NOTE 1.—The annual interest charge is computed upon the amount of outstanding principal at the close of the fiscal year, and is exclusive of interest charge on Pacific Railway bonds.
 NOTE 2.—The temporary loan per act of July 11, 1862, is included in the 4 per cents. from 1862 to 1863, inclusive, with the exception of the amount outstanding for August 31, 1863, the date at which the public debt reached its highest point. This loan bore interest from 4 per cent. to 6 per cent., redeemable on ten days' notice after thirty days, but being constantly changing, it has been considered more equitable to include the whole amount outstanding as bearing 4 per cent. interest on an average for the year.

NOTE 1.—From 1791 to 1820, as the free merchandise cannot be distinguished from the dutiable merchandise, only the total values of imports and exports are stated.

NOTE 2.—The amounts of "duty collected" from 1791 to 1823, inclusive, are taken from the Finance Reports, and show *net* amounts received from duties on imported merchandise, tonnage tax, hospital dues, and other sources, after deducting expenses of collection; the amounts from 1824 to 1883, inclusive, are the gross amounts collected on the imports of merchandise only, the figures from 1824 to 1866, inclusive, being taken from the accounts of the Register of the Treasury, and those after 1866 from the accounts of this office.

NOTE 3.—The average ad valorem rates of duty from 1791 to 1866, inclusive, are computed upon the values of net imports. After 1866, the averages are based upon the values of imported merchandise entered for consumption, as reported to this office by collectors of customs.

NOTE 1.—The amount of State and national bank circulation is compiled from the reports of the Comptroller of the Currency at the nearest dates obtainable to the end of each fiscal year; the other amounts are taken from the official printed reports of the Secretary of the Treasury.

* NOTE 2.—Exclusive of \$8,375,934. amount estimated as lost or destroyed, act June 21, 1879.

NOTE 3.—The one and two year notes of 1863, and the compound interest notes, though having a legal-tender quality for their face-values, were in fact interest-bearing securities, payable at certain times, as stated on the notes. They entered into circulation for but a few days, if at all, and, since maturity, those presented have been converted into other interest-bearing bonds, or paid for in cash, interest included.

NOTE 4.—The amount of fractional silver in circulation in 1860, 1861, and 1862 cannot be stated. The amounts stated for 1876, 1877, 1878, and 1879 are the amounts coined and issued since January, 1876. To these amounts should be added the amount of silver previously coined which has come into circulation.

^aThe figures of production from 1860 to 1871, inclusive, are taken from the New York Shipping and Commercial List; for 1872, 1873, and 1874 from the New York Commercial and Financial Chronicle; and after 1874, from reports of the National Cotton Exchange of America. The amount placed opposite each fiscal year in the column of production is the crop grown during the preceding calendar year and comprises port receipts, overland shipments to Northern mills, and Southern consumption, during the year ended August 31.

^bThe net weight of bales is stated on the authority of Mr. Thomas Ellison, of Liverpool; and the gross weight for years prior to 1878 on the authority of Mr. J. R. Dodge, Statistician of the Department of Agriculture; and after 1877, as reported by the National Cotton Exchange.

^cNo record during the war period.

^a As a given number of gallons of refined petroleum represents the product of a larger number of gallons of crude petroleum, it is necessary to reduce the exports of petroleum to their equivalent in crude oil, in order to arrive at a knowledge of the percentage of the total product of mineral oil exported. It has been ascertained, as the result of a careful computation, that the quantity of petroleum and its distilled products exported during the year ended June 30, 1878, was equivalent to 407,483,175 gallons of crude oil; or, in other words, that the exports of petroleum constituted about 66 per cent. of the production. A larger percentage of the mineral oil product of the country is exported than of any other product, except cotton.

^b Barrels reduced to gallons, at the rate of 42 gallons to the barrel.

^c Estimated.

^d Figures of production for fiscal years 1882 and 1883 furnished by S. H. Stowell, editor of Stowell's Petroleum Reporter.

^a Prior to the year 1864 the tonnage of vessels entered from British Columbia is combined with that entered from British Possessions on the Atlantic; subsequent to that period it is shown in a separate column.

^b A small portion of the tonnage from the United Kingdom during these years entered at lake ports, and has been deducted from the total tonnage entered from that country, which will account for the apparent discrepancy between these figures and those of the regular annual statements of navigation.

^c No detailed statement of the trade of each port with foreign countries was published for these years, which renders it impossible to determine what amount of the tonnage of each foreign country, if any, may have entered at lake ports. The whole amount of tonnage from the countries herein enumerated has therefore been credited to seaports.

*This statement is the result of original estimates, made by Mr. J. R. Dodge, from annual returns to the Department of Agriculture, of the comparative condition and area of the crop and price of product; and as to quantity of production, mainly from the official records of manufacture and exportation. It has been demonstrated that returns of production of tobacco, which bears a heavy tax, are uniformly underestimates, whether census returns or those of the Department of Agriculture; a fact in accord with the experience of all governments with respect to voluntary statistical returns of taxed products. The prices are the average home or farm value of leaf tobacco.
