LETTER OF SUBMITTAL

DEPARTMENT OF COMMERCE,
BUREAU OF FOREIGN AND DOMESTIC COMMERCE,
Washington, June 29, 1928.

SIR: I have the honor to submit herewith for publication the fiftieth annual issue of the Statistical Abstract of the United States. As in previous years, this publication has been prepared in the Division of Statistical Research, of which E. Dana Durand is chief and Lawrence B. Mann assistant chief. It represents, however, a digest of data collected by all statistical agencies of the National Government, as well as those of a considerable number of private agencies and one or two States. Many of these offices and agencies have been of great assistance in furnishing advance data and also in the actual preparation of the tables used in the Abstract. Special mention in this connection is due the following offices of the Federal Government: The Bureau of the Census, the Bureau of Fisheries, and the Bureau of Mines of the Department of Commerce; the Bureau of Agricultural Economics and the Weather Bureau of the Department of Agriculture; the Bureau of Immigration and the Bureau of Labor Statistics of the Department of Labor; the Bureau of Education of the Department of the Interior; the Federal Board for Vocational Education; the Statistical Division of the Income Tax Unit and the Federal Farm Loan Bureau of the Treasury Department; the Veterans' Bureau; the Interstate Commerce Commission; the United States Shipping Board; and the Division of Analysis and Research of the Federal Reserve Board. Valuable aid has also been given by the Bureau of Railway Economics, Washington; the New York Produce Exchange; the Spectator Co., New York; Dun's Review, New York; and the Bureau of Canals, State of New York.

Owing to the publication by the department of the Commerce Yearbook for Foreign Countries, tables dealing with foreign statistics are, for the most part, omitted.

Respectfully,

JULIUS KLEIN,
Director of Bureau.

To Hon. HERBERT HOOVER,
Secretary of Commerce.

No. 12.—DENSITY OF POPULATION PER SQUARE MILE, BY STATES

[NOTE.—In computing density for the United States the areas and population of Alaska, Hawaii, and Porto Rico at all censuses are not considered. The population of continental United States has been divided by the total land area, although it included at each census some unorganized territory which was not canvassed by the enumerators. For each State or Territory the population as returned at a given census has been divided by the land area in square miles of the State or Territory as constituted at the time that census was taken. The areas of Indian reservations, outside of Indian Territory, are included in the areas of the several States and Territories, although the population was not ascertained and can not be considered in figuring density of population prior to 1890. The census of 1870 in the Southern States is considered incomplete. Population density in 1920 of Alaska, Hawaii, and Porto Rico, based on gross area, and not land area, was as follows: Alaska, 0.1; Hawaii, 39.7; Porto Rico, 378.4]

¹ A minus sign (-) denotes decrease.

² Boundaries changed since 1910. Statistics for 1920 relate to postwar boundaries; for 1910, to prewar boundaries.

³ Persons reported in 1910 as of Polish mother tongue born in Germany (190,096), Austria (329,418), and Russia (418,370) have been deducted from the respective countries and combined as Poland for comparison with number reported in 1920 as born in Poland. Though Poland before 1919 was divided among Russia, Germany, and Austria, the censuses of 1870 to 1900 listed it as a country of birth.

⁴ Created since 1910.

⁵ Included as part of Yugoslavia in 1920.

⁶ Turkey in Asia included with Turkey in Europe prior to 1910.

⁷ Albania included with Turkey in Europe in 1910 and earlier years.

⁸ Includes "Europe, not specified" at each census, and Danzig, Trieste, and Saar Basin in 1920.

⁹ Newfoundland included with Canada prior to 1910.

¹⁰ Except possessions of the United States.

No. 37.—URBAN AND RURAL POPULATION: MARITAL CONDITION OF PERSONS 15 YEARS OF AGE AND OVER, BY MAJOR CLASSES, 1920, WITH COMPARATIVE TOTALS FOR 1910, CONTINENTAL UNITED STATES

[NOTE.—The number divorced is considered to be understated. The small number unknown is omitted. The method of segregating the urban and rural population in certain New England States has been changed since 1910 (see headnote, Table 36), so that the absolute numbers for marital condition in 1910 are not strictly comparable; the percentages, however, would not be affected by the small change.]

¹ Excludes Duluth village (population 2,645) which was set apart by act of legislature in 1877, but which again became part of the city in 1887.

² Population of town, including city; town and city not returned separately.

³ Population shown is for New York City as now constituted.

Total population for 1910, including South Omaha, annexed since 1910, 150,355; native white of native parentage, 61,416; native white of foreign or mixed parentage, 45,023; foreign-born white, 34,902; Negro, 5,143; other colored, 271.

⁴ Population shown is for District of Columbia, with which the city is now coextensive.

No. 41.—PERSONS ENGAGED IN GAINFUL OCCUPATIONS: By SEX AND AGE, CONTINENTAL UNITED STATES

[NOTE.—Owing to change in the date of enumeration from April to January and to changes in the wording of the instructions, the number of persons, especially women and children, reported as farm laborers was much less in 1920 than would have been the case if the 1910 method had been followed. The incomparability in this large occupation affects materially the figures for the agricultural group as a whole and even the aggregate for all occupations combined. For discussion see Census of 1920, Vol. IV, pp. 12 to 14. All data in Tables 41 to 45 relate to Continental United States.]

GENERAL NOTE.—The figures contained in this section can not be taken as an absolute index of conditions. The provisions for the care of these classes are so divergent in different States, and in the same State at different times, that the enumeration of persons in certain institutions may be far from reflecting the true differences or changes in the relative number of such persons in the population at large. Moreover, the methods of enumeration have been changed from time to time. The difficulty of formulating an adequate definition, the large element of personal judgment of the enumerator, and reluctance on the part of individuals to admit defects, all affect the accuracy of the data.]

No. 79.—DEATHS:¹ RATE PER 1,000 POPULATION, BY SEX AND BY AGE GROUPS

(NOTE.—It is necessary for accurate comparison of different years to consider only States having registration throughout the period compared. The rates for the registration States of 1900 are based on the population as enumerated Jan. 1, 1920, and the estimated midyear population of 1902, 1913, 1923, and 1926; the rates for the registration States of 1920 are based on the midyear estimates. For definition of crude and adjusted rates see headnote to Table 83.)

No. 83.—DEATHS: RATES PER 1,000 ESTIMATED POPULATION, BY REGISTRATION CITIES OF 100,000 OR MORE INHABITANTS

[NOTE.—Adjusted rates make allowances for the sex and age distribution of the population, while crude rates do not, being obtained simply by dividing the number of deaths by the total population. The former are more significant. Adjusted rates subsequent to 1920 may be computed by applying to the crude rates, based on estimated population, the ratio of the adjusted rate to the crude rate in 1920, based on enumerated population. This method, as we get further away from the census of 1920, may become less and less reliable owing to changes which may have taken place in the age and sex distribution of the population. Stillbirths are excluded.]

4. IMMIGRATION AND EMIGRATION

IN COMPILING IMMIGRATION STATISTICS FOR THE UNITED STATES, ALASKA, HAWAII, AND PORTO RICO, BEGINNING 1904, 1901, 1902, RESPECTIVELY, WERE INCLUDED. IN PRIOR YEARS THE TRANSFER OF POPULATION BETWEEN THEM AND THE UNITED STATES WAS CONSIDERED IMMIGRATION.

No. 96.—IMMIGRATION: 1821 TO 1927

[NOTE.—For 1821 to 1855 the figures represent alien passengers arriving; for 1856 to 1903, immigrants arriving; for 1904 to 1906, aliens admitted; for 1907 to date, immigrant aliens admitted. Data are for fiscal years ended June 30 except as noted; for periods they are totals, not annual averages]

[NOTE.—For 1831 to 1867 figures represent alien passengers arriving; for 1868 to 1903, immigrants arriving; for 1904 to 1906, aliens admitted; thereafter, immigrant aliens admitted. Owing to changes in the lists of countries separately reported and to changes in boundaries, data for certain countries are not comparable throughout. For immigration since 1920, rendered incomparable in many cases by changes in boundaries, see Table 102. No. 107.—IMMIGRATION UNDER THE PER CENTUM LIMIT LAW: BY NATIONALITY, YEARS ENDED JUNE 30

[NOTE.—Immigration statistics under the per centum limit law are not comparable with statistics in other tables, as both immigrant and nonimmigrant aliens may appear in quota law statistics, or aliens of both classes may not be counted against quotas at all, as shown by Table 108. Changes in quotas between 1923 and 1924 were necessitated by changes in boundaries and other adjustments.]

No. 117.—PUBLIC ELEMENTARY AND SECONDARY SCHOOLS: NUMBER AND SALARY OF TEACHERS

[NOTE.—Number of teachers includes some superintendents, principals, and supervisors, as some States do not report them separately. Average salary refers in 1900 to annual salary of teachers and supervising officers in cities of 8,000 or over; in 1910, to monthly salary of teachers. Both total salaries and annual average salary in 1926 refer to salaries of teachers, supervisors, and principals, the latter being based on number of teaching positions plus number of supervisors and principals.]

No. 118.—PUBLIC HIGH SCHOOLS AND PRIVATE HIGH SCHOOLS AND ACADEMIES: NUMBER OF TEACHERS AND PUPILS, 1925-26

[NOTE.—Data for public high schools are compiled from reports from the schools and include seventh and eighth grades in junior high; see also headnote, Table 114. Data for teachers and pupils in private high schools and academies are as furnished by reporting schools supplemented by reports from the State departments of education and information furnished by the National Catholic Welfare Association; they are therefore more complete than figures published for prior years]

¹ In the adjustment of this grant the road was treated as an entirety and without reference to the State line. Hence Alabama has had approved to her more and Mississippi less than they would appear to be entitled to in proportion to the length of road in the respective States.

² Includes 35,685 acres of the Chicago, Rock Island & Pacific Rr.; 109,757 acres of the Cedar Rapids & Missouri River R. R.; and 77,535 acres of the Dubuque & Sioux City R. R., situated in the old Des Moines River grant of Aug. 8, 1846, which should be deducted.

³ Declared to be one grant.

⁴ See Minnesota for original grants.

⁵ Leavenworth, Lawrence & Galveston includes 186,937 acres and Missouri, Kansas & Texas 270,971 acres in the Osage ceded reservation which are to be deducted under decision of the Supreme Court.

¹ Includes Philippine Scouts beginning with 1902. Figures for 1919 to 1926, inclusive, include in most cases World War emergency personnel still in service. All emergency enlisted men still in service were discharged on July 2, 1921. On Nov. 11, 1926, the last emergency (World War nonregular) officer who for several years had been undergoing treatment for physical reconstruction, was discharged, thereby completing the demobilization of the World War Army. Retired personnel on active duty are not included.

² State militia prior to act of June 3, 1916.

³ Figures for 1900 and 1901 are "U. S. Volunteers of the Philippine Insurrection period; for other years Regular Army Reserve, Officers' Reserve Corps, Enlisted Reserve Corps, and the "National Army" of the World War period, as noted.

⁴ U. S. Volunteers.

⁵ Figures on officers and enlisted men not available.

⁶ Regular Army Reserve. The Regular Army Reserve was abolished by act of June 4, 1920.

⁷ Includes National Guard personnel in Federal service.

⁸ Estimate.

⁹ Officers' Reserve Corps.

¹⁰ Includes Regular Army Reserve, 8,382; Enlisted Reserve Corps, 35,000 (estimate).

¹¹ Subject to revision.

¹² Includes Officers' Reserve Corps, 86,262; National Army, 49,118 (estimate).

¹³ Estimated enlisted strength of the National Army. Practically all members of the Regular Army Reserve and the Enlisted Reserve Corps had, by this date, been assigned to duty with Regular Army, National Guard, and National Army organizations.

¹⁴ Estimates only. Under orders of the Secretary of War all components had been merged into one army known as "The United States Army."

¹⁵ Beginning with 1919, figures for commissioned officers include warrant officers in the following numbers: 1919, 37; 1920, 68; 1921, 1,159; 1922, 1,151; 1923, 1,085; 1924, 1,063; 1925, 1,023; 1926, 1,325; 1927, 1,262.

¹⁶ Enlisted Reserve Corps.

¹⁷ Beginning with 1924, figures for commissioned officers include warrant officers in the following numbers: 1924, 87; 1925, 160; 1926, 162; 1927, 182.

No. 158.—VETERANS' INSURANCE AND COMPENSATION: DEATH AND DISABILITY AWARDS

[NOTE.—Compensation for death and disability due to war service is paid automatically under various laws, but in a large majority of death and permanent total-disability cases, additional compensation is paid to those participating in the Government life-insurance system. Term insurance is a temporary form of insurance designed to cover war hazards. The right to reinstate and convert term insurance into permanent Government life insurance (converted insurance) expired by law July 2, 1927.]

¹ Includes clerks and carriers at classified post offices, rural carriers, and fourth-class postmasters.

² At close of year or period; approximated.

³ The large increase in field service figures for 1913 is due to the inclusion of navy-yard artisans' positions to the number of about 16,000 in the competitive classified service.

⁴ 11,635 fourth-class postmasters, appointed in 1914 and 18,238 in 1915, under the Executive order of May 7, 1913, requiring examinations at offices whose incumbents have not been appointed under the regulations, are not included in this table.

⁵ Excluding 3 examinations not yet rated.

¹ Figures do not include votes cast for names not appearing on any of the electoral tickets specified in the table. In 1924 votes by parties other than those shown above were as follows: Workers, 36,386 votes (cast in 13 States); American, 23,967 (7 States); Commonwealth Land, 1,262 votes (5 States); Industrialist, 639 votes (1 State).

² Democrat-Populist.

³ Socialist-Labor.

⁴ Socialist and Socialist-Labor.

⁵ Socialist-Labor only. Practically all of the Socialist vote is included in votes shown in next column for La Follette and Wheeler, official candidates of the Socialist party as well as the Independent Progressive.

9. NATIONAL GOVERNMENT FINANCES

No. 174.—RECEIPTS AND EXPENDITURES OF THE GOVERNMENT

[NOTE.—In thousands of dollars. Figures are on the basis of warrants issued (net) and expenditures include unexpended balances to the credit of disbursing officers at the end of the year but not expenditures made from unexpended balances of the previous year. On this account and because of certain adjustments, principally in the cash receipts credited directly against expenditures, figures on a warrant basis may differ from those on a cash basis. Under normal conditions, disbursing officers' balances fluctuate very little and other adjustments are small, but during the war period and during the liquidation of war corporations, etc., the differences between the figures on the two bases may be marked (for adjustments in 1926 and 1927, see pp. 167 and 171). Figures do not include postal revenues and expenditures except surpluses or deficiencies]

¹ Up to 1920, inclusive, civil expenditures under War and Navy Departments at Washington are included under the column Civil and Miscellaneous; thereafter under War and Navy Departments, respectively. War Department expenditures include those for rivers and harbors and the Panama Canal.

² Includes only Army and Navy pensions for service prior to World War, and fees of examining surgeons. Does not include salaries under Bureau of Pensions, or payments to veterans of the World War, which are made by Veterans' Bureau and included under civil and miscellaneous expenditures.

³ Exclusive of amounts transferred to the civil service retirement and disability fund in 1920 to 1926.

⁴ Averages are for entire 10-year period though there were no expenditures in certain years.

⁵ Additional compensation, Postal Service (resolution of Nov. 8, 1919), included in "Postal deficiencies."

⁶ The liquidation of the War Finance Corporation and the repayment of loans by the railroads very much affected the total civil and miscellaneous expenditures in 1925.

¹ Beginning 1927, credits to this fund are made direct to the appropriation account by repayments.

² These items represent cash receipts which are credited against the expenditures shown on a warrant basis and must be added back to receipts by warrants in order to adjust to an actual cash basis.

³ Exclusive of \$6,371,000 balance to the credit of the United States Sugar Equalization Board after crediting the appropriation with \$5,000,000 on account of repayment of capital stock, covered into the Treasury as "Miscellaneous receipts—final dividends of United States Sugar Equalization Board." As this was only an adjustment between accounts of transactions occurring in prior years, these items have not been included in the receipts and expenditures.

¹ The figures given for operations in special accounts are net figures and make allowance for receipts and deposits credited to the account concerned.

² In the fiscal years 1921, 1922, and 1923, changes were made in classification of expenditures between legislative establishment, executive proper, and other independent offices and commissions, which account for most of the differences as compared with expenditures for other fiscal years.

³ Payments on account of veterans' relief made prior to Aug. 11, 1921, by the War Risk Insurance Bureau are included under Treasury Department, while similar payments made prior to that date by the Federal Board for Vocational Education are included under other independent offices and commissions.

⁴ Deduct, excess of credits.

⁵ During the fiscal years 1922, 1923, 1924, and 1925, allotments for veterans' relief were made to the Treasury, War, and Navy Departments and, in 1924 and 1925, to the Interior Department, which appear under these departments. In the fiscal year 1925, these allotments amounted to \$6,058,000.

⁶ Post Office Department expenditures for June, 1921, include \$65,576,000 paid to the Railroad Administration. This resulted in decrease in expenditures on account of "Federal-control transportation systems and transportation act, 1920," by a corresponding amount.

⁷ Deduct, excess of credits. The railroad expenditures during the fiscal year 1922, were reduced by \$266,637,000 on account of sale of equipment trust notes, and by \$123,783,000 on account of sale or collection of other securities acquired under the Federal control act or transportation act, 1920. In 1923 and 1924, receipts on these accounts were included under miscellaneous receipts.

⁸ Included under Executive proper prior to fiscal year 1922.

⁹ Net expenditures after taking into account credits and \$100,000,000 applied to reduction in capital stock of United States Grain Corporation.

¹⁰ \$25,000,000 of this amount represents reduction in capital stock of United States Grain Corporation effected Oct. 17, 1921, and is reflected in an increase of receipts in an equal amount.

¹ Figures cover only appropriations which have been specifically designated by Congress as payable from the Treasury and are exclusive of amounts which may be required under indefinite appropriations (payable from the Treasury) provided by law to supply deficiencies in the postal revenues. (See note 5.)

² Includes \$35,698,000 additional compensation, Postal Service.

³ Includes \$14,000,000 for deficit under Federal control of telegraph and telephone systems.

⁴ Includes \$1,053,000 certified claims.

⁵ These figures include amounts which may be required under indefinite appropriations (payable from the Treasury) to supply deficiencies, if any, in the postal revenues.

⁶ The sinking fund created by the act of Feb. 25, 1862, was repealed by the act of Mar. 3, 1919. The act of Mar. 3, 1919, created a cumulative sinking fund beginning with the fiscal year 1921.

⁷ In 1913 to 1922, indefinite appropriations, estimated. In 1923 and 1924, definite amounts were appropriated which are included under the several departments and establishments. In 1925 to 1927, this fund was absorbed by rates of pay included under the classification act, approved March 4, 1923.

⁸ Includes \$125,000,000 of accumulated interest on war-savings certificates, series of 1918, to be paid during the fiscal year 1923 though properly allocable to the full five years of their life.

No. 181.—INTERNAL REVENUE: AMOUNTS COLLECTED FROM PRINCIPAL SOURCES

[NOTE.—All figures in thousands of dollars. The figures differ from those in Tables 175 and 177 because they represent collections by internal revenue officers throughout the country, including deposits by postmasters of amounts received from sale of internal revenue stamps and deposits of internal revenue collected through customs offices, while the other tables represent the deposits of these collections in the Treasury or depositories during the fiscal year concerned, there being thus an overlapping of time. Certain items, included in the totals in the last column, are shown in detail in the second part of the table]

¹ For 1913 to 1916, returns reporting net income of \$3,000 and over; for 1917 to 1924, \$1,000 and over; for 1925, \$1,500 and over.

² Returns showing net income in excess of \$5,000 exemption.

³ Determined on the basis of the number of returns filed and the average net income in each class.

⁴ Includes excise tax, \$10,071,000, under act of Aug. 5, 1909.

⁵ Figures for 1915 contain approximately 30,000 returns which properly belong in 1914.

⁶ In addition to the personal and corporation taxes shown for 1917 there was a war and excess-profits tax on partnerships amounting to \$103,888,000.

⁷ Includes war and excess-profits tax, \$101,250,000.

⁸ Includes tax on capital net gain from sale of assets held for more than 2 years. In 1924 and 1925 figures represent net tax after deducting tax credits of 12½ per cent on capital net loss from sale of assets held over 2 years and 25 per cent on earned net income.

No. 194.—GROSS RECEIPTS OF CORPORATIONS: BY INDUSTRIAL GROUPS

[NOTE.—Gross receipts are from all sources (except interest on Federal, State, and municipal bonds and, in 1920 and 1921, also dividends on capital stock of domestic corporations), sales being given on gross basis. Data are not comparable with "total income" of individuals shown in other tables. See also Table 196]

10. STATE, MUNICIPAL, AND LOCAL GOVERNMENT FINANCES

No. 217.—TAXES: TOTAL LEVIES OF AD VALOREM GENERAL PROPERTY TAXES OF STATES, COUNTIES, AND MINOR CIVIL DIVISIONS

[NOTE.—The data represent the total levies of general property taxes of States, counties, cities, villages, towns, townships, school districts, etc., and for all purposes. They do not cover special property taxes applying only to limited classes, nor taxes based on other standards than property, such as income, volume of business, inheritance, etc., which have been steadily growing in relative importance. The change in buying power of money affects materially the comparability of the figures. For data for 1870 and 1890, by States, see Table 437, Statistical Abstract of 1922.]

No. 220.—REVENUES AND EXPENDITURES OF STATE GOVERNMENTS

[NOTE.—Both receipts and expenditures are net figures, excluding temporary and special transactions which represent virtually duplication. Revenue receipts do not include any receipts from borrowing of money. Outlays, which enter into the total for governmental cost payments, represent capital investments, including those made with the proceeds of borrowed money. The excess of governmental cost payments over revenue receipts represents, approximately, increase of indebtedness.]

No. 225.—BONDED INDEBTEDNESS OF STATES, BY PURPOSE OF ISSUE

[NOTE.—All figures in thousands of dollars. Data for the various States are not of identical date but with few exceptions are as of Jan. 1, 1927, or of more recent date. Four States (Florida, Nebraska, Kentucky, and Wisconsin) have no bonded indebtedness. Kentucky owes \$3,881,000 on outstanding warrants, and Wisconsin is indebted to its trust fund to the amount of \$1,763,000. "Total debt" includes indebtedness under issues for refunding and for miscellaneous purposes not shown separately. "Education" includes universities and public-school systems (cost of buildings and maintenance). "Welfare institutions" includes special and general hospitals, insane asylums, penal institutions, and reformatory schools. "Agricultural aid" includes rural credits, State Bank of North Dakota, agricultural experiment stations, forestry, etc. "Highways" includes bridges and grade-crossing elimination. "Other improvements" includes physical improvements other than highways, waterways, or buildings. "Other military purposes" includes armories, insurrection costs, and old war debts.]

No. 226.—DEBT OF STATE GOVERNMENTS: GROSS DEBT, SINKING FUND ASSETS, AND DEBT LESS SINKING FUND OF THE 48 STATES COMBINED

[NOTE.—For more detailed statement for 1926, see Table 224. In the present table, for comparability with earlier figures, the item of "obligations to public trust funds" not evidenced by formal certificates of indebtedness is included throughout under funded or fixed debt; in Table 224 it is included with floating debt; the amount of this item in 1926 was \$39,035,000. These obligations to public trust funds are not debt in the ordinarily understood sense.]

¹ Number (in thousands) of United States standard silver dollars that could be coined from the quantity stated; not market value of the silver.

² Figures are totals for the period, not annual averages.

No. 240.—STOCK OF MONEY IN THE UNITED STATES, BY KINDS, JUNE 30

[NOTE.—Amounts in thousands of dollars. Figures prior to 1890 have been revised from the best available data, but the older records, especially from 1860 through the early 70's, are not complete and figures for gold and silver those years are only estimates. Figures beginning 1890 have been compiled on the basis of revised figures for June 30 of each year and therefore differ slightly from the monthly circulation statements. In 1927, data were revised to include minor coins beginning 1900 (no satisfactory data available for earlier years) and to exclude earmarked gold. For changes in stock through earmarking see Table 295, p. 286. Gold and silver certificates and Treasury notes of 1890 are not shown, since equivalent amounts held in trust against them are included in gold coin and bullion and silver dollars]

No. 241.—MONEY IN CIRCULATION, HELD IN TREASURY AND IN FEDERAL RESERVE SYSTEM, AND TOTAL STOCK, JUNE 30

[NOTE.—All figures except per capita in thousands of dollars. In conformity with revisions in the form of circulation statement in 1922 and 1927, figures for 1915 on have been compiled to include in the holdings of Federal reserve banks and agents, and, hence, in stock of money, gold bullion and foreign coin held by them and gold coin and bullion held abroad for the account of Federal reserve banks, and also to include in the holdings of Federal reserve banks and agents, and, hence, exclude from circulation, all forms of money held by them whether as reserve against Federal reserve notes or otherwise. As to other revisions, see headnote, Table 240. Per capita figures are on basis of population estimates of the Treasury Department.]

¹ In March, 1917, the Federal Reserve Board ruled that when the 60-day trade acceptance rate was higher than the 15-day commercial paper rate, trade acceptances maturing within 15 days were to be taken at the lower rate.

² Commodity rates were established during September and October, 1915, and merged with those for commercial paper of corresponding maturities in November and December, 1917.

³ Nov. 16, 1914, to Dec. 31, 1915.

⁴ Rates for bills maturing within 30 days, 3½ per cent; 31 to 60 days, 4 per cent; 61 to 90 days, 4½ per cent.

⁵ Oct. 20, 1917, rate of 3½ per cent for commodity paper maturing within 60 days and 4 per cent for paper maturing after 60 days but within 90 days.

⁶ Five per cent on 6 to 9 month agricultural and livestock paper from Apr. 7, 1923, to June 11, 1924.

⁷ Five per cent on 6 to 9 month agricultural and livestock paper from Apr. 19, 1923, to June 25, 1924.

⁸ 4½ per cent on 91 days to 6 months agricultural and livestock paper from June 19 to June 25, 1924.

No. 258.—PRINCIPAL ASSETS AND LIABILITIES OF SELECTED REPORTING MEMBER BANKS OF THE FEDERAL RESERVE SYSTEM IN LEADING CITIES

[NOTE.—All money figures in millions of dollars. Owing to the addition of new members to the list of reporting banks during 1919 and 1920, the comparability of the figures is somewhat affected, but since Jan. 1, 1921, the changes have been almost entirely through consolidation of reporting banks]

**No. 260.—NUMBER, CAPITAL AND SURPLUS, AND TOTAL RESOURCES OF
EACH CLASS OF COMMERCIAL AND SAVINGS BANKS: UNITED STATES
AND OUTLYING TERRITORIES AND POSSESSIONS**

[NOTE.—Money figures expressed in millions and tenths of millions of dollars. Data relate in general to June 30. Statistics for private banks are incomplete, as many not under State supervision do not furnish reports. The number of private banks in 1910 was estimated at 4,000, in 1927 at 711. The apparent decrease in the number of stock savings banks and loan and trust companies in 1916 is due to the fact that beginning with that year statistics are based on summaries furnished by State banking departments, which in a number of States included the returns for banks formerly classed as stock savings and for loan and trust companies with commercial or State banks, or classed all banks other than national as State banks. In recent years the segregation of the classes has been fairly accurate]

¹ In 1921 returns from California, which in 1920 had shown 106 stock savings banks, included all banks except 1 mutual savings bank with State banks, which accounts for the greater part of the decrease in stock savings banks and part of the increase in State banks. In subsequent years returns showed separate statistics for each class of banks.

² Figures given under capital and surplus are surplus fund only.

No. 262.—BANKS: INDIVIDUAL DEPOSITS IN EACH CLASS OF BANKS, UNITED STATES AND OUTLYING TERRITORIES AND POSSESSIONS

[NOTE.—Data for national banks are as of reports nearest to June 30, for other banks, of various dates within the year but during recent years, mainly, as of June 30 or nearest report date. Beginning with 1913, figures include dividends unpaid, excluded in prior years, and exclude certified checks and cashiers' checks, previously included. Postal savings deposits are included. Figures for private banks include all private banks in 1880 and 1882 and only those under State supervision and others voluntarily reporting from 1887 to date (see headnote Table 260). For 1909 to 1915, when statistics were compiled from reports from the individual banks, and in recent years, the segregation of the classes of banks is fairly accurate. In other years figures for State banks include stock savings banks and loan and trust companies in a number of States, and in some instances private banks]

¹ Individual and other.

² No data.

³ Apparent decrease in deposits in savings banks was mainly due to the fact that in 1921 a number of banks in California, classed in other years as stock savings banks, were included with returns for State banks.

No. 269.—NATIONAL BANKS: DIVIDENDS AND EARNINGS

[NOTE.—The dividends and earnings are for years ending Mar. 1, prior to 1907, and for years ending June 30 thereafter. The ratios are computed on the basis of the capital and surplus as shown in the earnings and dividend reports, which differ only slightly from the amounts given in Table 268, which are as of June 30 or nearest report date. Net additions to profits are calculated before deducting dividends. Data include banks in Alaska and Hawaii]

No. 277.—CERTAIN MAJOR ITEMS OF SAVINGS OF THE UNITED STATES

[NOTE.—In millions of dollars. Increase in savings deposits is for fiscal years ended June 30; increase in assets of building and loan associations includes figures for calendar years for some States and fiscal years for others; other data are for calendar years. These various types of savings should not be added to a total, as there is much duplication between them. For example, savings banks and life-insurance companies both invest their assets in the securities of corporations. On the other hand, many forms of savings are not listed.]

No. 287.—WAR FINANCE CORPORATION: STATUS OF ADVANCES MADE UNDER ALL SECTIONS OF THE ACT, APRIL 5, 1918, TO NOVEMBER 30, 1927

[NOTE.—When the corporation resumed operations January, 1921, there was outstanding \$111,117,610. The making of new loans was discontinued on Dec. 31, 1924, and all loans since that date are "expense advances" only. Figures for agricultural and livestock loans have been revised and adjusted so as to exclude all amounts representing renewals of loans and to include only net additional amounts advanced. For details of advances to Nov. 30, 1924, see Statistical Abstract 1924, Tables 245 and 246]

No. 288.—CLEARING HOUSE EXCHANGES: SUMMARY BY GEOGRAPHIC DIVISIONS

[NOTE.—All figures in millions of dollars. Prior to 1920 data are for all cities reporting to the New York Clearing House Association; commencing 1920 they are for 182 identical cities. The comparability of these figures is affected (1) by changes in the number of cities reporting, and (2) by the tendency toward consolidation of banks, eliminating former clearings between two or more banks. Debits to individual account (Tables 291 to 293) are a more significant measure of volume of payments.]

No. 298.—WEALTH: ESTIMATED VALUE OF ALL TANGIBLE PROPERTY SITUATED IN EACH GEOGRAPHIC DIVISION AND STATE

[NOTE.—See headnote to Table 296. This table shows, not the value of property owned by the citizens of each State, but that of the physical property lying in each State wherever the securities or other evidences of title representing it may be found or owned. The per capita figures thus do not represent the average wealth of the citizens of each State]

¹ Total differs from estimate as published in 1912 because of revision of estimate for taxed real property in Oklahoma. Includes \$402,000,000 value of ships belonging to the United States Navy and \$290,000,000 value of privately owned water-supply systems not distributed by States. Items for geographic divisions and States differ from estimate as published in 1912 because of redistribution of railroad values in accordance with the method employed in 1922.

² Total includes \$1,446,000,000 value of ships belonging to the United States Navy, \$361,000,000 privately owned water-supply systems, and \$4,278,000,000 gold and silver coin and bullion not distributed by States.

³ Includes Indian Territory.

⁴ Differs from estimate as published in 1912 because of revision of estimate for taxed real property.

¹ Data for 1921 and also for 1922-1925 for Colombia, Peru, and Venezuela compiled by the Bureau of Foreign and Domestic Commerce from various sources.

² Quotations prior to 1926 are for the paper peso (1913 average, 19.53 cents). Beginning 1926, the currency was reestablished on a gold basis, the peso being devaluated to 12.17 cents.

³ Quotations for 1921 to 1924 are for the krone, par 20.26 cents.

⁴ Quotations prior to 1927 are for the franc (par 19.3 cents). The belga, which is equal to 5 francs, superseded the Belgian franc Oct. 26, 1926, and was quoted at par during November and December, 1926.

⁵ Nominal par value, 20.26 cents. Stabilized in March, 1925, at 2.96 cents.

⁶ The pre-war par of the markka was 19.3 cents. In 1926 it was devaluated to a new gold parity of 2.52 cents.

⁷ Prior to 1924 quotations are for paper marks (see monthly rates in Table 300). The rate of exchange of paper marks for the first 10 months of 1924 was approximately steady at from 22 to 24 cents per trillion (1,000,000,000,000) marks. The new paper reichsmark currency issued beginning in the latter part of 1924 was thereafter quoted substantially at par (23.82 cents).

⁸ Prior to 1926, quotations are for the paper krone (par 20.26 cents). On Jan. 1, 1926, this was superseded by the pengo valued at 17.49 cents and exchangeable for 12,500 paper kronen.

⁹ Prior to 1924, quotations are for Polish marks, par 23.82 cents; thereafter for the zloty. The average rate for January to April, 1924, was 11.3 cents per million marks; for June to December, 19.23 cents for one zloty. The par value of the zloty when adopted as the currency unit in 1924 was fixed at 19.3 cents, but in October, 1927, it was stabilized at 11.22.

¹⁰ 1913 average; varies with the price of silver, the standard of value.

No. 307.—FIRE LOSSES IN THE UNITED STATES: TOTAL AND PER CAPITA

[NOTE.—Amounts, except per capita, in thousands of dollars. Prior to 1916, figures are as compiled by the New York Journal of Commerce and include losses of \$10,000 or over in the principal cities of the United States, adding 15 per cent for small and unreported losses. These figures are not comparable with those shown for later years (the 1916 Journal of Commerce figure being \$214,531,000 as against \$258,378,000) which cover all fires reported to the Actuarial Bureau Committee, adding 25 per cent for unreported and uninsured losses]

No. 325.—INDEXES OF VALUE OF SALES OF MAIL-ORDER HOUSES AND CHAIN STORES

[NOTE.—1923-1925 average=100. Indexes for mail-order houses cover four companies throughout. The number of chain-store companies reporting varied from year to year, but in computing the indexes adjustment has been made for these variations. No adjustment has been made, however, to eliminate the influence of increase in the number of stores operated by the individual companies which accounts for a considerable part of the increase in the indexes. Sales are much affected by changes in price levels. For price index see Table 326.]

14. PRICES

[The revised wholesale price index of the Department of Labor on a 1926 base by commodity groups and months for earlier years and by degree of manufacture were not available until July 1928, and are therefore shown in supplemental tables on pp. 813 to 815. For agricultural prices see Tables 562, 563, 610, 612 to 622, 647, and 648. For other price statistics shown in tables devoted to specific commodities consult index]

[GENERAL NOTE.—The wholesale price index number (1913=100) of the Department of Labor, shown in tables 332 to 334, 338 and 339, is based on primary market quotations of 404 commodities. The revised index based on the year 1926, shown in Tables 335 to 337, 392 and 393, covers 550 commodities. The retail food index is based on the weighted average quotations (weighted by average family consumption in 1918) as of the 15th of the month, secured from retail stores in 51 cities since 1920 and from a smaller number in earlier years, for 22 commodities to 1920 and for 43 commodities in 1921 and subsequent years. The farm price index is constructed by weighting prices paid to producers for 30 products. Average quotations for the period, August, 1909–July, 1914, are used as a base, and each price series is weighted by the average annual marketings of farmers in the years 1918 to 1923]

No. 338.—WHOLESALE PRICES: INDEX NUMBERS

[NOTE.—Figures in boxes indicate number of quotations. Bradstreet's index is the sum of the prices per pound of the 96 commodities. Dun's index is weighted by the amount "annually consumed by each inhabitant." The method of computing the wholesale-price index of the Department of Labor based on 1913=100 is described in the general note, p. 317. Indexes in the last three columns were computed by the Federal Reserve Board prior to August, 1926, by reclassifying the data of the Department of Labor into the groups shown, using the same weights as that department. The term "Consumers' goods" in general applies to those commodities which because of their finished condition are ready for consumption. The term "Producers' goods" applies to those products which have been subjected to some manufacturing process but which are still in semifinished condition requiring additional manufacture.]

No. 339.—COMPARISON OF INDEXES OF WHOLESALE PRICES AND COST OF LIVING (RETAIL PRICES) BY NEAREST SIMILAR GROUPS (1913=100)

[NOTE.—The commodities in a given wholesale group differ considerably from those in the nearest corresponding retail group, so that comparisons are approximate only. For the sixth group the wholesale index represents building materials and the retail index represents house and apartment rentals. Retail indexes do not cover the entire year but are averages of indexes for selected months shown in Table 341]

No. 340.—WHOLESALE PRICES IN FOREIGN COUNTRIES: INDEX NUMBERS

[NOTE.—The foreign index numbers of wholesale prices compiled in the various countries differ materially as regards the commodities covered and in other respects. They do not refer to the same day or period of the month. In England (British Board of Trade), Netherlands, and Japan (Tokyo) they are monthly averages; in Switzerland they refer to the beginning of the month; in Sweden and Canada to the middle of the month; in England (London Economist), France, Italy, Australia, and India (Calcutta) to the end of the month, and in Belgium to the last half of the month. In computing the index numbers for Canada and Australia the prices are weighted; for Japan, England (London Economist), and France the prices are unweighted. The figures in the box indicate the number of quotations used. In a few cases where indexes do not check exactly with those published in the Commerce Yearbook, Vol. II, the difference is due to source used]

No. 343.—COST OF LIVING AND RETAIL FOOD PRICES IN FOREIGN COUNTRIES: INDEX NUMBERS

[NOTE.—The foreign index numbers of retail food prices and cost of living do not all refer to the same day or period of the month. There are also differences in the number and kind of articles included and the number of markets from which prices are taken. The base for Belgium (retail food and cost of living) is 1921 and for Netherlands (cost of living) 1911, but for all other indexes the base is either the year 1914 as a whole or the first half of 1914, or some month in 1914 preceding the outbreak of the war. Statistics in all countries are official, being given out by the Ministry of Labor or some corresponding Government department. The data for Netherlands (retail food) are unweighted averages of prices; for all other countries weighted, usually according to the consumption of working-class families.]

No. 347.—ANNUAL AVERAGE UNIT VALUES OF IMPORTANT ARTICLES IMPORTED INTO THE UNITED STATES

[NOTE.—The values are required by law to represent the values of the goods in the foreign markets whence exported to the United States. "Ton" signifies long ton of 2,240 pounds. The averages are obtained by dividing the total value of imports of the specified article by the total quantity, and as in some commodities there may be considerable variations in price between different grades, methods of packing, etc., and as the proportions of the grades, etc., may vary from year to year, the averages in such cases may show the actual price movements only roughly]

¹ The normal or customary hours of operation of the great majority of the potteries included in the study are 9 hours per day and 54 hours per week. Working hours in a pottery, however, are more nominal than normal, as so many employees are pieceworkers and to quite an extent determine their own time.

No. 353.—INDEX NUMBERS OF UNION HOURS OF LABOR PER WEEK AND RATES OF WAGES PER HOUR, BY OCCUPATIONS

[NOTE.—The figures cover the principal cities of the United States. The relative hours are percentages showing the change in the regular full-time working hours per week, account not being taken of loss of time from slack work or other causes not of overtime work. The relative wages are percentages which indicate the change in wages per hour. The figures are based on the scale prevailing May 15 each year. For absolute hourly wage rates for the same and other occupations, see Table 354.]

No. 359.—POSTAL MONEY-ORDER BUSINESS

[NOTE.—For revenues from money orders, see Table 358. For value of orders issued for other years, see Table 357. Money orders are exchanged on a domestic basis not only within this country, but with its outlying possessions, Canada, Cuba, and numerous islands and minor countries neighboring the United States. International-basis orders are exchanged between the United States and its outlying possessions, on the one hand, and other than "domestic basis" foreign countries, on the other. In this table, however, "international" includes money orders exchanged between the United States and "domestic basis" foreign countries, and these are not included in "Domestic"]

No. 361.—TRANSPORTATION OF DOMESTIC MAILS

[NOTE.—Amounts, except where units are indicated, in thousands of dollars. Since Nov. 1, 1916, all service on steam railroads is authorized and paid for under the space basis system; prior to that time payments were based on a system of quadrennial weighings. Railway mail space units of service vary in size and character and may consist of a car, a section of a car, or a closed pouch carried on a car. Some cars are railway post offices, and others are for storage only, over 20 classes of units being distinguished. The "equated unit" represents a calculation of the equivalent of all the different units in terms of a 60-foot car. Annual rate of expenditure (regular authorizations) represents the estimated cost for transporting normal mail traffic over regular routes only, based on contracts outstanding at the end of each fiscal year. "Annual cost" includes emergency and side and transfer service. Average rates are computed on the basis of "regular authorizations"]

No. 372.—TELEPHONE SYSTEMS: REPORTS TO INTERSTATE COMMERCE COMMISSION

[NOTE.—All telephone companies engaged in interstate business are required to report to the commission both as regards their interstate and their intrastate business. Prior to 1923 the classification of companies based on the amount of annual operating revenues was as follows: Class A, over \$250,000; Class B, \$50,000 to \$250,000; Class C, \$10,000 to \$50,000. Beginning with 1923 Class B includes companies with revenues from \$100,000 to \$250,000 and Class C those with revenues from \$50,000 to \$100,000. The smaller companies, designated as Class D, are not covered in the table. Blank spaces indicate that statistics are not available.]

[For additional statistics, see supplemental tables, pp. 818 and 817. Data in this section relate to continental United States]

No. 378.—CENTRAL ELECTRIC STATIONS: EQUIPMENT, EMPLOYEES, OUTPUT, AND SALES

[NOTE.—A central electric station is one selling current to public or private consumers, or a municipal plant supplying current for streets, public buildings, etc. Isolated or private plants operated solely for the benefit of the owner in connection with factories, mines, stores, hotels, institutions, etc., which in the aggregate produce great quantities of current, are not included. The business of electric street railways is shown only so far as that portion of their business relating to the sale of current can be segregated. Electric plants operated by the Federal or State Governments are excluded even when they sell current to private consumers. One central electric station often sells current to another, so that there is considerable duplication in total sales. Net sales are considerably less than current generated because of wire losses, self-consumption, etc. Part of the sales reported as made to other public-service corporations, however, go to street railways, and the exact amount of duplication in the central station sales is not known. The separate data given for hydroelectric stations relate only to those with a capacity of 1,000 horsepower or more]

¹ Data are estimated totals for all plants, based on actual returns from about 3,500 plants in 1919 to about 3,800 in 1927, each producing 10,000 kilowatt hours or more per month, engaged in public service, including central stations, electric railways, steam railroads generating electricity for traction, and certain other plants. The capacity of plants submitting reports is about 95 per cent of the capacity of all plants.² Of 42 gallons.

No. 383.—RETAIL PRICES OF ELECTRICITY IN PRINCIPAL CITIES

[NOTE.—Net price in cents per kilowatt hour, electricity for household use. For cities having more than one tariff for domestic consumers rates are shown for the schedule or schedules under which most residences are served. "Demand" is a term applied to an amount of current consumption bearing a given ratio to the capacity of consumers' installation as a basis for graduating rates. The method of determination varies from city to city. For example, in Buffalo the lighting demand is 25 per cent of the total installation, but not less than 250 watts. If the capacity of the total installation is 2,000 watts, the "demand" is 25 per cent of this, or 500 watts, and the first 60 hours' use amounts to 30 kilowatt hours and is subject to the first price schedule (5 cents, 1927); the next 120 hours' use (60 kilowatt hours) to the next rate (4 cents), and above 90 kilowatt hours to the excess rate (1½ cents). Measure of consumption as stated in second column refers to tariffs of 1927. For some cities primary and secondary rates applied to somewhat different amounts of current consumption in previous years. For full details see Monthly Labor Review, February, 1928.]

¹ Prior to 1922 figures are based only on price of five-passenger open cars of a given chassis. Thus, if this model sold for less than \$1,000, the total production of cars with the same chassis is included in the "under \$1,000" class, even though closed models sold for over \$1,000. In 1922 and later years actual f. o. b. prices of open and closed models are considered separately and the cars included under proper classification.

Source: Automotive Industries. The grouping is based on retail prices f. o. b. factory.

20.—STEAM AND ELECTRIC RAILWAYS AND EXPRESS COMPANIES

[Data in this section relate to continental United States unless otherwise stated]

GENERAL NOTE.—The total steam railroad mileage of the United States includes: (a) Regular interstate carriers (and their nonoperating subsidiaries) reporting to the Interstate Commerce Commission, (b) switching and terminal railroads, also reporting to the commission; and (c) private railroads (defined by the commission as "circular" because they report on brief circulars and as "unofficial"). Except in certain mileage data the circular and unofficial companies are not included in any of the statistics. The switching and terminal roads were formerly included with operating railways, but are now separated, and data for them do not appear in most of the tables.

Nonoperating subsidiaries include proprietary companies, which are covered by the reports of operating carriers, and lessor companies which have no traffic and whose reports appear only in statistics of capitalization, dividends, and investment.

Operating railways are divided into three classes, according to the amount of gross operating revenue in 1919: Class I, having more than \$1,000,000 of such revenue; Class II, from \$100,000 to \$1,000,000; and Class III, less than \$100,000. During recent years more detailed reports are required from Class I carriers than from smaller companies. The basis of the figures in each table is indicated by notes. Omission of Class II and Class III railroads affects very little the comparability of statistics with those of earlier years as regards most items, since the bulk of the business is done by Class I.

The Interstate Commerce Commission divides railroads geographically into three districts and eight subsidiary regions. Each railroad is treated as a unit and placed wholly in some one district or region. Broadly speaking, the eastern district includes territory east of Chicago and north of the Ohio and Potomac Rivers; southern district, territory east of the Mississippi River and south of the Ohio and Potomac Rivers; and western district the remainder of the country. The principal railroads of the eight regions are listed in Table 420.

Class I companies make monthly reports and the yearly totals from these become available earlier than the sometimes slightly corrected totals from the final annual reports. The latest figures in these tables are in many cases from the monthly reports.

No. 400.—RAILWAY MILEAGE OWNED AND MILEAGE OPERATED CLASSIFIED BY TRACKAGE

[NOTE.—Beginning with 1908 switching and terminal roads are omitted (they operate about 2,000 miles of first main track). The first and second columns cover all railways including "circular" and "unofficial" lines; the last five columns omit "circular" and "unofficial" lines. Mileage owned excludes all duplication and covers continental United States only. Mileage operated includes some duplication under trackage rights and some mileage in Canada operated by United States companies]

No. 404.—RAILWAY EQUIPMENT IN SERVICE, ALL REPORTING COMPANIES

[NOTE.—"All reporting companies" include switching and terminal but not circular and unofficial lines. Data for tractive power and capacity of cars exclude switching roads beginning with 1908 and smaller roads during recent years; they would not be materially different if all carriers were included. The large number of cars owned by private car lines is not included. Capacity figures for recent years are for Class I roads only]

¹ Data exclude switching and terminal companies beginning 1910. Class III roads are excluded in 1913. Exclusion of the latter has practically no effect on the comparability of the figures.

² Calculated for all classes of employees, including those not paid on an hourly basis.

³ Data not available.

⁴ Estimated, Class I total taken as 97.67 per cent of employees of all carriers.

No. 413.—PROPERTY INVESTMENT, INCOME, INTEREST, AND DIVIDENDS:
Reported by Operating Roads

[NOTE.—Investment is as reported by the carrier and should not be confused with the tentative valuation fixed by the Interstate Commerce Commission. It relates only to railway property, but includes leased lines, which are not included, however, under the other columns. All data exclude switching and terminal companies. See also footnotes]

¹ Prior to 1926, figures include investment of leased lines and exclude investment of proprietary companies which do not render annual reports. Beginning with 1926, the investment in road and equipment of proprietary companies is included. On a comparable basis, the investment for 1926 would be only \$663,531,228 greater than that for 1925. In this column no allowance is made for cash and material and supplies, and no deduction is made for depreciation.

² Investment originally published is increased by \$170,000,000, estimated reserve for depreciation.

³ Does not include returns for Class II and Class III companies.

⁴ Figures not comparable on account of Federal control accounting requirements.

No. 422.—REVENUE FREIGHT CARRIED, BY COMMODITY GROUPS

[NOTE.—All figures in thousands of tons of 2,000 pounds. Data relate to years ended June 30 prior to 1916, to calendar years thereafter. Switching and terminal roads excluded since 1908. Figures for 1911 to 1916, inclusive, exclude Class III roads but this affects the comparability very slightly; those after 1916 exclude both Class II and Class III, thereby reducing the grand total about 6 per cent. Nonrevenue freight is excluded; this is a large item in the case of a few commodities, notably coal]

No. 424.—CAR LOADINGS: AVERAGE WEEKLY LOADINGS OF REVENUE FREIGHT, CLASS I RAILWAYS, BY PRINCIPAL COMMODITY GROUPS

[NOTE.—The difference between the averages in the following table and those in the corresponding tables previously published is owing to changes in weekly groupings. In 1927 a week falling within two months is included in the month in which it ends, and averages for months in all prior years are computed according to the number of weeks included in a month in 1927. Averages for years for all commodities are: 1913, 857,540; 1919, 804,472; 1920, 867,663; 1921, 756,215; 1922, 830,915]

No. 426.—PERSONS KILLED AND INJURED IN RAILWAY ACCIDENTS

[Note.—For various reasons, including the fact that returns were required under different acts, the statistics are not strictly comparable. Prior to 1921, train accidents were those causing damage to railway property in excess of \$150 or any damage and a resulting casualty. Thereafter they were considered as such when the damage exceeded \$150 with or without a casualty. Where the damage is less than \$150 and there is a reportable casualty it is classified as a train-service accident. Figures for years 1911-1915 include industrial and other nontrain accidents to employees only, and for years 1908-1910 do not cover switching and terminal roads. Otherwise the statement covers all reportable accidents.]

¹ The ratio of fuel oil to coal is based upon the experience of the various roads; 1 cord of hardwood equals two-thirds ton of coal; 1 cord of softwood equals one-half ton of coal.

² Totals include equivalent of a small amount of miscellaneous fuel.

³ The total charges shown do not include the labor cost of applying the rails or ties.

⁴ Figures do not include data for 6,325 linear feet of steel ties in 1924, 1,435 in 1925, and 450 in 1926.

No. 431.—ELECTRIC RAILWAYS: SUMMARY OF OPERATIONS

[NOTE.—This table does not include the electric operations of steam railway companies. Many electric railway companies also engage in other operations, especially in the sale of current for light and power; wherever possible, such light and power business has been excluded, but for numerous companies this is impossible. No distinction can be made in the statistics between purely urban street railways and suburban and interurban lines. The insignificant amount of business still conducted by cable and animal traction is included, as well as some operations conducted by primarily electric railways by means of steam traction and gasoline engine cars. In the trackage statistics of this table, each track of a double or multiple line is counted separately]

OPERATING STATISTICS, BY STATES

all other data relate to the total operations of companies domiciled in the State, part of which may be passenger revenue and in other similar ratios are largely due to differences in the relative importance of related only to those lines which formed integral parts of electric-railway companies. 21.—WATERWAYS, WATER TRAFFIC, AND SHIPPING

General note as to units of measurement.—"Cargo tonnage" represents weight of cargo in long tons (2,240 pounds) or short tons (2,000 pounds). All other tonnage figures refer to capacity of vessels. The terms gross and net tonnage refer to space measurement, 100 cubic feet being called 1 ton. Gross tonnage is the capacity of the entire space within the frames and the ceiling of the hull, together with those closed-in spaces above deck available for cargo, storage, passengers or crew, with certain minor exemptions. Net or registered tonnage is what remains after deducting from the gross tonnage the spaces occupied by the propelling machinery, fuel, crew quarters, master's cabin, and navigation spaces. It represents substantially space available for cargo and passengers. The net tonnage capacity of a ship recorded as "entered with cargo" may bear little relation to actual weight of cargo. Dead-weight tonnage is the weight in long tons required to depress a vessel from light water line (that is, with only the machinery and equipment on board) to load line. It is therefore the weight of the cargo, fuel, etc., which a vessel is designed to carry with safety. Displacement tonnage (naval vessels) has reference to weight of the vessel itself with its normal equipment, fuel, etc.

No. 438.—WATER-BORNE COMMERCE OF THE UNITED STATES

¹Including canal boats and barges. ²Dec. 31.³The decrease of tonnage arises principally from the registered tonnage having been corrected in 1818, 1829, and 1830 by striking off all vessels the registers of which were granted prior to 1813, which were supposed by the collectors to have been lost at sea, captured, etc.⁴Sept. 30.⁵Including Porto Rico in 1910, 1920, 1926 and 1927, and also Virgin Islands in 1920, 1926 and 1927.⁶Including Hawaii and Alaska. ⁷Motor vessels included in steam in 1900 and 1910.

¹To and including 1921 "Net revenues from business operations" shown in last column are included in "Taxes, licenses, etc.," "Total transit revenues," and "Net revenues from transit operations"; therefore the \$480,725 shown under the latter is the net revenue to June 30, 1921, from all operations. In the adjusted total this is transferred to "net revenues from business operations," to which is also added \$619,585 interest on public works in Panama and Colon received prior to June 30, 1921, but not taken up as a canal revenue.

No. 478.—MERCHANDISE TRADE OF CONTINENTAL UNITED STATES WITH FOREIGN COUNTRIES AND OUTLYING TERRITORIES AND POSSESSIONS

[IMPORTANT NOTE.—This table differs as to its geographic basis from all other foreign trade tables in this section and in other publications: (1) In the case of other tables the data represent the trade of the "customs area," which includes continental United States, Alaska, Hawaii, and Porto Rico, but not other outlying possessions. Consequently trade between continental United States and Alaska, Hawaii, and Porto Rico is not covered by the figures, while trade between these three Territories and foreign countries is so included. On the other hand, trade between continental United States (also Alaska, Hawaii, and Porto Rico) and the Philippine and Virgin Islands is covered, being treated as if it were trade with foreign countries. However, neither the trade between continental United States and Guam and American Samoa nor their trade with other countries, is covered. (2) The present table takes continental United States as the basis. In the totals trade between it and Alaska, Hawaii, and Porto Rico is included while their trade with foreign countries is excluded. Trade of continental United States with Guam and American Samoa is also included. Practically all other nations calculate their foreign trade in the manner followed in the present table; that is, totaling the trade of the home country with foreign countries and with all outlying areas. Prior to 1901 Alaska was our only outlying area. Therefore our foreign trade statistics for 1900 and earlier years very nearly represent the trade of continental United States with foreign countries. Data are for years ended June 30, through 1918; thereafter for years ended Dec. 31]

No. 479.—INDEXES OF CHANGES IN QUANTITY, PRICE, AND VALUE OF IMPORTS AND DOMESTIC EXPORTS

[NOTE.—The purpose of these indexes is to eliminate the effect of price changes upon the total value of trade. They have been constructed by the so-called ideal formula, the essential feature of which is the use as weighting factors of the mean of the values of the several articles during each pair of years compared. For many commodities no quantitative data are available and for others the quantities lack significance because of variation in grades, size, and styles. About 180 commodities were included in the direct calculations for exports and 160 in those for imports, representing somewhat over two-thirds of the total value. It was then assumed that the prices of articles not directly covered had moved in parallel with those of articles covered save only that in making the adjustment the effect of abnormal price movements of heavily weighted commodities was first eliminated. In constructing the indexes data for 1919 were linked directly to 1913 and each subsequent year was compared with that preceding. The resulting percentages were made into a series by the chain method]

¹ Fiscal years.

² Indexes not calculated for 1910-1914. The quantity index of exports is estimated by assuming that the relation of export prices in 1910-1914 to 1913 was the same as that for domestic prices.

No. 482.—EXPORTS AND IMPORTS OF MERCHANDISE

[NOTE.—All figures in thousands of dollars. Specie values. Figures are for fiscal years ended Sept. 30, 1790 to 1842, and June 30, 1843 to 1915, subsequently for calendar years. For calendar years 1901-1915 and fiscal years 1916-1927, see supplemental Table 484. For total exports and total imports by years prior to 1883, see Table 485. Figures include gold and silver prior to 1821. In the years 1922-1927, much of the wheat and carpet wool imported was originally entered as dutiable, but later was classified as free. Consequently, imports for consumption, Table 487, show a smaller value for dutiable imports and a larger value for free imports than do statistics of general imports.]

No. 487.—IMPORTS ENTERED FOR CONSUMPTION AND DUTIES THEREON

[NOTE.—From 1821 to 1865, inclusive, the figures of import values represent total imports less reexports, and for 1870 and later years imports entered for consumption. The ratio prior to 1860 is based upon the values of total imports, since the duties as calculated for those years include the duties afterwards refunded upon reexports. Figures cover fiscal years ended Sept. 30, 1821 to 1840, and June 30, 1850 to 1915; calendar years thereafter]

No. 497.—FREE AND DUTIABLE IMPORTS BY PRINCIPAL COUNTRIES

[NOTE.—For the years 1926 and 1927 dutiable imports for consumption from Canada were probably 3 to 5 per cent less and the free imports correspondingly greater than the general imports because of wheat which was originally entered as dutiable but which was later classified as free. There was a similar difference between imports for consumption and general imports from China caused by a reclassification of carpet wool from dutiable to free and this affects to a smaller degree statistics for Argentina, British India, and other wool exporting countries. See headnotes, Tables 482 and 489]

1 Period July 1, 1915, to Dec. 31, 1920.

No. 500.—EXPORTS (DOMESTIC AND FOREIGN) AND IMPORTS OF MERCHANDISE, BY PRINCIPAL CUSTOMS DISTRICTS

[NOTE.—All figures in thousands of dollars. Fiscal years to and including 1915; thereafter, calendar years. Figures represent specie values except for exports for years 1865 and 1870-1878. Areas of districts were rearranged July 1, 1913. Prior to that date some of the districts were more restricted. However in most cases, this change only slightly affects the comparability of the figures. Prior to 1914 the statistics given in the table for Buffalo include the (former) districts of Buffalo Creek and Niagara; those for Michigan include the (former) districts of Superior, Huron, and Detroit; and those for Massachusetts and Maryland were the former districts of Boston and Baltimore, respectively. See also headnote, Table 499.]

No. 504.—EXPORTS OF MERCHANDISE (DOMESTIC) BY COMMODITY GROUPS AND ARTICLES

[NOTE.—Data are for calendar years except averages for 1910-1914 which are for years ended June 30. A greater number of items are shown separately beginning about 1912 and for this reason many averages for two or three years are shown in the table. However, averages shown for group totals always cover five years. In some cases the detail does not add to the total because of the different periods covered by the averages]

No. 505.—IMPORTS OF MERCHANDISE, BY COMMODITY GROUPS AND ARTICLES

[NOTE.—Data are for calendar years except averages for 1910-1914, which are for years ended June 30. A greater number of items are shown separately beginning about 1912, and for this reason many averages for two and three years are shown in the table. However, averages shown for group totals always cover five years. In some cases the detail does not add to the total because of the different periods covered by the data]

23.—COMMERCE OF NONCONTIGUOUS TERRITORIES

[GENERAL NOTE.—In the general foreign-trade statistics of the United States presented in the preceding section, the Philippines and Virgin Islands are treated as foreign countries and their trade with the United States is included while their trade with other countries is not included. On the other hand, Porto Rico, Hawaii, and Alaska are treated as integral parts of the United States, so that trade between them and Continental United States is not included, while trade between them and foreign countries is included; each of these three possessions appears as a separate customs district (Table 493). Neither trade of American Samoa and Guam with foreign countries nor shipments between them and United States are included in the general tables on foreign trade. See also Table 478, p. 444.

In the present section the trade of each of these possessions with the United States (including other non-contiguous possessions except the Philippines) is shown, and separately its trade with foreign countries (including the Philippines).]

No. 510.—IMPORTS AND EXPORTS OF ALASKA

¹ The discrepancy between the United States figures of exports to the Philippines prior to 1911 and the Philippine figures of imports from the United States in corresponding periods is due chiefly to the fact that the Philippine import figures prior to that year omit merchandise imported free of duty for the use of the Government or for use in construction and equipment of railways in the islands, under the act of Feb. 6, 1906, while the United States returns omit only Government supplies carried by Government vessels.

24.—IRRIGATION AND DRAINAGE

GENERAL NOTE.—Data in this section cover irrigation and drainage enterprises in continental United States. "Government irrigation" tables relate only to works of the Bureau of Reclamation or to lands served in whole or in part by works controlled by the bureau. In 1926 the total area so served was 2,508,210 acres. (See Table 524.) Tables 528 to 533 relate to irrigation enterprises of all sorts as reported to the Bureau of the Census.

¹ Area Bureau of Reclamation was prepared to supply water.

² Irrigated crops. Includes 17,250 acres on two projects cropped without irrigation.

³ Excludes 32,660 cropped acreage, valued at \$295,280, cropped without irrigation.

⁴ Source: Salt River Valley Water Users' Association, which operates the project, data for year October, 1925, to September, 1926.

⁵ Includes 18,259 acres reported as vacant, "home tracts," etc., on which no crops were reported.

⁶ Includes 5,780 acres cropped without irrigation.

⁷ Includes 11,470 acres cropped without irrigation.

No. 528.—IRRIGATION: SUMMARY FOR THE UNITED STATES, 1910 AND 1920

[NOTE.—See general note, p. 567. Tables 528 to 532 relate to systematic irrigation enterprises and do not cover small irrigation work by individual farmers. They are based on reports of the management of the enterprises. An enterprise is defined as "an independent irrigation establishment and includes the works for supplying water and the land for which water is supplied, except that the cost and value of the land is not included in the capital invested." Statistics cover all States which have irrigation enterprises]

¹A minus sign (-) denotes decrease.

²Figures for 1909 do not include cost of operation and maintenance for rice-growing districts in Gulf States; consequently, figures for 1909 and 1919 are not comparable.

³When water is pumped, cost of operation and maintenance includes cost of fuel and attendance.

No. 533.—IRRIGATION: ACREAGE AND VALUE OF CROPS GROWN ON IRRIGATED LAND, 1919

[NOTE.—The data in this table are from schedules of individual farmers and not from the managements of irrigation enterprises, as in the case of Table 532. It is believed that the returns are incomplete, some crops actually grown on irrigated land not having been distinguished as such. In the tabulation for each State crops of which the aggregate area in the State was reported as less than 500 acres were omitted, but these form such a small part of the total as to be negligible.]

No. 534.—DRAINAGE OF FARM LANDS AND DRAINAGE ENTERPRISES IN THE UNITED STATES, 1920

[NOTE.—The statistics of drainage on farms in the first part of this table and the statistics of drainage enterprises in the second part are from wholly different sources and are not comparable. The former are from schedules of individual farmers and the latter from a special canvass of organized drainage enterprises. The farm may have artificial drainage without being connected with any general enterprise. Conversely, a general enterprise may facilitate the ultimate removal of water from a farm which has itself no artificial drainage. The statements of farmers as to additional land needing drainage are likely to be less precise than those as to area actually drained artificially. Drainage enterprises comprise public corporations and local improvement districts established under State laws relating to drainage, commercial enterprises draining land for sale, other organizations engaged in extensive land drainage work, and tracts of 500 acres or more drained by individual farm owners. The enterprises in some States include considerable areas of timber and other unimproved land not in farms. The canvass of drainage enterprises did not include any of the northeastern States, and no enterprises were found in Alabama, Virginia, or West Virginia.]

25.—FARMS—GENERAL STATISTICS

[Data in this section relate to continental United States]

No. 538.—POPULATION, FARMS, AND FARM PROPERTY

[NOTE.—The schedule for 1925 did not call for "improved land." The combined total for "crop land," 391,459,902 acres, and "plowable pasture land," 113,567,498 acres, aggregating 505,027,400 acres, corresponds in a rough way to the definition of "improved land" at previous censuses. Figures for 1920 and 1925 relate to Jan. 1, for 1910 to Apr. 15, and for earlier years to June 1]

¹ Estimated.

² Population residing outside of incorporated places having 2,500 inhabitants or more, or in Massachusetts, Rhode Island, and New Hampshire, outside of towns having 2,500 inhabitants or more.

³ The 1925 farm population includes only persons living on farms; the 1920 figures include also those farm laborers (and their families) who, while not living on farms, lived outside the limits of any incorporated place.

⁴ See headnote.

⁵ These figures include the value of fences, tile drains, and other incidental improvements on the land, excluding only the value of buildings.

No. 555.—MORTGAGE STATUS OF FARMS OWNED WHOLLY OR IN PART BY THE OPERATOR

[NOTE.—In 1910 and 1920 the number of all owned farms includes farms with mortgage status not reported, which constituted only 1.2 per cent in 1910 and 9.9 per cent in 1920. The 1925 schedule only called for amount of mortgage, therefore the percentage for 1925 is not available.]

26.—FARM PRODUCTS—VALUE, PRICES, AND FOREIGN TRADE

[Data in this section relate to continental United States except foreign trade statistics which represent the trade of the "customs area" (see general note, p. 444)]

No. 560.—ESTIMATED VALUE OF FARM PRODUCTS

[NOTE.—Values 1897 to 1908 are based on farm prices Dec. 1 while those for 1909 to date are obtained by multiplying crop and animal production by weighted prices for the crop year. Beginning with 1919, a number of items which previously had not been included in making these estimates were added]

No. 582.—MEATS: PRODUCTION, EXPORTS, IMPORTS, AND ESTIMATED CONSUMPTION, AND NUMBER OF ANIMALS SLAUGHTERED UNDER FEDERAL INSPECTION

[NOTE.—All figures except per capita in millions of pounds. Uninspected slaughter is a rough estimate based on ratios established at the census of 1909 and revised after the publication of more accurate data from census and other sources. The edible offal (liver, pluck, etc.) is disregarded. Figures of consumption beginning with 1916 include differences between quantities in storage at beginning and end of year.]

¹ Value of crops with production reported in 1924, exclusive of sugar cane.

² A minus sign (-) denotes decrease and a plus sign (+) an increase.

³ Change in value as actually reported, due to change in production and to lower prices.

⁴ Increase or decrease in value on basis of 1919 prices for both 1919 and 1924 crops. The percentages in this section represent the net quantitative increase or decrease in production.

⁵ Decrease of actual 1924 values over values computed for 1924 on basis of 1919 prices.

No. 609.—ESTIMATED VALUE OF 22 CROPS AND OF ALL CROPS: BY STATES

[NOTE.—The following tabulation gives the estimated total value of 22 crops—corn, wheat, oats, barley, rye, buckwheat, flaxseed, rice, potatoes, sweet potatoes, all hay, tobacco, lint cotton, beans, broomcorn, grain sorghums, hops, oranges, cloverseed, peanuts, cranberries, and apples, in 1923 to 1927, and the calculated value of all crops in 1923 to 1927, based upon ratio of the 22 crops to all crops in the census year 1919. The slight differences in the total value of crops in the United States between Table 560 and this table are due to different methods of estimating. In this table, where each State is shown separately, a more detailed method is used than is practicable in Table 560]

No. 630.—SUGAR BEETS AND BEET SUGAR: PRODUCTION

[NOTE.—Acreage and production accredited to State in which made into sugar. "Crop" represents deliveries to factories and includes a small quantity produced in Canada for United States factories. "Per cent of sucrose in beets" is based on analysis; "Per cent extracted" is per cent of total weight of beets actually recovered by factories. United States totals include data for States not specified, covering 62,000 acres of beets in 1927. Tons of 2,000 pounds]

¹ 1 gallon of sirup taken as equivalent to 8 pounds of sugar.² Totals cover the 10 States listed, except that for 1920 to 1923 Connecticut, which produced only a negligible quantity of sugar and sirup, is included, and for 1927, Ohio and Indiana are excluded. The 11 States included for 1920 to 1923 produced 97.1 per cent of the maple sugar and 97.2 per cent of the maple sirup made in the United States in 1919 as reported by the Bureau of the Census. That bureau also reported 98.1 per cent of the trees tapped in 1919 as being in these States.³ Preliminary.⁴ Not available for 1927.

No. 634.—SUGAR CANE AND SIRUP IN SOUTHERN STATES

[NOTE.—Sorghum, sometimes confused with sugar cane, is not included. For molasses, a by-product of sugar refineries and not included in this table, see Table 631.]

No. 636.—PRODUCTION, CONSUMPTION, EXPORTS, IMPORTS, AND PRICES OF COTTON

[NOTE.—All quantities in thousands of bales, reduced to equivalent of 500 pounds, gross weight. Production statistics relate to the growth year indicated in the stub. Other statistics for the most part relate to the 12-months period roughly corresponding to the marketing of the given crop; there have been minor variations from time to time in the periods covered. An exception appears in the price statistics from 1902 to 1909 which represent marketings of the preceding crop up to Mar. 31. Prices for 1902 to 1909 represent the average grade at New Orleans. Prices from 1910 to date represent average price on the farm of all lint cotton throughout the country. Production, consumption, and exports include linters]

No. 649.—GRAIN RECEIVED AT SIX ATLANTIC PORTS

[NOTE.—Data are for calendar years. Total receipts by ports include flour, meal, and malt reduced to grain equivalent. Receipts at New York, Boston, Philadelphia, and Baltimore include shipments from the West to foreign countries through these ports on through bills of lading. Receipts at Baltimore include flour ground by city millers, and therefore duplicate an equivalent quantity of wheat received in grain.]

No. 661.—LUMBER PRODUCTION: TOTAL AND BY SPECIES

[NOTE.—In the data designated as "Reported production" there are considerable variations in the comprehensiveness of the returns. For 1889 and 1904 custom mills are excluded and beginning with 1910 in each year except 1919 custom mills and mills cutting less than 50,000 board feet are excluded. Custom mills are much less important in recent years than formerly. Apart from the specific exclusions mentioned there are other variations in the completeness of the returns]

² The decline in the fisheries of these waters is due largely to legal restrictions.³ The fishery products of the Mississippi River and tributaries in 1908, as given in the report of the Bureau of the Census, "Fisheries of the United States, 1908," amounted to 148,284,000 pounds, valued at \$3,125,000.⁴ Not included with statistics of the Mississippi River and tributaries prior to 1922. Statistics for 1894 were obtained in connection with a canvass of interior waters for that year.⁵ Including tributaries.⁶ Including minor tributaries.

31.—MINING AND MINERAL PRODUCTS

[Data in this section cover the following areas unless otherwise indicated: Bureau of Census and American Iron and Steel Institute statistics, continental United States; Bureau of Mines production statistics, continental United States, and, for leading products, outlying areas; foreign trade statistics, United States customs area, which includes Alaska, Hawaii, and Porto Rico. Index numbers of mineral production are shown in Table 760, p. 785]

¹ Operators, not enterprises, in 1909.² The totals for all industries include, besides those specified, statistics for the chromite industry in 1919 and for the borax, chromite, grindstone, marl, monazite, and zircon, peat, and precious stones industries in 1909, for which comparable figures could not be given. The value of products of these industries did not exceed one-tenth of 1 per cent of the total for all industries in either year.³ Figures not available.

MINERAL PRODUCTS

¹ From both domestic and foreign ores.

² Content of antimonial lead. Value excluded from metallic total as the value of the antimony is included in the antimonial lead value. Value for antimony other than that in antimonial lead is included in metallic total. Bureau of Mines not at liberty to publish figures.

³ Product from domestic ores only.

⁴ Value not included in total value, since value of product derived therefrom, or of raw material used, is accounted for under other items.

⁵ Including ore used for fluxing.

⁶ Figures not available. Value of products derived therefrom, or raw materials used, is included elsewhere.

⁷ Value included in total value of metallic products. Bureau of Mines not at liberty to publish figures.

⁸ Figures obtained through cooperation with Bureau of the Census.

⁹ Figures not yet available. Estimate of value included in total value of nonmetallic products.

¹⁰ Includes brown coal and lignite, and anthracite mined elsewhere than in Pennsylvania.

¹¹ Tripoli only. Value of diatomite is included in total value of non-metallic products. Bureau of Mines not at liberty to publish figures.

¹² No canvass. Estimate of value included in total value of nonmetallic products.

¹³ Canvass discontinued after 1915. Value of iron ore sold for paint included under "Unspecified."

¹⁴ Sublimed blue lead, sublimed white lead, leaded zinc oxide, and zinc oxide.

¹⁵ In 1915 includes 59,189 tons and in 1920, 23,728 tons of stronger acid, not converted to 60° Baumé.

¹⁶ Talc only. Value of soapstone is included in value of non-metallic products. Bureau of Mines not at liberty to publish figures.

¹Includes much duplication.

²Value of products less cost of materials.

³Returns were not secured for number of salaried employees and it is probable that "wages" included amounts paid for salaries, and "wage earners" may have included some salaried employees.

⁴No data.

⁵This total differs slightly from the corresponding one published in previous reports because of the exclusion here and the inclusion in previous reports of data for rented power other than electric.

No. 700.—PRODUCTS OF STEEL WORKS AND ROLLING MILLS AND OF THE WIRE, TIN-PLATE, AND CAST-IRON PIPE INDUSTRIES

[NOTE.—The overlapping of the industries shown in this table results in considerable duplication. Products of steel works and rolling mills listed under Groups B, C, and D, if used in the same works, are not included, but for items under Group A the quantity of all finished products is shown, although no values have been included for such products consumed in the same works, these being included under Group B. The products chiefly used further in manufacture are wire rods, plates and sheets, black plates for tinning, and skelp. The data given under "Wire" and "Tin and terneplate" include products of these departments of steel works and rolling mills. The original census tables contain much fuller detail as to the disposition of semifinished products.]

No. 706.—COPPER: PRODUCTION, EXPORTS, IMPORTS, AND CONSUMPTION

[NOTE.—All quantities except ore produced in millions and tenths of millions of pounds. Owing to the varying stages of production, the stocks in different classes of hands, the redistribution of copper previously purchased, the recovery and use of old copper, etc., calculations of consumption are somewhat uncertain. The American Bureau of Metal Statistics presents consumption estimates rather widely different from those given below. Consumption as shown represents the quantity of copper withdrawn on domestic account, but not actual domestic consumption, as no account is taken of consumers' stocks.]

No. 710.—REFINED PRIMARY LEAD AND SECONDARY LEAD

[NOTE.—Production in short tons, values except price per pound in thousands of dollars. This table, except the last column, relates to new (primary) lead only, derived from both domestic and foreign ore. General production figures and production of desilverized lead do not include antimonial lead, which is shown in the next to the last column. This table represents exclusively refined lead, while in Table 711 part of the lead from domestic ore is unrefined.]

No. 713.—MANUFACTURES OF NONFERROUS METALS AND ALLOYS,¹ 1925

[NOTE.—This table shows the production of the commodities specified, whether made as primary or as secondary products by the industries reporting them. The census designations of the industries in which these commodities are made as primary products are as follows: Babbitt metal, white metal, type metal, and solder; brass, bronze, and other nonferrous alloys, and manufactures of these alloys and of copper, not specifically classified; lead bar, pipe, and sheet; and smelting and refining, metals other than gold, silver, or platinum, not from the ore]

No. 718.—SILVER: PRICE, AND VALUE OF SILVER IN THE DOLLAR

[NOTE.—The London price represents the equivalent in American money at par of exchange, converted to the basis of the ounce 1,000 fine. The commercial ratio and the value of silver (371½ grains) in the dollar are computed from this London price to and including 1917, but up to that time the New York and London quotations were close together, the departure since being due to the depreciation of the pound sterling; for 1918 to 1924, inclusive, these computations are based on the New York average price. Beginning 1925 the ratio reverts again to the London price]

No. 719.—COAL PRODUCTION: QUANTITY AND VALUE

[NOTE.—Quantities in thousands of short tons; values in thousands of dollars. Includes coal consumed at mines. Figures for anthracite relate to Pennsylvania output only. Bituminous coal includes brown coal and small amounts of anthracite outside of Pennsylvania. Comparatively little coal is held in stock at the mines]

No. 730.—RETAIL PRICES OF GAS IN PRINCIPAL CITIES

[Note.—Prices are net per 1,000 cubic feet of gas for household use. Prices for manufactured gas are based on a family consumption of 3,000 cubic feet per month. In cities where a service charge or a sliding scale is in operation families using less than 3,000 cubic feet per month pay a somewhat higher rate than shown, while those consuming more than this amount pay a lower rate. The figures represent quite closely the actual monthly cost of gas per 1,000 cubic feet to the average wage-earner's family. Prices for natural gas and for manufactured and natural mixed gas are based on a family consumption of 5,000 cubic feet per month.]

No. 731.—NATURAL GAS AND NATURAL-GAS GASOLINE

[NOTE.—Quantities of gas in millions of cubic feet, of gasoline in thousands of gallons; values in thousands of dollars. Production figures for gas refer only to that marketed, in addition to which considerable quantities are used by producers, and large quantities are wasted or lost. Values given are at the point of consumption. Consumption figures by States differ greatly from production figures by reason of interstate transportation.]

No. 739.—PETROLEUM PRODUCTS: OILS RUN TO STILL, OUTPUT OF REFINERIES, STOCKS, EXPORTS, AND APPARENT CONSUMPTION OF PRODUCTS

[NOTE.—Stocks are those in the hands of refiners only. Hence "apparent consumption" represents deliveries by refiners to dealers and consumers. Exports include shipments to noncontiguous territories. Consumption figures for kerosene, gas and fuel oil, and lubricating oil for 1922 to 1927 take into account comparatively small imports not shown separately, and for which no data were available prior to October, 1922. In 1927 these imports were as follows: Kerosene 55,000 barrels; gas and fuel oil, 8,123,000 barrels; lubricants, 7,000 barrels.]

No. 742.—PETROLEUM: PRICES OF CRUDE AND REFINED PRODUCTS

[NOTE.—Prices of crude and fuel oil in dollars per barrel, others in cents per gallon. Compiled by Joseph C. Pogue. The weighted average prices are computed from five principal grades of crude oil at wells, from five markets each for kerosene and gasoline from tank wagon, from five refining locations for fuel oil, and for five grades of lubricating oil]

32.—MANUFACTURES

Data in this section relate to continental United States.

For additional statistics regarding food manufacturing industries and mineral manufacturing industries see sections on Farm Animals and Animal Products, Farm Crops and Foodstuffs, and Mining and Mineral Products.

GENERAL NOTE.—Prior to 1899 census statistics of manufactures were collected decennially and from then to 1919 every five years. Beginning with 1921 data are being collected every two years. For the census of 1899 and previous censuses, data were collected for both factories and hand and neighborhood industries. For the census years 1904 to 1919, inclusive, factories having products valued at \$500 or more were included, but the statistics for 1921 (except as to certain major items shown in Table 754 only), 1923, and 1925 relate only to establishments having products valued at \$5,000 or more. However, in 1921, establishments having products valued at \$500 or more but less than \$5,000, while constituting 21 per cent of the total number of establishments, employed only six-tenths of 1 per cent of the total number of wage earners, and had an output of only three-tenths of 1 per cent of the total value of the product.

The statistics for automobile repairing, collected for 1914 and 1919, have been excluded from Table 753 and from Tables 755 to 757. Data for the "Coffee and spice, roasting and grinding" industry have also been omitted for all years in the third section of Table 753.

Figures for wages and value of materials and products are greatly affected by changes in the buying power of money or, in other words, by the general levels of prices and wages.

Figures of total cost of materials and total value of products for many individual industries, for all groups of industries and especially for all industries combined, involve much duplication. This is due to the use of products of a given establishment as material for another in the same or a different industry.

¹ No comparable data.

² Not called for on schedule.

³ Data approximately the same as given for factories and hand and neighborhood industries, as the amount of horsepower used in the latter is small.

⁴ Includes data for all establishments reporting products valued at \$500 or more. These items are not tabulated separately for establishments reporting products valued between \$500 and \$5,000.

¹ To make the percentages for the numbers of establishments comparable, those for all 4 years have been based on the numbers of establishments reporting products valued at \$5,000 or more. The percentages for wage earners and value of products, however, have not been similarly adjusted, the comparability of these percentages having been affected very slightly by the omission of small establishments in 1923 and 1925.

² No data for establishments with products under \$5,000 in value have been tabulated for 1923 and 1925.

³ The data for the 53,999 establishments in the "Less than \$5,000" class are not included in other tables.

⁴ Data for \$500,000 to \$1,000,000 class and \$100,000 to \$500,000 class combined.

¹ Statistics for 1919 and 1914 in the case of a few groups differ from those in certain previous reports because of the exclusion here and the inclusion in the previous reports of data for rented power other than electric.

² No data for the "Coffee and spice, roasting and grinding" industry were tabulated at the census for 1921, and therefore the statistics for the earlier years have been adjusted by deducting the figures for this industry.

³ The manufacture of asbestos textiles; formerly treated as an industry in Group 2, is now classified as a branch of the "Asbestos products, other than steam packing or pipe and boiler covering" industry, in Group 9. The statistics for 1923 and earlier years have accordingly been adjusted to include the data for asbestos textiles in Group 9.

⁴ The manufacture of engravers' materials, formerly classified in Group 16, is now classified in Group 7. The statistics for 1923 and earlier years have accordingly been adjusted to include the figures for this industry in Group 7.

⁵ The fact that the increase in the chemical group is less than in most others is due to the prohibition amendment, greatly reducing the production of distilled, fermented, and vinous liquors. Excluding these, the principal items for 1914 and 1925 become, respectively, as follows: Wage earners, 278,497 and 379,416; wages, \$166,758,000 and \$504,286,000; value of products, \$2,019,877,000 and \$6,376,885,000; value added by manufacture, \$715,013,000 and \$2,232,304.

No. 757.—MANUFACTURES: SUMMARY FOR INDIVIDUAL INDUSTRIES

[NOTE.—The figures for some industries do not fully represent the totals properly assignable to them, while those for some other industries are overstated, as in many cases establishments manufacture two or more classes of commodities, and figures for the entire establishment are placed in the industry in which it is primarily engaged. In figures for cost of materials and value of products extensive duplication occurs due to the use of the products of one establishment as the materials of another. As to comparability of figures, see general note, p. 749. Data for primary horsepower were not collected in 1921. Horsepower figures for 1914 and 1919 in certain industries differ from those in previous reports because of exclusion here and inclusion in certain previous reports of data for rented power other than electric. For totals for all industries and for 16 great groups, see Table 756]

¹ At the census of 1923 a number of important establishments failed to make returns, consequently the figures for this year are incomplete and are not comparable with those of 1925 or those prior to 1923.

² No data for the coffee and spice, roasting and grinding industry were tabulated at the census for 1925, therefore statistics for the earlier years have been adjusted by deducting the figures for this industry.

³ Includes cereal beverages ("near beer" and similar soft drinks) for 1925, 1923, and 1921, but not for earlier years.

⁴ The manufacture of asbestos textiles, formerly treated as an industry in this group is now classified as a branch of the "Asbestos products, other than steam packing or pipe and boiler covering" industry, p. 768, therefore data have been excluded from statistics for textile mill products for 1923 and earlier years.

⁵ Because of a change in classification no comparable statistics can be given for prior years.

⁶ "Gloves and mittens, cloth" included in "furnishing goods, men's," for 1914.

⁷ Formerly reported as "clothing, horse."

⁸ "Asphalted-felt-base floor coverings" included in "linoleum" for 1914.

⁹ Includes "oakum" for 1923 and 1914.

¹⁰ Similar products are manufactured to a large extent by steel works and rolling mills. The figures here given refer only to establishments engaged primarily in the manufacture of the specified classes of products.

¹¹ Included in "foundry and machine shop products" for 1914. (See p. 771.)

¹² Data for establishments engaged in job welding are included in the figures for 1923 and earlier years, but are not included for 1925, as job welding establishments were not canvassed for that year.

¹³ "Tin plate and terneplate" are treated as products of the "Iron and steel, steel works, and rolling mills" industry.

¹⁴ Classified in other industries for 1925.

¹⁵ Includes "show cases" and "store and office fixtures."

¹⁶ Formerly reported as "looking-glass and picture frames."

¹⁷ "Rubber goods not elsewhere classified" includes data formerly classified as "belting, rubber," for 1914 to 1923. For 1919 and 1914 also includes "rubber tires and inner tubes," data for which were not specifically called for at those censuses.

¹⁸ The manufacture of engravers' materials, formerly included with miscellaneous industries, is now classified with industries relating to printing and publishing. The statistics for 1923 and earlier years have been revised accordingly.

¹⁹ Includes 183 establishments classified under "Coal-tar products" for 1919.

²⁰ "Rayon" included in "Chemicals not elsewhere classified" for 1923 and prior years.

²¹ As to effect of the prohibition amendment, see note 5 to Table 756, p. 752. At the 1919 and 1921 censuses the malt-liquor industry was confined to cereal beverages (near beer and similar soft drinks) and in 1923 these were included under "Beverages." (See p. 756.)

²² See footnote, 4.

²³ For 1914 "millstones" are included in "all other industries," p. 776.

²⁴ Formerly reported "Brick and tile, terra cotta, and fire-clay products."

²⁵ Includes data for bells, shown as a separate industry under "Metal Products" in previous reports.

²⁶ Not separately reported in 1914.

²⁷ None reported for 1925.

²⁸ Figures for 1925 not strictly comparable with those for 1923 due to the classification of the reports of several establishments in other industries.

²⁹ No comparable data.

³⁰ "Foundry and machine-shop products not elsewhere classified" include for 1914: "Iron and steel, processed," "machine tools," "steel barrels, kegs, and drums," and "textile machinery and parts," data for which were not specifically called for at that census.

³¹ Figures for 1923 not strictly comparable with those for 1925 because of changes in classification.

³² Data for establishments engaged solely in repair work are included for 1921, 1919, and 1914 but not for 1925 and 1923. The differences between the figures for 1923, 1921, 1919, and 1914 and those published in previous reports are due to the inclusion here and the exclusion from the previous reports of data for wheelbarrows.

³³ See footnote, 18.

³⁴ "Motion pictures, not including projections in theaters" includes for 1919 data formerly reported as "motion picture projection films," a subclassification of "photographic materials."

³⁵ At the census for 1925 it was possible, without disclosing the operations of individual establishments, to classify all establishments in the appropriate industries, and therefore no "All other industries" items are shown for 1925. For preceding census years the distribution was as follows: For 1923, "pulp from fiber other than wood," 2 establishments; "tin plate andterneplate, not made in rolling mills," 3. For 1921, "butter, reworking," 3; "corkum," 2; "ordnance and accessories," 3; "pulp, from fiber other than wood," 4; "tin plate andterneplate," 4. For 1919, "butter, reworking," 5; "ferroalloys," 30; "ordnance and accessories," 26; "pulp, from fiber other than wood," 5; "straw goods, not elsewhere classified," 1; "tin plate andterneplate," 24; "whalebone cutting," 1; and "wood carpet," 3. For 1914, "butter, reworking," 17; "millstones," 2; "ordnance and accessories," 2; "pulp from fiber, other than wood," 3; "pulp wood," 20; "tin plate andterneplate," 31; "whalebone cutting," 1; and "wood carpet," 6.

No. 759.—SUMMARY FOR ALL MANUFACTURING INDUSTRIES COMBINED: BY GEOGRAPHIC DIVISIONS AND STATES

[NOTE.—As to comparability of figures for 1921, 1923, and 1925 with those of previous years, see general note p. 749. Data for horsepower not collected in 1921. No data for the "Coffee and spice, roasting and grinding" or the "Automobile repairing" industry, nor for establishments with products valued at less than \$5,000, in any industry, are included in the statistics here given for 1925, 1923, or 1921. For 1919 and 1914 the data for the two industries named have been eliminated from the United States totals for all items, as published at the censuses for those years, and the data for establishments with products valued at less than \$5,000 have been eliminated for all items except wages and primary horsepower. The figures for geographic divisions and States have not, however, been similarly adjusted.]

No. 762.—TEXTILE MANUFACTURES: PRODUCTION

[NOTE.—In general, most of the articles listed are finished products, but large quantities of partly finished products, especially yarn, made for sale to other establishments of the same or other branches of the textile industry are included. This involves considerable duplication in total value of products and in cost of material. The products listed under each branch of the textile industry represent only the output of concerns classified as engaged primarily in that branch. Certain quantities, usually small, of some of the products are also made in establishments classed under other branches. In 1925, these amounts were as follows: Cotton goods, \$5,401,533 (not including cordage and twine mills); cotton-lace goods, \$312,820; other knit goods, \$2,265,816; silk goods, \$4,729,234; woolen and worsted goods, \$9,595,481; felt goods, \$803,328; wool-felt hats, \$472,093; carpets and rugs, \$150,572; cordage and twine and jute and linen goods, \$10,956,594; fur-felt hats, \$526,613; oilcloth, linoleum, and asphalted-felt-base floor coverings, \$1,582,984; artificial leather, \$885,312.]

No. 767.—CHEMICALS: PRODUCTS MADE FOR SALE

[NOTE.—The table includes products made in all industries, sometimes as by-products. In addition to quantities shown in the table, made for sale, large quantities of certain chemicals, especially acids, are made and consumed in further processes in the same establishment. There is considerable duplication in the total value of products due to the use of products sold by one establishment as materials for other establishments manufacturing chemicals.]

No. 769.—MISCELLANEOUS INDUSTRIES INVOLVING CHEMICAL PROCESSES: CENSUS STATISTICS OF PRODUCTS

[NOTE.—Only major products of a fairly sharply defined character, and in general only those for which quantitative data are available are shown. See also chemicals (Table 767), petroleum refining (Table 738), manufactured gas (Table 727), etc. Semifinished products made for consumption in the same establishment are not included, except where otherwise stated, but there is some duplication in total value of products in certain branches, due to the use of such products as materials by other establishments in the same industry. Data include, except where otherwise stated, not only products of the major industry specified but also similar products made in other industries.]

No. 777.—COTTON SPINDLES, COTTON CONSUMPTION, AND STOCKS

[NOTE.—The statistics for 1915 to 1927 relate to the 12 months ended July 31, and those for prior years to the 12 months ended Aug. 31. South refers to cotton growing States. Consumption is expressed in running bales, counting round as half bales, except that all figures, 1840 to 1870, inclusive, and foreign cotton in all years are in equivalent 500-pound bales. The number of active spindles represents spindles operated for any time, however short, during the year, and is therefore an unsatisfactory measure of activity of the industry.]

No. 778.—COTTON SPINDLE HOURS AND COTTON CONSUMPTION

[NOTE.—Per cent of capacity represents ratio between (1) the actual number of spindle hours including overtime, double shifts, and part time, and (2) the total number of spindles in place multiplied by the number of hours per month in a single shift at normal full working time. Consumption includes both domestic and foreign cotton]

No. 784.—LEAF TOBACCO: AMOUNTS CONSUMED IN THE MANUFACTURE OF CIGARS, CIGARETTES, CHEWING AND SMOKING TOBACCO, AND SNUFF

[NOTE.—All figures in thousands of pounds. Figures are unstemmed equivalent of all tobacco, stemmed, unstemmed, and scrap. Beginning with 1922 the Commissioner of Internal Revenue converted stemmed tobacco used in the manufacture of cigars and cigarettes to unstemmed at the ratio of 3 pounds stemmed to 4 pounds unstemmed. In previous years conversion was at the ratio of 3 to 5. In the following table figures are given on the new basis beginning 1918. On the old basis the quantity used for cigars in 1918 was calculated at 162,277,000 pounds, and that for cigarettes at 177,379,000 pounds.]

No. 787.—BUILDING PERMITS ISSUED IN PRINCIPAL CITIES

[NOTE.—Figures do not include data for installation permits (those for installing boilers, signs, etc.) which are not strictly building operations but which were included in the figures originally published for 1923 and 1924. These permits are rather numerous, but in value they are of small amount. The number figures represent the number of buildings covered by permits issued (new construction and repairs, etc.) rather than the number of permits. The cities shown include all cities having a population of 50,000 or over in 1920, and some cities having a population of 25,000 or over. The estimated cost of buildings authorized in 130 identical cities since 1914 is as follows: 1914, \$748,209,763; 1915, \$776,228,606; 1916, \$980,323,685; 1917, \$649,961,875; 1918, \$401,565,104; 1919, \$1,258,875,108; 1920, \$1,842,630,686; 1921, \$1,602,232,041; 1922, \$2,427,734,079; 1923, \$2,959,051,398; 1924, \$3,068,161,900; 1925, \$3,550,572,815; 1926, \$3,836,102,350; and 1927, \$2,992,454,182. Buildings authorized by permit are not always actually constructed, and actual cost of those constructed may differ considerably from that originally estimated.]

¹ Based upon the cost of steel, cement, lumber, and rates paid common labor. The prices are weighted on the basis of the total production of steel, cement, and lumber, and the total supply of common labor.

² Designed to show the relative changes in the cost of constructing a standard concrete factory building.

³ Prices of materials entering into the construction of a six-room house in 45 cities.

No. 790.—BUILDING CONTRACTS AWARDED

[NOTE.—Covering small towns and rural districts as well as large cities. Certain public works (roads, etc.) not in the nature of buildings, have no floor space reported. The 36 States include all except Washington, Idaho, Montana, Oregon, Utah, Wyoming, Nevada, California, Arizona, New Mexico, and Texas, and comprise about seven-eighths of the total building contracts in the United States. The totals for the 27 States prior to 1919 cover only industrial and residential buildings]

No. 794.—DEVELOPED AND POTENTIAL WATER POWER OF THE UNITED STATES

[NOTE.—Data for developed water power cover capacity of actual installation of water wheels and turbines, on Jan. 1, 1923, in plants of 100 horsepower or more. In November, 1921, the capacity of installation amounted to 7,926,958 horsepower and in March, 1925, to 10,037,655. The figures, given for potential power are estimates showing the 24-hour horsepower available 90 per cent of the time and 50 per cent of the time at an over-all efficiency of 70 per cent at all developed and undeveloped sites. These figures for potential power are not directly comparable with those for developed power, because developed power is usually given in terms of the capacity of the installed water wheels or turbines, which may be several times the potential power available 90 per cent of the time. Probably with complete development of the water-power resources of the whole country the installed capacity would amount to 80,000,000 horsepower or more.]

¹ The fuel equivalent for water power is calculated from the reported horsepower of installed water wheels. Prior to 1890 data were unsatisfactory, but estimates are included in the total.

² Based on the amount of coal displaced by gas, as estimated by the gas companies at the time.
