Tableau 2 (suite). Superficie et Population. — Table 2 (continued). Area and Population.

NOTE GÉNÉRALE.

La remarque générale insérée dans la préface à la page 7 et qui porte sur la présentation territoriale résultant de situations de fait, s'applique plus particulièrement aux données figurant dans ce tableau. Certaines se réfèrent à des situations ou à des dispositions de caractère éphémère et unilatéral, dont plusieurs sont devenues dès maintenant caduques. De même, les notes qui suivent ne visent qu'à situer chronologiquement certains changements territoriaux et à fournir ainsi une base géographique aux données publiées dans ce tableau et dans d'autres tableaux de l'*Annuaire*.

Dans de nombreux cas, la population n'est pas exactement connue, et les évaluations de la population, qu'elles soient appelées « recensement », « dénombrement » ou « estimation », sont plus ou moins incertaines, voire même hypothétiques. Les relevés deviennent parfois de plus en plus complets, ce qui tend évidemment à exagérer l'augmentation de la population (p. ex. *Indes néerlandaises*, *Thaïlande*, *Congo*), tandis que dans d'autres cas ils accusent des fluctuations désordonnées.

Les critères servant de base aux estimations peuvent subir des modifications et, par conséquent, les nouvelles estimations ne font pas toujours suite aux anciennes ; ainsi, l'estimation pour l'*Iran* a été portée, il y a quelque temps, de 9 à 15 millions, celle pour l'*Ethiopie*, de 5-6 millions à plus de 9 millions et celle pour la *Colombie* a été réduite de 600.000.

Il y a, en outre, fréquemment un manque de continuité entre les recensements et les estimations effectuées antérieurement au recensement. Ainsi, par exemple, la population de l'*U.R.S.S.*, selon le recensement de 1939, et celle du *Japon* et du *Mexique*, selon les recensements de 1940, ont été sensiblement inférieures à ce qu'on escomptait généralement ; par contre, dans l'*Union Sud-Africaine*, en 1936, et aux *Indes britanniques*, en 1941, les résultats du recensement ont dépassé de beaucoup les estimations.

Faute de données suffisantes, on s'en tient dans certains cas chaque année au même chiffre. Ainsi, par exemple, on fait figurer depuis des années dans l'*Annuaire*, pour la population de la *Chine*, le chiffre rond de 450 millions.

D'une manière générale, on peut dire que les données relatives à la population des pays où il n'y a pas eu de recensements exacts ou dans lesquels les recensements ont été jusqu'à présent très espacés ou peu nombreux ne permettent pas de comparaison entre une période et une autre.

On s'abstiendra également de comparer les totaux continentaux et mondiaux publiés dans les différentes éditions de l'*Annuaire*, à moins qu'on n'y fasse de nombreux et importants ajustements.

Des cartes géographiques sont données à la fin du volume.

* * *

On n'a pas inséré dans le tableau les estimations officielles qu'il convient de ne pas prendre en considération — soit qu'elles ne s'accordent pas avec des recensements, soit qu'elles n'aient pas été maintenues par les autorités compétentes.

Dans certains cas, les chiffres totaux de la population recensée contiennent les personnes dont le sexe n'est pas spécifié ; les données par sexe qui ne sont pas complètes figurent entre parenthèses.

De même, les chiffres totaux se référant à des recensements partiels figurent entre parenthèses.

L'astérisque (*) indique des données provisoires ou des estimations dont la marge d'erreur paraît restreinte. Le signe + indique des données incertaines, parfois hypothétiques. Ce signe devant un chiffre de recensement peut notamment indiquer que le recensement ne portait que sur une partie de la population, par exemple la population blanche, qui n'est parfois qu'une faible fraction de la population totale, et que le reste a été évalué.

* * *

GENERAL NOTE.

The general remark in the preface (page 7) relating to the territorial presentation resulting from *de facto* situations applies more particularly to the data given in this table. These data sometimes reflect situations or provisions of a transient and unilateral character, several of which have now ceased to exist. Similarly, the notes which follow are intended merely to show the chronological sequence of certain territorial changes and thereby to furnish a geographical basis for the data published in this table and in other tables of the *Year-Book*.

In many cases, the exact population is not known, and the population figures, whether described as "census", "count" or "estimate", are more or less uncertain and even hypothetical. The records are, in some cases, improving and becoming more and more complete, which naturally tends to exaggerate the increase in the population (e.g., the *Netherlands Indies*, *Thailand*, *Belgian Congo*). In other cases, the records show irregular fluctuations.

The criteria on which estimates are based undergo certain modifications and the new estimates are therefore not always directly comparable with the old ones ; the estimate given for *Iran*, for instance, was raised some time ago from 9 to 15 millions, that for *Ethiopia* from 5-6 millions to over 9 millions, whilst that for *Colombia* was reduced by 600,000.

Further, there is frequently a lack of continuity between the censuses and the estimates made prior to the census. Thus, for instance, the population of the *U.S.S.R.*, according to the 1939 census, and that of *Japan* and *Mexico*, according to the 1940 censuses, were appreciably lower than was generally anticipated ; on the other hand, the results of the 1936 census in the *Union of South Africa* and of the 1941 census in *India* considerably exceeded the estimates.

For want of sufficient data, the same figure is repeated year after year in some cases ; thus, for example, the population of *China* has been shown in the *Year-Book* for some years at the round figure of 450 millions.

Generally speaking, it may be said that the population figures of countries where no accurate census has been taken or where censuses have so far been few or have been taken at long intervals cannot be compared from one period to another.

Similarly, no comparisons should be drawn between the totals for continents and the world published in the various editions of the *Year-Book*, without making numerous and extensive adjustments.

Maps are given at the end of the volume.

* * *

The table does not contain the official estimates which should no longer be utilised, either because they do not agree with census returns or because they are no longer maintained by the competent authorities.

In some cases, the total figures of the population recorded include persons whose sex is not specified ; the figures by sex which are incomplete are shown in parentheses.

Totals which refer to partial censuses are likewise shown in parentheses.

An asterisk * refers to provisional data or estimates with a probably narrow margin of error. The sign + refers to data which are uncertain or conjectural. A # before a census figure may denote that the census covered only part of the population — e.g., the white population, which sometimes constitutes only a small fraction of total population — the remainder having been estimated.

Tableau 2 (suite). Superficie et Population. — Table 2 (continued). Area and Population.

Note : pour des chiffres en « square miles », voir texte anglais.

AFRIQUE.

La population de l'AFRIQUE n'est connue que très imparfaitement, et les chiffres insérés sont parfois purement hypothétiques, p. ex. pour l'*Ethiopie*, le *Liberia*, le *Rio de Oro*, etc., pour lesquels les estimations varient du simple au double. La majorité des « recensements » coloniaux s'appliquent seulement à la population blanche, tandis que les données relatives aux indigènes, qui représentent l'immense majorité des habitants, ne sont que des évaluations très approximatives. Dans de nombreux cas, les estimations successives ne représentent que les étapes d'un dénombrement progressif des indigènes.

¹ Egypte : la superficie peuplée ne mesure que 35.168 km².

² Ethiopie : chiffres très approximatifs, datant d'avant l'occupation italienne (1936-1941) ; voir aussi note ¹⁴.

³ Tanger : aux termes de la loi espagnole du 23 novembre 1940, la Zone de Tanger a été « incorporée à la Zone du protectorat de l'Espagne au Maroc ».

⁴ Congo, « recensement » : indigènes dénombrés à la fin de 1942. En fait le chiffre de la population s'élève probablement à 11 millions.

⁵ Rhodésie du Sud, 1941 ; Somalie, 1931 ; Rio de Oro, 1930 : blancs seulement. Basutoland : non compris les Bantous se trouvant en dehors du territoire (env. 100.000).

⁶ Y compris les eaux : Nyassaland : 27.000 km² ; Ouganda : 35.000 km² ; Tanganyika : 52.000 km².

⁷ Guinée esp. : Fernando-Po, Guinée continentale (Rio-Muni) et quatre petites îles.

⁸ Maroc esp. : ce territoire se compose de deux parties non contiguës : 1. la zone du protectorat espagnol au Maroc ; 2. la zone méridionale du protectorat, appelée aussi Cabo Juby (v. aussi ⁹).

⁹ Ifni, Rio de Oro, Sahara esp. : trois colonies distinctes appartenant parfois « Territoires espagnols du Sahara ».

¹⁰ Algérie : y compris les « territoires du Sud », dont la superficie — en majeure partie désertique — s'élève à 1.995.000 km² et dont la population, selon le recensement de 1936, s'élevait à 643.000 h.

¹¹ Madagascar : y compris les îles Comores, mais non compris les dépendances inhabitées, en majeure partie antarctiques (Terre Adélie, archipel Kerguélen, etc., superficie de 350.000 km²).

¹² Maroc fr. : selon des données du Service du Ravitaillement, la population civile se serait élevée, en mars 1941, à 7.983.500.

¹³ Tunisie : population civile seulement. Y compris les « territoires militaires », d'une superficie de 76.700 km².

¹⁴ « Afrique orientale italienne » : ce terme, introduit par la loi du gouvernement fasciste du 1^{er} juin 1936, correspondait à l'ensemble de l'*Ethiopie* et des deux colonies italiennes, l'*Erythrée* et la *Somalie*. Aux termes de cette loi, le territoire de ces deux dernières était agrandi aux dépens de l'*Ethiopie*. Un arrangement a été signé, le 31 janvier 1942, entre la Grande-Bretagne et l'*Ethiopie*, par lequel l'indépendance de cette dernière est reconnue (voir aussi note ²).

La Libye se compose des anciennes colonies de Cyrénáïque et de Tripolitaine. D'après le décret-loi du 9 janvier 1939, les quatre provinces de la Libye septentrionale font partie intégrante du royaume d'Italie ; la population italienne de ces provinces s'élevait en juin 1942 à environ 128.000 habitants. Le reste de la Libye figure sous le nom de « *Sahara libyen* ».

¹⁵ Mozambique : le territoire de Manica et Sofala a été administré par la Cie du Mozambique jusqu'en 1941, date à laquelle la charte de la compagnie a expiré.

AMÉRIQUE.

La population de la majorité des pays de l'AMÉRIQUE CENTRALE et de plusieurs pays de l'AMÉRIQUE DU SUD est incertaine. Ainsi les évaluations pour *Haiti* varient entre 2 et 3 millions, celles pour la *Bolivie* entre 2 ½ et 3 ½ millions, et celles pour l'*Equateur* entre 2 et 3 ½ millions d'habitants.

¹ Superficie de : Canada, Etats-Unis, Alaska, Nicaragua : y compris les eaux (Canada 591.000 km², Etats-Unis 137.000 km², Nicaragua 9.000 km²). Groenland, superficie : partie libre de glace ; superficie totale : env. 2.170.000 km².

Note : for figures in square kilometres, see French text.

AFRICA.

The population of AFRICA is known only very roughly, and the figures inserted are in certain cases purely hypothetical — e.g., *Ethiopia*, *Liberia*, *Rio de Oro*, etc., the estimates for which may vary by 100%. Most of the so-called colonial “censuses” refer only to the white population, the figures for natives, who represent the vast majority of the population, being only very rough estimates. In many cases, again, successive estimates merely represent stages in a gradual process of recording the natives.

¹ Egypt : the area inhabited amounts to only 13,578 sq. miles.

² Ethiopia : very approximate figures dating from before the Italian occupation (1936-1941) ; see also note ¹⁴.

³ Tangier : by the terms of the Spanish Law of November 23rd, 1940, the Tangier Zone “was incorporated in the Zone of the Spanish Protectorate in Morocco.”

⁴ Congo, “census” : natives recorded towards the end of 1942. The population probably amounted actually to some 11 millions.

⁵ Sth. Rhodesia, 1941 ; Somaliland, 1931 ; Rio de Oro, 1930 : white population only. Basutoland : not including Bantus outside the territory (about 100,000).

⁶ Including inland waters : Nyasaland : 10,353 sq. miles ; Uganda : 13,616 sq. miles ; Tanganyika : 20,000 sq. miles.

⁷ Sp. Guinea : Fernando Po, Continental Guinea (Rio Muni) and four small islands.

⁸ Sp. Morocco consists of two non-contiguous territories : 1. the Zone of the Spanish protectorate in Morocco ; 2. the Southern zone of the protectorate, called also Cabo Juby (see also ⁹).

⁹ Ifni, Rio de Oro, Sp. Sahara : three separate colonies sometimes called “Spanish territories of the Sahara”.

¹⁰ Algeria : including the “Southern territories”, the area of which — mainly desert — amounts to 770,000 sq. miles and the population, according to the 1936 census, to 643,000.

¹¹ Madagascar : including the Comoro Islands, but excluding the uninhabited dependencies, mostly Antarctic (Adélie Land, Kerguelen Archipelago), with an area of 135,000 sq. miles.

¹² Fr. Morocco : according to the records of the Supply Services, the civilian population in March 1941 was 7,983,500.

¹³ Tunisia : civilians only. Including “military territories” (area 29,600 sq. miles).

¹⁴ “Italian East Africa” : this term introduced by the Law of the fascist government of June 1st, 1936, covered Ethiopia and the two Italian colonies of Eritrea and Somaliland. By the terms of this law, the territory of these colonies was increased at the expense of Ethiopia. An agreement between Great Britain and Ethiopia, recognising the independence of Ethiopia, was signed on January 31st 1942, (see also note ²).

Libya is composed of the former colonies of Cyrenaica and Tripolitania. According to the Decree of January 9th, 1939, the four northern provinces of Libya form an integral part of the Kingdom of Italy ; the Italian population of these provinces amounted in June 1942 to about 128,000 inhabitants. The rest of Libya is shown under the name of “Libyan Sahara”.

¹⁵ Mozambique : the territory of Manica and Sofala was administered by the Mozambique Co until 1941, when its charter expired.

AMERICA.

The population figures for most CENTRAL-AMERICAN and several SOUTH-AMERICAN countries are uncertain. The estimates for *Haiti*, for instance, range between 2 and 3 million inhabitants, for *Bolivia* between 2 ½ and 3 ½ millions, and for *Ecuador* between 2 and 3 ½ millions.

¹ Area of Canada, United States, Alaska, Nicaragua : including inland waters (Canada 228,307 sq. miles ; U.S.A. 53,000 sq. miles ; Nicaragua 3,500 sq. miles). Greenland, area : part free from ice ; total area : about 838,000 sq. miles.

Tableau 2 (suite). Superficie et Population. — Table 2 (continued). Area and Population.

AMÉRIQUE (suite des notes).

² Etats-Unis, 1943 : y compris les forces militaires à l'étranger. La pop. présente s'est élevée à 133.966.000, dont 119.970.000 blancs.

³ R. Dominicaine, Colombie : les estimations officielles ne paraissent pas s'accorder avec les recensements.

⁴ Dominique : l'île, qui faisait partie des îles sous le Vent, a été rattachée au groupe des îles du Vent à partir du 1^{er} janvier 1940 (Loi du 20 décembre 1939).

⁵ Bolivie, Paraguay : la frontière entre les deux pays, dans le Chaco, a été fixée par le Traité du 21 juillet 1938 et l'arbitrage du 10 octobre 1938. Il en a été tenu compte dans les chiffres relatifs à la superficie.

⁶ Equateur, Pérou : le protocole signé le 29 janvier 1942 à Rio-de-Janeiro et relatif aux frontières entre les deux pays a été ratifié en février 1942. Les chiffres relatifs à la superficie sont très incertains et ne tiennent pas encore compte de la nouvelle délimitation.

⁷ Paraguay : les opérations du recensement n'ont pu s'effectuer de manière satisfaisante dans l'ensemble du pays.

⁸ Pérou : y compris une estimation pour la population dans la jungle (350.000) et pour d'autres lacunes du recensement (465.000).

⁹ Venezuela : sans la pop. indienne non recensée, env. 100.000.

¹⁰ Au début de juin 1945, les Gouvernements du Guatemala et du Salvador ont annoncé la fusion de ces deux pays.

ASIE (sans l'U.R.S.S.).

Pour l'ASIE, les estimations de la population sont très incertaines, notamment dans le cas de l'Afghanistan (7-12 millions), l'Arabie (7-10), le Bhoutan, l'Iran (9-15), l'Irak (3,5-5 millions), le Nepal, le Sarawak, la Syrie et le Liban, l'Indochine, la Transjordanie et la Chine. Pour cette dernière, les estimations accusent des divergences dépassant 100 millions.

¹ Arabie : Arabie Saoudienne (Nejd, Hedjaz), Oman, Koveit, Yemen, Hadramout.

² Chine : la distribution territoriale est celle introduite par le Gouvernement national en 1928. Les données sous « Chine » comprennent donc, en plus des 18 provinces existant auparavant, également la Mandchourie, la Mongolie intérieure et le Sinkiang (Turkestan).

Selon l'avis d'autorités chinoises compétentes, toutes les estimations de la population comportent une marge d'erreur très considérable. Le chiffre rond de 450 millions a été inséré dans le tableau à titre d'indication. Il est impossible de faire des estimations annuelles, vu qu'on ne possède pas de critères suffisants permettant de mesurer les fluctuations de la population d'une année à l'autre. La superficie de la Mandchourie et du Jehol (connus sous le nom de « Mandchoukuo ») est d'environ 1.303.000 km²; la population de ces territoires s'élevait en 1942 à 45 millions.

³ Inde, Prov. brit. : non compris la Birmanie, qui ne fait plus partie de l'Inde depuis le 1^{er} avril 1937 (Burma Act 1935).

⁴ Thaïlande, Indochine : chiffres ne tenant pas compte des cessions de territoire prévues par l'accord de Tokio du 11 mars 1941, entre le gouvernement de Vichy et la Thaïlande. Ces cessions — environ 65.000 km² — affectaient le Cambodge et le Laos.

⁵ Turquie : y compris Hataï (voir note ¹⁶).

⁶ Aden : « Colonie d'Aden » proprement dite, c.-à-d., non compris le « Protectorat d'Aden » (env. 300.000 km²).

⁷ Chypre, Malaisie, îles de l'Égée, Palestine : non compris les forces militaires.

⁸ Hong-Kong, 1941 : dénombrement approximatif de la population totale effectué au début de l'année en vue de l'organisation de la défense aérienne.

⁹ Etabl. des Détroits : Singapour, Penang, Malacca ; dépendances : Wellesley, Dindings, Labuan, îles Christmas et Cocos-Keel. En février 1935, les Dindings ont été rattachées à l'Etat de Perak.

¹⁰ Etats Malais fédérés : Perak, Selangor, Negri-Sembilan, Pahang ; non fédérés : Johore, Kedah, Kelantan, Perlis, Trengganu.

¹¹ Philippines : devenues, le 15 novembre 1935, le « Commonwealth » des Philippines, le retrait final et complet de la souveraineté exercée par les Etats-Unis étant prévu pour 1946.

AMERICA (continuation of notes).

² U.S.A., 1943 : incl. armed forces abroad. The "de facto" population amounted to 133,966,000, of which 119,970,000 whites.

³ Dominican Republic, Colombia : official estimates do not seem to agree exactly with censuses.

⁴ Dominica : by an Order in Council of December 20th, 1939, Dominica, which formed part of the Leeward Islands, is comprised in the Windward Islands as from January 1st, 1940.

⁵ Bolivia, Paraguay : the frontier between the two countries, in the Chaco, was fixed by the Treaty of July 21st, 1938, and the arbitration of October 10th, 1938. Area figures have been approximately adjusted.

⁶ Ecuador, Peru : the Protocol signed on January 29th, 1942, at Rio de Janeiro, defining the boundaries between the two countries, was ratified in February 1942. The figures for areas are conjectural and do not take into account this new delimitation.

⁷ Paraguay : the census could not be carried out satisfactorily in the whole country.

⁸ Peru : including an estimate for the population in the jungle (350,000) and for other gaps in the census (465,000).

⁹ Venezuela : not including unrecorded Indians (about 100,000).

¹⁰ At the beginning of June 1945, the Governments of Guatemala and Salvador announced the fusion of these two countries.

ASIA (not including the U.S.S.R.).

For ASIA, the population estimates are very unreliable, particularly in the case of Afghanistan (7-12 millions), Arabia (7-10 millions), Bhutan, Iran (9-15 millions), Iraq (3,5-5 millions), Nepal, Sarawak, Syria and Lebanon, Indo-China, Transjordan and China. For the last mentioned, the estimates differ by more than 100 millions.

¹ Arabia : Sa'udi Arabia (Nejd, Hejaz), Oman, Kuwait, Yemen, Hadramaut.

² China : territorial distribution as introduced by an Act published by the National Government in 1928. The data for China proper cover, therefore, Manchuria, Inner Mongolia and Sinkiang (Turkestan), in addition to the old 18 provinces.

According to competent Chinese authorities, there is a very considerable margin of error in all the population estimates. The round figure of 450 millions has been entered in the table as a general indication. It is impossible to make annual estimates, because of the lack of criteria which could be used for measuring fluctuations from year to year. The area of Manchuria and Jehol (also known as "Manchukuo") is about 503,000 sq. miles; the population of these territories amounted in 1942 to 45 millions.

³ India, Brit. prov. : not including Burma, no longer a part of India since April 1st, 1937 (Burma Act, 1935).

⁴ Thailand, Indo-China : no account is taken in the figures of the Tokio agreement of March 11th, 1941, between the Vichy government and Thailand which provided for transfers of territories — about 25,000 sq. miles — affecting Cambodia and Laos.

⁵ Turkey : including Hatay (see note ¹⁶).

⁶ Aden : "Aden Colony" — i.e., not including the Aden protectorate (about 116,000 sq. miles).

⁷ Cyprus, Malaya, Aegean Islands, Palestine : not including military forces.

⁸ Hong-Kong, 1941 : approximate count of total population carried out at the beginning of the year in connection with air raid defence.

⁹ Straits Settl. : Singapore, Penang, Malacca ; dependencies : Wellesley, Dindings, Labuan, Christmas and Cocos-Keeling Islands. In February 1935, Dindings were joined to the State of Perak.

¹⁰ Federated Malay States : Perak, Selangor, Negri-Sembilan, Pahang ; Non-feder. : Johore, Kedah, Kelantan, Perlis, Trengganu.

¹¹ The Philippine Islands became the "Commonwealth of the Philippines" on 15 XI 1935, the final and complete withdrawal of the sovereignty of the U.S.A. being contemplated for 1946.

Tableau 2 (suite.) Superficie et Population.**ASIE (suite des notes).**

¹² Kouan-Toung : non compris la zone du chemin de fer de la Mandchourie du Sud (280 km², env. 600.000 habitants).

¹³ Indes néerlandaises, provinces extérieures : Sumatra, Borneo et le Groote Oost (nom collectif s'appliquant depuis juillet 1938 à cinq provinces, dont Célebes, Timor, la Nlle-Guinée néerl., etc.).

¹⁴ Thaïlande, Birmanie, Malaisie : les chiffres ne tiennent pas compte des modifications territoriales annoncées à Tokio et Bangkok le 5 juillet 1943, et qui portaient sur l'annexion par la Thaïlande d'une partie de la Birmanie mesurant env. 30.000 km² et des Etats malais de Kedah, Kelantan, Perlis et Trengganu, comprenant 40.600 km² avec 1,4 million d'habitants.

¹⁵ Transjordanie, Syrie et Liban : la superficie non désertique s'élève pour la Transjordanie à environ 18.000 km² et pour la Syrie et le Liban à environ 112.000 km².

¹⁶ Syrie et Liban : les résultats partiels du dénombrement en cours ont servi de base pour l'estimation. (Pour détails, voir *Annuaire 1938/39*, p. 21). Non compris le Sandjak d'Alexandrette ou Hataï (4.800 km²; population en 1940 : 238.000).

Par l'Accord franco-turc du 23 juin 1939, le Gouvernement français a consenti au rattachement du Sandjak à la Turquie.

U.R.S.S. D'EUROPE ET D'ASIE.

¹ Les chiffres du tableau se réfèrent au territoire couvert par le recensement de janvier 1939 et se répartissent ainsi :

| (Chiffres en milliers) | Km ² | Sq. miles | Population 17.I.1939 | (Figures in 000's) |
|------------------------|-----------------|-----------|----------------------|----------------------|
| R. S. F. S. R. | 16 510.5 | 6 374.7 | 109 279 | R.S.F.S.R. |
| Russie Blanche | 126.8 | 49.0 | 5 568 | White Russian S.S.R. |
| Ukraine | 445.3 | 171.9 | 30 960 | Ukrainian S.S.R. |

| Kirghizie | 196.7 | 75.9 | 1 459 | Kirghiz S.S.R. |
| Total | 21 175.2 | 8 175.9 | 170 467 | Total |

Le tableau suivant a trait aux territoires et pays incorporés à l'U.R.S.S., aux termes de différentes lois soviétiques, entre septembre 1939 et août 1940 :

| (Chiffres en milliers) | Incorporation | Km ² | Sq. miles | Population XII.1939 | (Figures in 000's) |
|----------------------------|---------------|-----------------|-----------|---------------------|-----------------------|
| Prov. polonaises | 1.2.XI.1939 | 194.8 | 75.2 | 12 500 | Polish provinces. |
| Prov. finlandaises | 12.III.1940 | 35.1 | 13.6 | — | Finnish provinces. |
| Prov. roumaines : | | | | | Roumanian provinces : |
| Bessarabie | 2.VIII.1940 | 44.4 | 17.1 | 3 200 | Bessarabia. |
| Bukovine. | 2.VIII.1940 | 6.0 | 2.3 | 500 | Bukovina. |
| Lithuanie | 3.VIII.1940 | 59.8 | 23.1 | 2 925 | Lithuania. |
| Lettonie | 5.VIII.1940 | 65.8 | 25.4 | 1 951 | Latvia. |
| Estonie | 7.VIII.1940 | 47.5 | 18.3 | 1 122 | Estonia. |
| Total* | | 453 | 175 | 22 200 | Total.* |

La population des provinces finlandaises cédées en 1940 à l'U.R.S.S. (env. 450.000) avait été alors évacuée dans sa grande majorité en Finlande.

Les provinces polonaises ci-dessus sont celles qui ont fait l'objet du traité germano-soviétique du 28 septembre 1939, déduction faite du district de Wilno détaché par l'U.R.S.S. en faveur de la Lithuanie (traité soviéto-lithuanien du 10 octobre 1939). Aux termes de l'accord soviéto-polonais conclu à Londres le 30 juillet 1941, le Gouvernement soviétique déclara caducs les traités germano-russes de 1939 relatifs aux changements territoriaux de la Pologne.

En janvier 1944, il a indiqué que « la frontière soviéto-polonaise pourrait passer approximativement le long de la ligne dite Curzon, qui fut adoptée, en 1919, par le Conseil Suprême des Puissances Alliées et qui prévoit l'incorporation de l'Ukraine occidentale et de la Russie Blanche occidentale dans l'Union Soviétique ».

D'après la déclaration anglo-soviéto-américaine faite après la Conférence de Crimée, le 12 février 1945, « les trois chefs de gouvernement estiment que la frontière orientale de la Pologne devrait suivre la ligne Curzon en s'en écartant, dans quelques régions, de 5 à 8 kilomètres en faveur de la Pologne ».

Voir également notes ⁹ Finlande, ¹⁰ Roumanie.

— Table 2 (continued). Area and Population.**ASIA (continuation of notes).**

¹² Kwantung : not including the zone of the South Manchuria Railway (108 sq. miles, about 600,000 inhabitants).

¹³ Netherlands Indies, outer provinces : Sumatra, Borneo and the Groote Oost (collective name applied since July 1938 to five provinces, including Celebes, Timor, Netherl. New Guinea, etc.).

¹⁴ Thailand, Burma, Malaya : no account is taken in the figures of the territorial changes referred to in a statement issued in Tokio and Bangkok on July 5th, 1943, on the annexation by Thailand of part of Burma (some 12,000 square miles) and of the Malayan States Kedah, Kelantan, Perlis and Trengganu (15,670 square miles with a population of 1,4 million).

¹⁵ Trans-Jordan, Syria and Lebanon : the non-desert area amounts in Trans-Jordan to 7,000 sq. miles and in Syria and Lebanon to 43,000 sq. miles.

¹⁶ Syria and Lebanon : the results of a progressive count so far known have served as a basis for the estimate. (For details, see *Year-Book 1938/39*, p. 21). Not including the Sanjak of Alexandretta or Hatay (1,850 sq. m.; population in 1940 : 238,000).

By the Franco-Turkish Agreement of June 23rd, 1939, the French Government agreed to the Sanjak being joined to Turkey.

U.S.S.R. IN EUROPE AND IN ASIA.

¹ The figures in the table refer to the territory covered by the census of January 1939 and may be subdivided as follows :

| (Chiffres en milliers) | Incorporation | Km ² | Sq. miles | Population XII.1939 | (Figures in 000's) |
|----------------------------|---------------|-----------------|-----------|---------------------|-----------------------|
| Prov. polonaises | 1.2.XI.1939 | 194.8 | 75.2 | 12 500 | Polish provinces. |
| Prov. finlandaises | 12.III.1940 | 35.1 | 13.6 | — | Finnish provinces. |
| Prov. roumaines : | | | | | Roumanian provinces : |
| Bessarabie | 2.VIII.1940 | 44.4 | 17.1 | 3 200 | Bessarabia. |
| Bukovine. | 2.VIII.1940 | 6.0 | 2.3 | 500 | Bukovina. |
| Lithuanie | 3.VIII.1940 | 59.8 | 23.1 | 2 925 | Lithuania. |
| Lettonie | 5.VIII.1940 | 65.8 | 25.4 | 1 951 | Latvia. |
| Estonie | 7.VIII.1940 | 47.5 | 18.3 | 1 122 | Estonia. |
| Total* | | 453 | 175 | 22 200 | Total.* |

The following table shows the territories and countries incorporated in the U.S.S.R., in accordance with various Soviet laws, between September 1939 and August 1940 :

| (Chiffres en milliers) | Incorporation | Km ² | Sq. miles | Population XII.1939 | (Figures in 000's) |
|----------------------------|---------------|-----------------|-----------|---------------------|-----------------------|
| Prov. polonaises | 1.2.XI.1939 | 194.8 | 75.2 | 12 500 | Polish provinces. |
| Prov. finlandaises | 12.III.1940 | 35.1 | 13.6 | — | Finnish provinces. |
| Prov. roumaines : | | | | | Roumanian provinces : |
| Bessarabie | 2.VIII.1940 | 44.4 | 17.1 | 3 200 | Bessarabia. |
| Bukovine. | 2.VIII.1940 | 6.0 | 2.3 | 500 | Bukovina. |
| Lithuanie | 3.VIII.1940 | 59.8 | 23.1 | 2 925 | Lithuania. |
| Lettonie | 5.VIII.1940 | 65.8 | 25.4 | 1 951 | Latvia. |
| Estonie | 7.VIII.1940 | 47.5 | 18.3 | 1 122 | Estonia. |
| Total* | | 453 | 175 | 22 200 | Total.* |

The great bulk of the population of the Finnish provinces ceded to the U.S.S.R. in 1940 (about 450,000) was then evacuated to Finland.

The above-mentioned Polish provinces are those which formed the subject of the German-Soviet Treaty of September 28th, 1939, with the exception of the district of Wilno which was ceded by the U.S.S.R. to Lithuania (Soviet-Lithuanian Treaty of October 10th, 1939). By the Soviet-Polish Treaty concluded in London on July 30th, 1941, the Government of the U.S.S.R. "recognised the Soviet-German Treaties of 1939 as to territorial changes in Poland as having lost their validity".

In January 1944, it stated that "the Soviet-Polish frontier could pass approximately along the so-called Curzon Line, which was adopted in 1919 by the Supreme Council of Allied Powers and which provides for the inclusion of Western Ukraine and Western White Russia in the Soviet Union".

According to the Anglo-American-Soviet Declaration made after the Crimea Conference on February 12th, 1945, "the three heads of Government consider that the eastern frontier of Poland should follow the Curzon Line with digressions from it in some regions of 5-8 kilometres in favour of Poland".

Tableau 2 (suite). Superficie et Population. — Table 2 (continued). Area and Population.**EUROPE (sans l'U.R.S.S.).**

¹ Europe : Population à la fin de 1939 : chiffre en partie estimé.

² Albanie : sans les territoires yougosl. et grecs placés, de 1941 à 1944, sous l'admin. albanaise (14.924 km²; pop. env. 795.000).

³ Allemagne : la superficie est celle du Reich dans les limites d'août 1939 ; les chiffres de la population se réfèrent au territoire couvert par le recensement de mai 1939, c.-à-d. sans le territoire de Memel. (Le chiffre du recensement donné est celui de la population résidente ; la population de fait était de 79,6 millions.)

Le *Territoire de la Sarre*, administré par la Société des Nations, fut rattaché à l'Allemagne le 1^{er} mars 1935. L'*Autriche* fut rattachée à l'Allemagne le 13 mars 1938, les districts dits *sudètes* en octobre et novembre 1938, et le territoire de *Memel* le 22 mars 1939.

Les données suivantes ont trait aux territoires qui avaient été incorporés à l'Allemagne aux termes des différentes lois allemandes, après septembre 1939 :

| Territoires | Date des lois | Superficie en milliers de km ² | Population en milliers |
|--------------------------|---------------|---|------------------------|
| Danzig | 1.IX.1939 | 1,9 | 391 |
| Prov. polonaises | 8.X.1939 | 92,0 | 10.043 |
| Eupen, Malmedy, etc. | 18.V.1940 | 1,0 | 69 |
| Total | | 95 | 10.500 |

Les chiffres du tableau ne comprennent ni le *Protectorat de Bohême-Moravie* ni certains territoires placés, au cours de la guerre, sous administration civile allemande tels que le *Gouvernement Général de Pologne*, l'*Alsace-Lorraine*, le *Luxembourg*, la *Slovénie du Nord* (voir notes ¹⁸ Pologne, ²¹ Tchécoslovaquie, ²² Yougoslavie).

Selon la déclaration des quatre gouvernements des Nations alliées publiée le 5 juin 1945, le territoire allemand aux fins de l'occupation est délimité par « les frontières du 31 décembre 1937 ».

⁴ Belgique : l'estimation pour 1943 ne comprend pas les 41 communes d'*Eupen*, *Malmedy* et *Moresnet*, soustraites temporairement à la juridiction de l'administration belge. Voir note ³.

⁵ Bulgarie : la *Dobroudja* méridionale a été rattachée à la Bulgarie à la suite du traité bulgaro-roumain du 7 septembre 1940. La population de la Bulgarie, avec la Dobroudja méridionale, et y compris les émigrés en provenance de la Dobroudja du nord, s'élevait à la fin de 1940 à env. 6,7 millions. L'estimation pour 1942 comprenait, en plus, la population des territoires grecs et yougoslaves de *Thrace* et de *Macedoine* occupés temporairement par les forces bulgares depuis avril et mai 1941. (Superficie : 28.250 km²; population : 1,3 million.) Aux termes de l'armistice du 28 octobre 1944, la Bulgarie a annulé ces annexions.

⁶ Estonie, Finlande, Norvège, Pays-Bas, Suède : y comp. les eaux (Estonie : 2.328 km²; Finlande : 32.045; Norvège : 14.087; Pays-Bas : 404, le Zuidzee n'étant pas compris; Suède : 38.741; Turquie : non compris lacs et marécages (9.600 km²); Irlande et Irlande du Nord : sans les lacs et les grandes rivières.

⁷ Danzig : voir note ⁸. ⁸ Estonie, Lettonie : voir note ¹ p. 19.

⁹ Finlande : population finlandaise présente, sans les étrangers. La superficie indiquée est celle à laquelle s'appliquait le recensement de 1940, c'est-à-dire non compris les territoires cédés à l'U.R.S.S. par le traité finno-russe de mars 1940 (voir note ¹ U.R.S.S.). Aux termes d'une loi votée par le parlement finlandais le 5 décembre 1941, ces territoires faisaient à nouveau partie de la Finlande. Aux termes de l'armistice russe-finlandais du 19 septembre 1944, les clauses du traité de 1940 ont été rétablies et la Finlande a cédé, en outre, à l'U.R.S.S. la région de *Petsamo*.

¹⁰ France : population de fait. (Population légale : 41.900.000.) La population présente à la fin de 1944 a été estimée à 37.740.000, les « absents temporaires », principalement prisonniers et déportés, à 2.560.000, la population totale à 40.300.000.

¹¹ Grèce : voir notes ² Albanie, ⁵ Bulgarie.

¹² Hongrie : la superficie et la population sont celles des territoires couverts par les recensements effectués au cours de 1941.

Territoire dit de Trianon : Hongrie dans ses limites de 1938, avant l'annexion des territoires ci-après :

Territoires du Nord : partie de la Tchécoslovaquie attribuée à la Hongrie à la suite de la sentence arbitrale de Vienne du 2 novembre 1938, et se composant de quelques districts slovaques ainsi que d'une petite partie de la Russie subcarpathique.

Subcarpathie ou Russie subcarpathique : occupée par la Hongrie à la fin de mars 1939 et délimitée par la « commission hungaro-slovaque » le 4 avril 1939.

EUROPE (not including the U.S.S.R.).

¹ Europe : Population at the end of 1939 : figure partly estimated.

² Albania : exclud. Yugoslav and Greek territories placed under Albanian admin. from 1941 to 1944. (5,800 sq. miles; pop. 795,000).

³ Germany : the area is that of the Reich within the frontiers of August 1939 ; the population figures refer to the territories covered by the census of May 1939 — i. e., less the *Memel* territory. (The census figure given in the table refers to the “resident population”; the *de facto* population was 79,6 millions.)

The *Saar Territory*, administered by the League of Nations, was joined to Germany on March 1st, 1935. *Austria* was joined to Germany on March 13th, 1938; the *Sudeten* districts in October and November 1938, and the *Memel* territory on March 22nd, 1939.

The following data refer to the territories which had been incorporated in Germany, in accordance with various German laws, after September 1939 :

| Territories | Date of the laws | Area in sq. miles (000's) | Population XII.1939 (000's) |
|----------------------------|------------------|---------------------------|-----------------------------|
| Danzig | 1.IX.1939 | 0.7 | 391 |
| Polish provinces | 8.X.1939 | 35.5 | 10,043 |
| Eupen, Malmedy, etc. . . . | 18.V.1940 | 0.4 | 69 |
| Total | | 36.6 | 10,500 |

The figures in the table do not include the *Protectorate of Bohemia-Moravia* or certain territories placed, during the war, under German civil administration — e.g., the *General Government* of Poland, *Alsace-Lorraine*, *Luxemburg*, *Northern Slovenia* (see notes ¹⁸ Poland, ²¹ Czechoslovakia, ²² Yugoslavia).

According to the statement made by the four Governments of the Allied Nations, published on June 5th, 1945, German territory, for the purposes of the occupation, is delimited by “the frontiers of December 31st, 1937”.

⁴ Belgium : the estimate for 1943 does not include the 41 communes of *Eupen*, *Malmedy* and *Moresnet* temporarily withdrawn from the jurisdiction of the Belgian administration. See note ³.

⁵ Bulgaria : Southern *Dobrudja* was ceded to Bulgaria as a result of the Bulgarian-Roumanian Treaty of September 7th, 1940. The population of Bulgaria, with Southern Dobrudja, and including émigrés from Northern Dobrudja, was about 6,7 millions at the end of 1940. The estimate for 1942 included, in addition to the Dobrudja, the population of the Greek and Yugoslav territories of *Thrace* and *Macedonia* occupied temporarily by the Bulgarian forces since April and May 1941. (Area : 11,000 sq. miles; population : 1,3 millions.) By the terms of the Armistice of October 28th, 1944, Bulgaria annulled these annexations.

⁶ Estonia, Finland, Norway, Netherlands, Sweden : including inland waters (area in sq. miles : Estonia : 899; Finland : 12,373; Norway : 5,439; Netherl. : 156, the Zuidzee not included; Sweden : 14,958); Turkey : exclud. lakes and marshes (3,700 sq. miles); Ireland and N. Ireland : not includ. lakes and large rivers.

⁷ Danzig : see note ⁸. ⁸ Estonia, Latvia : see note ¹ p. 19.

⁹ Finland : *de facto* Finnish population, not including foreigners. The area given is that covered by the 1940 census — i. e., excluding territories ceded to the U.S.S.R. in accordance with the Finnish-Russian Treaty of March 1940 (see note ¹ U.S.S.R.). In accordance with a law voted by the Finnish Parliament on December 5th, 1941, these territories once more formed part of Finland. By the terms of the Russo-Finnish armistice of September 19th, 1944, the clauses of the 1940 Treaty were re-established, and, in addition, Finland ceded the region of *Petsamo* to the U.S.S.R.

¹⁰ France : *de facto* population. (Legal population 41,900,000.) The population within the country at the end of 1944 was estimated at 37,740,000, those “temporarily absent”, mainly prisoners and deportees, at 2,560,000, total population at 40,300,000.

¹¹ Greece : see notes ² Albania, ⁵ Bulgarie.

¹² Hungary : the area and population are those of the territory covered by the censuses taken in the course of 1941.

The so-called Trianon Territory : Hungary within the boundaries of 1938, prior to the annexation of the following territories : *Northern Territories* : part of Czechoslovakia assigned to Hungary as a result of the Vienna arbitral award of November 2nd, 1938, and consisting of certain Slovak districts and a small part of Subcarpathian Ruthenia.

Subcarpathie or Subcarpathian Ruthenia : occupied by the Hungarians at the end of March 1939; boundaries fixed by the “Hungarian-Slovak frontier commission” on April 4th, 1939.

(Europe : suite des notes de la page précédente.)

Transylvanie : partie de la Transylvanie cédée à la Hongrie par la Roumanie à la suite de la sentence arbitrale germano-italienne du 30 août 1940. Aux termes de l'armistice entre les Alliés et la Roumanie, du 12 septembre 1944, les gouvernements alliés considèrent la sentence arbitrale comme nulle.

Territoires méridionaux : territoires yougoslaves qui avaient été occupés par les Hongrois en avril 1941.

(Voir aussi notes¹⁹ Roumanie, ²¹ Tchécoslovaquie.)

¹⁸ Irlande (en irlandais « Eire ») : terme substitué à « Etat libre d'Irlande », par la Constitution du 29 décembre 1937. 1941 : dénombrement de la population en relation avec le rationnement.

¹⁴ Italie, recensement 1936 : population « spéciale », c'est-à-dire la population de fait plus les personnes se trouvant temporairement aux colonies et en Ethiopie. La population de droit s'élevait à 42,993,600 et la population de fait à 42,444,600. La population de droit a été estimée, en octobre 1943, à 45,637,000.

Les chiffres indiqués au tableau ne comprennent ni les provinces italiennes de la *Libye* (voir note¹⁴ Afrique) ni les *territoires yougoslaves* incorporés aux termes de décrets-lois du gouvernement fasciste du 3 et du 20 mai 1941 (10,623 km²; pop. 1941 : 760,000).

La délimitation de ces derniers territoires avait fait l'objet d'un accord « italo-croate » du 18 mai 1941 et d'un traité germano-italien du 8 juillet 1941. (V. aussi notes³ Allemagne, ²² Yougosl.)

¹⁵ Lithuanie : non compris le territoire de *Klaipeda* (Memel), rattaché à la Lithuanie de mai 1924 à mars 1939, ni le district de *Wilno* (voir note¹ U.R.S.S., page 19).

¹⁶ Norvège : population de droit. La population de fait, selon le recensement de 1930, était de 2,785,550.

¹⁷ Pays-Bas, estimation de 1943 : y compris la main-d'œuvre travaillant obligatoirement en Allemagne.

¹⁸ Pologne, superficie et estimation de 1938 : y compris des territoires ayant fait partie de la Tchécoslovaquie et incorporés à la Pologne en septembre 1938 (principalement la *Silésie de Cieszyn* ou *Teschen* ; superficie 1.086 km²; population en 1930, 241,700).

Le terme *Gouvernement Général* introduit par le décret allemand du 12 octobre 1939 correspondait à la partie de la Pologne occupée en septembre 1939 par les forces allemandes et ayant fait l'objet du traité germano-russe du 28 septembre 1939, à l'exclusion des provinces incorporées à l'Allemagne aux termes de la loi allemande du 8 octobre 1939 ; la Galicie y avait été ajoutée le 1^{er} août 1941. La superficie du « G. G. » était de 142,200 km²; sa population était estimée à plus de 17 millions. Au sujet du traité germano-russe en question et de son abrogation, voir note¹ U.R.S.S. Voir aussi note³ Allemagne.

(Europe : continuation of notes from preceding page.)

Transylvania : part of Transylvania ceded to Hungary by Roumania as a result of the German-Italian arbitral award of August 30th, 1940. By the terms of the armistice of September 12th, 1944, between the Allies and Roumania, the Allied Governments consider the arbitral award as invalid.

Southern Territories : Yugoslav territories which had been occupied by the Hungarians in April 1941.

(See also notes¹⁹ Roumania, ²¹ Czechoslovakia.)

¹⁸ Ireland (in Irish, "Eire") : name introduced by the Constitution of December 29th, 1937, replacing "Irish Free State". 1941 : count of the population in connection with rationing.

¹⁴ Italy, census 1936 : "special" population — i.e., *de facto* population plus people staying temporarily in colonies and Ethiopia. The legal population was 42,993,600, and the *de facto* population 42,444,600. The legal population was estimated, in October 1943, at 45,637,000.

The figures given in the table do not include either the Italian provinces in *Libya* (see Africa note¹⁴) or the *Yugoslav territories* incorporated in accordance with legislative decrees of the fascist Government of May 3rd and 20th, 1941 (4,100 sq. miles; pop. 1941 : 760,000).

The boundaries of the latter territories were fixed by an "Italian-Croat" Agreement of May 18th, 1941, and a German-Italian Treaty of July 8th, 1941. (See also notes³ Germany, ²² Yugoslavia.)

¹⁵ Lithuania : not including the territory of *Klaipeda* (Memel), which was joined to Lithuania from May 1924 to March 1939, or the district of *Wilno* (see note¹ U.S.S.R., page 19).

¹⁶ Norway : legal population. The *de facto* population, according to the 1930 census, was 2,785,550.

¹⁷ Netherlands, estimate 1943 : including compulsory Dutch labour force in Germany.

¹⁸ Poland, area and 1938 population estimate : including territories formerly part of Czechoslovakia, which were incorporated in Poland in September 1938 (chiefly *Cieszyn Silesia* or *Teschen* ; area 419 sq. miles; population in 1930, 241,700).

The term *General Government* introduced by the German Decree of October 12th, 1939, covered the part of Poland which was occupied in September 1939 by the German forces and which was the subject of the German-Russian Treaty of September 28th, 1939, with the exception of provinces incorporated in Germany under the German Law of October 8th, 1939 ; Galicia had been added to it on August 1st, 1941. The area of the "G. G." was 54,900 sq. miles; its population was estimated at over 17 millions. With regard to the German-Russian treaty in question and its abrogation, see note¹ U.S.S.R.; see also note³ Germany.

Tableau 2 (fin). Superficie et Population. — Table 2 (concluded). Area and Population.

(Europe : suite des notes de la page précédente.)

¹⁹ Roumanie : la superficie indiquée est celle du territoire couvert par le recensement d'avril 1941, c'est-à-dire déduction faite de toute la Bessarabie et de la moitié de la Bukovine cédées à l'U.R.S.S. le 2 août 1940, des deux tiers de la Transylvanie cédés à la Hongrie le 30 août 1940 et d'un tiers de la Dobroudja cédé à la Bulgarie le 7 septembre 1940. La superficie totale des territoires en question s'élevait à 99.800 km²; leur population, à près de 7 millions. (Voir notes ¹ U.R.S.S., ⁵ Bulgarie, ¹² Hongrie.) La population recensée comprenait 251.400 réfugiés en provenance des territoires qui avaient été cédés à l'U.R.S.S. L'estimation de la population pour 1939 a trait au territoire de 1939; celle de 1941 comprend la Bessarabie et la Bukovine qui avaient été alors à nouveau placées sous l'administration roumaine. Aux termes de l'armistice entre les Alliés et la Roumanie du 12 septembre 1944, la Roumanie a confirmé les cessions territoriales en faveur de l'U.R.S.S. et les gouvernements alliés ont déclaré nulle la sentence arbitrale de Vienne concernant la cession de la Transylvanie à la Hongrie.

²⁰ Royaume-Uni : Angleterre, Ecosse, 1940 : population totale, y compris la population non civile se trouvant en dehors du pays, mais non compris les forces armées de pays étrangers, des Dominions, etc. Population civile : Angleterre 39.889.000, Ecosse 4.841.000, en 1942 : 4.751.000.

²¹ Tchécoslovaquie : la superficie et la population sont celles du territoire couvert par le recensement de 1930 :

| | (en milliers) | Km ² . | Pop. 1930 |
|------------------------|---------------|-------------------|-----------|
| Bohême-Moravie-Silésie | 79 | 10.674 | |
| Slovaquie | 49 | 3.330 | |
| Subcarpathie | 12,6 | 725 | |

En septembre 1938, les districts des Sudètes avaient été cédés à l'Allemagne (Accord de Munich, déclaré depuis annulé) et la Silésie de Teschen à la Pologne. En novembre 1938, la sentence arbitrale de Vienne avait attribué à la Hongrie une partie de la Slovaquie ainsi qu'une petite partie de la Russie subcarpathique. Compte tenu de ces modifications, la superficie de la Tchécoslovaquie s'élevait à la fin de 1938 à 98.912 km² (population 10,5 millions). En mars 1939, la Slovaquie s'était déclarée indépendante et la Hongrie avait occupé toute la Russie subcarpathique. Aux termes du décret allemand du 16 mars 1939, la Bohême et la Moravie faisaient « partie du territoire du Reich grand-allemand » sous forme de protectorat.

Le dénombrement effectué dans le « Protectorat » en nov. 1943, reposait sur les « cartes de ménage » établies en vue du rationnement. Pas plus que l'estimation de 1939, il ne tenait compte des forces d'occupation, des citoyens allemands en séjour temporaire, etc.

Le recensement « slovaque » de décembre 1940 a été effectué sur le territoire délimité par le traité « germano-slovaque » du 21 novembre 1939 ; il ne comprenait pas les 85.000 travailleurs occupés alors en Allemagne.

²² Yougoslavie : au cours de l'occupation ennemie, des territoires yougoslaves avaient fait, en 1941, l'objet de divers traités, notamment : 1) traité de Zagreb du 13 mai « entre le Reich allemand et l'Etat indépendant de Croatie »; 2) traité analogue « italo-croate » signé le 18 mai à Rome ; 3) traité germano-italien du 8 juillet relatif aux « frontières germano-italiennes » ; 4) traité « italo-croate » du 27 octobre, signé à Zagreb et relatif à la frontière entre la « Croatie » et le « Monténégro ».

La superficie de la « Croatie », ainsi délimitée, était de 102.000 km²; sa population s'élevait, à la fin de 1941, à 6,7 millions (hommes 3,32 ; femmes 3,35). (Voir notes ², ³, ⁵, ¹², ¹⁴.)

Océanie.

On ne connaît que très imparfaitement la population des pays autres que l'Australie et la Nouvelle-Zélande.

¹ Australie : sans la population autochtone, estimée à 60.000 ; estimation de 1943 : y compris les forces armées à l'étranger, mais non compris les forces alliées de défense, les prisonniers de guerre, etc. Nouv.-Zélande, 1943 : sans les forces armées à l'étranger.

² Papoua, Nlle-Guinée, île Nauru : recensements de la population non indigène. Les estimations pour la Nlle-Guinée sont incomplètes ; la population s'élève probablement à près d'un million.

³ Gilbert et Ellice : y compris l'île de l'Océan et l'île Christmas.

⁴ Etablissements français : îles de la Société (Tahiti, etc.), îles Tuamotu (Makatea, etc.), archipel Tubuai, etc.

⁵ Nauru : mandat de l'Empire brit. exercé par l'Australie.

(Europe : continuation of notes from preceding page.)

¹⁹ Roumanie : the area given is that of the territory covered by the census of April 1941 — i.e., after deducting the whole of Bessarabia and the half of Bukovina ceded to the U.S.S.R. on August 2nd, 1940, the two-thirds of Transylvania ceded to Hungary on August 30th, 1940, and the third of Dobrudja ceded to Bulgaria on September 7th, 1940. The total area of the territories in question was 38,500 sq. miles, their population nearly 7 millions. (See notes ¹ U.S.S.R., ⁵ Bulgaria, ¹² Hungary.) The population covered by the census included 251,400 refugees from the territories which had been ceded to the U.S.S.R. The population estimate for 1939 relates to the territory of 1939; the 1941 estimate includes Bessarabia and Bukovina, which had then been once more placed under Roumanian administration. By the terms of the armistice of September 12th, 1944, between the Allies and Roumania, Roumania confirmed the cessions of territory in favour of U.S.S.R. and the Allied Governments declared invalid the arbitral award of Vienna concerning the cession of Transylvania to Hungary.

²⁰ United Kingdom : England, Scotland, 1940 : total population, including non-civilian population outside the country, but not including armed forces of foreign countries, the Dominions, etc. Civilian population : England 39,889,000, Scotland 4,841,000, in 1942 : 4,751,000.

²¹ Czechoslovakia : the area and the population are those of the territory covered by the census of 1930 :

| | (000's) | Sq. miles | Pop. 1930 |
|-------------------------|---------|-----------|-----------|
| Bohemia-Moravia-Silesia | 505 | 30.5 | 10,674 |
| Slovakia | 18.9 | 18.9 | 3,330 |
| Subcarpathia | 4.9 | 4.9 | 725 |

In September 1938, the Sudeten districts had been ceded to Germany (Munich Agreement, later declared invalid) and Teschen Silesia to Poland. In November 1938, the Vienna arbitral award had assigned to Hungary a part of Slovakia and a small part of Subcarpathian Ruthenia. Following these changes, the area of Czechoslovakia at the end of 1938 was 38,190 sq. miles (population 10.5 millions). In March 1939, Slovakia had declared herself an independent State and Hungary had occupied the whole of Subcarpathian Ruthenia. According to the German decree of March 16th, 1939, Bohemia and Moravia formed "part of the territory of the Greater German Reich" as a protectorate.

The count effected in the "Protectorate" in November 1943 was based on "household cards" drawn up for purposes of rationing. Like the 1939 estimate, this count took no account of occupying forces, German citizens in temporary residence, etc.

The "Slovak" census of December 1940 was carried out on the territory determined by the "German-Slovak" Treaty of November 21st, 1939. It did not include the 85,000 workers who were at that time employed in Germany.

²² Yugoslavia : during enemy occupation, certain Yugoslav territories had been, in 1941, the subject of various treaties — e.g., (1) the Treaty of Zagreb of May 13th "between the German Reich and the independent State of Croatia"; (2) a similar "Italian-Croat" Treaty signed on May 18th at Rome; (3) the German-Italian Treaty of July 8th concerning the "German-Italian frontiers"; (4) the "Italian-Croat" Treaty of October 27th, signed at Zagreb, concerning the frontier between "Croatia" and "Montenegro".

The area of "Croatia", within the frontiers so fixed, was 39,400 sq. miles ; its population amounted, at the end of 1941, to 6.7 millions (men 3.32 ; women 3.35). (See notes ², ³, ⁵, ¹², ¹⁴.)

OCEANIA.

The figures for the population of countries other than AUSTRALIA and NEW ZEALAND are highly approximate.

¹ Australia : figures do not include the aboriginal population estimated at 60,000 ; estimate, 1943 : including armed forces overseas, but excluding Allied defence forces, prisoners of war, etc. New Zealand, 1943 : excluding armed forces overseas.

² Papua, New Guinea, Nauru : the population censuses do not include natives. The estimates for New Guinea are incomplete ; the population probably reaches nearly one million.

³ Gilbert and Ellice : including Ocean and Christmas Islands.

⁴ French Settlements : Society Islands (Tahiti, etc.), Tuamotu Islands (Makatea, etc.), Tubuai Archipelago, etc.

⁵ Nauru : mandate of the British Empire, exercised by Australia.

**Tableau 3. POPULATION PAR SEXE ET PAR GROUPES D'AGE QUINQUENNAUX
(RECENSEMENTS ET ESTIMATIONS).**

Table 3. POPULATION BY SEX AND BY QUINQUENNIAL AGE-GROUPS (CENSUSES AND ESTIMATES).

Note générale. — Le tableau donne les chiffres par groupes d'âge quinquennaux selon le dernier recensement et, s'il y a lieu, la dernière estimation. Les personnes d'âge inconnu figurent à part dans une rubrique indiquée par un point d'interrogation « ? ». L'absence de chiffres dans cette rubrique ne signifie toutefois pas que l'âge de tous les recensés soit connu, car les bureaux statistiques procèdent souvent d'emblée à leur répartition.¹

En règle générale, les estimations ne sauraient prétendre au même degré d'exactitude que les recensements. Les méthodes employées en vue de ces extrapolations diffèrent selon les pays ; tandis que certaines parmi ces estimations sont basées sur le mouvement naturel et migratoire de la population, d'autres ne tiennent pas compte du mouvement migratoire ; il se peut que certaines extrapolations soient effectuées à l'aide de tables de mortalité. Le tableau ne comprend pas certaines estimations par âge, établies uniquement en appliquant à l'estimation totale de la population des pourcentages fixes de répartition, p. ex. ceux d'un recensement précédent (p. ex. Inde, Colombie).

Les totaux qui figurent au tableau ne s'accordent pas toujours avec la population totale indiquée par les recensements, soit que les chiffres relatifs à la population totale aient été révisés sans que la révision s'étende aux chiffres détaillés, soit que les relevés par groupes d'âge ne portent pas sur la population totale du pays.

Les relevés relatifs à l'âge sont, dans un certain nombre de pays, peu exacts (par exemple, Turquie, Inde, la plupart des pays de l'Amérique latine, etc.). Cela est souvent dû à la tendance qui existe de déclarer l'âge approximativement par un chiffre finissant par 0 ou 5 ou de ne pas déclarer les enfants venant de naître. Dans le cas des Etats-Unis, on estime que le nombre d'enfants de moins de 5 ans, indiqué par le recensement de 1940, était d'environ 863 000 inférieur au chiffre réel (voir page 25).

Là où les déclarations portent non pas sur l'âge, mais sur l'année de naissance, le chiffre d'enfants au-dessous d'un an risque d'être incomplet si le recensement a lieu avant la fin de l'année et il risque de comprendre plus d'une année dans le cas où le recensement a lieu après le début de l'année. C'est en partie pour ces raisons que le groupe 0-4 a été subdivisé dans le tableau en « -1 » (moins d'un an) et « 1-4 ».

L'indication de groupes telle que « 5-9 » s'entend pour cinq années allant de 5 ans révolus (c'est-à-dire du début de la sixième année) à 9 ans et 364 jours (c'est-à-dire au seuil de la onzième année) ; « 10-14 » couvre cinq années allant de 10 ans révolus (c'est-à-dire du début de la onzième année) à 14 ans et 364 jours (c'est-à-dire au seuil de la seizeième année) et ainsi de suite.

Le fait de donner des chiffres absolus en milliers et les pourcentages avec une seule décimale explique quelques petites divergences entre la somme des chiffres par groupes d'âge et les totaux insérés. Les pourcentages ont été calculés sur des chiffres entiers.

¹ L'Annuaire 1938/39 donnait une vue d'ensemble des changements survenus, au cours des dernières décennies, dans l'importance relative de quelques grands groupes d'âge : le groupe des jeunes (jusqu'à 15 ans), celui des gens en âge productif (15 à 64 ans), et celui des gens âgés de 65 ans et plus. Le groupe de 15 à 49 ans, pour les femmes, indiquait l'âge de reproduction.

General Note. — The table gives figures for five-year age-groups according to the latest census and, where later estimates exist, according to the latest estimate. Persons whose age is unknown are shown under a separate heading “?”, but the absence of figures under this heading does not mean that the age of all those recorded is known, since in many cases the statistical offices allocate them forthwith to the various groups.¹

As a rule, the estimates cannot claim the same degree of exactness as census returns. The methods employed for these extrapolations differ according to countries ; whereas certain estimates are based on the natural and migratory movement of population, the latter is ignored in other estimates ; in some cases, the extrapolations are probably arrived at with the help of mortality tables. The table does not include certain estimates by age-groups arrived at by applying simply to the total estimate some fixed percentage distribution derived from a previous census (e.g. India, Colombia).

The totals appearing in the table do not always agree with the total population indicated by the censuses, either because the figures regarding the total population have been revised without this revision being extended to the detailed figures, or because the returns by age-groups do not cover the total population.

The returns regarding age are in some countries not very accurate (for instance, Turkey, India, the majority of Latin-American countries, etc.). This is often due to the tendency to declare ages approximately by means of a figure ending with a 0 or a 5 or to omit children recently born. In the case of the United States, it is estimated that for the census of 1940 the under-registration of children under 5 years of age amounted to some 863,000 (see page 25).

When the declarations refer not to the age but to the year of birth, the figure of children under 1 year of age is likely to be incomplete, if the census takes place before the end of the year, and it is likely to include more than one year if the census takes place after the beginning of the year. It is partly for these reasons that the group 0-4 in the table has been subdivided into “-1” (less than 1 year) and “1-4”.

Group headings such as “5-9” mean five years extending from 5 years completed (i.e., from the beginning of the sixth year) to 9 years and 364 days (i.e., to just before the beginning of the eleventh year) ; “10-14” covers five years extending from 10 years completed (i.e., from the beginning of the eleventh year) to 14 years and 364 days (i.e., to just before the beginning of the sixteenth year) and so on.

The fact that actual figures are given in thousands and percentages with a single decimal explains some slight divergencies between the sums of the figures for the different groups and the totals shown. Percentages have been computed from figures in units.

¹ The Year-Book 1938/39 gave a general survey of the changes which have occurred, in the course of several decades, in the relative importance of certain main age-groups — viz., young persons (up to 15 years), persons in working-age (15 to 64 years), and persons aged 65 years or over. In the case of women, the group 15 to 49 years represented the age of reproductive.

Tableau 3 (suite). Population par groupes d'âge quinquennaux (Nombres absolus en milliers et %).
Table 3 (continued). Population by Quinquennial age-groups (Actual Numbers, 000's omitted, and %).

* Données approximatives. (Généralement chiffres fortement concentrés aux âges finissant par 0 ou 5.)

¹ Etats-Unis, Recens. 1942 : non compris les forces armées en dehors du pays. Les chiffres de 1942, ajustés en tenant compte des lacunes du recensement de 1940 en ce qui concerne les enfants au-dessous de 5 ans, s'établissent comme suit :

| | | | | | |
|-------|--------------|--------------------------|-----------------|-------------|-------------------------|
| Total | H.-M. 66 994 | dont blancs white 60 096 | 0-4 ans — years | H.-M. 6 221 | dont blancs white 5 389 |
| | F. 67 639 | of which white 60 469 | | F. 5 972 | of which white 5 149 |

* Approximate data. (Figures usually largely concentrated around ages ending with a 0 or a 5.)

¹ United States, 1942: not including the armed forces outside Continental U.S. Adjustment for under-enumeration of children under 5 years of age in the 1940 census gives for the year 1942 the following :

Tableau 3 (suite). Population par groupes d'âge quinquennaux (Nombres absous en milliers et %).
Table 3 (continued). Population by Quinquennial Age-groups (Actual Numbers, 000's omitted, and %).

¹ Finlande : population légale ; chiffres supérieurs à ceux de la population de fait.

² France : population de fait ; les données sont inférieures à celles de la population légale.

¹ Finland : legal population ; figures higher than those of the *de facto* population.

² France : *de facto* population ; the figures are below those relating to the legal population.

* Données approximatives (voir page 25).

¹ « Bohême-Moravie » : relevés basés sur les « cartes de ménage » établies en vue du rationnement. Non compris les forces militaires d'occupation, les enfants allemands placés à la campagne, les personnes séjournant moins d'un mois, etc.

² Turquie : territoires d'Europe et d'Asie.

³ Australie : y compris les hommes mobilisés hors du pays, mais non compris les forces alliées, les internés, les prisonniers de guerre, etc.

⁴ Nouvelle-Zélande : non compris les Maoris ni, en 1943, les hommes mobilisés hors du pays.

* Approximate data (see page 25).

¹ « Bohemia-Moravia » : returns based on household registers, established for purposes of rationing. Not including the occupation forces, German children in the countryside, people staying less than one month, etc.

² Turkey : territories in Europe and Asia.

³ Australia : including armed forces overseas, but excluding Allied defence personnel, internees, prisoners of war, etc.

⁴ New Zealand : not including Maoris nor, in 1943, men mobilised abroad.
