Used in production of oatmeal and other cereal preparations. Based on reports of the Census of Manufactures.⁶ Based on area seeded to the following crop.⁷ Residual; includes small quantities for other uses and waste.⁸ Total disappearance, minus exports of oats and grain equivalent of oatmeal.⁹ Stocks at interior mills, elevators, and warehouses not included in computing 1942-43 disappearance.¹⁰ Includes exports for military relief feeding abroad.

Bureau of Agricultural Economics. Data for 1929-41 in Agricultural Statistics, 1952, table 59.

¹ Estimates of seeded acreage relate to the total acreage of barley sown for all purposes, including barley sown in the preceding fall.² Price of No. 3 barley, average of daily prices weighted by carlot sales, as reported in the Minneapolis Daily Market Record.³ Compiled from reports of the Department of Commerce. Barley flour converted to grain equivalent on the basis of 9 bushels of grain to 1 barrel of flour. Barley malt converted to grain equivalent on the basis of 1.1 bushels of grain to 1 bushel of malt through 1943; beginning 1944, 1 bushel of grain to 1 bushel of malt.⁴ Domestic exports minus imports for consumption, with net imports shown by a minus sign.⁵ Includes an allowance for unredeemed loan and purchase agreement deliveries at the average rate.⁶ Includes shipments under the Army Civilian Supply Program, beginning July 1946 and continuing in later years.⁷ Preliminary.

Bureau of Agricultural Economics. Italic figures are census returns. Data for 1909-38 in Agricultural Statistics, 1952, table 62.

¹ Estimates of seeded acreage relate to the total acreage of barley sown for all purposes, including barley sown in the preceding fall.

² Preliminary.

³ For certain years, prices include an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

Bureau of Agricultural Economics.

¹ Preliminary.

Bureau of Agricultural Economics. Disposition of the crop specified and not disposition within the marketing year. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes. Data for 1919-42 in Agricultural Statistics, 1952, table 66.

FOOTNOTES FOR TABLE 64

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow: thus, the crop harvested in the Northern Hemisphere in 1952 is combined with preliminary forecasts for the Southern Hemisphere harvests which began late in 1952 and ended early in 1953. ² Figures refer to harvested areas as far as possible. ³ Revised estimates for Northern Hemisphere countries; for Southern Hemisphere, revised preliminary forecasts. ⁴ Estimated totals, which in the case of production, are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown. ⁵ Average of less than 5 years. ⁶ 1935 only. ⁷ Comprises Albania, Bulgaria, Czechoslovakia, Eastern Germany, Hungary, Poland, and Rumania. ⁸ Estimates for Syria and Lebanon not shown separately during this period. ⁹ Figures for the period shown are not strictly comparable throughout, since figures for 1950-52 include allowances for nonreporting areas, which were not included for earlier periods shown, but were included in estimated total for Asia.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, or other information. Prewar estimates for countries having changed boundaries have been adjusted to conform to present boundaries.

¹ Owned by the Commodity Credit Corporation in bins owned or controlled by CCC and in Canadian elevators. Additional Government-owned stocks are included in reports for other positions.

² Not available prior to 1943.

³ Compiled from reports of the Bureau of Foreign and Domestic Commerce and Bureau of the Census. Both imports and exports include grain equivalent of malt.

⁴ Preliminary.

⁵ Compiled from reports of the Bureau of Internal Revenue. Includes small quantities of barley grain.

⁶ Estimated on basis of total malt production and quantities exported, imported, and used in alcohol and alcoholic beverages.

⁷ Based on acreage seeded to the following crop.

⁸ Residual; includes small quantities for other uses and waste.

⁹ Stocks at interior mills, elevators, and warehouses not included in computing 1942-43 disappearance.

¹⁰ Includes exports for military relief feeding abroad.

Bureau of Agricultural Economics. Data for 1934-41 in Agricultural Statistics, 1952, table 68.

¹ Consumption data for most grains are measured at the processing level. Total consumption is the grain equivalent of the food products processed from the grains. Excludes quantities used for alcoholic beverages.

² Includes white, whole wheat, and semolina flour.

³ Rice consumption for year beginning August previous to the year stated. Table rice used by brewers excluded, beginning August 1934.

⁴ Excludes corn and corn products used in the production of alcoholic beverages. Total corn includes an allowance for the quantity used as hominy and grits and minor food uses.

⁵ Barley consumed in food products, excluding malt beverages, expressed in terms of grain equivalent. Includes quantities used as pearl barley, flour,

malt extract, and other food products.

⁶ Malt equivalent of barley grain used for food.

⁷ The per capita civilian consumption was obtained by dividing the total apparent civilian consumption by the civilian population adjusted for under-enumeration and members of the armed forces eating out of civilian supplies.

⁸ Preliminary.

Bureau of Agricultural Economics. All figures are estimates based on data from the Census of Manufacturers, Price, Waterhouse, and Co., the Department of Commerce, the Bureau of Internal Revenue, and other sources.

| 1952..... | 9,935 | 83,316 | 93,251 | | | | | |

¹Total stocks not available prior to 1947. Beginning with 1947 Oct. 1 stocks include the following positions: farms, interior mills, elevators and warehouses, Commodity Credit Corporation grain in its own bins, and terminal elevators.

²Principally alcohol and distilled spirits. Includes an allowance for wet-processing from the middle of 1949 to date.

³Exports grain only. Imports are very small and are not separately reported.

⁴Since carryover stocks have been available only since 1947, production has been considered as the disappearance for each season prior to that date.

Production and Marketing Administration and Bureau of Agricultural Economics.

| 1952 ⁷ | 20.2 | 120.7 | 5.5 | 22.2 | 168.6 | 123.8 | 169.6 | .99 | .73 |

¹ October-September feeding year for all items except oats and barley carryover and production, which are for the July-June marketing year.

² Corn stocks on Oct. 1, oats and barley July 1. Sorghum grain Oct. 1, 1947 to date. Farm, terminal market, and Government-owned stocks 1939-42. Stocks in all positions, including interior mill, elevator, and warehouse stocks, 1943 to date.

³ Corn for all purposes, oats, barley, and sorghum grain.

⁴ Imported grains and domestic wheat and rye.

⁵ Total byproduct feeds available for feeding.

⁶ Grain-consuming animal units fed during the October-September feeding year. Weights for converting livestock numbers to grain-consuming animal units for recent years are as follows: Number on Jan. 1 of milk cows and heifers 2 years old and over, 1.00; heifers and heifer calves, 0.40; beef cows, 0.16; cattle on feed, 2.1; all other cattle, 0.14; stock sheep 0.22; sheep and lambs on feed, 0.12; horses and mules 2 years old and over, 1.3; colts 0.15; hens and pullets 0.055; number hogs fed during the year, 0.70; chickens raised 0.018; commercial broilers raised 0.0114; and turkeys raised 0.076.

⁷ Preliminary.

Bureau of Agricultural Economics. Data for 1926-38 in Agricultural Statistics, 1952, table 79.

Production and Marketing Administration and Bureau of Agricultural Economics. Prices of corn and oats at Kansas City, Chicago, and Minneapolis were computed by weighting selling prices by reported number of carlots sold. Prices of barley and grain sorghum at Kansas City and of barley at Chicago and Minneapolis are average of prices at the close of each day. Prices at San Francisco are the average of prices on one day each week.

TABLE 81.—Commercial feeds: Disappearance for feed, United States, 1942-51

¹ Other mill products, not listed, are screenings, hominy and oat feeds, etc., for which no statistics are available.

² Does not include moist sugar beet pulp.

³ Estimated on basis of Census reports for 1942 and 1943.

⁴ Includes dried skim milk, buttermilk, and whey for feed, but does not include any milk products fed on farms.

¹ 1947-51, 41 percent.

² 1944-46, 32 percent; 1950 and 1951, 36 percent.

³ 1942, 1943, 1948 and 1949, 34 percent.

⁴ 1950 and 1951, 44 percent.

⁵ Based on the prices of the following commodities at the leading markets, weighted by average consumption: Bran, middlings and shorts, copra meal, cottonseed meal, linseed meal, peanut meal, soybean meal, gluten feed, hominy feed, brewers' dried grains, distillers' dried grains, alfalfa meal, tankage, meat scrap, and fish meal.

Production and Marketing Administration. Data for 1929-41 in Agricultural Statistics, 1952, table 82.

CHAPTER II

STATISTICS OF COTTON, SUGAR, AND TOBACCO

In addition to tables on cotton, sugar, and tobacco, this chapter includes tables on fibers other than cotton, sorgo sirup, maple sirup and sugar, honey, and beeswax. Most cottonseed data, however, are in the following chapter on oilseeds, fats, and oils.

Much of the information on cotton lint is given in terms of "running" bales. The term "running bale," when applied to weight, is the average weight of a bale as it comes from the gin; when applied to number, it is the number of bales actually ginned.

The table on industrial molasses has been changed from a fiscal to a calendar year basis. A new table on consumption of tobacco products by persons 15 years of age and older has been added to this issue. The table on package bees carried in former issues has been dropped as these estimates are no longer available. A table giving average wholesale prices of tobacco products also has been dropped.

TABLE 84.—Cotton: Acreage, yield, production, value, and foreign trade, United States, 1939-52

| Year | Cotton | | | | | | | | Cottonseed | | |
|-------------------|-------------------------------|-------------------|--------------------------|-------------------------|---|---------------|--|---|--------------------------|------------|---------------|
| | Acreage in cultivation July 1 | Acreage harvested | Yield per harvested acre | Production ¹ | Season average price per pound received by farmers ² | Farm value | Market price per pound, New Orleans year beginning August ³ | Foreign trade, year beginning August ⁴ | | Production | Farm value |
| | | | | | | | | Do-estic ex-ports ⁵ | Im-ports for consumption | | |
| | 1,000 acres | 1,000 acres | Lb. | 1,000 bales | Cents | 1,000 dollars | Cents | 1,000 bales | 1,000 bales | 1,000 tons | 1,000 dollars |

¹ Census of Agriculture figures for all periods are in running bales. Department of Agriculture figures are in 500-pound gross-weight bales for all years.

² Gross weight price, including bagging and ties, except that American Egyptian cotton is included at net weight.

³ Prices compiled from Production Marketing Administration records. These central-market prices are for middling grades, 3/8-inch staple, through 1939; beginning August 1940, prices are for 1 1/16-inch staple.

⁴ Compiled from reports of the Department of Commerce. Equivalent bales of 500 pounds gross weight.

⁵ Excluding linters. ⁶ Includes an allowance for unredeemed loan cotton at season average price or average loan rate, whichever was higher. ⁷ Includes an allowance for all cotton put under loan at average loan rate. ⁸ Includes an allowance for unredeemed loan cotton at July 15, 1950 price. ⁹ Preliminary. ¹⁰ Includes an allowance for unredeemed loan cotton at the average loan rate. ¹¹ August-May average.

Bureau of Agricultural Economics. Italic figures are census returns. Production figures conform with census annual ginning enumerations. Data for 1866-1938 in Agricultural Statistics, 1952, table 84.

TABLE 85.—Cotton: Acreage, production, and season average price per pound and per ton of cottonseed received by farmers, by States, average 1941-50, annual 1951 and 1952

COTTON

65

¹ Preliminary.

² Gross weight price, including bagging and ties, except that American Egyptian cotton is included at net weight.

³ For the years 1941-47, 1950, and 1951, includes an allowance for unredeemed loan cotton at season average price or average loan rate, whichever was higher; for 1948, includes an allowance for all cotton put under loan at the average loan rate and for 1949, includes an allowance for unredeemed loan cotton at July 15, 1950 price.

⁴ Includes an allowance for unredeemed loan cotton at the average loan rate.

⁵ Illinois, Kansas, Kentucky, and Nevada.

⁶ Included in State and United States totals.

Bureau of Agricultural Economics. Cotton production figures conform with census annual ginning enumerations, with allowance for cross-State ginnings.

¹ These estimates represent total acreage and production in each country, including cotton consumed on hand spindles or in other ways without entering commercial channels. For this reason some of them should average somewhat larger than estimates of the "commercial crops." Years refer to crop years beginning Aug. 1 in which major portion of crop was harvested.

² Preliminary.

³ Production in bales of 478 pounds net prior to 1946 and 480 pounds thereafter.

⁴ Includes estimates for minor-producing countries not listed above and allowance for other figures not available.

⁵ Figures for 1943 to date are not comparable with prewar figures because of boundary changes.

⁶ Pakistan included with India.

⁷ South Korea only after 1941.

⁸ Less than 500.

⁹ Exports.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics, reports of United States Foreign Service officers, and results of office research.

¹ Includes only raw cotton produced for factory consumption and does not include large quantities grown in India, China, and other countries for consumption on hand spindles or for use in other noncommercial ways.

² American in running bales; foreign in bales of approximately 500 pounds, gross weight.

³ Preliminary.

⁴ Excludes estimates of cotton destroyed.

Bureau of Agricultural Economics. Compiled from reports of the New York Cotton Exchange Service and estimates of the International Cotton Advisory Committee. Data for 1929-42 in Agricultural Statistics, 1952, table 88.

¹ Data for crop years 1943-47, inclusive, do not include added charges made in some instances for drying and conditioning seed cotton. Data for 1948-52 include added charges for drying and conditioning seed cotton, the practice of assessing such added charges being confined chiefly to California. Data for all years exclude added charges made for sterilizing cottonseed in connection with pink bollworm control measures.

² In addition to American Egyptian cotton, small quantities of other extra long staple cotton are produced and ginned on roller gins. The production is too small, however, to affect the United States average ginning rate.

Production and Marketing Administration.

¹ Prices for Middling $1\frac{5}{16}$ inch and discounts for $\frac{7}{8}$ inch are averages of the 10 designated markets. Discounts for $\frac{13}{16}$ inch are 10-market averages from 1943 to 1946, a 4-market average for 1947, and 3 markets for 1948-1951. Premiums for 1-inch and $1\frac{1}{16}$ inches are 10-market averages. Premiums for $1\frac{1}{8}$ inches and longer are those quoted at Memphis.

² Hundredths of a cent per pound.

³ Average for August 1950-July 1951, excluding the period Jan. 27-Mar. 7, when no prices were quoted.

Production and Marketing Administration. Data for 1929-42 in Agricultural Statistics, 1952, table 102.

¹ Simple average of semi-annual and quarterly data. Quantities are annual per-family purchases of 42 cotton articles (from 1934-36 survey of families of wage earners and clerical workers).

² Computed from prices collected by the Bureau of Labor Statistics, weighted by average number of articles (clothing, furnishings, and yard goods) purchased annually (from 1934-36 survey) by families of wage earners and clerical workers. Estimates for 1943-51 based on indexes of retail prices of specified items of cotton clothing and housefurnishings, prepared by the Bureau of Labor Statistics.

³ Estimated prices received by farmers for cotton of grade and staple lengths used in the manufacture of the various articles, weighted by quantities of cotton required in their manufacture.

Bureau of Agricultural Economics. Data for 1927-38 in Agricultural Statistics, 1952, table 106.

¹ Includes bags and bagging for cotton (new and second-hand), webbing, padding, carpets and rugs, and yarns.

² In some instances import statistics have been converted from yards to pounds on the basis of average weights.

³ Prices for raw jute are for native first marks, duty-paid.

⁴ Less than 500,000 pounds.

⁵ Pakistan and India only, but includes a relatively small amount of mesta which is used as low grade jute.

⁶ Preliminary.

⁷ Raw abaca and manila cordage.

⁸ Prices for raw abaca are for Davao Grade I.

⁹ Sisal and henequen cordage.

¹⁰ Prices for raw sisal are for Haitian Grade A, compiled from *New York Journal of Commerce*.

¹¹ New York 1939. Prices for raw henequen are for Mexican Grade A.

Bureau of Agricultural Economics and Foreign Agricultural Service. Import data compiled from reports of the Department of Commerce; price data, except as noted, from reports of the Bureau of Labor Statistics; production data prepared or estimated on the basis of official statistics of foreign governments and reports of United States Foreign Service officers. Data for 1934-38 in *Agricultural Statistics, 1952*, table 112.

¹ Preliminary.

² Does not include Government payments under the Sugar Act. The United States average for these payments excluding abandonment and deficiency payments amounted to \$2.39 per ton in 1951 and approximately \$2.40 in 1952.

³ Short-time average.

⁴ Relates to year of harvest. In California, 1952 crop includes some acreage intended for harvest in fall of 1952, but not harvested until spring of 1953.

⁵ United States totals rounded to hundreds for acreage and thousands for production.

Bureau of Agricultural Economics.

¹ Seed is produced almost exclusively from fall plantings overwintered in the field.

² Comprises in addition to curly-top-resistant varieties 8,136 bags of commercial seed of "US" leaf-spot-resistant varieties, 1,056 bags of elite and stock seed for use in future production of commercial seed, and 26,053 bags of seed of improved non-curly-top-resistant varieties bred by beet sugar companies.

³ Curly-top-resistant varieties bred by the Bureau of Plant Industry, Soils, and Agricultural Engineering made up about 79 per cent of this production.

Bureau of Plant Industry, Soils, and Agricultural Engineering. Compiled from reports furnished by beet-sugar companies and their associations engaged in sugar-beet seed production.

¹ Acreage estimates are for harvested areas unless otherwise stated.

² Preliminary.

³ Includes the following: grown in Denmark and processed in Sweden, 5,000 acres and 57,000 short tons in both 1950 and 1951; and 7,000 acres and 65,000 short tons in 1952.

⁴ Topped beets.

⁵ Harvested for sugar only.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, and other information. Estimates of countries having boundary changes have been adjusted to postwar boundaries.

¹ Program payments represent gross payments for sugar beets marketed before deducting local administrative expenses which were charged in the years 1934-44. Payments with respect to crop deficiency and acreage abandonment have not been included. See table 774 for amounts of abandonment and deficiency payments. The bases for payment of the amounts shown are as follows: 1933, processing tax refund pursuant to Jones-Costigan Act; 1934 and 1935, parity payments pursuant to Jones-Costigan Act; 1936, no program in effect; 1937-51, average per ton of beets produced for payments made under the Sugar Act. Support payments in 1943-45 and 1947 were made under the U. S. Department of Agriculture price support programs. There were no support payments made in 1946 and 1948-51.

² Preliminary.

³ Prices of beets are for year harvested. Support payments and program payments are for year planted.

Bureau of Agricultural Economics. Payments under Federal sugar program computed by Sugar Branch of Production and Marketing Administration.

¹ Louisiana and Florida.² The growth of 9 months in Louisiana and 12 months in Florida. Sugar campaign usually ends by December or early January in Louisiana and in Florida by March following the season of growth.³ Preliminary.⁴ Prices do not include Government payments under the Sugar Act. Price support payments for 1943-45 are included. See table 122.⁵ Raw value equals 96° raw sugar as defined in the Sugar Act of 1948.⁶ Calculated on the basis that 100 pounds of raw sugar is required to produce 93.46 pounds of refined sugar.⁷ Sirup production not included. (See table 134.)

Bureau of Agricultural Economics. Of the total sugar produced in Louisiana about 25 percent consists of direct consumption sugar, marketed "as made" without further refining. Data for 1909-38 in Agricultural Statistics, 1952, table 120.

¹ Preliminary.² The growth of 9 months in Louisiana and 12 months in Florida. Sugar campaign usually ends by December or early January in Louisiana and in Florida by March following the season of growth.³ Does not include Government payments under the Sugar Act. The United States average for these payments excluding abandonment and deficiency payments amounted to \$1.01 per ton in 1951 and approximately \$1.12 in 1952.⁴ Based on data from Sugar Branch, Production and Marketing Administration.⁵ Raw value equals 96° raw sugar as defined in the Sugar Act of 1948.⁶ Calculated on the basis that 100 pounds of raw sugar is required to produce 93.46 pounds of refined sugar.⁷ Includes high test molasses made from frozen cane.⁸ Includes 3,284,000 gallons of edible molasses in 1951 and 4,077,000 gallons in 1952.⁹ Edible molasses not produced in Florida; therefore the Florida figures are for blackstrap.

Bureau of Agricultural Economics.

¹ Program payments represent gross payments for sugarcane marketed before applying penalties which were imposed in 1940 and before deducting local administrative expenses which were charged in the years 1939-44. Payments with respect to crop deficiency and acreage abandonment have not been included. The basis for payment of the amounts shown is average per ton of cane produced for payments made under the Sugar Act. Support payments were made under the U. S. Department of Agriculture price support programs.

² Preliminary.

Bureau of Agricultural Economics. Payments under Federal sugar program computed by Sugar Branch of Production and Marketing Administration. Data for 1933-38 in Agricultural Statistics, 1952, table 122.

| 1952..... | 222 | 108 | 80.4 | 8,694 | 1,020 | 954 | 235 | 10.97 |

¹ Beginning Jan. 1.² The growth of 18 to 24 months. Only a portion of the total acreage in cane is harvested each year.³ Converted in accordance with Sugar Regulations, Series 1, No. 1, U. S. Department of Agriculture, Agricultural Adjustment Administration, issued Feb. 18, 1935.⁴ 1 ton of raw sugar, 96° test, is assumed to be equivalent to 0.9346 ton of refined.⁵ Based on tonnage of cane used.

Bureau of Agricultural Economics. Data for 1929-38 in Agricultural Statistics, 1952, table 126.

¹ Harvesting begins about Nov. 1, the length of the growing season being about 11 months.² Calculated cane production divided by acreage.³ Calculated cane production is the quantity of cane ground for centrifugal sugar, estimated on the basis of the reported yield of sugar per ton of cane. ⁴ Not available. ⁵ Preliminary.

Foreign Agricultural Service. Data for 1921-38 in Agricultural Statistics, 1952, table 127.

FOOTNOTES FOR TABLE 128

¹ Years shown are for crop years; generally the harvesting season begins in the fall months of the year shown or in the early months of the following year, except in certain cane-sugar-producing countries in the Southern Hemisphere, such as Australia, Argentina, Mauritius, Union of South Africa, etc., where the season begins in May or June of the year shown. ² Centrifugal sugar, as distinguished from non-centrifugal includes cane and beet sugar produced by the centrifugal process, which is the principal kind moving in international trade. ³ Estimates of countries having boundary changes have been adjusted to postwar boundaries. ⁴ Preliminary. ⁵ Production probably would slightly exceed that in 1951-52 except for restrictions imposed under the Sugar Act. ⁶ Production probably would exceed that of 1951-52 except for restrictions decreed by the Cuban Government. ⁷ Includes a small amount of sugar from German beets processed in Austria. ⁸ Includes sugar from beets grown outside of Germany. ⁹ Includes a small amount of cane. ¹⁰ Includes sugar from Danish beets processed in Sweden. ¹¹ 1950-52 include a small amount of cane.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of U. S. Foreign Service officers, results of office research and other information.

¹ Data from Sugar Branch, Production and Marketing Administration.

² 1939 includes mainland cane stocks, and beginning 1940 includes raws for processing held by importers other than refiners.

³ Includes sugar used in the manufacture of other commodities. 1939-41 exports from U. S. Department of Commerce, Foreign Commerce and Navigation; 1942-52 quantities delivered for export as compiled by Sugar Branch, Production and Marketing Administration.

⁴ Data based on allocation audits and records kept by the armed forces.

⁵ Adjusted for changes in invisible stocks (estimated) held by manufacturers, wholesalers, and retailers. Civilian per capita consumption 1941-52.

⁶ Includes exports for civilian feeding by the military abroad.

⁷ Preliminary.

Bureau of Agricultural Economics. Data for 1929-38 in Agricultural Statistics, 1952, table 129.

¹ Stocks include sugar in bond and in customs custody and control. ² Sugar for direct consumption only. All sugars converted to refined basis. ³ Preliminary. ⁴ Excludes raw sugar delivered by refiners for direct consumption as follows: 1943, 15,196 tons; 1944, 9,875 tons; 1945, 5,021 tons; 1946, 3,939 tons; 1947, 9,025 tons; 1948, 2,343 tons; 1949, 2,212 tons; 1950, 2,636 tons; 1951, 1,864 tons; 1952, 2,833 tons. ⁵ Larger than actual deliveries by a small amount representing losses in reprocessing, includes 1,047 tons loss by fire in 1951. ⁶ Includes deliveries for export as follows: 194,911 tons in 1942; 436,312 tons in 1943; 292,953 tons in 1944; 271,621 tons in 1945; 376,850 tons in 1946; 217,060 tons in 1947; 72,243 tons in 1948; 40,880 tons in 1949; 56,477 tons in 1950; 76,751 tons in 1951 and 26,993 tons in 1952.

Production and Marketing Administration. Data for 1934-42 in Agricultural Statistics, 1952, table 130.

FOOTNOTES FOR TABLE 130

¹ Receipts are of sugar arriving in the ports of the United States regardless of whether or not it has been imported (i.e., entered through the customs).

² Preliminary.

¹ Official "Promedio" price converted to the basis of United States pounds. ² Starting with 1946 the quotations are on a cost, insurance, and freight basis; prior to 1946 they are on a cost and freight basis. (Insurance approximates 0.01 cent per pound.) ³ Includes excise tax of 0.535 cents per pound. ⁴ Averages of prices reported by retail dealers as of the 15th of the month in leading cities of the United States. Derived from reported price for 5-pound container beginning in 1950. ⁵ Preliminary.

Bureau of Agricultural Economics. Compiled from following sources: Anuario Azucarera de Cuba (Cuba Sugar Year Book); reports of United States Foreign Service officers in Cuba; U. S. Bureau of Labor Statistics retail price series; Lamborn's Sugar Market Report, New York; and reports of the New York Coffee and Sugar Exchange. Data for 1929-42 in Agricultural Statistics, 1952, table 133.

Production and Marketing Administration.

FOOTNOTES FOR TABLE 140

¹ Production of cane sirup, sorgo sirup, and edible molasses is of the fall of the preceding year.
² From 1939-42 inclusive, figures for odd years (except 1941) are from the Bureau of the Census; for even years (and 1941) quantities are estimated. Data for 1943-52 from the Sugar Branch, U.S. Department of Agriculture.

³ Data for 1939-52 are official figures of the Bureau of Agricultural Economics.

⁴ Data for 1939-52 represent molasses from which the liquid sugar has been subtracted.

⁵ Preliminary. ⁶ Assumed to be largely refiners' sirup.

Bureau of Agricultural Economics. Data for 1929-38 in Agricultural Statistics, 1952, table 140.

TOBACCO

111

TABLE 151.—*Tobacco: Acreage and production in specified countries, averages 1935-39, and 1945-49, annual 1950-52*—Continued

| Continent and country | Acreage harvested | | | | | Production | | | | |
|--|-------------------|-------------|-------------|-------------------|-------------------|--------------|--------------|--------------|-------------------|-------------------|
| | Average | | 1950 | 1951 ² | 1952 ² | Average | | 1950 | 1951 ² | 1952 ² |
| | 1935-39 | 1945-49 | | | | 1935-39 | 1945-49 | | | |
| | 1,000 acres | 1,000 acres | 1,000 acres | 1,000 acres | 1,000 acres | 1,000 pounds | 1,000 pounds | 1,000 pounds | 1,000 pounds | 1,000 pounds |
| Oceania: | | | | | | | | | | |
| Australia..... | 10 | 4 | 7 | 8 | 8 | 5,276 | 3,306 | 4,248 | 7,603 | 6,894 |
| New Zealand..... | 2 | 4 | 4 | 4 | 4 | 1,457 | 4,527 | 5,436 | 5,896 | 5,750 |
| Estimated total..... | 12 | 8 | 11 | 12 | 12 | 6,733 | 7,833 | 9,684 | 13,499 | 12,644 |
| Sub-total (excl. of U. S. S. R., China, and Eastern Europe ⁶)..... | 5,463 | 5,433 | 5,693 | 6,165 | 6,089 | 4,494,150 | 4,879,409 | 5,182,742 | 5,499,248 | 5,364,380 |
| Estimated world total..... | 7,402 | 7,572 | 7,748 | 8,178 | 8,073 | 6,488,280 | 6,848,562 | 7,122,255 | 7,420,248 | 7,220,380 |

¹ Year beginning July 1. For north temperate zone countries, harvests July through October of the year shown; for all other countries, harvests November and December of the year shown and January through June of the following year.

² Preliminary.

³ Less than a 5-year average.

⁴ Data for 1935-39 not comparable with subsequent years. Data for 1949-52 are for postwar areas; for Germany data for 1949-52 are for Western Germany only. For Korea 1949-52 data are for South Korea only. In the case of China, postwar data are for all of China except Manchuria; 1935-39 data are for Free China only.

⁵ Includes Albania, Bulgaria, Czechoslovakia, Hungary, Poland, and Rumania.

⁶ Separate data not available.

Foreign Agricultural Service. Official estimates of foreign countries, reports from United States Foreign Service officers, results of office research, and other information.

TABLE 152.—*Tobacco: Leaf used in the manufacture of cigars, cigarettes, chewing and smoking tobacco, and snuff, United States, 1943-52*¹

| Year | In cigars | | In cigarettes | | In chewing and smoking tobacco and snuff | Total |
|-------------------------|--|---|---|--|--|--------------|
| | Large ² Weighing more than 3 pounds per 1,000 | Small Weighing not more than 3 pounds per 1,000 | Large Weighing more than 3 pounds per 1,000 | Small ³ Weighing not more than 3 pounds per 1,000 | | |
| | 1,000 pounds | 1,000 pounds | 1,000 pounds | 1,000 pounds | 1,000 pounds | 1,000 pounds |

| 1944..... | 131,511 | 483 | 273 | 920,145 | 204,241 | 1,256,653 |
| 1945..... | 130,008 | 378 | 784 | 943,502 | 218,500 | 1,293,172 |
| 1946..... | 139,683 | 373 | 9 | 1,000,929 | 168,190 | 1,309,184 |
| 1947..... | 138,264 | 310 | 3 | 1,055,591 | 164,185 | 1,358,353 |
| 1948..... | 142,336 | 357 | 3 | 1,099,173 | 161,092 | 1,402,961 |
| 1949..... | 127,994 | 331 | 4 | 1,096,150 | 161,020 | 1,385,499 |
| 1950..... | 130,399 | 275 | 4 | 1,106,063 | 159,878 | 1,396,619 |
| 1951..... | 133,201 | 273 | 4 | 1,184,628 | 150,211 | 1,468,317 |
| 1952 ⁴ | 138,500 | 265 | 8 | 1,240,000 | 146,500 | 1,525,273 |

¹ The quantities given are unstemmed equivalent of all kinds of tobacco used. Stemmed leaf and scrap, etc., used in manufacturing have been converted to unstemmed equivalent at the ratio of 3 pounds stemmed to 4 pounds unstemmed.

² Includes tobacco used in bonded manufacturing warehouses.

³ "King size" cigarettes included in this category.

⁴ Preliminary estimate.

Production and Marketing Administration. Compiled from annual reports of the Commissioner of Internal Revenue, Treasury Department. Data for 1951 are estimates of the Production and Marketing Administration. Data for 1929-42 in Agricultural Statistics, 1952, table 153.

¹ July 1 for flue-cured types 11-14 and cigar types 61 and 62; Oct. 1 for all other types.

² Farm-sales weight of exports is subject to revision. Exports by rehandling trade included in totals of types from which they are made.

³ Preliminary.

⁴ Puerto Rican crop planted in the fall of the year shown and harvested the following spring.

⁵ Includes Perique.

Bureau of Agricultural Economics and Production and Marketing Administration. Basic export data from the official reports of the Department of Commerce. Data for Puerto Rico from "Basic Statistics on Puerto Rico," Office of Puerto Rico.

| 1953 | 1,016 | 1,013 | | | 1953 | 167,891 | 166,707 | | |

¹ Stocks as here shown have been converted to a farm-sales-weight basis—the equivalent of weight at the time of sale by growers—thereby making these figures of leaf-tobacco stocks comparable with figures of leaf-tobacco production.

² Stocks on the Island of Puerto Rico are included.

³ Stocks of Types 81 and 90 are not converted to a farm-sales-weight but are shown on an unstemmed weight basis. Stemmed stocks reported have been converted to an unstemmed equivalent. A factor for converting to farm-sales-weight has not been determined.

Production and Marketing Administration.

TABLE 155.—*Tobacco: Farm-to-retail price spreads and marketing charges for 4 products, 1939-52*¹

| Year beginning July | Composite retail cost ² | Farm value of 1 pound of equivalent leaf tobacco ³ | Margin | Federal and State revenue taxes ⁴ | Marketing charges (excluding taxes) ⁵ | Farmer's share of retail cost |
|---------------------|------------------------------------|---|---------|--|--|-------------------------------|
| | Dollars | Dollars | Dollars | Dollars | Dollars | Percent |
| 1939 | 1.79 | 0.163 | 1.63 | 0.67 | 0.96 | 9.1 |
| 1940 | 1.85 | 0.167 | 1.68 | 0.73 | 0.95 | 9.0 |
| 1941 | 1.92 | 0.272 | 1.65 | 0.77 | 0.88 | 14.2 |
| 1942 | 2.07 | 0.377 | 1.69 | 0.86 | 0.84 | 18.2 |
| 1943 | 2.17 | 0.415 | 1.75 | 0.94 | 0.81 | 19.1 |
| 1944 | 2.18 | 0.425 | 1.76 | 0.90 | 0.86 | 19.5 |
| 1945 | 2.32 | 0.431 | 1.89 | 0.98 | 0.91 | 18.6 |
| 1946 | 2.56 | 0.458 | 2.10 | 1.04 | 1.06 | 17.9 |
| 1947 | 2.69 | 0.457 | 2.23 | 1.11 | 1.12 | 17.0 |
| 1948 | 2.85 | 0.486 | 2.36 | 1.15 | 1.21 | 17.1 |
| 1949 | 2.86 | 0.461 | 2.40 | 1.17 | 1.23 | 16.1 |
| 1947-49 average | 2.80 | 0.468 | 2.33 | 1.14 | 1.19 | 16.7 |
| 1950 | 2.97 | 0.512 | 2.46 | 1.18 | 1.28 | 17.2 |
| 1951 | 3.09 | 0.504 | 2.59 | 1.27 | 1.32 | 16.3 |
| 1952 ⁶ | 3.20 | 0.499 | 2.70 | 1.31 | 1.39 | 15.6 |

¹ Farm-retail price spreads in this series are calculated from average retail prices for the year beginning July and the average farm prices for the corresponding crop year. Weights used in computing average retail cost and excise taxes for the four products are based on July-June tax-paid withdrawals in each year.

² The composite retail cost of the four products—cigarettes, cigars, pipe smoking tobacco, and plug chewing tobacco—is a weighted average of the retail cost of the four products equivalent to 1 pound of leaf tobacco (farm-sales weight). Retail prices reported by the Bureau of Labor Statistics in September, December, March, and June are averaged for comparison with corresponding crop-year farm prices.

³ The farm price is a weighted average of prices of several types of leaf tobacco combined in proportion to their estimated utilization in the four products.

⁴ Federal Internal Revenue taxes are weighted by annual percentage weights, based on tax-paid withdrawals, and inflated to allow for estimated State revenue taxes; city taxes are not included.

¹ Preliminary.² Less than a 5-year average.³ Estimated on the basis of data available for 6 months or more of the year.⁴ Re-exports.⁵ Not available.⁶ Includes manufactured tobacco.⁷ Approximated from unofficial information.⁸ Separate data not available.

Foreign Agricultural Service. Prepared or estimated from official statistics of foreign governments, reports of United States Foreign Service officers, and other information.

CHAPTER III

STATISTICS OF OILSEEDS, FATS, AND OILS

This chapter includes information on cottonseed, flaxseed, olive oil, peanuts, soybeans, tung nuts, margarine, and fats and oils.

Additional data on fats, oils, and oilseeds may be found in the chapter on foreign trade. Most butter statistics are included in the chapter on dairy and poultry statistics. Lard data are mostly in the chapter on livestock.

Although no tables have been added or dropped since last year, a few changes have been made in certain of the tables to improve their usefulness. In the table on tung nuts and tung oil exports and re-exports have been combined and separate columns on stocks and domestic disappearance added. A series on the average price of cotton linters has been added to the table on prices of cottonseed oil, meal, and hulls. Also, the items in the table on wholesale price per pound of fats, oils, tall oil, and glycerin have been arranged in alphabetical order.

¹ Quality information not available for cottonseed produced in Arizona and California.² These five basic factors are combined to form indices of quantity and quality which in turn are used to determine the official grade of cottonseed in accordance with the United States Official Standards for Grades.³ The quantity index measures the oil and cake or meal in the cottonseed, taking into account variations in the quantity of oil and protein.⁴ The quality index measures the deterioration in oil and meal and takes into account the excesses of moisture and foreign matter.⁵ The average grade is the product of the quantity index times the quality index. The base grade is 100.0.⁶ Samples graded by licensed chemists under the supervision of the U.S. Department of Agriculture.

Production and Marketing Administration.

| 1952 ⁵ | 3,450 | 3,309 | 9.4 | 31,002 | 4 3.74 | 115,801 | 3.96 | | | |

¹ Prices are averages of daily prices weighted by carlot sales, compiled from Minneapolis Daily Market Record.

² Compiled from reports of the Department of Commerce. Linseed oil converted to flaxseed equivalent on the basis of 1 bushel (56 lb.) of flaxseed to 2½ gallons of oil, and a gallon of oil weighs approximately 7½ pounds.

³ Imports for consumption minus domestic exports, with net exports shown by a minus sign.

⁴ Includes an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

⁵ Less than 500 bushels.

⁶ Preliminary.

Bureau of Agricultural Economics. Italic figures are census returns. Data for 1909-38 in Agricultural Statistics, 1952, table 170.

¹ Year beginning August.

Production and Marketing Administration. Carloads, converted to bushels on the basis of 1,200 bushels per car for the years 1942 and 1943 and 1,600 bushels for the years 1944-51.

FOOTNOTES FOR TABLE 170

¹ Harvests of the Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere countries in 1952 is combined with the Southern Hemisphere harvest which began late in 1952 and ended early in 1953. Estimates do not include China where annual production probably varies from 1 to 2 million bushels. ² Preliminary. ³ Acreage includes area for fiber. ⁴ Average of less than 5 years. ⁵ Flax and hemp. ⁶ Includes estimates for the above countries for which data are not available and for minor producing countries. ⁷ Sown area. ⁸ Officially reported figures plus Indian official estimates for unreported tracts for 1935-39 only. Estimates for unreported tracts for 1945-52 not available. ⁹ Prior to 1945 figures for India include Pakistan. ¹⁰ 1935 only. ¹¹ Flax grown for seed only. ¹² Less than 500 acres and 500 bushels.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, or other information.

TABLE 173.—*Flaxseed: Supply and distribution, United States, 1943-52*

¹ Included in total used for seed.

² From domestic and imported seed.

³ Total supply minus exports and stocks July 1 following year.

⁴ Preliminary.

⁵ Less than 500 bushels.

Bureau of Agricultural Economics. Compiled from reports of this Bureau, the Production and Marketing Administration, and the Bureau of the Census. Farm disposition relates to the crop specified and not disposition within the marketing year. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes.

| 1952 ^c | 6,179 | 7,887 | 6,616 | ----- | ----- | 675 | ----- | ----- | ----- | ----- | ----- | ----- |

¹ Each quarterly and annual figure is computed directly from original data stated in tons.

² In 1945 and 1947 some linseed oil was imported by the Government for reshipment under Lend-Lease. As no duty was required, this was included by Census with the imports for consumption, but when the oil was shipped out, it was included in re-exports. This amount was added to exports as reported by Census.

³ Less than 500 tons.

⁴ Less than 500,000 pounds.

⁵ Preliminary.

Bureau of Agricultural Economics. Crushings and stocks and production of oil from reports of the Bureau of the Census. Production of linseed cake and meal computed by the Department of Agriculture through 1948; reported by Bureau of the Census beginning January 1949. Trade figures from Monthly Summary of Foreign Commerce of the United States, and records of the Bureau of the Census. Data for 1929-42 in Agricultural Statistics, 1952, table 176.

¹ Acres grown alone, plus $\frac{1}{2}$ the interplanted acres. ² Mostly hogged.

³ For data on peanut vine hay, see table 384.

⁴ Compiled from reports of the Department of Commerce. Trade data are on the basis of "in the shell," converted at ratio of 1 to $1\frac{1}{2}$ through 1944; beginning 1945, ratio of 1 to 1.55.

⁵ Imports for consumption.

⁶ Imports for consumption minus domestic exports, with net exports shown by a minus sign.

⁷ Beginning January 1947 includes exports for civilian feeding by the military abroad.

⁸ Preliminary.

Bureau of Agricultural Economics. Data for 1909-38 in Agricultural Statistics, 1952, table 178.

¹ Foreign trade data from reports of the Department of Commerce.

² Stocks, converted to crude basis prior to 1948, crude plus refined 1948-52.

³ Oct. 1, 1942-45.

⁴ Holdings at producing mills only.

⁵ Beginning July 1, 1941, exports reported as peanut oil, edible, and peanut oil, crude; in this tabulation they are added without converting.

⁶ January-August; not separately reported prior to this date.

⁷ Less than 500 pounds.

Bureau of Agricultural Economics except stocks of peanut oil and trade from Bureau of the Census.

FOOTNOTES FOR TABLE 179

¹ Peanuts in the shell. Southern Hemisphere peanut crops, which are harvested from April-June, are combined with those of the Northern Hemisphere harvested from September-December of the same year. ² Figures refer to harvested areas as far as possible. ³ Preliminary. ⁴ Average of less than 5 years. ⁵ Includes estimates for the above countries for which data are not available and for minor producing countries. ⁶ 1 year only. ⁷ Export figures. ⁸ Java and Madura only. ⁹ Production on European farms only.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, and other information.

¹ Includes shipments to Hawaii, Alaska, Puerto Rico, and Virgin Islands, 1943-47; to Puerto Rico and Virgin Islands only, 1948-50, not separately reported after July 1950. Prior to January 1945, breakdown of exports into shelled and cleaned peanuts was estimated.

² Excludes small quantities for poultry feed and other miscellaneous uses, 1942-43, estimated as the difference between total disappearance of oil stock peanuts and crushings; 3,971,000 pounds in 1942, and 7,474,000 pounds in 1943. Includes some peanuts sold for seed.

Bureau of Agricultural Economics. Foreign trade from reports of Bureau of the Census.

¹ Crop year begins about Nov. 1 in the Virginia-North Carolina section; in September in the Southeastern States, and August in the Southwestern States.

² Prices are for "quota" stock only. A portion of crop (approximately 6.5 percent of estimated production) moved as "excess" peanuts to CCC for crushing into oil and meal at an overall average price of 7.28 cents per pound for all types in all areas. Virginia-North Carolina Virginia type peanuts were declared in short supply, and the excess of this type were sold by CCC for edible purposes at 105 percent of the applicable support price for edible peanuts plus reasonable carrying charges. Proceeds, after all costs to CCC, were prorated proportionately among all producers of Virginia type peanuts delivering these excess peanuts to CCC at oil prices.

³ Prices are for "quota" stock only. A portion of crop (approximately 10.6 percent of estimated production) moved as "excess" peanuts to CCC for crushing into oil and meal at an overall average price of 5.96 cents per pound for all types in all areas. ⁴ Preliminary.

Production and Marketing Administration. Data for 1929-42 in Agricultural Statistics, 1952, table 186.

¹ Crop year begins about Nov. 1 in the Virginia-North Carolina area; in September in the Southeastern States, and in August in the Southwestern States. Prices are for prompt shipment.

² The Office of Price Administration on Feb. 27, 1943, established per-pound ceiling prices as follows: Virginia-North Carolina cleaned Virginias jumbo and fancy, 15 $\frac{1}{4}$ cents; shelled Virginias extra large and medium, 16 $\frac{1}{4}$ cents; No. 1's, 14 $\frac{3}{8}$ cents; Southeastern shelled No. 1 Spanish, 14 $\frac{1}{4}$ cents; Runners, 14 cents; Southwestern shelled Spanish No. 1's, 14 $\frac{1}{2}$ cents. Price ceilings were suspended July 1-26, 1946, and lifted entirely on Sept. 1, 1946.

³ Under peanut program all No. 2's from 1944 and 1945 crops were crushed. CCC offered to purchase unworked No. 2's at following prices per pound: Spanish, east of Mississippi River, 12.4 cents; west of Mississippi River, 12.65 cents; Runners, 12.15 cents; Virginias, 12.9 cents; or to pay subsidy for No. 2's sold to crushers as follows, per pound: Spanish, east of Mississippi River, 6.75 cents; west of Mississippi River, 7.04 cents; Runners, 6.5 cents; and Virginias, 7.5 cents.

⁴ Under provisions of Price Support Program most shelled No. 2 peanuts were purchased by CCC at the following prices per pound: In 1947, Virginias, 15 $\frac{1}{4}$ cents; Runners, 14 $\frac{3}{8}$ cents; Spanish, 14 $\frac{3}{4}$ cents; in 1948, Virginias, 16 $\frac{1}{4}$ cents; Runners, 15 $\frac{3}{8}$ cents; Spanish, 15 $\frac{3}{4}$ cents; in 1949, Virginias, 16 $\frac{1}{4}$ cents; Runners, 15 $\frac{1}{2}$ cents; Spanish, 15 $\frac{3}{4}$ cents; in 1950, Virginias, 15 $\frac{1}{2}$ cents; Runners, 15 $\frac{1}{2}$ cents; Spanish, 15 $\frac{3}{4}$ cents.

Production and Marketing Administration.

¹ Acres grown alone, plus 1/2 the interplanted acres.

² Preliminary.

³ For data on soybean hay, see table 384.

⁴ For certain years, prices include an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

⁵ Short-time average.

¹ Years shown refer to years of harvest. Southern Hemisphere crops which are harvested in the early part of the year are combined with those of the Northern Hemisphere harvested the latter part of the same year. ² Figures refer to harvested areas as far as possible. ³ Preliminary. ⁴ Average of less than 5 years. ⁵ Acreage harvested for beans. ⁶ Less than 500 acres. ⁷ 1 year only. ⁸ Java and Madura only. ⁹ Beginning with 1945 figures represent South Korea only. ¹⁰ Rio Grande do Sul and Sao Paulo. ¹¹ Includes estimates for the above countries for which data are not available and for minor producing countries.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, or other information.

| Louisiana ⁴ | 10,336 | 2,900 | 32,000 | | | |
| United States | 38,856 | 49,060 | 120,200 | 86.60 | 106 | 91 |

¹ Production of unhusked air-dried nuts.² Preliminary.³ Prices for Georgia and Alabama have been combined, to avoid the possibility of disclosing individual mill operations.⁴ Includes small quantities of tung nuts produced in Texas.

Bureau of Agricultural Economics. The Census of Agriculture reported 351,000 tung trees in Southern States in 1930, 12,671,000 tung trees in 1940, and 9,583,000 tung trees in 1945. In addition to the States listed above, the census shows a small production also in Texas and South Carolina. The yield of oil from unhusked tung nuts varies from year to year but is usually estimated at around 16 percent of the weight of the nuts. Production and supply of tung oil appear in table 201.

¹ Production adjusted for estimated change in stocks, 1939-47, and for reported changes, 1951-52. ² Includes American Red Cross procurement for prisoner-of-war packages, 1943-45; and estimated quantities exported in food packages through CARE and other nongovernmental relief agencies, 1947-51; does not include quantities mailed abroad by individuals. ³ 1948-52 excludes shipments to Alaska and Hawaii, not reported after March 1948. ⁴ Less than 500,000 pounds. ⁵ Preliminary.

Bureau of Agricultural Economics. Totals and per-capita estimates computed from unrounded numbers. Compiled as follows: Production: 1939-June 1950, Bureau of Internal Revenue; after June 1950, Bureau of the Census. Exports: 1939-40, tax free withdrawals for export, Bureau of Internal Revenue, minus shipments to Puerto Rico and the Virgin Islands; 1941-52, Bureau of the Census. Shipments: Bureau of the Census. In addition, quantities shipped under special USDA programs, 1942-June 1945, not reported by the Bureau of the Census, are included here. Military: USDA. Civilian disappearance—1939-47, tax-paid withdrawals for use in the United States and Territories, plus tax-free withdrawals for use in Government institutions, Bureau of Internal Revenue, minus commercial shipments to Alaska and Hawaii; 1948-50, computed from data on production, trade and military procurement; 1951-52, also allows for reported changes in stocks. Data for 1920-38 in Agricultural Statistics, 1952, table 204.

¹ Preliminary.² Beginning 1949 partly estimated.³ Includes edible hydrogenated cottonseed oil, first reported as separate item in 1949.⁴ Includes edible hydrogenated soybean oil, first reported as separate item in 1949.⁵ Byproduct of winterizing cottonseed, soybean, corn, and peanut oils.⁶ Includes peanut, corn, and linseed oils, crude and refined oils not reported separately; and, beginning 1949, some edible hydrogenated oil not specified as to kind, minus lard used in hydrogenation; and deodorized and winterized oils not reported separately by kind. Part of these oils may be foreign. Also includes fish oils in the following amounts: 1943, 13 million pounds; 1944, 3 million pounds; 1945, 3 million pounds; 1946, 1 million pounds; 1947-49, 0; 1950-52, not reported separately.⁷ Mostly coconut oil.⁸ Less than 500,000 pounds.

Bureau of Agricultural Economics. Compiled from reports of the Bureau of the Census. Totals computed from unrounded numbers.

FOOTNOTES FOR TABLE 205

¹ Includes imports, which are negligible.² Partly estimated. 1943-June 1945 includes U. S. Department of Agriculture shipments to United States territories not reported by Bureau of the Census. Shipments to Puerto Rico and Virgin Islands only, after March 1948.³ Adjusted in accordance with U. S. Department of Agriculture records of shipments to United Kingdom.⁴ Adjusted for changes in U. S. Department of Agriculture stocks.⁵ Includes military exports for civilian feeding by the military abroad.⁶ Includes re-exports to Canada.⁷ Includes estimated exports through nongovernmental relief agencies.⁸ Less than 500,000 pounds.⁹ Preliminary.

Bureau of Agricultural Economics. Compiled as follows: Production and stocks from Bureau of the Census.

Trade figures from Foreign Commerce and Navigation of the United States, and records of the Bureau of the Census and U. S. Department of Agriculture.

Disappearance: Total, computed from data on production, trade, and stocks.

Price, from reports of the Production and Marketing Administration. Based on products containing from 20 to 50 percent animal fat, in 1-pound cartons. Data for 1929-42 in Agricultural Statistics, 1952, table 206.

¹ Preliminary. ² Total production, including estimated farm output. ³ Less than 500,000 pounds. ⁴ Includes shipments to Puerto Rico and the Virgin Islands, and amounts exported in food packages through CARE. ⁵ Reported production minus pressing. ⁶ Computed from factory consumption (Bureau of the Census), stocks, and trade; reported factory consumption used to represent domestic disappearance. ⁷ Total of the following export classifications: Inedible tallow; other animal greases and fats, inedible; and other animal oils, inedible. ⁸ Held by scourers only. ⁹ Production of cod oil, cod-liver oil, shark-liver oil, and other liver oils. Imports of cod oil, cod-liver oil, shark-liver oil, and fish-liver oil, n.e.s. ¹⁰ Whale oil, sperm oil, and seal oil. ¹¹ Excludes Government stockpiles of crude coconut, crude palm, sperm, and No. 1 and No. 3 castor oils. ¹² Oil equivalent of imported raw material. ¹³ Factory consumption plus loss, to minimize effects of stockpiling on which data are unavailable. ¹⁴ Includes re-exports. ¹⁵ Included in "Other vegetable oils." ¹⁶ Palm-kernel and tucum-kernel oils. ¹⁷ Factory consumption, to minimize effects of stockpiling. ¹⁸ Cashew nut shell liquid (oil), teaseed oil, Japan-wax, vegetable tallow, and other minor domestic vegetable oils, such as hempseed, mustardseed, and walnut oils.

Bureau of Agricultural Economics. Compiled as follows:

Production—

Butter and lard, U. S. Department of Agriculture.

Marine animal oils, reports of Fish and Wildlife Service. Reported in gallons; converted to pounds, using 7.74 pounds per gallon for Atlantic and Gulf coasts and 7.5 for Pacific coast. All other fats and oils, Bureau of the Census.

Foreign trade and factory and warehouse stocks, Bureau of the Census, except for stocks of butter, U. S. Department of Agriculture, Cold Storage Report.

Apparent disappearance computed from unrounded data on production, trade, and stocks.

¹ For butter, includes cold-storage stocks only.² Imports for consumption.³ Re-exports include only items imported free of duty or tax (coconut, palm, palm-kernel, and sunflower oils), except that in 1943-47 certain quantities of whale, linseed, and sunflower oils reported in imports for consumption are also included.⁴ Special programs of the U. S. Department of Agriculture included, 1942-June 1945. Beginning April 1948, data available only for Puerto Rico and the Virgin Islands.⁵ Adjusted to allow for changes in cold-storage stocks of butter held by the armed forces, and in U. S. Department of Agriculture stocks of lard in transit to warehouses and ships (these stocks are not included in factory and warehouse stocks).⁶ Beginning 1949 stocks of wool grease represent wool scourers' stocks only, in prior years consumer and storage holdings were included.⁷ Preliminary.⁸ Excludes Government stockpiles of crude coconut, crude palm, sperm, and No. 1 and No. 3 castor oils.⁹ Beginning 1943, stocks include dehydrated castor oil.¹⁰ Prior to 1949, figures are on a crude equivalent basis; thereafter on a crude plus refined basis.¹¹ Disappearance of primary fats and oils in continental United States adjusted for fat content of imports, exports, and shipments to United States territories of margarine, shortening, and soap and changes in stocks of margarine and shortening. 1949-52 also adjusted for imports, exports, and changes in stocks of vegetable stearine, fatty acids, foats, and soapstock.

Bureau of Agricultural Economics. Compiled as follows: Production, from reports of the Bureau of the Census, United States Department of Agriculture, and Fish and Wildlife Service. Foreign trade from Foreign Commerce and Navigation of the United States and records of the Bureau of the Census. Stocks from Bureau of the Census and U. S. Department of Agriculture. Disappearance computed from data on production, foreign trade, and stocks. Foreign trade and stocks converted to crude basis, 1939-48. Totals computed from unrounded numbers. Data for 1929-38 in Agricultural Statistics 1952, table 208.

¹ Includes cottonseed, peanut, soybean, corn, and edible olive oils; oleo oil, oleo stock, oleo-stearine, and edible tallow. Production and exports include oil equivalent of exported soybeans and peanuts for crushing abroad. ² Includes shipments to United States territories. ³ Chiefly coconut, babassu, palm kernel, palm, sesame, and sunflower oils. ⁴ Includes only the fat content of butter, estimated at 80.5 percent of total weight. ⁵ Preliminary.

Bureau of Agricultural Economics. Compiled from reports of the Bureau of the Census and U. S. Department of Agriculture. Trade figures from Foreign Commerce and Navigation of the United States. Foreign trade and stocks converted to crude basis 1943-48. Totals and per capita estimates computed from unrounded numbers. Data for 1931-42 in Agricultural Statistics 1952, table 210.

¹ Preliminary.

² Beginning 1949, includes small quantities of tallow, grease, lard, neat's-foot oil, marine mammal oil, and vegetable-oil foots not reported separately.

³ Reported factory consumption in paints, varnishes, linoleum, oilcloth, printing inks, and miscellaneous industrial products.

Bureau of Agricultural Economics. These estimates include utilization in paints, varnishes, floor coverings, printing inks, core oil, resins, insulation, linings, packings, caulking compounds, oilcloth, and other coated fabrics.

Compiled from reports of the Bureau of the Census and the Fish and Wildlife Service, as follows:

Linseed, castor, fish, soybean, tung, and oiticica oils: Total apparent domestic disappearance, minus quantities (if any) reported by the Bureau of the Census as used in soap, margarine, and shortening, and minus part of the quantity used in miscellaneous industrial products.

Tall oil and secondary fatty materials: Factory consumption in paints, varnishes, floor coverings, printing inks, core oil, resins, insulation, linings, packings, caulking compounds, oilcloth, and other coated fabrics, as reported by the Bureau of the Census.

Other fats and oils: Factory consumption in paints, varnishes, floor coverings, oilcloth, and printing inks, as reported by the Bureau of the Census.

Totals computed from unrounded numbers.

¹ Prior to 1949, most of the fats and oils used in synthetic detergents is believed to have been reported as used in soap. Since 1949, this use of fats and oils has been entirely excluded from soap.

² Preliminary.

³ Partly estimated. ⁴ Not separately reported. ⁵ Less than 500,000 lbs.

⁶ Mostly babassu oil, except in 1945 and 1946 when palm-kernel oil was 32 and 19 million pounds.

⁷ Inedible animal stearine, grease (lard) oil, tallow oil, foots and other soap stock, red oil, stearic acid, and other fatty acids. 1944-June 1947, estimated from factory consumption of total secondary fats and oils minus estimated use of tall oil in soap.

⁸ 1943-June 1947, estimated.

Bureau of Agricultural Economics. Compiled as follows: Fats, oils, and tall oil, Bureau of the Census; rosin, Naval Stores Report, Bureau of Agricultural Economics. Totals computed from unrounded numbers.

FOOTNOTES FOR TABLE 212

¹ Mainly salad and cooking oils. Includes all oils and fats (other than butter, lard, margarine, or shortening) used in mayonnaise and salad dressing, bakery goods, confectionery, commercial roasting and frying, etc.

² Includes only the fat content of butter, estimated at 80.5 percent of total weight, and of margarine, for which the fat content varies slightly each year.

³ Preliminary.

⁴ Fat equivalent of soap used in manufactures (rubber, textiles, etc.) is included with "Other industrial products." Prior to 1949, most of the fats and oils used in synthetic detergents is believed to have been reported as used in soap. Since 1949, this use of fats and oils has been entirely included in "Other industrial products." A substantial part of the synthetic detergents are made from petroleum derivatives or other nonfat products.

⁵ Paints, varnishes, floor coverings, oilcloth, printing inks, core oils, synthetic resins, insulation, linings, packings, coated fabrics (other than oilcloth), caulking, and other protective coatings.

Bureau of Agricultural Economics. Computed from data given in reports of the Bureau of the Census, Fish and Wildlife Service, and U. S. Department of Agriculture. Totals computed from unrounded numbers. Data for 1931-42 in Agricultural Statistics 1952, Table 213.

¹ Average 1938-39. ² Average for less than 12 months. ³ 1935-39 prices refer to open market sales only; 1948-52 to all types of wholesale trading for cash or short-time credit. ⁴ New York prior to 1947. ⁵ Average 1936-39. ⁶ Barrels, 1935-39. ⁷ Prices as originally quoted have been adjusted to include the 3-cents-per-pound tax on first domestic processing. ⁸ 1935-38 quoted as Manila, edible, 76 degrees, in tanks. ⁹ Converted from price per gallon on the basis of 7.5 pounds per gallon. ¹⁰ Converted from price per barrel on the basis of 230.4 pounds per barrel. Quoted as "Norwegian" prior to April 1939. ¹¹ Quoted as soap stock, 50 percent f.f.a., f.o.b. consuming point, before March 1943. ¹² Quoted as refined, edible, salad, drums, l.c.l. before September 1947. ¹³ Hardwood tubs, 1935-39. ¹⁴ Chicago prior to August 1948. ¹⁵ Quoted in tierces, 1948. ¹⁶ Barrels, before September 1939. ¹⁷ Niger, casks, 1935-39; Congo, crude, bulk, 1947-November 1948. ¹⁸ Barrels, New York, 1935-39. An excise tax of 4.5 cents per pound on imports of rapeseed oil became effective Aug. 21, 1936; but on July 1, 1938, rapeseed oil for use in rubber substitutes or lubricating oil was exempted from the tax. Since these are the major uses of rapeseed oil in the United States, the prices shown here are exclusive of tax after June 1938. ¹⁹ Quoted as edible 1935-39. ²⁰ Quoted as natural before May 1943.

Bureau of Agricultural Economics, Compiled from Oil, Paint, and Drug Reporter; the National Provisioner; The Journal of Commerce (New York); Wall Street Journal (Chicago edition), and reports of the Production and Marketing Administration and the Bureau of Labor Statistics. Excise taxes and duties are included where applicable.

Bureau of Agricultural Economics. All index numbers for 1947-52 except "Other industrial uses" from reports of the Bureau of Labor Statistics.

FOOTNOTES FOR TABLE 214

¹ Preliminary. ² No. 1, No. 3 and dehydrated (sulphonated excluded). To avoid double counting, the production of dehydrated is deducted. ³ Less than 500,000 pounds. ⁴ Includes quantities winterized and deodorized. Coconut oil includes quantities hydrogenated. Cottonseed and soybean oils include hydrogenated used in "Other edible products," and soybean oil includes refined oil not reported separately as to use. ⁵ Total disappearance minus reported factory consumption and loss in refining. Negative figures represent duplication in statistics, unreported production and/or reduction of unreported inventories. ⁶ Includes estimates for months not reported by Census. ⁷ Incomplete; partly included in "Other industrial products." When no figure is shown, the reported part is less than 500,000 pounds. ⁸ Reported consumption in paint and varnish, paint and ink vehicles, linoleum and oilcloth, and in 1950-51 printing inks. Also includes the following percentages of all other inedible products except soap: Castor oil, 10 percent; fish and fish liver oils, 6.5 percent; soybean oil, 55 percent. Linseed oil includes reported use in insulation, core oil, hydraulic brake fluid and linings and packings, resins, and "other coated fabrics." ⁹ Includes the following percentages of total disappearance minus reported factory consumption and loss in refining: Castor oil, 10 percent; fish and fish liver oils, 6.5 percent; linseed oil, 100 percent; oiticica oil, 100 percent; tung oil, 100 percent. ¹⁰ Reported factory consumption less estimated factory consumption in edible products, soap and drying oil products. ¹¹ Difference between crude oils used in refining and production of refined oils. ¹² Total apparent disappearance minus factory consumption and estimated unreported disappearance in edible and drying oil products. Negative figures represent duplication in statistics, unreported production and/or reduction of unreported inventories. ¹³ Reported factory consumption plus refining loss. ¹⁴ Includes some animal and marine mammal fats and oils, and vegetable, animal and fish foods not reported separately from fish oils, but excludes estimated amounts of lard used in soap during October and November 1950. ¹⁵ Incomplete; partly included in "Other edible products." When no figure is shown, the reported part is less than 500,000 pounds. ¹⁶ Reported use in shortening plus use in hydrogenation plus 65 percent of total consumption of refined in months when refined is not reported as being used in shortening, 1950-June 1951; July 1951-52 reported use in shortening plus "hydrogenated animal fats and oils edible." ¹⁷ Partly estimated. ¹⁸ Includes oleo stock. ¹⁹ Factory consumption less use in "Other inedible products." ²⁰ Reported factory consumption. ²¹ Excludes use in pressing.

CHAPTER IV

STATISTICS OF FRUITS, VEGETABLES, MELONS, TREE NUTS, AND BEVERAGE CROPS

These crops are arranged in two major groups within the chapter: (1) Fruits and berries; and (2) vegetables, melons, tree nuts, and beverage crops (tea, cacao beans, and coffee). Also, toward the end of the second group are included summary tables on inspections, unloads, and cold-storage holdings of both fruits and vegetables.

Fruits and Berries

Estimates of fruit production, in general, relate to the harvested crop although in some years quantities not harvested because of low prices or other economic factors are included. Losses from natural causes, such as windstorms, freezes, etc., are not included in production. Production relates to the total crop produced on all farms, except for apples and strawberries. In accordance with Congressional enactment, the Department's estimates of apple production since 1938 have related only to the crop in commercial areas. The estimates for strawberries cover production on acreage grown primarily for sale. The annual estimates are checked and adjusted at the end of each marketing season on the basis of shipment and processing records from transportation agencies, processors, cooperative marketing associations, and other industry organizations. The estimates are reviewed (and revised if necessary) at 5-year intervals, when census data become available. The Department's available statistics are limited to the major tree fruits and nuts and to grapes, cranberries, and strawberries, and exclude some States where census data indicate production is of only minor importance.

Since data on bearing acreage are not available for a member of the individual fruits and nuts, the bearing acreage table has been modified to show estimates for 4 major groups. Tables on apples no longer carry data on all apple production since this series was dropped after 1938. The tables on wholesale prices of Eastern apples and United States Banana supply have also been dropped from this issue. A new table has been added showing strawberry production for fresh and processing use, by States.

¹ For some crops in certain years, production includes some quantities unharvested on account of economic conditions and/or excess cullage of harvested fruit. Apples, peaches, pears, citrus fruit, cranberries, and strawberries, which are estimated in units other than tons, are converted to equivalent tons in this table.

² Estimates of the commercial crop refer to the total production of apples in the commercial apple areas of each State.

³ Preliminary.

Bureau of Agricultural Economics. Data for 1919-38 in Agricultural Statistics, 1952, table 219.

FOOTNOTES FOR TABLE 217

¹ Oranges (including tangerines), grapefruit, lemons, and limes.

² Commercial apples (total apples for years 1929-33), peaches, pears, grapes, cherries, plums, prunes, and apricots.

³ Figs, olives, avocados, dates, persimmons, and pomegranates.

⁴ Walnuts, almonds, and filberts.

| 1952 ⁹ | 92,489 | 92,489 | 2.55 | 235,539 | | | | | |

¹ Estimates of the commercial crop refer to the total production of apples in the commercial apple areas of each State.

² Differences between "Total production" and "Production having value" consists of fruit not harvested on account of economic conditions and/or excess cullage of harvested fruit.

³ Compiled from reports of the Department of Commerce.

⁴ Dried and canned are converted to terms of fresh apples on following basis: 1 pound of dried is equivalent to about 7 pounds fresh through 1942 (beginning 1943, 1 pound dried is equivalent to 8 pounds fresh); 1 pound of canned is equivalent to about 2 pounds fresh; 48 pounds fresh equal 1 bushel. No re-exports reported.

⁵ Excludes apple waste.

⁶ Includes apple waste.

⁷ Domestic exports minus imports for consumption with net imports shown by a minus sign.

⁸ Census returns of total harvested production of all areas in the United States.

⁹ Preliminary.

Bureau of Agricultural Economics. Data for 1909–38 in Agricultural Statistics, 1952, table 220.

¹ Harvests in Northern Hemisphere countries are for the year shown and are combined with the harvest in Southern Hemisphere countries of the following year. Estimates in original units of approximately 1 bushel in the following countries: Australia, Canada, United States, New Zealand, and South Africa. In other countries original estimates, mostly in metric tons, converted to bushels of 48 pounds except Argentina and Chile in 44 pound boxes. ² Preliminary.

³ Includes Bulgaria, Czechoslovakia, Hungary, Poland, Rumania, and Germany (Eastern Zone).

⁴ Includes Syria. ⁵ Included with Lebanon.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, and other information, and on the basis of postwar boundaries.

| 1952 ⁷ | 176,800 | 176,400 | 115.00 | 20,312 | | | | | |

¹ Production, price, and value for California, Washington, and Utah. The 1950 census reported these 3 States as having 95.5 percent of the 1949 production.

² Differences between "Total production" and "Production having value" consist of fruit not harvested on account of economic conditions.

³ Net processed weight.

⁴ Dried apricots are 12½ percent of total dried fruit for salad.

⁵ Exports of dried fruit converted to unprocessed dry weight by dividing by 1.07. Unprocessed dry weight converted to terms of fresh fruit on the basis of 5.5 tons fresh to 1 ton dried. Canned converted to fresh at ratio of 55 cases (45 pounds each) packed from 1 ton of fresh fruit through 1938; beginning 1939 at ratio of 60 cases to 1 ton.

⁶ Less than ½ ton.

⁷ Preliminary.

Bureau of Agricultural Economics. Exports compiled from records of Department of Commerce. Data for 1909-38 in Agricultural Statistics, 1952, table 229.

TABLE 227.—*Apricots: Production and season average price per ton received by farmers, by States, average 1941-50, annual 1951 and 1952*

| State | Production ¹ | | | Price for crop of— | | |

¹ Washington, Oregon, and Utah.

² Differences between "Production" and "Production having value" consist of fruit not harvested on account of economic conditions and/or excess cullage of harvested fruit.

³ Includes fruit used for wine, jelly, etc., and prior to 1944 small quantities dried in Washington.

⁴ Includes some quantities used for jam and nectar.

⁵ Preliminary.

Bureau of Agricultural Economics. Data for 1919-38 in Agricultural Statistics, 1952, table 232.

¹ Preliminary. ² All figures reported in stems have been converted to count bunches of 50 pounds. Stems at harvest weight from 25 to 80 pounds according to country and year of production. ³ Crop years Aug. 1-July 31, 1935-36 through 1936-37; Aug. 1-June 30, 1937-38; July 1-June 30, 1939. ⁴ Year beginning Oct. 1. ⁵ Less than 500 bunches. ⁶ Re-exports deducted.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, and other information.

¹ For some States in certain years, production includes some quantities unharvested on account of economic conditions. In 1951 and 1952, estimates of such quantities were as follows (tons): 1951—Washington Sweet, 1,220; Colorado Sour, 200; 1952—Michigan Sweet, 300; Idaho Sweet, 750; Michigan Sour, 5,000; Utah Sour, 400.

² Preliminary.

³ Includes excess cullage of harvested fruit (tons): 1951—Michigan Sour, 8,700; 1952—Idaho Sweet, 100; Michigan Sour, 2,000.

⁴ Equivalent returns per ton for bulk fruit at the packing-house door.

⁵ Equivalent returns per ton for bulk fruit at the first delivery point.

Bureau of Agricultural Economics.

¹ Production is from bloom of year shown and includes cherries produced for fresh consumption, drying, and processing.

² Preliminary.

³ Includes Czechoslovakia, Germany (Eastern Zone), Hungary, Poland, and Rumania.

⁴ Included with Syria.

⁵ Includes Lebanon.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, and other information.

¹ New York, Pennsylvania, Ohio, Michigan, Wisconsin, Montana, Idaho, Colorado, Utah, Washington, Oregon, and California.

² Differences between "Production" and "Production having value" consist of fruit not harvested on account of economic conditions and/or excess cullage of harvested fruit.

³ Includes fruit used for juice, wine, and preserves. For some years quantities of cherries frozen and/or brined also are included.

⁴ Preliminary.

¹ Differences between "Production" and "Production having value" consist of the following quantities not harvested on account of economic conditions and/or excess cullage of harvested fruit (tons): Sweet varieties not harvested, 1951, Washington, 1,220; 1952, Michigan, 300; Idaho, 750; excess cullage, 1952, Idaho, 100. Sour varieties, not harvested, 1951, Colorado, 200; 1952, Michigan, 5,000; Utah, 400; excess cullage, 1951, Michigan, 8,700; 1952, Michigan, 2,000.

² Includes fruit used for juice, wine, preserves, etc. ³ New York, Ohio, Pennsylvania, and Michigan. ⁴ Montana, Idaho, Colorado, and Utah. ⁵ Montana, Idaho, Colorado, Utah, Washington, and Oregon. ⁶ Preliminary.

Bureau of Agricultural Economics.

FOOTNOTES FOR TABLE 238

¹ Season begins with the bloom of the year shown and ends with the completion of harvest the following year. In California, picking usually extends from about Oct. 1 to Dec. 31 of the following year (15 months). In other States the season begins about Oct. 1 and ends in early summer, except for Florida limes, harvest of which usually starts about Apr. 1.

² Fruit ripened on the trees but destroyed by freezing or storms prior to picking is not included. For weight of boxes see pp. VII and VIII.

³ Differences between "Total production" and "Production having value" consist of fruit unharvested, donated to charity, and/or not utilized on account of economic conditions.

⁴ Equivalent returns per box at the intake packing-house-door for all methods of sale. When sale represents fruit sold at point other than intake packing-house-door, prices of fruit as sold are converted by additions or subtractions of necessary charges to or from prices of fruit as actually sold. Prices are State averages, weighted by production rather than by sales to obtain United States average.

⁵ Includes quantities used for juice, concentrates, grapefruit segments, and other citrus products. In some seasons, includes appreciable quantities of oranges and lemons in California delivered to processing plants which were not utilized, but for which growers received payment.

⁶ Imports converted to boxes on the following basis: Oranges, 90 pounds per box; grapefruit, 80 pounds per box; lemons, 76 pounds per box; limes, 80 pounds per box.

⁷ Less than 500 boxes.

⁸ Exports reported in pounds beginning Jan. 1, 1949. Converted to boxes on the following basis: Oranges, 84 pounds per box; grapefruit, 78 pounds per box; lemons, 79 pounds per box.

⁹ Production estimated from prospects on July 1, 1953.

¹⁰ Imports include pomeloes, beginning Jan. 1, 1941.

¹¹ Exports include limes, beginning Jan. 1, 1941.

Bureau of Agricultural Economics. Trade data from official records of the Department of Commerce. Data for 1919-38 in Agricultural Statistics, 1952, table 242.

| Florida ⁶ | 204 | 260 | 320 | 3.39 | 3.80 | 4.3 |

¹ Season begins with the bloom of the year shown and ends with the completion of harvest the following year (15 months). In California picking usually extends from about Oct. 1 to Dec. 31 of the following year. In other States the season begins about Oct. 1 and ends in early summer, except for Florida limes, harvest of which usually starts about Apr. 1. Fruit ripened on the trees but destroyed by freezing or storms prior to picking is not included. For some States in certain years, production includes some quantities donated to charity, unharvested, and/or not utilized on account of economic conditions. In 1951, estimates of such quantities were as follows (1,000 boxes): 1951—California Navel and miscellaneous oranges, 372; Valencias, 291; Florida tangerines, 400; grapefruit, seedless, 500; Other, 2,500.

² As estimated from prospects on July 1, 1953.

³ Equivalent returns per box at the intake packing-house door for all methods of sale. When sale represents fruit sold at point other than intake packing-house door, prices of fruit as sold are converted by additions or subtractions of necessary charges to or from prices of fruit as actually sold.

⁴ Includes small quantities of tangerines.

⁵ Includes the following quantities of Temple oranges (1,000 boxes): 1950—1,100; 1951—1,700; 1952—1,700.

⁶ Net content of box varies. In California and Arizona the approximate average for oranges is 77 pounds and grapefruit 65 pounds in the Desert Valleys; 68 pounds for California grapefruit in other areas; in Florida and other States, oranges, including tangerines, 90 pounds and grapefruit 80 pounds; California lemons, 79 pounds; Florida limes, 80 pounds. For weight of boxes prior to 1942, see p. VII and VIII.

⁷ In California and Arizona, Navels and miscellaneous.

Bureau of Agricultural Economics.

¹ Production estimates relate to the crop from bloom of year shown. Harvesting in Northern Hemisphere countries begins about November and in Southern Hemisphere about February of the following year. Production in foreign countries converted to boxes of the following weights: oranges, 70 pounds; grapefruit and limes, 80 pounds; lemons, 76 pounds.

² Preliminary. ³ Includes Syria. ⁴ Production in Israel only representing 90 percent of total Palestine acreage. ⁵ Included in Lebanon.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, and other information.

¹ Season average price at each auction market, weighted by total sales.

² Season beginning in an autumn month of the year shown, except California Valencia oranges, for which the season begins the following April.

³ Data represent 8 auction markets in 1943 season when Detroit and Cleveland were not included because market news service offices not operating that season.

⁴ No shipments or sales of Texas citrus fruit due to freeze.

Production and Marketing Administration. Data for 1929-41 in Agricultural Statistics, 1952, table 246.

¹ Exports of juice may include small quantities of concentrated juice in recent years. In the 1947 pack year approximately 425,000 cases of concentrate were thus shipped for Army relief-feeding in occupied Germany.

² Equivalent cases of 24 No. 2 cans. Domestic export of segments converted to cases at 30 pounds per case; juice at 3.4 gallons per case.

Production and Marketing Administration. Based on data obtained from various canners' associations and individual canners. Exports from reports of the Department of Commerce. Data for 1929-38 in Agricultural Statistics, 1952, table 247.

¹ Concentrated juices can be converted to approximate single-strength equivalent by multiplying orange and grapefruit concentrate by 7, lemon concentrate by 6, and frozen orange concentrate by 4.

² In 1947 an additional 1,440,177 gallons were packed in Florida as a result of a Department of Agriculture purchase program. It was used for Army relief-feeding in occupied Germany.

³ 1,585 gallons produced in Florida, balance in California-Arizona.

⁴ 1,303 gallons produced in Florida, balance in California-Arizona.

Production and Marketing Administration. Based on data obtained from various canners' associations and individual canners.

¹ Production, price, and value for California and Texas only. Texas discontinued in 1952.

² Equivalent returns per ton for bulk fruit at the first delivery point.

³ California dried figs converted to fresh basis at ratio of 3 pounds fresh to 1 pound dried.

⁴ Imports for consumption minus exports with net exports shown by a minus sign.

⁵ Less than 500 pounds.

⁶ Includes shipments under the Army Civilian Supply Program, beginning January 1947.

⁷ Preliminary.

Bureau of Agricultural Economics. Imports and exports from records of Department of Commerce. Data for 1919-38 in Agricultural Statistics, 1952, table 254.

¹ For some States in certain years, production includes some quantities unharvested on account of economic conditions. In 1951, estimates of such quantities were as follows (tons): New York, 2,400.

² Preliminary.

³ Equivalent returns per ton for bulk fruit at the first delivery point.

⁴ Dried basis: 1 ton of raisins equivalent to about 4 tons of fresh grapes.

⁵ United States average includes estimated production for Massachusetts, Rhode Island, Connecticut, Wisconsin, Nebraska, Delaware, Maryland, Florida, Kentucky, Tennessee, Alabama, Oklahoma, Texas, Idaho, Colorado, New Mexico, and Utah from 1941-43. Estimates of production in those States were discontinued beginning with the 1944 crop.

Bureau of Agricultural Economics.

¹ Differences between "Production" and "Production having value" consist of fruit not harvested on account of economic conditions.

² Mostly crushed for wine, brandy, and juices, but also includes quantities for freezing, jam, and jelly.

³ Fresh basis: dried raisins converted to fresh weight at ratio of 4 tons fresh to 1 ton dried.

⁴ Indiana, Illinois, Iowa, Missouri, Kansas, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Arizona, and Oregon.

⁵ Preliminary.

¹ Baltimore, Boston, Chicago, Cincinnati, Cleveland, Detroit, Jersey City, New York, Philadelphia, Pittsburgh, and St. Louis.

² From start of season in late June through the entire marketing season ending the following May. Prices are weighted by number of packages sold.

³ Mostly lugs. Table stock mostly in packages containing about 28 pounds; juice stock in packages containing mostly 25 to 40 pounds, with some special packs ranging from 42 to 50 pounds.

⁴ Table grapes are those packed for sale for table use.

⁵ Less than 1,000.

⁶ Juice grapes are those packed for sale for juice purposes.

⁷ Includes varieties not listed in this table.

Production and Marketing Administration.

¹ Production, price, value, and utilization for California only. According to the 1950 census there is also some commercial production of olives in Arizona but 99.6 percent of the 1949 production was in California.

² Includes the olives used for California Spanish Green, Greek style, Sicilian style, chopped, minced, and brine.

³ Less than 500 pounds.

⁴ Preliminary.

Bureau of Agricultural Economics. Imports compiled from reports of Department of Commerce. About 40 gallons of oil are obtained from 1 ton of olives in California. A gallon of olive oil weighs approximately 7.5 pounds. Data for 1919-38 in Agricultural Statistics, 1952, table 261.

¹ Differences between "Total production" and "Production having value" consist of fruit not harvested on account of economic conditions and/or excess cullage of harvested fruit.

² Compiled from reports of the Department of Commerce.

³ Net processed weight.

⁴ Canned peaches are 40 percent of total canned fruit for salad.

⁵ Dried peaches are 21 percent of total dried fruit for salad.

⁶ Exports of dried fruit converted to unprocessed dry weight by dividing by 1.07. Unprocessed dry weight converted to terms of fresh fruit on the basis that 1 pound dried equals 6.5 pounds fresh. Canned peaches converted to terms of fresh on basis that 1 pound canned equals about 1 pound fresh. 48 pounds of fresh equal 1 bushel.

⁷ Less than 500 pounds.

^a Preliminary.

Bureau of Agricultural Economics. Italic figures are census returns of harvested production. Data for 1909-38 in Agricultural Statistics, 1952, table 262.

TABLE 259.—Peaches: Production and season average price per bushel received by farmers, by States, average 1941-50, annual 1951 and 1952

| United States..... | ³ 68,186 | 63,627 | 62,560 | 1.90 | 2.02 | 2.01 |

¹ For some States in certain years, production includes some quantities unharvested on account of economic conditions. In 1951 and 1952, estimates of such quantities were as follows (1,000 bushels): 1951—South Carolina, 309; Georgia, 100; California Clingstone, 166; 1952—Michigan, 100; Colorado, 108.

² Preliminary.

³ Includes excess cullage of harvested fruit (1,000 bushels): 1951—South Carolina, 366; Georgia, 100; California Clingstone, 1,042; 1952—Georgia, 100; Colorado, 200; California Clingstone, 917.

⁴ Mainly for canning.

⁵ United States average includes estimated production for Iowa, Nebraska, Arizona, and Nevada for 1941-43. Estimates of production in those States were discontinued beginning with the 1944 crop.

Bureau of Agricultural Economics.

¹ Production is from bloom of year shown and includes peaches produced for fresh consumption, drying, and processing. Estimated in original units of approximately 1 bushel in the following countries: Australia, Canada, United States, New Zealand, and South Africa. In other countries original estimates mostly in metric tons, converted to bushels of 48 pounds.

² Preliminary. ³ Includes Czechoslovakia and Germany (Eastern Zone). ⁴ Included in Syria. ⁵ Includes Lebanon.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, and other information.

¹ Differences between "Production" and "Production having value" consist of fruit not harvested on account of economic conditions and/or excess cullage of harvested fruit.

² Includes some quantities canned and/or frozen for some States in some years.

³ Includes fruit used for jam and jelly, crushed for spirits, etc.

⁴ Preliminary.

Bureau of Agricultural Economics. Data for 1919-38 in Agricultural Statistics, 1952, table 265.

| 1952 ⁸ | 30,947 | 30,797 | 1.73 | 53,225 | | | | | | | | |

¹ Differences between "Total production" and "Production having value" consist of fruit not harvested on account of economic conditions and/or excess cullage of harvested fruit.

² Compiled from reports of the Department of Commerce.

³ Net processed weight.

⁴ Dried pears are 16% percent of total dried fruit for salad.

⁵ Canned pears are 35 percent of total canned fruit for salad.

⁶ Canned pears converted to terms of fresh on the basis that 1 pound canned equals about 1.2 pounds fresh; dried pears converted to terms of fresh on the basis that 1 pound dried equals about 5.5 pounds fresh; 50 pounds fresh equals 1 bushel, except in California, where 48 pounds equals 1 bushel.

⁷ Less than 500 pounds.

⁸ Preliminary.

Bureau of Agricultural Economics. Italic figures are census returns of harvested production. Data for 1919-38 in Agricultural Statistics, 1952, table 267.

¹ For some States in certain years, production includes some quantities unharvested on account of economic conditions. In 1951, estimates of such quantities were as follows (1,000 bushels): New York, 63; Michigan, 40.

² Preliminary.

³ Includes excess cullage of harvested fruit (1,000 bushels): 1951—Oregon Other, 115; 1952—Oregon Other, 150.

⁴ Equivalent returns per bushel for bulk fruit at the first delivery point.

⁵ United States average includes estimated production for Maine, New Hampshire, Vermont, Rhode Island, New Jersey, Iowa, Nebraska, Delaware, Maryland, New Mexico, Arizona, and Nevada from 1941-43. Estimates of production in those States were discontinued beginning with the 1944 crop.

Bureau of Agricultural Economics.

¹ Harvests in Northern Hemisphere countries are for the year shown and are combined with the harvest in Southern Hemisphere countries of the following year. Estimates in original units of approximately 1 bushel in the following countries: Australia, Canada, United States, New Zealand, and South Africa. In other countries original estimates, mostly in metric tons, converted to bushels of 50 pounds except Argentina and Chile in 44 pound boxes. ² Preliminary. ³ Includes Bulgaria, Czechoslovakia, Hungary, Poland, Rumania, and Germany (Eastern Zone). ⁴ Includes Syria. ^b Included with Lebanon.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, and other information, and on the basis of postwar boundaries.

¹ Beginning June 1951, prices shown are simple averages of representative prices for Tuesday of each week during the month.

Bureau of Agricultural Economics. Compiled from daily market news reports of the Production and Marketing Administration. Prices are based on stock of good merchantable quality and condition, U.S. No. 1 when quoted, in less than carlot quantities. Average for season is simple average of monthly averages. Data for 1934-42 in Agricultural Statistics, 1952, table 274.

¹ Production, price, and value for Florida only.

² Mainly exports directly from Hawaii and Puerto Rico to countries other than the United States mainland.

³ Boxes measuring approximately 12 by 10½ by 33 inches, inside dimensions, and holding about 70 pounds or 24 to 30 pineapples of medium size.

⁴ Crates of 2.45 cubic feet, holding about 70 pounds or 24 to 30 pineapples of medium size.

⁵ Less than 500.

⁶ 3 months only. Reporting discontinued Apr. 1, 1948.

⁷ Preliminary.

Bureau of Agricultural Economics. Data on foreign trade and receipts from noncontiguous territories compiled from reports of Department of Commerce. Data for 1919-38 in Agricultural Statistics, 1952, table 275.

¹ Includes some quantities of fresh prunes.

² Estimates for Michigan and California only.

³ Differences between "Total production" and "Production having value" consist of fruit not harvested on account of economic conditions and/or excess cullage of harvested fruit.

⁴ Includes California plums used for jam and in 1951 and 1952 small quantities frozen and crushed.

⁵ Preliminary.

Bureau of Agricultural Economics. Data for 1919-38 in Agricultural Statistics, 1952, table 276.

TABLE 273.—Plums and prunes (fresh basis): Production and season average price per ton received by farmers, by States, average 1941-50, annual 1951 and 1952

| Crop and State | Production ¹ | | | Price for crop of— | | |
|-------------------------------|-------------------------|-------------|-------------------|--------------------|----------------|-------------------|
| | Average 1941-50 | 1951 | 1952 ² | Average 1941-50 | 1951 | 1952 ³ |

| Eastern Oregon..... | 15,410 | 5,800 | 11,600 | | | |
| Western Oregon..... | 55,660 | 54,000 | 33,500 | | | |
| California ⁴ | 459,250 | 442,500 | 337,500 | 72.00 | 68.40 | 86.80 |
| 4 States..... | 574,810 | 537,900 | 423,300 | 71.60 | 68.80 | 84.90 |

¹ For some States in certain years, production includes some quantities unharvested on account of economic conditions. In 1951 and 1952, estimates of such quantities were as follows (tons): 1951—Prunes, Western Oregon, 2,600; California, 2,500; 1952—Plums, Michigan, 390; Prunes, Idaho, 900; Western Oregon, 1,600. These quantities are not included in utilization figures.

² Preliminary.

³ Includes excess cullage of harvested fruit (tons): 1951—Plums, California, 3,000; 1952—Prunes, Idaho, 400.

⁴ The California prune crop (fresh basis) is derived by multiplying the estimate of dried prunes by 2½.

Bureau of Agricultural Economics.

¹ Production is from bloom of year shown and includes plums and prunes produced for fresh consumption, drying, and processing. ² Preliminary. ³ Does not include wild plums which are 85 percent of total production. ⁴ Includes California dried prunes converted to a fresh basis at the ratio of 2½ pounds of fresh fruit to 1 pound of dried. ⁵ Includes Bulgaria, Czechoslovakia, Germany (Eastern Zone), Hungary, Poland, and Rumania. ⁶ Included in Syria. ⁷ Includes Lebanon.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, and other information.

| 1952 ⁷ | 423,300 | 420,400 | 84.90 | 35,683 | | | | | | | | | |

¹ Production, price, and value for Idaho, Washington, Oregon, and California. ² Differences between "Total production" and "Production having value" consist of fruit not harvested on account of economic conditions and/or excess cullage of harvested fruit. ³ Net processed weight. ⁴ Dried prunes in salad estimated at 43 per cent of total dried fruit for salad. ⁵ Exports of dried prunes converted to unprocessed dry weight by dividing by 1.025. Unprocessed dry weight converted to terms of fresh fruit on the basis that 1 pound dried equals 2½ pounds fresh. Canned prunes converted to

terms of fresh fruit on the basis that 1 pound canned equals 0.729 pound fresh. Otherwise prepared or preserved converted to terms of fresh fruit on the basis of 1 pound equals 0.899 pound fresh. ⁶ Less than ½ ton. ⁷ Preliminary.

Bureau of Agricultural Economics. Foreign trade data compiled from records of Department of Commerce. Data for 1919-38 in Agricultural Statistics, 1952, table 279.

¹ Mostly for fresh market but includes some quantities used for processing in States for which processing estimates are not prepared.

² Includes some quantities not marketed and excluded in computing value: 110,000 crates in 1940, 213,000 in 1941, 731,000 in 1942, 20,000 in 1943, 9,000 in 1944, 10,000 in 1945, 50,000 in 1947, 40,000 in 1948, 30,000 in 1949, and 80,000 in 1951.

³ Equivalent 24-quart crates (fresh market approximately 36 pounds with stems; processing approximately 34 pounds without stems).

⁴ Preliminary.

Bureau of Agricultural Economics. Data for 1918-38 in Agricultural Statistics, 1952, table 282.

¹ Figures for all commodities are on a calendar-year basis, except apples and pears which begin in June of year indicated and end the following spring. Shipments by truck are not included but have become increasingly important during this period. The data are not indicative of total production or total sales.

² Includes Satsumas and tangerines.

Production and Marketing Administration. Compiled from daily and monthly reports received from officials and local agents of common carriers throughout the country. Shipments shown in carlots include boat shipments reduced to a carlot basis. Data for 1929-42 in Agricultural Statistics, 1952, table 284.

FOOTNOTES FOR TABLE 280

¹ Preliminary.

² Mostly for fresh market but includes some quantities used for processing in States for which processing estimates are not prepared.

³ Equivalent 24-quart crates (fresh market approximately 36 pounds with stems; processing approximately 34 pounds without stems).

Bureau of Agricultural Economics.

¹ Excludes quantities not harvested on account of economic conditions and/or excess cullage of harvested prunes.

² Preliminary.

Bureau of Agricultural Economics. Data compiled from official reports of the Bureau, from trade sources, and from the Giannini Foundation of Agricultural Economics, University of California. All figures on a natural condition basis. Data for 1919–38 in Agricultural Statistics, 1952, table 289.

FOOTNOTES FOR TABLE 283

¹ Including shipments from Puerto Rico.

² Hawaiian pack. Data not available in terms of 24 No. 2½ cans prior to 1940.

³ In terms of cases of 24 No. 2½ cans.

⁴ Preliminary.

Bureau of Agricultural Economics. In addition to the canned fruits shown in this table, considerable quantities of the following products also are canned: Cranberries, citrus salad, figs, and orange segments. Data for 1929–38 in Agricultural Statistics, 1952, table 286.

TABLE 286.—Fruits, dried: Commercial production, in specified foreign countries, averages 1935-39 and 1945-49, annual 1949-52

| Total | 66,899 | 518,193 | 72,173 | 335,836 | 1,008,186 |

¹ Includes the commercial pack only and does not include quantities of fruit frozen by industrial users or other types of processors, who use all or the largest portion of their frozen pack as raw material for the manufacture of jams, jellies, and other fruit spreads, ice cream, bakery goods, or alcoholic beverages. Also does not include custom freezing for industrial users nor quantities produced in frozen-food locker plants.

² Connecticut, Maine, Massachusetts, New Jersey, New York, Pennsylvania, and Rhode Island.

³ Alabama, Arkansas, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, Missouri, North Carolina, South Carolina, Tennessee, Texas, Virginia, and West Virginia.

⁴ Illinois, Indiana, Michigan, Minnesota, Nebraska, Ohio, and Wisconsin.

⁵ Arizona, California, Colorado, Idaho, Montana, Oregon, Utah, and Washington.

⁶ Includes some packed in the South.

⁷ Data by regions not available for publication.

⁸ Includes some packed in the Midwest.

⁹ Includes bananas, cantaloups, elderberries, figs, melon balls, mixed fruits, nectarines, non-citrus fruit juices, pineapple, plums, and youngberries.

Bureau of Agricultural Economics. Data on all fruits except miscellaneous fruits and juices and citrus juices from National Association of Frozen Food Packers; data on these items from various canners' associations, Lemon Products Advisory Board, and survey by the U. S. Department of Agriculture.

¹ Fresh deciduous fruits, canned juices, frozen fruits, are on calendar year basis, as are fresh citrus fruits until 1941 and canned fruits beginning in 1943. For the years 1941-52 fresh citrus fruits are on a crop year basis, beginning in November of the preceding year. Canned fruits are on pack year basis for years 1909-42 and on a calendar year basis since. Dried fruits are on a pack year.

² Excludes noncommercial apples beginning with 1934.

³ Apricots, avocados, bananas, cherries (including an estimate for non-commercial), cranberries, figs, grapes, peaches, pears, pineapples, plums and prunes (including an estimate for noncommercial), and strawberries (including an estimate for noncommercial).

⁴ Apples, applesauce, apricots, berries, cherries (including brined), cranberries, figs, fruit cocktail and salad, citrus segments, olives (including brined), pineapple, plums, prunes, peaches, and pears.

⁵ Grapefruit, orange, blended citrus, lemon, pineapple, apple, berry, grape, and prune juices, and fruit nectars. Includes canned concentrated citrus juices converted to a single-strength basis, but excludes all frozen juices.

⁶ Dried apples, apricots, Zante currants, dates, figs, peaches, pears, prunes, and raisins except for unmerchantable figs and substandard prunes. Data are in terms of processed dried weight.

⁷ Principally cherries, apples, peaches, apricots, strawberries, other berries, and citrus juices.

⁸ The per capita civilian consumption was obtained by dividing the total apparent civilian consumption by total population adjusted for under-enumeration of children under 5 years of age, and for members of the armed forces not eating out of civilian food supplies.

Bureau of Agricultural Economics.

Vegetables and Melons

This section includes statistics on potatoes, sweetpotatoes, and commercial vegetables (including melons) for fresh market and processing. All estimates of commercial vegetables, shown in the following tables, have been reviewed using the 1950 Census of Agriculture data and revised where necessary. These revisions cover the period beginning with 1939. The seasonal groupings have also been revised in a number of instances.

Commercial vegetables, which are harvested in some sections of the country every month of the year, are for the most part extremely perishable and must be marketed quickly to avoid waste. Production estimates, broken down by harvesting seasons, are made at frequent intervals in order to provide a basis for more orderly marketing. These estimates indicate the quantities of each crop that will be available during each season of the year, and provide a measure of aggregate supplies.

The seasonal groupings of vegetables for fresh market, adopted in 1943, correspond to the four seasons of the year. The name of each group indicates the period when heaviest supplies of each crop are usually available, so that it is relatively easy to interpret the reports in terms of total production of all commercial vegetables for a given period. The groupings used are as follows:

Seasonal Groupings on Basis of the Most Active Harvesting Period

Winter: January, February, and March.
Spring: April, May, and June.

Summer: July, August, and September.
Fall: October, November, and December.

Subgroups for Most Crops

Early winter: January and first half of February.

Late winter: Last half of February and all of March.

Early spring: April and first half of May.

Late spring: Last half of May and all of June.

Early summer: July and first half of August.

Late summer: Last half of August and all of September.

Early fall: October and first half of November.

Late fall: Last half of November and all of December.

Subgroups for Short-Season Crops

Early spring: April.

Midspring: May.

Late spring: June.

Early summer: July.

Midsummer: August.

Late summer: September.

The beginning and the ending of these seasons are not fixed dates but approximations, as there is necessarily some overlapping of the seasons outlined above.

The revised estimates of commercial vegetables for fresh market include, for the crops estimated, all fresh-market production on acreage grown primarily for sale. Local-market production in areas near consuming centers is included as well as production in well-recognized commercial areas producing mainly for shipment to distant markets. Estimates are not made for a few States where fresh-market production of a given crop is relatively unimportant. Production for home use from farm and nonfarm gardens is not included. The acreages for fresh market are those "for harvest." These include not only acreage harvested but also acreage partly harvested and acreage not harvested at all because of low prices or other economic factors. Acreages lost or abandoned from natural causes are not included.

Revised fresh-market estimates on this new basis are not available for years prior to 1939. The estimates previously published included, for the most part, only acreages of the specified crops in important areas which were generally recognized as growing these crops in substantial quantities for shipment to market. Hence, some local-market production in areas near consuming centers was previously not included. Such estimates for the years prior to 1939 will be found in *Agricultural Statistics, 1952*.

The revised estimates of vegetables for commercial processing are on the same basis as those previously published. These estimates include acreages grown under contract, acreages grown by processors, and equivalent acreages for tonnage procured through open-market purchases. Such equivalent acreages are not duplicated in the fresh-market estimates. The estimates of vegetables for processing include quantities procured for commercial canning, freezing, and other processing, exclusive of dehydration. For some crops the quantities used for processing are a relatively small proportion of the total production, and separate estimates of the processing acreage and production are not prepared. For such crops the processing quantities are included in the fresh-market estimates.

Ten-year averages on the revised basis are not available, therefore most of the tables by States in this section carry data for the last 3 years instead of an average and 2 years. New tables have been added on broccoli and brussels sprouts production and potato utilization.

¹ Acreage for fresh market is acreage for harvest, including any partially harvested or not harvested because of low prices or other economic factors. Acreage for processing is acreage harvested.

² Artichokes, asparagus, lima beans, snap beans, beets, broccoli, Brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, Honey Ball and Honey Dew melons, kale, lettuce, onions, green peas, green peppers, shallots, spinach, tomatoes, and watermelons. Of these, broccoli was included for 2 States prior to 1949, 10 States, 1949-52; Brussels sprouts was not included prior to 1949; sweet corn was included for 3 States prior to 1948, 4 States in 1948, and 26 States, 1949-52.

³ Asparagus, lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers (pickles), green peas, pimientos, spinach, and tomatoes. Production of lima beans and green peas are on a shelled basis.

⁴ Production for fresh market includes some quantities not marketed because of low prices or other economic factors, and excluded in computing value.

Bureau of Agricultural Economics.

¹ In the hands of growers and local dealers. New York State only.

² Includes production used for dehydration 1943-45.

³ Includes the following quantities not harvested and excluded in computing value: 27,000 tons in 1939, 17,000 in 1940, 4,000 in 1941, 110,900 in 1942, 6,100 in 1943, 111,500 in 1944, 105,100 in 1945, 119,100 in 1946, 20,400 in 1947, 84,100 in 1948, 274,800 in 1950, 81,500 in 1951, and 14,700 in 1952.

⁴ Preliminary.

Bureau of Agricultural Economics.

¹ Estimates include heading broccoli or cauliflower-broccoli. Includes production for fresh market and processing.

² Preliminary.

³ Equivalent 1½-bushel crates (approximately 37 pounds).

⁴ Includes some quantities not marketed.

Bureau of Agricultural Economics.

¹ Mostly for fresh market use, but includes some quantities used for processing and dehydration.

² From crop of preceding year.

³ In the hands of growers and dealers.

⁴ Data compiled from reports of the Production and Marketing Administration. Not available prior to 1945.

⁵ Includes the following quantities not harvested and excluded in computing value: 951,000 sacks in 1939, 90,000 in 1940, 986,000 in 1942, 1,114,000 in 1944, 248,000 in 1945, 2,551,000 in 1946, 396,000 in 1948, 1,338,000 in 1950, and 560,000 in 1951.

⁶ Reported in bushels or pounds, converted to sacks at ratio of 57 pounds per bushel and 50 pounds per sack. Data compiled from reports of the Department of Commerce.

⁷ Equivalent 50-pound sacks. ⁸ Preliminary.

Bureau of Agricultural Economics.

¹ The following quantities were unharvested and/or not marketed and have been excluded in computing price and value (1,000 bushels): 1939-1,240; 1943-440; 1950-1,235; 1951-1,093. For 1946, the 1,504,000 bushels purchased by the Government under the price support program and left in the ground have been included in computing price and value. ² Prices are of eastern potatoes weighted by unloads, seasons September-May, from records of the Production and Marketing Administration. Beginning 1951, price data are for Maine and Long Island potatoes only. ³ Compiled from reports of the Department of Commerce. ⁴ Domestic exports minus imports for consumption, with net imports shown by a minus sign. ⁵ Includes shipments under the Army Civilian Supply Program beginning January 1947. ⁶ Preliminary.

Bureau of Agricultural Economics. Italic figures are census returns. Data for 1866-1938 in Agricultural Statistics, 1952, table 339.

FOOTNOTES FOR TABLE 340

¹ Early and late crops shown separately for California; total crop shown for all other States.

² Preliminary.

³ Includes 1,093,000 bushels of commercial early potato crops not marketed and excluded in computing value.

Bureau of Agricultural Economics.

¹ Consists of potatoes sold for all purposes including food, seed, processing and livestock feed. For 1937, 1940, and 1943-50, includes potatoes removed by the Government from normal market channels under price support programs, and for which growers received payment.

² Merchantable stocks consist of potatoes held by growers, local dealers, and buyers on farms or near areas of production in the 36 late and intermediate States and Arizona for sale or delivery after Dec. 31. They include potatoes held for sale or delivery to starch factories and other processors. Stocks for Jan. 1, 1938, 1941, 1944, and 1946-51, include merchantable potatoes which were removed by the Government from normal market channels under price support programs.

³ Includes the following quantities unharvested and/or not marketed (1,000 bu.): 1931-66; 1932-2,175; 1937-71; 1939-1,240; 1943-440; 1950-1,235; 1951-1,093.

⁴ Preliminary.

Bureau of Agricultural Economics.

FOOTNOTES FOR TABLES 344 AND 345

¹ Consists of potatoes sold for all purposes including food, seed, processing and livestock feed.

² Includes 1,093,000 bushels of commercial early potatoes not marketed.

¹ Mostly for fresh market, but includes some quantities for processing except in the States for which processing estimates are made.

² Includes the following quantities not marketed and excluded in computing value: 100,000 bushels in 1939, 38,000 in 1940, 16,000 in 1944, 16,000 in 1946, 72,000 in 1947, 86,000 in 1948, 213,000 in 1949, 172,000 in 1950, 440,000 in 1951, and 123,000 in 1952.

³ 9 States only: Texas, Virginia, Maryland, New Jersey, New York, Arkansas, Oklahoma, Washington, and California.

⁴ Approximately 20 pounds.

⁵ Preliminary.

Bureau of Agricultural Economics.

¹ Includes the following quantities not marketed and excluded in computing value: 42,000 bushels in 1940, 51,000 in 1941, 15,000 in 1942, 40,000 in 1943, 342,000 in 1945, 319,000 in 1946, 80,000 in 1948, 200,000 in 1949 and 110,000 in 1951.

² Includes "otherwise prepared", if any.

³ Approximately 53 pounds.

⁴ Includes exports for military civilian-feeding abroad beginning January 1947.

⁵ Preliminary.

Bureau of Agricultural Economics. Imports and Exports compiled from reports of the Department of Commerce.

¹ Figures for all commodities are on a calendar-year basis, except onions which are for a 12-month period beginning in March. Shipments by truck are not included but have become increasingly important during this period. The data are not indicative of total production or total sales.

² Includes Casaba, Honey Ball, Honey Dew, Persian, and mixed melons. Cars of mixed melons may include cantaloups as well as other muskmelons.

Production and Marketing Administration. Compiled from daily and monthly reports received from officials and local agents of common carriers, throughout the country. Shipments shown in carlots include boat shipments reduced to a carlot basis. Data for 1929-42 in Agricultural Statistics, 1952, table 360.

^a Fresh vegetables include estimated total commercial production for fresh market including estimated greenhouse production. Does not include production for home use.

^b Artichokes, asparagus, broccoli, Brussels Sprouts, lima beans, snap beans, cabbage, carrots, kale, lettuce and escarole, green peas, green peppers, spinach, and an estimated quantity of minor vegetables.

^c Beets, cauliflower, celery, sweet corn, cucumbers, eggplant, garlic, onions, shallots, and an estimated quantity of minor vegetables.

^d Includes watermelons, cantaloups, Honey Ball melons, Honey Dew melons, etc.

^e The per capita civilian consumption obtained by dividing the total apparent civilian consumption by total population adjusted for under-enumeration of children under 5 years of age and for members of the armed forces not eating out of civilian supplies.

^f Preliminary.

Bureau of Agricultural Economics. The figures in this table are given in terms of production weight, i.e., quantities available for consumption at the farm level.

¹ Total crop for processing converted to a canned basis by applying the following factors (cases of 24 No. 2 cans per ton, farm weight): Cucumbers for pickles, 68 cases; cabbage for kraut, 54 cases; and pimientos (year 1941 to date), 29 cases.

² Equivalent cases of 24 No. 2 cans.

³ Preliminary.

⁴ Data for tomato catsup, chili sauce, paste, and sauce through 1940 are either rough estimates or interpolations.

Bureau of Agricultural Economics. Compiled mainly from reports of the National Canners Association. Data for pickles, sauerkraut, and (beginning 1941) pimientos computed by BAE. In addition to the vegetables shown in this table, considerable quantities of the following products also are canned: Baked beans, carrots and peas, corn on the cob, hominy, kidney beans, mixed vegetables, mushrooms, okra, other greens than spinach, potatoes, rhubarb, sauerkraut juice, soups, spaghetti, succotash, sweetpotatoes, and vegetable puree. Data for 1929-38 in Agricultural Statistics, 1952, table 363.

Production and Marketing Administration. All of the shipping-point inspections were made under cooperative agreements between the Federal and State agencies. Receiving-market inspections were under direct Federal supervision. Some of the shipments inspected at receiving markets had been inspected previously at shipping points.

Shipping-point inspections were mostly for grade, as defined in the Federal standards. A considerable part of the receiving-market inspections was for condition only. Inspections were requested and paid by the shippers and other financially interested parties and were optional with the applicants except when required by State laws or marketing agreements. In addition to the quantities shown, there were inspections of products for canning factories, institutions, steamship lines, and Government agencies, amounting to 523,348 cars in 1951.

The figures, particularly in recent years, include some motortruck or less-than-carlot shipment inspections, which have been converted to a carlot basis. For the year beginning July 1950, shipping-point inspections were made in all 48 States, Hawaii, and Puerto Rico and receiving-market inspections in 74 cities.

¹ Included in "Other canned vegetables" prior to 1918.

² Includes asparagus, lima beans, beets, carrots, Irish potatoes, pickles (including bulk stock), pimientos, pumpkin and squash, sauerkraut (including bulk stock), spinach, succotash, sweet-potatoes, tomato juice, pulp, catsup, paste, sauce, and chili sauce, other greens, and mixed vegetables.

³ Excludes baked beans, soups, hominy, and minor vegetables not mentioned above.

⁴ The per capita civilian consumption was obtained by dividing the total apparent civilian consumption by the total population adjusted for underenumeration of children under 5 years of age and for members of the armed forces not eating out of civilian supplies.

⁵ Preliminary.

¹ Production, price, and value for Oregon and Washington only. The 1950 census reported small quantities of hazelnuts (filberts) produced in several other States in 1949, but 99.9 percent of the total production was in Oregon and Washington.

² Includes the following quantities unharvested on account of economic conditions (tons): Oregon, 1942—100; 1943—100; 1944—100; 1948—200; 1949—100; 1950—650; 1951—250; Washington, 1948—120; 1949—110; 1950—130; 1951—40.

³ Equivalent returns per ton at the first delivery point.

⁴ Shelled nuts converted to in-the-shell basis at ratio of 1 to 2.22 through 1949; 2.5 thereafter.

⁵ Preliminary.

Bureau of Agricultural Economics. Imports from reports of Department of Commerce. Data for 1927-38 in Agricultural Statistics, 1952, table 373.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, and other information.

CHAPTER V

STATISTICS OF HAY, SEEDS, AND MINOR FIELD CROPS

The data in chapter V deal with hay, pasture, seeds, and various minor field crops. The reader will note a break in the continuity of some of the hay series; this results from a change in the method of estimating prairie or wild hay, which is explained in the footnotes of the appropriate tables. Table 407 shows the seeding rates for a number of specified crops. The State averages represent the latest information available and are based largely on surveys made annually or every few years. The United States average rates are derived by weighting the average for each State by the acreage planted to the particular crop.

A new table has been added to this chapter showing the farm disposition of hay in the United States from 1919 to date.

TABLE 383.—Hay, all: Acreage, yield, production, value, and foreign trade, United States, 1939-52

¹ Season average prices, by States, weighted by production to obtain United States average.

² Season average prices obtained by weighting United States monthly prices by monthly marketings. 1943-47 prices are loose hay.

³ Compiled from reports made to the Production and Marketing Administration by its representative in the market. Simple average of 12 months beginning in July at Kansas City and April at Los Angeles.

¹ Preliminary.

Bureau of Agricultural Economics. Disposition of the crop specified and not disposition within the marketing year. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes.

¹ Table includes, besides the ordinary edible beans and beans grown for seed, blackeyes, and garbanzos in California. Soybeans and mung beans are not included. ² Price of cleaned beans. ³ Farm value of dry edible beans equals the price of cleaned beans applied to the production of cleaned beans rather than total production. ⁴ Compiled from New York Producers' Price Current, and beginning September 1947 from the New York Journal of Commerce. ⁵ Stocks for 1942-46 and 1950 from official reports, adjusted for U.S. Department of Agriculture holdings. Estimates for other years based on the best sources available. ⁶ Compiled from reports of Department of Commerce. ⁷ Bags of 100 pounds. ⁸ Acreage grown alone. ⁹ Includes an allowance for unredeemed loans and purchase agreement deliveries at the average rate. ¹⁰ Preliminary. ¹¹ September-May average.

Bureau of Agricultural Economics. Italic figures are census returns; census figures include all States; other figures, principal producing States only. Data for 1909-38 in Agricultural Statistics, 1952, table 404.

FOOTNOTES FOR TABLE 409

¹ Bags of 100 pounds.

² Table includes, besides the ordinary edible beans and beans grown for seed, blackeyes and garbanzos in California. Soybeans and mung beans are not included.

³ Preliminary.

⁴ Price of cleaned beans; for certain years, prices include an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

Bureau of Agricultural Economics.

¹ Excludes soybeans. ² For some States also includes small quantities fed to livestock, and lost. ³ Preliminary. ⁴ Bags of 100 pounds.

Bureau of Agricultural Economics. Disposition of the crop specified and not disposition within the marketing year. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where grown and do not include purchases by farmers from others for such purposes.

¹ Prices represent prevailing values of the commodity and grade specified, as indicated by sales from receivers to wholesale distributors.

² Price includes brokerage, cleaning and handling charges.

³ Beginning February 1949, changed to large standard lima.

⁴ Beginning September 1950, changed to U. S. No. 1.

⁵ September-May average.

Bureau of Agricultural Economics. Compiled as follows: New York Producers Price Current; New York Journal of Commerce; San Francisco Weekly Bean Market Review; and records of the Production and Marketing Administration. Data for 1929-42 in Agricultural Statistics, 1952, table 412.

| 1952 ⁵ | 228 | 211 | 1,237 | 2,610 | 5.20 | 12,399 |

¹ Bags of 100 pounds.

² Data are for the States in which dry edible and seed peas are grown commercially in material quantities and do not include cowpeas, nor Austrian winter peas.

³ Prior to 1940, prices are as of Dec. 1. Prior to 1941, they are applied to the total production, by States, to obtain approximate farm value. Beginning in 1941, prices are applied to the production of cleaned peas.

⁴ Includes an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

⁵ Preliminary.

Bureau of Agricultural Economics. Data for 1929-38 in Agricultural Statistics, 1952, table 414.

CHAPTER VI

STATISTICS OF CATTLE, HOGS, SHEEP, HORSES, AND MULES

This chapter contains information about most kinds of farm livestock and livestock products, with the exception of dairy and poultry. The information relates to inventories, production, disposition, prices, and income for farm animals, and to livestock slaughter, meat production, and market statistics for meat animals.

The term "on farms" as used in this chapter includes ranches. Estimated numbers do not include livestock not on farms.

Information on the methods used in making livestock estimates may be found in Miscellaneous Publication No. 703, "The Agricultural Estimating and Reporting Services of the United States Department of Agriculture."

Differences between census inventories and January 1 estimated numbers are large in years when the census relates to a later date than January 1, for example, the 1950 census was taken as of April 1. The difference represents the disappearance of numbers between January 1 and the date of the census enumeration. In the case of hogs, this difference is especially large as marketings and slaughter are seasonally high during the first 3 months of the year. In addition to the census data relating to an April 1 date in 1950, the enumeration covered all animals on hand including young stock born after January 1, 1950. Published census totals often include these young animals which are not included in the Department of Agriculture estimates of January 1, 1950 inventories. The 1950 census inventories as shown herein do not include the spring born young stock which was enumerated for that year.

A new table has been added showing annual average prices received by farmers, by States, for 1951 and 1952 for cattle, calves, hogs, sheep, and lambs. These estimated prices were used in determining value and income, by States as shown in the tables relating to production, cash receipts, and gross income. New tables were also added for wool, showing imports for consumption on a clean content basis, by grades and by country of origin.

¹ Estimates include only cattle being fattened for market as a more or less distinct agricultural enterprise, and exclude small operations incidental to dairy and general farming. Cattle thus fed are presumed to produce carcasses that will grade good or better. In addition there have been a number of cattle finished on distillery slop, mostly in Kentucky, and on byproduct feeds in other States not shown, as well as large numbers being winter-fed in West Virginia, Virginia, Kentucky, and some other States, to be marketed as "grass fat" cattle in the late summer.

² Includes cattle and calves on feed in Oklahoma, Texas, and 11 Western States.

³ Includes cattle and calves on feed in Pennsylvania, North Central States, and in 13 Western States.

⁴ Preliminary.

¹ Estimates include only cattle being fattened for market as a more or less distinct agricultural enterprise, and exclude small operations incidental to dairy and general farming. Cattle thus fed are presumed to produce carcasses that will grade good or better. In addition there have been a number of cattle finished on distillery slop, mostly in Kentucky, and on byproduct feeds in other States not shown, as well as large numbers being winter-fed in West Virginia, Virginia, Kentucky, and some other States, to be marketed as "grass fat" cattle in the late summer.

² Preliminary.

Bureau of Agricultural Economics.

¹ Calves born during the year.² Excludes interfarm sales.³ Includes cattle shipped in from other States and from central markets, but excludes intrastate shipments.⁴ Preliminary.⁵ Adjustments were made for cattle shipped in and changes in inventory.⁶ No adjustments made for cost of cattle shipped in and changes in inventory values. Gross income is "Cash receipts from sales of cattle, calves, beef, and veal" plus "Value of cattle and calves slaughtered for home consumption."

¹ Excludes interfarm sales.

² Includes cattle shipped in from other States and from central markets but excludes intrastate shipments.

³ Adjustments were made for cattle shipped in and changes in inventory.

⁴ No adjustments made for cost of cattle shipped in and changes in

inventory values. Gross income is "Cash receipts from sales of cattle, calves, beef, and veal" plus "Value of cattle and calves slaughtered for home consumption."

Bureau of Agricultural Economics.

¹ Weighted average prices of beef steers, sold out of first hands for slaughter. These grade designations became effective Dec. 30, 1950. Grades previously used in Agricultural Statistics compare with these grades as follows: The old Choice and Prime grades were combined as Prime, the old Good was changed to Choice, the old Medium was divided into Good and Commercial, and the old Common was changed to Utility.

² Grade name was changed to Commercial in 1951. Prices shown are approximate equivalent for present grade, estimated by Bureau of Agricultural Economics, as follows: Weighted average of Good 5, Common and Medium 1, through 1937; Good 3, Medium 1, 1938-50; reported as Commercial, 1951 to date.

³ This grade designation became effective Mar. 10, 1951. Good and Choice previously used in Agricultural Statistics is comparable to the Choice and Prime used here.

Production and Marketing Administration.

¹ End of year estimates (October-December) included under following year for comparisons and totals. Thus for Canada the December 1949 estimate of 5,413,000 is shown under 1950.

² Preliminary. ³ Averages for 2-4 years only. ⁴ June. ⁵ Census or estimate for single year. ⁶ Official statistics; may be underestimates of actual numbers. ⁷ September. ⁸ Includes China Proper (22 provinces), Manchuria, Jehol, and Sinkiang (Turkestan). ⁹ Year 1934. ¹⁰ Number taxed only.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, and other information. Data for countries having changed boundaries relate to present territory, unless otherwise noted. Totals include estimates for countries for which official statistics are unavailable.

¹ Excludes interfarm sales.

² Includes hogs shipped in from other States and from central markets but excludes intrastate shipments.

³ Adjustments were made for hogs shipped in and changes in inventory.

⁴ No adjustments made for cost of hogs shipped in and changes in inventory values. Gross income is "Cash receipts from sales of hogs, pork, and lard" plus "Value of hogs slaughtered for home consumption."

Bureau of Agricultural Economics. Data for 1924-42 in Agricultural Statistics, 1952, table 465.

TABLE 469.—Hogs: Production, disposition, cash receipts, and gross income, by States, 1951

¹ Excludes interfarm sales. ² Includes hogs shipped in from other States and from central markets but excludes intrastate shipments. ³ Adjustments were made for hogs shipped in and changes in inventory. ⁴ No adjustments made for cost of hogs shipped in and changes in inventory values. Gross income is "Cash receipts from sales of hogs, pork, and lard" plus "Value of hogs slaughtered for home consumption."

¹ Total rail and truck receipts.² Rounded total of complete figures.³ Covers receipts at 16-20 concentration yards and 10 or 11 packing plants in interior Iowa and southern Minnesota prior to 1947. Since January 1947, represents receipts at 14 packing plants and 30 concentration yards. Segregated truck receipts are not available.

Production and Marketing Administration. Compiled from reports received from stockyard companies. Data for 1930-42 in Agricultural Statistics, 1952, table 468.

¹ Includes lard in tushonka in 1943-46, and exports in food packages through CARE and other nongovernmental agencies in 1944-51.

² Less than 500 pounds.

³ Includes production in war-duration or "Fulmer" plants.

⁴ Includes U. S. Department of Agriculture shipments to United States territories.

⁵ Adjusted for changes in stocks held outside reported positions by U. S. Department of Agriculture.

⁶ Shipments to Puerto Rico and Virgin Islands only, beginning April 1948.

⁷ Preliminary.

Bureau of Agricultural Economics. Compiled as follows: Stocks, 1940-41, and production, from U. S. Department of Agriculture. Stocks, 1941-53, Bureau of the Census. Trade figures, from Foreign Commerce and Navigation of the United States, and records of the Bureau of the Census and U. S. Department of Agriculture. Use in shortening, margarine, and nonfood products, Bureau of the Census and Bureau of Internal Revenue. Disappearance computed from data on production, trade, and stocks. Totals and per capita estimates computed from unrounded numbers. Data for 1912-39 in Agricultural Statistics, 1952, table 477.

¹ Lambs saved during the year. ² Excludes interfarm sales. ³ Includes sheep and lambs shipped in from other States and from central markets but excludes intrastate shipments. ⁴ Preliminary. ⁵ Adjustments were made for sheep and lambs shipped in and changes in inventory. ⁶ No adjustments made for cost of sheep and lambs shipped in and changes in inventory values. Gross income is "Cash receipts from sales of sheep, lambs, muttons, and lamb" plus "Value of sheep and lambs slaughtered for home consumption."

Bureau of Agricultural Economics. Data for 1924-42 in *Agricultural Statistics, 1952*, table 486.

FOOTNOTES FOR TABLES 490 AND 491.

¹ Excludes interfarm sales. ² Includes sheep and lambs shipped in from other States and from central markets but excludes intrastate shipments. ³ Adjustments made for cost of sheep and lambs shipped in and changes in inventory. ⁴ No adjustments made for cost of sheep and lambs shipped in and changes in inventory values. Gross income is "Cash receipts from sales of sheep, lamb, mutton, and lamb" plus "Value of sheep and lambs slaughtered for home consumption."

¹ Includes sheep shorn at commercial feeding yards.

² For Texas and California the weight per fleece is the amount of wool shorn per sheep and lamb during the year.

³ Price per pound relates to the marketing season April-March.

⁴ Preliminary.

Bureau of Agricultural Economics.

WOOL

377

TABLE 504.—Wool: Number of sheep shorn, weight per fleece, production, average price per pound received by farmers, cash receipts, pulled wool production, Jan. 1 stocks, exports, imports, total new supply of apparel wool, and imports of carpet wool, United States, 1940-52

¹ Includes sheep shorn at commercial feeding yards.

² Revised. Beginning with 1943 the average price is for the marketing season April-March. Prior to 1943 average prices relate to the calendar year.

³ Preliminary.

⁴ Grease basis as reported by Bureau of the Census. Includes wool stored in bonded warehouses prior to payment of duty. Excludes wool on farms for all years, and wool stored for the British Government for re-export, 1942-46.

⁵ Includes hair of the angora goat, alpaca, and other like animals.

⁶ Apparel wool for all years includes the item "not finer than 40's" both free and dutiable. Carpet wool includes only Donskoi, Smyrna, East Indian, Chinese, and similar wool without merino or English blood.

⁷ Production minus exports plus imports; stocks not taken into consideration.

⁸ Does not include 222,222,220 pounds in 1942; 275,476,308 pounds in 1943; 2,725,929 pounds in 1944; 5,372,698 pounds in 1945; and 14,840 pounds in 1946, imported free of duty as an act of international courtesy. Wool so imported consisted almost entirely of wool stored in this country for the British Government, and later re-exported. This wool was not available to domestic mills.

⁹ Clean content.

Bureau of Agricultural Economics. Imports and exports from Foreign Commerce and Navigation of the United States and other reports of the Department of Commerce. Data for 1909-39 in Agricultural Statistics, 1952, table 499.

¹ Scoured wool, plus greasy wool converted to a scoured basis, using assumed average yields. Includes both pulled and shorn, foreign and domestic wool. Beginning January 1942 wool was considered as consumed (1) on the woolen system when laid in mixes and (2) on the worsted system when entering scouring bowls. From August 1948 forward consumption on the worsted system is taken as the sum of top and noil production.

² 53 weeks.

³ Beginning 1946, excludes wool consumed on the cotton system and in the manufacture of felt, hat bodies, and other miscellaneous products. ⁴ Preliminary.

Bureau of Agricultural Economics. Compiled from reports of Bureau of Census.

¹ Only market trading in wool top futures.

Commodity Exchange Authority. Trading and open contract figures compiled from daily reports from exchange clearing members. Prices compiled from records of the Wool Associates of the New York Cotton Exchange.

FOOTNOTES FOR TABLE 505.

¹ For summary purposes wool produced mostly in the spring in the Northern Hemisphere is combined with that produced in the season beginning July 1 or Oct. 1 of the same year in the Southern Hemisphere. Pulled wool is included for most countries at its greasy equivalent.

² Estimates for countries having changed boundaries have been adjusted to present boundaries.

³ Preliminary. ⁴ Includes estimates for Newfoundland, Netherland West Indies, Guatemala and El Salvador. ⁵ Includes Albania, Bulgaria, Czechoslovakia, Hungary, Poland, Rumania, and Eastern Germany. ⁶ Includes estimates for countries producing 2 million pounds or less, namely Belgium, Denmark, Iceland, Sweden, and Switzerland. ⁷ Includes China Proper (22 provinces) Manchuria, Jehol, and Sinkiang (Turkestan). ⁸ Includes Pakistan. ⁹ Includes estimates for Afghanistan, Cyprus, Palestine, Jordan, Outer Mongolia, Tibet, Nepal, and China. ¹⁰ Includes relatively small production in Bolivia, Colombia, Ecuador, Paraguay, and Venezuela. ¹¹ Union of South Africa, Union Protectorate, and South West Africa. ¹² Includes estimates for Kenya, French West Africa, and Togo.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, results of office research, and other information.

¹ Wools grown in the range areas of Washington, Oregon, the intermountain States, including Arizona, New Mexico, and parts of the Dakotas, Nebraska, Kansas, and Oklahoma. These wools vary considerably in shrinkage and color.

² Open market prices except for January 1944-May 1947, which are Commodity Credit Corporation selling prices.

³ Open market prices except for January 1944-August 1948, which are Commodity Credit Corporation selling prices.

⁴ Wools grown east of the Mississippi River and in the farm areas of The Dakotas, Nebraska, Kansas, Oklahoma, Minnesota, Iowa, and Missouri.

⁵ No quotations August 1939-August 1946. London wool auctions were suspended at outbreak of war. Supplies and prices under Government control.

⁶ 10-month average.

Bureau of Agricultural Economics. Prices for domestic wools compiled from reports of Production and Marketing Administration and for foreign wools from Kreglinger and Fernau market reports. Data for 1930-42 in Agricultural Statistics, 1952, table 503.

¹ All figures in this table do not represent production, as a product may be inspected more than once in the course of further manufacture and some products may undergo further processing in plants not under Federal inspection. Compiled from weekly data; therefore the number of weeks added to obtain the annual totals may vary slightly. ² Includes production for the U. S. Department of Defense. ³ Excludes production for the U. S. Department of Defense July 29-Dec. 29. ⁴ Includes 59,045,000 pounds processed for the U. S. Department of Defense.

Production and Marketing Administration. Compiled from data of the Bureau of Animal Industry. Data on a slightly different basis for years prior to 1950 may be found in earlier editions of Agricultural Statistics.

¹ Meats canned under Federal inspection include the largest part of the canned meat produced in the United States. Net product weight; including weight of nonmeat ingredients of products.

² Includes production for the U. S. Department of Defense.

³ Excludes production for the U. S. Department of Defense July 29-Dec. 29.

⁴ Excludes 59,045,000 pounds processed for the U. S. Department of Defense.

Production and Marketing Administration. Compiled from data of the Bureau of Animal Industry.

¹ Based on estimated weight of carcasses and meat products. Includes all gradings for the Commodity Credit Corporation. On Sept. 18, 1942, Office of Price Administration RMPR 196 required all Choice beef and veal to be graded by a United States official grader, and on Dec. 16, 1942, the order was revised to include all grades of beef except Cutter and Canner, and of veal except Cull. On Apr. 3, 1943, the order was again revised to include Cutter and Canner beef and Cull veal. On Apr. 10, 1943, RMPR 239 required grading of all lamb and mutton carcasses. On Oct. 16, 1946, grading of all meats was restored to a voluntary basis. Compulsory grading of beef, veal, calf, lamb and mutton pursuant to O.P.S. regulation became effective May 7, 1951.

² Totals based on unrounded figures.

Production and Marketing Administration. Data for 1930-42 in Agricultural Statistics, 1952, table 512.

¹ All meats converted to a carcass weight equivalent; includes beef and veal, pork, mutton and lamb, goat, and horse meat; excludes live animals, edible offal, lard, rabbit, and poultry meat. ² Preliminary. ³ Averages for years 1935-39 for prewar. ⁴ Includes Newfoundland, beginning Apr. 1, 1949. ⁵ Not available. ⁶ Excludes exports of horse meat, which averaged 2 million pounds in 1935-39, 66 million in 1946-50, 15 million in 1950, 22 million in 1951, and 20 million in 1952. ⁷ Partially estimated. ⁸ Includes carcass meat equivalent of live cattle exports. ⁹ Western Germany, beginning Oct. 1, 1949. ¹⁰ Averages for years 1931-35 for prewar. ¹¹ Includes edible offal. ¹² Averages for 2-4 years only. ¹³ Includes Bulgaria, Czechoslovakia, East Germany, Hungary, Poland, and Rumania. ¹⁴ Present territory for postwar years. ¹⁵ Estimated: based on imports into receiving countries reporting imports by origin. ¹⁶ Estimated: based on exports from supplying countries reporting exports by destination. ¹⁷ Revised to include 44 countries instead of the 39 countries included in previous summaries. The 5 additional countries are: Dominican Republic, Honduras, Peru, Philippine Republic, and Venezuela.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Foreign Service officers, and other available information. In postwar years some international trade, particularly imports, may have been excluded because of lack of information upon which to base estimates.

¹ Carcass weight equivalent: Dressed weight of cattle, calves, sheep, and lambs; pork excluding lard is carcass equivalent weight of hog products minus an allowance for carcass fat rendered for lard. Edible offals are excluded. Civilian consumption through 1940 is assumed to be the same as total consumption; for 1941 to date military takings are excluded.

² Includes lard entering into manufactured products.
³ Includes meat produced and consumed from animals slaughtered under the emergency Government relief-purchasing and hog-reduction programs.
⁴ Preliminary.

Bureau of Agricultural Economics.

¹ Carcass weight equivalent of all meat, including the meat content of minor meats and of mixed products. Exports exclude shipments for military-civilian feeding in United States occupied areas. Shipments to territories include shipments to all territories through 1943, from 1949-51 shipments to Puerto Rico and Virgin Islands, and for 1952 shipments to Puerto Rico, Virgin Islands and Guam. ² Include exports and shipments to territories by U. S. Department of Agriculture, 1941-49. ³ Less than 500,000 pounds. ⁴ Exports and shipments for 1949-52 not strictly comparable with earlier years (see footnote 1). ⁵ Preliminary. 1952 data are computed with slightly revised conversion factors.

Bureau of Agricultural Economics. Data on imports and commercial exports and shipments are computed from records of Bureau of the Census; those on exports and shipments by U. S. Department of Agriculture are separately estimated from deliveries and stocks. Data for 1910-39 in Agricultural Statistics, 1952, table 516.

¹ Weights for combining the different species are based on average sales values per head. Allowing the average sales values per head for milk cows to equal 1.00, the value per head for other kinds of livestock and poultry is expressed in terms of the value of milk cows: The weights used for 1910-31 are the 1924-28 relative average sales values per head as follows: milk cows 1.00, other cattle and calves 0.63, hogs 0.32, sheep and lambs 0.13, horses 1.04, mules 1.29, chickens .011, turkeys .042. The weights used for 1932-44 are the 1937-41 relative average sales value per head as follows: milk cows 1.00, other cattle and calves 0.75, hogs 0.29, sheep and lambs 0.10, horses 1.33, mules 1.64, chickens .010, turkeys .042. The weights used for the period since 1944 are the 1947-49 relative average sales value per head as follows: milk cows 1.00, other cattle and calves 0.76, hogs 0.31, sheep and lambs 0.10, horses 0.29, mules 0.53, chickens .007, turkeys .042. The indexes for each period have been linked together as of 1932 and 1945 to provide a continuous series.

² Milk cows, other cattle and calves, hogs, sheep and lambs, horses, mules, chickens and turkeys; turkeys included beginning 1929. ³ Milk cows, other cattle and calves, hogs, and sheep and lambs.

⁴ Milk cows, heifers 1-2 for milk and heifer calves saved for milk. Weights for combining the three classes of milk animals are based on the average sales value per head using relationship of Jan. 1 values per head for each class to milk cows to determine sales value per head for heifers 1-2 and heifer calves. The weights used for 1910-31 are the 1924-28 relative average Jan. 1 values per head as follows: milk cows 1.00, heifers 1-2, 0.49, heifer calves 0.30. The weights used for 1932-44 are the 1937-41 relative average Jan. 1 values per head as follows: milk cows 1.00, heifers 1-2, 0.54, heifer calves 0.31. The weights used for the period since 1944 are the 1947-49 relative average sales value per head as follows: milk cows 1.00, heifers 1-2, 0.56, heifer calves 0.32. The indexes for each period have been linked together as of 1932 and 1945 to provide a continuous series. ⁵ Chickens and turkeys; turkeys included beginning 1929.

CHAPTER VII

DAIRY AND POULTRY STATISTICS

Dairy statistics in this chapter include series relating to many phases of production, movement, prices, stocks, and consumption of milk and its products. The two distinct series of numbers of milk cows on farms included in this publication should not be confused. One series entitled "Cows and heifers two years old and older kept for milk, January 1" is an inventory number of this specific age-sex classification which is estimated as one of the major groups making up the total cattle population at the beginning of the year. The other series, identified as "Milk cows on farms," is an annual average number of milk cows during the year (excluding any not yet fresh) which is used in connection with determining milk production. More animals are represented in the former series than the latter because heifers over 2 years of age which have not freshened are included.

In comparing the several series of milk prices, it is important to note that prices received by farmers for all whole milk sold are for milk or butterfat content as actually sold (about 3.91 percent), while certain prices paid by dealers for milk for fluid purposes or for specified manufacturing purposes may be quoted on a 3.5 percent butterfat basis, or for some types of manufacturing milk on the test of the milk used for that particular purpose.

Poultry and poultry products statistics include inventory numbers of chickens by classes; the production, disposition, and cash receipts, and gross income from chickens and eggs; poultry and egg receipts at principal markets; commercial broiler production; turkey production, disposition, cash receipts, and gross income; liquid and dried egg production; and the National Poultry Improvement Plan.

The estimates of chickens and turkeys on farms in census years differ from the census figures to the extent of the seasonal disappearance in numbers from January 1 to the average date of the enumeration. Estimates relating to inventories, production and income exclude poultry and eggs which are produced on places not classified as farms.

¹ A sire is proved when records of 5 or more of his unselected daughters are compared with records of their dams.² Lactation records converted to 305-day, twice-a-day milking, mature-equivalent basis.³ Prior to 1946 data represent cows enrolled.

Bureau of Dairy Industry.

FOOTNOTES FOR TABLE 537

¹ Averages for the October-May feeding period, as reported by about 6,000 dairy correspondents.² In computing hay equivalents, 3 tons of silage or 2 tons of other roughage were considered equal to 1 ton of hay.³ Seasonal average condition for Apr. 1-Oct. 1 period.⁴ Includes citrus pulp fed.⁵ Data insufficient for stable average.

Bureau of Agricultural Economics.

TABLE 540.—Cows in dairy-herd-improvement associations: Production, feed costs, and relationship of feed input to production returns for cows of different levels of butterfat production, United States, 1951

¹All counties in the United States and all areas in Puerto Rico and the Virgin Islands are in the modified accredited area. Areas or counties so designated are those in which tuberculosis does not exist among more than 0.5 percent of the cattle as determined by official tuberculin testing and from which all reactors to the test have been removed.

| 1952 ³ | 21,606 | 5,328 | 209.4 | 3.93 | 115,117 | 4,525 | 229,010 |

¹ Average number on farms during year, heifers that have not freshened excluded.

² Excludes milk sucked by calves and milk produced by cows not on farms.

³ Preliminary.

Bureau of Agricultural Economics. Data for 1924-39 in Agricultural Statistics, 1952, table 539.

TABLE 546.—Milk: Quantities used and marketed by farmers, United States, 1943-52

| Year | Milk used on farms where produced | | | | Milk marketed by farmers | | | |
|-------------------|-----------------------------------|---------------------------------|------------------------------|-------------------------|---------------------------------|-----------------------|---|---|
| | Fed to calves | Consumed as fluid milk or cream | Used for farm-churned butter | Total utilized on farms | Delivered to plants and dealers | | Retailled by farmers as milk and cream ² | Total in combined milk and cream marketings |
| | | | | | As whole milk ¹ | As farm-skimmed cream | | |
| | Million pounds | Million pounds | Million pounds | Million pounds | Million pounds | Million pounds | Million pounds | Million pounds |
| 1943 | 3,276 | 11,615 | 6,860 | 21,751 | 59,656 | 29,871 | 5,739 | 95,266 |
| 1944 | 3,258 | 11,688 | 6,621 | 21,567 | 63,680 | 26,026 | 5,750 | 95,456 |
| 1945 | 3,290 | 11,451 | 6,714 | 21,455 | 68,929 | 23,868 | 5,576 | 98,373 |
| 1946 | 3,228 | 11,562 | 6,557 | 21,347 | 69,619 | 21,379 | 5,352 | 96,350 |
| 1947 | 3,194 | 11,048 | 6,154 | 20,396 | 70,559 | 20,952 | 4,907 | 96,418 |
| 1948 | 3,064 | 10,505 | 5,808 | 19,377 | 69,010 | 19,712 | 4,572 | 93,294 |
| 1949 | 3,163 | 10,027 | 5,440 | 18,630 | 73,290 | 19,949 | 4,234 | 97,473 |
| 1950 | 3,286 | 9,808 | 5,160 | 18,254 | 74,205 | 20,208 | 3,935 | 98,348 |
| 1951 | 3,450 | 9,790 | 4,910 | 18,150 | 74,172 | 18,715 | 3,804 | 96,691 |
| 1952 ³ | 3,348 | 9,552 | 4,514 | 17,414 | 76,775 | 17,289 | 3,639 | 97,703 |

¹ Estimates include milk delivered to creameries, condenseries, cheese factories, and market milk receiving stations, but exclude market milk sold to other farmers for local delivery.

² Approximations based on health officers' reports of sources of fluid milk in villages, towns, and small cities, and information on sales by producer-distributors.

³ Preliminary.

Bureau of Agricultural Economics. Similar data for 1924-42 in Agricultural Statistics, 1952, table 544, except that the milk used for farm-churned butter was separated between that consumed in the farm household and that sold. Resulting totals for farm use and for products sold are consequently not entirely comparable.

¹ Preliminary.² Milk sherbet, ice milk, and miscellaneous minor frozen products.³ Milk equivalent of butter and condensed milk used in ice cream.⁴ Includes dry cream, malted milk, dry part skim milk, dry ice cream mix, and whole milk equivalent of the fat in cottage cheese.⁵ Includes net milk equivalents on butter and frozen dairy products to avoid double counting of milk from which fat was reused in making a second dairy product.⁶ Computed as the difference between the milk produced on farms and the quantity of milk utilized for manufacture of principal factory dairy products, farm-churned butter, consumption of fluid milk and cream on farms where produced, and feeding of calves. It includes milk consumed as fluid milk and cream by the nonfarm population and by people on farms where milk is not produced. It also reflects the net effects of imports and exports of milk and cream, changes in stocks of cream carried over at the beginning and end of the year, use of milk in miscellaneous products not included above, and any errors in the independently determined figures on production or utilization.

Bureau of Agricultural Economics. Data for 1940-45 in Agricultural Statistics, 1952, table 545.

¹ Includes farm uses. ² Includes for the United States and Canada, cows kept mainly for milk, and for all other countries cows producing over and above the requirements of the calf. ³ Includes milk used for cream. ⁴ Includes milk used for ice cream, dried whole milk, minor products, waste, and balance. ⁵ Total production is shown. Milk production on farms: average 1946-50, 115,977 million pounds; 1951, 114,841 million pounds; 1952, 115,117 million pounds. ⁶ Not available; data currently being revised. ⁷ Includes fluid milk. ⁸ Average for 1947-50. ⁹ Includes canned milk. ¹⁰ Includes both hand-fed milk and milk sucked by calves. ¹¹ Production and utilization include goats milk. ¹² Excludes milk fed to calves. ¹³ Years ending June 30.

Foreign Agricultural Service. Prepared or estimated from official statistics, reports of United States Foreign Service Officers, and other information.

FOOTNOTES FOR TABLES 553 AND 554

¹ Milk sold to plants and dealers and retailed by farmers, plus milk skimmed for sale as cream. ² Computed from the value of milk and cream sold divided by the quantity of milk or milkfat utilized in preparation of these products for market.

³ Milk used for fluid consumption and home-made butter on farms where produced valued at average per unit returns for milk utilized in all forms of sale.

⁴ Value of sales of milk and cream plus value of milk used for farm consumption and farm butter churned.

⁵ Milk produced on farms valued in each State at average returns per 100 pounds for milk utilized in dairy products sold. In addition to gross income, it includes the value of whole milk fed to calves.

TABLE 553.—Farm dairy products: Quantity sold, price, value of sales and farm use, gross income, and farm value, by States, 1951

¹ Preliminary.² Data not available.³ Totals for 1951 and 1952 do not include farm butter sold since this was not estimated separately.⁴ Milk sold at wholesale and retail plus milk skimmed for sale as cream and milk equivalent of farm butter sold.⁵ Computed from the value of milk, cream, and farm butter sold divided by the quantity of milk or milkfat used in the preparation of these products for market.⁶ For 1951 and 1952 includes milk used for all butter churned on farms, including a small quantity which was sold but for which separate data were not available.⁷ Milk utilized for household consumption valued in each State at average returns per 100 pounds for milk utilized in dairy products sold.⁸ Value of milk, cream, and farm butter sold plus the value of these products consumed in the household on farms where produced.⁹ Milk produced on farms valued in each State at average returns per 100 pounds for milk utilized in dairy products sold. In addition to gross income, it includes the value of whole milk fed to calves.

Bureau of Agricultural Economics. Data for 1924-42 in Agricultural Statistics, 1952, table 547.

¹ Annual price is simple average of United States prices for 12 months.

² Average price for all milk sold at wholesale to plants and dealers, based on reports from milk-market administrators, cooperative milk-marketing associations, whole-milk distributors, and milk-products manufacturing plants. Annual prices, by States, weighted by estimated volume of all milk sold at wholesale to plants and dealers.

³ Based on reports of special price reporters. Annual prices, by States, weighted by estimated volume of cream sold.

⁴ Dealers' buying prices, f.o.b. local shipping point or country plant, for standard grade milk which is used for city distribution as fluid milk.

⁵ Includes milk for canned condensed milk. Prices f.o.b. factory.

⁶ Does not include Government dairy production payments, made October 1943 to June 1946.

⁷ Preliminary.

⁸ Price f.o.b. factory or local receiving station, whichever is the customary place for determining prices.

⁹ Monthly price and butterfat test obtained by weighting together milk for canning, milk for butter and byproducts, and milk for American cheese. Annual averages are simple averages of monthly prices.

Bureau of Agricultural Economics. Data for 1930-42 in Agricultural Statistics, 1952, table 550.

¹ As specified in order. ² Includes producer-handlers where they represent an appreciable portion of the market. ³ Revised for markets for which audited data were available. ⁴ Represents total volume distributed within the marketing area, except where milk sold outside the area could not be segregated. Includes sales of milk received from sources other than producers. Milk sold by handlers subject to another Federal Order not always included in data for market in which distributed. ⁵ Includes whole milk equivalent of concentrated milk sold. ⁶ Weighted average. ⁷ Includes sweet and sour cream and milk and cream mixtures containing 6 percent or more butterfat. ⁸ Includes skim milk, buttermilk and cultured specialties, and flavored milk and milk drinks. ⁹ 201-210 mile zone. ¹⁰ September-December. ¹¹ December only. ¹² Suburban Chicago market merged with Chicago July 1, 1951. ¹³ 70-mile zone January-June 1951; 55-70 mile zone July 1951-December 1952. ¹⁴ Includes data for Suburban Chicago market. ¹⁵ Individual

prices, butterfat differentials, number of producers, receipts from producers and fluid consumption, 1951 and 1952

¹ "Standard" refers to the grade of milk commonly sold in each market. Grades may vary from market to market because of variation of the factors which enter into grade determination.

² Changed from New Haven; prices identical at time of change in 1950.

³ Simple average.

Bureau of Agricultural Economics. Compiled from reports secured through the cooperation of milk distributors, producers' associations, and municipal officers.

¹ Revised. ² Preliminary.

³ Excluding American full skim cheese and cottage, pot, and bakers' cheese.

⁴ Comparable data prior to 1946 not available. Cottage cheese curd includes cottage, pot, and bakers' cheese with a butterfat content of less than 4 percent, made by reporting plants. Creamed cottage cheese includes cheese with a butterfat content of 4-19 percent. Cottage cheese curd and creamed cottage cheese should not be added together to get a total cottage cheese figure, for, while some of the cottage cheese curd is sold direct for consumption without further processing, a considerable part is creamed within the plant or shipped to another plant for creaming prior to sale.

¹ Includes fluid milk equivalent of cream. Data for 1909-23 are very rough approximations of consumption rates. Official milk production and utilization estimates have not been developed for this period. The total apparent civilian consumption for the years 1941-52 was obtained by subtracting military takings from total fluid milk use. The per capita civilian consumption, 1924-52, was obtained by dividing the total apparent civilian consumption by the total population adjusted for underenumeration, and for members of the armed forces not eating out of civilian food supplies.

² Preliminary.

¹ Total disappearance is based on production, imports, and change in stocks during the year. Production statistics for these commodities appear in other tables in this chapter. The total apparent civilian consumption was obtained by subtracting ending stocks, shipments and exports, (military takings also, 1941-52) from the total supply. The per capita civilian consumption for each year was obtained by dividing the total apparent civilian consumption by the total population adjusted for underenumeration, and for members of the armed forces not eating out of civilian food supplies. Production data on most manufactured dairy products have been reported by the Bureau of Agricultural Economics beginning around or somewhat before 1920. For years prior to such reporting, the data shown in the above table were interpolated, using as guides information from Census of Manufactures, market receipts data where available, and B A E estimates for later years.

² Includes both farm and factory-made butter.

³ Includes all kinds of cheese except cottage, pot, and bakers' cheese, and full-skim American.

⁴ The evaporated milk is unskimmed, unsweetened, case goods. The condensed milk is unsweetened (plain condensed), unskimmed, bulk goods; and sweetened condensed milk, unskimmed, case and bulk goods.

⁵ Preliminary.

⁶ Exports and change in stocks exceed production by 1 million pounds.

¹ Includes all kinds of cheese except cottage, pot, and bakers' cheese, and full skim American.

² Data for 1945 and following years not always comparable with data for years prior to 1945 due to inclusion of Government stocks at additional stages of distribution.

³ Case goods.

⁴ Sweetened condensed milk, unskimmed, case goods; beginning 1948 data include cold-storage holdings of bulk condensed, whole, and skimmed milk.

⁵ Preliminary.

Bureau of Agricultural Economics. Compiled partly from Production and Marketing Administration data. Data for 1930-42 in Agricultural Statistics, 1952, table 564.

CHICKENS

441

¹ Does not include commercial broiler production.

² Total chicks hatched less death loss of chicks and young chickens during the year.

³ Death loss during the year of mature chickens on hand Jan. 1.

⁴ Chickens raised less death loss during the year of mature chickens on hand Jan. 1.

⁵ Change in Jan. 1 inventory numbers during the year.

⁶ Chickens consumed in households of farm producers.

⁷ Value of sales plus value of those consumed in households of producers.

⁸ Preliminary.

Bureau of Agricultural Economics.

¹ Does not include commercial broiler production.
² Total chicks hatched less death loss of chicks and young chickens during the year.
³ Death loss during the year of mature chickens on hand Jan. 1.
⁴ Chickens raised less death loss during the year of mature chickens on hand Jan. 1.

⁵ Change in Jan. 1 inventory numbers during the year.
⁶ Chickens consumed in households of farm producers.
⁷ Value of sales plus value of those consumed in households of producers.
Bureau of Agricultural Economics.

CHICKENS

443

TABLE 590.—Chickens: Farm production, disposition, cash receipts, and gross income, by States, 1952¹

| State and division | Number | | | | | | Pounds | | | Price per pound | Value of chickens produced | Cash receipts (sales) | Value of chickens consumed on farms ⁶ | Gross income ⁷ | |
|-------------------------|---------------------|-----------------------------------|-----------------------|----------------------------------|-----------|---|-----------|--------------|---|-----------------|----------------------------|-----------------------|--|---------------------------|---------------|
| | Raised ² | Loss of mature birds ³ | Produced ⁴ | Change in inventory ⁵ | | Consumed in farm household ⁶ | Sold | Produced | Consumed in farm household ⁶ | | | | | | Sold |

¹ Does not include commercial broiler production.

² Total chicks hatched less death loss of chicks and young chickens during the year.

³ Death loss during the year of mature chickens on hand Jan. 1.

⁴ Chickens raised less death loss during the year of mature chickens on hand Jan. 1.

⁵ Change in Jan. 1 inventory numbers during the year.

⁶ Chickens consumed in households of farm producers.

⁷ Value of sales plus value of those consumed in households of producers.

Bureau of Agricultural Economics.

¹ Manufacturer's rating of the number of eggs the incubators will hold, including both incubating and hatching trays.
² For U. S. Record of Performance and U. S. Register of Merit, the year covers either 300 or 365 days from date of first egg of each bird. Most candidates begin laying in the late summer or early fall.

³ Computed as percentage production during 300 days for breeder using the 300-day qualifying period and number for breeder using the 365-day qualifying period. The 300-day qualifying period was made optional in 1950.

Bureau of Animal Industry.

¹ For hatcheries and supply flocks, year began July 1, 1952 and ended June 30, 1953. For U. S. Record of Performance the year covers either 300 or 365 days from date of first egg of each bird. Most candidates begin laying in the late summer or early fall.

² Manufacturers' rating of the number of eggs the incubators will hold, including both incubating and hatching trays.

¹ Data on cross-mated flocks are not truly indicative of the situation since in several States birds in such flocks are reported under the respective purebred heading and in some States those flocks are cross-mated only for a portion of the year to produce broilers; for the remainder of the year they are mated as purebreds for the production of purebred chicks.

² To show the trend in popularity of birds during the past 5 years, data from 42 States which reported in both 1947 and 1952 are given. States not included are: California, Colorado, Maryland, Nevada, Pennsylvania and Tennessee.

Bureau of Animal Industry.

¹ By commercial broiler is meant young chickens of the heavy breeds to be marketed at from 2 to 5 pounds live weight and from which no pullets are kept for egg production. These figures are not included in farm production of chickens.

² Includes value of consumption in households of producers, which is less than 1 percent of total production.

Bureau of Agricultural Economics.

¹ In 1940-50, 88 percent of live weight of sales from farms plus consumption on farms where produced, plus nonfarm production where applicable; since 1950, 89 percent of same.

² Consumption on farms and sales, plus 10 percent of same to allow for nonfarm production.

³ Total poultry less turkeys (through 1932) and less turkeys and ducks (1933 to date).

⁴ Beginning 1941, consumption figures apply only to civilian population.

⁵ Not available.

⁶ July-December.

⁷ Less than 500,000 pounds.

⁸ Preliminary.

Bureau of Agricultural Economics.

¹ Includes all classes of poultry except turkeys. ² On basis of fiscal years ending June of year shown except figures beginning with 1944, which are on a calendar year basis. ³ Covers service to poultry canning plants and plants preparing eviscerated poultry for sale as such, under cooperative agreements between the Federal and State Governments. Inspections are made for condition and wholesomeness and not for grade. The service is optional and is paid for by the applicants. ⁴ Turkeys are included in dressed poultry July-December 1950. ⁵ Turkeys included in dressed poultry January-June 1951. ⁶ Six months only: July-December 1951.

Production and Marketing Administration.

¹ Total poults hatched less death loss of poults and young turkeys during the year.

² Death loss during the year of breeder hens on hand Jan. 1.

³ Turkeys raised less death loss during the year of breeder hens on hand Jan. 1.

⁴ Change in Jan. 1 inventory numbers during the year.

⁵ Turkeys consumed in households of farm producers.

⁶ Value of sales plus value of those consumed in households of producers.

⁷ Less than 500.

Bureau of Agricultural Economics.

TABLE 614.—*Turkeys: Farm production, disposition, cash receipts, and gross income, by States, 1952*

| State and division | Number | | | | | | | Average weight per bird sold | Pounds | | | Price per pound | Value of turkeys produced | Cash receipts (sales) | Value of turkeys consumed on farms ⁶ | Gross income ⁶ |
|-------------------------|---------------------|-----------------------------------|------------------------|----------------------------------|------------|---|------------|------------------------------|--------------|---|--------------|-----------------|---------------------------|-----------------------|---|---------------------------|

¹ Number of eggs produced during the year divided by number of hens and pullets on hand Jan. 1.

² Number of eggs produced during the year divided by the average number of hens and pullets of laying age on hand during the year.

³ Consumed in households of farm producers.

⁴ Value of sales plus value of those consumed in households of producers.

⁵ Less than $\frac{1}{2}$ million.

Bureau of Agricultural Economics.

TABLE 619.—Eggs: Farm production, disposition, cash receipts, and gross income, by States, 1952

| State and division | Hens and pullets | | Rate of lay | | Eggs produced | Eggs used for farm hatching | Consumed in farm household ³ | Eggs sold | Price per dozen | Value of eggs produced | Cash receipts (sales) | Value of eggs consumed on farms ² | Gross income ⁴ |

¹ Number of eggs produced during the year divided by number of hens and pullets on hand Jan. 1.

² Number of eggs produced during the year divided by the average number of hens and pullets of laying age on hand during the year.

³ Consumed in households of farm producers.

⁴ Value of sales plus value of those consumed in households of producers.

⁵ Less than 1/2 million.

Bureau of Agricultural Economics.

¹ Farm production, plus nonfarm production estimated at 10 percent of farm production.

² Shell-egg equivalent of eggs and egg products.

³ Shell eggs and shell equivalent of frozen and dried egg products; includes exports made from Government-owned stocks acquired for price support and other purposes.

⁴ Estimated.

⁵ Beginning 1941, consumption figures apply only to civilian population.

⁶ Preliminary.

¹ Includes stocks of turkeys and other poultry.

Production and Marketing Administration.

CHAPTER VIII

STATISTICS OF FOREIGN TRADE IN AGRICULTURAL PRODUCTS

The term "foreign trade" applies to trade between the United States, including its territories, and foreign countries. Trade between continental United States and its territories is referred to as "shipments." Alaska, Hawaii, Puerto Rico, and, since January 1, 1935, the Virgin Islands are territories. Beginning January 1, 1940, trade with foreign countries through the customs district of the Virgin Islands is not included in United States trade statistics. Figures for shipments out of the territories include small quantities to other territories. In statistics of foreign trade, forest products, and distilled liquors are considered nonagricultural products, as distinct from strictly agricultural products.

Separate figures are not being compiled by the Bureau of the Census on exports under various special economic-aid programs but these exports are included in figures appearing in this publication. Excluded from the export figures are shipments to the United States armed forces abroad for their own use, shipments between continental United States and the territories and possessions, and shipments between the territories and possessions. Effective January 1, 1950, also excluded from the dollar values is the export subsidy paid to private United States exporters on shipments of domestically produced agricultural commodities. The export subsidy programs have included the following commodities: Wheat, wheat flour, raisins, prunes, apples, oranges, canned orange juice, honey, cotton, unshelled filberts, and fresh pears. These subsidies have applied only on exports to certain countries or under certain programs and are usually in effect for limited periods.

Imports for consumption include imports for immediate consumption plus withdrawals from bonded warehouses. In the classification of agricultural imports into supplementary and complementary groups, all those similar to agricultural commodities produced commercially in the United States and all others that are interchangeable in use to any significant extent with such United States commodities are considered *supplementary*. *Complementary* includes all others, about 95 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and spices.

TABLE 631.—Foreign Trade: Value of total and agricultural exports and imports, United States, 1939-51

| Year beginning July | Total domestic exports | Agricultural exports ¹ | | | | Agricultural imports (for consumption) | | | | | Excess of domestic agricultural exports over supplementary imports |

¹ Beginning January 1942, the value of agricultural exports has been revised to include "food exported for relief or charity by individuals and private agencies." These figures, for which separate commodity detail is not available, include a small amount of certain foodstuffs other than agricultural. They were not included in Census reports as agricultural prior to 1949.

² Supplementary agricultural imports consist of all imports similar to agricultural commodities produced commercially in the United States, together with all other agricultural imports interchangeable to any significant extent with such United States commodities. Complementary agricultural imports include all others, about 95 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and spices.

³ Excess of imports. ⁴ Preliminary.

Foreign Agricultural Service. Compiled from official records of the Bureau of the Census and of the United States Tariff Commission. Data for 1909-38 in Agricultural Statistics, 1952, table 625.

¹ Preliminary.² Supplementary agricultural imports consist of all imports similar to agricultural commodities produced commercially in the United States, together with all other agricultural imports interchangeable to any significant extent with such United States commodities. Complementary agricultural imports include all other, about 95 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and spices.³ Imports include horses and mules for immediate slaughter and teams owned by immigrants.⁴ Less than 500.⁵ Imports exclude wool imported free in bond for manufacture of carpets, rugs, etc. which are listed with "complementary" products.⁶ January-June. ⁷ Prior to 1950–51, corn flour included in cornstarch.⁸ Beginning 1950–51, excludes corn flour.⁹ Beginning 1950–51, "Other starch" included in "Other vegetables and preparations."¹⁰ Excludes corn, barley, oats, grain sorghums, and wheat (unfit for human consumption).¹¹ Exports include palm-kernel oil. ¹² Not separately classified.¹³ Coffee imported through the customs district of Puerto Rico is considered a supplementary import and is excluded from the complementary value.¹⁴ Imports exclude value of rubber salvaged from the high seas.¹⁵ These figures for which separate commodity detail is not available, include a small amount of certain foodstuffs other than agricultural. They were not included in Census reports as agricultural prior to 1949.

Foreign Agricultural Service. Compiled from official records of the Bureau of the Census and of the United States Tariff Commission.

¹ Preliminary.
² Prior to 1943, bales of 500 pounds each; 1943-45, bales of 478 pounds each; January 1946-September 1948, bales of 500 pounds each; beginning October 1948, bales of 480 pounds each.
³ Beginning 1949, reported in pounds; prior to 1949, they have been converted on the following basis: Grapefruit, 1942-48, 78 lb. per box; lemons, 1942-48, 79 lb. per box; oranges, 1942-48, 84 lb. per box; apples, 1942-48, 140 lb. per barrel, 48 lb. per basket and 44 lb. per box.
⁴ Tons of 2,000 pounds each.
⁵ Includes apple waste (except pomace).
⁶ Less than 500.
⁷ Beginning 1944, 1 bushel of malt (34 lb.), the product of 1 bushel of barley grain (48 lb.). Prior to 1944, 1.1 bushels of malt the product of 1 bushel of grain.
⁸ Beginning 1946, 100 pounds of degermed cornmeal, the product of 3.16 bushels of corn. Prior to 1946, the factor for nondegermed meal (1 barrel of meal the product of 4 bushels of corn) has been used. Prior to 1950-51, corn flour was included in cornstarch.
⁹ Beginning 1943, 100 pounds of oatmeal the product of 7.6 bushels of oats. Prior to 1943, 18 pounds of meal the product of 1 bushel of oats.
¹⁰ 65 pounds of milled rice, the product of 100 pounds of paddy. 1 pound of flour, meal and polish, the product of 1 pound of milled rice. Flour, meal and polish classification discontinued 1950-51.
¹¹ Rye grain only.
¹² Includes domestic flour and flour ground from imported wheat. From July 1942 through June 1944, 1 barrel of flour the product of 4.7 bushels of wheat. From July 1944 through February 1946, and beginning July 1949, 100 pounds of flour the product of 2.33 bushels of wheat (this is equivalent to 4.56 bushels of wheat per barrel of flour). From March 1946 through June 1949, the factor varies from month to month being a weighted average based on the proportion of higher extraction flour sent to certain destinations.
¹³ Prior to 1950-51, includes corn flour.
¹⁴ Includes peanuts not shelled prior to Jan. 1, 1945.
¹⁵ Includes crude and refined.
¹⁶ July-December; classification discontinued Jan. 1, 1952.
¹⁷ Includes chickpeas, cowpeas and other dried peas.
¹⁸ January-June.
¹⁹ Not separately classified.

Foreign Agricultural Service. Compiled from official records of the Bureau of the Census. Data for 1929-41 in Agricultural Statistics, 1952, table 629.

¹ Includes whole, skimmed, buttermilk, cream, and malted milk and compounds, etc.
² Preliminary.
³ Not separately classified; included in "Other bacon, hams, etc." and "Other pickled pork", prior to June, 1950.
⁴ Less than 500.
⁵ June only.
⁶ Includes appreciable quantities of fresh, chilled or frozen boned beef.
⁷ Excludes the weight of "Other hides and skins", reported in pieces only.
⁸ 1942-45 includes wool (ordinarily dutiable) imported free as an act of international courtesy.
⁹ Includes crin vegetal, hemp, istle or Tampico, kapok, New Zealand fiber and "other".
¹⁰ Beginning August 1946, bales of 480 pounds; prior to August 1946, bales of 478 pounds.
¹¹ Tons of 2,240 pounds.
¹² Tons of 2,000 pounds.

Foreign Agricultural Service. Compiled from official records of the Bureau of the Census and of the United States Tariff Commission. Data for dried milk, cattle, dutiable and for all meats except beef and veal appear in this issue of Agricultural Statistics for the first time. Data for 1929-41 for all other commodities in Agricultural Statistics, 1952, table 630.

| Total | 4,006 | 1,900 | | | |

¹ Preliminary.² Less than 500.³ The Latin American Republics include Costa Rica, Guatemala, Honduras, Nicaragua, Panama Republic, Canal Zone, El Salvador, Mexico, Cuba, Dominican Republic, Haiti, Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, Paraguay, Peru, Uruguay, and Venezuela.⁴ Imports from Hungary.⁵ Beginning January 1952, reported as East Germany and West Germany.⁶ July–December.⁷ Not separately reported prior to January 1952.⁸ January–June.⁹ Includes appreciable quantities of fresh, chilled, or frozen boned beef.¹⁰ The British West Indies include the Bahamas, Bermuda, Barbados, Jamaica, Trinidad and Tobago, and The Windward and Leeward Islands.¹¹ Includes Canary Islands and Other Spanish Africa.¹² Includes Madeira Islands, Angola, and Other Western Portuguese Africa.¹³ Includes Gold Coast, Nigeria, and Other British West Africa.¹⁴ Other vegetable fibers include coir fiber, maguay or cantala, palmyra, piassava, palm leaf fibers, pulu, ramie or China grass, sunn, and fiber, n.s.p.f.¹⁵ Imports from Greece.¹⁶ Grains returned from storage in Canada:

| | 1950 | 1951 |
|--------------|------------------|---------------|
| | 1,000 bushels | 1,000 bushels |
| Corn | 5,172 | 675 |
| Wheat | 2,677 | 936 |
| Other grains | ^a 610 | — |

These grains are included in agricultural exports when shipped for storage. However, they are not included in agricultural imports. They are reported as "articles, the growth, produce, or manufacture of the United States returned."

^a Beginning January 1951, reported in value only.¹⁷ Imports from Iran (Persia).¹⁸ Imports from Netherlands.

Foreign Agricultural Service.

CHAPTER IX

FARM RESOURCES, INCOME, AND EXPENSES

The statistics in this chapter deal with farms, farm people, and the financial aspects of farming. Many of the series are estimates developed in connection with the research activities of the Department. Other series are primarily records of operations, such as certain data from agricultural credit agencies. A number of the series have been revised following receipt of the 1950 census data and such revisions are included. Also a number of the index number series have been shifted to a 1947-49 base period.

For convenience the tables in this chapter have been arranged in general groups as follows:

- Farm property, beginning with table 639.
- Population and employment, beginning with table 661.
- Farm production and distribution, beginning with table 670.
- Prices and income, beginning with table 698.
- Costs and expenses, beginning with table 712.
- Credit and loan programs, beginning with table 735.

A number of tables carried in Chapter IX in "Agricultural Statistics, 1952" have been dropped because no new data were available or the series has been discontinued. These include such national or State tables as: Farm-wage rates (old classification), 1909-48; commodity goals, 1942-52; percentage of small grains harvested by specified methods, 1945 and 1950; percentage of wheat acreage harvested by specified methods, 1938, 1945, and 1950; percentage of oats acreage harvested by specified methods, 1938, 1945, and 1950; percentage of soybean acreage for beans harvested by specified methods, 1950; amount of straw stored for use on farms or for sale and percentage baled or loose, 1945 and 1950; index numbers of volume of agricultural production for sale and for consumption in the farm home; and a table relating to the Federal Farm Mortgage Corporation showing the amount of debt owed by farm owners and secured by farm real estate.

New tables in this chapter cover such subjects as: Major uses of Federal and State-owned rural land, by States; acreage irrigated and cost of water used in 20 States; percentage distribution of farms by economic class and tenure of operator; percentage of land in farms by major types of owners; amount of hail insurance written, net premiums and losses paid; several tables on farm practices covering methods of harvesting hay, corn for grain, corn silage, and sorghum silage; and a table on the number and capacity of farm sales. The tables giving payments to producers under the sugarcane and sugar beet program have been shifted to this chapter from Chapter X.

TABLE 639.—*Farms: Number, acreage, cropland harvested, and value, United States, census years 1850-1950*

| Year | Farms | Land in farms | Farm land as percent of total land area | Cropland harvested, preceding year ¹ | Value of farm land and buildings |
|-----------|---------------|--------------------|---|---|----------------------------------|
| | <i>Number</i> | <i>1,000 acres</i> | <i>Percent</i> | <i>1,000 acres</i> | <i>Million dollars</i> |

| 1900..... | 5,737,372 | 838,592 | 44.1 | 263,218 | 16,615 |
| 1910..... | 6,361,502 | 878,798 | 46.2 | 311,293 | 34,801 |
| 1920..... | 6,448,343 | 955,884 | 50.2 | 348,604 | 66,316 |
| 1925..... | 6,371,640 | 924,319 | 48.6 | 344,549 | 49,468 |
| 1930..... | 6,288,648 | 986,771 | 51.8 | 359,242 | 47,880 |
| 1935..... | 6,812,350 | 1,054,515 | 55.4 | 295,624 | 32,859 |
| 1940..... | 6,096,769 | 1,060,852 | 55.7 | 321,242 | 33,642 |
| 1945..... | 5,859,189 | 1,141,615 | 59.9 | 352,866 | ² 54,761 |
| 1950..... | 5,382,162 | 1,158,566 | 60.9 | 344,399 | ³ 75,261 |

¹ Prior to 1924, this column shows the total acreage of crops for which figures are available, except for 1919, when 14,502,932 acres of corn cut for forage were excluded (most of this was probably duplicated in the acreage of corn harvested as grain). Beginning with 1924, the figures represent the total cropland harvested. ² Revised estimate derived from the Bureau of Agricultural Economics index of farm real estate values applied to 1940 and 1950 Census values. 1945 Census reported a total value of land and buildings of \$46,389 million. ³ Based on sample data from 1950 Census.

Bureau of Agricultural Economics. Compiled from reports of Census of Agriculture, Bureau of the Census.

Bureau of Agricultural Economics.

FOOTNOTES FOR TABLE 642

¹ Approximate land area from the Census of Agriculture, 1950.² Cropland harvested, failure, fallow, and idle, exclusive of cropland used only for pasture.³ Pasture in farms includes: Cropland used only for pasture, woodland pastured, and other pasture not cropland and not woodland.⁴ Woodland in farms not pastured and all other land in farms, including farmsteads, feedlots, and other areas unaccounted for under cropland, pasture, or woodland.⁵ Grazing land not in farms includes public and private grassland and forest land used for grazing but not included in farms. In addition to the land used for grazing in 1949 there were an estimated 20 million acres of woodland and other land that had some value for grazing at certain seasons, but which were not used for grazing.⁶ Forest land not grazed.⁷ Parks, wild life areas, urban and industrial sites, and other miscellaneous areas not in farms and used for grazing.

Bureau of Agricultural Economics. Compiled from the Census of Agriculture, 1950; publications and records of the Bureau of Agricultural Economics; and Federal and State land management and conservation agencies.

TABLE 642.—Land utilization: Land in farms and land not in farms by States, 1949

| Forestland used chiefly for producing commercial timber ⁵ | 318 | 301 | 319 | 354 | 349 | 306 | 325 | 322 | 311 |
| Other land outside farms (cities, roads, railroads, unused wasteland, etc.) ⁷ | 121 | 123 | 126 | 130 | 130 | 131 | 137 | 149 | 144 |
| Grand total land area ⁸ | 1,903 | 1,903 | 1,903 | 1,903 | 1,903 | 1,903 | 1,905 | 1,905 | 1,904 |

¹ Compiled from census reports, publications and records of Bureau of Agricultural Economics and public land administering and conservation agencies.

² Total farm land and total nonfarm land acreages are for the calendar year indicated. Cropland and pasture land acreage usually relates to the preceding year.

³ Land used chiefly for crops, including cropland harvested, crop failure, fallow, and idle cropland. To find land available for crops add plowable pasture to cropland.

⁴ Estimated acreages of small farm orchards and gardens not included and field crops under-enumerated were added to the cropland harvested acreage reported by the Census of Agriculture in 1950 to arrive at the total cropland harvested acreage of 355 million acres.

⁵ Pasture and grazing land not in farms consists of land used chiefly for pasture and includes open or non-forested pasture, idle grassland in first decades, and woodland (pinion-juniper, chaparrel), and shrub and brush pasture in all years.

⁶ Forest land outside of farms used chiefly for commercial timber excludes forested areas included in parks, wildlife refuges, military areas, recreation sites, and arid woodland and brushland used chiefly for pasture.

⁷ Other land outside farms includes urban, industrial, and residential areas outside farms, parks, wildlife refuges, military lands, roads, railroads, ungrazed desert, rock, swamp, and other unused and waste land.

⁸ Remeasurement of the land area of the United States in connection with the 1950 census indicated an approximate total land area of 1,904 million acres. The total acres previously reported were, 1,905 million acres in 1940 and 1945 and 1,903 million acres 1900-35 inclusive.

Bureau of Agricultural Economics.

FOOTNOTES FOR TABLE 644

¹ Because of rounding of figures, use class items do not necessarily add up to total Federal land. Includes Indian land.

² Includes Federal land used under leases and permits, Indian land used by Indians or leased out and prison and hospital farms. Does not include trespass uses. Only 4.3 million acres of Federal rural land was used for farming of which 3 million acres was Indian land.

³ Excludes woodland in park, recreational, and other areas set apart for special uses and woodland used primarily for grazing. The forest area in Federal and Indian ownership is approximately 176 million acres. U. S. Forest Service, "Forests and National Prosperity," U.S.D.A. Misc. Pub. No. 668, 1948, pp. 88-89.

⁴ Parks, wildlife refuges, military and institutional land, etc., used principally for these purposes, and land not otherwise accounted for, including desert, rock, and land of low value for agriculture. Does not include areas used for farming, grazing, public highways, and road rights-of-way. Includes 15,000 acres not allocated by States.

⁵ Includes 7,550 acres in TVA holdings not allocated by States. Also includes 7,267 acres, primarily park lands, in District of Columbia (6,867 parks and 400 Agricultural Research Administration).

⁶ Includes land leased out for farming and grazing and land used by the States in institutional farms, experiment stations, etc.

⁷ Does not include forest and woodland used primarily for grazing or for special purposes such as parks, fish and game refuges, and institutional sites.

⁸ Does not include land used primarily for agricultural production. Includes an undetermined acreage of forest and woodland, some of which has commercial value. Also includes idle and wasteland, including State grant and tax-forfeited land not under lease and with no reported use. Some of this land may have been used in trespass for grazing.

Bureau of Agricultural Economics. Compiled from reports and records of Federal and State agencies.

¹ All series revised except for livestock and non-real-estate debt. Margin of error of the estimates varies with the items.

² Includes all crops held on farms for whatever purpose and crops held in bonded warehouses as security for Commodity Credit Corporation loans. The latter on Jan. 1, 1953 totaled 705 million dollars.

³ Estimated valuation for 1940, plus purchases minus depreciation.

⁴ Preliminary.

⁵ Computed from rounded data.

⁶ Includes individuals, merchants, dealers, and others. Estimates based on fragmentary data.

¹ Revised series with base changed from 1924-29 to 1947-49. As result of new base, Georgia and Mississippi were replaced by Kentucky and Washington in the 20 leading agricultural States. Indexes are based on deposits of member banks of the Federal Reserve System located in places of less than 15,000 population. Annual indexes are simple averages of monthly indexes which are based on average amounts of daily deposits. In preparing indexes for groups of States the amounts of monthly deposits for each State are weighted by the cash farm income of each State in the base period. ² Arkansas, Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Nebraska, New York, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, South Dakota, Texas, Washington, and Wisconsin. ³ Michigan, Wisconsin, and Minnesota. ⁴ Ohio, Indiana, Illinois, Missouri, and Iowa. ⁵ North Carolina, South Carolina, Georgia, Alabama, Mississippi, Arkansas, Louisiana, and Oklahoma. ⁶ Average of 9 months. ⁷ Average of 11 months. ⁸ Average of 7 months. ⁹ Mississippi, Arkansas, and Louisiana. ¹⁰ North Dakota, South Dakota, Nebraska, and Kansas. ¹¹ Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, and Utah.

¹ Includes in 1939, 30,516 6-foot and under combines; in 1940, 41,450; in 1941, 44,001; in 1942, 36,701; in 1943, 25,362; in 1944, 33,169; in 1945, 39,257; in 1946, 38,127; in 1947, 58,965; in 1948, 68,018; in 1949, 75,351; in 1950, 89,149; in 1951, 79,726; and in 1952, 55,863.
² Includes in 1940, 6,140 two-wheel spreaders; in 1941, 21,032; in 1942, 17,087; in 1943, 5,729; in 1944, 12,834; in 1945, 19,982; in 1946, 26,466; in 1947, 42,516; in 1948, 88,073; in 1949, 103,652; in 1950, 78,529; in 1951, 88,500; and in 1952, 85,480.
³ Row cultivators tractor-drawn or mounted, beet or field cultivators not included.
⁴ Not including rice binders.
⁵ Figures omitted to avoid disclosure of operations of individual establishments.
⁶ Figures combined with other harvesting machinery.
⁷ Includes 1,100 self-propelled combines in 1944, 3,287 in 1945, 3,110 in 1946, 5,506 in 1947, 10,198 in 1948, 13,671 in 1949, 10,772 in 1950, 14,207 in 1951, and 18,575 in 1952. Not called for by the Census prior to 1944.
⁸ 1941 and later figures for milking machines include only the number of vacuum-pump units for stationary and portable milking machines. Figures for previous years combine the single and double milker units, and the vacuum-pump units.

Bureau of Plant Industry, Soils, and Agricultural Engineering. Compiled from reports of the U. S. Department of Commerce. Data for 1923-38, in Agricultural Statistics, 1952, table 651.

¹ Estimates based on a sample of persons enumerated in the 1950 Census of Population. They exclude armed forces overseas. Each estimate is separately rounded to the nearest thousand; therefore detailed figures do not always add to totals. Data for the residence groups of the population are based on new 1950 definitions and are not comparable with data from earlier censuses.

¹ Simple averages of monthly employment during the last full calendar week ending at least 1 day before the end of the month.

² Includes farm operators doing 1 or more hours of farm work and members of their family working 15 hours or more during the survey week without cash wages.

³ Includes all persons doing 1 or more hours of farm work during the survey week for pay.

Bureau of Agricultural Economics. Revised on basis of 1950 census data and a different interpretation of census data for earlier years.

¹ Includes harvested acreage of 36 crops for which separate planted estimates are not available. See footnote 6 in table 670.

² Includes all corn, all wheat, oats, barley, rye, buckwheat, flaxseed, rice, sorghum grain, sorghum forage and silage, cotton, hay, timothy seed, sweetclover seed, dry edible beans, soybeans for beans, cowpeas for peas, peanuts picked and threshed, dry field peas, sorgo for sirup, sugarcane, sugar beets, potatoes, sweetpotatoes, tobacco, broomcorn, artichokes, asparagus, snap beans, green lima beans, beets, cabbage, cantaloups (including Honey Dew melons, Honey Ball melons, and miscellaneous melons), carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, lettuce, onions, green peas, green peppers, pimientos, spinach, tomatoes, and watermelons. Red clover seed, alsike clover seed, lespedeza seed, and alfalfa seed are included in the count of crops, but the acreage is not included because it is mostly duplicated in the hay acreage. See footnote 4 in table 671.

³ Preliminary.

¹ The average farm in each group is the average of the most common sizes of farms of the type in the general region indicated. The averages are thus not affected by the activities of operators on farms larger or smaller than the group described, nor by production, prices, and costs of other groups of commodities than those common to the types indicated.

² Total sales plus government payments, perquisites, and change in inventory of livestock and crops.

³ Includes all cash production expenditures plus depreciation and change in inventory of service buildings, machinery, and equipment.

⁴ Estimated average value Jan. 1 of land and buildings times average farm mortgage interest rates in the specified area plus average value Jan. 1 of livestock, machinery, and equipment, and inventory of feed grains and hay times average short-term interest rates.

¹ Includes acreage planted in preceding fall for harvest in the year shown.

² Grain and sweet sorghums for all uses, including sirup. ³ Acreage seeded in preceding fall.

⁴ Preliminary. ⁵ Acreage in cultivation July 1.

⁶ Includes harvested acreage of the following crops: Rye, hay (including tame and wild), sweetclover seed, timothy seed, soybeans for beans, cowpeas for peas, peanuts picked and threshed, tobacco, sugarcane, broomcorn, and 21 commercial vegetables (11 for processing: asparagus, snap beans, green lima beans, beets, cabbage for kraut, sweet corn, cucumbers for pickles, green peas, pimientos, spinach, and tomatoes; 19 for fresh market: artichokes, asparagus, snap beans, green lima beans, beets, cabbage, cantaloups, including Honey Dew, Honey Ball, and miscellaneous melons, carrots, cauliflower, celery, cucumbers, eggplant, lettuce, onions, green peas, green peppers, spinach, tomatoes, and watermelons). Alfalfa seed, red clover seed, alsike clover seed, and lespedeza seed are included in the count of crops, but the acreage is not included because mostly duplicated in the hay acreage; the acreage of peanut hay, largely duplicated in peanuts picked and threshed, has been deducted. The harvested instead of the planted acreage of rye is included because most of the rye acreage not harvested is planted to other crops or used for pasture. Excludes grains cut for hay because part of the acreage shown as planted to wheat, oats, and barley is included in grain hay.

⁷ Includes crops listed separately in this table, plus those mentioned in footnote 6. (Sorghums counted as 2 crops, grain and sweet.)

Bureau of Agricultural Economics. Data for 1929-38 in Agricultural Statistics, 1952, table 665.

FOOTNOTES FOR TABLE 671

¹ Preliminary. ² Asparagus, snap beans, green lima beans, beets, cabbage for kraut, sweet corn, cucumbers for pickles, green peas, pimientos, spinach, and tomatoes.

³ Artichokes, asparagus, snap beans, green lima beans, beets, cabbage, cantaloups (including Honey Dew melons, Honey Ball melons, and miscellaneous melons), carrots, cauliflower, celery, cucumbers, eggplant, lettuce, onions, green peas, green peppers, spinach, tomatoes, and watermelons grown commercially for market. Excludes farm gardens.

⁴ Totals are for crops shown in preceding columns. Alfalfa seed, red clover seed, alsike clover seed, and lespedeza seed are included in the count of crops, but the acreage is not included because mostly duplicated in the hay acreage; the acreage of peanut hay, largely duplicated in peanuts picked and threshed, has been deducted. Other crops not included are sweet corn for fresh market, some of the less important commercial vegetables (282,950 acres in 1952), farm gardens, hops, spelt, hemp, velvetbeans, various legumes and other crops harvested by livestock, minor crops, and fruits and nuts. The acreages shown include some crops harvested in succession from the same land.

⁵ Commercial apples, peaches, pears, grapes, cherries, plums, prunes, apricots, figs, olives, avocados, cranberries, dates, persimmons, pomegranates, oranges (including tangerines), grapefruit, lemons, limes, walnuts, almonds, and filberts. For 1944-52, includes peach, pear, and grape acreages for certain States in which production estimates were discontinued beginning with 1944.

Bureau of Agricultural Economics. Data for 1929-38 in Agricultural Statistics, 1952, table 666.

¹ Includes all corn, all wheat, oats, barley, rye, buckwheat, flaxseed, rice, sorghum grain, sorghum forage and silage, cotton, hay, timothy seed, sweetclover seed, dry edible beans, soybeans for beans, cowpeas for peas, peanuts picked and threshed, dry field peas, sorgo for sirup, sugarcane, sugar beets, potatoes, sweetpotatoes, tobacco, broomcorn, artichokes, asparagus, snap beans, green lima beans, beets, cabbage, cantaloups (including Honey Dew melons, Honey Ball melons, and miscellaneous melons), carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, lettuce, onions, green peas, green peppers, pimientos, spinach, tomatoes, and watermelons. Red clover seed, alsike clover seed, lespedeza seed, and alfalfa seed are included in the count of crops, but the acreage is not included because it is mostly duplicated in the hay acreage. Farm value also includes apples (commercial crop), peaches, pears, grapes, cherries, cranberries, oranges, grapefruit, lemons, limes, plums, all prunes, apricots, figs, olives, almonds, walnuts, pecans, maple products, and hops.

² Preliminary.

³ Unrevised. Differs from tables 668, 671, and 673, which show revisions made after December 1952.

Bureau of Agricultural Economics.

| Total 72 crops ¹⁶ | | | | | | 17 20,020,950 | 17 21,281,578 |

¹ Preliminary.

² Includes acreage planted in preceding fall.

³ Acreage seeded in preceding fall.

⁴ Acreage in cultivation July 1.

⁵ Short-time average. ⁶ Bags of 100 pounds (uncleaned).

⁷ Values apply to the production of cleaned beans or peas.

⁸ Acres grown alone, plus 1/2 the interplanted acres.

⁹ All purposes. ¹⁰ 1,000 trees tapped.

¹¹ Includes some quantities not harvested.

¹² Fresh basis.

¹³ For breakdown between fresh market and processing, see individual crop tables.

¹⁴ Includes fresh market production equivalent tons in the shell and processing production equivalent tons shelled.

¹⁵ Data for "Commercial early potatoes" are included in "Potatoes" on p. 576.

¹⁶ Includes all corn, all wheat, oats, barley, rye, buckwheat, flaxseed, rice, sorghum grain, sorghum forage and silage, cotton, hay, timothy seed, sweetclover seed, dry edible beans, soybeans for beans, cowpeas for peas, peanuts picked and threshed, dry field peas, sorgo for sirup, sugarcane, sugar beets, potatoes, sweetpotatoes, tobacco, broomcorn, artichokes, asparagus, snap beans, lima beans, beets, cabbage, cantaloups (including Honey Dew melons, Honey Ball melons, and miscellaneous melons), carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, lettuce, onions, green peas, peppers, pimientos, spinach, tomatoes, and watermelons. Red clover seed, alsike clover seed, lespedeza seed, and alfalfa seed are included in the count of crops, but the acreage is not included because it is mostly duplicated in the hay acreage. Farm value also includes apples (commercial crop), peaches, pears, grapes, cherries, cranberries, oranges, grapefruit, lemons, limes, plums, all prunes, apricots, figs, olives, almonds, walnuts, pecans, maple products, and hops.

¹⁷ Total values do not include revisions made after December 1952, which are shown in this table.

Bureau of Agricultural Economics.

¹ Feed computations for horses and mules are based on United States average yields of corn, oats, and all hays. In 1939 the calculations allow 800 pounds of oats, 1,400 pounds of shelled corn, and 2.00 tons of hay per head for farm horses and mules 3 years old and over, and animal-unit equivalents for younger animals. Thereafter, the rate of feeding corn was assumed to decline 10 pounds per head annually and the rate of feeding hay to increase 20 pounds. For nonfarm horses and mules the quantity of grain and hay fed per head annually was estimated to average about $\frac{1}{2}$ more than for farm horses and mules.

² Includes products used by our military forces in this country and abroad, and by our domestic civilian population.

³ Crop exports for 1939 are based on yields of that year applied to exports for year beginning July 1, or month representing beginning of crop season. Acreages for livestock exports for 1939 are based on average crop yields for 1935-39 and are for the year beginning July 1. Acreages for crop exports and lend lease beginning with 1940 are for calendar year based on yields of specified year. Acreages for livestock exports and lend lease beginning with 1940 are for calendar year based on average 1940-44, and 1945-49 crop yields.

⁴ Area in 52 principal crops harvested or estimated equivalent plus acreages in fruits, tree nuts, and farm and market gardens.

⁵ Preliminary.

Bureau of Agricultural Economics. Data for 1910-38 in Agricultural Statistics, 1952, table 668.

| 1945 | 100 | 121 | 123 | 111 | 1952 ⁵ | 101 | 133 | 119 | 123 |

¹ Based on sum of the estimated acreage from which one or more crops were harvested plus acreages of crop failure and summer fallow.

² Average 1935-39 farm prices were used as weights in combining annual total production of each crop into an index of total crop production. The index of crop production was divided by the index of total cropland to derive the index of crop production per acre.

³ The index of animal units of breeding livestock is based on numbers of milk cows, beef cows, ewes, and hens and pullets on farms Jan. 1, the number of sows farrowing in the spring of the given year and in the fall of the preceding year, the total number of turkeys on Jan. 1, and the number of goats clipped. The numbers of the various types of breeding units were combined into a total by weighting by constant-dollar value weights based on the contribution of each unit to gross livestock production in the 1935-39 period.

⁴ The index of livestock production was built up from net annual liveweight production of cattle and calves, sheep and lambs, and hogs, and annual production of dairy products, chickens raised, broilers, turkeys, eggs, wool, and mohair. Average 1935-39 farm prices were used as weights in constructing the index. This index was divided by the index of animal units of breeding livestock to obtain production per unit.

⁵ Preliminary.

¹ Average 1935-39 farm prices in each geographic division were used as weights in constructing indexes for each geographic division. United States totals were obtained by summing the geographic division quantity-price aggregates. ² The index of gross farm production measures calendar-year production of all crops and pasture consumed by all livestock, and the product added in the conversion of feed and pasture into livestock and livestock products for human use and into farm-produced horse and mule power. ³ Farm output is gross farm production minus farm-produced power of horses and mules. The index of farm output measures calendar-year production of farm products for human use. ⁴ Farm-produced power production is equal to the estimated cost (including depreciation) at 1935-39 average prices of raising and maintaining farm horses and mules each year. Farm-produced power production includes the feed and pasture consumed by horses and mules, and the product added in converting this feed and pasture into animal power. Continued on page 585.

| 1952 ² | 121 | 117 | 129 | 153 | 134 | 106 | 109 | 147 | 148 | 132 |

¹The indexes measure total crop production, pasture consumed by all livestock, and the product added in the conversion of feed and pasture into livestock and livestock products for human use and into farm-produced horse and mule power. The product-added method of combining crop and livestock production credits crop production to the geographic division in which the feed was grown, and credits livestock "manufacturing" production (product added) to the geographic division in which the feed was fed. Product added by livestock was derived by subtracting the estimated value, at 1935-39 average prices, of feed and pasture consumed by each class of livestock from the total value, at 1935-39 average prices, of livestock and livestock products. The indexes of gross farm production measure calendar-year total production of each geographic division. ²Preliminary.

¹See footnote 1, table 686. Farm output is gross farm production minus farm-produced power of horses and mules. Farm-produced power production is equal to the estimated cost (including depreciation) at 1935-39 average prices of raising and maintaining farm horses and mules each year. Farm-produced power production includes all feed and pasture consumed by horses and mules, and the product added in converting this feed and pasture into animal power. The indexes of farm output measure calendar-year production of farm products for human use in each geographic division.

²Preliminary.

Bureau of Agricultural Economics. Data for 1919-38 in Agricultural Statistics, 1952, table 681.

FOOTNOTES FOR 685—Continued

⁵Product added by livestock was derived by subtracting the estimated value, at 1935-39 average prices, of all feed (including commercial feeds) and pasture consumed by each class of livestock from the total value, at 1935-39 average prices, of livestock and livestock products.

⁶Includes some miscellaneous crop production not included in separate crop groups shown.

⁷Corn, oats, barley, grain sorghum, tame hay, wild hay, sorghum for forage, and estimated pasture consumed by all livestock. ⁸Wheat, rye, rice, and buckwheat. ⁹Commercial truck crops for fresh market shipment (except commercial early Irish potatoes and strawberries) and processing, market gardens, and farm gardens. ¹⁰Potatoes (Irish), sweetpotatoes, dry edible beans, and dry peas. ¹¹Sugar beets, sugarcane for sugar and seed, sugarcane sirup, sorgo sirup, maple sugar, and maple sirup. ¹²Soybeans for beans, peanuts, and flaxseed. ¹³Preliminary.

Bureau of Agricultural Economics. Gross farm production and total farm output cover all production of the calendar year without duplication, but allowances have been set up for production not regularly reported in the available statistical series. Data for 1910-38 in Agricultural Statistics, 1952, table 679.

¹ Reports of associations are included either for the calendar year or for fiscal years ending between July 1 of the calendar year shown and June 30 of the following calendar year, with limited exceptions. ² Includes independent local associations, large-scale centralized associations, and federations of cooperatives. Associations are classified according to their major activity. If, for example, more than 50 percent of an association's business is derived from marketing activities, it is included as a marketing association. Prior to 1950 total dollar volume of the marketing associations was classified as marketing business even though a portion of this volume was derived from handling supplies or performing services for patrons. Similarly, the total volume of purchasing associations was classified as purchasing business even though a portion of their business originated from the sale of various farm commodities or from performing trucking and other services for patrons. In 1950, the method of reporting was revised so that associations reported sales of each major commodity marketed, the value of each major type of supply purchased, and receipts from major types of services performed for patrons. The total marketing volume for 1950, therefore, consists only of the value of products actually marketed and purchasing volume consists only of the value of individual supplies purchased. ³ In 1950 a separate category was set up for associations whose major activity is providing services related to marketing and purchasing activities. ⁴ Includes members (those entitled to vote for directors) but does not include nonvoting patrons. (Some duplication exists because some farmers belong to more than one association.) ⁵ Charges for services in which no duplication occurs. ⁶ Includes the value of farm supplies sold to or purchased for patrons and the service receipts for associations rendering essential services either in marketing or purchasing. Also includes value of products under Government loan where applicable. Combining the supply business by all associations, the estimated totals for purchasing are: \$416,000,000 in 1939; \$450,000,000 in 1940; \$600,000,000 in 1941; \$750,000,000 in 1942; \$1,010,000,000 in 1943; \$1,095,000,000 in 1944; \$1,220,000,000 in 1945; \$1,452,000,000 in 1946; \$1,822,000,000 in 1947; \$2,022,440,000 in 1948; \$2,233,856,000 in 1949. ⁷ The estimated gross business figures for 1950-51 cannot be compared with the estimated business for previous years because in previous figures not all of the supply sales at wholesale level for other cooperatives or terminal market sales for local associations were included. The 1950-51 estimated gross business, however, includes all business reported between cooperatives, such as the wholesale business of farm supply cooperatives with other cooperatives or terminal market sales for local associations. ⁸ The estimated net business figures for 1950-51 cannot be compared with the estimated business for previous years because previous figures included some supply sales at the wholesale level for other cooperatives and some terminal market sales for local associations. The 1950-51 estimated net business represents approximately the level at which the farmer does business with his cooperative. It does not include the wholesale business of farm supply cooperatives with other cooperatives or terminal market sales for local associations.

Farm Credit Administration. Based on records from associations reporting to the Administration.

¹ The gross and net business figures for 1950-51 cannot be compared with the volume of business in previous years because previous figures included some supply sales at the wholesale level for other cooperatives and some terminal market sales for local associations. Also, the 1950-51 figures cover all business for each commodity whether handled by a cooperative specializing in this commodity or not. In previous years, for example, the poultry figure was all the marketing business reported by a cooperative doing more than 50 percent of its business in poultry which meant it also might include some sideline business. The 1950-51 figures cover the poultry business handled by poultry cooperatives, and they also include the poultry business handled by all other types of cooperatives.

² The total number of cooperatives in 1950-51 are comparable with the total number of associations in previous years, but the number of associations handling each commodity in 1950-51 cannot be compared with the figures shown in previous years. For example, in the 1950-51 figures each association reporting any sales of poultry or poultry products is counted in the number of associations handling this commodity. In addition to the 126 associations whose major operations were marketing poultry, 634 associations which were engaged primarily in other types of marketing or supply business were also marketing poultry. Therefore, because many associations are engaged in more than one type of business, these totals are less than the number that would be obtained by adding the number of associations handling individual items.

³ The gross business includes business done between cooperatives, such as wholesale business of farm supply cooperatives with other cooperatives or terminal market sales for local associations.

⁴ This figure represents approximately the value at the level at which the farmer does business with his cooperative. It does not include wholesale business of farm supply cooperatives with other cooperatives or terminal market sales for local associations.

⁵ Includes associations handling forest products, fur pelts, honey, maple syrup, sugarcane, and other products not separately classified.

⁶ Charges for services in which no duplication occurs.

Farm Credit Administration. Based on records from associations reporting to Administration.

FOOTNOTES FOR TABLE 691

¹ These figures include associations doing business in States other than those in which their headquarters are located and cannot be totaled because of duplication.

² Prior to 1950, membership and business volume were credited to the States in which the associations had their headquarters. In 1950, however, large-scale centralized and federated associations gave information on their membership located in each State, the volume of products marketed which originated in each State, and the value of total farm supplies purchased by patrons in each State they serve.

³ The net business figures for 1950-51 cannot be compared with the volume of business in previous years, because previous figures included some supply sales at the wholesale level for other cooperatives and some terminal market sales for local associations. The 1950-51 figures represent approximately the level at which the farmer does business with his cooperative. They do not include the wholesale business of farm supply cooperatives with other cooperatives or terminal market sales performed for local associations.

Farm Credit Administration. Based on records from associations reporting to the Administration.

TABLE 693.—Farmers' Cooperatives: Farmers' equities in marketing and purchasing cooperatives, 1949 and 1950

| 1952..... | 112.84 | 75.48 | 37.36 | 67 | 40.69 | 7.48 | 33.21 | 18 |

¹ These estimates are calculated in terms of a market basket of farm food products, containing quantities equivalent to 1952 average annual purchases per wage-earner and clerical-worker family. The market basket is broken down into seven commodity groups. Quantities of food valued in these series do not change from year to year.

² Retail cost of the market basket and commodity groups are calculated from retail prices published by the Bureau of Labor Statistics, with additional weight on priced items to include the value of those not priced.

³ Farm value is calculated from official series showing prices received by farmers for items priced at retail, applied to quantities of farm products equivalent to retail purchases, and is adjusted by subtracting an imputed value, at the farm level, of nonfood byproducts obtained in processing. Farm value of bakery and cereal products includes value of ingredients other than grain. No allowance is made for Government subsidy payments to producers in 1946, nor for payments to producers under provisions of the Sugar Act. Farm values including Government payments to producers in 1946 were: Market basket, \$405.48; meat products, \$123.43; dairy products, \$87.99; bakery and cereal products, \$28.20; and miscellaneous products, \$6.94. Additional payments to producers of sugar beets amounted to about 23 cents each year for sugar in the bakery and cereal products, and not more than 63 cents for sugar in the miscellaneous products group—about 86 cents for the market basket.

⁴ The marketing margin is the difference between retail cost and farm value. Marketing margins plus Government payments to processors, less Government taxes paid by sugar manufacturers in 1946 were: Market basket, \$383.32; meat products, \$56.98; dairy products, \$61.92; bakery and cereal products, \$65.15; fruits and vegetables, \$116.45; fats and oils, \$25.53; and miscellaneous products, \$27.35. Taxes paid by sugar manufacturers on the quantity of sugar in the market basket amount to 54 cents each year.

Bureau of Agricultural Economics. Revised estimates not comparable to data published in Agricultural Statistics, 1952 and earlier.

¹The estimates in this table have not been revised to take account of recent revisions in cash receipts from farm marketings and other basic data used in estimating the data in this table.

²Farm value is adjusted to eliminate imputed value of nonfood by-products and income from products not purchased by domestic civilian consumers. It does not include Government payments to producers such as soil conservation payments and feed subsidies.

³Retail cost equals the sum of the retail costs for the six commodity groups. For derivation of retail cost by commodity groups, see footnote 5.

⁴Marketing charges equal margin (difference between retail cost and

farm value) minus processor taxes plus Government payments to producers. Taxes and payments are estimated by applying ratios from price-spread data to retail cost.

⁵Retail cost for each commodity group is derived by dividing farm value by farmer's share estimated from commodity price spreads. Valuation is at retail store sales level.

⁶Farm value includes bakery ingredients other than flour.

¹ Season average prices for crops and wool and weighted calendar year averages for livestock and livestock products other than wool. Unless otherwise noted these are averages for marketing season or calendar year computed by weighting State prices by quantities sold, or by production for those commodities for which virtually all of the production is sold.

² Effective parity prices as of the 15th of the month computed in accordance with procedure and index numbers applicable currently. Parity prices shown are those used in connection with a price support determination when applicable, otherwise for the month preceding the start of the crop marketing season for crops and for Dec. 15 of the previous year for livestock and livestock products.

³ Preliminary, based on information available through July 1953.

⁴ Parity price for all cotton.

⁵ Parity price for American-Egyptian cotton.

⁶ Previous year.

⁷ Based on auction sales through July 1953.

⁸ Type 46 included in base period price.

⁹ Types 42-46 and 51-56 included in base period price.

¹⁰ Weighted calendar year average.

¹¹ State prices weighted by production to obtain United States average.

¹² Savannah market price.

¹³ Comparable price computed in accordance with legislation currently in effect.

¹⁴ Dec. 1 price. State averages weighted by production to obtain United States average.

¹⁵ Equivalent on-tree returns for all methods of sale.

¹⁶ Season averages relate to all methods of sale. Parity prices are primarily for fresh use.

¹⁷ Equivalent per unit returns for bulk fruit at first delivery point.

¹⁸ Washington and Oregon only; primarily for processing.

¹⁹ Oregon only.

²⁰ Prices for fresh use for important processing States and average prices for all methods of sale for other States.

²¹ Equivalent packing-house door returns for fresh consumption for Pacific Coast States, average prices for fresh use for Michigan, and average prices for all methods of sale for other States.

²² Includes California dried prunes.

²³ Based on prices for Oregon, Washington, and Louisiana strawberries for fresh use and prices of all strawberries in other States.

²⁴ Based on prices for Washington, Oregon, and Louisiana only.

²⁵ Prices include average Government payments to farmers authorized by the Sugar Acts.

²⁶ Continental United States only.

²⁷ Dec. 1 prices for all States except Louisiana which is a season average.

²⁸ Season average prices for 1947 based on New York, New Jersey, and Pennsylvania; 1948 also includes Florida and Massachusetts; 1949 and subsequent years include the 26 States in which commercial production is important.

²⁹ Based on prices of New Jersey, New York, and Pennsylvania.

³⁰ Shelled basis.

³¹ Simple calendar year average.

³² Sold by farmers directly to consumers.

Bureau of Agricultural Economics.

¹ This summary of the average prices at which the Commodity Credit Corporation has supported agricultural commodities is limited to mandatory commodities and to certain others for which price support has been in effect for several recent years.

² Average support shown is for commercial area only.

³ Other types of long staple cotton have been supported from time to time. American-Egyptian support levels for grade No. 2-½ inch staple Amsak and Pima 32 varieties in period 1945-52, and for average grade in 1953.

⁴ Loan rates were not announced, even though support was mandatory, because prices were considerably above support.

⁵ Other types of tobacco have been supported for various years throughout 1945-53.

⁶ Average support price for year not available.

Production and Marketing Administration. Data for 1933-44 in Agricultural Statistics, 1952, table 693.

¹ This does not replace the farmer index (1926=100) as the official index of primary market prices prior to January 1952. The data from January 1947 forward represent the revised sample and the 1947-49 weighting pattern. Prior to January 1947 they are based on the month-to-month movement of the various individual products price series included in the farmer index.

Bureau of Agricultural Economics. Compiled from data of the Bureau of Labor Statistics.

FOOTNOTES FOR TABLE 702

¹ Potatoes, sweetpotatoes, dry edible beans.

² Wartime subsidy payments on beef cattle, sheep, and lambs, made to producers under programs designed to maintain ceiling prices as established under the Emergency Price Control Act of 1942, are included for the period July 1945-June 1946.

³ Milk, wholesale; milk, retail; and butterfat. Wartime subsidy payments on butterfat and milk made to producers under programs designed to maintain ceiling prices as established under the Emergency Price Control Act of 1942 are included for the period October 1943-June 1946.

⁴ Wartime subsidy payments made to producers under programs designed to maintain ceiling prices as established under the Emergency Price Control Act of 1942 are included.

⁵ Including interest, taxes, and wage rates. This ratio will not necessarily be identical to a weighted average percent of parity for all farm products.

Bureau of Agricultural Economics. Compiled from prices reported to the Department of Agriculture by dealers purchasing agricultural commodities in local farm markets. The price series for individual commodities are averages for all classes and grades of the commodity being sold in local farm markets on or about the 15th of each month. In computing the group indexes, prices of individual commodities have been weighted by average quantities sold during the period 1937-41. Data for 1910-38 in Agricultural Statistics, 1952, table 694.

TABLE 704.—Prices paid by farmers: Index numbers, by groups of commodities, United States, 1939-52¹

[1910-14=100]

| Commodities bought for use in production | | | | | | | | | | |

| Alfalfa, Grimm, per 100 pounds ⁸ | 60.10 | 68.70 | 64.50 | 76.50 | 76.90 |
| Alfalfa, Cert. Ranger, Buffalo and other imp. var. ⁹ | | | | 87.40 | 82.60 |
| Clover, red, per 100 pounds ⁸ | 59.50 | 57.00 | 56.40 | 44.30 | 47.20 |
| Clover, sweet, per 100 pounds ⁷ | 21.30 | 23.90 | 28.60 | 21.30 | 18.70 |
| Clover, alsike, per 100 pounds ⁸ | 50.10 | 43.90 | 46.20 | 53.40 | 55.50 |
| Lespedeza, Korean, per 100 pounds ⁷ | 12.00 | 11.10 | 8.47 | 10.60 | 20.20 |
| Timothy, per 100 pounds ⁸ | 15.50 | 25.20 | 32.10 | 17.90 | 18.40 |
| Kentucky bluegrass, per pound ⁸ | .782 | .753 | .803 | .797 | .762 |
| Common ryegrass, per pound ⁸ | .148 | .167 | .187 | .165 | .170 |
| Sudangrass, per 100 pounds ⁷ | 11.70 | 11.40 | 11.70 | 15.20 | 14.70 |
| Austrian winter peas, per 100 pounds ² | 8.95 | 6.14 | 7.40 | 7.39 | 7.12 |
| Vetch, hairy, per 100 pounds ³ | 23.50 | 24.20 | 22.80 | 21.20 | 20.60 |

¹ Annual average prices based on Mar. 15, June 15, Sept. 15, and Dec. 15 prices unless otherwise indicated. Prices paid by farmers are collected for the most part from retail establishments located in small cities, towns, and in rural areas through using questionnaires sent and returned by mail. ² Based on price for 1 month only. ³ Average based on prices for 2 months.

⁴ Average based on prices for 3 months.

⁵ Prices for different specifications prior to 1952 adjusted to current basis.

⁶ Prices for years prior to 1952 are for models comparable to current model designation.

⁷ Average based on prices for 4 months. ⁸ Average based on price for 5 months. ⁹ Revised.

¹⁰ Average based on prices for 12 months.

¹¹ Average based on prices for 6 months.

¹ Payments under rental and benefit, soil conservation, price adjustment, price parity, Sugar Act, and production programs.

² Value of farm products consumed directly in farm households.

³ Includes an allowance for maintenance and interest on the value of farm dwellings and for a proportionate share of taxes on farm real estate and insurance on farm buildings. In most years the rental value is 9-11 percent of the estimated value of farm dwellings.

⁴ Cash receipts from farm marketings, Government payments, value of home consumption, and rental value of farm homes.

⁵ Includes Government payments. For a number of farms, see table 639 in this book.

⁶ Preliminary.

Bureau of Agricultural Economics.

¹ Amount of money received by farmers during the calendar year from the sale of farm products and from Government payments.

² Quantities of farm products consumed directly in farm households, valued at the average price received by farmers for the sale of similar commodities.

³ Cash receipts include value of home consumption, which is less than 1 percent of total production.

⁴ Ducks, geese, guineas, pigeons, quail, pheasants, and all other.

⁵ Value of home consumption determined by applying milk-equivalent price received for products sold to total home-consumed milk; not available for separate items.

⁶ Horses, mules, honey, beeswax, bees, goats and kids, goat milk, rabbits, and fur animals and their pelts.

⁷ Boysenberries, blackberries, dewberries, loganberries, youngberries, currants, gooseberries, and all other.

⁸ Persimmons, pineapples, pomegranates, nectarines, bananas, guavas, jujubes, mangoes, papayas, prickly pears, quinces, sapodillas, and loquats.

⁹ Bermudagrass, mixed bluestem, mountain bromegrass, buffalograss, dallisgrass, meadow fescue, blue grama, side-oats grama, sand lovegrass, weeping lovegrass, rapeseed, sunflower, purple vetch, crested slender tall, and western wheat grass, Canada wild-rye, and Russian wild-rye.

¹⁰ Payments under agricultural conservation and Sugar Act.

Bureau of Agricultural Economics.

¹The series on income of the nonfarm population and total national income are those previously developed for use in comparison with income of the farm population. They are based on Department of Commerce estimates of nonagricultural income, with appropriate adjustments to improve their comparability with farm income.

²Preliminary.

Bureau of Agricultural Economics.

¹ Cash wages and value of perquisites.

² An adjustment to realized net income to deduct sales out of inventories or to add increases in inventories from current production. Computed by valuing changes during the year in numbers of livestock on farms and in quantities of crops held for sale, at year-end prices.

³ Interest charges payable during the calendar year on outstanding farm-mortgage debt.

⁴ Gross rent to nonfarm landlords minus their share of expenses.

⁵ Preliminary.

Bureau of Agricultural Economics.

¹ Man-hours are in terms of the time required by average adult males to perform various farm tasks. Since many women, children, and older workers accomplish less in an hour than an average adult male, actual hours of work on many enterprises are in excess of those shown.

² Preliminary.

³ Includes labor required for chickens raised, hens and pullets for egg production, broilers, and turkeys.

⁴ Includes, in addition to the livestock listed above, the labor required for minor livestock enterprises, such as goats, bees, ducks, and geese.

⁵ Includes labor required for fencing, repairs to buildings, machinery and equipment, farm woods, pastures, general land maintenance, farm business, and other miscellaneous work.

Bureau of Agricultural Economics.

¹ Revised. The tonnages are on the basis of materials as used. The Census of Manufactures gives superphosphate data in terms of 18 and 45 percent P₂O₅, and muriate of potash on the basis of 50 percent K₂O. In this table they are in terms of the materials actually used. ² Calcium nitrate, Cal-Nitro, urea, etc. ³ Includes dried blood. ⁴ Dried blood, hoof and horn meal, various seed meals, king crab meal, lobster scrap, wool waste, and many others. ⁵ Spent bone black, high-grade residue, precipitated phosphate, and phosphoric acid. ⁶ Cement kiln dust, cotton-hull ashes, wood ashes, and potassium carbonate. ⁷ Magnesium oxide, magnesium sulfate, magnesium carbonate, sulfur, etc. ⁸ Furfural waste, rice hulls, and similar materials.

Bureau of Plant Industry, Soils, and Agricultural Engineering.

| Sold for direct application to soil 7..... | 732, 695 | 855, 898 | 993, 884 | | | |

¹ Lime from oystershells included with quicklime from limestone.

² Figures supplied by Fish and Wildlife Service, Department of Interior.

³ The large increase over 1949 is due in part to a more complete coverage of plants in Michigan.

⁴ Used includes manufacture of superphosphate, phosphates, phosphoric acid, phosphorous, and ferro phosphorous; for direct application to the soil; as a fertilizer filler; stock and poultry feed; undistributed exports; and other minor uses.

⁵ Includes sintered matrix.

⁶ Includes small quantity from Virginia.

⁷ Included in total phosphate rock.

Bureau of Agricultural Economics. Compiled from reports of the Bureau of Mines.

| 1951 | 78.1 | 15.1 | 4.8 | 2.0 | 84.6 | 13.5 | 1.9 | 95.6 | (⁵) | 3.3 |

¹ Half of the N in ammonium nitrate is included under ammonia and half of it under nitrates.
² Concentrated superphosphate and ammonium phosphates. ³ Muriate and sulfate. ⁴ Before 1915 mostly kainite. For 1929-1935 most of it was 20 percent manure salts. Sulfate of potash-magnesia is included under "All other."
⁵ Less than 0.1 percent.

Bureau of Plant Industry, Soils, and Agricultural Engineering.

¹ Includes Government distribution, secondary and minor-element fertilizers, but not liming materials. ² Calculated from the quantities of each grade and kind of fertilizer shipped and the analyses published by Fertilizer Control Authorities, for the respective States. ³ Does not include gypsum, sewage sludge, other than activated sludge, soil sulphur, nor materials containing less than 5 percent total plant foods, classed by this State as "minerals." ⁴ Alaska, Hawaii, and Puerto Rico. The consumption of commercial fertilizers in other territories is negligible. ⁵ Revised.

¹ Motor-carrier fees included with registration fees prior to 1934. Segregation not available.

Bureau of Public Roads, U. S. Department of Commerce. Data for 1929-38 in Agricultural Statistics, 1952, table 718.

FOOTNOTES FOR TABLE 724

¹ Data indicate year of levy but not necessarily year of payment.

² Revised estimates for 1938-51.

³ Index numbers computed before rounding taxes per acre to nearest cent. Revised 1937-51.

⁴ Derived from tax-per-acre figures in Column 1 and value-per-acre figures reported by Bureau of the Census for census years and estimated by Bureau of Agricultural Economics for intercensal years. Value-per-acre figures reported by the Bureau of the Census adjusted by Bureau of Agricultural Economics to exclude the value of public and Indian lands included in census figures. No taxes are levied on public and Indian lands. Taxes levied in any particular year are related to values for the next succeeding year. The series has been revised for 1925, 1926, 1930, and 1932-51.

Bureau of Agricultural Economics.

FOOTNOTES FOR TABLE 725

¹ Figures indicate year of levy but not necessarily year of payment.

² Taxes levied in each region were computed before rounding State figures to nearest thousand dollars.

³ Index numbers were computed before rounding taxes per acre to nearest cent.

⁴ Derived from tax-per-acre figures in Columns 3 and 4 and value-per-acre figures reported by the Bureau of the Census for census years and estimated by Bureau of Agricultural Economics for intercensal years. Value-per-acre figures reported by the Bureau of the Census adjusted by Bureau of Agricultural Economics to exclude the values of public and Indian lands included in census figures. No taxes are levied on public and Indian lands. Taxes levied in any particular year are related to values for the next succeeding year.

⁵ Revised.

¹ Farm Credit Administration. ² In computing rates, each Farm Credit district is given equal weight, but within each district rates are weighted by number of days in force. ³ Contract rates on loans through national farm loan associations. Temporarily reduced rate in effect between July 1, 1935, and June 30, 1944, 3.5 percent. ⁴ Weighted average face rate of bonds outstanding on Dec. 31, each year, excluding bonds owned by the issuing agency. ⁵ Average yields on representative outstanding issues. ⁶ Contract rate. Temporarily reduced rate in effect between July 1, 1940 and June 30, 1944, was 3.5 percent; and between July 1, 1944, and June 30, 1945, was 4.0 percent. Authority to make new loans expired July 1, 1947; however, a few outstanding loans may be refinanced from time to time under loan servicing procedures. ⁷ Weighted average face rate of debentures issued during the year. ⁸ Board of Governors of Federal Reserve System. ⁹ Annual averages of prevailing open-market rates in New York City. ¹⁰ Annual ranges in discount rates on advances secured by Government obligations maturing or callable beyond 1 year and discounts of and advances secured by eligible paper. ¹¹ Comparable representative data not available. ¹² A rate of ½ percent was effective from Oct. 30, 1942, to Apr. 23, 1946, on advances secured by Government obligations maturing or callable in 1 year or less. ¹³ After May 15, 1944, all outstanding bonds were held by the United States Treasury. No bonds were outstanding after December 1947.

¹ For companies with more than 50 percent of their insurance on farm property.

² Number of companies for which data could be obtained. Variations from year to year may not represent real variation in number of companies operating.

³ Excess of assets over liabilities. Most farmers' mutuals are assessment companies and as such are not required to set up unearned premium reserves.

⁴ Revised. ⁵ Estimates based on sample of companies; not available by States.

Bureau of Agricultural Economics. Data for 1939-41 from Farm Credit Administration. All data compiled from published State reports, supplemented by information from State insurance officials, officers of farmers' mutuals, and others.

¹ Continental United States only.² 1939-53, includes regular mortgages, purchase-money mortgages, and sales contracts. Mortgages in process of foreclosure were estimated for 1951 and 1952.³ Loans held by Federal Farm Mortgage Corporation were made on its behalf by Land Bank Commissioner. Authority to make new loans expired July 1, 1947.⁴ 1939-53, includes regular mortgages, purchase-money mortgages, and sales contracts.
⁵ Joint-stock land banks began liquidation May 12, 1933, and completed it Apr. 26, 1951. Also includes banks in receivership.⁶ Prior to 1942, includes tenant purchase loans only. Beginning with 1942, includes farm development (special real estate) loans; beginning with 1944, includes farm enlargement loans; beginning with 1945, includes project liquidation loans; and beginning with 1951, includes farm housing loans. Loans made for these purposes from State Corporation trust funds are included. Loans insured by Farmers Home Administration are not included.⁷ 1939-47, insured commercial banks and 1948 to date, all operating banks.⁸ Revised to incorporate new benchmark data for 1950 from a cooperative Census—Bureau of Agricultural Economics farm-mortgage survey made for that year. The estimate of total farm-mortgage debt for the United States for 1950 has been revised 3 percent upward and estimated debt for individual and miscellaneous lenders has been raised 8 percent. Many State and regional estimates have undergone substantially greater revision. Revisions in State estimates of total farm-mortgage debt for 1950 range from 1 to 33 percent with a median revision of 10 percent. Estimates of farm-mortgage debt held by individual and miscellaneous lenders for 1951 and later years should be regarded only as general indicators of trend.

Bureau of Agricultural Economics. Data for 1910-38 in Agricultural Statistics, 1952, table 727.

FOOTNOTES FOR TABLE 734

¹ Data are for companies with more than 1/2 of their insurance on farm property.² Number of companies for which data could be obtained.³ Excess of assets over liabilities. Most farmers' mutuals are assessment companies and as such are not required to set up unearned premium reserves.⁴ No mutual fire insurance company with more than 1/2 of its insurance on farm property.

Bureau of Agricultural Economics.

FOOTNOTES FOR TABLE 739.

¹ Includes regular mortgages, purchase-money mortgages, and sales contracts. Mortgages in process of foreclosure were estimated by States.² Loans held by Federal Farm Mortgage Corporation were made on its behalf by Land Bank Commissioner.³ Includes regular mortgages, purchase-money mortgages, and sales contracts.⁴ Includes tenant purchase, farm enlargement, farm development, project liquidation, and farm housing loans, and loans for these purposes from State Corporation trust funds.⁵ Includes loans held by commercial and savings banks, individuals, and miscellaneous lenders. See table 744 for State data on loans held by all operating banks (classified by location of bank rather than by location of security).⁶ Revised. See footnote 8, table 736.⁷ Includes District of Columbia.

Bureau of Agricultural Economics.

¹ Continental United States only.

² Loans on regular mortgages only, excluding purchase money mortgages and sales contracts.

³ Loans by the Land Bank Commissioners are made on behalf of the Federal Farm Mortgage Corporation. Authority to make Land Bank Commissioner loans expired July 1, 1947, except for the limited purpose of refinancing loans previously made by the Land Bank Commissioner.

⁴ Includes tenant purchase, farm enlargement, farm development, and project liquidation farm ownership loans and similar loans from State corporation trust funds. Figures represent amounts advanced for project liquidation loans and amounts obligated for all other types of loans. Data for 1944 include all project liquidation loans made from inception of program through Dec. 31, 1944, no breakdown by years being available for such loans prior to that date.

⁵ Amount obligated.

⁶ Figures are estimates of the Farm Credit Administration, based on reports from counties including 30-50 percent of the farms in the United States.

⁷ Includes national, State, and mutual savings banks.

⁸ Revised.

⁹ Data for 1950 include all loans obligated from beginning of farm housing program in November 1949-Dec. 31, 1950.

Farm Credit Administration. Data for 1910-38 in Agricultural Statistics, 1952, table 728.

TABLE 738.—Farm mortgages: Loans made or recorded by principal lenders, by geographic divisions, 1952¹

¹ Continental United States only.

² All operating banks. Data are reported by the Comptroller of the Currency and the Federal Deposit Insurance Corporation. Includes loans to individuals guaranteed by the Commodity Credit Corporation; beginning 1942, includes certificates of participation in pool of cotton growers' notes. Such loans and certificates totaled \$725,563,000 on Jan. 1, 1953.

³ Loans "made" include renewals.

⁴ Excludes loans guaranteed by Commodity Credit Corporation. Beginning 1947, also excludes loans held by associations in liquidation.

⁵ Excludes loans to and discounts for production credit associations, regional agricultural credit corporations and banks for cooperatives. Includes loans guaranteed by CCC.

⁶ Excludes loans guaranteed by CCC.

⁷ Also includes rural rehabilitation, water facility, construction, and war-time adjustment loans, and such loans from State Corporation trust funds beginning Apr. 1, 1942.

⁸ Also includes flood and windstorm restoration, flood damage, fur, and orchard loans; and loans of the Regional Agricultural Credit Corporation.

⁹ Also includes drought-relief and orchard rehabilitation loans.

¹⁰ Loans "outstanding" also include loans made from State Corporation trust funds. Loans "made" during 1947-52, were exclusively to water facility cooperative associations.

¹¹ Electrification loans only. Loans "outstanding" are cumulative net advances less principal repayments; loans "made" are net advances, after deducting returns of unused loan funds.

¹² Principally loans to municipalities, public utility districts, State authorities, and private power companies for rural electrification.

¹³ Excludes loans guaranteed by Commodity Credit Corporation held by other lending agencies. The data shown in table 742, cover all loans made and guaranteed by Commodity Credit Corporation.

¹⁴ Revised.

¹⁵ Data unavailable.

Bureau of Agricultural Economics.

LOANS NOT SECURED BY FARM REAL ESTATE

| 1946..... | 1,033,800 | 1,670,539 | 1,947,532 | | | | |

¹ Excludes territories and possessions.

² All operating banks. Data for some years are estimated and for other years are taken from reports of the Comptroller of the Currency and the Federal Deposit Insurance Corporation. Excludes loans guaranteed by Commodity Credit Corporation.

³ Banks, production credit associations, Farmers Home Administration, private financing agencies discounting with the Federal intermediate credit banks and Commodity Credit Corporation.

⁴ Includes certificates of participation in pool of cotton growers' notes.

⁵ Revised.

Bureau of Agricultural Economics.

FOOTNOTES FOR TABLE 742

¹ Loans of operating banks are classified by location of bank; those of federally sponsored agencies by location of security or borrower.

² All operating banks. Includes loans guaranteed by the Commodity Credit Corporation and certificates of participation in pool of cotton growers' notes. Such loans and certificates totaled \$725,563,000 on Jan. 1, 1953. Data not available for loans "made."

³ Loans "made" include renewals.

⁴ Excludes loans guaranteed by Commodity Credit Corporation.

⁵ Excludes loans to and discounts for production credit associations and banks for cooperatives. Loans "outstanding" include \$2,000,000; and loans "made" include \$8,000,000 to cooperatives in New York.

⁶ Loans "outstanding" also include rural rehabilitation, water facility, construction, and war-time adjustment loans and such loans from State Corporation trust funds. Loans "made" also include water facility loans and loans from State Corporation trust funds.

⁷ Loans "outstanding" also include flood damage, fur, orchard, and flood and windstorm restoration loans, and loans formerly held by the Regional Agricultural Credit Corporation. Loans "made" also include fur and orchard loans.

⁸ Also includes drought relief and orchard rehabilitation loans.

⁹ Loans "outstanding" also includes loans made from State Corporation trust funds. Loans "made" were exclusively to water facility cooperative associations.

¹⁰ Electrification loans only. Loans "outstanding" are cumulative net advances less principal repayments; loans "made" are net advances, after deducting returns of unused loan funds.

¹¹ Approximately 67 percent of individuals served by these cooperatives are farmers.

¹² Principally loans to municipalities, public utility districts, State authorities, and private power companies for rural electrification.

¹³ Includes loans made directly by Commodity Credit Corporation and guaranteed loans made by other lending agencies. Guaranteed loans held by banks are included here as well as in column 1. As far as possible, loans have been distributed according to location of producer receiving loan or location of cooperative.

¹⁴ Includes \$16,000 which cannot be allocated by States.

¹⁵ Less than \$500.

¹⁶ Excludes \$1,082,000, a "credit" adjustment which cannot be allocated by States.

¹⁷ Includes \$32,000 which cannot be allocated by States.

Bureau of Agricultural Economics.

¹ Includes loans of national and State commercial, mutual savings, stock savings, and private banks. Loans are classified according to location of bank and therefore, are not strictly comparable with data for other lenders, which are classified according to location of farm.

² Also includes loans guaranteed by the Commodity Credit Corporation and certificates of participation in pool of cotton growers' notes. Such loans and certificates totaled \$725,563,000 on Jan. 1, 1953.

³ Alaska, Hawaii, Puerto Rico, and Virgin Islands.

Federal Deposit Insurance Corporation.

¹ Includes Puerto Rico. ² Excludes purchase money mortgages and real estate sales contracts.

³ Land Bank Commissioner loans are made on behalf of the Federal Farm Mortgage Corporation. The authority to make Land Bank Commissioner loans expired July 1, 1947, except for the limited purpose of refinancing loans previously made. ⁴ Includes renewals.

⁵ Does not include advances in connection with the Commodity Credit Corporation program.

⁶ In order to eliminate interagency transactions, the amounts of these loans and discounts for production credit associations, and banks for cooperatives are excluded from the net total.

⁷ Excludes data for production credit associations in liquidation subsequent to the beginning of liquidation.

Farm Credit Administration.

¹ Includes Puerto Rico.² Excludes purchase money mortgages, real estate sales contracts, loans in suspense, and loans in process of foreclosure.³ Land Bank Commissioner loans are made on behalf of the Federal Farm Mortgage Corporation. The authority to make Land Bank Commissioner loans expired July 1, 1947, except for the limited purpose of refinancing loans previously made.⁴ In order to eliminate interagency transactions, the amounts of these loans and discounts for production credit associations, and banks for cooperatives are excluded from the net total.⁵ Excludes for each date, data for production credit associations which had been placed in liquidation.

¹ Includes 92 loans amounting to \$6,324,651 for loans under Commodity Credit Corporation storage program.

² Represents number of cooperative associations having loans outstanding; includes a small number of duplications arising from direct loans made by the Central Bank to cooperative associations which have direct loans from a district bank also.

³ The total number of loans outstanding is usually less than the sum of the 3 types of loans, because some associations have more than 1 type of loan outstanding.

Farm Credit Administration.

| 1953..... | | | 193,123 | | | 51,599 | | | 69,680 |

¹ Includes tenant purchase, farm enlargement, farm development (special real estate), and project liquidation loans. Loans from Corporation trust funds and farm development loans from "Loans, grants, and rural rehabilitation" funds are also included.

² Amount advanced for project liquidation loans and obligated for all other types of loans. Includes subsequent loans to borrowers who received an initial loan in a prior year.

³ Loan advances less principal repayments.

⁴ Includes tenant purchase, farm enlargement, and farm development loans.

⁵ Amount obligated. Includes supplemental loans to borrowers who received an initial loan in a prior year.

⁶ Amount obligated less principal repayments for Jan. 1, 1949 and 1950; loan advances less principal repayments for Jan. 1, 1951-53.

⁷ In addition to Farm Housing Loans reported in this table, Farm Housing grants in the amount of \$358,450 were made in 1950-52.

⁸ Includes project liquidation loans advanced from beginning of program through 1944.

⁹ Loans obligated from beginning of insured program in October 1947-December 1948.

¹⁰ Loans obligated from beginning of farm housing program in November 1949-December 1950.

Farmers Home Administration.

TABLE 756.—Farmers Home Administration: Progress made by the average 1946 real estate loan borrower with loan outstanding during the 1951 crop year ¹

| Item | Unit | Year before receiving loan | First year with loan | 1951 |

¹ Acquired by foreclosure or other "distress" transfers from borrowers. Continental United States only.

² Investment. Also includes sheriffs' certificates and judgments, but excludes prior liens.

³ Book value, partially estimated. 1945-52 revised.

⁴ Carrying value of real estate, including sheriffs' certificates and judgments. Real estate held by banks in receivership is included at book value.

⁵ Book value. Data represent holdings of insured commercial banks.

⁶ Investment. Rural Credit Board of South Dakota, Bank of North Dakota, and Department of Rural Credit of Minnesota. The large reduction during 1945 is mostly due to a charge-off of approximately \$27,000,000 of cumulated losses by the Rural Credit Board of South Dakota upon completion of liquidation.

⁷ Data unavailable.

⁸ Less than \$500.

Bureau of Agricultural Economics.

¹ State totals represent data for borrowers incorporated within the State.² United States totals for other types of borrowers are: public power districts, 44 borrowers, \$92,854,201; municipalities and other Government authorities, 26 borrowers, \$20,749,089; power companies, 25 borrowers, \$9,253,912.³ Funds loaned to corporate borrowers for relending to individuals. Includes wiring, plumbing, and refrigeration installations.⁴ Includes miles energized and consumers connected, shown in table 766.

Rural Electrification Administration.

TABLE 764.—Rural Electrification Administration: Annual revenues and expenses reported by REA electric borrowers, 1941-52

| Year | Operating revenues | Operating expenses | Interest expense | Depreciation expense | Net margin after depreciation and interest ¹ |

¹ Includes loans made directly by the Commodity Credit Corporation and loans made by banks and other lending agencies under CCC obligation to purchase. As far as possible, loans have been distributed according to the location of producers receiving the loans. Direct loans to cooperative associations for the benefit of members have been distributed according to the location of the association.

² Negative item represent allocation in 1952 of items reported as unallocated at Dec. 31, 1951.

³ Includes loans to cotton cooperatives and the 1933 cotton loan for which State data are not available.

⁴ Reflects adjustment of \$170,000 from cumulative figures through calendar year 1950 on storage facility and equipment loans; includes \$165,570,000 of potato loans for which the State breakdown is available in Agricultural Statistics, 1950.

Production and Marketing Administration.

| | | | 1952 | 80,265 | 44,788 |

¹ Includes loans made directly by Commodity Credit Corporation and loans made by banks and other lending agencies under Commodity Credit Corporation obligations to purchase. Renewals and extensions of loans previously made are excluded.

² Partly estimated.

³ Loans to the Cotton Producers Pool were second-lien advance on cotton in the pool. The 1932 advance was \$20 per 500-pound bale and the 1934 advance was an additional \$10 on cotton remaining in the pool. The number of bales involved is excluded from the quantities placed under loan.

Production and Marketing Administration. Commodity Credit Corporation data for loan programs not active in recent years may be found in Agricultural Statistics, 1952, table 760.

¹ Payments from 1937-47 made under authority of Sugar Act of 1937, as amended. The 1948 and subsequent crop payments made under Sugar Act of 1948. ² Revised. ³ Estimated.

Production and Marketing Administration.

CHAPTER X

AGRICULTURAL CONSERVATION AND FORESTRY STATISTICS

Statistics in this chapter concern conservation of various resources, particularly soil, water, and timber. Data on the production, supply, and distribution of naval stores is included because of its close association with forestry statistics.

Two tables showing payments to producers through the sugarcane and sugar beet programs have been moved to Chapter IX.

TABLE 775.—*Agricultural conservation program: Assistance to farmers for carrying out conservation practices, United States and Territories, by program years, 1936-52*¹

¹ Turpentine places under Naval Stores Program are not included in "Participating farms" but number of payees are included in "Payees." Farms participating in manager type pooling agreements are included in "Participating farms" but only the managers are included in "Payees."

² Cropland on participating farms as percentage of total cropland acreage in State.

³ Totals are rounded from complete figures.

Agricultural Conservation Program.

¹ Assistance for these practices represent 88.3 percent of the amount paid for all conservation practices under the 1951 program.

² 500 feet or less.

³ Includes data for cross-slope farming.

⁴ Includes listing, pitting, chiseling, or furrowing, on the contour; emergency listing, chiseling, or furrowing, at right angles to the wind; pit cultivation; deep plowing sandy cropland; and other approved tillage operations; on cropland. Also includes contour tillage operations on noncrop pasture.

⁵ Includes 62,682 reservoirs to obtain better distribution of livestock, 10,972 erosion control reservoirs, and 1,733 reservoirs for irrigation water, new developments only. Does not include structures constructed wholly of concrete or rubble masonry.

¹ Assistance under 1951 program with respect to these practices represent about 91 percent of the total 1951 practice assistance.

² Revised. ³ Comparable data not available.

⁴ Includes data for cross-slope farming.

⁵ Includes listing, pitting, chiseling, or furrowing, on the contour; basin listing; emergency listing, chiseling, or furrowing, at right angles to the wind; pit cultivation; deep plowing sandy cropland; and other approved tillage operations; on cropland. Also contour tillage operations on noncrop pasture.

⁶ Includes stubble mulch and leaving stalks or stubble.

⁷ Includes dams for livestock water, erosion control (storage type), and irrigation.

⁸ Includes contour stripcropping, stripcropping not on the contour, and cross-slope stripcropping.

⁹ 500 acres or less.

Agricultural Conservation Program. Data for 1936-41 in Agricultural Statistics 1952, Table 738.

TABLE 779.—Soil conservation districts: Dates of State laws, number of districts organized, approximate total area, number of farms, land in farms, and districts having memoranda of understanding with U. S. Department of Agriculture, cumulative to Dec. 31, 1952

¹ For specific procedure on organization of soil conservation districts, reference should be made to each of the respective State soil conservation district's laws.

² Upon request, the U. S. Department of Agriculture enters into memoranda of understanding with districts for such assistance from departmental agencies as may be available.

³ Includes 4 wind-erosion districts. ⁴ Includes 20 States cooperative grazing districts.

⁵ Includes the Imperial Irrigation District.

684 AGRICULTURAL CONSERVATION AND FORESTRY STATISTICS, 1953

TABLE 780.—Soil conservation and other districts: Number organized each calendar year and approximate land in farms, United States and Territories, 1937-52

| Calendar years | Number districts organized ¹ | | Total area in districts | | Approximate land in farms within districts | |
|-------------------|---|------------------|-----------------------------|------------------|--|----------------------|
| | Each year | Cumulative total | New districts and additions | Cumulative total | Added each year | Cumulative total |

| 1952 ⁴ | 75 | 2,493 | 35,084 | 1,369,698 | 17,267 | 903,303 |

¹ Totals at the end of each year are net, including corrections and adjustments made during the year.

² Includes wind erosion districts.

³ Includes wind erosion districts and grazing districts.

⁴ Includes wind erosion districts, grazing districts, and Imperial Irrigation District (California).

⁵ Adjusted to the 1945 Census of Agriculture.

Soil Conservation Service.

¹ Soil conservation surveys showing kinds of soil, slope, degree of erosion, and present land use are used to determine land capabilities for conservation planning and treatment of entire farms and ranches and of group enterprises.

² In addition, about 190 million acres of reconnaissance surveys have been prepared, of which 331,789 acres were done in 1952.

Soil Conservation Service.

TABLE 783.—*Soil conservation practices: Applied in conservation districts each year, with the assistance of Soil Conservation Service technicians, United States and Territories, 1948-52 ¹*

| Some major practices | Unit | 1948 | 1949 | 1950 | 1951 | 1952 | Cumulative to Dec. 31, 1952 |

¹ Both planned and applied totals are for satisfactory first-time application only. Reapplication and maintenance of practices on the same area year after year are not included. Planned practices are reported as applied when properly installed on the land, the job thereafter being one of maintenance.

² Some areas of range and pasture improvement were previously included in the seeding figures. Soil Conservation Service.

¹ Group enterprise plans are defined as any job involving two or more landowners or operators who agree to work together to carry on the construction, operations, and maintenance specified in the plans.

² Other types include special erosion control, water control, water spreading, and other such group enterprise jobs.

Soil Conservation Service.

TABLE 787.—Flood prevention: Authorized works of improvement for run-off and waterflow retardation and soil erosion prevention within certain watersheds in the United States¹

| Watershed and States | Years to complete installation of measures | Area of authorized portion of watershed | Estimated total Federal cost of authorized improvement | | Estimated cumulative (Federal) obligations ² through fiscal year 1952 |
|--------------------------------------|--|---|--|------------------------------------|--|
| | | | As shown in survey reports (as of about 1940) | Based on costs as of June 30, 1952 | |

| Yazoo (Miss.)..... | 20 | 3,222,400 | 21,700 | 34,382 | 2,184 |
| Total..... | | 30,102,774 | 89,624 | 175,230 | ³ 28,700 |

¹ All of the listed watersheds were approved Dec. 22, 1944.

² Of appropriations under the flood control item, for both Soil Conservation Service and Forest Service.

³ Includes obligations of \$486,599 for emergencies. Use of Flood Control funds to safeguard lives and property from floods and products of erosion on watersheds suddenly impaired by fire or other natural causes is authorized by Sec. 216 of this Flood Control Act of 1950.

Soil Conservation Service and Forest Service.

Soil Conservation Service. Subwatershed work plans serve as a basis for selecting items of accomplishments which are credited to flood control operations. The above totals are for subwatershed work plans in soil conservation districts where works of improvement have been planned and completed by cooperating farmers, as well as work done or contracted by the Service. Most of this work has been initiated since 1946.

TABLE 790.—*Flood prevention: Improvement works completed in authorized watersheds with assistance of the Forest Service, year ending June 30, 1952, and cumulative to June 30, 1952*¹

| Practices and measures ² | Unit | Total completed or acquired | |

¹ Total collections, less refunds during calendar year 1952, and includes revenue from sources other than those shown in this table, such as building occupancy, sales of improvements, minerals, and easements.

² Includes public domain lands administered under agreement with Grazing Service.

³ Of this amount, 25 percent is paid to counties in which Title III lands are located, to be used for schools and roads.

¹The preparation of soil maps by the Division of Soil Survey, Bureau of Plant Industry Soils, and Agricultural Engineering is generally done in cooperation with the State agricultural experiment stations. Inquiry for available maps and reports may be made of the State agricultural college, the State agricultural experiment station, or the U. S. Department of Agriculture.

²These figures refer to work done for a period of over 40 years and in some instances include resurveys.

³During the year beginning July 1, 1951, maps were published for the following counties in the states indicated: California, Los Banos area; Maine, York County; North Carolina, Cherokee, Mitchell, and Yancey Counties; Oklahoma, Okfuskee County; and Virginia, Scott County.

¹ Forest land is all land bearing or once supporting commercial or noncommercial forest and not at present in use or likely to be suitable for any form of use higher than forestry.

Commercial forest land is land bearing or capable of producing timber of commercial quantity and quality and economically available now or prospectively for commercial use and not withdrawn from commercial use.

Noncommercial forest land is (1) commercially valuable forest land in the form of parks, preserves, wilderness areas, etc., actually withdrawn from commercial use; and (2) open grown pinon-juniper lands in the West, chaparral in southern California, oak-cedar brakes in Texas and Oklahoma, remote and inaccessible alpine areas, and other areas which because of very low productivity or excessively poor quality timber or extreme inaccessibility appear to be permanently out of the timber producing class. Much of this land has important value in watershed protection, preventing or reducing soil erosion, protecting wildlife, providing game cover, etc.

Forest Service; from A Reappraisal of the Forest Situation.

¹ Status beginning of 1945. Includes volume on land capable of producing timber of commercial quantity and quality and available now or prospectively for commercial use. Includes trees large enough for sawlogs regardless of the actual use, in accordance with the practice of the large region. Volumes are on lumber-tally basis.

Minimum sizes of saw-timber trees: New England, Middle Atlantic: 9" D.B.H. (Diameter Breast High or at a point 4½ feet-above the ground) for softwoods and 11" for hardwoods. Lake, Plains: 9" D.B.H. Central: 10" D.B.H. South Atlantic, Southeast, West Gulf: 9" D.B.H. for pine and cypress and 13" for hardwoods. Pacific Northwest (pine subregion), North Rocky Mountain, South Rocky Mountain: In the pine type, 11" D.B.H. for pine, cedar, and cottonwood, and 13" for fir and hemlock; in the fir type, 11" D.B.H. Pacific Northwest (Douglas-fir subregion): 15" D.B.H. California: All except redwood type, 12" D.B.H.; redwood type 24" D.B.H.

Virgin growth includes mature or overmature forests not seriously disturbed by cutting or by fire, insects, and disease infestations, or other natural causes, and generally characterized by the absence of any net growth; and mature and overmature forests so lightly cut or otherwise disturbed as not to make any material change in the original forest canopy or the quality of the original stand, or to induce net growth in any appreciable amount.

Second growth includes forests which have been cut over or which have been so disturbed by fire, insects, disease, windstorms, or other natural causes that net growth occurs and they no longer qualify as virgin forests.

Forest Service; from A Reappraisal of the Forest situation.

696 AGRICULTURAL CONSERVATION AND FORESTRY STATISTICS, 1953

| Total..... | 630,894 | 227,565 | 127,229 | 56,868 | 1,042,556 |

¹ Status beginning of 1945. Of the total 1,042,556 million board feet in this tabulation, 1,036,751 million board feet is softwoods and the remainder is hardwoods, as indicated.

² May include some white fir, Sitka spruce, western hemlock, Port Orford cedar, and western red cedar, which are commonly lumped with Douglas fir in redwood cruising.

³ Includes Jeffrey pine.

⁴ Excluding 416 million board feet in Plains region. Grand total of ponderosa pine in the United States is 185,441 million board feet. See also table 796.

⁵ Includes the western white pine, mountain hemlock, and lodgepole pine recorded in cruises of fir areas.

⁶ Redwood exclusive of volume of 1,000 Big trees reported on cruises in the West-Side Sierra subregion.

Forest Service; from A Reappraisal of the Forest Situation.

Forest Service. Data for 1926–38 in Agricultural Statistics, 1952, table 795.

FOOTNOTES FOR TABLE 802

¹ Definition of units:
National forests.—Areas established as national forests by Act of Congress or Presidential Proclamation. Acres shown as under Forest Service administration include small administrative sites outside of proclaimed boundaries and those portions of land utilization projects and other areas over which the Forest Service has supervision located within the national-forest boundaries. Land utilization and other areas located outside the national forests and under Forest Service supervision are not included; such areas being listed under the classification "Land utilization and other areas."

Purchase units.—Areas established by the Secretary of Agriculture with the concurrence of the National Forest Reservation Commission but not formalized by Act of Congress or Presidential Proclamation. Acres shown under Forest Service administration include all administrative sites outside the established boundaries and those portions of the land utilization projects and other areas over which the Forest Service has supervision located within the established purchase unit boundaries. Land utilization and other areas located outside the boundaries and under Forest Service supervision are not included; such areas being listed under the classification "Land utilization and other areas."

Experimental areas.—Areas outside of the exterior boundaries of national forests or purchase units which have been reserved and dedicated to forest or range research and experimentation by Executive Order or other authorized administrative action. The Massabesic Experimental Forest in Maine and the McNeill Division of the Harrison Experimental Forest in Mississippi, which have both purchase unit and experimental area status, are only included in the experimental area summaries.

Land utilization and other areas.—Lands acquired by the United States in pursuance of certain national programs of land utilization and adjustment, which have been placed under the administration of the Forest Service but have not been given a national-forest status. The parts of these areas that are located within the established national forest or purchase unit boundaries are included as part of the national forest or purchase unit acreage.

² Does not include lands within certain State forests in Michigan which have been acquired by the United States with intent to exchange them for State lands within the national forests.

³ Exclusive of the area at the Beltsville Research Center of the U. S. Department of Agriculture that is used by the Forest Service as an experimental area.

⁴ Lands acquired by the United States in pursuance of certain national programs of land utilization and adjustment, which have been placed under the administration of the Forest Service but have not been given a national-forest status. The parts of these areas that are located within the established national forest or purchase unit boundaries are included as part of the national forest or purchase unit acreage.

⁵ Includes national forest lands under the primary jurisdiction of other Federal agencies where the national forest withdrawal has not been revoked.

⁶ Lands within the unit boundaries in private, State, county, and municipal, etc., ownership, and Federal lands over which the Forest Service has no jurisdiction.

Forest Service.

¹ Includes "B wood resin" produced in refining FF wood resin to paler grades. Beginning Sept. 1, 1950, "B wood resin" used in making paper size is included in paper and paper size. All other "B wood resin" is included in chemicals and pharmaceuticals.

² Barrels of 50 gallons.

³ Drums of 520 pounds net weight.

⁴ Prior to 1950, turpentine used in making Beta pinene for consumption in manufacturing synthetic resins is included in ester gum and synthetic resins. For the other years this turpentine is shown in chemicals and pharmaceuticals.

Bureau of Agricultural and Industrial Chemistry and Bureau of Agricultural Economics.

¹ Rosin, not for violins; imports for consumption, as reported by the Department of Commerce.

² Drums of 520 pounds net weight.

³ Reports of Department of Commerce.

⁴ Total supply less exports and Mar. 31 stocks.

⁵ Due partly to unreported industrial consumption and partly to failure of some consumers to distinguish in their reports between gum rosin, wood rosin, and modified or derived rosin.

Bureau of Agricultural and Industrial Chemistry and Bureau of Agricultural Economics. Data for 1932-42 in Agricultural Statistics, 1952, table 810.

712 AGRICULTURAL CONSERVATION AND FORESTRY STATISTICS, 1953

¹ Included in construction timbers prior to 1925.

² Includes both full-length pressure-treated poles and nonpressure (butt-treated) poles.

³ Preliminary.

Forest Service. Conversion factors: Crossties, 3 cubic feet per tie; piles, .6763 cubic foot per linear foot; poles, 17.6 cubic feet per pole; wood blocks, 2.625 cubic feet per square yard; cross arms, .6198 cubic foot per cross arm; fence posts, .5 cubic foot per post; and switch ties, construction timbers, lumber, and miscellaneous, 1 cubic foot equals 12 board feet. Data for 1909-38 in Agricultural Statistics, 1952, table 812.

CHAPTER XI

CONSUMPTION AND FAMILY LIVING

The statistics in this chapter deal with the consumption of food and clothing of both rural and urban people, retail price levels, and with other aspects of family living of farm people. Data presented here on quantities of food available for consumption are based on material presented in the earlier commodity chapters, but they are shown here at the retail level, a form that is more useful for an analysis of the demand situation faced by the producer. Data on quantities of farm-produced food consumed directly by farm households are presented in the commodity chapters. Its value and the rental value of the farm home are given in the section on farm income, tables 706-709.

The table showing city-farm food consumption and nutritive value of diets in selected areas of Minnesota has been dropped and replaced by a new table showing food consumption and nutritive value in three type-of-farming areas in five Southern States. Also the table on fiber utilization in clothing has been replaced by a table showing farm housing and equipment by economic class of farm operator. A table on spending for farm family living in Montana, and two tables showing days lost because of illness have also been dropped from this issue.

TABLE 823.—*Population: Number of people eating out of the total domestic food supplies and number eating out of the civilian food supplies, Jan. 1 and July 1, 1909-52*

| Year | Jan. 1 | July 1 | Year | Jan. 1 | July 1 |

Bureau of Agricultural Economics. Estimates compiled from data of Federal agencies. The basic population estimates are from the Bureau of the Census, with adjustments for underenumeration. For July 1, 1940, and subsequent dates, estimates of the civilian population were supplied by the Bureau of the Census. For the period Jan. 1, 1941-Jan. 1, 1946, adjustments have been made to allow for members of the armed forces eating out of civilian supplies; the adjustments were originally estimated by OPA on the basis of data from several official sources.

¹ Derived from data on per capita consumption of individual foods, using estimates of retail weights multiplied by average retail prices in 1947-49. Civilian consumption only, 1941 to date.² Fat cuts of pork in "Meats, poultry, fish" group.³ Includes frozen vegetables, canned soups, and canned baby foods.⁴ Preliminary.

Bureau of Agricultural Economics.

¹ Estimated from per capita data by means of average loss factors with the addition of estimates of supplies from rural and urban home gardens and of minor food items. Civilian consumption only, beginning 1941.

² Fluid whole milk equivalent based primarily on mineral and protein content. One quart of fluid milk weighs 2.15 pounds.

³ Sum of approximate retail weights.

⁴ Allows for breakage from farm to retail and increasing size of eggs in recent years.

⁵ Excludes bacon and other fat pork cuts; includes edible offal, game, and small quantity of noncommercial fish; poultry on eviscerated basis.

⁶ Product weight except for "other edible fats and oils," which represents oils used in salad dressings, etc.

⁷ Nuts on a shelled basis.

⁸ Includes fresh and processed items and produce of rural and urban home gardens. Product weight except for concentrated citrus juices which are on a single strength basis in the citrus and tomato group.

⁹ Excludes corn sugar and sirup.

¹⁰ Excludes sugar used in condensed milk, frozen dairy products (except ice cream), and processed fruits and vegetables.

¹¹ Includes coffee on roasted basis and chocolate liquor equivalent of cocoa and chocolate products.

¹² Preliminary.

Bureau of Agricultural Economics.

¹ Quantities of nutrients computed by Bureau of Human Nutrition and Home Economics on the basis of estimates of apparent per capita consumption (retail basis), including estimates of produce of rural and urban home gardens, prepared by Bureau of Agricultural Economics. No deduction has been made in the nutrient estimates for loss or waste of food in homes, public eating places, and institutions, or for destruction or loss of nutrients during the preparation of food. Civilian per capita only, 1941 to date. Data for iron, thiamine, riboflavin, and niacin include estimates of the quantity of these nutrients added to prepared cereals, white flour, and bread.

² Preliminary.

Bureau of Human Nutrition and Home Economics.

¹ The monthly data are based on 4-week periods (28 days) in order to permit comparisons between periods of equal length. The totals for each 3-month period are based on complete calendar periods. Therefore, an additional week is included in the totals for each 3-month period.

² These figures include $\frac{1}{2}$ of the household purchases of canned orange-grapefruit blended juice converted to equivalent boxes of fresh fruit.

Bureau of Agricultural Economics and Production and Marketing Administration. Data collected under contract with the Market Research Corporation of America.

¹ The monthly data are based on 4-week periods (28 days) in order to permit comparisons between periods of equal length. The totals for each 3-month period are based on complete calendar periods. Therefore, an additional week is included in the totals for each 3-month period.

² Total figures include household purchases of dates not identified as to origin. Purchases of domestic and imported dates were not reported separately prior to October 1950. No figures on purchases of dates later than September 1952 are available.

Bureau of Agricultural Economics and Production and Marketing Administration. Data collected under contract with the Market Research Corporation of America.

¹ Distribution without charge to recipients, of food commodities acquired by the Government and distributed under provisions of Section 32, Public Law 320, 74th Congress, approved Aug. 24, 1935, as amended. Beginning in 1949, data include CCC commodities distributed pursuant to Section 416, Public Law 439, 81st Congress, approved Oct. 31, 1949. This amounted to 56,571,000 pounds valued at \$9,275,000 in 1949, 185,782,000 pounds, valued at \$21,125,000 in 1950, 2,669,000 pounds, valued at \$2,695,000 in 1951 and 72,500 pounds, valued at \$12,300 in 1952. In the fiscal year beginning July 1, 1949, institutions and welfare cases received 46,173,000 pounds of potatoes, at a cost to the Government of \$1,044,000, in accordance with Section 3, Public Law 471, 81st Congress, approved Mar. 31, 1950. Distribution to ultimate eligible recipients is accomplished through cooperating distributing agencies in States.

² Total cost to the Government of the commodity as delivered to the distributing agency; includes cost of purchase, handling, warehousing, and transportation, but does not include costs of administration of program.

³ Preliminary.

Production and Marketing Administration. Data for 1938-42, covering the food stamp and relief milk programs, in Agricultural Statistics, 1948, table 658.

¹ Distribution, without charge to recipients, of food commodities acquired by the Government and distributed under provisions of Section 32, Public Law 320, 74th Congress, approved Aug. 24, 1935, as amended. Part of the distribution to school-lunch programs, 84,291,000 pounds costing \$14,770,000, consisted of commodities distributed under provisions of Section 6 of the National School Lunch Act. The data also include distribution under Section 416 of the Agricultural Act of 1949, Public Law 439, 81st Congress, approved Oct. 31, 1949, for institutions and welfare cases. Section 416 distribution to these outlets was 72,500 pounds, at a cost to the Government of \$12,300. Distribution to ultimate eligible recipients is accomplished through cooperating distributing agencies in States. Eligible recipients include school-lunch programs, eleemosynary institutions, and households receiving public assistance from State or local welfare agencies.

² Total cost to the Federal Government of the commodity as delivered to the distributing agency; it includes the cost of purchase, handling, warehousing, and transportation, but does not include costs of administration of the program.

³ Preliminary.

Production and Marketing Administration.

| 1952 ⁵ | 4,265 | 9,172 | 7,234 | 9,781 | 789 | 1,281 |

¹ In this tabulation, "peak participation" is the participation during the month of the year when the largest number of persons participated in the program; "average participation" is the average for the 12 months of the fiscal year.

² Distribution, without charge to recipients, of food commodities acquired by the Government and distributed under provisions of Section 32, Public Law 320, 74th Congress, approved Aug. 24, 1935, as amended; and under Section 6 of the National School Lunch Act, Public Law 396, 79th Congress, approved June 4, 1946. Distribution to ultimate eligible recipients is accomplished through cooperating distributing agencies in States. Eligible recipients include school-lunch programs, eleemosynary institutions, and households receiving public assistance from State or local welfare agencies.

³ A subsidy program to expand markets for agricultural products, maintain outlets for Section 32 commodities, and support school-lunch programs. Sponsors of school-lunch programs are reimbursed by the Government for local purchases of food on basis of the quality and quantity of meals served. The program was started in February 1943.

¹ Provides for distribution, without charge to recipients of food commodities acquired by the Government and distributed under provisions of Section 32, Public Law 329, 74th Congress, approved Aug. 24, 1935, as amended. Beginning in 1949, data include Commodity Credit Corporation commodities distributed pursuant to Section 416, Public Law 439, 81st Congress, approved Oct. 31, 1949. In the fiscal year beginning July 1, 1949, schools received potatoes in accordance with Section 3, Public Law 471, 81st Congress, approved Mar. 31, 1950.

² Total cost to the Government of the commodity as delivered to the distributing agency; includes cost of purchase, handling, warehousing, and transportation, but does not include costs of administration of the program.

³ Distribution of commodities acquired by the Government and distributed under provisions of Section 6 of the National School Lunch Act, Public Law 396, 79th Congress, approved June 4, 1946.

⁴ A subsidy program to expand markets for agricultural products, maintain outlets for Section 32 commodities, and support school-lunch programs. Sponsors of school-lunch programs are reimbursed by the Government for local purchases of food on a basis of the quality and quantity of meals served. The program was started in February 1943. The figure for 1946 does not include the sum of \$9,694,703, expended under authority contained in Section 5 of the National School Lunch Act to provide nonfood assistance for the school-lunch programs. Approximately 39,000 schools purchased lunchroom equipment under this program.

⁵ Total cost in subsidy payments by the Government; does not include costs of administration of the program.

¹ The consumers' price index calculated on the base period (1935-39=100), has been converted to the new base (1947-49=100). This index reflects retail prices of goods and services commonly bought by average families with moderate income in 46 urban areas of the United States. Beginning January 1953 this index became the official index released monthly by the Bureau of Labor Statistics.

Bureau of Agricultural Economics. Compiled from data of the Bureau of Labor Statistics. Data for 1913-51 on 1935-39=100 base in Agricultural Statistics, 1952, table 827.

¹ Indexes based on data from the appropriate Censuses of Agriculture. The index for a given area is the unweighted average of the index values for all counties or combinations of counties in that area except where otherwise noted. These indexes are based on the following items: (1) Percentage of farms with electricity; (2) percentage of farms with telephones; (3) percentage of farms with automobiles; and (4) average value of products sold or traded in the year preceding the census (adjusted for changes in purchasing power of farmer's dollar). The index has a mean value of 100 for the United States in 1945 and a value of zero when all of the items in a county have a value of zero. Because some of the basic data were obtained on a sample basis in 1950, counties with fewer than 800 farms in 1950 were generally combined with an adjacent county or counties and an index was computed for the combinations; in computing the above averages, the indexes for the combinations were used for all years rather than just 1950.

² Indexes were not computed for 11 counties in Arizona, 9 in New Mexico, and 1 in Utah for certain years because data comparable with regard to the treatment of Indians on reservations are not available. Therefore, State averages are not shown for Arizona and New Mexico and the averages for Utah do not take 1 county into account.

Bureau of Agricultural Economics.

¹ 1950 Census of Agriculture.
Rural Electrification Administration.

FOOTNOTES FOR TABLE 839

¹ Data are from a special study made by U. S. Department of Commerce and U. S. Department of Agriculture of a sample of 11,000 matched schedules from the 1950 Censuses of Population and Housing and Agriculture. ² Those having other facilities than those specified or none may be obtained by subtraction. ³ Percentages are based on number of farm operators reporting on presence or absence of item or condition unless otherwise noted. If such a percentage is applied to total number of farm operators shown in first line, the estimate of the number of operators having the specified facility would include an estimate for those not reporting on the item. ⁴ Includes operator families with \$10,000 or more family income and those not reporting income not shown separately. ⁵ Farms other than abnormal farms are classified by sales of farm products as follows: I and II, \$10,000 or more; III, \$5,000 to \$9,999; IV, \$2,500 to \$4,999; V, \$1,200 to \$2,499; VI, \$250 to \$1,199 provided the farm operator worked off the farm less than 100 days and provided the family's nonfarm income was less than the value of farm products sold; Part-time, \$250 to \$1,199 provided the operator worked off the farm 100 or more days or the family's nonfarm income exceeded the value of farm products sold; and Residential, under \$250. Abnormal farms are institutions, experimental farms, grazing associations, and other community projects. ⁶ Based on a 20 percent subsample. ⁷ Base of percent is total number of farms; no distinction was made between no report on item and operator not having it.

Bureau of Human Nutrition and Home Economics.

TABLE 841.—*Rural Electrification Administration: Number and amount of telephone loan allocations, pole miles of lines, and number of subscribers, by States, from program authorization (Oct. 28, 1949) to Jan. 1, 1953*

| State ¹ | Total loan allocations ² | | Pole miles of line provided for by loan allocations | | | Subscribers provided for by loan allocations | | |
|---------------------|-------------------------------------|------------------|---|-----------------------------|----------------------|--|----------------|---------|

¹ These rates do not include charges for the amortization of investment in lines or charges for line extensions where such are levied by the utility.

² The data on energy used for farms west of the 100th meridian vary year by year, depending on the proportion of the total consumption used for irrigation pumping. As more nonirrigation consumers are served the average consumption is reduced. Hence, the figures for the West are not strictly comparable to those for the East.

Bureau of Plant Industry, Soils, and Agricultural Engineering. Compiled from reports of the Edison Electric Institute. Data for 1929-38 in Agricultural Statistics, 1952, table 834.

FOOTNOTES FOR TABLE 842

¹ Edison Electric Institute report.

³ REA estimate.

⁴ Percentage of all farms in State, as shown by 1935 Census of Agriculture.

⁵ Percentage of all farms in State, as shown by 1940 Census of Agriculture.

⁶ Percentage of all farms in State, as shown by 1945 Census of Agriculture.

⁷ Percentage of all farms in State, as shown by 1950 Census of Agriculture.

Rural Electrification Administration.

CHAPTER XII

MISCELLANEOUS AGRICULTURAL STATISTICS

This chapter of the book contains miscellaneous data which do not fit into the preceding chapters. Included here are weather data pertaining to farming; freight rates on the transportation of agricultural products; statistics of fishery products; and of refrigerated warehouse space. This chapter also covers the work of the Agricultural Extension Service.

A new table showing production of fishery byproducts for the United States and Alaska has been added this year.

¹ Transportation bill for all years and revised railroad freight rate indexes beginning 1945 are on a calendar year basis. Earlier freight rate indexes are on crop years beginning July. They differ from those previously published primarily because of changes from crop year to calendar year in the base period 1947-49. The change from crop to calendar year (1945 to date) was made to increase comparability with other BAE index series. ² Estimates of total expenditures by shippers for transportation (except local hauling) of farm products for civilian consumption by rail and truck, including private trucks. Year-to-year variations are caused by changes in rates, changes in volume shipped, length of haul, and some additional minor factors. ³ All index number series beginning with 1945, and those for livestock, meats, and fruits and vegetables prior to 1945 are of the weighted aggregate type. They are based upon averages of rates in effect during the year. Annual averages are computed by weighting the applicable monthly rates by the estimated proportion of annual shipments moved thereon, assuming an average seasonal distribution of shipments. In constructing the combined index, group indexes were weighted by average revenues for 1947-49. ⁴ New index series with postwar weights used for years after 1945. Linkage with original indexes made in 1945.

T = Trace; an amount too small to measure.
¹ These normals differ slightly from those used previously. They are based on a 30 year period of 1921-50.
² AP means Airport Station. CO means City Office; Abbe stands for Abbe Observatory.
 Weather Bureau, U. S. Department of Commerce.

| 1941..... | 371,771 | 92,380 | 302,232 | 766,383 |
| 1943..... | 389,991 | 91,625 | 2 169,650 | 2 651,266 |
| 1945..... | 403,832 | 107,545 | 2 134,814 | 2 646,191 |
| 1947..... | 408,232 | 135,816 | 2 130,993 | 2 675,041 |
| 1949..... | 413,256 | 171,198 | 2 116,324 | 2 700,778 |
| 1951..... | 425,114 | 187,673 | 98,229 | 711,016 |

¹ 1941 data from June 16 survey; all others Oct. 1. Warehouse space is defined as all space artificially cooled to temperatures of 50° or less, in which food commodities are held for 30 days or longer.

² Reduction from earlier years is due chiefly to the elimination from reports of meat-packing establishments of the "working space" in such establishments.

Production and Marketing Administration.

TABLE 858.—Refrigerated warehouses: Total storage capacity of all types, by States, Oct. 1, 1951¹

| State | Gross space | State | Gross space | State | Gross space |

Butter—Continued
 market receipts, 1943-52 ----- 433, 434
 prices—
 farm, 1943-52 ----- 413, 415-417
 market, 1935-39, 1943-52 -- 154, 433, 434

production—
 on farms, 1940-52 ----- 148, 405-407
 world, 1946-50, 1951-52 ----- 431
 sales from farms, 1943-52 ----- 413, 415-417
 stocks on hand, Dec. 31, 1943-52 --- 430
 trade, international, 1946-50, 1951-
 52 ----- 432

Butterfat—
 percentage in milk, 1940-52 ----- 405-407
 prices, farm, 1943-52 ----- 413-419

production—
 feed cost, and value per cow, 1951 403
 on farms, 1940-52 ----- 405-407
 per cow, 1940-52 ----- 405-407
 sales from farms, 1924-51 ----- 413-419

Butterfat-feed price ratio, 1932-52 --- 402

Cabbage—
 acreage and production, 1939-52 .. 233, 234
 exports, 1944-51 ----- 484
 prices, farm, 1939-52 ----- 233, 234
 shipments, 1943-52 ----- 271
 stocks, Jan. 1, 1939-52 ----- 233
 yield and value, 1939-52 ----- 233

Cabretta skins, imports, origin,
 1950-51 ----- 532, 533

Cacao beans—
 exports from principal countries,
 1935-39, 1945-49, 1949-52 ----- 285

imports—
 1942-51 ----- 488
 origin, 1950-51 ----- 536

Cacao butter. *See* Cocoa butter.

Calf—
 crop, 1943-52 ----- 336, 337

skins—
 imports, 1942-51 ----- 486
 imports, origin, 1950-51 ----- 532

Calves—
 feeder and stocker shipments into
 North Central States, 1948-52 --- 341

heifer, number on farms,
 1940-53 ----- 332, 398-400

income, 1943-52 ----- 337-341

number on farms, 1940-53 ----- 330-332

number on feed, 1944-53 ----- 333

prices, farm, 1943-52 ----- 337, 375

production and disposition, 1943-52 337-341

receipts at public stockyards, 1943-
 52 ----- 343

slaughter—
 farm, 1943-52 ----- 337-341, 344
 total, 1940-52 ----- 344
 under Federal inspection,
 1943-52 ----- 344-347, 392

slaughtered, live weight—
 and costs, 1943-52 ----- 346, 347
 by States, 1952 ----- 346

value—
 Jan. 1, 1940-53 ----- 330, 331
 of production, 1943-52 --- 337-341, 582
 veal, prices, market, 1943-52 ----- 347

Camel hair, imports, origin, 1950-51 -- 535

Cantaloups—
 acreage and production, 1939-52 .. 235, 236
 prices, farm, 1939-52 ----- 235, 236
 shipments, 1943-52 ----- 276
 yield and value, 1939-52 ----- 236

See also Melons; Muskmelons.

Carcasses, whole, number condemned
 under Federal inspection, 1943-52 --- 392

Carnauba wax, imports, origin, 1950-51 541

Carrots—
 acreage and production, 1939-52 .. 236, 237
 canned pack, 1939-52 ----- 276
 exports, 1944-51 ----- 484
 prices, farm, 1939-52 ----- 236, 237
 shipments, 1943-52 ----- 271
 yield and value, 1939-52 ----- 236
