Preface

Statistics Norway (formerly the Central Bureau of Statistics) was founded as an independent institution on 1 July 1876 and is celebrating its 125th anniversary in 2001. In conjunction with the celebration, which also marks the last time that a form-based population and housing census will be conducted in Norway, several historical publications and Internet products are being issued. For more information, go to: <http://www.ssb.no/magasinet/jubileum/>.

At the same time that Statistics Norway celebrates its 125th anniversary this year, the 120th edition of the Statistical Yearbook of Norway is issued. To mark that occasion, this edition includes a brief historical summary of the yearbook's development from 1880 to the present.

Statistical Yearbook of Norway 2001 contains a wealth of relevant statistics on Norway and the main figures for the Nordic countries and other countries selected from international statistics. The international tables have been prepared in collaboration with the central bureaux of statistics in the other Nordic countries. With the help of 676 tables and figures, Statistics Norway presents both the current situation and the historical development in a form most people can use.

The yearbook presents the main features of the official statistics for all of the subject areas covered by the statistics. The statistics are based on data that are gathered both through our own statistical surveys and from administrative data, which, in co-operation with many other public agencies, have been made available for statistical purposes. Some of the tables have been prepared in their entirety by other public institutions. The statistics follow approved principles, standards and classifications that are also in accordance with international recommendations and guidelines.

The Statistical Yearbook is a useful reference work – an encyclopaedia in numbers – at home, in schools and in professional contexts. The list of tables and figures and an index at the back of the book make it easy to find relevant information. The source references in the tables also make the yearbook a good starting point for those who are looking for more detailed statistics.

The yearbook is also published in a separate Norwegian edition. Both editions are available in electronic form on Statistics Norway's home page on the Internet: <http://www.ssb.no/>.

Statistical Yearbook of Norway 2001 has been edited by Ms. Åse Lukerstuen. Mr. Jan Erik Kristiansen has prepared the summary of the yearbook's historical development and Ms. Siri Boquist is responsible for the design of the book. In addition, more than a hundred people from within and outside Statistics Norway have made important contributions to this edition of the Statistical Yearbook of Norway.

A flagship – loaded with numbers

Jan Erik Kristiansen

Statistics Norway (formerly the Central Bureau of Statistics), which was founded in 1876 with Anders Nicolai Kiær serving as the first director, is now celebrating its 125th anniversary. The Statistical Yearbook of Norway is almost the same age: Volume 120 is published this year.

The idea of a statistical yearbook was obviously not something that occurred on the spur of the moment in Norway at the close of the 1870s. In Norway as in many other countries the publication of statistical yearbooks had become a high priority task during this period.

In Great Britain, *Statistical Abstract for the United Kingdom* was published in 1860, and in the mid-1870s Austria and Portugal also began publishing their yearbooks. After that, in rapid succession, Italy, France and the United States all published statistical yearbooks in 1878. A year later came the first Finnish one, and in 1880 the first Norwegian yearbook was published at the same time as the German one. Denmark and Sweden, on the other hand, did not publish a yearbook until much later, 1886 and 1914 respectively, but both Sweden and Denmark had already been publishing so-called summary publications for many years: *Sveriges officiella statistik i sammandrag* ("The Official Statistics of Sweden in Summary") and *Sammendrag af statistiske Oplysninger angaaende Kongeriget Danmark* ("Summary of Statistical Information Concerning the Kingdom of Denmark"). The term "yearbook" was not included in the title of these publications, but they should be regarded as yearbooks nonetheless.

Many precursors

There were also precursors to the first official yearbook in Norway. A. M. Schweigaard's *Norges Statistik* ("Statistics of Norway") was published for the first time in 1840, and eight years later M. Braun Tvethe published a similar book with an identical title, both of which were highly systematic statistical surveys with the main emphasis on economic statistics. Then in 1871 O. J. Broch's *Statistisk Årbog for Kongeriget Norge*; ("Statistical Yearbook for The Kingdom of Norway") was published, consisting primarily of more lexical information about the kingdom's organisation and various administrative classifications.

That same year Kiær also published his *Statistisk Håndbog for Kongeriget Norge*. ("Statistical Handbook for The Kingdom of Norway"). At that time Kiær was head of division at the Statistical Office in the former Ministry of the Interior, but it seems as if this was Kiær's work more than that of the Statistical Office. "Prepared by A. N. Kiær" is printed on the title page, and the preface is written in first person. Nevertheless, this publication, which the author describes as a "small handbook," is probably the closest thing to a precursor to what would later become the official statistical yearbook. The "Statistical Handbook" contained only 43 tables, but these were stuffed with information. It seems as if Kiær was much freer here with regard to both sources and presentation than in the yearbook that he would be responsible for a few years later as the director of the Central Bureau of Statistics.

Thus, the publication of yearbooks was given priority both at home and abroad in this period. This was obviously related to the fact that a need had gradually arisen for a comprehensive, uniform overview for the public of the increasing amount of statistics that was otherwise published by various ministries and other institutions. In addition, the publication of the yearbook can probably be assumed to have played an important latent role in developing both the institution and the nation. In many ways a statistical yearbook represents the tip of the statistical pyramid, and one of the functions of this kind of flagship was – and still

is – to help present both the institution and the nation. Therefore, it rarely takes long after a central bureau of statistics is established before a yearbook is published. From this perspective, it is typical that the Palestinian National Authority is now involved in publishing a statistical yearbook for the Palestinian Areas.

First a French edition, then a Norwegian one

Thus, the first *Statistisk Aarbog for Kongeriget Norge* ("Statistical Yearbook for The Kingdom of Norway") is dated 1880, but did not appear until the spring of 1881. On the title page the term "First Volume" signals that this was not intended to be a one-time publication, but rather that the publication was part of a more long-term publishing strategy (as we would probably call it today).

The title page of the 1880 edition of *Statistisk Aarbog for Kongeriget Norge*, ("Statistical Yearbook for The Kingdom of Norway") which appeared in the spring of 1881.

The French edition, *Annuaire Statistique de la Norvège*, had already been published two years before that. For some unknown reason the spelling "Norvège" was used for a long time, i.e. with an acute accent. Not until 1907 did they begin to use the grave accent, i.e. "Norvège".

Already in 1886 the Norwegian and French editions were combined and the yearbook became bilingual, which it remained all the way up to 1996, when it again began to be published in separate editions.

Whereas Kiær's "Statistical Handbook" from 1871 consisted mostly of relative numbers (percentages and rates), the yearbook contained only absolute numbers up to 1895, but in 1896

Already two years earlier, however, – in 1879 – the French edition (*Annuaire Statistique de la Norvège*) had been published. This was by no means by chance, but was probably an indication that they gave priority to the foreign users, who to a great extent must be assumed to have been colleagues. Thus, in many ways the development of the institution and the nation seems to have been more important than serving the public.

The first yearbook consisted of 85 tables on 120 pages. "The purpose of this yearbook is to gather in a fairly easily comprehensible table form the most important statistical information about the conditions in our country for which we have any data that can be used in any way to provide statistical information" (From the preface to the 1880 edition).

Already in table 1 we find the first printing error (but because of an elaborate printing process, this has already been corrected on the preceding page!). Here we can also see how they wrote square kilometres in those days, namely: □ kilometre. In 1891, however, they switched to the current format: km².

Up to the turn of the century, the number of tables gradually increased and new elements were also gradually added. In 1889 they began to list source references – presented at the front of the book; in 1897 they began to use a new classification system for the various topics; and in 1898, a separate appendix with international tables was added to the yearbook (then as now prepared in collaboration with the other Nordic bureaux of statistics). These tables were actually supposed to have come the year before, but were postponed "... because time is scarce." In 1904 an index was added to the yearbook.

Tabel 19. Voldsomme Dødsfald i Aarene 1872—1876.

This table from the first edition of the yearbook shows that drowning was then the predominant cause of death by accident (96 per cent of the accidents) and that nearly nine out of ten of those drowned were men. Today drowning accidents constitute only about 6 per cent of accidental deaths, whereas accidental falls and traffic accidents are the most frequent causes of accidental death.

many tables also contained relative distributions and ratios. The percentage calculations were presented with two decimals. They wanted accuracy!

"The graphical method"

Another major innovation was introduced in 1901, namely a "Graphical Representation of the Different Countries' Merchant Fleets". The diagram, which was created as a "Separate Appendix" for technical printing reasons, was a type of volume diagram based on a very complex calculation so that it required half a page of explanatory text. The next year the number of diagrams increased, and up to and including 1912 the yearbook included a separate appendix with two to three diagrams each year. The subjects were different from year to year. Thereafter almost 80 years would pass before graphical presentations were used in the yearbook again.

A diagram in the 1902 edition, which shows the trend in Norway's merchant fleet in the nineteenth century divided into sailing ships and steamships. The diagram is elegantly designed and provides a simple overview of the transition from sail to steam, but like most volume diagrams it can be difficult to interpret: "... tripling the length of the keel in millimetres corresponds to the cube root of the total net tonnage for sailing ships, and to the cube root of the total gross tonnage for steam ships." Nothing is said, however, about the significance of the height of the ships.

quintupled, today's price of NOK 260 (incl. VAT) must be regarded as roughly equivalent to what it was then; and since the tables have become more compact, we probably get much more data per krone today than we did a century ago. (If we also take increase in wages into consideration, the current yearbook is much more reasonable than it was a century ago.)

This graphical "craze" was part of an international trend. Already around 1860 they had begun to discuss the use of "the graphical method" in the presentation of statistics at international statistical congresses. A congress in The Hague in 1869 approved a strong recommendation to use maps and diagrams in official statistical publications and described graphical statistics as "a universal language." At later congresses they vigorously debated whether an international standard for the design of diagrams should be prepared, e.g. with regard to scale, classification and use of colours.¹ This attempt at co-ordination, however, was gradually abandoned, but despite the anarchical situation, the period at the close of the century was a kind of golden age for the use of graphical statistics. So-called graphical statistical albums were published, and the Paris World Fair in 1878 had a number of exhibits of statistical graphics.

When the graphical presentations were omitted from the 1913 edition of the yearbook, this may have been related to the advent of a new director at the bureau, but most other countries had also gradually ceased to use this form of presentation at the beginning of the last century. The main reason for this was probably that these presentations were extremely resource-intensive and costly, not least because the diagrams were drawn by hand and were usually printed as separate appendices in multiple colours.

In 1901 the yearbook cost NOK 1, which would correspond to about NOK 50 today, but when we also consider that the number of pages has almost

Limits to growth?

At the Nordic statistical meeting in Stockholm in 1897, it was recommended that the size of the yearbooks should not exceed 200 pages;² but after the turn of the century the size of the yearbooks increased considerably (cf. diagram), and the "ceiling" of 200 pages was

reached in 1910. In 1924 they exceeded 200 tables and 300 pages, but then they clearly thought that enough was enough. Thus, the preface to the 1925 edition explains, "*Statistical Yearbook of Norway 1925 has been greatly revised, among other things so as to decrease the size of the book.*" The next year the size was further reduced. These reductions must probably be seen in the context of the bureau's printing budget, which was reduced almost every single year in the 1920s.³

In 1927 the date in the title of the yearbook was changed "... to the year in which it is published. [A practice that is still followed.] Since the date in the title of the last edition was 1925, this edition is dated 1926 and 1927." This and a couple of other similar chronological shuffles are the reason why we can write Volume 120 on the title page of this year's edition.

Delays are by no means an unknown phenomenon in publishing, and not in the case of the yearbook either. In 1931 it was very delayed because of a long-lasting work stoppage at the printing works, and in 1937 it was "... very delayed because of a change to new typefaces. The whole book has therefore had to be typeset again." Other major delays occurred after the war. The 1946 edition did not come out until 1948, which was mainly due to "... the difficult printing conditions."

German? Nein Danke!

During the war years 1943-44 no yearbook was published because the German occupying forces had demanded that the French text should be replaced with German. The foreword to the 1945 edition states that "*The bureau refused to comply with this demand, and the preparation of the yearbook was therefore sabotaged.*" Since it had now been three years since the last publication, that edition was extra voluminous (over 500 pages).

After the war the number of tables continued to increase each year, but the tables were also simplified and made smaller so that the number of pages did not increase to the same extent, and hence in the middle of the 1950s the number of tables exceeded the number of pages. In 1950 "symbols in tables" were introduced.

Statistisk årbok kommer.

Statistisk årbok for 1941 og 1942 forelå i går, og ønskes hermed hjertelig velkommen. Disse publikasjoner har under okkupasjonen vært vaktet på som de sarte statshemmeligheter og har foreligget bare «til bruk for administrasjonen». Synderlig aktuelt inneholder årbøkene selvsagt ikke, Det er bare data fra den første del av krigen som er kommet med. Derfor gleder vi oss mere til å kunne bli i årgangene for 1943 og 44, for ikke å snakke om 1945-utgaven.

Notice in *Aftenposten* 29 May 1945:
"The Statistical Yearbook of Norway will soon be out."

Av følgende årganger av «Statistisk Årbok» og «Norges Handel» er Byråets beholdning meget knapp, og Byrået er takknemlig for å få overlatt enkelte eksemplarer:

Statistisk Årbok 1914—1916, 1919, 1920, 1926—1930, 1934 og 1938—1940.

Norges Handel 1911—1915, 1921 og 1929.

24. mai 1945.

After the war a number of volumes of the yearbook were sold out, and "... the Bureau would be grateful for the donation of any individual copies."

But English is fine

After the war the Central Bureau of Statistics also came under the influence of the Anglo-American linguistic hegemony. Gradually, English became the international language, and in 1952 the French translation was replaced with an English one (*"By agreement with the bureaux of statistics in the other Nordic countries..."*). That same year they began to place source references under the individual tables.

There now followed a long period without any major changes. The Central Bureau of Statistics' centennial in 1976 was only barely noted on the cover, and the yearbook's centennial in 1981 was passed over in silence. Indeed, the 1981 edition was probably the only yearbook in history where not a single change was made from the year before except for the updating of the figures!

The yearbook enters the schools

In 1982, however, there was some revision of the contents of the yearbook with special emphasis on meeting the needs of the upper secondary schools. Among other things, this entailed an expansion of the national accounts. The chapters that elucidate human and social conditions were also expanded at the expense of industrial statistics. All in all, the 1980s were the yearbook's golden age in many ways. It was widely used in the schools. Starting in 1983 the bureau published its own workbooks for a number of years for use in the schools; and whereas the yearbook had previously been published in the spring, the time of publication was now shifted to the beginning of the school year, i.e. August. The 1980s were also a heyday for circulation, with a circulation between 30 000 and 40 000. In the 1990s its use in the schools declined, and the current print run is 8 000.

In 1996 graphics were again introduced to the yearbook, and it was published in separate Norwegian and English editions. Thus, in a way we were back to the situation almost a century earlier, also in the sense that the graphs now as then were in colour, though the previous time they were in four colours. The yearbook was finally given a hard cover for its 2000 edition, but it had also had one in 1880. The biggest revolution of the 1990s was probably that the yearbook was now made freely available in an electronic version on the Internet – in its entirety and as one of the first in the world. This also occurred in 1996. Last year we could register about one million "hits" on the Norwegian Internet version and about 500 000 on the English one.

"It is really wonderful to occasionally forget one's scruples about free advertising, and extravagantly praise a product almost without reservation - and even specify the price and the manufacturer's name. Wonderful - because in this case 'the product' so clearly deserves it, and because the many users deserve to be made aware that it now is available in a new version.

Petter-Jakob Bjerve, director of the Central Bureau of Statistics, must be the country's only publisher who can put his name on a 460 page non-fiction work for the incredibly modest price of NOK 15, and the 'product' to which we initially referred is of course the Statistical Yearbook of Norway - available now in its 1975 edition.

The book is published with its usual boring cover, and anyone who is looking for a catchy illustration or an apt picture will search in vain, but that doesn't mean that the contents of the book are not 'dramatic'. [...] The Central Bureau of Statistics deserves praise and respect. [...]"

Ole S. Gilbo

Praise for the yearbook; Aftenposten 8 November 1975

Continuity and change for 120 years

The following formulation from the 1960 preface is typical for most of the yearbooks. *"Otherwise, some of the former tables have been dropped or condensed as usual in order to make room for some new ones and for the expansion of older tables. Moreover, some tables have been revised."* This is, as usual, followed by a listing of new and outgoing tables. In this way the yearbook reflects changes in society and the need for new statistics.

Since the first edition in 1880, about 36,000 yearbook tables have now been published. But without studying any of these tables, you can still get an overview of the social development in Norway during this period just by looking at the yearbooks' table of contents, based on the assumption that social changes are reflected to a great extent in the selection of tables.

Around the turn of the century many tables relating to what was often called "moral statistics" were added to the yearbook. When they began to publish tables on alcohol consumption in 1895, this ushered in a period of great interest in and debate about the alcohol problem. In the same way the new tables in 1905 on "Civil Marriages" and "Divorces and separations" indicate the beginning of major changes in the family ("Illegitimate Children" were already in the statistics.).

Norge i tall.

Boken som skildrer vår vei fra vuggen til graven.

Idag er 'det kommet ut en bok som forteller mere om vårt folks liv og ferd enn noget annet trykt verk. Allikevel kan man si med temmelig stor sikkerhet at ikke et eneste menneske kommer til å lese denne boken fra perm til perm. Ja, de fleste kommer ikke til å vite at den eksisterer engang, til tross for at den handler om hver eneste en av oss. Alle har vi vår bestemte plass i boken, helt fra vi kommer inn i den under betegnelsen «fødte» til vi tilslutt havner i dødelighetstabellen. Og i mellomtiden vandrer vi i kolonnene fra alderstrin til alderstrin, fra ugifte til gifte o. s. v., o. s. v.

Hvad er så denne bok med de mange merkelige egenskaper? Selvsagt er det Arboken fra Statistisk Centralbyrå, denne rikholdige kunnskapskilde for alle som kan mestre det vanskelige sprog vi kaller tallenes tale.

In 1912 the first tables on whaling were published, and three years later the first "Automobiles and Motorcycles" entered the statistics. Table 85 in 1916: "School Children's Occupational Labour in The Cities" reflects a long period with numerous surveys of child labour. That same year the first tables on tuberculosis were published, and there would be many more in the years that followed.

After Svalbard became a part of the Kingdom of Norway in accordance with the Act of 17 July 1925, the yearbook in that year included a table with "Data concerning Svalbard" with information about meteorological conditions, coal exports and postal and telegram traffic. In 1936 traffic accidents had become so numerous that they were given their own table ("Automobile Accidents, etc.") in the yearbook. That same year, statistics on "Air Traffic in Norway" were also included.

The post-war period was a time of reconstruction, and the 1949 edition included two tables on building construction. The telephone had also become so common now that it was given its own table: "Number of Telephones".

In the 1960s the budding debate on equal status also found its way into the statistical yearbook. Women now gradually made their entry into the labour market, and the 1964 edition included a separate table on married, working women. In 1966, the first kinder-

Notice in *Aftenposten* on 12 September 1934: "Norway in numbers. The book that describes our passage from the cradle to the grave."

garten statistics were published. Another phenomenon of great significance for women, namely abortion, was given its own table in 1971, two years after the amendment in 1969, and some years later (1975) we could compare the way men and women spent their time, e.g. time spent on housework.

After the deregulation of automobile sales in the beginning of the 1960s, the car fleet had now become so large and old that there was a need for separate statistics on scrapped vehicles, which were presented for the first time in the yearbook in 1978. In the 1980s unmarried cohabitant couples were included in the yearbook.

In the 1990s we got tables on HIV and AIDS (1991) among other things. Later mobile telephones and smoking habits were included in 1996, and after the Act relating to registered partnerships was passed in 1993, we also got a yearbook table on this topic in 1996. In the present edition, data on the cash benefit scheme are presented for the first time.

¹ For example, they should not use more than five different shades of the same colour. When using two colours, red should be used for high values and blue for low values.

² They also had views about the format: the director of the Swedish bureau wrote the following in a memo to the meeting, "It seems to me that such a book should be small enough to stuff in one's pocket without difficulty...". Thus, it looks as if the Swedish bureau's fondness for "pocket-books" has a certain historical tradition.

³ Thus, the Recommendation to the Storting in 1925 from the Standing Committee on Health and Social Affairs states. "The Committee thinks that it must be possible to reduce the actual printing expenditures both through limitations on what should be printed there and by taking bids on the major printing jobs.". When the budget was discussed in the Storting, representative Vraa said, "I request that the honourable president see that the whole Standing Committee on Health and Social Affairs [...] make a whole chapter relating to printing expenditures of the Central Bureau of Statistics. [...] Mr. Hambro has said that more should perhaps be printed. Yes, I am of the same opinion, but don't you agree with me that we should put an end to the humbug that the committee is inviting with further bids for printing. [...] I am ashamed that this should take place repeatedly, and in other budgets it will probably come up again.". (From the Storting's debate on Budget Recommendation S. No. 39 - 1925.)

The bureau's printing expenditures were also debated in the Storting in 1929. In that year it was proposed that the printing budget be further reduced, first by the Ministry, later by the Standing Committee on Health and Social Affairs. Representative Djupvik (the committee chairman) then scoffed at the bureau's veterinary statistics (e.g. a table on castrated cats) and said, "I mention this as an example of what can be printed, and this is a statistic of the kind that I think we should not spend a lot of money on". The cabinet minister (Værland) defended his proposal as follows, "The director of the Central Bureau [of Statistics] has a very different opinion on this matter with regard to printing. In a memo to the Ministry he has stated that he thinks that the number of publications have now been reduced so greatly that it is difficult to go any further with this trend. Among other things, he states that the total number of pages in the official statistics have been reduced by 30 per cent despite the fact that new publications have been added. The reduction has gone so far that they no longer can print the things that people need.". The proposal from the Committee (which included a further reduction in relation to the Ministry's proposal) "was unanimously approved". (From the debate in the Storting on Budget Recommendation S. No. 36 - 1929.)

Geographical survey

The Kingdom of Norway consists of the mainland, the archipelago of Svalbard and the island Jan Mayen.

The mainland consists of continental Norway and every island, islet and rock within the Norwegian baseline.

Svalbard consists of Bjørnøya, Spitsbergen, Nordaustlandet, Barentsøya, Edgeøya, Kong Karls land, Hopen, Prins Karls forland, Kvitøya and every island, islet and rock situated between 74° and 81° N. latitude and between 10° and 35° E. longitude. By an international treaty (the Svalbard treaty), signed on 9 February 1920, Norway's sovereignty over the archipelago was recognised. On 17 July 1925 the archipelago was officially incorporated into the Kingdom of Norway.

Jan Mayen is an island situated in the northern Atlantic. On 8 May 1929 it was placed under Norwegian sovereignty, and became by law of 27 February 1930 a part of the Kingdom of Norway.

The Antarctic islands Bouvet Island, Peter 1's Island and Queen Maud's land (20° W. and 45° E.) on the Antarctic continent are dependencies. They were placed under Norwegian sovereignty by law of 27 February 1930, parliamentary resolution of 23 April 1931 and royal announcement of 14 January 1939, respectively. The dependencies are not part of the Kingdom of Norway.

Forest and agricultural areas

Forests cover about one third of the country. In Southern Norway the timberline lies at approx. 1,000 metres above sea level. The height of the timberline declines towards the west and the north. In many places in Western Norway the timberline reaches no higher than 300 metres above sea level, while in the far north it disappears, because the timberline is at sea level.

Spruce and pine dominate the coniferous forest areas. Birch trees also grow in large stands in mountainous areas between the conifers and high moors and in low-lying areas in Western Norway and in Northern Norway. Valuable deciduous woods are found in areas where the climate is especially favourable. The forestry picture is changing in many places through, for example, the reversion of former grazing areas into forest and reforestation of deciduous woods.

Forestry is carried out in areas with productive forests, which cover approx. 22% of the land area. Agricultural areas lie in the most climatically favourable parts of the lowlands, and account for between 3 and 4% of the land area.

Grain and fruit growing require hotter temperatures while grass and potatoes are less demanding, and are therefore cultivated farther north and at higher elevations than grain.

Settlement

The map shows populated areas and the number of inhabitants in major urban areas as of 1 January 1999. Urban areas with 5 000 or more inhabitants are shown with circles on the map. Oslo, the largest urban area, has 761 259 inhabitants.

An urban area is an agglomeration of houses having at least 200 residents and where the distance between the houses does not as a rule exceed 50 metres, and is limited independent of administrative bounds.

Around three fourths of the population of Norway live along the coast. Other fairly densely populated areas are the plain regions of Eastern Norway and the valleys. Norway is one of the most sparsely populated countries in Europe, with 15 persons per km².

The smallest map shows the percentage of county inhabitants living in urban areas as of 1 January 1999. In 1865, around 20% of Norway's population lived in urban areas. By 1999, the figure had reached 75.3%.

County divisions in Norway

The map shows the county divisions in Norway as of 1 January 2001. Norway has a total of 19 counties. The name and location of county administrative centres are shown on the map. In addition the map shows division in economic regions. The economic regions (90 regions) consist of a total number of municipalities. The division is further documented in NOS C 616.

¹The table does not include nature relics (99 geological+about 190 trees) and flora and fauna protections. ²Some areas are located in more than one county. Thus the sum of the number in the counties is higher than the total number. ³Including fresh-water lakes. In some cases sea area is included. ⁴Flora and fauna protection areas (biotope protections). ⁵Protected according to the Svalbard law § 4. These areas are not included in the sum figures for protected areas.

¹Mean annual energy production. The figures are not directly comparable because of reference to different time periods for inflow to the reservoirs; from 2000 the period 1970-1999 is used. ²Plans for not operational hydro power are continuously being reconsidered, and consequently the potential hydro power will vary from year to year. ³Includes "License granted" for the years before 1993. ⁴Included in "License granted" or "Under licensing" for the years before 2000.

¹Agglomerations having at least 200 inhabitants and where the distance between the houses as a rule does not exceed 50 metres. Before 1845 cities ("kjøpsteder" and "ladesteder") are considered as densely populated areas, for 1845-1950 also agglomerations outside cities. ²Not included Svalbard and Jan Mayen. ³The population figure is probably about 15 000 too low. ⁴Figures from new preparation of the census in 1980. ⁵Not included Holt-Dypvåg, 4 583 persons. ⁶The population figure is probably about 20 000 too low. ⁷Present population. ⁸Including 15 952 persons with no information on densely/sparsely populated areas in 1980 and 25 005 persons in 1990.

¹Urban settlement: An agglomeration having at least 200 residents and where the distance between houses as a rule does not exceed 50 metres. An urban settlement is delimited independent of administrative boundaries. ²In municipalities where more than 50 per cent of the population live in urban settlements, persons with no registration on urban/rural residence have been considered as inhabitants of the largest urban settlement within the municipality. ³With assignment of codes as in the 1970 census, the population figures of the major urban settlements would be: Oslo 649 031, Bergen 181 919, Trondheim 128 159 and Stavanger 91 129. ⁴Revised figures. New method for delimitation that may influence the comparability with former figures. ⁵From 1 January 1999 continuous urban settlements are merged to one settlement. ⁶The population figure is probably about 4 000 too low.

¹Children 0-17 years of age include only children 0-17 years of age who live at home. Children 0-17 years of age who are registered as having left the family home, who have married, or who have their own children, are excluded. ²Children with no siblings being the only child living at home. ³Siblings living at home, at the same address as the child. ⁴Married or cohabitant (with at least one common child). A total of 34 children living with a parent who is a registered partner are also included. ⁵Children living alone, together with siblings or with step-mother/step-father only. The group may also include children in nursing homes or adopted children not yet formally registered.

¹Most of the children born out of wedlock have cohabitant parents. ²Minus sign indicates deficit of births. ³Occasions where the husband was a resident of Norway and according to the residence of the husband. ⁴For the counties: From/to counties and foreign countries.

⁵Increase in population is the difference between population 1 January two following years, and may differ from the sum of excess of births and net migration.

¹According to the boundaries each year. ²According to the boundaries for the counties from 1 January 1972. Oslo and Akershus are here considered as one county. ³Figures for 1951-1957 refer to uncontrolled data from the local population registers (and are therefore less reliable than figures for later years). ⁴Refers to 1957-1960.

114

Standardized mortality rates from malignant neoplasms per 100 000 population, by county. 1993-1997

Females

Number of deats per
100 000 population

Country average: 181

Males

Number of deats per
100 000 population

Country average: 287

The standardpopulation is the
total population by 5-years age
groups per 1 January 1981

151 National Insurance. Benefits at childbirth and adoption

	1998	1999	2000
	Number		
Cases of benefit, total	94 729	95 582	97 746
Cases of confinement benefit	78 351	79 614	82 244
Mothers	48 159	48 478	49 585
Of which: Cases with "tidskonto"	1 439	1 484	1 331
Fathers	30 192	31 136	32 659
Of which: Cases with "tidskonto"	250	217	227
Cases of benefit to persons engaged in own housework ¹	15 300	14 769	14 377
Cases of benefit to persons who have adopted a child/children ²	1 139	1 199	1 125
	1 000 kroner		
Expenditure, total	6 843 014	7 450 026	7 853 586
Confinement benefit to employed persons	6 093 752	6 695 342	7 092 416
Of which: Confinement benefit for fathers	393 599	424 806	459 477
Holiday allowance from confinement benefit	171 889	184 163	202 249
Confinement benefit to persons engaged in own housework	487 950	475 341	462 126
Benefit for having birth at home	1 277	1 097	808
Benefit to persons who have adopted a child/children	88 146	94 083	95 987

¹The figures are estimated on the basis of account and statistics. ²The figures are probably overestimated. The reason is that some of the cases may have been registered more than once, due to interruptions because of sickness leave or because of the father's quota.

¹The studies at the universities and colleges are based on terms. ²The pupils of upper secondary schools consist of pupils under the Upper Secondary Education Act, pupils of folk high schools, participants of labour market courses and participants of other upper secondary education.

³The number of colleges is from 1994/95 lower than recent years because most of the colleges have been reorganized into fewer units, and the single divisions of NKI colleges and Norwegian School of Management are not counted as separate colleges. ⁴Norwegian College of Fishery Science is included in the University of Tromsø. ⁵Until 1996 the University of Trondheim was divided in College of Arts and Science, The Norwegian Institute of Technology and Faculty of Medicine. All the institutions were from 1 January 1996 combined to an administrative unit, the Norwegian University of Science and Technology.

¹The term personal taxpayer means an individual that has assessed taxes >0 and/or tax advances >0. Tax advances are defined as the sum of settled advanced tax deduction, settled advanced tax and paid additional advance tax. Married couples with joint-taxation are not counted as one personal taxpayer. This definition differs from earlier years' definition of personal taxpayers, and are therefore not comparable. Taxpayers from Svalbard are not included. ²Ordinary income after special deductions eligible for taxation.

¹The term personal taxpayer means an individual that has assessed taxes>0 and/or tax advances>0 and/or tax relieves>0. Tax advances are defined as the sum of settled advanced tax deduction, settled advanced tax and paid additional advance tax. Married couples with joint-taxation are not counted as one personal taxpayer. This definition differs from earlier years' definition of personal taxpayers, and are therefore not comparable. Taxpayers from Svalbard are not included. ²Municipal net wealth eligible for taxation. ³Ordinary income after special deductions eligible for taxation.

Others	28	18	10	2	148	82	66	42

¹Married females include cohabitants. ²The estimates for 1995 are not quite comparable with estimates from before 1988 because of changes in the questionnaire and in the survey weeks. This is most significant for the groups Home workers and Pensioners, disabled and sick. More recent figures can not be given because of changes in the Standard Classification of Occupations.

¹Starting in 1970, 16 years and over. ²For 1980, persons stating to have worked at least 1 000 hours per year are considered economically active. There is good correlation between working at least 1 000 hours per year and having a main occupation as the main source of livelihood, a term used in earlier censuses. For 1990, the figures are deducted from the responses to the question on number of months in full-time or part-time work. The figures on economically active are therefore lower than the ones presently used.

¹The statistics cover general trade. Imports directly to the Norwegian continental shelf not cleared by customs are excluded. The exports include crude oil shipped directly from the Norwegian Continental Shelf and natural gas from the Norwegian Continental Shelf. ²Excluding aircraft, ships and floating structures. ³Refunds of duty to the ship building industry are not deducted. In 1990-1991 these amounted to 15 and 6 million kroner. In 1992-2000 there was no refund of duty.

	1 000 tonnes	Million kroner	1 000 tonnes	Million kroner
55 Essential oils and perfume materials, toilet, polishing and cleansing preparations	112	3 229.5	115	3 494.5
Perfumery, cosmetics and toilet preparations	23	1 559.5	23	1 788.0
Soap, cleansing and polishing preparations	85	1 021.0	88	1 068.0
56 Fertilizers, manufactured	729	799.8	787	931.9
Potassic fertilizers (other than crude potassium salts)	538	579.5	540	631.5
57 Plastics in primary forms	254	2 502.6	271	2 904.3
Polyethylene in primary forms	64	451.2	70	577.3
Other plastics in primary forms	99	1 154.9	110	1 293.5
58 Plastics in non-primary forms	77	2 049.0	83	2 258.6
Tubes, pipes and hoses of plastics	14	434.3	18	504.3
Plates, sheets, film, foil and strip of plastics	61	1 542.2	64	1 675.7
59 Chemical materials and products n.e.s.	280	2 999.1	257	2 976.4
61 Leather, leather manufactures and dressed fur skins	2	324.3	3	424.3
62 Rubber manufactures	2 191.1	..	2 274.3
Rubber tyres for motor cars, buses and lorries	⁵ 3 040 834	1 101.7	⁵ 3 283 744	1 170.7
63 Cork and wood manufactures (excl. furniture)	2 430.8	..	2 723.5
Builders' joinery and carpentry of wood (incl. cellular wood panels and assembled parquet panels)	1 026.5	..	1 145.9
64 Paper, paperboard and manufactures thereof	686	6 431.6	702	6 879.6
Printing and writing paper, other than newsprint	125	898.5	123	910.4
Sanitary towels and tampons and similar sanitary articles of paper pulp, paper and cellulose wadding	23	526.5	23	594.3
65 Textile yarn, fabrics, made-up articles and related products	4 243.8	..	4 472.3
Textile yarn	14	467.9	14	479.5
Cotton fabrics, woven	5	407.0	5	405.4
Fabrics, woven of man-made fibres	4	406.8	4	391.5
Special yarns, special textile fabrics and related products	16	819.0	17	899.1
Bed linen, table linen, toilet linen and other furnishing articles of textile materials	10	702.6	11	790.2
Carpets etc. of man-made textile materials, tufted	4	138.1	4	152.8
66 Non-metallic mineral manufactures	3 666.1	..	3 860.0
Mineral manufactures n.e.s.	956.3	..	967.3
Glass	88	741.4	87	733.8
Pottery	19	490.3	19	517.9
67 Iron and steel	7 352.6	..	7 245.3
Flat-rolled products of iron or non-alloy steel, not clad, plated or coated, hot-rolled	307	785.2	368	993.7
Flat-rolled products of iron or non-alloy steel, not clad, plated or coated, cold-rolled	103	294.5	94	327.2
Flat-rolled products of iron or non-alloy steel, plated or coated with zinc	79	329.8	72	347.2
Bars and rods of iron or steel, hot-rolled, hot-drawn or hot-extruded, incl. those twisted after rolling	56	193.0	68	236.9
Tubes, pipes and hollow profiles of circular cross-section, seamless, of iron or steel	23	427.3	23	436.8
Tube or pipe fittings of iron or steel	15	852.9	13	729.2
68 Non-ferrous metals	4 628.0	..	6 333.1
Copper	27	619.3	30	792.5
Aluminium and -alloys, unwrought	188	2 136.8	253	3 460.6
69 Manufactures of metals, n.e.s.	9 941.3	..	9 027.2
Structures and parts of iron or steel (excl. prefabricated buildings)	120	2 924.6	111	1 787.7
Nails, screws, nuts etc.	23	687.6	25	738.3
Tools for use in the hand or in machines	1 055.0	..	1 101.0
71 Power generating machinery and equipment	4 566.5	..	4 439.1
Internal combustion piston engines	1 581.2	..	1 676.7
Rotating electric plants	938.6	..	863.9
72 Machinery specialized for particular industries	10 735.3	..	10 222.1
Agricultural machinery	1 123.0	..	1 158.4
Tractors	⁵ 5 924	836.9	⁵ 6 875	783.1
Civil engineering and contractors' plant and equipment	2 573.6	..	2 815.6
Paper mill and pulp mill machinery	722.5	..	465.7
Printing and bookbinding machinery	953.1	..	588.6
Food processing machines	747.2	..	722.7
Machinery and equipment specialized for particular industries	3 477.8	..	3 416.4

¹As from 1969 the figures comprise holdings with at least 5.0 decares agricultural area in use. ²Figures up to 1999 comprise goats 1 year and older. ³As from 1989 the coverage of the censuses are a little changed compared to earlier censuses. Because of this, some horses kept for leisure purposes are not included.

¹The statistics record the number of bounties paid for predators killed. After the species were protected (cf. note 5), all registered mortality is recorded.

²The periode from 1866-1870 records the average per year. No data for eagles. ³The decrease for eagles is due to better control through the payment of bounties. ⁴For 1933-1940 there were an additional 40 wolves and 56 eagles felled. After 1961 bears felled without bounty are also included. ⁵Eagles were protected starting in 1969, wolves starting in 1972 and bears starting in 1974. Wolverines starting in South of Norway in 1975 and in the whole of Norway from 1981, until license hunting was introduced in 1993. Lynx was protected in South of Norway from 1992, until quota hunting was introduced in 1994.

¹One driving licence may include several classes. ²Trailers with total weight of 750 kg or more. ³The large increase in the figures for some of the driving licence classes, is due to what previously was called the stamp arrangement. That means that many driving licence owners had the privilege to drive light motor cycle, motor vehicle up to 7 500 kg and mini buses, and this right was only indicated by a stamp on the driving licence (stamp arrangement). It was, however, not marked by any letter combination on the driving licence (or in the driving licence register). Previously, the statistics did not comprise those who had these rights (the stamp). When the driving licence register was re-adjusted in 1998, the stamp arrangement was unrolled.

¹Refers to transfers comprising transfer of title to land and transfers of building sections registered as individual property. Dwelling property comprises detached houses, semi-detached houses, row-houses, multi-dwelling houses etc. The share of different dwelling types will vary over time. Because of this figures do not describe the price trend for a specific type of dwelling. A few transfers may include more than one dwelling unit. Dwelling properties without purchase price reported are not included.

Per resident personal taxpayer					
Ordinary income plus special deductions	143 423	152 360	162 964	169 820	178 660

¹Assessed taxes equal a net amount where taxes are reduced by different tax deductions. ²Ordinary income plus special deductions. ³For non-personal taxpayers tax based on correction income is included from 1994, and taxes on natural resources for electric power stations are included from 1997. For non-personal taxpayers locally based taxation is removed as of 1998 and includes now only taxes on natural resources.

⁴For personal taxpayers income tax to the central government consists mainly of surtax on gross income. For non-personal taxpayers income tax to the state consists before 1998 mainly of petroleum tax. From 1996 assessed tonnage tax for shipping companies is included and from 1997 taxes on rents for electric power stations. As of 1998 all taxes on income and wealth for non-personal taxpayers are assessed to the state with the exception of taxes on natural resources for electrical power stations.

¹Capital cities are listed first, then, alphabetically, some of the largest cities in the country. Cities that don't have suburbs are usually listed with the population in the administrative areas. The population figures for a large number of cities in less developed countries are uncertain. ²De jure population. ³Includes Frederiksberg and Gentofte. ⁴The capital city region including Espoo, Kauniainen and Vantaa. ⁵The administrative units may cover more than city areas. ⁶Includes Anderlecht and Schaerbeek. ⁷Excluding alien military forces. ⁸Former Sverdlovsk. ⁹County districts. ¹⁰Pretoria is the administrative unit, Cape Town is the legislative capital city. ¹¹Includes New Delhi. ¹²The "Standard metropolitan statistical area" is used for cities with suburbs. ¹³Including East-Jerusalem. ¹⁴Excluding countryside population. The administrative areas of Chinese cities usually include large countryside areas. The majority of the population may be living in such areas. ¹⁵The Greek part. ¹⁶The Turkish part. ¹⁷Statistical district. **Source:** UN and Statistics Finland. **More information:** <http://www.ssb.no/> and <http://www.stat.fi/>.

642 World's largest cities. Summary

City, country	Population
With suburbs	
1. Tokyo, Japan	1999 33 129 000
2. Chongqing, China	1998 30 596 000
3. Seoul, South-Korea	1998 21 273 000
4. New York, United States	1998 20 124 400
5. Osaka, Japan	1999 16 918 000
6. Mexico City, Mexico	1995 16 674 200
7. São Paulo, Brazil	1996 16 583 200
8. Los Angeles, United States	1998 15 781 000
9. Bombay, India	1996 15 725 000
10. Moskow, Russia	2000 15 141 800
11. Shanghai, China	1998 14 640 000
12. Cairo, Egypt	1995 14 525 000
13. Beijing, China	1998 12 460 000
14. Calcutta, India	1996 12 118 000
15. Buenos Aires, Argentina	1996 11 931 000
16. London, United Kingdom	1991 11 840 700
17. Jakarta, Indonesia	1995 11 500 000
18. Lagos, Nigeria	1996 10 878 000
19. Paris, France	1999 10 561 600
20. Teheran, Iran	1996 10 344 000
21. Delhi, India	1996 10 298 000
22. Rio de Janeiro, Brazil	1996 10 192 100
23. Karachi, Pakistan	1996 10 119 000
24. Chengdu, China	1998 9 970 000
25. Tianjin, China	1998 9 570 000

City, country	Population
Without suburbs	
1. Seoul, South-Korea	1998 10 289 000
2. São Paulo, Brazil	1999 9 968 500
3. Bombay, India	1991 9 925 900
4. Jakarta, Indonesia	1999 9 604 900
5. Shanghai, China	1998 9 536 500
6. Karachi, Pakistan	1998 9 269 300
7. Istanbul, Turkey	1999 8 788 000
8. Mexico City, Mexico	2000 8 591 300
9. Moskow, Russia	1999 8 389 700
10. Tokyo, Japan	1998 7 854 000
11. New York, United States	1998 7 420 200
12. Beijing, China	1998 7 336 400
13. Delhi, India	1991 7 206 700
14. London, United Kingdom	1998 7 187 300
15. Cairo, Egypt	1996 6 789 500
16. Teheran, Iran	1996 6 758 800

Ws	watt second =1 J		
toe	ton oil equivalent 42 622 000 000 J= approx. 42,6 GJ		

Power

W	watt 1 W=1 J/s=VA	MW	megawatt=1 000 000 W
kW	kilowatt=1 000 W	MVA	megavolt ampere=1 000 000 W

Units of measure of ships

RT	Registered tonnage is a common measure of capacity or volume for ships. 1 register ton=2.83 m ³
GT	Gross registered ton. The gross registered tonnage of a ship indicated the volume of the whole ship including superstructure, deck and deck house.
NT	Net register ton. The net registered tonnage primarily indicates the size of cargo space.

Some prefixes

Prefix	Symbol	Factor	
exa	E	10 ¹⁸	=1 000 000 000 000 000 000

Topics 1995

The topic classification (revised 1995) makes it easier to locate relevant statistics within a subject of interest. The chapters of this yearbook are consistent with the highest level of the classification, while the tables are grouped at lower levels as well.

Statistics Norway has produced a publication to guide the users of the statistics. An English summary of the publication is available on Statistics Norway's home page on Internet: <http://www.ssb.no>.

00 General

- 00.00 General statistics and surveys
- 00.01 Politics
- 00.02 Living conditions and time use
