Tableau 96. NAVIRES MARCHANDS : TONNAGE BRUT LANCÉ (en milliers de tonneaux).

Table 96. MERCHANT VESSELS : GROSS TONNAGE LAUNCHED (000's omitted).

Navires de 100 tonneaux et plus. — Vessels of 100 tons and upwards.

Note. — Tous les totaux comprennent, en plus des vapeurs et des navires à moteur, les voiliers non munis de machines auxiliaires ; les autres voiliers sont compris sous vapeurs ou navires à moteur, selon le type des machines auxiliaires.

On trouvera ci-dessous la proportion des vapeurs pourvus, soit d'installations pour brûler du combustible liquide, soit de turbines à vapeur ou électriques ou d'une combinaison de machines à vapeur alternatives et de turbines, dans le tonnage lancé total.

Note. — In addition to steam and motor vessels, all totals include sailing vessels not fitted with auxiliary power ; other sailing vessels are included under steamers or motor-ships, according to the type of the auxiliary engines.

The following statement shows the proportion of tonnage of steam vessels launched fitted for burning oil fuel or equipped with steam or electric turbines or with a combination of steam reciprocating engines and turbines.

Pourcentage des navires à vapeur dans le total du tonnage lancé. — Percentage of steam vessels in total tonnage launched.

Table 98. IMPORTS AND EXPORTS, BY VALUE (000,000's omitted).

A = Marchandises ; B (chiffres en italiques) = or et argent, en lingots et espèces.

(G) = Commerce général ; dans tous les autres cas, les données se rapportent au commerce spécial.

* = Chiffres provisoires.

La série B a été omise là où les chiffres étaient nuls ou insignifiants. Dans certains cas, indiqués dans les notes, les chiffres correspondant à B ne sont pas disponibles.

Pour certains pays, l'argent compris sous B est indiqué séparément à la fin du tableau.

A = Merchandise ; B (figures in italics) = Bullion and specie (gold and silver only).

(G) = General trade ; in all other cases, the data refer to special trade.

* = Provisional figures.

Series B is omitted where the figures were nil or insignificant. In some cases, referred to in footnotes, figures for B are not available.

For certain countries, the silver included under B is shown in an annex at the end of the table.

Tableau 100 (fin). Commerce par catégories de marchandises.

(d'après la « Liste minimum de marchandises pour les statistiques du commerce international »).

Table 100 (concluded). Trade by Classes of Commodities.

(according to the "Minimum List of Commodities for International Trade Statistics").

Note. — La nouvelle classification internationale intitulée « Liste minimum de marchandises pour les statistiques du commerce international », dont le présent tableau donne un résumé, a été préparée par le Comité d'experts statisticiens de la Société des Nations créé en vertu de la Convention internationale de 1928 concernant les statistiques économiques.

La « Liste minimum » complète, accompagnée d'un exposé détaillé des principes dont le Comité s'est inspiré dans son élaboration, a été publiée dans le rapport du Comité d'experts statisticiens au Conseil de la Société des Nations sur les travaux de sa septième session (Série de publications de la Société des Nations. — II. Questions économiques et financières. — 1938.II.A.14).

La « Liste minimum » a pour principal objet de fournir des statistiques comparables pour un grand nombre de marchandises ou de groupes de marchandises de même nature ; elle est divisée en 17 sections, 50 chapitres et 456 positions, dont 125 se subdivisent en deux ou plusieurs sous-positions. La division par sections et chapitres a été surtout adoptée pour la commodité de la présentation. Du point de vue analytique, les positions de la liste sont regroupées d'après le degré de préparation et l'usage auquel les marchandises sont destinées. Les groupes suivants, établis d'après l'usage, figurent dans le présent tableau :

Matières pour la production (1-4) :

1. Matières pour la production d'aliments, de boissons et de tabac.
2. Matières pour la production agricole.
3. Matières non durables pour l'industrie et le commerce (excepté 1 et 2).
4. Matières durables pour l'industrie et le commerce.
5. Huiles et graisses animales et végétales et leurs matières premières.
6. Combustibles, énergie électrique et lubrifiants.
7. Equipement et outillage pour l'agriculture, l'industrie et le commerce.

Articles prêts à la consommation :

8. Produits alimentaires, boissons et tabac.
9. Autres articles de consommation courante.
10. Articles durables (équipement des consommateurs).

Cette classification permet également un regroupement de toutes les marchandises en *articles non durables* : (groupes : 1, 2, 3, 5, 6, 8, 9) et *articles durables* : (groupes : 4, 7, 10).

En outre, chacun des groupes de la classification d'après l'usage se subdivise, selon le **degré de préparation**, en *a*) articles bruts, *b*) articles ayant subi une transformation simple et *c*) articles ayant subi une transformation plus avancée. Faute de place, seule la classification des importations et exportations totales d'après le degré de préparation figure dans le présent tableau.

On trouvera les chiffres qui ont servi de base aux pourcentages (pour autant qu'ils étaient disponibles en octobre 1939) et des détails complémentaires sur la nouvelle classification dans les *Statistiques du Commerce international, 1938* (Genève, 1939).

Note. — The new international classification entitled "Minimum List of Commodities for International Trade Statistics", of which the present table contains a summary, has been prepared by the Committee of Statistical Experts of the League of Nations set up under the terms of the International Convention relating to Economic Statistics of 1928.

The complete "Minimum List", accompanied by a detailed statement regarding the principles which guided the Committee in its preparation, was published in the Report of the Committee of Statistical Experts to the Council of the League of Nations on the Work of its Seventh Session (Series of League of Nations Publications — II. Economic and Financial. — 1938.II.A.14).

The main object of the "Minimum List" is to secure comparable trade statistics for a large number of individual commodities or groups of nearly related commodities ; it is divided into 17 sections, 50 chapters and 456 items, 125 of which are subdivided into two or more sub-items. This grouping mainly serves the purpose of convenience of presentation ; for analytical purposes, the items of the List are regrouped in accordance with the stage of production and the use to which the commodities are put. The grouping **according to use** is as follows :

Materials for Production (1-4) :

1. Of human food, of beverages and of tobacco.
2. For agricultural production.
3. Non-durable materials (except groups I and 2) for industry and commerce.
4. Durable materials for industry and commerce.
5. Animal and vegetable oils and fats and materials therefor.
6. Fuels, electric energy and lubricants.
7. Capital equipment for agriculture, industry and commerce.

Articles ready for Consumers' Use :

8. Food, beverages and tobacco.
9. Other articles for current consumption.
10. Consumers' capital equipment.

This classification allows also a regrouping of all commodities into *non-durable goods* (groups : 1, 2, 3, 5, 6, 8, 9), and *durable goods* (groups : 4, 7, 10).

In addition, each of the groups by use is subdivided in accordance with the **stage of production** into (*a*) crude, (*b*) simply transformed and (*c*) more elaborately transformed articles. For reasons of space, only the distribution of the total imports and exports by stage of production has been given in the present table.

The basic figures for the percentages shown in the table (so far as they were already available in October 1939) and further details of this new classification are given in the volume *International Trade Statistics, 1938*, Geneva, 1939.
