<sup>14</sup> Because of changes in classification, the statistics for 1931 and prior years are not strictly comparable with those for 1933. The figures in italics for 1931 have been adjusted for comparison with those for 1933.

<sup>15</sup> Similar products are manufactured to a considerable extent by departments of "Steel works and rolling-mill products" industry. The figures here given refer only to establishments engaged primarily in the manufacture of the specified classes of products.

<sup>19</sup> "Tin plate and terneplate" is treated as part of the "Steelworks and rolling-mill products" industry.

<sup>1</sup> Because of a change in classification, no comparable figures can be shown for earlier years.<sup>2</sup> Revised; revision not carried into total.<sup>20</sup> Not including watch cases.<sup>21</sup> Establishments classified in the "Jewelers' findings and materials" industry for 1931 were, for the most part, classified in the "Jewelry" industry in prior years; figures for the latter industry for 1931 are, therefore, not strictly comparable with those for prior years. Figures shown in italics have been adjusted for comparison with those for 1931.

<sup>2</sup> Revised; revision not carried into total.<sup>22</sup> Prior to 1931 this industry covered radio apparatus and tubes included for 1931 in a new classification, "Radio apparatus and phonographs." Figures for 1931 are, therefore, not comparable with those for prior years; figures shown in italics were adjusted for comparison with those for prior years.<sup>23</sup> A new classification at the census for 1933, formerly a part of "Foundry and machine-shop products, n. e. c." The figures for 1931 were compiled for comparison with 1933.<sup>24</sup> At the census for 1933 certain establishments formerly classified in this industry, were classified in the "Elevators and elevator equipment" and "Refrigerators and refrigerating and ice-making apparatus" industries, and the figures in italics for 1931 have been adjusted for comparison with 1933. At the census for 1929 certain establishments which had been formerly classified in this industry were classified as "Machine-tool accessories and machinists' precision tools and instruments." The figures in italics for 1927 were adjusted for comparison with 1929. This industry includes for 1931 and 1933 "Iron and steel processed", formerly treated as separate industry in the "Iron and steel" group. Figures for prior years have not been revised to include such data.<sup>25</sup> For 1929 and 1931 certain establishments, formerly classified in this industry, were included in a new industry classification "Machine-tool accessories and machinists' precision tools and instruments." Figures for 1929 and 1931 are, therefore, not strictly comparable with those for prior years. Figures in italics have been adjusted for comparison with those for later years.<sup>26</sup> This classification covers "Refrigerators and refrigerator cabinets, exclusive of mechanical refrigerating equipment" and "Refrigerators, mechanical", formerly separate classifications in groups 3 and 13, respectively, and also includes, beginning 1931, statistics for a small number of establishments producing industrial ice-making and refrigerating machinery, formerly included in "Foundry and machine-shop products." As figures for 1927 and 1929 do not include the establishments producing industrial ice-making and refrigerating machinery, they are not comparable with those for later years.<sup>27</sup> No comparable data for prior years. Radio apparatus was formerly included in "Electrical machinery, apparatus, and supplies" and "Phonographs", was a separate industry in the "Miscellaneous industries" group.

<sup>6</sup> Owing to a change in classification, data for 1929 are not strictly comparable with data for later years.

<sup>14</sup> Because of changes in classification, the statistics for 1931 and prior years are not strictly comparable with those for 1933. The figures in italics for 1931 have been revised for comparison with 1933.

<sup>28</sup> At the census for 1931 trailers were included for the first time in the classification "Motor-vehicle bodies and motor-vehicle parts"; formerly these were included in "Motor vehicles, not including motor cycles." The statistics for 1929 in italics have been revised for statistics comparison with 1931 and 1933.

<sup>29</sup> Figures include internal-revenue tax; figures in italics for 1931 exclude internal-revenue tax and are comparable with those for earlier years.

<sup>30</sup> No comparable figure because of the fact that the amount of internal-revenue tax is included in the "Cost of materials" for 1931 and 1933, but not for prior years, while this tax is included in the figures for "Value of products" for all years. ("Value added by manufacture" equals "value of products" less "cost of materials, etc.")

<sup>31</sup> Separate data for cigarettes and cigars for 1925 are not available; combined data are shown below.

<sup>32</sup> Combined figure for cigarettes and cigars for 1927 is 35,810; separate figures are not available.

<sup>33</sup> Separate statistics for cigarettes and cigars for later years are shown above.

# No. 776.—SUMMARY FOR ALL MANUFACTURING INDUSTRIES COMBINED: By GEOGRAPHIC DIVISIONS AND STATES

NOTE.—The United States totals for 1927 to 1931 have been revised to exclude statistics for "Coffee and spices, roasting and grinding" and "Peanuts, walnuts, and other nuts, processed or shelled", no data having been collected for these industries at the 1933 census. No data for "Coffee and spices, roasting and grinding" were collected for the United States as a whole at the 1925 census, and there are no comparable figures for "Peanuts, walnuts, and other nuts, processed or shelled" for years prior to 1927. These revisions have been made for divisions and States for the years 1929 and 1931 only. Data for "Poultry killing and dressing" are included for all years except 1927, for which year this industry was not canvassed. Statistics for horsepower were not collected for 1931 and 1933

<sup>1</sup> Includes internal-revenue tax paid by tobacco manufacturers amounting to \$239,125,000 for 1931 and \$205,689,000 for 1933.

<sup>2</sup> The "Cost of materials" does not include internal-revenue tax paid by tobacco manufacturers and the "Value added by manufacture" for these years is, therefore, overstated by the amount of such tax.

## No. 778.—INDEXES OF INDUSTRIAL PRODUCTION

NOTE.—Monthly average, 1923-25=100. The manufactures index covers 49 industries and the minerals index 8, prior to 1932. Indexes for 1932 to 1936 exclude copper (mined and smelted) and for 1935 and 1936 also lumber cut, data for which are not available for those years, and are, therefore, not strictly comparable with figures for earlier years. The monthly indexes in this table and those in table 779 have been adjusted for seasonal variations and for the number of working days in the month

## No. 780.—TEXTILE MANUFACTURES: PRODUCTION

NOTE.—In general, most of the articles listed are finished products, but large quantities of partly finished products, especially yarn, made for sale to other establishments of the same or other branches of the textile industry are included. This involves considerable duplication in total value of products and in cost of materials

<sup>1</sup> Figures beginning 1927 are not strictly comparable with earlier years owing to the fact that large quantities of heavy footwear now included with men's shoes were included with "Athletic," prior to 1927.

<sup>2</sup> Includes satin, canvas, etc., but excludes footwear with fabric uppers and rubber soles. Figures for the latter for certain census years are shown in table 787, page 775.

<sup>3</sup> Includes slippers and moccasins (all leather and part leather, felt, etc.) for house wear.

<sup>4</sup> Not reported separately; included with "all other".

<sup>5</sup> Not reported separately; included with other classes.

## No. 784.—CHEMICALS: PRODUCTS MADE FOR SALE

NOTE.—In addition to quantities shown in the table, made for sale, large quantities of certain chemicals, especially acids, are made and consumed in further processes in the same establishments. There is considerable duplication in the total value of products due to the use of products sold by one establishment as materials for other establishments manufacturing chemicals. Tons are of 2,000 pounds, except as noted

<sup>1</sup> For reason of adjustment see last paragraph, general note, p. 733. No adjustment was necessary for the Bureau of Mines data.

<sup>2</sup> Includes for 1931 approximately 80,000,000 pounds of carbon dioxide piped to plants making dry ice; for 1933, approximately 64,500,000.

<sup>3</sup> Basis 50 percent.

<sup>4</sup> Production in "Chemicals not elsewhere classified", "Fertilizers", "Explosives", and "Smelting and refining, zinc" industries only. Data for production from "Smelting and refining, copper and lead" industry in 1933 are not available; figures in the columns "1931 comparable with 1933" have been adjusted accordingly.

<sup>5</sup> Not including byproduct crudes made in coke plants and gas works.

<sup>6</sup> Ammonia (N H<sub>3</sub>) content.

<sup>7</sup> Articles made in the producing establishments in the "Chemicals not elsewhere classified" industry.

<sup>8</sup> In addition fabricated articles valued at \$716,591 were made by pyroxylin-producing establishments in other industries.

<sup>9</sup> No comparable data.

<sup>10</sup> Production of crude potassium salt from original sources in 1933, as reported by 4 plants to the Bureau of Mines, Department of the Interior, amounted to 333,110 tons; content of K<sub>2</sub>O 63,880 tons.

<sup>11</sup> Not including ethyl, glycerol (see Glycerine), nor methanol produced by the distillation of wood.

<sup>12</sup> Tons of 2,240 pounds.

<sup>13</sup> Because of intergroup duplication the sum of the various products exceeds the total value of all products by this amount. For example, nitric acid is shown under "Acids" and is also included with "Other nitrogen compounds", likewise phenolic resins are included with "Coal-tar products" and also shown under "Plastics."

## No. 785.—MISCELLANEOUS PRODUCTS INVOLVING CHEMICAL PROCESSES

NOTE.—Semifinished products made for consumption in the same establishment are not included, but there is some duplication in total value of products in certain branches, due to the use of such products as materials by other establishments in the same industry. Tons are of 2,000 pounds.

<sup>1</sup> For reasons of adjustment see last paragraph of general note, p. 733.<sup>2</sup> No comparable figures available because of changes in classification of products at the 1933 census.<sup>3</sup> Not including pharmaceutical specialties dispensed on physicians' prescriptions or through physicians. Patent and proprietary packaged medicines includes \$21,799,000 for 1929 and \$22,432,000 for 1931 for antiseptics reported as "Proprietary compounds." Schedules for these years did not provide for reporting antiseptics under the head of "Patent and proprietary packaged medicines."<sup>4</sup> No comparable figures available. The value published for 1929 (\$5,093,000) included that of deodorants for human use which are now included with "Other industrial compounds."<sup>11</sup> Not including production in the "Chemicals not elsewhere classified" industry.

Not strictly comparable with figures for 1931 and 1933. See footnote 9.

<sup>1</sup> The inclusion of this item results in duplication in the total value of products since it represents amounts paid by publishers for work done for them, and consequently enters into the production cost and the "Value of products" (receipts for subscriptions and sales and advertising), reported by the publishers.

<sup>2</sup> In addition, lithographed or engraved labels, tags, and greeting cards valued at \$28,681,000 in 1931 and \$23,745,000 in 1933 were reported by establishments in other industries.

## No. 790.—MACHINERY: VALUE OF THE PRINCIPAL CLASSES MANUFACTURED

NOTE.—Values in thousands of dollars. The various classes of machinery listed are products of a number of industries, such as "foundry and machine-shop products," "agricultural implements," "aircraft," "electrical machinery, apparatus, and supplies," etc. This table is not an industry presentation, but a special presentation giving value of products for groups designated. The values are in part duplicated in other tables in this abstract, such as tables 791 to 795.

| Class                                                                                   | 1925        | 1927        | 1929        | 1931        | 1933     |

<sup>1</sup> The values of "Systems complete without cabinets" (see footnotes 2) and "Cabinets, display cases, etc." are duplicated in the totals to which this footnote is indexed, to the extent to which these products were sold to manufacturers in the industry, or were transferred from one plant to another under the same ownership for assembly and sale as complete refrigerators.

<sup>2</sup> The term "System", as used here, refers to a complete assembly, consisting of "High sides" and "Low sides" with motor, control, and expansion valve or its equivalent. The cabinet is not a part of the system.

<sup>3</sup> Data incomplete.

<sup>4</sup> No data.

<sup>5</sup> Figures combined to avoid disclosing output of an individual manufacturer of absorption-type refrigerators.

## No. 798.—COTTON SPINDLES, COTTON CONSUMPTION, AND STOCKS

NOTE.—The statistics for 1915 to 1936 relate to the 12 months ended July 31 and those for prior years to the 12 months ended Aug. 31. Consumption is expressed in running bales, counting round as half bales, except that all figures, 1840 to 1870, inclusive, and foreign cotton in all years are in equivalent 500-pound bales. The number of active spindles represents spindles operated at some time during the year, and is not as satisfactory a measure of activity of the industry as active spindle hours.

# No. 803.—LEAF TOBACCO: AMOUNTS CONSUMED IN THE MANUFACTURE OF CIGARS, CIGARETTES, CHEWING AND SMOKING TOBACCO, AND SNUFF.

NOTE.—All figures in thousands of pounds. Figures represent the equivalent in unstemmed leaf tobacco of stemmed leaf or scraps, cuttings, and clippings. In the following table the tobacco used in the manufacture of cigars and cigarettes was converted on the basis of 3 pounds of stemmed leaf or scraps, etc., to 4 pounds of unstemmed beginning 1915 (conversion prior to 1915 was at the ratio of 3 to 5) and of tobacco and snuff beginning 1903. For 1896 to 1902, tobacco used in manufactured tobacco and snuff was shown only under two heads, namely "leaf" and "scraps." It is probable that stemmed leaf was included with unstemmed tobacco under the head of "leaf" without the one kind being converted to the equivalent in the other. The conversion ratio of 3 to 4 was applied only to "scraps" for these years. Data exclude tobacco used in bonded manufacturing warehouses. See table 802

<sup>1</sup> In computing taxable gallons all fractional parts of a proof gallon less than one-tenth are excluded.

<sup>2</sup> Production represents the amount removed from fermenters including wine that is removed for use as distilling material in the production of brandy.

<sup>3</sup> Includes champagne, other sparkling wines, and artificially carbonated wine. The tax is payable "on each one-half pint or fraction thereof" of "each bottle or other container."

<sup>4</sup> Barrels of not more than 31 gallons.

<sup>5</sup> Contains less than one-half of 1 percent alcohol by volume.

<sup>6</sup> Includes data for Hawaii; industrial alcohol figures also include data for Puerto Rico beginning 1931.

<sup>7</sup> No data compiled by Bureau of Internal Revenue.

<sup>8</sup> No legal production.

<sup>9</sup> Includes 1,583,788 barrels produced prior to Apr. 7 (effective date of the Act of Mar. 22, 1933).

<sup>10</sup> Alcoholic content limited to 3.2 percent by weight prior to Dec. 5, 1933.

<sup>11</sup> Subject to revision.

<sup>12</sup> Does not include brandy withdrawn for the fortification of sweet wine.

<sup>13</sup> Total withdrawals; tax law repealed, effective May 10, 1934.

<sup>14</sup> In thousands of proof gallons.

<sup>15</sup> Does not include 40,206 gallons (regulation) of ethyl alcohol (pure grain) for 1935 and 44,289 for 1936, not convertible into proof gallons.

<sup>16</sup> In thousands of wine gallons.

## No. 806.—MOTION-PICTURE PRODUCTION: SUMMARY OF CENSUS STATISTICS

NOTE.—All money figures are in thousands of dollars. Data represent the activities of the motion-picture studios and laboratories. They do not include the distribution of films and their projection in theaters. No data are included for establishments which reported less than \$5,000 as the cost of work done. The motion-picture industry has been canvassed, since 1921, in connection with the biennial census of manufactures. It is not, however, a manufacturing industry, but was treated as such prior to 1931.

<sup>1</sup> Includes cost of studio supplies, containers for films, fuel, and purchased electric energy.<sup>2</sup> Data cover "productive employees" only. These include all wage earners and a part, but not all of the salaried employees. Figures are not, therefore, comparable with either the wage-earner figures or with the total number of persons engaged. Data for other years cover all classes of employees.<sup>3</sup> Combined to avoid disclosing approximations of data for individual establishments.<sup>4</sup> Not reported separately.

<sup>1</sup> Revised figures. The data previously issued include a number of concerns dealing in grain and petroleum and its products that were erroneously reported and classified in the wholesale census.

<sup>2</sup> The 1929 data have been corrected for certain changes in classification.

<sup>3</sup> For comparison purposes, wholesaling manufacturers and district and general sales offices, except those dealing in petroleum and its products, have been included in manufacturers' sales branches, 1929.

<sup>4</sup> 1929 equivalent not available.

<sup>5</sup> Figures for 1929 include district and general sales offices dealing in petroleum and its products.

<sup>6</sup> Figures for 1933 include 1,438 cooperative elevators with net sales amounting to \$83,193,000.

<sup>1</sup> Includes leased departments, market and roadside stands, itinerant vendors and rolling stores, cooperatives, a few retailer-wholesalers (whose business is evenly divided between the two), and country buyers who also operate retail stores. The latter were difficult to identify from the 1933 schedule, and the comparison between 1929 and 1933 is subject to qualification in that the entire 1929 figures for retailer-country buyers are included for comparison purposes in figures for independents.

<sup>2</sup> One large national chain with total sales in 1933 (published in the press) of more than \$78,000,000 so changed the character of its business since 1929 that it now is classified as a department-store chain whereas it was a variety-store chain before.

<sup>3</sup> Data not available for 1929.

<sup>4</sup> Restaurants and eating places in the 1933 tabulation include lunch counters and refreshment stands in addition to restaurants, cafeterias, and lunch rooms. The 1929 figures include only the latter three kinds of restaurants and, therefore, are not strictly comparable, but the new basis is considered preferable for future comparisons, in order to distinguish eating places as such from drinking places.

<sup>5</sup> Figures for 1933 include two business classifications—hardware stores, and hardware and farm implement dealers. The 1929 figures include only the former and are not comparable with figures for 1933.

<sup>6</sup> Data for "Household appliance stores" and "Motor-vehicle dealers" included for 1929 but not for 1933.

## No. 818.—INDEXES OF THE VALUE OF SALES OF CHAIN STORES

NOTE.—The combined index for all groups includes in addition to the apparel and grocery chains shown in the table, 6 five-and-ten (variety), 2 drug, and 2 (beginning January 1936, 3) shoe chains. Indexes are based on daily average sales. Each monthly index is expressed as a percentage of the average for the same month of the base period. Allowance for the fluctuating date of Easter is made in the case of apparel, variety, and shoe chains. No allowance has been made for changes in the number of stores operated

## No. 819.—INDEXES OF DOLLAR VALUES OF AUTOMOBILE RETAIL SALES, VARIETY STORE SALES, AND RETAIL SALES OF GENERAL MERCHANDISE IN SMALL TOWNS AND RURAL AREAS

NOTE.—Indexes of automobile sales are based on unit sales figures reported monthly to the Automobile Manufacturers' Association, which represent over 95 percent of all dealer's sales. The unit sales figures are converted to dollar volume by the use of a computed "average realized price." Indexes of sales in small towns and rural areas are based on figures furnished by three mail-order companies for sales by mail only and by a large group of chain units operating in small towns and cities which serve the rural population. Sales of reporting concerns represent about one-fifth of all general merchandise sales in places of less than 30,000 inhabitants. Indexes of variety store sales are based on figures furnished by chain organizations, doing more than 75 percent of the business in the variety field. Adjustment has been made for changes in the number of stores operated by these companies so that the indexes reflect sales changes for a constant number of stores. All indexes are computed from dollar sales reduced to a daily average basis. In computing the index of automobile sales, equal weight is given to all days of the month, while in computing the other two indexes, allowance is made for the varying number of business days and the varying sales importance of the different days of the week. In addition, all monthly indexes are adjusted for seasonal changes. No allowance is made for the changing date of Easter

# No. 824.—POWER LAUNDRIES, CLEANING AND DYEING ESTABLISHMENTS, AND RUG-CLEANING ESTABLISHMENTS: SUMMARY OF CENSUS STATISTICS

NOTE.—All money figures in thousands of dollars. Statistics cover establishments reporting receipts of \$5,000 or more. Data for power laundries relate to commercial laundries. Data for cleaning and dyeing establishments are restricted to establishments using mechanical power; they include cleaning and dyeing departments of laundries where separate data could be obtained. Rug-cleaning, which was given a separate classification in 1933, was treated in general as an activity of the power laundry industry at prior censuses; statistics include rug-cleaning departments of laundries and of cleaning and dyeing plants so far as they were reported separately. Data for 1933 are incomplete as about 15 percent of the laundries and 24 percent of the cleaning and dyeing establishments that had reported in 1931 failed to supply any information as to their status or activities in 1933. The laundries that failed to report accounted for around 8 percent of the 1931 totals for number of wage earners and receipts for work done for all laundries, while the cleaning and dyeing establishments that did not report accounted for about 15 percent of the 1931 totals for these two items for cleaning and dyeing establishments.

## No. 825.—CONSTRUCTION CONTRACTS AWARDED

NOTE.—Data compiled from reports covering contracts awarded in small towns and rural districts as well as large cities. Public works and public utilities cover some projects not susceptible to measurement in terms of floor space, such as highways, pipe lines, subways, etc. Statistics for the 37 States were not compiled for years prior to 1925, but available figures covering a varied number of States for earlier years have been published in the 1932 and previous issues of this publication

<sup>1</sup> Owing to a change in the classification, data for airports have been excluded from the "Commercial" class and included with "Public utilities" beginning 1930. Separate figures for airports are not available prior to 1930.

<sup>2</sup> Owing to a change in the classification figures for the "Factories" class exclude data for power plants for all years and for pipe lines beginning 1929 (separate figures not available for years prior to 1929), which data are included with "Public utilities."

<sup>3</sup> Figures for the 37 States include all except the 11 States in the Mountain and Pacific divisions.

<sup>4</sup> Does not include 23 projects with a total value of \$23,551,900, for which data are not available by classes of construction. These projects were under the Civil Works Program which was not in existence after March 1934.

<sup>5</sup> Includes data for Home Owners' Loan Corporation improvements.

## No. 828.—BUILDING PERMITS ISSUED IN PRINCIPAL CITIES

NOTE.—Figures cover new buildings and repairs to old buildings, but exclude data for installation permits (those for installing boilers, signs, etc.) which are not strictly building operations. These permits are rather numerous, but in value they are of small amount. The number figures represent the number of buildings covered by permits issued (new construction and repairs, etc.), rather than the number of permits. Buildings authorized by permit are not always actually constructed, and the actual cost of those constructed may differ considerably from that originally estimated. The cities shown had a population of 50,000 or over in 1930.

## No. 830.—ESTIMATED COST OF BUILDING CONSTRUCTION, FAMILIES PROVIDED FOR, AND POPULATION FOR 257 IDENTICAL CITIES

NOTE.—The estimated cost of buildings is based upon building permits issued for new buildings and repairs to old buildings, but does not include data for installation permits (those for installing boilers, signs, etc.) which are not strictly building operations. These permits are rather numerous, but in value they are of small amount. Buildings authorized by permit are not always actually constructed, and the actual cost of those constructed may differ considerably from that originally estimated.

**No. 831. CONSTRUCTION, AND PROFESSIONAL, TECHNICAL, AND CLERICAL PROJECTS FINANCED FROM FEDERAL FUNDS: VALUE OF CONTRACTS AWARDED AND FORCE-ACCOUNT PROJECTS STARTED**

NOTE.—In thousands of dollars. In the case of Federal projects financed from Public Works Administration funds the entire amount is allotted to Federal departments or agencies. The work is performed by commercial firms under contracts or, if a force-account project (no contract let), by day labor hired directly by the Federal agencies. In the case of allotments to States and local governments for non-Federal projects the Public Works Administration makes a direct grant of not more than 30 percent of the total labor and material cost on projects financed from funds appropriated under the National Industrial Recovery Act and not more than 45 percent of the total labor and material cost on projects financed by funds provided under the E. R. A. A. of 1935. The public agency finances the other 70 or 55 percent, in some cases through loans at interest from the Public Works Administration. Commercial allotments are in the form of loans and for the most part have been made to railroads.

## No. 833.—RESIDENTIAL STRUCTURES IN 64 CITIES: SELECTED STATISTICS FROM THE REAL PROPERTY INVENTORY, 1934

NOTE.—The cities included in the real-property inventory were selected from every State in the Union as a representative sample of urban housing in the United States. The cities chosen vary in size from a population of 11,000 to more than 1,000,000. The total population of the areas canvassed constituted about one-seventh of the total urban population of the United States. The survey covered all buildings with residential units except hotels, clubs, rooming houses, and summer cottages. Data for the individual cities included in this summary are shown in table 815 of the 1935 issue of the Statistical Abstract

# SUPPLEMENT TO SECTION 33, DISTRIBUTION

## No. 836.—RETAIL TRADE BY KIND OF BUSINESS: 1935

[NOTE.—All figures are preliminary; the coverage is incomplete in five States as noted in table 837. For data for earlier years see table 814. In the kind of business classifications, stores are classified according to the principal lines of commodities sold, dual-line stores (such as furniture and hardware, groceries and feed, etc.) being classified according to the lines which predominate currently. Changes in the relative proportion of the sales of major commodities by dual-line stores and changes in the character of the business resulting from changes in consumer demand result in some shifts between classifications from census to census. In the 1935 census, some automobile service establishments, bakeries, lumber dealers (planing mills), dairies, motor-vehicle dealers, hardware dealers, and heating, plumbing, and electrical shops, formerly included in the Retail census, were transferred to other censuses (Service, Manufactures, Wholesale, or Construction census), based on the nature of the principal business of each such establishment.]

### APPROXIMATE WEIGHT OF PETROLEUM AND PRODUCTS

In the United States petroleum and its products are measured by bulk, not weight. Whether handled in containers or without them the quantities are customarily reduced to the equivalent of barrels of 42 United States gallons (barrel thus equals 158.984 liters). In many foreign countries these commodities are measured by weight. The specific gravity of the different grades of crude petroleum and of the finished products varies materially. On the basis of approximate averages the Department of Commerce in converting foreign weight statistics to gallons or barrels of 42 gallons uses the factors shown in the following table:

|                                                                  | Weight of United States gallon |            | Weight of barrel of 42 gallons |            |

### APPROXIMATE WEIGHT OF PETROLEUM AND PRODUCTS

In the United States petroleum and its products are measured by bulk, not weight. Whether handled in containers or without them the quantities are customarily reduced to the equivalent of barrels of 42 United States gallons (barrel thus equals 158.984 liters). In many foreign countries these commodities are measured by weight. The specific gravity of the different grades of crude petroleum and of the finished products varies materially. On the basis of approximate averages the Department of Commerce in converting foreign weight statistics to gallons or barrels of 42 gallons uses the factors shown in the following table:
