LETTER OF TRANSMITTAL.

DEPARTMENT OF COMMERCE,
BUREAU OF FOREIGN AND DOMESTIC COMMERCE,
Washington, 1923.

SIR: I have the honor to submit herewith for publication the forty-fifth issue of the Statistical Abstract of the United States. As in former years, this publication has been prepared in the research division.

Respectfully,

JULIUS KLEIN,
Director of Bureau.

To Hon. HERBERT HOOVER,
Secretary of Commerce.

EXPLANATORY NOTES.

The condensed statistics contained in this volume, unless otherwise stated in connection with the individual tables, represent, or are based upon, official figures collated and published under the various laws of the United States or those of other countries to which they may relate. The sources to which the various tables are credited will indicate where application should be made for additional details, with the exception that certain tables for which no credit appears are derived from regular reports of the Bureau of Foreign and Domestic Commerce, Department of Commerce, and that Table No. 454 is derived largely from corresponding data presented for shorter periods in previous tables.

General imports.—Tables Nos. 295 and 298 embrace imported articles entered at the customhouses for immediate consumption and imported articles entered for warehouse. The statements of *imports entered for consumption*, Tables Nos. 301 and 302, embrace imported articles entered for immediate consumption and imported articles withdrawn from warehouse for consumption. The statement of *general imports* and the statement of *imports entered for consumption* for any period should, therefore, differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term "entry for consumption" is the technical name of the import entry made at the customhouse and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer, and that the duties have been paid on the dutiable portion. Some of them may be afterwards exported.

Import value.—The value of imported merchandise as shown in the statistical tables up to and including May, 1921, represents the "actual market value or wholesale price thereof at the time of exportation to the United States, in the principal markets of the country from whence exported, including the value of all containers or coverings, whether holding liquids or solids, and all other costs, charges, and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States," as defined in section III, paragraph B of the tariff act of 1913.

Beginning with June, 1921, the import value represents either the actual foreign market value, as defined above, or "the export value, including any export tax imposed by the country of exportation" as defined in section 302 of the emergency tariff act of May 27, 1921, whichever value is higher.

Domestic exports.—Tables Nos. 294 and 299 exhibit the exports of domestic products or manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles and utensils made from imported metals, etc. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported. (Rev. Stat., 337, and act of April 29, 1902.)

Foreign exports.—Table No. 300, called "foreign exports" or "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported from "warehouse" is their import value. The value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Weights and measures.—The term "ton," as applied to weight, is specified "long" (2,240 pounds) or "short" (2,000 pounds). The term "ton," as applied to vessel measurement, is specified as "net," equal to 100 cubic feet of carrying capacity exclusive of deductions for space occupied by cabins, machinery, etc., or "gross," equal to 100 cubic feet of the entire carrying capacity inclusive of such space. "Dead-weight tonnage" is also applied to vessel measurement, and is intended to be a measure of cargo-carrying capacity. It is the difference between the displacement of the vessel when loaded and when light, in steaming condition, but without crew, stores, water, or fuel on board. The term "M feet" used in connection with the measure of lumber, etc., signifies 1,000 feet board measure, a "foot" of such measure being 1 foot long, 1 foot wide, and 1 inch or less in thickness. "Cubic feet" or "cords," as applied to the measurement of lumber, pulp wood, etc., signifies cubic contents. According to section 3249, Revised Statutes, "Proof spirits shall be held to be that alcoholic liquor which contains one-half its volume of alcohol of a specific gravity of 0.7939 at 60° Fahrenheit." The official gallon prescribed is one containing 231 cubic inches, or 58,372.2 grains, equal to 8.3389 pounds of distilled water at its maximum density, weighed in air of a temperature of 62° Fahrenheit and barometric pressure of 30 inches. The taxable gallon differs from the proof gallon by reason of the fact that in computing taxable gallons under section 3251, Revised Statutes, all fractional parts of a gallon less than one-tenth are excluded.

IRRIGATION AND DRAINAGE.

General note for irrigation tables from the United States Reclamation Service, Department of the Interior.—The figures given in these tables relate only to lands served in whole or in part by works controlled by this Service. In 1921 the area so served amounted to 2,228,750 acres (1,227,500 acres in the Reclamation Service projects proper, and 1,001,250 acres served by Reclamation Service works, usually a partial water supply through private canals under Warren Act contracts). Data are for calendar year (irrigation season) except on the Salt River project, Ariz., data are for corresponding "agricultural year," ended Sept. 30, 1921. Unless otherwise indicated, figures are restricted to irrigated areas covered by crop reports, excluding small areas cropped by dry farming on a few projects, the area served under Warren Act contracts, and the three Indian projects in Montana, the works for which were constructed by the Reclamation Service. All value figures are intended to show the value received by the farmer for his crops, whether sold on the farm or in town, with or without baling, boxing, etc. If fed by the farmer, the crop is given a value representing the average selling price on the farm.

¹ See general note on p. 19.

² Data are for calendar year (irrigation season), except in Salt River project where data are for corresponding "agricultural year," October, 1920, to September, 1921.

³ Area Reclamation Service was prepared to supply water.

⁴ Irrigated crops. Excludes small areas on few projects cropped by dry farming.

⁵ Data furnished by Salt River Valley Water Users' Association, which operated the project.

⁶ Includes 5,536 acres reported as vacant, 3,032 acres of "home tracts," and 2,862 acres within town sites, on which no crops were reported.

⁷ Data furnished by King Hill Irrigation District. The project was built under private auspices and is under reconstruction by the United States.

⁸ Data furnished by Minidoka Irrigation District, which operated the division.

⁹ Figures do not cover an additional area of 12,490 acres cropped by dry farming, producing crops worth \$142,300, or \$11.40 per acre.

¹⁰ Figures are for 208 irrigated farms, covering an irrigated acreage of 8,880, in addition to which there were irrigated in townsites 22 acres, and for miscellaneous purposes, 8 acres. In addition 4 units farmed "dry" reported 30 acres of alfalfa, \$120; 5 acres of oats, \$40; 10 acres of pasture, \$50; 60 acres of wheat, \$756.

¹¹ Figures are for 169 irrigated farms, all but 450 acres of which produced crops.

¹² Crop reports covered an additional area of 9,680 acres cropped by dry farming, producing crops worth \$80,600, or \$8.33 per acre.

¹³ For crops in full production, excluding 7,874 acres of wild-grass pasture and 3,170 acres otherwise not in full production. For all crops, \$28.83.

¹ A minus sign (—) denotes decrease. Per cent not shown when more than 1,000.

² Does not include cost of operation and maintenance for rice-growing districts in Gulf States; consequently figures for 1909 and 1919 are not comparable.

³ Not reported in 1909.

⁴ When water is pumped, cost of operation and maintenance includes cost of fuel and attendance.

¹ Data for drainage enterprises relate to operating enterprises only, comprising those which had completed their drainage works and those which had actually commenced construction prior to Jan. 1, 1920.

It is assumed that the acreage of unimproved land provided with artificial drainage is negligible.

No. 30.—DENSITY OF POPULATION PER SQUARE MILE AT EACH CENSUS, 1790 TO 1920: BY STATES.

[Source: Reports of the Bureau of the Census, Department of Commerce.]

[NOTE.—In computing density of population for the United States, the areas and population of Alaska, Hawaii, and Porto Rico in 1900 and 1910, of Alaska and Hawaii in 1890, and of Indian Territory in 1860, 1870, and 1880 are not considered. The area of Indian reservations, outside of Indian Territory, is included in the area of the States and Territories in which they are severally situated, and in that of the United States, although the population of these Indian reservations was not ascertained, and for this reason can not be considered in figuring density of population at the censuses prior to 1890.]

¹ Boundaries changed since 1910. Statistics for 1920 refer to postwar boundaries; for 1910 to pre-war boundaries.

² Persons reported in 1910 as of Polish mother tongue born in Germany (196,096), Austria (329,418), and Russia (418,376) have been deducted from the respective countries and combined as Poland for comparison with number reported in 1920 as born in Poland. Prior to 1910, persons reporting their birthplace as Poland were so tabulated.

³ Turkey in Asia included with Turkey in Europe prior to 1910.

⁴ Albania included with Turkey in Europe in 1910.

⁵ Includes "Europe, not specified" at each census and Danzig, Flume, and Saar Basin in 1920.

⁶ Newfoundland included with Canada prior to 1910.

⁷ Except possessions of the United States.

¹ Most of the figures of the table were furnished by the statisticians of the denominations and relate to 1921, though the month in which they were gathered varies. Figures for Churches of Christ and Pentecostal Churches of the Nazarene and for a few smaller bodies are from the Religious Census of 1916. Figures for other smaller bodies, for which official figures could not be obtained, are taken from the latest source available.

² Includes Free Baptist.

¹ Exclusive of Hawaii.

² Exclusive of stillbirths.

³ Census year ending May 31.

⁴ Increase of 194 square miles, as compared with the area stated by census of 1890, due to the reclamation of part of the Potomac River Flats in the District of Columbia and of part of Lake Tulare in California.

⁵ Net reduction of 289 square miles, as compared with the area stated by census of 1900, due to the drainage of lakes and swamps in Illinois and Indiana, to the building of the Roosevelt and Laguna Reservoirs, and to the overflow of the Colorado River into the Salton Sea in California.

⁶ Net reduction of 116 square miles as compared with area stated by census of 1910, due to irrigation projects.

¹ The extension of the quota law caused a revision of basic figures of population. Germany's quota was somewhat reduced and Poland's correspondingly increased through the partition of Upper Silesia. Separate quotas were established for areas known as Pinsk, Estonian, Lithuanian, Latvian, and Bessarabian regions, all of which territory was included with Russia in the quota allotment of 1921-22. A separate quota was given to Russian Armenia, and Turkish Armenia and the Smyrna region were merged with Turkey. Iceland and the Memel region, which were included with "Other Europe" last year, now have separate quota allotments. The quotas of New Zealand and Pacific Islands were merged and other minor changes made. The immigration quotas assigned to the various countries and regions listed above should not be regarded as having any political significance whatever, or as involving recognition of new Governments, or of new boundaries, or of transfers of territory, except as the United States Government has already made such recognition in a formal and official manner.

² Subject to possible slight revision due to pending cases in which additional admissions chargeable to the quotas of the fiscal year 1922 may occur.

³ Given up by Hungary and by Austria, and therefore can not be included in the quota of either of these countries.

⁴ Given up by Germany but not yet allotted to any other country.

⁵ Given up by Austria but not yet allotted to any other country.

⁶ The area bounded by the so-called (a) Curzon line, (b) treaty of Riga line, (c) Polish-Lithuanian neutral zone northwest of Vilna, and (d) eastern Galicia.

⁷ The land area bounded by (a) the Pruth and Dniester Rivers and the eastern boundary of Bukovina.

¹ A minus sign (—) denotes decrease. Per cent not shown when base is less 100.

² Population residing outside incorporated places having 2,500 inhabitants or over. The rate of increase in the rural population between the two censuses is affected somewhat by the fact that certain places classified as rural by 1910 had become urban by 1920. The population in 1910 of the territory classified as rural in 1920 was 48,779,082. For this territory, the increase in population between 1910 and 1920 was 5.4 per cent, which percentage indicates the rate of growth of the rural population, leaving out of consideration the changes in classification of territory.

³ Decrease in land area due to the building of the Pathfinder and Shoshone reservoirs in Wyoming and several reservoirs in connection with irrigation projects in Montana.

⁴ Less than one-tenth of 1 per cent decrease.

¹ Many of the figures for 1922 are preliminary and some of them are estimated. Totals represent the sum of the values here shown with the addition of certain estimates for values not yet available. See following notes.

² From both domestic and foreign ores.

³ From all sources. Values excluded from metallic totals as the values of the antimony contained in antimonial lead are in the antimonial lead values, and the remainder under "Unspecified."

⁴ Value not included in total value.

⁵ Product from domestic ores only.

⁶ Including ore used for fluxing.

⁷ Figures showing values not available.

⁸ Figures for 1922 not yet available.

⁹ Value included in total value of metallic products. Survey not at liberty to publish figures.

¹⁰ Figures not yet available; canvass being conducted by Bureau of Census; estimate of value included in total value of nonmetallic products.

¹¹ Includes brown coal and lignite, and anthracite mined elsewhere than in Pennsylvania.

¹² Canvass discontinued after 1915. Value of iron ore sold for paint included under "Unspecified."

¹³ Sublimed blue lead, sublimed white lead, leaded zinc oxide, and zinc oxide.

¹⁴ No canvass for 1922. Estimate of value included in total value of nonmetallic products.

¹⁵ In 1915 includes 59,189 tons and in 1920, 23,728 tons of stronger acid, not converted to 60° Baumé.

¹⁶ Canvass discontinued by the Survey after 1920. Figures for 1921 obtained through cooperation with Bureau of Census and represent production, the value having been partly estimated by the Survey to cover acid consumed by producer as well as that sold.

¹⁷ No information available for publication.

¹ Figures do not include refined or processed fats or oils.² Figures prior to 1919 include edible and inedible products.³ No data.⁴ Figures prior to 1919 represent total production of edible and inedible oil. As the edible oil is made from the inedible oil, there may be some duplication in these figures.⁵ Figures represent total production of crude oil only.

No. 163.—COTTON SEED AND COTTONSEED PRODUCTS: PRODUCTION AND MANUFACTURE, QUANTITIES AND VALUES, 1898 TO 1922.

[Source: Reports of the Bureau of the Census, Department of Commerce. In the preparation of this table a number of sources of information have been utilized, but it has been found impracticable to secure in all instances satisfactory data for the years indicated, and only an approximation to the facts is claimed. Statistics of the quantity of seed produced relate to the preceding crop year and the quantity manufactured and of cottonseed products to the year ending July 31.]

¹ The number of reporting concerns varies from month to month, but the Bureau of the Census states that they represent practically 100 per cent of the wool manufacturing establishments of the country. The total number of looms and spindles reported in the earlier years does not represent the totals for the country but only such as furnished reports. Assuming that these were a fair sample of all machines, they furnish a basis to calculate the proportion of active machinery each year. The 1913 figures were collected by the National Association of Wool Manufacturers.

No. 205.—WAGES AND HOURS OF LABOR (UNION): RELATIVE HOURS OF LABOR PER WEEK, RELATIVE RATES OF WAGES PER HOUR, AND RELATIVE RATES OF WAGES PER WEEK, COMPUTED FROM UNION SCALES, CALENDAR YEARS 1914 TO 1922.

[Source: Reports of the Bureau of Labor Statistics, Department of Labor. The figures are based on data obtained in the principal cities of the United States. The relative hours are percentages which indicate the change in the regular full-time working hours per week, account not being taken of loss of time from slack work or other causes. The relative wages are percentages which indicate the change in wages per hour and per full-time week. Hours and rates for 1913=100. The figures are based on the scale prevailing May 1, 1914 and 1915, and May 15, 1916, 1917, 1918, 1919, 1920, 1921, and 1922.]

¹ Data for years prior to 1890 are from Poor's Manual of Railroads and relate to Dec. 31 of previous year; data from 1890 to date are from reports of the Interstate Commerce Commission and relate to June 30, 1890 to 1916; subsequently to Dec. 31 of previous year. No mileage included for Alaska.

² After 1907 excludes mileage of switching and terminal companies not previously segregated.

³ Changes from preceding year are due principally to change from weight to space system, effective Nov. 1, 1916.

⁴ Decrease due to elimination of "lap" mileage.

⁵ Incomplete pending adjustment of sums due U. S. Railroad Administration.

⁶ Exclusive of \$1,027,145 transferred to civil service retirement and disability fund.

⁷ Unit miles of travel.

¹ The statistics are those of part of the operations of one company for the entire year and for the coast stations of this and the entire operations of the other companies until taken over by the Government.

² Includes 5,013 land messages sent over a leased wire by a wireless company doing land telegraphy also.

³ Less all expenses, including charges for depreciation.

⁴ Includes stocks, bonds, and sundries.

⁵ Includes reserves, cash investments, interest and taxes due and accrued, and sundries.

⁶ Number employed Sept. 16, 1912. Includes, in some cases, number of operators on shipboard who, in addition to wages, receive board and quarters.

⁷ Includes in two instances, number employed when stations were taken over by the United States Government, Apr. 6, 1917. One report gives number employed Dec. 31, 1917.

¹ Western Union figures for both land and cable business, except for "miles of single wire owned and leased" (see note 3), are included here, no adequate segregation of financial figures being obtainable.

² Exclusive of poleline wholly owned and used by railway companies, and of that owned by cable companies reporting separately.

³ Does not include 24,301 nautical miles of ocean cable operated by the Western Union Telegraph Co. in 1917, 22,816 nautical miles in 1912, and 5,729 nautical miles in 1907. Exclusive, also, of 344,110 miles of wire wholly owned and operated in 1917 by railway companies having annual operating revenues of \$1,000,000 or more; and in 1912 of 314,329 miles of wire reported by railway companies of all classes; and in 1917 of land wires of cable companies reporting separately.

⁴ Does not include land messages sent over its 207 miles of leased land wire by a wireless company in 1912 nor ocean cable messages, except those reported by the Western Union Telegraph Co., in 1917 and 1912.

⁵ Does not include offices of the ocean cable telegraph companies.

⁶ Includes receipts from leased wires, not required separately in 1917.

⁷ Less all expenses, including charges for depreciation; in 1917 does not include charges for sinking fund, these being a deduction from net income in new accounting forms.

⁸ Includes charges for depreciation which were not included in expenses in 1907, but not payments for use of leased lines.

⁹ Includes payments for use of leased lines.

¹⁰ Includes sinking fund and stock and bond discount.

¹¹ Includes assumed stock of subsidiaries to the amount of \$3,851,975 in 1917 and of \$1,946,592 in 1912.

¹² Includes floating debt and cash investments (for unincorporated companies).

¹³ Includes deferred noninterest-bearing obligations payable only on termination.

¹⁴ Number, for the most part, employed Dec. 31, 1912.

¹⁵ Number, for the most part, employed June 30, 1917.

¹ Does not include statistics for the ocean cable systems operated by the Western Union Telegraph Co., as no segregation could be obtained of the financial statistics for the cable business of this company. The number of nautical miles of ocean cable owned and leased by it was, in 1917, 24,301; in 1912, 22,816 miles; and in 1907, 5,729 miles. The number of ocean messages reported by this company for 1917 was 3,537,978; in 1912, 2,996,112; and, as estimated by it for 1907, 3,500,000.

² In addition there were 116 miles of pole line and 1,452 miles of single wire on land and under ground.

³ Includes payment for leased lines.

⁴ Includes sinking and other special funds and sundries for 1917 and 1912 and sundries only for 1907.

⁵ Includes floating debt.

⁶ Includes in 1917 interest and taxes, due and accrued, and also, in 1907, interest.

⁷ Number, for the most part, employed Dec. 31, 1912.

⁸ Number, for the most part, employed June 30, 1917.

¹ The census figures for the Bell System do not agree exactly with those contained in the annual reports of the directors of the company as given on the preceding page, because the former include certain affiliated and controlled companies that were not covered in the annual reports. The Bell System companies are located in 27 different States, and its local and long-distance service extends into all States. The miles of wire and number of telephones are the only features for which satisfactory comparison can be made between the Bell and other systems.

² Number for 1917 is that employed on Sept. 29, for 1912 on Sept. 16.

¹ The figures relating to the number of locomotives and cars as published have been adjusted to cover all operating roads each year, but the figures showing average tractive power of locomotives and average capacity of freight cars are as published in the Statistics of Railways. The fact that the same classes of roads have not been covered each year affects these averages only slightly.

No. 239.—RAILROAD FREIGHT CARS:¹ NUMBER AND AVERAGE CAPACITY OF EACH CLASS, ON JUNE 30, 1914, AND ON DEC. 31, 1916, 1918, 1920, AND 1921.

¹ Excludes returns for switching and terminal companies.

² Excludes returns for so-called small roads (having operating revenues below \$100,000 for the year) and returns for switching and terminal companies.

³ Excludes returns for roads having operating revenues below \$1,000,000 for the year and returns for switching and terminal companies.

⁴ Figures include an apportionment of unclassified tonnage.

⁵ Includes 25 per cent of the total mileage of revenue mixed trains.

⁶ For the years 1890 and 1895, 25 per cent of the mixed-train mileage was apportioned to passenger-train mileage and 75 per cent to freight-train mileage; but in computations for subsequent years the total mixed-train mileage was used both with passenger-train mileage and with freight-train mileage.

⁷ Includes 75 per cent of the total mileage of revenue mixed trains.

⁸ Includes a small amount of unclassified train mileage; also a small amount of special-train mileage not separately reported prior to 1909.

⁹ Includes a small amount of special-train mileage not separately reported prior to 1909.

¹ Statistics for 1922 not available. During the first quarter of the calendar year 1922, 6,872 revenue passengers and 12,414 tons of revenue freight were carried, an increase of 3 and 30 per cent, respectively, over the corresponding quarter of the previous year.

No. 250.—RAILROAD ACCIDENTS (STEAM ROADS): NUMBER OF EMPLOYEES, PASSENGERS, AND OTHER PERSONS KILLED, AND NUMBER INJURED, 1899 TO 1922.

[Sources: Years 1899 to 1910, statistical reports of the Interstate Commerce Commission; for subsequent years, accident bulletins of that commission compiled from monthly reports required under the act approved May 6, 1910. For various reasons, mainly the fact that returns were required under different acts, the statistics are not strictly comparable. Figures include nontrain (or industrial) accidents.]

¹ During the first six months of the year 1914 rates paid on grain, flour, and provisions were quite low as compared with previous years; the European war, however, shortly after the beginning of hostilities, created a tremendous demand for tonnage and forced rates to the highest level known to this generation of shippers. Complete statements of freight averages for 1914 to 1916 are therefore impossible, and for 1917, 1918, and 1919 no figures are available.

² Beginning with rate on sacked flour shipped to Amsterdam, figures relate to last nine months of 1920.

³ Birth rates converted from English money, \$4.429185, average exchange for 1922.

⁴ Rates for Liverpool may be applied to London and Glasgow.

⁵ Average for first eighteen weeks of 1922.

¹ Grain embraces wheat flour reduced to equivalent in wheat, corn, rye, oats, barley, malt, and peas.² Receipts at New York, Portland, Boston, Philadelphia, and Baltimore include shipments from the West to foreign countries through these ports on through bills of lading. Receipts at Portland via Montreal are duplications of receipts reported at Montreal. Receipts at Baltimore include flour ground by city millers, and therefore duplicate an equivalent quantity of wheat received in grain.³ No data.

¹ The figures of this table do not in most instances agree with those under corresponding heads in the table following, owing to the fact that the schedules of the tariff and the classifications of the Bureau of Foreign and Domestic Commerce do not fully coincide as to the articles included. See note 2, p. 468.

² Potatoes, dutiable under paragraph 581, and wheat and products, dutiable under paragraph 644, tariff act of 1913, are included, beginning with 1914.

¹See also prior table of "Merchandise imported into and exported from the United States and excess of imports or exports, by countries."

²The marked discrepancy between the United States figures of exports to the Philippine Islands prior to 1911 and the Philippine figures of imports from the United States in corresponding periods is due chiefly to the fact that the Philippine import figures prior to that year omit merchandise imported free of duty for the use of the Government or for use in construction and equipment of railways in the islands, under the act of Feb. 6, 1905, while the United States returns omit only Government supplies carried by Government vessels.

CONSUMPTION ESTIMATES.

(In the preparation of the tables which follow no attempt, as a rule, has been made to consider stocks carried over from year to year, nor in any of them has consideration been given to the separation of industrial consumption, as illustrated by distilled spirits used in the manufacture of drugs and chemicals to be consumed at home or abroad from actual consumption, as illustrated by such spirits consumed at home as beverages. It is clear that if both forms are treated as "consumption" double consumption is involved.)

¹ The production is of the calendar year preceding the fiscal year, the figures being those of the U. S. Department of Agriculture.

² Including corn meal reduced to corn at rate of 4 bushels to barrel.

³ The figures include for years prior to 1910 net imports of corn and imports of corn meal for consumption; for 1910 and subsequent years all figures represent imports for consumption. Small amounts of burnt or roasted corn in 1898, 1899, and 1900 are omitted.

⁴ Average for the period.

⁵ Data relating to United States as a whole. Production (if any) for noncontiguous territory is lacking.

¹The loss in weight of sugar in the process of refining ranges from 2 to 7 per cent. The figures in this table relate to sugar in various degrees of refinement; therefore it is impossible to make any accurate distinction between the raw and refined sugar, or satisfactorily reduce the former to the latter.

²Production is of the season preceding the fiscal year.

³Figures relate to continental United States after 1900.

⁴Average for the period. ⁵Figures of production and those based thereon are preliminary.

¹ The production statistics relate, when possible, to the year of growth, but when figures for the growth year are wanting, a commercial crop which represents the trade movement is taken. The statistics of production have been compiled from publications of the United States Department of Agriculture for 1870 to 1898. Census figures have, however, been used when available, including those for 1899 to date. For 1870 to 1913, inclusive, import and export statistics relate to the 12 months beginning with Sept. 1; and for 1914 to date to the 12 months beginning with Aug. 1.

² For 1910 to date the price per pound shown for upland cotton represents the average price received for cotton by growers as computed by the Department of Agriculture; for 1902-1909 it is the average price of the average grade marketed in New Orleans prior to Apr. 1 of the following year; for 1890-1901, inclusive, it is the average price of middling cotton on the New Orleans Cotton Exchange; and for 1870-1889, inclusive, it is taken from reports of the United States Department of Agriculture.

³ Statistics of consumption for 1883-1894, inclusive, have been compiled from publications of the United States Department of Agriculture, and those for 1895-1903, inclusive, from the reports of Latham, Alexander & Co. Census figures are used for 1904 to date as well as for other years when available. The statistics, relate to the 12 months during which the crop of the specified year was chiefly marketed, and not to the calendar year specified.

⁴ The figures represent percentage of growth year stated in the stub exported in the following commercial cotton year.

⁵ Average for the period.

⁶ Statistics for August, 1914, are included in both 1914 and 1915.

¹ The slaughter each year is accurate so far as the number of animals slaughtered under United States inspection is concerned. Ratios were established for the remaining slaughter at the census of 1909, and these have been changed since the publication of certain data of the last census, covering the year 1919, which recently became available. The annual ratios of cattle and calf slaughter are estimated by Dr. Wright of the Animal Husbandry Division, Department of Agriculture. The data throughout are computed from a dressed-weight basis. The edible offal (liver, pluck, etc.) is not included in the dressed weights and so is disregarded. In the aggregate it represents a large quantity of edible material, but it is more than offset by the bones and waste trimmings of the dressed carcasses. The figures in the table, therefore, represent approximately actual meat. Lard is estimated separately from the dressed weights of swine. Figures of consumption include differences between quantities in storage at beginning and end of year.

² Average for the period.

³ Subsequent to 1917, figures include differences between quantities in storage at beginning and end of year.

⁴ Slaughter and consumption figures include small quantities of goat meat not given separately.

¹ Studies involved in this table were begun in 1909 but were not completed until 1913, a period of 12 months being made the basis for each State. The material is mostly lumber but includes small quantities of veneer, bolts, and dimension stock. Lath, shingles, cooperage, veneer pulp, distillation poles, and ties industries are not included. For further explanation see Bulletin 605, referred to in the credit line above.

NOTE BY MESSRS. MAUGER & AVERY.—This table exhibits in a concise form the prices of the three grades of a standard domestic fleece wool in the seaboard markets at the beginning of each quarter. In its present shape it is deemed to be intelligible to all interested in wool. In the special features of character and condition, "washed Ohio fleece wool" is less subject to variation than any other description, and thus is more a basis of value than any other class. Wool, owing to its wide variety, difference in character and condition, and liability to shrink in cleaning, is precluded from speculative operations which apply to products which may be dealt in as "futures." For these reasons the prices of wool are not liable to the same changes as cotton, wheat, etc.

¹ The term "anthracite," when standing alone, signifies Pennsylvania anthracite.

² Per ton of 2,240 pounds.

³ Zoned out by Fuel Administration.

⁴ Arkansas anthracite.

⁵ Colorado anthracite.

⁶ New Mexico anthracite.

⁷ Price per 10-barrel lots (1,800 pounds).

⁸ Per 25-bushel lots (1,900 pounds).

⁹ 50 cents per ton additional is charged for "binning." Most customers require binning or basketing the coal into the cellar.

¹⁰ At yard; delivery, \$0.50 to \$2, according to distance.

¹¹ Prices in Zone A. The cartage charge in Zone A was \$1.85 until in July, 1921, when it was \$1.55. Beginning with January, 1922, the cartage charge in Zone A has been \$1.75. These charges have been included in the averages.

No. 348.—INDEX NUMBERS OF WHOLESALE PRICES (REVISED) AS COMPILED BY THE BUREAU OF LABOR STATISTICS: BY GROUPS, 1890 TO 1922, AND BY MONTHS, 1918 TO 1922.

[The number of commodities on which the wholesale price index number is based varied from 192 in 1890 to 404 in 1922. In computing the new index the price of each commodity is weighted by multiplying it by the estimated quantity of that article marketed in the census year 1919. The number was revised in April, 1922, by the addition of a number of new articles; a regrouping of commodities, so as to include articles properly falling in more than one group in each group, but only once in all commodities, and by the use of 1919 census data for weighting purposes in place of the 1909 census data formerly employed. For detailed explanation and more complete monthly data see Monthly Labor Review for July and September, 1922, and annual Bulletin 320. Base: 1913 average=100.]

¹ The form of circulation statement was revised as of July 1, 1922, so as to exclude from money in circulation all forms of money held by the Federal reserve agents and Federal reserve banks whether as reserve against Federal reserve notes or otherwise. This change did not affect figures for money in circulation prior to the establishment of the Federal reserve system. For the sake of comparability the figures for 1915 to 1922, inclusive, have been compiled on this statement in the same manner as those of July 1, 1922.

² The amount of money held in trust against gold and silver certificates and Treasury notes of 1890 should be deducted from these totals before combining them with total money outside of the Treasury to arrive at the stock of money in the United States.

³ Revised figures: See footnote 1 on p. 513.

¹ Figures for the stock of money in the country from 1861 to 1878, inclusive, have been revised to include all gold in the Treasury; gold coin in the vaults of banks and in circulation; the monetary stock of silver; and all United States currency, including one and two year notes and compound interest notes, as published in previous annual reports of the Secretary of the Treasury; from 1919 to 1921, inclusive, to include gold bullion and foreign gold coin held by the Federal reserve banks. This table has been compiled on the basis of revised figures for June 30 of each year and therefore differs slightly from the monthly circulation statements.

² Does not include gold bullion and foreign coin outside of the vaults of the Treasury.

³ There has been no fractional currency in circulation since 1878.

² Nov. 16, 1914, to Dec. 31, 1915.

³ Commodity paper rates for bills maturing within 30 days, 3½ per cent; 31 to 60 days, 4 per cent; 61 to 90 days, 4½ per cent.

⁴ Oct. 20, 1917, rate of 3½ per cent for commodity paper maturing within 60 days and 4 per cent for paper maturing after 60 days but within 90 days.

NOTE 1.—In March, 1917, the Federal Reserve Board ruled that when the 60-day trade acceptance rate was higher than the 15-day commercial paper rate, trade acceptances maturing within 15 days were to be taken at the lower rate.

NOTE 2.—Rates on paper secured by War Finance Corporation bonds, established by all Federal reserve banks between Apr. 4 and 11, 1919, at 1 per cent higher than on commercial paper of corresponding maturities, were automatically discontinued effective Apr. 1, 1920, coincident with the maturity of all outstanding War Finance Corporation bonds.

¹ The internal-revenue receipts are based on covering warrants issued therefor, and differ from amounts reported to the Commissioner of Internal Revenue by collectors.

² Based on warrants issued during the year.

³ The cost of collecting the internal revenue embraces the following items: Salaries and expenses of the Internal Revenue Service, including collectors, deputy collectors, clerks, etc., and including expenses incident to enforcing the provisions of law taxing oleomargarine; salaries and expenses of revenue agents, surveyors of distilleries, gaugers, storekeepers, and miscellaneous expenses; paper for internal-revenue stamps, expenses of detecting and punishing violations of internal-revenue laws, and expenses of collecting the corporation tax.

⁴ The expenses of collecting the revenue from customs includes all sums drawn from the appropriation made by Congress for that purpose. The money is expended for salaries, rents, labor in weighing, gauging, and measuring imported merchandise, revenue boatmen, repairs, and other expenses incident to rented buildings, stationery, and the traveling expenses of special agents, but does not include disbursements for revenue cutters, fuel, lights, water, furniture, janitors, etc., for buildings owned by the Government, nor disbursements for erecting new buildings, all of which are paid for from specific appropriations made for those purposes. The expenses of collecting internal and customs revenue do not include the disbursements for salaries, etc., incident to auditing these accounts in the office of the Auditor for the Treasury Department.

⁵ For itemized internal-revenue collections, see following tables.

¹ See footnote 1 on p. 588.

² Includes \$35,698,400 additional compensation, Postal Service.

³ Includes \$14,000,000 for deficit under Federal control of telegraph and telephone systems.

⁴ Includes \$11,053,081.92 certified claims.

⁵ See footnote 2 on p. 588.

⁶ Includes \$125,000,000 of accumulated interest on war-saving certificates, series of 1918, to be paid during the fiscal year 1923 though properly allocable to the full five years of their life and not simply to the fiscal year 1923.

⁷ The sinking fund created by the act of Feb. 25, 1862, was repealed by the act of Mar. 3, 1919 (40 Stat., p. 1312, sec. 6). The act of Mar. 3, 1919, created a cumulative sinking fund beginning with the fiscal year 1921.

⁸ Definite amounts appropriated by Congress, which are included in this column as appropriations under the several departments and independent establishments.

¹ Figures for 1873 to 1885, inclusive, are taken from "Statement of Receipts and Expenditures of the Government from 1855 to 1885 and Principal of Public Debt from 1791 to 1885," compiled from the official records of the Register's office. Later figures are taken from the monthly debt statements and revised figures published in the annual reports of the Secretary of the Treasury.

² Exclusive of bonds issued to the Pacific railways (provision having been made by law to secure the Treasury against both principal and interest) and the Navy pension fund (which was in no sense a debt, the principal being the property of the United States).

³ Includes old demand notes; United States notes, less the amount of the gold reserve since 1900; postal currency and fractional currency less the amounts officially estimated to have been destroyed; and also the redemption fund held by the Treasury to retire national bank notes of national banks failed, in liquidation, and reducing circulation, which prior to 1890 was not included in the published debt statements. Does not include gold, silver, or currency certificates or Treasury notes of 1890 for redemption of which an exact equivalent of the respective kinds of money or bullion was held in the Treasury.

¹ There is considerable variation in the dates of original reports by the various States, but these relate mainly to the early part of 1922, although a few extend back as far as 1921, or in a few instances to 1920. "Education" includes universities, public school systems (cost of buildings and maintenance). "Welfare institutions" includes special and general hospitals, insane asylums, penal institutions and reformatory schools. "Agricultural aid" includes rural credits, State Bank of North Dakota, agricultural experiment stations, forestry, etc. "Highways" includes bridges and grade crossing elimination. "Other improvements" includes physical improvements other than highways, waterways or buildings. "Other military purposes" includes armories, insurrection costs and old war debts. "Funding operations" includes refunding operations. "Miscellaneous" includes debts for unspecified purposes and purposes not otherwise classified.

² Outstanding warrants (not bonded indebtedness).

¹ Includes clerks and carriers at classified post offices, rural carriers, and fourth-class postmasters.

² The large increase in field service figures for 1913 is due to the inclusion of navy-yard artisans' positions to the number of about 16,000 in the competitive classified service.

³ 11,635 fourth-class postmasters, appointed in 1914 and 18,238 in 1915, under the Executive order of May 7, 1913, requiring examinations at offices whose incumbents have not been appointed under the regulations are not included in this table.

¹The figures relate to continental United States.

²For other than census years prior to 1890 the figures represent estimates of the Treasury Department; subsequently, for all years, estimates of the Bureau of the Census.

³The figures are based upon the land area of continental United States and upon population as given in the preceding column.

⁴True valuation of real and personal property; the figures are those of the Bureau of the Census, Department of Commerce, relate to continental United States, and cover census years.

⁵From 1800 to 1850 figures represent outstanding principal of the public debt Jan. 1; subsequently, principal of debt exclusive of gold, silver, and currency certificates and Treasury notes of 1890.

⁶1800 to 1855, outstanding principal of the public debt Jan. 1.

⁷The form of circulation statement was revised as of July 1, 1922, so as to exclude from money in circulation all forms of money held by the Federal reserve agents and Federal reserve banks whether as reserve against Federal reserve notes or otherwise. This change did not affect figures for money in circulation prior to the establishment of the Federal reserve system.

* Statistics of national banks are as of reports nearest to June 30 of each year. Those of other banks combine reports of various dates within the year.

¹ Postal savings are not included.

² From 1896 to 1908, inclusive, includes Illinois State banks having savings departments. Returns from the banking departments of several States include stock savings banks with commercial banks. It was estimated for a recent year that 300 stock savings banks with \$15,000 depositors and \$250,000,000 deposits were included with the figures furnished by the State banking departments for State banks. This estimate included the so-called stock savings banks of Michigan.

³ Includes all private banks from 1875 to 1882; from 1887 to date includes only those voluntarily reporting, estimated at one-fourth of total private banks.

⁴ Based on total imports prior to 1896; subsequently on imports for consumption.

* Fiscal years to and including 1918; subsequently, calendar years.

† Fiscal years.

‡ Exclusive of bunker or fuel coal laden on vessels in the foreign trade.

* Gold and silver can not be separately stated in domestic exports prior to 1864, but it is probable that the greater portion of the exports was gold, under which head the exports in question are included. Gold and silver contained in ore are included under gold and silver since 1894.

* 1821; no complete data for 1820 or earlier years.

¹ The statistics since 1913 represent the commerce of the districts named in the boxhead, as rearranged July 1, 1913. The former limits in almost all cases were more restricted, and the statistics are accordingly not strictly comparable. Prior to 1914 the statistics given in this table for Massachusetts and Maryland were returned as for the (former) districts of Boston and Baltimore, respectively.

¹ Prior to 1875 the customs district of Texas.² The statistics since 1913 represent the commerce of the districts named in the boxhead as re-arranged July 1, 1913. The former limits in almost all cases were more restricted, and the statistics are accordingly not strictly comparable. Prior to 1914, the statistics given in this table for Buffalo and Michigan were returned as for the (former) districts of Buffalo Creek and Detroit, respectively.

¹ The figures are those of the Bureau of the Census, cover census years, and relate to continental United States.

² The item "live stock," which forms a part of the total value, includes for 1850, 1860, and 1870 only reported value of live stock on farms; for 1880 and 1890, estimates for value of range animals; and for 1900 and 1910, value of live stock on both farms and ranges.

³ Includes mules.

⁴ Included with horses.

⁵ Census figures for the previous year.

⁶ Gold values being 80 per cent of currency values reported.

*Calendar years.

† The production statistics (those for cotton being exclusive of linters) relate, when possible, to the year of growth, but, when figures for the growth year are wanting, a commercial crop which represents the trade movement is taken. The statistics of production have been compiled from publications of the United States Department of Agriculture for 1858 to 1898.

‡ From 1904 to 1914, inclusive, the figures represent consumption. Those for 1911 and subsequent years do not include imported leaf aluminum and miscellaneous manufactures of aluminum. After 1914 figures represent value of production.

¹ Cleared rice; 1800 to 1903, commercial movement, as given by Dan Talmage's Sons Co.; 1904 to date, as reported by the Department of Agriculture.

*Fiscal years to and including 1916; subsequently, calendar years.

¹Exclusive of fast freight line service.

²Overvalued by reason of depreciation of Brazilian paper milreis.

³Information for 1901 and 1902 relative to commerce between continental United States and noncontiguous customs districts in coffee and tea is somewhat fragmentary.

⁴Includes an estimate for certain roads, as their records for this item were destroyed in the San Francisco fire of April, 1906.

⁵Figures for railroads exclude switching and terminal companies not segregated prior to 1908; also, except for "miles in operation," the mileage of so-called small roads having operating revenues below \$100,000 for the year, for 1913 to 1916, and below \$1,000,000, for 1917 to 1921.

*School years.

¹ Figures for the years 1873-1882, inclusive, are for the calendar year preceding fiscal year; prior to 1920 the figures include technological instead of professional schools.² Figures until 1889 include nonresident graduate students; figures for 1889 and later years are exclusive of nonresident graduate students.³ Figures are not comparative. They relate to libraries of the following sizes: 1875 and 1885, 300 volumes and over; 1891, 1896, 1900, and 1903, 1,000 volumes and over; 1903 and 1913, 5,000 volumes and over. In 1903, 3,342 libraries with more than 999 and less than 5,000 volumes reported with 7,278,378 volumes, and in 1913 2,188 such libraries with 5,503,500 volumes.⁴ Figures from 1810 to 1860, inclusive, from census of 1880.

No. 457.—MONETARY SYSTEMS AND APPROXIMATE STOCKS OF MONEY, IN THE AGGREGATE AND PER CAPITA, IN THE
PRINCIPAL COUNTRIES OF THE WORLD, DEC. 31, 1920 AND 1921.¹

[Source: Director of the Mint, Treasury Department. The following compilations have been made from such data as are available, avowedly incomplete. The amount of gold and silver in circulation in many countries is not obtainable, and in some countries that held by private banks can not be given. For the United States the figures given cover all domestic gold and silver coined but only such bullion and foreign coin as owned by the Government and Federal reserve banks. All foreign coin which comes into possession of the Government is converted to bullion.]

¹ Figures include a considerable number of vessels not completed. Vessels trading on the Caspian Sea are not included. In the absence of satisfactory information, the records of most sailing vessels belonging to Greece, Turkey, and southern Russia are omitted.

² Sailing vessels fitted with auxiliary power are included in figures shown for steamers.

³ Figures include reinforced concrete vessels.

⁴ Figures for Japan do not include sailing vessels.

⁵ Figures do not include wooden vessels trading on the Great Lakes.

⁶ Figures include all vessels without record of flag, owing to no definite information having been received.
