## No. 146.—ARMY OF THE UNITED STATES: STRENGTH OF COMPONENT PARTS

NOTE.—Prior to 1914, table covers quinquennial years and years in which considerable changes occurred in the number of Regular Army. Figures for Officers' Reserve Corps include Regular Army enlisted men and also, prior to 1924, National Guard officers holding commissions in the reserve. There is, therefore, some duplication in the grand totals, but the number of this personnel is not so great as to make a material difference in the figures.

<sup>2</sup> Activities common to all services, such as central stenographic section, files, etc., have been prorated to the various services according to the use that the services make of them. Owing to changes in the method of prorating these common activities, the detail for 1935 is not comparable with detail for earlier years shown in previous issues of this publication.

\* For disbursements by wars see table 152.

\* Includes veterans of the War of 1812 whose dependents were receiving pensions (4 for 1935) not shown separately.

<sup>1</sup> In computing these averages, pensions paid to a small number of veterans (see table 153) were included.  
<sup>2</sup> The decrease in the averages for 1931 and 1932 was due to the addition to the roll of a large number of veterans receiving disability allowance for nonservice-connected disabilities at a lower annual average value, and the increase in 1934 to the discontinuance of the disability allowance to approximately 400,000 veterans.

## No. 166.—CIVIL SERVICE AND CANAL ZONE RETIREMENT

NOTE.—Retirement for civil service employees was established by act of May 22, 1920. Under this act as amended July 3, 1926, and May 29, 1930 (effective July 1, 1930), employees of the classified service and certain other groups, including unclassified laborers subject to labor regulations, are eligible for retirement on annuity at the ages of 62, 65, and 70, according to the class of service, if they have rendered at least 15 years of service. The last-named act permits the optional retirement of employees 2 years before reaching the retirement age where they have rendered at least 30 years of service and also permits retirement on account of permanent and total disability after 5 years of service. From the basic compensation of each employee within the scope of the acts there is deducted 3½ percent (2½ prior to July 1, 1926) thereof for deposit to the credit of the retirement fund. All amounts deducted prior to July 1, 1930, and thereafter amounts deducted less \$1 per month are credited to the employee's individual account. Under the amendment of May 29, 1930, annuities are composed of (1) a sum equal to \$30 for each year of service not exceeding 30 (provided it does not exceed three-fourths of average salary), and (2) the amount of annuity purchasable with the sum credited to the individual's account together with interest at 4 percent per annum, with certain provisions regarding the minimum total annuity.

By act of Mar. 2, 1931 (effective July 1, 1931), special provision was made for employees of the Panama Canal and Panama Canal Railroad, who theretofore had been eligible for retirement under the civil service retirement and disability act.

## 9. NATIONAL GOVERNMENT FINANCES

*General note as to bases used in compiling statistics of receipts and expenditures of the United States Government.*—Four different bases are used in compiling both the receipts and expenditures of the Government. These bases, in the case of receipts, are the daily Treasury statements (unrevised and revised), warrants issued, and collections reported. The expenditures of the Government are published on the first three of these bases and also on the basis of checks issued. Figures in the daily Treasury statements (unrevised) which are on a current cash basis are compiled from the latest daily reports from the Treasury offices or public depositories. Owing to the distance of some of these offices and depositories from the Treasury, reports from them are somewhat delayed in reaching the Treasury, and consequently it is necessary to issue the unrevised Treasury statements before they are received. The figures for actual transactions during a month or year which are calculated to take into account these delayed reports are said to be on a basis of daily Treasury statements (revised). The unrevised figures are the basis of the Budget estimates submitted to Congress by the President.

It is provided by law that warrants shall be issued by the Secretary of the Treasury in acknowledgment of money received, and that warrants must be drawn by the Secretary of the Treasury for all disbursements of money. Some of these warrants for expenditures do not represent actual payments but are merely advances of credit to disbursing officers, who then issue checks in payment of Government obligations. Expenditures on the basis of warrants issued include unexpended balances to the credit of disbursing officers at the end of the year but do not include expenditures made during the year from unexpended balances of the preceding year.

Expenditures on the basis of checks issued (table 174) represent most accurately the actual expenditures during any given year. They differ from expenditures shown by daily Treasury statements (revised), because they include checks outstanding at the end of the year and exclude unpaid checks at the beginning of the year.

Government transactions are classified according to the accounts through which they are effected. The three classes of accounts are: General fund accounts, which include the general revenues and from which the operating expenses of the Government, including capital outlays and fixed charges, are paid under appropriations by Congress; special fund accounts, or funds received under special authorizations of law which are earmarked for some specific purpose; and trust fund accounts, representing money received and held in trust for the benefit of individuals or classes of individuals. The latter are not strictly Government moneys and are shown separately in all tables except No. 171.

All figures for receipts and expenditures include postal surpluses or deficiencies only; postal revenues other than surplus receipts and postal expenditures payable from postal revenues are shown in table 171.

<sup>1</sup> Emergency expenditures (except Reconstruction Finance Corporation) were not classified separately prior to the fiscal year 1934 and are included in general expenditures. Totals for 1934 and 1935 are, therefore, not comparable with totals for prior years.

<sup>2</sup> Additional emergency expenditures for 1934 and 1935 are included under "Public Works."

<sup>3</sup> Public building construction and sites, Treasury Department, and War Department (nonmilitary) are included under Treasury Dept., departmental, and National Defense—Army, respectively, prior to 1934.

<sup>4</sup> Credit, deduct. <sup>5</sup> Includes road construction.

<sup>6</sup> Additional expenditures under this account are shown under emergency expenditures.

<sup>7</sup> Beginning May 27, 1933, repayments of loans from Agricultural Marketing Fund, Federal Farm Board, and interest thereon, are reflected as credits in expenditures of Farm Credit Administration.

<sup>8</sup> Additional expenditures under this account are shown under general expenditures.

<sup>9</sup> Figures include expenditures from funds allocated by the Reconstruction Finance Corporation. Commodity Credit Corporation expenditures for 1934 are exclusive of \$18,800,000 for this purpose included under Reconstruction Finance Corporation, direct loans and expenditures, reimbursement on account of which was effected in the fiscal year 1935.

<sup>10</sup> Less than \$500.

<sup>11</sup> Advances to States under 1932 Relief Act of \$298,560,000 are included under Reconstruction Finance Corporation, direct loans and expenditures.

<sup>12</sup> Includes \$18,800,000 for Commodity Credit Corporation. See note 9.

<sup>13</sup> Receipts and expenditures on account of contributed funds are included in "Other" trust funds beginning with 1934; prior to 1934, such receipts and expenditures were included under special accounts.

<sup>14</sup> Since July 1, 1932, deductions from salaries credited to the civil service, foreign service, and Canal Zone retirement funds and earnings from investments of such funds and of adjusted service certificate fund have been classified as receipts; prior thereto, such items were used to offset expenditures for these funds.

## No. 176.—INTERNAL REVENUE: AMOUNTS COLLECTED FROM PRINCIPAL SOURCES

NOTE.—All figures in thousands of dollars. The figures represent collections by internal revenue officers throughout the country, including deposits by postmasters of amounts received from sale of internal revenue stamps and deposits of internal revenue collected through customs offices, and, therefore, differ from those in tables 170 to 173, which represent the deposits of these collections in the Treasury or depositories during the fiscal year concerned, there being thus an overlapping of time. Certain items, included in the totals in the last column, are shown in detail in the second part of the table

## No. 178.—INTERNAL REVENUE: RECEIPTS BY STATES, YEARS ENDED JUNE 30

NOTE.—See headnote, table 176. Tax receipts are credited to the districts in which the collections are made. Receipts in the various States do not indicate the tax burden of the respective States, since the taxes may eventually be borne by persons in other States. Figures include collections for credit to trust funds for territories and possessions of the United States. For amounts of such trust fund collections for 1935, see "Trust accounts" table 173, p. 169

<sup>1</sup> Under the 1926 act a specific exemption of \$100,000 is allowed in arriving at net estate, whereas in computing net estate to which the additional tax under the 1932 or 1934 act applies the exemption is \$50,000.

<sup>2</sup> In arriving at net estate the gross estate and deductions are diminished by amount of gross estate and deductions for "no net estate."

<sup>3</sup> Credit for estate, inheritance, legacy, or succession taxes paid to any of the several States, Territories, or District of Columbia and gift taxes paid to the Federal Government.

## No. 210.—REVENUES AND EXPENDITURES OF STATE GOVERNMENTS

NOTE.—Both receipts and expenditures are net figures, excluding temporary and special transactions which represent virtually duplication. Revenue receipts do not include any receipts from borrowing of money. Outlays, which enter into the total for governmental-cost payments, represent capital investments, including those made with the proceeds of borrowed money. The excess of governmental-cost payments over revenue receipts represents, approximately, increase of indebtedness.

No. 213.—ASSESSED VALUATION OF PROPERTY SUBJECT TO GENERAL PROPERTY TAX

NOTE.—Property belonging to railroads, telegraph companies, and a number of similar corporations is in some States distinguished as real or personal, but in a number of States it is treated as a single total. In the latter case, figures for such corporations and also other property and franchise valuations of corporations for which data were insufficient for a complete distinction of real from personal are not shown separately but are included in the totals. Figures do not show the relative wealth of the different States owing to differences in the bases of assessments and practices thereunder

# No. 215.—TAXES: TOTAL LEVIES OF AD VALOREM GENERAL PROPERTY TAXES OF STATES, COUNTIES, AND MINOR CIVIL DIVISIONS

NOTE.—The data represent the total levies of general property taxes of States, counties, cities, villages, towns, boroughs, townships, school districts, etc., and for all purposes. They do not cover "special assessments" on property benefited by specific improvements nor special property taxes applying only to limited classes, nor taxes based on other standards than property, such as income, volume of business, inheritance, etc., which have been steadily growing in relative importance. The change in buying power of money affects materially the comparability of the figures. For data for 1880, 1870, and 1890, by States, see Table 437, Statistical Abstract of 1922

**No. 223.—DEBT OF STATE GOVERNMENTS: FUNDED, FLOATING, AND SPECIAL ASSESSMENT DEBT AT CLOSE OF YEAR, BY PURPOSE FOR WHICH INCURRED, 1931<sup>1</sup>**

**NOTE.**—All figures in thousands of dollars. The classification by purpose for many States is more or less imperfect owing to defective records of these States. <sup>1</sup> Under orders of the Secretary of the Treasury of Dec. 28, 1933, and Jan. 11 and 15, 1934, all gold coin domestically owned (with minor exceptions) was required to be delivered to the Treasurer of the United States, and under the Gold Reserve Act of 1934 (Jan. 30) withdrawn from circulation and formed into bars. ## No. 230.—STOCK OF MONEY IN THE UNITED STATES, BY KINDS

NOTE.—Amounts in thousands of dollars. Figures prior to 1890 were revised in 1928 from the best available data, but the older records, especially from 1860 through the early 70's, are not complete and figures for gold and silver those years are only estimates. In 1927, data were revised to include minor coins beginning 1900 (no satisfactory data available for earlier years) and gold coin and bullion held abroad for Federal Reserve banks and to exclude earmarked gold. Gold and silver certificates and Treasury notes of 1890 are not shown, since equivalent amounts held in trust against them are included in gold coin and bullion and silver dollars and bullion.

<sup>1</sup> Figures beginning 1934 include only gold held by the Treasury; prior to 1934, they also include gold held by the Federal Reserve banks and Federal Reserve agents and an estimate of gold coin in circulation. By a proclamation of the President dated Jan. 31, 1934, the weight of the gold dollar was reduced from 25.8 to 15.5 grains of gold, 0.9 fine. The value of gold is therefore based on \$35 per fine ounce beginning June 1934; theretofore, it is based on \$20.67 per fine ounce.

<sup>2</sup> There has been no fractional currency in actual circulation to any extent since 1875.

<sup>3</sup> Silver bullion in Treasury.

<sup>4</sup> Includes silver bullion as follows: June 30, 1934, \$1,560,000; Dec. 31, 1934, \$211,620,000; June 30, 1935, \$313,309,000; Dec. 31, 1935, \$576,862,000.

<sup>2</sup> Both of these items include also reserve against Treasury notes of 1890.

<sup>3</sup> See note 1, table 229.

# No. 247.—REPORTING MEMBER BANKS IN 101 LEADING CITIES: PRINCIPAL ASSETS AND LIABILITIES

NOTE.—In millions of dollars. Data are monthly averages of weekly figures. They represent a continuation of the 101 cities series published in previous issues of this report. Figures were considerably affected in March 1933 by the closing of a number of large banks in 11 of the cities included and from March 1933 until the middle of 1934 by the reopening of old banks or the beginning of reports by new successor banks in these cities. These changes, however, reflect the course of banking developments during this period.

# No. 254.—ALL REPORTING BANKS: NUMBER, ASSETS, CAPITAL AND SURPLUS, AND DEPOSITS FOR EACH CLASS OF BANKS

NOTE.—Banks in Alaska, Hawaii, Puerto Rico, Philippine Islands and, for 1935, Virgin Islands are included. Data are as of June 30 or about June 30, except data for the earlier years for banks other than national, for which reports were of various dates. Figures for private banks and for other banks except national for earlier years, especially 1875, 1880, and 1885, are incomplete. Prior to 1910, figures for State banks include stock savings banks and loan and trust companies in a number of States, and in some instances private banks. Deposits exclude interbank demand deposits (except as stated in footnote 1, table 253) and U. S. deposits; they also exclude dividends unpaid and, beginning 1910, certified and cashiers' checks, items at one time included in original figures for demand deposits; they include postal savings.

<sup>1</sup> See footnote 1, table 253.<sup>2</sup> Capital only.<sup>3</sup> Estimated.<sup>4</sup> In 1921 returns from California, which in 1920 had shown 106 stock savings banks, included all banks except 1 mutual savings bank with State banks, which accounts for part of the increase in State banks and the greater part of the decrease in stock savings banks. In subsequent years returns showed separate statistics for each class of banks.<sup>5</sup> Licensed banks (banks operating on an unrestricted basis); for mutual savings banks, figures include banks having limitations on deposit withdrawals in 5 States for 1933 and in 1 State for 1934.<sup>6</sup> Includes capital notes and debentures.<sup>7</sup> For 1890 to 1933, figures include only banks under State supervision and others voluntarily reporting; for 1934 and 1935, they include banks under State supervision and banks that have agreed to examination by the Comptroller of the Currency or a Federal Reserve bank under provisions of the Banking Act of 1933.<sup>8</sup> Average for all private banks for the 6 months ended May 31, 1880, as reported to the Commissioner of Internal Revenue for taxation purposes.<sup>9</sup> Stock savings banks included with mutual savings banks or State banks in 1880 and 1885. For deposits in savings banks for earlier years, see table 271, p. 255.<sup>10</sup> Figures given under "Capital and surplus" are surplus funds only.

## No. 294.—CLEARING-HOUSE EXCHANGES: SUMMARY FOR UNITED STATES

NOTE.—Prior to 1920 data are for all cities reporting to the New York Clearing House Association and cover years ended Sept. 30; commencing 1920 they are for 150 identical cities and relate to calendar years. The comparability of these figures is affected (1) by changes in the number of cities reporting, and (2) by the tendency toward consolidation of banks, eliminating former clearings between two or more banks. Debits to individual account (Tables 295 and 296) are a more significant measure of volume of payment. The divisions shown in this table, with the exception of the New England, differ from the geographical divisions shown in most tables in the Abstract. The Eastern division includes the States comprising the Middle Atlantic division in other tables (see for example table 260) and Delaware, Maryland, and District of Columbia of the South Atlantic division; the Southern includes the other six South Atlantic States, the East South Central and the West South Central States with the exception of Oklahoma; the Middle Western includes the East North Central States, Minnesota, Iowa, and Missouri; the Western, North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, Montana, Wyoming, and Colorado; the Pacific, Washington, Oregon, California, Idaho, Utah, Nevada, and Arizona.

## 12. NATIONAL WEALTH, INCOME, AND DEBT

(Data in this section relate to continental United States)

### No. 297.—ESTIMATED NATIONAL WEALTH OF THE UNITED STATES: TOTAL, 1850 TO 1922, AND BY CLASSES OF PROPERTY, 1900 TO 1922

NOTE.—Estimates of national wealth for the earlier censuses were not made by precisely the same methods used more recently and are not closely comparable. Changes in buying power of money, as indicated by levels of prices and wages, materially affect the comparisons (see price tables in Sec. 14). For distribution of principal classes of property by States for 1912 and 1922, see Statistical Abstract, 1922, Table 275. There have been no official estimates of wealth since 1922

# No. 298.—WEALTH: ESTIMATED VALUE OF ALL TANGIBLE PROPERTY SITUATED IN EACH GEOGRAPHIC DIVISION AND STATE

NOTE.—See headnote to Table 297. This table shows, not the value of property owned by the citizens of each State, but that of the physical property lying in each State wherever the securities or other evidences of title representing it may be found or owned. ## No. 299.—NATIONAL INCOME PRODUCED AND PAID OUT

NOTE.—Under the concept of national income employed in this study, the following items have not been included: Imputed income from ownership of durable goods (including owned homes), the imputed value of services of housewives and other members of the family, earnings from odd jobs, direct relief and charity, earnings from illegal pursuits, and changes in value of assets not derived by groups professionally occupied in the handling of assets. Business savings represent the difference between the income produced in a given year and the amount actually distributed to individuals. Negative savings are incurred when the business system pays to individuals more than was produced in a given year.

## No. 303.—LONG-TERM DEBT, PUBLIC AND PRIVATE: ESTIMATED AMOUNTS OUTSTANDING AT THE END OF THE YEAR, BY CLASSES

NOTE.—These figures represent gross debt. Insofar as possible, obligations held by the issuing corporation or individual are excluded, but no eliminations are made for intragroup and intergroup holdings of evidences of debt. Under the concept of long-term debt employed in this study, figures include, in general, debt issued with maturities of more than 1 year. The margins of error shown in the table for private debt represent a nonstatistical evaluation of the figures by the estimator. As the element of bias is probably in the same direction for all years, the figures are more reliable for the measurement of the flow of debt than to measure the absolute volume as of a particular date.

<sup>1</sup> This summary excludes the debt of financial corporations which is largely duplicated in other basic debt. Private financial corporate debt has been estimated at about \$2,600,000,000 for 1934. Bonds, notes, and debentures of governmental corporations and credit agencies, excluding interagency liabilities and Federal land-bank bonds held by the Federal Farm Mortgage Corporation, amounted to \$5,100,000,000 on Dec. 31, 1934 (see table 293, p. 267, for agencies included). The latter figure includes \$3,300,000,000 of bonds guaranteed by the U. S. Government, representing contingent Federal debt.

<sup>2</sup> Funded debt actually outstanding for railways and switching and terminal companies. The 1930 and 1934 figures are raised to take account of receivers' certificates and funded debt matured unpaid. The margin of error is very small for these figures.

<sup>3</sup> Figures are for corporations operating for profit and do not include debts of unincorporated business firms. Debts of the latter in the form of mortgage loans are included in urban realty debt figures.

<sup>4</sup> Figures for 1912, 1922, and 1930 are interpolated between estimates of the Bureau of Agricultural Economics on the basis of annual statistics of interest payable on farm mortgages published by that Bureau. The percentages shown as margins of error refer to adjustments in the estimates of the Bureau of Agricultural Economics and not to the estimates as a whole. The figure for 1934 is an estimate by William G. Murray, published in the Journal of Farm Economics, 1935.

<sup>5</sup> Estimates are very rough. They include debts of unincorporated business enterprises and nonprofit corporations as well as real estate debts proper.

<sup>6</sup> For additional statistics relating to public debt, consult index for references to data in other sections.

<sup>7</sup> Includes bonds and Treasury notes and also, for 1922, Treasury war savings securities; these items constitute a debt figure which is roughly comparable with private long-term debt figures.

<sup>8</sup> Estimates as of June 30, 1913, 1923, 1931, and 1935.
