NOTE 1.—The interest charge is computed upon the amount of outstanding principal at the close of the fiscal year, and is exclusive of interest charge on Pacific Railway bonds.

NOTE 2.—The temporary loan enacted of July 11, 1862, is included in the four per cents. from 1862 to 1868, inclusive, with the exception of the amount outstanding for August 31, 1865, the date at which the public debt reached its highest point. This loan bore interest from 4 per cent. to 6 per cent., redeemable on ten days' notice after thirty days, but being constantly changing. It has been considered more equitable to include the whole amount outstanding as bearing 4 per cent. interest on an average for the year.

NOTE 3.—The total interest-bearing debt, as above, is exclusive of Pacific Railway bonds.

These certificates, as a matter of accounts, are treated as a part of the public debt, but being offset by notes held on deposit for their redemption, should properly be deducted from the principal of the public debt in making comparison with former years.

† Exclusive of gold, silver, and currency certificates held in the Treasury's cash, and including \$64,623,512 bonds issued to the several Pacific railroads.

NOTE 1.—The amounts of "duty collected" from 1791 to 1823, inclusive, are taken from the Finance Reports, and show *net* amounts received from duties on imported merchandise, tonnage tax, hospital dues, and other sources, after deducting expenses of collection; the amounts from 1824 to 1866, inclusive, are the gross amounts collected on the imports of merchandise only. The amounts of duty collected from 1824 to 1866, inclusive, are from the accounts of the Register of the Treasury, and those after 1866 from the accounts of this office.

NOTE 2.—The annual average ad valorem rates of duty from 1791 to 1866, inclusive, are computed upon the values of net imports; after 1866, the average rates are based upon the values of imported merchandise entered for consumption, as reported to this office by collectors of customs. (See Table No. 11.)

^a As a given number of gallons of refined petroleum represents the product of a larger number of gallons of crude petroleum, it is necessary to reduce the exports of petroleum to their equivalent in crude oil, in order to arrive at a knowledge of the percentage of the total product of mineral oil exported. It has been ascertained, as the result of a careful computation, that the quantity of petroleum and its distilled products exported during the year ending June 30, 1878, was equivalent to 407,482,175 gallons of crude oil; or, in other words, that the exports of petroleum constituted about 66 per cent. of the production. A larger percentage of the mineral-oil product of the country is exported than of any other product, except cotton. ^b Barrels reduced to gallons, at the rate of 42 gallons to the barrel. ^c Estimated. ^d Figures of production for fiscal years 1882, 1883, and 1884 and 1885, furnished by S. H. Stowell, editor of Stowell's Petroleum Reporter.

NOTES.—(1) The production of domestic liquors and wines for 1840, 1850, and 1860, was derived from the United States census. (2) The consumption of imported liquors and wines for 1840, 1850, and 1860 is the net imports. (3) The production of domestic wines from 1870 to 1887 is estimated by the Department of Agriculture; by Mr. Charles McK. Leoser, president of the Wine and Spirit Traders' Society, New York, and other well-informed persons. (4) The consumption of domestic spirituous and malt liquors from 1870 to 1885 was obtained from the reports of the Commissioner of Internal Revenue, and for prior years from the United States census. (5) The consumption of imported liquors and wines, from 1870 to 1885 was taken from the official returns made to the Bureau of Statistics by collectors of customs. (6) In computing the quantity of sparkling and still wines and vermouth in bottles, five so-called quart bottles are reckoned as equivalent to the gallon.

a Prior to the year 1864 the tonnage of vessels entered from British Columbia is combined with that entered from British Possessions on the Atlantic; subsequent to that period it is shown in a separate column.

b A small portion of the tonnage from the United Kingdom during these years entered at lake ports and has been deducted from the total tonnage entered from that country, which will account for the apparent discrepancy between these figures and those of the regular annual statements of navigation.

c No detailed statement of the trade of each port with foreign countries was published for these years, which renders it impossible to determine what amount of the tonnage of each foreign country, if any, may have entered at lake ports. The whole amount of tonnage from the countries herein enumerated has therefore been credited to seaports.

^a Prior to the year 1864 the tonnage of vessels cleared for British Columbia is combined with that cleared for British Possessions on the Atlantic.

^b A small portion of the tonnage for the United Kingdom during these years cleared at lake ports, and has been deducted from the total tonnage cleared for that country, which will account for the apparent discrepancy between these figures and those of the regular annual statements of navigation.

^c No detailed statement of the trade of each port with foreign countries was published for these years, which renders it impossible to determine what amount of the tonnage of each foreign country, if any, may have cleared at lake ports. The whole amount of tonnage for the countries herein enumerated has therefore been credited to seaports.

NOTE.—(a) No comprehensive figures of the business of the railways of the United States are attainable prior to the above. And even these tables are the fruit of private enterprise, in compiling from the official annual reports of each road the results of the traffic as shown above, and including for the year 1845 the operations of companies running 123,320 miles of railway. No department of the Federal Government has been invested with authority to require returns of railway operations, except from the transcontinental lines chartered or endowed by Congress, nor are there State officers charged with such duties except in a few of the States. (b) This table includes elevated railroads.

The greatly-increased mileage since 1880 is principally due to the fact that in 1881 the Western Union Telegraph Company absorbed by purchase all the lines of the American Union and the Atlantic and Pacific Telegraph companies, the former having

previously in operation over 12,000 miles of line and the latter 8,706 miles. Capital stock of the Western Union, \$50,000,000.

The Western Union has exclusive contracts with several international cable companies, operating eight Atlantic cables, and guarantees 5 per cent. annual dividends on the stock of the American Cable Company; amount \$14,000,000.

Besides the above, there are many new lines of telegraph which have complied with the United States telegraph act of 1866, and are operating wires with or without connection with railway companies.

The Mutual Union Telegraph Company of the United States, established in 1831, has about 8,000 miles of line, 60,000 miles of wires, 1,200 offices, and has extended its lines north and south, operating already from Boston to Chicago, Saint Louis, Washington, etc. Capital stock, \$2,500,000. This line is now leased and operated by the Western Union Telegraph Company.

The Baltimore and Ohio Railroad Telegraph has lines co-extensive with its railway system and branches, besides many newly-extended wires south and west, constituting in 1885, 7,535 miles of line and 54,972 miles of wire. This line was purchased in 1887 for \$5,000,000 by the Western Union Company, by which it is owned and operated.

The Bankers and Merchants' Telegraph Company, New York, organized March 23, 1881, has about 4,000 miles of line, 28,300 miles of wire, and is in operation to many leading points. Capital authorized, \$3,000,000. Debt about \$7,500,000, as stated in August, 1884. Sold in foreclosure July 31, 1885, and now operated by the United Lines of Telegraph.

The American Rapid Telegraph Company New York to Boston, Philadelphia, Baltimore, Washington, Buffalo, etc., with capital stock of \$4,000,000, has been leased by the Western Union Telegraph Company.

The Postal Telegraph and Cable Company, of New York, organized June 21, 1881, has about 1,500 miles of line and 4,500 miles of wire in operation from New York to Chicago, etc., and owns what are claimed to be very valuable patents in improved wires and telegraphy. Authorized capital stock, \$21,000,000, of which about \$7,000,000 has been issued. Now operated by the United Lines of Telegraph.

The aggregate mileage of telegraph lines in the United States open for public business exceeds 176,000 miles besides railway, Government, private, and telephonic lines, length not ascertainable.

a This statement is the result of original estimates, made by Mr. J. R. Dodge, from annual returns to the Department of Agriculture, of the comparative condition and area of the crop and price of product; and as to quantity of production, mainly from the official records of manufacture and exportation. It has been demonstrated that returns of production of tobacco, which bears a heavy tax, are uniformly underestimates, whether census returns or those to the Department of Agriculture; a fact in accord with the experience of all Governments with respect to voluntary statistical returns of taxed products. The prices are the average home or farm value of leaf tobacco.
