No. 15.—DENSITY OF POPULATION PER SQUARE MILE AT EACH CENSUS, 1790 TO 1900: BY STATES AND TERRITORIES.

[From reports of the Bureau of the Census, Department of Commerce and Labor.]

[NOTE.—In computing density of population for the United States, the areas and population of Alaska and Hawaii in 1900, of Alaska in 1890, and of Indian Territory in 1860, 1870, and 1880 are not considered. The area of Indian reservations, outside of Indian Territory, is included in the area of the States and Territories in which they are severally situated, and in that of the United States prior to 1890, although the population of these Indian reservations was not ascertained, and for this reason can not be considered in figuring density of population at the censuses prior to 1890.]

EXPLANATION OF TERMS USED IN TABLES 160 TO 169 (PAGES 416-534).

General imports.—Tables Nos. 160 and 161 embrace imported articles entered at the custom-houses for immediate consumption and imported articles entered for warehouse. The statements of *imports entered for consumption*, Tables Nos. 165 and 166, embrace imported articles entered for immediate consumption and imported articles withdrawn from warehouse for consumption. The statement of *general imports* and the statement of *imports entered for consumption* for any period will always differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term "entry for consumption" is the technical name of the import entry made at the custom-house, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion. Some of them may be afterwards exported.

Import values.—The values or prices of articles imported since August 1, 1890, are governed by the provisions of section 19 of the act of June 10, 1890, which prescribes that the values of imported merchandise subject to ad valorem rates of duty shall be "the actual market value or wholesale price of such merchandise as bought and sold in usual wholesale quantities at the time of exportation to the United States in the principal markets of the country from whence imported, and in the condition in which such merchandise is there bought for exportation to the United States or consigned to the United States for sale, including the value of all cartons, cases, crates, boxes, sacks, and coverings of any kind, and all other costs, charges, and expenses incident to placing the merchandise in condition ready for shipment to the United States."

Domestic export values.—Tables Nos. 162 and 163 exhibit the exports of domestic products or manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported, or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles and utensils made from imported metals, etc. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

Foreign export values.—Table No. 164, called "foreign exports," or "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported from "warehouse" is their import value. The value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Values of foreign merchandise in transit or transshipped.—Table No. 169 exhibits foreign merchandise brought to the United States for immediate transit across the territory of the United States to a foreign country, or for transshipment in the ports of the United States to a foreign country. The value of the commodities returned in this table is similar to that of imports.

Values of warehoused merchandise.—Tables Nos. 167 and 168 exhibit imported merchandise in warehouse. This merchandise has already appeared in the statement of *general imports*, Tables Nos. 160 and 161, for the year in which it was imported. The official values of the articles therein represented are the same as the *import values*.

Unless otherwise stated the term "ton" used in this volume, as applied to weight, signifies the "long" ton of 2,240 pounds.

NOTE BY MESSRS. MAUGER & AVERY.—This table exhibits in a concise form the prices of the three grades of a standard domestic fleece wool in the seaboard markets at the beginning of each quarter. In its present shape it is deemed to be intelligible to all interested in wool. In the special features of character and condition, "washed Ohio fleece wool" is less subject to variation than any other description, and thus is more a basis of value than any other class. Wool, owing to its wide variety, difference in character and condition, and liability to shrink in cleaning, is precluded from speculative operations which apply to products which may be dealt in as "futures." For these reasons the prices of wool are not liable to the same changes as cotton, wheat, etc.

[a] The price on board fixed at Baltimore by the Seaboard Coal Association.
[b] Price of soft-coal pool.
[c] Owing to unusual conditions in the coal market the association price for 1902 is not a correct guide as to the actual selling price, Clearfield coal selling as high as $7 at the mines and as high as $9 in New York Harbor. Unsettled conditions lasted until the 1st of March, 1903, or nearly so; then, on April 1, prices were made $3.30 at Baltimore; later on in the year this price was discounted from 10 to 15 per cent.
[d] No lump coal was shipped beyond the Delaware Capes in 1907. Had shipments been made, the price would have been $4.50 per ton.

No. 202.—RELATIVE WHOLESALE PRICES OF RAW AND OF MANUFACTURED COMMODITIES, 1890 TO 1906, AND PER CENT OF INCREASE IN PRICES FOR 1906 OVER PRICES FOR EACH PRECEDING YEAR.

[From reports of the Bureau of Labor, Department of Commerce and Labor. This table summarizes wholesale prices of 258 staple commodities. The commodities designated as "Raw" are such as are marketed in their natural state and also such as have been subjected to only a preliminary manufacturing process; this group includes 50 articles. The commodities designated as "Manufactured" are such as have been subjected to more than a preliminary factory manipulation and in which the manufacturing labor cost constitutes an important element in the price; this group includes 208 articles. A relative price, or index number, as it is technically called, of any article is the per cent which the price of that article at any date is of the price of the same article at a date or period which has been selected as the base or standard. The base selected by the Bureau of Labor for this compilation is the average price for the ten-year period 1890 to 1899. The relative prices shown under each group are simple averages of the relatives of all articles included within the group. Average price for 1890–1899=100.]

No. 204.—RELATIVE RETAIL PRICES OF THE PRINCIPAL ARTICLES OF FOOD, 1890 TO 1906.

[From reports of the Bureau of Labor, Department of Commerce and Labor. The total number of statements of prices collected by the Bureau of Labor in 1906 was 6,175 from 993 retail merchants. The number has varied somewhat from year to year. The 993 merchants are located in 39 cities, which are principal industrial centers of 39 States. For each of the 30 articles the prevailing price each month was secured. As previously explained under the title of wholesale prices, the relative price of any article is the per cent which the price of that article at any date is of the price of the same article at a date or period which has been selected as the base or standard. The base selected by the Bureau of Labor for retail as well as for wholesale prices is the average price for the ten-year period 1890 to 1899. Average price for 1890–1899=100.]

No. 205.—RELATIVE RETAIL PRICES OF FOOD, SIMPLE AND WEIGHTED AVERAGES: BY GEOGRAPHICAL DIVISIONS, 1890 TO 1906.

[From reports of the Bureau of Labor, Department of Commerce and Labor. This table summarizes for each of the 5 geographical divisions and for the United States the relative retail prices of food for each year from 1890 to 1906. In the first column under each division is shown the simple average of the relative prices of the 30 articles. In the second column under each division is shown the relative prices computed by giving to the relative price of each article its proper weight as determined by the average consumption in 2,567 families of workingmen investigated by the Bureau of Labor in 1901. Average price for 1890–1899=100.]

No. 207.—AVERAGE FOOD COST PER WORKINGMAN'S FAMILY, 1890 TO 1906: BY GEOGRAPHICAL DIVISIONS.

[From reports of the Bureau of Labor, Department of Commerce and Labor. This table is based on the average food cost per family in 1901, as reported by the workingmen's families investigated in each geographical division, and the course of retail prices of food as indicated by the relative prices, weighted according to family consumption in that division. In each of the geographical divisions and in the United States as a whole it is considered in this table that the expenditure for each of the various articles bore the same relation to the total expenditure for food in each of the other years of the seventeen-year period covered by this investigation as in 1901.]

[a] Gold coin became available for circulation January 1, 1879, as a result of the resumption act of January 14, 1875.

[b] Silver certificates were authorized by acts of February 28, 1878, and August 4, 1886.

[c] Subsidiary silver, which disappeared from circulation in 1862, was reintroduced under operation of the act of January 14, 1875.

[d] As the result of special investigation by the Director of the Mint, a reduction of $135,000,000 was made in the estimate of gold coin in circulation on July 1, 1907, as compared with the basis of previous years.

NOTE.—For redemption of outstanding certificates an exact equivalent in amount of the appropriate kinds of money is held in the Treasury, and is not included in the account of money held as assets of the Government.

[a] The cost of collecting the internal revenue embraces the following items: Salaries and expenses of collectors, including pay of deputy collectors, clerks, etc., and including expenses incident to enforcing the provisions of law taxing oleomargarine; salaries and expenses of revenue agents, surveyors of distilleries, gaugers, storekeepers, and miscellaneous expenses; paper for internal-revenue stamps, and expenses of detecting and punishing violations of internal-revenue laws.

[b] The expenses of collecting the revenue from customs includes all sums drawn from the appropriation made by Congress for that purpose. The money is expended for salaries, rents, labor in weighing, gauging, and measuring imported merchandise, revenue boatmen, repairs, and other expenses incident to rented buildings, stationery, and the traveling expenses of special agents, but does not include expenditures for revenue cutters, fuel, lights, water, furniture, janitors, etc., for buildings owned by the Government, nor expenditures for erecting new buildings, all of which are paid for from specific appropriations made for those purposes.

The expenses of collecting internal and customs revenue do not include the expenditures for salaries, etc., incident to auditing these accounts in the Departments at Washington.

[f] Figures for the years 1800 to 1855 include the total public debt.

[g] Gold and silver can not be stated separately prior to 1876. From 1862 to 1875, inclusive, gold and silver were not in circulation except on the Pacific coast, where it is estimated that the average specie circulation was about $25,000,000, and this estimate is continued for the three following years under the head of gold. After that period gold was available for circulation.

[h] Total specie in circulation; gold and silver were not separately stated prior to 1876.

[i] Estimated.

[j] As the result of special investigation by the Director of the Mint a reduction of $135,000,000 was made in the estimate of gold coin in circulation on July 1, 1907, as compared with the basis of previous years.
