An entirely satisfactory statistical tabulation in regard to all forms of charitable aid is especially difficult in the case of benevolent institutions, because the services provided by these institutions are not always identical.

2. **Principal Institutions.**—Particulars respecting the accommodation and the number of inmates of the principal institutions were published in earlier issues of the Official Year Book (*see* No. 22, p. 485).

3. **Revenue and Expenditure.**—Details regarding revenue and expenditure for the year 1954–55 are given in the following table.

BENEVOLENT HOMES : REVENUE AND EXPENDITURE, 1954-55.
(£.)

(a) These figures relate to the three State hospitals and homes only. (b) 15 months ended 30th June, 1955. (c) Includes Commonwealth hospital benefits and age and invalid pension receipts. (d) Includes such items as purchase of land, cost of new buildings and additions to buildings.

4. The Aged Persons Homes Act.—The *Aged Persons Homes Act* 1954 operated from 16th December, 1954. The purpose of the act is to encourage and assist the provision of suitable homes for aged persons ("aged person" means a man who has reached the age of 65 years or a woman who has reached 60 years and includes the wife or husband of an aged person residing or desiring to reside with the aged person), and in particular, homes at which aged persons may reside in conditions approaching as nearly as possible normal domestic life, and, in the case of married people, with proper regard to the companionship of husband and wife.

To be eligible for assistance under this act an organization must be—

- (a) carried on otherwise than for purposes of profit or gain to the individual members; and
- (b) a religious organization, an organization the principal objects or purposes of which are charitable or benevolent, an organization of former members of the Defence Forces established in every State or a State branch of such an organization, or an organization approved by the Governor-General for the purpose of this Act.

An organization conducted or controlled by, or by persons appointed by, the Government of the Commonwealth or of a State or a local governing body established under the law of a State, is not eligible for assistance under this Act.

The Director-General of Social Services may make a grant of money to an organization as assistance towards meeting the cost of the construction or purchase of a home to be used permanently for the accommodation of aged persons.

A grant under this section shall be made at such time, or by such instalments and at such times, as are determined by agreement between the Director-General and the organization or, in the absence of agreement, by the Director-General.

The grant is made on a £1 for £1 basis with money raised by the organization, not counting money which the organization received from a governmental body or borrowed. Before a grant is made, the Director-General must be satisfied that the sum of the moneys expended, and the moneys presently available for expenditure, by the organization towards the capital cost of the home, together with the amount of the grant, will be not less than the capital cost of the home.

§ 2. Orphanages, Industrial Schools, etc.

1. **General.**—The methods of caring for orphans and neglected children differ extensively, inasmuch as some of the children are more or less segregated in orphanages and industrial schools, while others are boarded out with their mothers or female relatives or with approved foster-mothers. The children in orphanages and similar institutions may receive, in addition to primary education, some craft training. In all cases employment is found for the children on their discharge from the institution, and they remain for some time under the supervision of the proper authorities. The conditions under which orphans, neglected children and children boarded out live are subject to frequent departmental inspections.

2. **Principal Institutions.**—Particulars concerning the principal institutions in each State were published in earlier issues of the Official Year Book (*see* No. 22, p. 486).

3. **Children under Government Authority.**—The following table summarizes the transactions of State Departments during 1954–55 in connexion with children under their control or supervision. In addition to neglected children, the figures include uncontrollable and convicted children who are wards of a Government authority, as well as poor children whose parents obtain assistance from the Government without giving up the legal right of custody.

CHILDREN UNDER GOVERNMENT AUTHORITY : SUMMARY, 1954-55.

(a) Year ended 31st December, 1954.
463 after-care ex-institution inmates.

(b) Includes inmates of hospitals.

(c) Includes

The total expenditure on children's relief in the foregoing table shows considerable variation amongst the States owing to the different methods of treating assistance to mothers with dependent children. In South Australia, Western Australia and Tasmania, large amounts have been excluded from the total expenditure on this account owing to the difficulty of obtaining separate amounts for allowances made in respect of the dependent children only.

§ 3. Protection of Aborigines.

For the protection of the aboriginal Australian race, there are institutions, under the supervision of Aborigines Boards, where these people are housed and encouraged to work, the children receiving elementary education. The work is usually carried on at mission stations, but many of the natives are nomadic, and receive food and clothing when they call, while others only rarely come near the stations. The aboriginal native race is extinct in Tasmania. The expenditure from Consolidated Revenue in 1954-55 was as follows (figures in brackets are for year 1953-54):—New South Wales, £170,694 (£151,100); Victoria, £13,131 (£10,960); Queensland, £592,218 (£512,549); South Australia, £84,989 (£83,844); Western Australia, £327,253 (£180,517); Northern Territory, £413,833 (£354,266); Australian Capital Territory, £3,241 (£3,227); total for Australia £1,605,359 (£1,296,463).

§ 4. Lifesaving.

There are three lifesaving societies in Australia—The Royal Lifesaving Society, the Australian Lifesaving Society and the Surf Lifesaving Association. The object of these societies is the saving of life from drowning and other forms of asphyxiation. Among other things, they aim to encourage an ability to swim and a knowledge of lifesaving techniques on the part of pupils in schools and colleges. Numerous certificates of proficiency in various grades are issued annually throughout Australia.

§ 5. Royal Humane Society.

The Royal Humane Society of Australasia with head office at 188 Collins-street Melbourne has as its main object the granting of awards to all who with bravery, skill and perseverance promptly risk their own lives in saving or attempting to save those of their fellow creatures. The classes of awards are (a) Gold Medal; (b) Silver Medal; (c) Bronze Medal; and (d) Certificate of Merit. The Clarke Medal is awarded for the outstanding case of the year, and the Rupert Wilks Trophy is awarded for the most outstanding bravery by a child under 13 years of age. About 75 awards are made annually.

§ 6. The Order of St. John.

The Priory in Australia of the Most Venerable Order of the Hospital of St. John of Jerusalem is the governing body of the various activities of the Order which comprises the St. John Ambulance Association, the St. John Ambulance Brigade and the Hospitallers' Clubs in all States and Commonwealth Territories.

The teaching of first aid to the injured, home nursing, hygiene and child welfare are undertaken by the Association and carried out in a practical manner by the Brigade and qualified members of the public throughout the Commonwealth, in times of peace and war.

The Hospitallers' Clubs in each State undertake the collection of funds for the St. John Ophthalmic Hospital in Jerusalem, and other duties which tend to bring together all persons interested in the work of St. John.

The Order of St. John has established ambulance transport services in some States, acts as an ancillary to such services in other States, and provides technical reserves for the medical services of the Crown.

The Life Saving Medal is awarded by the Order as warranted.

§ 7. Other Charitable Institutions.

Owing to the variety of name and function of other charitable institutions it has been found impracticable to give detailed results. The aid given in kind—food, clothing, tools of trade, etc.—is considerable, whilst the shelter and treatment afforded range from a bed for a night for casual callers in establishments ministering minor charity to indoor treatment over long periods in those that exist for the relief of the aged and the infirm. The institutions not so particularized include homes for the deaf, dumb and blind, infant homes, homes for the destitute and aged poor, industrial colonies, night shelters, crèches, rescue homes for females, free kindergartens, auxiliary medical charities, free dispensaries, benevolent societies and nursing systems, ambulance and health societies, boys' brigades, humane and animals' protection societies, prisoners' aid associations, shipwreck relief societies, bush fire, flood and mining accident relief funds.

CHAPTER XVI.

POPULATION.

NOTE.—The figures shown throughout this chapter for the Census of 30th June, 1954, are the final results, and population estimates shown for the intercensal period 1947 to 1954 are revised figures which have been adjusted in accordance with these results.

In general, the remaining statistics in this chapter cover the year 1956. More detailed figures will be found in the annual bulletin, *Demography*.

§ 1. Population Statistics.

Population statistics relating to Australia or to the component States and Territories as at specific dates are of two types—

- (i) *Those ascertained by census enumeration.* These results attain a very high degree of accuracy and may generally be accepted without reservation.
- (ii) *Estimates derived by the application of vital and migration statistics to census data.* In general, three estimates are made for any specific date :
 - (a) Original estimates for dates subsequent to a census made before another census is taken.
 - (b) Two-stage revision of the original estimates for each newly completed intercensal period to adjust for the difference between the new census result and the comparable estimate. This is to bring intercensal estimates into line with the two census populations. The first revision is reconciled with preliminary census results and the second revision with final census results.

Final revised figures become the permanent population estimates. For purposes requiring a mean population for any twelve-month period such mean is calculated as described in § 4. As populations at specific dates are used in these calculations, consequential revisions are made in mean populations when the estimates for specific dates are revised as described above.

In accordance with this policy, all Australian population statistics shown in this issue of the Official Year Book for dates up to 30th June, 1954, and all mean populations for calendar years up to 1953 and financial years up to 1953-54 are final. Population statistics for dates or years subsequent to these are subject to revision when another census is taken.

Since the establishment of the Commonwealth Bureau of Census and Statistics the populations of the States and Territories have been estimated in a comparable manner and attention has been given to the improvement of the basic demographic data from which the estimates are compiled. The principal source of error in early estimates lay in the migration records, both overseas and interstate, and efforts were directed towards their improvement. The 1911 Census disclosed an error in the precensal estimates equivalent to proportions of 14.5 per cent. and 10.0 per cent., respectively, of recorded male and female overseas departures from Australia. These proportions were used as adjusting factors to recorded overseas departures during the intercensal period 1911-21. These adjusting factors were reduced after the 1921 Census to 1 per cent. for males and 4.5 per cent. for females and were discontinued altogether after the 1933 Census. From the results of the 1954 Census it appears that the accuracy of the records of overseas migration is such that in future little adjustment to recorded figures will be necessary for Australia as a whole.

It is improbable that the same degree of accuracy as has been attained in the record of overseas migration can be reached in the case of interstate movements. Records are made of interstate passengers by sea, rail and air, but it is impracticable, with occasional important exceptions, to record the movements by road.

§ 2. The Census.

1. **Census-taking.**—Although “musters” of the population were carried out at least annually from 1788 to 1825, the first regular census in Australia was not taken until 1828 when a count of the population of the Colony of New South Wales was made. Subsequent censuses were taken sporadically in the various colonies until 1881, when a census was taken on the same date throughout Australia.

In 1891 and 1901, census-taking was still in the hands of the Government Statisticians of the States, but, in 1911, under the provisions of the Commonwealth Census and Statistics Act, which provides for the enumeration to be made from one centre instead of by each State as formerly, the Commonwealth Statistician undertook the first census of the Commonwealth of Australia. The second was taken in 1921, the third in 1933, the fourth in 1947 and the fifth as on the night of 30th June, 1954.

2. **Population recorded at Censuses.**—State and Territorial populations recorded at the Australia-wide censuses taken over the period 1881 to 1954 are shown in the following table. The figures relate to the political boundaries of the several States (or Colonies) and Territories as they existed at the date of each census, except that the Northern Territory has been shown separately from South Australia for three censuses prior to its transfer from that State. The years of formation of the separate Colonies and transfer of the Territories are shown in Chapter 1, § 4 and § 5. The total populations recorded at the censuses taken in the Colonies from 1828 to 1876 were shown in Official Year Book No. 40, page 326.

NOTE.—Minus sign (—) denotes decrease.

§ 3. Growth and Distribution of Population.

1. Growth of Population.—The table which follows shows the growth in the population of each sex in the various States and Territories as measured by the estimated population at 31st December in 1880 and thereafter at decennial intervals to 1950. Each year from 1951 to 1956 is included in order to show recent fluctuations in greater detail.

ESTIMATED POPULATION : 1880 TO 1956.

(a) Northern Territory figures included with South Australia prior to 1900. (b) Part of New South Wales prior to 1911. (c) Includes all defence personnel enlisted in Australia irrespective of movements subsequent to enlistment.

Estimates of population for intercensal years are obtained in the manner outlined in § 1.

The estimated population at 31st December each year from 1788 to 1946 on the same basis as in the table above is shown in *Demography*, Bulletin No. 67, 1949 and for the period 1881 to 1955 in *Demography*, Bulletin No. 73. A graph illustrating the growth of the population of Australia and of each State and Territory appears on page 561.

2. **Present Numbers.**—The population of Australia at 31st December, 1956, was estimated at 9,533,334 persons of whom 4,830,721, or 50.67 per cent., were males and 4,702,613, or 49.33 per cent., were females. The increase during 1956 was 220,043, equal to 2.36 per cent., males having increased by 115,792 or 2.46 per cent., and females by 104,251 or 2.27 per cent. This increase was the result of an excess of births over deaths of 126,045, and a net gain by migration of 93,998 persons.

3. **Proportion of Area and Population, Density and Masculinity.**—The previous table shows the number of persons in each of the States and Territories at 31st December, 1956. In the following table the proportions of the total area and of the total population represented by each State and Territory are given, together with the density and the masculinity of the population.

DENSITY AND MASCULINITY OF POPULATION, 1956.
(EXCLUDING FULL-BLOOD ABORIGINALS.)

State or Territory.	Proportion of Total Area. (Per cent.)	Proportion of Estimated Population, 31st December, 1956. (Per cent.)			Density. (a)	Masculinity. (b)
		Males.	Females.	Persons.		
New South Wales	10.40	37.31	37.98	37.64	11.60	100.89
Victoria	2.96	27.50	27.73	27.62	29.96	101.85
Queensland	22.54	14.66	14.26	14.46	2.06	105.60
South Australia	12.78	9.05	9.03	9.04	2.27	103.05
Western Australia	32.81	7.31	7.05	7.18	0.70	106.43
Tasmania	0.88	3.54	3.44	3.49	12.70	105.87
Northern Territory	17.60	0.22	0.16	0.19	0.03	144.29
Australian Capital Territory	0.03	0.41	0.35	0.38	38.35	121.76
Australia	100.00	100.00	100.00	100.00	3.20	102.72

(a) Number of persons per square mile.

(b) Number of males per 100 females.

Additional information regarding density and masculinity of population appears in later sections of this chapter.

4. Urban and Rural Distribution.—Particulars of the distribution of the population amongst metropolitan urban, other urban and rural areas in each State and Territory is available only from a census. Particulars of the distribution at the 1947 Census were shown in Official Year Book No. 39, pages 521–524.

At the census of 30th June, 1954, the number of persons and the proportion of the total population of Australia in each division were:—metropolitan urban 4,845,230, 53.92 per cent.; other urban 2,230,039, 24.81 per cent.; rural 1,887,892, 21.01 per cent. Migratory population (23,369) accounted for the remaining 0.26 per cent.

Of the States, Victoria had the largest proportion of population residing in the metropolitan area (62.15 per cent.) but was closely followed in this respect by South Australia (60.66 per cent.). Percentages for the other States were:—New South Wales, 54.42; Queensland, 38.10; Western Australia, 54.50; and Tasmania, 30.84.

A feature of the metropolitan population is its higher femininity as compared with the population of extra-metropolitan areas. In 1933, 52.5 per cent. of the metropolitan population was composed of females; in 1947, the proportion had fallen slightly to 51.9 per cent., being highest in Tasmania at 52.3 per cent.; at the Census of 30th June, 1954, the proportion had fallen to 51.0 per cent., there being little difference in the proportions as between the several States. The proportion of females in extra-metropolitan areas was between 46 per cent. and 48 per cent. at each of these three censuses.

Metropolitan Urban Divisions include the capital cities of the States and (included in 1954 for the first time) Canberra, the capital city of Australia, the boundaries of the capital cities being determined for census purposes by the Statisticians of the States in collaboration with the Commonwealth Statistician, and normally include the city proper and all contiguous urban areas. In order to conform to the growth of the metropolitan urban population the boundaries are reviewed at each census and adjustments made, wherever necessary, to embrace contiguous urban areas that have developed since the previous census. Amendments were made prior to the Census of 1954 to the boundaries of the Metropolitan Urban Divisions in New South Wales, Victoria and Tasmania.

Other Urban Divisions comprise the capital city of the Northern Territory, all separately incorporated cities and towns, and all other towns with a population of 1,000 persons or more (750 in Tasmania), outside the Metropolitan Urban Divisions. The inclusion in the Other Urban Divisions in 1954 of the larger towns not separately incorporated was a significant departure from the classification adopted at previous censuses, when these towns (in all States except Tasmania) were included in the Rural Divisions, and the Other Urban Divisions (or Provincial Urban Divisions) were restricted to provincial separately incorporated cities and towns only. As it is not possible to provide 1947 particulars for all these towns, the particulars for the Other Urban and Rural Divisions for 1947 have been combined in the table below.

Rural Divisions comprise the remaining portions of each State and Territory, and are affected by the intercensal changes in the areas of the Metropolitan Urban and Other Urban Divisions. As already mentioned, the Rural Divisions in 1954 exclude the towns of 1,000 persons or more (750 in Tasmania) which were not separately incorporated.

The term "Migratory" used in the following tables refers to persons not elsewhere enumerated who at midnight between 30th June and 1st July, 1954 were travelling on ships in Australian waters or on long-distance trains or aircraft.

<i>Total</i> ..	<i>4,546,118</i>	<i>4,440,412</i>	<i>8,986,530</i>	<i>100.00</i>	<i>100.00</i>	<i>18.57</i>

(a) See letterpress on page 545. (b) Adjustments have been made to the 1947 Census figures for the Metropolitan Divisions of New South Wales, Victoria and Tasmania in order to provide approximate comparisons on the 1954 Census basis. See letterpress on page 545.

NOTE.—Minus sign (—) denotes decrease.

5. Capital Cities : Australia and Other Countries.—In Australia there is an abnormal concentration of population in the capital cities, which are the only cities of outstanding importance in the various States. A comparison with the capitals of various other countries is given in the following table.

POPULATION OF CAPITAL CITIES: AUSTRALIA AND OTHER COUNTRIES.
(*000.)

State or Country.	Metropolis.	Year.	Metro- politan Popu- lation.	Country.	Metropolis.	Year.	Metro- politan Popu- lation.

(c) Census, 30th June, 1954.

(c) Entire Urban Area.

(d) At 31st May, 1955.

7. **Urban Areas Outside Metropolitan Areas.**—The proportion of the total population of each State which was located in incorporated urban provincial areas at the 1933 and 1947 Censuses was shown in Official Year Book No. 39, pages 522-3. In Official Year Book No. 40, page 334, a table was given showing aggregate population at the 1947 Census of all cities and towns outside the metropolitan area of each State with 2,000 or more and 3,000 or more inhabitants, irrespective of whether such centres were incorporated separately or not. In addition, the proportion of the aggregate population of these cities and towns to the total population of the State was shown. The following table shows similar particulars for the 1954 Census.

AGGREGATE POPULATION OF CITIES AND TOWNS OF SPECIFIED SIZE :
CENSUS, 30th JUNE, 1954.

(EXCLUDING FULL-BLOOD ABORIGINALS.)

State or Territory.	Cities and Towns outside Metropolitan Area with Population of—					
	2,000 and over.			3,000 and over.		
	Number.	Population.	Proportion of Total Population.	Number.	Population.	Proportion of Total Population.
			%			%
New South Wales(a) ..	98	881,391	25.75	67	806,373	23.55
Victoria ..	56	415,690	16.95	40	376,347	15.35
Queensland ..	41	404,520	30.69	29	374,328	28.40
South Australia ..	14	74,502	9.35	9	62,008	7.78
Western Australia(b) ..	13	82,139	12.84	7	67,440	10.54
Tasmania ..	8	89,003	28.83	6	84,312	27.31
Northern Territory ..	2	10,856	65.92	1	8,071	49.01
Australian Capital Territory (c)
Total ..	232	1,958,101	21.79	159	1,778,879	19.79

(a) Excludes that part of Liverpool Municipality outside the Metropolitan Area of Sydney.
(b) Excludes that part of Fremantle suburbs outside the Metropolitan Area of Perth. (c) The only city or town is Canberra, the capital city of Australia, classed as metropolitan.

In the foregoing table, "Urban Areas" comprising two or more Local Government Areas or portions thereof are treated as units. The "Urban Areas" so treated are: in New South Wales, Newcastle; in Victoria, Ballarat, Bendigo, and Geelong; in Western Australia, Kalgoorlie; and in Tasmania, Launceston. The figures in each instance include the populations of the adjoining areas which, together with the city proper, constitute the entire "Urban Area".

The numbers of towns of 2,000 or more inhabitants in New South Wales and Victoria, and of 3,000 or more in New South Wales, show considerable decreases as compared with the figures for the 1947 Census. This is due to the absorption, by the increased metropolitan areas, of towns within these ranges which were formerly outside the metropolitan limits, and, in New South Wales, to similar absorptions by the City of Blue Mountains, Greater Wollongong and Newcastle Urban Area.

8. **Principal Cities in the World.**—The following table shows the population of the world's largest cities at the latest available date:—

POPULATION OF THE WORLD'S LARGEST CITIES.

§ 4. Mean Population.

1. **General.**—Mean populations are calculated for twelve-month periods to provide a satisfactory average basis for calculations requiring allowance for the continuous change in population figures during such periods.

2. **Method of Calculation.**—From 1901 onwards the mean population for any year has been calculated by the formula:—

$$\text{Mean Population} = \frac{a + 4b + 2c + 4d + e}{12}$$

where *a*, *b*, *c*, *d* and *e*, respectively, are the populations at the end of the quarter immediately preceding the year and at the end of each of the four succeeding quarters; e.g., in the case

of a calendar year, 31st December of the preceding year and 31st March, 30th June, 30th September and 31st December of the year under consideration. This formula gives a close approximation to the mean of a theoretical population progressing smoothly through the five values *a*, *b*, *c*, *d*, *e*.

3. Results.—(i) *Calendar Years.* The following table shows the mean population of each State and Territory for the calendar years 1947 to 1956:—

(a) Includes all defence personnel enlisted in Australia irrespective of movements subsequent to enlistment.

§ 5. Elements of Increase.

1. *Natural Increase.*—(i) *General.* The two factors which contribute to the growth of a population are the "natural increase", i.e., the excess of births over deaths, and the "net migration", i.e., the excess of arrivals over departures. In earlier issues of the Official Year Book particulars of the natural increase from 1861 were given for each sex and for each State and Territory (see No. 22, page 899.) Figures for more recent years will be found in *Demography*, Bulletin No. 73.

During the present century, the rate of natural increase grew until it reached its maximum at a rate of 17.44 per thousand of population in 1914, but it steadily declined after that year to 7.07 in 1934. There was little change until 1939, but during the war and in the post-war period the rate rose sharply, reaching the level of 14.37 in 1947, and it has since remained at between 13 and 14 per 1,000 of population.

In the following table particulars of the natural increase in each State and Territory are given for each sex for each five-year period from 1926 to 1955 and for each of the years 1952 to 1956.

POPULATION : NATURAL INCREASE (EXCESS OF BIRTHS OVER DEATHS).

(a) Excess of births over civilian deaths from September, 1939 to June, 1947. (b) Excess of births over deaths per 1,000 of mean population. (c) Excess of births over civilian deaths per 1,000 of mean population from September, 1939 to June, 1947.

NOTE.—Minus sign (-) denotes excess of deaths over births.

During the first five years of the present century, the average increment to the population of Australia by natural increase was 56,886 persons per annum. The increment rose to 81,695 persons per annum in 1921-25, but thereafter fell to 52,650 persons per annum in the five years 1931-35. During 1941-45, the average annual excess of births over civilian deaths was 74,750, while during 1951-55 the annual excess of births over deaths was a record high average of 119,940. In the year 1956 the excess was 126,045.

A graph showing the rate of natural increase for each year from 1860 to 1956 will be found on page 598.

(ii) *Comparison with other Countries.* Notwithstanding its low birth rate, Australia has a higher rate of natural increase than most European countries, owing to the fact that its death rate is very low. The following table gives a comparison between the rate of natural increase in Australia and that in some of the principal countries for which such information is available.

NATURAL INCREASE OF POPULATION : VARIOUS COUNTRIES.

NOTE.—Minus sign (-) denotes decrease.

2. **Net Migration.***—The other factor of increase in the population, namely, the excess of arrivals over departures, known as "net migration," is, from its nature, much more subject to variation than is "natural increase".

Particulars of the increase by net migration are given below for five-year periods from 1926 to 1955 and for each of the years 1952 to 1956.

POPULATION: INCREASE BY NET MIGRATION.

(a) Excludes troop movements from September, 1939 to June, 1947. (b) Excludes interstate migration from July, 1943 to June, 1947.

NOTE.—Minus sign (—) indicates excess of departures over arrivals.

* Oversea and interstate. The subject of overseas migration is dealt with at some length later in this chapter (see page 571.)

In the five years ended 1935 there was a net emigration of 10,886 and in the five years ended 1940 a net immigration of 43,128. During the war period 1941-45 net immigration fell to 7,809 persons. In 1946 there was a net loss by migration of 15,148 persons, due mainly to the departure of refugees and evacuees, and also fiancées, wives and children of British and Allied servicemen but, with increasing transport facilities and the resumption of assisted migration, there was a net gain of 10,611 in 1947, increasing rapidly to 55,115 in 1948, 150,001 in 1949 and 152,505 in 1950. This large net gain was due in great measure to the arrival of successive contingents from Australia's quota of 176,000 former European displaced persons, of whom 156,491 had arrived by the end of 1950. As this flow diminished, it was partly offset by new schemes for assisted migrants, but by 1953 the total net gain from all sources during the year had fallen to 42,897. Since then it has risen, being 93,998 in 1956. The net gains in each of the years 1949 to 1952 were the highest recorded for individual years with the exception of 1919, for which year troops returning from the 1914-18 War were included.

3. Total Increase.—The total increase of the population is obtained by combining the natural increase with the increase by net migration. For the period September, 1939 to June, 1947, deaths of defence personnel have been deducted from the total increase so derived. The results of the 1947 and 1954 Censuses disclosed some unrecorded movements of population during the intercensal periods, July, 1933 to June 1947 and July, 1947 to June, 1954, and particulars of total increase, after taking into account deaths of defence personnel in the earlier period, have been adjusted for these discrepancies. However, no separate adjustment has been applied to individual elements of increase during the periods, although intercensal discrepancies disclosed by previous censuses were adjusted on recorded overseas departures.

The annual increments to the population for the years 1952 to 1956 are shown below, together with the increases for each five years from 1926 to 1955. For the reasons stated in the previous paragraph, figures for the period 1933 to 1954 differ from the totals of figures for natural increase and net migration shown in preceding tables by an amount equal to the net total of deaths of defence personnel and unrecorded movements of population disclosed by the Censuses of 1947 and 1954.

POPULATION : TOTAL INCREASE.

(a) Includes recorded deaths of defence personnel, whether inside or outside Australia, from September, 1939 to June, 1947. (b) Excludes interstate migration from July, 1943 to June, 1947.

4. Rate of Population Growth.—(i) *Australia.* The annual percentage rate of population growth is computed by the compound interest formula. The formula is as follows :—

$$P_1 = P_0 (1+r)^t$$

where P_0 and P_1 are the populations at the beginning and end of the period respectively, t is the number of years intervening and r is the annual rate of growth.

The annual rates of growth per cent. of population in Australia during each of the years 1947 to 1956 were as follows :—1947, 1.60 ; 1948, 2.02 ; 1949, 3.25 ; 1950, 3.26 ; 1951, 2.65 ; 1952, 2.48 ; 1953, 1.87 ; 1954, 2.11 ; 1955, 2.45 ; and 1956, 2.36.

The annual rate of population growth during the present century has been 1.67 per cent., but the results from year to year have deviated widely from this figure. In the following table the period 31st December, 1900 to 31st December, 1956 has been arranged into certain defined groups of years according to the occurrence of influences markedly affecting the growth of population :—

POPULATION : PERIODICAL RATES OF GROWTH.

Period.	Interval. (Years.)	Total Increase. ('000.)	Average Annual Numerical Increase. ('000.)	Annual Rate of Population Growth. (Per cent.)		
				Natural Increase.	Net Migration.	Total.
1901 to 1913 ..	13	1,128	87	1.59	0.53	2.04
1914 to 1923 ..	10	862	86	1.50	0.15	1.64
1924 to 1929 ..	6	680	113	1.28	0.64	1.88
1930 to 1939(a)	10	569	57	0.82	0.03	0.85
1940 to 1946(a)	7	513	73	1.05	0.01	1.01
1947 to 1956(a)	10	2,015	202	1.44	1.11	2.40

(a) For the period September, 1939 to June, 1947, overseas movements of Australian defence forces have been excluded and deaths of members of these forces, whether occurring in Australia or overseas, have been included.

Up to 1913 the rate of natural increase was rising, and this factor, coupled with the impetus given to immigration from 1911 onwards by increased governmental assistance, was responsible for the comparatively high annual rate of 2.04 per cent. during this period. The 1914-18 War was a dominating influence in the decade 1914-23, and its effects can be

seen in the reduction of the rate from 2.04 to 1.64 per cent. From 1924 to 1929, more settled and prosperous conditions were experienced; encouraged migration was resumed on a large scale and, despite a further decline in the rate of natural increase owing to the persistent fall in the birth rate, the annual rate of growth rose to 1.88 per cent. After 1929 came the economic depression, and immigration ceased—in fact, Australia actually lost people through an excess of departures over arrivals in 1930, 1931, 1932 and 1935. The rate of natural increase also fell, and the rate of growth of the population receded to 0.85 per cent. per annum. With the outbreak of war in 1939, Australia entered a new phase in her demographic history, the full effects of which will not be seen for some time to come. The immediate effect of the war was to increase the number of marriages and to reverse the downward trend in fertility. The number of births increased each war year from 1940 to 1945, and these increases more than offset the rise in deaths due to war casualties and higher civilian death rates. As might be expected, migration over these years was negligible. The post-war period 1947 to 1956 was marked by a continued high natural increase and a resumption of immigration, the latter resulting in very high net gains in each of the four years 1949 to 1952. The annual rate of growth for the period was 2.40 per cent.

Rates of population growth from 1881 to 1954 may be found for each State and Territory of Australia in *Demography*, Bulletin No. 72, 1954.

(ii) *Various Countries.* Estimated rates of growth of the population of Australia in comparison with those for other countries are shown in the following table:—

(a) Excludes armed forces overseas at 31st December, 1941. (b) Not available. (c) Excludes war losses. (d) Territory defined by 1947 peace treaty.

NOTE.—Minus sign (—) denotes decrease.

§ 6. Density.

1. *General.*—From certain aspects population may be less significant in respect of its absolute amount than in its relation to the area of the country. Australia, with an area of 2,974,581 square miles, and an estimated population at 31st December, 1956 of 9,533,334, excluding about 47,000 full-blood aboriginals, has a density of only 3.2 persons to the square mile, and is, therefore, the most sparsely populated of the civilized countries of the world. For the other continents and sub-continent the densities are approximately as follows :—Europe (excluding U.S.S.R.), 212; Asia (excluding U.S.S.R.), 139; U.S.S.R., 23; Africa, 18; North and Central America, 25; and South America, 18. The population of Australia has thus about one-sixth of the density of that of South America and of Africa; about one-eighth of that of U.S.S.R. and of North and Central America; about one-forty-fifth of that of Asia (excluding U.S.S.R.); and about one-seventieth of that of Europe (excluding U.S.S.R.).

On account of the very large area of Australia and the unsuitability for settlement of much of the country, the density of population must necessarily increase slowly. In Australia as a whole the figure has increased from 1.29 per square mile in 1901 to 3.20 in 1956. Victoria's density, however, has grown from 13.77 to 29.96 and that of New South Wales from 4.43 to 11.60 in the same period. When comparing the density of population of the several States, consideration should be given to the average annual rainfall

distribution in each State as an indication of the climatic influence upon probable population numbers. The proportion of the area of Australia receiving less than 10 inches of rainfall is 38 per cent. ; that of the various States is :—New South Wales, 20 per cent. ; Victoria, nil ; Queensland, 13 per cent. ; South Australia, 83 per cent. ; Western Australia, 58 per cent. ; and Tasmania, nil.

2. *Main Countries of the World.*—Number and density of population of the most important countries of the world at 30th June, 1954, are shown in the following table. In some instances, more particularly in the cases of Asia and Africa, the numbers must be considered as rough approximations only.

POPULATION OF THE PRINCIPAL COUNTRIES OF THE WORLD : NUMBER AND DENSITY, 1954.

(a) Number of persons per square mile. (b) Population 1953. (c) Includes European Territory. (d) Population 1951. (e) Population 1952. (f) Includes 47,000 full-blooded aboriginals.

The populations shown in the above table are, in the main, in accordance with figures published in the *Demographic Year Book*, 1955, published by the United Nations, and the countries have been arranged in accordance with the continental groups used therein. The totals for continents include adjustments for overestimation and underenumeration.

§ 7. General Characteristics.

1. Sex Distribution.—(i) States. The number of males to each hundred females has been adopted as a measure of the "masculinity" of the population. On pp. 163-5 in Official Year Book No. 2 a table was included showing the masculinity of the population of each of the States for each year from 1796 to 1907. In issue No. 5, on p. 123, the figures in this table for the years 1901 to 1907 were modified in accordance with the results of the 1911 Census.

With the exception of some dislocation arising from the two World Wars, there was a continuous diminution of the masculinity of the population until 1945. This resulted from the increasing proportion of the population in the higher age groups, in which females preponderate owing to their greater longevity, and the general long-term fall in the birth rate. At the 1947 Census the numbers of the sexes were practically equal, but there has since been an increase in masculinity owing to the higher birth rate and to the increase in the number of immigrants, the majority of whom are males.

The following table shows the masculinity of the population at five-year intervals from 1925 to 1950 and for each of the years 1952 to 1956 :—

POPULATION : MASCULINITY, 1925 TO 1956.
(NUMBER OF MALES PER 100 FEMALES.)

At 31st December—	N.S.W.	Victoria.	Q'land.	S. Aust.	W.Aust.	Tas.	N.T.	A.C.T.	Aust.

(ii) Various Countries. The masculinity of the population in various countries is shown in the following table.

POPULATION : MASCULINITY IN VARIOUS COUNTRIES.

Country.	Year.	Number of Males per 100 Females.	Country.	Year.	Number of Males per 100 Females.
Ireland, Republic of ..	1951	103.6	Northern Ireland ..	1955	95.0
Canada	1955	102.7	Italy	1951	95.0
Australia(a)	1956	102.7	Yugoslavia	1954	94.6
New Zealand(b)	1955	101.0	Switzerland	1953	94.2
Union of South Africa(c)	1951	100.3	Spain	1950	92.8
Netherlands	1953	99.3	England and Wales ..	1955	92.8
Sweden	1952	99.3	France	1954	92.2
United States of America	1954	98.7	Scotland	1955	91.7
Norway	1953	98.7	Germany, Federal Re-		
Denmark	1954	98.5	public	1954	88.8
Belgium	1953	96.9	Austria	1953	86.7
Japan	1954	96.6			

(a) Excludes full-blood aboriginals.

(b) Excludes Maoris.

(c) European population only.

2. Age Distribution.—The age distribution of the population is obtained only at a census, but estimates, based on the census distribution and on births, recorded ages at death and recorded ages of migrants, are made for intercensal years. The following table shows the variation which took place in the age constitution of the population during the 7 years following the 1947 Census.

Of the 8,986,530 persons enumerated at the 1954 Census, 10.8 per cent. were under 5 years of age ; 10.0 per cent. were from 5 to 9 years ; 7.7 per cent. from 10 to 14 years ; 6.6 per cent. from 15 to 19 years ; and 36.3 per cent. were under age 21. At the 1947 Census 10.0 per cent. were under 5 years ; 8.0 per cent. 5 to 9 years ; 7.1 per cent. 10 to 14 years ; 7.7 per cent. 15 to 19 years ; and 34.4 per cent. under 21 years of age.

Owing mainly to the fall in the birth rate during the years 1930 to 1939, the number of persons in Australia between the ages of 15 and 24 in 1954 showed a decline of 12,683 as compared with the number in this age group in 1947. This decline would have been more serious but for the migration of adolescents between 1947 and 1954. The number of children under 16 years of age among immigrants contributed substantially to the increases in the lower age groups. The proportion of persons under 21 years in Australia increased from 34.4 per cent. in 1947 to 36.3 per cent. in 1954, whilst the proportion of persons aged 21 years and over decreased from 65.6 per cent. to 63.7 per cent. during the same period.

(a) At the 1947 Census unspecified ages were distributed proportionally over ages 15 years and upwards after completion of tabulation, but at the 1954 Census they were distributed over all ages prior to tabulation.

NOTE.—Minus sign (--) denotes decrease.

The next table shows the change which has been taking place in the age constitution of the population of Australia since 1871. Up to the 1954 Census, each successive census except that of 1921 had revealed a larger percentage of the population 15 years of age and over than was recorded at the previous census. However, in 1954, the proportion of this age group dropped sharply to a level (71.5 per cent.) slightly below that of 1933, the proportion of children under 15 years showing a corresponding increase to 28.5 per cent of the total population.

3. **Conjugal Condition.**—Of the total population of Australia at the 1954 Census, 46.8 per cent. had never married ; 47.1 per cent. were married (including 1.4 per cent. married but permanently separated) ; 5.2 per cent. were widowed ; and 0.8 per cent. were divorced. Between 1947 and 1954 the number never married increased by 17.7 per cent. ; those married (including permanently separated) by 20.6 per cent. ; the widowed by 10.2 per cent. ; and the divorced by 31.8 per cent.

From the demographic point of view the most important change in the conjugal condition of the population of Australia between 1947 and 1954 was the increase of 35.0 per cent. in never married persons under 15 years of age, which offset by many times the continued decrease in never married persons 15 years and over. The latter decrease was, however, confined to females, as the number of unmarried males 15 years and over increased by 3.6 per cent. between 1947 and 1954. The proportion of married persons continued to increase, and in 1954 comprised 66 per cent. of the population 15 years of age and over who stated their conjugal condition, compared with 62 per cent. in 1947 and 54 per cent. in 1933.

The number of widowed females recorded in Australia in 1954 was 351,102, or more than three times as many as the number of widowed males. This disparity is the result of two influences. The first is the greater longevity of females coupled with the usually younger age at marriage ; and the second is that a larger proportion of widowed males cancel their widowhood by remarriage.

POPULATION : CONJUGAL CONDITION, AUSTRALIA, 1947 AND 1954.

NOTE.—Minus sign (-) denotes decrease.

4. Birthplace.—At 30th June, 1954, the Australian-born element of the population of Australia represented 85.7 per cent. as compared with 90.2 per cent. at the 1947 Census. The number of Australian-born increased by 864,893 or by 12.7 per cent. between 1947 and 1954, while the oversea-born population increased by 542,279 or 72.9 per cent. The latter resulted mainly from the increase of 503,458 in the number of persons of European birthplace since 1947—principally persons born in England (an increase of 96,819); Italy (86,265); Germany (50,855); Poland (50,021); and the Netherlands (49,861).

Although numerically less significant, the number of persons of Asian and African birthplace more than doubled during the intercensal period, but there was little change in the number of persons born elsewhere.

Of persons born outside Australia, 57 per cent. were males and 43 per cent. females.

POPULATION : BIRTHPLACES, AUSTRALIA, 1947 AND 1954.

5. *Period of Residence in Australia.*—This table classifies the immigrant population of Australia according to period of residence in Australia, and reflects the greatly increased rate of immigration since 1947. It shows that in 1954, of persons born outside Australia who stated their period of residence, 40.9 per cent. had resided in Australia for a period of less than 5 years, 53.9 per cent. for less than 8 years, and 56.2 per cent. for less than 15 years, compared with 5.7, 7.7 and 14.8 per cent. respectively at the previous Census in 1947.

6. *Nationality.*—At 30th June, 1954, 8,582,251 persons, or 95.5 per cent. of the Australian population, were of British nationality (consisting of 85.7 per cent. born in Australia and 9.8 per cent. born outside), compared with 99.5 per cent. in 1947 (90.2 per cent. Australian-born and 9.3 per cent. born outside Australia). Of the oversea-born population in 1954, 68.6 per cent. were British subjects, compared with 94.8 per cent. in 1947. The most numerous foreign nationals in Australia at 30th June, 1954, were:—Italian, 90,018 persons; Dutch, 53,458; Polish, 49,746; German, 31,448; Yugoslav, 18,124; Greek, 17,843; Ukrainian, 17,239; and Latvian, 17,225.

POPULATION: NATIONALITY (i.e., ALLEGIANCE), AUSTRALIA, 1947 AND 1954.
(EXCLUDING FULL-BLOOD ABORIGINALS.)

(a) "Irish" nationality is included with "British" nationality for the purpose of this table.

7. **Religion.**—At the 1921 Census, 92,258 persons in Australia, or 1.7 per cent., gave no reply to this question, but at the Censuses of 1933, 1947 and 1954, when the public was informed that there was no legal obligation to answer this question, 848,948 persons (12.8 per cent.), 824,824 (10.9 per cent.) and 855,819 (9.5 per cent.), respectively, gave no reply. Of males 10.3 per cent., and of females 8.7 per cent., did not state their religion in 1954.

Of those who stated their religion, the greatest numerical increase during the inter-censal period between 1947 and 1954 was recorded by the Roman Catholic and Catholic combined. This group was followed closely by Church of England, and then Presbyterian, Methodist and Lutheran in that order. Amongst the denominations with the largest numbers of adherents, the greatest proportional increases were recorded by Roman Catholic and Catholic combined, 29.9 per cent.; Presbyterian, 17.0 per cent.; Church of England, 15.3 per cent.; and Methodist, 12.2 per cent. The largest proportional increase was that of the Lutheran denomination, 73.7 per cent.

At the 1954 Census, as at earlier censuses, 99 per cent. of those who stated their religion professed the Christian faith. Between 1947 and 1954 the number who stated they were of non-Christian religion increased by 50 per cent., while those specifically stating they had no religion decreased by 10 per cent.

POPULATION: RELIGION, AUSTRALIA, 1947 AND 1954.

(a) So described in individual Census Schedules. (b) Not available.

NOTE.—Minus sign (-) denotes decrease.

8. Industry.—In the following table, the male and female populations of Australia are classified according to the industry in which they were usually engaged at the 1954 Census. Persons usually engaged in industry are regarded as being "in the work force," while the remainder of the population, which at the 1954 Census comprised 5,284,508 persons, is classified as not being in the work force. The term "in the work force" includes persons of all ages who are employers, self-employed or working on their own account, wage and salary earners and unpaid helpers engaged in industry. It also includes persons "not at work," i.e., those who stated that they were usually engaged in work, but were not actively seeking a job at the time of the Census by reason of sickness, accident, etc., or because they were on strike, changing jobs or temporarily laid off, etc.; also persons able and willing to work but unable to secure employment, as well as casual and seasonal workers not actually in a job at the time of the Census.

Persons who do not earn their living by doing work for monetary reward, such as children, housewives, full-time students, retired persons, pensioners and permanent inmates of institutions, are regarded as not being in the work force.

About 63 in every 100 of the male population and 19 in every 100 of the female population were in the work force, or in other words there were, in 1954, 3.4 males to every female in the work force.

Of the total males in the work force, those engaged in Manufacturing represented the largest proportion, namely 28.0 per cent., followed in order by those in Primary Production, 16.1 per cent.; Commerce, 13.6 per cent.; Building and Construction, 11.3 per cent.; Public Authority (n.e.i.) and Professional Activities, 9.1 per cent.; and Transport and Storage, 8.4 per cent.

As with males, females in the work force were engaged mainly in Manufacturing, 26.9 per cent., followed in order by those in Commerce, 22.5 per cent.; Public Authority (n.e.i.) and Professional Activities, 22.1 per cent.; and Amusement, Hotels, Cafés, Personal Service, etc., 14.8 per cent.

9. **Occupational Status.**—The term "occupational status" relates to the capacity in which persons are engaged in the various branches of industry.

While the numbers of employers and of persons self-employed at the 1954 Census showed increases of approximately 13 per cent. and 6 per cent., respectively, as compared with 1947, the number of employees increased by slightly more than 20 per cent., and in 1954 constituted nearly 80 per cent. of the total work force, as compared with 77 per cent. in 1947. Employers and self-employed combined constituted 17.8 per cent. of the work force in 1954 as compared with 19.0 per cent. in 1947.

POPULATION : OCCUPATIONAL STATUS, AUSTRALIA, 1947 AND 1954.

(EXCLUDING FULL-BLOOD ABORIGINALS.)

(a) Includes persons who were (1) unable to secure employment; (2) temporarily laid off from their jobs; or (3) not actively seeking work at the time of the Census on account of sickness or accident, industrial dispute, resting between jobs or for any other reason.

NOTE.—Minus sign (—) denotes decrease.

10. **Other General Characteristics.**—Questions asked at the 1933 Census regarding orphanhood, and the ability to read and write a foreign language (of persons who could not read and write English), were not asked on the schedules of the 1947 and 1954 Censuses. The question on dependent children asked at the 1947 Census was not asked in 1954, and information supplied in 1954 in reply to the question on race has not yet been tabulated.

The latest data published in respect of the first two questions appear on pp. 482 and 487 of Official Year Book No. 36, and of the last two on pp. 326 and 327 of Official Year Book No. 41.

§ 8. Oversea Migration.

1. **Oversea Migration during the Present Century.**—Earlier issues of the Official Year Book contain in summary form tables showing the increase of population by net migration from 1861 to the latest date, while information for individual years is published in the annual bulletin, *Demography*. The following table shows, for Australia, arrivals and departures and net migration since 1901. A graph showing arrivals and departures from 1921 to 1956 appears on p. 562.

OVERSEA MIGRATION : AUSTRALIA.

(a) Excludes movements of defence personnel from September, 1939 to June, 1947.

NOTE.—Minus sign (-) indicates excess of departures over arrivals.

As the encouragement of immigration by governmental assistance has been a feature of Australian immigration policy, a clear indication of the significance of migration movements is obtained when "assisted" and "unassisted" movements are distinguished. This was shown broadly, for the period 1901-1952, in Official Year Book No. 40, p. 361, and has been continued in the following table for the period 1926 to 1956.

"ASSISTED" AND "UNASSISTED" MIGRATION : AUSTRALIA.

1951-55	275,241	752,625	1,027,866	138,583
1952	60,531	155,308	121,807	33,501
1953	27,310	135,815	163,125	15,587
1954	54,038	143,987	129,818	14,169
1955	66,688	170,549	237,237	30,567
1956	54,957	192,491	247,448	39,041

(a) Excludes movements of defence personnel from September, 1939 to June, 1947.

NOTE.—Minus sign (-) indicates excess of departures over "unassisted" arrivals.

It is not possible in the statistics of departures to distinguish the return movement of persons who came to Australia as "assisted" migrants from that of "unassisted" migrants. Consequently, the separate net migration of "assisted" and "non-assisted" persons cannot be ascertained. Nevertheless, the basis on which the above table has been compiled is sufficient to throw into relief the major trends in Australian migration statistics in the period reviewed.

Although separate net migration figures are not available, it is generally agreed that Australia has gained considerably more population through its encouraged migration programme than it has from non-assisted migration.

A detailed review of assisted migration into Australia in recent years is given in § 9.

2. Classes of Arrivals and Departures.—(i) *General*. Since 1st July, 1924, all oversea travellers have been classified as "permanent" or "temporary" migrants according to their declared intention in regard to residence made at the time of arrival or departure. The

basis of this classification is that "permanent" residence is regarded as residence for one year or longer, in Australia in the case of arrivals, or abroad in the case of departures. These definitions were adopted in accordance with international usage and do not purport to represent permanent migration as such. For various reasons the intentions of travellers are subject to subsequent modification and the classification headings used must therefore be accepted as indicating intention only. The numbers so classified since 1st January, 1926, are as follows:—

ARRIVALS AND DEPARTURES CLASSIFIED ACCORDING TO INTENDED RESIDENCE : AUSTRALIA.

Period.	Arrivals.			Total	Departures.			Total.
	Perman-ent Move-ment.	Temporary Move-ment.			Perman-ent Move-ment.	Temporary Move-ment.		
	New Arrivals.	Aus-tralian Residents Return-ing.	Visitors Arriving.		Aus-tralian Residents Departing Per-manently.	Aus-tralian Residents Departing Tem-porarily.	Visitors Depart-ing.

1956 ..	123,822	57,608	66,018	247,448	37,717	51,400	64,333	153,450

(a) Includes 46 arrivals whose intended period of residence was not stated. (b) Includes 78 departures whose intended length of stay abroad was not stated. (c) Includes 5 departures whose intended length of stay abroad was not stated. (d) Includes evacuees arriving in Australia during the war years as follows:—1936-40, 4,543; 1941-45, 12,586.

(ii) *Permanent Movement.* In the table above, as explained in para. 2 (i), "permanent" means residence for a year or longer, in Australia in the case of arrivals, or overseas in the case of departures.

The 1939-45 War caused a large drop, from 1940, in the number of permanent new arrivals but after the war the number rose progressively, reaching 174,540 in 1950, the highest on record. As in the case of arrivals, although not to the same extent, the number of Australian residents departing permanently rose rapidly in the period of immediate post-war re-adjustment of population, but the high figure of 29,806 in 1946 was surpassed in each of the years 1952 to 1956, for which the figures were higher than any recorded since this method of classification was introduced.

Up to and including 1929, there was a considerable net gain of permanent residents, but during 1930 and 1931 there was a heavy net loss. The loss was very much reduced in 1932, 1933 and 1934, whilst during the five years up to and including 1939 there was a net gain in permanent residents of more than 28,000. Except for the arrival of evacuees, little movement took place during the war period, but in 1946 a net permanent loss of 11,589 persons occurred, owing in large measure to the departure for the United States of America of Australian wives and children of American servicemen, and, when conditions permitted after the war, the departure of Australians to Papua and New Guinea and of large numbers of war evacuees who were returned to their home countries. Subsequently, the largest net gain recorded was 153,685 in 1950. A net gain of 86,105 was recorded in 1956.

(iii) *Temporary Movement.* Temporary movement refers to persons intending residence for periods shorter than one year and includes Australian residents and visitors from overseas. Since 1st July, 1947, it also includes Australian defence personnel irrespective of intended length of residence. Although considerable in number, the temporary movement is of little significance from the point of view of population growth, as it represents principally the movement of business people and tourists.

3. *Extent of Journey.*—Since 1st January, 1945, the journeys undertaken by passengers have been recorded for Australian oversea migration statistics in two ways: (a) according

to country of embarkation or disembarkation and (b) according to country of last or intended future permanent residence.

Detailed statistics of overseas journeys are published in the annual bulletin, *Demography*.

4. **Racial Origin.**—Up to 30th June, 1948, the system of classifying racial origin was a compromise based partly on nationality and partly on racial origin (see para. 5). From 1st July, 1948, this system was superseded by one in which the passenger's statement as to race is restricted to either "European", "Asian", "African", or "Polynesian" only. Statistics based on this system are shown for the years 1954 to 1956 in the following table. Under this system nationality is recorded independently, as indicated in the next paragraph.

RACIAL ORIGIN OF ARRIVALS AND DEPARTURES: AUSTRALIA.

Racial Origin.	Arrivals.			Departures.			Net Migration.		
	1954.	1955.	1956.	1954.	1955.	1956.	1954.	1955.	1956.
European ..	192,334	230,699	237,782	124,636	134,970	145,930	67,698	95,729	91,852
Asian ..	4,890	5,943	8,687	4,237	4,594	6,677	653	1,349	2,010
African ..	98	84	193	39	55	130	59	29	63
Polynesian ..	703	511	786	906	363	713	-203	148	73
Total ..	198,025	237,237	247,448	129,818	139,982	153,450	68,207	97,255	93,998

NOTE.—Minus sign (—) indicates excess of departures over arrivals.

5. **Nationality.**—From 1st July, 1924, to 30th June, 1948, nationality of overseas passengers was recorded as "British" or "Alien" only. Racial origin was also recorded and as the particulars of racial origin stated by passengers closely reflected their nationalities and made it possible to present much more detail of "nationality" than was possible on the total "Alien" basis, published statistics were mostly confined to those compiled on the detailed basis according to a composite classification of "nationality or race".

This method was superseded on 1st July, 1948 by one in which each passenger's race was recorded as indicated in paragraph 4 above, and nationality, as shown on each passenger's passport or other document of identification, was recorded independently of race. The principal nationalities recorded on this basis for the years 1954 to 1956 are as follows:—

NATIONALITY OF ARRIVALS AND DEPARTURES: AUSTRALIA.

Nationality.	Arrivals.			Departures.			Net Migration.		
	1954.	1955.	1956.	1954.	1955.	1956.	1954.	1955.	1956.

8. *Occupation.*—The following is a summary of the main occupational groups of males who arrived or departed permanently during the years 1955 and 1956 (1955 figures in parentheses):—Permanent new arrivals—Rural, fishing and hunting, 10,574 (10,389); professional and semi-professional, 2,310 (2,073); administrative, 1,002 (986); commercial and clerical, 4,491 (3,936); domestic and protective service, 2,084 (1,465); craftsmen, 13,450 (14,805); operatives, 7,285 (7,789), labourers, 6,835 (8,776); indefinite or not stated, 3,858 (3,396); not gainfully occupied (mainly children), 18,354 (20,797); total, 70,243 (74,412). Permanent departures—Rural, fishing and hunting, 647 (731); professional and semi-professional, 2,046 (2,012); administrative, 897 (906); commercial and clerical, 2,727 (2,604); domestic and protective service, 643 (554); craftsmen, 4,159 (4,148); operatives, 1,553 (1,548); labourers, 2,419 (1,622); indefinite or not stated, 384 (407); not gainfully occupied (mainly children), 4,468 (4,016); total, 19,943 (18,548).

§ 9. Assisted Migration into Australia.

1. *Joint Commonwealth and States Scheme.*—Details of the joint scheme of assisted immigration arrived at by agreement between the Commonwealth and State Governments, which operated from 1920 to 1939, may be found in earlier issues of the Official Year Book (*see* No. 38, p. 576). After the outbreak of hostilities in 1939, it was decided to discontinue the grant of assisted passages for the duration of the war.

2. *United Kingdom Free and Assisted Passage Agreements, March, 1946.*—(i) *General.* Resumption of migration was the subject of negotiations between the Commonwealth and United Kingdom Governments towards the end of 1945 and two agreements were signed in March, 1946. These agreements, which came into operation on 31st March, 1947, provided for free and assisted passages to be granted to British residents desirous of settling in Australia. The Free Passage Agreement was terminated on 28th February, 1955. From 1st April, 1949, the Assisted Passage Agreement has continued in operation under renewal from time to time and has again been renewed as from 1st April, 1957.

(ii) *Assisted Passages.* Under the existing financial arrangements the United Kingdom Government's contribution towards the Assisted Passage Scheme is agreed upon when the Agreement is extended, and for the five years from 1st April, 1957, is fixed at a maximum amount of £150,000 sterling per annum.

The Assisted Passage Agreement covers three main groups of migrants (and their families), namely, *Personal nominees*, who are migrants sponsored by residents of Australia able to provide suitable accommodation for them (any adult resident of Australia may nominate friends or relatives in the United Kingdom who are eligible to be considered for assisted passages under this agreement); *Group nominees*, who are recruited on a trade-qualification basis to meet applications lodged by employers and State Governments who guarantee to provide employment and accommodation for those selected; *Commonwealth nominees*, who comprise workers selected against known and assessed employment demands in Australia. Migrants in the last group live in hostels established by the Commonwealth Government for up to two years whilst they are seeking to obtain private accommodation. The Commonwealth nominee scheme was introduced in 1950 in order to reinforce the personal and group nomination schemes, but towards the end of 1952 it was greatly curtailed and selection was confined to workers in a limited group of essential skilled trades. During the latter part of 1953, the list of categories of workers who could be selected was broadened and the scheme resumed its former impetus.

Although the Commonwealth is not generally prepared to accept single persons or married persons without children if they have reached their forty-sixth birthday before the date of sailing, the parents or close relatives of intending migrants or of persons established in Australia may, if otherwise acceptable under the scheme, be granted passages irrespective of age. Each migrant of 19 years of age and over is required to contribute £10 sterling towards the cost of his or her passage, while juveniles aged 14 years and under 19 years have to pay £5 sterling. Children under 14 years travel free. Apart from these contributions and that made annually by the United Kingdom Government, the cost of the passages is borne by the Commonwealth Government.

(iii) *Numbers Arrived.* The numbers of British migrants who came to Australia under the Free and Assisted Passage Agreement during the years 1947 to 1956 are given in the following table:—

UNITED KINGDOM FREE AND ASSISTED PASSAGE AGREEMENT: NUMBER OF MIGRANTS.

Period.	N.S.W.	Vic.	Q'ld.	S. Aust.	W Aust.	Tas.	A.C.T.	Commonwealth Nominations.	Total.
1947-51 ..	34,370	38,389	17,072	10,081	13,797	5,007	1,976	21,120	141,812
1952 ...	7,386	10,596	4,104	2,326	2,804	1,235	382	6,247	35,080
1953 ...	3,890	3,962	1,835	1,072	1,969	485	110	372	13,695
1954 ...	3,046	3,199	1,872	1,406	2,067	425	97	6,605	18,717
1955 ...	4,743	6,068	2,731	1,756	2,219	672	119	7,389	25,697
1956 ..	4,231	5,516	2,471	1,814	2,231	602	189	7,082	24,136
Total, 1947-56	57,666	67,730	30,085	18,455	25,087	8,426	2,873	48,815	259,137

3. *Child Migration from the United Kingdom.*—(i) *General.* Since the commencement of the assisted passage schemes in 1947, the immigration of unaccompanied children and youths from the United Kingdom has been encouraged under the auspices of approved voluntary organizations. The organizations at present introducing child migrants include the Fairbridge Farm Schools of New South Wales and Western Australia, Dr. Barnardo's Homes, the Big Brother Movements of New South Wales and Tasmania, and the Northcote Children's Emigration Fund. All the principal religious denominations are also participating in the scheme. At the present time 40 institutions are caring for child migrants.

(ii) *Financial Assistance.* The United Kingdom Government contributes 12s. 6d. and the Commonwealth Government 10s. per week to approved organizations in respect of each child under 16 years of age, while the respective State Governments contribute amounts varying from 4s. 8d. per week in New South Wales to £1 10s. 9d. in Western Australia. In addition, the Commonwealth Government and the State Government concerned may contribute, where necessary, towards the approved capital expenditure on accommodation for child migrants brought in by these organizations.

(iii) *Numbers Arrived.* From the beginning of 1947 to the end of 1956, a total of 4,391 British children and youths arrived under the sponsorship of voluntary organizations. New South Wales took 2,404, Western Australia 1,155, Victoria 463 and the other three States 369. These children were brought to Australia under the United Kingdom Free and Assisted Passage Scheme and are included in the figures shown in the table above.

4. *Assisted Passage Scheme, Eire.*—In November, 1948, the Commonwealth Government decided to grant limited financial assistance to natural-born citizens of Eire normally residing in the British Isles, and to natural-born British citizens residing in Eire, who wish to emigrate to Australia and who are duly selected. This scheme applies only to prospective settlers and their dependants who are not eligible for assisted passages under the agreement with the United Kingdom Government (see para. 2 above). The maximum amount granted towards an adult passage is £30 sterling, with varying amounts for children according to age.

It is not essential for an applicant for a passage to be nominated by a friend or relative in Australia before the question of granting financial assistance is considered. Single men or women who are eligible under the scheme are readily accepted. Families, on the other hand, are accepted only if they can produce evidence of having secured accommodation in Australia, or, in the case of nominated migrants, a guarantee of accommodation by their sponsors. Up to the end of 1956, 2,782 migrants had arrived under this scheme (see table on p. 580).

5. *Maltese Migration.*—On 31st May, 1948, the Commonwealth Government and the Government of Malta entered into an agreement under which both Governments grant financial assistance towards the passage costs of selected Maltese migrants. The Commonwealth contribution is £30 sterling per adult with proportionate amounts for children, and the Government of Malta contributes an amount at least equal to this sum. This agreement has been extended from time to time, and as at 31st March, 1957, its future was subject to further negotiations between the two Governments.

At 31st December, 1956, a total of 22,464 Maltese had arrived under this scheme since its inception (*see* table on p. 580). Until the end of 1956, 213 Maltese children had been brought out to approved institutions in Western Australia. These are included in the number shown above.

6. Empire and Allied Ex-Servicemen's Scheme.—On 26th May, 1947, the Commonwealth Government implemented a scheme under which assistance was given to the passage costs of Empire ex-servicemen and their dependants not covered by the Free and Assisted Passage Scheme (*see* para. 2 above) and of ex-servicemen of the U.S.A. Later, eligibility was extended to ex-servicemen and resistance workers of the Netherlands, Norway, France, Belgium and Denmark. The amount of assistance for an adult was £30 sterling and amounts for children varied according to age. The scheme was discontinued as from 30th June, 1955.

During its currency a total of 21,994 migrants came to Australia under the scheme. The majority of these (16,830) were Dutch.

7. Displaced Persons Scheme.—On 21st July, 1947, the Commonwealth Government entered into an agreement with the International Refugee Organization to settle displaced persons in Australia. Although the International Refugee Organization wound up its activities in 1951, the Commonwealth agreed to receive those displaced persons already accepted for migration, but whose passages had still to be arranged. A total of 170,700 persons settled in Australia under this scheme.

8. Netherlands Migration.—A migration agreement concluded between the Commonwealth and Netherlands Governments in February, 1951, came into operation on 1st April of that year. On 1st August, 1956, the agreement was extended for a period of 5 years with retroactive effect as from 1st April, 1956. This superseded an earlier arrangement in 1946 between the Commonwealth and the Netherlands Emigration Foundation (*see* Official Year Book No. 39, p. 567).

The migrant is required to contribute towards his passage costs in accordance with a formula devised by the Netherlands Government. The balance is met by the Commonwealth and Netherlands Governments and the Intergovernmental Committee for European Migration. The Commonwealth Government's contribution is now equivalent to \$110 per head.

The provision of shipping is the responsibility of the Netherlands Government. The Commonwealth arranges for the reception of migrants and their after-care and assists in the securing of employment. Families who have not obtained private accommodation prior to arrival may be temporarily accommodated in an Immigration Centre when the breadwinner is placed in employment and proceeds either to employer-found accommodation or a Commonwealth Hostel. These arrangements continue until the family can secure its own accommodation, or vacancies enable a family to be united in a hostel.

Up to the end of December, 1956, 30,955 Dutch migrants had settled here under the Netherlands-Australia Migration Agreement.

9. Italian Migration.—On 29th March, 1951, the Commonwealth and Italian Governments entered into a migration agreement effective for a period of 5 years, under which certain selected Italian migrants were assisted to Australia. The agreement came into force on 1st August, 1951, and at that time the Commonwealth contributed an amount of £25 sterling for each adult migrant and proportionate amounts for children according to fares charged. From 1st March, 1955, this sum was increased to the equivalent of \$85 per head. The balance of passage costs is contributed by the migrants themselves, the Italian Government and the Intergovernmental Committee for European Migration.

The agreement was temporarily suspended at the end of 1952, but in March, 1954, provision was made for assisted passages to be granted to certain relatives and fiancées of migrants who had previously settled in Australia under the agreement. On 1st December, 1954, the agreement proper was re-opened and it was subsequently extended to 31st July, 1957. Up to 31st December, 1956, arrivals under this agreement totalled 24,401 persons.

10. German Migration.—On 29th August, 1952, a migration agreement was signed between the Commonwealth Government and the Government of the Federal Republic of Germany. This is somewhat similar to the agreements concluded with the Netherlands and Italy and is effective for a period of 5 years. The Commonwealth's contribution towards passage costs is the equivalent of \$85 per head. The migrant may be required to pay a small contribution and the balance of passage costs is paid by the Government of the Federal Republic and the Intergovernmental Committee for European Migration. Total arrivals of German assisted migrants were 32,594 to the end of December, 1956.

11. **Austrian Migration.**—Late in 1952, arrangements were made with the Intergovernmental Committee for European Migration for the migration to Australia of a small number of selected rural and other workers and their families from Austria. Later these arrangements were extended to cover greater numbers and wider categories of migrants. The Commonwealth contributes an amount equivalent to \$85 per head towards the passage costs of Austrian migrants. The Austrian Government, the Intergovernmental Committee for European Migration and the migrants themselves also contribute towards passage costs. Reception arrangements, temporary accommodation, after-care and placement in employment are undertaken by the Commonwealth. Under these arrangements, 10,353 Austrians arrived in Australia up to 31st December, 1956.

12. **Greek Migration.**—An arrangement similar to the Austrian one was made with the Intergovernmental Committee for European Migration late in 1952. The Commonwealth's contribution and the arrangements for reception, accommodation, employment and after-care are the same as for Austrian migrants.

Under this arrangement 18,271 Greek assisted migrants had settled in Australia up to 31st December, 1956.

13. **Migration from Trieste.**—In 1953, arrangements were made for the migration of refugees from Trieste. These arrangements continued until what was formerly the Free Territory of Trieste became part of the Italian Republic. Latterly, migrants from Trieste have proceeded under the Italian Agreement, and altogether 5,138 Triestians had arrived in Australia as assisted migrants up to 31st December, 1956. The Commonwealth made a contribution to passage costs at the same rate as for other European migrants and the balance was made up by contributions from the Intergovernmental Committee for European Migration and the Italian Government.

14. **Hungarian Migration.**—On 5th November, 1956, the Intergovernmental Committee for European Migration and the United Nations High Commissioner for Refugees, in accordance with a request received from the Austrian Government, appealed to Member Governments to give asylum to the greatest possible number of Hungarian refugees who were fleeing in thousands across the border into Austria, following Russian military action in Hungary.

On 8th November, 1956, the Minister for Immigration announced that Australia would provide permanent asylum for up to 3,000 Hungarian refugees during the year 1956–57. At the same time, the Australian Government agreed also to grant \$67,200 (£A.30,000) for the immediate relief needs of the Hungarian refugees in Austria. The Australian migration representative in Austria was instructed to begin selection of the refugees immediately, and was advised that normal standards should be applied with understanding and flexibility; in addition, he was authorized to select a number of compassionate cases such as children and persons over the normal age limits.

Early in December, 1956, the Government decided that the number of Hungarian refugees to be received during the year 1956–57 should be increased from 3,000 to 5,000. This number was subsequently increased to 10,000.

On 14th December, 1956, Cabinet decided that an additional contribution of £A.100,000 should be made available for the relief of Hungarian refugees. This amount was to be divided between the Austrian Government Refugee Fund, the United Nations Secretary-General's Fund for Relief within Hungary, and the Intergovernmental Committee for European Migration, and was to be additional to the grant of \$85 per person contributed by Australia to passage costs of the refugees.

To the end of December, 1956, 331 Hungarian refugees had arrived in Australia.

15. **General Assisted Passage Scheme.**—To encourage the migration of persons from the United States of America, Switzerland, Denmark, Norway, Sweden and Finland, the Commonwealth, on 10th September, 1954, introduced an assisted passage scheme for nationals of those countries. The Commonwealth makes a contribution of £37 10s. sterling per adult migrant and *pro rata* amounts for children according to the fare paid. No other Government or organization contributes to the passage costs of these migrants. To the end of December, 1956, 2,232 migrants had arrived in Australia under this scheme.

16. **Summary of Arrivals of Assisted Migrants.**—The following table shows, for each of the years 1950 to 1956, the number of assisted migrants who arrived in Australia under the various schemes. The total for the years 1947 to 1956 is also given.

ASSISTED MIGRATION SCHEMES : NUMBER OF MIGRANTS.

Assisted Migration Scheme.	1950.	1951.	1952.	1953.	1954.	1955.	1956.	Total, 1947-56.

General Assisted Passage Scheme	19	399	1,814	2,232
L.C.E.M. Agreement, 1952—
Triestians	4,273	744	121	5,138
Austrians	13	103	1,674	4,627	3,936	10,353
Greeks	1,486	7,278	6,419	3,088	18,271
Hungarians	331	331
Total Assisted Migrants	119,109	66,674	60,531	27,310	54,038	66,688	54,957	603,393

From the earliest years of assisted migration to the end of 1956 a total of 1,671,704 assisted migrants arrived in Australia.

§ 10. The Regulation of Immigration into Australia.

1. Powers and Legislation of the Commonwealth.—(i) *Constitutional.* Under section 51, xxvii. and xxviii. of the Commonwealth Constitution, the Parliament of the Commonwealth is empowered to make laws with respect to immigration and emigration and the influx of criminals.

(ii) *Legislation.* Immigration into the Commonwealth is regulated by the Immigration Act 1901-1949, which specifies the persons whose immigration is prohibited and provides for their deportation if they enter contrary to the Act. Provision is also made for the deportation of persons who have entered lawfully but who contravene the provisions of the Act after they have entered. Power is given to the Minister for Immigration to admit prohibited immigrants for a specified period under Certificate of Exemption from the provisions of the Act relating to entry or stay in the Commonwealth.

The Aliens Deportation Act 1948 empowers the Minister for Immigration to order the deportation of an alien who after investigation by a Commissioner is reported as not being a fit and proper person to be allowed to remain in Australia.

The Immigration (Guardianship of Children) Act 1946-1952 provides that the Minister for Immigration becomes the legal guardian of every person under the age of 21 years who enters Australia other than in the charge of, or for the purpose of living in the care of, a parent or adult relative. It is primarily administered through the child welfare authorities in each State who, as the Minister's delegates under the Act, supervise the welfare of each "immigrant child".

The Aliens Act 1947-1952 provides that a register of aliens shall be maintained for every State and Territory of the Commonwealth. Unless exempted, aliens 16 years of age and over are required to register with the Department of Immigration, and to notify the Department of any change of address, occupation or employment, and of their marriage. The Act also provides that consent must be obtained before an alien may change his surname.

2. **Conditions of Immigration into Australia.**—(i) *Persons of Non-European Race.* In pursuance of established policy, the general practice is not to permit Asians or other coloured persons to enter Australia for the purpose of settling permanently. Special provision exists for the temporary admission of non-Europeans who are bona fide merchants, students or tourists. They are permitted to enter and remain in Australia under exemption while they retain their status. Permission may also be given for the entry of non-Europeans as assistants or substitutes for local traders domiciled in Australia. Such persons are allowed to remain so long as they retain their status.

(ii) *Persons of European Race.* Persons of European race desiring to settle permanently in Australia are required to obtain authority for admission from the Department of Immigration. Their admission under the present policy is subject to their compliance with the Commonwealth's requirements in regard to health, character, freedom from security risk and general suitability as settlers.

(iii) *General Information.* General information as to conditions of entry into Australia may be obtained from the following officers:—

- (a) In Australia—The Secretary, Department of Immigration, Canberra, Australian Capital Territory, and Commonwealth Migration Officers in the capital cities of the various States;
- (b) In Great Britain—the Chief Migration Officer, High Commissioner's Office, Australia House, Strand, London;
- (c) In other British Dominions—The High Commissioner for Australia;
- (d) In Holland, Italy, Germany, Greece, Austria—the Chief Migration Officer in the capital city of each of those countries;
- (e) In other countries where Australia is represented—the Secretary, Australian Embassy, Legation or Consulate.

For details of the Australian representatives in the British Dominions and other countries see the section entitled "Diplomatic and other Representatives Overseas and in Australia" in Chapter XXX.

3. **Racial Origin and Nationality of Persons Arriving.**—For details of the racial origin and nationality of persons who arrived in Australia during the years 1954 to 1956, see p. 574.

§ 11. Passports.

Provision is made in the Immigration Act 1901–1949 for the production of a passport by each immigrant over 16 years of age who desires to enter Australia. Under the Passports Act 1920, it was compulsory also for each person over 16 years of age to be in possession of a passport or other document authorizing his departure. This Act has now been superseded by the Passports Act 1938–1948, which repealed the compulsory provisions. The Act also applies to the Territories of Australia, including Papua, Norfolk Island and the Trust Territory of New Guinea.

Although it is not compulsory for Australians to obtain a passport when leaving Australia, it is desirable in their own interests that they should have one in order to establish their identity and nationality overseas. A passport is necessary for admission into most countries, and the holder of an Australian passport also has no difficulty in landing on return to Australia. The charge for an Australian passport is £1.

As a result of the Nationality and Citizenship Act 1948–1955 (see § 12 below) and the enactment of similar citizenship legislation in other British Commonwealth countries, it is now the general rule that Australian passports are issued only to Australian citizens. Citizens of other British Commonwealth countries secure passports from their own High Commissioners in Australia. Australian citizens abroad may secure passports only from Australian representatives.

Diplomatic and official passports are issued to members of the Australian diplomatic service and other Government officials proceeding abroad on official business.

Applicants for passports are required to produce evidence of their identity and nationality (e.g., birth certificates).

§ 12. Citizenship and Naturalization.

1. **Commonwealth Legislation.**—The Nationality and Citizenship Act 1948 commenced on Australia Day (26th January), 1949 and repealed all previous Commonwealth legislation on this subject. The most significant effect of the Act was the creation for the first time of the status of "Australian Citizen". In this respect, the Act was complementary to citizenship legislation passed or about to be passed by other countries of the British Commonwealth. All Australian citizens, and the citizens of other countries of the British Commonwealth, are declared to be British subjects. For details of the Act, see previous issues of the Official Year Book.

2. **Certificates Granted.**—(i) *Australia.* The following figures relate to certificates issued under the Nationality and Citizenship Act 1948–1955 during the year 1955:—

NATURALIZATION : CERTIFICATES GRANTED, AUSTRALIA, 1955.

PREVIOUS NATIONALITIES OF RECIPIENTS.

		Italy ..	2,581				

(ii) *States.* The certificates of naturalization granted in 1956 were issued in respect of residents of the various States and Territories as follows:—New South Wales, 7,097; Victoria, 8,650; Queensland, 947; South Australia, 4,712; Western Australia, 3,105; Tasmania, 566; Northern Territory, 91; Australian Capital Territory, 332; External Territories, 85; Total, 25,585.

§ 13. Population of External Territories.

At the Census of 30th June, 1954, as at previous censuses, arrangements were made to obtain complete information concerning the external territories under the control of Australia, namely:—Norfolk Island, Papua, the Trust Territory of New Guinea, and the Trust Territory of Nauru. The following table shows the population of each of these Territories at 30th June, 1954 and the estimated population at 30th June, 1956.

On 23rd November, 1955, the Cocos (Keeling) Islands were placed under the authority of the Commonwealth. An estimate of the population at 30th June, 1956 is included in the table below.

POPULATION: EXTERNAL TERRITORIES.

(EXCLUDING INDIGENOUS POPULATION.)

Territory.	Census, 30th June, 1954.			Estimate, 30th June, 1956.
	Males.	Females.	Persons.	Persons.
Cocos (Keeling) Islands	649
Norfolk Island	478	464	942	1,039
Papua	3,867	2,446	6,313	7,711
Trust Territory of New Guinea ..	7,201	4,241	11,442	13,455
Trust Territory of Nauru	1,269	376	1,645	1,917

Particulars concerning the indigenous populations of the internal and external territories will be found in Chapter V.—*The Territories of Australia.*

§ 14. The Aboriginal Population of Australia.

In Official Year Book No. 17, pp. 951–61, a brief account was given of the Australian aboriginal population, its origin, its numbers as estimated from time to time, and the steps taken for its protection. On pp. 914–6 of Official Year Book No. 22, particulars were shown for each of the States and Territories of Australia at successive periods, while a special article dealing with the estimated number and distribution of the native population at the date of first settlement of the white race in the continent appeared on pp. 687–96 of Official Year Book No. 23.

The aborigines are scattered over the whole of the mainland but the majority are concentrated in Western Australia, Queensland and the Northern Territory. Details of the number in each State at the June, 1947, Census are shown in the following table. Full-blood aborigines in employment or living in proximity to settlements were enumerated at the census, while estimates of the total numbers, including those living in the wild state, were furnished by the Protectors of Aborigines. Half-caste aborigines are included in the numbers of the population and are of course enumerated at the census. The figures shown for Queensland are exclusive of Torres Strait Islanders.

ABORIGINAL POPULATION, 30th JUNE, 1947.

State or Territory.	Full-blood.				Half-caste. (Enumerated at the Census.)			Total, Full- blood and Half- caste.
	In Employment or Living in Proximity to Settlements.(a)			Esti- mate of Total Num- bers.(b)	Males.	Females.	Persons.	
	Males.	Females.	Persons.					
New South Wales ..	546	407	953	(c) 953	5,498	5,109	10,607	11,560
Victoria ..	100	108	208	(c) 208	537	532	1,069	1,277
Queensland ..	3,504	2,822	6,326	9,100	3,684	3,527	7,211	16,311
South Australia ..	259	205	464	2,139	1,103	1,054	(d)2,157	(d)4,296
Western Australia ..	2,664	2,269	4,933	20,338	2,359	2,215	(d)4,574	d 24,912
Tasmania	127	87	214	214
Northern Territory ..	5,615	5,370	10,985	13,900	660	587	1,247	15,147
Aust. Cap. Territory	58	42	100	100
Total ..	12,688	11,181	23,869	46,638	14,026	13,153	27,179	73,817

(a) Enumerated at the Census. (b) Furnished by the Protectors of Aborigines. (c) Census totals. (d) In addition to these totals, the Protectors of Aborigines estimated that there were 826 half-caste and mixed bloods in South Australia and 1,322 in Western Australia, presumably living in the nomadic state.

According to the annual Reports of the Protectors of Aborigines, there has been little change in the numbers of aborigines in most States since 1947. In Western Australia, however, the estimate for the total number of full-blood and half-caste aborigines at 30th June, 1952 was 21,051.

CHAPTER XVII.

VITAL STATISTICS.

NOTE.—1. Owing to considerations of space, the tables in this chapter contain only summaries of the principal vital statistics for Australia. They relate, in the main, to the year 1955, except for the totals of marriages, births, deaths and infant deaths, for which it has been possible to include figures for 1956. Comparisons have been restricted, in general, to the individual years 1952 to 1956 and the five-year periods 1931–35 to 1951–55, while age data have been shown in groups. Comparisons over longer periods, together with more detailed figures such as single age distributions and cross-classifications of various characteristics, will be found in the annual bulletin, *Demography*.

2. Figures for Australia throughout are exclusive of full-blood aboriginals.

§ 1. Provisions for Registration and Compilation of Statistics.

In Australia, vital statistics are compiled from information obtained from the registers of births, deaths and marriages. Each State and Territory has an independent system of registration. Provisions for the civil registration of births, deaths and marriages have been in force in Tasmania from 1839, in Western Australia from 1841, in South Australia from 1842, in Victoria from 1853 and in New South Wales and Queensland (then part of New South Wales) from 1856. Registration in the Territories is administered by the Commonwealth Government, registration in respect of the Northern Territory having been taken over from South Australia in 1911 and in respect of the Australian Capital Territory from New South Wales in 1930. The authority responsible for the registration of births, deaths and marriages occurring within his particular State or Territory is the Registrar-General or the Principal Registrar, or, as in the case of Victoria, the Government Statist.

In the Australian Capital Territory and the Northern Territory, information concerning a birth is required to be supplied within 21 days, in South Australia in 42 days, and in all other States 60 days is allowed. In all States, however, provision has been made for the late registration of births. For the registration of a death, the length of time varies more considerably, being 8 days in Tasmania, 10 days in South Australia, 14 days in Western Australia, the Northern Territory and the Australian Capital Territory, 21 days in Victoria and 30 days in New South Wales and Queensland. Provision is made in all States and Territories for the celebration of marriages by ministers of religion registered for that purpose with the Registrar-General or the Principal Registrar of Births, Deaths and Marriages of the State or Territory and also by certain civil officers. In all cases the celebrant, whether minister of religion or civil officer, is required to register particulars of the parties married with the Registrar of the district in which the marriage has taken place. The length of time allowed for registration of marriage also shows considerable variation as between States and Territories. In Victoria, Western Australia, the Northern Territory and the Australian Capital Territory, registration is required immediately following the ceremony, in Tasmania and South Australia within 7 days and in New South Wales and Queensland within 30 days.

For all States except Queensland and Tasmania, the registration of stillbirths is compulsory. Western Australia was the first State to introduce compulsory registration in 1908, followed by the Australian Capital Territory in 1930, New South Wales in 1935, South Australia in 1937 and Victoria in 1953. No statutory provision has been made in Queensland or Tasmania for the registration of stillbirths but provision is made in these States for voluntary registration and it appears likely that such births are notified to the Registrar-General. In this chapter, stillbirths have been excluded from all tables of births and deaths and shown only in those specially relating to stillbirths.

While there is every indication that the registration work of the several States and the Territories is very efficiently carried out, it is clear that in those States with a large area and scattered population, failure to register births and deaths may occur in some cases. It is believed, however, that consequent on the abolition, in 1943, of income limits previously restricting eligibility for maternity allowances (claims for which are checked against birth registers before payment), the proportion of births occurring now which is not registered is very small.

The data required for the compilation of vital statistics are copied from the registers of births, deaths and marriages in the Registrar General's Office and forwarded, through the Government Statistician in each State, and direct from the Principal Registrars in the two Territories, to the Commonwealth Statistician. The compilation and publication of vital statistics for Australia is a function of the Commonwealth Statistician. The Statisticians in the various States compile and publish statistics relating to their respective States.

§ 2. Marriages.

NOTE.—See NOTE at the beginning of this chapter.

1. **Number of Marriages.**—The number of marriages registered in Australia during the year ended 31st December, 1956 was 71,780, giving a rate of 7.61 per 1,000 of the mean population for the year. A summary of the number of marriages registered in each State and Territory from 1931 to 1956 is given in the following table. Annual averages for each five-year period from 1861 to 1950 were published in Official Year Book No. 39, p. 575. A graph showing the number of marriages in each year from 1860 to 1956 appears on p. 597 of this issue.

1955 ..	7.92	7.94	7.54	7.59	7.81	8.22	8.86	7.74	7.84
1956 ..	7.68	7.73	7.27	7.40	7.50	8.07	8.94	8.01	7.61

(a) Number of marriages per 1,000 of mean population.

3. **Marriage Rates based on Marriageable Population.**—As the marriage rates in some international tabulations are based on the unmarried population aged 15 years and over, the corresponding rates have been calculated for Australia for the eight census periods to 1953–55. The period in each case comprises the census year with the year immediately preceding and the year immediately following, and the figures are as follows:—

PERSONS MARRYING PER 1,000 OF UNMARRIED POPULATION: AUSTRALIA.

Period.			Rate.(a)	Period.			Rate.(a)
1880–82	48.63	1920–22	55.97
1890–92	44.04	1932–34	42.88
1900–02	42.14	1946–48	71.24
1910–12	50.12	1953–55	65.32

(a) Average annual number of persons who married per 1,000 unmarried persons, including widowed and divorced, aged 15 years and over.

4. **Crude Marriage Rates of Various Countries.**—The following table gives the crude marriage rates for Australia in comparison with the rates for various other countries.

CRUDE MARRIAGE RATES(a) : VARIOUS COUNTRIES.

Country.	1921–25.	1926–30.	1931–35.	1955.	Country.	1921–25.	1926–30.	1931–35.	1955.

(a) Number of marriages per 1,000 of mean population. (b) European population only.
(c) 1953. (d) Includes Maoris. (e) Excludes full-blood aborigines.

5. **Age and Conjugal Condition at Marriage.**—(i) *General.* Particulars of age at marriage in age groups and previous conjugal condition of bridegrooms and brides in 1955 are given hereunder. There were 5,613 males under 21 years of age married during 1955, while the corresponding number of females was 22,440. At the other extreme there were 96 bachelors and 73 spinsters in the age group 65 years and over.

AGE AND CONJUGAL CONDITION OF BRIDEGROOMS AND BRIDES : AUSTRALIA, 1955.

55-59 ..	828	..	2	7	9	40	56	130	584
60-64 ..	635	3	4	6	25	55	542
65 and over	903	4	4	8	41	846
Total Brides	72,172	25	16,678	32,033	10,398	4,760	2,640	2,030	3,608

(iv) *Average Ages of Bridegrooms and Brides.* The age at marriage of brides has remained fairly constant during recent years at an average of about 25½ years, although in the period 1937-39 the average rose to almost 26 years. The average ages, in years, of brides for each of the five years to 1955 were:—1951, 25.71; 1952, 25.61; 1953, 25.73; 1954, 25.59; and 1955, 25.42. For the following five-year periods the average ages in years were:—1931-35, 25.50; 1936-40, 25.72; 1941-45, 25.68; 1946-50, 25.61; and 1951-55, 25.61. The average ages, in years, of bridegrooms were 28.92 in 1951, 28.79 in 1952, 28.96 in 1953, 28.82 in 1954, and 28.68 in 1955. It follows, therefore, that brides are, generally speaking, a little more than three years younger than bridegrooms. The difference in age was 3.21 years in 1951, 3.18 in 1952, 3.23 in 1953 and 1954, and 3.26 in 1955.

6. *Previous Conjugal Condition.*—The following table shows the relative conjugal condition of the contracting parties to marriages in 1955.

CONJUGAL CONDITION OF BRIDEGROOMS AND BRIDES : AUSTRALIA, 1955.

Conjugal Condition of Bridegrooms.	Total Bridegrooms.	Conjugal Condition of Brides.		
		Spinsters.	Widows.	Divorced.
Bachelors	64,407	59,907	1,466	3,034
Widowers	3,216	1,240	1,350	626
Divorced	4,549	2,566	594	1,389
Total Brides	72,172	63,713	3,410	5,049

7. **Birthplaces of Persons Marrying.**—A table showing the relative birthplaces of bridegrooms and brides married in each year will be found in the annual bulletin, *Demography*.

8. **Occupation of Bridegrooms.**—The distribution of the 72,172 bridegrooms for 1955 amongst classes of occupations was as follows:—Craftsmen, 19,364; commercial and clerical, 12,397; operatives, 11,948; rural, fishing and hunting, 8,366; labourers, 6,803; domestic and protective service, 4,594; professional and semi-professional, 3,916; administrative, 2,808; and not gainfully occupied and not stated, 1,976.

9. **Celebration of Marriages.**—In all the States, marriages may be celebrated either by ministers of religion who are registered for that purpose with the Registrar-General, or by certain civil officers—in most cases district registrars—but most of the marriages are celebrated by ministers of religion. The registered ministers in 1955 belonged to more than forty different denominations, some of which, however, have only very few adherents. A number of these have been bracketed under the heading "Other Christian". The figures for 1955 are shown in the following table.—

MARRIAGES IN EACH DENOMINATION, 1955.

§ 3. Divorces.

Chapter XIII.—Public Justice shows details of the number of marriages dissolved annually by divorce, nullity of marriage and judicial separation. The number dissolved by decrees for divorce and nullity of marriage made absolute and by judicial separation in 1955 was 6,782. Detailed tables relating to divorce statistics for 1955 and summary tables for earlier years are shown also in *Demography*, Bulletin No. 73.

§ 4. Fertility and Reproduction.

NOTE.—See NOTE at the beginning of this chapter.

1. **Introductory.**—Of the two elements of increase in the population, namely, natural increase and net migration, the former has been by far the more important over the past few decades. The level of natural increase depends on the excess of births over deaths and the relation between fertility and mortality determines the rate of reproduction or replacement of the population.

2. **Number of Live Births and Confinements.**—(i) *Year 1955.* There are various methods of measuring the fertility of the population by relating the number of births to the numbers in the population. In each the basic data are, of course, the numbers of live births.

The number of live births registered in Australia during 1955 is shown in the following table. The table shows also the number of confinements resulting in one or more live births. The figures exclude cases where the births were of still-born children only.

LIVE BIRTHS AND CONFINEMENTS, 1955.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W.A.	Tas.	N.T.	A.C.T.	Australia.
LIVE BIRTHS.									
Single births ..	72,770	54,994	31,682	18,069	16,207	7,911	501	835	202,969
Twins ..	1,616	1,321	649	419	410	173	14	26	4,628
Triplets ..	21	21	17	6	6	5	76
Quadruplets	4	4
Males ..	38,081	28,888	16,701	9,524	8,436	4,122	257	441	106,450
Females ..	36,326	27,448	15,651	8,970	8,187	3,967	258	420	101,227
Total ..	74,407	56,336	32,352	18,494	16,623	8,089	515	861	207,677

STILLBIRTHS ASSOCIATED WITH MULTIPLE BIRTHS INCLUDED ABOVE.

Twins ..	58	11	15	5	14	5	..	2	110
Triplets	1	1	2

CONFINEMENTS RESULTING IN ABOVE BIRTHS.

Nuptial ..	70,619	53,778	30,188	17,675	15,646	7,728	450	833	196,917
Ex-nuptial ..	2,995	1,889	1,833	608	775	274	58	16	8,448
Total ..	73,614	55,667	32,021	18,283	16,421	8,002	508	849	205,365

NOTE.—Owing to the registration procedure adopted in some States, it is possible that in some cases where one child only of a multiple pregnancy is live-born the confinement has been treated as a single birth. However, the numbers of multiple births are not significantly affected. See also para. 13.

(ii) *Live Births, Years 1931 to 1956.* The average annual number of live births in each State and Territory for each five-year period from 1931 to 1955 and the total number of live births in each State and Territory for each year from 1952 to 1956 are given in the following table. Corresponding figures for each five-year period from 1861 to 1950 were published in Official Year Book No. 39, p. 583.

LIVE BIRTHS.

A graph showing the number of births in each year from 1860 to 1956 will be found on p. 597.

3. **Crude Birth Rates.**—The oldest and most popular method of measuring fertility is to relate the number of births to the total population, thus obtaining the crude birth rate. The crude birth rate measures the rate per thousand persons (irrespective of age or sex) at which the population has added to its numbers by way of births during a given period.

Crude birth rates for each five-year period from 1931 to 1955 and for each year from 1952 to 1956 for each State and Territory are set out below:—

CRUDE BIRTH RATES.(a)

Period.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
AVERAGE ANNUAL RATES.

(a) Number of births per 1,000 of mean population.

NOTE.—The birth rates in the table above are based on live births registered in the respective States and Territories. Prior to 1939, a large proportion of births in respect of which the mother's usual residence was the Australian Capital Territory took place in Queanbeyan, just over the New South Wales border. With improved hospital facilities in the Territory, the position was reversed until late in 1952, when maternity accommodation was provided at the Queanbeyan District Hospital. Since 1952, the movements in either direction have been only small. Particularly for years prior to 1953, the following rates, based on births in respect of which the mother's usual residence is the Australian Capital Territory, are a truer measure of birth rates in the Australian Capital Territory.

Annual Average.	Year.
1931-1935 ..	19.53
1936-1940 ..	19.29
1941-1945 ..	23.06
1946-1950 ..	27.13
1951-1955 ..	28.39
1951 ..	28.51
1952 ..	31.09
1953 ..	27.61
1954 ..	28.67
1955 ..	26.53

The variations similarly caused in the birth rates for the States and the Northern Territory by referring the birth registrations to the State or Territory in which the mother was usually resident are shown by the following corrected rates for 1955:—New South Wales, 21.29; Victoria, 22.28; Queensland, 24.24; South Australia, 22.46; Western Australia, 25.26; Tasmania, 25.66; and Northern Territory, 30.93.

A graph showing the birth rate for each year from 1860 to 1956 will be found on p. 598.

In the earlier years of the present century the crude birth rate fluctuated somewhat, but from 1912, when 28.60 was recorded, there was an almost continuous decline to the very low figure of 16.39 in 1934. The decline in the depression years was to some extent occasioned by the postponement of marriages, and with subsequent improvement in economic conditions the rate rose. From 1940 the rate increased quite appreciably, owing to a continued improvement in the economic welfare of the community and the war-time boom in marriages. The latter resulted in an abnormal number of first births but investigation indicates that rates for births other than first were generally slightly higher than might have been expected from pre-war experience. The improvement in the birth rate has been substantially maintained since the end of the war despite some falling off in marriage rates. The post-war peak of 24.07 was recorded in 1947.

4. **Crude Birth Rates of Various Countries.**—The following table gives crude birth rates for Australia in comparison with rates for various other countries.

CRUDE BIRTH RATES(a) : VARIOUS COUNTRIES.

Country.	1921- 25.	1926- 30.	1931- 35.	1955.	Country.	1921- 25.	1926- 30.	1931- 35.	1955.

(a) Number of births per 1,000 of mean population. (b) European population only.
(c) Excludes Maoris. (d) 1933-35. (e) Excludes full-blood aboriginals.

5. **Fertility Rates.**—The principal demographic factors affecting the level of crude birth rates are the proportion of women of child-bearing age in the population and the proportion of such women who are married. These factors may vary considerably at different periods and for different countries, and a population with a higher proportion of married women of child-bearing age will have a much higher crude birth rate than one with a low proportion, although the fertilities of the two populations may be identical.

In order to compare fertilities, births are sometimes related to the number of women of child-bearing age or, alternatively, nuptial births are related to the number of married women of child-bearing age. Thus births are related to potential mothers, giving the fertility rate.

The following table sets out for certain periods, commencing with 1880-82, the number of births per thousand of mean population, the number of births per thousand women of child-bearing age and the number of nuptial births per thousand married women of child-bearing age. For purposes of this table the child-bearing age has been taken to be 15-44 years inclusive, but births to mothers who were stated to be under 15 or over 44 years have been included in the compilations.

CRUDE BIRTH RATES AND FERTILITY RATES: AUSTRALIA.

Period.	Average Annual Rates.			Index Nos. (Base: 1880-82 = 100).		
	Crude Birth Rate.(a)	Fertility Rates.		Crude Birth Rate.(a)	Fertility Rates.	
		Births per 1,000 Women aged 15-44 Years.	Nuptial Births per 1,000 Married Women aged 15-44 Years.		Births per 1,000 Women aged 15-44 Years.	Nuptial Births per 1,000 Married Women aged 15-44 Years.
1880-82 ..	35.3	170	321	100	100	100
1890-92 ..	34.5	159	332	98	94	103
1900-02 ..	27.2	117	235	77	69	73
1910-12 ..	27.2	117	236	77	69	74
1920-22 ..	25.0	107	197	71	63	61
1932-34 ..	16.7	71	131	47	42	41
1946-48 ..	23.6	104	160	67	61	50
1953-55 ..	22.7	109	149	64	64	46

(a) Number of births per 1,000 of mean population.

The table above shows how increasing proportions both of women of child-bearing age and of married women of child-bearing age inflate the crude birth rate. Thus, while the nuptial birth rate for married women increased by only 22 per cent. over the period 1932-34 to 1946-48 the crude birth rate rose by 41 per cent., owing principally to the greatly increased number of marriages during that period.

6. Age-specific Fertility Rates for Females.—So long as customary ages at marriage do not change drastically, the main demographic factor affecting the number of births is the age composition of the potential mothers in the population. Within the child-bearing group the fertility of women of different ages varies considerably and a clearer view of the fertility of the population can be obtained from an examination of what are known as its age-specific fertility rates, that is, the number of births to women of specified ages per thousand women of those particular ages.

Age-specific fertility rates are more commonly expressed in age groups than in single ages. In the following table, such rates, calculated in terms of female births for the purpose of obtaining the gross and net reproduction rates described in para. 7, are shown in five-year age groups for Australia for the period 1921 to 1955.

AGE-SPECIFIC FERTILITY RATES(a) : AUSTRALIA.

Age Group (Years).	1921.	1926.	1931.	1936.	1941.	1946.	1951.	1953.	1954.	1955.
15-19 ..	12.83	14.02	13.08	12.18	11.90	12.63	18.59	18.45	19.12	20.30
20-24 ..	65.45	60.23	53.08	50.33	59.42	73.52	85.84	94.53	96.24	99.48
25-29 ..	82.24	76.82	62.47	62.02	70.78	89.51	90.24	94.73	94.49	97.12
30-34 ..	68.50	61.90	51.25	46.33	49.72	65.03	55.16	61.17	59.91	60.14
35-39 ..	49.48	43.55	33.23	28.89	28.69	37.43	32.22	31.87	31.17	31.12
40-44 ..	21.66	17.63	13.61	10.19	9.52	11.87	9.97	9.77	9.85	9.92
45-49 ..	2.10	1.90	1.45	1.11	0.80	1.03	0.80	0.67	0.71	0.71

(a) Number of female births per 1,000 women in each age group.

The table shows that from 1954 the most fertile age group has been 20-24 years, whereas previously fertility had been highest between the ages of 25 and 29 years. The decline in fertility between 1921 and 1936 was general but was more pronounced in the higher age groups. During the period 1936 to 1955, a rise in fertility occurred in all age groups below 40. The most noticeable increase has been in the 20 to 24 age group, in which, as mentioned, fertility is now highest, as the result of a marked trend towards earlier marriage.

7. Gross and Net Reproduction Rates for Females.—A single measure of reproduction known as the gross reproduction rate is obtained by adding together the specific fertility rates for each age in the child-bearing group. This measure indicates the number of female children who would be born on the average to women living right through the child-bearing period, if the conditions on which the rate is based continue. The rate is unaffected by the age composition of the potential mothers, and consequently it shows more clearly than the crude birth rate the reproductive propensity of the population. It is, however, an

imperfect measure of reproduction because it does not take into account the females who fail to live from birth to the end of the reproductive period. A more accurate measure of this nature is obtained by multiplying the specific fertility rates by the number of females in the corresponding age group of the stationary or life table population and summing the products. Allowance is thus made for the effect of mortality and the result is known as the net reproduction rate. The net reproduction rate indicates the average number of female children who would be born to women during their lifetime if they were subject at each age to the fertility and mortality rates on which the calculation is based. A constant net reproduction rate of unity indicates that the population will ultimately become stationary. If it continues greater than unity, the population will ultimately increase; if less than unity, it will ultimately decrease. The following table should be read in the light of the comment which follows it and of the index of marriage fertility in paragraph 9 hereof.

GROSS AND NET REPRODUCTION RATES: AUSTRALIA.

Year.	Gross Reproduction Rate.	Net Reproduction Rate.	Year.	Gross Reproduction Rate.	Net Reproduction Rate.(g)
1881(a)	2.65	(b) 1.88	1949	1.457	1.382
1891(a)	2.30	(b) 1.73	1950	1.491	1.415
1901(a)	1.74	(c) 1.39	1951	1.485	1.409
1911	1.705	(d) 1.421	1952	1.547	1.468
1921	1.511	(e) 1.313	1953	1.556	1.477
1931	1.141	(f) 1.039	1954	1.558	1.478
1941	1.154	(f) 1.053	1955	1.594	1.513

(a) Approximate only. (b) 1881-1890 mortality experience used. (c) 1891-1900 mortality experience used. (d) 1901-1910 mortality experience used. (e) 1920-1922 mortality experience used. (f) 1932-1934 mortality experience used. (g) 1946-1948 mortality experience used.

NOTE.—It is not strictly correct to assume, as in the calculations of the rates above, that a particular age-specific fertility rate can be applied to a hypothetical group of women reaching that age, without taking account of previous fertility and marriage experiences. Reproduction rates are therefore unreliable when birth and marriage rates have been changing. The indexes of marriage fertility shown on the next page are also of doubtful reliability in similar circumstances.

Since 1881, there has been a substantial downward trend in both rates, but the gross rate has fallen considerably more than the net, showing that the decline in fertility has been offset to some extent by a decline in mortality. The net reproduction rate was below unity over the period 1932 to 1939. If such low levels were to be experienced indefinitely, ultimate population decline would be certain. The progressive rise in both gross and net reproduction rates from 1939 to 1947 was due largely to higher marriage rates during the war and early post-war years than had been experienced in the immediate pre-war years. Such fluctuations in marriage rates affect both gross and net reproduction rates substantially. When fluctuations in marriage rates are transient, reproduction rates calculated as above are not valid as indicators of relative fertility nor of the extent to which population will replace itself. Owing to various influences, the number of marriages in each year since 1948 has remained at a relatively high level and the net reproduction rates have been steady between 1.4 and 1.5. The fertility of marriages is measured in paragraph 9 below.

8. Gross and Net Reproduction Rates of Various Countries.—In the following table, a comparison is given of the gross and net reproduction rates recorded for various countries in the period 1950 to 1955. These represent the latest available international comparison.

GROSS AND NET REPRODUCTION RATES: VARIOUS COUNTRIES.

Country.	Period.	Reproduction Rate.		Country.	Period.	Reproduction Rate.	
		Gross.	Net.			Gross.	Net.
Canada	1954	1.87	(a)	France	1953	1.30	1.22
New Zealand(b) ..	1954	1.76	1.69	Norway	1953	1.28	1.21
United States of America(c)	1953	1.60	1.54	Switzerland	1953	1.25	1.15
Australia(d)	1955	1.59	1.51	Denmark	1954	1.23	1.12
Ireland, Republic of	1950-52	1.60	1.47	Scotland	1952	1.18	1.12
Netherlands	1953	1.47	1.40	England and Wales	1953	(a)	1.03
Finland	1953	1.44	1.34	Belgium	1953	1.13	1.03
Portugal	1953	1.50	1.27	Sweden	1952	1.08	1.03

(a) Not available. (b) Excludes Maoris. (c) White population only. (d) Excludes full-blood aboriginals.

In comparing the reproduction rates of the countries shown above, allowance should be made for any differences in years, as the rates for any one country from year to year are affected by variations in the incidence of marriage.

9. **Fertility of Marriages.**—Estimates of the fertility of marriages which were published in issues of the Official Year Book prior to No. 36 were calculated by relating the births of one five-year period to the marriages in the preceding five years (*see* Official Year Book No. 35, p. 329). Since the publication of that issue, an improved method has been formulated for measuring current marriage fertility by relating nuptial confinements in each year to the marriages from which they could have resulted. Confinements of women of a certain number of years duration of marriage are related to the number of marriages taking place that number of years previously. The table below sets out this index of current fertility per marriage in respect of confinements in the individual years shown.

FERTILITY OF MARRIAGES : AUSTRALIA.

Year.	Nuptial Confinements per Marriage.	Year.	Nuptial Confinements per Marriage.	Year.	Nuptial Confinements per Marriage.
1941..	2.19	1946..	2.55	1951..	2.55
1942..	2.12	1947..	2.55	1952..	2.63
1943..	2.21	1948..	2.44	1953..	2.66
1944..	2.28	1949..	2.45	1954..	2.66
1945..	2.36	1950..	2.56	1955..	2.71

NOTE.—*See* NOTE to table opposite.

The figure for a particular year gives the estimated number of children which a marriage would produce according to the fertility conditions of that year. There was an almost continuous decline for a number of years to 1942, but a pronounced increase has since occurred. Comparing this index with the net reproduction rate, it is evident that the rise in the latter since 1935 has been caused mainly by a rise in the marriage rate, due firstly to postponed depression marriages, and secondly to war-time and post-war marriages which have resulted in very high proportions of women married, particularly in the most fertile age groups. Only since 1944 has there been an increase in the fertility of marriages compared with pre-war levels.

The figures for 1949 and subsequent years present a somewhat inflated index, as many of the births which have been used to calculate the index relate to marriages of immigrants which took place overseas and are consequently not included in Australian marriage records. Partial investigation suggests that this factor probably overstated the index by very little in 1949, but that the overstatement at present is at least 6 per cent.

10. **Masculinity of Live Births.**—The masculinity of live births, i.e., the number of males born for every 100 female births, has remained fairly stable for Australia at about 105. But when the number of births for which masculinity is being calculated is small (for example, State totals), considerable variation is shown. For 1956, the figures ranged from 103.82 in Tasmania to 113.69 in the Australian Capital Territory. The averages for the ten years 1941–50 were as follows:—New South Wales, 105.49; Victoria, 105.47; Queensland, 105.49; South Australia, 105.78; Western Australia, 104.27; Tasmania, 104.45; Northern Territory, 100.20; Australian Capital Territory, 104.91; Australia, 105.38. The following table shows the figures for Australia for each ten-year period from 1901 to 1950 and for each of the years 1953 to 1956:—

MASCULINITY(a) OF LIVE BIRTHS REGISTERED : AUSTRALIA.

Particulars.	1901–10.	1911–20.	1921–30.	1931–40.	1941–50.	1953.	1954.	1955.	1956.
Total Births ..	105.22	105.27	105.55	105.12	105.38	104.82	104.92	105.16	106.87
Ex-nuptial Births	104.08	105.25	105.16	105.36	105.34	105.69	101.58	104.72	(b)

(a) Number of males born for every 100 female births.

(b) Not available.

11. **Ex-nuptial Live Births.**—(i) *General.* The highest proportion of ex-nuptial births in any one year since 1901 was recorded in 1905 when there were 6,545 ex-nuptial births, representing 6.24 per cent. of total births. Since then the proportion has declined steadily. The largest number of ex-nuptial births was recorded in 1955 when 8,537 were registered, but this number represented only 4.11 per cent. of total births. The lowest proportion was 3.78 per cent. in 1940.

The variations in the proportions of ex-nuptial births as between the individual States and Territories for 1955 are shown below.

EX-NUPTIAL LIVE BIRTHS : NUMBER AND PROPORTION, 1955.

Particulars.	N.S.W.	Vic.	Q'land.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Number ..	3,024	1,908	1,859	615	780	276	59	16	8,537
Proportion of Total Births %	4.06	3.39	5.75	3.33	4.69	3.41	11.46	1.86	4.11

The number and proportion of ex-nuptial births at intervals from 1901 to 1955 are as follows:—

EX-NUPTIAL LIVE BIRTHS : NUMBER AND PROPORTION, AUSTRALIA.

Particulars.	Annual Average.					1952.	1953.	1954.	1955.
	1901-10.	1911-20.	1921-30.	1931-40.	1941-50.				
Number ..	6,498	6,836	6,238	5,133	6,780	7,842	8,032	8,027	8,537
Proportion of Total Births %	6.05	5.22	4.66	4.40	4.13	3.89	3.97	3.97	4.11

It is of course possible that the number of ex-nuptial births is somewhat understated owing to diffidence in proclaiming the fact of ex-nuptiality.

(ii) *Rate of Ex-nuptiality.* A further comparison is obtained by calculating the number of ex-nuptial births per thousand of the single, widowed and divorced female population aged from 15 to 44 years. On this basis, the number of ex-nuptial births per 1,000 unmarried women of ages 15 to 44 has been found to be as follows:—1880-82, 14.49; 1890-92, 15.93; 1900-02, 13.30; 1910-12, 12.53; 1920-22, 10.50; 1932-34, 6.91; 1946-48, 11.45; and 1953-55, 14.45. Ex-nuptial births to married women, which are not recorded separately, are included in these figures and it is not possible to determine to what extent they influence the trend shown.

(iii) *Comparison of Rates.* The following table, showing the relative proportions of ex-nuptial and nuptial births to the total population, discloses a much greater proportional reduction in the ex-nuptial birth rate than in the nuptial rate:—

CRUDE EX-NUPTIAL, NUPTIAL, AND TOTAL BIRTH RATES(a) : AUSTRALIA.

Birth Rate.	Annual Average.					1952.	1953.	1954.	1955.
	1901-10.	1911-20.	1921-30.	1931-40.	1941-50.				
Ex-nuptial ..	1.60	1.39	1.04	0.76	0.90	0.91	0.91	0.89	0.93
Nuptial ..	24.91	25.18	21.40	16.47	20.99	22.44	22.03	21.61	21.64
Total ..	26.51	26.57	22.44	17.23	21.89	23.35	22.94	22.50	22.57

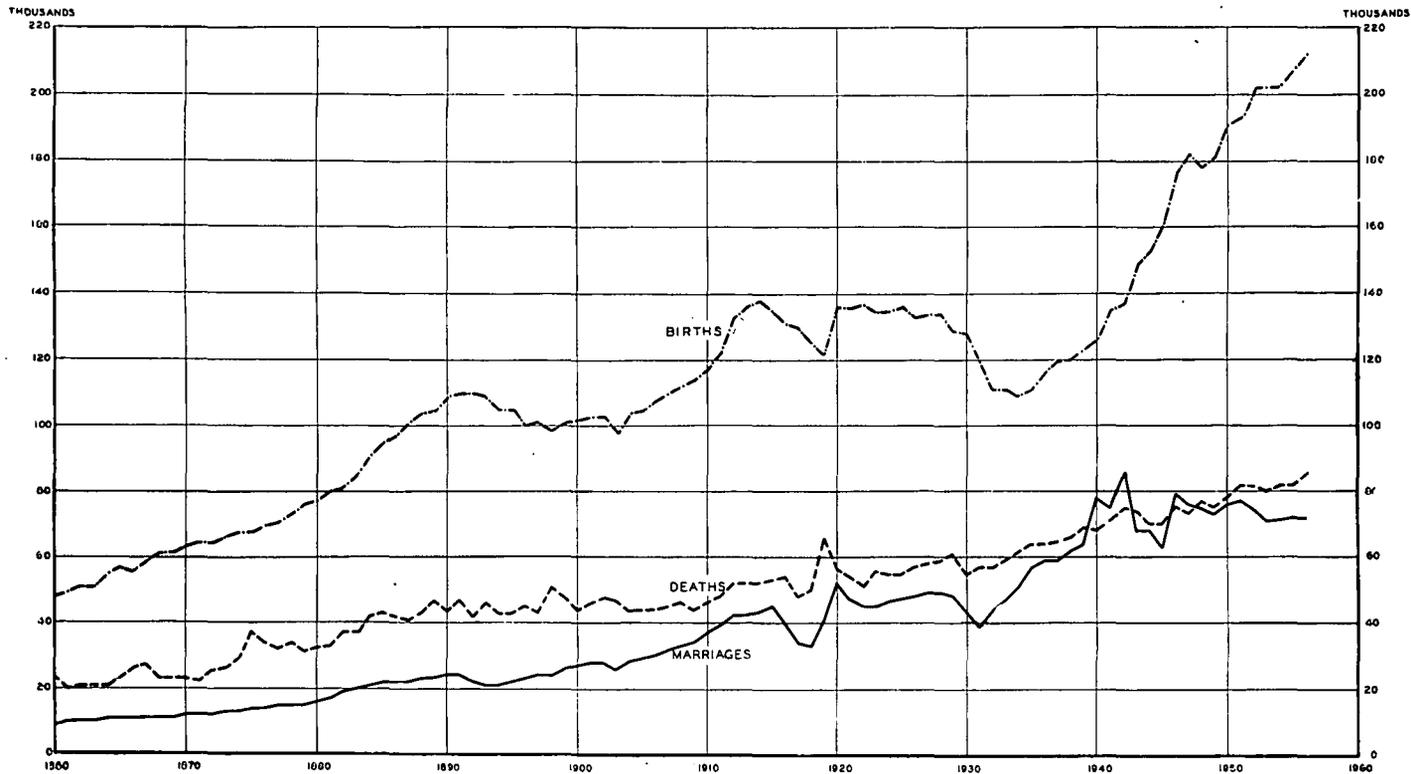

(a) Number of births per 1,000 of mean population.

12. *Legitimations.*—Acts have been passed in the several States to legitimize children born before the marriage of their parents, provided that no legal impediment to the marriage existed at the time of birth. On registration in accordance with the provisions of the Legitimation Acts, any child who comes within the scope of their purposes, born before or after the passing thereof, is deemed to be legitimate from birth by the post-natal union of its parents, and entitled to the status of offspring born in wedlock. During 1955, the number of children legitimized in Australia was 912.

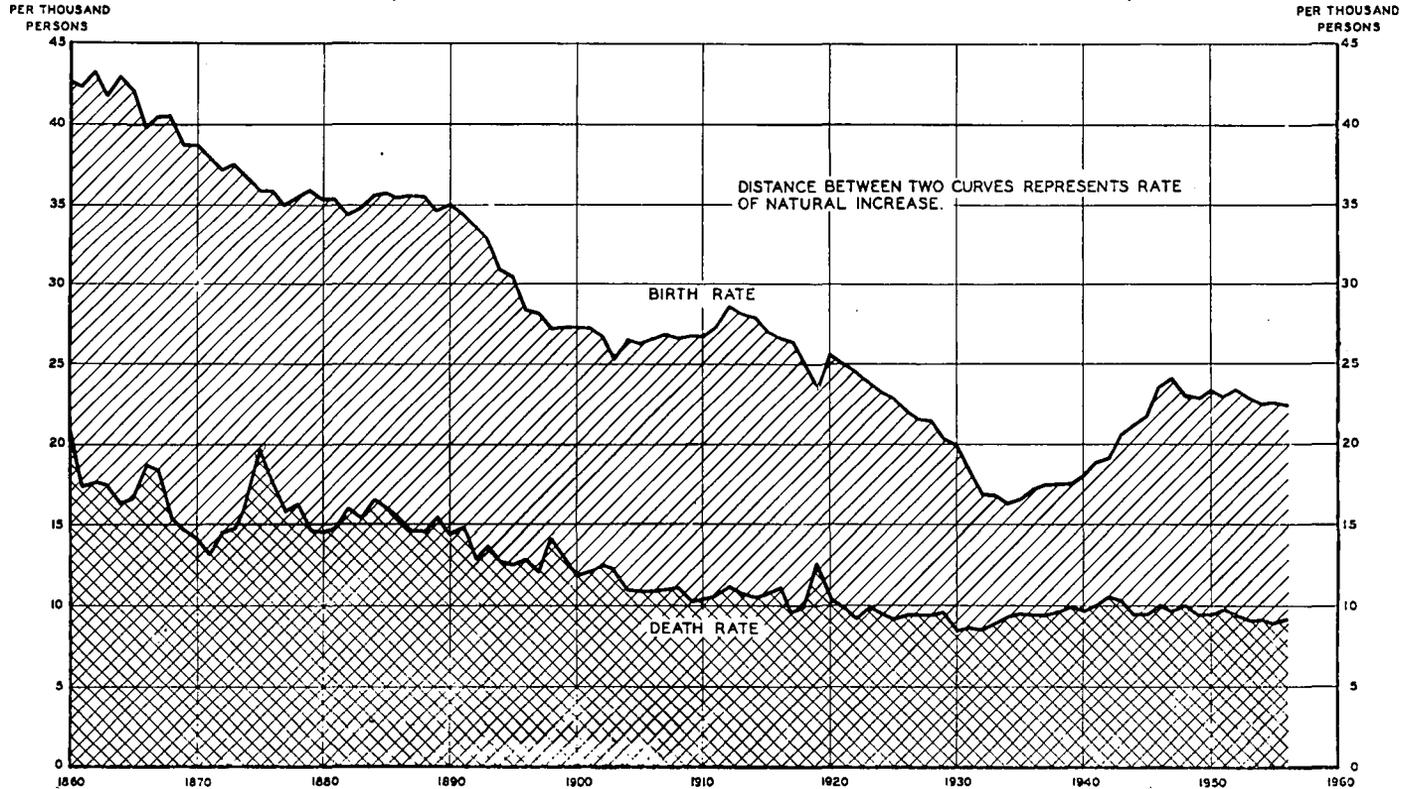

13. *Multiple Births.*—Because the current Australian birth statistics are based only on those confinements which resulted in a live-born child, the number of confinements for multiple births for Australia is understated—firstly, because in cases where all children of a multiple birth are still-born the confinement is excluded, and secondly, because some cases of multiple births in which only one child was live-born are registered as single births.

During 1955, multiple births recorded on the above basis comprised 2,369 cases of twins, 26 cases of triplets and 1 case of quadruplets, all live-born, the resultant numbers of live-born and still-born children being respectively 4,628 and 110 for twins, 76 and 2 for

BIRTHS, DEATHS, AND MARRIAGES: AUSTRALIA, 1860 to 1956

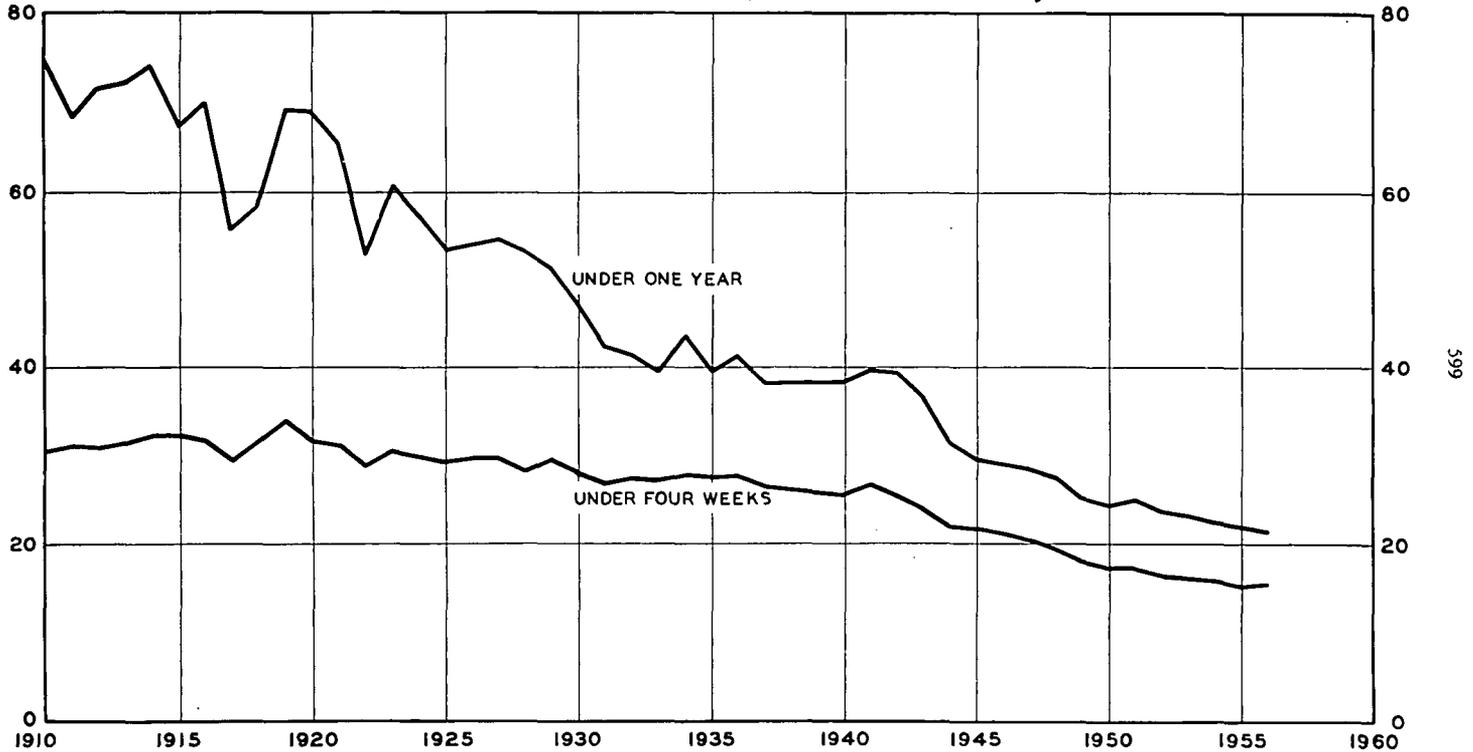

RATES OF BIRTHS, DEATHS, AND NATURAL INCREASE: AUSTRALIA, 1860 TO 1956

INFANT MORTALITY RATES: AUSTRALIA, 1910 TO 1956

(INFANT DEATHS PER 1,000 LIVE BIRTHS)

triplets and 4 live-born for quadruplets. This represents an average of 11.54 recorded cases of twins and 0.13 recorded cases of triplets per 1,000 confinements or, alternatively, mothers of twins represented 1 in every 87 mothers and mothers of triplets 1 in every 7,900. Total cases of multiple births represented 11.66 per 1,000 confinements or 1 in every 86 mothers.

The proportion of mothers of multiple births to total mothers does not vary greatly from year to year.

14. Ages of Parents.—The relative ages of the parents of children registered in 1955 have been tabulated separately for male and female births, multiple births being distinguished from single births. For total births and for multiple births the relative ages of parents are shown in *Demography*, Bulletin No. 73. In the present work the exigencies of space allow only the insertion of a table showing, in respect of confinements resulting in one or more live births, the relative ages of parents in groups of five years.

CONFINEMENTS: RELATIVE AGES OF PARENTS, AUSTRALIA, 1955.

15. Birthplaces of Parents.—A table showing birthplaces of parents of children whose births were registered during 1955 appears in *Demography*, Bulletin No. 73.

16. Occupation of Fathers.—A table showing occupations of the fathers of all nuptial children registered in 1955 appears in *Demography*, Bulletin No. 73.

17. Age, Duration of Marriage and Issue of Mothers.—(i) *General.* The total number of nuptial confinements resulting in live births in 1955 was 196,917, comprising 194,613 single births, 2,277 cases of twins, 26 cases of triplets and 1 case of quadruplets. The tables relating to previous issue exclude the issue of former marriages and still-born children. On the other hand, they include children by the same father who were born to the mother prior to the marriage. Children born at the present confinement are included in the total issue shown.

(ii) *Duration of Marriage and Issue of Mothers.* The following table shows that in 1955 the duration of marriage of mothers of nuptial children ranged from less than one year to over 25 years, and that the average family increased fairly regularly with the duration of marriage. The average issue of married mothers who bore children in 1955 was 2.50, compared with 2.48 in 1954, 2.45 in 1953, 2.42 in 1952, and 2.40 in 1951.

NUPTIAL CONFINEMENTS : DURATION OF MARRIAGE AND ISSUE OF MOTHERS, AUSTRALIA, 1955.

				Total ..	196,917	492,924	2.50

(iii) *Age and Average Issue of Mothers.* The following table shows the average number of children born to mothers of different ages. In the younger ages there is, naturally, little difference in the average number of children to each mother from year to year, but with the increase of the age of the mother the number of issue has until recently fallen in comparison with past years. In 1955, average issue was greater in all age groups under 40 years than in the decade 1941-50. The average issue of mothers of all ages recorded for 1955 (namely, 2.50) is 23.1 per cent. below the average of 3.25 for the years 1911-20.

AGE AND AVERAGE ISSUE OF MOTHERS : AUSTRALIA.

Period.	Age of Mother (Years).							All Ages.

1955	62,238	134,679	196,917	31.61

19. *Stillbirths.*—Registration of stillbirths is not compulsory in all Australian States. It has been compulsory in Western Australia since 14th January, 1908; in the Australian Capital Territory since 1st January, 1930; in New South Wales since 1st April, 1935; in South Australia since 1st May, 1937; and in Victoria from 1st January, 1953. In Queensland and Tasmania where registration is not enforced, some information is obtained by notification of stillbirths for various purposes. Because registration is not compulsory in all States, detailed statistics of stillbirths for Australia as a whole have not been compiled.

The number of stillbirths in each State and Territory, as recorded since 1936 by the means outlined above, is shown in the following table:—

STILLBIRTHS.

Period.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.

§ 5. Mortality.

NOTE.—See NOTE at the beginning of this chapter. A detailed analysis of causes of death and issue for 1955 will be found in *Demography*, Bulletin No. 73.

1. Number of Deaths.—(i) Year 1956. The following table shows the number of deaths, male and female, registered in each state and Territory during the year. Stillbirths, although registered as both births and deaths in some States, are excluded from the death statistics published herein.

DEATHS, 1956.

Sex.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.

(a) Excludes deaths of defence personnel and of internees and prisoners of war from overseas for the period September, 1939 to June, 1947.

A graph showing the number of deaths in each year from 1860 to 1956 will be found on p. 597.

2. **Crude Death Rates.**—The commonest method of measuring the mortality rate is to relate the number of deaths for a given period to the mean population for that period, thus obtaining the crude death rate. This rate for a given period measures the numbers per thousand of population by which the population is depleted through deaths during that period. Crude death rates for each State and Territory from 1931 to 1956 are shown in the following table.

CRUDE DEATH RATES.(a)

Persons ..	9.58	9.17	8.92	8.95	8.23	7.80	5.98	4.81	9.13

(a) Number of deaths per 1,000 of mean population.
from September, 1939 to June, 1947.

(b) Excludes deaths of defence personnel

A graph showing the crude death rate for each year from 1860 to 1956 will be found on p. 598.

3. **Standardized Death Rates.**—(i) *General.* The death rates quoted above are crude rates, i.e., they simply show the number of deaths per thousand of mean population without taking into consideration differences in the sex and age composition of the population. Other conditions being equal, however, the crude death rate of a community will be low if it contains a large proportion of young people (not infants), and conversely it will be relatively high if the population includes a large proportion of elderly people. The foregoing table of crude death rates, therefore, does not indicate comparative incidence of mortality either as between States in the same year or in any one State over a period of years. In order to obtain a comparison of mortality rates on a uniform basis as far as sex and age constitution are concerned, "standardized" death rates may be computed. These are computed by selecting a particular distribution of age and sex as a standard, and then calculating what would have been the general death rate if the death rates for each sex and in each age group were as recorded, but the age and sex distribution were the same as in the standard population. For the standardized rates which follow, the standard population compiled by the International Institute of Statistics has been used. This standard is based upon the age distribution according to sex of nineteen European countries at their censuses nearest to the year 1900. Full details of the "Standard Population" are given in Official Year Book No. 22, p. 962.

(ii) *Death Rates in Age Groups.* An examination of the age distribution of deaths and the resultant age-specific death rates is made in paragraph 9, p. 615.

(iii) *Comparison of Crude and Standardized Death Rates.* The relative incidence of mortality as between individual States and as between the years 1921, 1933, 1947 and 1954 is illustrated in the following statement of crude and "standardized" death rates. These years have been chosen for comparison because the census data give essential information as to sexes and ages of the State populations. Crude death rates are shown to indicate the degree to which they disguise the true position.

CRUDE AND STANDARDIZED DEATH RATES.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
Crude Death Rate(a)—							
1921	9.50	10.52	9.37	10.02	10.42	10.30	9.91
1933	8.58	9.59	8.84	8.44	8.64	9.60	8.92
1947	9.53	10.44	9.15	9.61	9.39	9.17	9.69
1954	9.46	9.19	8.64	9.01	8.38	8.67	9.10
Standardized Death Rate(b)—							
1921	10.35	10.79	10.24	10.38	11.88	10.83	10.58
1933	8.52	8.74	9.10	7.66	8.74	8.86	8.62
1947	7.44	7.31	7.47	6.77	7.28	7.21	7.34
1954	7.24	6.63	6.80	6.52	6.71	7.02	6.90

(a) Total deaths per 1,000 of mean population.
in para. 3 (i) above.

(b) See explanation of standardized death rates

The comparisons above relate to individual years in which a census of population was taken and should not be used as the basis for general conclusions as to changes in incidence of mortality for other than those years.

4. **True Death Rates.**—The main objections to standardized death rates are that the choice of a standard population is arbitrary and that the standardized rates have little value except for comparative purposes, and even then variation of the standard population may make appreciable differences. A correct measurement of the mortality of the population can be obtained, however, from life tables. A life table represents the number of survivors at each age from a group of newly-born children who are subject to given mortality conditions, and from such a table the complete expectation of life at birth can be calculated. The reciprocal of this figure is known as the true death rate, since, if the complete expectation of life of a person at birth is 50 years, say, then each person will on the average die 50 years after birth so that in the standard population one person in 50 or 20 per thousand will die each year. The true death rate for a given period is unaffected by the particular age distribution of that period and is determined solely by the mortality experience of the period as manifested in the rate of survivorship from each year of age to the next. The table below sets out complete expectation of life at birth and true death rates for the periods covered by Australian life tables.

**COMPLETE EXPECTATION OF LIFE AT BIRTH AND TRUE DEATH RATES :
AUSTRALIA.**

Period.	Complete Expectation of Life at Birth (Years).		True Death Rate.	
	Males.	Females.	Males.(a)	Females.(b)
1881-1890	47.20	50.84	21.19	19.67
1891-1900	51.06	54.76	19.58	18.26
1901-1910	55.20	58.84	18.12	17.00
1920-1922	59.15	63.31	16.91	15.80
1932-1934	63.48	67.14	15.75	14.89
1946-1948	66.07	70.63	15.14	14.16

(a) Number of deaths per 1,000 males in life table or stationary population. (b) Number of deaths per 1,000 females in life table or stationary population.

5. **Crude Death Rates of Various Countries.**—The following table gives crude death rates for Australia in comparison with rates for various other countries.

CRUDE DEATH RATES(a) : VARIOUS COUNTRIES.

Country.	1921-25.	1926-30.	1931-35.	1955.	Country.	1921-25.	1926-30.	1931-35.	1955.

Switzerland ..	1948-53	15.1	14.1				
Australia(d) ..	1946-48	15.1	14.2				

(a) Number of deaths per 1,000 males in life table or stationary population (see explanation on p. 607). (b) Number of deaths per 1,000 females in life table or stationary population (see explanation on p. 607). (c) Excludes Maoris. (d) Excludes full-blood aborigines. (e) European population only.

7. **Australian Life Tables.**—(i) *Life Tables prior to 1947.* It has been the practice at each census from 1911 onwards to prepare Life Tables representative of the mortality experience of Australia. The mortality of the Australian population for the thirty years from 1881 to 1910 inclusive was investigated in 1911 by the Commonwealth Statistician. Tables were compiled for each State and for Australia as a whole in respect of each sex for each of the decennial periods 1881–1890, 1891–1900 and 1901–1910. These compilations furnished a comprehensive view of Australian mortality in respect of sex, of time, and of geographical distribution, and practically superseded all Life Tables prepared in Australia prior to 1911. In addition, monetary tables based on the experience for the whole of Australia for the ten years 1901–1910 were prepared and published.

At the Census of 1921, Life Tables were prepared by the Commonwealth Statistician from the population recorded and the deaths in the three years 1920–22. Similarly, in 1933, the Life Tables were based on the census population and the deaths in the calendar years 1932–34.

(ii) *Life Tables of Census of 1947.* On the occasion of the 1947 Census, Life Tables representing the sixth in the series were compiled by the Commonwealth Actuary. These were based on the population recorded, in conjunction with the deaths during 1946, 1947 and 1948, as it was considered undesirable to take into account deaths occurring prior to 1946 owing to the possible effects on the civilian population of conditions arising from the 1939–45 War. Full particulars of the data used, the methods of construction and tabulation of these Life Tables will be found in the report of the Commonwealth Actuary which was published by the Commonwealth Statistician in 1950. This report also appeared in Volume III. of the Census of the Commonwealth of Australia, 1947. Monetary tables for both single and joint lives have also been prepared by the Commonwealth Actuary.

Comparative tables showing the number of survivors (l_x) out of 100,000 births, rates of mortality (q_x) and probability of surviving ten years (${}_{10}p_x$), at selected ages, in respect of the Australian Life Tables of 1920–22, 1932–34 and 1946–48, together with a summary of the main characteristics of the tables, were published in Official Year Book No. 39, pp. 602–3. The expectation of life at selected ages taken from these three Life Tables is as follows:—

AUSTRALIAN LIFE TABLES : COMPLETE EXPECTATION OF LIFE (e_x^o) AT SELECTED AGES.

Age (x).	Males.			Females.		
	1920–22.	1932–34.	1946–48.	1920–22.	1932–34.	1946–48.
0	59.15	63.48	66.07	63.31	67.14	70.63

1956 ..	(b)	(b)	6.39	6.33	6.80	6.54	12.59	2.78	(b)

(a) Number of deaths of children aged four weeks and under one year per 1,000 live births registered.

(b) Not yet available.

(ii) *Australia. (a) Under One Year.* The universal experience that during the first few years of life the higher death rate of male infants tends to counteract the excess of male births is confirmed by the fact that out of 526,474 male infants born from 1952 to 1956, 13,251 (25.17 per 1,000) died during the first year of life, while of 499,477 female infants only 9,986 (19.99 per 1,000) died during the first year. Stillbirths, for which masculinity is also higher, are not included in any of the tables relating to deaths.

As shown by the following table, the disparity is greater during the first four weeks of life, termed the neonatal period, than during the remainder of the first year of life or the post-neonatal period.

INFANT DEATHS AND MORTALITY RATES : AUSTRALIA.

Period.	Number of Deaths.						Rates.(a)

(a) Number of deaths per 1,000 live births registered.

(b) *Under Four Weeks.* The following table shows particulars of infant deaths in the first four weeks of life, or the neonatal period, from 1931 to 1955. It will be seen that, for both males and females, the risk of death is very much greater during the first day of life than subsequently.

**INFANT DEATHS AND MORTALITY RATES—UNDER FOUR WEEKS :
AUSTRALIA.**

Period.	Number of Deaths.						Rates.(a)

(a) Number of deaths per 1,000 live births registered. (b) Not available. (c) Includes under one day.

The foregoing tables indicate the decrease in infant mortality in Australia, the mortality rate of children aged under one year per 1,000 live births for 1955 being 53 per cent. of the average rate for 1931-35. The improvement was due largely to the decrease in deaths from preventable causes, the mortality rate for children aged one week but under one year of age declining by 53 per cent. while that for children aged under one week declined by only 43 per cent.

A graph showing infant mortality rates for each year from 1910 to 1956 will be found on page 599.

(iii) *Statistical Divisions.* The total numbers of births and of deaths of children under one year of age in each statistical division are shown in the annual bulletin, *Demography*.

(iv) *Various Countries.* Compared with other countries Australia occupies a favourable position in respect of infant mortality. In 1955, only New Zealand, Sweden the Netherlands and Norway recorded a lower rate than Australia.

INFANT MORTALITY RATES : VARIOUS COUNTRIES.

Country.	Infant Mortality Rate.(a)						Crude Birth Rate(b), 1955.

(a) Number of deaths under one year per 1,000 live births registered. (b) Number of live births per 1,000 of mean population. (c) Excludes Maoris. (d) 1935-39. (e) Not available. (f) Excludes full-blood aboriginals. (g) European population only. (h) 1935-38.

(v) *Causes of Death: Children under one Year.* Causes of death of children under one year of age should be considered in relation to age at death, because the emphasis on various causes changes rapidly as age at death varies. In 1955, 2,740 (97.5 per cent.) of the deaths occurring during the first week of life were caused by congenital malformations (12.2 per cent.) and certain diseases of early infancy (85.3 per cent.). Of the latter, 67.2 per cent. were associated with immaturity (*see table below*). At ages one week and under four weeks the proportions were 35.1 per cent. and 49.6 per cent. respectively. Of deaths of children over four weeks and under one year of age 24.4 per cent. were caused by congenital malformations and only 4.0 per cent. by diseases of early infancy, the emphasis having shifted to respiratory and digestive diseases (42.8 per cent.), accidents and violence (8.8 per cent.), infective and parasitic diseases (5.8 per cent.) and diseases of the nervous system (5.4 per cent.). A summary for 1955 of the deaths of children under one year of age, classified according to principal causes of death and age at death, is given in the following table.

CAUSES OF DEATH: CHILDREN UNDER ONE YEAR OF AGE, AUSTRALIA,
1955.

(a) Age four weeks and under two months.

(b) For further detail of this group of causes *see* next table.

The individual categories representing the causes of death which come within Class XV.—Certain Diseases of Early Infancy are designed to show the effect of immaturity in such causes of infant death. In 1955, 67 per cent. of deaths in this class during the first week of life and 44 per cent. of those in the next three weeks of life were due, directly or indirectly, to immaturity. The relationship between immaturity and each of the individual categories of Class XV. is shown for the year 1955 in the following table.

**DEATHS OF CHILDREN UNDER ONE YEAR OF AGE FROM CERTAIN DISEASES
OF EARLY INFANCY : AUSTRALIA, 1955.**

(vi) *Deaths of Ex-nuptial Children under one Year of Age.* Distinction between nuptial and ex-nuptial children in death statistics for Australia as a whole has been made since 1925. Results show that death rates during infancy have generally been much higher for ex-nuptial children than for nuptial children, but the disparity has become smaller in recent years. The following table shows the number of deaths of children under one year of age and the infant mortality rates for nuptial, ex-nuptial and all children in five-year periods since 1931 and for each year from 1952 to 1955.

DEATHS UNDER ONE YEAR OF AGE : NUPTIAL AND EX-NUPTIAL, AUSTRALIA.

Period.	Nuptial Children.		Ex-Nuptial Children.			All Children.	
	Number of Deaths.	Infant Mortality Rate.(a)	Number of Deaths.	Infant Mortality Rate.(b)		Number of Deaths.	Infant Mortality Rate.(c)
				Actual.	Ratio to Nuptial Rate. (Per Cent.)		
1931-35 ..	21,460	40.09	1,713	65.37	163	23,173	41.27
1936-40 ..	21,792	37.59	1,680	66.87	178	23,472	38.81
1941-45 ..	24,053	34.20	1,627	52.39	153	25,680	34.97
1946-50 ..	23,139	26.54	1,373	37.37	141	24,512	26.98
1951-55 ..	22,529	23.29	977	24.43	105	23,506	23.34
1952 ..	4,609	23.78	188	23.97	101	4,797	23.79
1953 ..	4,515	23.25	198	24.65	106	4,713	23.30
1954 ..	4,353	22.41	193	24.04	107	4,546	22.48
1955 ..	4,365	21.92	207	24.25	111	4,572	22.01

(a) Number of deaths under one year of age per 1,000 nuptial live births registered. (b) Number of deaths under one year of age per 1,000 ex-nuptial live births registered. (c) Number of deaths under one year of age per 1,000 total live births registered.

For the five years 1951-55, the ratio of the ex-nuptial to the nuptial rate at various ages of infancy was as follows:—Under one month, 99 per cent.; one month, 144 per cent.; 2 months, 113 per cent.; 3 months, 154 per cent.; 4 months, 119 per cent.; 5 months, 158 per cent.; under one year, 105 per cent.

Detailed information for Australia as to the age at which ex-nuptial children died from each cause of death will be found in *Demography*, Bulletin No. 73. Because of the small number of ex-nuptial deaths involved in each case, it is difficult to assess the real significance of the differences between the numbers of nuptial and ex-nuptial deaths from each individual cause.

9. Age Distribution.—(i) *Number of Deaths.* Age at death is recorded for statistical purposes in days for the first week of life, in weeks for the first four weeks, in months for the first two years and in completed years of life thereafter. These ages are usually combined in groups for publication, the most common being weeks for the first four weeks, months or groups of months for the first year, single years of age for the first five years and thereafter the five-year groups 5-9 years, 10-14 years, etc. A summary in this form for Australia is given in the following table for the year 1955.

AGE AT DEATH : AUSTRALIA, 1955.

Age at Death.	Males.	Fe- males.	Per- sons.	Age at Death.	Males.	Fe- males.	Per- sons.

				Total, All Ages	46,188	35,848	82,036

There are different mortality rates at various stages of life and the actual number of deaths in any period depends upon the impact of these rates on the numbers living at the respective stages. Changes in the number of deaths from one period to another are caused by changes in the rate of mortality in the various age groups and by the changed proportions of persons living in the different groups.

In Australia, during the last fifty years, there has been a steady improvement in the rate of mortality at all ages, which has tended to reduce the number of deaths. This has been most pronounced at ages under one year. The increased length of life due to this factor, coupled with the long-term decline in the birth rate and the effects of past and present migration, has been a significant cause in changing the age distribution of the population and consequently the age distribution of deaths, thus obscuring the effects of improved mortality rates.

The combined effect of these various influences can be seen from the following table, which shows the proportion of deaths in various age groups in periods of ten years from 1901 to 1950 and for the year 1955.

PROPORTION OF DEATHS IN EACH AGE GROUP : AUSTRALIA.
(Per Cent.)

Period.	Age at Death (Years).								Total.
	Under 1.	1-4.	5-19.	20-39.	40-59.	60-64.	65 and over.	Unspec- ified.	
1901-10 ..	20.51	6.45	6.37	14.99	17.99	5.31	28.26	0.12	100.00
1911-20 ..	16.66	6.09	5.49	14.44	20.32	6.19	30.68	0.13	100.00
1921-30 ..	13.10	4.51	4.85	12.12	20.55	8.26	36.53	0.08	100.00
1931-40 ..	7.40	2.56	3.83	9.36	20.54	8.36	47.92	0.03	100.00
1941-50 ..	6.79	1.71	2.26	6.01	19.04	9.33	54.84	0.02	100.00
1955—									
Males ..	5.68	1.42	2.15	5.57	19.20	10.15	55.80	0.03	100.00
Females ..	5.43	1.44	1.40	3.58	14.24	8.02	65.87	0.02	100.00
Persons ..	5.57	1.43	1.83	4.70	17.03	9.21	60.20	0.03	100.00

A table showing these proportions for males and females separately for the period 1901 to 1950 was published in Official Year Book No. 39, p. 614.

(ii) *Age-specific Death Rates.* The following table gives the average annual age-specific death rates for each State and Australia for the years 1953-55 based on the age distribution of the population at the Census of 30th June, 1954. Similar tables for the years 1932-34 and 1946-48 were published in earlier issues of the Official Year Book (see No. 37, p. 778 and No. 39, pp. 615-6).

(a) Average annual number of deaths per 1,000 of population in each age group at 30th June, 1954.

10. **Causes of Death.**—The classification of causes of death adopted for Australia by the Commonwealth Bureau of Census and Statistics at the inception of its mortality statistics in 1907 was that introduced by the International Institute of Statistics in 1893, reviewed by that Institute in 1899 and revised by an International Commission in 1900. This classification became known as the International List of Causes of Death and further international revisions in 1909 (Second), 1920 (Third), 1929 (Fourth), 1938 (Fifth) and 1948 (Sixth) were successively adapted for use in Australian statistics.

The Sixth Revision of the International Statistical Classification of Diseases, Injuries and Causes of Death has been used in Australia since 1950. For the first time in connexion with the International List, international rules for a uniform method of selecting the main cause to be tabulated, if more than one cause is stated on the death certificate, were laid down. Prior to 1950, the rules adopted in Australia for the selection of the cause of death to be tabulated were those laid down in the United States Manual of Joint Causes of Death, first published in 1914 and revised to conform with successive revisions of the International List.

The adoption of the new method marked a fundamental change in Australian cause of death statistics, with emphasis now placed on the underlying cause of death as indicated by the certifying practitioner. The introduction of this method required the adoption by all States of a form of medical certificate substantially identical with the International Form of Medical Certificate of Cause of Death as laid down in Article 9 of the World Health Organization Regulations No. 1. By 1950, all States had adopted satisfactory forms of certificate and it was possible to apply the new principles uniformly to all State cause of death records.

This change in principle affects the comparability of the statistics for 1950 and subsequent years with those for earlier years. For convenience in assessing the extent of the change and in accordance with a recommendation of the Sixth Decennial Revision Conference, causes of death for Australia for 1950 were also classified according to the detailed classification of the Fifth Revision, 1938, on the joint cause rules current for that revision. A complete detailed classification according to both the Fifth and Sixth Revisions was shown in *Demography*, Bulletin No. 68. Commencing with 1951, the classification is according to the Sixth Revision only.

In order to facilitate the briefer presentation of cause of death statistics, the present International Classification provides two special lists of causes for tabulation—the Intermediate List of 150 causes and the Abbreviated List of 50 causes. The latter has been used for the cause of death tabulations A to C which follow. Tables A and B show deaths of males and females, respectively, for 1955 and Table C shows the numbers of persons who died and the death rates and proportion per 10,000 deaths for the years 1954 and 1955.

11. **Deaths from Principal Causes.**—(i) *General.* In the preceding tables particulars have been given for each of the causes of death comprising the Abbreviated Classification according to the Sixth Revision of the International List. Certain important causes are treated in detail hereunder. The Abbreviated Classification number used in tables A to C (pp. 618-620) is indicated in parentheses for each cause or group of causes.

(ii) *All Forms of Tuberculosis (B1, B2).* (a) *General.* The total number of deaths classified to all forms of tuberculosis in 1955 was 729, consisting of 547 males and 182 females. In comparing any of the figures for 1950 and subsequent years with those for 1949 and earlier years consideration should be given to the effect of the change in basis from the Fifth to the Sixth Revision of the International List. This was discussed in Official Year Book No. 39, p. 626.

(b) *Age at Death.* The following table shows the age groups of males and females who were classified as dying from tuberculosis in 1955 together with figures for 1921, 1931, 1941 and 1951.

TUBERCULOSIS (ALL FORMS) : DEATHS IN AGE GROUPS, AUSTRALIA.

Age Group (Years).	Males.					Females.				
	1921.	1931.	1941.	1951.	1955.	1921.	1931.	1941.	1951.	1955.

45-64	692	674	793	570	237	278	252	251	126	52
65 and over ..	138	193	279	306	237	56	89	110	86	49
Not stated ..	3	1	..
Total ..	2,171	1,836	1,725	1,080	547	1,516	1,331	1,009	458	182

(c) *Death Rates.* The reduction in mortality from tuberculosis is shown by the decline in the crude death rate (per 100,000 of mean population) from tubercular diseases, which fell from 68 in 1921 (males, 78; females, 56) to 18 in 1951 (males, 25; females, 11) and still further to 8 in 1955 (males 12; females, 4). The crude death rate does not reveal the even more striking fall in the number of deaths in the younger age groups, which can be seen from the table above.

(d) *Death Rates, Various Countries.* A comparison of the death rates from tuberculosis for Australia with those for various other countries, made on the latest figures available, shows that Australia, with a rate of 8 deaths per 100,000 of mean population, occupies a favourable position as regards this disease. Whereas the rate for Denmark is also only 8, rates range as high as 67 for Japan. For various other countries rates are as follows:—Netherlands, 9; Canada, 10; New Zealand, 12; United States of America, 12; United Kingdom, 18; Union of South Africa, 20; Italy, 24; France, 32; Finland, 45; and Portugal, 62.

(iii) *Malignant Neoplasms, including Neoplasms of Lymphatic and Haematopoietic Tissues (B18).* (a) *General.* It was shown in Official Year Book No. 39, p. 628, that deaths classified under this heading according to the Sixth Revision of the International List are not directly comparable in total with those on the Fifth Revision basis and comparability ratios were given to enable comparison to be made on an adjusted basis. This change must be kept in mind in considering the comparisons shown in the following pages.

(b) *Type and Seat of Disease.* Tables showing the type and seat of disease in conjunction with age and conjugal condition of the persons dying from malignant neoplasms in 1955 will be found in *Demography*, Bulletin No. 73. A summary regarding type and seat of disease for 1955 is given below. It may be pointed out that the significance of the number of deaths shown for the various types of neoplasms enumerated hereunder is doubtful, owing to the fact that, in the absence of a post-mortem, it is impracticable for the certifying doctor in the majority of cases to make an accurate diagnosis as to type in the detail required for the following classification.

DEATHS FROM MALIGNANT NEOPLASMS AND NEOPLASMS OF LYMPHATIC AND HAEMATOPOIETIC TISSUES: TYPE AND SEAT OF DISEASE, AUSTRALIA, 1955.

(c) *Age at Death.* The ages of males and females who died from malignant neoplasms in 1955 are given below, together with figures for 1921, 1931, 1941 and 1951. Inferences drawn from the great increase in the number of deaths from malignant neoplasms in 1955 compared with the number in 1921 need qualification in view of the altered age constitution of the population since the earlier year. While the total population increased by about 70 per cent. between 1921 and 1955, the number of people over 55 years of age, at which ages the risks of cancer are much greater, increased by about 150 per cent. It is only from age 75 onwards, however, that the rate of mortality, as distinct from the number of deaths, has increased. For groups up to age 75 there has been no increase in mortality rates since 1921; indeed in some age groups the rates have actually declined. It is also probable that a proportion of the increased number of deaths from cancer recorded in recent years has been due to better diagnosis and certification on the part of medical practitioners rather than to any actual increase in the disease itself.

(d) *Death Rates.* The death rates from malignant neoplasms have continued to rise over recent years. The rates are crude death rates representing the number of deaths from malignant neoplasms per 100,000 of mean population and do not take account of changes in the age constitution of the population, and to a substantial extent reflect the increasing age of the population rather than the true change in mortality from malignant neoplasms (see para. 11 (iii) (c), p. 622). In 1921, the rate for Australia was 87 (males, 88; females, 87); in 1931 it was 101 (males, 105; females, 97); in 1941 it was 119 (males, 119; females, 120) and in 1951 it had risen to 126 (males, 129; females, 122). Figures for 1955 show that a further rise has taken place, the rate being 129 (males, 135; females, 124).

(e) *Death Rates, Various Countries.* Death rates from malignant neoplasms per 100,000 of mean population for Australia and for various other countries are as follows:—Portugal, 75; Japan, 83; Spain, 115; Union of South Africa, 125; Australia, 129; Canada, 130; United States of America, 145; New Zealand, 145; France, 178; Switzerland, 190; and United Kingdom, 202. The rates are for the latest available year in each case.

(iv) *Diseases of the Heart (B25 to B28).* The number of deaths classified to diseases of the heart in 1955 was 27,685 (16,382 males and 11,303 females). This class is the largest amongst causes of death, the rate having increased from 102 per 100,000 of mean population in 1911–15 to 301 in 1955. The increase in the number of deaths recorded from heart diseases has been particularly pronounced during the past twenty years. The rapid increase in mortality is partly a reflection of the ageing of the population, but the figures have been influenced mainly by improved diagnosis and certification by medical practitioners.

The death rates for heart diseases for various years from 1921 were as follows:—1921, 93 (males, 102; females, 83); 1931, 159 (males, 178; females, 142); 1941, 269 (males, 306; females, 231); 1951, 314 (males, 367; females, 259); and 1955, 301 (males, 352; females, 249). Deaths from heart diseases in 1955 represented 34 per cent. of the total deaths.

(v) *Puerperal Causes (B40).* It was shown in Official Year Book No. 39, p. 634, that the changes introduced with the Sixth Revision of the International List did not significantly affect the comparability of the total number of deaths from puerperal causes. The death rate from these causes (including criminal abortion) has fallen rapidly during recent years and in 1955 the rate was 0.6 per 1,000 live births, compared with a rate of 6 per 1,000 in 1936. The 133 deaths in 1955 correspond to a death rate of 2.9 per 100,000 females. The death rate may be expressed in other terms by stating that 1 of every 1,544 women giving birth to a live child in 1955 died from puerperal causes; the corresponding ratios for married women were 1 in every 1,614, and for single women 1 in every 768.

The death rate per 1,000 live births from puerperal causes in various countries for the latest available years is as follows:—New Zealand, 0.5; United States of America, 0.6; France, United Kingdom, Canada and Denmark, 0.7; Union of South Africa and Spain, 1.1; Switzerland, 1.2; Portugal, 1.4; and Japan, 1.8.

The total number of children left by the 122 married mothers who died from puerperal causes in 1955 was 341, an average of 2.8 children per mother.

Three of the mothers who died had been married less than one year, 14 between one and two years, and 9 between two and three years. The duration of marriage ranged up to 28 years. Tabulations distinguishing the ages at marriage and at death will be found in *Demography*, Bulletin No. 73, which also includes a table showing in combination the duration of marriage and previous issue.

(vi) *Congenital Malformations and Diseases of Early Infancy (B41 to B44).* This combined group embraces two complete classes of the International List of Causes of Death which relate more specifically to infant deaths and they have already been presented in detail in the section devoted to causes of infant death (see pp. 613 and 614).

(vii) *Accidents, Poisonings and Violence (BE 47 to BE 50).* (a) *General.* Deaths in this class are classified according to external cause and not according to nature of injury. The classification provides sub-groups for accident, including adverse reactions to prophylactic inoculations, therapeutic misadventures and late effects of accidental injury; suicide; homicide and injuries purposely inflicted by other persons; and injury resulting from operations of war, including late effects.

The following table, showing the death rates in the main sub-groups per 100,000 of mean population indicates that the death rate from violence is generally about three times as great for males as for females. It can be seen also that in 1955 the percentage of deaths caused by violence was 7.52, compared with 6.76 in 1931–35.

The low level of the rates and proportions for the years 1941–45 is due largely to the exclusion of deaths of defence personnel from accidents, suicide and homicide, though the

rates have been based on total mean population (including defence personnel). A further contributing factor is the decrease during this period in the number of automobile accidents. From July, 1947, deaths of defence personnel from accidents, etc., have again been included.

ACCIDENTS, POISONINGS AND VIOLENCE : DEATH RATES.(a)

(a) Number of deaths per 100,000 of mean population. (b) Includes "open verdict".
(c) Includes late effects of injuries due to operations of war.

(b) *Accident (BE 47, BE 48)*. In 1955, the total number of deaths from accidental causes was 5,083 (3,685 males and 1,398 females). Half of the accidental deaths were the result of transport accidents. Of these, the numbers attributable to the major causes, and the percentages of the total accidental deaths in each case, were as follows:—Motor vehicle traffic accidents, 2,084 (41.00 per cent.); motor vehicle non-traffic accidents, 84 (1.65 per cent.); other road vehicle accidents, 132 (2.60 per cent.); railway accidents, 164 (3.22 per cent.); water transport accidents, 60 (1.18 per cent.); aircraft accidents, 41 (0.81 per cent.); a total of 2,565 (50.46 per cent.). Other important causes were accidental falls, 978 (19.24 per cent.); accidental drowning, 444 (8.73 per cent.); and accidents caused by fire and explosion of combustible material, 155 (3.05 per cent.).

(c) *Suicide (BE 49)*. (i) *Modes Adopted*. Deaths from suicide in 1955 numbered 946 (males, 701; females, 245). Firearms and explosives were used in 273 cases (28.86 per cent. of total deaths by suicide). Other important modes adopted, together with the numbers and relevant percentages, were as follows:—Hanging or strangulation, 184 (19.45 per cent.); poisoning by gases, 171 (18.07 per cent.); poisoning other than by gases, 157 (16.60 per cent.); submersion (drowning), 52 (5.50 per cent.); other modes, 109 (11.52 per cent.).

Of the 701 males who committed suicide, 254 (36.23 per cent.) used firearms and explosives. For females the most common mode was poisoning (other than by gases). This was used in 68 cases (27.75 per cent.).

(ii) *Age at Death*. From the following table which shows the age of persons who committed suicide in 1955 it will be seen that both young and extremely old people took their lives during this year.

AGE OF PERSONS WHO COMMITTED SUICIDE : AUSTRALIA, 1955.

50-54 ..	61	37	98				
55-59 ..	65	26	91	Total Deaths ..	701	245	946

(d) *Homicide and Operations of War (BE 50)*. In 1955, there were 129 deaths from homicide and injury purposely inflicted by other persons (not in war), of which non-accidental poisoning caused 5 deaths, assault by firearms and explosives, 38; assault by cutting and piercing instruments, 25; and assault by other means, 61. Deaths from injury resulting from the operations of war numbered 11, but all were deaths from late effects of such injuries.

12. Age at Death of Deceased Married Males and Females, and Issue.—*Demography*, Bulletin No. 73, contains a number of tables showing, in combination with the issue, the age at marriage, age at death and occupation of married (including widowed or divorced) persons who died in Australia in 1955. Deaths of married males in 1955 numbered 34,167, and of married females, 27,982. The tabulations which follow deal, however, with only 33,679 males and 27,734 females, the information regarding issue in the remaining 736 cases being incomplete. The total number of children in the families of the 33,679 males was 108,262 and of the 27,734 females, 96,136. The average number of children is shown for various age groups in the following table.

AGE AT DEATH AND AVERAGE ISSUE OF DECEASED MARRIED^(a) MALES AND FEMALES : AUSTRALIA.

(a) Includes widowed or divorced.

The figures in the preceding table include the issue both living and dead. The proportion of living to deceased issue, taking males and females together, is six to one. The totals for 1955 are shown in the following table:—

ISSUE OF DECEASED MARRIED^(a) MALES AND FEMALES : AUSTRALIA, 1955.

Issue of Married Males.				Issue of Married Females.			
Issue.	Males.	Females.	Total.	Issue.	Males.	Females.	Total.
Living ..	48,074	47,150	95,224	Living ..	40,345	40,110	80,455
Dead ..	7,732	5,306	13,038	Dead ..	9,303	6,378	15,681
Total ..	55,806	52,456	108,262	Total ..	49,648	46,488	96,136

(a) Includes widowed or divorced.

13. Age at Marriage of Deceased Males and Females, and Issue.—While the table giving the average issue of married males and females naturally shows an increase in the averages with advancing age at death, the following table, which gives the average issue of males and females according to the age at marriage of the deceased parent, shows a corresponding decrease in the averages as the age at marriage advances.

§ 6. Vital Statistics of External Territories.

Because of the outbreak of hostilities in the Pacific during the 1939-45 War, civil administration in the external territories was suspended on 11th February, 1942, and registration of births, deaths and marriages was not resumed until 1946. The following table for the year 1955 shows the number of births, deaths and marriages registered in the external territories under the control of Australia, namely:—Norfolk Island; Papua; the Trust Territory of New Guinea; the Trust Territory of Nauru; and, as from 23rd November, 1955, the Territory of Cocos (Keeling) Islands. More detailed information will be found in a series of tables in *Demography*, Bulletin No. 73.

CHAPTER XVIII.

HOUSING.

§ 1. Introduction.

1. **General.** In previous issues of the Official Year Book, certain information relating to the housing of the population was included in various chapters, but for a more convenient presentation of the material this complete chapter, which presents a summary of all available information on the subject, has been substituted in this issue.

In sections 2 and 3, a brief outline is given of government assistance to housing since 1945 and of operations under the War Service Homes Act 1918-1956. Other sections of the chapter are devoted to statistics of new building and to characteristics of dwellings at the Censuses of 1947 and 1954.

2. **Number of Dwellings, Censuses 1911 to 1954.**—At each census, in addition to the questions relating to the personal particulars of the individual members of households, there have been a number of important questions on the Census Schedule designed to elicit information concerning the dwellings in which the population was housed at the date of the census. For the purpose of the census, a "dwelling" is any habitation occupied by a household group living together as a domestic unit, whether comprising the whole or only part of a building. The term has therefore a very wide reference, and includes, *in addition to houses and flats*, a great variety of dwellings ranging from a single-roomed shack to a multi-roomed hotel or institution.

The following table shows the number of occupied and unoccupied dwellings in Australia at each Census from 1911 to 1954. Occupied dwellings are classified into private and other dwellings: Dwellings other than private include hotels, boarding houses, lodging houses, hostels, hospitals, educational, religious and charitable institutions, defence and penal establishments, etc. The term "unoccupied dwellings" is not synonymous with vacant houses and flats available for occupancy, but refers mainly to "week-end", holiday and other dwellings whose usual occupants were temporarily absent on the night of the Census. Newly-completed dwellings awaiting occupancy are also included.

DWELLINGS : AUSTRALIA, CENSUSES 1911 TO 1954.
(Excluding Dwellings occupied solely by Full-blood Aboriginals.)

Census.	Occupied.			Unoccupied.
	Private.	Other than Private.	Total.	
1911	894,389	29,870	924,259	33,473
1921	1,107,010	46,275	1,153,285	51,166
1933	1,509,671	37,705	1,547,376	68,772
1947	1,873,623	34,272	1,907,895	47,041
1954	2,343,421	36,932	2,380,353	112,594

§ 2. Government Assistance to Housing Since 1945.

1. **Agreements between the Commonwealth and State Governments.**—(i) *The 1945 Agreement.*—In November, 1945, the Commonwealth Government entered into an agreement with the Governments of the States whereby the Commonwealth Government would provide finance for and the State Governments would undertake the building of housing projects. Tasmania withdrew from the Agreement in 1950 and South Australia did not begin to operate under it until 1953. The Agreement expired on 30th June, 1956. Features of the 1945 Commonwealth and State Housing Agreement were :—

- (a) The Commonwealth Government agreed to make advances to each participating State for the construction of housing projects between 3rd December, 1943, and the date of the Agreement, and the amount required for the State's housing projects during a further period of ten years.
- (b) Each advance of money was to be repaid with interest thereon in equal annual instalments within a maximum period of 53 years from the date the advance was made, the interest to be at a rate not exceeding that payable in respect of the latest Commonwealth loan at the date of the advance.

- (c) Rents charged were to be economic rents, i.e., the rents were to be sufficient to meet repayments by the State to the Commonwealth of the capital cost of each dwelling with interest and of current outgoings such as the cost of maintenance, administration, rates and taxes and insurance.
- (d) The rental provisions of the Agreement provided for a system of rental rebates, whose basic principle was that a family with an income at the basic wage level did not need to pay more than one-fifth of its income in rent, regardless of the economic rent of the dwelling.
- (e) The Commonwealth Government was to bear three-fifths, and the State concerned two-fifths, of all losses sustained by the States on an annual basis.

The following table shows the amount of money advanced to each State under the 1945 Agreement :—

1945 COMMONWEALTH AND STATE HOUSING AGREEMENT : ADVANCES TO STATES.
(£'000.)

Year.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	Total.

Total	37,718	30,877	9,456	4,884	12,073	1,130	96,138

(a) Includes flats.

Initially, houses constructed under the 1945 Commonwealth and State Housing Agreement could be sold to tenants provided the tenant was able to arrange payment of the full purchase price of the house to the State Authority immediately on sale. Under this arrangement sales to tenants were relatively few. In April, 1955, the Commonwealth and the States entered into a supplementary agreement whereby the State Governments were permitted to sell houses to tenants on terms. These were : deposit, 5 per cent. of the first £2,000 and 10 per cent. of the balance of the cost of the house, the maximum amount of the remaining balance being limited to £2,750 and repayment of the balance to be made over a maximum period of 45 years at an interest rate of 4½ per cent. per annum. Tenants eligible under the War Service Homes Act were entitled to purchase houses built under the Agreement on the terms provided in that Act. The number of houses sold under the Agreement is as follows :—

1945 COMMONWEALTH AND STATE HOUSING AGREEMENT : HOUSES SOLD.

Year.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Total.(a)
1947-48	109	109

Total	2,402	1,379	540	283	1,779	6,383

(a) There were no sales in Tasmania.

(ii) *The 1956 Agreement.*—In 1956, the Commonwealth and the States entered into a new agreement under which added emphasis was placed on the construction of homes for private ownership. Features of the new agreement are :—

- (a) The Commonwealth Government will provide finance to the States over a period of five years ending 30th June, 1961, for the erection of housing projects.
- (b) For the first two years of the agreement, 20 per cent. of the money allocated to each State is to be advanced to building societies and other approved institutions for lending to private house builders. In the third and subsequent years of the currency of the agreement this proportion is to be increased to 30 per cent.
- (c) The remaining 80 per cent. (last three years 70 per cent.) of the allocation to each State may be used by the States for the erection of houses for either rental or sale. The States determine the type of houses to be erected, their location and the selection of tenants. They also fix the terms of selling.
- (d) In any one year, the Commonwealth may specify that an amount not exceeding 5 per cent. of the moneys referred to in (c) above be set aside for the erection of houses for serving members of the defence forces nominated by the Commonwealth. The Commonwealth will provide supplementary advances to the States equal to the amounts set aside by them for this purpose.
- (e) Each advance of money and interest thereon is to be repaid in equal annual instalments within a maximum period of 53 years from the date the advance is made. Interest on advances made during the years 1956-57 and 1957-58 shall be the long-term bond rate less (i) three-quarters of one per cent. per annum, if the long-term bond rate does not exceed 4½ per cent. ; and (ii) one per cent. per annum, if the long-term bond rate exceeds 4½ per cent.

Interest on advances made during the years 1958-59 to 1960-61 shall be as agreed between the Commonwealth and the States, or, in default of agreement, as determined by the Treasurer of the Commonwealth, but not exceeding the long-term bond rate less three-quarters of one per cent. per annum.

2. Imported Houses.—With the object of supplementing the number of houses being constructed by the building industry within Australia, the Commonwealth Government in 1950 sponsored a plan to import prefabricated houses from overseas. Under the States Grants (Imported Houses) Act 1950, the Commonwealth undertook to pay a subsidy not exceeding £300 per house to assist approved State Housing Authorities to meet the cost of houses brought to Australia from overseas.

A total of 14,016 houses were imported by State Authorities under this plan. Of these, 7,613 units were erected under the 1945 Commonwealth and State Housing Agreement on behalf of the State Governments themselves, whilst other houses were erected for governmental authorities concerned with public utilities such as the generation of electricity, railways and water supply.

The Commonwealth Government imported 4,176 houses for the Department of Works and the Snowy Mountains Hydro-Electric Authority. Of the 18,192 houses imported, the United Kingdom supplied slightly more than half, with France, Austria and Sweden the next largest suppliers in that order.

Expenditure by the Commonwealth Government on subsidies to the States importing houses under this plan was as follows : New South Wales, £252,000 ; Victoria, £1,645,200 ; Queensland, £703,800 ; South Australia, £1,173,000 ; Western Australia, £419,400 ; Total, £4,193,400. Imports of houses from overseas ceased in January, 1954.

3. Housing Schemes in Commonwealth Territories.—(i) *Australian Capital Territory.*—The Commonwealth Government, through the Department of Works (construction) and the Department of the Interior (management), provides houses primarily for rental to employees of Government organizations and to persons privately employed in the Australian Capital Territory. Since 1st July, 1945, 3,770 houses and flats have been erected by the Government.

Government rental houses may be purchased by tenants and the basis of sale is a minimum deposit of 5 per cent. of the first £2,000 of the purchase price fixed by the Department of the Interior and 10 per cent. of the balance, with a maximum advance by way of mortgage of £2,750. Repayment may be made over a maximum period of 45 years on all types of houses. Interest charged on loans is 4½ per cent. per annum. More than 1,100 houses have been sold to tenants since 1950.

Loans may be granted by the Commissioner for Housing to enable persons to purchase, erect or enlarge houses in the Territory or to discharge mortgages. Where the Commissioner's valuation of the property concerned does not exceed £2,000 the maximum loan may not exceed 95 per cent. of the valuation. If the Commissioner's valuation exceeds £2,000 the maximum loan is 95 per cent. of the first £2,000 and 90 per cent. of the balance (but in no case can the amount lent exceed £2,750). Repayment may be made over a maximum period of 45 years. The current rate of interest is 4½ per cent. per annum. From 1st July, 1949 to 30th June, 1956, 252 loans were granted.

(ii) *Northern Territory.* In 1946, control of all Government-owned residences in the Territory (excluding those belonging to the Defence Services or Commonwealth Railways or attached to post offices) was vested in the Administration. The Administration provides houses for rental for its own and other Commonwealth employees. In 1953, a Housing Scheme was inaugurated under which potential house builders may obtain loans of up to £2,750 for the erection of houses, the purchase or extension of existing houses or to discharge mortgages on houses. Up to 30th September, 1956, 179 loans had been approved. These were for : New houses, 117 ; extensions to existing houses and/or discharge of mortgages, 24 ; purchase of existing houses, 38.

(iii) *Papua and New Guinea.* The Housing Loans Ordinance 1953 permits the advance of loans of up to £2,750 to any member of the community for the purchase, erection or extension of an existing house. The loans are limited to declared township areas and are repayable over a maximum period of 45 years. The effective rate of interest is 4½ per cent. per annum. Up to 30th June, 1956, loans totalling £130,615 had been approved.

4. Other Housing Schemes in the States.—(i) *General.* In each State, the major Government housing schemes operated by the State Housing Authorities are those provided for under the Housing Agreements between the Commonwealth and State Governments referred to earlier. Other State Government assistance to housing is referred to in the following paragraphs.

(ii) *New South Wales.* The principal schemes operating in New South Wales are :—

- (a) *Commission-Financed Advances.* Under the Housing Act 1912–55, the Housing Commission is empowered to provide finance to persons to have houses erected on their own land, to purchase existing dwellings, or to effect improvements or repairs to houses. In respect of advances made under the Act prior to 1952, the maximum amount that could be lent was limited to £1,540, repayment of which could be made over a maximum period of 45 years. Interest charged was at the rate of 4½ per cent. per annum. Under this scheme 779 houses were erected. Regulations prescribing the present maximum amount that may be advanced and the limitation on income which may be received by an applicant for a loan have not been published and at present no advances are being made.
- (b) *Rental Housing (other than Housing Agreement).* Upon request by other State Departments, the Housing Commission will erect houses for employees of those Departments, e.g., Education, Agriculture, Water Conservation, etc. These Departments provide the necessary land and funds needed to finance the erection of the houses. Rentals charged are fixed by the Departments in accordance with the salaries of the officers occupying the houses. The number of houses erected under this scheme is 717.
- (c) *Sales Scheme.* During 1953–54, the Housing Commission began the erection of 100 houses for sale. Under this scheme, the Commission acted as the construction authority whilst administrative arrangements are carried out by the Rural Bank. Houses are sold on the basis of 10 per cent. deposit with repayment of the balance over a maximum period of 40 years. Construction of all houses has been completed.

(iii) *Victoria.* In 1956, a Homes Finance Trust was established with the object of receiving money from institutions and others in order to make loans for the erection or purchase of houses. Applicants for loans must declare that they intend to use the house as a home for themselves, their family and dependants. Except in special circumstances no loan will be granted if the borrower or wife or husband of the borrower already owns a house in Victoria at the date of the proposed mortgage.

Loans granted will be on the basis of a first mortgage over the house. Loans are not to exceed 95 per cent. of the value of the house and will not be made if the value of the house exceeds £4,500. In the case of purchase the house must not have been erected more than two years before the date of the mortgage. Repayment of loans may be made over a maximum period of 30 years, with interest charges determined by the Trust. At 30th June, 1956, 291 loans totalling £772,200 had been made.

(iv) *Queensland.* In this State there are two housing schemes operating—

- (a) Under the State Housing Acts 1949–1955, the Queensland Housing Commission makes advances to eligible applicants on the security of homes to be erected. A person to be eligible must be the proprietor of a suitable building site, must not already own a dwelling and must undertake to use the completed dwelling as a home for himself and family. The present maximum advances allowable under the Acts are £2,400 for a timber-frame building, £2,500 for a brick veneer and £2,750 for a brick or concrete building. The rate of interest at present chargeable on advances is 5½ per cent. per annum. Repayment may be made at the option of the borrower over either a 30-year or a 45-year period. A borrower or purchaser who elects to repay over a 30-year period, who is under 40 years of age, and who has passed a prescribed medical examination, is entitled to free life insurance cover in an amount sufficient to liquidate his indebtedness to the Commission in the event of his death before his loan has been fully repaid, provided that the maximum benefit payable under such insurance cover does not exceed £2,250. The total amount advanced on completed dwellings up to 30th June, 1956, was £15 million. The number of dwellings constructed under these Acts up to 30th June, 1956, was 24,086.
- (b) Workers homes are erected by the Queensland Housing Commission under the Workers' Homes Act 1919–1953. These homes are intended for persons who are not the owners of building sites, and applications are confined to persons with a net annual income for taxation purposes of not more than £800. The Housing Commission builds the home to suit the applicant's needs, on Crown Land, or on land purchased for the purpose, which is then converted to perpetual leasehold tenure. An applicant pays a deposit of

5 per cent. of the selling price of the home and the balance by monthly rent over a term of 30 to 45 years. The rate of interest is 5½ per cent. per annum. The number of houses constructed under this Act up to 30th June, 1956, was 2,343.

(v) *South Australia.* In South Australia, the Housing Trust builds houses for both rental and sale, and in addition administers an Emergency Dwelling Scheme for the South Australian Government. Since July, 1946, 27,060 houses have been erected in both city and country areas by the Trust.

(a) *Rental Houses.* The majority of the Trust's rental houses are of brick or stone construction and are built in pairs in housing groups. The Trust also has a large number of flats for rental, tenancy of which is restricted to married couples and others without young children. Recently a scheme of specially designed flats for pensioners and other elderly persons of limited means was inaugurated. Rents charged for accommodation are generally based on the overall cost of construction, and are likely to vary not only according to the size of the dwelling but also as to date of erection. As at 1st February, 1957, the rents of five-roomed houses (i.e., 3 bedrooms) ranged from £1 17s. 6d. per week for houses of an older type to £3 5s. per week for houses then being completed. Factors taken into consideration when allotting rental houses include date of application, housing need and suitability of tenant. Persons with high incomes are asked to consider purchasing their own homes.

(b) *Sales Scheme.* Houses built under this scheme, which was inaugurated in 1946, are of solid or timber-frame construction. More than 11,000 houses have been completed in both metropolitan and country areas since the scheme began. When houses are sold the usual practice is for the Trust to recover the total cost of the house and land by the purchaser paying the total amount in cash or (as is usually the case) paying a deposit (which varies according to the type of house—at present £300 for a timber-frame house and £600 for a 5-roomed brick house—and the purchaser's ability to pay) and raising the balance by way of mortgage. In cases where the deposit and first mortgage are insufficient, the Trust may advance the balance by way of a second mortgage, the repayment term of which is a maximum of 30 years, interest being at the rate of 5½ per cent. per annum. In 1956, the Trust began the erection of houses, which may be of solid or timber-frame construction or a mixture of both, for individuals on their own land. Houses are built by contract under the Trust's supervision. Prices for building and supervision of the standard houses covered by the scheme in early 1957 ranged from £2,930 for a 2-bedroom brick house to £4,480 for a 6-roomed (2 storey) house.

(c) *Rural Housing.* In order to assist primary producers, the Trust will erect houses on the applicant's own land for his own use or that of his employees, either using local materials or transporting prefabricated houses to the site. In early 1957, prices for houses erected on level sites within 100 miles of Adelaide ranged from £1,875 for a 2-bedroom minimum type timber house to £2,560 for a 3-bedroom, asbestos cement sheeted, timber house.

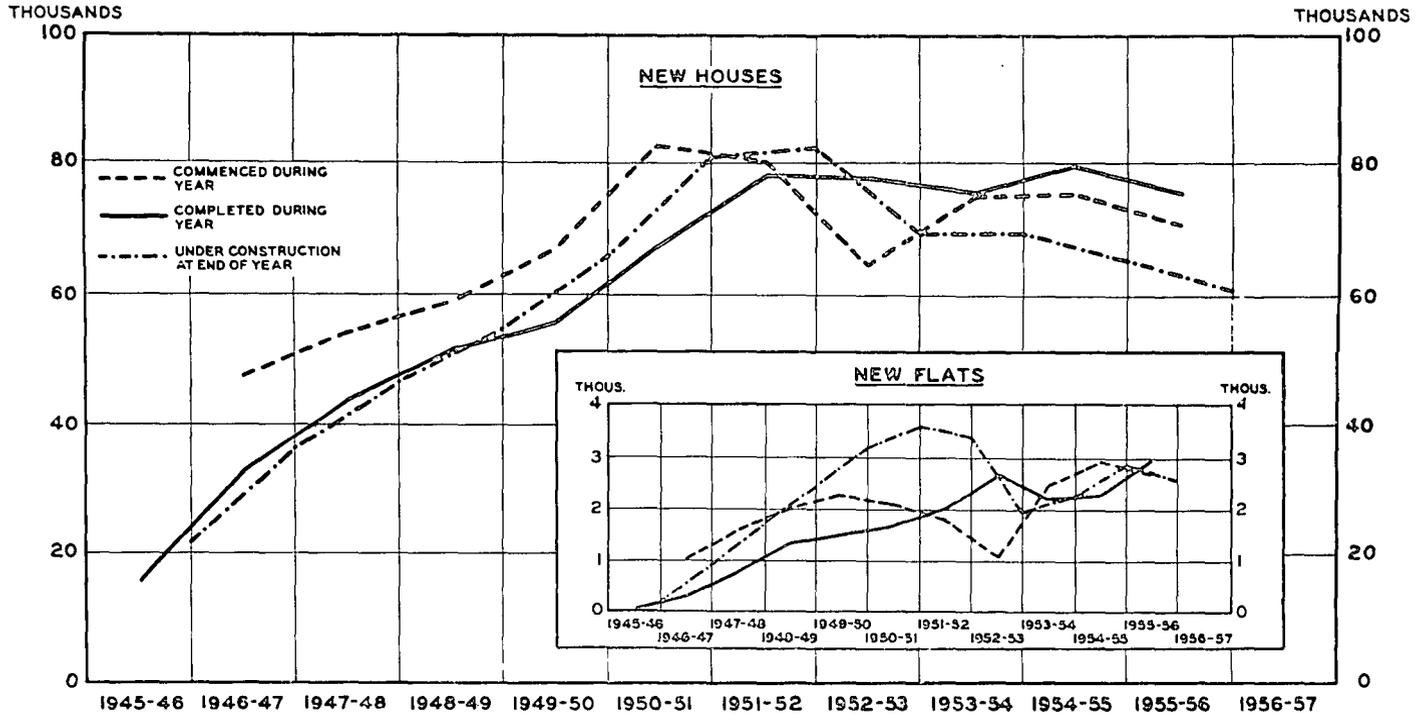

(vi) *Western Australia.* Under the State Housing Act 1946–56 the State Housing Commission has two types of home ownership schemes in operation. These are—(a) Freehold scheme on a mortgage basis; and (b) leasehold scheme on a contract of sale basis.

Under both schemes, the Housing Commission builds the houses on a contract basis—with the freehold scheme on land owned by the applicant; with the leasehold scheme on land owned by the Commission. With each scheme, the maximum loan granted is £2,500. Under the mortgage scheme, a deposit of not less than 10 per cent. is required, but with the contract of sale scheme a deposit of less than 10 per cent. may be accepted at the discretion of the Commission. The rate of interest chargeable in both cases is, at present, 5½ per cent. per annum. The repayment of the balance may be made over a maximum period of 45 years. An applicant's gross income is at present not to exceed £1,058 per annum plus £25 per year for each dependent child.

A second mortgage scheme also exists. This provides a maximum loan of £1,000 under the same conditions as above. The loan on a second mortgage, however, must not exceed the amount advanced under the first mortgage. The applicant has still to provide at least 10 per cent. of the cost of the house, which is not to exceed £3,000.

NEW HOUSES AND FLATS: AUSTRALIA

1945-46 TO 1955-56

The number of houses completed under the above Act up to 31st December, 1956, was—leasehold 2,575, freehold 345.

(vii) *Tasmania.* The Agricultural Bank is authorized under the terms of the Homes Act 1935 to make loans to eligible persons for home building on the security of a first mortgage over the property. A person to be eligible must be married or be about to marry or have dependants for whom it is necessary to provide a home. At present, there are no statutory limitations as to the maximum income which an eligible applicant may receive. However, it is the policy of the Bank not to make loans to persons who are well able to provide houses for themselves. The maximum amount which the Bank can loan at present is £3,300 on homes built in proclaimed brick areas, and £3,000 on timber houses. The rate of interest at present charged is 5½ per cent. per annum. As funds now coming to the Bank for the purposes of the Homes Act are provided under the 1956 Housing Agreement, the period of repayment is limited to 31 years.

5. War Service Homes.—The provision of War Service Homes is a function of the War Service Homes Division of the Department of National Development, and the administration of the War Service Homes Act is under the control of the Director of War Service Homes.

The War Service Homes Act 1918–1956 is a measure for the provision of homes for Australian ex-servicemen who served during the 1914–1918 War or the 1939–1945 War and, subject to the statutory provisions of the Act, to persons allotted for service in Korea or Malaya. Provision is made also for assistance to the female dependants of Australian ex-servicemen and other classes of eligible persons as defined in the Act. Assistance may be granted to an eligible person and the wife or husband of that person, as the case may be, as joint tenants.

The maximum amount of loan or advance which may be granted under the Act is £2,750. The period of repayment may be approved up to 45 years. In the case of a widow or widowed mother of an Australian ex-serviceman the period may be extended to a maximum of 50 years.

The War Service Homes Division does not provide homes for occupation on a purely tenancy basis.

From the inception of operations under the War Service Homes Act to 30th June, 1956, (figures in parentheses indicate cases where eligibility has been established as a result of service during the 1939–45 War or in Korea or Malaya), 158,435 (108,004) applications were approved; 60,775 (37,886) homes were built, or assistance to build them was given; 62,814 (47,391) homes were purchased; and 16,726 (13,205) mortgages were discharged. The total number of homes provided under the War Service Homes Act to 30th June, 1956, was 140,315, including 98,482 to persons who served during the 1939–45 War or in Korea or Malaya. In addition, the Division had approved 13,256 transfers and resales, of which 4,794 were in respect of persons whose eligibility had been established as a result of service during the 1939–45 War or in Korea or Malaya. Applications approved under the Commonwealth–State Housing Supplemental Agreement numbered 581 (562) and homes purchased 426 (411).

During 1955–56, 10,575 (10,019) applications were approved; 5,777 (5,587) homes were built or assistance to build them was given; 4,802 (4,520) homes were purchased; and 1,224 (1,180) mortgages were discharged. The total number of homes provided during the financial year 1955–56 was 11,803 (11,287). Transfers and resales approved numbered 1,298 (1,180). Applications approved under the Commonwealth–State Housing Supplemental Agreement numbered 569 (550) and homes purchased 423 (408).

At 30th June, 1956, 2,114 homes, including 131 group homes, were in course of construction; 748 contracts, of which 90 were for group homes, had been let but work had not started; and 681 tenders, including 32 for group homes, had been called but not finally dealt with. The majority of these homes are being provided for persons who served during the 1939–45 War.

The total capital expenditure from inception to 30th June, 1956, was £229,486,549, including £30,066,780 for 1955–56. Receipts from inception to 30th June, 1956, amounted to £94,953,981, including £11,960,509 during 1955–56. Of the total receipts, £49,067,452 had been paid to the National Debt Sinking Fund, including £5,864,437 for 1955–56.

At 30th June, 1956, the total amount of insurances in force, including cover notes, amounted to £273,008,103. During 1955–56, the premium income amounted to £203,692, and expenditure from the War Service Homes Insurance Trust Account to £188,027.

At 30th June, 1956, arrears of instalments outstanding amounted to £320,118, or 0.35 per cent. of the total instalments due.

6. **Other Forms of Government Assistance.**—(i) *General.* In addition to the assistance given to housing as outlined above, the Commonwealth and State Governments, through advances by Government Banks and the exercise of certain guarantees of the operations of private Co-operative Terminating Building Societies, further assist in making finance available for the erection and purchase of houses.

(ii) *Government Banks.* The terms and conditions governing the making of advances may be altered from time to time; consequently no attempt has been made to tabulate them. However, the usual loan for a house of solid construction (brick, etc.) is generally between £1,750 and £2,500. The average loan for a timber-frame house is £1,500. Interest rates charged average 5½ per cent. per annum. In some institutions this may be changed, usually after from 5 years to 10 years from the date of the loan. The maximum period of repayment ranges from about 20 years for timber-frame houses to 30 to 40 years for a house of solid construction.

(iii) *Building Societies.* The Co-operative Terminating Building Society movement in New South Wales and Victoria derives its strength from State legislation, under which the Governments of those States guarantee loans made to the societies by lending institutions and indemnify the societies against losses arising directly from that portion of loans made to members which exceeds 80 per cent. of the valuation of the property which is the security for the loan.

In States other than New South Wales and Victoria, there are at present no active Co-operative Terminating Building Societies, but Permanent and Starr-Bowkett Societies operate in each State under State legislation. The State Governments do not guarantee the borrowings of these societies, and the relevant Act in each State places strict limits on their borrowing powers.

§ 3. Statistical Summary—New Building.

1. *General.*—The statistics in this section relate to the operations of private contractors, Government authorities and owner-builders, with the exception of those relating to employment, which exclude the numbers of persons working on owner-built houses. In general, they relate to *new* building only, and data on alterations, additions, renovations and repairs to buildings are excluded, because of the difficulty in obtaining complete lists of persons who engage in these operations. Figures for houses exclude converted military huts, flats and shop dwellings. Some houses built on farms are excluded but these do not affect the figures materially.

These statistics are available for each quarter from the September quarter, 1945.

More detailed information on building activity may be found in the *Quarterly Bulletin of Building Statistics*.

The following definitions of terms used in this section are necessary for interpretation of the data presented:—

Owner-Built. An "owner-built" house is one actually erected or being erected by the owner or under the owner's direction without the services of a contractor who is responsible for the whole job.

Contract-Built. Includes the operations of all building contractors and Government instrumentalities which undertake the erection of new buildings.

Commenced. A building is regarded as having been commenced when work on foundations has begun. Owing to the difficulty of defining the exact point that this represents in building operations, it is probable that the classifications made by informants are not entirely uniform.

Completed. A building is regarded as having been completed when the contractor has fulfilled the terms of the contract. As with commencements, the classifications made may not be entirely uniform.

Under Construction. A building under construction at the end of a period is so classified regardless of whether construction was actively proceeding on that particular date. The figures for houses appearing under this heading in respect of New South Wales relate to buildings "remaining uncompleted".

Employment. Figures relate to persons actually working on the jobs of contractors who undertake the erection of new buildings and of Government instrumentalities which erect new buildings on their own account. They include persons actually engaged on alterations, additions, repairs and maintenance when these jobs are undertaken by such contractors and instrumentalities. The figures include working principals and their employees, men working as or for sub-contractors, and men temporarily laid off on account of weather.

Contractors are asked to give details of the persons employed *on a specified day* but, because of frequent movement between jobs and because some persons (such as electricians, etc.) may work on several jobs which are under construction simultaneously, some duplication may occur.

The figures *exclude* persons working on owner-built houses, and employees of builders who undertake only alterations, additions, repairs and maintenance.

Values. All values shown exclude the value of land and represent the estimated value of buildings on completion.

2. **New Houses.**—(i) *Commenced, Completed and Under Construction, 1948–49 to 1955–56.* The next table provides a summary of the number of new houses commenced, completed and under construction in each State and Territory for the years 1948–49 to 1955–56.

(a) Excludes Northern Territory prior to 1954-55. (b) Partly estimated.

3. *New Flats.*—The figures in the foregoing tables, except those for the Northern Territory, do not include particulars of new flats. The summary below shows the number of new flats commenced, completed and under construction in each State and Territory for the years 1948-49 to 1955-56. It should be noted: (i) that the figures are additional to the numbers of houses shown in other tables, (ii) that each flat is counted as a separate unit, and the numbers shown therefore relate to individual flats, and (iii) that new flats only are included, i.e., the conversions of old buildings into flats are omitted.

NEW FLATS : NUMBER.
(Individual Flats.)

(a) Excludes Northern Territory prior to 1955.

(b) Not available.

(c) At 29th June.

§ 4. Census Dwellings.

1. **Number of Dwellings.**—The following table shows the number of occupied and unoccupied dwellings in the urban and rural areas of Australia at the Census of 30th June, 1954. (For definitions of "urban" and "rural" see para. 4, p. 545). As explained therein, the boundaries of the Metropolitan Urban and other divisions of State differ from census to census, and consequently accurate comparison cannot be made between figures for corresponding divisions. Moreover, the inclusion in the Other Urban Division in 1954 of the larger towns not separately incorporated has further reduced comparability. These factors should be borne in mind when referring to tables in this section showing divisions of State.

Occupied dwellings are classified into private and other dwellings (see para. 2, p. 644, for definitions of "private" and "other" dwellings). The term "unoccupied dwellings" is not synonymous with vacant houses and flats available for occupancy, but refers mainly to "week-end", holiday and other dwellings whose usual occupants were temporarily absent on the night of the Census. Newly-completed dwellings awaiting occupancy are also included.

The total number of occupied dwellings in Australia at the Census of 30th June, 1954, showed an increase of 24.8 per cent. over the corresponding figure for the 1947 Census, compared with an increase of 18.6 per cent. in population. Occupied private dwellings increased by 25.1 per cent. and occupied dwellings other than private by 7.8 per cent. At the 1954 Census, 98.4 per cent. of the total occupied dwellings in Australia were private dwellings, compared with 98.2 per cent. in 1947. Proportional increases in total occupied dwellings over 1947 figures in each State and Territory were:—New South Wales 22.3 per cent., Victoria 25.3 per cent., Queensland 24.7 per cent., South Australia 27.7 per cent., Western Australia 30.5 per cent., Tasmania 26.1 per cent., Australian Capital Territory 96.9 per cent., and Northern Territory 27.1 per cent.

Unoccupied dwellings increased by 139 per cent.

DWELLINGS: AUSTRALIA, CENSUS, 30th JUNE, 1954.

(EXCLUDING DWELLINGS OCCUPIED SOLELY BY FULL-BLOOD ABORIGINALS.)

Division.	Occupied.				Unoccupied.

Australia	1,907,895	47,041	2,380,353	112,594

2. *Class of Dwelling.*—The following table shows the number of the various classes of occupied dwellings in the Metropolitan Urban, Other Urban and Rural Areas of Australia at the Censuses of 1947 and 1954. Definitions of the several classes of dwellings are as follows:—

Private dwellings comprise private houses (including sheds, huts, garages, etc. used for dwelling purposes), shares of private houses, flats, and rooms, apartments, etc. In previous censuses, dwellings returned on the Schedules as sheds, huts, garages, etc. were included with private houses. In the Census of 1954, particulars of these dwellings have been tabulated separately, but are linked with private houses to preserve continuity with past census results. Separate particulars were shown in the 1947 Census publications for private houses which were shared by two or more family units and for which only one Householder's Schedule was received, but in 1954 these dwellings were included with private houses.

Share of private house is a portion of a shared private house which is occupied separately and for which portion a separate Householder's Schedule was furnished.

Flat is part of a house or other building which can be completely closed off and which includes both cooking and bathing facilities.

Other private dwelling is an apartment, room(s), etc., which is part of a building, but which is not a self-contained unit.

Dwellings other than private include hotels, boarding houses, lodging houses, hostels, hospitals, educational, religious and charitable institutions, defence and penal establishments, etc.

It is desirable when considering the question of housing to exclude those forms of accommodation which do not represent the normal housing conditions associated with family life, and the statistics which follow relate mainly to private dwellings only.

OCCUPIED DWELLINGS ACCORDING TO CLASS, AUSTRALIA, 1947 AND 1954.

(EXCLUDING DWELLINGS OCCUPIED SOLELY BY FULL-BLOOD ABORIGINALS.)

(c) Portion of a shared private house which is occupied separately and for which portion a separate Householder's Schedule was received.

NOTE.—Minus sign (-) denotes decrease.

3. Population According to Class of Dwelling, etc.—The following table shows the number of the various classes of occupied dwellings at the Censuses of 1947 and 1954, together with the number of inmates therein.

Of the total population in 1954, 92.52 per cent. were living in private dwellings—houses, flats, apartments, rooms, etc.—whilst 672,168 persons, or 7.48 per cent. of the population, spent the night in other than private dwellings, or on ships, trains or aircraft or were camping out.

(b) Portion of a shared private house which is occupied separately and for which portion a separate Householder's Schedule was received.

(c) Shipping, railway and air travellers.

4. Occupied Private Dwellings.—(i) *Material of Outer Walls.* In the following table, occupied private dwellings are classified according to the material of which the outer walls were built.

Wood has been the most extensively used material in the construction of the outer walls, followed by brick and fibro-cement, and in 1954 the respective proportions for Australia for occupied private dwellings for which the material of the outer walls was specified were—wood, 44.4 per cent., brick, 33.5 per cent. and fibro-cement, 12.7 per cent. The latter has shown a most spectacular increase since 1933, when the proportion was 1.6 per cent. (23,696 dwellings), compared with 6.3 per cent. in 1947 (117,631 dwellings). The proportions of both brick and wooden dwellings have shown small decreases since 1947. The numbers of dwellings of all other materials except fibro-cement and concrete have decreased. Brick dwellings in 1954 represented 51.5 per cent. of all occupied private dwellings in the Metropolitan Urban Divisions, whilst in the Other Urban and Rural Divisions wooden dwellings predominated, the percentages of such dwellings being 60.0 per cent. and 59.4 per cent. respectively.

(a) See letterpress on p. 643 regarding comparability as between Censuses.

NOTE.—Minus sign (—) denotes decrease.

(ii) *Number of Rooms.* For Census purposes, the kitchen and any permanently enclosed sleep-out were included in the number of rooms in the dwelling, but the bathroom, pantry, laundry and storehouse were excluded unless generally used for sleeping.

Excluding houses with rooms unspecified, private houses of four, five and six rooms represented 78.3 per cent. of the total number of private houses in Australia at 30th June, 1954, compared with 79.2 per cent. in 1947, and three-quarters of the total increase in the number of private houses since 1947 consisted of houses containing these numbers of rooms. Houses of seven and more rooms also showed substantial increases.

(a) See letterpress on p. 643 regarding comparability as between Censuses. (b) Includes kitchen and permanently enclosed sleep-out but does not include bathroom, pantry, laundry or storehouse, unless generally used for sleeping. (c) Includes houses, sheds, huts, etc., and shared private houses for which only one Householder's Schedule was received. (d) Portion of a shared private house which is occupied separately and for which portion a separate Householder's Schedule was received.

(iii) *Number of Inmates.* A classification of occupied private dwellings according to the number of inmates is shown in the following table.

For Australia as a whole, private houses with four inmates were most numerous, followed very closely by those with two and three inmates in that order.

An increase of nearly 51 per cent. (149,348 houses) in the number of private houses occupied by two inmates brought this group from third position in 1947 to second position in 1954. Houses with two inmates in 1954 constituted 22 per cent. of the total number of occupied private houses in Australia, about the same proportion as for houses with four inmates. In 1947, houses with two inmates constituted 18 per cent. of the total and houses with four inmates 21 per cent. Houses with three inmates constituted 21 per cent. at both the 1947 and 1954 Censuses. The average number of inmates in private houses was 3.69 in 1954 compared with 3.91 in 1947.

The number of private houses which were shared, and for each share of which a separate Householder's Schedule was furnished, increased slightly between 1947 and 1954, but the average number of inmates therein decreased from 2.87 to 2.71. Separate particulars of shared houses for which only one Householder's Schedule was furnished were not compiled in 1954. These particulars are included with private houses in all tables in this section.

Flats and other classes of private dwellings increased in both numbers and total inmates, but the average number of inmates fell from 2.84 to 2.58 for flats and from 2.18 to 2.11 for others.

In flats those with two inmates and in other classes of occupied private dwellings those with one inmate predominated.

(a) See letterpress on p. 643 regarding comparability as between Censuses. (b) Includes houses, sheds, huts, etc., and shared private houses for which only one Householder's Schedule was received. (c) Portion of a shared private house which is occupied separately and for which portion a separate Householder's Schedule was received.

(iv) *Nature of Occupancy.* At the 1954 Census, 52.5 per cent. of occupied private houses in Australia for which particulars were supplied were occupied by owners, 16.8 per cent. by purchasers by instalments, 28.1 per cent. by tenants, and 2.6 per cent. by others. The corresponding percentages in 1947 were—owners, 50.5 per cent; purchasers by instalments, 9.0 per cent; tenants, 37.6 per cent; and others, 2.9 per cent. Owner-occupied houses in Australia increased by 33.4 per cent. between 1947 and 1954, and those being purchased by instalments by 139.3 per cent., the increase in these two groups combined being nearly 50 per cent., while tenant-occupied houses decreased by 4.1 per cent.

In the Metropolitan Areas, 70.5 per cent. of all occupied private houses were either owner-occupied or being purchased by instalments, as compared with 69.0 per cent. in the Other Urban areas, and 66.9 per cent. in the Rural Areas.

Tenants occupied by far the greater proportion of flats and other private dwellings.

(v) *Weekly Rent.* (a) *All Tenanted Private Dwellings.* The following table shows tenanted private dwellings in the Metropolitan Urban, Other Urban and Rural Areas of Australia classified according to weekly rent (unfurnished).

Information tabulated concerning rents was restricted to the actual rent paid per week by tenants for unfurnished private dwellings. Particulars of rents shown in the following tables are therefore on an *unfurnished* basis. Dwellings shown as rent "Not Stated" include those whose rents were shown on Householders' Schedules on a *furnished* basis, and those whose rents were not applicable (e.g., for shop and dwelling combined). In this section information on "tenanted private dwellings" relating to the 1954 Census *excludes particulars of dwellings occupied by "Tenants" (Governmental Housing) in each State*, i.e., those who furnished answers in response to the instruction on the Census Householder's Schedule "Tenant paying rent to a Government Authority to write 'Tenant (G)'". For the Australian Capital Territory and the Northern Territory, particulars of all tenanted private dwellings are included. Particulars for the 1947 Census relate throughout to all tenanted private dwellings.

TENANTED PRIVATE DWELLINGS CLASSIFIED ACCORDING TO WEEKLY RENT (UNFURNISHED), AUSTRALIA, 1947 AND 1954.

(EXCLUDING DWELLINGS OCCUPIED SOLELY BY FULL-BLOOD ABORIGINALS.)

Average Weekly Rent (Unfurnished) per Private Dwelling ..	22s. 8d.	22s. 0d.	36s. 7d.	24s. 2d.	32s. 2d.	34s. 2d.	50s. 6d.	36s. 2d.	35s. 0d.

(a) The figures shown for 1954 exclude dwellings occupied by " Tenants " (Governmental Housing) except those in the Northern Territory and the Australian Capital Territory. (b) Includes houses, sheds, huts, etc., and shared private houses for which only one Householder's Schedule was received. (c) Portion of a shared private house which is occupied separately and for which portion a separate Householder's Schedule was received. (d) Includes " other private dwellings " not shown in the table.

At the 1947 Census, nearly 83 per cent. of the tenanted private houses in Australia shown in the table above had weekly rentals of between 10s. and 35s. ; at the 1954 Census, only 61 per cent. were within these limits. In 1947, 6 per cent. had rentals below 10s. and

11 per cent. above 35s. In 1954, 3 per cent. had rentals below 10s. and 36 per cent. above 35s. At the 1947 Census, 88 per cent. of the flats shown for Australia had rentals of between £1 and £3 per week, 5 per cent. were below this range, and 7 per cent. above it. At the 1954 Census, the corresponding proportions were:—74 per cent., 2 per cent. and 24 per cent. Dwellings whose rents were not stated were excluded in obtaining these proportions.

The average rentals shown in this table for all tenanted private dwellings in Australia at the 1954 Census were 45 per cent. higher than in 1947 (42 per cent. higher for houses and 38 per cent. higher for flats). Metropolitan rentals in 1954 were higher by 40 per cent., 35 per cent. and 37 per cent., respectively, than in 1947.

In all such comparisons as these, the difference in basis between the 1947 and 1954 Censuses, referred to in the opening paragraph above, and also the differences in the Urban and Rural divisions (*see p. 643*), should be borne in mind.

(*b Tenanted Private Houses of Three to Six Rooms.* The comparisons in the following table, restricted to houses of three to six rooms, with outside walls of wood, brick or stone, are of particular interest, since this group comprises more than three-quarters of all tenanted private houses in Australia.

**AVERAGE WEEKLY RENT(a) PER ROOM OF TENANTED PRIVATE HOUSES,
THREE TO SIX ROOMS, WITH WALLS OF WOOD, BRICK OR STONE,
AUSTRALIA, 1947 AND 1954.**

3 to 6 rooms	5 3	4 5	3 4	4 9	7 0	6 5	4 7	6 7	1 10

(a) Rents relate to tenanted private houses (one family) in 1947 and to all tenanted private houses, excluding those occupied by "Tenants" (Governmental Housing) in 1954.

The average rent per room of 3- to 6-roomed tenanted private houses of wood, brick or stone increased by about 39 per cent. between 1947 and 1954 (wood by 45 per cent. and brick by 33 per cent.). The average for 3-roomed tenanted houses of wood, brick or stone increased by about 52 per cent., 4- and 5-roomed houses by about 40 per cent., and 6-roomed houses by 32 per cent. The increases in respect of houses of wood were higher than those for brick or stone in each case. The increases in the Metropolitan Areas were relatively lower than for Australia as a whole.

(vi) *Date of Building.* The number of occupied private dwellings in Australia at the Census of 30th June, 1954, classified according to date of building, were as follows :— Built before 30th June, 1947, 1,758,448; 1st July–31st December, 1947, 19,742; 1948, 60,360; 1949, 63,897; 1950, 78,965; 1951, 85,852; 1952, 91,712; 1953, 88,467; 1954, 44,725; built after 30th June, 1947 but particular year not stated, 19,641; not stated, 31,612; total, 2,343,421.

(vii) *Facilities, etc.* At the 1947 Census, a detailed question was asked concerning facilities, and a summary of the information obtained therefrom was published on p. 571 of Official Year Book No. 38. The question asked at the 1954 Census was much less detailed, and was designed partly to clarify replies to the question on class of dwelling. Information obtained in reply to this question and to that on farm dwellings has not been compiled.

CHAPTER XIX.

LOCAL GOVERNMENT.

§ 1. Introduction.

1. **Local Government Authorities.**—In each State of the Commonwealth, there exists a system of local government whose powers and responsibilities are in general similar, and cover such matters as the upkeep and construction of roads, streets and bridges, water, sewerage and drainage systems and health and sanitary services, the supervision of building and the administration of regulations relating to items such as weights and measures, slaughtering, the registration of dogs, etc. In addition to these obligatory functions, there are also many which may be performed by a local government authority either with or without the consent of the ratepayers or the Governor-in-Council. These include transport facilities, electricity, gas and other business undertakings, hospitals, charitable institutions, recreation grounds, parks, baths, libraries, museums, etc.

The system is based on the principle of a grant of specific powers by the State legislatures to the local authorities, their autonomy, however, being more or less limited by the provision for general supervision by a department of the central government or by the Governor-in-Council. Otherwise, within the scope of the Acts under which they are constituted or which they have to administer, they are responsible only to the ratepayers.

While the broad pattern of local government throughout the States of Australia is similar, the range of activities, election of officers, methods of valuation and rating powers, etc., differ considerably.

The areas over which local government bodies exercise general control, numbering 914, are known in New South Wales as cities, municipalities and shires; in Victoria as cities, towns, boroughs and shires; in Queensland as cities, towns and shires; in South Australia as cities, corporate towns and district council areas; in Western Australia as cities, municipalities and road districts; and in Tasmania as cities and municipalities. In New South Wales, some local government authorities in an area have combined to provide services such as electricity, water, sewerage and drainage—e.g., the county councils. Within shires, there are also some municipal units known as urban areas. In Western Australia, there are local health boards, whose personnel in most cases coincide with those of municipalities and road boards. Apart from the more thinly populated parts of New South Wales and South Australia and the Commonwealth Territories, practically the whole of Australia comes within local government jurisdiction.

The financial statistics in § 2 following are classified under the headings of Ordinary Services and Business Undertakings. The former covers the obligatory and general functions referred to above. Business Undertakings include public utilities such as water supply, sewerage, electricity, gas, transport and hydraulic power undertakings, and other miscellaneous works such as abattoirs, quarries, ice works, cinemas, etc.

2. **Semi-Governmental Authorities.**—In addition to local government authorities, a large number of authorities have been set up to control specific activities, which are often identical with some of those performed by either, or both, of the other classes of public authority—central government and local government—and a complete picture of any field of activity for a State or Australia as a whole cannot be obtained without reference to each class operating in that particular field. These semi-governmental authorities differ primarily from local government authorities in that their operations are restricted to the specific activity for which they were constituted—e.g., roads and bridges, or water and sewerage, or electricity and irrigation, or harbours, or tramways, etc.—i.e. each dispenses a specific service throughout an area as distinct from the general services of the local authority.

In §§ 3 to 7, which deal with debt, roads and bridges, water supply and sewerage, and harbours and fire brigades, particulars are included of the more important of these authorities which operate within the range covered by this chapter.

3. **Roads, Bridges, etc.**—The construction and maintenance of roads, bridges and ferries are generally part of the functions of local authorities, but in each State there exists a central road authority or a Government department whose duties relate to the construction, reconstruction and maintenance of "main" and "developmental" roads, the distribution of funds to local bodies, and the supervision and co-ordination of road construction and policy throughout the State. Although roads and bridges constructed and maintained directly by the Government or by the central road authority do not properly come under the heading of "Local Government", they have been included in this chapter for the

sake of convenience. Owing to difficulty in obtaining complete particulars of receipts and expenditure by the various local governing bodies in regard to roads under their control, the details of receipts and expenditure given in § 4 are those of the Government only, relating either to the supervisory board or commission in the State or to direct activities of a department. In § 2, some information is given of the revenue and expenditure of local government authorities in respect of roads.

4. **Water Supply and Sewerage.**—In the cities of Sydney and Melbourne, the control of water supply and sewerage is in the hands of special Boards, while in Adelaide and Perth these services are under the direct supervision of Government departments. In most of the other cities and towns, the municipal councils, or, in some cases, water trusts, are the controlling bodies which either construct the works out of their own resources or take them over after they have been constructed by the Government.

5. **Harbours.**—The majority of the harbours in Australia are managed by Boards, the members of which are either elected by persons interested, or are appointed by the Government. In a few instances, however, they are directly controlled by the Government.

6. **Fire Brigades.**—In all the States, the management of fire brigades is undertaken by Boards. These Boards usually comprise members elected by the councils of municipalities and insurance companies within the districts placed under their jurisdiction, and one or more members appointed by the Government. Occasionally volunteer or country fire brigades are represented.

7. **Other Local or Semi-Governmental Activity.**—The activities referred to above are not the only forms of local or semi-governmental undertakings. There are others, the most important being tramways and omnibus services and electricity and gas undertakings, which are not dealt with in this chapter, except to the extent that they are represented in the finances as shown in the following section. Chapter XI.—Transport and Communication contains information on municipal transport services, and Chapter VIII.—Electric Power Generation and Distribution deals with the various types of electricity undertakings in each State. In addition, particulars of municipal electricity and gas undertakings, although not shown separately, are included in the relevant sections in Chapter VII.—Manufacturing Industry.

§ 2. Local Government Authorities.

1. **New South Wales.**—For purposes of local government, the whole of the Eastern and Central land divisions and a small portion of the sparsely populated Western division have been divided into cities, municipalities (most principal towns) and shires (mainly large rural areas, some of which embrace important towns). At the end of 1953, the area incorporated was 184,000 square miles, or nearly three-fifths of the total area of the State.

All local government authorities in the State are subject to the general provisions of the Local Government Act.

Municipalities and shires may combine to form county councils for the establishment and conduct of services of joint benefit, e.g., electricity, water, sewerage. There were 35 county councils and the Grafton and South Grafton Water Board at 31st December, 1953.

2. **Victoria.**—Local government is established throughout the State, the various divisions being termed cities, towns, boroughs or shires. The only unincorporated areas are French Island (42,000 acres) in Westernport Bay, Julia Percy Island (650 acres), off Port Fairy, and Tower Hill (1,350 acres), adjacent to the Borough of Koroit. Melbourne and Geelong were incorporated under special statutes prior to the establishment of a general system of local government, but are now subject to several provisions of the Local Government Act. The law relating to local government was consolidated by the Local Government Act 1946.

3. **Queensland.**—The whole of the State (except certain islands along the coast, the Dawson Valley Irrigation Area and the Somerset Dam Area) is incorporated into cities, towns and shires under the Local Authorities Act 1902 and its amendments.

4. **South Australia.**—The settled portion of South Australia is incorporated, being mostly under municipal corporations in the larger cities and towns, and district councils in the agricultural areas.

5. **Western Australia.**—In this State, local government is carried on by means of municipalities and district road boards. Certain functions are delegated to health boards, whose personnel, in most cases, coincide with those of the municipalities and district road boards.

6. **Tasmania.**—The whole State is divided into municipal districts, Hobart and Launceston being incorporated under separate Acts.

7. Area, Population, Dwellings and Value of Ratable Property.—The area, population, dwellings and value of ratable property in the incorporated areas of each State are shown in the following table. The valuations relate to ratable property only and exclude Government and other non-ratable property, whose value in the aggregate is considerable. In this table, particulars of dwellings are in accordance with the definition used in the 1954 Census, and are the results of information collected on the Census Schedules. For the purpose of the Census, a dwelling was defined as any habitation occupied by a household group living together as a domestic unit, whether comprising the whole or only part of a building. The term has, therefore, a very wide meaning and includes, in addition to houses and flats, a great variety of dwellings ranging from a single-roomed shack to a multi-roomed hotel or institution. Unoccupied dwellings include "week-end" and holiday dwellings and other dwellings temporarily unoccupied on the night of the Census. Dwellings being built are not included.

(a) Particulars of population and dwellings are as at Census 30th June, 1954. (b) Year ended 31st December, 1953. (c) Not available. (d) Year ended 30th September, 1954. (e) Excludes Yallourn area under the jurisdiction of the State Electricity Commission. (f) Year ended 30th June, 1954. (g) Municipalities—Year ended 31st October, 1954; Road Districts—Year ended 30th June, 1954.

8. Finances.—(i) *General.* The following tables show the latest available financial statistics for local government authorities. The figures relate to the year 1953-54, except for New South Wales, where they relate to the year 1953.

(ii) *Ordinary Services.* In the returns of revenue and expenditure for 1953-54 in the following table, the proceeds from loans and expenditure thereof have been excluded. The financial operations of business undertakings controlled by the various local government authorities are given in the next paragraph. The profits resulting from the working of these undertakings, where taken into general revenue, have been included.

§ 3. Local and Semi-Governmental Authorities' Debt.

1. **General.**—Statistics of local and semi-governmental debt for the years 1938–39 and 1951–52 to 1954–55 are given in the following paragraph. The information covers all local government authorities and those semi-governmental authorities responsible for the provision of the following services :—

New South Wales. Water Supply, Sewerage and Drainage, Electricity Supply, Fire Brigades, and Banking. County Councils are included among these authorities.

Victoria. Water Supply and Sewerage, Irrigation and Drainage, Harbours, Tramways, Electricity and Gas Supply, Fire Brigades, Marketing (Buying and Selling), Industry Assistance, Grain Elevators, Housing, and Miscellaneous.

Queensland. Water Supply and Sewerage, Irrigation and Drainage, Harbours, Electricity Supply, Roads and Bridges, Fire Brigades, Universities, Hospitals and Ambulances, Marketing (Buying and Selling and Agency), and Industry Assistance.

South Australia. Irrigation and Drainage, Tramways, Electricity Supply, Fire Brigades, Hospitals and Ambulances, Marketing (Agency), Industry Assistance, Banking, Housing, and Miscellaneous.

Western Australia. Water Supply and Sewerage, Irrigation and Drainage, Harbours, Tramways, Electricity Supply, Fire Brigades, Hospitals and Ambulances, Marketing (Agency), and Housing.

Tasmania. Harbours, Electricity Supply, Fire Brigades, and Housing.

A detailed list of the authorities included is shown in *Finance Bulletin No. 46, 1954–55.*

2. **Local and Semi-Governmental Authorities' Debt.**—The following table provides a summary of new money loan raisings, provisions for debt redemption, debt outstanding and interest payable by local and semi-governmental authorities for the years ended 30th June, 1954 and 1955. For greater detail See *Finance Bulletin No. 46, 1954–55.*

(a) Includes debt or interest payable in London and New York. The former is expressed in United Kingdom currency, the latter is payable in dollars which have been converted at the rate of 4.8665 dollars to £1. (b) Included in debt figures above. (c) Not available.

In this and the following tables, debt includes all liabilities for which arrangements have been made for repayment over a period of one year or more, and net overdrafts. Interest capitalized and amounts due for the capital cost of assets or for services rendered which are to be repaid over a period of one year or more are included. Current liabilities, such as interest accrued (but not capitalized), trade creditors, amounts held in trust and other debts which are to be repaid in less than one year are not included. Net overdraft is the gross overdraft of all funds less all bank credit balances (including fixed deposits) which do not form part of a sinking fund to repay a loan. New loans raised during the year include new loan liabilities incurred during the year, loans raised to repay indebtedness to the Government, and interest capitalized. Loans raised and redeemed within the year, increases in overdrafts and loans raised for conversion or redemption of existing debt are excluded. Funds provided for redemption include instalments of principal repaid and amounts credited to sinking funds established for the purpose of repaying the debt on maturity. Amounts provided for redemption from loans raised for that purpose are excluded.

In the following table, a summary is given of new money loan raisings, provisions for the redemption of debt and debt outstanding of local and semi-governmental authorities for the years 1938-39 and 1951-52 to 1954-55.

§ 4. Roads and Bridges.

1. Commonwealth Government Grants.—The following table shows the allocation under the several Commonwealth Aid Roads Acts to the States for road construction, maintenance, repair and other works connected with transport for each of the years 1938-39 and 1949-50 to 1954-55, and to the Commonwealth for expenditure on the construction and maintenance of strategic roads and for the promotion of road safety practices for each of the years 1949-50 to 1954-55. See also Chapter XXI.—Public Finance, and *Finance* bulletins,

ROAD CONSTRUCTION, MAINTENANCE, ETC. : GRANTS UNDER THE COMMONWEALTH AID ROADS ACTS.

(£'000.)

Year ended 30th June—	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	C'wealth. (a)	Total.
1939 ..	1,199	747	815	474	819	213	..	4,267

1955 ..	5,893	3,771	4,125	2,409	4,190	1,073	900	22,361

(a) Allocation for expenditure on the construction and maintenance of strategic roads and the promotion of road safety practices. (b) Includes £5,000,000 paid into the Commonwealth Aid Roads (Supplementary) Trust Account to be expended on grants to the States for roads purposes in subsequent years.

2. New South Wales.—(i) *General.* A central road authority was created by legislation in 1925 for the purpose of providing improved and uniform standards of construction, reconstruction and maintenance of the principal roads, and to administer Governmental subsidies for work on those roads. This authority, known as the Department of Main Roads, exercises control over Government activities in connexion with road works. Its activities embrace works on main and developmental roads throughout the State, all roads in the unincorporated portion of the Western Division, and proclaimed national works (principally bridges and vehicular ferries) constructed from Government funds. The department co-operates with the municipal and shire councils in the work of constructing and maintaining a well-organized system of main highways.

In the metropolitan district, the whole cost of the construction and maintenance of main roads is paid from the funds of the Main Roads Department, while in the country districts assistance in respect of road works may be granted for any area through which a main road passes. The cost of constructing developmental roads and works is borne in full by the Main Roads Department, but local councils are required to maintain them in satisfactory condition. For other roads, the cost of both construction and maintenance work is generally chargeable to the revenue of local authorities, although Governmental assistance is not infrequently granted for works of construction and re-construction. In the Western Division, the full cost of all roads and bridges is met by the Department of Main Roads.

The general system of road communication throughout the State is made up of main roads classified into State highways, trunk roads and ordinary main roads. There are also secondary roads (metropolitan area) and developmental roads.

Public roads, except those within the City of Sydney, may be proclaimed as main roads on the recommendation of the Commissioner for Main Roads, who takes into consideration representations made by councils concerned, availability of funds for construction and maintenance purposes, and the value as connecting links between centres of population or business.

(ii) *Length of Roads.* (a) *Proclaimed Roads.* The following table shows lengths of proclaimed roads at 30th June, 1955, according to class of road:—

PROCLAIMED ROADS, NEW SOUTH WALES : LENGTHS, 30th JUNE, 1955.
(Miles.)

Division.	Main Roads.				Secondary Roads.	Developmental Roads.	Total.
	State Highways.	Trunk Roads.	Ordinary Main Roads.	Total.			
Eastern and Central ..	5,198	2,874	9,703	17,775	(a) 76	2,934	20,785
Western	1,326	1,353	2,859	5,538	5,538
Total ..	6,524	4,227	12,562	23,313	76	2,934	26,323

(a) Metropolitan area.

During 1954-55, 156 miles of new developmental roads were proclaimed and 156 miles were removed from the list of proclaimed roads. There were 10 miles of main roads proclaimed during the year.

The length of main and secondary roads maintained by the Department of Main Roads at 30th June, 1955 (excluding the Western Division) was 2,823 miles (16 per cent.), while the length maintained by councils was 15,028 miles (84 per cent.). The proportions of the several classes of main roads maintained by the Department and councils respectively were:—State highways, 42 per cent., 58 per cent.; trunk roads, 2 per cent., 98 per cent.; ordinary main roads, 6 per cent., 94 per cent. Secondary roads were wholly maintained by councils. In the County of Cumberland (the metropolis and adjoining areas) the Department maintained 55 per cent. of the roads (504 miles).

(b) *Composition of Roads.* In 1955, the total length of all roads in New South Wales was estimated at 125,040 miles, including 8,645 miles in the Western Division. The lengths of roads, according to their composition or nature, were as follows:—cement concrete, 404 miles; asphaltic concrete, 200 miles; tar or bituminous macadam, 4,684 miles; surface water-bound macadam, 5,440 miles; water-bound macadam, 1,794 miles; gravel or crushed rock, 39,550 miles; formed only, 27,281 miles; cleared or natural surface only, 45,687 miles.

(iii) *Main Roads Department.* (a) *General.* Progress has continued with the implementation of the Main Roads Department plan for main road development in the metropolis and the balance of the County of Cumberland. The plan has been incorporated in the County of Cumberland Planning Scheme approved by Parliament under the Local Government (Amendment) Act 1951. Detailed planning of the Newcastle and District Arterial Roads System is well advanced and some sections of the system have already been constructed. Surveys and designs have been advanced in the planned Wollongong-Port Kembla District Main Roads System.

In addition to its construction and maintenance work on roads, the Main Roads Department is engaged on a scheme for widening metropolitan roads. The acquisition of land required to implement approved schemes is proceeding.

During 1954-55, 46 new bridges were completed on main roads by the Department and councils. Major bridge works under construction include steel and concrete bridges, over Middle Harbour at the Spit, Sydney (length 745 feet), over George's River at Liverpool (length 912 feet), over the Clyde River at Bateman's Bay (length 1,008 feet), over the Tuross River at Bodalla (length 630 feet), over the Cockfighters Creek at Warkworth (length 637 feet) and over the Hunter River at Denman (length 683 feet).

(b) *Receipts and Payments.* The funds of the Department of Main Roads are derived principally from taxation of motor vehicles, contributions by the Commonwealth Government under the Commonwealth Aid Roads Acts (see Chapter XXI.—Public Finance, for some particulars of the basis and distribution of grants under these Acts and para. 1 of this section for particulars of the amounts allocated in recent years), contributions by municipal and shire councils, and special (not statutory) assistance by the State Government by way of loan moneys or special grants from revenue funds. Receipts and payments for the four years 1951-52 to 1954-55 compared with the income and expenditure for 1938-39 are shown below.

(a) Income and expenditure. (b) Includes £100,000 repayment to Treasury of funds specially provided by the State Government in earlier years from Consolidated Revenue. (c) Excludes plant and motor vehicles. (d) Includes purchase and operation of Departments' Plant and Vehicles not included elsewhere.

NOTE.—Minus sign (—) indicates excess of receipts over payments.

The figures shown above represent the aggregate receipts and payments of three funds—the County of Cumberland Main Roads Fund, the Country Main Roads Fund and the Developmental Roads Fund.

The total expenditure on roads, streets and bridges in the State by all authorities during the years 1938-39 and 1950-51 to 1954-55 was, respectively, £8,891,000, £14,822,000, £19,960,000, £22,560,000, £26,829,000, and £29,498,000. These figures are approximate and they include expenditure on construction, maintenance and direct administration, but not on debt charges. Expenditure on the Sydney Harbour Bridge is not included.

(c) *Sydney Harbour Bridge.* The Sydney Harbour Bridge was opened for traffic on 19th March, 1932. The main span is 1,650 feet and the clearance for shipping 170 feet from high water level. The deck, 160 feet wide, carries a roadway, two railway tracks and two tramway tracks, and there is also a footway on each side. The capital cost of the bridge to the 30th June, 1955, was £9,578,006, but this amount will be reduced slightly on completion of the disposal of the remaining surplus resumed property. The portion met from repayable loan funds, over £7,900,000, is repayable from toll income. The accumulated balance of the Bridge Account at 30th June, 1956, showed a surplus of £23,278, after the transfer of sums totalling £1,775,000 to a reserve account. Annual income, after a decline to less than £300,000 during the 1939-45 War, has risen from about £400,000 in 1938-39 to over £950,000 in 1955-56, expenditure over the same period has remained relatively stable, varying between £424,000 and £560,000. In 1955-56, income included road tolls £764,716, railway passenger tolls £146,577, and tram and omnibus passenger tolls £25,965. Expenditure amounted to £560,656, including interest, exchange, etc., £251,933, sinking fund, £59,832 and maintenance and improvement £163,461. During 1955-56, 25,785,000 rail travellers, 23,680,000 tram and omnibus travellers, and 35,201,000 road travellers in 20,535,000 road vehicles crossed the bridge, contributing respectively, 16 per cent., 3 per cent., and 81 per cent. of the total toll revenue.

3. Victoria—(i) *General.* With the object of improving the main roads of the State the Country Roads Board was established by legislation passed in 1912. The principal duties of the Board are to determine the main roads, State highways, tourists' roads, etc., to inquire into the State's resources in road materials and the most effective methods of road construction and maintenance, and to recommend deviations in existing roads or the construction of new roads in order to facilitate communication or to improve the conditions of traffic.

(ii) *Length of Roads.* (a) *Declared Roads.* The total length of declared roads in Victoria at 30th June, 1954, the latest date for which details are available, was 14,430 miles, classified as follows:—State highways, 3,849 miles; main roads, 9,791 miles; tourist roads, 414 miles; forest roads, 376 miles. The total length of the surface treated (black) or higher type of pavements included in the foregoing totals was 7,630 miles or 52.8 per cent.

(b) *Composition of Roads.* It is estimated that, in addition to the 14,430 miles of classified roads as above, there were approximately 85,500 miles of unclassified roads at 30th June, 1954. The latest detailed estimate of the length of roads and streets in Victoria (as at 30th September, 1954) provides the following information:—Wood or stone, 61 miles; portland cement concrete, 135 miles; asphaltic concrete and sheet asphalt, 233 miles; tar or bitumen surface seal, 12,197 miles; water-bound macadam, gravel, sand and hard loam pavements, 31,766 miles; formed only, 25,040 miles; not formed, 30,531 miles; total, 99,963 miles.

(iii) *Country Roads Board. (a) General.* During 1954–55, 1,267 miles of declared roads under the Board's control were treated with bitumen. In addition, 186 miles of undeclared roads, for which the Board contributed funds, were similarly treated. Work for other authorities carried out by the Board's plant amounted to 189 miles. The total length of bitumen treatment carried out in 1954–55 was 1,642 miles. Of the work on the roads under the Board's control, 519 miles related to State highways.

During 1954–55, 196 bridge projects with a total value of £1,502,347 were initiated. Of these new projects, 48 with a total value of £1,112,347 were supervised by the Board and 148 with a total value of £390,000, were supervised by municipalities.

(b) *Receipts and Payments.* The funds of the Country Roads Board are derived principally from motor registration fees, two thirds of all money received by way of owners' certificates, one half of drivers' licence fees, fines, payments by the Commonwealth Government under the Commonwealth Aid Roads Acts and repayments by municipalities. In addition, loans have been authorized from time to time under the Country Roads Acts for permanent works on main and developmental roads, State highways, tourists' and forest roads, while the State Government has provided, free of repayment, loan moneys for restoration of flood and bush fire damage. During the year ended 30th June, 1955, loan receipts and payments each amounted to £1,102,309, and expenditure included £146,309 for restoration of flood and bush fire damage. The total loan expenditure to 30th June, 1955, was £11,494,545. This figure does not include loan expenditure from the Developmental Roads Loan Account, which fund was created for the purpose of constructing and maintaining subsidiary or developmental roads. Loan money raised on this account was exhausted at 30th June, 1937, the total expenditure at that date being £6,425,758.

Total receipts and payments during each of the years 1938–39 and 1951–52 to 1954–55 are shown below:—

(a) Figures for 1938-39 are not directly comparable with those of succeeding years owing to a change in the method of compilation adopted by the Country Roads Board. (b) Prior to 1st July, 1949 drivers' licence fees were paid into Consolidated Revenue Fund. From that date until 31st December, 1950 the fees were credited to the funds of the Country Roads Board. Since then one half of the fees has been credited to the funds of the Country Roads Board while the remaining half has been credited to the Municipalities Assistance Fund. (c) Excludes portion of Commonwealth Aid Roads Acts advances drawn by the Public Works Department for expenditure on wharfs, jetties, etc. (d) Includes £54,662 expenditure on unemployment relief works

(iv) *Level Crossings.* In 1954-55, the Level Crossings Fund was created under the Country Roads and Level Crossings Funds' Act 1954 to finance (a) the elimination of level crossings or the provision of alternative routes to enable road traffic to avoid level crossings, (b) the provision of lights, signs, and lighting at and to improve approaches to level crossings and (c) generally, to reduce danger at level crossings. A third of all moneys received by way of owners' certificates is paid into the Fund as well as payments under other Acts for similar purposes. In 1954-55, the Fund received £226,469 from collections in respect of additional registration fees and £250,000 from Surplus Revenue. Expenditure from the Fund amounted to £60,995 comprising £20,863 incurred by the Railways Department and £40,132 incurred by the Country Roads Board.

4. *Queensland*—(i) *General.* Under the Main Roads Act 1920, a Main Roads Board was constituted, consisting of three members appointed by the Governor-in-Council. In 1925, the Board was abolished and its powers conferred upon a single Commissioner. The Main Roads Commission was constituted a Department under the name of the Department of Main Roads in February, 1951, with the Commissioner of Main Roads as its permanent head. The duties of the Commissioner are to carry out surveys and investigations necessary to determine State highways, main, developmental, secondary, mining access, farmers' and tourist roads and tourist tracks, and the responsibility for building and maintaining these declared roads is largely that of the Commissioner. Roads of purely local importance are constructed and maintained by local authorities. In many cases, construction is financed by the State Government by means of Treasury loans. Other roads are built by the Public Estate Improvement Branch of the Lands Department in order to open up areas of previously inaccessible or undeveloped country.

(ii) *Length of Roads.* (a) *Declared Roads.* The total length of declared roads in Queensland at 30th June, 1955, was 21,039 miles, comprising State highways, 7,778 miles; main roads, 11,186 miles; developmental roads, 241 miles; secondary roads, 648 miles; mining access roads, 574 miles; farmers' roads, 312 miles; tourist roads, 298 miles; tourist tracks, 2 miles. The length of roads improved in Queensland from the date of commencement of work under the Main Roads Acts 1920-1952 to 30th June, 1955, was 12,655 miles (60 per cent.). At that date also, 1,118 miles of new road construction and 695 miles of stage construction work were proceeding.

(b) *Composition of Roads.* The total length of roads and streets in Queensland at 30th June, 1955, was:—Concrete, 102 miles; bitumen, 6,142 miles; macadam, 14,461 miles; other formed, 41,517 miles; unconstructed, 61,949 miles; total, 124,171 miles.

(iii) *Department of Main Roads. (a) General.* During 1954-55, the Department completed 1,020 miles of roads including new construction and stage construction. Bridges of all types to a length of 4,763 linear feet were constructed, bringing the total constructed by the Department at 30th June, 1955, to 177,461 feet. In addition, at 30th June, 1955, 7,383 feet were under construction.

(b) *Receipts and Payments.* The funds of the Department of Main Roads are obtained chiefly from motor vehicle registration and collections, fees, etc., under the Transport Acts, contributions under the Commonwealth Aid Roads Acts and loans, grants and advances from the State Government. The total receipts and payments, including amounts for defence works, during each of the years 1938-39 and 1951-52 to 1954-55 are shown below :—

5. *South Australia.—(i) General.* The Highways and Local Government Department is administered by the Commissioner of Highways, who is empowered, subject to the approval of the Minister of Roads to undertake the construction, maintenance, and protection of the main highways of the State. In addition the Commissioner—

(a) allocates grants to councils for roadworks and supervises the expenditure.

(b) assists Councils to purchase road-making plant and to defray the cost of roadworks.

(c) advises Councils on any question concerning the construction, maintenance or repair of road-works.

(ii) *Source of Funds.* Funds of the Department are derived mainly from—

(a) *State Government.* The Highways Fund, into which are paid the proceeds from motor vehicle registrations and drivers' licences (less cost of collection), appropriations from loan funds repayments of advances made to Councils and contributions by the Municipal Tramways Trust.

(b) *Commonwealth Government.* Contributions under the Commonwealth Aid Roads Acts.

(iii) *Length of Roads.* In South Australia, there are only two classifications of roads. These are Main Roads, proclaimed under the provisions of the Highways Act and all other roads, commonly designated District Roads. At 30th June, 1956, there were 8,188 miles of proclaimed Main Roads and 44,743 miles of District Roads, totalling 52,931 miles. Of these, 24,969 miles are unformed and carry little or no traffic and a further 8,859 miles, which have been formed only are open to traffic during most of the year. Of the remainder, there are 13,598 miles of road constructed with gravel or crushed rock and 5,505 miles of a higher standard constructed with either bitumen or concrete.

(iv) *State Highways and Local Government Department.* (a) *General.* The Department's metropolitan road widening scheme has been in operation for approximately nine years. During the year ended 30th June, 1956, an additional 24,300 lineal feet of frontages were purchased and the total length acquired to that date is equivalent to 40.6 miles of road frontages. In rural areas, increases in the volume of traffic have necessitated widening of roads and improving alignments.

(b) *Receipts and Payments.* The following table shows particulars of receipts and payments, during the years 1938-39 and 1951-52 to 1954-55, of funds controlled by the Highways and Local Government Department.

Total	1,374,108	3,938,119	3,804,310	5,027,688	6,146,833

(a) Figures for 1938-39 are not completely comparable with those for following years. (b) Includes special contribution of £620,000 from Consolidated Revenue for roads for war service land settlement and developmental roads. (c) Roads, plant, etc. (d) Interest and sinking fund payments. (e) Not separately available ; included elsewhere.

The total expenditure, both revenue and loan, by State and local governments on roads, streets and bridges in South Australia during the years 1938-39 and 1951-52 to 1954-55 was, respectively, £1,966,000, £4,596,000, £4,667,000, £6,131,000 and £7,539,000.

6. *Western Australia.*—(i) *General.* Under the Main Roads Act 1930-39, the Main Roads Board previously existing was abolished and a Commissioner of Main Roads was

appointed. His duties relate to the determination of main roads after consideration of the funds available and the services to be rendered by the roads, the declaration and provision of developmental roads, the construction and maintenance of main roads, and the carrying out of surveys, investigations and experiments connected with roads and road materials. The Act authorizes two trust accounts (Main Roads Trust Account and Main Roads Contribution Trust Account) to record the moneys prescribed as available to the Commissioner for expenditure associated with roads, etc. In addition, the Commissioner operates on those Trust Accounts which are used for funds made available under the Commonwealth Aid Roads Acts.

(ii) *Length of Roads and Streets.* The total known lengths of roads and streets in existence in the various municipalities at 31st October, 1955, and in road districts at 30th June, 1955, were as follows :—Bituminous, 5,316 miles ; gravel water-bound, 14,287 miles ; other constructed surfaces, 1,211 miles ; formed only, 36,098 miles ; unprepared, 27,992 miles (incomplete) ; total, 84,904 miles.

The lengths of declared roads at 30th June, 1955, were :—Main roads, 3,178 miles ; important secondary roads, 7,232 miles ; developmental roads, 12,051 miles ; total, 22,461 miles.

(iii) *Main Roads Department.* During the year 1954-55, the activities of the Department included :—clearing, 1,437 miles ; forming, 1,557 miles ; gravelling, 1,027 miles ; reconditioning, 3,881 miles ; stabilizing, 225 miles ; side drains, 70 miles. In addition, lengths of tar and bitumen work performed aggregated 810 miles. Bridges constructed numbered 17. Two major bridges, one of timber over the Murray River at Pinjarra and the other of concrete over the Canning River at Riverton, and the Perth Causeway project were completed during the year. Detailed surveys were made for the projected bridge across the Swan River at the Narrows, Perth, as well as a comprehensive set of borings to determine the nature of the foundations at the site. Preliminary reclamation of the adjacent area by dredging was undertaken. Construction of the Wyndham-Ord River-Nicholson Road was continued during 1954-55. The first installation of traffic control lights within the Perth city block was made during the year.

(iv) *Receipts and Payments—Combined Road Funds.* The following table shows the combined transactions of the Main Roads Trust Account, the Main Roads Contributions Trust Account, the Metropolitan Traffic Trust Account, and the Commonwealth Aid Roads and Works Trust Accounts during the years ended 30th June, 1939 and 1952 to 1955.

7. Tasmania.—(i) *General*. Under the Road Construction (Transfer of Functions) Act 1951, which came into operation on 1st July, 1951, the control of the construction and maintenance of roads and certain road making plant was vested in the Minister for Lands and Works. Works authorized by the Minister in respect of roads classified as State highways, tourists' and developmental roads are constructed by the Department of Public Works and financed from the State Highways Trust Fund into which are paid the proceeds from Commonwealth Aid Roads grants, motor vehicle registration fees and taxes, licensing fees for drivers and public transport and other moneys made available by the Parliament. In addition, provision was made under the Road Construction (Transfer of Functions) Act for certain works authorized by the Transport Commission to be carried out and constructed by the Department. The expenditure by the Public Works Department during 1954–55 on the construction of roads, tracks and bridges amounted to £2,697,855 of which £1,784,265 was charged to road funds, £38,939 to revenue, £722,672 to loan and £151,979 to other funds. Except in special cases, municipal councils bear the cost of maintaining country roads and a proportion of the cost of main and secondary roads.

(ii) *Length of Roads*. (a) *Classified Roads*. The mileages of classified roads in Tasmania at 30th June, 1955 were as follows:—State highways, 1,161 miles; main roads, 651 miles; secondary roads, 186 miles; tourist roads, 45 miles; developmental roads, 50 miles; subsidized roads, 92 miles; total 2,185 miles. Country roads totalled more than 10,000 miles. The mileages of sealed roads, and their proportions to the respective totals, were:—State highways, 582 miles (49 per cent.); main roads, 216 miles (33 per cent.); secondary and other roads, 18 miles (10 per cent.); total, 816 miles (37 per cent. of all classified roads, and 6 per cent. of all roads, in Tasmania).

(b) *Composition of Roads*. The length of all roads in Tasmania, including those with surfaces of lower grade, at 30th June, 1955, was as follows:—Bituminous, 1,128 miles; concrete, 10 miles; granite, limestone, etc., water-bound, 8,596 miles; surfaces of lower grade, 2,940 miles; total, 12,674 miles.

(iii) *Receipts and Payments—Combined Road Funds*. The table hereunder shows particulars of the receipts and payments of the combined Road Funds for the years 1939–40 and 1951–52 to 1954–55:—

NOTE.—Minus sign (–) indicates an excess of credits.

8. **Summary of Roads used for General Traffic.**—(i) *Proclaimed or Declared Roads.* The table hereunder is a summary of the roads proclaimed or declared under the Acts of the several States relative to the operations of the central road authorities, and shows the lengths of various classes proclaimed or declared as at 30th June, 1955. These proclaimed or declared roads are those for which the central road authority assumes responsibility under the Act for the whole, or a proportion, of the cost of construction and/or maintenance, the extent varying from State to State and with the class and locality of the roads. Before proclamation of a main road, consideration is given, in general, to the following points :— availability of funds ; whether the road is, or will be, within one of several classes of main trunk routes ; whether the district is, or will be, sufficiently served by railways. Provision is also made in some States for the declaration of roads other than main roads. The absence of a particular class in any State does not necessarily imply that there are no roads within that State that might be so classified ; the classes are restricted only to roads proclaimed or declared under the Acts. A further point to make is that, through various causes, e.g., insufficiency of funds, man-power or materials, etc., construction or maintenance may not keep pace with gazettals of mileages, and therefore the condition of a road may not match its status.

PROCLAIMED OR DECLARED ROADS : LENGTHS, 30th JUNE, 1955.

(a) As at 30th June, 1954. (b) As at 30th June, 1956. (c) Forest roads. (d) Includes mining access roads, 574 miles; farmers' roads, 312 miles; tourist tracks, 2 miles. (e) Subsidized roads.

(ii) *Composition of Roads.* The following table represents an attempt to classify all the roads used for general traffic in Australia, at the latest dates available, according to States and Territories and to certain broad composition groups. The results are not entirely satisfactory, (i) because it is doubtful whether the whole of Australia is covered. (ii) because the dates of reference differ, and (iii) because the figures constituting each group are not wholly comparable for the States and Territories. It is hoped, however, that despite these defects, the table will provide an approximate and general idea of the main types of roads in Australia.

The data in the table for the States are obtained from the State Government Statisticians, and are derived mainly from local government sources. Unincorporated areas in some States are probably excluded and the figures on the returns supplied by the local government authorities are in some cases of doubtful accuracy. Details of the composition of roads, as far as they are available, vary to such an extent that it is considered preferable to show here only major divisions.

Groups 1-4 as shown in the table include, respectively, the following types of composition :—

1. *Wood or Stone.* Wood blocks ; stone paved.
2. *Concrete.* Cement concrete ; asphaltic concrete ; bituminous concrete ; sheet asphalt on concrete base.
3. *Bituminous.* Tar or bituminous macadam ; tar and bituminous surface seal ; surfaced water-bound macadam or gravel ; bituminous or cement penetration.

4. *Macadam and Other.* Water-bound macadam ; granite, limestone, and blast-furnace slag, water-bound ; water-bound gravel ; gravel or crushed rock ; metallated (gravel or rubble) ; gravel, sand and hard loam pavements.

Groups 5 and 6 include roads so-called mainly because they are used for general traffic, irrespective of their surfaces, prepared or otherwise.

It will be noticed that some of the terms used above are practically synonymous. Such terms are, of course, not used by any one State, but are the classifications adopted by different States.

For details of any particular State, see the respective paragraphs in the preceding pages.

(a) Municipalities, 31st October and Road Districts, 30th June.

It will be seen from the foregoing table that only about one third of the road lengths of Australia have actually been constructed, the remainder, for the greater part, being in little more than the natural state. The percentages for each group are as follows :—Group 1, 0.01 ; group 2, 0.33 ; group 3, 7.62 ; group 4, 25.01 ; groups 5 and 6, 67.03. The percentage of constructed lengths to total length in each State is as follows :—New South Wales, 42 ; Victoria, 44 ; Queensland, 17 ; South Australia, 37 ; Western Australia, 25 ; Tasmania, 77 ; Northern Territory, 12 ; Australian Capital Territory, 61. Comparisons between the States should be made with caution, however, because, in addition to the defects enumerated at the beginning of this section, factors such as the area, physiography, density and distribution of population, nature of economic activity, other facilities for transport, etc., in each State must be taken into account.

9. *Summary of Expenditure on Roads and Bridges.*—(i) *General.* In most States there are three classes of authorities—the State Government, the central road authority, and the numerous local government bodies. Most of these authorities may expend money either directly on road construction or indirectly by means of grants and miscellaneous payments to other authorities. Insufficient information is given in the accounts of many authorities to permit the exclusion of these indirect payments which would, if included in the aggregate, duplicate the expenditure. In addition, a number of authorities are not able to supply separate information concerning their expenditure on roads. For these reasons it has not been possible, up to the present, to compile statistics of the aggregate expenditure on roads.

The two paragraphs following therefore represent only : (a) aggregate expenditure from the various State road funds referred to in the foregoing pages, and (b) loan fund expenditure by State Governments. Expenditure by local government bodies is not included. Paragraph 8., Finances, of § 2. Local Government Authorities, contains some particulars of local government revenue and expenditure on roads, streets and bridges (see pp. 660 and 663).

(ii) *Aggregate Expenditure from State Road Funds.* The following table shows expenditure on the construction and maintenance of roads, including payments to local government bodies, by each State during the years 1938–39 and 1950–51 to 1954–55, as summarized from the foregoing tables dealing with the receipts and payments of the various State road authorities. Expenditure on plant and materials, not charged to construction

and maintenance of roads and bridges and expenditure on debt charges and payments to State consolidated revenues are not included. In some instances, expenditure on works other than roads and bridges is included. Because of differing accounting methods, figures are not completely comparable as between States, nor, in some States, as from year to year.

ROADS AND BRIDGES : AGGREGATE EXPENDITURE FROM ROAD FUNDS.
(£'000.)

Year ended 30th June—	N.S.W.(a)	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Total.
1939.. ..	3,358	2,569	2,557	1,374	1,138	(b) 319	11,315
1951.. ..	6,416	6,184	4,908	2,334	2,746	1,442	24,030
1952.. ..	9,006	6,576	7,379	3,267	3,564	1,550	31,342
1953.. ..	9,357	6,472	5,979	3,404	4,390	1,683	31,285
1954.. ..	11,972	7,237	6,235	4,708	3,661	2,096	35,909
1955.. ..	12,938	9,131	8,975	5,256	4,130	2,752	43,182

(a) Excludes Sydney Harbour Bridge.

(b) Year 1939-40.

The foregoing particulars do not represent the total expenditure on roads and bridges in each State. To obtain this information, additions must be made on account of (a) State Government expenditure from revenue and loan through Departments or authorities other than the central road authority and (b) local government expenditure from revenue and loan, while, on the other hand, allowances must be made for grants and miscellaneous payments to other authorities (*see* (i) above).

(iii) *State Net Loan Expenditure.* In recent years, expenditure from State loan funds on roads and bridges has not been large, and it would appear, also, that a considerable proportion passes through the funds of the central road authorities and is therefore included in the figures of their financial operations in the foregoing sections. Gross loan expenditure by all State Governments during 1954-55 amounted to over £2,000,000, while net expenditure was about £350,000 less. Aggregate net loan expenditure on roads and bridges in each State to 30th June, 1955, amounted to the following approximate sums :—New South Wales, £22,000,000; Victoria, £19,000,000; Queensland, £11,000,000; South Australia, £5,000,000; Western Australia, £3,000,000; Tasmania, £9,000,000; total, £69,000,000.

§ 5. Water Supply, Sewerage and Drainage.

NOTE.—*See also* Chapter IX.—Water Conservation and Irrigation.

1. *New South Wales.*—(i) *General.* The two largest domestic water supply and sewerage systems are controlled by statutory boards each consisting of a president and a vice-president appointed by the State Government and five members elected by local councils. These are (a) the Metropolitan Water, Sewerage and Drainage Board, which administers the systems in the County of Cumberland, i.e., in Sydney and in the surrounding districts, and, in addition, has jurisdiction over territory extending along the South Coast beyond Wollongong to Lake Illawarra, and (b) the Hunter District Water Board, serving the Newcastle area. At Broken Hill, a similar board includes a representative of the mining companies. Other systems, apart from irrigation projects and water storage systems administered by the State Government, are controlled by county, municipal or shire councils.

(ii) *Water Supply—to 30th June, 1955.* (a) *Metropolitan.* The storage reservoirs of the metropolitan system, with a combined available capacity of 124,959 million gallons, drain catchment areas of 376 square miles (Upper Nepean, 347 square miles and Woronora, 29 square miles). Water is drawn also from the Warragamba River, with a catchment of 3,383 square miles. This system is being developed, and building has commenced on a dam to have an overall height of 415 feet (greatest depth of water 340 feet) having a storage capacity of 460,000 million gallons and giving a net safe draught estimated at 263 million gallons per day in addition to 11 million gallons per day for riparian purposes. The existing temporary storage is supplied by a weir 50 feet high with a maximum storage of 579 million gallons. At 30th June, 1955, there were 110 service reservoirs in use with a

combined capacity of 546.5 million gallons. Rating for water for 1954-55 was 10d. in the £1 of assessed annual value and the charge for water measured by meters 1s. 9d. per 1,000 gallons.

(b) *Newcastle*. The water supply is drawn from two sources (1) the Chichester Reservoir, with a storage capacity of about 5,000 million gallons and draining a catchment of 76 square miles, and (2) the Tomago Sandbeds, which extend northerly along the coast towards Port Stephens. Service reservoirs and tanks distributed throughout the Water Supply District have a total storage capacity of 111 million gallons. Water rating for 1954-55 was 1s. 8d. in the £1 on assessed annual value for occupied properties and 1s. 5d. in the £1 for unoccupied properties. The price of water to domestic and industrial consumers is 2s. per 1,000 gallons.

(c) *Water Supplied, etc.* The following tables show, for the Sydney and Newcastle systems, the number of properties, the estimated population supplied, and other details for the years 1938-39 and 1950-51 to 1954-55 :—

WATER SUPPLY, SYDNEY(a) : SERVICES.

1954-55 ..	73,770	295,080	25.1	9,179	341	85.2	1,322

(iii) *Sewerage and Drainage—to 30th June, 1955.* (a) *Metropolitan.* Sydney and suburbs are served by 3 major sewerage systems and 5 minor systems consisting of 6 outfalls discharging direct into the Pacific Ocean and 2 treatment works. A further treatment works is in course of construction near Kurnell and is designed to serve the whole of the Cronulla Peninsula. In addition, 4 centres outside the metropolitan area (Camden, Campbelltown, Liverpool and Wollongong) are served by local treatment works.

Stormwater drainage channels under the control of the Metropolitan Water, Sewerage and Drainage Board at 30th June, 1955 were 175 miles long. Sewerage rating for 1954-55 was 9½d. in the £1 of assessed annual value and drainage rating ¾d. in the £1.

(b) *Newcastle.* The main sewerage system of the Newcastle area discharges into the Pacific Ocean at Merewether Gulf. In some of the outlying districts, treatment works have been installed.

Sewerage rates for 1954-55 were 1s. 3d. in the £1 of assessed annual value of occupied lands and 1s. 0d. in the £1 for unoccupied lands and drainage rates (on certain areas served) 2d. in the £1.

(c) *Particulars of Services.* The following table gives, for the Metropolitan system, details of sewerage services and stormwater drains as at 30th June, 1939 and 1951 to 1955.

SEWERAGE AND DRAINAGE, METROPOLITAN(a) : SERVICES.

At 30th June—				Improved Properties for which Sewerage Available.	Estimated Population Served.	Lengths of Sewers.	Length of Stormwater Channels.
						Miles.	Miles.

1955	334,280	1,390,000	3,252	175

(a) Includes part of South Coast.

At 30th June, 1955, 49,093 premises had been connected to the Hunter District Water Board's sewerage system (Newcastle area). The total length of sewers under the Board's control was 640 miles, and the length of drains was 49 miles.

(iv) *Finances, Sydney and Newcastle Systems.* The following table shows the debt, revenue and expenditure of the Metropolitan Water, Sewerage and Drainage Board and the Hunter District Water Board for each of the services of water supply, sewerage and drainage during 1954-55 and for the three services combined during the years 1938-39 and 1953-54.

1938-39	4,574,880	385,732	167,620	188,185	20,886	376,691	+ 9,041

(a) Includes provision for renewals, long service leave, loss on exchange, etc. (b) Includes part of South Coast. (c) Excludes non-interest bearing capital in respect of stormwater drains transferred from Public Works Department—£2,199,223 at 30th June, 1955.

(v) *Country Water Supply and Sewerage Systems.* At 31st December, 1953, country water supply services were conducted or under construction by 63 municipalities, 61 shires and 4 county councils, and country sewerage services by 57 municipalities and 19 shires. The capital indebtedness of these schemes was £15,119,792 at 31st December 1953, namely, £10,752,997 for water and £4,366,795 for sewerage. Debt of the municipalities amounted to £8,550,016, shires to £3,383,377 and county councils to £3,186,399. Government advances amounting to £443,497 are included in these figures. Aggregate income and expenditure amounted to £2,606,184 and £2,003,011, respectively, in 1953.

(vi) *Other Water Supply and Sewerage Systems.* The water supply and sewerage services for Broken Hill are operated by a statutory board, the Broken Hill Water Board. Its capital indebtedness at 31st December, 1954 was £2,914,417. In 1954, income (excluding subsidies, State Government £106,946 and Mining Companies £315,546) amounted to £172,201 and expenditure (excluding debt redemption £125,242) amounted to £463,835.

The following country water supply systems—South-West Tablelands, Junee and Fish River—are administered by the Department of Public Works. These supply water in bulk to municipalities and shires, the Railways Department, and other large consumers; only a small quantity is sold directly to private consumers. The capital indebtedness of these systems was £3,575,074 at 31st December, 1955.

There are also the Mulwala Water Supply and Sewerage Service constructed as an urgent war-time work for the Commonwealth, and the Bethungra Water Supply System administered by the Department of Public Works in conjunction with the Junee supply.

2. *Victoria.*—(i) *Melbourne and Metropolitan Board of Works.* (a) *General.* The Board was established by Act of Parliament on 20th December, 1890. Since August, 1955, the Board has consisted of a Chairman and 50 Commissioners elected to represent the municipalities which lie wholly or partly within the metropolitan area. The Chairman is elected by the Commissioners for a four-year term. The principal functions of the Board until 1954 were to control and manage the metropolitan water supply system; to provide the metropolitan area with an efficient main and general sewerage; to deal with main drains and main drainage works; and to control and manage the rivers, creeks and watercourses within the metropolitan area. The Board has carried out since December, 1954, the additional functions of a permanent planning authority and in June, 1956, it became the authority directly responsible for metropolitan main highways, bridges, parks and foreshores.

(b) *Water Supply.* There are five storage reservoirs serving the metropolitan area—Yan Yean, 7,234 million gallons (available for consumption, 6,649 million gallons); Toorourrong, 60 million gallons; Maroondah, 6,289 million gallons (4,870 million gallons); O'Shannassy, 930 million gallons; Silvan, 8,853 million gallons (8,823 million gallons); total, 23,366 million gallons (21,332 million gallons). Service reservoirs number 25, with a total capacity of 257 million gallons. Two major projects are under construction. One is an 18 mile conduit to carry water from the Silvan Reservoir to the existing Mt. Waverley service reservoir and to a new service reservoir which is to be built south of Glen Waverley and which when completed will be capable of supplying an additional 110 million gallons a day. The other project, which was approved by the Board in 1946, consists of a dam, 293 feet high, which will impound 45,800 million gallons of water, on the River Yarra, immediately upstream from the confluence of the Yarra and Doctors Creek, and work on the project is proceeding. This work is estimated to cost £12,628,000.

The water rate levied by the Board in 1954–55 was 8d. in the £1 on the net annual value of the properties served. The charge for water consumed in excess of the quantity which at 1s. per 1,000 gallons would equal the water rates payable on each property was 1s. 6d. per 1,000 gallons. The following table shows particulars of Melbourne metropolitan water supply services for the years 1938–39 and 1950–51 to 1954–55.

WATER SUPPLY, MELBOURNE : SERVICES.

Year.	Number of Houses Supplied.	Estimated Population Supplied.	Average Daily Consumption.	Total Consumption for the Year.	Average Daily Consumption.		Length of Aqueducts, etc., Mains and Reticulation.	Number of Meters.

The metropolitan sewerage system consists of the Main system (serving an area of 70,382 acres) and three subsidiary systems—the Sunshine system (serving an area of 1,022 acres), the Kew system (serving an area of 186 acres) and the South-eastern system (serving an area of 2,523 acres in Cheltenham, Parkdale, Mentone and Mordialloc). The Metropolitan Sewage Farm, 26,855 acres in extent and situated about 24 miles south-west of Melbourne beyond the township of Werribee, serves to purify and dispose of approximately 95 per cent. of the sewage flow of the metropolis before its discharge into Port Phillip Bay. The total capital cost (less depreciation) of the Farm to 30th June, 1955 was £2,812,749. Revenue during 1954-55 amounted to £106,873, cost of sewage disposal to £163,672, trading expenses to £101,758, interest to £111,365, and net cost of sewerage purification to £269,922. These financial particulars are included in the sewerage items of the summary below.

(d) *Finances.* The following table provides a summary, for the year 1954-55 of the financial operations of the three services conducted by the Melbourne and Metropolitan Board of Works.

MELBOURNE AND METROPOLITAN BOARD OF WORKS : FINANCES, 1954-55.
(£.)

Service, etc.	Capital cost of Works and Buildings at 30th June. (a)	Revenue.	Expenditure.				Surplus (+) or Deficit (-).

1954-55	57,747,795	5,091,108	2,744,555	2,211,592	123,977	5,080,124	+ 10,984

(ii) *Geelong Waterworks and Sewerage Trust.* (a) *General.* The Geelong Waterworks and Sewerage Trust was constituted in 1908 and reconstituted under the Geelong Waterworks and Sewerage Act in 1910. It was further reconstituted in September, 1950, to include a Government nominee (Chairman) and provision was made for a commissioner to be elected by the ratepayers of the Shire of Corio, making a total of seven commissioners instead of five as formerly. The amount of loan money which may be raised is limited to £6,500,000 for water supply undertakings, £1,250,000 for sewerage undertakings, and £270,000 for sewerage installation to properties under the deferred payment system. The population supplied is estimated by the Trust at 82,000. This and other general information relates to 30th June, 1955.

(b) *Water Supply.* The catchment area is about 32,000 acres. There are five storage reservoirs and nine service basins whose total storage capacity is 4,386 million gallons. The length of water mains and reticulation is 412 miles. In addition, the State Rivers and Water Supply Commission has made available a supplementary supply of a minimum quantity of 545 million gallons of water per annum from the Bellarine Peninsula System. The total expenditure on water supply to 30th June, 1955 was £1,682,830. Expenditure for 1954-55 comprised £91,631 for working expenses and £83,332 for interest, redemption and reserves, while revenue amounted to £180,631. The sinking fund appropriations at June, 1955, amounted to £151,224. The replacement and contingencies reserve amounted to £226,459. There is a water rate of 1s. 5d. in the £1 (with minima of 5s. for vacant land and £1 for tenements) on the net annual value of ratable properties.

(c) *Sewerage Works.* The sewerage scheme consists of a main outfall sewer to the ocean at Black Rock, about 9 miles from Geelong, and 193 miles of main and reticulation sewers. The sewerage area is 10,559 acres, and the number of buildings within the sewered areas is 16,620; of which 16,602 have been connected. The total expenditure to 30th June, 1955, was £1,063,353 on sewerage works and £261,947, of which £2,631 was outstanding, on the cost of sewerage installation under deferred payment conditions. The revenue in 1954-55 amounted to £115,913 and the expenditure comprised £44,055 on working expenses and £59,757 on interest, redemption and reserves. Sinking fund appropriations at June,

1955, were £129,116. Replacement and contingencies reserve amounted to £215,768. A general rate of 1s. 4d. in the £1 is levied on the net annual value of ratable properties.

(iii) *The Ballarat Water Commission and the Ballarat Sewerage Authority.* (a) *General.* The Ballarat Water Commission was constituted on 1st July, 1880, and the Ballarat Sewerage Authority on 30th November, 1920. The members of the Water Commission constitute the Sewerage Authority. The Commissioners number eight, three (one of whom is chairman) being appointed by the Government, four being elected by the Council of the City of Ballaarat and one being elected by the Councils of the Borough of Sebastopol and the Shires of Ballarat, Bungaree, Buninyong and Grenville. General and financial information given herein relates to the year ended 31st December, 1955.

(b) *Water Supply.* The Water Supply District embraces an area of about 65 square miles, containing a population of about 50,000. The total storage capacity of the seven reservoirs is 5,563 million gallons and the catchment area is 18,695 acres.

The capital cost of construction of the waterworks was £2,087,565 to 31st December, 1955. The liabilities amounted to £1,132,147 at 31st December, 1955 including loans due to the Government totalling £1,082,608. The revenue for the year 1955 was £119,709. Working expenses during 1955 amounted to £57,660 and interest and other charges to £57,917. A rate of 1s. 1d. in the £1 is levied on the net annual value of all ratable properties, with a minimum of £1 per annum for land on which there is a building or water supply.

(c) *Sewerage.* The Ballarat sewerage district embraces the City of Ballaarat and parts of the Shires of Ballarat and Bungaree and the Borough of Sebastopol. Work was commenced in 1922 and up to 31st December, 1955 the Authority had constructed a disposals works, a nightsoil depot, an ejector station and more than 100 miles of sewers. The capital cost of sewerage construction works to 31st December, 1955 was £704,852. The method of sewage disposal is by sedimentation, oxidation and sludge digestion. One hundred and forty-six sewered areas had been declared as at 31st December, 1955. Assessments in the sewerage district numbered 15,372, while those in sewered areas numbered 12,278. There were 10,371 buildings connected.

The scheme is financed by debenture-issue loans from various financial institutions, The liabilities on account of loans secured for construction at 31st December, 1955, amounted to £569,547; redemption payments at that date totalled £217,027. An expenditure of £157,122 was incurred for house connexions, the whole of which has been redeemed. Revenue during 1955 amounted to £71,853 and expenditure, which included £33,629 on interest and redemption, was £72,103.

A sewerage rate of 1s. 4d. in the £1 is levied, with a minimum charge of £2 4s., on the net annual value of any ratable sewered property on which there is a building and £1 on any ratable sewered property on which there is no building.

(iv) *Other Sewerage Authorities.* At 30th June, 1955, 60 sewerage authorities had been constituted under the provisions of the Sewerage Districts Acts in districts outside the areas under the control of the Melbourne and Metropolitan Board of Works and the Geelong Waterworks and Sewerage Trust, and systems were in operation in 30 districts (including five partly operating) serving a population of 268,800 persons.

The operations of the other 30 districts constituted at this date had either been suspended or not commenced.

(v) *Water Supply in Country Towns and Districts.* Most of the country waterworks are controlled by the State Rivers and Water Supply Commission, but in some instances the control is by waterworks trusts or by municipal corporations.

The waterworks controlled by the State Rivers and Water Supply Commission at 30th June, 1955, included 38 large reservoirs and 240 subsidiary reservoirs and service basins with a total storage capacity of 1,309,237 million gallons (4,808,950 acre feet). Length of channels was 15,117 miles (irrigation, 4,949 miles, domestic and stock 8,064 miles, drainage and flood protection, 2,104 miles) and of pipe lines 1,242 miles. The quantity of water delivered to water users during 1954-55 was 1,070,433 acre feet. The Commission administered 65 rural districts during 1954-55 (29 irrigation districts, 31 waterworks districts, 4 flood protection districts and 1 drainage district), and the reticulated pipe supplies for domestic and industrial purposes in 130 urban districts. In addition, 127 urban districts were administered by waterworks trusts and 16 by local governing bodies. The population served in these groups of urban districts numbered, respectively, 194,530, 356,470 and 103,810 persons. The table below is a summary of the Commission's finances for operations in districts under its control for the years 1938-39 and 1950-51 to 1954-55.

STATE RIVERS AND WATER SUPPLY COMMISSION, VICTORIA : FINANCES.(a)
(£.)

Year.	Total Loan Capital Expenditure to 30th June.	Receipts.	Payments.				Total.
			Operating Expenses.	Interest on Capital Allotted.	Depreciation.	Debt Redemption.

1954-55 ..	73,456,588	2,532,946	2,781,621	95,335	120,475	2,465	2,999,896

(a) Excludes waterworks and river improvement trusts and local governing bodies under the general supervision of the Commission.

The total loan capital expenditure of waterworks and river improvement trusts and local governing bodies to 30th June, 1955, was £9,767,389, making a grand total of £83,223,977 when added to the figure for works under the control of the Commission. The net loan capital after redemption payments of £2,305,836 was £80,918,141.

The financial operations of the State Rivers and Water Supply Commission form part of the Consolidated Revenue Fund, but are included in this section for convenience. The major proportion of the interest payable is borne by the State and is additional to that shown above. The net expenditure borne by the State during 1954-55 was £3,002,178.

3. Queensland.—(i) *Brisbane City Council—to 30th June, 1955. (a) General.* This organization conducts the water supply and sewerage systems of the City of Brisbane. Prior to 1928, water and sewerage activities had been controlled by the Metropolitan Water and Sewerage Board, but were then absorbed by the Brisbane City Council, which also supplies, in bulk, the whole of the water used by the City of Ipswich and the Town of Redcliffe.

(b) *Water Supply.* Water storage facilities comprise the following (available capacities are shown in parentheses):—Somerset Reservoir, 200,000 million gallons (55,000 million gallons); Lake Manchester, 5,806 million gallons (5,725 million gallons); Brisbane River, 543 million gallons (484 million gallons); Pure Water Reservoir, Holt's Hill, 8.3 million gallons (8.3 million gallons); Enoggera Reservoir, 1,000 million gallons (600 million gallons); Gold Creek Reservoir, 407 million gallons (400 million gallons). There are fifteen service reservoirs with a capacity of approximately 41 million gallons. The Somerset reservoir is under the control of Stanley River Works Board and is a dual purpose project with a designed total holding capacity of 200,000 million gallons, 55,000 million gallons to be for water storage and 145,000 million gallons for flood mitigation. Water rating at 30th June, 1955 was 3½d. in the £1 of unimproved capital value for improved properties, and 2d. in the £1 for vacant lands, with a minimum charge of £3 10s. and £2 6s. 8d. respectively. The following table is a summary of operations of the complete Brisbane City Council system (metropolitan area, Ipswich and Redcliffe) for the years 1938-39 and 1950-51 to 1954-55:—

WATER SUPPLY, BRISBANE(a) : SERVICES.

Year.	Services Connected.	Estimated Population Supplied.	Average Daily Consumption.	Total Consumption for the Year.	Average Daily Consumption.		Length of Trunk and Reticulation Mains.	Number of Meters.
					Per Service.	Per Head of Estimated Population.		
1938-39 ..	81,389	345,903	Mill. gals. 15.9	Mill. gals. 5,791	Gallons. 195	Gallons. 45.9	Miles. 1,169	(b)
1950-51 ..	117,904	464,000	27.9	10,193	237	60.8	1,642	52,691
1951-52 ..	124,992	483,000	32.4	11,860	259	66.2	1,696	52,496
1952-53 ..	131,895	501,000	31.5	11,486	239	61.0	1,760	52,360
1953-54 ..	139,172	520,000	33.9	12,379	244	62.3	1,817	51,976
1954-55 ..	144,459	530,000	34.1	12,458	236	64.3	1,870	51,138

(a) Includes Ipswich and Redcliffe.

(b) Not available.

(c) *Sewerage.* The sewage treatment works are situated at Luggage Point at the entrance to the Brisbane River. An activated sludge system of treatment was originally planned but, since the commencement of pumping operations, a sedimentation plant only has been used. Sewerage rating at 30th June, 1955 was 2½d. in the £1 of unimproved capital value for improved properties, and 2d. in the £1 for vacant lands, with a minimum charge of £3 15s. and £3 5s. respectively. The following table is a summary of operations of the Brisbane sewerage scheme for the years 1938-39 and 1950-51 to 1954-55 :—

SEWERAGE, BRISBANE : SERVICES.

Year.					Premises Connected.	Estimated Population Served.	Total Sewage Pumped for the Year.	Length of Main, Branch, Reticulation etc., Sewers.
							Mill. Galls. (a)	Miles.
1938-39	33,200	150,000		484
1950-51	44,700	176,000	5,351	608
1951-52	46,300	179,000	4,663	615
1952-53	47,500	182,000	4,791	630

(ii) *Country Towns.* (a) *Water Supply.* In addition to the City of Brisbane, there were, at 30th June, 1954, 118 cities and towns in Queensland provided with water supply systems controlled by municipal and shire councils.

(b) *Sewerage Systems.* At 30th June, 1954, there were 13 cities and towns outside the metropolitan area—Bundaberg, Charleville, Cunnamulla, Goondiwindi, Hughenden, Ipswich, Mackay, Maryborough, Quilpie, Rockhampton, Toowoomba, Townsville and Warwick—with sewerage systems. Sewerage systems were in course of construction at Mt. Isa, Dalby, Barcardine and Longreach.

(c) *Finances.* The receipts (other than loan) of water undertakings controlled by the cities and towns referred to above amounted to £1,750,102 in 1953-54. Expenditure amounted to £1,688,672, including £364,248 for debt charges. In addition, loan expenditure amounted to £1,105,034.

Finances of sewerage undertakings are incorporated in council general funds and are not available separately.

4. **South Australia.**—(i) *General.* The water supply and sewerage systems in this State were constructed and are maintained by the Engineering and Water Supply Department under the control of the Minister of Works. The works controlled comprise the Adelaide, Barossa, Baroota Creek, Beetaloo, Bundaleer, Tod River, Warren and other country water districts systems, the Morgan-Whyalla water supply system, the Adelaide metropolitan sewerage system, the Murray River Weirs water conservation, and the Metropolitan Flood Waters Scheme. In 1954-55, construction commenced on the Salisbury-Elizabeth Sewerage Scheme.

(ii) *South Australian Waterworks.* (a) *Services.* The table hereunder shows particulars of the area, capacity, etc. of combined metropolitan and country waterworks for the years 1938-39 and 1951-52 to 1955-56 :—

(iii) *Adelaide Waterworks.* At 30th June, 1956, the Adelaide waterworks supplied a district of 144,711 acres. The capacity of its five reservoirs was 14,469 million gallons and there were 1,920 miles of mains.

The Mannum-Adelaide pipeline conveys water from the River Murray to Angas Creek and supplements the Metropolitan and Warren system areas and serves country areas en route. Another major project, the construction of a large reservoir on the South Para River, is still under construction but is nearing completion. This reservoir will provide additional storage to serve the lower northern areas of the State and will make some additional provision for the metropolitan area. The capacity of the new reservoir will be about 10,000 million gallons.

Particulars of finances for the years 1938-39 and 1951-52 to 1955-56 are shown below :—

ADELAIDE WATERWORKS : FINANCES.

(£.)

Year.	Invested Capital to 30th June.	Revenue.	Expenditure.			Surplus (+) or Deficit (-).
			Working Expenses.	Interest and Debt Redemption.	Total.	
1938-39	4,676,110	446,459	111,347	202,279	313,626	+ 132,833

(iv) *Adelaide Metropolitan Sewerage.* The Adelaide metropolitan sewerage system, comprising the Adelaide, Glenelg and Port Adelaide areas, with drainage areas of 104 square miles in all, includes a sewage farm, and treatment works at Glenelg and Port Adelaide. The total quantity of sewage pumped by the various stations was 5,903 million gallons during 1955-56. Other particulars for 1938-39 and 1951-52 to 1955-56 are shown hereunder :—

ADELAIDE METROPOLITAN SEWERAGE : SUMMARY.

(v) *Country Water Supply.* Water district systems outside Adelaide at 30th June, 1956 comprised an area of 11,962,084 acres, and the capacity of the reservoirs was 9,545 million gallons. These figures exclude the Morgan-Whyalla supply system, which obtains its water from the River Murray. The storage tanks of this system had a capacity of 44 million gallons.

The Uley-Wanilla sub-artesian basin has been utilized to augment the Tod River District supplies. Pumping began in 1947. In 1955-56, nine bores were in operation and 372 million gallons were pumped from the basin to meet the needs of Port Lincoln. At 30th June, 1956, £5,099,202 had been invested in the Tod River District.

Construction work is proceeding on the scheme to reticulate water to Yorke Peninsula. The section of the new 20 inch to 26 inch steel main between Bundaleer Reservoir and Bute is in service.

The following table gives financial information on country waterworks for 1938-39 and 1951-52 to 1955-56 :—

COUNTRY WATERWORKS, SOUTH AUSTRALIA : FINANCES.(a)

1955-56..	21,066,810	861,564	1,128,294	681,348	1,809,642	948,078

(a) Excludes Morgan-Whyalla system.

(vi) *Morgan-Whyalla Water Supply Scheme.* This scheme, which involved the laying of 223 miles of main, was officially opened on 31st March, 1944, the capital invested to 30th June, 1956, being £2,585,869. Particulars of this scheme, where applicable, are included in the tables of the combined waterworks in (ii) above. During 1955-56, the water used from the system between Hanson and Whyalla amounted to 1,553 million gallons. Revenue for the year 1955-56 was £182,398, working expenses, etc., £178,248, interest charges, £83,734 and deficit, £79,584. Corresponding figures for 1954-55 were respectively, £173,880, £155,195, £82,200 and £63,515.

5. **Western Australia.**—(i) *General.* The water supply and sewerage systems of Western Australia are principally under the management of Government Departments, and are divided into the following categories :—(a) Metropolitan Water Supply, Sewerage and Drainage, covering Perth, Fremantle, Claremont, Guildford, Midland Junction and Armadale District ; (b) Country Areas (previously Goldfields) Water Supply ; (c) Water Supply of other towns, etc. ; (d) Agricultural Water Supply ; and (e) Artesian and sub-artesian waters.

(ii) *Metropolitan Water Supply, Sewerage and Drainage.* (a) *General.* The sources of the metropolitan water supply are the Canning Dam, Churchman's Brook, Wongong Brook, Victoria Reservoir, Armadale Pipe Head Dam and Well, and certain bores. The largest reservoir, the Canning Dam, has a capacity of 20,550 million gallons, about 5,000 million gallons more than that of the Mundaring Reservoir to which it is linked by a pipeline.

The sewage treatment works of Perth and suburbs consist of primary sedimentation with separate sludge digestion and discharge of all effluent direct to the ocean. Fremantle treatment works consist of septic tanks with ocean outfall for effluent. There are three treatment works, situated at West Subiaco, Swanbourne and Fremantle.

(b) *Water Supply.* The following table shows particulars of water supply services for 1938-39 and 1950-51 to 1954-55.

METROPOLITAN WATER SUPPLY, WESTERN AUSTRALIA : SERVICES.

Year.	Number of Services.	Estimated Population Supplied.	Average Daily Consumption.	Total Consumption for Year.	Average Daily Consumption.		Length of Mains.	Number of Meters.
					Per Service.	Per Head of Estimated Population.		
1938-39 ..	61,467	248,248	Mill. gals. 14.1	Mill. gals. 5,147	Gallons. 229	Gallons. 56.8	Miles. 953	40,014
1950-51 ..	84,926	303,422	28.4	10,354	334	93.5	1,271	52,277
1951-52 ..	90,436	309,854	31.0	11,337	343	100.0	1,327	61,146
1952-53 ..	96,155	316,423	30.7	11,201	319	97.0	1,422	69,262
1953-54 ..	102,093	323,131	34.9	12,743	342	108.0	1,500	73,780
1954-55 ..	108,755	367,429	38.2	13,948	353	105.7	1,597	78,194

Water rating for 1954-55 was 1s. 9d. in the £1 on annual valuation.

(c) *Sewerage and Drainage.* Some particulars of the metropolitan sewerage and drainage services for 1938-39 and 1950-51 to 1954-55 are shown below:—

METROPOLITAN SEWERAGE AND DRAINAGE, WESTERN AUSTRALIA : SERVICES.

Year.	Houses Connected.	Estimated Population Served.	Sewage Pumped for the Year.(a)	Length of Sewers.	Length of Stormwater Drains.
			Mill. gals.	Miles.	Miles.
1938-39	36,652	162,457	1,030	444	31
1950-51	50,480	212,016	3,809	605	34
1951-52	52,171	224,000	3,080	626	34
1952-53	54,467	229,700	3,333	648	34

(iii) *Country Areas Water Supply (Previously Goldfields Water Supply)*. The source of supply for Kalgoorlie, Coolgardie and adjacent goldfields, as well as for the towns and districts on or near the pipeline, is the Mundaring Reservoir, whose capacity is 15,100 million gallons. This scheme is linked by pipeline with the Canning Dam.

Work is also proceeding on the comprehensively reticulated water scheme at a revised estimated cost of approximately £10,000,000 to serve an area of about 4,500,000 acres of farm lands and some 23 agricultural towns, including the principal towns on the Great Southern Railway. The supply to the Eastern Goldfields will be increased to permit expansion of the gold-mining industry, the already increased capacity of the Mundaring Reservoir being part of this scheme. It is also planned to increase the storage capacity of the Wellington Dam to 38,000 million gallons. The maximum amount of financial assistance to be provided by the Commonwealth Government is £4,000,000. Expenditure on this work to 30th June, 1955 totalled £3,216,951.

The following table shows details of the Country Areas Water Supply for 1938–39 and 1950–51 to 1954–55 :—

COUNTRY AREAS WATER SUPPLY(a), WESTERN AUSTRALIA : SUMMARY.

Year.	Number of Services.	Total Con-	Length of	Number of Meters.	Capital Cost.	Revenue.	Expendi- ture.(b)	Surplus
		sumption.	Water Mains.					(+) or Deficit (-).

1954-55 ..	18,034	2,536	1,850	16,045	9,417,014	445,650	1,000,756	- 555,106

(a) Previously Goldfields Water Supply.

(b) Includes interest and debt redemption.

(iv) *Water Supply of Other Towns, etc.* (a) *Controlled by Public Works Department*. During 1954–55, water supplied to other towns and districts, excluding minor water supplies amounted to 906 million gallons, including service to adjacent mines, 21 million gallons, and railways, 100 million gallons. There were in all 17,118 services connected.

(b) *Controlled by Commonwealth and State Government Railways*. Consumption for the year ended 30th June, 1955 was 261 million gallons. In addition, 370 million gallons were obtained from other sources, mainly the Country Areas Water Supply and the Metropolitan Water Supply.

(c) *Water Boards not Controlled by Government*. During 1954–55, approximately 435 million gallons of water were supplied to an estimated population of 18,152.

(v) *Agricultural Water Supply*. From 1st July, 1904 to 30th June, 1955, 585 tanks were built, 1,159 wells sunk, and 5,617 bores (including artesian) put down. Of the bores put down, 1,594 yield fresh or stock water.

(vi) *Artesian and Sub-artesian Waters*. Up to 30th June, 1955 the total number of bores put down in search of artesian or sub-artesian water (inclusive of operations by Defence Services) was 341, ranging in depth from 21 to 4,006 feet. Water (fresh or stock) was struck in 291 bores, 175 of which were artesian and 116 sub-artesian.

6. *Tasmania*.—(i) *Waterworks*. At the end of 1955–56, there were 64 municipal waterworks in Tasmania. The capacity of the reservoirs was 887 million gallons, the estimated population served was 227,000, the number of tenements served was 56,880. In addition, two regional schemes operated by the State Government were serving an estimated population of 18,000 in 4,428 tenements.

(ii) *Sewerage*. At the end of 1955–56, there were 11 municipal sewerage schemes in operation in Tasmania. They served an estimated population of 147,000 and the number of tenements served was 36,673.

§ 6. Harbour Boards and Trusts.

NOTE.—The number and net tonnage of all vessels which entered the major ports in each State during the years 1954–55 and 1955–56 are shown in Chapter XI.—Transport and Communication, A. §5. Shipping at Principal Ports. Particulars of oversea and interstate cargo discharged and shipped during 1955–56 are shown in A. §6 of the same chapter.

1. *New South Wales.*—(i) *Maritime Services Board of New South Wales.* (a) *General.* The Maritime Services Board of New South Wales is a corporate body of five Commissioners comprising three full-time members and two part-time members representing shipping and other interests. The Board was constituted on 1st February, 1936, under the Maritime Services Act 1935, to co-ordinate the port and navigation services of the State, which had previously been administered by the Sydney Harbour Trust and by the State Department of Navigation.

The Board exercises general control over intra-state shipping, including the survey and certification of vessels, the licensing of harbour craft, and the examination and issue of certificates to officers. It is responsible for the provision of pilotage services, lights, beacons, buoys and other port facilities, imposes and collects rates and charges on goods and vessels, and is vested with the general control and management of the navigable waters and ports within the State.

At the Port of Sydney, the Board is also responsible for the provision of adequate wharfage and channels, and carries out all construction, maintenance and dredging work. At other ports of New South Wales, such work is undertaken by the Department of Public Works.

(b) *Port of Sydney.* The entrance to Sydney Harbour, the principal port of New South Wales, is nearly a mile wide, and the depth of its navigable channel is not less than 80 feet. Between the entrance, known as "The Heads", and the Harbour proper, a distance of 4 miles, there are two separate channels, each 700 feet wide, the Western Channel not less than 42 feet deep (low water ordinary spring tides) and the Eastern Channel 41 feet deep. The foreshores, which have been reduced by reclamations, are 152 miles in length and the total area of the port is 13,600 acres, or 21 square miles, of which about one-half has a depth of 30 feet or more at low water ordinary spring tide. The mean range of tides is 3 feet 6 inches.

The wharves are situated in close proximity to the business centre of the city, about four or five miles from the Heads. At present, there are 6 dolphin berths each 550 feet long, and 122 effective commercial cargo berths with a total length of 49,948 feet controlled by the Board. Accommodation for harbour craft amounts to 4,835 feet while the length of other berths including oil and private wharves totals 25,463 feet. Depth of water at wharves is up to 40 feet. Special facilities for the storage and handling of staple products such as wheat, wool, etc., are provided and modern plant has been installed for replenishing ships' bunkers with oil or coal.

Docking facilities are available for the largest vessel afloat. The Captain Cook Graving Dock, opened in March, 1945, ranks amongst the largest graving docks in the world being 1,133 feet by 147 feet 7½ inches with a depth of 45 feet 2 inches over the sill at high water. There are also several smaller dry docks and floating docks in the port.

The following table shows particulars of the finances of the Board in respect of the Port of Sydney for 1938–39 and 1950–51 to 1954–55 :—

MARITIME SERVICES BOARD : FINANCES OF THE PORT OF SYDNEY.

1953–54	12,799,104	1,482,492	333,320	2,471,540	1,517,811	550,654	2,318,465	+ 153,075
1954–55	13,408,326	1,814,226	515,480	3,093,315	1,735,504	593,478	2,978,982	+ 114,333

(a) Excludes capital expenditure but includes transfers to the Renewals Fund Reserve Account : 1951–52, £200,000 ; 1953–54, £250,000 ; and 1954–55, £650,000.

Capital expenditure for each of the years 1938–39 and 1950–51 to 1954–55 was £28,576, £384,911, £495,443, £465,764, £468,010 and £583,558 respectively. Expenditure on renewals and replacements from the Renewals Fund Reserve Account was : 1950–51, £196,102 ; 1951–52, £291,454 ; 1952–53, £299,286 ; 1953–54, £317,493 and 1954–55, £306,542.

(c) *Port of Newcastle.* The Maritime Services Board of New South Wales is the port authority but other government bodies are responsible for certain functions and activities of a maritime character at Newcastle. These include—

- (i) The Department of Public Works, which is the constructing, dredging and maintenance authority at Newcastle as well as at other New South Wales ports except Sydney ;
- (ii) The Department of Railways, which is responsible for the control of wharfrage and shipping arrangements in connexion with the coal industry and the provision and maintenance of appliances necessary for the transport and shipment of coal.

An Advisory Committee consisting of eight members, appointed by the Governor, assists the Board in matters associated with the operation of the port. In regard to volume of trade, Newcastle ranks second in importance in New South Wales. It is primarily a coal-loading port, and the proximity to the coal fields has led to the establishment of important industries, including iron and steel works, in the district. Facilities are available for the shipment of wool, wheat and frozen meat, and a wharf is available for timber.

The area used by shipping is about 570 acres, excluding the entrance to the harbour and the inner basin, which together cover an area of 162 acres. The width of the harbour at the entrance is 1,200 feet, and the navigable channel, with a depth of 25 feet 6 inches at low water, is 350 feet wide. Wharfrage accommodation amounts to 16,100 feet, the Maritime Services Board controlling 6,500 feet and the Railways Department 7,000 feet while 2,600 feet is privately owned. There are also a number of dolphin berths available for tie-up purposes. A floating dock of 15,000 tons capacity is available at the port.

(d) *Port Kembla.* As from 3rd May, 1948, the Maritime Services Board assumed the administration and navigational control of Port Kembla, which had previously been administered by the New South Wales Department of Public Works. The Department, however, continues to be the constructing authority in respect of works, dredging and maintenance. An Advisory Committee consisting of eight members appointed by the Governor has been formed to assist the Board in the operation of the Port. In respect of volume of trade, Port Kembla ranks third in the ports of New South Wales. It has an area of approximately 330 acres, with depths ranging from 20 to 50 feet (low water ordinary spring tide), and wharfrage accommodation totalling 4,800 feet has been provided for large ocean-going vessels. No cargo sheds are available as the nature of trade at the port does not call for the provision of sheltered storage accommodation at the berths. It is the port of the southern coalfields and for the expanding industrial area in and about Wollongong. The developmental programme for Port Kembla includes the construction of an inner harbour to provide wharfrage for the steelworks in addition to general cargo berths.

(e) *Botany Bay.* The Maritime Services Board of New South Wales is the administrative and controlling authority. The port is primarily a discharging centre for the oil refinery at Kurnell and two berths are available as well as tanker mooring buoys. The entrance to the Bay is approximately $1\frac{1}{2}$ miles wide, with a minimum depth of about 36 feet.

(f) *Other Ports.* In addition to the ports of Sydney, Newcastle, Port Kembla and Botany Bay, the Board controls 28 outports along the coastline of 609 miles. The shipping trade of these outports is relatively small.

(ii) *Port Charges.* The port charges payable in respect of shipping and ships' cargoes in New South Wales are imposed by the Commonwealth Government in terms of the Light-houses Act and the Federal Navigation Act, and by the State authorities under the Navigation

Act of New South Wales, the Harbour and Tonnage Rates Act, and the Sydney Harbour Trust Act. Since 1st February, 1936, the State enactments have been administered by the Maritime Services Board. The gross collections by the State authorities amounted to £4,339,154 in 1954-55. These figures include the Port of Sydney revenue (*see table above*) and State navigation service collections (£1,245,839 in 1954-55). Commonwealth Government revenue from light dues and navigation receipts, for the whole of Australia, amounted to £249,775 in 1954-55.

2. Victoria.—(i) *Melbourne Harbour Trust. (a) General.* Information regarding the origin and constitution of this Trust, which controls the Port of Melbourne, appears in Official Year Book No. 12, p. 970 *et seq.* The membership of the Board of the Melbourne Harbor Trust Commissioners was increased to five during 1954 by the appointment of a further part-time Commissioner to represent waterside workers' interests. At 31st December, 1955, the sheds available for wharfage accommodation had a length of 21,766 feet, covering an area of 1,569,016 square feet. The area of water in the bay and River Yarra under the control of the Trust is approximately 5,327 acres and the total length of wharves, piers and jetties in the port is 62,703 feet, giving an area of over 58 acres of wharfage, and 58,161 feet of effective berthing space. During 1955, work was continued on the new berths at Appleton Dock (ultimately to have eighteen berths), Victoria Docks, South Wharf and Williamstown. The depth of water (low water ordinary spring tide) from the main channels to the principal wharves is about 31 to 34 feet, the maximum being about 40 feet.

(b) *Finances.* The following table shows particulars of the financial operations of the Trust during the years 1939 and 1951 to 1955.

MELBOURNE HARBOR TRUST : FINANCES.

(£.)

Year.	Gross Loan Indebtedness at 31st December.	Revenue.		Expenditure.				Surplus (+) or Deficit (-).
		Wharfage and Tonnage Rates.	Total.	Administration and Maintenance.	Interest, Debt Redemption, Exchange, etc.	Depreciation, Renewals and Insurance Account.	Total. (a)	
1939 ..	4,018,527	689,100	843,899	282,533	270,650	129,160	837,577	+ 6,322
1951 ..	5,883,857	1,493,423	2,129,432	1,036,842	235,881	175,263	1,768,105	+ 361,327
1952 ..	7,914,146	1,256,581	1,941,252	1,204,863	292,485	179,047	1,947,085	- 5,833
1953 ..	9,581,933	1,423,345	2,052,272	1,230,195	381,914	98,182	2,013,554	+ 38,718
1954 ..	9,641,361	1,800,811	2,593,347	1,232,574	418,818	479,393	2,509,947	+ 83,400
1955 ..	9,978,842	2,120,780	3,019,048	1,475,467	446,348	532,372	2,906,406	+ 112,642

(a) Includes statutory payments to Consolidated Revenue and Geelong Harbor Trust :—1939, £155,234 ; 1951, £320,119 ; 1952, £270,690 ; 1953, £303,263 ; 1954, £379,162 ; 1955, £452,219. Excludes capital expenditure :—1939, £128,567 ; 1951, £2,058,921 ; 1952, £2,246,097 ; 1953, £1,255,613 ; 1954, £1,255,625 ; 1955, £1,509,665.

(ii) *Geelong Harbor Trust.* The Geelong Harbor Trust which was constituted in 1905 was reconstituted in 1934 under the provisions of the Melbourne and Geelong Harbor Trusts Act 1934. The Trust is under the control of three Commissioners appointed by the Governor-in-Council. The port dredging programme was nearing completion at the end of 1955 and will provide a minimum depth of water throughout approaches and at all berths of 32 feet (mean low water spring tides).

Revenue for the year 1955 was £746,600, and revenue expenditure was £423,648. The value of the Trust's fixed assets less depreciation was £3,629,184 and £4,270,378 at 31st December, 1954 and 1955 respectively. Loans outstanding at the end of 1955 amounted to £2,993,097.

(iii) *Other Ports.* Apart from Melbourne and Geelong, Portland is the only Victorian port of other than minor importance.

3. Queensland.—(i) *General.* The ports of Queensland, except Brisbane and certain minor ports, are administered by Harbour Boards with members representing the towns and districts served by the ports. Brisbane and the minor ports are controlled by the State Treasury through the Department of Harbours and Marine, which supervises the engineering activities of the other ports.

(ii) *Brisbane.* Brisbane accommodates comfortably, in its dredged and improved river, the largest vessels in the Australian trade. The main centres for shipping, although further downstream than formerly, because of the increasing size of vessels, are still within easy access of the city. The maximum depths (low water ordinary spring tide) of the shipping channel decrease from 32 feet in the North-West channel to 20 feet in the Bulimba Reach to Victoria Bridge section. Depths at wharves vary between 23 and 33 feet. Adequate dry-docking facilities are available. The finances of Brisbane Harbour for the years 1938-39 and 1950-51 to 1954-55 are shown below :—

BRISBANE HARBOUR : FINANCES.
(£'000.)

Year.	Loan Indebtedness at 30th June.	Receipts.		Payments.	
		Harbour Dues.	Total.	Working Expenses.	Total (including Interest and Redemption).
1938-39	1,179	165	173	36	112
1950-51	1,572	221	253	237	329
1951-52	1,862	276	326	348	463
1952-53	2,168	318	393	426	558
1953-54	2,528	603	753	460	611
1954-55	2,633	685	853	456	693

In addition to Brisbane Harbour, the Department of Harbours and Marine also controls the Brisbane Dry Dock, the Cairncross Dock, the Brisbane River, and ten smaller harbours not administered by harbour boards.

(iii) *Harbour Boards.* Harbour boards control the ports of Bowen, Bundaberg, Cairns, Gladstone, Mackay, Rockhampton and Townsville. After 1st January 1953, the harbour boards adopted the financial year ended 30th June for accounting purposes instead of the calendar year as previously. Finances for each port for the year ended 30th June, 1955 are shown below, together with a summary for the years 1939 and 1950 to 1952 and for the period of eighteen months ended 30th June, 1954.

HARBOUR BOARDS, QUEENSLAND : FINANCES.
(£.)

Harbour Board.	Loan Indebtedness at 30th June. (a)	Revenue.		Expenditure (excluding Loan).		Surplus (+) or Deficit (-).
		Wharfage and Harbour Dues.	Total.	Working Expenses.	Total (including Interest and Redemption).	
Bowen	351,228	51,395	58,610	14,088	42,952	+ 15,658
Bundaberg	43,159	3,700	7,556	4,741	6,462	+ 1,094
Cairns	230,779	195,179	300,908	232,149	285,477	+ 15,431

.. 1939	1,548,144	249,510	401,439	139,752	343,083	+ 58,356

(a) Years 1939 and 1950 to 1952, 31st December.

(b) Eighteen months ended 30th June, 1954.

4. *South Australia.—The South Australian Harbors Board.* All South Australian harbours are controlled by the South Australian Harbors Board, which consists of three Commissioners appointed by the Governor for a period of five years and eligible for re-appointment. The Board is responsible to the Minister of Marine for the discharge of its duties and functions. The most important ports are the five deep sea ports of Port Adelaide, Port Pirie, Wallaroo, Port Lincoln and Thevenard. At several ports, the wharves or jetties are privately controlled, the principal of these being Whyalla (controlled by the Broken Hill Pty. Co. Ltd. under a Private Act of Parliament) and Ardrossan where the Broken Hill Pty. Co. Ltd. has installed a bulk loading plant for handling dolomite, grain and salt. Stenhouse Bay, Port Augusta and Rapid Bay comprise the other private ports with interstate or oversea trade. Maximum depths of water (low water ordinary spring tide) at the wharves of the main ports range from 20 to 24 feet at Port Pirie to 35 feet at Port Adelaide (Outer Harbour). The following table shows the finances of the Board for 1938–39 and 1951–52 to 1955–56:—

THE SOUTH AUSTRALIAN HARBORS BOARD : FINANCES.

(£.)

Year.	Capital at 30th June, (a)	Revenue.	Expenditure from Revenue.				Surplus(+) or Deficit(—).
			Working Expenses.	Interest.	Debt Redemption.	Total.	
1938–39 ..	8,026,441	664,915	205,848	326,719	50,000	582,567	+ 82,348
1951–52 ..	9,581,786	1,336,504	1,039,801	280,872	..	1,320,673	+ 15,831
1952–53 ..	10,047,582	1,240,679	1,083,322	286,456	..	1,369,778	– 129,099
1953–54 ..	10,782,702	1,382,276	1,280,709	312,333	..	1,593,042	– 210,766
1954–55 ..	11,604,213	1,842,796	1,315,349	352,005	..	1,667,354	+ 175,442
1955–56 ..	12,366,653	1,920,340	1,451,296	404,188	..	1,855,484	+ 64,856

(a) State Treasurer's Funds and Reserve employed.

5. *Western Australia.—(i) Fremantle Harbour Trust.* Fremantle Harbour is controlled by a board of five Commissioners appointed by the Governor-in-Council. Maximum depth of water (low water ordinary spring tide) at the entrance to the harbour is 36 feet, and at the wharves 33 feet. The length of wharf berth accommodation is 10,495 feet.

In January, 1955, the channels, which were dredged through Success and *Parmelia* Banks in the southern portion of the Fremantle Outer Harbour, were officially opened and berthage facilities became available to the oil refinery and steel rolling mill at Kwinana.

Gross earnings for the years 1954–55 and 1955–56 amounted to £2,214,454 and £2,056,141 respectively, working expenses to £1,772,386 and £1,838,650, interest £164,544 and £174,280, debt redemption £48,167 and £51,723 and renewals fund £2,000 in each year. There were also special loan repayments from revenue amounting to £236,708 and £155,848. The total amount debited to loan capital account at 30th June, 1955 was £4,357,010 and at 30th June, 1956, £4,655,975.

(ii) *Bunbury Harbour Board.* The Bunbury Harbour Board consists of five members appointed by the Government. The depth of water at the entrance to the harbour and at the wharf is 27 feet (low water ordinary spring tide). Berthage accommodation is 3,700 feet. Gross earnings in 1954–55 and 1955–56 were £28,722 and £33,955, respectively, working expenses £73,747 and £45,978, and interest was £29,084 in each year. The total amounts debited to loan capital account at 30th June, 1955 and 1956 were £1,402,320 and £1,458,788 respectively.

(iii) *Other Ports.* Only the ports of Fremantle, Bunbury and Albany in Western Australia are under the control of trusts, the remainder are Government operated. Of these, Yampi, Carnarvon, Geraldton and Onslow have the largest amount of shipping movement.

6. *Tasmania.*—There are eight marine boards and two harbour trusts in Tasmania. The marine boards control the ports of Hobart, Launceston, Stanley (Circular Head), Burnie and Wynyard (Table Cape), Devonport, Strahan, Currie (King Island) and White-mark (Flinders Island) and the harbour trusts those of Smithton and Leven. Aggregate receipts of revenue accounts of all these authorities during the year 1954–55 were £929,321,

and expenditures £822,221 including loan charges £137,460. The total receipts of the Hobart Marine Board during 1954–55 were £397,809, loan charges amounted to £32,869 and total expenditure to £406,724. Launceston Marine Board receipts during 1954–55 amounted to £243,141, loan charges to £22,716 and total expenditure to £187,881. Loan indebtedness of all marine boards and trusts at 30th June, 1955 was £2,391,112, of which £767,068 was in respect of Hobart and £267,351 in respect of Launceston.

Hobart, Launceston, Burnie and Devonport are the principal ports of Tasmania. In addition to their interstate and intra-state traffic, there is also considerable oversea shipping. Depths of water at wharves vary, in general between 16 and 34 feet (low water ordinary spring tide), but at Hobart there is a depth of water of from 30 to 52 feet.

§ 7. Fire Brigades.

1. *New South Wales.*—(i) *General.* A Board of Fire Commissioners, consisting of five members (one each representing the State Government, President; Insurance companies; local government authorities. volunteer firemen and permanent firemen) operates under the Fire Brigades Act 1909–1956, and 154 fire districts had been constituted at the end of 1955. Up to the end of 1949, the cost of maintenance of fire brigades was borne in proportions of one quarter, one quarter, and one half respectively by the Government, the municipalities, and the insurance companies concerned, the expenditure so regulated that the proportion payable by the councils in a fire district should not, except in special circumstances, exceed the amount obtainable from $\frac{1}{4}$ d. in the £1 rate on the unimproved capital value of rateable land in the fire district. In June, 1949, legislation was introduced (i) increasing the limit of the Board's borrowing power from £250,000 to £500,000, (ii) providing for the varying of the maximum rate that may be levied by councils and (iii) altering the basis of contributions so that from 1st January, 1950, local councils and the Government will each pay one-eighth and the insurance companies three-quarters.

Other legislation, introduced in September, 1949, to improve and modernize the law dealing with the prevention of bush fires and to build up the organization of the bush fire-fighting services, provided for the establishment of Fire Regions and a Bush Fire Fighting Fund to be financed from contributions by the Government, councils and insurance companies in the proportion of one-quarter, one-quarter and one-half, respectively. The contribution of any council shall not exceed one-twentieth of a penny in the £1 on the unimproved capital value of rateable land in the area of the council not being land within a fire district constituted under the Fire Brigades Act 1909–1956.

(ii) *Board of Fire Commissioners of New South Wales.* At 31st December, 1955, the authorized strength of the Fire Brigade throughout the fire districts of New South Wales was 360 officers and 868 permanent and 2,320 volunteer firemen. Corresponding figures for the Sydney Fire District were 299, 822 and 343. The revenue for the year 1955 was £1,850,599, made up as follows:—From the Government, £228,099, municipalities and shires, £228,099; fire insurance companies and firms, £1,368,594; and from other sources, £25,807. The disbursements for the year were £1,889,966.

2. *Victoria.*—(i) *General.* The Fire Brigades Act of 1928 provided for a Metropolitan Fire Brigades Board and a Country Fire Brigades Board each consisting of nine members. In December, 1944, the latter Board was superseded by the Country Fire Authority under an Act of that title, and the number of members was increased to ten. The number of members of the Metropolitan Fire Brigades Board was increased in December, 1954 from nine to ten to include an employees' representative.

(ii) *Metropolitan Fire Brigades Board.* Since 1st October, 1952, the Metropolitan Fire Brigades Board has received contributions from the municipalities and the insurance companies in the proportion of one-third and two-thirds respectively. Prior to 1st October, 1952, the Board received contributions in equal proportions from the Treasury, the municipalities and the insurance companies. On 30th June, 1955, the Board had under its control 44 stations, 684 permanent staff, 65 special service and clerical, etc., staff, and 15 part-time firemen. The total receipts for 1954–55 were £1,076,731 comprising contributions, £865,857, receipts for services, £113,709, and interest and sundries, £97,165. The expenditure was £1,060,540.

(iii) *Country Fire Authority.* This authority, constituted in 1944, is responsible for the prevention and suppression of fires in the "country area of Victoria", which embraces the whole of the State outside the metropolitan fire district, excluding State forests and certain crown lands. The country area has been divided into 24 fire control regions, three of which (Ballarat, Bendigo and Geelong) are wholly urban and the remainder mixed urban and rural. The Country Fire Authority has received contributions in the proportion of two-thirds from insurance companies and one-third from the Treasury as from 1st January, 1954. Prior to that date the Treasury contributed two-thirds while the insurance companies contributed one-third. At 30th June, 1955, the Act applied to 155 insurance companies, 198 urban and 1,010 rural fire brigades. The effective registered strength of the brigades was 93,788 members.

The receipts for the year 1954-55 amounted to £362,718. Total expenditure other than loan amounted to £356,741.

3. *Queensland.*—(i) *General.* The Acts of 1920-1931 made provision for the retention of existing fire districts, and for the constitution of new districts. For each district, there must be a Fire Brigades Board consisting of seven members, and the cost of maintenance of each brigade is proportioned as follows:—The Treasury two-sevenths, insurance companies three-sevenths, and local authorities two-sevenths. All volunteer fire brigades in a district must be registered.

(ii) *Fire Brigades Boards.* At 30th June, 1954, the latest year for which figures are available, there were 71 Fire Brigades Boards. The total number of stations was 121, and full-time staff numbered 466, including 15 administrative, 83 officers and 368 firemen. Workshop staff numbered 17. Part-time staff numbered 605, including 70 administrative, 99 officers and 436 firemen. Volunteers numbered 392. The total revenue for the year 1953-54 was £584,508 received mainly from the following sources—Government £156,114, local authorities £155,560, insurance companies £234,244 and loans (Government and other) £94,672. The total expenditure for the year was £555,439 the chief items being salaries and wages £406,161 and interest and redemption of loans £27,244.

4. *South Australia.*—The Fire Brigades Act 1936-1944 provides for a board of five members, and the expenses and maintenance of brigades are defrayed in the proportion of two-ninths by the Treasury (subject to certain limits when the contribution exceeds £10,000), five-ninths by insurance companies, and two-ninths by the municipalities concerned. At 30th June, 1955, there were altogether 35 fire brigade stations, of which 12 were metropolitan and 23 country.

The authorized strength of the permanent staff was 371, including 264 officers and men and 85 country auxiliary firemen. The total revenue for the year 1954-55 was £298,188 made up as follows:—insurance companies £179,627, Treasury £46,710, and municipalities £71,851. The Treasury contribution includes an additional grant of £34,704.

5. *Western Australia.*—In 1942, certain municipal and road board districts were constituted fire districts under the control of the Western Australian Fire Brigades Board. There were 31 fire districts at 30th September, 1955. The contribution to the Board is made in the proportion of two-ninths from the Government, two-ninths from local government authorities, and five-ninths from insurance companies. The number of local government authorities and insurance companies who contributed numbered 55 and 134 respectively. The brigades throughout the State controlled by the Western Australian Fire Brigades Board at 30th September, 1955 numbered 49, with a staff of 1,393 including 239 permanent officers and firemen and 1,125 volunteer brigade officers and firemen. The revenue for the year ended 30th September, 1955, was £306,350 and the expenditure £308,090.

Under the Bush Fires Act, a Bush Fires Board (appointed April 1955 and superseding the Rural Fires Prevention Advisory Committee) consisting of ten members, five of whom are nominated by the Road Board Association, was set up to advise the Minister for Lands on bush fire control. The Act also provides for the registration of bush fire control officers, who numbered 1,160 at 30th June, 1955 and the establishment of bush fire brigades, the number of which was 610 at 30th June, 1955.

6. *Tasmania.*—The Fire Brigades Act 1945 provided for the creation of the Fire Brigades Commission of Tasmania to co-ordinate the activities of existing fire brigades boards, while leaving the responsibility for individual control and management with the boards. The Commission consists of five members nominated or elected by the fire brigades boards and one member nominated by the Minister. Contributions towards the cost of operations are on the basis of one-third each from the Treasury, the municipalities, and the insurance companies concerned. The cost for the year 1954–55 amounted to £99,487. There were at 30th June, 1955, 23 brigades controlling 31 stations and their aggregate staffs numbered 422, including 77 permanent officers and 335 part-time firemen, including officers.

CHAPTER XX.

PRIVATE FINANCE.

A. CURRENCY.

§ 1. General.

The Australian monetary system is based on the British system, of which the unit is the pound (£) divided into 20 shillings (s.) each of 12 pence (d.). When the Australian currency was introduced in 1909 the Australian pound was specified as equivalent to 123.27447 grains of gold $\frac{11}{18}$ ths fine or 113.002 grains of fine gold and, until the depression in 1930, was identical with the pound sterling. There was a gradual depreciation of the Australian pound in terms of sterling from the beginning of 1930 until 3rd December, 1931, when it was stabilized at the rate of £125 Australian = £100 sterling. This relationship has been maintained until the present time. Following the depreciation, no action was taken to define the value of the Australian pound in terms of gold until 5th August, 1947, when the Australian Government advised the International Monetary Fund, in terms of the membership agreement, that the par value of the Australian pound was 2.86507 grammes (44.2148 grains) of fine gold. From 19th September, 1949 this was reduced to 1.99062 grammes (30.720 grains) of fine gold.

When the Commonwealth was established in 1901, the currency in Australia consisted of United Kingdom gold, silver and bronze coins, notes issued by the banks, and Queensland Treasury notes. Queensland Treasury notes were in circulation in Queensland only, having superseded bank notes in that State after the 1893 crisis. Under the Commonwealth Constitution, the control of currency, coinage and legal tender and the issue of paper money was vested in the Commonwealth. The Commonwealth assumed these powers by enacting the Coinage Act 1909 and the Australian Notes Act 1910.

Imperial gold coins of the specified weight and fineness and Australian notes are legal tender in Australia for any amount. Australian silver coins are legal tender for any amount not exceeding forty shillings and Australian bronze coins are legal tender for any amount not exceeding one shilling.

§ 2. Coinage.

1. **Coins in Circulation.**—Brief historical notes relating to the Australian Coinage are given in Official Year Book No. 37, pages 557 and 558. For weight, metal, composition, etc., of Australian coins in circulation see Official Year Book No. 39, page 697.

The silver coins issued prior to July, 1947, have a millesimal fineness of 925 (thirty-seven fortieths silver and three fortieths copper) and those issued since 1st July, 1947 (dated 1946 and later) have a millesimal fineness of 500 (one-half silver and one-half other metals).

From 1910 to 1916, Australian coins were minted in England by the Royal Mint, London, and the Mint, Birmingham Ltd., and in 1916 and 1917 by the Indian Mints. The minting of Australian coins was undertaken by the Australian Mints in 1916 and coins have been minted at the Melbourne branch of the Royal Mint from 1916 to the present time, at the Sydney branch from 1919 until that Mint closed in 1926 and at the Perth branch in 1922 and since 1940.

During the 1939–45 War, the two Australian mints were unable to meet the demand for Australian coins and some coins were minted in the United States of America and India. In 1951–52 and 1952–53, some coins were minted at the Royal Mint, London, to meet the heavy demand for coins. Details of Australian coins obtained from each mint to 30th June, 1956, are as follows :—Melbourne, £38,910,000 ; Perth, £1,285,000 ; Sydney, £488,000 ; United Kingdom Mints, £3,016,000 ; United States Mints, £6,000,000 ; Indian Mints, £169,000 ; Total, £49,868,000.

2. **Issues of Australian Coins.**—The net issues of Australian silver and bronze coin from 1910 to 30th June, 1956 were :—Crown (5s.), £276,000 ; Florin (2s.), £17,656,000 ; Shilling (1s.), £6,981,000 ; Sixpence (6d.), £4,588,000 ; Threepence (3d.), £5,221,000 ; Total silver coin, £34,669,000 ; Penny (1d.), £2,192,000 ; Half-penny (½d.), £692,000 ; Total bronze coin, £2,884,000. Except in the total no allowance has been made for £53,000 worth of damaged silver coin, for which denominations are not available, withdrawn since 1910.

3. **Profits on Coinage of Silver and Bronze.**—Australian silver and bronze coins are token coins and, as the face value of the coins is greater than the value of the bullion they contain, a profit is made from their issue. This profit forms part of the Commonwealth Consolidated Revenue. In the following table, details are given of the value of coins issued, the cost of bullion, the cost of minting and sundry expenses connected with the issue, and the profits made on the issue of coins during the years 1938–39 and 1951–52 to 1955–56.

1955–56	1,090,789	678,241	412,548	213,117	199,431

NOTE.—Minus sign (—) denotes a loss.

4. **Australian Mints.**—(i) *General.* Soon after the discovery of gold in Australia, a branch of the Royal Mint was established in Sydney. The formal opening took place on 14th May, 1855. The Melbourne branch was opened on 12th June, 1872, and the Perth Branch on 20th June, 1899. The States of New South Wales, Victoria and Western Australia provided an annual endowment in return for which the mint receipts were paid to the respective State Treasuries. Owing to losses incurred in its operations, the Sydney branch was closed at the end of 1926.

Since their establishment, the Australian branches of the Royal Mint have been primarily concerned with the refining of gold, minting of Imperial gold coins and the production of bars and ingots of gold bullion for export. The minting of Imperial gold coins was discontinued in September, 1931. In 1916, the Melbourne branch took over the minting of Australian silver and bronze coins from the Royal Mint, London. Australian coins were also minted at the Sydney Mint from 1919 to 1926 and at the Perth Mint in 1922 and from 1940 to the present time. The Melbourne branch has also minted token coins for the Territory of New Guinea and for New Zealand.

(ii) *Gold Receipts and Issues.* (a) *Receipts.* The receipts of gold at Australian mints during 1955 amounted to 984,369 fine ounces (Melbourne, 147,602 fine ounces ; Perth, 836,767 fine ounces).

(b) *Issues.* The Australian mints issue gold bullion for the use of local manufacturers (jewellers, dentists, etc.) and for export. Since September, 1931, when the United Kingdom departed from the gold standard, the minting and issue of gold coins by Australian mints has ceased. Australian exports of gold are mainly in the form of 400-oz. ingots, but in earlier years a considerable amount of gold was shipped to India in 10-oz. bars. Since early in the 1939-45 War, all gold has been acquired by the Commonwealth Bank and the export and use of gold has been subject to regulation by the Commonwealth Government. From December, 1951, export of a proportion of newly-mined gold for sale on premium markets overseas was permitted (see para. 5 below). The issues from Australian mints during 1955 amounted to 986,857 fine ounces (Melbourne, 149,381 fine ounces, Perth, 837,476 fine ounces).

5. *Price of Gold.*—The following table shows the average prices of gold and the average value of the sovereign in London and Australia for the years 1938-39 and 1951-52 to 1955-56. The average price of gold in Australia is based on the Commonwealth Bank's buying price for gold lodged with the mints.

PRICE OF GOLD : LONDON AND AUSTRALIA.

Period.	London.		Australia.		
	Average price per fine oz.	Average value of Sovereign.	Average price per fine oz.	Sovereign.	
				Average value.	Equivalent to a premium of—
	£stg. s. d.	£stg. s. d.	£A. s. d.	£A. s. d.	%
1938-39..	7 6 9	1 14 7	9 2 9	2 3 0	115.0
1951-52..	12 8 0	2 18 5	15 9 10	3 12 0	260.0
1952-53..	12 8 0	2 18 5	15 9 10	3 12 0	260.0
1953-54..	12 8 3	2 18 5	15 10 4	3 12 1	260.4
1954-55..	12 10 0	2 18 10	15 12 6	3 12 6	267.8
1955-56..	12 10 0	2 18 10	15 12 6	3 12 6	267.8

In December, 1951, arrangements were made whereby producers could sell a proportion of newly-mined gold for industrial purposes on oversea premium markets. Under the arrangements, gold is acquired by the Commonwealth Bank in the usual manner and sold, at the Bank's buying price, to an association representing gold producers participating in the scheme. The association pays the Bank's handling charges and the costs of preparation of the gold and makes arrangements for export and sale. The gold can be sold only against payment in United States dollars. Profits earned by the association after meeting administrative expenses are distributed to members in proportion to the quantity of gold delivered to the Commonwealth Bank. Until August, 1952, when permission was given for the export of fine gold, gold exported under this arrangement was not to exceed a fineness of 22 carats ($\frac{11}{12}$ ths.).

The average prices per fine ounce in Australian currency (f.o.b.) obtained for gold exported under this scheme for each of the months during 1955-56 for which there were sales were:—July, £15 13s. 1d.; August and September, £15 13s. 2d.; October, £15 12s. 11d.

§ 3. Notes.

1. *General.*—Brief historical notes relating to the circulation and issue of notes in Australia are given in Official Year Book No. 37, pages 561 and 562. The issue of notes intended for circulation as money other than by the Commonwealth Bank is prohibited.

2. *The Australian Note Issue.*—(i) *General.* Notes in circulation in Australia are issued by the Commonwealth Bank through the Note Issue Department. The Bank is authorized to issue Australian notes in denominations of 5s., 10s., £1, £5, £10 and any multiple of £10. The Commonwealth Bank is not required to hold a specific reserve in gold against the note issue, but the assets of the Note Issue Department must be held or invested in gold, on deposit with any bank, or in securities of the Government of the United Kingdom, the Commonwealth or a State. All profits of the Note Issue Department, with the exception of an amount not exceeding £500,000 each year which may be used as capital for the Commonwealth Trading Bank, or the special departments of the Commonwealth Bank, are paid to the Commonwealth Consolidated Revenue Fund.

Australian notes are legal tender to any amount within Australia and have been issued in denominations of 10s., £1, £5, £10, £20, £50, £100 and £1,000. Notes of denominations higher than £10, however, have not been issued to the public since 1945.

(ii) *Australian Notes in Circulation.* Particulars of the average values of notes in circulation for the years 1938-39 and 1951-52 to 1955-56 are given in the following table :—

AUSTRALIAN NOTE ISSUE.

(iii) *Commonwealth Bank—Note Issue Department.* The following statement shows particulars of liabilities and assets of the Note Issue Department of the Commonwealth Bank as at 30th June, 1955 and 1956.

NOTE ISSUE DEPARTMENT : LIABILITIES AND ASSETS, 30th JUNE.
(£'000.)

Liabilities.	1955.	1956.	Assets.	1955.	1956.
Notes on Issue(a) ..	362,753	371,969	Gold and Balances held abroad (including money at short call)	120,926	120,831
Special Reserve— Premium on gold sold	4,755	4,755	Government Securities (including Commonwealth Treasury Bills)	250,041	259,368
Other Liabilities(a) ..	3,531	3,525	Other Assets	72	50
Total Liabilities	371,039	380,249	Total Assets	371,039	380,249

(a) Notes of a denomination not exceeding one pound which have been on issue for more than twenty years, and notes of a denomination exceeding one pound which have been on issue for more than 40 years are not included in the item "Notes on Issue" but are included in the item "Other Liabilities".

In 1955-56, the net profits of the Note Issue Department amounted to £8,365,937 of which £7,865,937 was paid to the Commonwealth Treasury and £500,000 to the Capital Accounts of sections of the Commonwealth Bank and the Commonwealth Trading Bank as follows :—Mortgage Bank Department £143,000, Rural Credits Department £71,000, Industrial Finance Department £143,000, and the Commonwealth Trading Bank £143,000. For the basis of distribution of the net profits of the Note Issue Department, see page 708.

B. BANKING.

§ 1. Cheque-Paying Banks.

1. *Banking Legislation.*—(i) *Commonwealth Legislation.* Under Section 51 of the Commonwealth Constitution, the Commonwealth Parliament has power to legislate with respect to "Banking, other than State banking ; also State banking extending beyond the limits of the State concerned, the incorporation of banks, and the issue of paper money". The principal Commonwealth Acts at present in force relating to Banking are—

- (a) The Commonwealth Bank Act 1945-1953 which provides for the constitution and management of the Commonwealth Bank, Commonwealth Trading Bank and Commonwealth Savings Bank and the management of the Australian note issue ; and

- (b) The Banking Act 1945-1953, which provides for the regulation of banking and for the protection of the currency and the public credit of the Commonwealth.

The Banking Act 1945 was assented to on 3rd August, 1945, and came into operation on 21st August, 1945. It applies to all banks, except State banks, operating in Australia or Territories of the Commonwealth. The objects of the Act are :—(a) To provide a legal framework, uniform throughout Australia, for regulating the banking system ; (b) to safeguard depositors of the banks from loss ; (c) to provide for the co-ordination of banking policy under the direction of the Commonwealth Bank ; (d) to control the volume of credit in circulation and bank interest rates ; (e) to mobilize and to provide machinery for the control of the foreign exchange and gold resources of the Australian economy. A summary of the main provisions of the Act is given in Official Year Book No. 37, page 565.

The Banking Act 1953, assented to on 1st April, 1953, amended the Banking Act 1945. Details of the main amendments are given in Official Year Book No. 40, page 616.

(ii) *State Legislation.* State banking legislation relates to the incorporation of banks and the constitution and management of State banks. The Acts under which the various banks are incorporated differ. While some of the older banks were incorporated by special Act or Charter, e.g., the Bank of New South Wales by Act of Council 1817, The Bank of Adelaide by Act of the South Australian Parliament, and the Bank of New Zealand by Act of the General Assembly of New Zealand, most of the banks are incorporated under a Companies Act of the States or the United Kingdom. This is also the case with those banks which were reconstructed after the crisis of 1893. State banks, constituted under State Acts, transacting general banking business are The Rural Bank of New South Wales, the State Bank of South Australia and The Rural and Industries Bank of Western Australia.

2. **Royal Commission on Monetary and Banking Systems.**—A Royal Commission was appointed by the Commonwealth Government in November, 1935, to inquire into the monetary and banking systems in operation in Australia and to report whether any, and if so what, alterations were desirable in the interest of the people of Australia as a whole, and the manner in which any such alterations should be effected. The Commission presented its report on 15th July, 1937, and a summary of the recommendations appears in Official Year Book No. 31, page 1010.

3. **Presentation of Banking Statistics.**—Because of the different purposes they serve in the Australian financial system, Australian banks have been divided for statistical purposes into four groups and a separate series is presented for each. These groups are :—

- (a) *The Commonwealth Bank.* This is the Central Bank. It also provides special banking facilities through the Rural Credits, Mortgage Bank and Industrial Finance Departments. It transacted general banking business through a General Banking Division up to 3rd December, 1953, when that business was transferred to the Commonwealth Trading Bank of Australia. Statistics of the Central Banking Business (including the Note Issue Department), and Rural Credits, Mortgage Bank and Industrial Finance Departments are presented in separate series.
- (b) *The Commonwealth Trading Bank of Australia.* This bank commenced operations on 3rd December, 1953. On that date, under the provisions of the Commonwealth Bank Act, 1953, it took over the business of the General Banking Division of the Commonwealth Bank. The statistics presented in the Commonwealth Trading Bank series include averages for the General Banking Division of the Commonwealth Bank up to 3rd December, 1953.

- (c) *Private Trading Banks.* This group was formerly known as the Nine Trading Banks but the number of banks included has been reduced to seven by amalgamations. With the Commonwealth Trading Bank, these banks provide the major part of the general banking facilities in Australia. The banks included in this group are—the Bank of New South Wales, The Commercial Banking Company of Sydney Ltd., The National Bank of Australasia Ltd. (which has absorbed the Queensland National Bank Ltd., and The Ballarat Banking Co. Ltd.), The Commercial Bank of Australia Ltd., The Bank of Adelaide, the Australia and New Zealand Bank Ltd. (an amalgamation of The Bank of Australasia Ltd. and The Union Bank of Australia Ltd.), and The English, Scottish and Australian Bank Ltd.
- (d) *Other Banks.* This group consists of (i) three State Government Banks—The Rural Bank of New South Wales, the State Bank of South Australia and The Rural and Industries Bank of Western Australia, which, in their general banking business, specialize mainly in financing rural industries, (ii) one joint stock bank—The Brisbane Permanent Building and Banking Co. Ltd., which has specialized business in one district only, and (iii) branches of three oversea banks—the Bank of New Zealand, Comptoir National d'Escompte de Paris and the Bank of China, which transact limited business in Australia and are mainly concerned with financing trade, etc., between Australia and oversea countries.

In addition to the series mentioned above, a series for all cheque-paying banks is presented. This series covers the Commonwealth Trading Bank, the Private Trading Banks and the other cheque-paying banks included in the fourth group.

Unless otherwise stated, the statistics presented are averages of weekly returns. Averages of liabilities and assets are the averages of the liabilities and assets of the banks on the several weekly balance days during the period concerned. Averages of bank clearings and debits to customers' accounts are the averages of transactions for weeks ended on the balance days during the period.

4. **Banks Transacting Business in Australia.**—(i) *Number of Branches.* At 30th June, 1956, the 15 banks operating in Australia transacted all classes of banking business at 3,415 branches and 1,305 agencies. The Commonwealth Trading Bank and the Private Trading Banks have branches throughout the Commonwealth. The Rural Bank of New South Wales, the State Bank of South Australia and The Rural and Industries Bank of Western Australia, being State Government banks specializing mainly in financing rural industries, have branches only in their respective States. The Brisbane Permanent Building and Banking Co. Ltd., transacts business in Brisbane only. The remaining three banks are branches of oversea banks.

CHEQUE-PAYING BANKS : NUMBER OF BRANCHES^(a) AT 30th JUNE, 1956.

(a) For the Commonwealth Trading Bank, the amount shown in this column is the amount specified as capital in the Commonwealth Bank Act 1945-1953. This amount was appropriated out of Reserve Funds built up from profits of the Commonwealth Bank. For the State Bank of South Australia and The Rural and Industries Bank of Western Australia, the amounts shown in this column are capital funds provided by the respective State Governments. Capital of The Rural Bank of New South Wales consists of Inscribed Stock and Debentures issued by the Bank for capital purposes. (b) Includes dividends declared but not paid at date of balance-sheet. (c) For the Commonwealth Trading Bank and the State Banks, the amount shown in this column is total capital and reserves. (See footnote (a).) (d) Includes uncalled capital. (e) For the State Government Banks, the net profit is the profit after writing off bank premises and payment of interest on capital. For the other Banks, the net profit is the profit before writing off bank premises. (f) Dividends paid and payable out of profits earned during 1954-55. (g) These banks are in process of liquidation consequent upon the amalgamation of their business with The National Bank of Australasia Ltd.

5. Commonwealth Bank of Australia.—(i) *General.* An account of the progress and development of the Commonwealth Bank is given in earlier issues of the Official Year Book (see No. 37, pages 570 to 573). The general functions of the Bank are set out in section 8 of the Commonwealth Bank Act 1945-1953 which states—

“ 8. It shall be the duty of the Commonwealth Bank, within the limits of its powers, to pursue a monetary and banking policy directed to the greatest advantage of the people of Australia, and to exercise its powers under this Act and the Banking Act 1945 in such a manner as, in the opinion of the Bank, will best contribute to :—

(a) the stability of the currency of Australia ; (b) the maintenance of full employment in Australia ; and (c) the economic prosperity and welfare of the people of Australia.”

In addition to its functions as a Central Bank, the Bank controls the Australian note issue through a Note Issue Department and provides special services through the Rural Credits Department, Mortgage Bank Department and Industrial Finance Department. The Commonwealth Bank also provided general banking facilities through the General Banking Division up to 3rd December, 1953. In accordance with the provisions of the Commonwealth Bank Act, 1953, the Commonwealth Trading Bank, on that date, took over the business of the General Banking Division of the Commonwealth Bank. The Commonwealth Savings Bank, a separate institution providing for small depositors, is controlled by the Commonwealth Bank Board and is operated in conjunction with the Commonwealth Trading Bank.

(ii) *Management.* Under the Commonwealth Bank Act 1911, the Bank was managed by a Governor. From 1924 to August, 1945, it was controlled by a Board of Directors. Under the Commonwealth Bank Act 1945, control was vested in a Governor, assisted by an Advisory Council. Since 21st August, 1951, under the Commonwealth Bank Act 1951, the policy of the Commonwealth Bank and the Commonwealth Savings Bank has been determined by the Commonwealth Bank Board consisting of the Governor (Chairman), the Deputy Governor, the Secretary of the Department of the Treasury and seven other members appointed by the Governor-General. The Bank is managed by the Governor who acts in accordance with the policy of the Bank and with any directions of the Board. The Board is required to inform the Government of the monetary and banking policy of the Bank. In the event of a disagreement between the Government and the Board as to whether the monetary and banking policy of the Bank is directed to the greatest advantage of the people of Australia, the Governor-General, acting with the advice of the Executive Council, may determine the policy to be adopted by the Bank. The Commonwealth Trading Bank is managed by a General Manager under the Governor of the Commonwealth Bank and its policy is determined by the Commonwealth Bank Board.

(iii) *Central Banking Business.* Under the powers it possessed under the Commonwealth Bank Act 1911–1943, and under its war-time powers under the National Security Regulations, the Commonwealth Bank had gradually assumed the functions of a Central Bank. Part III. of the Commonwealth Bank Act 1945 formally constituted the Commonwealth Bank as a Central Bank and granted the Bank the necessary powers to carry on the business of a Central Bank. The capital for the Central Banking Business is £4,000,000 and such other sums as are transferred from the Reserve Fund. Since 1951, the profits of the Commonwealth Bank have been distributed as follows:—(a) One-half to the National Debt Sinking Fund; (b) for a period of five years, an amount not exceeding £500,000 per annum may be paid to the capital of the several departments of the Bank and the Commonwealth Trading Bank, this amount to be distributed as follows:—Commonwealth Trading Bank, Mortgage Bank Department, and Industrial Finance Department each two-sevenths and the Rural Credits Department one-seventh; and (c) the balance to be paid to the Commonwealth Bank Reserve Fund.

(iv) *Note Issue Department.* This Department was established in 1920 when the control of the Australian note issue was transferred from the Commonwealth Treasury to the Commonwealth Bank. The Bank may, through this department, issue, re-issue and cancel Australian notes. Until 30th June, 1951, all profits of this Department, with the exception of £2,000,000 paid to the Capital Account of the Rural Credits Department and £1,200,000 paid to the Capital Account of the Mortgage Bank Department, were paid to the Commonwealth Consolidated Revenue Fund. In 1951, provision was made for an amount, not exceeding £500,000 per annum for five years, to be paid to the Capital Accounts of the Commonwealth Trading Bank and the Rural Credits, Industrial Finance and Mortgage Bank Departments of the Commonwealth Bank. This amount is payable only if a similar amount is paid from the profits of the Central Banking Business and is to be distributed to the various sections in the same proportions as the amount payable from the profits of the Central Banking Business. The balance of the profits is to be paid to the Commonwealth Consolidated Revenue Fund.

(v) *General Banking Division.* Under the Commonwealth Bank Act 1911–1943, no provision was made for the separation of the general banking business of the bank from its central banking business. Under the Commonwealth Bank Act 1945, the General Banking Division was set up to carry on the general banking business of the Bank and the accounts and transactions of this division were kept separate and distinct from the other accounts of the Bank. The capital of the General Banking Division was £4,000,000, and

such other sums as were transferred from the General Banking Division Reserve Fund, or from the profits of the Central Banking Business and the Note Issue Department. Transfers from these two sources increased the total capital to £4,572,000 at 30th June, 1953. The profits of the General Banking Division were distributed as follows:—(a) one-half was credited to the General Banking Division Reserve Fund, and (b) one-half was paid to the National Debt Sinking Fund. Under the Commonwealth Bank Act 1953, the business of the General Banking Division was transferred to the Commonwealth Trading Bank on 3rd December, 1953. See also para. 6 below—Commonwealth Trading Bank of Australia.

(vi) *Rural Credits Department.* The Rural Credits Department was established in 1925 for the purpose of making short-term credit available for the orderly marketing of primary produce. The Bank may, through this department, make advances, upon the security of primary produce placed under the legal control of the Bank or other security associated with the production or marketing of primary produce, to co-operative associations or marketing boards formed under the laws of the Commonwealth or of a State or Territory of the Commonwealth or other bodies specified by proclamation. The period of the advance shall not be more than one year. The capital of the Rural Credits Department is £2,000,000 and such amounts as are transferred from the profits of the Central Banking Business and the Note Issue Department. Transfers from these two sources have increased the total capital to £2,714,000 at 30th June, 1956. Profits are distributed as follows:—(a) one-half is credited to the Rural Credits Department Reserve Fund, and (b) one-half is credited to the Rural Credits Department Development Fund for the promotion of primary production.

(vii) *Mortgage Bank Department.* The Mortgage Bank Department was established in 1943 for the purpose of making long-term loans to primary producers. Through this department, the Bank may make a loan to any person engaged in farming, agricultural, horticultural, pastoral or grazing operations or other form of primary production, upon the security of a mortgage to the Bank of an estate or interest in land in the Commonwealth owned by the borrower. The term of the loan shall not be less than five years nor more than forty-one years. The capital of the Department is £4,000,000 plus any amount transferred from the profits of the Central Banking Business and the Note Issue Department. Transfers from these two sources have increased the total capital to £5,428,000 at 30th June, 1956. Profits are credited to the Mortgage Bank Department Reserve Fund.

(viii) *Industrial Finance Department.* The functions of the Industrial Finance Department, established in January, 1946, are:—(a) to provide finance for the establishment and development of industrial undertakings; (b) to assist in the establishment and development of industrial undertakings; and (c) to provide advice on the operations of industrial undertakings with a view to promoting the efficient organization and conduct thereof. To exercise these functions the Bank may, through the Industrial Finance Department, lend money and purchase and sell shares or securities in an industrial undertaking. The capital of this department is £4,000,000 plus any amount transferred from the profits of the Central Banking Business and the Note Issue Department. Transfers from these two sources have increased the total capital to £5,429,000 at 30th June, 1956. The Treasurer, the Bank and the Savings Bank may advance money to the Industrial Finance Department. The amount that may be advanced by the Bank is limited to £1,000,000. The profits of the Department are credited to the Industrial Finance Department Reserve Fund.

(ix) *Housing Loans.* Provision is made for the Bank, through the Commonwealth Trading Bank, to make loans to individuals or building societies for the erection or purchase of homes or for the discharge of mortgages on homes. These loans must be made at the lowest possible rate of interest. Loans to individuals are to be on *crédit foncier* terms, to be secured by first mortgage on an estate or interest in land owned by the borrower and to be repaid in periods of not less than five years nor more than 35 years. Loans to building societies are to be made on such security and on such terms and conditions as the Bank determines.

(x) *Liabilities and Assets—All Departments.* Liabilities and assets of each Department of the Commonwealth Bank at 30th June, 1956, are shown in the following table. The

Commonwealth Trading Bank and the Commonwealth Savings Bank, which are operated as separate institutions, are not included (*see* § 1, para. 6 (ii) and § 2, para. 7 (ii) following):—

6. **Commonwealth Trading Bank of Australia.**—(i) *General.* The Commonwealth Trading Bank was established by the Commonwealth Bank Act, 1953, and on 3rd December, 1953, took over the business of the General Banking Division of the Commonwealth Bank. The Commonwealth Trading Bank is a body corporate with its own General Manager who is appointed by the Governor-General on the recommendation of the Commonwealth Bank Board for a term of seven years. The General Manager, under the Governor of the Commonwealth Bank, is responsible for the administration of the Commonwealth Trading Bank in accordance with policy determined by the Commonwealth Bank Board. Under the Banking Act 1945–1953, the Commonwealth Trading Bank is subject to the same central banking controls as the private trading banks and is required to maintain a Special Account with the Commonwealth Bank on the same basis as those of the private trading banks. The capital of the Commonwealth Trading Bank is the total of the capital of the General Banking Division of the Commonwealth Bank immediately before 3rd December, 1953, and such other sums as are transferred from the Commonwealth Trading Bank Reserve Fund, or from the profits of the Central Banking Business and the Note Issue Department of the Commonwealth Bank. The net profits of the Commonwealth Trading Bank are divided as follows :—(a) one-half placed to the credit of the Commonwealth Trading Bank Reserve Fund, and (b) one-half paid into the National Debt Sinking Fund.

(ii) *Liabilities and Assets.* The liabilities and assets of the Commonwealth Trading Bank at 30th June, 1955 and 1956, are shown in the following table:—

COMMONWEALTH TRADING BANK OF AUSTRALIA: LIABILITIES AND ASSETS, 30th JUNE.
(£'000.)

Liabilities.	1955.	1956.	Assets.	1955.	1956.

(a) Includes Territories of Papua and New Guinea.

10. Classification of Advances within Australia.—Commonwealth Trading Bank of Australia and Private Trading Banks.—(i) *States, June, 1956.* A dissection of advances made by the Commonwealth Trading Bank and the Private Trading Banks at the end of June, 1956, is shown in the following table. Business advances, which have been classified according to the main industry of the borrower, are those made mainly for business purposes and include all loans to corporate bodies other than public authorities. Advances made to public authorities are those made to Commonwealth and State Governments, Government Agencies and Local and Semi-governmental Authorities irrespective of the purpose of the advance or the industry in which the authority is engaged. Personal advances, which have been classified according to purpose, include advances to persons in their private capacity for such purposes as the purchase of a house or of household equipment, repayment of personal debts, etc.

COMMONWEALTH TRADING BANK OF AUSTRALIA AND PRIVATE TRADING BANKS : CLASSIFICATION OF ADVANCES WITHIN AUSTRALIA(a)—STATES, END OF JUNE, 1956.

1956 ..	109,975	101,153	22,488	21,021	14,089	3,962	272,688

(a) Excludes transactions connected with the issue and redemption of Treasury Bills.

13. **Debits to Customers' Accounts—All Cheque-paying Banks.**—Statistics of debits to customers' accounts have been collected since September, 1945. Generally they represent the total of all cheques drawn by the customers of the banks. In the following table, the average weekly debits to customers' accounts of all cheque-paying banks are shown for each State for the years ended June, 1952 to 1956. In this table, debits to accounts of Australian Governments in capital cities are excluded, as they are subject to abnormal influences and are not uniform for each State.

AVERAGE WEEKLY DEBITS TO CUSTOMERS' ACCOUNTS : ALL CHEQUE-PAYING BANKS.
(Excluding Debits to Australian Government Accounts in Capital Cities.)
(£'000.)

Year ended June—	N.S.W.	Vic.	Q'land.	S. Aust.	W.Aust.	Tas.	A.C.T.	Total.

Australian Capital Territory ..	2 0	2 0	2 6	5 0	7 6	5 0	..

(a) Unchanged since 1st January, 1940.

There is no charge for transfers within a city or a town. In all States excepting Queensland and Western Australia, the exchange for transfers between towns in the same State is 2s. per £100. Queensland and Western Australia are divided into zones. The exchange rate for transfers between towns in the same zone is 2s. per £100, with higher rates for inter-zone transfers.

The exchange rate between Papua and New Guinea and the mainland is 10s. per £100 for all points.

§ 2. Savings Banks.

1. *General.*—The inauguration of savings banks in Australia dates from 1819, when a private savings bank was opened in Sydney. In 1832, the legislature created “The Savings Bank of New South Wales” under the control of trustees, and shortly after its establishment the funds of the private savings bank were transferred to the new institution. In the other States provision for placing deposits with savings banks dates from 1841 in Victoria; 1854 in Queensland; 1848 in South Australia; 1863 in Western Australia (a savings bank was opened in 1856 but was closed a year later); 1835 in Launceston; and 1845 in Hobart. These early banks functioned as trustee savings banks, but, with the exception of the Hobart and Launceston institutions, were later absorbed by, or amalgamated with, State government savings banks. The Commonwealth Savings Bank, established as a branch of the Commonwealth Bank in 1912 and separately constituted in 1928, absorbed the Tasmanian State savings bank in 1913, the Queensland State savings bank in 1920 and the New South Wales and Western Australian State savings banks in 1931.

Post office savings banks were established in all States from 1864 onwards. These were separate government institutions except in South Australia, where the Post Office acted as agent for the savings bank. Since the federation of the Australian States in 1900, post offices have been controlled by the Commonwealth Government, but they continued to act as savings bank agencies for the State institutions until the establishment of the Commonwealth Bank in 1912. They now act as agents for the Commonwealth Savings Bank.

During 1956, four new savings banks, the Bank of New South Wales Savings Bank Ltd., the Australia and New Zealand Savings Bank Ltd., the C.B.C. Savings Bank Ltd., and The Rural and Industries Bank of Western Australia, were established. Three of these are associated with and operate from the same premises as existing private trading banks and the other is a division of a State bank—The Rural and Industries Bank of Western Australia. Savings banks operating at the end of 1956 were—the Commonwealth Savings Bank (in

all States and Territories), the Bank of New South Wales Savings Bank Ltd. and the Australia and New Zealand Savings Bank Ltd. (in all States and Territories except South Australia and Tasmania), The C.B.C. Savings Bank Ltd. (in all States except South Australia and Tasmania and in the Australian Capital Territory), The State Savings Bank of Victoria, The Savings Bank of South Australia, The Rural and Industries Bank of Western Australia, and the two trustee banks, The Launceston Bank for Savings and The Hobart Savings Bank.

The prime object of the foundation of savings banks in Australia was the encouragement of thrift, deposits of one shilling and upwards being accepted; nevertheless, the facilities offered, while preserving the original object, have led to developments in another direction. Although depositors may not operate on their accounts by means of cheques, they have practically all the other advantages of a current account and in addition receive interest on their minimum monthly balances. No charge is made by the banks for keeping the accounts.

Commencing with July, 1931, monthly returns of statistics have been furnished by savings bank authorities. The information given in the following paragraphs relates to the deposits at 30th June in each year.

2. **Number of Operative Accounts.** The following table shows the number of operative savings bank accounts in existence at 30th June, 1955 and 1956. It should be noted that these figures relate to the number of accounts and not necessarily to the number of depositors.

ALL SAVINGS BANKS: NUMBER OF OPERATIVE ACCOUNTS.(a)

State or Territory.	At 30th June.	
	1955.	1956.
New South Wales	2,336,570	2,462,816
Victoria	2,153,926	2,233,738
Queensland	868,838	907,385
South Australia	801,067	822,150
Western Australia	426,637	446,419
Tasmania	279,027	285,487
Northern Territory	9,604	10,549
Australian Capital Territory	19,412	21,271
Total	6,895,081	7,189,815

(a) Excludes school bank accounts and inoperative accounts (i.e. accounts of less than £1 which have not been operated on for more than two years).

3. **Business Transacted.** The following table shows details of the business transacted in Australia by savings banks during the years ended 30th June, 1955 and 1956:—

ALL SAVINGS BANKS: BUSINESS TRANSACTED IN AUSTRALIA.

5. **School Banking.**—With the object of encouraging principles of thrift amongst children, agencies of the Savings Banks have been established at most of the schools throughout Australia. Particulars of operative accounts for the Commonwealth at 30th June of the years 1939 and 1952 to 1956, appear below:—

SCHOOL SAVINGS BANKS: AUSTRALIA.

At 30th June—				Number of School Agencies.	Number of Operative Accounts.	Deposits.	Deposits per Operative Account.
						£	£ s. d.
1939	9,535	560,116	1,090,703	1 18 11
1952	8,219	638,476	3,866,793	6 1 2
1953	8,148	684,527	4,375,185	6 7 10
1954	8,179	724,038	4,831,538	6 13 6
1955	8,210	761,974	5,280,808	6 18 7
1956	8,591	825,777	5,786,546	7 0 2

6. **War Savings and Savings Certificates.**—Sales of savings certificates and stamps under the War Savings and Savings Certificate schemes, particulars of which were given in earlier issues of the Official Year Book (*see* No. 37, page 586), were discontinued after 31st January, 1949, except for some sales made to wind up savings groups, etc. This method of saving was replaced by special savings schemes to operate through the savings banks. Employers were asked to co-operate by forming employee savings groups and by making regular deductions from wages and salaries for payment into group savings bank accounts, and thence, at the end of each quarter to individual accounts. The total value of certificates outstanding at 30th June in each of the last five years was:—1952, £41,809,000; 1953, £35,601,000; 1954, £30,310,000; 1955, £26,615,000; 1956, £23,366,000.

7. **Commonwealth Savings Bank of Australia.**—(i) *General.* The Savings Bank Department of the Commonwealth Bank opened for business in Victoria on 15th July, 1912; in Queensland on 16th September, 1912; in the Northern Territory on 21st October, 1912; in Tasmania on 1st January, 1913, and in New South Wales, South Australia and Western Australia on 13th January, 1913. The Tasmanian State Savings Bank was absorbed by the Commonwealth Bank on 1st January, 1913, the Queensland State Savings Bank was taken over in 1920 and the New South Wales and Western Australian State Savings Banks in 1931. The Savings Bank Department was separated from the General Bank on 9th June, 1928, and established as a separate institution known as the "Commonwealth Savings Bank of Australia". It has since then operated independently, publishing its own balance-sheets and profit and loss accounts. The Commonwealth Bank Act 1927, which provided for the establishment of the Commonwealth Savings Bank as a separate institution, provided for a Commission of three members to manage the Savings Bank. This Commission was never appointed and the Commonwealth Bank Act 1945 placed the control of the Commonwealth Savings Bank under the Governor of the Commonwealth Bank.

(ii) *Balance-sheet, 30th June, 1955 and 1956.* Particulars of the liabilities and assets of the Commonwealth Savings Bank as at 30th June, 1955 and 1956 were as follows:—

COMMONWEALTH SAVINGS BANK(a): LIABILITIES AND ASSETS, 30th JUNE.
(£'000.)

Liabilities.	1955.	1956.	Assets.	1955.	1956.

9. Private Savings Banks.—(i) *General.* The Bank of New South Wales Savings Bank Limited and the Australia and New Zealand Savings Bank Limited on the 18th January, 1956, and the C.B.C. Savings Bank Limited on the 2nd June, 1956, were granted authority under section 8 of the Banking Act 1945–1953 to carry on banking business subject to the following conditions:—

1. The Savings Bank shall not, in the course of that business, receive a deposit from a company or other body engaged in or formed for the purpose of trading or acquiring pecuniary profit.
2. The Savings Bank shall not, in the course of that business, permit a cheque to be drawn on an account maintained with the Savings Bank, not being an account maintained by a local authority, friendly society, co-operative society, or any other society, body or club.
3. The Savings Bank shall not, in the course of that business, place money on deposit in Australia (whether fixed or in current account) with a bank other than a bank specified in Part 1. of the First Schedule to the Banking Act 1945–1953, the Commonwealth Bank of Australia or the Commonwealth Trading Bank of Australia.
4. The Savings Bank shall at all times maintain in investments of the following kinds an amount which, together with cash on hand in Australia and moneys on deposit in Australia with banks, is not less than the amount on deposit in Australia with the Savings Bank:—
 - (a) securities issued by the Government of the Commonwealth, including Commonwealth Treasury Bills;
 - (b) securities issued by the Government of a State;
 - (c) securities issued or guaranteed by an authority constituted by or under a Commonwealth or a State Act;
 - (d) loans to building societies the repayment of which is guaranteed by the Commonwealth or a State; and
 - (e) loans for housing or other purposes on the security of land in Australia.

5. The Savings Bank shall at all times maintain in investments of the following kinds an amount which, together with cash on hand in Australia and moneys on deposit with the Commonwealth Bank of Australia, is not less than seventy per centum of the amount on deposit in Australia with the Savings Bank:—
- securities issued by the Government of the Commonwealth, including Commonwealth Treasury Bills;
 - securities issued by the Government of a State; and
 - securities issued or guaranteed by an authority constituted by or under a Commonwealth or a State Act.
6. The Savings Bank shall at all times maintain in investment in Commonwealth Treasury Bills an amount which, together with moneys on deposit with the Commonwealth Bank of Australia, is not less than ten per centum of the amount on deposit in Australia with the Savings Bank.
7. For the purposes of these conditions, the amount on deposit in Australia with the Savings Bank includes interest credited to the accounts of depositors.

The Bank of New South Wales Savings Bank Limited and the Australia and New Zealand Savings Bank Limited commenced business on the 19th January, 1956 and the C.B.C. Savings Bank Limited on 16th July, 1956.

(ii) *Assets.* Two of the three private savings banks published Annual Reports for 1956. Details of the assets as shown in these Reports are given below.

PRIVATE SAVINGS BANKS : ASSETS, AT 30th SEPTEMBER, 1956.
(£'000.)

Particulars.	The Bank of New South Wales Savings Bank Ltd.	The Australia and New Zealand Savings Bank Ltd.
Cash at Bankers—		
Commonwealth Bank	2,625	1,995
Parent Bank	8,957	2,222
Government Securities—		
Treasury Bills	3,750	299
Other	23,543	13,474
Municipal and other Public Securities	3,037	3,715
Loans and Advances (including accrued Interest and other Sundry Accounts)	590	1,486
Total	42,502	23,191

(iii) *Profit and Loss.* The net profits for the year ended 30th September, 1956 (after allowing for all expenses and providing for reserves, contingencies, etc.) were : The Bank of New South Wales Savings Bank Limited, £37,135; and the Australia and New Zealand Savings Bank Limited £24,705.

10. *Classification of Depositors' Balances.*—The classification of deposits published by savings banks does not permit a fully detailed analysis with respect to Australia as a whole, but information supplied to the Royal Commission on Monetary and Banking Systems, for all savings banks except the Hobart trustee savings bank, shows that at 30th June, 1936 the amount on deposit in accounts with balances of less than £100 represented 21 per cent. of the total deposits; balances of over £100 but under £250, 21 per cent.; over £250 but under £500, 23 per cent.; over £500 but under £1,000, 25 per cent.; while those of over £1,000 accounted for 10 per cent. School, penny bank and small inoperative accounts were excluded in determining these percentages.

A similar classification as at 30th June, 1936, 1939 and 1952 to 1956, but relating only to the combined State Savings Banks of Victoria and South Australia, is shown below.

STATE SAVINGS BANKS : CLASSIFICATION OF DEPOSITS.

(Per cent.)

At 30th June—	£100 and under.	£101-£300.	£301-£500.	Total under £501.	£501-£1,000.	Over £1,000.

3. **Co-operative Housing Societies, Victoria.**—In addition to the information shown above, the following details of co-operative housing societies in Victoria have been extracted from the 9th Annual Report of the Registrar of Co-operative Housing Societies. At 30th June, 1954, 250 co-operative housing societies were registered in Victoria with 23,697 members who had subscribed for 811,343 shares giving a nominal share capital subscribed of £42,767,419. For the twelve months ended 30th April, 1954, returns were submitted by 245 societies, the total income of those societies being £179,915, and total expenditure £160,698. The liabilities at 30th April, 1954 of the societies submitting returns were:—bank overdraft, £24,718,524; subscriptions, £3,340,012; surplus interest and management expenses, £321,361; other liabilities, £514,424; total liabilities, £28,894,321. Assets at the same date consisted of:—advances, £28,562,818; other assets, £331,503; total assets, £28,894,321.

§ 3. Co-operative Societies.

Co-operative societies are divided into three classes—(i) those engaged in the manufacture and marketing of primary products and trade requirements; (ii) those engaged in retailing general household requirements; and (iii) those engaged in activities covered by both classes (i) and (ii). The first class may be described briefly as Producers' Co-operative Societies and the second as Consumers' Co-operative Societies. The particulars given for New South Wales relate to societies registered under the Co-operative Act 1923–1950. A summary of the business of all co-operative societies for the years 1953–54 or 1954 for all States except Western Australia is given in the following tables. For Western Australia, details of the business during 1940–41 (the latest year available) are given. Separate particulars for each of the three types of Co-operative Societies are given in the annual bulletin *Finance* (see No. 46, pages 190 and 191).

D. INSURANCE.

§ 1. Introductory.

1. Legislation.—Section 51 of the Commonwealth Constitution confers the necessary powers on the Commonwealth Parliament to legislate with respect to “insurance other than State insurance; also State insurance extending beyond the limits of the State concerned”. Commonwealth legislation includes the Marine Insurance Act 1909 defining the limits of marine insurance and regulating the terms of contracts, etc., the Insurance

Act 1932–1937 requiring the lodgment of deposits by insurance companies, and the Life Insurance Act 1945–1953 generally regulating life assurance business in Australia. The Marine Insurance Act 1909 and the Insurance Act 1932–1937 have limited application, and, except for life assurance business, which is regulated by the Life Insurance Act 1945–1953, insurance business is conducted under State laws.

2. Insurance Act 1932–1937.—Companies, persons or associations of persons carrying on insurance business in Australia or in any Territory of Australia are required to lodge a deposit with the Commonwealth Treasurer.

Money deposited is invested by the Treasurer in prescribed securities selected by the depositor, and all interest is paid to depositors. Deposits remain as security against liability to policy holders, and are available to satisfy judgments obtained in respect of policies.

Deposits held by States, on 1st February, 1932, could, however, remain with the States subject to the conditions embodied in the laws of the States, and depositors to the extent of the value of these deposits were exempt from liability to make deposits under the Commonwealth Act.

The following are not regarded as insurance businesses under the Act:—

Staff superannuation schemes; schemes of religious organizations solely for insurance of their property; and friendly society, union and association schemes involving superannuation or insurance benefits to employees.

This Act does not apply to State insurance within the limits of the State concerned, and, under the Life Insurance Act 1945–1953, ceased to apply to life assurance business.

3. Life Insurance Act 1945–1953.—The objects of this Act are :—(a) To replace all State legislation on the subject of life assurance and to provide uniform legislation for the whole of Australia; (b) to appoint an Insurance Commissioner to exercise active supervision of the activities of life assurance companies, with a view to securing the greatest possible protection for policy holders; (c) to set up adequate machinery for dealing with any company that fails to maintain a required minimum standard of solvency.

The Act was assented to on 16th August, 1945 and came into operation on 20th June, 1946. A summary of the provisions of the Act is given in Official Year Book No. 37 (pages 595 to 597).

The main amendment by the Life Insurance Act, No. 94 of 1953 was to repeal Part VI. of the principal Act, which provided for the establishment of a Commonwealth Government Insurance Office.

4. Deposits under Insurance Acts.—Deposits lodged under the Insurance Acts at 30th June, 1955, totalled £5,766,359, comprising £1,152,282 held by the Commonwealth in respect of life assurance and £4,390,787 held by the Commonwealth and £223,290 held by the States in respect of other forms of insurance. The deposits consisted of government, municipal and other securities £4,647,709, fixed deposits £1,000, bank guarantees and undertakings £785,000 and titles and mortgages £332,650.

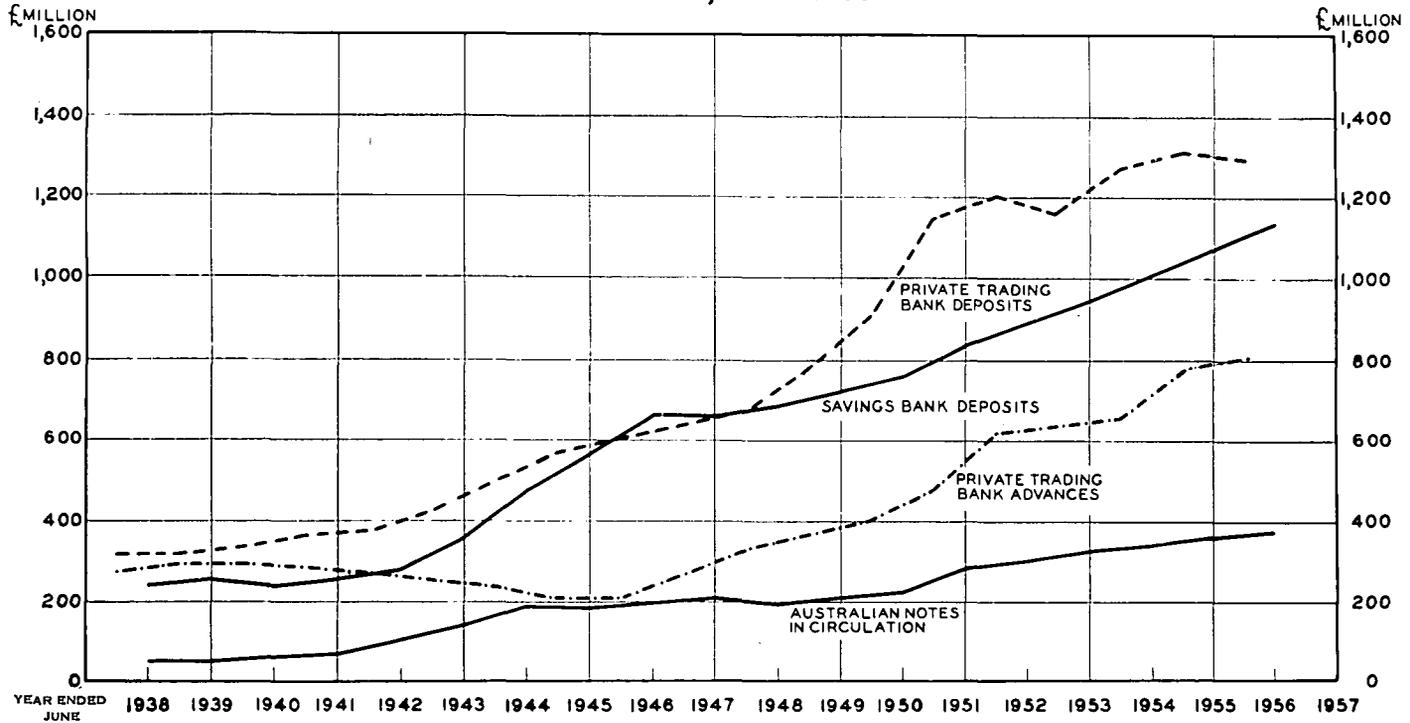

At the 30th June, 1956, total deposits lodged amounted to £6,347,552, comprising £1,212,282 held by the Commonwealth in respect of life assurance and £4,911,980 held by the Commonwealth and £223,290 held by the States in respect of other forms of insurance. The deposits consisted of government, municipal and other securities £4,924,902, fixed deposits £1,000, bank guarantees and undertakings, £1,089,000 and titles and mortgages, £332,650.

§ 2. Life Assurance.

1. General.—Statistical returns have been collected from life assurance institutions since 1907. Until 1946, these returns were collected under the Census and Statistics Act. Since 1947, returns lodged under the Life Insurance Act 1945–1953 have been used to compile life assurance statistics. This change in method of collection has resulted in some slight changes in definition and, as a result, the statistics for 1947 and later years are not in all cases strictly comparable with those for earlier years. In earlier years, statistics of

POLICIES ISSUED AND SUM ASSURED

revenue and expenditure and of assets and liabilities, although generally related only to the life assurance business of the offices making the returns, included, in some cases, a small amount of other classes of business. Under the Life Insurance Act 1945-1953, companies transacting life assurance business are required to set up separate statutory funds for their life assurance business. As a result of this, it has been possible to separate life assurance business from other classes of business. Except where otherwise indicated, the figures in the succeeding paragraphs refer to Australian business only. Business in the Territories of Papua and New Guinea is, however, included in the Australian figures.

2. **Offices Transacting Business.**—The number of offices which transacted life assurance business in Australia during 1954 was 23 including three oversea companies. Of the twenty Australian offices, six are purely mutual, including one which transacts general business in respect of which share capital is used, twelve are public companies, and two are State Government institutions. Of the total offices, thirteen transacted both ordinary and industrial business, and one industrial business only. In 1955, the number of offices transacting life assurance business in Australia was reduced to 22, one Australian public company, which transacted industrial business only, ceasing business at the end of December, 1954. Ordinary and industrial business has, where possible, been kept separate.

3. **Australian Business—Policies in Existence.**—In the following tables, details of policies on the registers in each State and in the Australian Capital Territory are given for the years 1954 and 1955—

5. Policies Matured or Otherwise Discontinued in Australia.—The volume of business discontinued from various causes in each year is always large. In the following tables, details are given of ordinary and industrial life assurance policies matured or otherwise discontinued in each State and the Australian Capital Territory during the years 1954 and 1955.

Policies discontinued in 1954 and 1955 include policies in existence at the beginning of the year which were discontinued as a result of the winding up of two companies.

1954	9,124	1,096	..	2,399	88	3,408	16,115
1955	9,994	1,185	..	2,406	28	3,342	16,955

(a) Includes other expenses of management, licence fees and taxes, etc.

8. **Liabilities and Assets.**—(i) *General.* The liabilities of the Australian offices consist mainly of their assurance funds, but in the case of public companies there is a further liability on account of the shareholders' capital. The assets consist chiefly of government and municipal securities, mortgages, loans on policies, landed and house property, etc. Loans on personal security are granted by very few of the Australian offices. Separate details of liabilities and assets in respect of Australian business are not available.

(ii) *Total Liabilities and Assets.* In the two tables which follow, the details of liabilities and assets relate to all business (Australian and overseas) of Australian companies, the life assurance business of the two State Government offices, all business of the Provident Life Assurance Co. Ltd. (incorporated in New Zealand) and the Australian business only of the Prudential Assurance Co. Ltd. (incorporated in England). For various reasons several offices do not attempt the dissection of liabilities and assets between the industrial and ordinary branches, and, therefore, the figures in the following tables relate to the ordinary and industrial branches combined. Details of the total liabilities of life assurance offices for the years 1954 and 1955 are given in the following tables.

ORDINARY AND INDUSTRIAL LIFE ASSURANCE: TOTAL LIABILITIES, 1954.

(a) State or Territory of location of mortgage, registration of policy, or residence of borrower.
(b) Includes Papua and New Guinea. (c) Includes Northern Territory.

§ 3. Fire, Marine and General Insurance.

1. **General.**—The following statistics which are in respect of the Australian business of companies operating in Australia and State Government insurance offices, conform to the following definitions and should be interpreted in accordance therewith.

(a) Premiums represent the full amount receivable in respect of policies issued and renewed in the year, less returns, rebates and bonuses paid or credited to policy-holders during the year. They are not adjusted to provide for premiums unearned at the end of the year and consequently the amounts differ from "earned premium income" appropriate to the year. When business is increasing, as in recent years, premiums receivable (as shown in the statistics) are greater than "earned premium income" appropriate to the year. The converse applies when business is declining.

(b) Claims or losses include provision for outstanding claims and represent claims or losses incurred in the year. Salvage and other amounts recoverable have been deducted.

(c) Contributions to Fire Brigades, Commission and Agents' Charges, and Expenses of Management represent mainly charges paid during the year.

(d) Taxation represents mainly payments made during the year, and includes income tax, pay-roll tax, licence fees, stamp duty (where paid by the company), etc. Income tax paid during the year is based on the income of earlier years.

The tables contain selected items of statistics and the information shown is not suitable for the construction of a "profit and loss" statement or "revenue" account.

In cases where the business is underwritten in one State and the risk is situated in another the business is included in the State in which the policy was issued.

During 1955-56, revenue from premiums amounted to £123,970,000 and from net interest on investments, etc., to £4,372,000, totalling £128,342,000. Expenditure on claims amounted to £71,913,000, contributions to fire brigades £2,922,000, commission and agents charges £12,509,000, expenses of management £20,246,000 and taxation £4,518,000, a total of £112,108,000.

2. **States.**—The following table shows, for each State, the aggregate premium income less reinsurances and returns, and claims or losses less amounts recoverable, for all classes of insurance other than life for the years 1938-39 and 1951-52 to 1955-56.

FIRE, MARINE AND GENERAL INSURANCE : PREMIUMS AND LOSSES—STATES.

Total	8,529	40,365	45,765	52,668	63,284	71,913

(a) From 1947–48 excludes Workers' Compensation in coal-mining industry in New South Wales.

The volume of business measured by the amount of premium income shows that fire insurance represented about 21.6 per cent. of total business during 1954–55 and 20.8 per cent. during 1955–56, workers' compensation 20.3 per cent. during 1954–55 and 20.7 per cent. during 1955–56, motor vehicles (including compulsory third party insurance) 36.5 per cent. in 1954–55 and 36.7 per cent. in 1955–56 and marine insurance 6.1 per cent. in 1954–55 and 5.8 per cent. in 1955–56.

E. FRIENDLY SOCIETIES.

1. **General.**—The total membership of friendly societies in Australia is just over 500,000 but as certain benefits, such as medical attendance and free medicines, and in many cases funeral expenses, are granted to members' families as well as to members themselves, this figure must, even when due allowance is made for young and unmarried members, be more than doubled to arrive at an estimate of the number of persons who receive some direct benefit from these societies. Legislation has conferred certain privileges on friendly societies, but, on the other hand, it insists on their registration, and it is the duty of the Registrars in the various States, prior to registering a new society, to see that its proposed rules conform to the law, and that the scale of contribution is sufficient to provide the promised benefits. Societies are obliged to forward to the Registrar annual returns about their membership and their finances, and reports are published in most of the States dealing with the returns received.

2. **Societies, Members and Revenue.**—The following table sets out the number of societies, members, etc., and revenue and expenditure and funds of registered societies for the year 1953–54. More detailed information is available in *Finance*, Bulletin No. 46.

FRIENDLY SOCIETIES(a) : 1953-54.

(a) Total estates of deceased persons assessed for death duty. (b) Estates dealt with by Taxation Department. (c) Not available. (d) Not available separately.

G. LOTTERIES AND BETTING.

§ 1. Lotteries.

State Governments operate lotteries in New South Wales, Queensland and Western Australia. Tattersalls Lotteries and Tasmanian Lotteries are operated under Government licences in Victoria and Tasmania respectively.

New South Wales State Lotteries are conducted in accordance with the New South Wales State Lotteries Act, 1930 and the first drawing took place on 20th August, 1931. At present, each ordinary lottery consists of 100,000 tickets at 5s. 6d. each, with prizes totalling £17,550 and each special lottery of 100,000 tickets at 10s. each, with prize money totalling £31,700. In addition, there is a mammoth lottery consisting of 100,000 tickets at £1 each with prize money totalling £64,200. Net profits of the lottery are paid to the Consolidated Revenue Fund from which grants are made to hospitals.

Tattersalls Lotteries, which were previously conducted in Tasmania, were transferred to Victoria in 1954 and the first drawing in Melbourne took place on 8th July, 1954. The Tattersalls Consultations Act, 1953 provides that prizes in each consultation shall not be less than sixty per cent. of total subscriptions to that consultation, and that a duty equal to thirty-one per cent. of subscriptions shall be paid into the Consolidated Revenue Fund from which an equivalent amount will be paid out into the Hospitals and Charities Fund and the Mental Hospitals Fund in such proportions as the Treasurer determines from time to time. At present, tickets are priced at 5s. each (200,000) with prizes totalling £30,000; 10s. each (100,000) with prizes totalling £30,000, and £1 each (100,000) with prizes totalling £60,000. In addition there is a special Melbourne Cup consultation at £1 each (200,000) with prize money of £120,000.

In Queensland, the Golden Casket Art Union commenced in 1916 with the specific object of augmenting the funds of the Queensland War Council. Subsequently, Anzac Cottages and Nurses Quarters Funds benefited until 1920 when net profits were paid to the Department of Health and Home Affairs (Hospitals, Motherhood and Child Welfare Trust Fund) and used for the maintenance of hospitals, grants to institutions, and for motherhood and child welfare purposes. A stamp duty is imposed on tickets sold. The proceeds of this are paid to Consolidated Revenue Fund. At present, ordinary tickets are priced at 5s. 6d. each (100,000), special tickets at 10s. (100,000) and £1 (100,000) each with prizes totalling £17,550, £32,000 and £64,300 respectively. A special Melbourne Cup lottery with tickets priced at 15s. (100,000) and prizes totalling £48,100 was introduced in 1955.

In Western Australia, lotteries are conducted by the Lotteries Commission under the Lotteries Control Act of 1932. Profits are paid by the Commission to hospitals and other charities. At present tickets are priced at 2s. 6d. each (100,000) with prizes totalling £6,630 and 5s. each (100,000) with prizes totalling £16,630.

In Tasmania, lotteries are subject to the provisions of the Racing and Gaming Act 1950-1952. With the transfer of Tattersalls from Hobart to Melbourne, Tasmanian Lotteries commenced operations under Government licence and the first drawing took place on 30th June, 1954. The stamp duty on tickets sold and the tax on prize money are paid into Consolidated Revenue. At present tickets are priced at 5s. each (250,000) with prizes totalling £38,046; £1 each (250,000) with prizes totalling £152,188; £5 each (50,000 and 100,000) with prizes totalling £152,188 and £304,375 respectively; and £100 each (5,000) with prizes totalling £304,375.

Details of ticket sales, prizes allotted, and taxes paid and other net contributions to State Government revenues relating to lotteries drawn during each of the years ended 30th June, 1952 to 1956 are given in the following table:—

H. GOVERNMENT, SEMI-GOVERNMENTAL AND PARLIAMENTARY PENSION AND SUPERANNUATION SCHEMES.

§ 1. Government and Semi-Governmental Pension and Superannuation Schemes.

The Commonwealth and all State Governments have established pension or superannuation schemes for their employees. These schemes are operated through funds to which both the Government and the employees make contributions. Employees of semi-governmental authorities are in some cases covered by the Commonwealth or State Government scheme and in other cases by a separate scheme of the authority.

In the following table, aggregate details are given for the year 1954-55, of the receipts, expenditure, accumulated funds and number of contributors and pensioners of the Commonwealth and State Government and main semi-governmental schemes. The funds included are:—

- (a) *Commonwealth*.—The Superannuation Fund and Defence Forces Retirement Benefits Fund.
- (b) *New South Wales*.—State Superannuation Fund, Government Railways Superannuation Fund and Police Superannuation and Reward Fund.
- (c) *Victoria*.—The State Superannuation Fund, Police Superannuation Fund, Police Pensions Fund, Melbourne Harbor Trust Superannuation Account, Geelong Harbor Trust Superannuation Fund, Melbourne and Metropolitan Board of Works Superannuation Fund, State Electricity Commission Provident Fund, Gas and Fuel Corporation Superannuation Fund, Metropolitan Fire Brigades Board Superannuation Fund, Country Fire Authority Superannuation Fund and Port Phillip Pilots' Sick and Superannuation Fund.
- (d) *Queensland*.—Public Service Superannuation Fund and Police Superannuation Fund.
- (e) *South Australia*.—South Australia Superannuation Fund, Police Pensions Fund and Public Service Superannuation Fund.
- (f) *Western Australia*.—The Superannuation Fund.
- (g) *Tasmania*.—Public Service Superannuation Fund (Old and New Funds), Police Provident Fund and State Teachers' Superannuation Fund.

GOVERNMENT AND SEMI-GOVERNMENTAL PENSION AND SUPERANNUATION SCHEMES, 1954-55.

For details of the individual funds summarized above see *Finance Bulletin* No. 46, issued by this Bureau.

§ 2. Parliamentary Pension and Superannuation Schemes.

Pension and superannuation schemes have been established for members of the Commonwealth and State Parliaments. Details of these schemes, except for Tasmania, are given in pp. 91 to 99 of Official Year Book No. 38. Details of the Tasmanian scheme, which came into operation in November, 1955, are given in Chapter III.—General Government, p. 72 of this volume. All the schemes are operated through funds to which the members of Parliament and the Commonwealth or States contribute. Details of the receipts, expenditure, funds and number of contributors and pensioners for the year 1954-55 are given in the following table:—

PARLIAMENTARY PENSION AND SUPERANNUATION SCHEMES, 1954-55.

CHAPTER XXI.

PUBLIC FINANCE.

NOTE.—The subject of "Public Finance" is dealt with in this Chapter under the two major divisions of Commonwealth Finance and State Finance. The close financial relations between the Commonwealth and States, however, particularly since the Financial Agreement has been in operation, demand also a combination of these two divisions under the heading of Commonwealth and State Finance. Under the Financial Agreement, the Commonwealth assumed the liability to bondholders for the States' Debts existing at the date of the Agreement and now arranges for all borrowings for and on behalf of the Commonwealth or any State and for all conversions, renewals, redemptions and consolidations of the Public Debts of the Commonwealth and the States. In view of this, it has been found convenient to deal with the Commonwealth and State Public Debt in a separate division.

The subject of income taxes is also dealt with in a separate division.

A. COMMONWEALTH FINANCE.

§ 1. General.

1. **Financial Provisions of the Constitution.**—The main provisions of the Constitution relating to the initiation and development of the financial system of the Commonwealth are contained in Sections 81 to 105A of the Commonwealth Constitution (*see* pp. 17–20 of this Year Book). Two other sections which have a most important bearing on questions of Commonwealth finance are Sections 69 and 51.

Section 69 provides for the transfer from the States to the Commonwealth of certain specified departments, and Section 51, in outlining the powers of the Commonwealth Parliament, implies the transfer or creation of other departments. Section 87 deals with the financial relations between the Commonwealth and the States. These matters have been treated in previous issues of the Official Year Book and on pp. 775–778 of this issue a summary is given of the present provisions for Commonwealth financial assistance to the States.

The majority of the tables relating to Commonwealth Finance have been compiled from the annual Budget Papers as presented to Parliament by the Treasurer of the Commonwealth.

2. **Accounts of Commonwealth Government.**—The Commonwealth Government bases its accounts upon three funds, the Consolidated Revenue Fund, the Trust Fund and the Loan Fund.

§ 2. Commonwealth Consolidated Revenue Fund.

I. Nature of Fund.

1. **Provisions of the Constitution.**—The provisions made for the establishment of a Commonwealth Consolidated Revenue Fund, and the means to be adopted for operating on the fund, are contained in Sections 81 to 83 of the Constitution (*see* p. 17 of this Year Book).

2. **Annual Results of Transactions.**—In the early 1920's, receipts and expenditure of the Consolidated Revenue Fund each ranged between £60 million and £70 million. Excess receipts in these years amounted to one or two million pounds a year, and were utilized for a variety of purposes, e.g., for debt redemption, naval construction, main roads, science

and industry investigations, prospecting for oil and precious metals, civil aviation, etc. In the later 'twenties and early 'thirties, when receipts and expenditure were each about £70 million or £80 million a year, there were annual deficiencies, which by the end of 1930-31 had accumulated to more than £17 million.

In subsequent years (receipts and expenditure each rising from about £70 million in 1931-32 to £95 million in 1938-39), there were excess receipts of up to £3.5 million a year. Approximately £1.5 million of these excess receipts were used to reduce the accumulated deficiency, and the balance for non-recurring grants to the States, post office works and the provision of defence equipment. The balance of the accumulated deficiency (£15.7 million) was funded in 1937-38.

For most of the 1939-45 War years and thereafter, the Consolidated Revenue Fund has been balanced, as all available revenue after charging expenditure on ordinary services has been used for defence, war and repatriation purposes.

During the years 1951-52 to 1954-55, the Fund was balanced after special payments of £98.5 million to the National Debt Sinking Fund, £13.4 million to the War Pensions Trust Account and £56.3 million and £70.1 million to the Debt Redemption Reserve Trust Account. The amounts so transferred were subsequently invested wholly or partly in special loans for State works requirements.

Receipts and expenditure increased from £95 million in 1938-39 to £377 million in 1944-45. By 1950-51, they had risen to £842 million and by 1953-54 to £1,023 million. Receipts and expenditure for 1954-55 were £1,067 million.

II.—Revenue.

1. **General.**—The following table shows details of the revenue from each source and the amount per head of population under each of the main headings during the years 1938-39 and 1950-51 to 1954-55. Taxation constitutes the main source of Commonwealth revenue e.g. 87.8 per cent. in 1954-55.

Total	16,472	73,083	99,931	113,104	125,460	143,149

(iv) *Other Taxation. (a) General.* Taxes other than customs and excise are, in general, assessed and collected by the Commissioner of Taxation. The organization comprises an office in each State assessing the returns of taxpayers whose interests are restricted to that State only, and a Central Office assessing taxpayers whose interests are in more than one State.

(b) *Sales Tax.* The sales tax was first imposed in August, 1930. The operation of the tax is controlled chiefly by a system of registration of taxpayers whereby all manufacturers and wholesale merchants, who are the taxpayers under the Act in respect of goods sold in Australia, must be registered with the Department. The tax on imports subject to sales tax is collected by the Customs Department at ports of entry.

Since the inception of the tax, certain exemptions have been allowed. These exemptions, which have been extended from time to time, relate mainly to goods of an essential nature or for use in primary production. The most recent exemptions were those granted from 19th August, 1954.

A general rate of Sales Tax is levied on all goods other than those specified in the schedules of the Sales Tax (Exemptions and Classifications) Act 1935–1954. These schedules

set out details of goods exempt from sales tax and those subject to special rates. The general and special rates which operated from 15th November, 1946, were :—

Period.	General Rate.	Special Rates.
15th November, 1946 to 7th September, 1949 ..	10 per cent. ..	25 per cent.
8th September, 1949 to 12th October, 1950 ..	8½ per cent. ..	25 per cent.
13th October, 1950 to 26th September, 1951 ..	8½ per cent. ..	10, 25 and 33½ per cent.
27th September, 1951 to 6th August, 1952 ..	12½ per cent. ..	20, 25, 33½, 50 and 66½ per cent.
7th August, 1952 to 9th September, 1953 ..	12½ per cent. ..	20, 33½ and 50 per cent.
10th September, 1953 to 18th August, 1954 ..	12½ per cent. ..	16½ per cent.
19th August, 1954 to 14th March, 1956 ..	12½ per cent. ..	10 and 16½ per cent.
From 15th March, 1956	12½ per cent. ..	10, 16½, 25 and 30 per cent.

For particulars of rates applicable since the inception of Sales Tax in August, 1930, see Official Year Book No. 37, p. 617.

Particulars of the net amount of sales tax payable, and the sales of taxable and exempt goods in each State for 1954-55, are given in the following table. The figures relate to sales during the period 1st July to 30th June. The figures for sales tax payable differ from those for net collections shown on p. 755, because the latter include some adjustments in respect of earlier years tax and would include only tax payable on returns lodged during the year, which in general cover sales for the period June to May.

SALES TAX AND AMOUNT OF SALES, 1954-55.

1938-39	196,491	280,656	477,147	9,363
1950-51	552,919	1,138,887	1,691,806	54,471
1951-52	623,390	1,321,696	1,945,086	91,332
1952-53	555,390	1,342,279	1,897,669	86,085
1953-54	687,946	1,466,323	2,154,269	96,079
1954-55	766,940	1,699,342	2,466,282	101,427

In the foregoing tables, sales include goods transferred to stock for sale by retail, goods imported by persons other than registered taxpayers, and goods used in the business of the taxpayer. Exempt sales relate to goods exempted from sales tax under the Sales Tax (Exemptions and Classifications) Act 1935–1954. The figures shown in the foregoing tables do not represent the total sales of all commodities, as vendors trading in exempt goods only are not required to be registered and consequently the volume of their sales is not included in the statistics above. In addition, non-taxable sales (i.e. goods sold by one registered taxpayer to another registered taxpayer) are excluded.

(c) *Land Tax.* Commonwealth Land Tax was levied annually from 1910–11 to 1951–52 on the unimproved value of land. It was abolished from 1st July, 1952. For rates of tax payable from 1942–43 to 1951–52, see Official Year Book No. 40, 1954, p. 669. Receipts for the years 1938–39 and 1950–51 to 1954–55 were as follows :—1938–39, £1,489,000 ; 1950–51, £3,591,000 ; 1951–52, £6,199,000 ; 1952–53, £1,250,000 ; 1953–54, £221,000 ; 1954–55, £13,000.

(d) *Pay-roll Tax.* The Pay-roll Tax Assessment Act 1941–1942 and the Pay-roll Tax Act 1941 imposed a pay-roll tax of 2½ per cent. on all wages and salaries in excess of £20 per week paid by an employer after 30th June, 1941. Employers who are liable for tax are required to register and to furnish a monthly return of all wages paid. These measures formed part of the Commonwealth scheme of child endowment, the revenue from the tax being designed to provide part of the money required. The exemption was increased to £80 per week (£4,160 per annum) from 1st October, 1953 and to £120 per week (£6,240 per annum) from 1st September, 1954.

Receipts from pay-roll tax for the years 1950–51 to 1954–55 were, 1950–51, £28,721,000 ; 1951–52, £37,170,000 ; 1952–53, £40,171,000 ; 1953–54, £40,384,000 ; 1954–55, £41,455,000.

(e) *Income Taxes.* Details of taxes on income are given in division E of this Chapter.

(f) *Wool Sales Deduction.* The Wool Sales Deduction Act 1950 and the Wool Sales Deduction (Administration) Act 1950 came into operation on 2nd December, 1950 and required that a deduction be made from the sale value of wool sold or exported, the amount deducted being set off against the Income Tax and Social Services Contribution assessed in respect of the income of the year 1950–51. These Acts were repealed by the Wool Sales Deduction Legislation Repeal Act 1951 which came into operation on 17th November, 1951, and provided for the refund to producers, etc., of amounts paid on the value of wool sold or otherwise disposed of, after 30th June, 1951. The amount of deduction collected was—1950–51, £109,531,000 ; 1951–52, £5,963,000. In 1952–53 and 1953–54, refunds amounted to £2,223,000 and £239,000 respectively.

(g) *Estate Duty.* The Commonwealth Estate Duty was first levied in 1914. Particulars of exemptions and the rates imposed prior to October, 1953 are given in earlier issues of the Year Book (see No. 40, p. 670).

Estate duty, under the Estate Duty Assessment Act 1914–1953, operative from 28th October, 1953 is assessed on the net value of the estate less a statutory exemption determined in accordance with the following formula :—(a) where the whole of the estate passes to the widow, children or grand-children of the deceased, the sum of £5,000 decreasing by £1 for every £3 by which the value exceeds £5,000 and ceasing to apply at £20,000 ; (b) where no part of the estate passes to the widow, children or grand-children, the sum of £2,500 decreasing by £1 for every £3 by which the value exceeds £2,500 and ceasing to apply at £10,000 ; and (c) where part only of the estate passes to the widow, children or grand-children, the statutory exemption is to be calculated proportionately under (a) and (b).

This Act also provides, from 27th June, 1950, for a special deduction of £5,000 from the value of estates of persons who served in Korea or Malaya.

The rates of duty levied under the Estate Duty Act 1914-1941 increase as the value of the estate increases as follows :—£1 to £10,000, 3 per cent. ; £10,001 to £20,000, 3 per cent. to 6 per cent. ; £20,001 to £120,000, 6 per cent. to 26 per cent. ; £120,001 to £500,000, 26 per cent. to 27.9 per cent. ; over £500,000, 27.9 per cent.

Total collections for the years 1938-39 and 1950-51 to 1954-55 were as follows :—1938-39, £1,915,000 ; 1950-51, £6,401,000 ; 1951-52, £7,778,000 ; 1952-53, £8,393,000 ; 1953-54, £9,825,000 ; 1954-55, £9,614,000.

Particulars of the number and value of estates and duty assessed, for each of the assessment years 1938-39 and 1950-51 to 1954-55, are given in the following table :—

ESTATE DUTY ASSESSMENTS.

Particulars.	1938-39.	1950-51.	1951-52.	1952-53.	1953-54.	1954-55.
Number of Estates	9,681	15,680	16,289	19,663	19,621	12,878
Gross Value Assessed	£'000 65,699	134,074	144,073	175,672	187,905	176,853
Deductions	£'000 12,630	22,714	22,083	27,795	31,010	30,136
Statutory Exemption	£'000	18,175	18,672	22,566	22,976	23,290
Dutiable Value	£'000 53,069	93,185	103,318	125,311	133,919	123,427
Duty Payable	£ 2,002,283	6,933,608	7,797,967	9,248,925	10,088,841	10,309,838
Average dutiable value	£ 5,482	5,943	6,343	6,373	6,825	9,584
Average duty per estate	£ 207	442	479	470	514	801

(h) *Gift Duty.* The Gift Duty Assessment Act 1941-1947 and the Gift Duty Act 1941-1947 impose a gift duty on all gifts made after the 29th October, 1941. A gift has been defined as any disposition of property, which is made otherwise than by will, without adequate consideration in money or money's worth. There is a liability on both the donor and the donee to furnish a return, and both are jointly and severally liable for payment of the duty.

The following rates of duty are levied under the Gift Duty Act 1941-1947 and relate to the value of all gifts made by the donor within a period of eighteen months :—Not exceeding £2,000, nil ; £2,001 to £10,000, 3 per cent. ; £10,001 to £20,000, 3 per cent. to 6 per cent. ; £20,001 to £120,000, 6 per cent. to 26 per cent. ; £120,001 to £500,000, 26 per cent. to 27.9 per cent. ; £500,001 and over, 27.9 per cent.

An amendment which operated from 3rd June, 1947 provides that gift duty will not exceed one-half of the amount by which the value of the gift exceeds £2,000.

Total receipts from gift duty for the years 1950-51 to 1954-55 were as follows :—1950-51, £1,044,000 ; 1951-52, £1,202,000 ; 1952-53, £1,162,000 ; 1953-54, £1,386,000 ; 1954-55, £1,618,000.

(i) *Entertainments Tax.* The Commonwealth levied an Entertainments Tax from 1st October, 1942 to 30th September, 1953. Details of rates are given in earlier issues of the Official Year Book (*see* No. 40, pp. 672 and 673).

Entertainments tax receipts during the five years 1950-51 to 1953-54 were as follows :—1950-51, £5,148,000 ; 1951-52, £6,161,000 ; 1952-53, £6,708,000 ; 1953-54, £1,977,000. In 1954-55, there was an excess of refunds over payments of £2,000.

(j) *Flour Tax.* Particulars of the rates of flour tax which operated from 4th December, 1933 to 21st December, 1947 are given in Official Year Book No. 37, pp. 618 and 619. Because of the rise in wheat prices, the rate was declared to be nil as from 22nd December, 1947.

(k) *Wool Levy.* The Wool Tax Act 1936 and Wool Tax Assessment Act 1936 provided for a levy on all wool grown in Australia and shorn on or after 1st July, 1936. Details of this levy are given in earlier issues of the Official Year Book. This levy was suspended from 1st July, 1946 until 30th June, 1952 while the Wool Contributory Charge was imposed.

With the repeal of the Wool Contributory Charge, however, a levy on wool produced in Australia was re-introduced from 1st July, 1952. The Wool Tax Acts (Nos. 1 and 2) of 1952 provide for the payment of a levy of four shillings per bale until 30th June, 1953, after which date the rate of tax may be varied within prescribed limits. There was no variation to 30th June, 1954. The purpose of the tax is to provide funds for publicity and research previously provided by the Wool Contributory Charge. Collections during 1952–53, 1953–54 and 1954–55 were £675,000, £772,000 and £784,000 respectively.

(l) *Wool Contributory Charge.* The Wool (Contributory Charge) Act 1945 and the Wool (Contributory Charge) Assessment Act 1945 imposed a charge on all wool produced in Australia and sold, manufactured or exported. Wool sold by the Australian Wool Realization Commission was not liable to the charge. Details of the rate of the charge are given in earlier issues of the Official Year Book (*see* No. 40, p. 675).

The various Wool (Contributory Charge) Acts were repealed by the Wool Tax Assessment Act of 1952 and the charge superseded by the wool levy. Collections during the years 1950–51 to 1952–53 were as follows :—1950–51, £44,844,000, 1951–52, £2,230,000, and 1952–53, £28,000.

(m) *Wheat Export Charge and Wheat Tax.* A summary of the provisions of the Wheat Export Charge Acts 1946, 1948 and 1952 is contained in previous issues of the Official Year Book (*see* No. 40, p. 676 and No. 41, p. 604).

The Wheat Export Charge Act 1954 repealed previous Acts and provided for an export charge on wheat and wheat products for the seasons 1953–54 to 1957–58 inclusive. The charge levied is based on the difference between the cost of production and the export price with a maximum levy of 1s. 6d. per bushel. Under the Wheat Industry Stabilization Act 1954, to which the Wheat Export Charge Act is complementary, the Commonwealth Government guarantees a return to wheat-growers of the ascertained cost of production in respect of up to 100 million bushels of wheat exported from Australia during each of the five seasons. Collections from the wheat export charge are paid into the Wheat Prices Stabilization Fund, out of which payments will be made to the Australian Wheat Board, when required, for the purpose of building up the average export price for any season to the guaranteed price. If the Fund is exhausted, additional payments will be made from the Consolidated Revenue Fund.

Collections of the wheat export charge amounted to £13,353,000 in 1950–51, £12,202,000 in 1951–52, £8,139,000 in 1952–53, nil in 1953–54, and £5,063,000 in 1954–55.

(n) *Miscellaneous Export Charges.* These consist of charges levied on exports of apples and pears (Apple and Pear Export Charges Act 1938–1947), canned fruits (Canned Fruits Export Charges Act 1926–1952), dairy produce (Dairy Produce Export Charges Act 1924–1937), dried fruits (Dried Fruits Export Charges Act 1924–1929), eggs (Egg Export Charges Act 1947) and meat (Meat Export Charge Act 1935–54) and on grapes used in the manufacture of wine (Wine Grapes Charges Act 1929–1954). The collections are paid into funds to be applied for the purposes of Export Boards established under various Acts, in controlling the quantity and quality of produce exported.

Collections for the last five years were as follows :—1950–51, £76,000 ; 1951–52, £72,000 ; 1952–53, £166,000 ; 1953–54, £168,000 ; and 1954–55, £300,000.

(o) *Stevedoring Industry Charge.* The Stevedoring Industry Charge Act 1947 and the Stevedoring Industry Charge Assessment Act 1947 imposed a charge of 4½d. per man-hour on the employer of a waterside worker after 22nd December, 1947.

The amounts received are paid to the Stevedoring Industry Board for the payment of attendance money to waterside workers and for other expenses of the Board.

Since 1947, the charge has been amended as follows :—11th October, 1949, a reduction to 2½d. per man-hour ; 11th December, 1951, an increase to 4d. per man-hour ; 28th October, 1952, an increase to 11d. per man-hour and from 4th May, 1954, a reduction to 6d. per man-hour.

Collections during the years 1950–51 to 1954–55 were as follows :—1950–51, £420,000 ; 1951–52, £551,000 ; 1952–53, £1,144,000 ; 1953–54, £1,630,000 ; and 1954–55, £998,000.

(p) *Gold Tax.* Particulars of the Gold Tax which operated from 15th September, 1939 to 20th September, 1947 are given in Official Year Book No. 39, p. 767.

3. *Business Undertakings.*—(i) *Postmaster-General's Department.* Particulars of net receipts for each of the financial years 1938–39 and 1950–51 to 1954–55 are contained in the following table :—

POSTMASTER-GENERAL'S DEPARTMENT : NET RECEIPTS.
(£'000.)

Further particulars to 1954-55 are given in Chapter XI.—Transport and Communication (Division B. Government Railways).

4. **Other Sources of Revenue.**—Revenue derived by the Consolidated Revenue Fund from the Territories of the Commonwealth during 1954-55 amounted to £2,419,000 (Australian Capital Territory, £1,776,000; Northern Territory, £643,000). Of other sources of revenue, amounting in 1954-55 to £47,199,000, the following are noteworthy:—Interest, £12,428,000; Civil Aviation, £4,644,000; Net Profit on Australian Note Issue, £5,516,000; Joint Coal Board—Repayment of Advances £3,550,000 and Surplus Balances of Trust Accounts, £8,237,000.

III.—Expenditure.

1. **Details of Expenditure from Consolidated Revenue.**—The following table shows details of the expenditure from the Consolidated Revenue Fund during the years 1938-39 and 1950-51 to 1954-55.

COMMONWEALTH CONSOLIDATED REVENUE FUND: EXPENDITURE. (£'000.)

(a) Excludes debt charges and Defence Division of the Department of the Treasury. (b) Includes Railway Fare and Freight Concessions. (c) Invalid and Age Pensions and Maternity Allowances. (d) Provided in part from Postmaster-General's Department votes and balance from Broadcasting Trust Account. (e) Excludes Railway Fare and Freight Concessions and Contribution to South Australia (Port Augusta to Port Pirie Railway Act). (f) Includes Northern Territory Railway Freight Concessions. (g) In addition, £24,911,000 was provided from Loan Fund. (h) Excludes Tuberculosis Act 1948—Reimbursement of capital expenditure to States. (i) Includes Tuberculosis Act 1948—Reimbursement of capital expenditure to States. (j) Includes assistance to primary producers. (k) Excludes surplus £13,400,000 transferred to War Pensions Trust Account. (l) Excludes surplus £56,271,000 transferred to Debt Redemption Reserve Trust Account. (m) Excludes surplus revenue £70,151,000 transferred to Debt Redemption Reserve Trust Account.

Further details of the expenditure in each section are given in paragraphs 2 to 11 following.

A graphical representation of the revenue and expenditure of the Commonwealth Consolidated Revenue Fund appears on p. 765. In this diagram, Public Debt Charges (interest and debt redemption, etc.) are shown as a separate item, whereas, in the table above, these charges are included in the section to which they relate.

Details of Commonwealth expenditure on public debt charges for 1938-39 and 1950-51 to 1954-55 are shown in the following table :—

(a) Excludes payments to or for States under the Financial Agreement. See pp. 775-778.

(b) Includes repatriation debt.

(c) Redemption, conversion and loan management, etc., expenses.

2. Defence Services.—Details of the expenditure on Defence Services by the Departments of Defence, Navy, Army, Air, Supply and Defence Production are shown in the following table. The expenditure shown under Department of Supply includes the former Departments of Shipping and Fuel, Supply and Development, Supply and Shipping, and Munitions. This table covers expenditure by the service and associated departments only, and includes the cost of maintaining forces in Korea and at other overseas posts.

The figures represent the combined expenditures from revenue, trust and loan funds for the years 1938-39 and 1950-51 to 1954-55.

(a) Excludes Interest and Redemption on War (1914-18) Debt due to the United Kingdom Government, payment of which was suspended in 1931. (b) From Service Departments and Australian Soldiers' Repatriation Trust Account. (c) Represents expenditure on War and Repatriation Services by Defence Departments (see page 764) for which dissection is not available. (d) Excludes International Monetary Fund Charges. (e) Munitions, stores, etc., supplied to the Government of United Kingdom and other administrations. Includes repayments and waiver of war-time indebtedness of other administrations. (f) Receipts credited to Defence revenue.

NOTE.—Minus sign (—) indicates excess of credits or repayments over expenditure.

4. **Subsidies and Bounties.**—The following table shows details, for the years 1938-39 and 1950-51 to 1954-55, of Commonwealth expenditure from revenue on subsidies, bounties and assistance to primary producers. Expenditure on special relief such as drought, frost, flood and bush fire, etc. (see table, p. 770, for more important items), is not included, nor is expenditure from the proceeds of certain taxes on primary products and profits from marketing schemes, which have been paid to trust funds for the purpose of price or other stabilization schemes or for distribution to producers (see paragraph 11) p. 775. Further information relating to these schemes and other assistance to, primary producers is given in Chapter XXII.—Agricultural Production.

Details of price stabilization subsidies and of various forms of assistance to primary producers for earlier years may be found on pages 414 and 1014-15 respectively of Official Year Book No. 38.

SUBSIDIES AND BOUNTIES : COMMONWEALTH EXPENDITURE.
(£'000.)

(a) Dairy products.

(b) Includes Raw Cotton Bounty, £115,000 and Sulphur Bounty, £88,000.

5. **Total Cost of Departments.**—Expenditure under this heading covers expenditure by departments, other than the defence and repatriation departments and business undertakings, on administrative services and other activities. Expenditure on defence (other than interest and debt redemption in respect of the defence departments which is included in the expenditure of the Department of the Treasury), war and repatriation services, subsidies and bounties, social services paid from the National Welfare Fund, business undertakings, Commonwealth territories and capital works and services is excluded.

Information on the functions of departments and the acts administered by the Ministers of departments was published in Official Year Book No. 37, pages 76-86, and particulars of subsequent changes in departmental structure are given in later issues.

In the following table, details are given of that expenditure on the branches of each department which might be termed running expenses. Miscellaneous expenditure and debt charges, etc., are not included in this table but are in the one following.

(a) Includes rent, repairs and maintenance, pension and superannuation contributions. Interest and debt redemption in respect of the various departments is included under the Department of the Treasury.

(b) League of Nations. (c) Unallocated debt charges, in respect of all departments including defence departments. (d) Included with Department of the Interior. (e) Provided under Defence Services. (f) Included with Prime Minister's Department.

6. **National Welfare Fund.**—The National Welfare Fund was established for the purpose of providing a fund for the payment of Commonwealth social services benefits. During the year 1949-50, an amount equivalent to the total collections of pay-roll tax and social services contribution was paid to the fund from Consolidated Revenue. During 1950-51, the social services contribution was amalgamated with the normal income tax and it became necessary to base the contributions on other formula. For the year 1950-51, the amount paid to the fund was the total of collections of pay-roll tax and social services contribution plus £30,000,000. In 1951-52, the amount paid to the fund was the amount paid in 1950-51 increased in the same proportion as collections of pay-roll tax increased over the collections of pay-roll tax in 1950-51. By an amendment to the National Welfare Fund Act 1943-1950, the amount to be paid to the fund in 1952-53 and subsequent years was changed to the amount of moneys paid out of the fund. In addition to these payments from Consolidated Revenue, the fund received a small amount of interest from investments.

In the following table, details are given of the income and expenditure of the National Welfare Fund and the balance in the fund at the end of each year for the years 1950–51 to 1954–55. A dissection of expenditure into the various types of benefits is given in Chapter XV.—Welfare Services (see page 522).

NATIONAL WELFARE FUND : RECEIPTS, EXPENDITURE AND BALANCES.
(£'000.)

Year.	Income.			Expenditure.	Balance in Fund at end of Year.
	Contribution from Consolidated Revenue.	Interest on Investments.	Total.		
1950–51	132,680	985	133,665	114,983	149,797
1951–52	171,709	1,129	172,838	137,608	185,027

1954–55	189,319	2,108	191,427	189,319	191,038

7. **National Debt Sinking Fund.**—During 1951–52, surplus revenue of £98,500,000 was paid to the National Debt Sinking Fund for investment in a special loan raised to finance State works expenditure.

8. **Business Undertakings.**—(i) *Postmaster-General's Department.* From the beginning of 1949–50, Broadcasting Services were separated from the Postmaster-General's Department. Prior to 1949–50, part of the expenditure on these services was included with the Postmaster-General's Department. Details of the expenditure of this Department for the years 1938–39 and 1950–51 to 1954–55 are given in the following table :—

POSTMASTER-GENERAL'S DEPARTMENT : EXPENDITURE.
(£'000.)

Item.	1938–39.	1950–51.	1951–52.	1952–53.	1953–54.	1954–55.

Debt Redemptions	1,129	2,150	2,257	2,371	2,313	1,655
<i>Total Working, etc., Expenses</i>	14,878	54,802	64,291	69,917	72,244	76,246
Capital Works and Services	3,851	34,897	28,819	28,427	25,986	25,839
Grand Total	18,729	89,699	93,110	98,344	98,230	102,085

Further details of expenditure for 1954–55 on account of the Postmaster-General's Department appear in Chapter XI.—Transport and Communication (Part II., Division A., Posts, Telegraphs, Telephones and Wireless).

(ii) *Broadcasting Services.* Since 1949–50, all expenditure on broadcasting services has been brought together in one section. Previously these services had been financed partly by the Postmaster-General's Department and partly from the Wireless Broadcasting Trust Account. Details of expenditure for the years 1950–51 to 1954–55 are shown in the following table.

COMMONWEALTH BROADCASTING SERVICES : EXPENDITURE.

(a) Excludes fare and freight concessions and contribution to South Australia—Port Augusta to Port Pirie Railway. (b) Includes loans redemption and conversion expenses, 1950-51, £1,000; 1952-53 £1,000; 1954-55, £19,000.

Additional details of the financial operations of the Commonwealth Railways to 1954-55 are given in Chapter XI.—Transport and Communication (Part I., Division B. Government Railways).

9. *Territories.*—The following table shows the expenditure on account of Commonwealth Territories for the years 1938-39 and 1950-51 to 1954-55. The Australian Capital Territory is administered by the Department of the Interior, and the Department of Territories controls the Northern Territory and the external territories. The expenditure has been grouped in one table for convenience. Information in greater detail will be found in the annual bulletin *Finance*.

COMMONWEALTH TERRITORIES : EXPENDITURE.

(a) Includes Strategic Stores and Equipment Reserve, 1950-51, £57,048,000; 1951-52, £10,049,000.
(b) Excludes Amalgamated Wireless (Aust.) Ltd. and Commonwealth New Guinea Timbers Ltd. included under Postmaster-General's Department and Territories respectively. (c) Excludes Overseas Telecommunications Commission included under Postmaster-General's Department. (d) From excess receipts of previous years and National Defence Contributions Trust Account.

NOTE.—Minus sign (-) indicates excess of credits or repayments over expenditure.

11. Payments to or for the States.—(i) *General.* An outline of the provisions of the Constitution requiring the Commonwealth to make payments to the States, and of the systems which followed, is given in earlier issues of the Official Year Book (see No. 37, pages 633 to 638). In the following paragraphs, reference is made to the arrangements at present in operation.

(ii) *Amounts Paid.* (a) *Year 1954-55.* The table below shows particulars of the amounts paid to each of the States as grants for the several purposes referred to in subsequent paragraphs.

COMMONWEALTH PAYMENTS TO OR FOR THE STATES, 1954-55.(a)
(£'000.)

Total	15,669	127,861	161,101	183,603	195,043	199,829

(a) Excludes relief to primary producers and other payments for medical research, etc. (b) Paid to National Debt Sinking Fund. (c) Excludes expenditure on strategic roads and road safety practices, 1950-51 to 1953-54, £600,000, 1954-55, £900,000.

Particulars of special Commonwealth grants for the relief of primary producers are not included in the foregoing tables. For details see Chapter XXII.—Agricultural Production. See also para. 4, Subsidies and Bounties, and para. 12, Other Expenditure, of this subsection.

(iii) *Financial Agreement.* Details of the Financial Agreement between the Commonwealth and the States are given in Official Year Book No. 37, pages 685 to 690. Under this Agreement, the Commonwealth undertook to contribute £7,584,912 per annum towards interest payable on the State Debts for a period of 58 years from 1st July, 1927. This amount is to be distributed amongst the States as follows :—New South Wales, £2,917,411 ; Victoria, £2,127,159 ; Queensland, £1,096,235 ; South Australia, £703,816 ; Western Australia, £473,432 ; Tasmania, £266,859.

These amounts are equal to the sums paid by the Commonwealth to each State in the year 1926–27 at the rate of 25s. per head of population, the rate at which the Commonwealth had contributed annually to the States since 1st July, 1910 as compensation for the States relinquishing, after Federation, the right to levy Customs and Excise Duties.

In addition, under the Financial Agreement, the Commonwealth agreed to make certain contributions to the National Debt Sinking Fund for redemption of State Debts. Details of these payments are given in division D of this Chapter (§ 2, page 795).

(iv) *Special Grants.* The Constitution provides in Section 96 for the granting of special financial assistance to the States. Prior to 1933, financial assistance of varying amounts was granted by the Commonwealth to South Australia, Western Australia and Tasmania. Details of this may be found in earlier issues of the Official Year Book (see No. 40, page 695).

In 1933, the Commonwealth Government appointed the Commonwealth Grants Commission of three members to inquire into and report upon claims made by any State for a grant of financial assistance and any matters relevant thereto.

Applications have been received from South Australia, Western Australia and Tasmania each year from 1933 onwards and the recommendations of the Commission in respect of the years 1938–39 and 1951–52 to 1955–56 are shown in the following table. Commencing with 1949–50, the Commission has divided the grants recommended into two parts. One part is the Commission's estimate of the indispensable need of the claimant State for the year in which the payment is to be made after allowing a sufficient margin for safety. The other part is an adjustment of this estimate for an earlier year after an examination of the audited accounts for that year. Thus the grants for 1955–56 include an estimate of the indispensable need of the claimant State for 1955–56 and an adjustment to the estimated grant for 1953–54.

(a) Adjustment to estimated grant paid two years previously.

(v) *Tax Reimbursement Grants.* Details of the States Grants (Income Tax Reimbursement) Act 1942 and the States Grants (Entertainments Tax Reimbursement) Act 1942 are given in earlier issues of the Official Year Book (see No. 37, pages 635 to 637). These Acts provided for grants to the States as compensation for vacating the fields of Income Tax and Entertainments Tax. Grants under these Acts ceased after 1945–46 and were replaced by grants under the States Grants (Tax Reimbursement) Act 1946–1948.

This Act provided for reimbursement grants of certain specified amounts to be paid to the States during 1946-47 and 1947-48. For 1948-49 and subsequent years, the grants were assessed on the aggregate paid in 1947-48 (£45,000,000) increased in accordance with a formula based on increases in population and average wages. Details of the formula and of the treatment of arrears of State income taxes were given in earlier issues of the Official Year Book (see No. 40, page 696).

In 1950-51, an amount of £5,000,000 was paid to the States under the States Grants (Additional Tax Reimbursement) Act 1950. As this was considered as a non-recurring grant, the formula outlined above was not amended.

(vi) *Special Financial Assistance Grants.* During the years 1950-51 to 1954-55, there were heavy additions to the financial needs of the States and special assistance grants amounting to £15,000,000, £33,577,000, £27,146,000, £21,915,000 and £19,902,000 respectively were made. For details of amounts paid to each State during 1954-55 see page 775 and for payments during 1950-51, 1951-52, 1952-53 and 1953-54, see Official Year Book No. 39, page 791, No. 40, page 698, No. 41, page 619 and No. 42, page 783.

(vii) *Grants for Road Construction.* (a) *Main Roads Development Act 1923-25, Federal Aid Roads Acts 1926, 1931 and 1936, Federal Aid Roads and Works Act 1937, Commonwealth Aid Roads and Works Act 1947-1949 and Commonwealth Aid Roads Act 1950.* Details of these Acts are given in earlier issues of the Official Year Book (see No. 38, pp. 787-8 and No. 41, p. 62) and in the annual bulletin *Finance*.

(b) *The Commonwealth Aid Roads Act 1954* repealed the Commonwealth Aid Roads Act 1950 and provided for payment to the States, for a period of five years from 1st July, 1954, of an amount equivalent to 7d. per gallon on all petrol except aviation spirit which is entered for home consumption and which is subject to Customs and Excise duties as specified in Customs Tariff Items 229 c and 229 (d) (2) and Excise Tariff Item 11. Out of this amount, the following grants are to be made to the States, for construction and maintenance of roads and the purchase of roadmaking plant :—

- (a) Sixty per cent. of the amount, less £900,000 per annum, for expenditure on roads, and
- (b) Forty per cent. of the amount for expenditure on roads in rural areas other than highways, trunk or main roads.

The States may spend from the Commonwealth road grants up to £1,000,000 per annum on works connected with transport by road or water. Five per cent. of the grants is payable to Tasmania and the remainder is to be divided among the other five States, three-fifths according to population and two-fifths according to area. In addition, the Commonwealth may spend each year £800,000 on strategic roads and £100,000 on the promotion of road safety practices.

An amendment to the Commonwealth Aid Roads Act 1954 increased the allocation for road safety purposes to £150,000 per year as from 1st July, 1955.

(viii) *Tuberculosis Act 1948.* Reimbursement of Capital Expenditure. The Tuberculosis Act 1948 provided for the reimbursement by the Commonwealth of capital expenditure incurred by the States in the provision of facilities for the diagnosis, treatment and control of tuberculosis, as from 1st July, 1948. This expenditure is included in "Payments to the States" for the first time in 1954-55. It was previously classified under Capital Works and Services—Health Department.

(ix) *Other Payments.* (a) *Price Control Reimbursement.* These grants were made from 1948-49 to 1953-54 to reimburse the States for expenditure incurred in administering prices, rents and land sales controls.

(b) *Western Australian Waterworks.* The Western Australia (Water Supply) Act, 1948, provides for grants to Western Australia not exceeding an aggregate of £2,150,000 for the development of the agricultural areas, great southern towns and Goldfields Water Supply scheme. The amount provided by the Commonwealth is not to exceed half the total expenditure on the scheme.

(c) *Coal Mining Industry—Long Service Leave.* To provide funds for the payment for long service leave in the coal mining industry, the Commonwealth imposed an excise duty of 6d. per ton on coal produced from 1st November, 1949. The rate of duty was raised to 7½d. per ton from 26th August, 1951 and to 8d. per ton from 30th May, 1952. The proceeds of this excise duty are paid to a trust fund out of which the States are reimbursed for expenditure incurred in granting long service leave to employees in the coal mining industry.

(d) *Imported Houses.* A subsidy is paid to the States for houses imported by a State or a housing authority of a State after 12th October, 1949. The amount of the subsidy is the amount by which the cost of imported houses exceeds the cost of building comparable houses from local materials. The subsidy is limited to £300 per house and in aggregate to 30,000 houses or £9,000,000.

(e) *Contribution to South Australia—Port Augusta to Port Pirie Railway.* The Port Augusta to Port Pirie Railway Act 1935–1950 approved an agreement between the Commonwealth and South Australia to provide for the extension of the Trans-Australian Railway by the construction of a railway in South Australia from Port Augusta to Port Pirie. As a contribution towards reimbursing South Australia for the cost of the section to be constructed by the State, and for any additional expense incurred by the State in carrying out the Agreement, the Act provided for a payment by the Commonwealth to the State of South Australia of £20,000 per annum for twenty years, the first payment being made after the opening of the Railway in 1937–38.

(f) *Encouragement of Meat Production.* To develop meat production in Queensland and Western Australia, grants are made to these States for the provision of improved roads and other facilities for the movement of live-stock. Provision is made for the Commonwealth to meet the cost of the construction and improvement of certain specified roads in both States and the construction of eight cattle loading and unloading points in Queensland. Provision is also made for the Commonwealth to meet half the cost of improving watering facilities on specified stock routes in both States. The amount of the grants for improving watering facilities on stock routes is limited to £75,000 in Queensland and £31,500 in Western Australia. These limits were extended as from 20th April, 1954 to £150,000 in Queensland and £50,000 in Western Australia.

(g) *Grants to Universities.* The States Grants (Universities) Act 1951 provides for grants to be made to the States for the purpose of financial assistance to Universities during the three years 1950–51 to 1952–53. The Act was superseded by the States Grants (Universities) Act 1953 which came into operation on 1st January, 1953, and which increased the assistance payable.

12. **Other Expenditure.**—Expenditure under this item represents the proceeds of special industry taxes and profits from marketing schemes which are paid to trust funds or other authorities for the purposes of the industries concerned. Advance payments in respect of sales of uranium paid to the Atomic Energy Commission are also included.

Information relating to the taxes levied is given in sub-section II.—Revenue, of this section (see pages 758, 759 and 760). Details of expenditure from the trust funds are given in § 3., Commonwealth Trust Funds. Details of the price stabilization and other assistance schemes for primary industries may be found in Chapter XXII.—Agricultural Production. Details of expenditure from the Consolidated Revenue Fund during the last five years are given in the following table.

§ 4. Commonwealth Loan Fund.

Brief historical notes relating to the Commonwealth Loan Fund are given in earlier issues of the Official Year Book (*see* No. 37, page 640). In the following table, details are given of the net expenditure from the Commonwealth Loan Fund for the years 1938-39 and 1950-51 to 1954-55 and of the aggregate expenditure to 30th June, 1955. The figures shown represent "net" loan expenditure, i.e., after adjustments have been made for refunds of amounts expended in earlier years.

(b) Excludes amounts charged to War Loan Fund. (c) Includes administration and other public buildings, Australian Capital Territory. (d) Payment to National Debt Sinking Fund. *See* pages 808 and 809. (e) Payment to Swiss Loan Trust Account. *See* page 808.

NOTE.—Minus sign (–) indicates excess of repayments to Loan Fund.

Information relating to the Public Debt of the Commonwealth is given in Division D, Commonwealth and State Public Debt, of this chapter.

B. STATE FINANCE.

§ 1. General.

1. **Functions of State Governments.**—In comparing the financial returns of the States, allowances must be made for the various functions discharged by the respective Governments, and for local conditions in each case. Direct comparisons of the revenue, expenditure and debt of the individual States are difficult, owing to the fact that functions which in one State are assumed by the Central Government are in another relegated to

municipal or semi-governmental bodies which are vested with certain defined borrowing powers and whose financial transactions are not included with those of the Central Government. Care, therefore, is needed in making comparisons, and the particulars contained in this Chapter should be read with those contained in Chapter XIX.—Local Government. In many respects, moreover, the budgets of the Australian Governments differ materially from those of most European countries, owing to the inclusion therein of the revenue and expenditure of departments concerned in rendering public services, such as railways, tramways, water supply, etc., which in other countries are often left to private enterprise.

2. Accounts of State Governments.—The various financial transactions of the States are in each case mainly concerned with one or other of three Funds—the Consolidated Revenue Fund, the Trust Fund, and the Loan Fund. All revenue (except certain items paid into special funds) collected by the State is paid into its Consolidated Revenue Fund, from which payments are made under the authority of an annual Appropriation Act passed by the Legislature, or by a permanent appropriation under a special act.

Figures in § 2 following relating to New South Wales represent the transactions of the Consolidated Revenue Fund and the business undertakings included in the annual budget papers. These latter are as follows:—Railways, Tramways and Omnibuses, and Sydney Harbour Trust Section of the Maritime Services Board. Adjustments have been made to the Budget figures, however, in order to obviate duplications caused by inter-fund payments and to maintain uniformity from year to year in the presentation of statistics. Particulars for all other States relate to the transactions of the Consolidated Revenue Fund.

The Trust Fund comprises all moneys held in trust by the Government, and includes such items as superannuation funds, road funds, insurance companies' deposits, etc.

The Loan Fund is debited with all loan moneys raised by the State, and credited with the expenditure therefrom on public works or other purposes.

3. Inter-relation of Commonwealth and State Finances.—A statement in some detail, covering the inter-relation of Commonwealth and State Finances during the period from the inception of Federation to the passing of the Financial Agreement Act 1928, was published in Official Year Book No. 22, pages 379–80. Changes in the financial relations between the Commonwealth and States since the passing of the Financial Agreement Act have been described in issues of the Official Year Book from year to year (*see also* pages 795–797).

§ 2. State Consolidated Revenue Funds.

I.—Revenue.

1. General.—The principal sources of State revenue are:—

(a) Taxation; (b) The business undertakings controlled by the State Governments; (c) Sale of and rental from crown lands; (d) Payments by Commonwealth Government under the Financial Agreement, Special Grants and Tax Reimbursement Acts, etc.; (e) Interest on advances; and (f) Miscellaneous sources, comprising fines, fees, etc.

Of these sources, that yielding the largest revenue for the States as a whole is the group of business undertakings, the principal contributors being the government railways and tramways. Next in magnitude are Commonwealth payments under the Tax Reimbursement Acts, followed in order by taxation receipts, Commonwealth special financial assistance and special grants, and lands receipts. With the introduction of uniform taxation by the Commonwealth in 1942–43, the States vacated the fields of income and entertainment taxation, and payments by the Commonwealth under the Income and Entertainments Tax Reimbursements Acts and, from 1946–47, under the Tax Reimbursement Act, replaced revenue previously received from those sources. The Commonwealth, however, ceased to impose Entertainments Tax in 1953–54 and in the same year Victoria, Western Australia and Tasmania re-imposed an Entertainments Tax.

2. Revenue Received.—The following table shows particulars of the total amounts and the amounts per head of consolidated revenue received by the several States during the years 1938–39 and 1950–51 to 1954–55.

STATE CONSOLIDATED REVENUE.

(a) See § 1, para. 2, page 781. (b) In all States certain taxation collections are not paid into Consolidated Revenue Fund. For total collections see next page. (c) Includes payments under Financial Agreement, Special Grants, Prices Control Reimbursement Grants and Special Financial Assistance.

(ii) *Revenue from Taxation.* (a) *General.* The following table shows, for the year 1954-55, particulars of all State taxation collections irrespective of whether such moneys have been paid into the Consolidated Revenue Funds or not. For this reason, the particulars hereunder differ from those shown in the tables relating to the Consolidated Revenue Funds and represent a comprehensive statement of all taxation collections by the Government in each State. In this and the succeeding statements of taxation, the collections have been grouped according to the nature of the tax rather than the method of collection. For example, stamp duties on betting tickets and bookmakers' licences have been included under "Racing Tax" instead of under "Stamp Duties" and "Licences" respectively. Commonwealth payments under the State Grants (Tax Reimbursement) Act are not included.

STATE REVENUE FROM TAXATION : TOTAL NET COLLECTIONS(a) 1954-55.

(b) 1938-39 and 1950-51 to 1954-55. Prior to federation, customs and excise duties contributed the principal source of revenue from taxation. Thereafter, until the introduction of the uniform income tax scheme in 1942-43, the most productive State taxes were the various income taxes which, in 1941-42, included unemployment relief, State development and hospital taxes. Since 1941-42, the States have been reimbursed by the Commonwealth for the revenue lost by the discontinuance of these taxes. Details of the reimbursement grants are given on pp. 776 and 782. Information relating to the State income taxes which were levied prior to 1942-43 may be found in earlier issues of the Official Year Book.

The total amounts and the amounts per head raised from all sources of taxation by the several State Governments, including amounts not paid into the Consolidated Revenue Fund, during the years 1938-39 and 1950-51 to 1954-55 are shown in the following table:—

Total	7,589	14,427	18,165	20,769	22,433	24,664

(iii) *Business Undertakings.* (a) 1954-55. A very large proportion of State gross revenue is made up of receipts from business undertakings under the control of the Governments. The principal of these are railways and tramways, harbour works, water supply and sewerage, and electricity supply and, in addition, State batteries for the treatment of auriferous ores in Western Australia and various minor revenue-producing services rendered by the Governments of all States are included. For the year 1954-55 the revenue from these sources was £197,282,000 or 40.0 per cent. of the revenue from all sources. Details of revenue are as follows:—

STATE REVENUE FROM BUSINESS UNDERTAKINGS, 1954-55.
(£'000.)

Source.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.(a)	Total.

(iv) *Lands.* The revenue from the sale and rental of crown lands has, with few exceptions, been treated from the earliest times as forming part of the Consolidated Revenue Funds, and has been applied to meet ordinary expenses. The following table shows the revenue from sales and rentals of crown lands for the year 1954-55.

STATE LAND REVENUE, 1954-55.

(£'000.)

Source.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Total.
Sales ..	213	96	..	96	99	14	518

Other ..	66	98	106	5	275
Total ..	4,431	2,259	3,827	379	1,007	405	12,308

(a) Includes mining royalties, rents, etc.

The total land revenue for all States for the years 1938-39 and 1950-51 to 1954-55 respectively was:—£4,144,000, £7,858,000, £11,722,000, £12,589,000, £11,903,000, and £12,308,000.

(v) *Commonwealth Payments.* Commonwealth payments to the States represent a considerable proportion of the States' Revenue. In 1954-55, the total amount (excluding sundry minor items) paid to the Consolidated Revenue Funds of the States was £169,834,000 (34.5 per cent.). This was made up of the contribution towards interest on States' debts under the Financial Agreement, £7,585,000, special grants to the States of South Australia, Western Australia and Tasmania, £12,300,000, special financial assistance, £19,902,000 and tax reimbursement grants, £130,047,000.

In addition to these, the States receive a number of other payments which are paid to trust funds. The main items in this class are the contribution towards the sinking fund on States' debts (£3,947,000 in 1954-55) paid to the National Debt Sinking Fund and grants for Commonwealth Aid Roads (£21,461,000 in 1954-55) paid to State trust funds.

More detailed information concerning Commonwealth payments to the States is given in § 2 of Division A of this Chapter (page 775).

(vi) *Interest and Miscellaneous.* In addition to the forgoing, there are in each State several miscellaneous sources of revenue, including such items as interest, fines, fees, etc. In 1954-55, interest, mainly from loans to local governing bodies, on public account balances and for soldier land settlement amounted to £13,351,000, whilst "Miscellaneous" revenue which includes fines of the courts and fees for services, amounted to £35,300,000.

II.—Expenditure.

1. *General.*—The principal heads of State expenditure from Consolidated Revenue Funds are:—

(a) Interest, exchange and debt redemption charges in connexion with public debt; (b) Working expenses of railways, tramways and other business and industrial undertakings; (c) Education; (d) Health and charitable expenditure; (e) Justice; (f) Police; (g) Penal establishments; and (h) all other expenditure, under which heading is included public works, lands and surveys, agriculture and forestry, legislative and general administration, pensions and miscellaneous.

In earlier years, the working expenses of railways and tramways were the most important item of State Governmental expenditure but for a period prior to 1941-42 public debt charges were the heaviest item. Since then, however, railways and tramways expenditure has again taken the major place. In the year 1954-55, the working expenses of the railways, tramways and omnibuses were 35.0 per cent. of the total expenditure from the State Consolidated Revenue Funds; next in importance were education, 15.4 per cent.; public debt charges, 14.2 per cent.; charitable, public health and hospitals, 13.1 per cent.; and law, order and public safety, 5.2 per cent.

2. **Total Expenditure.**—The total expenditure from the Consolidated Revenue Funds of the several States and the expenditure per head of population during each of the years 1938–39 and 1950–51 to 1954–55 are shown in the following table:—

STATE EXPENDITURE: CONSOLIDATED REVENUE FUNDS.

Total ..	195,187	115,453	73,602	50,918	46,554	14,707	496,421

(a) See § 1, para. 2, page 781.

(b) Tasmanian transport services are under the separate control of the Transport Commission.

(c) Balance of Special Grant, 1952–53. The Special Grant for 1954–55 was brought into the Western Australian Consolidated Revenue Fund as £7,100,000, although the Commonwealth payment was £7,450,000. The Special Grant for 1954–55 taken into Tasmanian Consolidated Revenue Fund was £3,200,000, although the Commonwealth payment was £2,600,000. The difference was offset in the Tasmanian accounts against the adjusted surplus for 1952–53.

(a) See § 1, para. 2, page 781.

NOTE.—Minus sign (–) indicates deficit.

§ 3. State Trust Funds.

In addition to the moneys received as revenue and paid to the credit of the Consolidated Revenue Funds, considerable sums are held by the State Governments in trust for various purposes. The balances of trust funds held at 30th June of the years 1939 and 1951 to 1955 were as follows:—

STATE TRUST FUND BALANCES.
(£'000.)

At 30th June—	N.S.W.(a)	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Total.
1939	15,684	8,189	3,062	1,448	3,744	530	32,657
1951	43,169	18,725	33,907	6,184	12,090	360	114,435
1952	39,419	20,084	35,097	1,896	10,537	625	107,658

1954	63,284	29,023	47,518	4,131	12,957	1,671	158,584
1955	63,435	30,649	50,235	4,127	10,667	739	159,852

(a) Special Deposits Account and Special Accounts.

§ 4. State Loan Funds.

1. General.—As far back as 1842, revenue collections were supplemented by borrowed moneys, the earliest loan being raised by New South Wales for the purpose of assisting immigration, at rates of interest varying from 2½d. to 5½d. per £100 per diem, or approximately

from 4½ per cent. to 8 per cent. per annum. Australian public borrowing however is mainly due to the fact that the State Governments, in addition to ordinary administrative duties, undertake functions which in other countries are usually entrusted to local authorities or left to private enterprise. Foremost amongst these are the construction and control of the railway systems. Loan moneys have also been largely used for improvements to harbours and rivers, and for the construction of roads, water supply and sewerage works. The State loan expenditure and public debt thus differ very materially from those of most European countries, and from those of the Commonwealth, where such expenditure was very largely incurred for defence or war purposes. As shown above, the State debts consist chiefly of moneys raised and expended with the object of assisting the development of the resources of the country, and are to a very large extent represented by tangible assets.

Statements relating to "gross" loan expenditure are shown below. The gross expenditure represents the amounts disbursed during each year. Details of "net" loan expenditure, i.e., gross expenditure less any credits to the Loan Fund during the year on account of repayments of advances to local governing bodies, settlers, etc., the sale of assets, and transfers from other funds may be found in *Finance*, Bulletin No. 46, 1954-55. Such moneys are credited to the Loan Fund in the year of repayment irrespective of when the advance was made. (See also following page).

2. Gross Loan Expenditure.—(i) 1954-55. Particulars of gross loan expenditure on works, services, etc., are shown in the following table:—

STATE GROSS LOAN EXPENDITURE ON WORKS, SERVICES, ETC., 1954-55.

(a) Includes exchange, discounts and flotation expenses, revenue and general cash deficits.

(b) From Consolidated Revenue Fund.

Information relating to the State Public Debt is given in division D. Commonwealth and State Public Debt (pages 797 and 799).

C. COMMONWEALTH AND STATE FINANCE.

1. Revenue and Expenditure.—(i) *Consolidated Revenue Funds.* The following tables show the aggregate revenue and expenditure of the Consolidated Revenue Funds of the Commonwealth and States for each of the years 1938-39 and 1950-51 to 1954-55. In these tables the combined Commonwealth and State totals have been adjusted to exclude major duplications, but the separate Commonwealth and State figures are as shown in other divisions of this Chapter. The items excluded from the total figures are :—payments made by the Commonwealth to the States on account of tax reimbursements, interest under the Financial Agreement, special grants, special financial assistance, coal strike emergency grants, price control reimbursements and estimated payments of pay-roll tax by the States to the Commonwealth.

COMMONWEALTH AND STATES : REVENUE AND EXPENDITURE.

Year ended 30th June—	Revenue.			Expenditure.		
	Commonwealth.	States.	Total.	Commonwealth.	States.	Total.
	£'000.	£'000.	£m.	£'000.	£'000.	£m.
1939.. ..	95,065	124,283	209.6	94,437	128,159	212.8

D. COMMONWEALTH AND STATE PUBLIC DEBT.

§ 1. General.

Under the Financial Agreement between the Commonwealth and the States in 1927, the Commonwealth and State Public Debts were amalgamated and the Commonwealth Government accepted responsibility for the State Public Debts. The Commonwealth is reimbursed by the States for interest, exchange, etc., paid on their behalf and the debt is redeemed from the National Debt Sinking Fund to which both the Commonwealth and the States make contributions. Under the agreement, the Commonwealth arranges for all borrowings on behalf of the Commonwealth and the States, and Commonwealth securities are issued for all money borrowed.

In the statistical tables relating to Public Debt, the units of currency for debt outstanding and interest payable, except in § 3, para. 5, are :—Debt in Australia—£ Australian ; Debt in London—£ Sterling ; Debt in New York—£ (converted from dollars at the rate of \$4.8665 to £1) ; Debt in Switzerland—£ (converted from Swiss francs at the rate of 1,000 Swiss francs = £A.102 1s. 10d.).

The totals shown represent the total "face" or "book" value of the debt without adjustment on account of the difference in currency mentioned above.

In § 3, para. 5 only, details of the debt for the Commonwealth and each State are given in Australian currency.

§ 2. The Financial Agreement between the Commonwealth and the States.

1. **General.**—Full details of the Financial Agreement between the Commonwealth and the States are given in earlier issues of the Official Year Book (*see* No. 37, pp. 685–690). In this issue, a summary of the main provisions only is given.

2. **Australian Loan Council.**—The Australian Loan Council was set up to co-ordinate the public borrowings of the Commonwealth and the States. It consists of the Prime Minister of the Commonwealth, or another Minister nominated by him in writing, as Chairman, and the Premier of each State, or Ministers nominated by them in writing. Each year the Loan Council examines the loan programmes of the Commonwealth and the States and determines the total amount to be borrowed during the year. Borrowings by the Commonwealth for defence purposes are not subject to decisions of the Loan Council.

3. **Loan Raisings for the Commonwealth and States.**—Subject to the decisions of the Loan Council, the Commonwealth arranges for all borrowings for or on behalf of the Commonwealth or any State, and for all conversions, renewals, redemptions, and consolidations of the Public Debts of the Commonwealth and of the States.

If the Loan Council unanimously decides, however, a State may borrow outside Australia in the name of the State, and may issue securities for the amount so borrowed. The Commonwealth then guarantees that the State will fulfil all its obligations to bondholders in respect of the money so borrowed and the money is deemed to be borrowed by the Commonwealth for and on behalf of the State.

Subject to any maximum limits decided upon by the Loan Council for interest, brokerage, discount and other charges, the Commonwealth or any State may—

- (i) borrow within its own territory, for any purpose, money from any authorities, bodies, funds or institutions (including Savings Banks) constituted or established under Commonwealth or State law or practice ;
- (ii) borrow from the public by means of counter sales of securities ; and
- (iii) use any available public moneys.

However, any securities issued for money so borrowed or used must be Commonwealth securities on terms approved by the Loan Council.

4. **Taking over of State Public Debts.**—The Commonwealth took over on 1st July, 1929—

- (a) the balance then unpaid of the gross public debt of each State existing on 30th June, 1927 ; and
- (b) all other debts of each State existing on 1st July, 1929, for money borrowed by that State deemed by the Agreement to be money borrowed by the Commonwealth for and on behalf of the State,

and in respect of these debts assumed, as between the Commonwealth and the States the liabilities of the States to bond holders.

5. **Transferred Properties.**—In relation to State properties transferred to the Commonwealth under Section 85 of the Constitution, the States as from 1st July, 1929, were discharged from any liability in respect of principal, interest or debt redemption on so much of the debts bearing interest at 5 per cent. per annum, taken over by the Commonwealth as amounted to the agreed value of these properties, namely £10,924,323.

6. **Payment of Interest.**—For a period of 58 years from 1st July, 1927, the Commonwealth agreed to contribute the sum of £7,584,912 each year towards the interest payable on the State debts. The balance of the interest payable on the State debts is paid to the Commonwealth by the States.

7. **Sinking Fund.**—(i) *State Public Debt existing at 30th June, 1927.* A sinking fund at the rate of 7s. 6d. per annum for each £100 of the net public debts of the States existing on 30th June, 1927, and conversions thereof, was established under the terms of the Agreement. The Commonwealth contributes annually from revenue 2s. 6d. per cent. on the net public debts of the States existing at 30th June, 1927, and each State contributes annually 5s. per cent. on the net public debt of such State at 30th June, 1927. The payments of the Commonwealth and of all States except New South Wales will continue for a period of 58 years from 1st July, 1927, and those of New South Wales for a similar period from 1st July, 1928.

(ii) *New Borrowings.* On new borrowings after 1st July, 1927, (except those for redemptions or conversions, or funding a State deficit) a sinking fund at the rate of 10s. per cent. per annum was established and the State and the Commonwealth contribute from revenue equal shares for a period of 53 years from the date of raising. (New South Wales did not commence sinking fund contributions in respect of new loans raised in the financial year 1927–28 until 1st July, 1928.)

(iii) *Loans raised to meet a Revenue Deficit.* In respect of any loan (except any of the loans referred to in para. (iv) below) raised after 30th June, 1927, by a State to meet a revenue deficit accruing after that date, no sinking fund contribution is made by the Commonwealth, but the State makes a sinking fund contribution at the rate of not less than 4 per cent. per annum of the loan for a period sufficient to provide for the redemption of the loan, the contributions being deemed to accumulate at the rate of 4½ per cent. per annum compound interest.

(iv) *Loans raised to meet Revenue Deficits between 30th June, 1927 and 1st July, 1935.* In respect of loans raised by a State or by the Commonwealth on behalf of a State, on the security of Commonwealth Treasury Bills, to meet a revenue deficit accruing after 30th June, 1927, and before 1st July, 1935, special contributions are payable. Details of these contributions are given in Official Year Book No. 37, pp. 688 and 689.

(v) *National Debt Commission.* The sinking funds established are controlled by the National Debt Commission, which may arrange with any State to act as its agent in connexion with payments due to bond holders. Except where the conditions relating to sinking funds, redemption funds, and funds of a like nature held by a State on 30th June, 1929, precluded such transfer, all such funds were transferred to the National Debt Commission.

(vi) *Operation of Sinking Fund.* Sinking fund contributions made in respect of the debts of a State, and funds of that State transferred to the National Debt Commission, are not accumulated but must be applied, whenever expedient, to the redemption and repurchase of loan securities. When such a loan security is repurchased or redeemed by the National Debt Commission, it is cancelled, and the State, in addition to sinking fund contributions otherwise payable, pays a further annual sinking fund contribution at the rate of 4½ per cent. on the face value of the cancelled security.

(vii) *Oversea Debt.* Sinking fund contributions in respect of oversea debt shall be calculated at the mint par of exchange prevailing on 1st July, 1927.

8 **Borrowing by Semi-Governmental Authorities.**—It was realized at the inception of the Loan Council that, in the interests of co-ordinated borrowing, the Council should be advised of borrowing of large amounts by semi-governmental authorities. In May, 1936, all resolutions passed by the Loan Council in connexion with semi-governmental borrowings were consolidated into one set of rules, which superseded all previous resolutions. This set of rules provides, *inter alia*, for the submission of annual loan programmes in respect of semi-governmental authorities proposing to raise £100,000 or more in a year, for the consideration of such programmes in conjunction with the loan programme of the Government concerned, and for the fixing of the terms of individual semi-governmental loans coming within the scope of the annual programme.

§ 3. Commonwealth and State Public Debt Outstanding.

1. **Public Debt, Annual Interest Payable and Average Rate of Interest at 30th June, 1955.**—In the following table, details are given of the Commonwealth and State Public Debt, annual interest payable and average rate of interest at 30th June, 1955.

(a) See § 1, page 795.

In some States, certain public utilities such as tramways, water supply and sewerage, harbour services, etc., are controlled by boards or trusts, which, in addition to receiving advances from the central Government, raise loans by public borrowing on their own behalf, while in other States these services are controlled by the central Government. Comparison of the debts of the States is therefore difficult, but on page 804 figures showing the aggregate debts of the States, including these local and semi-governmental authorities, are shown for the years 1938-39 and 1951-52 to 1954-55.

5. Public Debt and Interest Payable in Australian Currency.—In the foregoing tables relating to Commonwealth and State public debt, the debt outstanding in London is expressed in sterling, debt outstanding in New York is expressed in pounds converted from dollars at the rate of \$4.8665 to £1 and debt outstanding in Switzerland is expressed in pounds converted from Swiss francs at the rate of 1,000 Swiss francs = £A.102 1s. 10d. This method of showing the debt gives no indication to the amount that the Australian Government would have to find to repay the debt. In the following tables, the public debt and the interest payable are shown in terms of Australian currency throughout. Debt in London, New York and Switzerland has been converted to Australian currency at the selling rate of exchange on 30th June, 1955.

(a) Excludes Overdrafts and Internal Treasury Bills.

(ii) *Interest Rates.* (a) *London.* The rates of interest payable on Treasury Bills and Debentures in London during the following periods were : 1938-39—minimum rate, 2 per cent., maximum rate, 2½ per cent. ; 1949-50 to 1950-51—minimum rate, 2 per cent., maximum rate, 2½ per cent. On 8th November, 1951, the rates were increased to—minimum rate, 2½ per cent., maximum rate, 2¾ per cent.

(b) *Australia.* The Treasury Bill rates in Australia were as follows :—1½ per cent. from 1st January, 1935 ; 1½ per cent. from 1st May, 1940 ; 1½ per cent. from 1st May, 1943 ; 1 per cent. from 1st March, 1945 ; ¾ per cent. from 1st May, 1949 ; 1 per cent. from 1st August, 1952.

9. **State and Municipal and Semi-Governmental Authority Public Debt.**—For the reasons indicated on page 801, direct comparisons of the debts of the several States should be made with caution. The table following shows, for 1938-39 and 1950-51 to 1953-54, particulars of the debts of the States and the debts due to the public by municipal and semi-governmental authorities in each State.

STATE AND MUNICIPAL AND SEMI-GOVERNMENTAL AUTHORITY PUBLIC DEBT.

§ 4. Commonwealth Loan Raisings.

1. **New Loans Raised, 1952-53 to 1954-55.**—Under the Financial Agreement between the Commonwealth and the States, the Commonwealth is responsible for raising all loan moneys required by both the Commonwealth and the State Governments. Details of loan transactions given in this section relate, therefore, to all loans raised for the Commonwealth and the States. The following table shows details of new loans raised in Australia by the Commonwealth during the three years 1952-53 to 1954-55. No new loans were raised in London during this period, and the only new loans raised in New York were those from the International Bank for Reconstruction and Development. Details of these loans are given in para. 3, below.

(a) Includes loans raised for redemption of Treasury Bills, but excludes conversion loans, loans for redemption of debt maturing in London, short-term debt and certain miscellaneous debt (see below).

(b) Special issue. For details see following paragraph.

The loans of £123,000,000, £80,000,000 and £48,000,000 issued in June, 1953, 1954 and 1955 respectively were for the purpose of fulfilling an undertaking given by the Commonwealth that the States would have access to loan funds for their works programmes up to the approved Loan Council borrowing programmes. These programmes totalled £190,182,000 in 1952-53, £200,000,000 in 1953-54 and £180,000,000 in 1954-55. Subscriptions to these special loans came from the following sources :—

—	1952-53.	1953-54.	1954-55.
	£	£	£
National Debt Commission—			
Investment of surplus received from Commonwealth Revenue
Investment of Australian currency proceeds of International Bank Loan	18,500,000	18,000,000	22,150,000
Swiss Loan Trust Account	5,750,000	6,150,000
Commonwealth Trust Moneys—Investment	104,500,000	56,250,000	19,700,000
Total	123,000,000	80,000,000	48,000,000

Finance for the approved Loan Council programmes from 1952-53 to 1954-55 was provided from the following sources—

—	1952-53.	1953-54.	1954-55.
	£	£	£
Public Loans, domestic raisings, etc.	67,357,000	125,647,000	135,527,000
Special Commonwealth Loan	122,825,000	74,353,000	44,473,000
Total	190,182,000	200,000,000	180,000,000

In addition to the new loans raised shown in the foregoing table, and the redemption and conversion loans shown in the following table, there were other miscellaneous debt operations during 1954-55, namely :—Savings Certificates and War Saving Certificates (Five and Seven Years' Series), decrease of £3,693,000 ; War Savings and Savings Stamps, decrease of £1,000 ; National Savings Bonds and Stamps, decrease of £13,000 ; "Over the Counter Sales" (small amounts borrowed by virtue of certain statutory rights) £8,138,900. Advance loan subscriptions in hand decreased from £9,894,000 at the end of 1953-54 to £5,175,000 at the end of 1954-55.

2. Conversion and Redemption Loans, 1952-53 to 1954-55.—(i) *Australia*. Particulars of conversion loans raised in Australia during the three years 1952-53 to 1954-55 are given in the following table :—

COMMONWEALTH CONVERSION AND REDEMPTION LOANS RAISED IN AUSTRALIA.

Month of Raising.	Old Loan.		New Loan.				Increase in Annual Liability for Interest.

(a) The cost of issuing the new loans at a discount has not been taken into account. (b) Converted at selling rate of exchange on 30th June, 1955, \$2.2159 = £A.1.

3. *International Bank for Reconstruction and Development Loans*.—To provide dollar funds for the purchase of certain types of capital equipment and plant which were indispensable to the furtherance of development in Australia and which could be obtained only in the United States of America and Canada, the Commonwealth Government, in August, 1950, arranged a loan of \$100,000,000 from the International Bank for Reconstruction and Development. The loan is for a term of 25 years with interest at 4½ per cent. per annum on the amount of the loan withdrawn and outstanding from time to time. In addition, there is a commitment charge of ¾ per cent. per annum on the amount of the loan not withdrawn from time to time. Repayment of the loan is to be made in half-yearly instalments commencing on 1st September, 1955. The last instalment is payable on 1st September, 1975. At the 31st December, 1953, the whole of the loan had been drawn.

In July, 1952, a further loan of \$50,000,000 was arranged. This loan is for a term of 20 years with interest at 4½ per cent. per annum on the amount of the loan withdrawn and outstanding from time to time. There is also a commitment charge of ¾ per cent. per annum similar to that of the previous loan. Repayment of the loan is to be made in half-yearly instalments from 1st June, 1957 to 1st December, 1972. At 30th September, 1954, the whole of the loan had been drawn.

In March, 1954, a third loan of \$54,000,000 was arranged. This loan is for a term of 15 years with interest and commitment charges similar to those for the previous loan for \$50,000,000. Repayment of the loan will be made in half-yearly instalments from 1st March, 1957 to 1st March, 1969. Up to 30th June, 1955, \$48,214,957 had been drawn on the loan.

In March, 1955, a fourth loan of \$54,500,000 was arranged. This loan is for a term of 15 years with interest at 4½ per cent. per annum. There is also a commitment charge of ¾ per cent. per annum similar to that of previous loans. Repayment is to be made in half-yearly instalments from 15th March, 1958 to 15th March, 1970. Up to 30th June, 1955, \$5,411,552 had been drawn on the loan.

The capital equipment and plant purchased from the proceeds of these loans are made available to Commonwealth and State Government departments and agencies and private firms and individuals for use in the development of Australian resources. Subject to a special import licence being obtained, the goods are imported and distributed through normal channels and payment made through the Australian banking system. Periodically, schedules of dollar payments for goods imported against loan licences are submitted to the International Bank for Reconstruction and Development. These schedules form the basis for periodical drawings by the Commonwealth against the loan. The amounts drawn are paid to the Commonwealth Bank to replace the dollar funds used in making the purchases. In return, the Commonwealth Government receives Australian currency from the Commonwealth Bank. This is paid to the Commonwealth National Debt Sinking Fund out of which the loans will subsequently be redeemed.

4. **Swiss Loan.**—To foster industrial development in Australia and to stimulate trade relations between the two countries, the Commonwealth Government arranged for the issue in Switzerland in November, 1953, and February, 1955, of two public loans each of 60,000,000 Swiss francs. The loans were underwritten by a Swiss banking group headed by the Swiss Bank Corporation, the Crédit Suisse and the Union Bank of Switzerland. Certain Swiss taxes connected with the issue and servicing of the loan were paid on an agreed basis by the Australian Government.

The first loan was for a period of 15 years with an option on the part of the Australian Government to repay the loan in whole or in part after 12 years. The rate of interest was 4 per cent. and the issue price £99. Bondholders have the option of requiring payment either in Australian pounds or in the foreign currency equivalent of Australian pounds.

The second Swiss loan was for a period of 15 years with an option to redeem after 10 years. The rate of interest was 3½ per cent. and the issue price £99 10s. Bonds and interest are payable only in Swiss francs.

The loans were both fully subscribed and Swiss franc proceeds, after deducting borrowing expenses, were sold by the Commonwealth Government to the Commonwealth Bank in return for an equivalent amount of Australian currency. A trust account, named the Swiss Loan Trust Account, was opened and the proceeds from the two loans were transferred to this account and were used in assisting the Loan Council borrowing programmes for the 1953–54 and 1954–55 financial years. The Swiss Loan Trust Account will also be used as a sinking fund for the loans, and, when the time comes for repayment, the trust account investments can be realized. The provisions of the National Debt Sinking Fund Act do not apply to the loans.

5. **Summary of Loan Transactions, 1950–51 to 1954–55.**—The following table contains a summary of loan transactions on behalf of the Commonwealth and State Governments during the five years 1950–51 to 1954–55.

E. TAXES ON INCOME.

NOTE.—The following section contains details of taxes on individuals and companies for the 1956-57 financial year.

1. **General.**—A description of the development of income taxes in Australia appeared in Official Year Book No. 35, p. 926. Since July, 1942, the Commonwealth, under the uniform tax arrangement, has been the only authority imposing taxes on income. Taxes on income are assessed and imposed under the Income Tax and Social Services Contribution Assessment Act 1936-1956 and the Income Tax and Social Services Contribution Act 1956. The latter Act is an annual measure and its primary purpose is to declare the rates of tax and contribution payable for the financial year. The rates for the financial year are levied, in the case of individuals, on the income of that year and, in the case of companies, on the income of the preceding year. Thus tax for the financial year 1956-57 is levied on the income of individuals in 1956-57 and on the income of companies in 1955-56.

2. **Present Taxes.**—For individuals, a single tax known as the Income Tax and Social Services Contribution is levied. All companies are liable for primary income tax and in addition, private companies are subject to tax on undistributed income.

3. **Assessable Income.**—Income taxes in Australia are levied, primarily, on all income derived from Australian sources by any person, rather than on income derived from all sources by Australian residents. Thus a non-resident is taxed on income derived in Australia, while a resident is, in general, not taxed on income other than dividends derived from overseas, if the income is taxed in the country in which it is derived.

Certain types of Australian income are exempt from tax in Australia, the more important being (i) pensions, child endowment and other payments under the Social Services Act 1947-1955 and the Tuberculosis Act 1948, (ii) income from gold-mining and uranium mining, (iii) twenty per cent. of certain mining profits, (iv) dividends paid out of exempt mining profits, (v) pay and allowances earned by a member of the Defence Forces while serving in Korea after 26th June, 1950, and Malaya after 28th June, 1950, and (vi) income received from a scholarship, bursary or other education allowance.

No amount is included in assessable income on account of a house occupied by its owner. Profits derived from the sale of property are not assessable income if such property was not purchased with a view to resale at a profit.

Assessable income is divided into two main groups—personal exertion and property. Personal exertion income includes all wage, salary, business and professional incomes, while property income includes all rents, dividends and interest. No distinction between personal exertion and property income is made for companies. The further tax on property income imposed on individuals in cases where the total taxable income exceeded £400 and the amount of property income exceeded £100 was discontinued from the 1953–54 financial year.

Expenses incurred in earning income, certain subscriptions to business associations, and trade union dues, are allowable deductions. Losses incurred in previous years may be carried forward as a deduction.

Because of uncongenial climatic conditions, isolation and high cost of living, taxpayers living in certain areas are allowed an additional deduction. Two zones have been prescribed, and the allowances are Zone A, £180 and Zone B, £30.

Income Tax and Social Services Contribution is levied on the taxable income remaining after making these deductions and the concessional deductions to which reference is made in paragraph 4 following.

4. Concessional Deductions.—Concessional allowances for dependants, medical expenses, life assurance and superannuation contributions, etc., are made by way of a deduction from income. The maximum deduction allowed for each dependant, for a parent, or for a housekeeper employed by the taxpayer for the financial year 1956–57 is shown in the following table.

CONCESSIONAL DEDUCTIONS FOR DEPENDANTS, ETC.

(£.)

Dependant, etc. (Resident).	Maximum Deduction. (a)
Spouse	130
Daughter-housekeeper (b)	130
Housekeeper (b) having care of taxpayer's children under 16 years of age	130
Parent	130
One child under 16 years of age	78
Other children under 16 years of age	52
Invalid relative(c)	78
Child 16 to 21 years receiving full-time education (d)	78

(a) These deductions are allowed only if the dependant or parent is a resident of Australia. If the dependant is maintained for part only of the year a partial deduction is allowed. (b) Of a widower or widow. (c) Child, step-child, brother or sister over 16 years of age. The amount of the deduction is reduced by any invalid pension received. (d) The amount of the deduction is reduced by the value of any assistance provided by the Commonwealth or a State.

When the dependant or person maintained derives separate income, the amount of the concessional deduction allowable is reduced as follows :—

In the case of a spouse or daughter-housekeeper, by £2 for every £1 by which the separate net income exceeds £65 ; for each parent maintained, by £1 for each £1 of separate income ; and for each dependent child or invalid relative, by £2 for every £1 by which the separate net income exceeds £52.

For the 1956–57 financial year, medical expenses paid by a taxpayer who is a resident, in respect of himself or dependants, including children under 21 years of age, up to £150 for each person, are allowed as a concessional deduction. Medical expenses include payments made to a legally qualified medical practitioner, nurse or chemist, or a hospital, in respect of an illness or operation, payments for dental services not exceeding £30 for any one person, payment for therapeutic treatment and eye tests, expenditure on medical or surgical appliances, artificial limbs or eyes, hearing aids and spectacles, and the remuneration of an attendant of a person who is blind or confined to bed or invalid chair.

Other concessional deductions allowed to resident taxpayers include, (i) payments of life, etc., insurance premiums and contributions to superannuation, medical, hospital and similar funds and friendly societies, not exceeding an aggregate of £300, (ii) funeral expenses of a dependant not exceeding £30, and (iii) expenditure incurred for the full-time education of children or dependants who are less than 21 years of age (maximum £100 per child or dependant).

In addition to concessional deductions, all taxpayers (residents and non-residents) are allowed a deduction from income of rates and taxes on land which are annually assessed, gifts to charitable, benevolent or patriotic funds and one-third of amounts paid as calls to certain mining, forestry and oil-prospecting companies.

5. **Effective Exemptions from Tax.**—For the financial years 1950–51 to 1956–57, resident taxpayers without dependants were exempt from Income Tax and Social Services Contribution if their income did not exceed £104. The effect of the deductions for dependants was to exempt taxpayers up to the incomes shown hereunder.

RESIDENT TAXPAYERS : EFFECTIVE EXEMPTIONS FROM TAX.
(£.)

Taxpayer with—	Income Tax and Social Services Contribution— Financial Years 1950–51 to 1952–53.	Income Tax and Social Services Contribution— Financial Years 1953–54 to 1956–57.
No dependants	104	104
Wife	208	234
Wife and one child	286	312
„ „ two children	338	364
„ „ three children	390	416
„ „ four children	442	468

For the 1956–57 financial year, an aged person (i.e., a man who has attained the age of 65 years or a woman who has attained the age of 60 years) is exempt from Income Tax and Social Services Contribution if his net income (i.e., gross income less expenses of earning that income) does not exceed £390. A married couple both of whom qualify by age for the concession, are exempt from tax if their combined net incomes do not exceed £780.

6. **Rates of Income Tax and Social Services Contribution on Individuals.**—The following table shows the rates of income tax and social services contribution for the financial years 1953–54 to 1956–57.

16,000	upwards	9,157 5 10	168	8,417 18 4	160.

For primary producers, the rate of Income Tax and Social Services Contribution for the current year is determined by the average of the taxable incomes for the five years up to and including the current year. A taxpayer may elect not to have these averaging provisions applied to his assessment, but the election once made, is irrevocable. The application of the averaging provisions is limited to that part of the taxable income which does not exceed £4,000, and when the taxable income exceeds £4,000, the balance is taxed at ordinary rates. When the taxable income is less than £4,000, the rate of tax for averaging purposes is limited to the rate on a taxable income of £4,000.

Commencing with 1953-54, the taxable income, including any abnormal receipts, of actors, artists, composers and inventors, is taxed at the rate appropriate to the normal taxable income plus one-third of the abnormal receipts.

Interest on Commonwealth Loans issued prior to 1st January, 1940, is subject to the condition that it shall not be taxed at rates higher than those for 1930-31. Interest on Commonwealth Loans issued after 1st January, 1940, and interest on certain State semi-governmental loans issued free of State income tax receive a rebate of 2s. in the £1.

The minimum amount of Income Tax and Social Services Contribution payable is 10s. and the amounts payable and rebates are calculated to the nearest shilling.

7. **The Income Tax (International Agreements) Act 1953.**—This Act provided for relief from double taxation of incomes flowing between Australia and the United States of America. It also provided similar relief in respect of the United Kingdom, which had been covered by the Income Tax Assessment Act since 1947.

8. **Taxes on Specified Incomes.**—The following table shows the Income Tax and Social Services Contribution payable by taxpayers, with various incomes and numbers of dependants, on income derived in each year from 1950-51 to 1956-57 :—

9. **Pay-as-you-earn.**—Individual taxpayers pay tax on a pay-as-you-earn basis. A similar scheme does not operate for companies.

(a) *Salary and Wage Earners.* Salary and wage earners are subject to instalment deductions for payment of tax at current rates out of weekly (or fortnightly) earnings. Employers are required to deduct tax and contribution from each payment of wages and salary to an employee at the appropriate rate in accordance with a prescribed instalment scale. This scale shows the amount to be deducted according to the income and number of dependants of the employee.

Under the group scheme of deduction, which covers most employers of more than ten persons, the amount deducted is remitted to the Taxation Department, and after 30th June each year each employee is given a group certificate by his employer showing the amount of deductions made during the year. This certificate is forwarded to the Taxation Department with the employee's return of income for the year. If the tax assessed on the basis of this return is less than the amount shown on the group certificate a refund is forwarded to the employee with his assessment. If the tax assessed is greater than the amount shown on the group certificate the employee is required to pay the balance.

Under the stamp scheme used by small employers, a stamp deduction sheet in two parts is used. Each four weeks the employer purchases stamps (also in two parts) for the amount of the deductions made each pay day and sticks one part on each half of the sheet. At the end of the year, the employer gives the employee one half of the sheet and sends the other half to the Taxation Department. The employee's half is then used in the same way as a group certificate.

(b) *Taxpayers with Income other than Salary and Wages.* These taxpayers pay provisional tax in respect of income other than salary and wages. Collection of tax and contribution for the current year is made at the same time as collection and assessment for the previous year is adjusted. The notice of assessment shows an amount of provisional tax and contribution for the current year. This provisional amount is an approximation to the tax and contribution which will be payable after the return of income for the current year has been lodged. It is ascertained by assuming that the income of the current year will be the same as that for the previous year (for which a return has already been lodged) but the rates for the current year are applied to the income and not the rates for the year in which it was derived. The assessment notice shows the provisional tax and contribution paid in the previous year as a credit against the tax and contribution assessed on the basis of the return for that year. On receipt of his assessment the taxpayer may elect to substitute his estimate of income for the current year and pay tax on the basis of this estimate. To protect the revenue, a penalty is imposed if the taxpayer elects to pay provisional tax on an estimate of income more than 20 per cent. lower than the income of the previous year and he underestimates his income by more than 20 per cent.

Employees with income of £100 or more from sources other than salaries and wages are required to pay provisional tax in respect of that income.

10. **Lodgment of Returns and Assessment of Tax.**—All persons with assessable income in excess of £104 are required to lodge returns by the 31st July each year (31st August for business incomes). Income Tax and Social Services Contribution payable is assessed, and assessment notices showing the amount payable are issued, during the year following the year of income (in most cases from September to June following the lodgment of the return). The approximate amount payable, however, has already been collected during the income year—from employees by deductions from wages and from non-employees by a provisional tax. The amount shown on the assessment notice is therefore adjusted against the amount already collected and any difference either collected or refunded.

11. **Company Income Taxes.**—(i) *General.* For taxation purposes, companies are divided into two main groups—public and private. A private company is defined as a company in which all the issued shares are held by not more than twenty persons or which is capable of being controlled by not more than seven persons, and which is not a company in which the public is substantially interested or a subsidiary of a public company. All other companies are regarded as public companies. Both public and private companies pay primary Income Tax and Social Services Contribution assessed on a taxable income ascertained by the same principles as for individuals.

Dividends received are assessable income, but resident companies receive a rebate at the average rate on the amount of dividends included in the taxable income. This rebate is not allowed to non-resident companies.

(ii) *Rates of Tax.* The rates of Primary Tax, in the case of public companies, and Primary and Additional Tax for private companies, for the financial years 1953-54 to 1956-57, are shown in the table below.

Super Tax and Undistributed Income Tax ceased to be levied on public companies in the 1951-52 financial year and Additional Income Tax and Social Services Contribution ceased in the 1953-54 financial year. For details see Official Year Book No. 39, p. 846 and No. 40, p. 743.

RATES OF TAX : COMPANIES, 1953-54 TO 1956-57 FINANCIAL YEARS.
(Pence per £.)

Type of Company.	Rate of Tax—				
	1953-54 to 1955-56.		1956-57.		1953-54 to 1956-57.
	Up to £5,000.	On Remainder of Taxable Income.	Up to £5,000.	On Remainder of Taxable Income.	
Private	48	72	60	84	120
Co-operative and Non-profit(a)	60	84	72	96	..
Life Assurance—					
Mutual	48	72	60	84	..
Other—					
(1) Mutual Income ..	48	72	60	84	..
(2) Other Income(b) ..	(c) 72	84	(c) 84	96	..
Other	(c) 72	84	(c) 84	96	..
Interest paid to a Non-resident ^d	84	84	96	96	..

(a) Non Profit companies with taxable incomes not exceeding £104 are exempted from tax and if the taxable income does not exceed £208 the tax may not exceed one-half (1953-54 to 1955-56) or eleventh-twentieths (1956-57) of the amount by which the taxable income exceeds £104. (b) The rate of 72d. (1953-54 to 1955-56) or 84d. (1956-57) is levied on the amount by which the £5,000 exceeds the mutual income. (c) For non-resident companies dividends included in this part of the taxable income are taxed at 60d. (1953-54 to 1955-56) and 72d. per £1 (1956-57). (A resident company is allowed a rebate of tax in respect of dividends received.) (d) If the non-resident is not a company, tax is paid only on income in excess of £104.

A private company incurs liability for additional tax on its undistributed income if it fails to make a sufficient distribution of income within a specified period after the close of the year of income. The tax is levied on the undistributed amount which, for practical purposes, is the taxable income less—

- (a) Primary income tax and social services contribution payable ;
- (b) Retention allowance (i.e., the proportion of the reduced distributable income which a company may retain without incurring liability for undistributed income tax) ; and
- (c) Certain dividends paid by the company.

For the financial years 1953-54 to 1956-57, the retention allowance is the following proportion of the reduced distributable income :—

- On first £1,000 or part, 50 per cent.
- On next £1,000 or part, 40 per cent.
- On next £1,000 or part, 35 per cent.
- On next £1,000 or part, 30 per cent.
- On balance, 25 per cent., and
- Ten per cent. of distributable income from property, except dividends from other private companies.

For the financial years 1953-54 to 1956-57, the reduced distributable income is calculated by deducting from the taxable income the primary tax payable and the amount of all property income included in taxable income. The additional tax imposed on undistributed income was imposed at a flat rate of 10s. in the £1 on the undistributed amount.

12. Yield of Income Taxes.—(i) *Collections from Income Taxes.* The following table shows the collections of taxes imposed on income for the years 1938-39 and 1950-51 to 1954-55 :—

INCOME TAX COLLECTIONS.
(£'000.)

Year.	Total.		
	Commonwealth.(a)	State.(b)	Total.
1938-39	11,883	29,796	41,679
1950-51	451,488	291	451,779
1951-52	551,142	155	551,297
1952-53	554,737	132	554,869
1953-54	528,181	92	528,273
1954-55	532,916	52	532,968

(a) Includes Social Services Contribution, War Time (Company) Tax, Super Tax, Undistributed Profits Tax and Wool Deduction. (b) Amounts shown for years other than 1938-39 are arrears of State Income Taxes.

(ii) *Commonwealth Income Tax Assessed.* The amounts of Commonwealth Taxes assessed on the income of recent years are shown in the following table. The amounts are shown under the year in which most of the assessments were made, i.e., the year following the income year. Income taxes assessed on income for past years and for the years shown after the close of the normal assessing period, are not included.

(a) Includes Social Services Contribution. (b) Actual income is the total income (less any expenses of earning the income) and includes any exempt income and any concessional deductions or expenses of a capital nature which are allowed as a deduction for the purpose of assessing taxable income. (c) Grade £251-£300. (d) Grade £601-£750. (e) Grade £751-£1,000. (f) Grade £15,001-£25,000. (g) Grade £25,001-£50,000.

CHAPTER XXII.

AGRICULTURAL PRODUCTION.

NOTE.—Values of Australian oversea trade shown throughout this chapter are expressed as £A. f.o.b. Port of Shipment, except where otherwise indicated.

§ 1. Introductory.

Chapter XXI, Agricultural Production, of Official Year Book No. 42, the latest statistics included were, in general, for the year 1953-54. In this issue, it has been possible in most cases, to provide details for the year 1955-56. Full details for 1954-55 have not been included owing to limitations of space, but these are available in the bulletin *Primary Industry Parts I and II* for 1954-55. Beginning with 1954-55, detailed information on Northern Territory agriculture has been available and, where applicable, this has been included in the tables and text of this chapter.

In general, statistics in this chapter relating to agricultural production are derived from "census" returns supplied by approximately 250,000 farmers who utilize one acre or more of land for agricultural or pastoral purposes. The returns are collected by the Statisticians of each State and by the Commonwealth Statistician in respect of the Northern Territory and the Australian Capital Territory. The returns are collected on a substantially uniform basis in all States at 31st March, each year, and relate to areas sown and crops produced in the previous twelve months. Where harvests are not completed by March (e.g. potatoes) provision is made in some States for a special collection after the harvest is completed and in others for the inclusion of the total estimated yield expected from the complete harvest. In cases where additional data are available from marketing authorities or other sources, these are used in conjunction with the "census" returns. The statistics published in this Chapter are therefore shown in agricultural years. For most purposes there will be little error involved in considering them to apply to years ending on 30th June.

In 1955-56, the lists of land holdings used in the collection of agricultural and pastoral statistics in New South Wales were reconciled with lists of ratable land of one acre or more in extent recorded by country shires for rating purposes. After elimination of ratable lands not used for agricultural and pastoral purposes, this reconciliation led to the addition of 4,784 land holdings, totalling 3,131,462 acres, to the annual collection. As a high proportion of the additional holdings from which returns were obtained in 1955-56 were used for grazing, either full-time or part-time, and were on the whole lightly stocked, the only statistics appreciably affected were number and area of rural holdings, and persons engaged on rural holdings. For these statistics, the extent of the increase due to the inclusion of the additional land holdings is shown in § 28, Number and Area of Rural Holdings and Employment thereon. As regards other items, continuity of the series was not materially affected by the inclusion of the additional land holdings.

§ 2. Progress of Agriculture.

1. **Early Records.**—In an "Account of Live Stock and Ground under Crop in New South Wales, 19th August, 1797", Governor Hunter gives the acreage of crops as follows:—Wheat, 3,361 acres; maize, 1,527 acres; barley, 26 acres; potatoes, 11 acres; and vines 8 acres.

The following details of crops were collected in 1808:—Wheat, 6,874 acres; maize, 3,389 acres; barley, 544 acres; oats, 92 acres; peas and beans, 100 acres; potatoes, 301 acres; turnips, 13 acres; orchards, 546 acres; and flax and hemp, 37 acres.

A brief reference to the attempts at cultivation by the first settlers in New South Wales and to the discovery of suitable agricultural land on the Parramatta and Hawkesbury Rivers prior to the year 1813 and west of the Blue Mountains thereafter is contained in early issues of the Official Year Book. (*See No. 22, p. 670.*)

By the year 1850, the area of crops had increased to 491,000 acres, of which 198,000 acres were cultivated in what is now the State of New South Wales, and 169,000 acres in Tasmania. At the end of 1850, the area under cultivation in Victoria, which was then the Port Phillip District of New South Wales, was 52,190 acres.

The gold discoveries of 1851 and subsequent years had at first a very disturbing effect on agricultural progress, the area of crops declining from 491,000 acres in 1850 to 458,000

acres in 1854. The demand for agricultural products occasioned by the large influx of population was, however, soon reflected in the increased area cultivated, for at the end of 1858 the land under crop in Australia exceeded a million acres.

2. **Progress of Cultivation.**—The following table shows the area of crops in each of the States and Territories of Australia at decennial intervals since 1860–61 and during each of the eleven seasons ended 1955–56, and on page 831 there is a graph showing the area of crops in Australia from 1860 onward.

(a) Not available.

The progress of agriculture was practically uninterrupted from 1860–61 to 1915–16, when, as the result of a special effort to raise wheat during the 1914–18 War, 18.5 million acres were cultivated in Australia. Four years later the area of crops declined to 13.3 million acres owing to the accumulation of wheat stocks consequent upon the difficulty of securing freight space during the war years. After the termination of hostilities, the area again began to expand and rose steadily to the record area of 25.2 million acres in 1930–31. Thereafter, the slump in wheat prices seriously depressed the agricultural industry and the area of crops receded to just under 20 million acres in 1935–36.

By 1938–39, the industry had recovered from the depression and the total area under cultivation reached the high level of 23.5 million acres. Thereafter, as a result of war-time man-power shortages and shipping difficulties, the area declined to less than 16 million acres in 1943–44. After 1943–44, production gradually increased again until, in 1947–48, 22.3 million acres were sown to crops. This upward trend was reversed after 1948–49, largely as a result of the transfer of many primary producers from agricultural to pastoral production following on high prices for wool. In recent years, the area sown has again increased from 19.7 million acres in 1951–52 to 21.7 million acres in 1954–55 and 22.5 million acres in 1955–56. As the area under wheat in Australia constitutes a large proportion of the total area cropped (56 per cent. during the ten years ended 1954–55) fluctuations in the latter follow broadly the same pattern as changes in wheat areas.

3. **Area under Sown Pastures.**—In all the States, there are considerable areas of grasses mainly sown on land from which scrub has been cleared or on land which it is desired to rest from cultivation. These areas, which are not included in “area of crops”, have expanded from about 5.3 million acres in 1929–30 to about 28.4 million acres in 1955–56.

4. **Australian Agricultural Council.**—Arising out of a conference of Commonwealth and State Ministers on agricultural and marketing matters, held at Canberra in December, 1934, a permanent organization known as the Australian Agricultural Council was formed. The Council consists of the Commonwealth Ministers for Primary Industry and for Territories and the State Ministers of Agriculture, with power to co-opt the services of other Commonwealth and State Ministers as required. The principal functions of the Council are:—(i) the promotion of the welfare and development of agricultural industries generally; (ii) exchange of information on agricultural production and marketing; (iii) the improvement

of the quality of agricultural products and the maintenance of high grade standards; (iv) to ensure, as far as possible, balance between production and available markets; and (v) organized marketing, etc.

In addition, a permanent Standing Committee on Agriculture was formed to advise the Council; to secure co-operation and co-ordination in agricultural research; to advise State and Commonwealth Governments on the initiation and development of agricultural research; and to secure co-operation between all Governments in respect of quarantine measures against pests and diseases of plants and animals.

§ 3. Distribution, Production and Value of Crops.

1. Area of Crops in States and Territories.—The following tables show the areas in the several States, the Northern Territory and the Australian Capital Territory of each of the crops for the seasons 1954-55 and 1955-56.

(a) Excludes pasture land sown to lucerne and oats for grazing. (b) Excludes pasture land sown to lucerne for grazing.
(c) Not available. Included in "All other Crops". (d) Incomplete. See footnotes to individual States.
(e) Not available for publication. Included in "All other Crops".

2. **Relative Areas of Crops in States and Territories.**—The proportion of each of the major crops cultivated in the various States and Territories to the total area of crops for the season 1955-56 is shown in the next table. In four of the States, namely, New South Wales, Victoria, South Australia and Western Australia, wheat-growing for grain is by far the most extensive crop. In Queensland the most extensive crops are green fodder, wheat, and sugar-cane, and in Tasmania, hay, green fodder, and oats.

As pointed out previously, wheat is the main crop in Australia, the area thereof, for grain only, representing 45 per cent. of the total area of crops in 1955-56.

RELATIVE AREAS OF CROPS, 1955-56.

(Per cent.)

Crop.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Wheat (Grain) ..	51.9	47.1	22.3	40.5	54.1	1.9	..	10.3	45.3

Total Gross Value	77,490	278,638	332,324	383,108	372,135	339,635

(a) Includes Government assistance. (b) Incomplete, excludes Western Australia. (c) Incomplete. Market gardens and pulse only.

9. Value of Production and Indexes of Price and Quantum of Production.—(i) *Gross and Net Values*, 1954-55. Values of agricultural production for each State are shown for 1954-55 in the following table. A more detailed reference to the value of production of agriculture and other industries in Australia as well as a brief explanation of the terms used will be found in Chapter XXX.—Miscellaneous.

In computing the net value of production, no deduction has been made for the cost of maintenance of farm buildings and fences, nor for the depreciation of farm plant; consequently, the figures stated are inflated to that extent.

GROSS, FARM AND NET VALUES OF AGRICULTURAL PRODUCTION, 1954-55.

(£'000.)

State.	Gross Production valued at Principal Markets.	Marketing Costs.	Gross Production valued at Farm.	Value of Materials Used in Process of Production.		Net value of Production. (a)

§ 4. Wheat.

1. *Royal Commission on the Wheat Industry.*—A Royal Commission was appointed in January, 1934 to inquire into and report upon the economic condition of the industries of growing, handling and marketing wheat, and the manufacturing, distributing and selling of flour and bread. A searching inquiry was made by the Commission and the results of its investigations were submitted in a series of five reports. The first and second reports covered the wheat-growing industry, the third that of baking, the fourth the flour-milling industry, while the fifth, completed in February, 1936, dealt with the history of the Commission's investigations and traversed the principal recommendations submitted.

2. **Wheat Costs of Production Committee.**—A Wheat Costs of Production Committee was appointed by the Commonwealth Government in February, 1947, to inquire into and report upon:—(i) the reasonable costs of production of wheat per bushel in Australia's main wheat-growing districts, and (ii) whether basic items of costs could be established as an index to periodical variations in costs of the production of wheat. The Committee in its report to the Commonwealth Government in March, 1948, found that the cost of growing wheat in the Commonwealth was 6s. per bushel at sidings and advised that basic items of cost could be established as an index to periodical variations in wheat production costs.

3. **Licensing of Areas Sown to Wheat, and Acreages Sown.**—Details of the operations of the Wheat Stabilization Board in licensing wheat growing during the seasons 1941–42 to 1948–49 will be found in Official Year Book No. 38, pp. 940, 941. The Board ceased to function on 31st December, 1948.

4. **Legislation relating to Wheat Industry.**—(i) *Stabilized Marketing.* A detailed survey of legislation relating to stabilization of the wheat industry, including controls exercised during the 1914–18 and 1939–45 Wars and legislation establishing the Wheat Stabilization Plan in 1948, was given in the Appendix to Official Year Book No. 37 (pp. 1295–99).

(ii) *The Australian Wheat Board.* The Australian Wheat Board was constituted in September, 1939 under National Security (Wheat Acquisition) Regulations to purchase, sell, or dispose of, wheat or wheat products, manage and control all matters connected with the handling, storage, protection, shipment, etc. of wheat acquired, and such other matters as were necessary to give effect to the regulations.

The Board was reconstituted, with similar powers, under the Commonwealth Wheat Stabilization Act 1948, to administer the stabilization plan. The new Board commenced to function on the 18th December, 1948.

(iii) *Wheat Stabilization Plan.* (a) 1947–48 to 1952–53. Details of the Wheat Stabilization Plan which operated during the seasons 1947–48 to 1952–53 inclusive were published in Official Year Book No. 40, pp. 841 and 842, and previous issues. All contributions paid into the Fund established as a part of the plan have now been refunded.

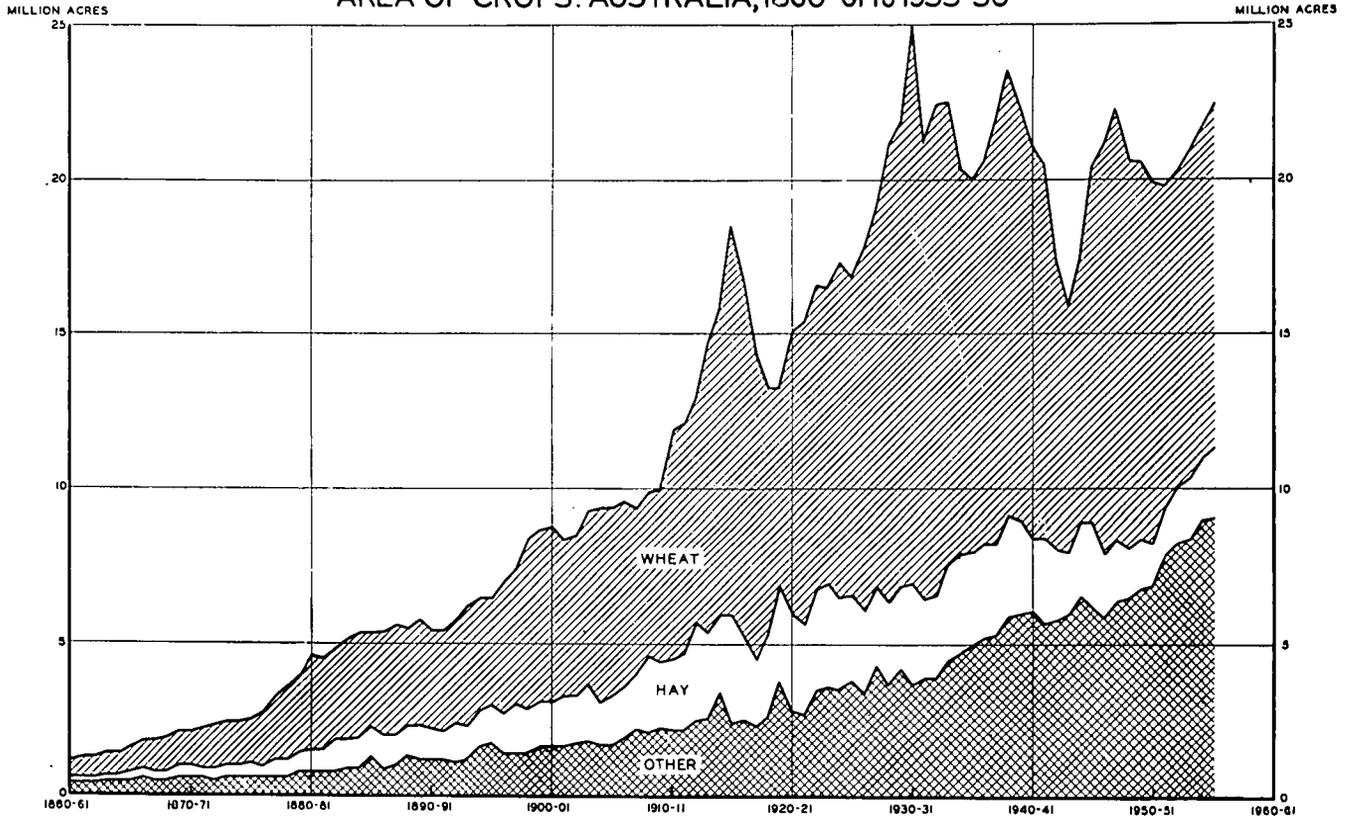

(b) 1953–54 to 1957–58. Agreement was reached in July, 1954, at a conference of Premiers and Ministers for Agriculture on the terms of a new wheat industry stabilization plan. The plan was submitted to polls of wheat growers in the mainland producing States, 94 per cent. of growers voting in favour of the plan.

The necessary legislation was subsequently passed by Commonwealth and State Governments and the plan operated from the 1953–54 season.

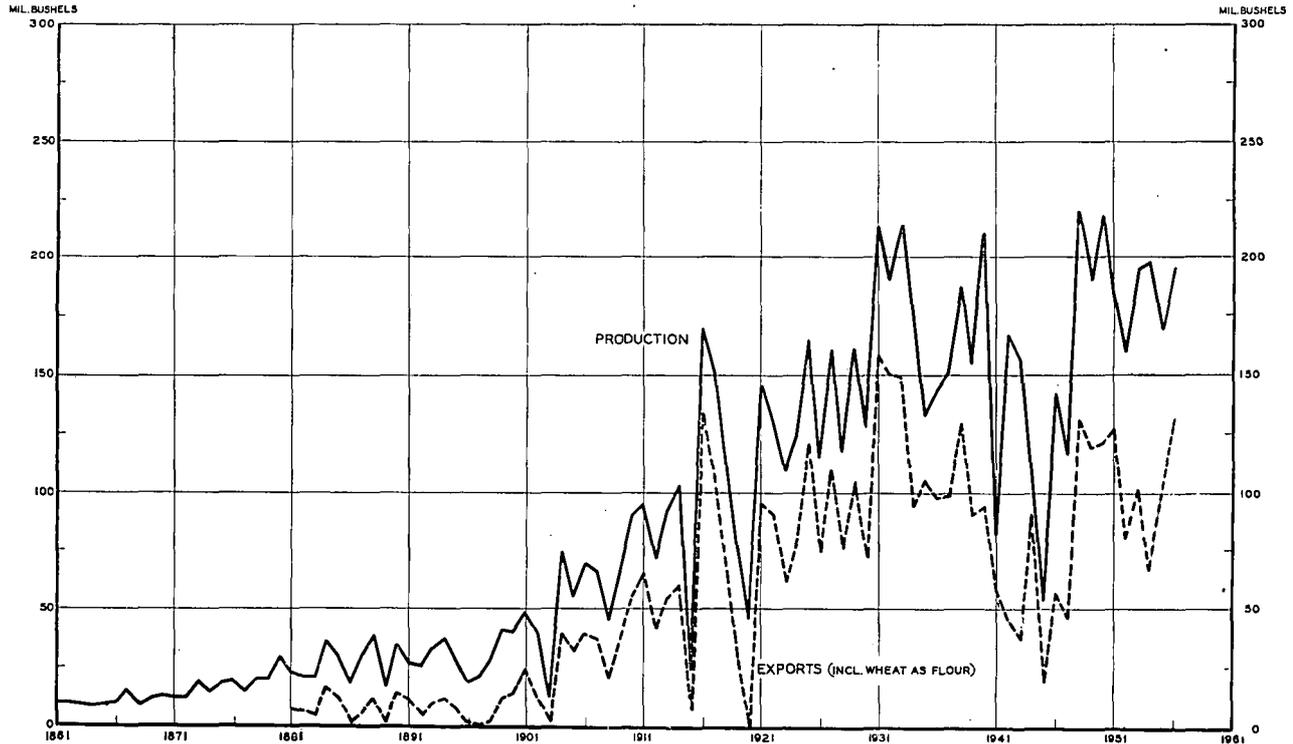

The principal features of the plan are as follows:—

- (i) The period of the Wheat Stabilization Plan to be five years, 1953–54 to 1957–58 inclusive.
- (ii) The Australian Wheat Board will be the sole authority for marketing wheat within Australia and wheat and flour for export from Australia.
- (iii) The Commonwealth Government will guarantee a return to growers of the ascertained cost of production in respect of up to 100 million bushels of wheat exported from Australia from each of the crops covered by the plan.
- (iv) The home consumption price will not be less than the guaranteed price. Subject to this understanding, the home consumption price will be fixed at 14s. per bushel, bulk f.o.r. ports, but will vary downwards to conform with the International Wheat Agreement price current at the commencement of each season. If no international agreement is operating, the home consumption price will vary downwards with the current export price fixed by the Wheat Board.
- (v) A premium of 3d. per bushel on wheat grown in Western Australia and exported from that State will be paid in recognition of the natural freight advantage applying to that State.
- (vi) The home consumption price will be loaded by an amount necessary to cover the cost of freight on wheat to Tasmania.
- (vii) A Stabilization Fund will be established by means of an export tax of 1s. 6d. per bushel when wheat export prices exceed the costs of production by this amount or more, and by that portion of 1s. 6d. by which the export prices exceed the costs of production when the excess is less than 1s. 6d. per bushel.
- (viii) The maximum amount of the Stabilization Fund will be £20 million. As the Fund accumulates beyond this figure, repayments will be made to the oldest contributing pool.

AREA OF CROPS: AUSTRALIA, 1860-61 to 1955-56

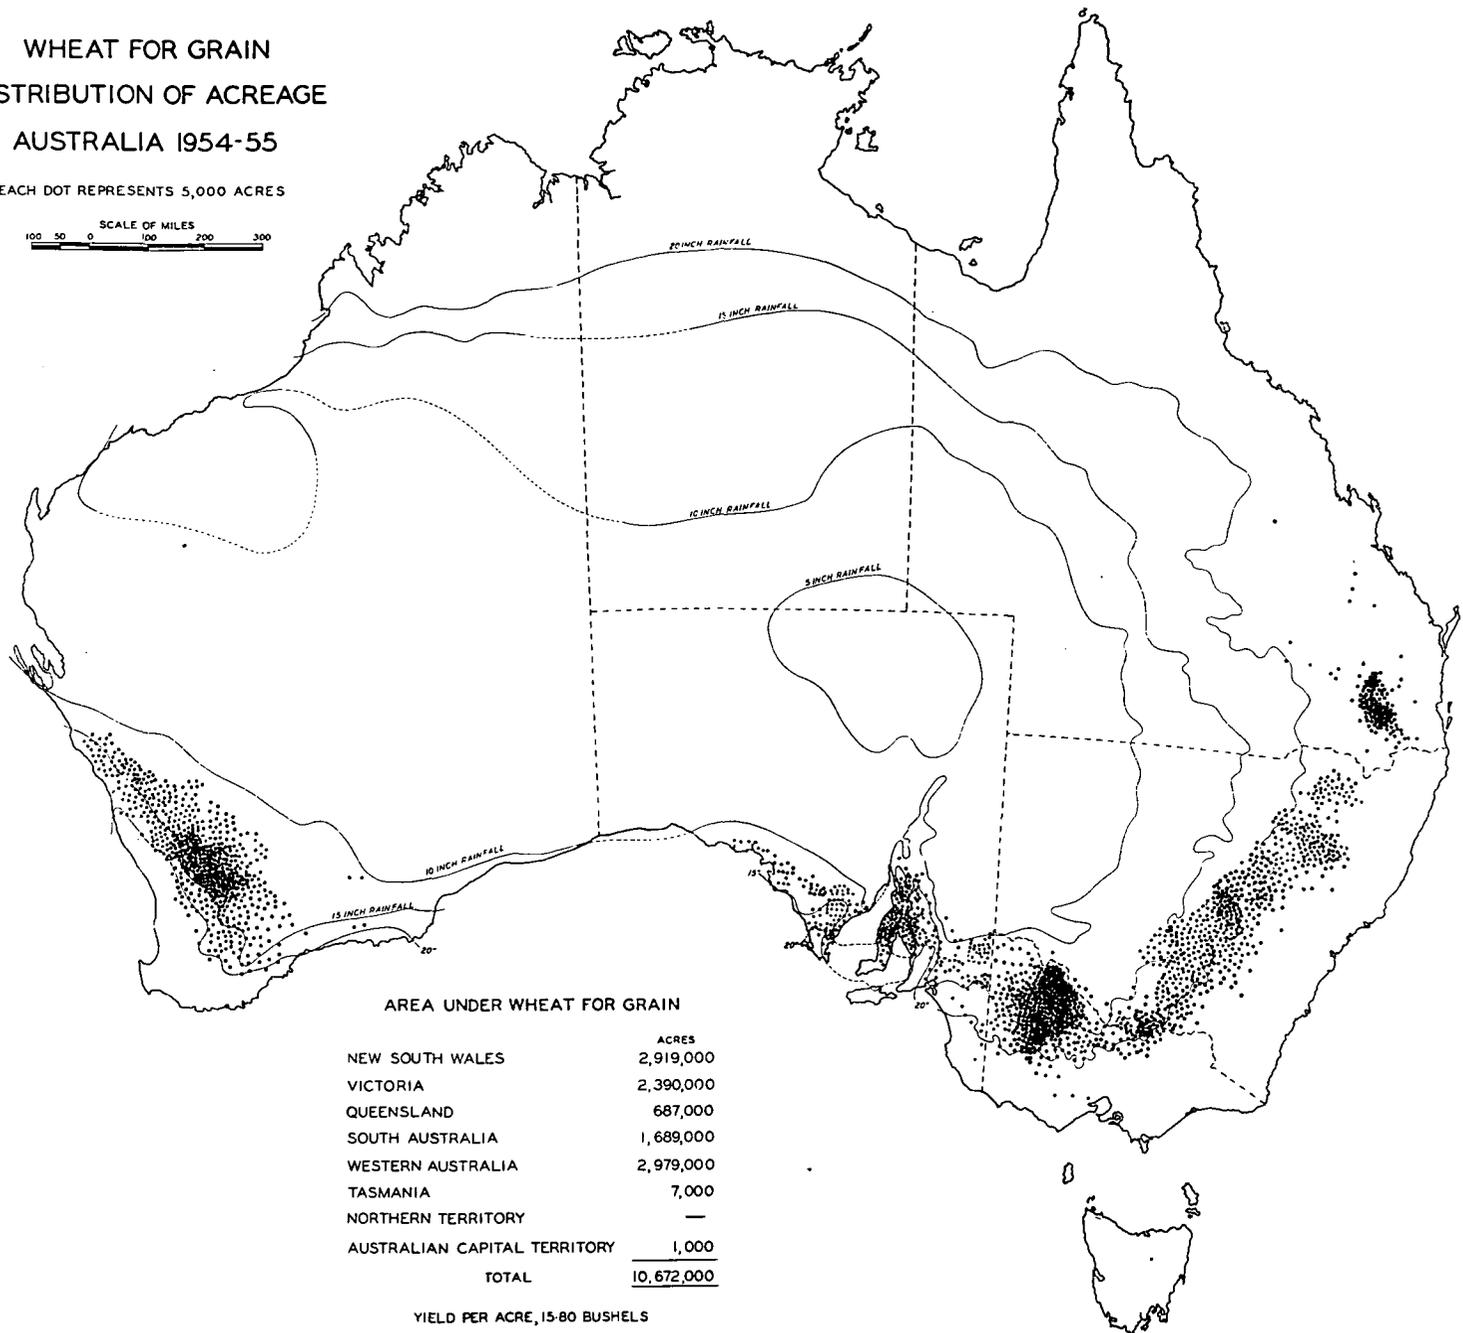

WHEAT PRODUCTION AND EXPORTS: AUSTRALIA, 1860-61 to 1955-56

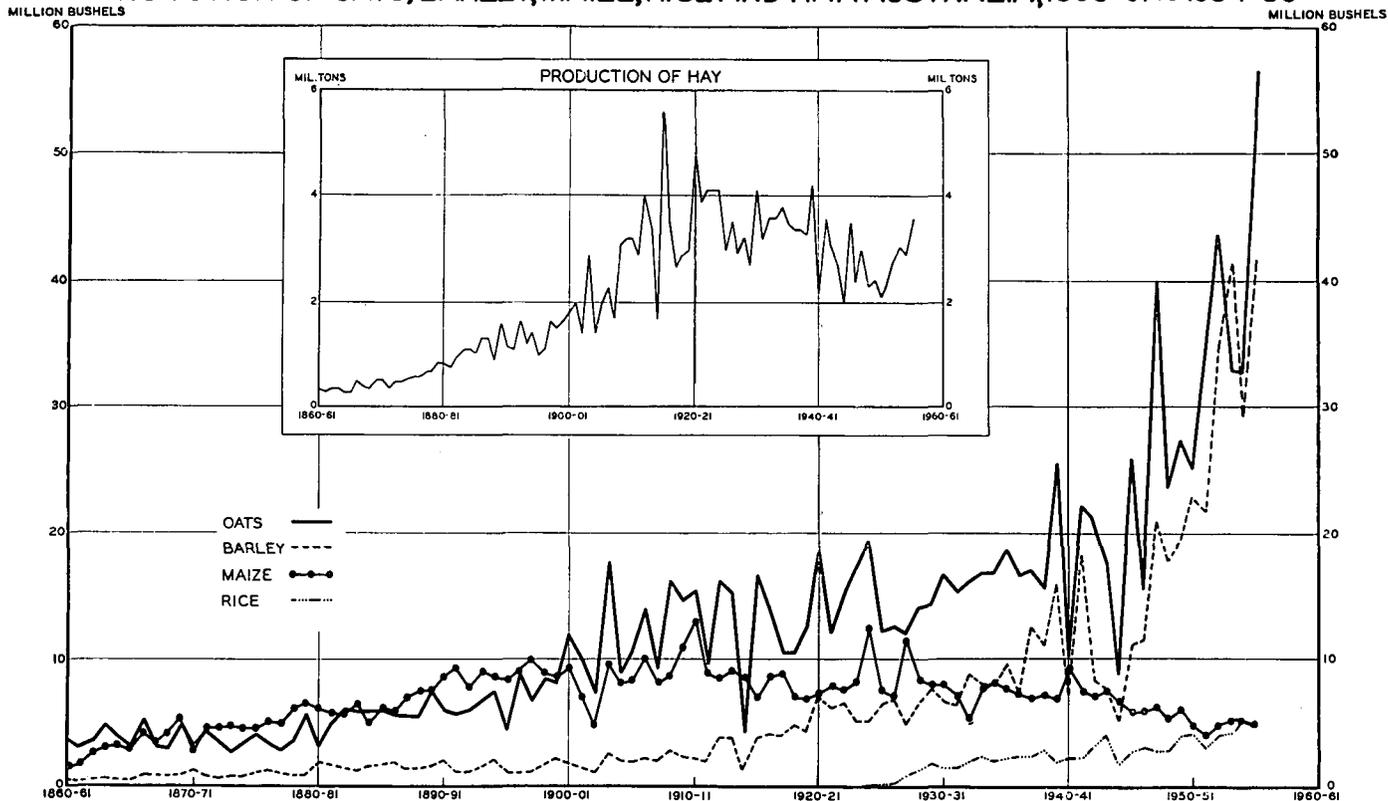

NOTE.—The export figures for the years 1915-16 to 1920-21 do not represent the surplus available for export in each of these years because of the dislocation of shipping due to the 1914-1918 War. For these years the quantity consumed in Australia has been averaged and the balance taken as exports.

AUSTRALIA 1954-55

EACH DOT REPRESENTS 5,000 ACRES

PRODUCTION OF OATS, BARLEY, MAIZE, RICE AND HAY : AUSTRALIA, 1860-61 to 1954-56

(ix) When average export realizations fall below costs of production, export returns will be raised, in respect of up to 100 million bushels, first by drawing upon the Stabilization Fund and when that Fund is exhausted the Commonwealth Government will make the necessary payments.

5. Marketing of Wheat.—(i) *Wheat Acquired and Disposed of.* (a) *Wheat Acquired.* Particulars of wheat acquired by the Australian Wheat Board from the 1950–51 to 1955–56 harvests are shown in the following table:—

AUSTRALIAN WHEAT BOARD : WHEAT ACQUIRED, 1950-51 TO 1955-56.

(a) Complete. (b) Incomplete. (c) Includes £9,166,550 paid into Wheat Prices Stabilization Fund under Wheat Export Charges Act 1948, plus interest £282,291. (d) Includes £9,165,517 paid to Wheat Prices Stabilization Fund under Wheat Export Charge Act 1954.

NOTE.—Details of earlier pools will be found in previous issues of the Year Book.

(iii) *Advances to Growers.* Details of advances made to wheat growers in respect of the various pools are published in *Statistical Bulletin: The Wheat Industry, Australia*, last issued in April, 1957.

6. **International Wheat Agreements.**—Details of the first and second International Wheat Agreements operative from 1st August, 1949 to 31st July, 1953 and from 1st August, 1953 to 31st July, 1956, respectively, were published in Official Year Book No. 42 (*see pp. 840-1*) and previous issues.

A new International Wheat Agreement covering a period of three years from 1st August, 1956 to 31st July, 1959 came into force on 1st August, 1956. The 1956 Agreement is identical in form with the 1949 and 1953 Agreements, although amendments have been made to many of the more important provisions.

The annual quota of 395 million bushels determined by the 1953 International Wheat Agreement was reduced in the new Agreement by almost a quarter to 303 million bushels.

As previously, 44 importing countries submitted figures for inclusion but many quotas were substantially less than those in the previous Agreement. The number of exporting countries was increased to six. Argentina and Sweden were the two additional exporting countries included and France was given a substantial quota instead of the nominal one it had in the 1953 Agreement.

As a result of the reduction in quantities submitted by importing countries and the participation of France, Argentina and Sweden, there has been a substantial reduction in the export quotas available for Australia, Canada and the United States. Australia's original quota was reduced from 45 million bushels under the 1953 Agreement to 30 million bushels.

The new Agreement was to be ratified by both exporting and importing countries on 1st December, 1956. On that date, 37 importing countries had ratified and Iceland had joined the Agreement as an importer although not included in the original list. Of the remaining seven countries which submitted import quotas, four countries (Brazil, Lebanon, the Netherlands and Panama) have notified that they intend ratifying and three countries (Ceylon, Colombia and Jordan) will not ratify the Agreement. All six exporting countries have acceded.

In accordance with the terms of the Agreement, the original quotas allotted to exporting countries have been reduced in conformity with the reduction in importers' quotas. The adjustment has been made on the basis of ratifications as at 1st December, 1956. This pro rata adjustment has given Australia an export quota of 25.6 million bushels but this will probably be increased to 29.3 million bushels when countries which have indicated their intention of doing so have formally ratified the Agreement.

Particulars of guaranteed sales and purchases and transactions actually recorded during 1955-56 are shown in the following table.

INTERNATIONAL WHEAT AGREEMENT: GUARANTEED SALES AND PURCHASES AND TRANSACTIONS RECORDED FOR 1955-56.(a)
(Million Bushels.)

(a) Not yet available.

(b) Excludes Australian Capital Territory.

(ii) *Special Tabulations relating to Wheat Holdings.* With the co-operation of State Statisticians, a series of special tabulations relating to rural holdings was undertaken for all States for the year 1949-50. The tabulations, which covered, *inter alia*, a series of size classifications of wheat farms, have been published in detail in *Primary Industries 1949-50*, Bulletin No. 44. A similar tabulation was made for the year 1947-48, a summary of the results being published in *Production—Part II.—Primary Industries*, Bulletin No. 42, and Official Year Book No. 38, p. 947.

8. *Area, Production and Yield per Acre.*—(i) *Area.* Wheat is the principal crop grown in Australia, and its progress since 1860-61 has been almost continuous. Prominent features in its early development were the increase in population following the discovery of gold and the redistribution of labour after the surface gold had been won. The economic depression of 1893 interrupted its progress, but its subsequent recovery was assisted by the invention of mechanical appliances, the use of superphosphates as an aid to production, and the introduction of new and more suitable varieties for Australian conditions. The establishment of closer settlement schemes and the settling of returned soldiers and others on the land were additional factors in its expansion.

The area, production and yield per acre of wheat for grain in each State are shown below for the years 1951-52 to 1955-56 in comparison with the averages for the decennial periods ended 1938-39 and 1954-55:—

(a) 60 lb. per bushel.

A graph showing the expansion of the area sown to wheat for grain in Australia since 1860-61 appears on p. 831 while a map showing the distribution of areas growing wheat for grain throughout Australia in 1954-55 appears on p. 833. Similar maps showing the distribution of wheat areas in 1924-25, 1938-39 and 1947-48 appeared respectively in Official Year Books No. 22, p. 695, No. 34, p. 451 and No. 39, pp. 977-8.

(ii) *Production.* Apart from the variations in the area sown, the size of the wheat harvest in Australia is largely determined by the nature of the season and inconsistencies in this respect are reflected in the yearly production.

The main wheat-producing States of Australia are New South Wales, Victoria, South Australia and Western Australia. Queensland production normally approaches local demands, but Tasmania imports wheat from the mainland to satisfy its needs, though it ships flour made from local wheat which is particularly suitable for biscuits. Normally the production of wheat greatly exceeds Australian requirements, and from half to two-thirds of the crop is exported.

Australia's wheat production in 1955-56 was 195.4 million bushels, representing an average yield of 19.2 bushels per acre. This was 16.0 million bushels more than the average for the ten years ended 1954-55 and 26.0 million bushels more than the average for the ten years ended 1938-39.

(iii) *Yield per Acre.* Short-term variations in yield per acre are due chiefly to the vagaries of the seasons. The best yields per acre for single seasons since 1901 were obtained in 1920-21, 16.1 bushels; in 1942-43, 16.8 bushels; in 1949-50, 17.8 bushels; in 1952-53, 19.1 bushels; in 1953-54, 18.4 bushels and in 1955-56, 19.2 bushels (the record).

(iv) *Decennial Averages, 1861-70 to 1947-56.* The following table shows the average area, production and yield per acre for decennial periods since 1861.

WHEAT FOR GRAIN: AVERAGE AREA AND PRODUCTION, AUSTRALIA.

Period.		Area.	Production.	Yield per Acre.
		'000 Acres.	'000 Bushels.	Bushels.
1861-70	831	10,622	12.8
1871-80	1,646	17,711	10.8
1881-90	3,258	26,992	8.3
1891-1900	4,087	29,934	7.3
1901-10	5,711	56,058	9.8
1911-20	8,928	95,480	10.7
1921-30	11,291	135,400	12.0
1931-40	14,176	177,758	12.5
1941-50	11,358	145,599	12.8
1947-56	11,573	184,750	16.0

It should be noted, that with improved farming methods, including the proper tillage of the soil, rotation of crops, the growing of suitable varieties and the application of fertilizers, average yields per acre in the five decades since 1901 have shown a continued improvement.

9. *Varieties of Wheat Sown.*—(i) *General.* The breeding of wheat suitable to local conditions has long been established in Australia. Farrer (1845-1905) did invaluable work in pioneering this field and the results of his labour and the continued efforts of those who have since followed him have proved of immense benefit to the wheat industry of Australia. Their efforts have resulted in better average yields, a greater uniformity of sample with which have accrued certain marketing advantages, as well as an improvement

in the quality of wheat grown. More than 1,000 different varieties of Australian wheats have been catalogued by the Commonwealth Scientific and Industrial Research Organization, but the number of principal varieties grown during each season is restricted to about 40.

(ii) *States, 1955.* The principal varieties of wheat sown and the percentage of each to the total area sown in the five main producing States during 1955 were as follows:—New South Wales, Bencubbin (33.3), Gabo (20.3); Glenwarie (6.3); Victoria, Insignia (49.3), Pinnacle (24.7), Quadrat (15.4); Queensland, Spica (15.4), Charter (15.0), Festival (13.2); South Australia, Gabo (22.4), Insignia 49 (12.8); Western Australia, Bungulla (21.8), Bencubbin (18.8), Gabo (16.5). A detailed table of wheat varieties sown in these five States appears in the annual bulletin *Primary Industries—Part I.—Rural Industries.*

10. **F.A.Q. Standard of Wheat.**—The Chambers of Commerce in each of the four main wheat States each year determine the "f.a.q." standard for the State. In the case of New South Wales as from 1956–57, two f.a.q. standards will be determined—one for the Northern Zone and one for the Southern Zone. "F.a.q." means "fair average quality", and the standard is used as the basis for sales of the season's crop. It represents the average quality for the season, and this average varies from year to year, and from State to State. "F.a.q." is an Australian term, and the method differs from that of other countries which sell according to sample, or (as in Canada) according to grades which are fixed, and do not vary from year to year.

Samples of wheat are obtained by the Chambers of Commerce from the different wheat districts, and are mixed to give a representative sample of the whole crop. From this representative sample the f.a.q. weight is determined by the use of the Schopper 1-litre scale chondrometer.

The f.a.q. weight of a bushel of wheat in each of the four main wheat-producing States for the 1955–56 season's crop was as follows (1954–55 details in parentheses)—New South Wales, 62 lb. (61½ lb.); Victoria, 63¾ lb. (62½ lb.); South Australia, 64 lb. (64½ lb.); and Western Australia, 64 lb. (63½ lb.).

11. **Price of Wheat.**—(i) *Home Consumption.* The price charged by the Australian Wheat Board for wheat sold to millers for gristing into flour for consumption in Australia and for wheat sold as stock feed is shown in the table below for the years 1953 to 1957.

AUSTRALIAN WHEAT BOARD'S PRICE FOR WHEAT FOR HOME CONSUMPTION : AUSTRALIA.

(s. d. per Bushel, Bulk Basis.)

Particulars.	1953.	1954.	1955.	1956.	1957.
For Flour	11 11	(a) 14 1½	(a) 14 1½	(a) 13 5½	(a) 13 9½
For Stock Feed	(b) 13 11	(a) 14 1½	(a) 14 1½	(a) 13 5½	(a) 13 9½

(a) Of this, 1½d. is to be used to meet freight charges incurred on wheat shipped to Tasmania.
 (b) Excludes subsidy of 2s. 2d. in 1953 paid by the Commonwealth Government.

(ii) *Export Wheat Prices—Australian Wheat Board's Basic Selling Price.*—The monthly average of the Wheat Board's basic export selling prices for f.a.q. bulk wheat f.o.b. basis was 13s. 4d. for the season ended 31st July, 1956, both for wheat sold under the International Wheat Agreement and for "free" wheat sold on the open market. Actual selling prices have been lower than the basic prices in some cases, particularly where other exporting countries enjoy a geographical freight advantage.

The maximum and minimum prices fixed under the 1956–59 International Wheat Agreement are expressed in terms of "Canadian currency per bushel, at the parity of the Canadian dollar determined for the purposes of the International Monetary Fund for No. 1 Manitoba Northern wheat in bulk in store Fort William—Port Arthur." Expressed in terms of Australian currency the maximum price for f.a.q. Australian wheat sold under the Agreement is approximately 18s. per bushel. The direct currency conversion of the minimum price is 12s. but this price will vary according to movements in transportation costs.

Details of export wheat prices in previous years, including those received for wheat sold under the terms of the 1949–1953 International Wheat Agreement, are given in *Official Year Book No. 40*, pp. 849–50, and *Statistical Bulletin: The Wheat Industry, Australia*, No. 92, of April, 1957, and in previous issues of these publications.

12. **Value of the Wheat Crop.**—The estimated gross value of the wheat crop in each State and in Australia during the season 1954-55 and the value per acre are shown below.

WHEAT FOR GRAIN : VALUE OF CROP(a), 1954-55.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value £'000	23,582	30,516	10,697	20,796	21,827	100	10	107,528
Value per acre ..	£8 1 7	£12 15 4	£15 11 3	£12 6 3	£7 6 6	£13 13 8	£12 2 1	£10 1 6

(a) Gross value of total crop, including wheat used for seed and for stock feed on farms.

13. **Production and Disposal of Wheat in Australia.**—In the following table, details are given of the production of wheat and its disposal during each of the years ended 30th November, 1952 to 1956 in comparison with the average for the three years ended November, 1937 to 1939. The particulars respecting local consumption refer to sales actually executed by the Australian Wheat Board, whilst those respecting exports represent actual shipments. (For particulars of production and exports from 1860-61 see graph, p. 832.)

WHEAT : PRODUCTION AND DISPOSAL, AUSTRALIA.
(Million Bushels.)

Particulars.	Average, Three Years ended 30th Nov. 1939.	Year ended 30th November—				
		1952.	1953.	1954.	1955.	1956.
Opening stocks (including flour as wheat)	10.2	19.4	16.9	37.7	94.9	95.0

(a) Includes wheatmeal from July 1951, and sharps from July, 1954. (b) In terms of wheat.
(c) Included with flour (local consumption). (d) Included with stock feed. (e) Includes allowance for unrecorded movements in stocks, gain or loss in out-turn, etc.

14. **Exports of Wheat and Flour.**—(NOTE: Statistics in this section relate to years ended 30th June). (i) *Quantities.* The following table shows particulars of the exports of wheat and flour and total of both in terms of wheat for each of the years 1951-52 to 1955-56 compared with the average for the five years ended 1938-39. For the sake of convenience, flour has been expressed at its equivalent in wheat, 1 ton of flour being taken as equal to 46.3 bushels of grain. Wheat and flour have been imported to tide over lean seasons on only two occasions since 1900; in 1902-3 the wheat harvest was as low as 12,378,000 bushels, and wheat and flour representing 12,468,000 bushels of wheat were

imported, whilst an equivalent of 7,279,000 bushels was imported in 1914-15 to supplement the yield of 25 million bushels produced in that season. During the five years ended 1955-56, exports in terms of wheat averaged 93,233,000 bushels, compared with the average of 106,432,000 bushels for the five years ended 1938-39.

WHEAT AND FLOUR : EXPORTS FROM AUSTRALIA.

Year.	Quantity.				Value. (£'000.)		
	Wheat.	Flour.		Total as Wheat.	Wheat.	Flour.	Total.
		As Flour.	As Wheat. (a)				
	'000 bushels.	Tons. (2,000 lb.)	'000 bushels.	'000 bushels.			
Average, 1934-35 to 1938-39	76,473	647,073	29,959	106,432	14,813	(b)5,058	19,871
1951-52	62,921	791,470	36,645	99,566	55,287	33,107	88,394
1952-53	59,508	871,096	40,331	99,839	51,970	37,471	89,441
1953-54	36,058	761,917	35,276	71,334	30,957	29,726	60,683
1954-55	63,133	656,605	30,401	93,534	45,222	20,357	65,579
1955-56	71,041	667,773	30,918	101,959	46,456	19,743	66,199

(a) One ton (2,000 lb.) of flour is taken to be equivalent to 46.3 bushels of wheat. (b) Excludes wheatmeal for baking.

(ii) *Destination.* (a) *Wheat.* The following table shows the exports of wheat to various countries for each of the five years ended 1955-56 and the average for the five years ended 1938-39.

WHEAT: EXPORTS FROM AUSTRALIA. (^{'000 Bushels.})

Country to which Exported.	Average, 1934-35 to 1938-39.	1951-52.	1952-53.	1953-54.	1954-55.	1955-56.

Total	647,073	791,470	871,096	761,917	656,605	666,874

(a) Excludes wheatmeal for baking.

(b) Included with Federation of Malaya.

15. **Stocks of Wheat and Flour.**—Stocks of wheat and flour in terms of wheat held by each State at 30th November in each year 1939 and 1952 to 1956 are shown in the following table. These data are based on stocks held at mills, sidings, ports and depots as recorded by the Australian Wheat Board.

**WHEAT (INCLUDING FLOUR IN TERMS OF WHEAT): STOCKS AT
30th NOVEMBER.(a)
(*000 Bushels.)**

30th November—	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Australia.
1939	6,674	4,702	549	6,134	2,513	241	20,813
1952	5,881	4,432	5	4,254	2,108	187	16,867
1953	9,888	11,550	2,237	7,576	6,307	188	37,746
1954	26,458	26,937	2,487	15,413	23,499	125	94,919
1955	17,483	28,434	4,049	18,470	26,278	256	94,970
1956	21,365	22,821	1,973	15,223	22,534	265	84,181

(a) One ton of flour is treated as equivalent to 46.3 bushels of wheat.

16. **Bulk Handling and Storage of Wheat in Australia.**—(i) *Description and Development of the Bulk Handling System.* A detailed description of the bulk handling system including its advantages and disadvantages compared with other methods of handling appeared on p.p. 954–8 of Official Year Book No. 39.

New South Wales, Victoria and Western Australia have operated bulk handling systems for a number of years, but until recently no efforts have been made to introduce such a system in the other States.

Late in 1953, it became clear that Australia could not clear its stocks of wheat as quickly as in past years and in April, 1954, the Commonwealth Government arranged to finance the construction of additional storage space in New South Wales, Victoria and South Australia (Western Australia and Queensland were later included in the scheme). The Australian Wheat Board was authorized to control the expenditure of the money provided, amounting to £3½ million.

(ii) *Bulk Handling and Storage in the States.* Particulars of the operation of the bulk handling and storage system and projected extensions in the States concerned are set out below:—

(a) *New South Wales.* At the end of 1955, there were 180 elevators operated by the Grain Elevators Board (formerly the Government Grain Elevators) and situated at the more important wheat receiving stations throughout the State, as well as terminal elevators at Sydney and Newcastle. The storage capacity of the country elevators is 25,422,000 bushels. In 1955–56, 82 per cent. of the total marketable crop was handled compared with 85 per cent. in 1954–55 and 61 per cent. in 1953–54.

Additional storage capacity has been constructed at several country centres and sub-terminals at Junee, Temora and Werris Creek were enlarged to hold 4.5 million bushels each as part of the plan to meet the general shortage in storage capacity.

Temporary bulkheads were also erected to meet shortages and in 1955–56, 80 of these were used.

The State's portion of the Commonwealth loan of £3½ million, mentioned above, was used to construct additional bulk storages totalling 11,900,000 bushels; in many instances these new storages—of which 11 were in use for 1955–56—will replace temporary bulkheads which will then be dismantled.

(b) *Victoria.* The Victorian Grain Elevators Board operates 148 elevators with storage capacity totalling 17,034,000 bushels and a terminal elevator at Geelong with a capacity of 4,100,000 bushels. Storages for 18 million bushels, adjacent to the permanent terminal, have been constructed at Geelong.

Temporary measures for extending bulk handling have been adopted and sub-terminals were constructed or acquired at Dunolly, Murtoa and Warracknabeal with a capacity of

22 million bushels. Temporary bulkheads have also been used but most of these will be replaced by the construction of a total of 99 steel annex bins (many of which were completed in 1955) with total capacity of 6,435,000 bushels and 47 steel elevators, each of 100,000 bushels, to be constructed in 1956 and 1957.

In 1955-56, 98 per cent. of the total marketable crop was received as bulk wheat compared with 97 per cent. in 1954-55 and 96 per cent. in 1953-54.

(c) *Queensland.* In 1952-53, a temporary silo was provided at Pinkenba and a number of concrete silos and temporary bulkheads have subsequently been erected at country centres. Plans to extend this programme include the provision of a permanent bulk terminal at Pinkenba.

(d) *South Australia.* In 1951-52, a bulk terminal was erected by the Wheat Board at Ardrossan with storage capacity for 1,000,000 bushels. Approximately 6,645,000 bushels were shipped through that facility during the 1954-55 season.

In 1955, the South Australian Co-operative Bulk Handling Ltd. was formed, as a grower-controlled organization, to receive, store and handle bulk wheat on behalf of the Wheat Board. The Company purchased the Ardrossan terminal from the Board and commenced its programme of country bulk storage constructions, completing one storage, at Paskeville, in time to receive wheat of 1955-56 harvest. The company's plans provide not only for the expansion of bulk receival facilities in country areas but also the construction of further shipping terminals at Wallaroo, Port Lincoln and other ports.

(e) *Western Australia.* The system of storage in Western Australia differs from that in the Eastern States in that horizontal storages made of timber and galvanised iron are used. These are relatively cheap and can be moved from place to place as required. These storages are operated by Co-operative Bulk Handling Ltd. which is controlled and managed by wheat growers.

In 1955-56, there were 281 sidings equipped with bulk handling facilities and 49,627,000 bushels, comprising the whole of the marketable crop, were received.

Extension of storage facilities in 1954-55, financed from the Commonwealth loan of £3½ million, involved the erection of a storage for 5 million bushels at Midland Junction.

(f) *Tasmania.* Bulk handling of wheat has not been found necessary in this State but it is planned to erect installations at Hobart and Launceston to store wheat imported from the mainland.

17. **World Area and Production of Wheat.**—The details in the following table of the world area and production of wheat by principal countries and by continents have been compiled from official sources so far as they are available, but more particularly from the records published by the Food and Agriculture Organization of the United Nations, and the United States Office of Foreign Agricultural Service. The harvests shown for countries in the Northern Hemisphere are those garnered during the period March to October whilst those for the Southern Hemisphere cover the period November to February following.

(a) Figures refer to harvested areas as far as possible. (b) Preliminary. (c) Totals (estimates) include allowances for any missing data for countries shown and for other producing countries not shown. (d) 1935 only. (e) Not available. See footnote (c). (f) Average of less than five years.

18. Exports—Principal Countries.—The following table shows the quantities of wheat exported from the chief exporting countries for the period 1934-38 and the years 1954 and 1955 according to statistics recently published by the Food and Agriculture Organization of the United Nations, and the United States Office of Foreign Agricultural Service.

While Australia's production of wheat averages about 3 per cent. of the world's total, its exports account for a much higher proportion of the total quantities shipped. During the five years 1934-38, Australia's share of world wheat exports was 16 per cent., but in 1955 the proportion fell to 10 per cent. The actual quantity shipped in 1955 was 10 per cent. lower than the average for 1934-38.

§ 5. Oats.

1. **Area, Production and Yield per Acre.**—Oats are usually next in importance to wheat amongst the grain crops cultivated in Australia, but while wheat grown for grain in 1955–56 accounted for 45.3 per cent., oats grown for grain represented only 14.9 per cent. of the area of all crops. The area, production and yield per acre of oats for the years 1951–52 to 1955–56 and the averages for the ten-year periods ended 1938–39 and 1954–55 are shown in the following table:—

OATS FOR GRAIN: AREA, PRODUCTION AND YIELD PER ACRE.

(a) 40 lb. per bushel.

A graph showing the production of oats appears on pp. 834.

The principal oat-growing States are New South Wales, Victoria and Western Australia, which produce on the average more than 80 per cent. of the total quantity grown in Australia. South Australia also produces considerable quantities, but in Queensland and Tasmania the output is small. The production of oats for grain in Australia in 1955–56 amounted to 56,487,000 bushels which was a record. This compares with 32,834,000 bushels in 1954–55. The previous record was 43,623,000 bushels in 1952–53.

During the five seasons ending 1955–56, an average of 8.4 million bushels were exported; 1.9 million bushels were used in factories for oatmeal; and 7.5 million bushels were used for seed purposes; leaving a balance of 22.3 million bushels for stock feed (principally unprocessed) and carry-over.

The largest yield per acre recorded for Australia in the ten years ended 1955–56 was that of the season 1947–48, amounting to 19.3 bushels per acre, this being the highest yield since 1920–21. The smallest yield per acre for the same period was that recorded in the abnormally dry season 1944–45, namely 4.4 bushels which is the lowest ever recorded for Australia.

2. **Price of Oats.**—The average wholesale price in the Melbourne market for oats of good milling quality in 1955–56 was 6s. 9½d. per bushel. This represents a decrease of 20.6 per cent. on the price in 1954–55 (9s. 3d.) and an increase of 96.4 per cent. on the price in 1938–39 (3s. 5½d.).

3. **Value of Oat Crop.**—The estimated gross value of the oat crop in each State for the 1954-55 season and the value per acre were as follows:—

OATS : VALUE OF CROP, 1954-55.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value £'000	3,993	4,415	351	1,944	3,093	268	2	14,066
Value per acre	£6 1 6	£6 17 0	£9 12 7	£5 14 6	£3 10 10	£11 16 7	£10 12 4	£5 9 3

4. **Imports and Exports.**—The production of oats in Australia is sufficient to admit of a regular export trade. The quantities and values of oats exported from Australia during the years 1951-52 to 1955-56 compared with the average for the years 1934-35 to 1938-39 are shown hereunder:—

OATS : EXPORTS, AUSTRALIA.

Particulars.	Average, 1934-35 to 1938-39.	1951-52.	1952-53.	1953-54.	1954-55.	1955-56.
Quantity .. '000 bus.	286	12,971	11,846	3,275	2,872	9,608
Value.. .. £'000	36	8,001	4,851	1,219	1,376	3,578

The quantity of oats imported into Australia is usually not very large, although in 1945-46 imports exceeded exports by 802,000 bushels. Canada was the chief supplier. The previous year in which imports exceeded exports was 1927-28 (by 461,000 bushels), when New Zealand was the main supplier. In 1955-56, the principal countries of destination of the exports were the United Kingdom, the Federal Republic of Germany, New Zealand, Italy and the Netherlands.

5. **Oatmeal, etc.**—The production of oatmeal amounted in 1955-56 to 20,013 tons equivalent to about 2,241,000 bushels of oats, or about 4.0 per cent. of the total production.

6. **World Production.**—The world's production of oats for the year 1955, according to preliminary details released by the United States Department of Agriculture, amounted to 4,435 million bushels, harvested from 127.0 million acres, representing an average yield of 34.9 bushels per acre. This compared with the production in the previous year of 4,275 million bushels from an area of 132.5 million acres giving an average yield of 32.3 bushels per acre. The world's average production, for the years 1934 to 1938 amounted to 3,588 million bushels from 143 million acres giving an average yield of 25.09 bushels per acre. In comparison with the average return per acre for world production in 1955 that of Australia for the same period (16.8 bushels) appears very small. Yields in excess of 40 bushels per acre are not uncommon and some European countries record averages in excess of 50 bushels per acre.

§ 6. Maize.

1. **States Growing Maize.**—Maize is grown for grain chiefly in Queensland and New South Wales, the area so cropped in these States during the 1955-56 season being 163,824 acres, or 98 per cent. of the total for Australia. In all States except South Australia, the crop is grown to some extent for green fodder, particularly in connexion with the dairying industry.

2. **Area, Production and Yield per Acre.**—Although maize for grain is grown extensively in other countries, the area sown to maize for grain in Australia has averaged only 195,539 acres during the ten years ended 1954-55. Compared with the previous year, the area in 1955-56 decreased by 2,246 acres and was considerably less than the comparatively large areas of 414,914 and 400,544 acres sown in 1910-11 and 1927-28 respectively.

There has been a considerable increase in recent years in the growing of maize from hybrid strains of seed. Varieties have been developed which are capable of producing yields per acre considerably in excess of the older open pollinated types. The expansion in areas sown to hybrid maize necessitates a parallel development in the specialized industry of growing hybrid strains of seed.

The area, production and yield per acre of maize for grain in each State for the years 1951-52 to 1955-56 and the averages for the ten-year periods ended 1938-39 and 1954-55 are given in the following table. Separate details for hybrid and other varieties are shown for New South Wales, Victoria and Queensland for 1955-56.

(a) Includes 3 acres in the Northern Territory.

(b) 56 lb. per bushel.

The average yield for Australia for the ten-year period ended 1954-55 was 27.0 bushels per acre. Among principal producing countries during 1955 the United States of America averaged 40.6 bushels per acre and Italy 38.0 bushels.

3. Price of Maize.—The average wholesale price of maize in the Melbourne market in 1955-56 was 16s. 5d. per bushel compared with 16s. 6d. in 1954-55. In 1938-39, the comparable price for maize of similar quality was 5s. 2½d.

4. Value of Crop.—The estimated gross value of the crop in each State for the 1954-55 season and the value per acre were as follows:—

MAIZE FOR GRAIN: VALUE OF CROP, 1954-55.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
Aggregate value .. £'000	1,495	177	1,943	3,615
Value per acre	£29 10 8	£40 8 7	£16 18 9	£21 6 1

5. Exports of Maize and Maize Products.—Details of exports of maize for the five years ended 1955-56 compared with the average of the five years ended 1938-39 are shown below.

MAIZE: EXPORTS, AUSTRALIA.

Particulars.	Average, 1934-35 to 1938-39.	1951-52.	1952-53.	1953-54.	1954-55.	1955-56.
Quantity .. '000 bus.	57	188	782	504	458	185
Value £'000	9	149	703	353	301	119

In recent years only small quantities of maize have been imported.

Exports of cornflour, which prior to the 1939-45 War were very small, increased considerably during the war years, the principal country of destination being New Zealand. In 1955-56, 1,050,100 lb., valued at £32,745, were exported, compared with an annual average of only 37,000 lb. during the five years ended 1938-39. It should be noted that these figures include some quantities of "cornflour" made from wheat. Imports of cornflour into Australia are negligible.

6. World Production.—According to preliminary details released by the Food and Agriculture Organization of the United Nations, world production of maize, excluding that of the U.S.S.R., in the year 1955, amounted to 6,275 million bushels, harvested from 250 million acres, giving an average yield per acre of 25.1 bushels. This compared with production in the previous year of 5,635 million bushels from 225 million acres, yielding an average per acre of 25.0 bushels. Production (including that of the U.S.S.R.) over the years 1934 to 1938 averaged 4,525 million bushels from 218 million acres, giving an average yield per acre of 21.0 bushels.

The United States of America is the most important maize-producing country in the world and during the three years ended 1956 the area sown to maize in that country averaged 79 million acres or 32 per cent. of the world total. During the same period production averaged 3,246 million bushels or about 52 per cent. of the world total. These figures are not strictly comparable with those for other countries included in the above-mentioned world totals as the area, and an estimate of grain equivalent, of maize used as green fodder are included. In recent years, maize grain actually harvested in the United States has amounted to about 90 per cent. of the total crop.

A graph showing the production of maize in Australia appears on p. 834.

§ 7. Barley.

1. Area, Production and Yield per Acre.—The area sown to barley for grain expanded considerably during the ten years preceding the 1939-45 War—from 383,000 acres in 1930-31 to 836,000 acres in 1939-40. This increase was followed by a decline to 443,000 acres in 1943-44, but the area sown has increased in succeeding years, and in 1955-56 reached the record level of 1,894,000 acres. Victoria was originally the principal barley-growing State, but since 1913-14 its place has been taken by South Australia which accounted for 55 per cent. of the Australian acreage in 1955-56. There has been a substantial increase in the acreage sown in most States in recent years particularly in Western Australia and Queensland. Small areas of barley are sown for hay, and more considerable quantities are sown for green forage but these are not included in this section. The production of barley for grain in Australia in 1955-56, at 41,655,000 bushels was the highest ever recorded. The area, production and yield per acre of barley for grain in the several States for the years 1951-52 to 1955-56 and the averages for the ten-year periods ended 1938-39 and 1954-55 are shown in the following table:—

(a) 50 lb. per bushel.

For Australia as a whole, about 80 per cent. of the area of barley for grain in 1955-56 was sown with malting or 2-row barley while the remainder consisted of 6-row, or feed, varieties. The proportion, however, varied considerably in the several States. The consumption of barley during the season 1955-56 was as follows:—malt works, 7,829,000 bushels; flour and other grain mills, 592,000 bushels; distilleries, 42,000 bushels; exports, 28,246,000 bushels; leaving a balance of 4,946,000 bushels for feed, seed and other purposes.

The following table sets out the acreage and production of malting and other barley in Australia during the seasons 1951-52 to 1955-56 and the averages for the ten-year periods ended 1938-39 and 1954-55.

BARLEY, MALTING AND OTHER: AREA AND PRODUCTION, AUSTRALIA.

Season.	Area. (‘000 Acres.)			Production. (‘000 Bushels.)			Yield per Acre. (Bushels.)		
	Malting (2-row).	Other (6-row).	Total.	Malting (2-row).	Other (6-row).	Total.	Malting (2-row).	Other (6-row).	Total.
Average, 1929-30 to 1938-39 ..	428	67	495	7,480	1,073	8,553	17.5	16.0	17.3

Average 1945-46 to 1954-55 ..	976	165	1,141	20,404	2,735	23,139	20.5	16.6	20.3
1955-56 ..	1,510	384	1,894	35,470	6,185	41,655	23.5	16.1	22.0

A graph showing the production of barley appears on p. 834.

During the last ten-year period shown, the average area of barley of the malting, or 2-row, class was nearly six times the corresponding figure for barley of the 6-row, or feed, class. The yield per acre for malting barley was 23 per cent. higher than that for 6-row barley.

2. **Australian Barley Board.**—Following the outbreak of war in 1939, the Australian Barley Board, representative of the whole industry, was formed, and the Commonwealth

Government acceded to its request to acquire the entire 1939-40 barley crop, which was placed under the control of the Board. A pool was established from which proceeds were distributed with appropriate margins for different grades of barley.

The Board was responsible for the marketing and storage of barley, and, like the Australian Wheat Board, appointed licensed receivers to receive grain on its behalf and to act as agents for all local and overseas sales.

Following the decision of the Commonwealth Government not to acquire barley in the smaller producing States after 1941-42, the Governments of Western Australia and Queensland established State Barley Boards to control marketing in these States.

The Commonwealth Government did not acquire barley after the 1947-48 crop, and the Victorian and South Australian Governments formed a joint board under the same name as the former Commonwealth board to market the 1948-49 and subsequent crops of the two States. Details of the acquisitions from 1950-51 to 1955-56 are shown in the table below.

AUSTRALIAN BARLEY BOARD ; BARLEY ACQUIRED, SOLD, ETC.

Pool.	Quantity	Quantity.	Total	Total Net
	Acquired.	Sold.(a)	Advances made per Bushel on 2-row No. 1 Grade less freight.	Payments to Growers.
	'000 bushels.	'000 bushels.	<i>s. d.</i>	£
No. 12 (1950-51 Crop)	19,976	20,152	(b) 11 2.488	10,721,180
„ 13 (1951-52 „)	19,340	19,488	15 8.28	14,563,936
„ 14 (1952-53 „)	29,087	29,103	16 2.01	21,359,168
„ 15 (1953-54 „)	34,430	34,586	10 4.101	15,417,374
„ 16 (1954-55 „)	20,679	20,709	12 10.92	11,953,430
„ 17 (1955-56 „)	29,357	29,438	(c) 9 6	11,835,364

(a) Includes surplus in out-turn. (b) Paid to growers in the northern part of South Australia. Growers in the south-east of South Australia and Victoria received an additional 2d per bushel. (c) As at 30th April 1957. At that date it was estimated that the amount still to be paid to growers was 9.441d. per bushel.

3. Prices.—The average wholesale price for 2-row English malting barley in the Melbourne market during 1955-56 was 14s. 7½d. compared with 14s. 6½d. in 1954-55 and 3s. 5½d. in 1938-39.

4. Value of Barley Crop.—The estimated gross value of the barley crop in each State for the 1954-55 season and the value per acre are shown in the following table:—

BARLEY FOR GRAIN: VALUE OF CROP, 1954-55.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Australia.
Aggregate value .. £'000	333	3,155	1,427	11,622	1,554	166	18,257
Value per acre	£9 0 9	£11 4 10	£16 7 0	£11 7 11	£5 19 8	£22 18 7	£10 15 11

5. Exports.—Australian exports of barley during the five years ended 1955-56 averaged 19,532,000 bushels, South Australia being the principal exporting State and the United Kingdom, the Netherlands and Japan the principal countries to which barley was shipped. Particulars of Australian exports for the years 1951-52 to 1955-56 together with the average for the five years ended 1938-39 are shown in the following table:—

BARLEY: EXPORTS, AUSTRALIA.

Particulars.	Average, 1934-35 to 1938-39.	1951-52.	1952-53.	1953-54.	1954-55.	1955-56.
Quantity .. '000 bus.	3,279	12,062	22,239	26,949	18,867	17,539
Value .. £'000	483	11,154	19,245	14,870	10,357	10,471

Imports of barley in recent years have been negligible.

In addition to exports of barley grain, there is also an export of Australian pearl and Scotch barley, the total for 1955-56 amounting to 356,142 lb., valued at £11,961, consigned mainly to Malaya.

6. Malt.—(i) *Production.* Details of the quantity of grain used and the production of barley malt are given in the following table:—

BARLEY MALT: GRAIN USED AND MALT PRODUCED, AUSTRALIA.

Particulars.	1938-39.	1951-52.	1952-53.	1953-54.	1954-55.	1955-56.
Grain used . . '000 bus.	3,730	6,063	6,505	7,118	7,629	7,803
Malt produced '000 bus.(a)	3,621	6,073	6,620	7,078	7,517	7,782

(a) 40 lb. per bushel.

(ii) *Imports and Exports.* The production of malt in Australia was sufficient to meet local requirements and to provide a margin for export until 1947-48 but from 1948-49 to 1951-52 imports exceeded exports by an increasing quantity, the net imports reaching 266,000 bushels in 1951-52. In 1952-53, there was a small net export and net exports have increased steadily since. In 1954-55 and 1955-56, no malt was imported and exports amounting to 368,247 bushels valued at £372,177 in 1954-55 and 451,687 bushels valued at £502,046 in 1955-56 were recorded.

7. *World Production.*—In comparison with the barley production of other countries, that of Australia is extremely small. The main producers in 1955 were the United States of America and Canada. China is also normally a major producer, but details for 1955 are not available. Australian production in that year was only a little more than one per cent. of the world total.

According to preliminary results compiled by the Food and Agriculture Organization of the United Nations, world production of barley in the year 1955, excluding that of the U.S.S.R., amounted to 2,562 million bushels harvested from 112.2 million acres, equivalent to a yield per acre of 22.8 bushels. This compared with the production of 2,465 million bushels in the previous year from 110 million acres, giving a yield per acre of 22.4 bushels. Production, including that of the U.S.S.R., over the years 1934-38 averaged 2,273 million bushels from 114.6 million acres, representing an average yield of 19.8 bushels per acre.

§ 8. Rice.

The rice-growing areas of the world are confined almost entirely to Asia although rice is grown in limited quantities in other countries. In Australia, rice was first cultivated at the Yanco Experimental Farm in New South Wales, but it was not grown commercially until 1924-25 when 16,240 bushels were produced from 153 acres. Favoured by high average yields and protected by tariff, rice culture made rapid progress in the Murrumbidgee Irrigation Area until local requirements were met and a small surplus became available for export. The acreage to be sown in this area is controlled as the quantity of water available is limited.

In 1956, the Commonwealth Government entered into an agreement for the development of large scale rice-growing in the Northern Territory. The agreement, which was made with a company financed by American and Australian interests, granted a 30 year lease over 750,000 acres of sub-coastal plains east of Darwin and provided for the development of 500,000 acres of land for rice-growing within 15 years.

The area sown in 1955-56 was a record at 41,182 acres, the previous highest area being 40,690 acres in 1943-44. Production was 4,725,000 bushels in 1955-56 which was 355,000 bushels less than the record production of 5,080,000 bushels in 1954-55.

A graph showing the production of rice appears on p. 834.

The bulk of Australia's exports of rice, which had gone to the United Kingdom in years prior to 1938-39, is shipped now to islands in the South-East Asia area.

Details relating to area, production and trade for the years 1951-52 to 1955-56, compared with the averages for the years 1934-35 to 1938-39, are shown in the following table:—

RICE : AREA, PRODUCTION AND TRADE, AUSTRALIA.(a)

Season.	No. of Holdings Growing Rice. (b)	Area.	Production (Paddy Rice).		Average Yield (Paddy) per Acre.	Imports.		Exports.	
			Quantity.	Gross Value. (c)		Un-cleaned.	Cleaned.	Un-cleaned.	Cleaned.
			'000 Bushels. (d)	£'000.		Bushels. (d)	Centals.	Centals.	Centals.
Average, 1934-35 to 1938-39 ..	(e) 313	22,823	2,274	450	99.7	2,124	38,272	9,357	271,851
1951-52 ..	452	35,664	3,048	2,108	85.5	3	18	4,140	559,395
1952-53 ..	496	34,519	3,964	3,338	114.8	136	2,223	2,126	532,828

1955-56 ..	620	41,182	4,725	3,405	114.7	(f)	(f)	200,813	760,400

(a) Rice-growing in Australia has been practically confined to New South Wales with very small acreages only being sown in Queensland, Western Australia and the Northern Territory in recent seasons. (b) Twenty acres or more in area. (c) Excludes the value of straw. (d) Forty-two lb. per bushel. (e) 1938-39 figure, previous years not collected. (f) Not available.

§ 9. Sorghum for Grain.

The growing of sorghum for grain on an extensive scale is a recent development in Australia. No details of the area and production of this cereal are available prior to 1939-40, but the output was of little importance. The climatic conditions of Queensland and northern New South Wales are particularly suited for the growing of sorghum and so far, development has been restricted mainly to these areas, and more particularly to Queensland which accounts for the greater portion of the area sown. The grain produced is fed to livestock and has become an important source of supply for supplementing other coarse grains for the feeding of livestock. Other sorghums are grown in Australia mainly as green fodder, hay and silage (sweet sorghums and Sudan grass) and for the production of brush for broom manufacture (broom millet). Particulars of the area and production of sorghum grown for grain are given in the following table.

GRAIN SORGHUM : AREA, PRODUCTION AND YIELD PER ACRE, AUSTRALIA.

Season.	Area.			Production.(a)			Yield per Acre.(a)		
	N.S.W.	Q'land.	Total. (b)	N.S.W.	Q'land.	Total. (b)	N.S.W.	Q'land.	Total. (b)

1955-56 ..	23,697	155,527	179,298	662,973	3,960,195	4,624,273	28.0	25.5	25.8

(a) 60 lb. per bushel. (b) Includes small areas sown and quantities produced in other States. (c) Not available. (d) Queensland only.

§ 10. Potatoes.

1. Area, Production and Yield per Acre.—Victoria possesses particular advantages for the growing of potatoes, as the rainfall is generally satisfactory and the climate is unfavourable to the spread of Irish blight; consequently, the crop is widely grown. The principal areas of that State are the central highlands, and the south-western and Gippsland districts. Tasmania comes next in order of acreage sown, although the production exceeded that of Victoria in some of the war years. New South Wales occupies third place in acreage and production. The area of these three States accounted for 76 per cent. of the total for Australia in 1955–56.

The area sown, production and yield per acre of potatoes in each State during the years 1951–52 to 1955–56 and the averages for the ten-year periods ended 1938–39 and 1954–55 are shown hereunder:—

POTATOES : AREA, PRODUCTION AND YIELD PER ACRE.

1955–56 ..	3.33	4.41	3.68	6.79	6.16	3.74	..	5.93	4.29

(a) Not available.

After the outbreak of war in the Pacific in December, 1941, the area sown to potatoes increased rapidly and reached a maximum of 241,803 acres in 1944–45. Areas sown in subsequent seasons were considerably less, however, and showed a general decline to the figure for the 1955–56 season, 93,607 acres.

Compared with the yield per acre obtained in other countries, that returned for Australia is low; the production in New Zealand, for example, averaged 6.74 tons per acre in 1954–55 from an area of about 20,000 acres, as compared with a record yield of 4.36 tons per acre in Australia in 1954–55, and 4.29 tons per acre in 1955–56.

2. **Gross Value of Potato Crop.**—The estimated gross value of the potato crop of each State for the 1954–55 season and the value per acre are shown in the following table.

POTATOES : VALUE OF CROP, 1954-55.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value £'000	914	5,840	766	675	1,175	4,073	6	13,449
Value per acre £ s. d.	65 15	2,132 9 9	79 12 11	111 14	1'155 6 10	155 8 4	89 3	1,125 2 7

3. **Consumption.**—The annual consumption of potatoes in Australia during each of the three years 1953–54 to 1955–56 amounted to 485,400 tons, 417,100 tons and 373,400 tons respectively, or 122.2 lb., 102.8 lb. and 89.8 lb. respectively per head of population. These figures exclude the quantities used for seed, which averaged about 55,000 tons annually over this period. Consumption during the three years ended 1938–39 averaged 318,500 tons (103.8 lb. per head of population) excluding 37,000 tons for seed. New South Wales, Queensland and, in some seasons, South Australia do not produce the quantities necessary for their requirements and must import from Tasmania and Victoria which have a surplus.

4. **Marketing.**—Commonwealth control of potato marketing under war-time legislation ceased at the end of 1948 with the completion of sales of the 1947–48 crop.

Potato Marketing Boards were subsequently established in all States under separate State legislation. The Queensland Board was not extended when its term ended in 1954, and the New South Wales Board was voted out by growers in 1956. As the Victorian Board does not acquire the State crop, potato marketing is conducted now chiefly on an open marketing system.

5. **Exports.**—Prior to the 1939–45 War, small quantities of potatoes were exported, principally to the Pacific Islands and Papua. After the war, the export trade expanded considerably. It reached a peak in 1952–53 but then declined. Details showing exports for the years 1951–52 to 1955–56 and the annual average for the period 1934–35 to 1938–39 are given in the following table:—

POTATOES : EXPORTS, AUSTRALIA.

Particulars.	Average, 1934–35 to 1938–39.	1951–52.	1952–53.	1953–54.	1954–55.	1955–56.
Quantity .. tons	1,884	12,468	37,570	4,010	3,473	3,478
Value .. £'000	17	437	1,237	155	109	225

Imports of potatoes are negligible.

§ 11. Onions.

1. **Area, Production and Yield per Acre.**—Australia's supply of onions comes chiefly from Victoria, which accounted for 47.6 per cent. of the total area and 50.9 per cent. of the quantity produced in 1955–56. Queensland came next with 35.4 per cent. of the area and 23.0 per cent. of the production, leaving a balance of 17.0 per cent. of area and 26.1 per cent. of production distributed among the remaining four States. The Victorian crop consists almost entirely of brown onions of good keeping qualities, and the bulk of the crop is grown in a small section of the Western Division of the State, where soil conditions have been found to be particularly suitable for onion growing on a commercial scale. Details of the area, production and yield per acre are given in the following table for the years 1951–52 to 1955–56 together with averages for the ten-year periods ended 1938–1939 and 1954–55.

ONIONS : AREA, PRODUCTION AND AVERAGE YIELD.

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
AREA (ACRES).

1953-54	4.91	6.26	4.79	10.56	12.34	4.83	2.00	6.29
1954-55	4.70	6.57	4.36	9.36	11.08	5.10	7.89	6.13
Average, 1945-46 to 1954-55	3.98	6.17	4.35	9.84	9.89	4.42	5.33	5.95
1955-56	5.53	6.08	3.69	9.37	11.05	6.36	5.25	5.69

2. **Gross Value of Onion Crop.**—The estimated gross value of the onion crop and the value per acre are shown in the following table for the 1954-55 season:—

ONIONS : VALUE OF CROP, 1954-55.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.	
Aggregate value £'000	58	841	352	194	134	4	3	1,586	
Value per acre £ s. d.	203 6	0 211 17	10 125 7	11 378 17	11 344 5	8 188 11	5 341 4	5 198 9	1

3. **Consumption.**—The annual consumption of onions in Australia averaged 44,600 tons or 11.0 lb. per head of population during the three years ended 1955-56, compared with 40,600 tons or 13.2 lb. per head during the three years ended 1938-39. These figures exclude an estimated wastage which averaged 2,300 tons and 2,100 tons respectively.

4. **Imports and Exports.**—Onions are the only root crop, other than potatoes, in which any considerable overseas trade is carried on by Australia. In 1955–56, exports amounted to 981 tons, valued at £54,944, and were shipped mainly to New Caledonia, Singapore, Papua and Hong Kong. The quantity of exports in 1954–55 was 2,706 tons, valued at £104,440. There were no imports in 1954–55 and 1955–56.

Details relating to fresh vegetables other than potatoes and onions are given in § 17.

§ 12. Hay.

1. **General.**—(i) *Area and Production.* As already stated, the chief crop in Australia is wheat grown for grain. Up to and including 1946–47, hay was next in importance in area but, in 1947–48, it gave place to oats (for grain). In the following year, 1948–49, green fodder replaced hay as the third most important crop and hay has since remained in fourth position.

In 1955–56, the hay area represented 10.0 per cent. of the total area cropped. A graph showing the area sown to hay since 1860 appears on p. 831. In most European countries, the hay consists almost entirely of meadow and other grasses, but, in Australia, a very large proportion consists of oats, wheat and lucerne. The area, production and yield per acre of hay of all kinds in the several States during the years 1951–52 to 1955–56 and the averages for the ten-year periods ended 1938–39 and 1954–55 are shown below:—

HAY : AREA, PRODUCTION AND YIELD PER ACRE.

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
AREA ('000 ACRES).								
Average, 1929–30 to 1938–39 ..	757	1,111	68	541	432	83	2	2,994
1951–52 ..	334	640	44	257	174	98	2	1,549
1952–53 ..	388	753	66	214	227	110	3	1,761

1954–55 ..	524	739	76	257	289	96	3	1,984
Average, 1945–46 to 1954–55 ..	458	709	63	289	232	99	3	1,853
1955–56 ..	562	879	63	326	269	137	5	2,241
PRODUCTION ('000 TONS).								
Average, 1929–30 to 1938–39 ..	959	1,263	104	577	464	120	3	3,490
1951–52 ..	451	1,047	80	380	211	172	4	2,345
1952–53 ..	579	1,245	136	318	290	192	5	2,765
1953–54 ..	639	1,361	140	369	294	241	5	3,049
1954–55 ..	680	1,208	171	330	305	158	4	2,856
Average, 1945–46 to 1954–55 ..	601	1,116	123	385	271	166	4	2,666
1955–56 ..	846	1,526	137	461	384	261	10	3,625
YIELD PER ACRE (TONS).								
Average, 1929–30 to 1938–39 ..	1.27	1.14	1.54	1.07	1.07	1.44	1.21	1.17
1951–52 ..	1.35	1.63	1.83	1.48	1.22	1.76	1.58	1.51
1952–53 ..	1.49	1.65	2.05	1.48	1.28	1.75	1.54	1.57
1953–54 ..	1.42	1.69	1.99	1.41	1.34	1.96	1.52	1.58
1954–55 ..	1.30	1.63	2.25	1.28	1.05	1.64	1.33	1.44
Average, 1945–46 to 1954–55 ..	1.31	1.57	1.96	1.33	1.17	1.67	1.44	1.44
1955–56 ..	1.51	1.74	2.17	1.41	1.42	1.91	2.08	1.62

Owing to various causes, particularly the variation in the relative prices of grain and hay and the favourableness or otherwise of the season for a grain crop, the area of hay is apt to fluctuate considerably. The area under hay in Australia during the season 1915–16, 3,597,771 acres, was the largest on record, whilst the average for the ten-years ended 1954–55 was 1,852,509 acres.

A graph showing the production of hay appears on p. 834.

(ii) *Varieties Grown.* Information regarding areas cut for hay is available for all States, and details for 1955–56 are given in the following table.

HAY : AREA UNDER VARIOUS KINDS GROWN, 1955-56.
(Acres.)

State.	Wheaten.	Oaten.	Lucerne.	Other.	Total.
New South Wales	84,487	102,173	195,204	179,608	561,472
Victoria	33,003	198,873	69,305	578,107	879,288
Queensland	5,197	4,134	49,946	3,827	63,104
South Australia	61,524	139,325	20,932	103,892	325,673
Western Australia	58,005	133,082	552	77,800	269,439
Tasmania	2,737	23,668	1,276	109,476	137,157
Australian Capital Territory ..	191	1,922	1,306	1,308	4,727
Australia	245,144	603,177	(a)338,522	1,054,018	a 2,240,861

(a) Includes one acre in the Northern Territory.

For all States and the Territories combined, the proportions of the areas sown to the principal kinds of hay in 1955-56 were 27 per cent. for oaten, 11 per cent. for wheaten, 15 per cent. for lucerne, and 47 per cent. for other hay. In that year, oaten hay predominated in the States of South Australia and Western Australia, lucerne in New South Wales and Queensland, and meadow and grass in Victoria and Tasmania.

2. **Value of Hay Crop.**—The following table shows the estimated gross value, and the value per acre, of the hay crop of the several States for the 1954-55 season:—

HAY : VALUE OF CROP, 1954-55.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value £'000	9,228	11,842	2,393	2,861	2,781	1,715	58	30,878
Value per acre ..	£17 12 4	£16 0 6	£31 9 3	£11 3 1	£9 12 3	£17 15 6	£18 17 1	£15 11 3

3. **Farm Stocks of Hay.**—Details of stocks of hay held on farms are now collected at the annual census of farm production. Particulars of stocks so held at 31st March in each year 1952 to 1956 are given in the table below.

STOCKS OF HAY HELD ON FARMS.
(Tons.)

31st March—	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Australia.
1952 ..	500,596	1,129,163	29,766	418,734	142,711	129,893	2,702	2,353,565
1953 ..	628,977	1,347,363	97,492	402,477	186,523	145,375	5,119	2,813,326
1954 ..	700,367	1,479,299	106,794	420,423	216,023	185,549	4,775	3,113,230
1955 ..	809,263	1,553,289	156,115	447,102	207,664	145,112	3,269	3,321,814
1956 ..	830,619	1,870,214	149,187	474,456	306,586	270,138	7,778	3,908,978

4. **Imports and Exports.**—Under normal conditions, hay, whether whole or in the form of chaff, is somewhat bulky for oversea trade, and consequently does not figure largely amongst the imports and exports of Australia. During 1955-56, exports amounted to 2,064 tons, valued at £43,222.

§ 13. Green Fodder.

1. **Nature and Extent.**—Considerable areas are devoted to the growing of green fodder, mainly in connexion with the dairying industry. Consequently, green fodder ranks after wheat and oats (for grain) as the third most important crop, in area, grown in Australia. The areas recorded in respect of green fodder include areas of crops cut for feeding to live-stock as green fodder, or ensilage, together with areas fed off to stock as green forage. Included with the latter are areas which may have been sown with the intention of harvesting

for grain, but which, due to adverse seasonal conditions, showed no promise of producing grain or even hay and were fed off to live-stock. The principal crops cut for green fodder are oats, wheat and lucerne, while small quantities of barley, sorghum, maize, rye and sugar-cane also are so used. In 1955-56, the area under green fodder (2,648,799 acres) consisted of oats (1,558,256 acres), lucerne (400,486 acres), wheat (120,835 acres), sorghum (71,514 acres), maize (41,569 acres), barley (130,298 acres), rye (30,583 acres), sugar-cane (1,683 acres) and other crops (293,575 acres). Particulars concerning the area of green fodder in the several States during each of the years 1951-52 to 1955-56 are given in the following table, together with the average for the period of ten years ended 1938-39.

GREEN FODDER : AREA.
(Acres.)

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W.Aust.	Tas.	N.T.	A.C.T.	Aust.
Average, 1929-30 to 1938-39 ..	482,989	(a)	347,804	106,820	189,332	24,255	(a)	656	(a)
1951-52 ..	672,633	45,661	604,190	385,079	636,728	57,548	(a)	1,225	2,403,064

1953-54 ..	761,552	56,210	663,097	365,301	507,756	60,127	(a)	1,218	2,415,261
1954-55 ..	934,395	77,135	649,607	360,359	639,086	70,945	32	988	2,732,547
1955-56 ..	826,789	75,815	689,469	334,957	666,398	54,401	..	970	2,648,799

(a) Not available.

2. Value of Green Fodder Crops.—The value of these crops is variously estimated in the several States, and the Australian total for the season 1954-55, excluding Western Australia, may be taken as approximately £6,440,000.

§ 14. Sugar-cane.

1. Area.—Sugar-cane growing appears to have commenced in Australia in or about 1862, and is confined to New South Wales and Queensland. A brief outline of the development of the industry was included in earlier issues of the Official Year Book (see No. 38, p. 985). The area of sugar-cane in Australia for the seasons 1951-52 to 1955-56 and the averages for the ten-year periods ended 1938-39 and 1954-55 are shown in the following table. In 1955-56, the total area of sugar-cane (excluding areas cut for green fodder) was 499,065 acres which was slightly below the record area of 501,859 acres in 1954-55.

SUGAR-CANE : AREA.(a)
(Acres.)

Season.	New South Wales.			Queensland.			Australia.			Total.
	Area crushed.	Area of stand-over and newly-planted cane.	Area cut for plants.	Area crushed.	Area of stand-over and newly-planted cane.	Area cut for plants.	Area crushed.	Area of stand-over and newly-planted cane.	Area cut for plants.	
Average, 1929-30 to 1938-39 ..	9,106	9,023	140	229,327	75,409	9,368	238,433	84,432	9,508	332,373
1951-52 ..	8,354	5,974	191	273,370	101,731	13,247	281,724	107,705	13,438	402,867
1952-53 ..	5,202	8,581	277	274,757	131,724	13,353	279,959	140,305	13,630	433,894
1953-54 ..	7,787	6,869	468	332,703	120,929	12,846	340,490	127,798	13,314	481,602
1954-55 ..	6,566	8,078	474	367,640	107,512	11,589	374,206	115,590	12,063	501,859
Average, 1945-46 to 1954-55 ..	7,364	7,958	322	270,740	101,803	12,348	278,104	109,761	12,670	400,535
1955-56 ..	7,522	8,728	670	365,252	104,782	12,111	372,774	113,510	12,781	499,065

(a) Excludes areas cut for green fodder.

2. **Productive and Unproductive Cane.**—The areas shown in the preceding table do not include the small acreage cut for green fodder, which in 1955-56 amounted to 1,683 acres. The whole area planted is not cut for crushing during any one season, there being always a considerable amount of young and "stand-over" cane as well as a small quantity required for plants. Thus the season in which the highest acreage is recorded may not show the greatest area of productive cane cut for crushing.

3. **Production of Cane and Sugar.**—For Queensland, statistics of the production of sugar-cane are not available for seasons prior to 1897-98. In that season, the total for Australia was 1,073,883 tons, compared with 8,900,702 tons in the 1955-56 season. The record production was 10,086,517 tons in 1954-55.

The average production of cane during the ten seasons ended 1954-55 was 6,516,573 tons, and of raw sugar 890,048 tons. Particulars of the total production of cane and sugar for the years 1951-52 to 1955-56 and the averages for the ten-year periods ended 1938-39 and 1954-55 are as follows.

SUGAR-CANE : PRODUCTION OF CANE AND SUGAR.

(Tons.)

Season.	New South Wales.		Queensland.		Australia.	
	Cane.	Sugar.(a)	Cane.	Sugar.(a)	Cane.	Sugar.(a)
Average, 1929-30 to						
1938-39	241,402	30,317	4,461,988	626,789	4,703,390	657,106
1951-52	321,388	41,060	5,005,172	704,341	5,326,560	745,401
1952-53	125,714	14,272	6,841,536	934,614	6,967,250	948,886
1953-54	263,249	34,004	8,751,063	1,220,383	9,014,312	1,254,387
1954-55	222,213	26,301	9,864,304	1,301,245	10,086,517	1,327,546
Average, 1945-46 to						
1954-55	264,006	32,515	6,252,567	857,533	6,516,573	890,048
1955-56	284,539	36,028	8,616,163	1,135,685	8,900,702	1,171,713

(a) Raw sugar at 94 net titre.

The production of raw sugar in Australia in 1955-56 amounted to 1,171,713 tons manufactured from 8,900,702 tons of cane, compared with the record production of 1,327,546 tons in 1954-55.

Official annual data are not available regarding the total number of persons engaged in the sugar industry in New South Wales and Queensland. The number of separate holdings of 5 acres or more growing cane was 7,224 in 1955-56.

According to data obtained from the population census of 30th June, 1954, the number of persons engaged in the sugar-cane industry in New South Wales and Queensland comprised 20,185 males and 431 females, a total of 20,616 persons, of whom 4,245 were employers and 5,118 were self-employed.

4. **Average Production of Cane Sugar.**—Owing to climatic variation, comparison between the average yields of cane per productive acre in Queensland and New South Wales cannot be made accurately except on an annual basis. In New South Wales, the crop matures in from 20 to 24 months, whereas in Queensland a period of from 12 to 14 months is sufficient. Allowing for the disparity in maturing periods the average annual yields of cane per productive acre during the ten years ended 1954-55 were 35.85 tons for New South Wales, and 23.09 tons for Queensland. Similarly, the yields of sugar per acre crushed for the same period were estimated at 4.42 tons and 3.17 tons respectively. Apart from the consideration mentioned above, the yields of cane and sugar per acre crushed for Australia for the ten years ended 1954-55 were 23.43 tons and 3.20 tons respectively, as compared with 19.73 tons and 2.76 tons for the ten years ended 1938-39.

SUGAR-CANE AND SUGAR : YIELD PER ACRE.
(Tons.)

Season.	New South Wales.			Queensland.			Australia.

Average, 1929-30 to									
1938-39	26.51	3.33	7.96	19.46	2.73	7.13	19.73	2.76	7.15
1951-52	38.47	4.92	7.83	18.31	2.58	7.11	18.91	2.65	7.15
1952-53	24.17	2.74	8.81	24.90	3.40	7.32	24.89	3.39	7.34
1953-54	33.81	4.37	7.74	26.30	3.67	7.17	26.47	3.68	7.19
1954-55	33.84	4.01	8.45	26.83	3.54	7.58	26.95	3.55	7.60
Average, 1945-46 to									
1954-55	35.85	4.42	8.12	23.09	3.17	7.29	23.43	3.20	7.32
1955-56	37.83	4.79	7.90	23.59	3.11	7.59	23.88	3.14	7.60

5. **Quality of Cane.**—The quantity of cane required to produce a ton of sugar varies with the variety planted, the district and the season. For the ten years ended 1954-55 it required on the average 7.32 tons of cane to produce 1 ton of sugar, or 13.7 per cent. of its total weight, as compared with 7.15 tons for the ten years ended 1938-39. As the result of the systematic study of cane culture in Queensland and improvements in field and mill methods the sugar content of the cane has been considerably increased since the turn of the century when over 9 tons of cane were required to produce 1 ton of sugar. It is believed that this is the highest sugar content obtained anywhere in the world.

The Bureau of Sugar Experiment Stations in Queensland is rendering useful service to the sugar industry by advocating and demonstrating better methods of cultivation and the more scientific use of fertilizers, lime, etc., and by producing and distributing improved varieties of cane.

6. **Production and Utilization.**—Details of the production and utilization of raw sugar for the three years ended 1938-39 and each year 1951-52 to 1955-56 are shown below. It should be noted that the details of sugar production refer to the annual periods shown, without regard to the season in which the sugar was produced; and include the small quantities of beet sugar produced in certain of these years. Consumption is shown in terms of refined sugar, including that consumed in manufactured products.

RAW SUGAR : PRODUCTION AND UTILIZATION, AUSTRALIA.

Year.	Changes in Stocks.	Pro-duction.	Exports. (a)	Miscel-laneous Uses.(b)	Consumption in Australia.(a)	
					Total.(c)	Per Head. (c)

(a) Includes sugar content of manufactured products. (b) Includes industrial uses and losses in refining. (c) In terms of refined sugar.

7. **Consumption in Factories.**—The quantity of sugar used in factories in 1955-56 amounted to 266,065 tons compared with 252,012 tons in 1954-55 and 123,883 tons in 1938-39. Particulars of sugar used in establishments not classified as factories are not available, and consequently these quantities are deficient to that extent. In 1955-56, consumption by factories engaged in the production of jams, jellies and preserved fruit (including condiments, pickles, etc.) amounted to 71,056 tons and by those producing confectionery, ice cream, etc., amounted to 52,784 tons.

8. **Control of Cane Production in Queensland.**—Agreements between the Commonwealth and Queensland Governments have fixed the wholesale price of sugar and sugar products from time to time. Details of prices are shown in para. 14 of this section (*see* p. 863.)

The Queensland Government acquires the whole of the sugar production of that State and New South Wales by legislation and private agreement respectively. The net proceeds of all sugar sold are pooled and a uniform price paid to mills.

Sugar production barely met local requirements in 1923 but increased rapidly until 1925 when approximately 44 per cent. of the production was exported. Steps were taken by the Government to restrict planting of new areas and production was fairly stable until 1929. In that year, the pool was reorganized and mills received full pool price for sugar up to the amount of their previous maximum production, further supplies being acquired at export prices.

Between 1929 and 1939, production rose by more than 70 per cent. despite the restrictions mentioned above and the fact that export prices were generally less than half the pool price.

In 1939, following the International Sugar Agreement, which limited exports, the Queensland Government limited the pool (mill peaks) to 737,000 tons in respect of Queensland production. Mill quotas were allotted on the understanding that mills would allot quotas to individual growers. Mill peaks have been raised to 942,300 tons in 1950, 1,045,000 in 1953 and 1,170,900 tons in 1954. These latter increases followed the negotiation of the Commonwealth Countries Sugar Marketing Agreement of 1949, which allowed the Queensland Government to initiate a planned expansion of the industry.

9. **Sugar Agreement in Australia—Embargo on Imports, etc.**—Reference was made in Official Year Book No. 37 (pp. 940–41) to the agreement operating between the Commonwealth and Queensland Governments in respect of the sugar industry in Australia. Briefly, the agreement places an embargo on sugar importations and fixes the price of sugar consumed in Australia. A new agreement operating from 7th July, 1951, covers the period up to 31st August, 1956. Some of the terms of the 1951 Agreement (in particular, those relating to sugar prices), were amended in 1952, and incorporated in the Sugar Agreement Act 1954. A further amendment in May, 1956, again increased the price of sugar.

10. **International Sugar Agreement.**—The International Sugar Agreement of 1937 was superseded by a new agreement which came into force on 1st January, 1954. Details of the 1937 Agreement were given in Official Year Book No. 40, pp. 881 and 882, and previous issues.

The new agreement, which was negotiated by 38 countries, is designed to assure supplies of sugar to importing countries and markets to exporting countries at stable and equitable prices. It is also aimed at increasing world consumption of sugar. Basic export quotas have been allocated with provision for reductions or increases to maintain prices within a specified range.

The British Commonwealth, as a whole, has been granted an export quota of 2,375,000 tons, rising to 2,450,000 tons in 1956, which is not subject to the fluctuations mentioned above. The allocation of this total between exporting members of the British Commonwealth is a matter for the countries and territories themselves, Australia's share being fixed at 600,000 tons. Details of the marketing arrangements for Australian sugar are given in para. 15 below.

11. **Net Return for Sugar Crop.**—Details of the disposal of the crop, net value of exports and the average price realized during each of the years 1938–39 and 1951–52 to 1955–56 will be found in the following table:—

RAW SUGAR(a) : NET RETURNS, AUSTRALIA.

Year.	Proportion Exported. (b)	Net Value of Exports per Ton. (b)		Average Price per Ton for Whole Crop.	Estimated Value of Crop.
		£	s. d.	£ s. d.	
1938–39	55.78	8	4 3	15 3 11	12,806
1951–52	21.12	36	15 6	34 7 0	24,912
1952–53	49.66	41	2 0	42 12 9	40,781
1953–54	58.39	38	13 9	42 10 8	52,572
1954–55	59.11	37	8 0	41 6 11	53,984
1955–56	53.46	38	11 4	42 9 0	51,744

(a) 94 net titre.

(b) As supplied by the Queensland Sugar Board.

The estimated value of the raw sugar produced has been based upon details taken from the audited accounts of the Queensland Sugar Board. The values stated represent the gross receipts from sales in Australia and overseas, less refining costs, freight, administrative charges, etc., and export charges, but including concessions to the fruit industry and other rebates which in 1955-56 amounted to £356,689. The value thus obtained represents the net market value of all raw sugar sold, which is divided between the growers and millers in the approximate proportions of 70 per cent. and 30 per cent. respectively.

12. **Exports of Sugar.**—Particulars of the exports of cane sugar (raw and refined) for the five years ended 1938-39 and for each year from 1951-52 to 1955-56 are as follows:—

SUGAR : EXPORTS, AUSTRALIA.

Particulars.		Average, 1934-35 to 1938-39.	1951-52.	1952-53.	1953-54.	1954-55.	1955-56.
Quantity	tons	377,930	167,431	459,370	706,801	592,018	737,108
Value	£'000	3,481	6,896	21,655	31,592	24,703	31,138

13. **Sugar By-products.**—Large quantities of molasses are produced as a by-product in the sugar mills. Details for a series of years of the quantities produced and the amounts used for distilling, fuel, manure and other purposes will be found in Chapter VII.—Manufacturing Industry.

Other by-products include industrial chemicals and building boards. These boards are made from the residue of crushed fibre after removal of the sugar content from sugar-cane and possess high insulating and sound-absorbing properties which make them particularly suitable for use in walls and ceilings.

14. **Sugar Prices.**—The prices of sugar in Australia from 1951 to 1955 in the case of raw sugar, and from 1951 to 1956 in the case of refined sugar, are shown in the following table.

SUGAR : PRICES IN AUSTRALIA.

Year.	Raw Sugar, 94 Net Titre.			Refined Sugar.		
	Average Return per Ton Received by Millers and Growers for—			Date of Determination.	Wholesale Price per Ton.	Retail Price per lb.
	Home Consump- tion.	Exports.(a)	Whole Crop. (a)			
£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	d.	
1951 ..	33 14 0	36 15 6	34 7 0	7.7.51 to 23.3.52..	53 6 8	6½
1952 ..	44 3 0	41 2 0	42 12 9	24.3.52 to 12.10.52	65 12 10	8
1953 ..	47 18 6	38 13 9	42 10 8	13.10.52 to 13.5.56	73 16 11	9
1954 ..	47 1 0	37 8 0	41 6 11	14.5.56 to 31.8.61	82 1 0	10
1955 ..	46 18 0	38 11 6	42 9 0			

(a) Including "Excess" Sugar.

15. **Marketing Arrangements.**—Since 1939, the British Ministry of Food has purchased Australia's surplus raw sugar at prices negotiated annually and varying from £ stg. 11 5s. in 1939 to £ stg. 40 15s. in 1956 including tariff preference (for prices in other years see earlier issues of the Year Book). From 1953, the negotiated price applies to 314,000 tons of exports annually, the balance of exports being sold at world prices.

In December, 1949, the United Kingdom Government undertook to find a market for Australia's sugar exports until the end of 1952 when a new British Commonwealth Sugar Agreement came into operation. The new arrangement, as extended annually, provides for Australia to export a maximum of 600,000 tons annually from 1953 to 1964. The United Kingdom Government agreed to take 300,000 tons at annually negotiated prices, the balance to be sold at world prices, plus preference if sold in the United Kingdom or Canada.

The Sugar Bill introduced into the House of Commons on 5th July, 1955, provided for the reversion of dealings in sugar in the United Kingdom to a trader to trader basis as

from 1st January, 1957. However, under the Bill, a Sugar Board was created which is responsible for the purchase of the negotiated price sugar which the United Kingdom Government has contracted to take under the British Commonwealth Sugar Agreement.

16. Fruit Industry Sugar Concession Committee and Sugar Rebates.—The Fruit Industry Sugar Concession Committee was established by agreement between the Commonwealth and Queensland Governments and administers a fund to which the Queensland Government contributes £216,000 annually on behalf of the Sugar Industry (contributions were suspended temporarily while funds exceeded £500,000).

A rebate of £2 4s. per ton of refined sugar used in processing approved fruit products is paid to Australian manufacturers provided they buy the fresh fruit at prices not lower than those declared by the Committee as reasonable.

An export sugar rebate is also paid by the Committee to exporters of approved fruit products to ensure that manufacturers do not pay higher prices for Australian sugar than the price for which the cheapest imported sugar could be landed duty free in Australia.

Any money remaining may be used for the promotion of the use and sale of fruit products, or for scientific research for the purpose of increasing the yield per acre of Australian fruits.

17. Sugar Inquiry Committee.—The Sugar Inquiry Committee was constituted in March, 1952, to investigate the sugar industry and in particular the Sugar Agreement between the Commonwealth and Queensland Governments. As a result of its findings, the wholesale and retail prices of sugar were increased from 13th October, 1952 by £8 per ton and 1d. per lb. respectively.

Other amendments were also made, and incorporated in the Sugar Agreement Act, 1954.

18. Bulk Handling of Sugar.—Terminals for loading raw sugar in bulk are under construction at the ports of Mackay and Lucinda Point. Designs are being prepared for additional terminals at Townsville and Bundaberg. These facilities in Queensland are being constructed under a general scheme laid down in the Queensland Harbours Act, 1955.

Bulk unloading facilities are in operation at Pymont refinery, Sydney. The three raw sugar mills in New South Wales despatch all their raw sugar production in bulk.

§ 15. Vineyards.

1. Progress of Cultivation.—(i) *Area of Vineyards.* Since the early days of Australian settlement, the expansion of the cultivation of vines has been most rapid in Victoria and South Australia, the area under vineyards in the 1956 season in these two States comprising 78 per cent. of the total area. The purposes for which grapes are grown in Australia are (a) for wine-making, (b) for table use, and (c) for drying. The total area of vines in the several States during each of the years 1951–52 to 1955–56 and the averages for the ten-year periods ended 1938–39 and 1954–55 are shown in the following table.

VINEYARDS : AREA.
(Acres.)

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Aust.(a)
Average, 1929–30 to						
1938–39	15,777	40,563	2,142	54,156	5,666	118,304
1951–52	17,047	45,267	2,819	61,214	9,358	135,705
1952–53	18,006	45,968	2,808	60,603	9,233	136,618
1953–54	18,128	45,777	2,884	62,121	9,202	138,112
1954–55	18,205	45,757	2,896	60,612	9,015	136,485
Average, 1945–46 to						
1954–55	17,066	44,865	2,989	60,113	9,522	134,555

Total	18,099	44,817	2,916	59,862	9,107	134,801

(a) Excludes particulars for Australian Capital Territory.

(ii) *Wine Production, Bounties, etc.* The total production of wine (beverage and distillation) in Australia has shown a marked increase in recent years, rising from 14.3 million gallons in 1938-39 to 22.9 million gallons in 1955-56. In the same period, consumption of beverage wine in Australia has expanded from 4.5 million gallons (0.7 gallons per head of population) to 10.9 million gallons (1.2 gallons per head of population). For many years prior to the 1939-45 War, a bounty was paid on wine shipped overseas under the provisions of the Wine Export Bounty Act 1930, as amended from time to time. Details of the bounty, payment of which was discontinued in 1947, may be found in Official Year Book No. 39, p. 992.

The quantity of wine produced in the several States during the 1951-52 to 1955-56 seasons, together with the averages for the ten-year periods ended 1938-39 and 1954-55, are shown in the following table:—

WINE : PRODUCTION.(a)
(‘000 Gallons.)

Season.	N.S.W.	Victoria.	Queensland.	S. Aust.	W. Aust.	Australia.
Average, 1929-30 to 1938-39 ..	2,099	1,449	36	12,127	393	16,104
1951-52.. ..	5,465	3,472	33	25,495	790	35,255

1953-54.. ..	5,066	2,327	59	23,497	717	31,666
1954-55.. ..	2,271	1,612	61	19,208	812	23,964
Average, 1945-46 to 1954-55 ..	4,211	2,630	41	22,653	694	30,229
1955-56.. ..	2,327	1,342	37	18,403	787	22,896

(a) Net factory and farm production of beverage and distillation wine excluding the liquid gallonge of spirits added in wine fortifying.

2. *Imports and Exports of Wine.*—(i) *Imports.* The principal countries of origin of wine imported into Australia were, before the 1939-45 War, France, Spain, Portugal and Italy, the bulk of the sparkling wines coming from France. The bulk of the post-war wine imports have been obtained from France. Imports for 1955-56 amounted to 48,547 gallons valued at £106,462 compared with 53,204 gallons valued at £127,470 in the previous year and an average of 36,685 gallons valued at £39,577 for the five years ended 1938-39.

(ii) *Exports.* Before the 1939-45 War, practically all wine exported was sent to the United Kingdom, only about 200,000 gallons per annum being sent elsewhere. Exports in 1955-56 totalled 1,203,992 gallons, of which the United Kingdom received 896,490 gallons, New Zealand 61,972 gallons, Canada 176,852 gallons, and other countries 68,678 gallons.

Exports for the five years ended 1955-56 are shown in the following table in comparison with average exports during the five years ended 1938-39:—

WINE : EXPORTS FROM AUSTRALIA.

Year.	Quantity (Gallons).			Value (£).		
	Sparkling.	Other.	Total.	Sparkling.	Other.	Total.
Average, 1934-35 to 1938-39 ..	3,772	3,559,094	3,562,866	5,400	938,195	943,595
1951-52.. ..	6,685	1,155,610	1,162,295	18,983	711,554	730,537
1952-53.. ..	7,373	1,160,088	1,167,461	21,277	742,649	763,926
1953-54.. ..	4,842	1,390,118	1,394,960	16,631	886,228	902,859
1954-55.. ..	5,570	1,258,503	1,264,073	19,670	797,767	817,437
1955-56.. ..	5,997	1,197,995	1,203,992	19,833	714,235	734,068

3. **Oversea Marketing of Wine.**—(i) *The Wine Overseas Marketing Act 1929–1954.* This Act was introduced to place the oversea marketing of surplus wine on an orderly basis. The Australian Wine Board (formerly The Wine Overseas Marketing Board), consisting of representatives from wineries and distilleries, grape-growers and the Commonwealth Government, supervises the sale and distribution of Australian wine exported and recommends conditions under which export licences should be issued. The Board has a London agency which advises on marketing conditions.

During 1954, the Act was amended to enable the Board to engage in the sales promotion of wine in Australia in addition to overseas.

(ii) *The Wine Grapes Charges Act 1929–1954.* This Act provides for the imposition of a levy on all grapes used in Australia for the manufacture of wines or spirit used for fortifying wine. The proceeds of the levy are used to defray the administrative and other expenses of the Board, and provision is made for such exemptions from the levy as the Board may recommend.

4. **Other Viticultural Products.**—(i) *Table Grapes.* Grapes for table use are grown in all the States except Tasmania, but the area cultivated to this variety is only about 6 per cent. of the productive area of vines. The quantities of table grapes produced during the season 1955–56 in each State are shown in § 3 of this chapter. (See p. 826)

(ii) *Raisins and Currants.* The quantities of raisins (sultanas and lexias) and currants dried during each of the seasons 1951–52 to 1955–56 and the averages for the ten-year periods ended 1938–39 and 1954–55 are shown in the following table. Production in 1955–56 was 60,270 tons, compared with 80,752 tons in 1954–55.

RAISINS^(a) AND CURRANTS : PRODUCTION.

(Tons.)

Season.	N.S. Wales.		Victoria.		South Aust.		Western Aust.		Australia.

(a) Sultanas and lexias.

5. **Production and Disposal of Dried Vine Fruit.**—As the production of dried vine fruit is far in excess of Australia's requirements, considerable quantities are available for export. The quantities disposed of in Australia and overseas, as recorded by the Commonwealth Dried Fruits Control Board for the season ended December, 1955, totalled 79,469 tons, Australian consumption amounting to 18,036 tons and oversea exports 61,433 tons. Australian consumption includes amounts delivered to biscuit manufacturers, bakeries, etc., as well as retail sales for household consumption.

The following table shows the oversea exports of raisins and currants during each of the years 1951-52 to 1955-56 compared with the average for the five years ended 1938-39.

RAISINS AND CURRANTS(a) : EXPORTS, AUSTRALIA.

Year.	Raisins.		Currants.		Total Raisins and Currants.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	Tons.	£'000.	Tons.	£'000.	Tons.	£'000.
Average, 1934-35 to 1938-39 ..	43,191	1,686	15,054	549	58,245	2,235
1951-52 ..	32,669	3,961	5,003	646	37,672	4,607
1952-53 ..	58,886	6,395	10,387	1,053	69,273	7,448
1953-54 ..	51,693	5,561	10,731	1,039	62,424	6,600
1954-55 ..	59,934	6,720	8,373	917	68,307	7,637
1955-56 ..	51,734	6,224	9,561	1,151	61,295	7,375

(a) Excludes quantities exported as mincemeat.

The chief countries importing Australian raisins and currants are the United Kingdom, New Zealand and Canada, the quantities exported thereto in 1955-56 being 36,024 tons, 5,852 tons and 15,193 tons respectively.

6. **Post-war Contracts.**—Agreements were negotiated between the Governments of the United Kingdom and Australia for the purchase of Australian dried vine fruits during the period 1946-1953. Up to and including 1951, the quantity of fruit to be purchased was limited but in 1952 and 1953 there was no restriction. In April, 1953, it was agreed to extend the contract for one year but in August, 1953, the United Kingdom Government abolished all controls and on 1st December of that year exports reverted to a trader to trader basis.

The British Ministry of Food agreed to subsidize returns from sales of fruit of the 1954 crop sold in the United Kingdom up to 31st May, 1955, if average returns were less than the level of prices agreed upon. The support prices under this arrangement were: Currants 1 and 2 crown, £87 10s. per ton, Currants 3 and 4 crown, £93 15s.; Sultanas 1 crown and upwards, £100; Lexias 4 and 5 crown seeded, £112 10s., unseeded, £100.

Details of contract prices for the years 1946 to 1953 will be found on p. 783 of Official Year Book No. 41.

7. **Overseas Marketing of Dried Fruits.**—(i) *The Dried Fruits Export Control Act 1924-1953.* This Act was passed to organize overseas marketing of Australian dried vine fruits. The Dried Fruits Control Board, consisting of growers and Government representatives and members with commercial experience and experience in marketing dried fruits, controls the sale and distribution of dried fruit exports and recommends the conditions under which export licences will be issued.

In conjunction with its London agency the Board has improved dried fruit marketing overseas by its system of appraisal, regulation of shipments and advertising.

(ii) *Dried Fruits Export Charges Act 1924-1929.* This Act provides for a levy on exports of dried fruits to defray costs and expenses incurred by the Board. Provision is made for exemption from the levy upon recommendations by the Board.

§ 16. Orchards and Fruit-Gardens.

1. **Area.**—The largest area of orchards and fruit-gardens prior to the 1939-45 War was 281,899 acres which was attained in 1933-34. From that year until 1942-43, when 260,384 acres were under fruit, there was a gradual decline. In each subsequent year, there was a continuous upward movement to 1947-48 when the area reached a new peak of 290,320 acres. Subsequently, there was a continuous decline to about 271,000 acres in 1951-52 and 1952-53. There has been an increase in each year since then to 278,907 acres in 1955-56. The total area of orchards and fruit-gardens in the several States during the years 1951-52 to 1955-56 compared with the average for the ten seasons 1929-30 to 1938-39 is shown in the following table.

ORCHARDS AND FRUIT-GARDENS : AREA.
(Acres.)

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.

(a) Not available.

2. **Varieties of Crops.**—The varieties grown differ in various parts of the States, ranging from such fruits as pineapples, papaws and mangoes in the tropics, to strawberries, raspberries and currants in the colder parts of the temperate zone. In New South Wales, citrus fruits (oranges, lemons, etc.) and bananas are the principal crops, although apples, peaches, plums pears and cherries are extensively grown. The principal varieties grown in Victoria are apples, peaches, pears, oranges, plums and apricots. In Queensland, pineapples, apples, bananas, oranges, mandarins, peaches and plums are the varieties most largely cultivated. In South Australia, in addition to apples, oranges, apricots, plums, peaches and pears, almonds and olives are extensively grown. In Western Australia, apples, oranges, pears, plums, peaches, lemons, apricots and figs are the chief varieties. In Tasmania, apples occupy over three quarters of the fruit-growing area, but small fruits, such as currants, raspberries and gooseberries are extensively grown, while the balance of the area is mainly taken up with pears, apricots and plums. The following table shows the acreage—bearing and non-bearing—of the principal kinds of fruit, and the quantity and value of fruit produced.

ORCHARDS AND FRUIT-GARDENS, 1955-56.

1955-56.. ..	16,594	2,286	5,738	8,549	3,365	4,681	1,380

4. **Production of Jams and Jellies and Preserved Fruit.**—Considerable quantities of fruit are used in the production of jams and jellies and preserved fruit in Australia. In 1955-56 output of jams and jellies amounted to 84,096,000 lb. whilst output of preserved fruit, excluding preserved apples, amounted to 283,611,000 lb. Production of preserved apples was 20,296,000 lb.

The recorded consumption of fruit in factories for all purposes, including that used for juice and cordial manufacture and for drying, was 231,548 tons in 1955-56.

5. **Consumption of Fruit and Fruit Products.**—Details of the estimated consumption of fruit and fruit products per head of population for a series of years ending 1955-56 are shown in Chapter XXX.—Miscellaneous, of this Year Book.

6. **Imports and Exports of Fruit.**—(i) *General.* The imports of fresh fruit into Australia are negligible, whilst those of dried fruit consist mainly of dates.

A considerable export trade in both fresh and dried fruit is carried on by Australia with oversea countries. The values of the shipments in 1955-56 amounted to £9,138,000 and £7,802,000 respectively. Apples constitute the bulk of the fresh fruit exported, although the exports of citrus fruit and pears are fairly considerable. Shipments of raisins and currants have increased greatly since 1914-15 and are mainly responsible for the growth in the dried fruit exports, although dried tree fruit also figures amongst the exports.

(ii) *Fresh Fruit.* Particulars of the Australian export trade in fresh and frozen fruit for each of the years 1951-52 to 1955-56 and the average of the five years ended 1938-39 are shown in the following table:—

FRESH AND FROZEN FRUIT: EXPORTS, AUSTRALIA.

Year.	Apples.		Pears.		Citrus.		Total.(a)	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	'000 bus.	£'000.						
Average, 1934-35 to 1938-39 ..	4,591	1,396	632	268	533	234	5,865	1,981
1951-52 ..	3,263	4,285	808	1,492	432	779	4,601	6,895
1952-53 ..	4,696	6,740	937	1,675	433	742	6,181	9,569
1953-54 ..	4,728	6,089	1,209	2,045	533	809	6,596	9,384
1954-55 ..	4,265	5,444	1,407	2,183	525	783	6,248	8,771
1955-56 ..	5,023	6,513	1,012	1,470	585	869	6,663	9,138

(a) Total, including exports of all other fresh and frozen fruit.

(iii) *Dried Tree Fruit.* The quantity and value of oversea imports and exports of dried fruit, other than raisins and currants, for the years 1951-52 to 1955-56, compared with the average for the five years 1934-35 to 1938-39, are shown below. Normally, the bulk of the imports consists of dates obtained almost entirely from Iraq.

DRIED TREE FRUIT(a): IMPORTS AND EXPORTS, AUSTRALIA.

Year.	Imports.		Exports.		Net Imports.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	'000 lb.	£'000.	'000 lb.	£'000.	'000 lb.	£'000.
Average, 1934-35 to 1938-39 ..	12,225	80	4,315	117	7,910	-37
1951-52 ..	12,680	293	4,520	414	8,160	-121
1952-53 ..	5,851	142	3,966	403	1,885	-261
1953-54 ..	11,638	303	6,526	795	5,112	-492
1954-55 ..	(b) 13,176	(b) 373	6,576	804	6,600	-431
1955-56 ..	(b) 8,627	(b) 204	3,681	428	4,946	-224

(a) Excludes raisins and currants referred to separately under Vineyards, § 15, para. 5. (b) Imports of dates and figs only.

NOTE.—Minus (-) denotes net exports.

(iv) *Jams and Jellies.* Exports of jams and jellies reached large proportions immediately following the 1939-45 War and in 1946-47 amounted to 65,434,000 lb., compared with the average for the five years ended 1938-39 of 7,118,000 lb. Since 1949-50, when exports totalled 65,229,000 lb., there has been a marked decline and in 1955-56 exports amounted to only 4,429,000 lb., valued at £265,000. Imports of jams and jellies are negligible.

(v) *Preserved Fruit.* The total quantity of fruit preserved in liquid, or partly preserved in liquid or pulped, imported into Australia during 1955-56, was 992,000 lb. valued at £70,070. Large quantities of fruit preserved in liquid are normally exported from Australia the value of shipments in 1938-39 amounting to £1,271,525. In 1955-56, the value of exports had increased to £15,478,431. In addition, the exports of pulped fruits during 1955-56 amounted to 3,471,000 lb., valued at £245,980. Quantities of fruit preserved in liquid exported from Australia in 1955-56 amounted to 209,231,000 lb. compared with average

exports of 68,896,000 lb. for the five years ended 1938-39. Exports in 1955-56 were principally made up of peaches (61,464,000 lb.), pears (62,406,000 lb.), apricots (29,368,000 lb.) and pineapples (41,320,000 lb.).

7. **Marketing of Apples and Pears.**—(i) *Apple and Pear Organization Act 1938-1953.* This Act, which was passed by the Commonwealth Parliament at the request of the apple and pear industry, provides for the establishment of an Australian Apple and Pear Board comprised of representatives of growers, exporters, employees and the Commonwealth Government. Oversea representatives may also be appointed by the Board.

The function of the Board is the organization and control of exports of fresh apples and pears and it has the power to regulate shipments, determine export quotas and allocate consignments from each State.

(ii) *Apple and Pear Export Charges Act 1938-1947.* This Act provides for an export levy to meet the expenses of the Board.

(iii) *Apple and Pear Acquisition.* Exports of apples and pears were seriously curtailed during the war and the 1940 to 1948 crops were acquired and marketed under National Security and Defence Regulations. Details of the acquisition scheme will be found on pp. 1003 and 1004 of Official Year Book No. 38 and in earlier issues.

8. **Oversea Marketing of Canned Fruit.**—(i) *The Canned Fruits Export Control Act 1926-1956.* This legislation was introduced with the object of organizing the oversea marketing of canned fruit. The Australian Canned Fruits Board, comprising members representing the Commonwealth Government and canners of apricots, peaches, pears, pineapples and fruit salad, was appointed with functions mentioned above and also to recommend conditions under which export licences are issued.

The system of marketing adopted by the Board has resulted in the satisfactory disposal of the exportable surplus of canned fruits.

(ii) *The Canned Fruits Export Charges Act 1926-1938.* This Act provides for a levy on exports to meet the Board's expenses. Provision has been made for certain exemptions when recommended by the Board.

§ 17. Vegetables for Human Consumption.

1. **Area and Production of Fresh Vegetables.**—Details of the areas planted and production of individual kinds of vegetables, excluding potatoes and onions referred to in §§ 10 and 11 of this chapter, are shown below for the seasons 1953-54 to 1955-56.

FRESH VEGETABLES(a) FOR HUMAN CONSUMPTION : AUSTRALIA.

(a) Excludes potatoes and onions.

(b) Incomplete; excludes New South Wales.

2. **Production of Canned and Dehydrated Vegetables.**—Total production of canned vegetables in 1955–56 amounted to 77,812,000 lb., which was considerably higher than pre-war production, but only approximately 65 per cent. of the peak war-time production. The principal canned vegetables produced in 1955–56 were green peas 25,465,000 lb., green beans 4,748,000 lb., baked beans (including pork and beans) 16,985,000 lb., tomatoes 3,119,000 lb. and asparagus 7,501,000 lb.

The production of dehydrated vegetables, which was initiated during the 1939–45 War by the Commonwealth Government, rose to a maximum of 22 million lb. in 1945–46, but in 1955–56 had declined to approximately 392,000 lb.

3. **Imports and Exports of Vegetables.**—Oversea exports of pulse and fresh vegetables during 1955–56 consisted of:—Pulse, 14,224 tons, £593,000; onions, 981 tons, £55,000; potatoes, 3,478 tons, £225,000; other vegetables, 1,767 tons, £158,000. Imports of pulse amounted to 4,629 tons, valued at £390,000, whilst imports of fresh vegetables were negligible.

In 1955–56, exports of vegetables preserved in liquid consisted of:—Peas, 375,000 lb., £28,000; tomatoes, 253,000 lb., £16,000; other vegetables, 1,269,000 lb., £167,000.

4. **Consumption of Vegetables.**—Details of the estimated consumption of vegetables for a series of years ending with 1955–56 are shown in Chapter XXX.—Miscellaneous, of this Year Book.

§ 18. Tobacco.

1. **States, Area and Production.**—Tobacco-growing promised years ago to occupy an important place amongst the agricultural industries of Australia. As early as the season 1888–89, the area of this crop amounted to 6,641 acres, of which 4,833 were in New South Wales, 1,685 in Victoria, and 123 in Queensland. Thereafter, the industry fluctuated for many years reaching a peak in 1932–33 when 26,272 acres were planted.

In 1955–56, the acreage planted was 11,306 acres which was approximately the same as the average for the ten years ended 1938–39. Owing to improvement in average yields, however, the production of dried leaf in 1955–56 was 27 per cent. higher than the pre-war average.

In the following table, particulars of the area and production of tobacco are given by States for each of the seasons 1951–52 to 1955–56, together with averages for the ten-year periods ended 1938–39 and 1954–55:—

TOBACCO : AREA AND PRODUCTION.

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.(a)
AREA (ACRES).							
Average, 1929–30 to 1938–39	1,274	6,237	2,865	292	502	89	11,259

1955–56.. .. .	547	1,135	3,702	..	721	..	6,106

(a) Excludes Northern Territory for the years up to 1954–55. In that year, 616 lb. and in 1955–56 300 lb. were produced.

2. **The Tobacco Industry.**—(i) *Marketing.* In the early days, purchase of the leaf at the farms was the usual practice but towards the later part of the 1930's the auction system was introduced by arrangement between the growers' associations and the manufacturers.

On the 9th May, 1941, the Australian Tobacco Board was constituted under the National Security (Australian Tobacco Leaf) Regulations for the purpose of facilitating and regulating the marketing of Australian grown tobacco leaf. All leaf was under the control of the Board, the growers being paid on the valuation as appraised by the Board. The Board ceased to function on the 24th September, 1948 and subsequent crops have been

marketed at open auction in the respective States. Queensland has had its own Tobacco Leaf Marketing Board since 1948 and leaf sold in that State has a reserved price, determined by the Board's appraiser. Growers in New South Wales voluntarily submit their leaf to the Queensland Board.

(ii) *Central Tobacco Advisory Committee.* The Australian Agricultural Council formed the Standing Advisory Committee on Tobacco during 1950. This Committee consisted of representatives of tobacco growers, tobacco manufacturers and Commonwealth and State Governments. Its main functions were to review the industry and make recommendations on its problems.

The Committee was reconstituted by the Agricultural Council during 1952-53 and its terms of reference were as follows:—

“To report annually to the Agricultural Council, through the Standing Committee on Agriculture and also to the Commonwealth Minister for Trade and Customs, through the Chairman of the Council, on the following:—

- (i) The percentage of Australian tobacco which should be incorporated in locally manufactured tobacco under Customs regulations, having regard to the anticipated volume of Australian production of usable leaf available for absorption by the manufacturing industry;
- (ii) The progress of the industry during the year with particular reference to—
 - (a) marketing problems encountered,
 - (b) a review of prices being paid to farmers in relation to quality of leaf,
 - (c) such other problems as may be retarding the progressive development of the industry, such as the volume of importation of manufactured tobacco and cigarettes.”

(iii) *Industry Inquiries.* The tobacco industry has been the subject of a number of investigations during the past 30 years. The Tariff Board inquired into the industry in 1923, 1926, 1931 and 1940 and reports were issued in respect of the last three inquiries.

(iv) *Commonwealth Grants.* Details of the recommendations by the Tobacco Inquiry Committee and grants periodically approved by the Commonwealth Government up to 30th June, 1953, were given in Official Year Book No. 40, pp. 895, 896 and in previous issues.

(v) *Research and Investigations.* The Commonwealth Scientific and Industrial Research Organization has been investigating many fundamental problems connected with tobacco culture. One of the major achievements of this organization was the development of a technique to control “Field Blue Mould” and investigations are now being made into the control of this disease in the field. State Departments of Agriculture are also carrying out investigations over a wide range of problems, being concerned mainly with variety trials, irrigation, disease and pest control, crop rotation and cultural practices.

In 1955, the Central Tobacco Advisory Committee formulated a programme for increased research and advisory activities. The capital costs of establishing this programme are estimated at £168,000 of which the Commonwealth Government has agreed to contribute £84,000 and tobacco manufacturers the remaining £84,000. It has been estimated that to maintain the programme, it will cost approximately £63,000 per annum, of which the Commonwealth Government is contributing £21,000, tobacco growers £14,000 and tobacco manufacturers £28,000 per annum. A Tobacco Industry Trust Account has been established to receive these contributions. This programme commenced in 1956.

(vi) *War Service Land Settlement.* Tobacco growing under the War Service Land Settlement Scheme commenced in 1949 and is being carried out on 67 farms in Queensland. Each farm is designed to have a minimum of 40 acres of suitable land to permit ten acres being cropped annually on a one in four rotation.

Due to technical difficulties in certain districts in Western Australia tobacco growing under the War Service Land Settlement Scheme has been considerably curtailed.

(vii) *Tobacco Factories.* Manufacturers of Australian cigarettes and tobacco are granted a lower rate of duty on imported tobacco leaf provided it is blended with a prescribed minimum percentage of Australian leaf. These percentages rose from 3 per cent. for cigarettes and 5 per cent. for tobacco in November, 1946 to 7½ per cent. and 17½ per cent. respectively from 1st July, 1955. The Commonwealth Government has announced that the percentages to apply, from 1st July, 1957, shall be 12½ per cent. and 21 per cent. respectively. In 1955-56, the quantity of cured leaf used in tobacco factories in Australia amounted to 43.6 million lb. of which 5.3 million was of local origin, the balance being imported, chiefly from the United States of America.

3. *Overseas Trade.*—Imports of tobacco and manufactures thereof into Australia during 1955-56 were valued at £16.2 million, including 45.8 million lb. of unmanufactured tobacco valued at £15.1 million. Exports of tobacco and manufactures thereof during 1955-56 were valued at £518,000.

§ 19. Hops.

Hop-growing in Australia is practically confined to Tasmania and some of the cooler districts of Victoria, the total area for 1955-56 being 1,765 acres, of which 1,377 acres were in Tasmania, and 388 acres in Victoria. A small area was also grown in Western Australia, but the details are not available for publication. The Tasmanian area, though still small, has increased during the present century, the total for 1901-2 being 599 acres. The cultivation of hops was much more extensive in Victoria some 60 years ago than at present, the area in 1883-84 being 1,758 acres.

The production of hops in Australia is insufficient to meet local requirements, and additional supplies are imported to meet the needs of the brewing industry. In the following table details of the production, imports and exports of hops and the quantity of hops used in breweries are shown for each of the years 1951-52 to 1955-56 in comparison with the average for the five years ended 1938-39.

HOPS: PRODUCTION AND DISPOSAL, AUSTRALIA.

Year.			Production.		Imports.	Exports.	Net Available Supplies. (a)	Quantity used in Breweries.
			Quantity.	Gross Value.				
			Cwt.	£'000.	Cwt.	Cwt.	Cwt.	
Average, 1938-39	1934-35	to	20,576	173	1,020	78	21,518	18,992
1951-52	17,914	517	24,592	..	42,506	38,012
1952-53	32,116	1,021	12,512	11	44,617	40,845
1953-54	24,666	802	14,675	59	39,282	43,525
1954-55	34,075	1,106	10,311	..	44,386	42,976
1955-56	34,374	1,102	16,880	..	51,254	43,638

(a) Disregards movements in stocks.

The Tariff Board conducted an inquiry into the hop-growing industry and issued a report on 12th June, 1945.

§ 20. Flax.

During the 1914-18 and 1939-45 Wars, there was an acute shortage of flax fibre and the expansion of production was encouraged by the Commonwealth Government, the area sown reaching a maximum of more than 61,000 acres in 1944-45.

The growing of flax for fibre purposes is now confined to the States of Victoria, South Australia and Western Australia. In Victoria and South Australia, production is directed and controlled by the Flax Commission which took over the Commonwealth flax undertakings from the Flax Production Committee on the 1st November, 1954. In Western Australia, the industry is carried on by a Co-operative Company.

Following on the Tariff Board's Report on Flax Fibre dated the 5th August, 1954, the Government introduced a bounty on flax fibre for a period of two years to permit the modernization of plant and machinery. The amount of the bounty is related to the difference between overseas prices and local production costs and it came into operation on the 1st November, 1954. The Tariff Board conducted a further inquiry into flax fibre in 1956 and in its report dated 8th February, 1957, recommended the continuance of bounty payments for a further period of three years.

Details of the area under flax and the production of straw are given in the following table:—

FLAX FOR FIBRE: AREA AND PRODUCTION.

Season.	Victoria.	S. Aust.	W. Aust.	Australia.
AREA (ACRES).				
Average, 1934-35 to 1938-39	1,021	(a) 1,030
1951-52	2,821	1,599	1,965	6,385
1952-53	2,840	1,618	2,423	6,881
1953-54	9,550	3,040	3,105	15,695
1954-55	5,878	1,314	464	7,656
1955-56	2,550	526	1,594	4,670
PRODUCTION (TONS OF STRAW).				
Average, 1934-35 to 1938-39	61	61
1951-52	4,065	2,214	1,573	7,852
1952-53	4,379	2,967	2,856	10,202
1953-54	12,984	4,647	4,470	22,101
1954-55	7,799	1,888	500	10,187
1955-56	4,637	1,150	1,875	7,662

(a) Includes nine acres of unproductive flax in Queensland.

Prior to 1948-49, the growing of flax for linseed oil had not been developed extensively in Australia. Action has since been taken to develop this industry, however, the ultimate objective being the production of sufficient linseed to meet Australia's total oil requirements. Development of the industry proceeded rapidly until 1951-52 when the record total of 53,741 acres was sown. In 1952-53, there was a decline in the acreage and a further decline in 1953-54 when 6,343 acres only were sown. Since then an increase in the guaranteed price to growers has led to an increase in the area sown to 19,403 acres in 1954-55 and 47,727 acres in 1955-56.

The question of assistance to the industry was investigated by the Commonwealth Tariff Board in 1953 and their conclusions are contained in their Report on *Linseed and Linseed Products* dated 23rd October, 1953.

Details of the area and production of flax for linseed are shown in the following table for the seasons 1951-52 to 1955-56.

FLAX FOR LINSEED: AREA AND PRODUCTION.

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
AREA (ACRES).

1955-56	400	94	12,738	15	13,247

§ 21. Peanuts.

The production in Australia of peanuts, or groundnuts, is mainly confined to Queensland, although small quantities are grown in New South Wales, Western Australia and the Northern Territory. Details of the area and production are given in the table below.

PEANUTS: AREA AND PRODUCTION, AUSTRALIA.

Season.	Area (Acres).					Production (Tons).				
	N.S.W.	Qld.	W.A.	N.T.	Aust.	N.S.W.	Qld.	W.A.	N.T.	Aust.
Average, 1929-30 to 1938-39 ..	29	8,320	100	(a)	8,449 (b)	11	3,715	24	(a)	3,750
1951-52 ..	374	13,312	15	(a)	13,701	222	4,535	9	(a)	4,766
1952-53 ..	789	18,920	10	(a)	19,719	409	8,438	7	(a)	8,854
1953-54 ..	1,525	36,617	(c)	(a)	d 38,142	718	17,866	(c)	(a)	d 18,584
1954-55 ..	769	37,971	(c)	780	d 39,520	346	14,001	(c)	135	d 14,482
1955-56 ..	414	31,493	(c)	544	d 32,451	174	8,633	(c)	40	d 8,847

(a) Not available.

(b) Average for five years.

(c) Not available for publication.

(d) Excludes Western Australia for which details are not available for publication.

The gross value of the 1955-56 crop was £888,000 which was approximately £301,000 less than in 1954-55. This decrease was largely the result of the low level of production at 8,847 tons. This was due to very wet conditions at harvest time in Queensland where the yield per acre was the lowest ever recorded in that State.

Considerable quantities of peanut kernels were formerly imported annually, chiefly from India, for oil expression purposes. These imports were suspended from 1946 to 1949, but have since been resumed on an increasing scale. Total supplies available for consumption in Australia in 1955-56, 14,828 tons (shell equivalent), consisted of 14,482 tons grown locally in the 1954-55 season and 346 tons imported.

§ 22. Cotton.

1. **General.**—The production of cotton in Australia is restricted to Queensland, where cultivation began in 1860. Details of areas sown for years prior to 1930 and of Government financial assistance to growers up to 1940 appear in Official Year Book No. 39 and earlier issues.

Australia produces only portion of its requirements of raw cotton, the balance being obtained in 1955-56 chiefly from the United States of America, Mexico, Pakistan, India, and Egypt. Efforts have been directed towards increasing production by an extension of area, the introduction of irrigation methods and payment of bounties, but so far have not met with much success. Production increased very considerably during the early years of the 1939-45 War, reaching a peak of 17,550,000 lb. unginned cotton in 1939-40, but has since fallen away. The expansion of the industries connected with the spinning and weaving of cotton is referred to in Chapter VII.—Manufacturing Industry.

The Raw Cotton Bounty Act 1940 provided an extension until 31st December, 1946, of assistance previously granted by way of bounty. The Act was amended in August, 1946 to provide a guaranteed net average return to cotton-growers of 15d. per lb. of raw cotton for five years from 1st January, 1947. It was superseded by the Cotton Bounty Act 1951, which guaranteed a net average return of 9½d per lb. of seed cotton for five years from 1st January, 1951. The 1951 Act was amended in 1952 to provide for a guaranteed return of 14d. per lb. of seed cotton for the 1953 crop, and for variation by regulation of the guaranteed return, in succeeding seasons, with a minimum of 9½d. per lb. The Cotton Bounty Act extended the period of the guaranteed return for three years to 31st December, 1958. The guaranteed return has remained at 14d. per lb. of seed cotton since the 1953 season and the Government has announced that the guaranteed return for 1957 and 1958 seasons will not be less than 14d. per pound.

2. **Area and Production.**—The area under cultivation and the production in Queensland for the years 1951 to 1955 are shown hereunder together with the average for the period of ten years ended 1939. Details of the production of ginned cotton are derived from published statistics of the Queensland Cotton Marketing Board.

COTTON: AREA AND PRODUCTION IN QUEENSLAND.

Season ended December—	Area Sown.	Production of Cotton.				Average Yield per Acre Sown.	
		Unginned.		Ginned.	Ginned— Equivalent in Bales. (a)	Unginned.	Ginned.
		Quantity.	Gross Value.				
	Acres.	'000 lb.	£'000.	'000 lb.	Bales.	lb.	lb.

1951	4,480	1,406	127	549	1,124	314	123
1952	5,866	2,184	107	755	1,483	372	129
1953	8,965	5,132	316	2,068	4,229	572	231
1954	8,377	3,597	208	1,365	2,819	429	163
1955	13,290	5,359	307	(b)	4,386	403	(b)

(a) Bales of approximately 500 lb.

(b) Not yet available.

3. **Consumption of Raw Cotton.**—The following table shows the expansion which has taken place in the consumption of raw cotton in Australia since 1938–39.

RAW COTTON: PRODUCTION, IMPORTS AND CONSUMPTION, AUSTRALIA.
(‘000 lb.)

Year.	Production.	Imports.	Total.	Consumption of Raw Cotton in Spinning.
Average, 1936–37 to 1938–39	5,180	9,882	15,062	12,523
1950–51	402	45,201	45,603	40,907
1951–52	549	43,296	43,845	39,030
1952–53	755	24,796	25,551	31,128
1953–54	2,068	44,203	46,271	43,994
1954–55	1,365	43,218	44,583	47,098

§ 23. Financial Assistance to Primary Producers.

NOTE.—See also Chapter XXI.—Public Finance, pp. 767–8.

Direct financial assistance to primary producers by the Commonwealth Government takes the form of bounties, subsidies and other financial assistance. Brief details of some of the more important payments are given below:—

(i) *Cotton Bounty.* The Cotton Bounty Act provides for payment of a bounty on seed cotton delivered by growers to processors. The present rate of bounty is designed to give growers an average return of 14d. per lb. The total payment in 1955–56 was £67,284 in respect of 5,650,785 lb. of cotton. In 1954–55, the total payment was £25,243 in respect of 3,687,828 lb.

(ii) *Tractor Bounty.* Under the Tractor Bounty Act, bounties are payable on tractors produced and sold for use in Australia. The period for payment of bounty was extended, in 1956, for three years from 24th October, 1955. The rate of bounty which has increased from time to time, varies according to the belt horse-power of the engine. Payments in 1955–56 amounted to £55,034 on 253 tractors as compared with £81,786 on 388 tractors in 1954–55.

(iii) *Dairy Products Bounty.* Under the provisions of the Dairy Industry Assistance Act 1952, a subsidy is paid to dairymen to ensure them a return equal to the average cost of production of their produce. In 1955–56, total payments amounting to £14,499,587 were made compared with £15,749,998 in 1954–55.

(iv) *Flax Fibre Bounty.* From November, 1954, a bounty has been paid on scutched flax fibre produced from flax grown in Australia. In 1955–56, payments amounted to £58,070. Expenditure in 1954–55 was £4,907.

Other forms of financial assistance to primary producers include payments for Cattle Tick Control, the Dairy Industry Extension Grant, Flood and Bush Fire Relief, Food Production, Expansion of Agricultural Advisory Services, Assistance to the Tobacco Industry and Wheat Shipped to Tasmania—Freight Subsidy.

§ 24. Fertilizers.

1. **General.**—In the early days of settlement in Australia, scientific cultivation was little understood. It was common, as in other new countries, for the land to be cropped continuously to a degree of exhaustion. This practice is very much less in evidence now than in the early days of Australian agricultural development. Under the guidance of the State Departments of Agriculture, scientific farming is now much more widely practised. The importance of fallowing, crop rotation, and the application of suitable fertilizers in adequate quantities is now appreciated by farmers. The introduction of the modern seed-drill, acting also as a fertilizer-distributor, has greatly facilitated the use of artificial manures and much land formerly regarded as useless for cultivation has now been made productive.

In order to protect the users of artificial fertilizers, legislation has been passed in each of the States regulating the sale and prohibiting the adulteration of fertilizers. A list of these Acts and their main features is given in Official Year Book No. 12, p. 378.

2. **Imports and Exports.**—The Australian output of prepared fertilizers is derived chiefly from imported rock phosphate and is sufficient for local requirements.

The Chief sources of Australia's supplies of rock phosphate are Nauru, Gilbert Islands Group and Christmas Island. Sodium nitrate is obtained chiefly from Chile.

The imports of artificial fertilizers during the five years ended 1955-56, compared with average imports for the period 1934-35 to 1938-39, are shown in the following table:—

ARTIFICIAL FERTILIZERS: IMPORTS INTO AUSTRALIA.

Fertilizer.	Average, 1934-35 to 1938-39.	1951-52.	1952-53.	1953-54.	1954-55.	1955-56.
Ammonium Sulphate tons	26,090	40,848	384	11,187	35,056	9,466
	£'000	215	1,016	10	242	764
Potash Salts tons	10,641	15,978	14,467	22,234	27,403	39,099
	£'000	82	369	314	397	489
Rock Phosphate tons	635,097	1,014,100	1,271,139	1,143,330	1,086,884	1,418,527
	£'000	776	2,258	2,478	2,432	2,166
Sodium Nitrate tons	7,199	15,802	7,848	6,948	11,714	14,102
	£'000	63	363	185	183	250
Other .. tons	3,430	2,735	1,837	6,935	399	506
	£'000	8	120	15	151	14
Total .. tons	682,457	1,089,463	1,295,675	1,190,634	1,161,456	1,481,700
	£'000	1,144	4,126	3,002	3,405	3,683

Exports of fertilizers (practically all of which are manufactured locally) amounted to 1,962 tons valued at £37,000 in 1955-56 compared with 2,345 tons valued at £34,000 in 1954-55 and 4,826 tons valued at £34,000 for the average of the five years ended 1938-39. Superphosphate is the principal fertilizer exported and amounted to 1,727 tons in 1955-56.

3. **Quantities Used Locally.**—Information regarding the area fertilized with artificial fertilizers and the quantity of artificial fertilizers (superphosphate, bonedust, nitrates, etc.) used in each State during the 1955-56 season is given in the following table. Details of the area manured with natural manure (stableyard, etc.) are no longer collected.

AREA FERTILIZED AND QUANTITY OF ARTIFICIAL FERTILIZERS USED, 1955-56.

State or Territory.	Area Fertilized ('000 Acres).			Fertilizers Used (Tons).		
	Crops.	Pasture Lands.	Total.	Crops.	Pasture Lands.	Total.
New South Wales	2,401	4,003	6,404	97,818	209,790	307,608
Victoria	3,500	8,537	12,037	173,678	479,913	653,591
Queensland	449	18	467	97,603	1,472	99,075
South Australia	3,405	3,499	6,904	176,935	203,848	380,783
Western Australia	5,208	4,576	9,784	257,263	210,845	468,108
Tasmania	162	830	992	22,752	60,215	82,967
Northern Territory	67	..	67
Australian Capital Territory ..	5	50	55	333	2,649	2,982
Total	15,130	21,513	36,643	826,449	1,168,732	1,995,181

Particulars of the quantity of artificial fertilizers used in each State and Territory during each of the seasons 1951-52 to 1955-56, compared with the average for the five years ended 1938-39, are shown in the next table. These details include the quantity used in the top-dressing of pasture lands.

QUANTITY OF ARTIFICIAL FERTILIZERS USED.
(Tons.)

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Total.
Average, 1934-35

4. **Local Production.**—Complete information regarding local production of fertilizers is not available. The number of firms engaged in the manufacture of chemical fertilizers in Australia for the year 1955-56 was 54, made up as follows:—New South Wales, 15; Victoria, 9; Queensland, 8; South Australia, 8; Western Australia, 6 and Tasmania, 8. The production of superphosphate in Australia during 1955-56 amounted to 2,126,000 tons.

§ 25. Ensilage.

1. **Government Assistance in Production.**—The several State Governments devote a considerable amount of attention to the education of the farming community in regard to the value of ensilage. Monetary aid is afforded in the erection of silos, and expert advice is supplied in connexion with the design of the silos and the cutting and packing of the ensilage.

2. **Quantity Made and Stocks Held on Farms.**—Information regarding production and farm stocks of ensilage for the years ended 31st March, 1954, 1955 and 1956 are given in the following table.

ENSILAGE: PRODUCTION AND FARM STOCKS.
(Tons.)

Period.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Total.

(a) Not available.

The drought of 1902-3 drew increased attention to the value of stocks of ensilage, and during the four seasons ended 1909-10 there was an increase both in the number of holdings on which ensilage was made and in the quantity produced. The accumulated stocks proved of great value during the 1914 drought, though far less than would have been the case if more attention had been paid to production during the previous years when there was a surplus of green fodder. The quantities made since that date have fluctuated considerably, but the output increased up to 1939-40 in which year the production was 303,495 tons. During subsequent seasons, output declined to the extremely low level of 94,744 tons during the drought year 1944-45 rising to 180,622 tons in 1947-48 but decreasing again in succeeding years to 110,474 tons in 1951-52. Since then production has increased substantially each year up to 1955-56 when a record quantity of 345,640 tons was made.

§ 26. Agricultural Colleges and Experimental Farms.

Agricultural colleges, administered by State Departments of Agriculture, have been established in all States except Tasmania. The primary function of these colleges is the training of students in the various phases of agricultural work and livestock husbandry. Students are required to undertake a considerable amount of practical work in addition to lectures and theory. A secondary function of the colleges is agricultural research and experimentation. To a lesser degree, they carry out extension work in the form of public field days. Upon graduation, students receive diplomas in agriculture, dairying, etc., according to the course undertaken.

Experimental farms have been set up by State Departments of Agriculture in all States. They are primarily concerned with agricultural research and experimentation, each farm concentrating on problems specific to the district in which it is located. The results of the work undertaken are passed on to farmers at field days, which are held at regular intervals, through publication in various agricultural or scientific journals and through the agricultural extension officers of the State Departments of Agriculture.

The Commonwealth Scientific and Industrial Research Organization has field stations scattered throughout Australia, and sometimes undertakes joint research with the appropriate State authorities. In general, however, the Commonwealth Scientific and Industrial Research Organization concentrates on fundamental research, except when otherwise specifically invited, while the State Departments of Agriculture study problems of particular significance within their own boundaries. The universities also carry out valuable research work on their own experimental farms.

§ 27. Tractors on Rural Holdings.

The growth of mechanization in agriculture is indicated by the increase in the number of tractors on rural holdings from 41,943 in 1939 to 201,849 in 1956 or by 381 per cent. Since 1943, the first year in which the collection was made by types, wheeled type tractors have increased by 305 per cent., and crawler types by 156 per cent.

The table below sets out the total number of tractors on rural holdings in 1939, and the number of wheeled type and crawler tractors for the five years ended 1956. More detailed information showing the number of tractors in 1954 classified according to age, horse-power and type of fuel used is available from Primary Industries Bulletin, Part I., 1953-54.

(c) Excludes Tasmania.

§ 28. Number and Area of Rural Holdings and Employment Thereon.

NOTE.—In § 1, Introductory, of this chapter, reference was made to the reconciliation carried out in New South Wales, in 1955-56, of the lists of rural holdings used in the collection of agricultural and pastoral statistics with lists of ratable land of 1 acre or more in extent

An approximate classification was, however, made for New South Wales for 1945-46 and details may be found on p. 1018 of Official Year Book No. 39.

2. **Special Tabulation Relating to Rural Holdings, 1949-50.**—With the co-operation of State Statisticians, the second series of special tabulations relating to rural holdings was undertaken for all States for the 1949-50 season. These tabulations have been published in detail in Primary Industries Bulletin No. 44, 1949-50. The following table shows particulars of the number and area of rural holdings classified according to the size of holdings.

RURAL HOLDINGS: NUMBER AND AREA CLASSIFIED IN AREA SERIES, 1949-50.

(a) Excludes Northern Territory.

3. **Employment on Rural Holdings.**—The following table shows, for each State of Australia, the recorded number of persons permanently and temporarily working on rural holdings as at 31st March, 1956. Additional particulars relating to the number of males employed in agriculture are available up to 1941-42 in Official Year Book No. 36, p. 852 and previous issues. Similar details for later years are not available.

PERSONS PERMANENTLY AND TEMPORARILY ENGAGED ON RURAL HOLDINGS AT 31st MARCH, 1956.

(a) Excludes Northern Territory.

4. Salaries and Wages Paid to Employees on Rural Holdings.—Particulars of salaries and wages paid to permanent and temporary employees (including amounts paid to contractors) working full-time on rural holdings have been collected uniformly in all States from 1949–50. Details for each State are set out below for the year 1955–56 and for Australia as a whole for the years 1952–53 to 1955–56.

RURAL HOLDINGS: SALARIES AND WAGES^(a) PAID TO PERMANENT AND TEMPORARY EMPLOYEES, 1955-56.

CHAPTER XXIII.

PASTORAL PRODUCTION.

NOTE.—Except where otherwise indicated, values of Australian oversea trade shown throughout this chapter are expressed as f.o.b., Australian currency, port of shipment.

§ 1. Initiation and Growth of Pastoral Industry.

1. **Livestock Numbers.**—A detailed account of the various enumerations of livestock in Australia made prior to 1860 was given in previous issues of the Year Book. Since 1860, annual enumerations have been made, based, with few exceptions, on actual collections made through the agency of the State Police or by post. Particulars concerning the numbers of each of the principal kinds of livestock in Australia at decennial intervals from that year to 1950, and from 1952 onwards in single years, are given in the following table, and are shown continuously on the graph on p. 899.

LIVESTOCK : AUSTRALIA.
(‘000.)

Year.	Horses.	Cattle.	Sheep.	Pigs.	Year.	Horses.	Cattle.	Sheep.	Pigs.
1860 ..	432	3,958	20,135	351	1940 ..	1,699	13,080	119,305	1,455
1870 ..	717	4,276	41,594	543	1950 ..	1,057	14,640	112,891	1,123
1880 ..	1,069	7,527	62,184	816	1952 ..	937	14,893	117,647	1,022
1890 ..	1,522	10,300	97,881	891	1953 ..	895	15,247	123,072	993
1900 ..	1,610	8,640	70,603	950	1954 ..	850	15,601	126,944	1,197
1910 ..	2,166	11,745	98,066	1,026	1955 ..	803	15,836	130,849	1,297
1920 ..	2,416	13,500	81,796	764	1956 ..	770	16,457	139,124	1,166
1930 ..	1,793	11,721	110,568	1,072					

While livestock numbers (particularly sheep) have increased substantially since 1860, marked fluctuations have taken place during the period, mainly on account of droughts which have from time to time left their impress on the pastoral history of Australia. These occurred in 1868, 1877, 1883-4, 1892, 1893, 1895, 1901-2, 1912, 1914, 1918, 1919, 1922-23, 1925-26, 1927-28, 1929-30, 1940-41 and 1944-45 to 1946-47.

The years in which the numbers of livestock attained their maxima are as follows:—Horses, 1918 (2,527,000); cattle, 1956 (16,457,000); sheep, 1956 (139,124,000); and pigs, 1941 (1,797,000).

The distribution throughout Australia of beef cattle, dairy cattle, sheep and pigs as at 31st March, 1955 is shown in the maps on pp. 909-12.

The numbers of horses, beef cattle and sheep in each State and Territory are shown later in this chapter; similar information for dairy cattle and pigs appears in Chapter XXIV.—Farmyard, Dairy and Bee Products.

2. **Minor Classes of Livestock.**—Statistics of the minor classes of livestock (goats, camels, mules, donkeys, etc.) have not been collected in recent years. The last year in which all States, other than Victoria, collected this information was 1941, when total numbers were as follows:—Goats, 80,366; camels, 2,267; and mules and donkeys, 10,881. Of these, goats were most numerous in Queensland, and camels, mules and donkeys in Western Australia. Further details have been published in earlier issues of the Official Year Book.

3. **Carrying Capacity of Pastoral Holdings.**—The carrying capacity of pastoral holdings has been increased in recent years by the succession of good seasons since 1946-47. Other important contributing factors have been the reduction of rabbit infestation by the introduction of myxomatosis, and increased attention to pasture improvement.

Since myxomatosis was first introduced in 1950 there has been a dramatic increase in the spread of the disease over much of Australia and in many areas the rabbit population is at the lowest level for many years.

Statistics of the area under sown grasses and clovers have been collected on a uniform basis in all States since 1952-53 only, but here also there are indications that the area sown has been considerably increased. In 1954-55, the area under sown grasses and clovers (excluding native grasses) totalled 26.1 million acres, an increase of 2.3 million acres (9.9 per cent.) over 1953-54 and 5.0 million acres (23.6 per cent.) over 1952-53. In recent years the sowing and top-dressing of pastures has been facilitated by the increasing use of aircraft in these operations.

4. Value of Pastoral Production.—(i) *Gross, Local and Net Values, 1954-55.* Values of pastoral production for each State are shown for 1954-55 in the following table. Further details of the source of the information and an explanation of the terms used in this compilation will be found in Chapter XXX.—Miscellaneous. Maintenance costs have not been computed in all States and depreciation has not been deducted; consequently the net values are inflated to the extent of these costs.

GROSS, LOCAL AND NET VALUES OF PASTORAL PRODUCTION, 1954-55.

5. Indexes of Quantum and Price of Pastoral Production, 1950-51 to 1954-55.—For details of the methods of calculating these indexes and of the weights used see Chapter XXX.—Miscellaneous.

INDEXES OF QUANTUM(a) AND PRICE OF PASTORAL PRODUCTION:
AUSTRALIA.

(Base: Average 3 years ended June, 1939 = 100.)

Particulars.	1950-51.	1951-52.	1952-53.	1953-54.	1954-55.
<i>Quantum(a) produced—</i>					
Wool	116	112	131	128	132
Other products ..	100	95	119	117	120
<i>Total Pastoral</i> ..	109	105	126	123	127
Total per Head of Population ..	90	84	97	95	96
<i>Price—</i>					
Wool	1,098	552	623	621	540
Other products ..	386	423	389	401	409
<i>Total Pastoral</i> ..	818	501	531	534	489

(a) Index of value at constant prices, i.e., quantities revalued at average unit values of base years (1936-37 to 1938-39).

6. Consumption of Meats.—The quantity of meat (including cured and canned meat) in terms of carcass weight and edible offal available for consumption in Australia in 1955-56 was 949,500 tons. This is equivalent to 228.4 lb. per head compared with 228.7 lb. per head in 1954-55, 223.5 lb. in 1953-54 and an average of 253.0 lb. during the years 1936-37 to 1938-39.

Although it is not easy to obtain strictly comparable particulars for other countries, it appears from data published by the Food and Agricultural Organization of the United Nations in its *Food Balance Sheets* that in recent years consumption of meat in Australia has been at approximately twice the level of that in Canada and about one and a half times the level of that in the United States of America.

7. **Marketing of Meat.**—(i) *General.* The Australian Meat Board, consisting of representatives of producers, processors, exporters and the Commonwealth Government, is responsible for the control of all exports of Australian meat and meat products. Further information on the powers, etc., conferred on the Board under the Meat Export Control Act 1935–1953 was given on p. 801 of Official Year Book No. 40.

(ii) *United Kingdom Long-term Purchase Agreements.* Details of the long-term meat contracts with the United Kingdom Government from the outbreak of the 1939–45 War up to 30th June, 1952 and of the Fifteen Year Meat Agreement (1952–67) were given on p. 710 of Official Year Book No. 41 and in earlier issues of the Year Book.

The Fifteen Year Meat Agreement (1952–67) between the United Kingdom and Australian Governments has as its objectives the promotion of meat production in Australia enabling increased exports to be made to the United Kingdom and the provision of a satisfactory market in the United Kingdom for that meat. It covers chilled and frozen beef, frozen veal, frozen mutton and lamb, frozen cattle and sheep sundries and edible offal.

Pig meats were not included in the Fifteen Year Meat Agreement, but a two-year arrangement terminating on 30th September, 1954 was negotiated. This arrangement did not limit shipments of pig meats to other markets.

(iii) *Cessation of Bulk Purchasing.* Following the announcement in September, 1953, that the United Kingdom Ministry of Food would cease bulk purchasing of meat, arrangements were made between the Australian Meat Board and the Ministry for the reversion to private trading in the United Kingdom. The main features of the arrangements are:—

(a) Mutton and lamb exported after 1st July, 1954, and beef, veal and pig meats exported after 1st October, 1954, direct to United Kingdom importers are to be sold on the open market under methods similar to those which applied pre-war.

(b) The following minimum prices, to operate until 30th September, 1955 were agreed upon:—Beef and veal, 13.18d. stg. f.o.b. per lb.; lamb, 13.61d. stg. f.o.b. per lb.; and mutton, 6.05d. stg. f.o.b. per lb. The minimum prices are to be reviewed for subsequent years.

(c) In the event of market prices for the various classifications of meat averaging below the minimum, the Ministry is to make a payment to the Australian Government corresponding to the amount of the deficiency. So as to determine the extent of any deficiency, a procedure designed to measure as accurately as possible the weighted average level of wholesale prices of Australian meat on the United Kingdom market has been agreed upon.

(iv) *Private Trading.* After eight months of open trading, the Board estimated that a deficiency payment would be received in respect of beef for the first year. In order to make arrangements for this anticipated deficiency to be passed on to the producer, the Meat Agreement (Deficiency Payments) Act was passed by the Commonwealth Government in May, 1955. Under this Act, the Board paid to exporters a deficiency payment of 1½d. per lb. on beef delivered into store during the months of May, June, July and August, 1955 and subsequently exported to the United Kingdom. The rate for September was reduced to 1d. per lb. These payments were made on the understanding that they were, or would be, reflected in the price paid to producers.

To make provision for recoupment by the Board of any overpayment, the Meat Export (Additional Charge) Act was also passed in May, 1955.

Negotiations were made in Australia during August and September, 1955, to review minimum prices and the working of the Agreement generally. The following minimum prices were fixed for the three years ended 30th September, 1958:—For beef and veal and lamb the same as for the year ended 30th September, 1955, and for mutton the average prices realized to the end of April, 1955 (approximately 5.8d. stg. per lb.). In addition, minimum beef and veal prices were fixed for the three years 1958–61 at 5 per cent. below those for the 1955–58 period. Australia will, under the terms of the Agreement, be entitled to export 10,000 tons of beef, veal, lamb and mutton to destinations other than the United Kingdom and the Colonies. Additional free quotas can be requested and sympathetic consideration can be expected for any such requests should depressed prices or other circumstances justify an approach of this kind.

Under this arrangement, for the year ended 30th September, 1956, an additional 5,000 tons of beef for export to any destination was agreed upon.

Because of a rise in beef prices in the United Kingdom, the deficiency payments made by the Board during the year ended 30th September, 1955, exceeded the sum received from the United Kingdom for the same period. In an endeavour to recoup some of this overpayment, under the terms of the Meat Export (Additional Charge) Act, a levy of one eighth of a penny per lb. was imposed on certain classes of beef exported to the United Kingdom out of stocks placed into store from 1st February to 16th April, 1956.

During the season commencing on 1st October, 1955, beef prices in the United Kingdom were consistently below the level of the guarantee and consequently Australia

“earned” regular deficiency payments. The United Kingdom Government agreed, in July, 1956, to make an advance payment to Australia in respect of estimated deficiency earnings over the season. In anticipation of substantial deficiency earnings during the season, the Australian Meat Board made deficiency payments on beef delivered into store from 16th April to 29th September and subsequently exported to the United Kingdom. The payment from 16th April to 28th July was 2d. per lb.; from 29th July to 29th September, it was 1½d. per lb.

In July and August, 1956, the annual review of the operation of the Agreement took place in London. It was agreed that Australia be entitled to export 15,000 tons of beef, veal, mutton and lamb to destinations other than the United Kingdom and Colonies during each of the meat years 1956-57 and 1957-58.

The Australian Meat Board continued to make deficiency payments on beef delivered into store during 1956-57, the rate to 29th December, 1956 being 1½d. per lb. and to 31st March, 1957, 3d. per lb.

§ 2. Horses.

1. **Distribution throughout Australia.**—About 80 per cent. of the total number of horses in Australia are in the States of New South Wales, Queensland and Victoria. In the following table, figures are shown for each State and Territory for the years 1952 to 1956 in comparison with the average for the years 1935 to 1939:—

HORSES : NUMBER.
(’000.)

Year.	N.S.W.	Vic.	Q’land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
Average, 1935 to 1939 ..	537	355	444	198	154	31	33	1	1,753
1952 ..	311	169	289	63	53	19	32	1	937
1953 ..	298	154	282	57	50	18	35	1	895
1954 ..	280	141	273	52	49	17	37	1	850
1955 ..	258	132	267	49	47	16	33	1	803
1956 ..	247	119	261	44	46	15	37	1	770

The number of horses in Australia attained its maximum during 1918, when a total of 2,527,149 was recorded. The United States of America recorded its highest number in the same year and Canada in 1921. The number in Australia has declined considerably since 1918 owing to the mechanization of transport and farming. During the period 1918 to 1956, the decrease in numbers has averaged 46,000 per annum.

The number of horses in Australia from 1860 onwards may be obtained from the graph on p. 899.

The percentage distribution of the number of horses in each State and Territory for 1956 was:—New South Wales, 32; Victoria, 15; Queensland, 34; South Australia, 6; Western Australia, 6; Tasmania, 2; and Northern Territory, 5.

2. **Oversea Trade in Horses.**—(i) *Exports.* The export of horses from Australia during the early years of this century was fairly considerable, averaging about 15,000 head per annum between 1901 and 1920, exclusive of those used for war purposes during the 1914-18 War. Since then, exports have gradually declined and averaged only about 4,000 for the five years ended 1938-39 and just under 800 for the five years ended 1955-56.

(ii) *Imports.* The few horses imported into Australia consist mainly of valuable stud animals from the United Kingdom and racehorses from New Zealand. During the five years ended 1955-56, an average number of 448 horses valued at £382,000 (equivalent to £855 per head) was imported annually.

§ 3. Cattle.

1. **Purposes for which Raised.**—Cattle-raising is carried out in all the States, the main object in certain districts being the production of stock suitable for slaughtering purposes, and in others the raising of profitable dairy herds. The great impetus which the development of the export trade in Australian butter gave to the dairying industry led to a considerable increase in numbers and an improvement in quality of the dairy herds in the coastal districts of Victoria, New South Wales and southern Queensland in particular, the portion of Australia in the temperate zone which is best adapted to this industry. On the other hand, beef-producing cattle are more widely distributed particularly in the eastern States and are raised in areas unsuitable for dairy cattle, such as the tropical area of northern Queensland, the Northern Territory, and the Kimberley district in the north of Western Australia.

2. **Distribution throughout Australia.**—Until 1880, New South Wales was the principal cattle-raising State, but in that year Queensland occupied the leading position, which it has since maintained. There was a very rapid increase in the number of cattle in Australia up to the year 1894, when 12,312,000 head were depastured. From 1895 onwards, however, the effects of droughts and the ravages of tick fever reduced the number to 7,063,000 in 1902. Following the disastrous drought which terminated in the latter year, the herds were gradually built up, and, despite recurring droughts, they continued to increase up to 14,441,000 in 1921. After that year the number dropped continuously till 1929, largely owing to the decline in the oversea demand for frozen beef. With the expansion of dairying it recovered to 14,049,000 in 1934, but from that year declined continuously to 1939 when it stood at 12,862,000. The upward movement which commenced in 1940 was continued until 1944, the total number of cattle (14,184,000) in the latter year being at its highest level since 1923. Drought conditions and other factors caused a decline in numbers to 13,427,000 in 1947. This was followed by a general upward movement in numbers to a record 16,457,000 in 1956. A graph showing the number of cattle in Australia from 1860 appears on p. 899.

The numbers of cattle (beef and dairy) in the several States and Territories in each year 1952 to 1956 compared with the average for the years 1935 to 1939 are shown below.

CATTLE : NUMBER.

(‘000.)

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Nor. Terr.	Aust. Cap. Terr.	Aust.
Average, 1935 to 1939	3,198	1,952	6,018	331	819	262	889	9	13,478
1952	3,621	2,215	6,435	437	852	265	1,058	10	14,893
1953	3,649	2,297	6,751	483	846	275	936	10	15,247
1954	3,554	2,370	7,086	491	830	295	966	9	15,601
1955	3,461	2,456	7,238	524	861	319	969	8	15,836
1956	3,678	2,616	7,331	566	897	332	1,028	9	16,457

Although the proportion is not as high as it has been in the past, Queensland was carrying 45 per cent. of the cattle in Australia in 1956. The percentage in each State and Territory during that year was:—New South Wales, 22; Victoria, 16; Queensland, 45; South Australia, 3; Western Australia, 6; Tasmania, 2; and Northern Territory, 6.

Maps showing the distribution of beef and dairy cattle in Australia at 31st March, 1955 appear on pp. 909–10. Similar maps showing the distribution in earlier years appeared in previous issues of the Official Year Book (see No. 39, pp. 905–6, for 1948; No. 34, pp. 453–4, for 1938–39; and No. 22, p. 660, for 1924–25).

3. **Classification of Cattle According to Purpose.**—Of the total number of cattle in Australia in 1956, 11,478,000 or 70 per cent. were classified as beef cattle. The numbers classified as beef cattle in the several States and Territories during the years 1943 and 1952 to 1956 were as follows:—

BEEF CATTLE : NUMBER.

(‘000.)

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Nor. Terr.	Aust. Cap. Terr.	Aust.
1943	1,676	577	4,893	171	605	102	978	5	9,007
1952	2,416	776	5,138	201	621	110	1,058	7	10,327
1953	2,405	820	5,378	231	612	113	936	6	10,501
1954	2,316	829	5,703	230	600	121	966	6	10,771
1955	2,242	856	5,861	255	633	129	969	5	10,950
1956	2,421	954	5,946	302	673	148	1,028	6	11,478

A classification of numbers on this basis is not available prior to 1943.

Particulars relating to dairy cattle numbers will be found in Chapter XXIV.—Farm-yard, Dairy and Bee Products.

4. **Size Classifications of Cattle Herds.**—A special series of tabulations relating to rural holdings in Australia was compiled for 1949-50 and published in Primary Industries Bulletin No. 44. The tables relating to beef and dairy cattle show classifications according to size of herd and area of holding.

5. **Comparison with other Countries.**—The following table shows the number of cattle in Australia and in some of the principal cattle-raising countries of the world for the years 1936-40 and at the latest available date. The figures, which, in general, have been compiled by the United States Department of Agriculture for publication in *Foreign Crops and Markets*, relate to areas embraced by post-war boundaries, but do not cover identical areas for the two periods in all cases.

CATTLE : NUMBER IN VARIOUS COUNTRIES.

(⁰000.)

Country.	Average, 1936-40.(a)	Year and Month.	Number.
India(b)	180,000	1955 (January) ..	209,000
United States of America	66,706	1956 (January) ..	97,465
U.S.S.R.	59,800	1955 (October) ..	64,900
Brazil	40,807	1955 (December) ..	64,000
Argentina	33,762	1955 (July) ..	44,000
Pakistan(b)	33,000	1955 (January) ..	29,500
China	25,600	1953 (May) ..	28,800
Ethiopia	18,000	1954 (July) ..	20,000
France	15,504	1955 (October) ..	17,560
Australia	13,285	1956 (March) ..	16,457
Mexico	11,716	1955 (December) ..	16,000
Colombia	8,010	1953 (December) ..	13,650
Turkey(b)	8,611	1954 (December) ..	12,005
Union of South Africa	11,636	1954 (August) ..	11,604
Germany, Federal Republic of	12,114	1955 (December) ..	11,552

(a) In some cases census for a single year, and in others an average for two to four years. (b) Includes buffaloes.

6. **Imports and Exports of Cattle.**—The products of the cattle-raising industry figure largely in the export trade of Australia, although the export of live cattle has never been large. The number of cattle imported is also small, consisting, as in the case of horses, mainly of valuable animals for stud purposes. Details for the years 1951-52 to 1955-56 compared with the average for the years 1934-35 to 1938-39 are as follows.

CATTLE : IMPORTS AND EXPORTS, AUSTRALIA.

Year.	Imports.		Exports.		Net Exports.	
	No.	Value.	No.	Value.	No.	Value.
Average, 1934-35 to 1938-39 ..	295	£'000 22	308	£'000 6	13	— 16
1951-52.. ..	318	214	681	58	363	— 156
1952-53.. ..	494	201	1,643	81	1,149	— 120
1953-54.. ..	153	102	1,214	95	1,061	— 7
1954-55.. ..	1,679	155	6,786	346	5,107	191
1955-56.. ..	304	229	8,025	475	7,721	246

NOTE.—The minus sign (—) signifies net imports.

The average value per head of the cattle imported during the last five years was £305, while the average value per head of the cattle exported during the same period was £58.

7. **Cattle Slaughtered.**—The numbers of cattle slaughtered during each of the years ended June, 1952 to 1956 compared with the average for the years 1934–35 to 1938–39 are shown in the following table:—

CATTLE (INCLUDING CALVES) SLAUGHTERED.

('000.)

Year ended June—	Slaughtering passed for Human Consumption.									Total Slaughtering including Boiled Down.
	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.	
Average, 1935 to 1939	(a)1,112	812	1,046	(b)156	(b)124	45	(b) 4	2	3,301	3,331
1952	1,247	966	1,029	197	152	71	15	9	3,686	3,738
1953	1,406	848	1,272	194	154	70	14	8	3,966	4,008
1954	1,564	1,008	1,366	220	172	62	15	8	4,415	4,475
1955	1,518	1,024	1,430	233	181	75	16	8	4,485	4,550
1956	1,547	1,023	1,502	227	191	88	25	9	4,612	4,675

(a) Year ended March.

(b) Year ended previous December.

8. **Production of Beef and Veal.**—Details of the production of beef and veal in each State and Territory are shown in the following table for the years indicated:—

PRODUCTION OF BEEF AND VEAL (BONE-IN WEIGHT): AUSTRALIA.

('000 tons.)

Year ended June—	N.S.W.	Vic.	Qld.	S. Aust.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Average 1935 to 1939	(a)173	115	181	(b) 25	(b) 27	9	(b) 1	..	531
1952	184	138	178	31	32	14	3	2	582
1953	217	124	253	31	32	14	3	1	675
1954	221	140	258	34	35	11	3	2	704
1955	215	143	272	34	37	14	3	2	720
1956	222	139	292	38	38	15	5	2	751

(a) Year ended March.

(b) Year ended previous December.

9. **Consumption of Beef and Veal.**—For the three years 1936–37 to 1938–39, the average annual production of beef and veal in Australia was 569,000 tons of which 127,000 tons were exported, leaving a balance of 442,000 tons (or the carcass equivalent of 144 lb. per head per annum) available for consumption as fresh and canned meat.

Due mainly to the effects of rationing, during the 1939–45 War and the immediate post-war years, civilian consumption of carcass beef and veal (including the carcass equivalent of canned meat) was considerably lower than previously but following the return to more normal conditions, it rose to 135.6 lb. per head in 1950–51. From 1951–52, consumption fell again and in 1955–56 amounted to 122.9 lb. per head.

In the following table, details of the production and disposal of beef and veal are shown for the periods stated.

**PRODUCTION AND DISPOSAL OF BEEF AND VEAL (BONE-IN WEIGHT) :
AUSTRALIA.
('000 tons.)**

Year.	Changes in Stock.	Production.	Exports.	For Canning.	Consumption in Aus- tralia as Human Food.	
					Total.	Per Head per Annum.
Average, 1936-37 to 1938-39		569	127	(a)	442	lb. 144.1
1951-52	- 4	582	52	81	453	118.9
1952-53	+ 6	675	96	106	467	119.7
1953-54	- 7	704	155	101	455	114.6
1954-55	+ 4	720	137	107	472	116.3
1955-56	- 7	751	167	110	483	116.0

(a) Included with exports.

10. **Exports of Frozen Beef and Veal.**—The export of frozen meat from Australia dates from about 1881, and since that year the trade has grown considerably. The quantity of frozen beef and veal exported in 1938-39 amounted to 271,964,000 lb., valued at £4,324,000, but there was a decline during the war years owing to reduced production and the diversion of supplies to meet the requirements of the Australian and Allied Services based on Australia. By 1947-48, the quantity exported had risen again to 237,150,000 lb., valued at £6,193,000, but this was followed by a steady decline until 1951-52 when exports amounted to only 95,876,000 lb. valued at £5,230,000. The following three years were, however, at a record level, the quantity exported in 1955-56 being 311,043,000 lb. valued at £22,520,000. The quantities and values of frozen beef and veal exported during the five pre-war years ended 1938-39 and in each year 1951-52 to 1955-56 are shown in the following table:—

EXPORTS OF FROZEN BEEF AND VEAL : AUSTRALIA.

Year.	Exports of Frozen and Chilled Beef.		Exports of Frozen Veal.	
	Quantity.	Value.	Quantity.	Value.
	'000 lb.	£'000	'000 lb.	£'000
Average, 1934-35 to 1938-39 ..	231,355	3,188	10,353	165
1951-52	92,926	5,009	2,950	221
1952-53	189,176	13,443	3,324	339
1953-54	313,198	21,697	3,779	349
1954-55	271,772	21,408	4,626	491
1955-56	306,354	22,025	4,689	495

The largest purchaser of Australian beef and veal is the United Kingdom, which during 1938-39 took about 90 per cent. of the total shipments. In 1954-55, shipments to the United Kingdom were valued at £16,708,000 or 76 per cent. of the total value of beef and veal exports compared with £17,993,000 or 82 per cent. in 1953-54. Exports to other British countries amounted to £2,335,000 or 11 per cent. of the total in 1954-55 and £2,099,000 or 10 per cent. in 1953-54.

In view of the preference overseas for chilled beef, the Australian beef industry was at a serious disadvantage until investigations proved that beef could be successfully transported from Australia to the United Kingdom in a chilled condition. Trial shipments of 254,000 lb. in 1932-33 and 1,515,000 lb. in 1933-34 were made, and the exports in subsequent years increased to a maximum of 58,963,000 lb. in 1938-39. However, the advent of war seriously affected the export trade in chilled beef, which declined to a negligible amount after 1939-40.

§ 4. Sheep.

1. **Initiation of the Pastoral Industry.**—The suitability of the Australian climate and general conditions for the production of a high class of wool were recognized at an early date by Captain Macarthur, one of the pioneer sheep-breeders of New South Wales. While it would appear that the introduction of the merino sheep into Australia was not due to Macarthur, a great deal of the credit for having successfully established the pastoral industry in Australia must certainly be his.

2. **Movement in Sheep Numbers in Australia.**—Fluctuations in the number of sheep recorded in Australia for each year from 1860 onwards may be seen from the graph on p. 899. Up to 1945, there were five marked periods of decline, but the losses were made up rapidly. In each of the years 1925 to 1945, the sheep flocks exceeded 100 million, reaching 125.2 million in 1942. During the three years ended 1947 however, a sharp decline to 95.7 million occurred. This was largely attributable to the severe drought conditions experienced during 1944, 1945 and 1946. The passing of the drought and consequent re-stocking have resulted in a steady increase in sheep numbers which at 31st March, 1956 amounted to 139.1 million, the highest ever recorded.

The following table shows the approximate movement in sheep numbers in Australia in 1938–39 and 1951–52 to 1955–56.

SHEEP AND LAMBS : ANALYSIS OF MOVEMENT IN NUMBERS, AUSTRALIA.
(^{'000.})

Season.	Lambs Marked.	Excess of Exports.	Sheep and Lambs Slaughtered.	Estimated Number of Deaths from Disease, Drought, etc.(a)	Number at 31st March.	Annual Net Increase (+) or Decrease(—)
1938–39	25,469	67	18,900	8,817	(b)111,058	— 2,315
1951–52	27,183	79	15,418	9,635	117,647	+ 2,051
1952–53	31,778	84	21,034	5,235	123,072	+ 5,425
1953–54	32,231	86	20,922	7,351	126,944	+ 3,872
1954–55	32,804	97	22,454	6,348	130,849	+ 3,905
1955–56	36,914	102	20,998	7,539	139,124	+ 8,275

(a) Balance figure. (b) As at 1st January, 1939—Queensland, South Australia, Western Australia Tasmania, Northern Territory; as at 1st March, 1939—Victoria.

3. **Distribution throughout Australia.**—With the exception of a short period in the early sixties, when the flocks of Victoria outnumbered those of New South Wales, the latter State has occupied the premier position in sheep-raising, depasturing about one half of the sheep of Australia.

A map showing the distribution of sheep in Australia at 31st March, 1955, appears on p. 911. Similar maps showing the distribution in earlier years appeared in previous issues of the Official Year Book (see No. 39, p. 907, for 1948; No. 34, p. 432, for 1938–39; and No. 22, p. 659, for 1924–25).

The numbers of sheep in the several States and Territories at 31st March of each year 1952 to 1956 compared with the average for the years 1935 to 1939 are shown in the following table:—

SHEEP : NUMBER.

(^{'000.})

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Nor. Terr.	Aust. Cap. Terr.	Australia.
Average, 1935 to 1939	51,774	17,555	21,061	8,515	9,839	2,312	23	240	111,319
1952	53,676	21,537	16,164	11,470	12,188	2,338	31	243	117,647
1953	57,461	21,368	17,030	12,036	12,475	2,421	34	247	123,072
1954	59,639	21,438	18,194	11,838	13,087	2,465	31	252	126,944
1955	59,200	22,330	20,222	12,817	13,411	2,595	29	245	130,849
1956	62,988	23,343	22,116	13,585	14,128	2,673	33	258	139,124

Except when affected by drought, the relative number of sheep depastured in the different States in recent years has remained fairly constant.

The percentage distribution in 1956 was:—New South Wales, 45 ; Victoria, 17 ; Queensland, 16 ; South Australia, 10 ; Western Australia, 10 ; and Tasmania, 2.

4. Classification of Sheep According to Age, Sex and Breed.—In the following table, numbers of sheep in Australia are classified according to age and sex at 31st March of the years 1952 to 1956. Data in this form are not available prior to 1943.

SHEEP : AGE AND SEX, AUSTRALIA.
(’000.)

Description.	31st March—				
	1952.	1953.	1954.	1955.	1956.
Rams, 1 year and over ..	1,507	1,560	1,610	1,647	1,721
Breeding ewes (including ewes intended for mating) ..	52,954	55,351	55,528	58,614	62,480
Other ewes, 1 year and over ..	7,451	7,039	8,430	7,847	7,553
Wethers, 1 year and over ..	34,032	34,304	36,069	37,645	39,145
Lambs and hoggets, under 1 year ..	21,703	24,818	25,307	25,096	28,225
Total, Sheep and Lambs	117,647	123,072	126,944	130,849	139,124

Particulars relating to the principal breeds of sheep at 31st March, 1956, are shown in the following table:—

SHEEP : PRINCIPAL BREEDS, 31st MARCH, 1956.
(’000.)

Breed.	N.S.W.	Victoria.	Q’land.	S. Aust.	W. Aust.	Tas.	N.T.(a)	A.C.T.	Aust.
Merino ..	49,994	9,934	21,777	11,482	12,987	301	33	236	106,744
Other recognized breeds ..	3,491	5,314	71	910	439	1,345	..	13	11,583
Merino comebacks(b) ..	3,792	2,449	64	281	140	377	..	4	7,107
Crossbreeds(c) ..	5,711	5,646	204	912	562	650	..	5	13,690
Total ..	62,988	23,343	22,116	13,585	14,128	2,673	33	258	139,124

(a) As at 31st December, 1955. (b) Merino comeback is the progeny of a crossbred merino ewe and a merino ram, i.e., finer than half-bred. (c) Half-bred and coarser.

5. Numbers of Sheep on Rural Holdings.—A special series of tabulations relating to rural holdings in Australia was compiled for 1949–50 and published in *Primary Industries*, Bulletin No. 44. The tables relating to sheep farming show classifications according to areas of the holdings on which the sheep were carried.

6. Comparison with other Countries.—As regards the size of its flocks and the quantity and quality of wool produced, Australia has long occupied a leading position amongst the sheep raising countries of the world. In 1954–55, Australian flocks numbered 131 million sheep, compared with the estimate of 195 million for the U.S.S.R., China and Eastern Europe, with about 52 million in Argentina and about 39 million in New Zealand. The total world sheep population was estimated at about 887 million in 1954–55. Further details of sheep numbers in the principal wool producing countries of the world for 1938–39, 1953–54 and 1954–55 are given in the table on p. 903.

7. Oversea Imports and Exports of Sheep.—As in the case of cattle, the oversea exports of live sheep from Australia are of comparatively little importance. On 27th November, 1929, the export of stud merino sheep was prohibited, except with the approval of the

Minister for Trade and Customs. Exports of sheep are now principally for slaughter overseas. Consignments for this purpose in recent years were made chiefly to Singapore from Western Australia. The following table shows the imports and exports of all sheep for the years 1951-52 to 1955-56 compared with the average for the years 1934-35 to 1938-39.

SHEEP : IMPORTS AND EXPORTS, AUSTRALIA.

Year.	Imports.		Exports.		Net Exports.

10. **Consumption of Mutton and Lamb.**—For the three years 1936-37 to 1938-39, the annual production of mutton and lamb averaged 319,000 tons of which 88,900 tons were exported leaving a balance of 230,100 tons (or the carcass equivalent of 74.8 lb. per head per annum) available for consumption.

Civilian consumption of mutton and lamb (in carcass equivalent weight including that used for canning) during the 1939-45 War rose substantially. This was a direct result of the preference of Defence Service and export demand for beef and of the system of rationing which was introduced (the coupon rating for mutton and lamb being low compared with beef). Consumption per head fell steeply in 1946-47 and up to 1951-52 was lower than in pre-war years. It rose during the years 1952-53 to 1954-55 to a steady level of about 78.3 lb. per head, but fell again in 1955-56 to 74.3 lb. per head.

In the following table details of the production and disposal of mutton and lamb are shown for the periods stated:—

PRODUCTION AND DISPOSAL OF MUTTON AND LAMB (BONE-IN WEIGHT) :
AUSTRALIA.

11. **Exports of Frozen Mutton and Lamb.**—The export trade in mutton and lamb preserved by cold process expanded rapidly up to 1913 when 205 million lb. were shipped. Progress was interrupted during the 1914-18 War and, owing probably to high wool prices, the exports of mutton and lamb for a number of years after were considerably less than earlier shipments. Exports commenced to rise again in 1929-30 and from that year onwards they continued to expand almost uninterruptedly until 1942-43, in which year 203,682,000 lb. of mutton and lamb, valued at £5,496,000, were exported. In earlier years, shipments consisted mainly of frozen mutton, but in 1923-24 lamb supplanted mutton and the exports of lamb were largely responsible for the increase in total shipments during the ten years to 1942-43. Due to reduced production as a result of drought conditions and the diversion of supplies to meet the requirements of the Australian and Allied Services based in Australia, there was subsequently a marked decline in mutton and lamb exports, which fell to 56,575,000 lb., valued at £1,540,000, in 1945-46. The maximum quantity exported in any year since the 1939-45 War was 193,092,000 lb. (£7,453,000) in 1949-50. In 1950-51 and 1951-52, exports fell steeply, but recovered again during succeeding years. In 1955-56, exports amounted to 116,283,000 lb. (£9,752,000).

The quantities and values of exports of frozen mutton and lamb in each year 1951–52 to 1955–56 compared with the average for the five years ended 1938–39 are shown in the following table:—

EXPORTS OF FROZEN MUTTON AND LAMB : AUSTRALIA.

Year.	Exports of Frozen Mutton.		Exports of Frozen Lamb.		Exports of Frozen Mutton and Lamb.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	'000 lb.	£'000.	'000 lb.	£'000.	'000 lb.	£'000.
Average, 1934–35 to 1938–39 ..	40,584	656	153,606	4,208	194,190	4,864
1951–52	5,907	297	25,246	1,621	31,153	1,918
1952–53	80,774	2,790	86,070	5,971	166,844	8,761
1953–54	55,590	1,964	44,102	3,298	99,692	5,262
1954–55	33,811	1,626	94,982	10,191	128,793	11,817
1955–56	34,657	1,885	81,626	7,867	116,283	9,752

As with beef, the principal customer in this trade is normally the United Kingdom. In 1955–56, exports of mutton and lamb to this country represented 71 per cent. and 89 per cent., respectively of the total quantities exported.

§ 5. Wool.

1. **General.**—Australia is the leading wool-growing country in the world. With less than one-sixth of the world's sheep, Australia produces more than one-quarter of the world's wool, and about one-half of the total fine-quality merino wool. The bulk of the production is exported, mainly as greasy wool, although substantial amounts of scoured and carbonized wool and wool on sheep skins and small quantities of semi-manufactured wool are also shipped. The remainder, which is used by Australian manufacturers, amounted to only five per cent. of the total production (greasy basis) in 1955–56.

The important position held by Australia among the principal sheep and wool producing countries of the world is shown in the table on p. 903.

2. **Greasy and Scoured Wool.**—Whether the weight of the wool clip should be stated as “in the grease” or as “clean” is a matter which seriously affects comparisons between the clips of different seasons and of different countries. The quantity of grease and other extraneous matter in a fleece differs, not only between countries, but between districts in the same country. It fluctuates with the vagaries of the season, and with the breed and the condition of the sheep.

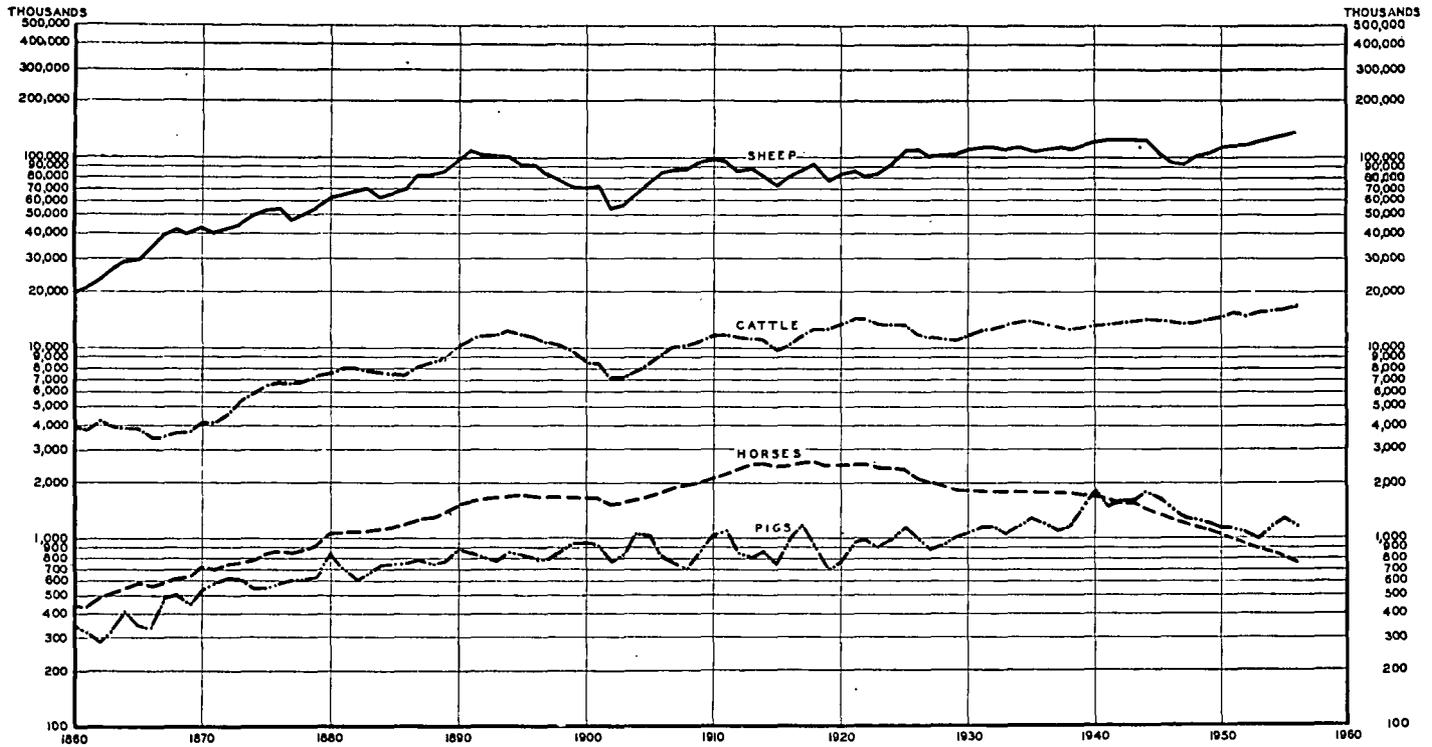

From 1946–47 to 1952–53, the Australian Wool Realization Commission, and from 1953–54, the Wool Statistical Service, has assessed annually the clean yield of the Australian wool clip. A steady rise was recorded from 53.4 per cent. clean yield from greasy in 1946–47 to 57.5 per cent. in 1951–52 and 1952–53, but this was followed by a fall to 55.7 per cent. in 1953–54, 56.0 per cent. in 1954–55, and 56.8 per cent. in 1955–56. A standard factor of 93 per cent. is taken as the clean yield of Australian scoured wools.

Wool scoured, washed and carbonized in Australia before export, however, has a clean yield somewhat lower than for the whole clip, because the grade of greasy wool treated locally for export as scoured, washed or carbonized includes a large proportion of dirty and low-grade wool. In recent years, it has approximated 50 per cent. The quantity of this wool exported during the five years ended 1955–56 was approximately 14 per cent. of the total raw wool exports (excluding wool exported on skins) in terms of greasy.

3. **Production.**—The bulk of the Australian wool production is shorn from live sheep; in recent years, approximately 4 per cent. has been obtained by fellmongering and about 5 per cent. has been on skins exported. Statistics of wool production are compiled from data received from growers, fellmongers, etc. The following table shows the production for the five years 1951–52 to 1955–56 compared with average production for the five years ended 1938–39. Particulars of the gross value of wool produced are based, for shorn wool, upon the average price realized for greasy wool sold at auction, and for skin wools on prices recorded by fellmongers and skin exporters.

4. Care Needed in Comparing Clips.—In comparing successive clips, allowance must be made for the circumstance that, owing to climatic or other conditions, the time of shearing may be so far delayed in some areas that one clip may include almost thirteen months' growth of wool, while the succeeding one may include little more than eleven months' growth.

5. Average Weights of Fleeces Shorn.—The average weights of sheep and lamb fleeces shorn in each of the States of Australia and in the Australian Capital Territory are shown in the following table for each season 1951-52 to 1955-56 compared with the average for the five seasons 1934-35 to 1938-39.

AVERAGE WEIGHT OF SHEEP AND LAMB FLEECES SHORN.

(b) Excludes Northern Territory.

6. **Wool classified according to Quality.**—Under control exercised during the 1939–45 War, records were kept of the classification of each lot of wool appraised according to quality, degree of fault and combing or carding type for each of the years 1940–41 to 1945–46. From the resumption of auctions in 1946–47 to 23rd October, 1953, this analysis was continued by the Australian Wool Realization Commission and from 23rd October, 1953, by the Wool Statistical Service, but the basis of the data has been changed to the catalogues of auction sales, and not upon appraisement as previously. The following table provides a detailed analysis of wool sold at auction according to quality, for the years 1951–52 to 1955–56. "Quality" ("64's, 60's, 58's," etc.) is a measure of the fineness and texture of wool for spinning purposes. Broadly, it means the maximum number of hanks of yarn, each of 560 yards length, which can be spun from 1 lb. of combed wool. For instance, wool of 64's quality is of a fineness and texture which will produce 64 hanks, each of 560 yards, from 1 lb. of tops (combed wool) of that particular wool.

(a) All greasy wool sold at auction except "wool re-offered account buyer".

7. **World Sheep Population and Wool Production.**—The following table shows particulars of the sheep population and total production of wool, in terms of greasy, in the principal wool-producing countries of the world, together with estimates of world production of merino, crossbred and carpet type wool for each season 1953–54 and 1954–55 compared with pre-war years. The data for countries other than Australia have been taken from reports published by the Commonwealth Economic Committee compiled from questionnaires prepared by the Committee and the International Wool Textile Organization.

In 1954–55, Australia produced 28 per cent. of the world total of all types of wool, the share of the British Commonwealth representing approximately 50 per cent. The principal wool producers, other than Australia, are New Zealand with 10 per cent. of the world total, Argentina, 8 per cent., United States of America, 7 per cent., and Union of South Africa, 7 per cent. Production in the U.S.S.R., China and Eastern European countries together amounted to 16 per cent. World production of wool (all types) in 1954–55 was about 823 million lb. (22 per cent.) greater than the average for 1934–38.

Australia's wool clip is predominantly merino; New Zealand and Argentina produce mainly crossbred wool, while the clip of the U.S.S.R. is largely of the carpet type. World production of merino wool in 1954–55 was 13 per cent. above the average for 1934–38, and the production of crossbred types has risen by about 42 per cent. Carpet wool production has risen by about 9 per cent.

(a) Provisional. (b) Basutoland and S.W. Africa Territory excluded from sheep population, but included in wool production. (c) Comprising U.S.S.R., Poland, Czechoslovakia, Hungary, Romania, Bulgaria, Eastern Germany, Albania, China and Dependencies, Outer Mongolia and Tibet.

8. War-time Contracts.—(i) *Wool*. Details of the contract entered into between the Governments of Australia and the United Kingdom for the purchase of the surplus wool clip of Australia for the duration of the war and one full clip thereafter (1939-40 to 1945-46) will be found in Official Year Book No. 36, p. 1106.

(ii) *Sheepskins*. Details of the war-time contract arrangements for the period April, 1940, to June, 1946, between the Australian and United Kingdom Governments for the purchase of Australia's exportable surplus of woolled sheepskins will be found in Official Year Book No. 37, p. 875.

9. Australian Wool Realization Commission.—The Australian Wool Realization Commission was the Australian subsidiary of a Joint Organization (commonly referred to as "J.O.") set up by the Governments of the United Kingdom, the Commonwealth of Australia, the Dominion of New Zealand and the Union of South Africa, under the title of "U.K.—Dominion Wool Disposals Limited" to dispose of accumulated war-time stocks of Dominion wool held by the United Kingdom Government at the end of the war. Details of the functions and operations of these organizations appear in earlier issues of the Year Book, particularly No. 38 (pp. 919-923).

By the end of 1951, the Joint Organization had disposed of all stocks of wool held and shortly after, it went into voluntary liquidation. Liquidation proceedings were completed on 15th February, 1954.

Australia's share of the profits arising from the operations of J.O. amounted to approximately £93 million (including interest). The task of distributing the profits to growers was entrusted to the Australian Wool Realization Commission and up to May, 1956, all but £2.5 million of the total value of the profits, plus a small amount representing mainly unclaimed moneys, had been distributed to growers.

The distribution of the remaining £2.5 million was held up by the protracted litigation known as the "Poulton Case". The moneys concerned represented the profits on wool which was submitted by growers for wartime appraisalment through dealers. Mr. Poulton, a dealer, sought to establish the right of the dealers to these profits, but the High Court ruled against him on two occasions. The single High Court judgment was given in November 1953, and the unanimous decision of the Full High Court was given in December 1953.

However, as the possibility existed that Mr. Poulton might seek leave to appeal to the Privy Council against the High Court's decision, the Government withheld distribution for that reason.

By May, 1956, Mr. Poulton had not taken any action to seek leave to appeal to the Privy Council and the Government, after consulting its legal advisers, decided to distribute the profits to the growers.

10. **Australian Wool Bureau.**—(i) *General.* The Australian Wool Bureau was constituted under the Wool Use Promotion Act 1953 and replaced the Australian Wool Board which was established in 1936. The Bureau's main function is to promote the use of wool by publicity and other means in Australia and overseas.

The Bureau consists of seven members. Of these, six represent wool-growers (three nominated by the Australian Woolgrowers' Council and three by the Australian Wool and Meat Producers' Federation) and are appointed by the Governor-General for a period of three years, while one (the Commonwealth Wool Adviser) represents the Commonwealth Government and is appointed by the Minister for Primary Industry.

Particulars of the wool promotional activities of the Bureau are given in paragraph 12, Wool Publicity and Research.

(ii) *Wool Statistical Service.* The Wool Statistical Service, formerly conducted by the Australian Wool Realization Commission, was taken over by the Australian Wool Bureau on 23rd October, 1953. The statistical Service is responsible for the preparation and publication of statistical material relating to the Australian wool market and the composition of the Australian clip and other special statistical work which may be assigned to it.

It is financed out of the income received by the Australian Wool Bureau from wool stores under its control and from an annual contribution by the Commonwealth Government.

A Statistical Service Committee, consisting of the representatives of the Australian Wool Bureau, the Commonwealth Government, wool buyers, wool growers and wool selling brokers' organizations, acts in an advisory capacity to the Australian Wool Bureau.

(iii) *Wool Stores.* Some three hundred wool stores, formerly the property of the Joint Organization and purchased from it by the Commonwealth Government, were transferred to the ownership of the Australian Wool Bureau by virtue of the Wool Stores Act 1953. The Bureau formally assumed control of these stores on 11th January, 1954, and at the same time received a substantial sum of money representing accumulated rentals and receipts from sales which had come to hand whilst the stores were held by the Commonwealth Government. Under the Act, the Bureau may only dispose of these stores with the permission of the Minister for Primary Industry and, in the event of war, may be required to return the stores without compensation to the Commonwealth Government. The stores are being let by the Wool Bureau as a commercial proposition. The rental income is used to meet the expenses of maintaining, managing and insuring the stores, to defray the cost of operating the Wool Statistical Service and to help finance the wool promotion activities of the Bureau.

(iv) *The Contributory Charge.*—Associated legislation, namely, the Wool (Contributory Charge) Act 1945 (subsequently replaced by the Wool (Contributory Charge) Act (No. 1) 1950–1951 and the Wool (Contributory Charge) Act (No. 2) 1950–1951) and the Wool (Contributory Charge) Assessment Act 1945–1951, provided for a contributory charge to be imposed on all wool produced in Australia and sold, purchased or processed by a manufacturer or exported on or after a date fixed by proclamation. The passage of amending Wool Tax legislation in June, 1952, made it possible to cease collection of the contributory charge at 30th June, 1952, and the legislation under which it was imposed was repealed. Further particulars of the Wool Contributory Charge and the amounts collected appear in Year Book No. 40, pp. 675 and 819.

(v) *The Wool Levy.* Whilst the contributory charge legislation, mentioned above, was in force, the Wool Levy, which was imposed by the Wool Tax Act 1936 and the Wool Tax Assessment Act 1936, was temporarily suspended. When the Wool Levy was first imposed in 1936, the rate of tax was 6d. per bale of wool delivered into the store of a wool dealer or wool selling broker or exported. The proceeds were paid into the Wool Publicity and Research Fund administered by the Australian Wool Board.

When collection of the contributory charge ceased, (i.e., from July 1st, 1952), the Wool Levy again became operative but at a higher rate. This rate was provided for in the Wool Tax Acts (No. 1 and 2) of 1952, under which a rate can be prescribed between the limits of 2s. and 5s. per bale of shorn wool produced. For the years 1952–53 to 1955–56 the rate imposed was 4s. per bale.

11. **Marketing of Wool.**—(i) *Minimum Reserve Price Plan.* Details of the minimum reserve price plan which was completed by the Governments of Australia, New Zealand, South Africa and the United Kingdom in May, 1951, and which was subsequently rejected at a referendum of wool-growers in Australia, may be found in Official Year Book No. 39, p. 925.

(ii) *Subsidy on Woollen Goods, 1950-51.* Details of the subsidy paid on woollen goods manufactured for consumption in Australia from wool sold during the 1950-51 season will be found in Official Year Book No. 41, p. 727.

12. **Wool Publicity and Research.**—(i) *Wool Use Promotion.* The Wool Use Promotion Act of 1953 defines the powers and functions of the Australian Wool Bureau as including measures for promoting, by publicity or other means, the use of wool in Australia or in other countries.

The Bureau is also authorized to take measures for improving the production of wool in Australia and encouraging research directed to the promotion of the use of wool.

By virtue of its powers, the Bureau is represented on the International Wool Secretariat, which was established in 1937 with head-quarters in London, to promote the use of wool through a broad programme of publicity, education and research.

The activities of the Australian Wool Bureau are financed from the Wool Use Promotion Fund into which are paid the proceeds of the Wool Levy, and contributions from the rental income of the wool stores as mentioned in 10 (iii) above.

(ii) *Research.* Until 1945, the Australian Wool Board was responsible for the supervision of economic and scientific research but in that year the Commonwealth Scientific and Industrial Research Organization was made responsible for scientific, technical and biological research into sheep raising and wool production, as well as wool textile research. Economic wool research is the responsibility of the Bureau of Agricultural Economics, a division of the Commonwealth Department of Primary Industry. The economic research work falls into two main categories, namely, farm production economics dealing with economics of wool growing and sheep-station management generally, and commodity research dealing with the economic aspects of the wool industry in Australia and of wool as a commodity in world trade.

To finance the research programme, the Wool Research Trust Account was established under the Wool Use Promotion Act in 1945. Originally, a sum equal to the amount raised by the Wool Levy was paid annually into this account from Consolidated Revenue. The Wool Use Promotion Act, 1953, fixed the rate of contribution at 2s. per bale of shorn wool produced.

In addition, funds are available for research from the Wool Industry Fund. This Fund was established in 1946 from various moneys accumulated by the Central Wool Committee in war-time.

Ample opportunity is afforded for co-operation in these research activities, with State Departments of Agriculture and other organizations.

13. **Consumption of Wool.**—(i) *Consumption of Raw Wool.* Statistics of raw wool consumption published in recent years for the purposes of broad international comparisons are based on the quantities of scoured or carbonized wool used on the woollen and worsted systems (mill consumption) plus quantities used in such processes as felting. Consumption estimates compiled on this basis have obvious defects as they disregard oversea trade in semi-processed wool (e.g., tops and yarn) as well as woollen goods. They are, however, comparatively simple to calculate and are useful in providing an approximate indication of trends in wool consumption. Estimates of raw wool used on the woollen and worsted systems and by felt manufacturers in Australia are shown below for the years 1938-39 and 1951-52 to 1955-56.

ESTIMATED CONSUMPTION OF RAW WOOL IN AUSTRALIA.

(’000 lb.)

Year.	Greasy Basis.			Clean Basis.		
	Used on Woollen and Worsted Systems.	Used for Felt Manufacture (including Hats).	Total.	Used on Woollen and Worsted Systems.	Used for Felt Manufacture (including Hats).	Total.
1938-39.. ..	77,947	2,248	80,195	39,599	1,068	40,667
1951-52.. ..	72,868	5,546	78,414	42,731	2,634	45,365

1953-54.. ..	88,106	8,376	96,482	52,975	3,979	56,954
1954-55.. ..	81,893	7,552	89,445	48,930	3,587	52,517
1955-56.. ..	87,324	8,372	95,696	52,175	4,186	56,361

(ii) *Consumption of Locally Processed Wool.* As considerable quantities of tops, noils and yarn are exported from Australia, the series on raw wool consumption shown above is over-stated to this extent. The series entitled "Consumption of Locally Processed Wool" provides a more reliable indication of wool consumption in Australia, as allowance has been made for exports of wool in semi-processed form. This series is shown below for the years 1938-39 and 1951-52 to 1955-56. Briefly, the series measures consumption of wool in terms of yarn used in Australian mills and other factories to produce woollen cloth and other woollen goods, yarn used for hand knitting purposes, and scoured wool used for felt manufacture. No allowance has been made for oversea trade in woollen piece goods, clothing, etc., because of the obvious difficulties of accurately estimating the wool content of these products.

ESTIMATED CONSUMPTION OF LOCALLY PROCESSED WOOL IN AUSTRALIA.

(a) Includes hand knitting yarns used from 1950-51. (b) Includes wool content of yarns containing a mixture of wool and other fibres. (c) Includes woollen yarn; excludes hand knitting yarns.

14. *Exports of Wool.*—(i) *Greasy—Quantities.* Prior to the 1939-45 War, Australian greasy wool exported overseas was sent principally to the United Kingdom and other European countries. In 1938-39, 42 per cent. of total shipments were sent to the United Kingdom, other important consignees being France, 20 per cent., Belgium, 13 per cent., and Japan, 9 per cent. During the 1939-45 War, exports to the United Kingdom declined and shipments to the European continent and to Japan virtually ceased, while the quantity shipped to the United States of America showed great expansion. Of the total quantity of greasy wool exported overseas during the five years ended 1955-56, 30 per cent. was sent to the United Kingdom and 13 per cent. to the United States of America. Of the total shipments in 1955-56, 26 per cent. went to the United Kingdom, 19 per cent. to France, 18 per cent. to Japan and 9 per cent. each to Belgium and Italy. The following table shows the quantities of greasy wool exported, and the principal countries of recorded destination.

(a) Excludes wool exported on sheepskins.

15. *Local Sales of Wool.*—In 1946–47, following the cessation of the war-time acquisition scheme which ended with the 1945–46 season, auction sales were resumed in Australia. Sales are conducted at Sydney, Goulburn, Newcastle, Albury, Melbourne, Geelong, Ballarat, Brisbane, Adelaide, Perth, Hobart and Launceston, and are attended by buyers representing manufacturers and merchants in the United Kingdom, France, the United States of America, Japan, U.S.S.R. and many other countries. More than 95 per cent. of the Australian wool clip is now disposed of at auction in Australia.

16. *Stocks of Wool.*—Stocks of raw wool held in Australia at 30th June, 1956 amounted to 68.6 million lb. (as in the grease) of which 51.3 million lb. (35.4 million lb. as greasy and 15.9 million lb. as scoured and carbonized) were held by woollen mills, wool scourers and fellmongers and 17.3 million lb. (unsold wool assumed to be all greasy) were held by brokers. These stocks exclude wool on skins, since this wool is not recorded as production until fellmongered in Australia or exported on skins.

Stocks at 30th June, 1956 were slightly lower than at 30th June, 1955, but both years were higher than in any of the three preceding years, when they were at their lowest level since the outbreak of the 1939–45 War. During the war and post-war years up to 1951 raw wool stocks were exceptionally high because of the large quantities held in Australia by the Australian Wool Realization Commission on account of Joint Organization. They reached a maximum of 1,749.9 million lb. at 30th June, 1945, but declined in each successive year to 30th June, 1952 by which time all Joint Organization stocks had been sold.

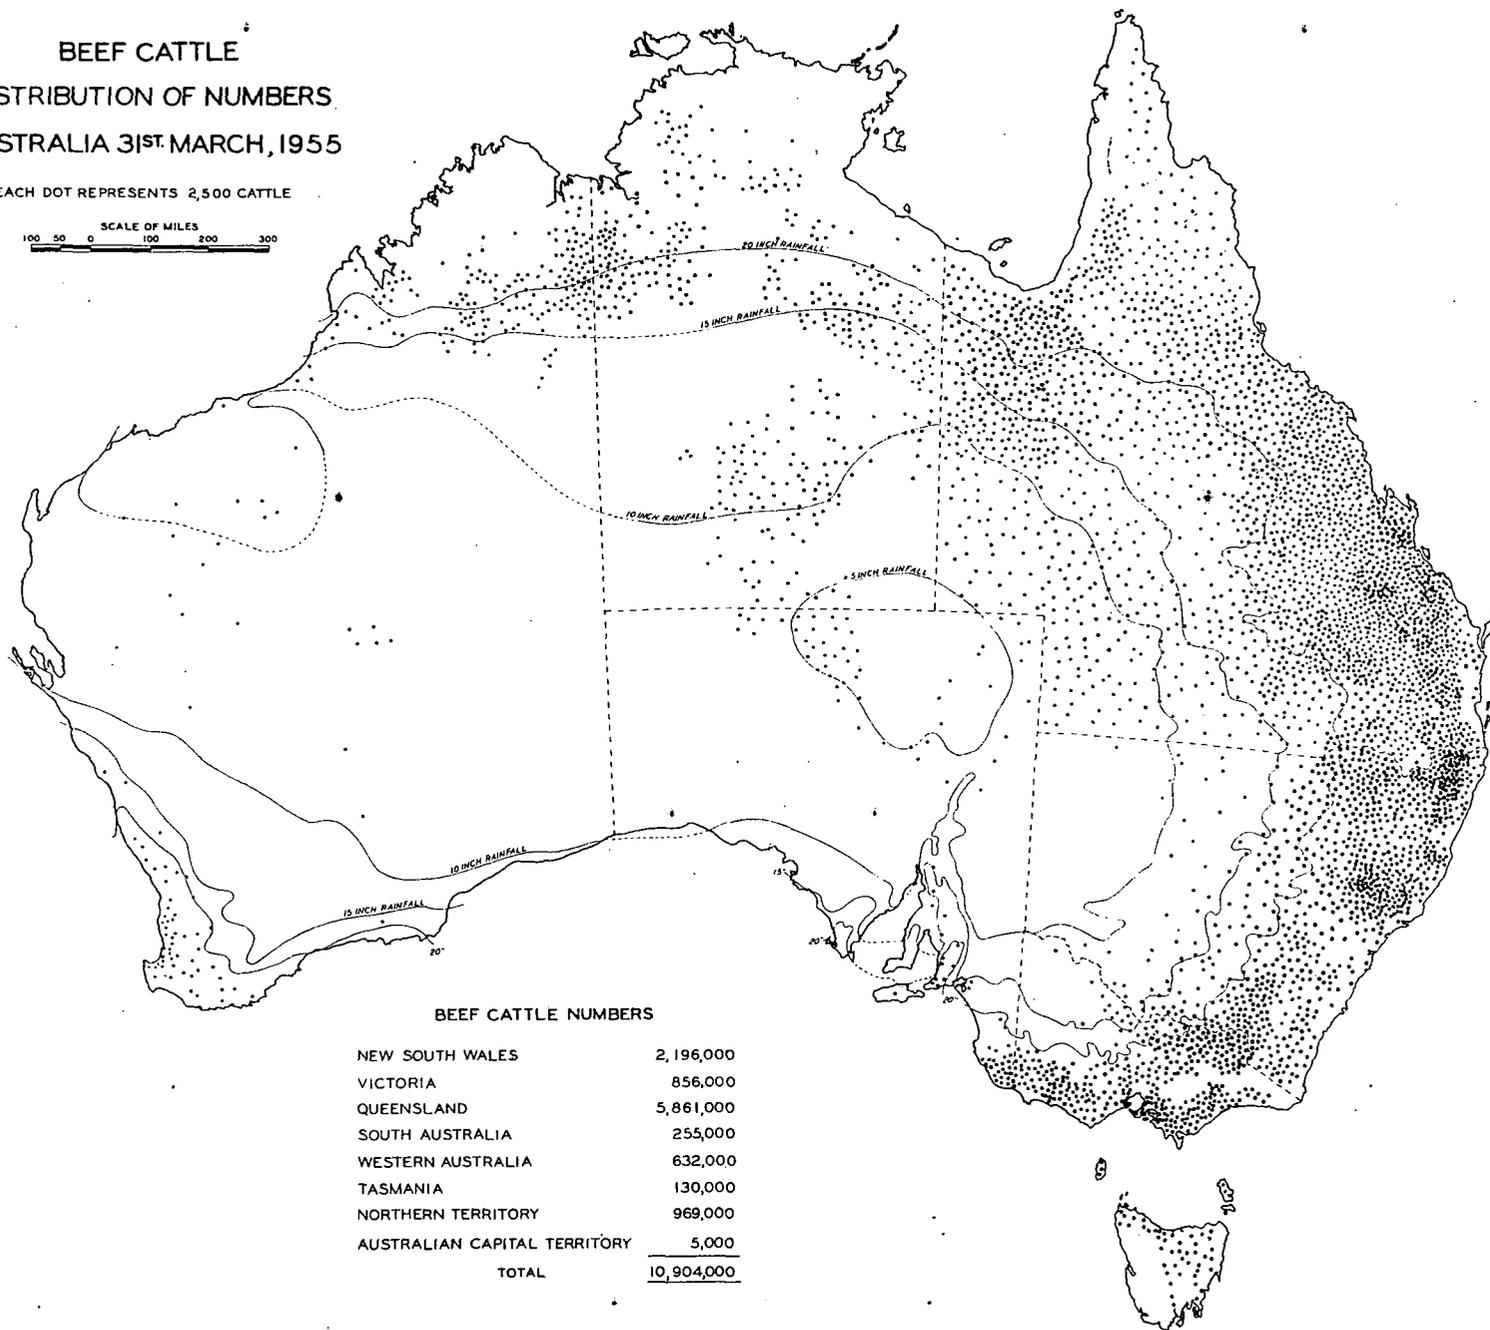

17. *Price.*—Wool is the chief factor in the pastoral wealth of Australia and the nation's prosperity is largely dependent upon its satisfactory sale. During the five years ended 1955–56, the price of greasy wool sold in the selling centres of Australia averaged 73.3d. per lb. compared with the average United Kingdom contract price of 14.59d. per lb. during the years 1939–40 to 1945–46 and the average selling price of 11.5d. per lb. during the ten years ended 1938–39. The average for the nine years ended 1928–29 was 18d. per lb., and for the seven years ended 1913–14, 9d. per lb.

As indicated in para. 8 above, the price of wool during the 1939–45 War was determined by the British Government wool contract. With the return to auction sales since 1945–46, the average price of greasy wool sold rose rapidly from the contract price of 15.45d. per lb. applicable to 1945–46 to the unprecedented level of 144.19d. per lb. in 1950–51. This was followed by a sharp fall in 1951–52 to 72.42d. per lb. or slightly more than half the price in 1950–51. There was, however, a partial recovery to 81.80d. per lb. in 1952–53 and 81.50d. per lb. in 1953–54. There was a further decline in the two following years to 70.88d. per lb. in 1954–55 and 61.46d. per lb. in 1955–56. The prices realized in 1955–56 were the lowest since 1948–49.

The prices quoted above, except for United Kingdom contract prices, are as compiled by the National Council of Wool Selling Brokers and represent the average price realized for all greasy wool, of whatever type or quality, marketed during the years indicated.

18. Value.—Fluctuation in Australian wool prices has a marked effect on the nation's rural income. In 1945-46, the gross value of wool production was £58,597,000 representing 17.4 per cent. of the gross value of all rural industries whilst in 1950-51, when prices reached a peak, wool was valued at £651,902,000 or 55.6 per cent. of the total for all rural industries. The value of wool production fell in subsequent years and in 1955-56 was £351,939.

Details of the value of wool production for the years 1951-52 to 1955-56 compared with the average for the three pre-war years are shown below.

WOOL (AS IN THE GREASE)—ESTIMATED GROSS VALUE OF TOTAL PRODUCTION.(a)
(£'000.)

(a) Including shorn, dead and fellmongered wool and wool exported on skins. (b) Estimated.

(c) Excludes distributions of profits under the Wool Disposal Plan; 1951-52, £23,662,000; 1952-53, £15,140,000; 1953-54, £14,279,000; 1954-55, £12,104,000; 1955-56, not yet available.

19. United Kingdom Importation of Wool.—The important position which Australia occupies in the supply of wool to the United Kingdom is indicated in the following statement of the quantities of wool imported into that country from the principal wool-producing countries during 1938 and each year 1951 to 1955.

WOOL(a): IMPORTS INTO UNITED KINGDOM.
(⁰⁰⁰ lb.)

Country of Origin.	1938.	1951.	1952.	1953.	1954.	1955.

(a) Greasy and Scoured.

(b) Not available.

Australian wool represented 45.7 per cent. of the total quantity imported into the United Kingdom during the five years ended 1955. New Zealand supplied 26.0 per cent. and South Africa 8.5 per cent., while the total quantity received from British countries constituted 87.1 per cent. of all United Kingdom imports.

20. Principal Importing Countries and Sources of Supply.—The following table furnishes, in respect of the principal importing countries, details of their production and imports of wool for 1955 together with the chief sources of supply. The quantities imported refer to the actual weight of wool without distinguishing between greasy and scoured except in the case of the United States of America where estimated clean content of raw wool is quoted.

WOOL: PRINCIPAL IMPORTING COUNTRIES AND SOURCES OF SUPPLY, 1955.
(Million lb.)

Importing Country.	Pro- duction of Importing Country. (a)	Quantity Imported from(b)—					Total Imports.
		Australia.	Union of South Africa.	Argen- tina.	New Zealand.	Other Countries.	
United Kingdom ..	104	338.5	64.4	31.9	186.1	103.4	724.3
Belgium	(c)	100.7	11.8	6.4	20.0	24.7	163.6
France	55	197.2	44.6	19.5	77.7	20.5	359.5
Germany (Federal Republic) ..	(c)	85.4	42.6	18.7	38.8	46.9	232.4
Italy	36	87.9	19.5	6.5	11.0	31.0	155.9
Japan	(c)	157.4	11.6	14.7	5.1	9.2	198.0
United States of America	304	(d) 53.2	(d) 17.8	(d) 69.3	(d) 25.8	(d) 82.3	(d) 248.4

(a) As in the grease, 1954-55. (b) Actual weight of greasy and scoured wool. (c) Not available. (d) Imports are in terms of estimated clean content of greasy and scoured wool. Actual weight of total United States of America imports was 354.8 million lb.

As a considerable transit trade exists between continental countries, it must not be assumed that the whole of the imports recorded by these countries are retained for their own consumption. The countries chiefly concerned with the transit trade are the United Kingdom (10 per cent. of total imports re-exported in 1955) and Belgium.

§ 6. Trade in Hides and Skins.

1. **Extent of Trade.**—In addition to the hides and skins treated locally, considerable quantities are exported: the value of cattle and horse hides, and sheep and other skins, sent overseas during the five years ended 1955-56 amounted to £97,288,000 or an average of £19,458,000 per annum.

2. **Sheepskins with Wool.**—The exports of sheepskins with wool, aggregating £76,348,000 during these five years, constitute the most important item in the values referred to in the preceding paragraph. During 1938-39, France was the largest purchaser of sheepskins with wool, taking 74 per cent. of the total consignments, while the United Kingdom ranked next with 15 per cent., followed by Germany with 7 per cent. In 1955-56, France obtained 80 per cent. of total exports and the United Kingdom 13 per cent. The exports of sheepskins with wool during each of the years 1951-52 to 1955-56 compared with the average for the years 1934-35 to 1938-39 were as follows:—

EXPORTS OF SHEEPSKINS WITH WOOL : AUSTRALIA.

Particulars.	Average, 1934-35 to 1938-39.	1951-52.	1952-53.	1953-54.	1954-55.	1955-56.
		Number .. '000	12,009	10,611	15,681	13,647
Value.. .. £'000	2,780	13,159	16,584	15,769	15,569	15,268

3. **Sheepskins without Wool.**—Up to 1943-44, sheepskins without wool were exported chiefly to the United States of America. During 1943-44, that country accounted for 97 per cent. of the total shipments while the remaining 3 per cent. were exported to the United Kingdom, Canada and the U.S.S.R. In subsequent years, however, there has been a decline in shipments to the United States of America and an increase in the quantities shipped to the United Kingdom and other countries; in 1955-56 the United States of America received 55 per cent. of total shipments; the United Kingdom 15 per cent. and

other countries 30 per cent. Quantities and values for the five years 1951-52 to 1955-56 compared with the average for the years 1934-35 to 1938-39 are shown in the table hereunder:—

EXPORTS OF SHEEPSKINS WITHOUT WOOL: AUSTRALIA.

Particulars.	Average, 1934-35 to 1938-39.	1951-52.	1952-53.	1953-54.	1954-55.	1955-56.
Number .. '000	808	1,454	3,242	2,482	2,147	1,771
Value.. .. £'000	70	518	749	671	372	424

4. Hides.—(i) *Exports.* The export trade in cattle hides and calf skins during 1955-56 was distributed as follows:—Japan, £456,000; Netherlands, £440,000; Italy, £425,000; Federal Republic of Germany, £423,000; United Kingdom, £402,000; Sweden, £107,000 and other countries, £469,000.

The exports during each of the five years 1951-52 to 1955-56 compared with the average for the years 1934-35 to 1938-39 are shown in the table below:—

EXPORTS OF CATTLE HIDES AND CALFSKINS: AUSTRALIA.

Particulars.	Average, 1934-35 to 1938-39.	1951-52.	1952-53.	1953-54.	1954-55.	1955-56.
Number .. '000	1,677	179	282	(a)18,761	(a)33,817	(a)45,976
Value.. .. £'000	957	1,109	1,161	1,381	1,874	2,722

(a) '000 lb.

Horse hides exported during the five years ended 1955-56 weighed 14,274,000 lb. and were valued at £1,050,000.

(ii) *Imports.* The imports of cattle hides and calfskins are fairly large, the chief sources of supply being New Zealand and the Pacific Islands. The quantities and values of cattle hides, including calfskins, imported into Australia during the years 1951-52 to 1955-56 compared with the average for the years 1934-35 to 1938-39 were as follows:—

IMPORTS OF CATTLE HIDES AND CALFSKINS: AUSTRALIA.

Particulars.	Average, 1934-35 to 1938-39.	1951-52.	1952-53.	1953-54.	1954-55.	1955-56.
Quantity .. cwt.	70,781	28,590	11,183	16,960	12,391	10,537
Value.. .. £'000	279	402	64	174	108	58

5. Furred Skins.—The exports of furred skins were valued as follows:—

EXPORTS OF FURRED SKINS: AUSTRALIA.

(£'000.)

Description.	Average, 1934-35 to 1938-39.	1951-52.	1952-53.	1953-54.	1954-55.	1955-56.

United States of America	1,167	247	13	1,427
Belgium and Luxemburg	146	(a)	..	146
Other Countries	24	9	..	33
Total	1,711	285	17	2,013

(a) Less than £500.

6. Marketing of Hides and Skins.—(i) *Sheepskins with Wool*. Details of the agreement between the United Kingdom and Commonwealth Governments for the purchase by acquisition of the "exportable surplus" of woolled sheepskins in Australia during the 1939-45 War were given in Official Year Book No. 37, p. 886. The contract expired on 30th June, 1946, and sheepskins have since been marketed mostly at open auction.

(ii) *Sheep and Lamb Pelts*. Details of the marketing control of sheep and lamb pelts were given in Official Year Book No. 38, p. 930. Pelts have reverted to open marketing without export restrictions.

(iii) *Hides and Leather*. A hide acquisition and marketing scheme operated from November, 1939 to August, 1954. Until 31st December, 1948, the scheme operated under the National Security Regulations. From 1st January, 1949, it continued under a Commonwealth Act and supporting State Acts. In June, 1952, the Tasmanian legislation lapsed and the scheme did not operate in Tasmania after that date. By August, 1954, the wide gap which had existed between fixed local prices and export prices for hides and leather had almost disappeared and, having in view certain legal difficulties which were hampering the operation of the scheme, the Commonwealth Government decided on its immediate termination.

The Australian Hide and Leather Industries Board, which administered the scheme, acquired all cattle hides and yearling and calf skins produced in Australia at set prices and allocated them to tanners at these prices. The prices were 15 per cent. to 20 per cent. above August, 1939 levels until May, 1952 when they were increased by an average of 50 per cent. Surplus hides were disposed of by tender or open auction. The Board retained the amounts realized in excess of appraised values, and supplemented the price to the producers in cases where the realized amount was less than the appraisal values.

Returns from sales of surplus hides and deferred payments levied on leather exported, based on the difference between world and Australian prices for the hides involved, were paid into a fund by the Board. From this fund, premiums were paid to producers as a proportion of appraised values. These premiums compensated hide producers to some extent for the margin between local and oversea prices. Further details of the war-time operations of the scheme will be found in Official Year Book No. 37, p. 887 and Official Year Book No. 38, pp. 930-1.

Pre-war, about 40 to 45 per cent. of Australian production was exported, but with the development of the local tanning industry, the proportion now is approximately 30 per cent.

(iv) *Rabbit Skins.* A marketing control scheme for rabbit skins was introduced under the National Security (Rabbit Skins) Regulations on 10th June, 1940, and terminated in April, 1949. Details of the scheme will be found in Official Year Book No. 38, p. 931.

§ 7. Tallow and Lard.

1. **Production.**—Australia's production of tallow and lard is in excess of local requirements and considerable quantities are normally available for export. Before 1952-53, the collection of details of tallow and lard was somewhat defective. In that year, a collection was instituted covering both slaughtering establishments and factories on a fiscal year basis. Details of the production of edible and inedible tallow and lard in each State are shown in the table below for the year 1954-55.

TALLOW AND LARD : PRODUCTION. (cwt.)

State.	1954-55.		
	Tallow.		Lard.
	Edible.	Inedible.	
New South Wales	92,553	463,839	4,145
Victoria	308,026	495,870	7,919
Queensland	378,218	221,601	19,421
South Australia	56,106	112,446	6,921
Western Australia	15,165	66,807	3,353
Tasmania	1,227	33,153	1,176
Australia	851,295	1,393,716	42,946

2. **Consumption of Tallow in Factories.**—Details of consumption are collected from the principal factories using tallow (soap and candle, chemical and woollscouring works).

Total consumption of tallow in factories as shown in the table below for the years 1938-39 and 1951-52 to 1955-56 is deficient, however, to the extent that no allowance is made for the small unrecorded amounts used in other types of establishments.

TALLOW : CONSUMPTION IN FACTORIES, AUSTRALIA. (cwt.)

Year.	Quantity Used.	Year.	Quantity Used.
1938-39.. .. .	539,095	1953-54	1,172,710
1951-52.. .. .	1,205,307	1954-55	1,193,368
1952-53.. .. .	1,068,181	1955-56	1,210,694

3. **Exports of Tallow and Lard.**—Particulars of exports of edible (including lard) and inedible tallow are shown in the following table for the five years 1951-52 to 1955-56 in comparison with the average for the five years ended 1938-39.

TALLOW AND LARD : EXPORTS, AUSTRALIA. (cwt.)

Particulars.	Average, 1934-35 to 1938-39.	1951-52.	1952-53.	1953-54.	1954-55.	1955-56.
Edible	(a)	27,331	111,020	158,875	74,401	142,498
Inedible	606,934	126,618	430,227	823,816	365,985	829,403
Total	(a)	153,949	541,247	982,691	440,386	971,901

(a) Not available.

4. Marketing of Tallow.—Until 30th September, 1952, the bulk of Australia's exportable surplus tallow, other than collar white mutton tallow was sold to the United Kingdom Ministry of Food under a series of annual contracts. The 1951-52 contract was not renewed and on 9th November, 1952 tallow export control was removed following termination of the industry's equalization pool arrangement and price de-control in most States.

§ 8. Net Exports of Principal Pastoral Products.

The quantities and values by which the exports of the principal pastoral products of Australia exceeded the imports for the years 1953-54 to 1955-56 were as follows:—

NET EXPORTS OF PASTORAL PRODUCTS: AUSTRALIA.

Product.	Unit of Quantity.	Quantity.			Value (£'000.)

CHAPTER XXIV.

FARMYARD, DAIRY AND BEE PRODUCTS.

NOTE.—Values of Australian oversea trade shown throughout this chapter are expressed as £A. f.o.b. Port of Shipment, except where otherwise indicated.

§ 1. Introductory.

1. **General.**—The introduction of cattle into Australia and the early history of the dairying industry are referred to in some detail in earlier issues of this publication. It may be noted here that an increased and improved milk supply has resulted from the crossing of imported stud cattle with the original stock and from the further judicious crossing of strains. In Australia, dairy cattle thrive in the open throughout the year, local climatic conditions demanding no protection other than tree plantations for shelter and, in certain districts, rugging in the coldest weather. Indigenous and imported grasses furnish food during the greater part of the year, and winter fodder, when necessary, is given to the cattle in the fields. With the wider application of scientific methods in the treatment of animals and pasturages and in the processes of manufacture, coupled with herd testing and effective State supervision, the dairying industry has shown rapid expansion. It has been demonstrated that Australian production and marketing methods do not adversely affect the vitamin content of the butter and that the loss during cold storage even for as long as two years is insignificant.

2. **Mixed Farming.**—Dairying is not, as formerly, wholly confined to agriculturists since many graziers also give it their attention. In non-coastal regions, it is generally carried on in conjunction with agriculture and sheep-raising, sufficient fodder being grown to carry the cattle through the winter months. Local wants are thus met, and in many places remote from the metropolis well-equipped factories have been established. The extent to which dairy cattle were run in conjunction with pig raising and wheat growing in 1947–48 is shown in the relevant tables published in the section “Special Tabulations Relating to Rural Holdings, 1947–48” of *Primary Industries 1947–48*, Bulletin No. 42.

3. **Employment.**—The numbers of persons employed in rural industries are ascertained at the annual census of rural production. The particulars collected are in respect of those persons who were permanently engaged in the actual work of the farm and include owners, lessees, tenants or sharefarmers, relatives over 14 years of age not receiving wages, and other permanent employees, including managers and relatives, working for wages or salary. For some earlier years, and uniformly from March, 1950, particulars have also been collected as to numbers of temporary employees at 31st March of each year. Details of the numbers so engaged are given in Chapter XXII.—Agricultural Production, § 28.

For the years up to 1939–40, information was also collected which enabled the classification of each holding according to the chief purpose for which it was used, thus obtaining a distribution of employment in the three main classes, Agriculture, Pastoral and Dairying.

However, because of difficulties in determining with precision the chief purpose for which holdings are used, this information has since been omitted from the schedules. Consequently, it has not been possible to continue to compile details of employment in the dairying industry from data obtained from this source.

Persons who described themselves at the population census as being engaged in dairy farming comprised 96,508 males and 10,018 females, a total of 106,526 persons at the Census of 30th June, 1947, and 100,553 males and 11,004 females, a total of 111,557 persons, at the Census of 30th June, 1954.

4. **Growth of the Dairying Industry.**—The following table gives some indication of the growth of the dairying industry since 1918–19:—

DAIRYING INDUSTRY : AUSTRALIA.

Year.	Number of Dairy Cows at 31st March.			Production of—			Milking Machines (No. of Stands). ^(a)
	In Milk.	Dry.	Total.	Milk for all Purposes.	Butter (Factory and Farm).	Cheese (Factory and Farm).	
				Million Gallons.	Tons.	Tons.	
1918–19 ..	1,319,588	582,448	1,902,036	529.6	81,162	10,621	(b)
1928–29 ..	1,744,728	600,342	2,345,070	815.4	129,817	13,490	(b)
1938–39 ..	2,600,707	608,812	3,209,519	1,189.9	203,500	29,304	(b)
1948–49 ..	2,339,885	818,725	3,158,610	1,208.9	165,830	43,202	144,916
1951–52 ..	2,098,560	874,192	2,972,752	1,047.4	135,319	40,598	171,712
1952–53 ..	2,223,410	863,133	3,086,543	1,215.2	167,480	46,606	179,853
1953–54 ..	2,262,783	948,215	3,210,998	1,189.7	159,585	49,057	189,542
1954–55 ..	2,338,658	897,949	3,236,607	1,325.8	191,078	45,193	196,877
1955–56 ..	2,393,870	929,517	3,323,387	(c)1,405.2	(c)208,590	(c)38,693	204,369

(a) "Number of Stands" indicates the number of cows that can be milked simultaneously—i.e., the cow capacity of installed milking machines. (b) Not available. (c) Subject to revision.

5. **Official Supervision of Dairying Industry.**—Dairy experts of the various State Agricultural Departments give instruction in approved methods of production, and inspect animals, buildings and marketable produce. A high standard of cleanliness, both of *personnel* and *matériel*, prevails.

The export trade is regulated by the terms of the Commonwealth Customs Act 1901–1954 and the Commonwealth Commerce (Trade Descriptions) Act 1905–1950, and regulations thereunder. It will be sufficient to state here that the true trade description, etc., must be marked on all produce intended for export, while official inspection ensures the maintenance of purity and quality. Upon request of the exporter, the goods are given a certificate by the inspector.

6. **Australian Agricultural Council.**—General information on the constitution and functions of the Australian Agricultural Council is given on p. 822 of Chapter XXII—Agricultural Production. Details were given on pp. 833–4 of Official Year Book No. 40, of the production aims for the five-year period ending 1957–58 (including specific targets for the principal dairy products) as set by the Council at its 36th Meeting in April, 1952.

§ 2. Value of Farmyard, Dairy and Bee Production and Indexes of Price and Quantum of Production.

1. **Gross Value of Farmyard, Dairy and Bee Production, 1936–37 to 1938–39 and 1950–51 to 1954–55.**—The following table shows the gross value of recorded farmyard and dairy production at the principal markets in Australia.

GROSS VALUE OF FARMYARD, DAIRY AND BEE PRODUCTION: AUSTRALIA.(a)
(£'000.)

Particulars.	Average 1936-37 to 1938-39.	1950-51.	1951-52.	1952-53.	1953-54.	1954-55.
Whole Milk(b) used for—						
Butter	22,550	35,044	36,009	58,995	57,004	67,801
Cheese	1,505	5,506	6,872	9,377	10,077	9,218
Condensing, Concentrating, etc.	1,094	6,223	7,948	10,860	9,583	7,537
Human Consumption and other purposes	7,971	28,315	37,261	46,092	49,205	50,377
Subsidy Paid on Whole Milk for—						
Butter, Cheese, Condensing, Concentrating, etc.	15,169	17,735	15,265	15,468	16,081
Human Consumption
Total Whole Milk (in- cluding Subsidy)	33,120	90,257	105,825	140,589	141,337	151,014
Pigs Slaughtered	5,526	15,358	18,516	21,703	23,773	21,263
Dairy Cattle Slaughtered	1,591	4,872	5,966	6,569	8,437	9,652
Eggs	9,117	28,047	37,534	43,637	43,569	40,650
Poultry	2,386	9,408	10,985	11,231	11,396	10,835
Honey	154	871	800	1,113	1,473	1,465
Beeswax	10	71	62	84	120	133
Total	51,904	148,884	179,688	224,926	230,105	235,012

(a) Prior to 1954-55 excludes Australian Capital Territory and Northern Territory, details for which are not available. (b) Excludes Commonwealth subsidy which is shown separately below.

2. Gross and Net Values, 1954-55.—The values of dairy, poultry and bee farming on gross, local and net bases are shown in the following table. Further information on values, including definitions of the terms used, is given in Chapter XXX.—Miscellaneous.

GROSS, LOCAL AND NET VALUE OF FARMYARD, DAIRY AND BEE
PRODUCTION, 1954-55.
(£'000.)

State.	Gross Production Valued at Principal Markets.	Marketing Costs.	Gross Production Valued at Farm.	Farm Costs.		Net Value of Pro- duction. (a)
				Fodder Fed to Farm Stock.	Value of Other Materials Used in Process of Pro- duction.	

DAIRY PRODUCTION.

New South Wales	57,426	6,792	50,634	5,642	(b) 244	44,748
Victoria	62,001	2,323	59,678	10,466	2,784	46,428
Queensland	34,296	1,204	33,092	4,033	3,989	25,070
South Australia	12,519	209	12,310	871	773	10,666
Western Australia	8,171	368	7,803	3,116	1,461	3,226
Tasmania	7,319	341	6,978	1,157	(b) 311	5,510
Northern Territory	22	1	21	21
Australian Capital Ter- ritory	175	10	165	35	1	129
Total	181,929	11,248	170,681	25,320	9,563	135,798

(a) No deduction has been made for depreciation and maintenance. (b) No allowance has been made for costs of power, power kerosene, petrol and other oils.

GROSS, LOCAL AND NET VALUE OF FARMYARD, DAIRY AND BEE PRODUCTION, 1954-55—*continued.*

(£'000.)

State.	Gross Production Valued at Principal Markets.	Marketing Costs.	Gross Production Valued at Farm.	Farm Costs.		Net Value of Production. (a)

(a) No deduction has been made for depreciation and maintenance. (b) Not available.
(c) Incomplete, Queensland only. (d) Incomplete, see individual industries above.

3. Net Value of Production, 1934-35 to 1938-39 and 1950-51 to 1954-55.—In the following table the net values of farmyard, dairy and bee production (total and per head of population) are shown by States.

NET VALUE OF FARMYARD, DAIRY AND BEE PRODUCTION.(a)

Year.	N.S.W. (b)	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.(b)	Total.
NET VALUE. (£'000.)							
Average, 1934-35 to 1938-39	11,848	12,238	7,118	1,938	979	943	35,064
1950-51	38,852	39,650	21,141	8,513	3,886	2,755	114,797
1951-52	44,508	51,935	19,412	11,029	5,265	3,955	136,104
1952-53	60,642	57,842	31,402	11,708	5,460	4,970	172,024
1953-54	58,985	60,595	29,758	12,525	5,540	5,761	173,164
1954-55	58,323	58,577	26,237	12,498	4,686	6,406	c 166,983
NET VALUE PER HEAD OF POPULATION. (£ s. d.)							
Average, 1934-35 to 1938-39	4 8 3	6 12 2	7 4 7	3 5 11	2 3 0	4 0 10	5 2 11
1950-51	11 19 11	17 13 7	17 10 4	11 15 10	6 16 3	9 14 4	13 17 10
1951-52	13 8 10	22 9 9	15 13 3	14 16 8	8 18 6	13 9 7	16 0 8
1952-53	18 0 3	24 7 6	24 13 8	15 5 6	8 18 8	16 8 7	19 15 10
1953-54	17 6 5	25 0 3	22 17 8	15 18 8	8 15 8	18 12 5	19 11 1
1954-55	16 17 1	23 10 10	19 15 11	15 9 6	7 4 5	20 9 4	c 18 7 4

(a) No deduction has been made for depreciation and maintenance or for costs of materials used in the process of production in the Poultry (for States other than Queensland) and Bee-farming Industries.
 (b) No deduction has been made for costs of power, power kerosene, petrol and other oils.
 (c) Includes Northern Territory and Australian Capital Territory.

4. Indexes of Quantum and Price of Farmyard, Dairy and Bee Production, 1950-51 to 1954-55.—For details of the methods of calculating these indexes and of the weights used see Chapter XXX.—Miscellaneous.

INDEXES OF QUANTUM (a) AND PRICE OF FARMYARD, DAIRY AND BEE PRODUCTION: AUSTRALIA.

(Base: Average 3 years ended June, 1939 = 100.)

Particulars.	1950-51.	1951-52.	1952-53.	1953-54.	1954-55.
<i>Quantum(a) of Production—</i>					
Milk	105	92	107	104	116
Other Products	109	108	110	113	117
<i>Total Farmyard and Dairy ..</i>	<i>106</i>	<i>97</i>	<i>108</i>	<i>107</i>	<i>117</i>
Total per Head of Population	88	78	85	83	88
<i>Price—</i>					
Milk	244	319	373	379	370
Other Products	295	363	423	435	375
<i>Total Farmyard and Dairy ..</i>	<i>258</i>	<i>332</i>	<i>387</i>	<i>395</i>	<i>371</i>

(a) Indexes of value at constant prices, i.e. quantities revalued at average unit values of base years (1936-37 to 1938-39).

§ 3. Dairy Cattle and Dairy Products.

1. Dairy Herds.—Lack of uniformity in the schedules used by the various States in the collection of livestock statistics makes it impossible to measure with complete accuracy the growth of dairy herds prior to 1943. Statistics of dairy cows—which form the largest part of herds—are, however, available on a comparable basis for a series of years. These statistics show that in 1918-19 there were 1,902,036 dairy cows (in milk and dry), compared with 2,345,070 in 1928-29 and 3,209,519 in 1938-39. The numbers remained at this level until March, 1944, but declined in succeeding years and did not regain the level of 1944 until 31st March, 1954, when the number recorded was 3,210,998. Numbers at 31st March, 1955 and 1956 were 3,236,607 and 3,323,387 respectively. In New South Wales, Victoria, South Australia, and Tasmania, the proportion of dairy to all cattle is high. In Queensland, the Northern Territory, and Western Australia, there is a great preponderance of other cattle, the main object in these areas being the production of beef. Since 1939, there has been a substantial decrease in the number of dairy cows in New South Wales. The numbers of dairy cows for 1952 to 1956 shown in the following table refer to those recorded by farmers as being in milk and dry as at 31st March. The figures shown for the years 1935 to 1939 cover the same categories, but the period differs in some States (see footnote (a)). To this extent the figures lack comparability.

NUMBER OF CATTLE AND DAIRY COWS (IN MILK AND DRY) AT 31st MARCH.

State.		Average, 1935-39. (a)	1952.	1953.	1954.	1955.	1956.

A map showing the distribution of dairy cattle in Australia at 31st March, 1955, appears on p. 910. A similar map showing the distribution at 31st March, 1948, appeared on p. 906 of Official Year Book No. 39.

2. **Size of Dairy Herds.**—A series of special tabulations relating to rural holdings, undertaken for all States for the year 1949-50, covered, *inter alia*, a classification of holdings with dairy cattle according to size of herd. Details of these tabulations are published in *Primary Industries 1949-50*, Bulletin No. 44.

3. **Factory System.**—(i) *General.* Cream separation and butter-making are often carried on together under the co-operative system. The creation of large central butter factories has resulted in a considerable reduction in the cost of manufacture, since improved appliances such as refrigerators, etc., may be profitably worked at the larger establishments. The product is also of a more uniform quality and, whereas formerly the average quantity of milk used per pound of hand-made butter was about 3 gallons, factory butter requires less than $2\frac{1}{2}$ gallons.

(ii) *Number of Factories.* In 1954-55, the factories in Australia for the manufacture of butter, cheese and condensed milk numbered 379 and were distributed among the States as follows:—New South Wales, 77; Victoria, 134; Queensland, 89; South Australia, 41; Western Australia, 17; and Tasmania, 21. More details regarding numbers of factories, output, etc., are given in Chapter VII.—Manufacturing Industry.

4. **Butter and Cheese—Stabilization Schemes.**—(i) *Voluntary Plan.* During the period from January, 1926 to April, 1934, a voluntary scheme known as the "Paterson Plan" was in operation which had the effect of stabilizing the price of butter in Australia. Details of this scheme may be found on p. 1028 of Official Year Book No. 38 and in earlier issues.

(ii) *Compulsory Plan.* On 1st May, 1934, the "Paterson Plan" was superseded by a compulsory price equalization plan, details of which were shown on p. 1029 of Official Year Book No. 38 and earlier issues. This compulsory plan was invalidated by the decision in 1936 of the Privy Council which declared in the James (Dried Fruits) Case that the Commonwealth had no power under the Constitution to regulate trade between the States.

(iii) *Equalization Scheme.* Since the Privy Council decision, the butter price equalization scheme has continued to operate by voluntary action based on the agreements between the manufacturers and the Commonwealth Dairy Produce Equalization Committee Limited. The Committee, which comprises members of the State Dairy Products Boards and other persons representing the industry, enters into agreements with manufacturers to secure to them equal rates from sales of butter and cheese, and for this purpose may fix basic prices at which these products sold in Australia or abroad are to be taken into account. The effect is that local and export trade are distributed in equitable proportions among the manufacturers by means of quotas. The Committee fixes basic prices and equalizes returns to factories through an Equalization Fund. The States originally participating in the scheme were New South Wales, Victoria, Queensland and Tasmania in respect of both butter and cheese, and South Australia in respect of cheese. South Australia and Western Australia entered the scheme in respect of butter on 1st April, 1946 and Western Australia extended its participation to include cheese in January, 1947.

The home consumption prices of butter and cheese were fixed by the Commonwealth Prices Commissioner up to 19th September, 1948, from which date they have been a matter for State Prices Authorities. At present, however, the power to fix prices is being exercised in only two States, Queensland and South Australia, the prices in all other States being determined by the Commonwealth Dairy Produce Equalization Committee.

5. **Commonwealth Subsidies.**—(i) *Butter, Cheese and Processed Milk Products.* Under the provisions of the various Dairy Industry Assistance Acts, the first of which was passed in 1942, the Commonwealth Government has provided subsidies on milk supplied for the manufacture of butter, cheese and processed milk products. Subsidies were paid on a seasonal basis prior to 1st April, 1946, but from that date have been on a flat rate basis. Subsidies are distributed by the Commonwealth Dairy Produce Equalization Committee Limited through factories to milk producers by payments on butter, cheese and processed milk products manufactured. Subsidy on milk supplied for the manufacture of processed milk products was discontinued from 1st July, 1948 to 30th June, 1949 and again from 1st July, 1952.

The following table shows in respect of butter and cheese, particulars of the rates realized on local, interstate and oversea sales and the average equalization and subsidy rates in operation for the years ended June, 1939 and 1952 to 1956.

(Source: Commonwealth Dairy Produce Equalization Committee Limited.)

Following representations by industry organizations, the Commonwealth Government established the Joint Dairy Industry Advisory Committee in November, 1946, comprising a chairman nominated by the Government, four representatives of Commonwealth Government Departments and four industry representatives from the several States. The Committee's functions, broadly, were to advise and assist in conducting cost and other surveys of dairy farm production and to act as an advisory body to the Government in these matters. From 1st April, 1947, to 30th June, 1952, the rates of overall return to milk producers determined by the Commonwealth Government for the purpose of subsidy payments were based on recommendations made by the Committee following surveys of production costs in the dairy industry.

Under the Five-year Stabilization Plan, which came into operation on 1st July, 1952, the Commonwealth Government, with the approval of the States, determines each season the ex-factory prices of butter and cheese, guarantees to dairy farmers a return, based upon costs of efficient production, in respect of quantities of butter and cheese sold within the Commonwealth, plus an additional 20 per cent. (if produced), and hence determines the amount of subsidy it will make available to lift the return on that part of output covered by the guarantee to the guaranteed level.

Early in 1953, the Dairy Industry Investigation Committee, an independent body consisting of three members, was appointed to advise the Commonwealth Government on the guaranteed return to producers during 1953-54. The Committee was re-established in March, 1954, to advise the Government on the guaranteed return for each year of the remaining three year period of the Stabilization Plan.

Amounts realized on exports of butter and cheese in excess of the f.o.b. equivalent of the guaranteed return have been credited to the Dairying Industry Stabilization Fund, which was established in July, 1948 for the purpose of stabilizing returns from exports. During 1951-52, the Stabilization Fund met the deficiency in respect of all exports which did not return sufficient to meet the basic return to the factory. Since 1st July, 1952, it has been available to the industry to be used, in whatever manner considered desirable by it, to make good any deficiency in respect of all exports other than the 20 per cent. provided for under the Commonwealth Government's Five-year Stabilization Plan. After allowing for outstanding debits, the amount standing to the credit of the Dairying Industry Stabilization Fund at 30th June, 1956, totalled approximately £1,400,000.

(ii) *Whole Milk.* In addition to the subsidies referred to above, the Commonwealth Government subsidized the production of whole milk consumed directly from 1943-44

to 1948-49. Details of the amounts distributed during each year will be found in Official Year Book No. 38, p. 1031.

(c) Includes milk, the produce of Queensland, sent as cream to New South Wales. (d) Includes butter made from cream, the produce of Victoria and Queensland. (e) Includes butter made from cream, the produce of New South Wales. (f) Includes cheese made in establishments not classified as factories. (g) Subject to revision.

7. **Whole Milk.**—(i) *Production and Utilization.* During the five years ended 1938–39 approximately 80 per cent. of Australia's milk supply was used for making butter, 4 per cent. for cheese manufacture, 2 per cent. for condensery products and 14 per cent. for fluid consumption and other purposes. There has since been a considerable decline in the proportion of milk used for butter-making, with corresponding increases in the quantities used for other purposes. In 1955–56, 68 per cent. of the total milk supply was used for butter, 8 per cent. for cheese, 6 per cent. for condensery products and 18 per cent. for other purposes.

Details of the production of whole milk for various purposes are shown in the following table for each year 1951–52 to 1955–56 in comparison with the average for the years 1934–35 to 1938–39:—

PRODUCTION AND UTILIZATION OF WHOLE MILK: AUSTRALIA.

(’000 Gallons.)

Year.	Total Production.	Quantity used for—			
		Butter (Factory and Farm).	Cheese (Factory and Farm).	Condensery Products.	Other purposes.
Average, 1934–35 to 1938–39	1,149,697	913,754	48,595	28,116	159,232
1951–52	1,047,376	626,560	87,360	76,496	256,960

1955–56(a)	1,405,177	966,737	83,774	72,631	282,035

(a) Subject to revision.

In the following table, particulars of production of whole milk in the several States are shown for the years 1951–52 to 1955–56, compared with the average for the five years ended 1938–39. Victoria is the principal milk-producing State and in 1955–56 the output from that State, 578.5 million gallons, represented 41 per cent. of total production. Output from New South Wales was 335.2 million gallons or 24 per cent. of the total and that of Queensland 282.9 million gallons (20 per cent.). Production in the remaining States accounted for 15 per cent. of the total Australian output.

TOTAL PRODUCTION OF WHOLE MILK.

(’000 Gallons.)

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Total.

(a) Subject to revision.

(ii) *Production per Cow.* The quantity of milk produced by a dairy cow reaches as high as 1,000 gallons per year, varying greatly with breed, locality and season. For the whole of Australia for all dairy cows and for all seasons prior to 1916 production has averaged considerably less than 300 gallons per annum. In recent years, not only has there been an

improvement in the quality of the cattle, but the application of scientific methods has been continually extended, and the 300-gallon average has been exceeded in each year since 1924. In 1955-56, the average yield of 428 gallons constituted a record. The annual average yields per cow shown in the following table are based on the approximate number of dairy cows which were in milk during any part of the year. The average shown is, therefore, less than that for cows which were yielding during the greater part of the year. It should be noted that there are many difficulties attending the collection of particulars of the total quantity of milk obtained during any year. In addition, there is the further difficulty of ascertaining with reasonable accuracy the average number of cows in milk during the same period. The average yield per cow shown hereunder may be accepted as sufficiently reliable to show the general trend :—

AVERAGE MILK PRODUCTION PER DAIRY COW.

(a) Subject to revision.

8. **Butter Production.**—There was a steady increase in the annual output of butter for many years prior to the 1939-45 War. The average annual production rose from 126,000 tons for the five years ended 1928-29 to 195,000 tons for the five years ended 1938-39.

Following the record output of 211,988 tons in 1939-40, the general trend of butter production declined until 1946-47, when 143,308 tons were produced. Output increased again to 173,599 tons in 1949-50, but was at a lower level in subsequent years. A substantial increase was recorded to 191,078 tons in 1954-55 and to 208,590 tons in 1955-56 due to a recovery in New South Wales and Queensland and a considerable increase in production in Victoria. The foregoing figures include butter produced on farms which has shown a decline from 8,714 tons in 1938-39 to 2,750 tons in 1955-56.

The following table shows production of butter in factories in each State for the years 1951-52 to 1955-56, compared with the average for the five years ended 1938-39.

9. Cheese Production.—Until 1916, the annual production of cheese had not reached 10,000 tons. From 1916 to 1932-33, it ranged between about 10,000 and 16,000 tons, rising in subsequent years with some reversals of trend to an output of 44,796 tons in 1949-50. Production decreased in 1950-51 and 1951-52 but by 1953-54 had risen to a record output of 49,057 tons. Production in 1954-55 declined to 45,193 tons and in 1955-56 to 38,693 tons due to a decline in Victorian output. The States contributing chiefly towards the general increase over the years are Victoria and South Australia.

The following table shows production of cheese in factories in each State in the years 1951-52 to 1955-56 in comparison with average output during the years 1934-35 to 1938-39:—

CHEESE PRODUCTION IN FACTORIES.

10. **Condensed, Concentrated and Powdered, etc., Milk Production.**—The manufacture of these products has expanded greatly since 1938-39 to meet the needs of the Services during the 1939-45 War and for export purposes since the war. The output of condensed milk (sweetened and unsweetened) in 1955-56 was more than double that in the three years ended 1938-39 while that of powdered milk (full cream and skim) was more than five times as high. Over the same period, the quantity of whole milk used in the manufacture of the products shown below increased from 33.2 million gallons to 72.6 million gallons or by 119 per cent. These products are manufactured mainly in Victoria, which produced 66 per cent. of the total (in terms of whole milk equivalent) in 1955-56. New South Wales accounted for 23 per cent. and the remaining States for 11 per cent.

The following table shows details of the output of condensed, concentrated, powdered, etc., milk during the years 1951-52 to 1955-56, compared with the available details for the years 1936-37 to 1938-39.

PRODUCTION OF CONDENSED, CONCENTRATED AND POWDERED, ETC., MILK: AUSTRALIA.

Year.	Full Cream Milk Products.				Total Whole Milk Equivalent of Full Cream Milk Products. '000 gals.	Milk By-products.	
	Condensed Milk (Sweetened and Unsweetened).	Concentrated Whole Milk.(a)	Powdered Full Cream Milk.	Infants' and Invalids' Foods (including Malted Milk and Milk Sugar).		Powdered Skim Milk.	Powdered Butter-milk and Whey.
	Tons.	Tons.	Tons.	Tons.		Tons.	Tons.
Average, 1936-37 to 1938-39	17,347	(b) 1,355	9,464	(c) 1,131	33,226	(d)	(e) 701
1951-52	52,467	16,743	15,121	12,066	76,496	10,887	2,938
1952-53	55,385	14,493	22,393	10,042	83,655	16,103	4,073
1953-54	42,386	19,464	18,905	11,740	75,995	19,804	5,358

1955-56(f)	45,399	14,870	17,423	13,125	72,631	30,634	4,586

(a) Mainly for ice-cream manufacture. (b) Incomplete. (c) Malted milk and milk sugar only. (d) Not available separately; included with powdered full cream milk. (e) Excludes powdered whey. (f) Subject to revision.

11. **Local Consumption of Butter and Cheese.**—The production of butter and cheese less net exports and adjusted to account for movements in stocks, represents the quantity available for consumption in Australia.

A system of butter rationing introduced as a war-time measure and retained until 16th June, 1950, had the effect of considerably reducing civilian consumption. In the last year of rationing, 1949–50, consumption was 25.3 lb. per head per annum compared with an average of 32.9 lb. during the years 1936–37 to 1938–39. Following the cessation of rationing, consumption rose sharply to 30.9 lb. per head in 1950–51 and to 31.2 lb. in 1951–52, and has since fluctuated between 29 lb. and 31 lb. per head per annum. In 1955–56, consumption amounted to 29.3 lb. per head.

Cheese consumption rose considerably during the period of butter rationing, from 4.4 lb. per head pre-war to 6.3 lb. per head in 1949–50. There was a further increase in certain years after the cessation of butter rationing, the maximum rate being achieved in 1953–54 when 6.6 lb. per head were consumed. This was followed by a decline in the next two years, the level in 1955–56 being only 5.5 lb. per head.

The following table shows details of the production and disposal of butter and cheese for each of the years 1951–52 to 1955–56 compared with the average for the years 1936–37 to 1938–39.

PRODUCTION AND DISPOSAL OF BUTTER AND CHEESE: AUSTRALIA.

(a) Figures for butter include ghee expressed as butter as well as butter shipped as ships' stores. Figures for cheese include ships' stores after allowance for a small quantity of cheese imported. (b) Not available. (c) Excludes ghee. (d) Includes allowance for movements in stocks other than those held in main cold stores. (e) Subject to revision.

12. **Marketing of Dairy Products.**—(i) *The Dairy Produce Export Control Act 1924–1954.* Introduced at the request of the dairying industry, this Act was passed by the Commonwealth Parliament with the object of organizing the overseas marketing of Australian dairy produce. A Dairy Produce Control Board was appointed and was in existence from 1924 to 1935. In the course of its functions, the Board regulated shipments to ensure regularity of supply in the London market, controlled forward selling, obtained reductions in overseas freights and insurance rates and participated in an advertising campaign in the United Kingdom.

Prior to the appointment of the Dairy Produce Control Board, a voluntary body—the Australian Dairy Council—was established to advise and make recommendations to the Governments on problems connected with the production, manufacture and quality of dairy produce, pasture improvements and diseases of dairy cattle.

Following a recommendation by the Australian Agricultural Council, the functions of these bodies were combined by an amending Act of 1935 under the Australian Dairy Produce Board and provision was made for the allocation of money from the Board's

funds for research and investigation into pastures, diseases of dairy cattle and the quality of butter. The functions of the Board were later extended to enable it to advise the Government in connexion with the transport of dairy produce, the securing of new markets, the expansion of existing markets and other matters.

The Australian Dairy Produce Board was re-constituted in 1947 by an amendment to the Dairy Produce Export Control Act, its membership being reduced from seventeen to twelve. The functions of the Board were extended to enable it to purchase and sell, on behalf of the Commonwealth, dairy produce intended for export, and to control all matters concerning the handling, storage, protection, treatment, transfer and shipment of the produce so purchased or sold. In 1953, the direct farmer representation on the Board was increased from two to three members, thus raising the total membership from twelve to thirteen.

In April, 1954, the Act was further amended to prepare for the implementation of an export marketing plan to follow the expiration of the United Kingdom-Australia Butter and Cheese Contract. The amendment enabled the Board to purchase dairy produce intended for export to the United Kingdom and to sell such produce on behalf of the dairying industry in lieu of its present function of selling on behalf of the Commonwealth Government. In the interests of the stability of the industry, the Act provides that the Board may be the sole Australian exporter of butter and cheese to the United Kingdom.

(ii) *The Dairy Produce Export Charges Act 1924-1937.* This Act provides for the imposition of a levy on all butter and cheese exported from Australia to cover the administrative expenses of the Board and for advertising and other purposes. The rate of the levy is fixed by regulation.

(iii) *Butter and Cheese Contracts.* Details of the war-time contracts arranged between the United Kingdom and Australian Governments, whereby the former undertook to purchase Australia's surplus butter and cheese, were shown on pp. 985 and 986 of Official Year Book No. 37. The purchase of butter and cheese from 1944-45 to 1954-55 was covered by the Long-Term Purchase Agreement. Details of this Agreement and of the prices paid for various grades of butter and cheese each year under the Agreement were given in pp. 943 and 944 of Official Year Book No. 42 and in earlier issues of the Official Year Book.

13. *Oversea Trade in Butter, Cheese and Milk.*—(i) *General.* The production of butter and cheese in Australia is considerably in excess of local requirements and consequently a substantial surplus is available for export overseas. In normal circumstances, the extent of this surplus is chiefly dependent upon the seasonal conditions. Exports of butter, which averaged 90,000 tons in the three years prior to the 1939-45 War, were maintained to a certain extent during the war and post-war years by the restriction of supplies for local consumption, but because of lower production they nevertheless fell as low as 41,800 tons in 1944-45. In the last year of rationing, 1949-50, exports were 79,200 tons, but they fell to 11,300 tons by 1951-52. There was a substantial increase in exports in each subsequent year and in 1955-56, 82,600 tons were shipped. In addition, small quantities of ghee have been exported during the post-war period. Exports of cheese, which averaged 11,500 tons pre-war, rose to a maximum of 26,000 tons in 1948-49, but they subsequently fell and in 1955-56 amounted to 17,200 tons.

During 1938-39, 96,900 tons of butter (95 per cent. of all butter exported) were shipped to the United Kingdom. With the decline in total exports, there was also a substantial reduction in the proportion shipped to the United Kingdom. This has now increased again and in 1955-56 amounted to 72,400 tons (88 per cent. of the total butter exports).

In 1938-39, exports of cheese totalled 16,000 tons of which 15,500 tons or 97 per cent. were exported to the United Kingdom. Of the total of 17,200 tons exported in 1955-56, 13,600 tons or 79 per cent. were shipped to the United Kingdom.

Total quantities and values of exports of Australian origin of butter, cheese and condensed, concentrated, etc., milk and cream are shown on p. 941.

(ii) *Butter and Cheese Exports graded according to Quality.* All butter and cheese exported comes under the provisions of the Exports (Dairy Produce) Regulations and is subject to the supervision, inspection and examination of officers appointed for that purpose. These commodities are graded according to quality which has been fixed by regulation as

follows:—Flavour and aroma, 50 points, texture, 30 points, and condition, 20 points. Butter and cheese graded at 93 to 100 points is of choicest quality, at 90 to 92 points, first quality, at 86 to 89 points, second quality, and at 80 to 85 points, pastry or cooking quality or, in the case of cheese, third quality.

In the following table, particulars are given of the relative proportions of butter and cheese graded for export according to quality. Further details, which include actual quantities by States, are to be found in *Primary Industries, Part I.—Rural Industries, 1954–55, Bulletin No. 49.*

BULK BUTTER AND CHEESE GRADED FOR EXPORT: AUSTRALIA.

(Per Cent.)

Grade.	Butter.			Cheese.		
	1953–54.	1954–55.	1955–56.	1953–54.	1954–55.	1955–56.

(a) Includes rejected.

(b) Included with Second Quality.

§ 4. Pigs and Pig Products.

1. **Pigs.**—The number of pigs in Australia first reached a million in 1905. It fluctuated about this level up to 1940, when it reached 1,455,341 while in 1941 the record number of 1,797,340 was recorded. There was a decline in the following two years but the numbers rose again to 1,746,721 in 1944; thereafter there was an almost continuous decline until 1953 when the number of pigs was only 992,532. Numbers increased in succeeding years to 1,296,502 in 1955 but decreased again in 1956 to 1,165,830. Details of the number of pigs in each State and Territory for each of the five years 1952 to 1956, together with the average for the five years 1935 to 1939, are given in the following table :—

NUMBER OF PIGS.

As at 31st March.	N.S.W.	Vic.	Qld.	S. Aust.	W. Aust.	Tas.	N.T.(a)	A.C.T.	Total.
Average, 1935 to 1939(b)	391,874	287,140	294,777	80,548	83,999	42,772	479	544	1,182,133
1952	292,829	213,670	316,529	64,903	86,224	46,926	794	249	1,022,124

(a) As at 1st January. (b) As at 31st March for New South Wales and Australian Capital Territory; 1st March for Victoria; 1st January for Queensland, South Australia, Western Australia and Tasmania.

Further details relating to pig numbers are given in Chapter XXIII.—Pastoral Production. A map showing the distribution of pigs in Australia at 31st March, 1955 appears on p. 912. A similar map showing the distribution at 31st March, 1948, appeared on p. 908 of Official Year Book No. 39.

2. **Size of Pig Herds.**—A series of special tabulations relating to rural holdings undertaken for all States for the year 1949–50 covered, *inter alia*, a classification of holdings carrying pigs according to size of herd. Full details of these tabulations were published in *Primary Industries 1949–50, Bulletin No. 44.*

3. **Pigs Slaughtered.**—The number of pigs slaughtered during each of the years 1951–52 to 1955–56 and the average for the years 1934–35 to 1938–39 are shown in the following table:—

PIGS SLAUGHTERED.
(’000.)

Year.	Slaughterings Passed for Human Consumption.							Total Slaughterings (including Boiled Down).

(a) Subject to revision.

(ii) *Consumption.* As in the case of other meats, pork was subject to rationing during the 1939–45 War and immediate post-war years and consumption was at a much lower level than pre-war. By 1948–49, it had returned to about 7 lb. per head, remaining at this level until 1951–52. In 1952–53, consumption fell to 5.8 lb., but rose again in 1953–54 to 7.7 lb. per head, and in 1954–55 to 10.2 lb., only slightly below the immediate pre-war average. In 1955–56, it fell again to 9.6 lb. per head. In the following table details of the production and disposal of pork are shown for the years 1951–52 to 1955–56 compared with averages for the three years 1936–37 to 1938–39.

PRODUCTION AND DISPOSAL OF PORK (BONE-IN WEIGHT) : AUSTRALIA.

Year.	Changes in Stock.	Production. (a)	Exports.	Canning.	Consumption in Australia.	
					Total.	Per Head per annum.
	’000 tons.	’000 tons.	’000 tons.	’000 tons.	’000 tons.	lb.
Average, 1936–37 to 1938–39	45.5	13.7	..	31.8	10.4
1951–52 ..	+0.4	35.0	1.7	5.3	27.6	7.3
1952–53 ..	+0.8	30.5	1.5	5.5	22.7	5.8

1955–56(b) ..	-0.7	42.8	1.1	2.3	40.1	9.6

(a) Includes an estimate of trimmings from baconer carcasses.

(b) Subject to revision.

5. **Bacon and Ham.**—(i) *Production.* As in the case of pork, the increased demand for bacon and ham during the 1939–45 War stimulated production to a level not previously attained. Production reached its peak in 1944–45 when 56,246 tons of bacon and ham were cured. This was followed by a continuous decline in output in each succeeding year to 36,628 tons in 1951–52. Production has been maintained at about this level in subsequent years, amounting to 37,279 tons in 1955–56. Details of production are shown by States in the following table for each year 1951–52 to 1955–56 compared with the average production for the five pre-war years ended 1938–39.

PRODUCTION OF BACON AND HAM (CURED WEIGHT)(a)
(Tons.)

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Average, 1934–35 to 1938–39	9,963	7,614	9,269	2,950	2,013	970	1	32,780
1951–52	12,514	8,964	7,669	2,969	3,683	829	..	36,628

(a) Pressed and canned bacon and ham have been converted to bone-in weight, except in pre-war years.

(b) Subject to revision.

(ii) *Consumption.* Consumption per head declined in the early stages of the 1939–45 War from the pre-war average of 10.2 lb. per annum, but subsequently increased to 12.7 lb. in 1946–47. Since that year, there has been a decline to a relatively steady level of from 7 lb. to 8 lb. per head per annum. In 1955–56, consumption amounted to 7.5 lb. per head. Details of production and disposal of bacon and ham for the years 1951–52 to 1955–56 compared with average production and disposal for the period 1936–37 to 1938–39 are shown in the following table:—

PRODUCTION AND DISPOSAL OF BACON AND HAM (CURED WEIGHT)(a): AUSTRALIA.

Year.	Changes in Stock.	Production.	Exports.	Canning.	Consumption in Australia.	
					Total.	Per Head per annum.
	'000 tons.	'000 tons.	'000 tons.	'000 tons.	'000 tons.	lb.
Average, 1936–37 to 1938–39	(b)	32.5	1.0	..	31.5	10.2
1951–52	+0.2	36.6	2.8	6.1	27.5	7.2
1952–53	-0.7	38.5	2.0	8.9	28.3	7.3
1953–54	+0.4	37.0	1.6	6.5	28.5	7.2
1954–55	-0.2	38.4	1.0	5.4	32.2	7.9
1955–56(c)	+0.4	37.2	0.7	5.1	31.0	7.5

(a) Pressed and canned bacon and ham have been converted to bone-in weight, except in pre-war years.

(b) Not available.

(c) Subject to revision.

6. **United Kingdom Contracts.**—Details relating to the several war-time contracts and the more recent Long-term Purchase Agreement between the Governments of the Commonwealth and the United Kingdom for the sale of Australia's surplus production of meats (including pigmeats) are included in Chapter XXIII.—Pastoral Production.

7. **Oversea Trade in Pigs and Pig Products.**—Total quantities and values of exports of Australian origin of pigs and pig products (bacon and ham, lard and frozen pork) for the years 1953–54 to 1955–56 are shown on p. 941.

§ 5. Poultry-farming.

1. **General.**—Poultry-farming has been carried on in Australia for many years and the State Departments of Agriculture have encouraged its development by appointing experts to advise on the care and management of poultry and by conducting egg-laying competitions. Originally the industry was conducted in conjunction with other branches of rural activity, mainly dairying, but it is now a specialized and distinct industry and it is from this source that the bulk of the commercial production is obtained. Practically all farms keep poultry for the purpose of supplying their own domestic requirements and in many cases some supplies from this source are also marketed. In addition, many private homes keep small numbers of fowls in backyard runs and this helps to maintain domestic needs particularly when eggs are in short supply.

2. **Numbers of Poultry.**—In pre-war years, the numbers of the principal kinds of poultry were a normal feature of the annual census of livestock in all States except Victoria and Tasmania. These data were collected on a restricted scale by all States in 1942–43, the details obtained being confined to farms of one acre or more producing eggs or poultry for sale. The collection has since been discontinued in some States. Because of their incompleteness, details of poultry numbers are not published.

3. **Recorded Production and Disposal of Eggs.**—(i) *Shell Eggs.* Available statistics of the production and disposal of eggs in Australia are restricted to those recorded by the Egg Boards of the several States. As Boards were not set up in all States until 1943, comparable statistics of recorded production of eggs for Australia as a whole are not available prior to 1943–44. Details of production in the respective States as recorded by these authorities for the years 1951–52 to 1955–56 are shown in the following table:—

SHELL EGGS : PRODUCTION(a) RECORDED BY EGG BOARDS.

(’000 Dozen.)

State.	1951–52.	1952–53.	1953–54.	1954–55.	1955–56.
New South Wales	50,271	50,884	51,884	55,057	51,635
Victoria	23,492	24,701	25,306	26,377	24,985
Queensland	8,426	7,860	8,555	8,312	7,848
South Australia	10,741	11,359	12,040	12,359	11,820
Western Australia	8,077	8,783	9,283	8,909	7,687
Tasmania	1,027	1,107	934	889	943
Total	102,034	104,694	108,002	111,903	104,918

(a) Receipts from consignors and sales by producer agents.

(ii) *Egg Pulp.* Prior to the 1939–45 War, production of egg pulp was about 7 million lb. per annum. This was used almost entirely for the manufacture of cakes, pastry and biscuits, only negligible quantities being exported. Production was expanded greatly during the war years to meet the requirements of the Armed Services and has since been maintained at a high level for export purposes and to meet increased local requirements.

Particulars of the production of whole egg pulp as recorded by the Egg Boards in the several States are shown in the following table.

LIQUID WHOLE EGG : PRODUCTION RECORDED BY EGG BOARDS.

(’000 lb.)

State.	1951–52.	1952–53.	1953–54.	1954–55.	1955–56.
New South Wales	12,357	16,991	20,942	17,057	14,649
Victoria	6,559	6,467	8,295	6,564	6,879
Queensland	2,278	2,315	3,703	2,419	2,901
South Australia	5,629	6,284	8,178	6,516	5,991
Western Australia	2,878	3,490	3,894	1,924	1,532
Tasmania	249	359	239	246	236
Total	29,950	35,906	45,251	34,726	32,188

In addition to liquid whole egg, production was also recorded of liquid egg whites and liquid egg yolks. Output in 1955-56 amounted to 540,643 lb. and 337,844 lb. respectively compared with 1,568,999 lb. and 1,043,545 lb. respectively in the previous year.

(iii) *Egg Powder.* The production of dried egg powder was established in Australia in 1942, to treat Australia's surplus eggs so as to maintain exports under war-time conditions to the United Kingdom. Production was continued after the end of the war for export purposes, but since 1946-47 has declined to negligible proportions.

4. **Production and Consumption of Eggs.**—Statistics of total egg production must necessarily be accepted with some reserve. The production shown in the following table together with details of exports and consumption is based upon the records of Egg Boards of production from areas under their control plus estimates of production from uncontrolled areas and from "back-yard" poultry-keepers.

**ESTIMATED PRODUCTION AND DISPOSAL OF EGGS IN SHELL(a) :
AUSTRALIA.**

Year.	Changes in Stock.	Estimated Total Production.	Exports.	For Drying and Pulping.(b)	Consumption in Australia as Human Food.

1.75 oz.

(b) The average weight of an egg in Australia is taken as

5. **Marketing of Eggs.**—(i) *United Kingdom Market.* Details of the annual contracts entered into between the United Kingdom and Australian Governments up to 1952-53 will be found in Official Year Book No. 38, pp. 1048-9 and No. 40, p. 930. The results for 1953-54 and 1954-55, the first two years after the return to free market conditions, will be found in Official Year Book No. 42, pp. 949-50.

The 1955-56 export season for shell eggs was a successful one. Prices in the United Kingdom market were well above the level of the previous year although there was some falling off in the quantity of exports to this market. Under a bulk sales and purchase arrangement with the United Kingdom Ministry of Food, 8,500 tons of egg pulp were shipped to the United Kingdom during the year 1955-56 at the contract price of £213 15s. sterling per ton f.o.b.

(ii) *Egg Export Control Act 1947.* Following the termination of Commonwealth control over the production and marketing of eggs on 31st December, 1947, functions relating to the local marketing of eggs reverted to State Egg Boards which became responsible

for stabilizing prices and marketing of eggs produced in the respective States. In order to assist in marketing Australia's surplus production of eggs under the Long-term Purchase Agreement with the United Kingdom, the Commonwealth established the Australian Egg Board under the Egg Export Control Act 1947. The Board, which commenced to operate on 1st January, 1948, was empowered to buy and sell, on behalf of the Commonwealth Government, eggs and egg products intended for export which comply with the provisions of the Export (Dairy Produce) Regulations. In addition, the Board was authorized to deal with all matters relating to the export of eggs and egg products from Australia, to make such experiments as are likely to lead to the improvement of the quality of Australian eggs and to promote their sale overseas. The Board consisted of ten members, including six representatives of egg producers and one representative of the Commonwealth Government.

Due to the discontinuance of inter-Governmental trading in eggs and egg products, the Egg Export Control Act was amended in April, 1954, to provide for the reconstruction of the Australian Egg Board and the implementation of an egg export marketing scheme. The new Board, established on 17th June, 1954, comprises nine members including a representative of the Commonwealth Government and representatives from each State Egg Marketing Board (except Tasmania). The Board is empowered to act as a trading authority selling eggs and egg pulp as agent for State Egg Boards. However, any State Board desiring to export on its own account may do so subject to general terms and conditions to be laid down by the Australian Egg Board.

6. Oversea Trade in Poultry Products.—The Australian oversea export of poultry products has been confined in the past chiefly to eggs in shell and egg contents, which are consigned mainly to the United Kingdom. In 1949–50, exports of eggs in shell reached the record level of 23.0 million dozen. Shipments were at a lower level in subsequent years and, in 1955–56, 16.1 million dozen were exported.

Prior to the 1939–45 War, exports of egg contents were small and in 1939–40 there was an excess of imports. During the war years, exports expanded greatly, mainly to meet Service requirements, and since the close of the war there has been a further expansion to 37.9 million lb. of egg contents in 1953–54. There was a decline in 1954–55 and 1955–56, when 22.5 and 21.2 million lb. respectively were exported.

Since the close of the war, there has also been a considerable increase in the exports of frozen poultry. Exports, which amounted to 1.5 million lb. in 1955–56, were however much lower than in preceding years.

Total quantities and values of exports of Australian origin of poultry products (live poultry, frozen poultry, eggs in shell, egg pulp and powder and undressed feathers) for the years 1953–54 to 1955–56, are shown on p. 941.

§ 6. Bee-farming.

1. Production of Honey and Bees-wax.—Although practised as a separate industry, bee-farming is also carried on in conjunction with other branches of farming, but its place in Australia's rural economy is not very significant. The returns of honey from productive hives during 1955–56 showed an average of 102 lb. per hive and the average quantity of wax was 1.3 lb. per productive hive.

The number of hives and the production of honey and bees-wax during the year 1955–56 are shown in the following table.

BEEHIVES, HONEY AND BEES-WAX, 1955–56.

State.	Beehives.			Honey Produced.		Bees-wax Produced.	
	Pro- ductive.	Unpro- ductive.	Total.	Quantity.	Gross Value.	Quantity.	Gross Value.
	'000.	'000.	'000.	'000 lb.	£'000.	'000 lb.	£'000.
New South Wales ..	140	37	177	15,207	789	184	60
Victoria ..	78	26	104	7,011	497	78	26
Queensland ..	24	11	35	2,329	107	34	9
South Australia ..	62	15	77	5,115	247	70	20
Western Australia ..	28	6	34	4,482	203	57	14
Tasmania ..	3	1	4	302	17	4	2
Aust. Cap. Territory ..	1	1	2	18	1
Australia ..	336	97	433	34,464	1,861	427	131

The production of honey and bees-wax fluctuates considerably and is determined mainly by the flow of nectar from flora of the eucalypts, which varies greatly from year to year. In recent years, there has been a pronounced upward trend in the output of honey, the 1948-49 figure, 53,200,000 lb., being an all-time record. Production in 1954-55 at 33,633,000 lb. and in 1955-56 at 34,464,000 lb., although much lower than in 1948-49, was still higher than pre-war.

The table hereunder shows the production of honey and bees-wax for the five years ended 1955-56 in comparison with the averages for the years 1934-35 to 1938-39.

HONEY AND BEES-WAX PRODUCTION.

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.

1955-56 ..	184	78	34	70	57	4	(b) 427

(a) Excludes Australian Capital Territory and Northern Territory. (b) Excludes Northern Territory.

2. Oversea Trade in Bee Products.—Prior to the 1939-45 War, the production of honey exceeded Australian requirements and a small quantity was available for export. In 1948-49, the record quantity of 32.1 million lb., was exported. Exports amounted to 23.5 million lb. in 1954-55 and to 27.2 million lb. in 1955-56.

The wider use of frame hives has reduced the production of wax, and as a result the quantity of bees-wax imported generally exceeded that exported up to 1945-46. During each year since 1946-47, however, with the exception of 1951-52, production has been high on account of exceptionally good seasons, and exports have exceeded imports by substantial margins. In 1955-56, exports exceeded imports by an amount of 166,000 lb.

Total quantities and values of exports of Australian origin of honey and bees-wax for the years 1953-54 to 1955-56 are shown in § 7 below.

§ 7. Exports of Australian Farmyard, Dairy and Bee Products.

The quantities and values of Australian farmyard, dairy and bee products exported during the years 1953-54 to 1955-56 are shown below.

AUSTRALIAN FARMYARD, DAIRY AND BEE PRODUCTS: EXPORTS OF AUSTRALIAN ORIGIN.

§ 8. Imports of Dairy and Farmyard Products into United Kingdom.

NOTE.—Values of imports in this section are expressed in £ sterling at the landed c.i.f. point.

1. Summary, Principal Products.—The following table shows the quantities and values of the principal dairy products imported into the United Kingdom during the years 1939, 1954 and 1955.

DAIRY PRODUCTS: IMPORTS INTO UNITED KINGDOM.

Product.	Unit of Quantity.	1939.		1954.		1955.	
		Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
Butter	'000 cwt.	8,737	£'000. 48,424	5,624	£'000. 97,675	6,192	106,663
Cheese	"	2,845	8,869	2,640	27,361	2,580	25,949
Milk, powdered and preserved	"	..	2,818	..	5,951	..	3,653
Bacon and ham	'000 cwt.	7,953	37,105	6,286	77,369	6,411	75,902
Pork(a)	"	989	3,036	652	7,980	749	8,967

Eggs not in shell, liquid or frozen	'000 cwt.	800	2,292	579	7,977	277	3,020

(a) Excluding pork in airtight containers.

2. **Butter.**—Until 1950, Australia had regularly supplied between 20 and 30 per cent. of the butter imported into the United Kingdom. After 1950, when butter rationing was abolished in Australia, the quantity shipped was considerably lower until 1955 when it amounted to 1,464,000 cwt. or 23.6 per cent. of the total United Kingdom imports. New Zealand supplied 40.0 per cent. of the total quantity imported during 1955 and Denmark 27.4 per cent.

In the following table, particulars of the quantity and value of butter imported into the United Kingdom are shown for the years 1938, 1954 and 1955, according to country of origin.

BUTTER: IMPORTS INTO UNITED KINGDOM.

Country from which Imported,	1938.		1954.		1955.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	'000 cwt.	£'000.	'000 cwt.	£'000.	'000 cwt.	£'000.
New Zealand	2,592	14,524	2,433	41,661	2,478	41,911
Australia	1,798	9,630	583	9,964	1,464	25,041
Other Commonwealth Countries and Republic of Ireland	423	2,455	106	1,986	41	762
Denmark	2,365	12,960	2,025	35,428	1,697	30,067
Netherlands	712	3,466	285	5,305	211	4,018
Other Foreign Countries	1,628	7,838	192	3,331	301	4,864
Total	9,518	50,873	5,624	97,675	6,192	106,663

3. **Cheese.**—The value of cheese imported into the United Kingdom in 1955 was £25,949,000. Of this £14,920,000 was imported from New Zealand, £3,927,000 from Australia, £2,644,000 from Denmark and £1,574,000 from the Netherlands.

4. **Bacon.**—Of a total import in 1955 of bacon (excluding bacon in airtight containers) valued at £70,517,000, the value of that supplied by Denmark was £53,685,000, Poland, £8,325,000 and the Netherlands, £7,571,000.

5. **Pork.**—The value of the United Kingdom imports of pork (excluding pork in airtight containers) was £8,967,000 in 1955. Imports from Republic of Ireland, valued at £2,844,000, New Zealand, £1,123,000, and Denmark, £2,601,000, comprised 73 per cent. of the imports into the United Kingdom.

6. **Eggs.**—In 1955, the value of eggs imported into the United Kingdom was £16,648,000, comprising eggs in shell, £13,628,000, and liquid or frozen eggs, £3,020,000. The Australian share in this trade amounted to £4,521,000. Eggs in shell were supplied principally by Denmark, £8,237,000, and Australia, £2,083,000.

7. **Milk Products.**—In 1955, the value of preserved milk imported into the United Kingdom was £3,141,000. Of this total, imports from Australia amounted to £528,000.

8. **Other Products.**—The imports into the United Kingdom from Australia of poultry (excluding poultry meat in airtight containers) amounted to £154,000, while those of bees-wax, lard and honey in 1955 were unimportant.

CHAPTER XXV.

FORESTRY.*

§ 1. General.

NOTE.—Values of Australian oversea trade shown throughout this Chapter are expressed in £A. f.o.b., Port of Shipment, except where otherwise indicated.

1. **Objects of Forestry.**—The main object of forestry is to manage the forests of a country in the way that will provide the maximum benefits, both direct and indirect. Direct benefits include the provision of essential commercial commodities such as structural timber, pulpwood, plywood, veneers, firewood, bark products, tars, oils and resins. Indirect benefits include protection of soil and stock from wind and exposure, regulation of stream flow, and aesthetic effects.

Forestry aims to improve existing forests and woodlands by properly controlled exploitation, by protection from destructive agencies such as fire, and by inducing natural regeneration where it is desirable. Forestry also aims to provide a partial tree cover on denuded lands when such cover is necessary for protective purposes, and a complete cover when the land is better under forest than under any other crop.

2. **General Account of Forests and Timbers.**—The area of land in Australia suitable for the production of commercial timber as the primary crop is very small in comparison with the size of the continent. It is concentrated mainly around the wetter coastal belts and the eastern highlands and it includes the bulk of the land suitable for intensive development by agricultural or pastoral undertakings.

The allocation of land for agricultural and pastoral purposes led to the clearing of much of the original forest of Australia, particularly of the more readily accessible parts. In the early period of agricultural and pastoral expansion, only the best timbers found their way into commerce, and species now prized as providing high quality woods were often put to inferior uses. During this period, the forest resources of the country were considered by the majority of the people to be inexhaustible, and relatively little care was taken to prevent the degradation of the remaining forests by fire and uncontrolled grazing. This state of affairs is rapidly changing; it is now recognized that the remaining forest land must be protected and properly managed in the interests of the community.

The trees which make up the forests of Australia are mainly evergreen hardwoods. The characteristic genus is *Eucalyptus*. There are over six hundred different kinds of eucalypts and with few exceptions the natural occurrence of all of them is restricted to Australia. The genus includes such species as the mountain ash (*Eucalyptus regnans*) of Victoria and Tasmania, and karri (*E. diversicolor*) of Western Australia, which are the tallest-growing hardwoods in the world. At the other end of the scale there are many eucalypts which do not grow to tall trees, including the species collectively known as the "mallees". The mallees develop a number of small stems from an underground structure called the "mallee root".

* A specially contributed article dealing with Forestry in Australia appeared as part of Chapter XIX. in Official Year Book No. 19 (see pp. 701–12 therein). See also "The Commercial Timbers of Australia Their Properties and Uses" by I. H. Boas, published by the Council for Scientific and Industrial Research in 1947, "Timbers and Forest Products of Queensland" by E. H. S. Swain, published in 1928 and "Australian Standard Nomenclature of Australian Timbers" published by the Standards Association of Australia.

Less than 100 eucalypts are used for sawmilling and not more than 30 to 40 are exploited extensively. The main commercial eucalypts were listed in Official Year Book No. 39 and earlier issues.

The eucalypts satisfy the Australian requirement for timbers having great strength and durability. They also provide a large proportion of the building timber and some of the wood required for packaging. In recent years, some eucalypts have been used extensively for papermaking and for the manufacture of hardboard and fibreboard. The species most commonly used for pulping are mountain ash (*E. regnans*), alpine ash (*E. gigantea*), and messmate, stringybark or Tasmanian oak (*E. obliqua*).

A large number of other genera represented in the Australian forest flora also produce commercial hardwoods. Among the outstanding furniture cabinet and veneer timbers are red cedar (*Cedrela toona* var. *australis*), Queensland maple (*Flindersia brayleyana*), Southern and Northern silky oak (*Grevillea robusta* and *Cardwellia sublimis*, respectively), Queensland walnut (*Endiandra palmerstoni*), blackwood (*Acacia melanoxylon*), rose mahogany (*Dysoxylum fraserianum*), etc. Turpentine (*Syncarpia laurifolia*) ranks with the world's best as a harbour piling timber. Coachwood (*Ceratopetalum apetalum*) came into prominence for rifle furniture and for aircraft plywood during the 1939-45 War.

The foregoing are but a few examples indicating the range of use of the timbers of the Australian hardwood forests.

The most important indigenous softwood resources of Australia were in the forests of hoop pine (*Araucaria cunninghamii*) of Queensland and New South Wales. These forests occurred on rich land suitable for intensive agriculture. The greater part of the original hoop pine forest has gone but the wood removed made an important contribution to the Australian timber industry. Some areas of the hoop pine forest have been replanted with this species in Queensland and, to a lesser extent in New South Wales.

There are still considerable areas of the useful white-ant resisting cypress pine (*Callitris* spp.) in the inland areas of Queensland and New South Wales. They have been seriously overcut but are gradually being brought under management.

Other native softwoods which have played a useful but minor part in the Australian timber industry include bunya pine (*Araucaria bidwilli*) and kauri (*Agathis* spp.) of Queensland, and huon pine (*Dacrydium franklinii*), celerytop pine (*Phyllocladus rhomboidalis*) and King William pine (*Athrotaxis selaginoides*) of Tasmania.

The savannah woodlands of the interior of Australia yield commercial commodities such as sandalwood, tanbarks and essential oils. They also have an important function in providing fuel and rough timbers for the development of agricultural and pastoral holdings.

3. Extent of Forests.—According to data assembled for the Seventh British Commonwealth Forestry Conference to be held in Australia and New Zealand in 1957, the total area of forest in Australia is estimated at 186,791 square miles, or about 6.3 per cent. of the total land area of the continent. This is an increase of 27,040 square miles over the estimate made for the 1952 Conference, and has resulted from the inclusion of a large area of mallee in South Australia, together with 4,500 square miles of forests, mainly low grade woodlands, in the Northern Territory. The estimated forest area is distributed amongst the States as follows (the proportion of forest land to the total area of each State is shown in parenthesis):—New South Wales and the Australian Capital Territory, 37,942 square miles (12 per cent.); Victoria, 26,222 (30 per cent.); Queensland, 28,000 (4 per cent.); South Australia, 36,000 (including 25,000 square miles of mallee suitable for firewood only) (10 per cent.); Western Australia, 41,826 (4 per cent.); Tasmania, 12,301 (47 per cent.) and the Northern Territory, 4,500 (1 per cent.). The areas given are rough estimates only and are considerably in excess of those which are both suitable for reservation and likely to be maintained for timber production. Considerable areas of low grade forest which, in many cases, are suitable for little more than the production of firewood, are included. It is doubtful if the remaining prime native forest area of Australia exceeds 20,000 square miles. The proportion of Australia carrying commercial forests is therefore very low and apart from forests on the coastal fringe of the continent, the tree density is very low.

The table below shows a classification of the estimated total forest area referred to above:—

CLASSIFICATION OF FOREST AREA(a): AUSTRALIA.

Class of Forest.	Area (Square Miles).				Proportion of Total Forest Area.
	State Forest.	Communal Forest.	Private Forest.	Total.	
<i>Exploitable—</i>					%
Softwood	10,512	5	2,808	13,325	7.1
Mixed wood	754	754	0.4
Hardwood	41,691	75	13,129	54,895	29.4
<i>Total</i>	<i>52,957</i>	<i>80</i>	<i>15,937</i>	<i>68,974</i>	<i>36.9</i>
<i>Potentially Exploitable—</i>					
Softwood	58	..	100	158	0.1
Mixed wood	100	100	0.1
Hardwood	13,002	..	12,200	25,202	13.5
<i>Total</i>	<i>13,160</i>	<i>..</i>	<i>12,300</i>	<i>25,460</i>	<i>13.7</i>
<i>Other Lands Classed as Forest</i>	<i>81,023</i>	<i>450</i>	<i>10,884</i>	<i>92,357</i>	<i>49.4</i>
Grand Total ..	147,140	530	39,121	186,791	100.0

(a) Based on the 1955 classification of forests.

State forests accounted for 78.8 per cent. of the total forest area, private forests for 20.9 per cent. and communal forests for 0.3 per cent.

The bulk of the softwood area of approximately 13,325 square miles is in Queensland and New South Wales and consists principally of slow-growing cypress pine (*Callitris spp.*) in low rainfall areas. The total area has been increased in comparison with previous estimates by the inclusion of a large area of crown land carrying scattered cypress pine. The volume of this species per acre is comparatively low.

4. **Forest Reservations.**—The first attempt to determine the forest areas which should be reserved solely for purposes of timber production was made at an Interstate Forestry Conference held at Hobart in 1920. This Conference decided that an area of 24½ million acres of indigenous forest should be permanently reserved. According to statements furnished by State and Commonwealth authorities, reservations of forest areas in Australia at 30th June, 1955, totalled 32,322,042 acres of which 21,703,274 acres were Dedicated State Forests and 10,618,768 acres were Timber and Other Reserves. The area of Dedicated State Forests increased by 725,013 acres during the year 1954–55, although total area remained almost at the same level. The distribution of these areas is shown by States in § 4, para. 2 of this chapter.

In general, the Timber Reserves are temporary and are liable to be alienated after the timber on them has been exploited. Some of these areas contain land of high value for forestry purposes, but the greater part does not justify permanent reservation.

If the permanently reserved areas were all of good quality, accessible, and fully productive forests supplying the class of timber required, they could be regarded as adequate for a much larger population than exists in Australia at the present time. Actually, however, a considerable proportion is in inaccessible mountainous country and many of the forests contain a mixture of species only some of which are at present of commercial value; much

of it consists of inferior forest and a large proportion of the whole has been seriously degraded by recurrent fires. Also, the indigenous forest does not contain adequate supplies of softwoods producing commercial timbers and Australia's requirements of these have to be met largely by imports from other countries.

It is freely acknowledged by Australian forestry authorities that information on forest resources is very imperfect. It is not possible at present to give a reliable estimate of the forest areas needed to meet all future demands because of the number of unknown variables involved; in particular the yield capacity per acre, future consumption of different classes of timber per head, and the future population. It appears, however, that all available potentially good forest country, including adequate areas for plantations of conifers, will need to be reserved, protected and systematically managed, if Australia is to approach the goal of self sufficiency in timber supplies in the future. One of the most urgent requirements in this connexion is a comprehensive estimate of forest resources.

5. Plantations.—Reference has been made to the inadequacy of indigenous softwood supplies, but, as a result of the planned policy of the forest services of the States and the Commonwealth and, to a less extent, of several private commercial organizations, the area of softwood plantations, mainly of exotic species is steadily increasing. It was natural that this aspect of forestry received earliest attention in South Australia as it is the State most poorly endowed with natural forest. This State now has a larger area of planted softwoods than any other State in Australia, and for some years has been exploiting considerable quantities of timber from these plantations. The total production is now over 130,000,000 superficial feet per annum and is expected to be increased substantially during the next decade. Production is also increasing in the other States and first thinnings from their plantations are already supplying a significant portion of the requirements of the case-making industry.

The total net area of Commonwealth and State softwood plantations at 30th June, 1955, was 311,580 acres. In addition, the area of privately owned plantations was about 70,700 acres. Hardwood plantations (mainly *Eucalyptus spp.*) comprise a much smaller area and the total acreage is about 30,000 acres, nearly two-thirds of which is mallet (*Eucalyptus astringens*) which has been established in Western Australia for tan bark production.

6. Fire Protection.—Fire control measures in Australia are the responsibility of the individual State Governments, and the provision of adequate fire protection is one of the main problems facing forest authorities at the present day. The forest services are responsible for fire control measures over a total area of 23.6 million acres of dedicated and reserved forest areas throughout Australia.

The responsibility for the protection of private property outside urban areas rests with volunteer bush fire brigade organizations which are co-ordinated in each State by a committee or board carrying out functions of an advisory or educational nature and fostering the growth and organization of the bush fire brigade movement. Throughout the main agricultural and forest areas of Australia there are over 4,500 registered volunteer bush fire brigades with a membership approaching 200,000. Although both forest and rural fire organizations are entirely separate entities, a high degree of co-operation and liaison is maintained.

In addition to the forest service and rural organizations, various private and semi-Governmental bodies in each State maintain fire protection organizations, which are generally concerned with the protection of private forestry operations and hydro-electric and water catchment areas.

The annual cost of protecting from fire 23.6 million acres of dedicated and reserved forest over the three year period 1952 to 1954 was estimated at £1,150,000 or about 11.7d. per acre annually. The cost of rural fire control as a whole cannot be estimated with any degree of accuracy owing to the fact that by far the greatest contribution comes from the personal efforts of volunteer brigade members.

The Australian fire season is very variable, with an average of a particularly bad fire season every seven years or so. Such years as 1926, 1939, 1944 and 1952 account for a large proportion of the average annual burn which, for the period 1945 to 1955, amounted to 2.16 million acres or 1.8 per cent. of the total forested area of Australia. In disastrous fire seasons, such as 1938-39 and 1951-52, the acreage burnt on protected forest areas may rise to as high as 15 per cent., compared with an average burn of 1.2 per cent. when such seasons are excluded.

During the post-war decade, forest services greatly expanded their fire detection facilities and big advances were made in the use of power pumping equipment. Radio communication is now being used extensively by both forest services and rural organizations, and considerable progress has been made in the provision of legislative power for the rural bush fire movement, although the volunteer movement itself dates back to the turn of the century.

Recognizing that fire prevention is one of the most important aspects of the problem, intensive campaigns have been conducted to reduce the incidence of man-caused fires. A study of fire causes in recent years reveals that human agencies account for 95 per cent. of all fires, and of this figure at least 80 per cent. are preventable. Burning off, much of which is started illegally, accounts for 35 per cent. of all fires, smokers, hunters, fishermen and travellers cause 13 per cent. of all fires, whilst only 5 per cent. of fires in Australia are caused by lightning.

§ 2. Forestry Activities of the Commonwealth.

1. **Prior to 1925.**—When the Commonwealth of Australia was established on the 1st January, 1901, forestry was not included among the matters transferred from the States to the control of the Commonwealth, and Federal jurisdiction was therefore restricted to the then relatively unimportant forests of the Australian Territories. After the 1914–18 War, these Territories (including Papua-New Guinea and Norfolk Island) covered a large area, and in the aggregate contained substantial forest resources. In the early twenties of this century, a professional forester was appointed as forestry adviser to the Commonwealth Government, and he submitted preliminary reports on the forest resources of Papua-New Guinea, Norfolk Island and the Australian Capital Territory, with suggestions for future policy.

2. **Forestry and Timber Bureau.**—In 1925, the Commonwealth Forestry Bureau was instituted, and the Commonwealth Forestry Adviser became the Inspector-General of Forests. By an Act of 1930, the Bureau received statutory powers, and its functions included the advising of the various Territorial Administrations on forestry matters, the management of forests placed under its control, the establishment of experimental forest stations, the training of students in forestry, etc.

At the end of the 1939–45 War, the Commonwealth Government decided to continue certain advisory functions which during the War had been carried out by War-time Timber Control, and such functions were incorporated in the Forestry and Timber Bureau Act 1946, under which the title of the Bureau was altered to Forestry and Timber Bureau. The powers and functions of the Bureau were extended to embrace the collection of statistics and information, and advising the Governments of the Commonwealth and the States or other interested bodies on matters relating to the supply, production, oversea trade and distribution of timber in Australia. The Bureau was placed under the administration of a Director-General.

The activities of the Bureau under its statutory functions are summarized below:—

(a) *Forestry Education.* The Australian Forestry School was opened at Adelaide University in 1926 in continuation of the School of Forestry of that University established in 1911. In 1927, the School was transferred to Canberra. The purpose of the School is to train students as professional officers to manage the forests of Australia. It also accepts students from overseas.

Training at the School covers the third and fourth years of a four-year course. The first two years are spent at an Australian University in a study of prescribed science subjects. Courses at the School lead to Commonwealth Diplomas in Forestry and in Forest Technology, and in the case of the former, can lead further to a Degree in Forestry of an Australian University. Applicants possessing a University Degree granted for approved natural science subjects, or applicants with academic qualifications accepted by the Director-General as equivalent, may also be admitted to this School and proceed to the Diplomas. Graduates or Diploma holders approved by the Director-General may be admitted to the School to take selected subjects or to carry out research work.

The Board of Higher Forestry Education advises regarding pre-requisite University courses leading to the Diploma courses and in regard to the maintenance of the standard of the School Diploma course.

In addition to students nominated by State Governments and other Australian and oversea authorities and organizations, private students are accepted at the School, and the Commonwealth Government offers up to ten forestry scholarships each year. These scholarships provide a salary allowance for the four years of the full Diploma course.

During 1950, the number of students enrolled reached 80, owing to the intake of ex-servicemen taking University courses under the Commonwealth Reconstruction Training Scheme. The normal capacity of the School is 40.

(b) *Silvicultural Research.* Research head-quarters and a Central Experimental Station have been established at Canberra. Other Forest Experimental Stations have been established at Mount Burr in the south-east of South Australia, in Tasmania, and at Dwellingup in Western Australia, on a co-operative basis with the Forest Services of those States. It is proposed to establish similar co-operative Experimental Stations in other States and Territories.

With its present limited staff, the research work of the Bureau has been concentrated largely upon studies of forest and climatic conditions, the genetical relationships and silvicultural requirements of various species, forest nutrition and the improvement of forest yields. A considerable expansion in the research activities is planned for the next few years as suitable trained staff becomes available.

(c) *Forest Management Research.* In the national interest, it is essential that over-cutting of forests should be avoided and in consequence it is a matter of primary importance that reliable information be available as to the country's forest resources and potentialities. To this end, a national forest stocktaking is being carried out by the Bureau in co-operation with the Forest Services of the States and, to assist in the work of forest assessment, special consideration is being given to the development of the use of aerial surveys.

Consideration is also being given, in co-operation with the State Forest Services, to the establishment of increased areas of plantations of exotic pines with a view to providing additional supplies of softwood timber to meet requirements.

The general economics of forest management are also being studied.

(d) *Timber Supply.* The value of reliable statistical data covering availability of timber and timber requirements was so forcibly demonstrated during the 1939-45 War that it was considered essential to maintain at least a skeleton organization against times of future national emergency. Apart from this, it became clear that, for many years to come, shortages of timber on the one hand and heavy post-war reconstruction demands on the other, accentuated by a rapidly increasing population, would necessitate assessment of requirements and availability of supplies being kept constantly under review as a basis for short and long term policies of timber supply and distribution.

Advice is currently provided to Government Departments and the trade in matters pertaining to timber supply, including—(a) the availability of total quantities and quantities of particular grades and specifications required to meet Australia's needs; (b) the quantity of timber that should be imported; (c) the extent to which exports of timber and related products might be allowed without detriment to local needs; and (d) distribution of timber within Australia.

(e) *Management of Forests.* The Bureau manages the forests of the Australian Capital Territory and maintains a forestry officer in the Northern Territory. In addition, it is responsible for advising the administrations of the Northern Territory and the External Territories on the management of the forests under their charge.

3. **Commercial Forests.**—The forest areas under Commonwealth control include the following:—

- (a) *Australian Capital Territory.* The forests of the Australian Capital Territory are administered by a Division of the Forestry and Timber Bureau. Further information is contained in Chapter V.—The Territories of Australia.
- (b) *Northern Territory.* The forests of the Northern Territory are administered under ordinance by the Administrator of that Territory. The native forests of the Territory are very limited, consisting largely of open eucalypt forest in the North, with very restricted patches of rain forest along streams, river-fringing forests of paper bark tea-tree, patches of cypress pine, and elsewhere savannah woodland deteriorating to mallee and mulga in the interior. The Bureau maintains a forestry officer in the Territory for investigation and advisory purposes.
- (c) *Norfolk Island.* The forests of Norfolk Island are administered by the Administrator of that Territory. The area reserved for forest covers 1,037 acres, of which the main species is Norfolk Island pine.
- (d) *Papua and New Guinea.* The forests of the Territory of Papua and New Guinea are managed by a Forestry Department under the control of a Director, and are administered under an ordinance of the Territorial Administration. Forestry in the Territory commenced with the appointment of two officers in 1938. Further information is contained in Chapter V.—The Territories of Australia.

4. **Forest Products Research.**—Fundamental investigations connected with the properties and uses of timber and forest products generally are carried out by the Forest Products Division of the Commonwealth Scientific and Industrial Research Organization. These investigations cover a very wide field, e.g., pulp, paper, seasoning, structure and chemistry of wood, tans, etc.

Details can be obtained from the annual reports and publications of the Forest Products Division.

§ 3. Forest Conferences.

The first British Empire Forestry Conference was held in London in 1920. Subsequent conferences were held in Ottawa in 1923, Australia and New Zealand, 1928, South Africa, 1935 and again in the United Kingdom in 1947. In conformity with the development of the British Commonwealth of Nations, the name of these conferences was changed to British Commonwealth Forestry Conference. The sixth was held in Canada in 1952 and the seventh will be held in Australia and New Zealand during the latter half of 1957.

§ 4. State Forestry Departments.

1. **Functions.**—Except for Queensland, the powers and functions of State forest authorities are laid down under Forestry Acts and Regulations. In each State, there is a department or commission to control and manage the forests of the State. The functions of these administrations are as follows:—(a) The securing of an adequate reservation of forest lands; (b) the introduction of proper measures for scientific control and management of forest lands; (c) the protection of forests; (d) the conversion, marketing and economic utilization of forest produce; and (e) the establishment and maintenance of coniferous forests to remedy the existing deficiency in softwoods. Annual reports are issued by each State forest authority. In Queensland, forestry is a sub-department of the Department of Public Lands. Victoria maintains a forestry school at which recruits are trained for the forestry service of that State.

2. **Forest Reservations.**—As mentioned in § 1, para. 4 above, State forest authorities agreed that, in order to secure Australia's future requirements, an area of 24½ million acres should be permanently reserved. At June, 1955, the area of State forests reserved in perpetuity totalled 21,703,274 acres or 89 per cent. of the area recommended as the goal to be attained.

In addition to the work of permanently reserving areas in each State, foresters are endeavouring to survey all timbered lands with a view to the elimination of those unsuitable for forestry. Considerable areas have been revoked in certain States, while dedications of new areas have resulted in gains to the permanent forest estate. The Forestry Departments also usually control all timber on open Crown lands as well as over 10 million acres of Timber Reserves, National Parks, etc., but, while these areas contain some land of high value for forestry purposes, the greater part does not justify permanent reservation.

In the following table, details of forest areas as recorded by State Forest Authorities, distinguishing between Dedicated State Forests, Timber Reserves and Other Forest Reserves are shown for each State as at 30th June, 1955. In addition, details of forest reservations in Northern Territory and Australian Capital Territory are shown.

AREA OF FOREST RESERVATIONS, 30th JUNE, 1955.
(Acres.)

State or Territory.	State Forests.	Timber Reserves (Forest Act).	Other Reserves.	Total.
New South Wales	6,202,889	1,364,482	..	7,567,371
Victoria	4,772,204	716,633	(a) 175,155	5,663,992
Queensland	4,698,508	3,212,849	(b) 788,007	8,699,364
South Australia	261,627	261,627
Western Australia	3,834,207	1,831,870	(a) 952,449	6,618,526
Tasmania	1,926,939	137,028	957,295	3,021,262
Northern Territory	6,900	..	352,000	358,900
Australian Capital Territory	131,000	131,000
Australia	21,703,274	7,262,862	3,355,906	32,322,042

(a) Timber reserves under the Land Act.

(b) National Parks.

3. **Employment.**—In the table below, details are shown of the number of persons employed by State Forestry Departments, and by the Forestry and Timber Bureau in respect of the Australian Capital Territory and the Northern Territory, at 30th June, 1955.

PERSONS EMPLOYED BY FORESTRY DEPARTMENTS, AT 30th JUNE, 1955.

(a) Excludes the Australian Capital Territory and the Northern Territory, details for which are not available.

The next table shows the sawn output of native timber in sawmills and other wood-working establishments in each State for the years 1938-39 and 1950-51 to 1954-55.

SAWN OUTPUT (a) OF NATIVE TIMBER : ALL MILLS.
(*000 super feet.)

State.	1938-39.	1950-51.	1951-52.	1952-53.	1953-54.	1954-55.
New South Wales ..	179,350	338,347	380,633	350,792	370,279	372,920
Victoria ..	120,197	329,640	348,478	322,209	338,957	362,334
Queensland ..	193,250	252,378	291,681	285,074	288,380	264,914
South Australia ..	14,537	59,393	67,121	68,500	68,190	82,942
Western Australia ..	125,453	156,810	178,290	203,314	216,021	225,794
Tasmania ..	84,228	124,772	126,563	109,908	118,271	140,384
Australia (b) ..	717,015	1,261,340	1,392,766	1,339,797	1,400,098	1,449,288

(a) Includes the sawn equivalent of timber peeled or sliced for plywood and veneers. (b) Excludes the Australian Capital Territory and the Northern Territory, details for which are not available.

In addition to the sawn timber shown in the preceding table, a large amount of other timber, e.g., sleepers, piles, poles, fencing material, timber used in mining, and fuel, is obtained from forest and other lands. Complete information in regard to the volume of this output is, however, not available. The annual reports of the Forest Departments of the States contain particulars of the output of timber from areas under departmental control, but owing to lack of uniformity in classification and measurement, accurate determination of total production cannot be made. Moreover, there is a moderate quantity of other timber produced from privately owned land, but information regarding output is not available.

2. Wood Pulp and Paper.—(i) *Wood Pulp.* The manufacture of wood pulp from Australian-grown timber was established in Australia in 1939, after years of experimentation with eucalypt hardwoods, production in 1938-39 being 6,165 tons of wood pulp. At the end of 1956, four wood pulp mills were operating in three States and production during 1954-55 was 105,117 tons of chemical pulp and 68,360 tons of mechanical pulp, a total of 173,477 tons.

(a) *Victoria.* In Victoria, Australian Paper Manufacturers Ltd. produce wood pulp at Maryvale in Gippsland by a chemical process known as the kraft or sulphate process. The timber used at this mill consists mainly of eucalypt hardwoods at present unsuitable for other purposes and, in addition, a small quantity of plantation pine thinnings and mill waste and special softwood for production of cellulose. During 1955-56, the wood taken from Crown Lands for the production of pulpwood and cellulose amounted to 4,554,686 cubic feet of which 3,563,368 cubic feet were hardwood and 991,318 cubic feet were softwood. Pine plantations are being established in Gippsland by A.P.M. Forests Pty. Ltd. The initial aim is 20,000 acres to provide a perpetual yield of 20,000 tons of long-fibred pulp per annum. Planting commenced in 1951 and by the end of 1955 it was estimated that 14,000 acres had been planted.

(b) *South Australia.* In South Australia a pulp and paper board mill operates near Millicent. This mill generally uses the mechanical or groundwood method of producing wood pulp but during recent years has adopted a semi-chemical process for part of its production. During 1954-55 and 1955-56, 6,619,104 and 10,565,900 super. feet of pulp wood respectively were produced from forests in the south east of South Australia.

(c) *Tasmania.* In Tasmania two large mills are making pulpwood from indigenous hardwoods. At Burnie, on the north-west coast, Associated Pulp and Paper Mills Ltd. use a chemical method, the soda process, to produce wood pulp for fine writing and printing papers from eucalypt hardwoods. This plant is of the most modern design and pulp and paper manufacture are combined with sawmilling and hardboard production. Offcuts and rejects from the timber mill are used for pulping and the manufacture of hardboard. Utilization of the freehold and concession forest areas held by the company is being extended to logging areas held by other sawmilling firms, who supply logs unsuitable for milling to the pulp mills. A continuous digester has been installed at the Burnie mill, making it the only one in Australia using a continuous pulping process. The forests are managed on a permanent yield basis with regeneration of the eucalypts in all suitable areas. Pine plantations are being established to provide softwoods for pulping.

Australian Newsprint Mills Ltd. at Boyer, 20 miles from Hobart, is the only producer of newsprint in Australia. Wood pulp is produced by mechanical process from hardwoods drawn from State timber concession areas. Eucalypts provide about 80 per cent. of its requirements for wood pulp, the remainder being imported long fibre softwood pulp. To secure more complete bush utilization, the company has established three sawmills to convert understorey species such as myrtle, sassafras, blackwood and celery top pine to sawn timber. The forests are managed on a sustained yield basis. Forest utilization and management are designed to obtain eucalypt regeneration. Experimental work into the problems involved is being carried out by the company and the Tasmanian Forestry Commission.

(ii) *Paper and Paper Board.* Paper and paper board are manufactured in all States but the industry is centred mainly in New South Wales, Victoria and Tasmania. At the end of 1956, seventeen paper mills were operating, six in Victoria, five in New South Wales, three in Tasmania and one each in Queensland; South Australia and Western Australia. A new mill, Shoalhaven Paper Mills Pty. Ltd. commenced production in February, 1956, when the first of two mills to be installed began operating. The mill, situated near Nowra in New South Wales will be the first superfine paper mill to operate in Australia, and is expected to produce 8,000 tons of watermarked, rag-content and other fine writing, printing and industrial papers each year. A wide variety of papers and paper boards is produced in Australian mills, the quantity and value of paper produced in 1954-55 being as follows:—newsprint, 73,608 tons valued at £5,172,037; blotting, 721 tons, £109,588; duplicating, 2,931 tons, £456,763; printing and writing, 37,636 tons, £5,937,109; kraft wrapping, 40,629 tons, £5,376,947; other wrapping, 3,985 tons, £590,639; felt and carpet felt, 4,144 tons, £400,693; and other paper, 34,521 tons, £3,161,845. In addition, 141,444 tons of paper boards valued at £12,342,619 were produced in 1954-55.

3. *Other Forest Products.*—(i) *Veneers, Plywood, etc.* Cutting of timber for the manufacture of veneers, plywood, etc., has been carried out in most States for a number of years. Recently, however, this has been considerably extended, and much greater use has been made of locally-grown timbers, both hardwoods and softwoods. In recent years, special attention has been paid to the selection of logs suitable for peeling.

The following table shows the production of plywood for each of the years 1938-39 and 1950-51 to 1954-55:—

PLYWOOD PRODUCED.
(‘000 square feet $\frac{3}{16}$ in. basis.)

State.	1938-39.	1950-51.	1951-52.	1952-53.	1953-54.	1954-55.
New South Wales	24,194	32,287	31,784	22,557	28,601	35,039
Queensland ..	66,100	104,799	110,028	81,400	114,545	130,330
Other States ..	14,511	16,412	17,341	11,771	18,435	21,235
Australia ..	104,805	153,498	159,153	115,728	161,581	186,604

Of the total plywood produced in 1954-55, 156,843,000 square feet $\frac{3}{16}$ in. basis was classed as “Commercial”, 24,810,000 as “Waterproof” and 4,951,000 as “Case.”

During 1954-55, 485.3 million square feet ($\frac{1}{16}$ in. basis) of veneers were produced by the rotary process for the manufacture of plywood, and 124.7 million square feet ($\frac{1}{16}$ in. basis) were sold or added to stock, the bulk of which would eventually be used in the production of plywood. In addition, 32.2 million square feet of sliced veneers were produced.

(ii) *Hardboard.* The production in Australia from pulped wood, of hardboard for building purposes has increased considerably in recent years. There were three factories producing hardboard in 1955 (two in New South Wales and one in Tasmania) and during the three years ended 30th June, 1955, the following quantities and values were produced:—1952-53, 12,150,000 square yards, £2,472,000; 1953-54, 16,992,000 square yards, £3,284,000; and 1954-55, 19,834,000 square yards, £3,810,000. Preliminary figures for 1955-56 show a recorded total production of 22,616,000 square yards (value not yet available).

Most of this hardboard enters into normal usage in the condition in which it leaves the producing factories but a number of other factories further treat and surface it, mainly to a glossy "tiled" finish, and in 1954-55 this production accounted for 715,000 square yards valued at £392,000.

(iii) *Eucalyptus Oil*. Oil may be distilled from the foliage of all varieties of *Eucalyptus*, and several of them furnish a product widely known for its commercial and medicinal uses. Complete information regarding Australian production and consumption of eucalyptus oil is not available, but considerable quantities are manufactured, particularly in New South Wales and Victoria. The value of oversea exports of eucalyptus oil distilled in Australia was £445,206 in 1951-52; £215,283 in 1952-53; £163,763 in 1953-54; and £155,291 in 1954-55. The quantities exported in the years 1951-52 to 1954-55 were, 1,254,618 lb., 721,330 lb., 504,628 lb. and 451,741 lb. respectively.

(iv) *Gums and Resins*. Gums and resins are produced in most States of Australia, the main product being grass tree, or yacca gum. This gum, which is used in the preparation of varnishes and lacquers, comes chiefly from South Australia while small quantities are also produced in New South Wales and Western Australia. The recorded production of gums and resins in 1954-55 was 520 cwt. in New South Wales, 10,380 cwt. in South Australia and 2,515 cwt. in Tasmania, giving a total production of 13,415 cwt. in Australia. Exports of yacca gum from Australia during the same period amounted to 11,457 cwt. valued at £23,202.

(v) *Tanning Barks*. The forests of Australia are capable of yielding a wealth of tanning materials; many species of eucalyptus and other genera contain varying proportions of tannin, chiefly in the bark, but also in the wood and twigs. Scattered distribution however, has resulted in only the richest tan-bearing species being used in Australia. These are:—Golden wattle (*Acacia pycnantha*), black or green wattle (*Acacia decurrens* or *mollissima*), and mallet (*Eucalyptus astringens*). Mallet (*E. astringens*), of Western Australia, is not extensively used in Australian tanneries, but is exported to Europe and other countries. Reference to oversea trade in tanning barks is made in § 6, para. 3.

The production of extract from the bark of karri (*E. diversicolor*), of which very large quantities are available at karri sawmills, has passed the experimental stage, and private enterprise has started production on a commercial scale. The experimental work in kino impregnated marri (*E. calophylla*) bark is not yet complete. The total factory production of tanning bark in Australia approximated 25,000 tons per annum in the years prior to 1939, but since then production has declined and in 1954-55 was only 4,248 tons. However, this decrease is offset by the increased use of vegetable tanning extracts and synthetic tanning agents.

4. Value of Production.—(i) *Gross and Local Values, 1954-55*. The values of forestry production on a gross and local basis are shown in the following table for the year 1954-55.

GROSS AND LOCAL VALUE OF FORESTRY PRODUCTION, 1954-55.
(£'000.)

State.	Gross Production Valued at Principal Markets.	Marketing Costs.	Gross Production Valued at Place of Production.
New South Wales	14,166	480	13,686
Victoria	10,721	734	9,987
Queensland	8,717	822	7,895
South Australia	4,603	176	4,427
Western Australia	4,058	208	3,850
Tasmania	4,573	536	4,037
Australia(a)	47,016	2,969	44,047

(a) Includes details for the Northern Territory and the Australian Capital Territory.

No information is available on the value of materials used in the process of production or of depreciation and maintenance charges for 1954-55 and hence it is not possible to calculate net value of forestry production.

(ii) *Local Values, 1934-35 to 1938-39 and 1950-51 to 1954-55.* In the following table, the local value of forestry production and the local value per head of population are shown by States for the years 1950-51 to 1954-55 in comparison with the average for the five years ended 1938-39. Local value is gross value less marketing costs and is the value at place of production.

LOCAL VALUE OF FORESTRY PRODUCTION.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.(a)
LOCAL VALUE. (£'000.)							
Average, 1934-35 to 1938-39(b) ..	2,094	837	2,226	547	1,176	394	7,274
1950-51	8,966	6,437	5,029	2,656	2,908	2,432	28,428
1951-52	12,461	8,479	7,040	3,179	3,689	3,057	37,905
1952-53	13,692	8,904	7,102	3,790	3,328	3,248	40,064
1953-54	12,905	9,475	7,797	4,373	3,615	3,555	41,720
1954-55	13,686	9,987	7,895	4,427	3,850	4,037	44,047

LOCAL VALUE PER HEAD OF POPULATION. (£ s. d.)

Average, 1934-35 to 1938-39(b) ..	0 15 7	0 9 1	2 5 2	0 18 7	2 11 8	1 13 9	1 1 4
1950-51	2 15 5	2 17 5	4 3 4	3 13 7	5 2 0	8 11 7	3 8 10
1951-52	3 15 3	3 13 5	5 13 7	4 5 0	6 5 1	10 8 5	4 9 3
1952-53	4 1 4	3 15 1	5 11 8	4 18 11	5 8 11	10 14 8	4 12 2
1953-54	3 15 10	3 18 3	5 19 11	5 11 3	5 14 7	11 9 10	4 14 3
1954-55	3 19 1	4 0 3	5 19 2	5 9 8	5 18 8	12 17 11	4 16 11

(a) Details for the Australian Capital Territory and the Northern Territory are excluded for years prior to 1954-55. (b) Net value of production (i.e. local value less value of materials used in the course of production) has been included for certain years for Victoria and Western Australia.

5. *Employment.*—(i) *Forestry Operations.* The estimated number of persons employed in forestry operations at 30th June, 1954, including working proprietors, but excluding those employed in the sawmilling industry, as recorded at the 1954 Census, was 15,300.

(ii) *Milling Operations.* Details of the average number of persons employed, including working proprietors, in the milling operations of sawmills during the year 1954-55 are shown in the next table. Further details regarding the operations of these mills are shown in Chapter VII.—Manufacturing Industry.

SAWMILLS : AVERAGE NUMBER OF PERSONS EMPLOYED, 1954-55.

Sex.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Australia. (a)
Males	9,526	7,481	6,853	2,038	4,511	2,386	32,795

Other Foreign Countries	32	3,559	529	172	427	4,494	5,326
Total ..	4,145	34,098	264,151	28,951	2,049	33,548	14,032	13,830

(a) Excluding railway sleepers.

Most of the logs imported are hardwoods from Borneo, the value of all logs imported being £899,000 during 1954-55. In the same year, the value of undressed timber imported totalled £12,366,000, of which more than 90 per cent. was softwood. The principal undressed timber imported was oregon pine from North America. The balance was mainly hemlock also from North America, pines from New Zealand, Indonesia and the United States of America and hickory from the United States of America. The bulk of the imports of dressed timber now comes from Finland, Sweden, Norway and New Zealand and consists mainly of tongued and grooved timber, weatherboards, etc. The total value of dressed timber shown in the table above amounted to £2,254,000 during 1954-55. New Guinea was the largest supplier of both veneers and plywood, imports of which were valued at £184,000 and £335,000 respectively.

2. Exports of Timber, Railway Sleepers, Veneers and Plywood.—The quantities of timber, railway sleepers, veneers and plywood exported during the year 1954-55 are shown below, together with the countries of consignment.

 EXPORTS OF TIMBER, RAILWAY SLEEPERS, VENEERS AND PLYWOOD FROM
 AUSTRALIA : COUNTRIES OF CONSIGNMENT.

Country of Consignment.	Logs (including desapped). (‘000 super ft.)		Undressed timber. (‘000 super ft.)		Railway sleepers.	Dressed timber.	Veneers.	Ply-wood.

Total ..	136	3,326	1,156	20,795	6,953	900	3,085	671

Exports of timber were consigned mainly to New Zealand and the United Kingdom, and consisted largely of the Western Australian hardwoods, jarrah and karri, which have earned an excellent reputation for such purposes as harbour works and wood paving, etc. The total value of exports of undressed timber, excluding railway sleepers, during 1954-55 was £1,218,000 (hardwood £1,132,000, softwood £86,000). Railway sleepers exported were valued at £308,000.

3. **Classification of Imports and Exports.**—(i) *General.* The quantities and values of timber, according to items, imported and exported during the year 1954-55 are shown in the following table:—

TIMBER: IMPORTS AND EXPORTS, AUSTRALIA, 1954-55.

Item.	Imports.		Exports.	
	Quantity.	Value.	Quantity.	Value.
	'000 super. ft.	£A. f.o.b.	'000 super. ft.	£A. f.o.b.
Logs, not sawn—

Total	16,241,388	..	1,919,054

(a) Not recorded separately.

(b) Includes dunnage and timber for which quantity data no available.

(ii) *Tanning Substances.* The imports of tanning substances of natural origin in 1954-55 amounted to 199,096 cwt. valued at £648,769 (bark, 2,499 cwt., £5,163; extracts, 154,390 cwt., £592,414; and other tanning substances including valonia, myrabolans, cutch, etc., 42,207 cwt., £51,192) compared with 176,440 cwt. valued at £574,060 (bark, 2,634 cwt., £5,245; extracts, 127,556 cwt., £506,378; and other tanning substances 46,250 cwt., £62,437) in 1953-54. Exports during the same periods were 96,965 cwt. valued at £350,801 (extracts, 92,262 cwt., £335,438; and other tanning substances, 4,703 cwt., £15,363) and 163,764 cwt. valued at £549,718 (extracts, 121,497 cwt., £451,324; and other tanning substances, 42,267 cwt., £98,394) respectively.

The imports of tanning bark consist almost exclusively of wattle bark from the plantations in South Africa. One species of Australian wattle, *Acacia mollissima*, is chiefly relied upon for the production of wattle bark in the South African plantations, most of the seed being obtained from the best wattle bark areas in eastern Tasmania and western Victoria. Two reasons are given to account for the success of the industry in the Union of South Africa:—(a) The suitability of the treeless, grassy highlands of Natal; and (b) the availability of native labour.

CHAPTER XXVI.

FISHERIES.

§ 1. General.

1. **Fish Resources.**—The waters surrounding the Australian continent contain a great variety of marine fauna. Despite this, the fish stocks of Australia, in common with those of other countries of the Southern Hemisphere, with the exception of South Africa, are small by comparison with the stocks in the Northern Hemisphere. The reasons for this comparative shortage have not been fully explained but it seems clear that the basic factors generally involved are the absence of large expanses of shallow water and the much lower fertility of the oceans of the Southern Hemisphere.

The existence of greater fish stocks largely explains why approximately 98 per cent. of the world production of fish comes from the Northern Hemisphere. Nevertheless, the Australian catch is low even after making allowance for the smaller resources available. Further explanation must be sought in terms of the socio-economic factors which determine the demand for and supply of fish.

By comparison with the populations of other countries, notably those in the Northern Hemisphere, Australians are not large fish eaters. Consequently, there is not the pressure on resources so necessary to induce expansion in the fishing industry and to encourage the investment of large amounts of capital. On the other hand, even this somewhat restricted Australian demand for fish cannot be met from purely local sources of supply. The result is that quantities of fish are imported each year.

This apparent paradox is explained by the fact that the Australian fishing industry has consistently over-exploited some sources of supply and under-exploited others.

Thus, on the one hand, the fisheries in the estuaries of the Australian coasts (the so-called estuarine fisheries) and those offshore for fish that dwell on the bottom of the sea (the demersal fisheries) have frequently been overfished with a consequent diminution of stocks. On the other hand, those species of fish which dwell near the surface of the sea (the pelagic species) have barely been exploited at all.

It is anticipated that the greatest future development of the Australian fishing industry will take place in the pelagic fisheries. However, no great contribution to the supplies of fresh fish can be expected from this source since most of the pelagic species caught are canned or processed.

An increase in the supply of fresh fish available to the Australian consumer will therefore have to come largely from an expansion of the estuarine and demersal fisheries. In view of the over-exploitation of existing estuarine and demersal fisheries, such an expansion will require the development of new fishing areas.

While it is known that promising fishing grounds exist to the south and north of Australia, it appears that the trawling grounds of the Great Australian Bight are the most suitable for development. However, it is not considered that any great expansion of production can come from this source.

2. **Fishing Areas.**—The principal fishing areas at present are the coastal lakes, streams, estuaries and beaches, from Cairns in Queensland to Ceduna in South Australia, and from Esperance to Geraldton in Western Australia. For the most part, these fishing grounds are associated with the coastal streams. The demersal grounds fall into two classes—(a) the reefs from which cod, snapper, etc. are taken; and (b) the grounds from which flathead, morwong, etc., are taken. The reefs extend intermittently from northern Queensland around the southern part of the continent to Shark Bay in Western Australia. The flathead grounds lie on the continental shelf off south-east Australia, chiefly from Crowdy Head to south of Cape Everard and further off the east Tasmanian coast from Babel Island southwards to Storm Bay. As mentioned in the previous section, other demersal grounds exist in the Great Australian Bight but would require large modern trawlers for commercial exploitation. The demersal shark grounds lie principally in Bass Strait and on the continental shelf off eastern South Australia. Other grounds have been located off southern Western Australia.

The grounds of existing pelagic fisheries include that for the Spanish mackerel off the north-eastern coast from about Coff's Harbour to Cairns and that for barracouta in Bass Strait and off eastern Tasmania. Jack mackerel is found in the waters of eastern Tasmania,

the south-east coast of New South Wales, and Western Australia. Tuna is now being taken in commercial quantities on the New South Wales coast.

Of the crustaceans exploited in Australia, crayfish are the most important and are taken on reefs of the continental shelf in the waters of all southern States, the fishery extending (with a major interruption in the Bight) from Port Macquarie in New South Wales to Geraldton in Western Australia. Considerable development has taken place in the crayfish fisheries, particularly in South Australian and Western Australian waters, owing to the opening up of markets in the United States of America for frozen crayfish tails. Crabs of various species are found in practically all coastal waters. Prawns are taken in the temperate waters of Queensland and New South Wales.

In the mollusc group, edible oysters are found in the temperate waters of Queensland, New South Wales and Victoria. Some cropping of natural resources takes place in Queensland, but the principal cultivation grounds are found in New South Wales. Until 1956, scallops were taken commercially in Tasmanian waters only, but since then, they have been taken also in Queensland.

Pearlshell is fished from Cooktown in Northern Queensland, and from Thursday Island, round the north coast of Australia to Exmouth Gulf in Western Australia. Trochus shell is obtained from Mackay in Queensland round the north coast to King Sound in Western Australia.

Whales emigrating from Antarctic waters to their breeding grounds in the warmer waters of low latitudes pass up both the western and eastern coasts of Australia, returning to the Antarctic in the spring. Two whaling stations operate in Western Australia (Babbage Island near Carnarvon and Cheynes Beach near Albany), one in New South Wales (Byron Bay) and one in Queensland (Moreton Island). The company operating at Byron Bay (N.S.W.) also opened a station at Norfolk Island in 1956.

3. Fishing Boats and Equipment.—The fishing equipment includes almost every possible type of gear, and appropriate boats are employed. The on-shore equipment includes mesh-nets, trawl-nets, and traps of various types. The demersal reef-fishery is worked with traps, hand lines and long lines. The demersal flathead fishery is worked by both otter trawl (with Vigneron-Dahl gear) and Danish seine; in addition some hand-lining is carried out. The demersal shark fishery is worked by long lines. The pelagic mackerel fishery employs trolling gear with lures of various types, while the pelagic barracouta fishery employs principally barbless jigs. Tuna is taken by trolling and, more recently, by pole fishing with live bait.

The boats for the on-shore fisheries are almost invariably small vessels fitted with low-power petrol engines. The vessels working the reefs are larger (up to 50 feet) and have more power. The otter trawl vessels are steam trawlers, and the Danish seine vessels are 40 to 70 feet in length with diesel engines. The shark boats have diesel power and range from 35 to 50 feet in length.

4. Administration.—The fisheries within the three-mile limit are administered by State Departments while the Commonwealth Fisheries Office, a division of the Department of Primary Industry, administers fisheries in extra-territorial waters, co-ordinates fisheries administration and develops the extra-territorial fisheries of Australia.

The administration of the fisheries was discussed in greater detail in Official Year Book No. 41, p. 844, and in earlier issues.

§ 2. Development and Present Condition of the Fishery.

1. Fisheries Proper.—(i) *General.* The development of Australian fisheries has almost invariably followed the same sequence at each centre. The earliest fisheries were on-shore followed by demersal reef fishing using long lines. Trawling operations have followed line fishing in suitable areas and more recently again the exploitation of pelagic fisheries has commenced.

Until about 1900, the expansion of the industry consisted chiefly of the extension of on-shore and demersal fishing with long lines into areas previously unworked. Barracouta was fished in Tasmanian waters at least by 1880, if not earlier, although the main development of this fishery occurred towards the end of the 1939–45 War and in later years to meet demands for canned fish.

The first major development of the industry came with the institution of trawling operations off the New South Wales coast in 1918 by the New South Wales Government. The State enterprise failed, but the fishery was found very profitable by private enterprise. In 1936, the use of Danish seine vessels began and the fleet of these vessels rapidly expanded, and in 1946 (after the return of vessels requisitioned in war-time) a peak was reached when thirteen steam trawlers and 120 Danish seine vessels were licensed. The total catch of trawled fish in 1946-47 was 16,000,000 lb. Of the species taken by the trawl fishery, tiger flathead, morwong, and nannygai are the most important and of these flathead may be regarded as the prime fish and commands a higher price. Since 1947, the composition of the catch has changed, because of depletion of the flathead stocks, and the lower-priced fish have become a larger proportion of the catch. In 1955-56, four steam trawlers (all based at Sydney but fishing right down the coast to Bass Strait) and a considerably larger number of Danish seine vessels in New South Wales and Victoria were engaged in the trawl fishery.

In Queensland waters, since 1930, the Spanish mackerel has been taken by line fishermen, operating in off-shore waters out to the Barrier Reef between Gladstone and Cairns.

In 1930 also, fishing for snapper shark commenced in south-eastern waters, particularly off the Victorian and Tasmanian coasts. This fishery rapidly extended its area of operations, and in 1954-55 the catch of edible sharks was 7,800,000 lb. round weight. Great impetus was given to the fishery during the war years by the demand for livers for fish oil production for medicinal purposes. Demand eased with the return of cod-liver oil and availability of synthetic vitamin "A". The shark fishery is still important, however, as the flesh, which is sold as "flake", brings substantial prices, mainly in Melbourne.

As far as pelagic fisheries are concerned, pilchards occur in the southern waters of Australia from Port Stephens to the south-west of Western Australia and also as far north as Moreton Bay. Commercial catches have been made with lampara nets and to a lesser extent with purse seines. Anchovies are caught in Port Phillip Bay and also in Lakes Entrance and are used for processing. Sprats in Tasmanian waters are caught in payable quantities, though there is usually some difficulty in finding a market for them. Jack mackerel have been caught in commercial quantities off the east coast of Tasmania and off Eden in New South Wales.

The tuna fishery was established on the New South Wales coast during 1949, when fishermen, using improvised trolling gear, caught 1,000 tons of southern bluefin tuna. The catch was canned at Eden and Narooma and some was frozen raw and sold direct to Californian canneries. The American-owned tuna clipper *Semibua*, whose operations were subsidized by the Commonwealth, demonstrated that Australian tunas could be caught by pole fishing with live bait. In 1955, 40 tuna boats were operating on the south coast of New South Wales, but their catch was limited by the canneries to quantities which could be marketed in canned form in Australia and overseas as the price of raw tuna in California was reduced below the level necessary to make export profitable. In 1955, a new plant on the south coast of New South Wales began producing smoked and cooked tuna, giving further support to the tuna fishery.

Southern bluefin tuna occurs all along the southern coastline of the continent. In addition, albacore, yellowfin, striped (skipjack) and northern bluefin tuna occur, but the taking of these fish has not been developed.

(ii) *Production.* The statistics of production published in this chapter are in terms of "round" or "gross" weights. Round weights are calculated from recorded weights using conversion factors which allow for the fact that the weights of fish reported are frequently in a gutted, headed and gutted, or otherwise reduced condition. Publication on a round weight basis has been made possible in recent years largely as a result of the efforts of the Commonwealth Fisheries Office.

In interpreting Australian fisheries statistics, allowance should be made for the incomplete coverage. Returns are collected in most States from licensed professional fishermen only, and as a result the published totals fall short of total fish production to the extent of the catch by amateur fishermen, the commercial catch by persons not licensed as professional fishermen and unrecorded catch by professional fishermen.

Production by States for the years 1950-51 to 1954-55 is shown in the following table on a round weight basis.

RECORDED PRODUCTION OF FISH.

(EQUIVALENT ROUND WEIGHT.)

('000 lb.)

State.	1950-51.	1951-52.	1952-53.	1953-54.	1954-55.
New South Wales	26,333	28,331	32,660	32,332	26,441
Victoria (a)	12,044	13,285	13,069	13,820	13,833
Queensland	9,454	9,594	11,354	10,525	9,368
South Australia	6,874	7,856	8,102	8,317	8,154
Western Australia	8,652	7,344	9,225	10,913	9,393
Tasmania (a)	7,924	5,162	6,882	2,821	3,115
Northern Territory	56	62	87	100	118
Total	(b) 71,337	71,634	81,379	78,828	70,422

(a) Catch by Victorian fishermen in Tasmanian waters is included in Victoria from 1951-52 onwards.

(b) Incomplete, excludes catch by Victorian fishermen in Tasmanian waters.

In the following table, total Australian recorded production of fish by species is shown by States in terms of equivalent round weight for the year 1954-55. As an aid to identification, scientific names have been listed in addition to common names.

FISH—RECORDED PRODUCTION BY SPECIES, 1954-55.

Total	26,441	13,833	9,368	8,154	9,393	3,115	70,422

(a) Catch by Victorian fishermen in Tasmanian waters is included in Victoria.

500 lb.

(b) Less than

(c) Includes Northern Territory production—species details not available.

2. **Crustaceans and Molluscs.**—Crayfish are taken (in pots) in all States other than Queensland. Cray fisheries have developed greatly since the 1939–45 War to take advantage of the market in the United States of America for frozen crayfish tails, the total catch increasing from approximately 3 million lb. in 1945–46 to 20.2 million lb. in 1954–55.

Prawns are taken by otter trawl in the waters of New South Wales, Queensland and Western Australia. Prawns have been found in considerable quantity in the ocean waters of northern New South Wales and southern Queensland. An important development is anticipated with improvement of handling and distribution and opening up of oversea markets.

Initially the Australian oyster fisheries depended solely upon the harvesting of naturally grown stock in littoral and submarine areas. However, the stocks soon deteriorated and attention was turned to methods of cultivation. This is carried on mainly in New South Wales where there has been constant improvement in methods, and the present technique in certain areas is highly efficient. The production for Australia in 1954–55 was 10,454,000 lb. (in shell). Scallops are taken by dredge in the D'Entrecasteaux Channel in Tasmania and recently they have been taken by trawl in Hervey Bay, Queensland.

Details of production of crustaceans and molluscs are shown by States in the table below on a gross (in-shell) weight basis for the year 1954–55.

RECORDED PRODUCTION OF CRUSTACEANS AND MOLLUSCS, 1954-55.

(GROSS (IN-SHELL) WEIGHT.)

('000 lb.)

Item.	N.S.W.	Vic.(a)	Qld.	S. Aust.	W. Aust.	Tas.(a)	Aust.

<i>Total</i> ..	10,198	47	185	..	51	5,450	15,931

(a) Catch by Victorian fishermen in Tasmanian waters is included in Victoria.

3. **Pearl-shell and Trochus.**—The industry, which ceased operations on Japan's entry into the war in December, 1941, did not resume on a commercial basis at Queensland centres until late in 1945, and at Western Australian centres until 1946, while operations off the Northern Territory coast were not resumed until 1948.

Before the war, a large proportion of the key men were Japanese; the others included Malays, Chinese, Koepangers, Filipinos, Papuans and Torres Straits Islanders. On the resumption of operations without the Japanese, the labour available was, with few exceptions, inefficient. The expansion of the industry at Darwin has been retarded by the fact that the key men lack the local knowledge acquired by the Japanese. Western Australian centres also suffered from lack of skilled labour. In 1953, the Commonwealth permitted the employment at Broome, under certain conditions, of 35 Japanese divers, tenders and engine-drivers. Queensland, with a more ready source of labour from the Torres Strait Islands and mainland, was able to expand its fishing more rapidly, and in the 1949 season, achieved its second highest pearl-shell production on record.

In 1953, a Japanese fleet, which had been pearling in the Arafura Sea while a Japanese Mission in Canberra was discussing a fisheries agreement with the Australian Government, moved into an area in which they had been asked not to fish. Their action was regarded

as having broken off the negotiations, and proclamations were issued in September, 1953 declaring Australia's sovereign rights over the natural resources of the sea bed and sub-soil of the Continental Shelf adjoining Australia, its territories and the Trust Territory of New Guinea. In September, the Pearl Fisheries Act 1952-53, providing for licensing and control of pearling, was brought into operation.

Japan disputed Australia's right to apply this legislation to foreign ships, and Australia agreed to refer the dispute to the International Court of Justice on condition that meantime Japanese pearling in Australian waters would be conducted in conformity with the Australian Government's policy of regulation and conservation, and that Japan would abide by the Court's decision. On these conditions, a Japanese pearling fleet has operated in prescribed waters since 1954.

Australian production of pearl-shell and trochus-shell was 2,489,000 lb. and 2,784,000 lb. respectively in 1954-55. In addition, Japanese pearlers took 2,105,000 lb. of pearl-shell in Australian waters.

Reference to inquiries into the pearl-shell fishing industry by a Royal Commission in 1912, and by the Tariff Board in 1935, is made on p. 1031 of Official Year Book No. 37.

§ 3. Marketing and Distribution.

1. **Marketing.**—Most of the fish taken in Australian waters is sold in metropolitan markets. In Queensland, fish marketing is under the control of a Fish Board, which has representatives of producers, wholesalers and consumers, and a Government nominee as chairman. A central market is located in Brisbane and there are branch markets or depots at fourteen centres along the coast. The organization ensures that all fish is marketed through these channels, and the board has encouraged to a very marked extent the steadily increasing fish production of the State. The fish marketing methods in this State have proved successful. In New South Wales, the central market in Sydney is conducted by the Chief Secretary's Department, and the port depots in various centres along the coast by fishermen's co-operatives. These co-operatives distribute some of their fish to local centres and to inland country districts, and send the balance to the central market in Sydney. In Victoria, South Australia and Western Australia, fish is sold in central markets by agents. The greater part of the catch of fish in Tasmania is either processed in canneries in that State or exported to the mainland. There is some interstate export of fish from the northern rivers of New South Wales to Queensland, from Tasmania to New South Wales and Victoria, and from South Australia to Victoria.

2. **Consumption of Fish.**—Prior to the 1939-45 War, Australians consumed annually the fresh and canned equivalent of about 131 million lb. of round fish, or 19.0 lb. per person. About 70 million lb. were produced locally and the remainder was imported. Total consumption (including canned and cured) during 1954-55 is estimated at 94.2 million lb. edible weight (10.4 lb. per head) as compared with 87.8 million lb. edible weight (9.9 lb. per head) in the previous year. This is equivalent to approximately 186.5 million lb. fresh round weight (20.5 lb per head) and 174.4 million lb. fresh round weight (19.6 per head) respectively.

3. **Processing, including Canning.**—The equipment for handling fish was in the past rather inadequate, but in most States cold storage facilities have been improved and increased in recent years. In Queensland and New South Wales, particularly, the depots which have been established at fishing ports have been equipped with cold storage space. In several States, there has been a development of establishments equipped for snap freezing of fish, in particular the freezing of crayfish tails, prawns and scallops for export. A number of vessels have been equipped with freezing plants to process crayfish at sea.

In all States, there has been a development of facilities for light processing of fish.

Reference to the production of processed fish and number of factories operating will be found in § 5, para. 4, p. 967. Considerable expansion has taken place in the industry, particularly since 1945-46. In 1938-39, three factories processed 1,472,592 lb. of fish valued at £29,581, whereas in 1954-55 nine factories processed 10,585,052 lb., valued at £341,240.

4. **By-products.**—Processing of offal for fish-meals, etc., has been established in certain States. The processing of livers for vitamin-rich oils was undertaken in several States but as mentioned previously production has fallen to a low level in recent years.

§ 4. Inquiries and Research.

1. **General.**—The Australian fishing industry has been the subject of a number of official inquiries seeking an explanation of the very slow rate of development and the unfortunate conditions prevailing within the industry as well as the paucity of supplies available to the public. Details of the inquiries undertaken, the recommendations arising from them, and subsequent developments will be found in Official Year Book No. 38, p. 1082.

2. **Commonwealth Scientific and Industrial Research Organization, Division of Fisheries and Oceanography.**—Details of the establishment, organization and functions of the Division of Fisheries of the Commonwealth Scientific and Industrial Research Organization will be found in Official Year Book No. 38, p. 1083. The scientific basis on which the work of the Division is carried out has now been widened, and, to provide for this, the name of the Division has been amended to "Division of Fisheries and Oceanography".

Research carried out by the Division has assisted greatly in the development and preservation of Australian fisheries. Details may be found in Official Year Book No. 41, p. 848, and in previous issues.

3. **Commonwealth Fisheries Office.**—The Commonwealth Fisheries Office, a division of the Department of Primary Industry, arose out of a Tariff Board recommendation in 1941, following a public inquiry into the fishing industry, that a Commonwealth developmental authority should be established. Details of the establishment, organization and functions of the office will be found in Official Year Book No. 38, p. 1084.

In accordance with the Tariff Board report, scientific research, as distinct from developmental and administrative functions, was left to the Commonwealth Scientific and Industrial Research Organization which had established a Division of Fisheries for this purpose in 1937.

The Commonwealth is responsible for extra-territorial waters, whaling, pearling, rehabilitation of ex-servicemen in the fishing industry, fishery training schools, commercial development of fisheries, promotion of uniform conditions governing catches of various species of fish, statistics, information and publications.

4. **North Australia Development Committee.**—In 1946, the North Australia Development Committee recommended that a hydrological and oceanographical survey should be made of North Australian waters. It also suggested that a biological survey should be made of the pearl oyster with particular reference to the possibility of instituting pearl culture.

Further reference to these and other recommendations may be found in Official Year Book No. 41, p. 848.

The C.S.I.R.O. Division of Fisheries subsequently set up a biological research station on Thursday Island, mainly for the pearl and pearl-shell investigations. Since 1951, a research vessel has been based on Thursday Island and is used for diving, biological and hydrological work.

5. **Whaling.**—The Commonwealth Fisheries Office carried out extensive investigational and preparatory work for the establishment of an Australian whaling industry. In 1949, a privately-owned station began operating at Pt. Cloates, Western Australia. The same year the Australian Whaling Commission was established. The Commission built a station at Babbage Island, near Carnarvon, Western Australia, but it did not begin operating until almost the end of the 1950 season. In 1956, legislation was passed to dissolve the Commission, and its assets were sold to Nor' West Whaling Company. From the proceeds of the sale a Fisheries Development Trust Account was set up to foster the development of the Australian fishing industry. There is also a small station in Western Australia at Cheynes Beach near Albany. A large station began operating in 1952 at Moreton Island (Queensland), and in 1954 a small station began operating at Byron Bay (New South Wales). In 1956, the company operating the Byron Bay station established a station at Norfolk Island. In the same year, the station operating at Pt. Cloates (W.A.) closed down. In

1955, the five stations operating processed 1,840 whales, producing whale oil and other products valued at £1,953,000. A table showing statistics of whaling operations appears in § 5, para. 2, following.

The Director of Fisheries represents Australia on the International Whaling Commission, which controls whaling throughout the world.

§ 5. The Fishing and Whaling Industry—Statistics.

1. Fisheries.—(i) *Quantity and Gross Value of Take.* Recorded production for all fisheries is shown in the following table.

RECORDED FISHERIES PRODUCTION: QUANTITY AND GROSS VALUE OF TAKE, 1954-55.

Particulars.	Unit.	N.S.W.	Vic.(a)	Qld.	S.A.	W.A.	Tas.(a)	Aust.(b)

(a) Includes Crustacean and Scallop Fisheries. (b) Incomplete; details for Queensland are not available. (c) Also (in N.S.W.) 5,628 acres offshore in 1950-51; 5,749 in 1951-52; 5,888 in 1952-53; 6,296 in 1953-54; and 6,547 in 1954-55.

2. Whaling.—The information summarized in the table below was supplied by the Commonwealth Fisheries Office. Details relate to seasons extending from about May to October of each year.

WHALING STATISTICS, AUSTRALIA.

Particulars.	Unit.	1951.	1952.	1953.	1954.	1955.
Seasonal Quota(a)	No.	1,250	1,850	2,000	2,040	1,840
Whales Taken	"	1,224	1,787	2,001	(b) 2,039	1,840
Whales Processed	"	1,220	1,780	2,001	(b) 2,039	1,840
Average Length of Whales Processed	ft.	40.3	40.1	40.0	39.8	40.8
Average Oil Production per Whale Processed	Barrel c	45.9	51.3	51.2	49.1	51.8
Persons Employed—At Sea	No.	48	110	110	114	124
Persons Employed—Ashore	"	230	390	390	420	433
Whale Oil Produced—Quantity	Barrel c	56,051	91,360	102,354	100,068	95,258
Whale Products—Value	£'000	1,601	1,670	1,803	1,960	1,953

(a) In terms of humpback whales, as determined by the Minister for Primary Industry, acting on the advice of the Director of Fisheries. For quota purposes, 1 blue whale is taken as equivalent to 2 fin whales, 2½ humpback whales or 6 sei whales. (b) Includes one blue whale. (c) 6 barrels = 1 ton.

3. Value of Production.—(i) *Gross and Local Values, 1954–55.* Although statistics of the value of production of the fishing industry have been on an established basis for some years, attention is drawn to the fact that the actual collection of statistics of the quantity of fish taken presents many difficulties and consequently any defects which may occur in the collection must necessarily be reflected in the value of production. Particulars of the value of materials used in the process of production are not available for all States, so the values can only be stated at the point of production and not on a net basis as has been done with other industries. Variations in the relative proportions of marketing costs to gross production suggest that complete uniformity in method has not yet been attained.

GROSS AND LOCAL VALUE OF PRODUCTION: FISHING AND WHALING, 1954-55. (£'000.)

State.	Gross Production Valued at Principal Markets.	Marketing Costs.	Gross Production Valued at Place of Production.
New South Wales	3,268	529	2,739
Victoria	1,002	153	849
Queensland	1,436	161	1,275
South Australia	1,178	132	1,046
Western Australia	2,192	43	2,149
Tasmania	556	..	556
Northern Territory	113	..	113
Total	9,745	1,018	8,727

(ii) *Local Values, 1934–35 to 1938–39 (Average) and 1950–51 to 1954–55.* In the following table, the local value of fisheries production and the local value per head of population are shown by States for the average of years 1934–35 to 1938–39 and for each of the years 1950–51 to 1954–55. Local value is gross value less marketing costs and is the value at the place of production. Because the value of materials used in the course of production is not available for all States it is not possible to show a comparison of net values.

LOCAL VALUE OF FISHING AND WHALING PRODUCTION.

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Total.
LOCAL VALUE. (£'000.)

1954-55 ..	15 10	6 10	19 3	25 11	66 3	35 6	(a) 19 3

(a) Includes Northern Territory.

4. Fish Preserving.—The attempt to establish the fish preserving industry at the commencement of this century met with little success although a bounty was paid to encourage production. The industry, however, continued to operate, but there was no marked development until about 1945-46 when the production of canned fish amounted to 1,700,000 lb. After that year, production increased considerably and reached a peak of 10,900,000 lb. in 1948-49, but by 1950-51 it had declined to 7,300,000 lb. It increased again to 7,700,000 lb. in 1952-53, but declined again to 6,600,000 lb. in 1953-54 and was at approximately the same level in 1954-55.

In addition to the canning of fish, other fish products are produced. In 1954-55, these included 66,000 lb. of smoked fish, 1,055,000 lb. of fish paste and a considerable quantity of frozen crayfish tails for export.

In 1939, New South Wales and Tasmania were the only States canning fish, but the industry has since been extended to Victoria, South Australia and Western Australia. Details of production are given in the following table for the years 1938-39 and 1950-51 to 1954-55.

PRODUCTION OF CANNED FISH(a): AUSTRALIA.

Particulars.	1938-39.	1950-51.	1951-52.	1952-53.	1953-54.	1954-55.
Number of factories operating ..	3	18	17	13	11	9
Quantity produced .. lb.	603,302	7,279,033	7,294,622	7,705,081	6,604,587	6,645,552
Value .. £	13,700	723,689	965,100	1,020,307	838,179	834,090

(a) Including the canning of fish loaf and crustaceans.

The varieties canned in the several States differ according to the species caught, but separate details for each variety are not available. In New South Wales, Australian salmon and tuna are the principal varieties. Barracouta is of major importance in Victoria and Tasmania; and Australian salmon predominates in South Australia and Western Australia; herrings are also important in the latter State.

5. **State Revenue from Fisheries.**—The revenue from fisheries during the year 1954–55 was £62,416, compared with £66,420 in 1953–54 and £34,273 in 1938–39. Of the total of £62,416 in 1954–55, New South Wales collected £30,037, Victoria £4,031, Queensland £13,057, South Australia £4,779, Western Australia (year ended December, 1954) £5,596, Tasmania £4,843 and Northern Territory £73.

§ 6. Oversea Trade in Fishery Products.

NOTE.—Values of Australian oversea trade shown in this section are expressed in £A. f.o.b., port of shipment.

1. **Imports of Fish.**—The equivalent, in the round, of imported fish consumed in Australia in 1954–55 was 34 per cent. of the total consumption. Particulars of the imports of fish are shown below for the years 1950–51 to 1954–55 in comparison with 1938–39.

FISH (INCLUDING SHELL FISH): IMPORTS INTO AUSTRALIA. (Cwt.)

Classification.	1938–39.	1950–51.	1951–52.	1952–53.	1953–54.	1954–55.

'Other (including salted)	7,987	8,655	11,911	6,878	11,296	12,294

(a) Not recorded separately.

The value of fish and fish products imported during 1954–55 amounted to £5,571,000, compared with £4,104,000 in 1953–54.

Canned fish (total imports of which in 1954–55 were valued at £3,532,000) accounted for most of the imports; salmon from the U.S.S.R. and Japan, herrings from the United Kingdom and Norway and sardines from Norway were the chief varieties imported. A considerable proportion of the fresh fish imported in 1954–55 came from the United Kingdom, the Union of South Africa and New Zealand, and the potted fish came chiefly from the United Kingdom; the bulk of the remainder came from South Africa and the United Kingdom.

2. **Exports of Fish.**—During 1954–55, the exports of fish of Australian origin were as follows:—Fresh or frozen crayfish tails, 39,906 cwt., £1,673,110; other fish (including shell fish), fresh or preserved by cold process, 9,163 cwt., £92,562; oysters in shell, 475 cwt., £4,322; potted or concentrated, 21 cwt., £515; fish preserved in tins, 3,737 cwt., £77,666; shell fish in tins, 446 cwt., £15,114; smoked or dried, 99 cwt., £1,942.

3. **Exports of Pearl and other Shell.**—The exports of pearl, trochus and other shell of Australian origin are shown hereunder for the years 1938–39 and 1950–51 to 1954–55.

PEARL, TROCHUS AND OTHER SHELL: EXPORTS FROM AUSTRALIA.

CHAPTER XXVII.

MINERAL INDUSTRY.

§ 1. The Mineral Wealth of Australia.

1. **Place of Mining in Australian Development.**—Population was first attracted to Australia in large numbers by the discovery of gold in payable quantities. This discovery was thus a significant factor in Australia's early development. In more recent times, the rapid growth of Australia's secondary industries has been associated with considerable expansion in mining for silver-lead-zinc, copper and iron ores, and coal. The value of mineral production, however, has lagged behind that recorded for Australia's large rural industries and in 1954 represented only about 11 per cent. of the net value of production of all primary industries.

2. **Extent of Mineral Wealth.**—The extent of the mineral wealth of Australia, as of any country, is not determined fully at any point of time. Regional and detailed investigations are being carried out by the Commonwealth Bureau of Mineral Resources, Geology and Geophysics, by the Geological Surveys of the State Governments and by the exploration departments of mining companies, but large areas of the country still await geological survey. Important prospects of copper, iron, lead and zinc, oil, uranium ore, bauxite (aluminium ore) and some other minerals have been recorded recently and are being investigated in detail.

3. **Standardization of Mineral Statistics.**—At the 1945 Conference of Australian Statisticians, consideration was given to the defective nature of Australian mineral production statistics arising from the widely differing methods adopted by individual States in collecting, compiling and publishing the data. Further attention was given to the problem by a conference in 1948 of officers of the Bureau of Mineral Resources, Geology and Geophysics, State Mines Departments and State and Commonwealth Statistical Bureaux. Following work subsequently undertaken by the Bureau of Mineral Resources, the Commonwealth Bureau of Census and Statistics and other authorities concerned, a specific plan for standardization of Australian mineral production statistics was adopted in 1950. In accordance with the plan, numerous improvements have been introduced and with the introduction of annual Australia-wide industrial censuses for mining and quarrying.

in 1952, Australian mineral statistics are now considered to be adequate for present needs. It should be noted that the statistics included in this chapter omit particulars relating to uranium-bearing minerals.

The fundamental provision of the plan for standardization of Australian mineral statistics is that quantities and values of individual minerals produced should be reported in terms of the products in the form in which they are despatched from the locality of each mine. This involves the inclusion in the mining industry of ore-dressing and elementary smelting of metallic minerals (e.g., in the case of gold) and miscellaneous treatment of non-metallic minerals, where these operations are carried out in an associated plant at or near the mine. For example, in the case of a metal mine, the output is recorded as ore when no treatment is undertaken at the mine or as a concentrate where ore-dressing operations are carried out in associated works in the locality of the mine. In addition to the basic quantity data, the plan provides for the reporting of contents of metallic minerals and of contents or average grade of selected non-metallic minerals. Wherever practicable, contents (based on assay) of metallic minerals are shown for each metal which is a "pay-metal" or a "refiners' prize" when present in the particular mineral.

For the purpose of compiling and publishing data relating to employment, value of output, value of production, etc., a detailed statistical classification for the mining industry has been used in Australia from 1950. For the purpose of this classification, the "Mining Industry" includes all mining and quarrying and the recovery of minerals from ore dumps, tailings, etc. As mentioned above, ore dressing and miscellaneous treatment of non-metallic minerals (where these are carried out in an associated plant at or near the mine) are included in the Mining Industry. However, establishments primarily engaged in smelting and/or refining (including the smelting and refining sections of the large plants operated at Mt. Morgan and Mt. Isa in Queensland and at Mt. Lyell in Tasmania) are omitted and classified to the Manufacturing Industry. The classification divides the industry into four major groups, namely, Metal Mining, Fuel Mining, Non-metal (excluding Fuel) Mining and Construction Material Quarrying.

The adoption of revised methods of compiling and presenting mineral statistics in 1950 caused a break in continuity of the data published for earlier years, and the introduction of industrial censuses of the mining and quarrying industry in all States in 1952 has caused a further break in continuity of data, particularly those relating to values.

In the main, the data consist of official statistics of Mines Departments furnished to this Bureau by the Statisticians of the several States and by the Northern Territory Mines Branch. These statistics have been supplemented, as necessary, by data obtained from the Australian Mines and Metals Association (Inc.) the Bureau of Mineral Resources, Geology and Geophysics and several other sources. The particulars shown have been compiled as far as practicable on the standardized basis. This has involved some re-arrangement of official statistics published by Mines Departments for some States.

In the tables, individual minerals are arranged in four groups, Metallic Minerals, Fuel Minerals, Non-metallic (excluding Fuel) Minerals and Construction Materials, to correspond with the major groups of the statistical classification of the mining industry.

4. Quantity and Value of Minerals Produced in 1955.—(i) *Quantities.* In the following table particulars of the quantities of principal minerals produced are shown for each State and the Northern Territory for 1955.

QUANTITIES OF PRINCIPAL MINERALS PRODUCED, 1955.

Production of—						
Coal—Black	"	17,608,428	19,404,047	18,410,845	19,763,039	19,274,751
Brown	"	7,836,056	8,103,764	8,257,299	9,331,255	10,112,206
Sulphur(d)	"	183,126	217,242	225,197	254,403	267,183

(a) Mine production of metals. (b) Estimated. (c) In terms of WO₃. (d) Total sulphur content of zinc concentrate and pyrite produced and of spent oxide roasted.

6. Value of Output and Value of Production for Mining and Quarrying.—(i) *Individual Industries, 1954 and 1955.* The following two tables show particulars of the value of output and value of production of individual mining and quarrying industries and for all mining and quarrying for the years 1954 and 1955. The data were obtained from industrial censuses of the mining and quarrying industry which were made on a substantially uniform basis in all States and Territories.

(a) Value of output at mine, less cost of power, fuel, light and other materials and stores used; depreciation and maintenance costs have not been deducted. (b) Cost of materials used, etc., exceeds value of output. (c) Not available for publication. (d) Incomplete. (e) Not available for publication; included with "Construction Material Quarrying". (f) Not available for publication; included with "Other Metal Mining".

(ii) *States, 1939 and 1951 to 1955.* Values for individual minerals produced based on estimated selling value at the mine or quarry are shown for the year 1955 in para. 4 (iii) above. Australian State and Commonwealth Statisticians have for many years used values for mine and refinery products as recorded by Mines Departments and other relevant data (including censuses of the industry in some States) to estimate value of output and value of production for the mining and quarrying industry as a whole. The following table shows estimates on this basis for the years 1939 and 1951 together with the values ascertained from the Australia-wide mineral industry censuses of 1952, 1953, 1954 and 1955. The estimates shown for 1939 and 1951 are approximate, and as value added in ore-dressing and similar treatment plants situated at or near the mine was excluded in some cases, they are not strictly comparable with later valuations which consistently include the value of such mine treatment. Northern Territory figures are not available for years prior to 1952 nor are Australian Capital Territory figures for years prior to 1953.

MINING AND QUARRYING : VALUE OF OUTPUT AND VALUE OF PRODUCTION.

(a) Selling value of mine and quarry products at the mine or quarry. (b) Not available.
(c) Value of output less cost of power, fuel, light and other materials and stores used; depreciation and maintenance costs have not been deducted. (d) Value of output; value of production not available.

7. Industrial Census of the Mining and Quarrying Industry, 1954 and 1955.—Industrial censuses of the mining and quarrying industry (covering employment, salaries and wages paid, fixed assets, value of output, costs of materials used, etc.) have been taken in some Australian States for many years, but on different bases. Since 1952, censuses have been taken in all States and Territories on a substantially uniform basis, thus providing important Australian statistics on mining and quarrying operations which were not previously available. A summary of the statistics collected in 1954 and 1955 is shown in the following table.

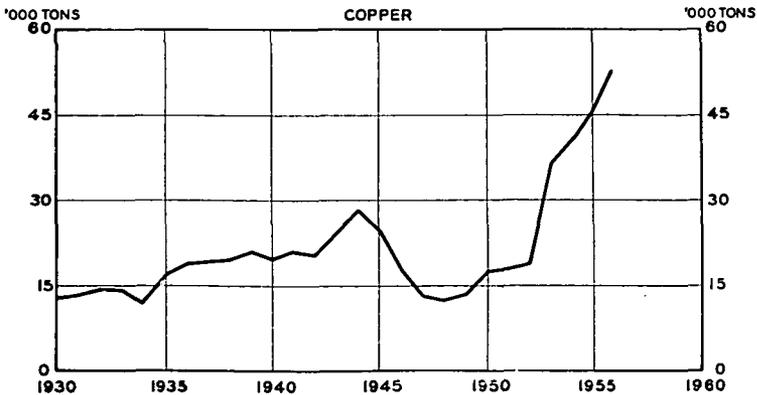

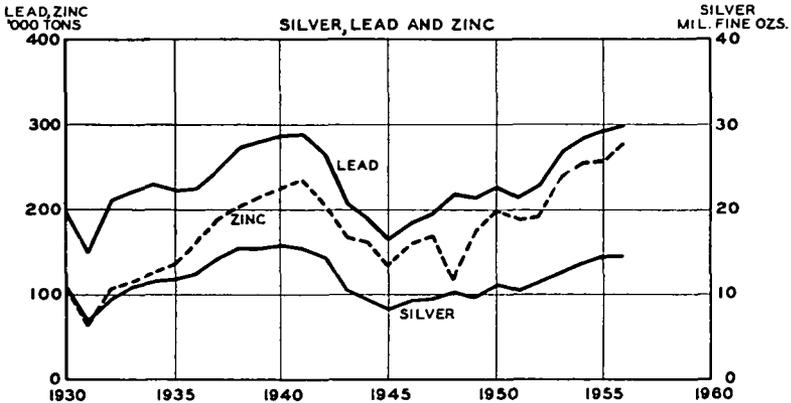

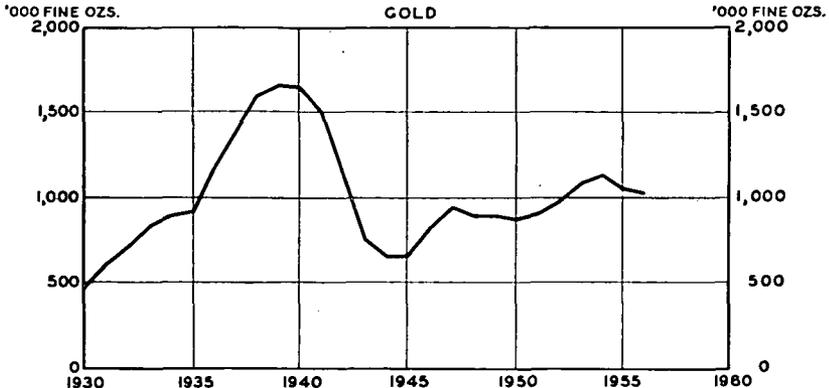

MINING AND QUARRYING : SUMMARY OF OPERATIONS, AUSTRALIA.

Particulars.	Unit.	Metal Mining.	Fuel Mining.	Non-metal (excluding Fuel) Mining. (a)	Total All Mining.	Construction Material Quarrying.(b)	Total All Mining and Quarrying.

§ 2. Gold.

1. **Discovery in Various States.**—A detailed account of the discovery of gold in the various States appears under this section in Official Year Books Nos. 1 to 4.

2. **Production.**—The following table shows the recorded mine production of gold (i.e., gold content of minerals produced) in the several States and in Australia as a whole during each of the ten decennial periods from 1851 to 1950, and in single years from 1951 to 1955. Owing to defective information in the earlier years it is likely that the recorded production falls considerably short of the actual totals.

GOLD : MINE PRODUCTION.(a)

('000 fine oz.)

Period.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	Aust.

(a) Gold content of minerals produced.

(b) Less than 500 fine oz.

The amount of gold won in Australia in any one year attained its maximum in 1903, when Western Australia also reached its highest point. For the other States, the years in which the greatest yields were obtained were as follows:—New South Wales, 1852; Victoria, 1856; Queensland, 1900; South Australia, 1904; and Tasmania, 1899. In recent years, output has expanded to record levels in the Northern Territory which is now the second largest producer in Australia.

Owing to the exhaustion of the more easily worked deposits and increased costs due to deep mining, the production of gold in Australia declined from 3,837,979 fine oz. in 1903 to 427,160 fine oz. in 1929, the lowest output since its discovery.

Increased activity in prospecting due to prevailing economic conditions resulted in some improvement in 1930, but the marked development between that year and 1939 was caused by the heavy depreciation of Australian currency in terms of gold. Following the outbreak of the 1939-45 War, there was a sharp fall in gold production to 656,867 fine oz. in 1944 and 657,213 fine oz. in 1945, but with the release of man-power after the war there has been a slight upward trend in mine production of gold, which, in 1953, exceeded 1,000,000 fine oz. for the first time since 1942. The devaluation of Australian currency in September, 1949 gave an impetus to gold production, but this was offset in the following years by increasing costs which brought about the closing of several large producers in New South Wales, Victoria and Western Australia. To enable the industry to meet the increase in costs, sales of gold on oversea premium markets at prices in excess of the official price were permitted from December, 1951. During 1952 and 1953, premium sales of gold brought an additional return to the industry amounting to about £1,800,000, but towards the end of 1953 the price of gold on oversea premium markets fell sharply and subsequent sales have been made at prices very little above the official price. This had an adverse effect on the financial position of the gold-mining industry and the Commonwealth Government passed the Gold-Mining Industry Assistance Act in 1954 to prevent any serious decline in gold-mining activity. The operation of this Act has since been extended from two years to five years. The production of gold in Australia increased from 1951 to 1954 but fell back in 1955 under the pressure of rising costs.

3. Sources of Production.—(i) *New South Wales.* Gold production in 1955 was 30,067 fine oz. The only gold producer of any significance was Wellington Alluvials Ltd., who operate a dredge on the Macquarie River, but other small quantities were won in conjunction with silver, lead and zinc at Broken Hill and at Captain's Flat, and by small prospecting parties throughout the State.

(ii) *Victoria.* The gold yield in Victoria further declined in 1955 to 38,035 fine oz., the lowest output since 1930. Only five producers—four quartz mines and one dredge—produced more than 1,000 fine oz. during the year, the largest of these being the Wattle Gully mine at Chewton in central Victoria.

(iii) *Queensland.* The output of 64,322 fine oz. during 1955 was considerably lower than the previous year owing to the lower output from Mt. Morgan, the main producer. The only other major producer is Golden Plateau N.L. at Cracow.

(iv) *South Australia.* Only 50 fine oz. of gold were won in 1955 by prospectors in central and northern parts of the State.

(v) *Western Australia.* Production of gold during 1955 was 834,326 fine oz. This was lower than production in 1954 and was due in some measure to the closing of the Big Bell mine early in 1955 and the Blue Spec mine later in the year. More than half the year's total production of gold in Western Australia came from the Coolgardie goldfields, most of the remaining production coming from the Murchison, Dundas, Yilgarn and Mt. Margaret goldfields. The Lake View and Star mine at Fimiston maintained its position as the largest gold producer in Australia, winning 166,318 fine ozs. during 1955, and ten other mines each produced over 20,000 fine ozs. in the same period.

(vi) *Tasmania.* Production of gold in Tasmania during 1955 was 16,882 fine oz. Almost all of this production was won as a by-product of lead-zinc mining at Rosebery and of copper mining at Mt. Lyell in western Tasmania. A small amount was also won in tin dredging operations in the north-eastern area of the State.

(vii) *Northern Territory.* Gold production in Northern Territory which has been steadily increasing in recent years, reached a record level of 65,357 fine oz. in 1955. Production is centred around Tennant Creek where the Nobles Nob mine is the main producer.

4. *Refinery Production.*—The quantities and values of the refinery production of new gold of Australian origin are shown in the following table for each of the years 1946 to 1955. The value of the refined new gold is based on the price fixed by the Commonwealth Bank, but allowance is made, from 1952 onwards, for premiums on sales of gold overseas and for industrial purposes in Australia.

GOLD : REFINERY PRODUCTION OF NEWLY WON GOLD OF AUSTRALIAN ORIGIN.

Year.			Quantity.	Value.	Year.			Quantity.	Value.
			'000. fine oz.	£'000.			'000. fine oz.	£'000.	
1946	820	8,830	1951	..	850	13,172	
1947	969	10,430	1952	..	979	16,037	
1948	884	9,517	1953	..	1,053	16,780	
1949	879	10,670	1954	..	1,063	16,589	
1950	844	13,077	1955	..	1,055	16,503	

The unit value of refinery production of newly won gold of Australian origin rose to £12 2s. 10d. in 1949 as a result of the increase in the price to £15 9s. 10d. per fine oz. fixed by the Commonwealth Bank on 19th September, 1949, consequent upon alteration in the rate of exchange. In 1950 and 1951, the unit values were the Bank's price of £15 9s. 10d. per fine oz., and since 1952 allowance has been made for premiums on gold sold for industrial purposes in Australia and on premium markets overseas, the average value per fine oz. being £16 7s. 7½d. in 1952; £15 18s. 9¼d. in 1953; £15 12s. 0d. in 1954; and £15 12s. 11¼d. in 1955. From 1st May, 1954, the official price of gold in Australia was raised to £15 12s. 6d. per fine oz. The previous gold price was based on the price for which gold could be sold abroad in official markets less costs of movement; the new price reflects the "parity" value of Australian currency established by the International Monetary Agreement Act 1947. Further information regarding the price of gold realized, including particulars of prices for newly won gold sold on overseas premium markets since December, 1951, is given in Chapter XX.—Private Finance.

5. *Changes in Stocks of Gold held in Australia.*—The following table shows particulars of production, imports and exports of gold and changes in stocks of gold held in Australia for each of the years 1951–52 to 1955–56.

CHANGES IN STOCKS OF GOLD HELD IN AUSTRALIA.

(Fine oz.)

Particulars.	1951-52.	1952-53.	1953-54.	1954-55.	1955-56.
Mine Production of Gold(a)	908,813	1,037,885	1,111,420	1,080,249	1,032,546
Imports of Gold(b)(c) ..	208,143	228,407	189,628	175,166	175,649

<i>Estimated World Total</i> ..	<i>23,700</i>	<i>24,300</i>	<i>24,200</i>	<i>25,700</i>	<i>26,900</i>

7. **Employment in Gold Mining.**—Particulars of the numbers of persons employed in gold mining are shown in § 13 (p. 1007).

8. **Assistance to Gold-mining Industry.**—In 1939, a tax was imposed on gold produced in Australia or any Australian Territory but this tax was suspended in 1947. Further relief was given to the gold-mining industry in 1952 and 1953 by permitting sales of gold on overseas premium markets, but with the disappearance of high premium prices overseas in late 1953, many producers were faced with the prospect of closing down. To meet this situation, the Gold-Mining Industry Assistance Act was assented to on 18th November, 1954. The

purpose of this Act was to assist the gold-mining industry by the payment of subsidy subject to certain conditions on the production and sales of gold during the two financial years 1954-55 and 1955-56. The subsidy payable to small producers whose annual output does not exceed 500 fine oz. of gold is a flat rate of £1 10s. 0d. per fine oz. For large producers, the formula for determining the amount of subsidy payable is :—

Three-quarters of the excess of average cost of production per fine oz. over £13 10s. 0d.

The maximum rate of subsidy which may be paid is £2 per fine oz. Where a producer receives an amount in excess of the official price of £15 12s. 6d. per fine oz. as a result of sales on overseas premium markets or otherwise, the subsidy payable shall be reduced by the amount of the excess. The subsidy will also be limited to the extent that the annual net profit of a producer will not, with the addition of the subsidy, exceed 10 per cent. of the capital investment in the company. A further condition of the Act is that the recovery rate of the mine shall be maintained at the level of the year previous to the Act. In 1956, the operation of the Act was extended for a further three years to 1958-59.

Payments under the Act commenced in March, 1955 and the amounts paid to gold producers in the various States and Territories of Australia during 1955 are shown in the following table.

NET SUBSIDY PAYMENTS TO GOLD PRODUCERS : 1955.

(£.)

New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Tasmania.	Northern Territory.	Papua and New Guinea.	Total.

§ 3. Silver, Lead and Zinc.

1. **Production.**—The following table shows for 1954 and 1955 the mine production (metallic content of ores and concentrates produced) of silver, lead and zinc in Australia, and the respective minerals in which these metals were contained.

SILVER, LEAD AND ZINC : CONTENT OF ORES AND CONCENTRATES PRODUCED.

Minera in which contained.	Silver (fine oz.).		Lead (tons).		Zinc (tons).	
	1954.	1955.	1954.	1955.	1954.	1955.
Copper Ore and Concentrate.	1,069,600	854,722	2,845	2,171
Gold Concentrate, etc. ..	245,691	211,332

Western Australia ..	237,639	200,748	1,497	1,007	74	..
Tasmania ..	1,321,385	1,166,307	11,533	11,267	30,324	27,948
Northern Territory ..	56	..	2
Australia ..	13,827,038	14,555,412	284,862	295,944	252,659	256,564

Particulars of the values ascribed to the various minerals containing silver, lead and zinc for the year 1955 are shown in the detailed table relating to mineral production on p. 972.

2. **Sources of Production.**—(i) *New South Wales.* By far the most silver-lead-zinc ore in Australia is won from the massive silver-lead-zinc sulphide deposit at Broken Hill. The companies concerned in operating this gigantic lode are North Broken Hill Ltd., which mines the northern limb of the ore-bearing structure, Broken Hill South Ltd., and Zinc Corporation Ltd. (with which is associated New Broken Hill Consolidated), which are conducting operations on the southern limb.

The present-day sulphide ores are concentrated by gravity and flotation methods at Broken Hill. The lead (galena) concentrates are railed to Port Pirie and smelted to produce lead bullion which is later refined by a continuous lead refining process for the elimination of arsenic and antimony and the recovery of silver and gold. About half of the zinc concentrate produced at Broken Hill is exported from Australia. Most of the remainder is treated at Risdon in Tasmania and a small proportion is roasted by fertilizer plants in South Australia for the recovery of sulphur dioxide for sulphuric acid manufacture.

At Captain's Flat, Lake George Mines Ltd. is operating a lode of similar constitution. Concentration of the ore is carried out at the mine itself, after which process, individual concentrates of zinc and lead (containing silver) are despatched to Port Kembla, New South Wales, for further treatment. Concentrates of copper, pyrite and gold are also produced at this mine.

Silver-lead-zinc ore has been mined in small quantities in various other parts of the State, the more important localities being Howell, Yerranderie and Kangiara. The Conrad Mine at Howell in northern New South Wales has been re-opened and production commenced again in May, 1955.

(ii) *Victoria.* Small quantities of lead sulphide ore occur on most of Victoria's gold-fields and in minor amounts in the Omeo, Bethanga and Cassilis districts. There has been no production of lead ore in recent years, the total recorded production being about 800 tons valued at £5,892.

The whole of the Victorian mine production of silver, 1,633 fine oz. in 1955, was won as a by-product of the gold mining industry.

(iii) *Queensland.* Silver produced in Queensland is obtained mainly as a by-product of ores of other metals such as lead-zinc and copper ores at Mt. Isa and copper-gold ore at Mt. Morgan. An exception is the ore at the Silver Phantom Mine in the Cloncurry district, which produced 32,269 oz. of silver from 12 tons of ore during 1955.

Nearly all the output of lead in Queensland is produced at Mt. Isa in the far north-west of the State, where mining is carried out on extensive silver-lead-zinc ore and copper ore bodies. After concentration by flotation in the concentrating mill, the silver-lead concentrate is converted to bullion in the smelter. All Mt. Isa lead bullion is exported overseas, where certain impurities, such as antimony, arsenic and copper, as well as silver, are removed to yield a pure lead suitable for commercial use.

Zinc concentrates produced by Mt. Isa are also exported overseas. During the 1939-45 War, operations on silver-lead-zinc ores at Mt. Isa were suspended while the mine was engaged in mining copper, but in 1946 copper mining ceased, and operations on silver-lead-zinc ores were resumed. Copper mining re-commenced at Mt. Isa with the opening there of a new copper smelting plant in 1953.

(iv) *South Australia.* Output of lead from local ores has been very small in recent years. In 1955, 7 tons of lead-silver ore were produced, containing 2 tons of lead and 142 fine oz. of silver. There has been no recorded zinc production since 1903.

(v) *Western Australia.* During recent years, lead-silver-zinc ore and lead concentrates have been produced in Western Australia. Main centres of production have been the Northampton area, the Ashburton area and the West Kimberley district.

The bulk of the mine production of silver in Western Australia is obtained as a by-product of the gold-mining industry.

(vi) *Tasmania.* There are two large centres of silver-lead-zinc mining in Tasmania, the more important being that operated by the Electrolytic Zinc Company of Australasia Ltd. at Read-Rosebery. This company also operates the electrolytic zinc reduction works at Risdon near Hobart. Although the product of this field is primarily zinc, lead and copper-lead concentrates are also produced.

The lead concentrates and copper-lead concentrates produced at Rosebery are exported overseas, while the zinc concentrates, containing some lead, are sent to Risdon for roasting and refining. The Risdon plant also treats considerable quantities of zinc concentrates from the Broken Hill mines.

Of secondary importance to Rosebery is the Mount Farrell field, situated 6 miles north-east of Rosebery. These ore-bodies are mainly silver-lead lodes which yield a lead concentrate with high silver content. The zinc content is insufficient to warrant recovery.

Most of the State's silver is contained in concentrates produced at Rosebery and Mount Farrell but some is obtained from the Mount Lyell copper refinery tank house slimes which are treated at Port Kembla in New South Wales.

(vii) *Northern Territory.* There was no production of lead-silver ore in the Northern Territory in 1955.

3. **Production and Sales of Refined Silver, Lead and Zinc.**—In the following table, details are given of the production and sales of refined primary silver, lead and zinc as recorded from data received from the Australian Mines and Metals Association and the Bureau of Mineral Resources. The figures shown for refined silver production include small quantities recovered from imported materials. The data relating to lead production for the year 1939 include small quantities recovered from scrap.

5. **Prices of Silver, Lead and Zinc.**—The following table shows average prices in Australia and on the London Metal Exchange during the years 1938 and 1951 to 1955. Lead and zinc prices were controlled in Australia and the United Kingdom after the outbreak of war in 1939, but were decontrolled in Australia on 21st April, 1953. Free trading in lead in the United Kingdom, after thirteen years of Government control, was resumed on 1st October, 1952, while the fixing by regulation of the price of zinc was abandoned from 1st January, 1953. Silver prices have not been controlled in Australia and the United Kingdom.

PRICES OF SILVER, LEAD AND ZINC.

Metals	1938.	1951.	1952.	1953.	1954.	1955.
Australian Prices, in Australian currency—

Zinc, per ton	(b) 14	(b) 172	(b) 150	75	78	91

(a) Silver prices have not been fixed by regulation in Australia, the prices shown represent export parity calculated from London Metal Exchange prices. (b) Prices fixed by regulation. (c) From February, 1940. (d) Price regulation was abandoned from 21st April, 1953; average market prices have been used thereafter. (e) Price regulation was abandoned from 1st October, 1952; average market prices have been used thereafter.

6. **Employment in Silver, Lead, and Zinc Mining.**—Particulars of the number of persons employed in mining for these metals are shown in § 13, p. 1007.

§ 4. Copper.

1. **Production.**—Copper is widely distributed throughout Australia. However, the principal producing States in 1955 were Queensland, Tasmania and New South Wales, in that order of magnitude. The opening of a new smelting plant at Mt. Isa in Queensland early in 1953 doubled the output of copper in Australia over the previous year, and production in 1955 was 45,496 tons. The table hereunder shows the quantity of mine production of copper (copper content of ores and concentrates produced) in Australia for the years 1951 to 1955. It should be noted that the minerals shown below contain, in addition to copper, certain other metals.

COPPER : CONTENT OF ORES AND CONCENTRATES PRODUCED, AUSTRALIA (Tons.)

Mineral in which Contained.	1951.	1952.	1953.	1954.	1955.
Copper Ore, Concentrate and Precipitate	15,739	16,125	33,007	37,041	41,674
Gold Ore, Concentrate, etc.	5	1	1	(a)	..
Lead Ore and Concentrate	1,874	2,163	3,037	3,241	3,224
Zinc Concentrate	308	289	540	575	598
Total	17,926	18,578	36,585	40,857	45,496

(a) Less than half a ton.

Particulars of the copper content of ores and concentrates produced in each producing State and the Northern Territory, as published by the Australian Mines and Metals Association for the year 1939, and as recorded by this Bureau from data obtained from the several State Mines Departments and other sources for the years 1951 to 1955, are shown in the table below.

COPPER : CONTENT OF ORES AND CONCENTRATES PRODUCED, STATES. (Tons.)

State.	1939.	1951.	1952.	1953.	1954.	1955.
New South Wales	1,155	3,679	3,562	3,626	3,182	3,492
Queensland	5,798	5,432	6,966	23,955	27,207	30,738
South Australia	110	(a)	2	1	(a)	..
Western Australia	1	7	7	15	..	3
Tasmania	13,453	8,657	7,722	8,902	9,880	8,394
Northern Territory	43	151	319	86	588	2,869
Australia	20,560	17,926	18,578	36,585	40,857	45,496

(a) Less than half a ton.

2. **Sources of Production.**—(i) *New South Wales.* The copper content of all ores and concentrates produced in New South Wales amounted to 3,492 tons in 1955. The only producer of copper concentrate in the State was the Lake George mine at Captain's Flat, but the major production of copper was as a by-product of lead and zinc mining at Broken Hill.

(ii) *Queensland.* In 1955, mine production of copper amounted to 30,738 tons. The main centre of production is the Cloncurry field in the north-western part of the State. Since the opening of the new copper smelter at Mt. Isa in February, 1953, copper production in Queensland has more than quadrupled and the Mt. Isa mine now produces about half of the present total Australian output. Lead bullion and zinc concentrate are also produced at Mt. Isa. The only other major copper producer is Mt. Morgan, just south of Rockhampton, where copper is produced in conjunction with gold.

(iii) *South Australia.* Deposits of copper were found in the past over a large portion of South Australia, but the principal fields have been exhausted and output in recent years has been negligible.

(iv) *Western Australia.* The ore sent to smelters in 1955 amounted to 12 tons, containing 3 tons of copper. Cupreous ore is mined in Western Australia for use in fertilizers as a trace-element and details of its production are given in § 12. Non-metallic Minerals (*see p. 1006*).

(v) *Tasmania.* The quantity of copper produced in Tasmania during 1955 was 8,394 tons, the Mount Lyell Mining and Railway Co. Ltd. providing the greater part thereof. The remainder consisted mainly of copper in copper-lead concentrates exported from Read-Rosebery.

(vi) *Northern Territory.* The greatest part of the output of 2,869 tons of copper in the Northern Territory during 1955, came from the Peko mine at Tennant Creek. Although originally worked as a gold mine, high-grade copper ore was discovered there, and since the new milling plant came into operation in June, 1954, the mine has become the major producer of copper in the Northern Territory. Copper concentrate is also produced at Rum Jungle by Territory Enterprises Pty. Ltd. but details are not available for publication and are not included in the Northern Territory total.

3. Production and Sales of Refined Copper.—There are two refining plants in Australia, one operated by the Electrolytic Refining and Smelting Co., Port Kembla, New South Wales, and the other by The Mount Lyell Mining and Railway Co. Ltd., Mount Lyell, Tasmania. The Port Kembla plant is a custom smelter and refinery and treats copper ore, concentrates and metal in all stages. It has an annual capacity of 27,000 tons of electrolytic copper, and fire-refinery which is a cheaper process, is done on a smaller scale when materials are amenable to that treatment. There is also a refinery for the recovery of precious metals from tank house slimes. At Mount Lyell, the electrolytic process of refining copper is employed, and apart from that sold in Tasmania, the cathode copper produced is shipped to Port Kembla for casting into merchant shapes. Construction of a new copper refinery commenced in October, 1956 near Townsville, Queensland. When it comes into operation it will treat the whole output of blister copper from Mount Isa, part of which is at present refined at Port Kembla, the balance being refined in the United States. In the following table, details are given of the production and sales of refined copper, as recorded from data received from the Australian Mines and Metals Association and the Bureau of Mineral Resources.

REFINED COPPER^(a) : PRODUCTION AND SALES, AUSTRALIA.

(a) Ex works Port Kembla. (b) Average market prices from 26th October, 1954. (c) Average market prices from 5th August, 1953.

6. **Employment in Copper Mining.**—Particulars of the numbers of persons engaged in the mining of copper and copper-gold ores are shown in § 13, p. 1007.

§ 5. Tin.

1. **Production.**—The following table shows the tin content of concentrates produced in each State and the Northern Territory for the year 1939 as published by the Australian Mines and Metals Association, and the years 1951 to 1955 as recorded by this Bureau.

**TIN: CONTENT OF TIN CONCENTRATES PRODUCED: STATES.
(Tons.)**

State.	1939.	1951.	1952.	1953.	1954.	1955.
New South Wales ..	775	413	396	342	272	270
Victoria	148	36	39	31	26	2
Queensland	867	340	330	292	730	770
Western Australia ..	7	41	65	76	80	119
Tasmania	1,250	706	772	788	947	853
Northern Territory ..	20	23	9	24	20	3
Australia	3,067	1,559	1,611	1,553	2,075	2,017

2. Sources of Production.—(i) *New South Wales.* Production of tin concentrates in 1955 was 378 tons, with a tin content of 270 tons, compared with 377 tons (tin content 272 tons) in 1954. A large proportion of the output in this State is obtained by dredging and sluicing, principally in the New England district.

(ii) *Victoria.* With the closing down of the Eldorado gold dredge in July, 1954, the production of tin in Victoria virtually ceased. Production in the State during 1955 amounted to 3 tons of concentrates, with a tin content of 2 tons, compared with 36 tons (tin content, 26 tons) in 1954.

(iii) *Queensland.* The chief districts in Queensland producing tin concentrates during 1955 were Herberton, 941 tons; Cooktown, 47 tons; Kangaroo Hills, 45 tons; Chillagoe, 19 tons; and Stanthorpe, 13 tons. The total production in 1955 amounted to 1,092 tons, compared with 1,034 tons in 1954. The tin content in 1955 and 1954 was 770 tons and 730 tons respectively. It is interesting to compare these production figures with those recorded in this State in the early years of this century when the output ranged between 2,000 and 5,000 tons per annum.

(iv) *Western Australia.* The quantity of tin concentrates reported in this State in 1955 amounted to 180 tons with a tin content of 119 tons, compared with 121 tons in 1954 (tin content, 80 tons). Production was mainly in the Pilbara and Greenbushes fields.

(v) *Tasmania.* For 1955, the output amounted to 1,232 tons of tin concentrates, a decrease of 142 tons on the output of the previous year. The tin content for 1955 was 853 tons and for 1954, 947 tons.

(vi) *Northern Territory.* The production for 1955 amounted to 5 tons of concentrates compared with 32 tons of concentrates produced during 1954. The tin content for 1955 and 1954 was 3 tons and 20 tons respectively.

3. Production of Refined Tin.—There are two firms engaged in the smelting of tin in Australia, both located in Sydney, New South Wales. The following table shows details of refined tin produced in Australia during the years 1939, and 1951 to 1955.

REFINED TIN PRODUCTION (a): AUSTRALIA.
(Tons.)

	1939.	1951.	1952.	1953.	1954.	1955.
Production of Refined Tin	3,294	1,459	1,700	1,443	2,063	2,004

(a) Source: Bureau of Mineral Resources.

4. Production in Principal Countries and World Total.—The production of tin reached its maximum in 1941 when 241,400 tons were recorded. The chief producing countries of the world are—Federation of Malaya, Bolivia, Indonesia, Belgian Congo, Thailand and Nigeria and in recent years these countries have produced approximately 90 per cent. of the total production. Australia's share of the world's tin production is about 1 per cent.

The production of tin ore, *in terms of metal*, as published by the International Tin Study Group and other authorities, for the principal producing countries in 1954 and 1955, was as follows.

TIN : PRODUCTION IN PRINCIPAL COUNTRIES.
(Long Tons.)

Country.	Production.		Country.	Production.	
	1954.	1955.		1954.	1955.
Malaya	60,690	61,244	Australia	2,075	2,017
Indonesia	35,861	33,368	Portugal	1,283	1,390
Bolivia	28,849	27,921	Union of South Africa	1,315	1,284
Belgian Congo	15,084	15,028	United Kingdom ..	920	1,034
Thailand	9,776	11,023			
Nigeria	7,926	8,158	<i>Estimated World</i>		
China	7,500	8,400	<i>Total(a)</i>	176,800	177,000

(a) Excludes U.S.S.R.

5. Prices.—At the outbreak of war in September, 1939, the price of tin in Australia and in London was fixed by regulation. London control of tin prices ceased on 14th November, 1949, while the Australian price was decontrolled on the 21st April, 1953. Details of the movement in average prices for the years shown are given in terms of Australian currency and sterling in the following table:—

AVERAGE PRICE PER TON OF TIN IN AUSTRALIA AND THE UNITED KINGDOM.
(£.)

Country.	December, 1939.	1951.	1952.	1953.	1954.	1955.
Australia—in Australian currency (a)	299	1,222	1,151	919	911	947
United Kingdom—in sterling (b) ..	(c) 271	1,080	965	731	720	741

(a) Prices fixed by regulation ex smelters for sales of 10 cwt. or more or in ingots of 70 lb. or more to 21st April, 1953; average market prices thereafter. (b) Average spot market prices for standard tin. (c) Price fixed by regulation for standard tin.

6. Employment in Tin Mining.—The number of persons employed in tin mining is shown in § 13 (p. 1007).

§ 6. Iron.

1. General.—Although iron ore is widely distributed throughout Australia, the only known ore bodies of large extent and high grade which are easily accessible are those situated at Iron Knob, South Australia and at Yampi Sound, Western Australia. Estimates of the high grade reserves at these centres place the quantities available at approximately 200 million tons and 100 million tons respectively. Bearing in mind the expansion of the iron industry in Australia, and the limitations of these reserves the Commonwealth Government prohibited the export of iron ore from 1st July, 1938.

2. Production.—(i) *Australia.* Production of iron ore for smelting purposes and estimated iron ore content are shown below for the years 1939 and 1951 to 1955:—

IRON ORE : PRODUCTION, AUSTRALIA.
(Tons.)

Particulars.	1939.	1951.	1952.	1953.	1954.	1955.
Production of Iron Ore ..	2,575,758	2,436,229	2,907,754	3,298,718	3,518,804	3,572,609
Estimated Iron Content ..	1,548,031	1,605,400	1,883,087	2,131,865	2,274,330	2,304,165

(ii) *New South Wales.* Since 1945, no iron ore has been mined in this State for conversion into pig-iron. For many years the chief source of supply for New South Wales blast furnaces has been South Australia.

Small quantities of iron oxide produced in New South Wales are used by the various gas-works for purifying gas, and also in the manufacture of paper, and for pigments. These supplies are drawn chiefly from the deposits in the Port Macquarie Division. During 1955, 3,405 tons of oxide were won. Of this total, 3,222 tons were used for gas purification and the remaining 183 tons were used for coal washing.

(iii) *Victoria.* Deposits of iron ore exist in the Nowa Nowa area of East Gippsland, but much larger quantities of ore than are at present known will have to be proved if the area is to become an economic source of iron ore. In 1955, approximately 2,000 tons of limonite (iron oxide) were produced at Buchan for gas purification purposes.

(iv) *Queensland.* Extensive deposits of iron ore are known to exist in Queensland. Their location and size, however, in comparison with the more favourable deposits of South Australia and Western Australia, preclude their exploitation. The output of 924 tons of iron oxide for 1955 came from the Townsville district.

(v) *South Australia.* The main production of iron ore in Australia is from the deposits worked by The Broken Hill Proprietary Co. Ltd. at Iron Knob in the Middleback Ranges near Whyalla. Production in 1955 reached a record level of 3,043,979 tons (estimated iron content, 1,978,586 tons).

(vi) *Western Australia.* Plans drawn up in 1927 to develop the rich iron ore deposits on Koolon and Cockatoo Islands in Yampi Sound were realized on 24th July, 1951, when regular shipments of ore for smelting at the steelworks at Newcastle and Port Kembla commenced from Yampi Sound. Iron ore is also obtained from deposits at Wundowie and Koolyanobbing. Production of iron ore during 1955 amounted to 496,882 tons at Yampi Sound and 31,748 tons at Koolyanobbing giving a total production of 528,630 tons with an estimated iron content of 325,579 tons. There was no production of iron ore at Wundowie during the year.

The whole iron pyrite production of Western Australia is won at the Iron King and Norseman mines and is railed, in the form of ores and concentrates, to superphosphate manufacturers in Perth.

(vii) *Tasmania.* There has been no production of ironstone in Tasmania since 1943 when 7 tons were produced. The iron pyrite concentrate produced, which in 1955 amounted to 45,010 tons (sulphur content, 22,023 tons), is a by-product from the flotation of copper ores at Mount Lyell. This product is exported to the mainland, where it is used in the manufacture of chemical fertilizers.

In 1955, 106 tons of iron oxide were produced for gas purification and 6,476 tons for fluxing and other purposes.

3. **Production of Iron and Steel.**—(i) *Australia.* The production of pig-iron and steel in Australia, of which New South Wales is the main producing State, is shown in the following table for each of the years ended 31st May, 1947 to 1956.

PIG-IRON AND STEEL : PRODUCTION, AUSTRALIA.
(Tons.)

Year Ended 31st May.	Pig-iron. (a)	Steel Ingots.	Year Ended 31st May.	Pig-iron. (a)	Steel Ingots.
1947	1,143,132	1,312,439	1952	1,430,027	1,521,386
1948	1,235,574	1,344,692	1953	1,691,693	1,801,028
1949	1,044,957	1,178,010	1954	1,826,711	2,116,813
1950	1,097,635	1,217,971	1955	1,868,841	2,208,708
1951	1,313,332	1,443,831	1956	1,909,839	2,338,621

(a) Includes pig-iron for castings; excludes ferro-alloys.

The principal producers in Australia, both in New South Wales, are the Broken Hill Proprietary Co. Ltd. at Newcastle and Port Kembla and Australian Iron and Steel Ltd. at Port Kembla. The expansion of the steelworks at Port Kembla was carried a step further in October, 1956 when two new open hearth steel furnaces, each of 275 tons capacity, were brought into operation. In January, 1957, the iron ore sintering plant was completed at a cost of nearly £5,000,000. This ore beneficiation plant has been installed to handle the fine friable iron ore from Yampi Sound in Western Australia and it has been erected in a position where it will be able to receive iron ore directly from ships berthed in the inner harbour now under construction at Port Kembla. Work on the new tin-plate mill is expected to be completed in mid-1957; initially it will produce 70,000 tons of tin-plate annually by the hot dip method, but the electrolytic method will be used later and its capacity increased to 150,000 tons a year. At Newcastle, construction of the new skelp mill is proceeding, and it is scheduled for completion by the end of 1957. This mill will produce high quality steel strip for processing into tubes and it will have a capacity of 400,000 tons annually. During 1956, plans were announced for the construction of an additional blast furnace at Port Kembla. When completed in 1959, its productive capacity of 600,000 tons of pig iron annually will at least equal the world's largest blast furnace. At the end of 1956, eight blast furnaces were operating in Australia; three at Newcastle and three at Port Kembla, in New South Wales, one at Whyalla, South Australia, and one at Wundowie, Western Australia. In 1956, the B.H.P. Central Research Organization commenced activities at Newcastle. It has been specially designed to investigate problems in coal and ore beneficiation, fuel technology, iron and steel making, fabrication and heat treatment of steel, and the chemistry and physics of materials used in modern industry.

At Whyalla in South Australia, in addition to the blast furnace production, The Broken Hill Proprietary Co. Ltd. produces a small quantity of steel ingots from an electric furnace.

In Western Australia, the State-owned Wundowie Wood Distillation, Charcoal Iron and Steel Industry produces pig iron using charcoal for smelting instead of the non-coking

local coal. This high grade iron is used for the manufacture of spheroidal graphite cast iron. The output of pig iron during the year 1954-55 amounted to 11,243 tons, and during 1955-56 to 12,028 tons. At Kwinana in Western Australia, the recently built merchant steel rolling mill commenced operations in July, 1956. Previously, production, mainly of steel fencing posts, had been on a limited scale. The annual output of this mill is to be 50,000 tons of steel sections.

(ii) *Principal Countries.* Particulars of the production in the principal countries and the estimated world total production during the years 1954 and 1955 according to figures published by the Mineral Resources Division of the Colonial Geological Surveys, are shown in the next table.

(a) Long tons.

§ 7. Other Metallic Minerals.

1. *Tungsten.*—Tungsten ores occur in all States. Particulars of scheelite concentrates from King Island, in Bass Strait, the major producer, are included in Tasmanian production. Other important deposits of tungsten ores occur in Queensland, New South Wales, the Tasmanian mainland and the Northern Territory, but production from Victoria, South Australia and Western Australia has been comparatively unimportant. In recent years the largest producer has been Tasmania. Production of tungsten concentrates and contents during 1955 in each State and Territory is shown below:—

TUNGSTEN CONCENTRATES : PRODUCTION, 1955.
(Tons.)

Particulars.	N.S.W.	Q'land.	W. Aust.	Tas.	N. Terr.	Australia.

WO ₃ Content	482	467	672	672	511	522

2. **Mineral Sands.**—The recovery of mineral sands from beaches in northern New South Wales and Queensland commenced in 1934. The industry was expanded considerably following the 1939–45 War and Australia is now one of the world's largest producers of the two principal minerals obtained from treatment of the sands, namely, rutile and zircon. Small quantities of ilmenite and monazite are also produced, but most producers either prepare a low-grade concentrate which is stockpiled or make no attempt to recover the ilmenite and monazite from the beach sands, the tailings being dumped after extraction of rutile and zircon. Late in 1956, operations commenced near Bunbury in Western Australia on beach dune deposits, and chromium-free ilmenite suitable for pigment manufacture is being produced. It is hoped later to recover the rutile, zircon and monazite content of the beach sands being treated. Particulars of the quantity of rutile and zircon concentrates produced are shown in the following table for the years 1951 to 1955.

RUTILE AND ZIRCON PRODUCTION, AUSTRALIA.
(Tons.)

Year.	Rutile Concentrates.		Zircon Concentrates.	
	Quantity.	TiO ₂ Content.	Quantity.	Zircon Content.
1951	35,189	33,432	42,410	41,420
1952	38,014	36,861	27,696	27,371
1953	38,039	37,067	27,207	26,858
1954	44,659	43,011	41,453	40,920
1955	59,613	57,232	48,673	48,209

3. **Cadmium and Cobalt.**—The sources of cadmium in Australia are lead and zinc concentrates. The cadmium content of these concentrates produced during 1954 was 903 tons and in 1955, 844 tons. Most of the concentrates are treated at Risdon, Tasmania, and at Port Pirie, South Australia, for the extraction of cadmium. The remainder are exported.

Cobalt is present in zinc concentrate produced at Broken Hill, New South Wales, and at Rosebery, Tasmania. The cobalt is recovered in the form of cobalt oxide at the zinc refining plant at Risdon, Tasmania, and is sold as such to industry. The cobalt metal content of zinc concentrate produced in 1954 was estimated at 69 tons and in 1955 at 61 tons.

Production of refined cadmium and cobalt oxide for the years 1939 and 1951 to 1955 is shown in the following table:—

CADMIUM (REFINED) AND COBALT OXIDE : PRODUCTION.(a)
(Tons.)

Year.	Cadmium (Refined).			Cobalt Oxide. Extracted from Ores Mined in New South Wales.(b)
	Extracted from Ores Mined in—			
	New South Wales.	Tasmania.	Total.	
1939	124	48	172	20
1951	195	36	231	13
1952	245	41	286	16
1953	257	40	297	17
1954	239	49	288	18
1955	261	40	301	18

(a) Source: Bureau of Mineral Resources.

(b) Excludes less than a ton of cobalt oxide produced from Tasmanian ores in each of the years shown.

The figures shown in the table above refer to production in Australia only and do not include the metallic contents of cadmium and cobalt oxide contained in the ores and concentrates exported overseas.

4. **Manganese.**—There has been considerable expansion of manganese ore production in recent years, due mainly to increased output in Western Australia at Ragged Hills, 250 miles south-east of Port Hedland, and at Horseshoe, north of Meekatharra. In 1955, the mining of manganese commenced near Muchetty in the Northern Territory and 1,462 tons of ore with a manganese dioxide content of 975 tons were produced during the year.

The following table shows the production of metallurgical grade and battery and other grades of manganese ore for the years 1939 and 1951 to 1955.

MANGANESE ORE PRODUCTION: AUSTRALIA.
(Tons.)

Year.	Metallurgical Grade.					Battery and Other Grades.
	New South Wales.	Queensland.	South Australia.	Western Australia.	Australia.	
1939	146	..	7	..	153	(a)
1951	1,054	5,257	6,311	(b) 1,658
1952	981	5,045	6,026	(c) 1,043

1954	749	138	..	26,448	27,335	(c) 867
1955	1,071	78	..	44,194	45,343	(d) 2,013

(a) Included with "Metallurgical Grade" 27 tons. (b) New South Wales, 1,631 tons; South Australia, 1,462 tons. (c) New South Wales only. (d) New South Wales, 551 tons; Northern Territory,

5. **Other.**—The production, in 1955 (1954 shown in parentheses) of other metallic minerals worthy of note, is as follows:—

Antimony. The antimony content of antimony-bearing minerals produced was 922 tons (731 tons). Of this amount, 615 tons (614 tons) were in lead concentrate and 307 tons (117 tons) in 650 tons (222 tons) of antimony ore and concentrate.

Bauxite. 7,563 tons (5,487 tons) of bauxite ore were produced mainly in New South Wales and Victoria. During 1956, the existence of extensive deposits of bauxite on the west coast of Cape York Peninsula, Queensland was announced. Bauxite has been found in an area about 150 miles north and south around Albatross Bay. In December, 1956, the Commonwealth Aluminium Corporation Pty. Ltd. was registered, and its authority to prospect embraces an area of about 2,500 square miles. Two separate areas, at Weipa and Pera Head, each containing 200,000,000 tons of commercial grade bauxite have already been proved. It is at present planned to produce annually 1,500,000 tons of bauxite yielding 500,000 tons of alumina which will be exported.

Beryllium. Production of beryl ore was 206 tons (149 tons) which came mainly from Western Australia where the Pilbara gold field was the main producing area. The beryllium oxide content of the beryl ore was 2,428 units (1,723 units).

Tantalite-Columbite. The production of tantalite-columbite concentrate was 27,139 lb. (117,767 lb.) and the whole of this output, excepting 1,048 lb. produced in the Northern Territory in 1954, came from Western Australia. The tantalum pentoxide and columbium pentoxide content of the concentrates was 15,454 lb. (60,348 lb.).

Other. Other metallic minerals produced in Australia in small quantities during 1955, were molybdenite concentrate, native osmiridium, and platinum concentrate.

§ 8. Coal.

1. **Total Production of Coal.**—An account of the discovery of coal in each State appears in earlier issues of the Official Year Book (see No. 3, pp. 515–16). The quantity and value of the production in each State in Australia for 1939, and for each of the years 1951 to 1955 are shown in the following table. Of the total production of black coal in 1955, 83,864 tons were classified as semi-anthracite, 17,608,498 tons as bituminous and 1,582,389 tons as sub-bituminous.

(a) At the mine.

The mining of black coal on a large scale by open-cut methods first began in Australia at Blair Athol in Queensland, where in 1937, the first year of production, 18,494 tons were produced. Open-cut mining of black coal was introduced in New South Wales in 1940, in Western Australia in 1943, in South Australia in 1944, and in Tasmania in 1950. The output from open-cuts rose slowly up to 1943 when 119,406 tons were produced, increasing rapidly from 1944 and reaching an output of over four million tons in 1952. Since then however, the output from open-cut mining has declined and in 1955 it was 2,315,568 tons only. This decline has been mainly due to the closing down of large open-cuts in New South Wales, as overproduction of coal began to occur late in 1952 and it is the policy of the Joint Coal Board that open-cut mining should provide the quantity of coal by which underground mine production fails to meet total requirements.

The production of black coal from underground and open-cut mines in each State for the years 1939 and 1951 to 1955 is shown in the following table.

BLACK COAL PRODUCTION : UNDERGROUND AND OPEN-CUT.
(*000 Tons.)

Year.	Method of Mining.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	Aust.

(a) Less than 500 tons.

2. **Production of Coal in Each State.**—(i) *New South Wales.* The coal deposits of New South Wales are the most important and extensively worked in Australia. The principal fields are known as the Northern, Southern and Western, and are situated in the vicinity of Newcastle, Bulli and Lithgow respectively.

The coal from the various districts differs in quality or, geologically speaking, rank—that from the Northern district being especially suitable for gas-making, household purposes and steam, while the product of the Southern and Western districts is essentially a steaming coal. The Permian Coal Measures in the Northern division are being worked extensively in the Hunter River Valley area, particularly in the vicinity of Maitland, Cessnock and, more recently, Muswellbrook. This district is the most important, from the aspect of coal mining, in Australia.

The following table shows particulars of New South Wales coal production classified according to rank and type of mining during the five years 1951 to 1955:—

COAL : PRODUCTION, NEW SOUTH WALES.
(Tons.)

Particulars.	1951.	1952.	1953.	1954.	1955.
Semi-anthracite ..	234	420	1,658
Bituminous ..	13,508,460	15,008,489	14,164,603	15,065,979	14,718,426
Sub-bituminous ..	4,550	13,191	9,228	17,281	16,313
<i>Total</i> ..	<i>13,513,244</i>	<i>15,022,100</i>	<i>14,173,831</i>	<i>15,083,260</i>	<i>14,736,397</i>
Underground mines ..	11,224,212	12,491,904	12,451,741	13,703,289	13,834,824
Open-cut mines ..	2,289,032	2,530,196	1,722,090	1,379,971	901,573

(ii) *Victoria.* (a) *Black Coal.* Production of black coal in Victoria is restricted to the Gippsland district. The State Coal Mine at Wonthaggi is the main producer, the remaining production coming from small privately-owned mines. In 1955, production of bituminous coal was 132,888 tons compared with 141,318 tons in 1954.

(b) *Brown Coal.* The mining of brown coal in Australia is carried on only in Victoria, where extensive deposits exist; estimates place the available reserves at 40,000 million tons. Large-scale developmental projects are in progress and these, when completed, will greatly reduce the dependence on fuel from other States. In the past ten years, the output of brown coal in Victoria has doubled, and in 1955 it exceeded ten million tons for the first time. Of the 10,112,206 tons of brown coal produced in 1955, 9,236,978 tons, or 93 per cent., were won at the State open-cuts at Yallourn.

The briquetting plant of the State Electricity Commission at Yallourn started operations in November, 1924, and the output, which in 1926 was 95,477 tons, had increased to 180,905 tons in 1930 and to 635,716 tons in 1955. Approximately two and a half tons of brown coal are required to make one ton of briquettes. In December, 1956, the Lurgi high pressure brown coal gasification plant at Morwell was opened. This plant is operated by the Gas and Fuel Corporation of Victoria and produces town gas which is sent to Melbourne through 103 miles of pipeline.

The table following shows the production and distribution of brown coal and the production of briquettes in Victoria for the years 1950-51 to 1954-55.

BROWN COAL : PRODUCTION AND UTILIZATION, VICTORIA.
(’000 Tons.)

Year.	Production.	Consumption as Fuel.			Consumption as Raw Material in Briquette Manufacture.	Balance (available for consumption and accumulation of stocks).	Briquettes Manufactured.
		Electricity Generation.	Briquette Factory.	Other Factories. (a)			
1950-51 ..	7,300	4,338	696	746	1,391	129	511
1951-52 ..	8,096	4,784	776	876	1,553	107	568
1952-53 ..	8,075	4,933	729	837	1,457	119	545
1953-54 ..	8,731	5,307	780	920	1,560	164	587
1954-55 ..	9,668	5,899	842	1,088	1,684	155	631

(a) Recorded consumption.

(iii) *Queensland.* The production of coal classified according to rank and type of mining during the years 1951 to 1955 was as follows:—

COAL : PRODUCTION IN QUEENSLAND.
(Tons.)

Particulars.	1951.	1952.	1953.	1954.	1955.
Semi-anthracite ..	80,722	83,373	80,979	72,459	80,442
Bituminous ..	2,137,994	2,312,167	2,215,078	2,377,883	2,459,727
Sub-bituminous ..	255,059	346,696	220,755	310,468	206,996
<i>Total</i> ..	<i>2,473,775</i>	<i>2,742,236</i>	<i>2,516,812</i>	<i>2,760,810</i>	<i>2,747,165</i>
Underground mines ..	1,856,842	2,006,321	1,941,631	2,066,788	2,108,065
Open-cut mines ..	616,933	735,915	575,181	694,022	639,100

The principal coal-producing districts in Queensland are Ipswich, Clermont, Mount Morgan and Bowen; output from these areas in 1955 amounted to 2,296,110 tons or 84 per cent. of the total.

The open-cut method of mining for black coal has advanced considerably in Queensland in recent years. In 1946, 106,444 tons (or 7 per cent. of total production) were won from open-cuts while in 1954, 694,022 tons (25 per cent.) were mined in this manner. In 1955, the output from open-cuts declined to 639,100 tons, or 23 per cent. of the total.

(iv) *South Australia.* Coal mined in South Australia is won by open-cut methods at Leigh Creek, some 380 miles by rail north of Adelaide. This important deposit yields a low grade sub-bituminous coal of Triassic age, and has known reserves of about 380 million tons. However, this State relies to a great degree on bituminous coal from New South Wales to supplement the demand created by industrial expansion. In the first year of major production of the Leigh Creek mine in 1944, 34,620 tons were won. Production has risen considerably in more recent years, and amounted to 455,287 tons in 1955.

(v) *Western Australia.* The only coal deposits which have been developed on a commercial scale are at Collie in the south-west of the State. Collie coal is sub-bituminous in rank. Production in 1955 was 903,793 tons, compared with 1,018,343 tons in 1954. Although a large proportion of the coal produced in Western Australia comes from open-cut mines, the amount available from these mines is limited, as present surveys estimate that only 8,000,000 tons can be extracted by open-cut methods. In 1955, 304,130 tons, or about one-third of the total production, were won by open-cut mining.

(vi) *Tasmania.* Two periods of coal formation are represented in Tasmania. The older (Permo-Carboniferous) seams contain fairly high ranking semi-anthracitic coal, with a high sulphur content, but production from these mines, 1,764 tons in 1955, represents less than one per cent. of Tasmanian black coal output. The more recent Mesozoic coal of bituminous rank is mined in the north-east of the island, the Cornwall and Mt. Nicholas mines being the most prolific producers. In 1955, output amounted to 299,221 tons of which 15,478 tons came from open-cut mining.

(vii) *Australia's Coal Reserves.* The latest available estimate of the actual and probable coal reserves of Australia is that prepared by the Coal and Lignites Panel of the Power Survey Sectional Committee of the Standards Association of Australia, and is shown in the following table.

COAL RESERVES OF AUSTRALIA.
(Million Tons.)

State.	Anthracitic and Bituminous Coal.	Sub-bituminous Coal.	Lignites and Brown Coal.
New South Wales ..	11,000	500	..
Victoria ..	12	..	40,000
Queensland ..	4,000	3	50
South Australia	380	225
Western Australia	1,000	2
Tasmania ..	240	..	2

3. **Production in Principal Countries.**—The following table shows the production of the principal countries in 1955 as published by the Mineral Resources Division of the Colonial Geological Surveys.

COAL : PRODUCTION IN PRINCIPAL COUNTRIES, 1955.
(⁰000 Tons.)(a).

Country.	Black Coal.		Brown Coal and Lignite.	
	1954.	1955.	1954.	1955.

Canada	11,426	11,175	1,890	2,048
Hungary	2,397	2,649	18,799	19,314
Yugoslavia	972	1,119	12,475	13,848
<i>Estimated World Total ..</i>	<i>1,462,600</i>	<i>1,584,000</i>	<i>478,400</i>	<i>518,000</i>

(a) Long tons.

4. **Exports.**—(i) *General.* The quantities and values of the oversea exports of Australian coal and of bunker coal for oversea vessels for the five years 1951–52 to 1955–56 are shown in the following table. These shipments were made mainly from New South Wales.

COAL : OVERSEA EXPORTS AND BUNKER, AUSTRALIA.

Year.	Oversea Exports (a)		Bunker-Coal for Oversea Vessels.	
	Quantity.	Value.	Quantity.	Value.
	Tons.	£	Tons.	£
1951–52	139,140	608,045	54,207	246,258
1952–53	255,832	1,178,466	42,623	215,776
1953–54	385,812	1,528,788	31,718	129,977
1954–55	291,226	1,147,441	25,363	111,625
1955–56	193,813	780,284	38,749	165,224

(a) Excludes bunker coal.

(ii) *New South Wales.* New South Wales is the principal Australian coal-producing State and in addition to meeting requirements within the State, supplies considerable quantities of coal to other States and for export overseas as well as bunker coal for vessels calling at New South Wales ports. Of the total New South Wales coal production in 1955–56 (14,630,702 tons), 12,048,715 tons (82 per cent.) were available for consumption in the State, 2,148,044 tons (15 per cent.) were exported interstate and 433,943 tons (3 per cent.) were exported overseas or supplied as bunker coal for interstate and oversea vessels.

5. **Consumption in Australia.**—Details of the production of black coal and its disposal in Australia are given in the following table for the years 1950–51 to 1954–55.

BLACK COAL : PRODUCTION AND DISPOSAL.
(^{'000} Tons.)

Particulars.	1950-51.	1951-52.	1952-53.	1953-54.	1954-55.
Production(a)	16,418	19,170	18,545	19,424	19,352
Imports	598	285	146	2	5
Total	17,016	19,455	18,691	19,426	19,357
Disposals—					
<i>Consumption as Fuel—</i>					
Electricity Generation ..	4,672	5,042	5,071	5,590	5,916
Factories	2,967	3,090	3,097	3,367	3,329
Railway Locomotives(b)..	3,183	3,291	3,110	3,208	3,112
Bunker Coal—					
Oversea Vessels ..	69	54	43	32	25
Interstate Vessels ..	225	227	229	228	218
Total	11,116	11,704	11,550	12,425	12,600
<i>Consumption as raw material—</i>					
Gas works	1,964	2,097	2,081	2,047	2,063
Coke works	2,618	2,835	3,071	3,252	3,314
Total	4,582	4,932	5,152	5,299	5,377
Exports (Oversea) ..	72	139	256	386	291
Balance—Unrecorded consumption, other purposes(c)	1,246	2,680	1,733	1,316	1,089
Grand Total	17,016	19,455	18,691	19,426	19,357

(a) Includes miners' and colliery coal. (b) Government railways only. (c) Includes net change in stocks.

After the 1939-45 War, it was found necessary to augment local supplies of black coal in Australia by increasing imports. The quantity imported reached a post-war peak of 597,866 tons in 1950-51, but since then has declined, as in recent years production has expanded considerably. Since 1952-53, exports have exceeded imports by a wide margin; in 1955-56, exports of black coal were 193,813 tons and imports were 4,117 tons.

6. Coal Value at the Mine in New South Wales.—Particulars of the average values at the mine (or at screens where these are at a distance from the mine) of saleable coal for each district and for New South Wales as a whole are shown in the following table for the years 1951 to 1955. Saleable coal is taken to exclude miners' coal, coal consumed at the mines and other producer-consumed coal. Stocks of coal held at grass by the Commonwealth Government are also excluded. No deduction has been made in respect of excise duty operative from 1st November, 1949.

**AVERAGE SELLING VALUE AT THE MINE PER TON OF SALEABLE COAL :
NEW SOUTH WALES.**

(s. d.)

Year.	Northern District.	Southern District.	Western District.	Average for State.
1951.. ..	51 5	50 8	42 10	49 8
1952.. ..	62 3	60 3	56 7	61 2
1953.. ..	62 1	61 0	56 9	61 1
1954.. ..	59 11	59 0	57 1	59 3
1955.. ..	59 3	58 10	55 3	58 7

7. Values in New South Wales, Great Britain and the United States of America.—The following table shows, for the years 1951 to 1955, average values of coal produced in New South Wales, Great Britain and the United States of America. The figures give an indication of changes in average value or price within each country but they do not necessarily show the relative levels as between the countries concerned.

PRODUCTION VALUES OF COAL PER TON : NEW SOUTH WALES, GREAT BRITAIN AND UNITED STATES OF AMERICA.

Country.	1951.	1952.	1953.	1954.	1955.
	<i>s. d.</i>				
New South Wales—Bituminous(a) ..	49 8	61 2	61 1	59 3	58 7
Great Britain—Deep mined(b)	51 2½	57 3	61 1½	63 6	68 0½
United States of America— Bituminous and lignite(c) ..	\$ 4.92	\$ 4.90	\$ 4.92	\$ 4.82	\$ (d)

(a) Average selling value at the mine per ton of 2,240 lb.; the figures relate to saleable coal and include excise duty from November, 1949. (b) Average value in sterling at the mine per ton of 2,240 lb. (c) Average value in United States currency at the mine per ton of 2,000 lb. (d) Not yet available.

8. **Employment in Coal-mines.**—The number of persons employed, both above and below ground, in coal-mines in each State for each of the years 1952 to 1955 is shown in the following table.

COAL-MINES : PERSONS EMPLOYED.

Year.	New South Wales.	Victoria.		Queensland.	South Australia.	Western Australia.	Tasmania.	Australia.
		Black.	Brown.					
1952	20,151	848	1,694	3,715	220	1,326	349	28,303
1953	19,961	900	1,598	3,673	250	1,478	344	28,204
1954	19,979	786	1,598	3,638	270	1,583	358	28,212
1955	19,260	687	1,502	3,618	280	1,432	367	27,146

The year of maximum employment was 1926 when 31,774 persons were engaged in the coal-mines of Australia. Shortly after that year, the industrial depression and a prolonged stoppage of work on one of the principal fields of New South Wales during 1929 and 1930 seriously affected the figures of employment. Since 1933 there has been a gradual increase, but the numbers employed in 1953 were only 86 per cent. of the maximum figure already quoted. In New South Wales in 1955, 8,787,538 tons of coal, or 60 per cent. of the total output of underground coal, were cut by machinery, compared with 3,594,000 tons or 32 per cent. in 1939. Similar details for other States are not available.

9. **Production of Black Coal per Man-shift.**—(i) *Underground Mines.* The following table shows particulars of estimated black coal output per man-shift worked (a) at the coal face and (b) by all employees in respect of underground mines for each State concerned and for Australia for the years 1951 to 1955. These estimates have been calculated by the Joint Coal Board from data collected fortnightly in respect of coal production and the number of man-shifts actually worked. In South Australia, black coal is won only by open-cut mining.

PRODUCTION OF BLACK COAL PER MAN-SHIFT : UNDERGROUND MINES.
(Tons.)

Year.	N.S.W.	Vic.	Q'land.	W. Aust.	Tas.	Australia.
PRODUCTION PER MAN-SHIFT WORKED AT COAL FACE.						
1951	10.82	2.43	6.40	8.22	6.01	9.39
1952	10.06	2.24	6.36	6.82	6.03	8.88
1953	9.72	2.09	6.37	4.86	6.15	8.49
1954	10.16	2.03	6.54	4.82	5.95	8.81
1955	10.76	2.13	6.61	4.74	6.54	9.24
PRODUCTION PER MAN-SHIFT WORKED BY ALL EMPLOYEES.						
1951	2.96	0.93	2.55	1.85	3.03	2.78
1952	3.00	0.83	2.55	1.64	3.01	2.81
1953	3.08	0.81	2.53	1.67	3.00	2.84
1954	3.25	0.82	2.61	1.92	3.07	3.00
1955	3.39	0.86	2.66	2.06	3.08	3.14

(a) In April, 1952, the definition of persons working "at coal face" was clarified resulting in a considerable increase in the number of persons assigned to this category in New South Wales.

(ii) *Open-cut Mines.* In the next table, the Joint Coal Board's estimates of production of black coal per man-shift worked by all employees in open-cut mines are shown for the years 1951 to 1955. There are no open-cuts producing black coal in Victoria.

PRODUCTION OF BLACK COAL PER MAN-SHIFT : OPEN-CUT MINES.(a)
(Tons.)

Year.	N.S.W.	Q'land.	S. Aust.	W. Aust.	Tas.	Australia.
1951	8.02	11.80	3.05	6.73	5.28	7.03
1952	7.92	11.78.	3.22.	6.13.	4.63	7.07
1953	8.51	10.97	3.57	5.37	..	6.92
1954	8.97	12.27	(a) 4.52	4.71	7.91	7.31
1955	9.18	11.42	6.02	5.77	7.78	8.11.

(a) Figures prior to July, 1954 include manshifts on other than mine work:

10. **Joint Coal Board.**—After the 1939–45 War, the Governments of the Commonwealth and New South Wales agreed to create jointly a coal authority with powers similar to and in some respects wider than those possessed under Commonwealth war-time legislation. Following this agreement, the Joint Coal Board was created and has functioned as from 1st March, 1947. Briefly, it is the responsibility of the Board to ensure that the coal of the State is conserved, developed, worked, distributed and used to the best advantage in the public interest, and to promote the welfare of the workers in the industry. Further details of the powers and functions of the Board are contained in earlier issues of the Official Year Book.

§ 9. Coke and Other By-products from Coal.

1. **Coke.**—The production of metallurgical coke in Australia was limited to about 250,000 tons per annum prior to the 1914–18 War. This was below local requirements and necessitated an annual import of about 27,000 tons. By 1920, production had risen to more than 500,000 tons, by 1938–39 to 1,164,873 tons, and in 1954–55 it reached the record level of 2,046,790 tons. Imports exceeded exports prior to 1952–53 but in 1952–53 and later years there has been a net export surplus. In 1954–55, exports amounted to 21,885 tons and 5,900 tons were imported, while in 1955–56 exports further increased to 66,590 tons (61,093 tons to New Caledonia) and imports amounted to 3,444 tons.

In addition to metallurgical coke referred to above (which is produced by specialized coke works), considerable quantities of coke are produced in gas works as a by-product of the manufacture of gas. Production in gas works in 1954–55 was 1,099,859 tons.

In order to avoid duplication with coal values, the figures for coke have not been included in the general tables of mineral production in the early part of this chapter.

In the following table, particulars of the production of coke in coke works and gas works in Australia are shown for the years 1950–51 to 1954–55. The figures exclude output of coke breeze, which in 1954–55 amounted to 331,602 tons.

COKE PRODUCTION : AUSTRALIA.

(Tons.)

Industry.	1950–51.	1951–52.	1952–53.	1953–54.	1954–55.
Coke Works	1,515,782	1,636,982	1,858,428	2,010,404	2,046,790
Gas Works	1,111,854	1,203,602	1,071,106	943,344	1,099,859
Total	2,627,636	2,840,584	2,929,534	2,953,748	3,146,649

2. **Other By-products from Coal.**—In addition to coke, other products are obtained from the treatment of coal by coke and gas works. Details of some of these are given in the following table for the years 1950–51 to 1954–55.

OTHER BY-PRODUCTS FROM COAL : AUSTRALIA.

Commodity.	1950–51.	1951–52.	1952–53.	1953–54.	1954–55:
Tar—Crude(a) '000 gals	41,239	42,886	44,408	46,517	46,609
Refined(a) "	12,449	12,514	15,699	17,725	17,120
Tar Oils (crude) "	3,960	4,101	3,674	3,799	4,631
Ammoniacal Liquor "	24,210	23,449	21,950	22,263	26,543
Ammonium Sulphate(a) tons	57,893	63,815	70,174	70,811	78,434

(a) Includes production in works other than coke and gas works.

§ 10 Mineral Oils.

1. **Australia.**—Natural oil has been proved to exist in Queensland and Victoria and also in Western Australia, where, in 1953, potential oil production was found at Rough Range. Many of the conditions favourable to the accumulation of oil in commercial quantities have been shown to be present in Queensland, Western Australia and New South Wales.

Reference is made in § 15 p. 1010, to the assistance afforded by the Commonwealth Government in the search for oil.

Structure control drilling has been carried out following the Rough Range discovery and field exploration increased enormously. The drilling of a number of wells has commenced at various places in all States of the Commonwealth except Tasmania and in the Northern Territory. Operations throughout the States and Territories of Australia during 1956 are briefly outlined below.

2. **New South Wales.**—Australian Oil & Gas Corporation Ltd. suspended the Kurralong well near Sydney and commenced drilling at Dural. Clarence River Basin Oil Exploration Co. N.L. completed operations on their Grafton well.

3. **Victoria.**—Woodside (Lakes Entrance) Oil Co. N.L. drilled 3 wells to 6,008 feet, 6,108 feet and 5,985 feet respectively. Evidence of oil was reported at several depths in these wells. A scout boring programme was initiated by Frome Lakes Pty. Ltd.

4. **Queensland.**—No drilling for oil was carried out in this State during the year.

5. **South Australia.**—Australian Oil & Gas Corporation Ltd. drilled near Loxton, South Australia and Murray Basin Oil Syndicate were drilling at Pinnaroo. Santos Ltd. have been engaged in an extensive shallow drilling campaign near Wilkatana, and have reported evidence of petroleum from a number of wells.

6. **Western Australia.**—West Australian Petroleum Pty. Ltd. drilled a number of structure holes in the Rough Range area in an attempt to solve the complicated geology of that area. Scout boring was also undertaken on the northerly plunge of the Rough Range structure and an extensive scout boring programme was carried out on Dirk Hartog Island. Cape Range 2 was completed as a dry hole at 15,170 feet and 2 further dry holes were drilled on this structure. Frazer River No. 1 was completed as a dry hole at 10,144 feet.

Associated Freney Oilfields N.L. abandoned their Myroodah No. 1 at 6,001 feet.

The Bureau of Mineral Resources, Geology and Geophysics undertook a scout boring programme in the Kimberley area of the Fitzroy Basin. Three bores were drilled for the purpose of obtaining geological information. West Australian Petroleum Pty. Ltd. also drilled one 4,000 foot bore for geological information at Roebuck Bay and a second was in progress at Dampier Downs at the end of the year.

7. **Northern Territory.**—A small flow of gas encountered at a shallow depth at Amaroo Station was found to contain hydrocarbons and geological surveys are now in progress.

8. **Papua.**—Australasian Petroleum Co. Pty. Ltd. and Island Exploration Co. Pty. Ltd. continued extensive geological and geophysical surveys over their permit areas in western Papua. Considerable trouble was experienced in Kuru No. 1 when high pressure gas was encountered at 998 feet, and a serious blow out occurred. A relief well had to be drilled before the blow-out was brought under control. Drilling was in progress at Kuru and Barikewa by Island Exploration Co. Pty. Ltd. and at Morehead by Australasian Petroleum Co. Pty. Ltd.

Papuan Apinaipi Petroleum Co. Ltd. and Enterprise of New Guinea Gold and Petroleum Development N.L. carried out geological surveys on their permits.

9. **General.**—During 1939, efforts were made to secure greater uniformity in State legislation governing the search for oil. A draft Bill based on modern legislation in other countries was prepared by the Commonwealth and submitted to the State Governments. As a result, amending legislation was passed in Victoria, Queensland, South Australia and Western Australia. In 1956, New South Wales also amended its petroleum legislation.

Further details of action taken by the Commonwealth Government in connexion with the search for oil will be found in § 15, Government Aid to Mining, and Mineral Control (p. 1010).

§ 11. Sulphur.

Sulphur, although produced in Australia as a content of certain metallic minerals, is itself non-metallic in character. Sulphides such as zinc concentrate and pyrite, which contain sulphur, are produced in appreciable quantities. There is no production of elemental sulphur (brimstone) in Australia. A large proportion of zinc concentrate produced is exported and therefore lost to Australia for utilization of the sulphur content.

The sulphur recovered in Australia is in the form of acid, most of which is used in the manufacture of fertilizers, mainly superphosphate. As this recovery does not at present satisfy local requirements, it is necessary to import elemental sulphur to meet the balance.

Production of pyrite concentrate at Nairne in South Australia commenced early in 1955. The output from this mine is supplied to the new sulphuric acid plant which was opened at Port Adelaide in August, 1955. This new plant has an annual capacity of 100,000 tons of sulphuric acid and will require 70,000 tons of pyrite concentrate from Nairne annually.

The following table shows for the years 1939 and 1951 to 1955 the sulphur content of sulphur-bearing minerals produced, quantities of sulphur recoverable therefrom, production of monohydrate acid (100 per cent. sulphuric acid), and sulphur content of monohydrate acid produced. Particulars regarding spent oxide roasted have been included to complete the statistics relating to recovery of sulphur and monohydrate acid production.

SULPHUR PRODUCTION : AUSTRALIA.
(Tons.)

Item.	1939.	1951.	1952.	1953.	1954.	1955.

(d) All imported..

§ 12. Non-metallic Minerals.

1. *Asbestos.*—The production of asbestos in Australia at present is only sufficient to meet about one-sixth of domestic requirements. Production of asbestos in Australia in recent years has been of two types, chrysotile and crocidolite, the former being the most important type economically, but the deposits of chrysotile are relatively small and widely scattered. The principal deposits of asbestos are of crocidolite, and they occur in the Hammersley Ranges in Western Australia, about 200 miles south-east of Roebourne. Large scale operations were commenced there in 1943 at Wittenoom Gorge by Australian-Blue Asbestos Ltd. and reserves in seams over which the Company holds leases are estimated at two million tons. However, high costs of production due to heavy freight charges and the difficulty of retaining labour in an isolated community have prevented greater development of the project.

The production of chrysotile and crocidolite in Australia during the five years 1951 to 1955 is shown in the following table:—

PRODUCTION OF ASBESTOS : STATES.
(Tons.)

Year.	Chrysotile.			Crocidolite.		
	New South Wales.	Western Australia.	Australia.	South Australia.	Western Australia.	Australia.
1951 ..	432	727	1,159	6	1,393	1,399
1952 ..	466	652	1,118	..	2,940	2,940
1953 ..	569	606	1,175	..	3,795	3,795
1954 ..	616	303	919	..	3,794	3,794
1955 ..	590	275	865	..	4,487	4,487

2. Clays.—Statistics of clay production in Australia are not entirely satisfactory, mainly because of differences between States in the classification of the various types of clays. In the following table, the recorded production of the main types of clays produced in each State of Australia is shown for the year 1955.

PRODUCTION OF CLAYS : STATES, 1955.
(Tons.)

Type.	New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Tasmania.	Total.
Bentonite ..					647		647
Brick Clay and Shale ..	1,589,262	(a)889,000	264,711	306,215	(a)434,000	(a) 73,000	3,556,188

Tile Clay ..	142,945	142,945
Other Clays ..	9,040	108,764	117,804

(a) Estimated.

3. Gypsum.—There are very extensive deposits of gypsum in Australia, but only the more accessible and easily worked deposits have been exploited. These deposits lie in four main regions, (a) in New South Wales stretching from around Griffith to near Broken Hill, (b) the north-west corner of Victoria, the south-west corner of New South Wales and adjoining parts of South Australia, (c) in South Australia on both sides of Gulf St. Vincent and extending to Lake MacDonnell in the west, and (d) between Perth and Kalgoorlie in Western Australia. The South Australian deposits are the most important and about two-thirds of the total Australian production of gypsum to 1954 came from this State, where the main centres of production are Stenhouse Bay on Yorke Peninsula and Lake MacDonnell.

The building industry is the main user of the gypsum produced in Australia, principally in the manufacture of plaster and the remainder in cement manufacture. A small amount is also used as fertilizer. A considerable quantity is exported, mainly to New Zealand for use in the plaster industry, and to New Caledonia for use in nickel smelting operations.

The production of gypsum in Australia is set out in the following table for the five years 1951 to 1955.

PRODUCTION OF GYPSUM : STATES.
(Tons.)

Year.	New South Wales.	Victoria.	South Australia.	Western Australia.	Australia.
1951	104,697	41,126	147,701	70,823	364,347
1952	89,226	47,295	164,825	50,332	351,678
1953	71,819	36,286	181,640	40,247	329,992
1954	128,790	75,012	194,772	41,142	439,716
1955	136,356	89,190	204,522	39,946	470,014

4. Limestone.—Limestone is quarried in all States, but statistics of production are incomplete, none being collected in Western Australia, while in Queensland figures do not include limestone quarried for cement manufacture. Limestone is used mainly for the manufacture of cement, other uses being in the steel industry as a metallurgical flux, in the chemical industry, and in agriculture.

The recorded statistics of limestone production in each State of Australia during 1955 are shown in the following table:—

PRODUCTION OF LIMESTONE(a) : STATES, 1955.
(Tons.)

New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Tasmania.	Northern Territory.	Total.
1,689,630	714,228	120,962	986,701	(b)280,000	206,138	37	3,997,696

(a) Includes shell and coral.

(b) Estimated.

5. **Magnesite.**—The major sources of magnesite at present are deposits at Fifield and Thuddungra in central New South Wales. Most of the output of magnesite in Australia is used for refractory purposes, particularly in the steel industry, and small amounts are used in chemical, paper, glass, rubber, and ceramic industries. Particulars of the production of magnesite in each State for the years 1951 to 1955, are set out in the table below.

PRODUCTION OF MAGNESITE : STATES.
(Tons.)

Year.	New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Australia.
1951	35,963	398	13	998	762	38,134.
1952	40,333	164	13	572	1,055	42,137
1953	45,769	572	..	36	20	46,397
1954	42,825	235	92	43,152
1955	57,262	412	..	57,674

6. **Mica.**—Almost all Australian production of muscovite mica has come from the Northern Territory, though small quantities of inferior grades have been obtained from most of the States. The centre of mica production in the Northern Territory is the Harts Range area about 130 miles north-east of Alice Springs, where mining has been carried on intermittently since 1892, and the Plenty River field, 50 miles north-east of Harts Range.

The Commonwealth Mica Pool—details of which are given in § 15, Government Aid to Mining, on p. 1012—purchases all mica which is in accordance with certain specifications. The following table shows the quantity of muscovite mica produced in Australia during the five years 1951 to 1955.

MUSCOVITE MICA PRODUCTION.
(lbs.)

Particulars.	1951.	1952.	1953.	1954.	1955.			
New South Wales—								
Scrap	15,680	20,160			
Northern Territory—								
Trimmed	48,034	} 71,929	{ 70,684	84,619	56,649			
Crude and Film	2,634					} 1,542
Scrap	82,880							

7. **Salt.**—Salt is obtained in Australia from evaporation of saline lakes and clay pans. Production satisfies local requirements and provides a considerable surplus for export. Recorded production in South Australia (the chief producing State) is shown in the following table for the years 1951 to 1955. Available estimates of total Australian production are also shown.

SALT PRODUCTION.
(’000 Tons.)

South Australia	219	203	239	304	291
Estimated Australian Total ..	300	277	310	380	370

8. **Other Non-metallic Minerals.**—(i) *General.* Many other non-metallic minerals are produced in Australia in considerable quantities, and are listed separately in the following paragraphs.

(ii) *Barite.* The principal producing centre of barite is at Orparinna in the north Flinders Range in South Australia where the deposits are of first-grade quality. The production of barite in Australia during 1955 was 6,264 tons, of which 4,168 tons came from South Australia, 2,086 tons from New South Wales, and 10 tons from Western Australia.

(iii) *Cupreous Ore and Concentrate.* Cupreous ore is mined in Western Australia for mixing with superphosphate fertilizer. The quantity produced in 1955 was 7,731 tons with an average grade of 8.65 per cent.

(iv) *Diatomite.* Production of diatomite is carried on mainly in the eastern States of Australia. In 1955, 5,042 tons were produced in Australia, and of this total, New South Wales produced 3,629 tons.

(v) *Dolomite*. Up to 1950, New South Wales was the main producer of dolomite, but in that year the Broken Hill Pty. Co. Ltd. opened up a large deposit of dolomite at Ardrossan in South Australia which now produces about 90 per cent. of the total output. In 1955, New South Wales produced 6,354 tons; Queensland, 5,318 tons; South Australia, 97,398 tons; Western Australia, 81 tons; and Tasmania, 2,266 tons, making an Australian total of 111,417 tons.

(vi) *Felspar*. The main demand for felspar comes from the glass and ceramic industries. About half the Australian production of felspar comes from New South Wales which produced 11,608 tons of the Australian total of 20,833 tons in 1955. Of the remainder, 5,660 tons came from South Australia and 3,565 tons from Western Australia.

(vii) *Gemstones*. (a) *Diamonds*. Gem quality diamonds are not produced in Australia, but 731 carats of industrial diamonds valued at £7,081 were recovered during gold dredging operations on the Macquarie River in New South Wales.

(b) *Opals*. Most of the opals won in recent years came from the Coober Pedy and Andamooka fields in South Australia which produced opals worth £71,200 in 1955. Other production in 1955 was from the Quilpie district in Queensland valued at £1,350, and £1,000 from Lightning Ridge in New South Wales.

(c) *Sapphires*. The Anakie field in Central Queensland is the only Australian producer of sapphires. Output in 1955 was valued at £3,412.

(viii) *Silica*. The production of silica is not recorded in Victoria and Queensland. The output of silica, which includes glass sand, quartz, quartzite, sand, sandstone, and silicious abrasives, was 103,682 tons in New South Wales; 23,443 tons in South Australia; 6,759 tons in Western Australia; and 5,657 tons in Tasmania, giving a total of 139,541 tons for those States during 1955.

(ix) *Sillimanite*. In 1955, 2,679 tons of sillimanite were produced in Australia. New South Wales contributed 1,987 tons and the remaining 692 tons came from South Australia.

(x) *Talc*. The Australian output of talc (including steatite), was 12,567 tons in 1954. New South Wales produced 817 tons, South Australia 9,163 tons and Western Australia 2,587 tons.

(xi) *Other*. Other non-metallic minerals produced in Australia in small quantities during 1955 were corundum, emery, fluorite, garnet, graphite, glauconite, mineral pigments, pebbles for grinding, phosphate rock, pyrophyllite, serpentine, slate and spodumene.

§ 13. Persons Engaged, Wages Paid and Accidents in Mining.

1. **Total Employment in Mining.**—The number of persons engaged in the mining industry in Australia fluctuates according to economic conditions generally, the price of industrial metals, the state of the labour market, and according to the permanence of new finds and the development of the established mines. The following table shows the numbers engaged in the various mining industries in each State and Australia as a whole in 1955.

EMPLOYMENT IN MINING, 1955. (a)

2. **Salaries and Wages Paid in Mining.**—Statistics of total salaries and wages paid in the mining and quarrying industry are now available from the annual industrial censuses of the industry taken from 1952 onwards. Salaries and wages paid in the mining industries and quarrying in Australia during each year 1952 to 1955, are shown in the following table. Information regarding rates of wages paid in the mining industry is shown in Chapter VI. —Labour, Wages and Prices (p. 159) and also in the *Labour Report*.

SALARIES AND WAGES PAID IN MINING : AUSTRALIA.
(£'000.)

(a) Not available for publication; included with "Non-metal Mining". (b) Incomplete.

3. **Accidents in Mining.**—Particulars of numbers of persons killed and injured in accidents in mines and associated treatment plants are recorded by State Mines Departments. Numbers injured are not reported on a uniform basis from State to State as varying criteria are used in determining what constitutes injury for the purpose of these

records. In 1955, 62 persons were recorded as having been killed and 1,788 as having been injured in mining and quarrying accidents. Of the total of 63 persons killed, 25 were in black coal mines, 11 in gold mines and 8 in silver-lead-zinc mines. Reported injuries were highest in black coal mines (552), gold mines (504), and silver-lead-zinc mines (398).

§ 14. Oversea Trade in Minerals and Metals.

Particulars of the quantity and value of imports and exports of the principal minerals and metals for Australia are shown in the following table for the years 1953-54, 1954-55 and 1955-56. In addition to the unfabricated metals shown, considerable quantities of partly fabricated metals (bars, rods, wire, etc.) enter into Australia's overseas trade.

Considerable quantities of metallic ores, concentrates, slags and residues are exported from Australia for refining overseas. The following table shows the quantities of such items exported during 1955-56 and their principal metallic content as estimated by assay.

PRINCIPAL METALLIC CONTENT OF ORES AND CONCENTRATES EXPORTED FROM AUSTRALIA DURING 1955-56.

Ore, Concentrate, etc.	Quantity Ex-ported.	Estimated Metallic Contents.						
		Copper.	Gold.	Lead.	Silver.	Tin.	Tungstic Oxide.	Zinc.
	cwt.	cwt.	fine oz.	cwt.	fine oz.	cwt.	cwt.	cwt.
Copper Ore, Concentrate, Slag and Residues ..	83,290	15,974	894	4,312	23,912	99
Lead Bullion ..	596,231	592,057	2,683,035
Lead Ore, Concentrate, Slag and Residues(a) ..	1,445,081	63,000	12,533	881,514	1,756,009	424
Scheelite Ore and Concentrate ..	23,012	1	15,575	..
Tin Ore and Concentrate ..	2,623	1,923
Wolfram Ore and Concentrate ..	24,525	10	15,736	..
Zinc Ore, Concentrate, Slag and Residues ..	5,823,602	42,203	86,945	3,049,697

(a) Includes copper-lead dross and speiss.

§ 15. Government Aid to Mining, and Mineral Control.

1. **Aid to Mining.**—(i) *Commonwealth.* (a) *Assistance to marginal and sub-marginal gold mines.* Under the terms of the Gold-Mining Industry Assistance Act 1954, a large producer may receive a subsidy of up to three-quarters of that portion of the cost of production in excess of £13 10s. 0d. per fine oz.; the subsidy will not exceed £2 0s. 0d. per fine oz. A person producing less than 500 fine oz. per year receives a flat rate subsidy of £1 10s. 0d. per fine oz. regardless of the cost of production. The Act remained in force for two years from 1st July, 1954 and has since been extended for a further three years.

(b) *Rewards for Discovery of Uranium Ore.* To encourage the search for and discovery of deposits of uranium ore, the Commonwealth Government has approved the granting of monetary rewards up to a maximum of £25,000 for any one deposit.

(c) *Bureau of Mineral Resources, Geology and Geophysics.* The Bureau of Mineral Resources, Geology and Geophysics has sections dealing with geology, geophysics, mining engineering, petroleum technology and mineral economics. The geological section provides geologists to conduct all surveys required in Commonwealth Territories, makes detailed and regional surveys in conjunction with or by arrangement with the State Mines Departments, surveys of possible oil-fields in Australia and New Guinea, surveys of mines for which financial assistance is sought, and investigations of deposits of radio-active minerals. The geophysical section conducts investigations throughout Australia and New Guinea connected with the search for metalliferous, radio-active and other mineral deposits; investigations connected with exploration for coal, oil and water; regional magnetic and gravity surveys; engineering and military geophysics; and the operation of geophysical (magnetic and seismic) observatories. The Bureau works in close co-operation with the Mines Departments of the States. It has assumed full responsibility for geological and geophysical surveys in Commonwealth Territories, but suitable arrangements have been made to ensure that the local Administrations have the necessary technical advice directly available to them.

(d) *Diamond Drills.* The drilling plant operated by the Bureau of Mineral Resources consists of two heavy, two medium and five light prospecting drills. These drills are used mainly in connexion with the Bureau's comprehensive programme of prospecting by aerial, geological, geophysical and geochemical methods.

(e) *Search for Oil.* No variation has been made in the policy described in Official Year Book No. 37, p. 850, regarding the search for petroleum throughout Australia and its Territories. In addition to its activities set out in that Year Book, the Bureau of Mineral Resources, Geology and Geophysics in Melbourne test bore cores for porosity and permeability on behalf of companies engaged in drilling for oil. The Bureau also maintains two portable rotary plants for scout boring for geological information.

The Commonwealth Government has encouraged the search for oil in Australia, Papua and New Guinea; details of the efforts made are outlined in earlier issues of the Official Year Book and in § 10, Mineral Oils (p. 1003).

(f) *Survey of North Australia.* Reference to this survey which was completed at the end of 1940 appears in Official Year Book No. 35, p. 744.

(g) *Ore-dressing and Mineragraphic Investigations.* These investigations are conducted by the Commonwealth Scientific and Industrial Research Organization as required by the industry. Ore-dressing investigations are carried out conjointly with appropriate State institutions, the three laboratory centres being the School of Mines, Kalgoorlie, the School of Mines and Industries, Adelaide, and the University of Melbourne.

Since 1947, funds for these investigations have been included in the investigational vote approved annually for the Commonwealth Scientific and Industrial Research Organization; in 1955 the Commonwealth Government expended approximately £18,000 on ore-dressing and £10,500 on mineragraphic investigations.

(h) *Petroleum Legislation.* The petroleum ordinances of Papua and New Guinea, have been amended and combined in a single ordinance entitled Petroleum (Prospecting and Mining) Ordinance 1951. Further minor amendments were passed early in 1954. A new Petroleum Ordinance for the Northern Territory was brought into force on 27th May, 1954. New legislation covering petroleum was brought down in New South Wales under the Petroleum Act, 1955, and several amendments to the Petroleum Act, 1951, were passed in Western Australia.

(ii) *States. (a) General.* In addition to free assays and determinations of rocks and minerals carried out for prospectors by the Mines Departments of the States and Territories, technical officers of these departments provide advice to the mining and allied industries where required, carry out field examinations of mining prospects, advise on exploration and development, select sites for water supply, and in general give a free technical service to the mining industry.

(b) *New South Wales.* State aid to assist metalliferous mining consisted of grants to assist the prospecting and/or mining for gold and minerals and for the purchase, removal and installation of mining plant or equipment.

(c) *Victoria.* Loans may be granted to assist prospecting and development or the purchase of machinery. The Mines Department has stamp batteries in different parts of the State to crush ore for prospectors at nominal rates. Small mining companies may avail themselves of these facilities. Drilling with diamond, rotary and percussion drills is carried out by the Mines Department for mining companies and for general mineral exploration. A survey of the States' underground water reserves is in progress, in conjunction with the opening up of town water supplies from underground sources for which new deep drilling equipment is on order.

(d) *Queensland.* The Mines Department maintains a treatment works for tin ores, etc., at Irvinebank, an assay office at Cloncurry and diamond-drilling plants in several parts of the State. The Venus State Mill at Charters Towers is available for the treatment of gold-bearing ores. In addition, many departmental compressor plants, pumping plants and other mining equipment are provided and made available on hire on the principal mining fields.

(e) *South Australia.* The Department of Mines provides the following services and facilities to the mineral industry:—(i) Hire of boring plants and mining equipment; boring and testing of mineral deposits; financial subsidies in approved cases for prospecting and mining development; development of sub-surface water supplies for farming, pastoral, irrigation and mining purposes; purchase of basic metal ores from prospectors. (ii) Geological examination of mineral deposits, water supply, dam, foundation and drainage problems; guidance on mining legislation; publication and issue of geological bulletins and maps. (iii) Chemical and metallurgical analytical and assay investigation; testing and treatment of ores and minerals; petrographic, mineragraphic and radiometric determinations. Pilot scale metallurgical and chemical treatment plants are maintained and operated for the development of mineral extraction processes.

(f) *Western Australia.* Assistance is given to prospectors to the extent of £4 10s. 0d. per week south of the 28th parallel of latitude, and of £5 10s. 0d. per week north of that parallel; also provision is made of some tools required for prospecting.

There are eighteen State batteries operating throughout the gold-fields for the treatment of ore from prospectors and small mine-owners, at a nominal charge. A cartage subsidy is also granted to such operators sending ore to State batteries for treatment.

Provision is made for loans to mine-owners who require assistance to develop mines. The Government has a drilling scheme, financing mine-owners on a £1 for £1 basis.

(g) *Tasmania.* The Department of Mines provides financial assistance to mining lessees for the purchase of plant and machinery, for sinking, repairing or dewatering of shafts, for construction of dams and water races, for testing and proving a deposit of any mining product, for developmental work and for diamond and other types of drilling.

Other assistance is rendered to the industry by geological and engineering advice and through ore-dressing research into metallurgical recoveries and the selection and design of treatment plant.

(h) *Northern Territory.* In order to encourage the development of the mining industry, the Northern Territory Administration provided Government batteries at Tennant Creek, Hatches Creek, and Maranboy for the treatment of miners' ores. The Hatches Creek

battery is the only one in operation at the present time. Pending reconstruction, the Tennant Creek battery has been shut down for a short time, but the re-opening of the Maranboy battery will depend on a revival of tin mining at that centre. The crushing charges are subsidized by Government grants. In addition, the Administration provides cartage subsidies and financial advances to encourage miners to carry out development work. Roads and water supply services are provided and maintained for mines under active development throughout the Territory.

2. **Control of Minerals.**—(i) *Mica Production.* The Commonwealth Mica Pool purchases mica won in the Harts Range, Northern Territory, thus ensuring the miners a ready market for their output at fixed prices and also permitting an orderly distribution of mica to the trade. The Pool is controlled by a Committee of Management consisting of representatives of the Commonwealth Government, producers and consumers.

(ii) *Control of Exports of Metals and Minerals.* Certain metals and minerals produced in Australia are subject to export control for one or more of the following reasons:—

- (a) the necessity to conserve resources (e.g., iron ore and manganese);
- (b) inadequacy of local production to fulfil domestic demand (e.g., mica, manganese ore, copper, iron and steel);
- (c) the strategic importance of the minerals (e.g., beryllium ores, concentrates and metal; monazite; tantalite and tantalum products; uranium ore, concentrates, residues and metal; mica).

Mixed concentrates of beach sand minerals are prohibited exports, but rutile, zircon and ilmenite may be exported. Some non-ferrous scrap is also subject to control.

(iii) *Radio-active Minerals.* Since the discovery of the possibility of using atomic energy considerable attention has been paid to the occurrence of uranium in Australia. To encourage the search for and discovery of deposits of uranium ore, the Commonwealth Government has approved the granting of monetary rewards for such discoveries.

Up to the end of 1949, important deposits had been found only in the north-eastern part of South Australia where the Mt. Painter and Radium Hill fields had been investigated, largely by the South Australian Government, but in that year the presence of uranium was discovered in the Rum Jungle district of the Northern Territory, and investigations carried out by the Commonwealth Bureau of Mineral Resources, Geology and Geophysics in the years 1949–1952 proved that these deposits are of substantial importance.

Towards the end of 1952, the Commonwealth Government placed the Rum Jungle deposits under the control of Territory Enterprises Pty. Ltd., a subsidiary of Consolidated Zinc Corporation Limited, to carry on the investigations on its behalf and to mine and treat the ore. The treatment plant at Rum Jungle was officially opened by the Prime Minister on 17th September, 1954. Investigation of an area adjacent to Rum Jungle was carried out by the Bureau, using an airborne scintillometer. This survey indicated the presence of many radio-active anomalies, and demonstrated the effectiveness of this method of search. During 1952, arrangements were completed between the Governments of the United States of America, South Australia and the Australian Commonwealth, for the purchase of ores by the United States.

In South Australia, the South Australian Government extensively explored the Radium Hill deposit by underground development and diamond drilling. A primary treatment plant was erected at the mine and went into operation in November, 1954; the concentrate is transported to a plant at Port Pirie, completed in mid-1955, where it is further reduced.

During 1956, the construction of a plant for the extraction of uranium oxide at Mary Kathleen in north-west Queensland commenced. This deposit is being developed by private interests.

The Bureau of Mineral Resources is carrying out further airborne scintillometer surveys and extensive geological, geophysical and geochemical surveys and diamond drilling operations, with a view to discovering further deposits and to assessing the value of known deposits.

During 1953, Commonwealth Legislation was enacted to set up an Atomic Energy Commission which is responsible, in an overall sense, for the production and utilization of uranium in Australia. This Act, the Atomic Energy Act of 1953, supersedes the Atomic Energy (Control of Materials) Act of 1946, but contains a provision of that Act which provides for control of substances which could be used for production or use of atomic energy. It gives the Commonwealth power to acquire such substances in their natural state and in waste materials from mining operations, to carry on mining and other operations necessary for the recovery of such substances, and to pay compensation for such acquisition. It also gives the Commonwealth power to obtain possession of such substances held by any person.

Further reference to the Atomic Energy Commission appears in Chapter XXX.—Miscellaneous.

CHAPTER XXVIII.

DEFENCE.

§ 1. Department of Defence.

1. **Introduction.**—At the outbreak of the 1939–45 War, the Department of Defence comprised the three Fighting Services and a Central Secretariat. In November, 1939, separate Departments, each with its own Minister, were created for the control and administration of the Navy, Army and Air Force. The Defence Department as then reconstituted retained responsibility for over-all defence policy and for the conduct during the war of the business of the War Cabinet, set up in September, 1939, and the Advisory War Council, set up in October, 1940. These bodies ceased to function after the war.

2. **Functions and Organization.**—(i) *Functions.* Subject to the authority of Cabinet, the Minister and Department of Defence are responsible for:—

- (1) The formulation and general application of a unified defence policy relating to the Defence Forces and their requirements, including:—(a) co-operation in British Commonwealth and regional defence and the defence aspect of the Charter of the United Nations; (b) the supply aspect of defence policy, including the review of production programmes and capacity; (c) the scientific aspect of defence policy; and (d) the financial requirements of defence policy, and the allocation of funds made available.
- (2) The defence aspect of armistice and peace terms, control commissions, and forces of occupation.
- (3) Matters of policy or principle and important questions having a joint Service or inter-Departmental defence aspect.
- (4) The defence aspect of questions relating to the organization and machinery for:—(a) co-operation in British Commonwealth defence; (b) co-operation in regional security, including obligations under the United Nations Charter; (c) higher direction in war; and (d) higher direction of the Services.
- (5) The Commonwealth War Book, which is a summary of national plans for an emergency as developed in Departmental War Books.
- (6) The administration of inter-Service organizations, such as the joint intelligence machinery.
- (7) The defence aspect of:—the strength and organization of the forces, higher appointments in the Services, honours and awards.
- (8) Advice on the military aspect of civil defence.

(ii) *Organization, higher defence machinery, the control of the joint Service machinery and the Secretariat of the Council of Defence.* The joint Service and inter-Departmental advisory machinery of the Department, consists of various committees headed by the Defence Committee, the Chiefs of Staff Committee and the Joint War Production Committee.

The Defence Committee is a statutory body consisting of the Secretary, Department of Defence, who is Chairman, the Chiefs of Staff of the three Services, the Secretary, Prime Minister's Department, the Secretary, Department of External Affairs and the Secretary to the Treasury. Its function is to advise the Minister for Defence on:

- (a) The defence policy as a whole and also to co-ordinate military, strategic, economic, financial and external affairs aspects in framing defence programmes.
- (b) Matters of policy or principle and important questions having a joint Service or inter-Departmental defence aspect.
- (c) Such other matters having a defence aspect as are referred to the Committee by or on behalf of the Minister for Defence.

The main responsibility of the Chiefs of Staff Committee in peace is the preparation of strategic appreciations and military plans. The function of the Joint War Production Committee is, briefly, to examine the relation between strategic plans and their requirements to ensure that the war potential for them exists. The major committees subordinate to the Defence Committee and/or the Chiefs of Staff Committee comprise the Principal Administrative Officers Committee (Maintenance and *Matériel*), the Principal Administrative Officers Committee (Personnel), the Defence Research and Development Policy Committee, the Joint Planning Committee, the Joint Intelligence Committee and the Joint Administrative Planning Committee.

(iii) *Board of Business Administration.* In view of the heavy defence expenditure, the Government, in July, 1953, established the Board of Business Administration in the Department of Defence. The Board deals with joint Service matters of common interest to the three Services, or important subjects on which the collective advice of the Board is desired. The Board comprises businessmen who serve in a part-time honorary capacity and consists of an independent chairman and deputy chairman and the business advisers of the three Service Departments.

3. *Basis of Current Defence Policy.*—The main strategic factors affecting current defence policy may be summarized as follows:—

(i) *Likelihood of War.* Because of the nuclear deterrent, it is believed that global (or full scale) war is unlikely to occur as the result of deliberate planning, but could occur as the result of miscalculation. Limited war (or armed conflict short of global war) is always possible and could break out with little or no warning. Hostile powers will probably continue to seize every opportunity to attain their aims by cold war techniques, such as infiltration, subversion and armed insurrection.

(ii) *Area of Primary Strategic Interest.* South East Asia is of great strategic importance to Australia, whose primary effort will be directed to that area in cold, limited or global war.

(iii) *Reliance on Collective Defence.* The defence of South East Asia and Australia are to be sought through the concept of collective security. For this reason Australia is participating in regional arrangements such as SEATO, ANZUS and ANZAM. Such arrangements are entirely in accord with the United Nations Charter.

4. *The Defence Programme.*—(i) *Programme.* The level of national defences must be adequate to enable Australia to meet her regional and home defence responsibilities. The proportion of the national resources that can be allotted to defence is, however, affected by the concurrent demands of the programmes of national development, industrial expansion and migration, which add to our basic defence capacity. Current defence planning and preparations provide for the maintenance of an efficient Service organization including fighting forces, together with command, training and maintenance elements, capable of rapid expansion in time of war. The emphasis is no longer so much on numbers as on mobility, equipment and fire power. Equipment used by Australian forces will be standard or compatible as far as possible with that used by United States forces, with whom they are likely to be associated in war. The defence programme provides for the acceleration of the naval construction programme, designed to produce ships of the appropriate types, the building up of a regular army brigade group, highly trained, mobile, and equipped with the most modern weapons available, and the re-arming of certain squadrons of the R.A.A.F. with the latest fighter and transport aircraft. The first ground to air guided weapons unit will also be introduced into the R.A.A.F., and additional mobile control and reporting units will be established. The army brigade group will be additional to the infantry battalion in Malaya referred to below, and the Citizen Military Forces will be maintained at an adequate strength.

In the field of research and development, Australia is making its principal contribution through the Long Range Weapons Establishment which is a joint United Kingdom-Australian effort, for the testing of guided weapons. The executive authority for this project is the Department of Supply which is also responsible for design and inspection services and for the provision of the material requirements of the forces other than munitions.

The Department of Defence Production is responsible for the manufacture and supply of munitions and aircraft. The new filling factory at St. Mary's will be completed this year and the Small Arms Factory at Lithgow will shortly commence production of the new FN rifle for the Services.

The estimated cost of the defence programme for 1957-58 is £190 million.

(ii) *Financial.* Details of defence expenditure for 1955-56 and the allocation of the Defence Vote for 1956-57 are set out in the two tables which follow:—

ALLOCATION OF DEFENCE VOTE OF £190,000,000 FOR 1956-57.
(£'000.)

Service or Department.	Maintenance.	Capital Material Requirements, Machinery, Plant and Equipment.	Capital Buildings, Works and Acquisition of Sites.	Total Expenditure.
Defence	828	27	35	890
Navy	28,828	8,490	1,747	39,065
Army	49,192	6,780	4,312	60,284
Air	39,664	10,322	3,764	53,750
Defence Production	3,497	2,336	14,058	19,891
Supply	11,391	1,225	2,516	15,132
Other Services	803	15	170	988
Total	134,203	29,195	(a) 26,602	190,000

(a) Includes in Services' Votes a total amount of £1,194,000 for advances to States under the Commonwealth-State Housing Agreement.

DEFENCE EXPENDITURE, 1955-56.
(£'000.)

Service or Department.	Maintenance.	Capital Material Requirements, Machinery, Plant and Equipment.	Capital Buildings, Works and Acquisition of Sites.	Total Expenditure.
Defence	721	14	25	760
Navy	31,119	15,615	1,290	48,024
Army	48,980	9,000	3,466	61,446
Air	37,625	11,500	3,013	52,138
Defence Production	3,002	2,062	7,241	12,305
Supply	12,162	1,048	2,131	15,341
Other Services	646	6	50	702
Total	134,255	39,245	17,216	190,716

(iii) *Personnel Strengths.* The personnel strengths of the Services at 31st December, 1956 were:—

Category.	Navy.	Army.	Air Force.	Total.
Permanent Forces	(a) 12,238	22,409	14,570	49,217
Citizen Forces—				
Volunteers	6,094	14,599	1,760	22,453
National Service Personnel	5,074	(b) 69,024	(b) 656	(b) 74,754
Total Citizen Forces	11,168	83,623	2,416	97,207
Total Permanent and Citizen Forces	23,406	106,032	16,986	146,424

(a) Excludes 55 midshipmen not on pay. (b) Excludes 61,584 Army and 16,752 Air Force National Service personnel who have completed training and are on the reserve.

5. *Australian Forces Serving Overseas.* (i) *Malaya.* Australia participates with the United Kingdom and New Zealand in the Commonwealth Strategic Reserve in Malaya. In addition to its rôle as a strategic reserve, this force is being used in the campaign against the communist terrorists.

The Australian contribution comprises the following forces—

Navy—Two destroyers or frigates. An aircraft carrier also pays an annual visit, and additional ships would be provided in an emergency.

Army—An infantry battalion with supporting arms, and reinforcements in Australia.

Air Force—An airfield construction squadron, which is reconstructing the Butterworth airstrip, on completion of which it is planned to deploy two R.A.A.F. fighter squadrons, and a bomber squadron to replace the R.A.A.F. bomber squadron which has been engaged in operations against the terrorists in Malaya since 1950.

(ii) *Korea-Japan*. Forces from the three arms of the Australian Services were among the earliest to participate in United Nations action in Korea. An account of the Australian contribution is given in previous issues of the Official Year Book.

Australian forces in Korea were progressively reduced after the armistice in 1953. All air forces have been withdrawn and the final army forces, which comprised a signals unit of about 80 men at the beginning of 1957, will be withdrawn during the year. Australian ships will continue to serve in Korean waters during their regular tours of duty with the Far East Fleet.

The Commonwealth base in Japan was closed down and all Australian forces were withdrawn by the end of 1956.

6. **National Service Training.**—Under the National Service training scheme every male person, other than those mentioned below, ordinarily resident in Australia, who, on or after 1st November, 1950, attains the age of 18 years is required to register for National Service when called upon to do so by notice published in the Commonwealth *Gazette*. The first registration of male British subjects took place in May, 1951, and since then successive groups of eighteen-year-olds have been required to register, usually at six-month intervals. In May, 1954, the obligation to register was extended to New Australians.

Exemption from the liability to register is confined to certain diplomatic personnel and officials in the service of international bodies, members of the permanent forces and aboriginal natives of Australia. Exemption from the liability to undergo training may be granted to theological students, ministers of religion, members of religious orders, conscientious objectors and registrants suffering from certain prescribed physical or mental disabilities.

Registrants not exempted for service are liable to be called up for training provided they attain the requisite standard of medical fitness. Deferment may be granted for limited periods to students or apprentices so as to avoid undue interruption to their studies or trade training and to registrants who can establish before a court that their call-up would cause exceptional hardship to themselves, their parents or dependants. Early in 1955, provision was made to defer the call-up of registrants living outside approved C.M.F. training centres and to rural workers permanently engaged full-time on a rural holding in the production of food or raw materials.

Up to and including the intakes in January, 1957, training was carried out in all three Services and a total of 193,578 (6,967 Navy, 22,267 Air Force and 164,344 Army) had been called up for training.

Commencing with the second intake of 1957, which will take place in July, the total number to be trained each year is reduced from 34,000 to 12,000, all of whom will perform their training in the Army. There will be no further Navy or Air Force intakes. The total Army training liability is now 140 days consisting of an initial continuous training period of 77 days and 21 days part-time and camp training in each of the following three years. Trainees will remain on the Reserve of the Citizen Military Forces for five years from the date of call-up. The normal times for call-up will be in January, April and August of each year.

Provision is made to safeguard the rights of registrants called up for training, notably with regard to reinstatement in civilian employment. There is no statutory obligation on employers to make up any difference between the civil and service pay of employees who are undergoing training, but some employers, e.g., the Commonwealth Government and the Government of New South Wales, do so voluntarily.

In order to bring the numbers liable for service into line with the reduced intake figures, a new selection procedure has been introduced. This is in the form of a ballot conducted shortly after each new age group is called upon to register. Registrants included by ballot are regarded as available for call-up subject to the existing rules and procedures for exemption and deferment. Those excluded by ballot are granted deferment.

§ 2. Naval Defence.

1. **General.**—(i) *State Systems.* Information regarding naval defence systems prior to 1901 will be found in Official Year Book No. 2, p. 1084.

(ii) *Royal Australian Navy up to the end of 1939–45 War.* An outline of the development of Australian Naval policy was given in Official Year Book No. 3, p. 1060 and No. 12, p. 1012. Some account of the building of the Australian Navy, the proposed and modified cost thereof, the compact with the Imperial Government, etc., appears in Official Year Book No. 15, pp. 921–23. An account of the growth and activities of the Royal Australian Navy during the 1939–45 War is given in Official Year Book No. 36, pp. 1023–27.

2. **Naval Board.**—The Australian Navy is administered by a Board consisting of the Minister for the Navy with four Naval Members, and the Secretary, Department of the Navy; the seat of administration is at Melbourne.

3. **Strength of the Fleet.**—Ships in Commission: The Fleet consists of:—

Carrier Force: 1 Light Fleet Carrier, 3 Destroyers, 1 Daring Class Ship.

Escort Forces: 3 Frigates.

Surveying Duties: 1 Survey Ship and its tender.

Training Ships: 1 Frigate, 4 Ocean Minesweepers, 1 Light Fleet Carrier.

Auxiliary Vessels: 2 Boom Defence Vessels, 1 Ocean-going Tug, 1 Armament Store Carrier, 4 Search and Rescue Vessels.

In addition to the ships in Commission, a substantial reserve fleet is maintained in good condition against any future emergency.

4. **Personnel.**—The strength of the Royal Australian Navy has been pegged at 14,400, comprising 1,584 officers and 12,816 ratings.

5. **Womens' Royal Australian Naval Service.**—The strength of the W.R.A.N.S. remains pegged at 14 officers and 260 ratings. One Officers' Training Course was held from November, 1956 to February, 1957; all three cadets successfully passed the course. Ratings are serving at the following Establishments: H.M.A.S. *Cerberus*, where all training is also carried out, H.M.A.S. *Harman*, H.M.A.S. *Lonsdale* and H.M.A.S. *Melville* (Coonawarra W/T Station). The categories in which W.R.A.N.S. ratings are employed are: Telegraphists; Writers (General Duties), (Pay), and (Shorthand Typist); Stores Assistants (Stores) and (Victualling); Sick Berth Attendants; Cooks; Stewards and Regulating.

6. **Strength of Royal Australian Navy.**—The serving strength of the Royal Australian Naval Forces, both permanent and reserves, at 31st December, 1956, was 1,298 officers and 10,684 ratings including 60 native ratings of the Papua and New Guinea Division of the Royal Australian Navy. In addition, 11 officers and 196 ratings of the Women's Royal Australian Naval Service were serving and 104 cadet midshipmen were undergoing training, including 88 at the Naval College. Reserve strength comprised 1,494 officers and 9,357 ratings.

7. **Reserve and National Service Training.**—Reserve training was resumed as from 1st January, 1950, for members of the Royal Australian Naval Reserve. Training consists of 45 two-hour drill attendances at night or on Saturdays in naval training establishments in each of the capital cities, plus 13 days continuous training each year in H.M.A. ships or training establishments, including special schools. In addition, payment is made for further voluntary home training up to a maximum of 12 days. Selected members may undergo special courses up to a limit of six months during the whole of their service in the Reserve, whilst up to 12 months training or service may be performed in H.M.A. ships or establishments with similar qualifications. Engagements are for three years. Rates of pay have been aligned (with minor modifications) with those applicable to the Permanent Naval Forces. The training for members of the Royal Australian Naval Reserve (Sea-going) is normally 28 days every two years whilst members of the Royal Australian Naval Volunteer Reserve are under no training obligations.

Naval National Service personnel commenced training on 30th July, 1951. On completion of their 154 days initial training in naval establishments and H.M.A. ships, personnel have been attached to the Naval Reserve Training Establishment in their State until completion of their five-year liability for mobilization in war or emergency. After the intake in January, 1957, there have been no further intakes of National Service Trainees by the Navy.

Revised post-war conditions of service in the Royal Australian Fleet Reserve were introduced as from 13th December, 1950. This Reserve is comprised of two classes:— (a) former ratings who receive full benefits under the Defence Forces Benefits Act and are required to serve five years in the Royal Australian Fleet Reserve as a consideration for receipt of these benefits and (b) former ratings who have previously served in the Permanent Naval Forces of the Royal Australian Navy, Royal Navy, or a Dominion Navy subject to a minimum period of three years' service and an absence of not more than five years. No retainer is payable to members under (a) and no obligatory training is carried out but 14 days paid voluntary training can be undertaken. Members under (b) receive an annual retainer of £24 subject to completing annual training; if enrolled within 12 months of discharge from Permanent Naval Forces—7 days; if enrolled after a lapse of 12 months since discharge from Permanent Naval Forces—14 days; additional paid voluntary training up to 14 days may be carried out. Ratings receive pay applicable to Royal Australian Navy personnel whilst under training.

8. **Fleet Air Arm.**—The Fleet Air Arm of the Royal Australian Navy consists of five front line squadrons, one operational carrier, H.M.A.S. *Melbourne*, and one Naval Air Station, H.M.A.S. *Albatross* at Nowra, New South Wales. The aircraft carrier H.M.A.S. *Melbourne*, fitted with an angled deck and steam catapult, carries two squadrons of Gannet turbo-prop anti-submarine aircraft, and one squadron of jet Sea Venom all weather fighters and ground attack aircraft. The training ship, H.M.A.S. *Sydney*, is used periodically for deck landing training.

9. **Ship Construction and Repair.**—Provision is made for the maintenance in Australia of a nucleus ship construction and repair industry capable of rapid expansion in war. The present approved programme provides for the construction of three Daring Class Ships (one was completed in February, 1957), four anti-submarine frigates (under construction), one boom-working vessel (completed in 1956) and two inshore minesweepers (work not yet commenced); and the conversion of four "Q" class destroyers to fast anti-submarine frigates (three have been completed and work on one is in progress).

10. **The Relation of New Weapons.**—Careful consideration has been given to the implications of new weapons, and the decisions in regard to the Navy are based on the broad conclusions of great naval powers that these weapons should be introduced by the normal process of evolution, first into existing ships, and later perhaps into an entirely new form of fighting ship. The same authority supports the view that there will be no rapid development which will render vessels such as carriers, cruisers and destroyers obsolete in the near future.

11. **Naval College.**—Forty-two cadet midshipmen (including five from the Royal New Zealand Navy) entered the Naval College for training in the year commenced January, 1957. At that date, there were 104 cadet midshipmen undergoing training at the College.

12. **Training Establishments.**—Flinders Naval Depot, Victoria, remains the principal training establishment for ratings in the permanent forces, while several advanced training schools are established at Port Jackson, New South Wales. Air training is carried out at Nowra, New South Wales.

13. **The Australia Naval Station.**—Defined limits of the Australia Station are as follows:—

Eastern—

From 3° 30' North, 169° East, south to 1° South, thence east to 170° East, thence south along this meridian to 30° South, thence to 45° South, 160° East, thence south, along this meridian.

Northern—

From 3° 30' North, 169° East, west to 125° East, thence south to the Coast of Celebes, thence west along the Coast of Celebes to 120° East, thence south to 11° 30' South, thence west to 11° 30' South, 95° 15' East.

Western—

From 11° 30' South, 95° 15' East, south along this meridian to 30° South, thence west along this parallel to 80° East, thence south along this meridian.

14. **Foreign Service.**—The R.A.N. was represented in Japan by H.M.A.S. *Commonwealth* base establishment at Kure. This establishment closed down on 4th November, 1956. During the year ended June, 1956, H.M.A. Ships *Arunta*, *Warramunga*, *Tobruk* and *Anzac* served on the Far East Station as units of the Strategic Reserve. In addition, H.M.A. Ships *Queenborough*, *Quickmatch* and *Quadrant* were engaged in exercises on the Far East Station.

15. Papua and New Guinea Division of the Royal Australian Navy.—A Papua and New Guinea Division of the Royal Australian Navy, consisting of native ratings, was inaugurated in July, 1951 as a separate part of the Permanent Naval Forces for employment in Papua and New Guinea and waters adjacent thereto.

16. Ships of the Royal Australian Navy.—The following ships were in commission or in reserve in June, 1957:—

SHIPS OF THE ROYAL AUSTRALIAN NAVY, JUNE, 1957.

Vessel.	Description.	Displacement.
In Commission—		Tons.

§ 3. Military Defence.

1. *State Systems.*—A detailed historical account of the Australian defence forces prior to Federation will be found in Official Year Book No. 2, pp. 1075–1080. *See also* Official Year Book No. 12, p. 999.

The strength of the military forces of the States on 31st December, 1900 (the eve of Federation) was:—New South Wales, 9,338; Victoria, 6,335; Queensland, 4,028; South Australia, 2,932; Western Australia, 2,696; Tasmania, 2,024; total for Australia, 27,353. This total is exclusive of cadets, reservists and rifle club members.

2. *Commonwealth Systems.*—(i) *General.* Under the terms of the Constitution Act 1900, the Commonwealth took over control of defence matters in March, 1901. The growth of the Commonwealth Military Forces may be considered to have taken place in sixteen phases. For particulars of the phases which cover the period from the welding together of the military forces of the States into one homogeneous army in 1902 up to the decision to increase the training strength of the militia to 70,000 in the year before the 1939–45 War (phases 1–7), *see* Official Year Book No. 36 and earlier issues.

Phases 8–10, covering the period immediately prior to, and just following, the outbreak of the 1939–45 War, relate to the initial steps necessary to put the Australian Military Forces on a war-time basis, and to its organization into commands.

The eleventh phase, in January, 1942, was the division of Northern, Eastern and Southern Commands into separate commands and base headquarters to handle operational and administrative matters respectively, and the twelfth phase was the revision of the machinery for command administration of lines of communication areas. The thirteenth phase was the appointment of Lieutenant-General Sir Iven Mackay as G.O.C.-in-C. Home Forces commanding the forces in Northern, Eastern and Southern Commands. The fourteenth phase covered the period following the outbreak of war with Japan and the entry of United States of America Forces into the South-West Pacific Area, and related to the appointment of General Sir Thomas Blamey as Commander-in-Chief, Australian Military Forces, the cessation of the Military Board, and the replacement of the system of commands and bases by the field army and lines of communication areas. In March, 1943, First and Second Armies took over from Queensland, New South Wales and Victoria Lines of Communication Areas the command of all coast and static anti-aircraft artillery defences and training

establishments. On 16th June, 1944, Western Command was re-established and took over the combined responsibilities of Third Australian Corps and Western Australia Line of Communication Area.

The fifteenth phase was the re-introduction in March, 1946, of the Military Board and the organization of commands and military districts, and the sixteenth phase was the commencement of the National Service Training Scheme in August, 1951 (see § 1, para. 6 above and sub-para. (iv) (c) following).

For greater detail on phases 8–14, see *Official Year Book No. 38* and earlier issues.

(ii) *Population of Military Age, 30th June, 1956.* The following particulars show the estimated numbers of males of military age in the population of Australia as at 30th June, 1956. The total number of cadet age, 14 and under 18, was 272,823; of citizen soldier age, 18 and under 26, 511,498; and 26 and under 35, 683,237; making a total of 1,194,735, 18 and under 35, which is considered the best period for military service. In addition to the above-mentioned, there were 1,442,190 males 35 and under 60, in Australia at 30th June, 1956.

(iii) *Allotment of Units.* Under the Command Organization (see above), units are raised on a territorial basis, each State supplying its proportion of the personnel required for the fighting services, the organization at 30th June, 1956, being as follows:—

COMMAND ORGANIZATION.

Army Headquarters.

Northern Command	Eastern Command	Southern Command	Central Command	Western Command	Tasmania Command	Northern Territory Command
All forma- tions and units in 1st Military District and New Guinea.	All forma- tions and units in 2nd Military District.	All forma- tions and units in 3rd Military District.	All forma- tions and units in 4th Military District.	All forma- tions and units in 5th Military District.	All forma- tions and units in 6th Military District.	All forma- tions and units in 7th Military District.

Commands conform generally to State boundaries as follows:—Northern Command, Queensland; Eastern Command, New South Wales; Southern Command, Victoria; Central Command, South Australia; Western Command, Western Australia; Tasmania Command and Northern Territory Command. New Guinea is the responsibility of Northern Command.

(iv) *Military Training Systems.* (a) *General.* Particulars of the military training systems in operation prior to the 1939–45 War, first on a compulsory basis and later voluntary, will be found in *Official Year Book No. 38* and earlier issues.

The current plan (1956–57) for the Australian Regular Army is based on an average strength of 28,000 full time duty personnel (including 4,600 civilians) and a Citizen Military Force of 80,000 including National Servicemen.

(b) *The Australian Cadet Corps.* The Australian Cadet Corps is a voluntary organization comprised of School Cadet units and Regimental Cadet units. It serves as a training ground to provide, to some extent, the future officers and non-commissioned officers of the Australian Military Forces, and, as such, occupies an important position in the scheme of national defence. School Cadet units are raised at educational establishments in all States of the Commonwealth. The minimum age for enrolment is the year in which the applicant reaches the age of 14 years, and cadets, who in the large majority of schools receive a free issue of A.M.F. pattern uniform, may remain in the Cadet Corps until they cease to be pupils of the educational establishments concerned. A few units retain their own pattern school uniform and are not issued with A.M.F. pattern uniforms. Provision is made for the appointment of officers, warrant and non-commissioned officers on an authorized establishment scale from within school units. School cadet units are not affiliated with Citizen Military Force Units.

Regimental Cadet units have been raised in close affiliation with Citizen Military Force units, whose uniform they wear with the addition of the word "Cadets" directly under

the title of the parent unit. These units are manned by boys who either have left school or are students at schools where no School Cadet unit has been raised. Regimental Cadet units are now being disbanded.

The establishment of the whole Corps is 35,000 all ranks, and at 31st December, 1956, comprised 265 School Cadet units with a posted strength of 30,500 all ranks and 382 Regimental Cadets posted to Citizen Military Force units.

(c) *National Service Training Scheme.* Under the National Service Training Scheme (see § 1, para. 6 above) the Army is required to train 29,250 trainees per year, effected by three intakes each of 9,750 trainees in January, April and August each year. The first intake commenced training in August, 1951. As from the second intake of 1957, the annual intake has been reduced to 12,000.

(v) *Women's Services.* In November, 1950, approval was given for the enlistment of women into the Australian Regular Army, on a limited scale. Enlistment commenced immediately into the Australian Women's Army Corps. During June, 1951, the Australian Women's Army Corps was re-designated the Women's Royal Australian Army Corps (W.R.A.A.C.). Members are employed in establishments in direct substitution for male soldiers. The Women's Services in the Australian Regular Army now comprise two Corps only:—(a) Royal Australian Army Nursing Corps; (b) Women's Royal Australian Army Corps.

Women's Services have been incorporated in the Citizen Military Forces; it is proposed to raise sixteen companies of the Women's Royal Australian Army Corps and twelve companies of the Royal Australian Army Nursing Corps, a total of 3,900 all ranks, within the C.M.F.

At December, 1956, seven companies of the Women's Royal Australian Army Corps and nine companies of the Royal Australian Army Nursing Corps, a total of 2,250 all ranks, had been raised within the C.M.F.

(vi) *Korea.* On 2nd August, 1950, the Commonwealth Government announced its decision to raise and dispatch to Korea one infantry battalion as part of Australia's contribution of military assistance to the United Nations. 3rd Battalion, The Royal Australian Regiment, stationed in Japan, brought up to strength by special enlistments flown to Japan from Australia, became the Special Korean Force, and on 27th September, 1950, sailed from Japan for Korea where it joined 27th British Brigade. For its gallantry on 24th and 25th April, 1951, 3rd Battalion was awarded the United States Presidential Citation by the United States of America. On 4th October, 1951, the Commonwealth Government announced that a second infantry battalion would be sent to Korea to join 3rd Battalion. On 3rd March, 1952, 1st Battalion, The Royal Australian Regiment, which had been brought up to strength at Ingleburn, New South Wales, embarked for Japan where it was equipped before moving to Korea. 1st Battalion joined 3rd Battalion, under operational control of 28th British Brigade, 1st Commonwealth Division, on 1st June, 1952. 2nd Battalion, The Royal Australian Regiment, after training at Puckapunyal, Victoria, relieved 1st Battalion in Korea on 21st March, 1953, the latter battalion returning to Australia. 2nd Battalion was relieved by 1st Battalion and returned to Australia in April, 1954, while 3rd Battalion returned to Australia in November, 1954.

(vii) *Malaya.* On 1st April, 1955, the Commonwealth Government announced its decision to dispatch troops to Malaya as an Australian component of the British Commonwealth Far East Strategic Reserve. 2nd Battalion, The Royal Australian Regiment and 105th Field Battery; Royal Australian Artillery and other minor units embarked from Australia on 6th October, 1955 and disembarked at Penang on 20th October, 1955.

(viii) *The Staff College.* Until 1938, the training of staff officers was carried out in the various Military Districts throughout Australia, except in cases where officers were selected from time to time to attend courses abroad. In 1938, an Australian Command and Staff School, located in the original Officers' Mess at Victoria Barracks, Sydney, was established. Between 1939 and 1945, the training of staff officers was carried out under varying conditions by different schools in accordance with the changing needs of the war.

Early in 1946, the Staff School (Australia) was established at Seymour in Victoria and re-designated the Staff College in conformity with other Empire training establishments for training officers for command and staff appointments. The College was later moved to Queenscliffe, Victoria, where it is at present situated. The courses are of ten months' duration and are held from January to November each year. The normal intake is 30 students and, on successfully completing the course, an officer is awarded the symbol "psc".

The course is designed to train selected officers for war, and in so doing to fit them for Command or Grade II. staff appointments. Each course includes, among the students, Army representatives of the United Kingdom and other Dominions and countries. Included in the 1957 course are students from the United Kingdom, Canada, New Zealand, India, Pakistan, the United States of America, the Philippines and Burma. Vacancies on each course are reserved also for officers who may be nominated by the Royal Australian Navy, the Royal Australian Air Force and the Commonwealth Public Service.

In order to ensure common standards in tactical doctrine and staff and command training throughout the Empire, liaison is maintained with other Staff Colleges; and to this end, there is also a reciprocal exchange of instructors. To this extent, it may be said that the Staff College is imperial in character.

(ix) *The Royal Military College.* The Royal Military College was established in 1911 at Duntroon in the Australian Capital Territory for the purpose of providing trained officers for the Army. The conditions of entry are laid down in the Royal Military College Regulations and provide for admission by "normal", "service", and "special" entries. The length of the normal course is four years; "service" entry cadets attend for three years; and "special" entries for one year.

While at the College, cadets receive pay and allowance of 15s. per day in their first year, rising to 24s. 1d. per day in their fourth. Uniform maintenance allowance of 1s. 9d. per day is additional, and a further 6d. per day is paid to cadets on attaining the age of 18 years. The course of instruction is organized into military and civil departments and the instructional staff comprises officers of the Army and civilian professors. On graduation, cadets are appointed lieutenants in the Australian Regular Army. The College also trains New Zealand cadets for commissions in the New Zealand Permanent Forces under an agreement made with the Government of that Dominion.

(x) *The Officer Cadet School.* The Officer Cadet School was established in 1951 at Portsea, Victoria, for the purpose of speeding up the supply of junior regimental officers for the Australian Regular Army. Serving members of the Australian Regular Army, the Citizen Military Forces, National Servicemen, and civilians between the ages of 18 and 23 years, are eligible to apply for entrance. The course is of eleven months' duration, and on graduation, cadets are appointed second-lieutenants in the Australian Regular Army. They then normally proceed to further training at the Army School of the Arm or Service to which they have been allotted before being posted to regimental duties.

(xi) *The Women's Royal Australian Army Corps School.* The W.R.A.A.C. School was established in 1952 at Mildura, Victoria. It has two wings, one whose primary task is the training of officer cadets for the W.R.A.A.C., the other being for the training of non-commissioned officers at all levels and for other special courses. The officer cadets are selected from eligible applicants, who may be serving members between 21 and 32 years of age, or civilians between 21 and 30 years of age. The course is of six months' duration and, on graduation, cadets are appointed lieutenants in the Women's Royal Australian Army Corps.

(xii) *The Army Apprentices' School.* The Army Apprentices' School was opened in 1948 at Balcombe, Victoria, with the aim of training youths as skilled tradesmen for the Australian Regular Army, and to form a background for an Army career with prospects of promotion. The course is open to boys between the ages of 15 and 17 years and provides training in a number of highly skilled trades. A three-year course of intensive theoretical and practical work at the Apprentices' School is followed by one year in an appropriate Army workshop or technical unit. At the end of their third year, boys are given their Army trade test and also take the Victorian Apprenticeship Commission final grade public examinations, which ensures that they will be accepted as qualified tradesmen in civil life when they eventually leave the Army. In addition to trade training, the Apprentices' School provides general educational facilities up to the school leaving standard.

(xiii) *Army Schools.* Schools have been established for the major Arms and Services for the purpose of training officers and other ranks in the up-to-date techniques of their own Arm or Service, to qualify them for promotion requirements, and to produce trained instructors. In addition, a School of Tactics and Administration which has been established at Seymour, Victoria, provides qualifying and instructional courses in current tactical and administrative doctrine for members of all Arms and Services. Courses at Army Schools are conducted for members of both the Australian Regular Army and the Citizen Military Forces.

The following Schools have been established:—School of Tactics and Administration; Jungle Training Centre; Armoured School; School of Artillery; School of Military Engineering; School of Survey; School of Signals; School of Military Intelligence; School of Infantry; Royal Australian Army Medical Corps School of Army Health; Royal Australian Army Service Corps School; Royal Australian Army Ordnance Corps School; Royal Australian Electrical and Mechanical Engineers Training Centre; Transportation Training Centre; School of Music; Women's Royal Australian Army Corps School; Land/Air Warfare (Joint Services) School.

(xiv) *Rifle Clubs*. The Australian Rifle Club movement, which had its origin in 1888, is provided for in the Defence Act and comprises an Australian Council of State Rifle Associations (which functions in an advisory capacity to the Minister and in the promotion of intra-empire and interstate rifle competitions), State Rifle Associations, District Rifle Club Unions and Rifle Clubs. When placed in recess, the efficient strength of the rifle club movement was 1,018 clubs and 36,478 members. Approximately 20 per cent. of this number served overseas and a further 60 per cent. performed home service duties during the 1939–45 War. Rifle shooting activities were resumed in 1946 and the strength of the movement as at 31st December, 1956, was 1,033 clubs and 44,940 members.

(xv) *The Australian Battles Nomenclature Committee*. The Minister for the Army gave approval on 25th July, 1947, for the formation of the Australian Battles Nomenclature Committee to tabulate and classify the operations fought in the Pacific Zones in the 1939–45 War which involved the Australian Military Forces, to define their geographical and chronological limits and to advise the United Kingdom Battles Nomenclature Committee regarding operations in zones other than the Pacific Zone in which the Australian Military Forces participated. Sub-committees were later appointed to study the various campaigns in order to classify the operations into battles, actions and engagements. In 1956, the terms of reference of the Australian Battles Nomenclature Committee were extended to cover the operations in Korea 1950–53.

3. Strength of Australian Military Forces.—The effective strength of the Australian Military Forces at 31st December, 1956, was as follows:—Australian Regular Army, 19,184; Regular Army Special Reserve, 3,225; Citizen Military Force (including National Service Trainees), 83,623; Australian Cadet Corps, 29,152.

§ 4. Air Defence.

1. General.—A statement respecting the preliminary steps taken in connexion with the development of air defence will be found in Official Year Book No. 18, p. 610, and one on the expansion and development and zones and operations of the Royal Australian Air Force during the 1939–45 War appears in Official Year Book No. 36, p. 1027.

2. Operations in Korea and Malaya.—Reference to R.A.A.F. participation in operations in Korea is contained in Official Year Book No. 40, pp. 1112–13.

Australian assistance in the form of one transport squadron provided to the Malayan authorities is detailed in Official Year Book No. 40, p. 1113.

One bomber squadron was also provided for operations in Malaya. The Lincolns of No. 1 Squadron arrived in July, 1950, and were soon in action. Up till 1st February, 1957, No. 1 Squadron had dropped 31,211,850 lb. of bombs during operations against communist bandits. This bombing, which calls for extreme accuracy, was mainly on jungle hideouts frequented by the insurgents and was carried out in close co-operation with the ground forces.

3. Administration and Organization.—The Department of Air is responsible for policy for the organization and control of the Royal Australian Air Force. The Air Board is responsible, subject to approved policy, for the control and administration of the Royal Australian Air Force, and is constituted as follows:—Chief of the Air Staff, Air Member for Personnel, Air Member for Technical Services, Air Member for Supply and Equipment, Citizen Air Force Member and the Secretary, Department of Air.

Headquarters of the Royal Australian Air Force is located at Melbourne. An Oversea Headquarters is located at London and an Air Attaché at Washington.

The units of the Royal Australian Air Force are organized in three functional Commands throughout Australia and its Territories.

The Commands are:—

Home Command.—Home Command is responsible for the command of operational units and the conduct of their operations within Australia and its Territories.

Training Command.—Training Command is responsible for the command of training units, recruitment and individual training in the R.A.A.F.

Maintenance Command.—Maintenance Command is responsible for the command of supply and servicing units, and supply and servicing, including technical services, of the R.A.A.F. in Australia.

The organization of the Royal Australian Air Force includes the following types of formations and units:—

- (a) *Sub-formations*, comprising a headquarters unit to control the activities of a number of units at one location. Each formation has a base squadron which provides common services to all units at the location.
- (b) *Flying Squadrons*. These bomber, fighter, transport, target-towing and maritime reconnaissance squadrons undertake the operational and operational training flying commitments of the R.A.A.F.
- (c) *Aircraft Depots*. These units specialize in major overhauls, etc., of aircraft and equipment and relieve flying unit ground staff of these commitments.
- (d) *Stores Depots*. Stores and equipment ordered by the R.A.A.F. are delivered to these centrally located depots for distribution to units.
- (e) *Flying Training, Ground Training, Navigation, Radio and Air Armament Training Units*, which specialize in the aircrew and ground staff training required by the R.A.A.F.
- (f) *Airfield Construction Squadrons*. These units specialize in the construction of R.A.A.F. aerodromes and associated buildings and works services.
- (g) *Royal Australian Air Force College*. This unit is the training college for officer cadet entrants to the R.A.A.F.
- (h) *Telecommunications Units*. These units are responsible for the communications services of the R.A.A.F.
- (i) *R.A.A.F. Staff College*. This college trains specially selected R.A.A.F. officers for higher staff and command posts.

4. **Aircraft.**—Some of the aircraft which are at present being used in the Royal Australian Air Force are: bomber squadrons—Lincoln and Canberra; fighter squadrons—Mustang, Vampire, Meteor and Avon Sabre; transport squadrons—Dakota; maritime reconnaissance squadrons—Lincoln and Neptune; air observation post—Auster; training—Tiger Moth, Wirraway, Mustang, Dakota, Metropolitan, Lincoln, Winjeel, Vampire and Meteor.

5. **Establishment.**—The Royal Australian Air Force establishment, as proposed, comprises—(a) a Home Defence Organization, (b) Task Force elements and (c) a Training Organization, consisting in all of approximately 16,680 personnel.

6. **Strength of Royal Australian Air Force.**—At 1st February, 1957, the strength of the Royal Australian Air Force was as follows:—Permanent Air Force, 14,608; Active Citizen Air Force, 520; Active Reserve, 1,142 and General Reserve, 27,892. In addition 3,330 National Service Trainees were transferred to the Reserve each year up to 1957 after they had completed their 154 days training. After the intake in January, 1957, there have been no further intakes by the Air Force (see p. 1016).

7. **Women's Royal Australian Air Force.**—At 1st February, 1957, the Women's Royal Australian Air Force had an establishment of 841, with an enlisted strength of 724. There are 27 musterings, excluding members of the W.R.A.A.F. in training. The entry age is 18 to 34 years inclusive. Parental consent must also accompany applications for those between the ages of 18 and 21 years. A good education is necessary and applicants must be of British nationality, single, or a widow without dependants, and must be physically fit. Engagement period is four years with the option of re-enlistment for further periods of four years.

All W.R.A.A.F. trainees undergo a month's initial training course at Point Cook, Victoria. On graduating they are posted for duty to R.A.A.F. units anywhere in Australia. Wherever possible, the Air Force endeavours to post members of the W.R.A.A.F. to R.A.A.F. units within their home State. This rule applies for those who wish to serve in their home State, but members of the W.R.A.A.F. who wish to travel may indicate their preference and be posted to whichever State they desire.

§ 5. War Gratuities.

Reference is made in earlier issues of the Official Year Book to the payments made under the provisions of the War Gratuity Acts 1920 (*see* No. 15, p. 930) and the War Gratuity Act 1945–1947 (*see* No. 41, p. 999).

§ 6. Department of Defence Production.

1. **General.**—On 11th May, 1951, a Department of Defence Production and a Department of Supply were established by a decision of the Commonwealth Government. These Departments took over the functions previously undertaken by a joint Supply Department. The Department of Defence Production is responsible broadly for the production in government-operated factories and in industry under contract to the Government of munitions (including aircraft) required by the Services. It is also responsible for all those matters incidental to production, including planning production capacity to meet expected future Service requirements. References to previous operations of the various sections and establishments of the Department are given in Official Year Book No. 38, pp. 1200–9.

2. **Functions of the Department and Act Administered.**—The functions of the Department of Defence Production, as defined in the Administrative Arrangements approved by the Governor-General, are:—

- (i) Manufacture, acquisition, provision and supply of munitions for the defence forces, that is to say, armaments, aircraft, arms, ammunition, weapons, machine tools, war chemicals, radar and such other items as may be mutually agreed with the Department of Supply as falling within the definition of munitions, including the materials and plant necessary for the production of those things and all matters incidental thereto, including:—

The receipt from the Service Departments and other authorities or Departments of orders and forecasts of requirements of munitions; appropriate liaison with the Higher Defence Machinery, Service Departments and the Department of Supply to deal with Service munitions programmes; operation and management of factories, workshops and undertakings concerned in the production of munitions; arrangements and all action necessary to secure the manufacture, processing and delivery of munitions; investigations and development of Australian sources of munitions production, including the establishment of annexes or special capacity in industry for that purpose; acquisition by the Commonwealth and the establishment of factories and workshops for the purpose of producing munitions; provision and maintenance of stocks of materials and goods for the purpose of producing munitions.

- (ii) Employment and training of technicians, workmen and others for the purpose of producing munitions.
- (iii) Formation of Industry Advisory Committees to advise the Minister for Defence Production regarding:—

The allocation to industry of production programmes of munitions; the establishing of additional munitions production facilities, including annexes and undertakings; the obtaining of appropriate details of Australian industrial capacity required by the Department of Defence Production in allocating munitions production to industry; any other matters associated with munitions production as specified by the Minister.

- (iv) Provision and control of stores, magazine and similar undertakings required in connexion with production of munitions and for other purposes as required.
- (v) Arrangements for ascertaining costs and the control and limitation of profits in connexion with the production of munitions.
- (vi) Development of inventions originating in government factories in the interests of defence production.

The Act administered by the Department is the Supply and Development Act 1939–1948.

3. **Production.**—(i) *Munitions.* The Department is responsible for the production in Australia of the munitions (other than specialized Navy requirements) for the Armed Services. The production is undertaken in government-operated factories and industry. Broadly their roles are:—

- (a) Some processes are entirely undertaken by the government factories in peace and war because of special requirements.
- (b) Some classes of equipment and components are produced entirely by industry in peace and war.

- (c) Production techniques of advanced equipment and components of which industry may undertake mass production in war, are developed in the government factories in peace.
- (d) Limited requirements of standard equipment and components produced in peace by the government factories are in war produced on a mass production basis in industry.

The following factories are currently in operation:—Ammunition—Footscray, Victoria; Explosives and Filling—Albion and Maribyrnong, Victoria; Mulwala and St. Mary's, New South Wales; Ordnance—Maribyrnong, Bendigo, Echuca, Port Melbourne, all in Victoria; Small Arms—Lithgow, New South Wales; and certain annexes established in industry. Other government-owned factories and annexes are held on a care and maintenance basis against an emergency.

These factories are complementary to each other in the manufacture of a range of basic munitions. The Ammunition Factory makes the brass and non-ferrous components of gun ammunition, including melting and rolling and these components are then passed to the Explosives Factory for filling with explosives. In the case of small arms ammunition, however, the factory makes the complete round, receiving the propellant from the Explosives Factory. The Ordnance Factories principally make guns, and in addition make the steel shell bodies which are passed to the Explosives Factory to be filled with explosives and assembled with the brass and other components received from the Ammunition Factory. The Explosives Factories make the propellant and high explosives for the brass components made at the Ammunition Factory and the steel components made at the Ordnance Factory. The Explosives Factory also assembles the gun ammunition. The Small Arms Factory is equipped to make the rifles and other small arms for which the Ammunition Factory makes the ammunition.

Production of munitions is also a joint effort between the Government factories and private contractors in industry. In peace, industry produces many components for ammunition and other stores plus complete units such as electronic equipment and motor vehicles for the Services. In war, industry would provide the major capacity not only for mass production of these and many other new items, but also for the mass production of equipment and components using engineering techniques developed in peacetime in the Government factories.

(ii) *Aircraft.* (a) *General.* Matters relating to the production in Australia of military types of aircraft and aero engines and of other aircraft components required by the Royal Australian Air Force and the Royal Australian Navy are administered by the Department of Defence Production. Aircraft repair and overhaul activities carried out for those Services in civilian establishments, as distinct from Service workshops, are also the function of the Department, together with the responsibility of supplying aircraft and engine spare parts and airborne equipment generally.

(b) *Aircraft, Engine and Other Production.* The approved production programmes for the major aircraft manufacturing organizations in Australia comprised Canberra jet-engined bombers and Jindivik radio-controlled jet-propelled target aircraft at the Government Aircraft Factory, Melbourne; Avon Sabre jet-engined fighters, Winiel basic trainers and Rolls-Royce Avon turbo-jet engines at Commonwealth Aircraft Corporation Pty. Ltd., Melbourne, and Vampire jet-trainers at De Havilland Aircraft Pty. Ltd., Sydney.

Associated concurrent production activities included the manufacture of parts of aero engines and of undercarriages at the Aircraft Engine Factory, Sydney, production of heavy forgings at the Heavy Forge Annexe, Sydney, and the manufacture of aircraft pressed metal parts at Chrysler Australia Ltd., Adelaide.

(c) *Repair and Overhaul.* During the year, the broad policy was continued by the R.A.A.F. of returning to the factories in which they were produced all Australian-made aircraft and aero engines requiring major overhaul and the incorporation of modifications. Repair and overhaul of R.A.A.F. aircraft of certain other types and of carrier-based aircraft operated by the R.A.N. were undertaken by civilian personnel in the aircraft factories or in the works of contractors specially equipped to handle this type of work.

Lincoln and Canberra bomber aircraft were repaired and extensively modified at the Government Aircraft Factory, together with Jindivik target aircraft. Avon Sabre fighter aircraft were repaired and modified and Rolls-Royce Nene and Avon turbo-jet engines were overhauled by Commonwealth Aircraft Corporation Pty. Ltd., Melbourne. Rolls-Royce Merlin and Pratt and Whitney Twin Row Wasp engines from the R.A.A.F., Rolls-Royce Griffon, Bristol Centaurus and Armstrong-Siddeley Double Mamba turbo-propeller engines from the R.A.N., and Rover Meteor engines from the Department of the Army for Centurian tanks were overhauled at the Aircraft Engine Factory, Sydney. Wright turbo-compound engines from R.A.A.F. Neptune aircraft were overhauled by Qantas Empire Airways Ltd., Sydney.

Carrier-based Sea Venom aircraft, Vampire fighters and trainers and Tiger Moth trainers together with Goblin turbo-jet engines from Vampire trainers and Gipsy Major

piston engines were repaired and overhauled at De Havilland Aircraft Pty. Ltd. Dakota transport and other miscellaneous aircraft were reconditioned and serviced at the Government workshops at Parafield, South Australia.

The repair and overhaul of carrier-based Fairey "Firefly", Hawker "Sea Fury" and Fairey "Gannet" aircraft were handled by the Fairey Aviation Company of Australasia Ltd. Sydney.

Sycamore helicopter aircraft built by the Bristol Aeroplane Company and Bristol freighter aircraft and Alvis Leonides and Bristol Hercules engines from those aircraft were repaired and overhauled by Bristol Aviation Services, also in Sydney.

Repair and overhaul work on propellers was undertaken at the Propellor Annexe, Sydney, managed for the Commonwealth by De Havilland Aircraft Pty. Ltd., Sydney.

The reconditioning and servicing of aircraft instruments, ancillary equipment and air-frame components were carried out by a large number of sundry contractors.

(d) *Avalon Test Field.* During the year, the aircraft flight test field at Avalon, near Geelong (Victoria), was further developed for the final assembly, fitting out and testing in flight of the Canberra bomber and Avon Sabre fighter aircraft built at the aircraft factories near Melbourne.

4. **Defence Production Planning.**—The Defence Production Planning Branch is the central planning authority of the Department and is the executive instrument of a Committee of the same name. The three Defence Services and the Departments of Defence, Defence Production, Supply and Trade are represented on the Committee and this enables a close liaison to be maintained with the Departments concerned directly and indirectly with defence in the formation of defence production planning policy.

Broadly, the functions of the Branch are:—(i) to plan for and undertake the development of additional production capacity to meet Service munition requirements for mobilization and war; (ii) to arrange production in industry of current munitions requirements for the Defence Services; (iii) to develop production techniques and, where necessary, capacity to produce such requirements.

These functions are performed by the following production and related sections which exist within the Branch:—(a) Ammunition; (b) Telecommunications; (c) Ordnance and Engineering Equipment (including optics, machine tools, mobile and electrical equipment and small craft); (d) Materials and Chemical Engineering; (e) Technical Services; (f) Planning.

In order to advise the Minister of the Department in the development of industrial mobilization plans to meet the requirements of war related to particular industries, the following Industry Advisory Committees have been created:—Ammunition; Electrical; Explosives and Chemicals; Materials; Radar and Telecommunications; Weapons and their equipment; and Military Vehicles.

5. **Finance and Accounts.**—The expenditure on munitions, munitions factories, aircraft production, etc., during 1954-55 and 1955-56 is shown in the following table:—

DEFENCE PRODUCTION: TOTAL EXPENDITURE.
(£'000.)

Particulars.	Expenditure.	
	1954-55.	1955-56.
Parliamentary Appropriations	(a) 5,280	(b) 12,334
Trust Fund Accounts—		
Government Factories and Establishments	14,564	16,781
Manufacture of Munitions	12,007	13,541
Munitions Materials	129	22
Defence Production Materials	570	349
Aircraft Production	15,944	18,417
Strategic Stores and Equipment	239
<i>Total Trust Fund Accounts</i>	<i>43,214</i>	<i>49,349</i>
Total Expenditure	48,494	61,683

(a) Includes contribution under Superannuation Act and Audit.
contribution under Superannuation Act.

(b) Includes Audit; excludes

§ 8. Department of Supply.

1. **General.**—Reference to the creation of the Department of Supply is contained in Official Year Book No. 39, p. 1257.

2. **Functions of the Department.**—The functions of the Department include (a) the manufacture, acquisition, provision and supply of services and goods other than "munitions" (that is to say foodstuffs, textiles, clothing, fibres, canvas goods, woodwork, hardware, boots, leatherware and other like supplies) required by Services and other authorities; (b) research and scientific development in relation to war *matériel*, including the operation of the Joint United Kingdom-Australia Long Range Weapons Project, and Australian research and development through the Weapons Research Establishment, the Aeronautical Research Laboratories, Defence Standards Laboratories and associated establishments; (c) design and associated technical development and inspection of war *matériel*; (d) planning for and procurement of strategic materials; (e) planning and establishment of manufacturing facilities for the production of goods other than munitions; (f) formation of industry advisory committees in respect of production and procurement matters; (g) arranging contracts for supply of goods and performance of services; (h) operation and management of Government Clothing Factories; (i) acquisition, maintenance and disposal of stocks; (j) sale or disposal of surplus or unserviceable Commonwealth property (except buildings or land); (k) provision of Commonwealth transport facilities; (l) security service for Supply and Defence Production Departments; (m) arrangements for ascertaining costs and control and limitation of profits on production contracts; (n) co-ordinating estimates, allocation and commitment of resources for Defence Supply needs (including munitions) and liaison with the National Security Resources Board; (o) provision and control of stores required for or in connexion with matters administered by the Department of Supply; general storage for other Departments as required.

3. **Acts Administered.**—Acts administered by the Minister for Supply are the Aluminium Industry Act 1944-1954, Atomic Energy Act 1953 and Supply and Development Act 1939-1948.

4. **Research and Development Branch.**—(i) *General.* The Research and Development Branch, which is under the control of the Chief Scientist, is responsible for research and scientific development in relation to war *matériel* including the operation of the joint United Kingdom-Australia Long Range Weapons Organization. The Chief Scientist is also the Chairman of the Board of Management for Research and Development, which is responsible for the efficient and economical conduct of research and development undertakings. The headquarters of the Branch is situated at 339 Swanston Street, Melbourne, and the following establishments are included in the Branch:—Weapons Research Establishment, Salisbury, South Australia; Defence Standards Laboratories, Maribyrnong, Victoria; Aeronautical Research Laboratories, Fishermen's Bend, Victoria.

(ii) *Weapons Research Establishment, Salisbury, South Australia.* This Establishment has two main sections, namely, the Trials and Instrumentation Wing and the Weapons Research and Development Wing.

The Trials and Instrumentation Wing is concerned with the Joint United Kingdom-Australia Long Range Weapons Project and is responsible for the testing of guided missiles developed in the United Kingdom. The Weapons Research and Development Wing is engaged chiefly on Australian-initiated research but also provides a supporting research service for the Joint Project.

The headquarters of Weapons Research Establishment consisting of the main laboratory, workshop and administrative services, is located at Salisbury.

Accommodation has been provided in the area for a number of United Kingdom firms which are developing guided weapons under contract to the British Ministry of Supply.

A modern airfield (Edinburgh Field) has been established adjacent to the Headquarters at Salisbury to meet the flying requirements of the establishment, the flying effort being provided by the R.A.A.F.

Testing ranges have been provided at Woomera, which is approximately 280 miles north-west of Salisbury and 9 miles north of Pimba, which is on the trans-continental railway line. A number of these testing ranges are now in operation. A modern township of 500 houses and extensive barracks accommodation has been built, complete with community store, hospital, school and all amenities usually found in an Australian country town.

(iii) *Aeronautical Research Laboratories.* The Aeronautical Research Laboratories at Fishermen's Bend have continued investigations in aerodynamics, structures, aircraft materials and general aeronautical engineering according to their approved programme with particular attention to defence problems. These laboratories also collaborate with the United Kingdom on aeronautical matters of mutual interest.

(iv) *Defence Standards Laboratories.* The Defence Standards Laboratories at Maribyrnong continue to give comprehensive service to industry, the armed services and to other Commonwealth and State Departments.

The broad function of these laboratories is the application of scientific knowledge and research to the problems arising in design, development, manufacture, inspection, storage, and use of war *matériel*. Research is also carried out in connexion with the development of new and improved materials, methods and equipment of known or potential interest.

5. *Design and Inspection Branch.*—(i) *General.* The prime functions of the Branch are to design and test equipment to meet the Army's special requirements, and to inspect stores equipment for adherence to standards before acceptance on behalf of the Army.

(ii) *Design.* Comparatively little of the Army's equipment is identical with commercial patterns. In many cases, these can be used as the basis, minor modifications being made to suit Service needs. In other cases, there is no commercial equivalent and a completely new equipment must be developed. Hence there is need for a design authority:—(a) to investigate, evaluate and recommend commercial types of equipment for adoption by the Army; (b) to devise modifications to bring commercial products, or oversea Service equipment, into line with Australian Army requirements; and (c) to design and develop completely new patterns of equipment for the Army.

The Design Establishment at Maribyrnong is equipped for these tasks. Its three design sections handle respectively armaments, vehicles, and general engineering and telecommunications. It has common facilities for dealing with defects, standards, rationalization and standardization, production drawings, specifications, publications, testing of components and complete electrical and mechanical units, and the construction of mock-ups and models. The establishment makes the maximum use of extra-mural facilities (universities, other government departments, and industrial firms) and itself undertakes equipment development only when this is clearly the best way of doing it.

A small amount of work is done for Services other than the Army, for non-service Departments and for industry.

(iii) *Inspection.* The Inspection Service is primarily intended for the inspection of supplies for the Army, but undertakes inspection on behalf of certain other Departments, and all proof of armament stores for the three Armed Services.

The Inspection Service is divided into four groups—Engineering, Ammunition and Small Arms, General Stores and Clothing, and Proof and Experimental. The headquarters of the service is predominantly technical. The size of elements in the States varies with the volume of production to be inspected.

The Proof and Experimental Group conducts a number of proof ranges, the chief of which are at Port Wakefield, South Australia, and Compton Vale, Victoria.

The General Stores and Clothing Group, in addition to its inspection function, is responsible for the design of general stores and clothing.

In addition, there is an Equipment Inspection Section which holds and issues a complete range of drawings and specifications for Army equipment, including United Kingdom and Australian Joint Service specifications. This Section provides the data on which production is based.

6. *Contract Board.*—(i) *General.* Under the Supply and Development Act 1939–1948, the Contract Board is the authority responsible for purchasing supplies and arranging services for the Military, Naval and Air Forces of the Commonwealth, as well as for the Departments of Supply and Defence Production. Under this Act and Regulations, it is charged also with the responsibility of arranging for the sale or disposal on behalf of Commonwealth Departments of all surplus or unserviceable war *matériel*, goods and services approved for disposal. In addition to its statutory responsibilities, the Board makes purchases and arranges disposals on behalf of numerous Commonwealth Government Departments and Authorities who have no public contracting organization of their own, e.g., Immigration, National Development and External Affairs (Colombo Plan supplies).

(ii) *The Board and its Administrative Organization.* The Contract Board meets in Melbourne, and comprises representatives of the Departments of Supply, Defence Production, Navy, Army and Air. The Board's administrative organization is the Directorate of Contracts. In each State other than Victoria, there is a District Contract Board with an administrative organization similar to the Directorate of Contracts. The table following shows, in respect of the Contract Board Organization, the purchases and realizations from disposals for the years 1954–55 and 1955–56.

CONTRACT BOARD ORGANIZATION : PURCHASES AND REALIZATIONS FROM DISPOSALS.

Total	32,829,346	40,862,619	3,616,558	3,972,484

7. **Tinplate.**—Despite substantial losses of stoned fruits in Victoria as the result of floods, consumption of tinplate in 1956 was 126,865 tons or only 600 tons below the 1955 record.

Supplies were freely available from the United Kingdom and the United States of America, although some delays were caused by industrial disturbances.

Production of tinplate in Australia is expected to commence in 1957.

8. **Stores and Transport Branch.**—This Branch, administered by a Board of Management and working under the direction of a General Manager, functions as the central authority for meeting the storage and transport requirements of Commonwealth Departments and Authorities. It is the authority for the arrangement of furniture removals, at Departmental expense, in all States with the exception of the Australian Capital Territory and the Northern Territory. It has agents in Canberra and Darwin.

At 30th June, 1956, it had under its control, land, buildings, plant and machinery valued at over £5,707,805 and 2,315,000 square feet of storage space, of which 1,936,830 square feet was Government-owned and the balance held under tenancy.

9. **Finance Branch.**—The expenditure for Department of Supply activities during the years 1954-55 and 1955-56 are shown in the following table.

SUPPLY : TOTAL EXPENDITURE.

(£'000.)

Particulars.	Expenditure.	
	1954-55.	1955-56.
Parliamentary Appropriations	(a) 13,745	(a) 15,363
Trust Fund Accounts—		
Dorset Tin Dredge	34
Mica	444	72
Minerals Production	154	36
Government Factory (Clothing)	2,089	2,198
Stores and Transport	3,969	4,633
Strategic Stores and Equipment Reserve	Cr. 7	..
<i>Total Trust Fund Accounts</i>	<i>6,649</i>	<i>6,973</i>
Total Expenditure	20,394	22,336

(a) Includes amount appropriated for audit charges.

10. **Australian Aluminium Production Commission.**—Basic plans for the manufacture of aluminium ingot in Australia were approved by the Commonwealth Government in April, 1941, as a defence measure designed to make this country independent of oversea supplies. In April, 1944, an agreement was made between the Commonwealth and Tasmanian Governments for the establishment of the industry in Tasmania. The Australian Aluminium Production Commission, consisting of representatives of each of the two Governments, was constituted on 1st May, 1945. By legislation passed in 1952 and 1954, the original fund of £3,000,000 to finance the undertaking was increased to £10,500,000, of which the Commonwealth Government will contribute £9,000,000 and the Tasmanian Government £1,500,000. At the same time, the Commission was reconstituted to consist of five members of whom four represent the Commonwealth and one the State of Tasmania.

Workable deposits of bauxite (aluminium ore) have been proved in Tasmania, Victoria, New South Wales and the Northern Territory. The largest deposits are located in the Wessel Islands, Northern Territory, where nearly 10,000,000 tons of good grade ore have been proved, and also in the Inverell district of northern New South Wales, where reserves exceeding 8,000,000 tons have been brought under the Commission's control. In the Wessel deposits alone, there is a sufficient supply to maintain aluminium production in Australia for over 100 years, based on the present planned production of 13,000 tons of aluminium ingot annually.

The combined Bayer-Hall alumina and reduction plant erected at Bell Bay, northern Tasmania, is now in production of aluminium ingot and was expected to reach full production by the middle of 1957.

CHAPTER XXIX.

REPATRIATION.

§ 1. General.

An outline of the activities leading up to the formation of the Commonwealth Repatriation Commission was given in Official Year Book No. 15, p. 931. Also in the Official Year Book referred to, and in subsequent issues, some account was given of the policy and general activities of the Department, while detailed information was incorporated in regard to such matters as sustenance rates and pensions to members of the Forces and dependants. (*See Official Year Book No. 17, pp. 598-601.*) In 1943, the Australian Soldiers' Repatriation Act was amended by the incorporation of the recommendations of the Parliamentary Committee appointed to inquire into pensions and repatriation benefits. A general increase was made of approximately 20 per cent. in the rates of war pensions and increases were also made in other repatriation benefits.

Under the Australian Soldiers' Repatriation Act 1950, rates of pension and medical sustenance were increased, and pensions and benefits under the Act were extended to those members of the Forces (and their dependants) engaged in operations in Korea and Malaya. Provision was also made for payment to a war widow, on re-marriage, of a gratuity equal to one year's war pension. In addition, an important amendment was a change in the basis of war pensioning. Previously, the basis was the daily rate of service pay, but under this legislation the rank, not the pay, of the service man or woman became the basis. This change was brought about as the result of the increased rates of pay of members of the Forces under the new pay code from 1st July, 1947, and the further increases since then. The constantly rising rates of pay made it evident that the basis of pensioning on the daily rate of pay would be unworkable; for example, the rates of pay of more or less senior officers of the 1914-18 War, and of the 1939-45 War discharged before 1st July, 1947, were less than the new rates of pay for present day lower ranks, with a consequent disparity in the rates of pension. To avoid this disparity, the daily rate of pay basis—which had been in operation since the original war pension legislation of 1914—was abandoned in favour of the basis of pensioning according to the rank of the member, the basis adopted by other countries.

Amendments to the Act in 1951-52, 1953-54 and 1954-55 made provision for general increases in the rate of certain types of war pension. Other payments were accordingly affected, and additional benefits were provided.

The main activities of the Repatriation Commission at 30th June, 1956, were the grant, review and assessment of war and service pensions, the provision of medical treatment, vocational training, the renewal and repair of artificial replacements and surgical appliances, the grant and review of sustenance and living allowances, and the administration of the Soldiers' Children Education Scheme.

§ 2. War Pensions.

1. **General.**—The first provision for the payment of war pensions to members of the Forces and their dependants was made by the Commonwealth Parliament in the War Pensions Act 1914, which came into operation on 21st December, 1914. This Act was repealed in 1920 by the Australian Soldiers' Repatriation Act (amended from 31st December, 1950 to the Repatriation Act). Owing to limitations of space, only some of the main features relating to war pensions under the Repatriation Act 1920–1955 are shown in the following paragraphs:—

(i) *Eligibility for Pension.* There has been a considerable widening of the provision in this respect, to the benefit, mainly, of members of the Citizen Military Forces who have not served outside Australia. These provisions are summarized as follows:—

- (a) A member of the Forces who served (1) outside Australia, (2) in the Territories of Australia, such as Papua and New Guinea, or (3) within Australia in circumstances which can be regarded as actual combat against the enemy, is covered for war pension purposes in respect of incapacity or death which may result from any occurrence that happened during the period from the date of his enlistment to the date of the termination of his service in respect of that enlistment.
- (b) In other cases where a member served only in Australia, incapacity or death to be pensionable must have been attributable to service.
- (c) There is a third ground applicable to all in (a) and (b) who have had at least six months' camp service. This provides that, where a condition existed at enlistment, a pension may accrue if it is considered that such condition was aggravated by service.

(ii) *Pensions for Incapacity.* From 7th October, 1954, the 100 per cent. pension rate for a member's incapacity was increased from £8 5s. to £9 per fortnight (higher rates were payable in respect of certain commissioned ranks). The rates for wives and children of such members are £3 11s. and £1 7s. 6d. per fortnight respectively. From 20th October, 1955, the member's 100 per cent. incapacity rate was increased from £9 to £9 10s. per fortnight.

(iii) *Supplementation of Pension.* Where a member in receipt of a pension at the maximum rate is, because of his war disability, temporarily (for at least three months) precluded from earning, an additional pension may be granted to bring the total pension to the member up to £19 10s. per fortnight from 20th October, 1955.

(iv) *Women's Nursing and Auxiliary Services.* Members of Women's Services are entitled to pensions and other benefits as prescribed in the Act on the same basis as male members of the Forces.

(v) *Tuberculosis.* In the case of a member of the Forces who served in a theatre of war, and, at any time after discharge became or becomes incapacitated, or died or dies, from pulmonary tuberculosis, war pension is payable, and medical treatment is provided on application as if the incapacity or death resulted from an occurrence on service. (*See also* § 3. Service Pensions.)

(vi) *Special Rates.* Those who have been totally blinded as the result of war service and those who are permanently and totally incapacitated receive as from 5th November, 1953, special pensions of £18 10s. per fortnight. The rate for Tuberculars, Class "B" (fit for light employment) was increased from £12 to £13 per fortnight. The rates were further increased to £19 10s. and to £14 per fortnight respectively from 20th October, 1955. In addition to the special pension, an attendant's allowance of £3 10s. per fortnight is granted to the war-blinded and to certain others who are deemed to be in need of an attendant. A war-blinded member who is also affected with total loss of speech or total deafness was entitled from 2nd October, 1952, to an attendant's allowance of £7 per fortnight in lieu of that referred to above. Attendant's allowance rates were further increased from 20th October, 1955, to £5 10s. and to £9 per fortnight respectively. The wife and any children under 16 years of age receive the same rates as shown in sub-para. (ii).

(vii) *Specified Disabilities.* Where the disability is amputation of a limb or limbs or total loss of vision in one eye, amounts ranging from 17s. to £10 per fortnight in addition to the statutory rate of pension are payable as from 20th October, 1955. In addition, allowances of either £5 10s. or £9 per fortnight are payable in certain double amputation cases.

(viii) *Time Limit for Wives and Children Removed.* Prior to the 1950 amending Act wives who were married and children who were born after 1st July, 1938, were ineligible to receive a war pension. This time limit was removed as from 2nd November, 1950.

(ix) *Rates of Pensions for Death. (a) Widows.* As already indicated, rates of pension, which were previously based on the daily rate of pay of the member, are now based on the rank of the member. From 20th October, 1955, the rates were increased by £1 per fortnight, the minimum rate being increased from £8 to £9 per fortnight. In addition to the pension, the widow, if she has dependent children, receives an allowance if she is permanently unemployable, or if she is over 50 years of age; this allowance is £3 9s. per fortnight. The allowance may also be paid to a widow under 50 years of age, in certain cases, so long as the child (or one of the children if more than one child) over the age of sixteen, is undergoing education or training but has not qualified for (or is not receiving) the adult wage in the trade, occupation or calling for which the child is training.

(b) *Children.* From 2nd October, 1952, the rate of pension for the eldest child (under 16 years of age) was increased to £2 13s. per fortnight, and that of each younger child to £1 17s. Additional pension of 12s. per fortnight may be paid in certain circumstances. Where both parents are dead each child is pensioned at the rate of £4 16s. per fortnight.

(x) *Widowed Mother on Death of Member.* A pension ranging from £4 10s. to £8 6s. per fortnight, according to the rank of the member, may be granted to a widowed mother of a deceased unmarried son, provided widowhood occurred either prior to or within three years after the death of the member. The pension may be supplemented by payment to a prescribed person of an additional amount not exceeding £8 per fortnight according to the extent of other income of the pensioner; this operated from 20th October, 1955. The value of property possessed does not affect the issue.

2. *Appeals Tribunals.*—The principal Act was amended as from 1st June, 1929, to create tribunals to hear appeals in regard to war pensions. The War Pensions Entitlement Appeal Tribunal is empowered to hear and decide any appeal by or on behalf of ex-members of the Forces or their dependants against a decision of the Repatriation Commission that an incapacity or the death of an ex-member did not arise out of war service. Assessment Appeal Tribunals were created to hear and decide any appeal against a current assessment or a "Nil" assessment of war pension made by the Repatriation Commission in respect of an incapacity of an ex-member of the Forces which had been accepted as arising out of war service. Provision was made by subsequent legislation to enable the Tribunals to hear appeals by certain members for service pensions.

3. *Summary of War Pensions, 1955–56.*—At 30th June, 1956, the number of war pensions for the 1914–18 War was 136,113, for the 1939–45 War 460,854, and for the Korea and Malaya Operations 2,647, making a total of 599,614 with a liability of £43,644,987 per annum. The amount paid in war and service pensions during the year 1954–55 was £47,307,315. The outstanding features for 1955–56 for each war are listed in the following table:—

WAR PENSIONS : SUMMARY, AUSTRALIA, 1955–56.

Particulars.	1914–18 War.	1939–45 War.	Korea and Malaya Operations.	Total.
New claims granted	2,337	30,098	676	33,111
Restorations	434	1,453	4	1,891

(a) Not available.

4. Classes of War Pensions, Australia, 1955-56.—(a) *New Claims Granted.* The following is an analysis of the total number of new claims granted during 1955-56:—

WAR PENSIONS : NEW CLAIMS GRANTED, AUSTRALIA, 1955-56.

Class.	1914-18 War.	1939-45 War.	Korea and Malaya Operations.	Total.
Members	795	5,815	203	6,813
Wives of Members	1,085	6,014	185	7,284
Children	337	17,610	277	18,224
Other dependants	120	659	11	790
Total	2,337	30,098	676	33,111

(b) *Pensions in Force.* The following table shows the number of pensions in force at 30th June, 1956 for each war and for each class of pensioner:—

WAR PENSIONS IN FORCE, AUSTRALIA, 30th JUNE, 1956.

Class.	Number of Pensioners at 30th June, 1956.			
	1914-18 War.	1939-45 War.	Korea and Malaya Operations.	Total.
Children of deceased members	587	8,522	81	9,190
Orphans	47	133	..	180
War widows	18,893	10,409	52	29,354
Members	58,984	139,249	1,057	199,290
Children	4,379	181,826	784	186,989
Wives	50,879	113,769	595	165,243
Parents	2,055	6,738	73	8,866
Brothers and sisters	81	108	5	194
Others	208	100	..	308
Total	136,113	460,854	2,647	599,614

(c) *Special Rate Pensions.* At 30th June, 1956, special rate pensions of £19 10s. per fortnight were being paid to the following classes of members of the Forces:—

WAR PENSIONS: MEMBERS ON SPECIAL RATES, AUSTRALIA, 30th JUNE, 1956.

Class.	1914-18 War.	1939-45 War.	Korea and Malaya Operations.	Total.
Blinded members	212	203	4	419
Tubercular members	759	997	10	1,766
Totally and permanently incapacitated members	10,316	3,547	8	13,871
Tuberculars, Class " B " (a)	156	323	1	480

(a) Rate £14 per fortnight.

5. *Number of War Pensioners and Annual Liability, States, etc., 30th June, 1956.*—The following table shows the number of pensions in force and annual liability for each war at 30th June, 1956, according to place of payment. (The amount paid is shown on p. 1039.)

WAR PENSIONS : NUMBER OF PENSIONERS AND ANNUAL LIABILITY, 30th JUNE, 1956.

§ 3. Service Pensions.

1. *General.*—The payment of service pensions is provided for in the Repatriation Act 1920-1955 and has operated since 1st January, 1936.

Originally fixed on a lower scale, the maximum rate of service pension for a member of the Forces now conforms to the rate of the age or invalid pension, which was increased from £7 to £8 per fortnight from 20th October, 1955. Since the 18th October, 1956, a member service pensioner with two or more children under the age of 16 years can receive a further £1 per fortnight in respect of each child (except the first) providing the member is permanently incapacitated for work and has the custody, care and control of the children. The maximum rate for the wife of a member is £3 10s. per fortnight; the rate for the first child under 16 years of age is 23s. per fortnight and 5s. per fortnight is payable for each of the younger children up to three in number. The actual rate payable in any case is determined after taking into consideration all other income, except income derived from property, and property (apart from the home and certain other exemptions) owned by the pensioner, and no service pension can be paid where the other income and/or property exceeds certain specified limits. From 7th October, 1954 the allowed income was £364 per annum for a single man and £728 per annum in the case of a member and wife. The amounts were raised to £390 and £780 operative from 20th October, 1955 in conformity with the member's rate increase. If a member has property (apart from the home and certain other exemptions) exceeding in value £1,750 (£3,500 for a member and wife), that alone precludes payment of a pension. Pension is assessed according to the amount of income; if the income is less than the amount shown above, service pension is assessed at such rate as will, with that other income, bring the total income (including service pension) of the pensioner up to the allowed income provided that the pension cannot exceed the maximum rate specified for the particular class of case. If assessable property is held, then a deduction is made from the pension assessed according to income only, the deductions being made at 9d. per fortnight for each complete £10 of property in excess of £200 (or £400 in the case of member and wife). Half the combined income received and property possessed by man and wife is deemed to be income received and property possessed by each for service pension purposes.

In 1936, female members of the Forces were made eligible for consideration for service pensions if they embarked for service abroad; previously they must have served in a theatre of war. In the same year, an institutional rate of service pension not exceeding 12s. per fortnight was made available. This pension rate, which benefits particularly inmates of mental hospitals, was £2 9s. per fortnight from 5th November, 1953, but was increased to £2 16s. per fortnight from 20th October, 1955.

Eligibility for service pensions may be established on any one of the following grounds:—

- (a) Sixty years of age or more, provided the member served in a theatre of war, but eligibility on this ground applies only to the member and not to his wife or children. In the case of a female member of the forces, the qualifying age is 55 years, and service abroad, not necessarily in a theatre of war, is sufficient.

- (b) Permanently unemployable, provided the member served in a theatre of war (or, in the case of a female member, served abroad). Under this class pensions may be paid to the member, his wife and children up to four in number.
- (c) Pulmonary tuberculosis, whether the member served in a theatre of war or not. Under this class also, pensions are payable to the wife and children up to four in number.

Only those members who qualify under Class (c) are entitled to receive both service and invalid pensions at the same time.

From 1st November, 1941, service pensions were extended to veterans of the South African War 1899–1902, and in 1943 to members of the Forces of the 1939–45 War, and now also apply to members who served in the Korea and Malaya operations.

2. Operations, 1955–56.—The following table gives a summary relating to service pensions during 1955–56:—

Claims granted during year—						
Members of the Forces	7,414
Wives	5,072
Children	1,748
Total	14,234
Claims rejected during year—						
Members of the Forces	1,362
Wives	824
Children	486
Total	2,672
Service pensions cancelled or discontinued during year	2,268
Deaths of pensioners during year	1,402
Pensions in force at 30th June, 1956	34,775
Annual pension liability on 30th June, 1956	£4,694,822

3. Number of Service Pensioners and Amount Paid.—(i) *Summary, Australia.* The following table shows the number of service pensions in force and the amount paid in pensions for the ten years 1946–47 to 1955–56.

§ 4. Medical Treatment of Returned Soldiers Suffering from War Service Disabilities.

At 30th June, 1956, there were 4,586 in-patients in Repatriation medical institutions and State mental hospitals, including a number whose care was undertaken by the Repatriation Commission on behalf of other countries or Commonwealth Departments. There were 377,641 out-patient attendances for treatment during the year, excluding approximately 964,000 treatments by the 3,805 local medical officers resident in metropolitan and country areas and New Guinea. The expenditure for the year ended 30th June, 1956 was £9,559,880.

§ 5. General Benefits and Miscellaneous.

1. *Other Departmental Activities.*—(i) *General.* During the 1939–45 War, the ordinary activities of the Department in the way of general benefits for the welfare of members and dependants were carried on without interruption. They were mainly education and training of children under the Soldiers' Children Education Scheme, medical benefits for widows and children of deceased members and for widowed mothers of deceased unmarried members, funeral expenses for certain classes of members and dependants, and allowances to certain classes of dependants in lieu of pension.

By legislation passed in June, 1940, these benefits were extended to members engaged in the 1939–45 War and in November, 1950, to those engaged in the Korea and Malaya Operations and new benefits designed for the re-establishment of members after discharge from the Forces were made available. The re-establishment benefits administered by the Repatriation Commission are:—payment of re-employment allowance while awaiting employment; provision of tools of trade and equipment where such are necessary to the member's employment; transportation expenses to meet the cost of fares and removal of household belongings, where a member, or member and family, takes up training, employment, or a business, or settles on the land; supplementation of wages of apprentices whose apprenticeships were interrupted by war service; re-establishment loans to enable members and widows to establish themselves in business, practices or other occupations,

including (until the Division of War Service Land Settlement began operations early in 1946) agricultural occupations; payment of re-establishment allowance during the early stages of establishment in business; gifts up to £75 for furniture to members who are blind or totally and permanently incapacitated, also to widows with children under 16 years of age; and free passages to Australia for wives, widows and children of members who married abroad (and passages outward from Australia in certain cases of members and dependants).

In 1949, the Commission took over the functions of the Re-establishment Division of the former Department of Post-war Reconstruction, and is responsible for the co-ordination of all matters relating to training under the Commonwealth Reconstruction Training Scheme. Re-establishment of the more seriously disabled, where ordinary training is not sufficient, continues to be a function of the Commission, and special means have to be found to overcome each problem.

(ii) *General Repatriation Benefits.* The following table gives a summary of expenditure during 1955–56 on the more important general repatriation benefits for all wars.

GENERAL REPATRIATION BENEFITS, 1955–56.

Benefit.	Expenditure, 1955–56.

<i>Capital Works and Services</i>		897,634
		<hr/>
		64,099,557

3. *Settlement of Returned Service Personnel on the Land.*—Reference to the settlement on the land of returned service personnel will be found in Chapter IV.—*Land Tenure and Settlement.*

4. *The Services Canteens Trust Fund.*—(i) *Introduction.* The Services Canteens Trust Fund was established under the Services Trust Funds Act 1947. This act transferred to the fund the profits and assets of the Army, Navy and Air Force canteens, the mess and regimental funds of disbanded wartime units, money derived from the sale of amenities supplied to the defence forces between the 3rd September, 1939, and the 30th June, 1947, and funds held by the A.M.F. Special Benefits Committee, the trustees of the R.A.N. Relief Fund and the trustees of the R.A.A.F. Welfare Fund.

(ii) *Establishment and Administration of the Fund.* The total amount transferred to the fund to the 31st December, 1956, was £5,505,775. The act prescribed that of this, £2,500,000, and such further amounts as the trustees of the fund may from time to time decide, should be devoted to the provision of education facilities for the children of eligible ex-servicemen and women, and that the balance of the fund should be used to provide relief for ex-servicemen and women and their dependants who are in necessitous circumstances.

The fund is administered by ten trustees, consisting of a chairman, a businessman selected by the government, and nominees of the Navy, Army, Air Force, Women's services, the Disabled Soldiers' Council, the Ex-naval Men's Association, the Air Force Association and the Returned Sailors', Soldiers' and Airmen's Imperial League of Australia. These

trustees all serve in an honorary capacity. They have power to determine the persons or groups of persons to benefit from the fund and the extent of benefits to be granted within the provisions of the act, and to appoint regional committees to assist with the administration.

Regional committees have been established in all Australian States, the Australian Capital Territory, the Northern Territory, New Zealand and London. All Australian diplomatic and consular posts also act as local representatives of the trustees. They have delegated to them by the trustees specific powers to deal with applications for assistance from the fund.

Members of regional committees are all persons who served in the 1939–45 War or are widows of men who served during the war, and, with the exception of regional chairmen and deputy chairmen, have been selected by the trustees from nominees of the major ex-service organizations. They also serve in an honorary capacity.

(iii) *Assistance from the Fund.* Persons eligible for assistance from the fund are those who between the 30th September, 1939 and the 30th June, 1947 served in the Australian Naval, Military or Air Forces (including members of the Canteens Staff of any ship of the Royal Australian Navy), persons duly accredited to any part of the Defence Force who served in an official capacity on full-time paid duty, and their dependants.

The trustees are charged under the Services Trust Funds Act with:—

- (a) providing educational assistance including professional and trade training—
 - (i) for the children of deceased or incapacitated eligible servicemen or of eligible servicemen who are in needy circumstances; and
 - (ii) for the children of other eligible servicemen which children are in the opinion of the trustees particularly deserving of assistance by reason of exceptional circumstances;
- (b) providing benefits for—
 - (i) eligible servicemen in necessitous or deserving circumstances;
 - (ii) the dependants of deceased or totally or partially incapacitated eligible servicemen or of eligible servicemen in necessitous or deserving circumstances;
 - (iii) the dependants of eligible servicemen other than those mentioned in paragraph (ii) above, which dependants are, in the opinion of the trustees, in necessitous circumstances or particularly deserving of assistance;
 - (iv) the provision of relief or benefit for eligible servicemen and their dependants in such other cases as the trustees think fit.

The trustees have introduced schemes for providing—

- (a) welfare relief for ex-service men and women who are eligible for benefits and their dependants;
- (b) benefits for children of eligible ex-service men and women who are suffering from serious and incapacitating afflictions; and
- (c) education benefits for the children of eligible ex-service men and women.

Because over 1,000,000 men and women and all their dependants are eligible for benefits, the assistance that can be provided in individual cases is limited and the trustees have prescribed a policy for welfare relief which makes assistance available only to those who are in genuine distress from which they cannot with their own efforts extricate themselves. In determining the nature or amount of relief to be granted, care is taken wherever possible to use the fund constructively with the object of assisting the applicant to achieve independence, and of discouraging any tendency towards increasing dependence on social welfare organizations. For example, the regular supplementation of pension or low income for an indefinite period is contrary to the policy of the trustees, as it is quite impossible for the fund to assume a general responsibility of that nature. Instead every effort is made to assist the applicant to adjust his mode of living or to increase his income himself so that he may live within it. Either the applicant, or his dependants, should be deserving of assistance. Though the fund is not used in such a way as to encourage improvidence, even the complete worthlessness of the eligible person will not debar deserving dependants.

The fund is to be available for 40 years from its inauguration in 1947 for welfare relief, and for 30 years for education.

Applications are carefully investigated to determine the bona fides of the applicant and the case presented, and to help regional committees in deciding the kind of assistance, if any, to be given. Where possible, investigations are made by trained social workers either on the staff of the fund or of recognized agencies.

The following amounts of welfare relief have been granted from the fund:—

	For the Year 1956.	Total to 31st December, 1956.
	£	£
To ex-service men and women	52,436	542,445
To widows and orphans	30,265	239,147
Total	82,701	781,592

A total of 20,498 ex-service men and women and 7,299 widows and orphans were granted welfare assistance from the Fund to the 31st December, 1956.

Of all persons eligible for assistance from the fund, widows and orphans are likely to be in greatest need, especially in the period immediately following the death of an ex-serviceman. Consequently a special effort is made to locate these widows and orphans and their degree of need is interpreted more leniently than is that of ex-servicemen.

Also particularly deserving of assistance are dependant children suffering from afflictions which permanently disable or seriously retard their progress or prevent the enjoyment of normal health and strength and present a prospect of complete or partial dependence on others for all or part of their lives. The trustees introduced a plan to ensure that any eligible child suffering from a serious affliction may be assisted as necessary and may have access to whatever treatment or facilities are available to help the child be as normal, self-reliant, self-supporting, socially acceptable, mobile, and happy as possible, despite his or her handicap. The extent to which assistance will be granted in a particular case depends largely on the nature of the child's affliction, the facilities available, the family circumstances, and the funds that can be made available.

Up to 31st December, 1956, 1,236 afflicted children had been assisted under the Afflicted Children's Scheme involving an expenditure of £53,849.

Educational assistance is restricted to children who are 14 years of age and over, except in the case of orphans, when assistance commences at the age of 12 years, or in the case of orphans eligible for education allowances from the Repatriation Department, where education assistance is granted from the age of 13. The object of the trustees is to assist eligible children to obtain the highest education within their capacity.

Educational assistance from the fund is in the form of education awards ranging from £5 to £200 a year depending on the cost of the course undertaken and the family circumstances.

These awards are granted for practically every type of course of education including secondary and tertiary education and business courses. They are designed to cover, or contribute towards, the cost of essential books, fees in cases where government school courses are not available, fares between the child's home and school, essential equipment and material, a uniform allowance in certain years and a maintenance allowance for the child whilst at school.

The education scheme also provides for post-graduate courses. Two post-graduate scholarships are awarded each year. One scholarship valued at £800 per annum for three years is provided for study overseas and one scholarship valued at £600 per annum for three years is available for post-graduate study in Australia.

Two post-graduate nursing awards are tenable in Australia each year. They cover fees, fares, books and a maintenance allowance at the rate of £6 per week for the duration of the course. In addition, post-graduate nursing awards are granted for post-graduate nursing training overseas in courses which are not available in Australia.

The number of children assisted under the education scheme to 31st December, 1956 was 19,996, and the expenditure on education awards, post-graduate scholarships and post-graduate nursing awards to 31st December, 1956 was £815,288.

CHAPTER XXX.

MISCELLANEOUS.

This chapter comprises miscellaneous statistics and other descriptive information not directly related to the subjects of the preceding chapters, arranged in sections as follows:—

1. Valuation of Australian Production; 2. Indexes of Production; 3. Consumption of Foodstuffs and Beverages; 4. Patents, Trade Marks and Designs; 5. Copyright; 6. Australian Shipbuilding Board; 7. Commonwealth Scientific and Industrial Research Organization; 8. Mount Stromlo Observatory; 9. Standards Association of Australia; 10. Film Censorship Board; 11. Australian National Film Board and the Film Division; 12. National Safety Council of Australia; 13. Australian Road Safety Council; 14. Australian Atomic Energy Commission; 15. The United Nations; 16. Australian Representation Abroad: Oversea Representation in Australia; 17. Retail Trade.

§ 1. Valuation of Australian Production.

1. **General.**—The value of production for Australia is computed in accordance with the decisions reached at the Conferences of Australian Statisticians and principally at the Conference held in 1935. The figures published below have been compiled by the State Statisticians from the best data available, and relate to 1954–55 and 1955–56. The adoption of substantially uniform methods of valuing production and of estimating elements of costs of production and marketing renders the results comparable as between States.

Attention is directed to the fact that the values shown in the tables herein refer only to production of primary industries and factories and exclude the building and construction industry, those industrial establishments not classified as factories, and certain agricultural and farmyard produce obtained from areas of less than one acre.

The following is a brief explanation of the terms used:—

- (a) *Gross Value of Production* is the value placed on recorded production at the wholesale price realized in the principal markets. In cases where primary products are consumed at the place of production or where they become raw material for a secondary industry, these points of consumption are presumed to be the principal markets.
- (b) *Local Value* (i.e., the gross production valued at the place of production) is ascertained by deducting marketing costs from the gross value. Marketing costs include freight, costs of containers, commission and other charges incidental thereto.
- (c) *Net Value of Production* represents local value less value of materials used in the process of production. Materials used in the process of production include seed, power, power kerosene, petrol and other oils, fodder consumed by farm stock, manures, dips, sprays and other costs. No deductions have been made for depreciation or certain maintenance costs as particulars are not available for all States. The *Net Value of Production* is the only satisfactory measure to use when comparing or combining the value of primary industries with those of other industries.

Power costs (power, power kerosene, petrol and other oils) have not been deducted in New South Wales since 1940–41 when they amounted to £1,892,000 and in Tasmania since 1941–42, when they amounted to £86,510. Consequently net values of production for later years in these two States are overstated. Costs of materials used in the process of production are not available for all States in respect of Bee-farming, Trapping, Forestry and Fisheries, and local values have been used for these industries with consequent overstatement in net values.

2. Value of Production, Australia, 1954-55 and 1955-56.—The following table shows particulars of the gross, local and net values of production in Australia by industries during the years 1954-55 and 1955-56:—

GROSS, LOCAL AND NET VALUE OF PRODUCTION OF PRIMARY INDUSTRIES AND FACTORIES : AUSTRALIA, 1954-55 AND 1955-56.

(a) See letterpress on p. 1047.

(b) Local value.

In the chapters dealing with the respective industries (except trapping and mines and quarries) tables will be found showing the total and per head values of production for the industry by States for a series of years up to 1955-56.

§ 2. Indexes of Production.

In the first two tables below, indexes of price and quantum (i.e. value at constant prices) of production are given for the following industrial groups, namely:—Agriculture, Pastoral, Farmyard and Dairying, and All Farming combined (including separate indexes for Wool and Products other than Wool). In the third table, indexes of quantum (i.e. value at constant prices) of production, exports and consumption of farm products for food use are shown. Indexes previously published in respect of Gold and Other Minerals, and All Mining combined, are under review and pending completion of investigations the publication of these results has been temporarily discontinued.

1. **Farm Production Price Indexes.**—The Farm Production Price Indexes shown in the following table relate to average "prices" of agriculture, pastoral, farmyard and dairying products realized in the principal markets of Australia. The "price" data used are average unit values for the total quantities of the relevant commodities produced or marketed in each year and the index numbers therefore measure both the effects of changes in prices (as such) and of variations in the quality, type, usage, etc. of products marketed. The index numbers for any year relate to the average values of products produced or marketed in that year, irrespective of the periods in which payment is received by producers.

The indexes have been calculated by the fixed-base weighted aggregative method. "Prices" for each commodity in any year are obtained by dividing gross value of production by the quantity produced in that year. In the original published series of Production Price Index Numbers, the average quantities of the relevant commodities produced in the period 1923-24 to 1927-28 were used as fixed weights. This series has been retained for years up to 1935-36, but re-computed to the base, average 1936-37 to 1938-39 = 100. For 1936-37 and later years, the original series was replaced in December, 1952, by a revised series in which average quantities of each product marketed during the period 1946-47 to 1950-51 are used as fixed weights. In the revised series, the regimen was extended and modified to include farm products (as defined by Australian Statisticians) in all cases. Certain other refinements were also incorporated in the revised indexes, the principal of which was the omission from the weights used for the All Farming Index of quantities of crops marketed for livestock feeding in Australia.

(b) See letterpress preceding table.

(c) Revised.

2. Indexes of Quantum (i.e. Value at Constant Prices) of Farm Production.—The indexes shown in the following table relate to gross output of farm products valued at constant prices. They have been calculated by revaluing quantities of each farm product included in the indexes at the average unit gross value of each product for the base years.

In the original published series, the period 1923–24 to 1927–28 was adopted as the base for revaluing each farm product. This series has been retained for years up to 1935–36, but the index numbers have been re-computed to the base, average 1936–37 to 1938–39 = 100. For 1936–37 and later years, the original series was replaced in December, 1952 by a revised series in which average unit values for the period 1936–37 to 1938–39 are used. The regimen used for the revised series was extended and modified to include farm products (as defined by Australian Statisticians) in all cases. Certain other refinements were incorporated in the revised indexes, the principal of which was the omission, in calculating the Ail Farming Index, of quantities of crops fed to livestock in Australia.

(a) Indexes of value at constant prices, i.e., quantities revalued at average unit values for the base years (see text preceding table). (b) See letterpress preceding table. (c) Not available for previous years. (d) Revised. (e) Subject to revision.

3. **Farm Products for Food Use; Indexes of Quantum (i.e. Value at Constant Prices) of Production, Exports and Consumption.** The indexes shown in the following table have been calculated by revaluing quantities of each farm product included in the indexes at the average unit gross value of each product for the years 1936-37 to 1938-39. The items included comprise products in the form in which they are sold from farms in all cases except live-stock sold for slaughter for meat, which are included in terms of dressed carcass weight of meat. Quantity data relating to exports include exports of processed food in terms of farm product equivalent. The indexes of production relate basically to gross output of farm products for food use, including crops exported for stock-feeding overseas. Particulars are not available prior to 1946-47 except for the base years.

FARM PRODUCTS FOR FOOD USE: INDEXES OF QUANTUM^(a) OF PRODUCTION, EXPORTS AND CONSUMPTION.

(Base: Average 1936-37 to 1938-39 = 100.)

Year.	Production.		Exports.		Consumption in Australia.	
	Total.	Per Head of Total Population.	Total.	Per Head of Total Population.	Total.	Per Head of Total Population.

(a) Indexes of value at constant prices, i.e., quantities revalued at average unit values for the base years (1936-37 to 1938-39). (b) Subject to revision. (c) Estimated.

§ 3. Consumption of Foodstuffs and Beverages.

1. **Quantities Consumed.**—Previous issues of the Official Year Book up to No. 36 included a statistical survey of the movement in the consumption in Australia, in total and per head of population, of a selected number of commodities over a period of years up to 1940-41 (see Official Year Book No. 36, pp. 1098-1100). In issue No. 37, these long-term comparisons were replaced by more detailed information covering consumption of the principal foodstuffs and beverages in annual periods since 1944 in comparison with average annual consumption during the three years ended 1938-39. In this issue, the annual periods extend from 1951-52 to 1955-56.

The estimates of total consumption and consumption per head of population in Australia in the two tables following have been compiled by deducting net exports from production and allowing for recorded movements in stocks of the respective commodities. While the estimates may generally be accepted as reasonably accurate, there are some deficiencies to which attention should be directed. These relate chiefly to the quantities of poultry, game and fish (fresh and shell) and the quantities of visible oils and other fats entering consumption. In addition, little information is available on the quantities of vegetables, fruit, eggs, etc., which householders produce for their own requirements and the extent of wastage occurring in the marketing of foodstuffs. In all these cases, careful estimates have been compiled from the best available data, and the quantities shown as entering consumption in Australia have been adjusted to allow for these circumstances. The absence of particulars of stocks for certain commodities has resulted in some inaccuracies in the estimates of annual consumption. Consumption of foodstuffs is measured in general "at producer" level. As a result no allowance is made for wastage before the foodstuffs are consumed. In recent years, wastage of foodstuffs has possibly been less than hitherto because of more efficient distribution and storage methods. In addition, it is likely that the

quantities of foodstuffs shown in the following pages as available for consumption have been supplemented by increased "back-yard" production. Neither of these factors has been taken into account, and it is possible that, as a result, some understatement has occurred in the following consumption estimates. Except in a few special cases no adjustment has been made for changes in stocks held by wholesalers and retailers. Where no allowance is made it is considered unlikely that these stocks would make any appreciable difference to consumption estimates. Allowance has not been made for the purchase of foodstuffs for despatch overseas as gifts in bulk and by parcel post. These deficiencies, however, do not seriously impair the accuracy of the estimates compiled.

The estimates of consumption per head of population shown in the second table following have been checked, wherever possible, with data from other sources (principally from the Food Consumption Survey conducted in 1944 by the Nutrition Committee of the National Health and Medical Research Council) which confirm the reliability of the methods used.

More detailed information on the consumption of foodstuffs and beverages is contained in the Statistical Bulletin: *Food Production and the Consumption of Foodstuffs and Nutrients in Australia*, issued by this Bureau.

(a) Subject to revision. (b) Included with fresh meat at its carcass weight. (c) Edible weight. (d) Included with fresh. (e) In terms of weight of shell eggs. (f) Includes fresh equivalent of manufactured products. (g) Probably understated owing to lack of complete data. (h) Not available. (i) Excludes invalid and health foods, semolina and wheat germ prior to 1951-52.

2. **Level of Nutrient Intake.**—The table below shows details of the estimated supplies of nutrients available for consumption in Australia during annual periods since 1951-52 in comparison with the annual average for the three years 1936-37 to 1938-39. The table has been compiled by the Nutrition Section of the Commonwealth Department of Health and is based on the estimates of the quantity of foodstuffs consumed per head of population shown in the preceding table.

ESTIMATED SUPPLIES OF NUTRIENTS AVAILABLE FOR CONSUMPTION :
AUSTRALIA.

(Per Head per Day.)

(a) Subject to revision.

NOTE.—For the years 1952-53 to 1955-56, new conversion factors have been used based on factors contained in the "Table of Composition of Australian Foods" (Anita Osmond and Winifred Wilson, Canberra, 1954), but the comparison with previous years has not been significantly affected. Vitamin A is on a revised basis for all years shown.

§ 4. Patents, Trade Marks and Designs.

1. Patents.—(i) *General.* Patents for inventions are granted under the Patents Act 1952-1955, which applies to the Commonwealth of Australia and the Territories of Norfolk Island, Papua and New Guinea. The Act is administered by a Commissioner of Patents. The principal fees payable up to and including the grant of a patent amount to £17 10s. Renewal fees are payable as follows:—£5 before the expiration of the fourth year, and an amount progressively increasing by £1 before the expiration of each succeeding year up to the final fee of £16, payable before the expiration of the fifteenth year. An extension of time for six months for payment of a renewal fee may be obtained. Patents granted under the repealed Acts (Patents Act 1903-1950) are subject to the renewal fees under those Acts.

(ii) *Summary.* The number of separate inventions in respect of which applications were filed and the number of letters patent sealed during the years 1939 and 1952 to 1956 are shown in the following table.

PATENTS : AUSTRALIA.

Particulars.	1939.	1952.	1953.	1954.	1955.	1956.
Applications	5,740	8,073	8,917	9,073	8,869	9,396
Applications accompanied by provisional specifications	3,161	3,406	3,973	3,590	3,220	3,465
Letters patent sealed	3,141	5,248	5,181	5,464	5,931	6,056

2. **Trade Marks and Designs.**—(i) *Trade Marks.* Under the Trade Marks Act 1905–1948, the Commissioner of Patents is also Registrar of Trade Marks. This Act has been amended from time to time, the last amendment having been made in 1948. Special provisions for the registration of a “Commonwealth Trade Mark” are contained in the Act of 1905, and are applicable to all goods included in or specified by a resolution passed by both Houses of Parliament that the conditions as to remuneration of labour in connexion with the manufacture of such goods are fair and reasonable. The Act of 1948 provides for the registration of users of trade marks, and also for assignment of trade marks with or without the goodwill of the business concerned.

(ii) *Designs.* Under the Designs Act 1906–1950, the Commissioner of Patents is also Registrar of Designs.

(iii) *Summary.* The following table shows the applications for trade marks and designs received and registered during the years 1939 and 1952 to 1956.

TRADE MARKS AND DESIGNS : AUSTRALIA.

Particulars.	1939.	1952.	1953.	1954.	1955.	1956.
Trade Marks—						
Received	1,992	3,988	4,305	4,730	4,630	4,402
Registered	1,580	4,044	1,469	1,400	1,848	5,360
Designs—						
Received	865	1,186	1,504	1,373	1,330	1,130
Registered	736	1,388	802	900	819	458

3. **Revenue.**—The following table shows the revenue of the Commonwealth Patent Office, Trade Marks and Designs Office, and revenue obtained from Copyright for the years 1939, 1952 and 1953. From 1st July, 1954, a system of payment of fees by “fee stamps” was introduced and fees have since been collected under one head of revenue. Consequently separate figures are not available for the years 1954 to 1956.

**PATENTS, TRADE MARKS AND DESIGNS AND COPYRIGHT, REVENUE :
AUSTRALIA.
(£.)**

Total	64,872	176,403	176,561	202,290	234,125	293,918

§ 5. Copyright.

1. **Legislation.**—Copyright is regulated by the Commonwealth Copyright Act 1912–1950 wherein, subject to modifications relating to procedure and remedies, the British Copyright Act of 1911 has been adopted and scheduled to the Australian law.

Reciprocal protection of unpublished works was extended in 1918 to citizens of Australia and of the United States of America, under which copyright may be secured in the latter country by registration at the Library of Congress, Washington. The Commonwealth Government promulgated a further Order in Council which came into operation on 1st February, 1923, and extended the provisions of the Copyright Act to the foreign countries of the Copyright Union, subject to the observance of the conditions contained therein.

2. Applications and Registrations.—The following table shows under the various headings the number of applications for copyright received and registered for the years 1939 and 1952 to 1956.

COPYRIGHT : AUSTRALIA.

Particulars.	1939.	1952.	1953.	1954.	1955.	1956.
Applications received—						
Literary	1,438	1,434	1,134	1,044	1,005	1,059

International ..	1

3. Revenue.—Revenue obtained from copyright during the years 1939, 1952 and 1953 is shown in § 4, para. 3, above.

§ 6. Australian Shipbuilding Board.

1. Constitution.—Originally established in 1941 under National Security Regulations, the Board has been reconstituted a number of times since its inception and in 1948 was constituted on a permanent basis under the Supply and Development Act. At present it operates under the control of the Minister for Shipping and Transport. In order to link the activities of the Board more closely with the Department of Shipping and Transport, the constitution of the Board was altered in April, 1952, to provide for representation by senior departmental officers. The present membership of the Board consists of a Chairman who is the General Manager, a Deputy Chairman, a Finance Member and two other members, one of whom represents the Naval Board.

2. Functions.—The existing functions of the Board which have been summarized in earlier issues of the Official Year Book, are set out in detail in regulation 22 (4) of the Supply and Development Regulations.

In the exercise of its functions, the Board is responsible for—(i) the design of vessels; (ii) calling of tenders and placements of orders; (iii) co-ordination of the Board's supplies to shipbuilders, e.g., machinery and certain equipment; (iv) supervision of construction; (v) acceptance of vessels after sea trials; and (vi) administration associated with ship repairs, marine engines, spare parts, etc.

The Board is also responsible for determining, within the limits prescribed by the Commonwealth Government, the amount of subsidy to be paid on merchant ships constructed in Australia. In 1956, the Government accepted a recommendation made by the Tariff Board that the maximum subsidy on ships built in Australia for the coastal trade should be increased from 25 per cent. to 33½ per cent. of the cost of construction.

In order to take advantage of this, private shipowners are required to place their orders for vessels through the Board, which has thus become the ordering authority for all vessels built in Australian yards on which a subsidy is paid. The increased subsidy was payable on all orders placed with the Board after 12th April, 1956.

The Board has also undertaken the preparation of plans and drawings for the various yards, as the level of ship construction in Australia does not warrant each yard employing specialists in naval architecture. In this way, the Board has assisted in raising the efficiency of the industry as a whole and also in the development of individual yards. (For a more detailed reference to the constitution and functions of the Board see Official Year Book No. 37, p. 1170).

In order to assist the shipbuilding industry to become more self-sufficient, the Board has also encouraged the construction of marine engines in Australia including steam engines and several well known types of diesel engines manufactured under licence. The marine diesel engines under construction at 31st March, 1957, were:—"Doxford", three engines of 3,300 B.H.P., two of 4,400 B.H.P., and one of 2,800 B.H.P.; "Polar", one engine of 1,120 B.H.P.

3. **Construction Programme.**—From its inception to 31st March, 1957, the Board had arranged for the construction of 52 vessels of over 300 gross tons and totalling 287,561 tons deadweight. During the war, the Board was also responsible for the construction of numerous small craft and a 1,000 ton floating dock.

Current orders at 31st March, 1957, placed by the Board were for the construction of 15 vessels totalling 150,000 tons deadweight. The vessels consisted of 2 bulk ore carriers each of 19,000 tons on behalf of the Broken Hill Pty. Co. Ltd., together with 2 bulk carriers of 14,000 d.w.t. each, 6 bulk carriers of 10,000 d.w.t. each, 2 colliers of 7,000 d.w.t. each, 2 bulk wheat/general cargo vessels of 2,000 d.w.t. each and a 6,000 d.w.t. passenger/car ferry all to Commonwealth account. The passenger/car ferry has been designed for the carriage of passengers and their cars and loaded trailers on the Bass Strait run from Melbourne to northern Tasmania and when completed, late in 1959, will be the first of its kind to be operated in the Australian Coastal trade.

§ 7. Commonwealth Scientific and Industrial Research Organization.

1. **General.**—By the Science and Industry Research Act 1949, the previously existing Commonwealth Council for Scientific and Industrial Research was re-organized under the title of the Commonwealth Scientific and Industrial Research Organization. An account of the organization and work of the former Council, and of the earlier Commonwealth Institute of Science and Industry from which the Council was formed, was given in earlier issues of the Official Year Book. (*See* No. 14, p. 1061 and No. 37, p. 1183).

2. **Science and Industry Research Act 1949.**—This Act provides for—

- (a) an Executive of the Organization consisting of five members to be appointed by the Governor-General, at least three of whom shall be persons possessing scientific qualifications; and
- (b) an Advisory Council of the Organization, consisting of the members of the Executive, the Chairman of each State Committee constituted under the Act, and such other members as the Advisory Council, with the consent of the Minister, co-opts by reason of their scientific knowledge.

The powers and functions of the Organization are as follows:—(a) To initiate and carry out scientific researches in connexion with primary or secondary industries in Australia; (b) to train research workers and to establish industrial research studentships and fellowships; (c) to make grants in aid of pure scientific research; (d) to establish and make grants to industrial research associations in any industry; (e) to test and standardize scientific apparatus and instruments; (f) to collect and disseminate scientific and technical information; (g) to publish scientific and technical reports and periodicals; and (h) to act as a means of liaison between Australia and other countries in matters of scientific research.

3. **Science and Industry Endowment Act 1926-1949.**—Under this Act, the Government established a fund of £100,000, the income from which is used to provide assistance (a) to persons engaged in scientific research; and (b) in the training of students in scientific research. Provision is made for gifts or bequests to the fund which is controlled by a trust consisting of the Executive of the Organization. In accordance with the Act, arrangements have been made to send a number of qualified graduates abroad for training in special fields of work.

4. **Work of the Organization.**—The activities of the Commonwealth Scientific and Industrial Research Organization have necessitated a widespread and adaptable arrangement of its research laboratories. Undesirable centralization has been avoided mainly in two ways. In the first place, the policy has been followed of establishing laboratories in different places in the Commonwealth wherever the necessary facilities, contacts and other suitable conditions could best be found. Secondly, the Act provides for the establishment of a State Committee in each of the six States. These Committees are widely representative of scientific and industrial interests, and advise the Executive or the Advisory Council on general matters and on particular questions of investigation and research.

For about twelve years after its establishment, the work of the previous Council was devoted mainly to the solution of problems affecting the agricultural and pastoral industries. Unlike manufacturing concerns which can often employ their own scientific staffs, the farmers and the pastoralists are dependent on outside help for the solution of their problems which require research. It was a recognition of the greater need of the primary producer which directed the Council's early policy. However, in 1937, the Commonwealth Government decided to extend the activities of the C.S.I.R. so as to provide assistance to secondary

industries, and several laboratories have been established for work in that field; it was thus in the fortunate position of being able to render to these industries assistance of vital importance almost immediately after the outbreak of war. In fact, the remarkable technological advances and developments in secondary industrial production during the war would to a large extent have been impossible had it not been for the assistance rendered by scientific research, and this may well serve as a forceful illustration of what may be accomplished in times of peace.

For the purpose of carrying out its research work, there are established within the Organization a number of Divisions and Sections. The Divisions, of which there are now eighteen, comprise the major establishments for which special laboratory buildings have been erected and equipped; the Sections generally include establishments which have not reached a stage of development, so far as the scope and magnitude of their operations are concerned, to justify their designations as Divisions. As the Organization's investigations extend on a Commonwealth-wide basis and as many of the investigations which are being conducted—particularly those concerned with problems affecting the agricultural and pastoral industries—necessitate experimental work in the field, a number of field stations are established in various parts of Australia.

The Divisions which have been established are as follows:—

- (1) Plant Industry, with main laboratories at Canberra and Brisbane and field stations.
- (2) Entomology, with main laboratories at Canberra and field stations.
- (3) Animal Health and Production with main laboratories in Melbourne, Sydney and Brisbane and field stations.
- (4) Biochemistry and General Nutrition, with main laboratories at Adelaide and field stations.
- (5) Soils, with main laboratories at Adelaide and extensive operations in the field.
- (6) Forest Products, with main laboratories in Melbourne and field experiments.
- (7) Food Preservation and Transport, with main laboratories at Homebush (New South Wales) and a subsidiary laboratory in Brisbane.
- (8) Fisheries and Oceanography, with main laboratories at Cronulla (New South Wales), subsidiary laboratories in Perth (Western Australia), Dunwich, (Queensland), and Thursday Island, and experimental work in coastal waters of Australia.
- (9), (10), (11) Metrology, Physics and Electrotechnology, comprising the National Standards Laboratory at Sydney.
- (12) Radiophysics, with main laboratory at Sydney.
- (13) Industrial Chemistry, with main laboratories in Melbourne.
- (14) Tribophysics, with laboratories in Melbourne.
- (15) Building Research, with laboratories in Melbourne.
- (16) Mathematical Statistics, with main laboratory in Adelaide.
- (17) Meteorological Physics, with main laboratory in Melbourne and field station.
- (18) Land Research and Regional Survey, with headquarters in Canberra, and field stations at Ayr (Queensland), Katherine (Northern Territory) and Ivanhoe (Kimberley, Western Australia).

The following are the Sections:—

- (1) Commonwealth Research Station, Murray Irrigation Area, Merbein (Victoria).
- (2) Irrigation Research Station, Griffith (New South Wales).
- (3) Radio Research Laboratories, Camden (New South Wales).
- (4) Dairy Research, Melbourne.
- (5) Mineragraphic Investigations, Melbourne.
- (6) Ore-dressing Investigations, Melbourne and Kalgoorlie.
- (7) Plant Fibre, Melbourne.
- (8) Physical Metallurgy, Melbourne.
- (9) Wool Textile Research Laboratories, Geelong, Melbourne and Sydney.
- (10) Coal Research, Sydney.
- (11) Mathematical Instruments, Sydney.
- (12) Wildlife Survey, with main laboratory in Canberra, subsidiary laboratory at Albury, and field experiments.
- (13) Animal Genetics, Sydney.
- (14) Engineering.

In addition to its investigational work, the Organization deals with inquiries covering a wide range of scientific and technical subjects and maintains Scientific Research Liaison Offices in London and Washington.

An Agricultural Research Liaison Section established at the Organization's Head Office assists in making results in agricultural research speedily available to State Departments of Agriculture for use in their extension work.

Recently an Industrial Research Liaison Section has also been established at Head Office to foster liaison in the secondary and manufacturing fields.

The Organization's Head Office, with administrative and executive staff, is in Melbourne, and associated with it are the Organization's Central Library, Agricultural Research Liaison Section and Industrial Research Liaison Section. The funds for the Organization are provided from two main sources, namely, from Commonwealth revenue by Parliamentary appropriation, and from industry directly or indirectly by way of contributions and special grants. The fact that contributions and grants account for over one-eighth of the total annual expenditure indicates that the C.S.I.R.O. has succeeded in a very large measure in gaining the confidence of the public.

The activities of the C.S.I.R.O. are now so comprehensive in their scope and so widely distributed that it is not an easy matter to present an adequate picture of them in a concise form. For details of the investigations in progress, reference should be made to the Annual Report of the Organization.

§ 8. Mount Stromlo Observatory.

1. **General.**—In January, 1957, the former Commonwealth Observatory was transferred from the control of the Department of the Interior to the Australian National University where, as part of the Research School of Physical Sciences of that University, it has become known as the Mount Stromlo Observatory.

2. **Foundation of Observatory.**—The Observatory was founded primarily to prosecute astrophysical research, including the study of the relations between solar and terrestrial phenomena. A short history of the foundation of the Observatory appears in *Official Year Book No. 19*, p. 979.

3. **Site of Observatory.**—The Observatory is situated on Mount Stromlo, which forms part of a ridge of hills about seven miles west of Canberra. The highest point in the ridge is 2,560 feet above sea level, that is about 700 feet above the general level of the surrounding country.

4. **Equipment.**—The major items of equipment at Mount Stromlo comprise a 74-inch reflector, a 50-inch reflector, which is the re-built Melbourne 48-inch telescope, a 30-inch reflector donated by the late J. H. Reynolds, Esq., a 20-inch reflector once the property of the late J. H. Catts, M.P., as well as a 9-inch refractor, a solar tower telescope of 45 feet focal length and other smaller telescopes. A photographic refractor of 26-inch aperture belonging to the Universities of Yale and Columbia is now installed in a dome provided by the Commonwealth Government, and a 24-inch/30-inch Schmidt telescope from the University of Uppsala has been installed in a similar fashion.

5. **Functions of Observatory.**—Investigations in the fields of stellar spectroscopy, stellar photometry and variable stars are being carried out. The Observatory is responsible for the accuracy of the Australian Time Service. Considerable attention is being given to the development of this work, and a highly accurate quartz clock system has been installed. A photographic zenith tube has been acquired for time determination.

6. **International Co-operation.**—The Observatory works in close liaison with overseas observatories and major equipment has been or is being installed at Mount Stromlo in co-operation with the University Observatories of Yale and Columbia (U.S.A.), Uppsala (Sweden), and Munich (Germany).

§ 9. Standards Association of Australia.

The Standards Association of Australia is the national standardizing organization of Australia, and issues Australian standard specifications for materials and codes of practice.

The Association was established in July, 1929 by the amalgamation of the Australian Commonwealth Engineering Standards Association and the Australian Commonwealth Association of Simplified Practice. It is an independent body in close touch with modern industrial requirements and has the full recognition and support of the Commonwealth and State Governments and industry. It was incorporated by Royal Charter in 1950.

The sole executive authority of the Association is vested in the Council, on which industry is fully represented, together with official representatives of the Commonwealth

and State Governments and their technical departments, and of scientific, professional and commercial organizations. Voluntary assistance is rendered in the drafting of specifications and codes by several thousand individuals who are experts in their particular fields, and are organized into some hundreds of committees. These committees are grouped under broad industry headings including civil engineering and building construction, mechanical engineering, electrical engineering, chemical industry, timber industry, transportation, aircraft materials, ferrous and non-ferrous metallurgy, textiles, mining, ceramics, medical and dental materials, household and domestic economy, miscellaneous and general.

These committees are comprised of nominated representatives of manufacturing, distributing and purchasing organizations, and of scientific and other expert authorities in the particular field of the project being dealt with. The operations of these committees are co-ordinated and supervised by committees broadly representative of the whole industry within which the respective projects are included.

The specifications of the Association provide a suitable standard of performance, quality and dimension and an equitable basis for tendering. They help to eliminate redundant qualities and sizes. They enable purchasers to obtain their requirements with greater assurance of satisfaction, with more rapid delivery and without the necessity of drafting individual specifications.

The underlying principles covering the preparation of the specifications and codes are that they shall be in accordance with the needs of industry; that the common interests of producer and consumer be maintained; that periodical revision should keep the work abreast with progress; and that standardization be arrived at by general consent without coercion.

Organizations, companies, firms and individuals interested in the work of the Association are eligible for subscription membership. Members are entitled to free copies of the publications of the Association and to the use of the library and its Special Information Service. Bibliographical research is undertaken for committees, members of the Association, and industry in general. Many hundreds of inquiries are answered each year.

The Association has international affiliations and the standards of all British and foreign countries are filed in the library and are accessible to members. It is a member, representing Australia, of the International Organization for Standardization (ISO). The Association also administers the Australian National Committees of the International Electrotechnical Commission and the International Commission on Large Dams.

The Association is also the representative of the British Standards Institution, and all British standards may be purchased from headquarters and branch offices in the various States.

The headquarters of the Association are at Science House, Gloucester Street, Sydney, and branches of the Association are situated at Temple Court, 422 Collins Street, Melbourne; School of Arts Building, 166 Ann Street, Brisbane; Alliance Building, Grenfell Street, Adelaide; Gledden Building, Hay Street, Perth; c/o Engineering Department, Hobart Technical College, Hobart; Department of Works, Canberra; and Howard Smith Chambers, Watt Street, Newcastle.

§ 10. Film Censorship Board.

1. **Legislation.**—The Censorship of imported films derives its authority from Section 52 (g) of the Customs Act which gives power to prohibit the importation of goods. Under this section, regulations have been issued prohibiting the importation of films except under certain conditions and with the consent of the Minister. The regulations provide, *inter alia*, that no film shall be registered which in the opinion of the Censor is (a) blasphemous, indecent or obscene; (b) likely to be injurious to morality, or to encourage or incite to crime; (c) likely to be offensive to the people of any friendly nation or to the people of a part of the Queen's Dominions; or (d) depicts any matter the exhibition of which is undesirable in the public interest.

The regulations governing the exportation of Australian-made films are similar with the addition that no film may be exported which in the opinion of the Censorship is likely to prove detrimental or prejudicial to the Commonwealth of Australia.

The Censorship consists of a Censorship Board of five persons and an Appeal Censor, the headquarters being in Sydney. There is also a right of appeal to the Minister.

In addition to the censorship of moving pictures, the Censorship may refuse to admit into Australia any advertising matter proposed to be used in connexion with the exhibition of any film. In respect of films and advertising matter produced in Australia, legislation of a uniform nature is now operative in all States except South Australia and New South Wales. Under the State legislation the Commonwealth Film Censorship Organization acts as censor for the States concerned by virtue of agreements entered into between the Commonwealth and the respective State Governments.

2. Import of Films.—Imported standard size (35-millimetre) films dealt with by the Censorship for the year 1956 were as follows:—1,291 films of 3,349,181 feet passed without elimination, 164 films of 1,302,574 feet passed after eliminations and 2 films of 15,023 feet rejected, making a total of 1,457 films of 4,666,778 feet. The countries of origin were as follows:—United States of America, 782 films of 2,550,717 feet; United Kingdom, 423 films of 1,198,615 feet; and other countries, 252 films of 917,446 feet.

The films which chiefly concern the Censorship are the feature or dramatic films. Of these, 431—3,548,480 feet were imported during 1956 (247—2,049,762 feet from the United States of America and 99—765,048 feet from the United Kingdom). Two hundred and seventy-three—2,246,337 feet were passed without eliminations, 156—1,287,120 feet were passed with eliminations and two films of 15,023 feet were rejected in the first instance. In one instance an appeal was lodged, which was disallowed. During 1955, 412 feature films were dealt with, 294 being passed without eliminations and 114 passed with eliminations, while one film rejected in the first instance was subsequently passed for public exhibition.

During 1956, 7,801,277 feet of imported 16 millimetre films were censored (Commercial Films, 3,184,247 feet, Films for Television, 3,170,854 feet and Private Films taken by Travellers, 1,446,176 feet) compared with 3,963,628 feet for 1955, representing an increase of 97 per cent. Of these, one Commercial Film was rejected and 30 passed after eliminations, and 18 Films for Television were rejected and 187 passed after eliminations.

During 1956, 2,067,219 feet of 8-millimetre and 9.5-millimetre films were censored compared with £1,637,612 feet for 1955. Of this total, 1,974,789 feet comprised films taken by travellers during their travels abroad, the remainder, 92,430 feet, being commercially produced films. Of these commercial films three were rejected and one subjected to eliminations.

3. Export of Films.—The number of films exported for the year 1956 was 2,143 of 2,260,420 feet, of which 1,626 films of 1,372,597 feet were sent to British countries, including Trust Territories and 243 films of 528,114 feet were sent to the United States of America. This footage includes in many cases, several prints of the one film. The increase of more than half a million feet over the figure for 1955 was mainly due to the films exported in connexion with the Olympic Games.

§ 11. Australian National Film Board and the Film Division.

1. The Australian National Film Board.—The Australian National Film Board was inaugurated in April, 1945, on the recommendations of a Commonwealth Government inter-departmental committee which considered the suggestions of a conference of interested individuals and Commonwealth and State officials, including Directors of Education, called in November, 1944 by the Ministers for Information and Post-war Reconstruction. It was attached, for administrative purposes, to the Department of Information.

With the abolition of the Department of Information in March, 1950, administration of the Board was transferred to the News and Information Bureau, Department of the Interior.

In November, 1950, the Board was reconstituted as an advisory body to the Minister for the Interior on matters concerned with the production, acquisition and distribution of films required by Commonwealth departments for the following purposes:—

- (a) for use within Australia on important matters of national interest and welfare, such as school and adult education, rehabilitation, social development, international understanding, trade and tourist expansion, and immigration;
- (b) for dissemination abroad to expand trade and commerce with other countries, encourage tourist traffic with Australia, improve Australia's relations with other countries and, where necessary, to explain Australia's national policies, and to encourage immigration.

The constitution provides for a membership of ten, with the Secretary of the Department of the Interior, Chairman, the Director of the News and Information Bureau, Deputy Chairman, and the remainder representative of Commonwealth departments, State Government instrumentalities and organizations interested in the production, distribution or utilization of films for national publicity.

2. **The Film Division of the News and Information Bureau.**—Production and distribution of all films required by Commonwealth Departments is undertaken by the staff of the Film Division, News and Information Bureau, Department of the Interior, or by commercial enterprises under the supervision of officers of the Film Division. Theatrical distribution in Australia, and both theatrical and non-theatrical distribution overseas, of all Film Division productions are organized by the News and Information Bureau's home office or its oversea representatives. Non-theatrical distribution in Australia is organized through the National Library, Canberra, in co-operation with State film distribution agencies.

The first Australian Government organization for the production of motion pictures for national publicity purposes was the Cinema and Photographic Branch of the Department of Commerce, set up in Melbourne in 1920. Early in the 1939-45 War, the newly-established Department of Information was made responsible for the operation of the Cinema Branch and for an Official War Photography Unit.

Since 1946, the Film Division has produced 252 films for general exhibition, as well as training and special purpose films. Prints are dispatched to 44 oversea centres where distribution is arranged by News and Information Bureau officers or other Australian representatives. In Britain, there is regular distribution through more than a thousand theatres, and a large non-theatrical and educational series of circuits. By arrangement with the British Broadcasting Corporation, items of topical interest photographed by the Film Division are flown to London for television. In the United States of America, there is wide non-theatrical distribution and considerable use of the films by television networks. An exchange arrangement with the National Film Board of Canada secures extensive distribution in Canada. French versions, prepared in Paris under the supervision of the Australian Embassy, circulate through France and French-speaking countries. Selected films have also been recorded in Dutch, German, Italian, Japanese, Hindustani, Tamil and other Indian dialects.

In addition to films made on the initiative of the News and Information Bureau, the Film Division has produced, or is producing, films under the sponsorship or with the co-operation of Commonwealth Departments and many other bodies such as the Commonwealth Bank of Australia, the Road Safety Council, Overseas Telecommunications Commission, Snowy Mountains Hydro-electric Authority, Australian Wine Board, the Australian National University and the Australian Broadcasting Commission.

The co-operation of the Australian motion picture industry with the Commonwealth, spontaneously offered at the outset of the 1939-45 War, continues. Special films for urgent national appeals are planned, produced and distributed, with the assistance of the National Films Council of the motion picture industry and its Film Production Advisory Committee.

§ 12. National Safety Council of Australia.

The National Safety Council of Australia was founded in Melbourne in 1927 for the purposes of developing, mainly by means of education, safety on the road, at work and in the home, and its activities have developed in other directions wherever the need for reducing the toll of accidents has been shown. To this end, it conducts continuous propaganda through the press and in other ways. It also forms Junior Safety Councils in the schools for developing a safety conscience among children. The children themselves are officers of these Councils and patrol the roads in the neighbourhood of the schools and conduct the scholars across in safety. Posters are available to schools in connexion with Health and Safety lessons. Films specially taken are available for children's and road safety instruction.

A "Safe Driving" campaign for individual motor drivers is conducted as well as a "Freedom from Accidents" competition among employee drivers, those completing a year free from any accident for which they were responsible being given a certificate to that effect. An industrial service of four posters per month, together with slips for pay envelopes, constitutes a regular service for the dissemination of safety advice, and is supplied to over 150,000 workers in factories yearly. Committees deal with specific problems regarding

traffic, films, safety in industry, air safety and home dangers. The Air Safety Committee has issued a 32-page booklet "Air Sense" for distribution with pilots' private licences through the Civil Aviation Department, and has a plan for assistance to aircraft in distress which is being implemented throughout Australia.

The Council is supported by Government grants, public subscriptions and payments for service, and is a non-profit organization. Its work is carried on by a small staff controlled by committees and governed by an executive. The following committees, whose work is of an entirely honorary nature, are in operation, namely, Executive, Traffic, Industrial Safety, Home, Air Safety and Publicity.

§ 13. Australian Road Safety Council.

1. Origin and Organization.—The Australian Road Safety Council was formed in June, 1947, through the instrumentality of the Australian Transport Advisory Council.

The prime movers for the establishment of the Council were the Australian Automobile Association, which submitted a comprehensive plan; the New South Wales Minister for Transport, who advocated expansion, on a nation-wide basis, of road safety activities on lines similar to those of the Road Safety Council of New South Wales; and the National Safety Council of South Australia, which conveyed recommendations from a Special Safety Convention held in Adelaide in 1946.

At that time, in addition to the above-mentioned organizations in New South Wales and South Australia, there was a road safety organization in Victoria. Steps were immediately taken to form Councils in Queensland, Western Australia and Tasmania, and subsequently for the internal Territories.

The Australian Road Safety Council is the composite body of Road Safety Councils of the following States and Territories of Australia:—

Governmental.—New South Wales, Road Safety Council of New South Wales; Queensland, Road Safety Council of Queensland; Tasmania, Road Safety Council of Tasmania; the Australian Capital Territory and the Northern Territory, Road Safety Councils of the Australian Capital Territory and the Northern Territory respectively.

Non-Governmental.—Victoria, Victorian Road Safety Division, National Safety Council of Australia; South Australia, Road Safety Division, National Safety Council of South Australia; Western Australia, Road Safety Division, National Safety Council of Western Australia.

The Council is representative, geographically and technically, of the whole Commonwealth and comprises nominees of practically all classes of road users, together with representatives of road transport, the Department of Defence and police administrations from each State. National organizations represented on the Council are:—The Federal Chamber of Automotive Industries, Council of Fire and Accident Underwriters, Australian Road Transport Federation, Australian Automobile Association, Transport Workers' Union of Australia, Federation of Motor Cycle Importers and Distributors of Australia, and Auto Cycle Council of Australia.

The Council meets annually and an Executive Committee operates between conferences. The principal effort of the Council is directed through educational, advertising and public relations media.

An annual grant is made available by the Commonwealth Government under the Commonwealth Aid Roads Act for the promotion of road safety. Hitherto £100,000 annually, it has been increased to £150,000 for the five years commencing 1st July, 1955. Of this, £90,000 is allocated to State Road Safety Councils for local activities in the following proportions:—New South Wales, £22,500; Victoria, £18,000; Queensland, £16,650; Western Australia, £14,850; South Australia, £11,250; and Tasmania, £6,750. The remaining £60,000 is applied to the National Campaign, spread equitably over the entire Commonwealth.

2. Mode of Operation.—The role of the Australian Road Safety Council is primarily in the field of education and public relations. Its task is to inculcate the habit of safe use of the roads by all who travel on them and to promote the cause of road safety as a humanitarian and community ideal of the highest importance. To this end, it constantly strives to increase public awareness of the road accident problem, which for the year ended 30th June, 1956 resulted in 105,638 accidents involving casualties or damage in excess of £10 to property, the deaths of 2,119 persons and injuries to 48,773 persons. (For further information on the subject of Traffic Accidents see pp. 406–408 of this Year Book.)

The Council works in close collaboration with two other committees also established by the Australian Transport Advisory Council, namely, the Australian Motor Vehicle Standards and the Australian Road Traffic Code Committees. All three committees are

administered by the Commonwealth Department of Shipping and Transport, which is the executive department for the Australian Transport Advisory Council.

The Australian Motor Vehicle Standards Committee develops and promulgates essential basic motor vehicle standards such as maximum lengths, weights, height, carrying capacity of vehicles, and minimum lighting, braking and other mechanical efficiencies. In addition to ensuring a greater safety factor, these standards have helped to eliminate many conflicting State requirements which had an adverse effect on design and production costs.

The Australian Road Traffic Code Committee is charged with the responsibility of progressively preparing a "blue print" uniform national traffic code for incorporation in State legislation. Speed limits, right-hand turns, rules governing approaches to intersections, qualifications of drivers, and pedestrian behaviour are a few of the numerous aspects which come within its purview, and a high degree of uniformity has been achieved.

The campaign for road accident prevention resolves broadly into three main elements relating to (i) the Road User, (ii) the Road, and (iii) the Vehicle. Similarly the attack falls into three main divisions—(i) Education, (ii) Enforcement, and (iii) Engineering. The link between the components is, broadly:—

The Road User	}	Education (public relations media, instruction in schools, homes, etc.).
		Enforcement (of correct road usage—through the police and the courts, uniform traffic laws, etc.).
The Road	}	Engineering (technical improvements of all kinds, safer roads and vehicles, improved illumination, uniform vehicle standards, etc.).
The Vehicle		

In addition to the foregoing activities, the Council convenes special national conferences, as required by the Australian Transport Advisory Council, to consider specific road safety problems. Typical of these have been the special committee appointed in 1951 to discuss level crossing accidents, which recommended, among other measures, the appointment in each State of a committee to investigate level crossings and report on safety provisions, the elimination of some railway level crossings and the closure of others where practicable and desirable; a special meeting held in June, 1953 to discuss methods of reducing the high incidence of motor cycle accidents, at which various measures to offset the greater vulnerability of both the machine and its rider were recommended; and special meetings held in May, 1954 and April, 1955 to consider the problems of "Youth and Road Safety" and "Pedestrian Behaviour" respectively. Road safety and traffic authorities from overseas countries took part in special "International Sessions" of the 1956 Congress of the Council. Through the Road Safety Council of New South Wales, the Australian Road Safety Council has pioneered the advocacy of voluntary blood tests for intoxication in cases of suspected driving under the influence of drugs or alcohol.

§ 14. Australian Atomic Energy Commission.

In November, 1952, a Commission of three members was appointed to control the Commonwealth's activities in relation to uranium and atomic energy, and in April, 1953, upon the enactment of the Atomic Energy Act 1953, the Commission was established as a statutory authority, with powers and functions as defined in the Act. The Commission is a corporate and autonomous body, controlling its own service. It functions under the direction of the Minister for National Development.

The functions of the Commission fall under two main headings. Firstly, it is responsible for undertaking and encouraging the search for and mining of uranium, and is empowered to co-operate with the appropriate authorities of the States in connexion with these and related matters. Secondly, it is authorized to develop the practical uses of atomic energy by constructing and operating plant for this purpose, carrying out research and generally fostering the advancement of atomic energy technology. These powers and functions are set out in detail in Part II. of the 1953 Act. In general, and subject to the Commonwealth's defence powers and particular provisions of the Act, they are exercisable only in or in relation to the Territories of the Commonwealth.

The search for and mining of uranium in the Territories of the Commonwealth are freely open to private enterprise, subject to the Atomic Energy Act 1953 and the Ordinances of the Territories. For the assistance of private prospectors, and with the object of ascertaining the uranium resources of the Territories, aerial and geological surveys are carried out to identify areas favourable to uranium occurrences. These surveys are undertaken for the Commission by the Bureau of Mineral Resources of the Department of National Development, and the results are published from time to time in map form for general information. As incentives to private enterprise to engage in the search for uranium, rewards have been paid for discoveries. Taxation concessions are allowed in respect of income derived from uranium mining. In addition, the Atomic Energy Commission, the

Bureau of Mineral Resources and other Commonwealth agencies make available to prospectors and mining companies a wide range of technical and advisory services.

The development of the uranium resources of the States is governed by the legislation and policies of the States. Commonwealth aerial survey facilities are made available to the States for the radiometric examination of areas within the States, and work is undertaken by the State Mines Departments for the Commonwealth on the testing of uranium ores and research on ore treatment problems.

Uranium oxide is being produced in Australia from large ore deposits at Rum Jungle, in the Northern Territory, and Radium Hill, in South Australia. The Rum Jungle deposits are being developed under arrangements between the Commonwealth and the Combined Development Agency, a joint procurement organization of the United States and United Kingdom Governments. The actual mining and treatment operations are being conducted for the Commonwealth by an Australian mining company. A treatment plant was brought into operation on the field in September, 1954, the substantial production from which is being sold to the Agency for defence purposes. The Radium Hill deposits are being developed by the South Australian Government, which has established an ore concentration plant on the field and a plant for the treatment of the concentrates at Port Pirie. Like the Rum Jungle project, the operations at Radium Hill and Port Pirie are carried out under arrangements with the Combined Development Agency, and the output from the operations is sold to the Agency.

Uranium ores have also been found elsewhere in the Commonwealth, most notably at the Mary Kathleen lease in the Mt. Isa-Cloncurry district in Queensland. The Mary Kathleen lease, containing a large body of ore, is being developed by commercial interests, which are proceeding with the erection of a treatment plant in the area at a cost of several million pounds. Production from the plant will be sold to the United Kingdom Atomic Energy Authority, under arrangements approved by the Commonwealth Government. Another company, operating in the South Alligator River area of the Northern Territory, has sold some ore of exceptionally high grade to the Combined Development Agency.

The Commission has undertaken a research programme into the civil uses of atomic energy, with special reference to Australian needs. By arrangement with the United Kingdom Atomic Energy Authority, it has had a team of scientists working in the Authority's Research Establishment at Harwell in England. At the end of 1955, the Commission began the construction of its Research Establishment at Lucas Heights near Sydney. This consists of a high flux nuclear reactor of the most advanced type, with associated services and various laboratories. During 1957, as the reactor approached completion, most of the scientific staff returned from England to continue the research programme in Australia. Within Australia, in addition to its programme at Lucas Heights the Commission is supporting atomic energy research on a considerable scale in the various universities, and it has established a wide range of post-graduate studentships and undergraduate scholarships in the universities to train scientists for future work in atomic energy fields.

The broad objects of the Commission's research programme are to develop the production of electric power from nuclear fuels, and to investigate and promote the application of atomic energy and radioactive isotopes in industry, agriculture, medicine and biological research and other fields. In these endeavours, the Atomic Energy Commission is working in close co-operation with the United Kingdom Atomic Energy Authority, under arrangements which give Australia access to the results of the very large United Kingdom programme of research on peaceful atomic energy uses. The results of research in Australia will in like manner be made available to the United Kingdom. Work in Australia, though constituting a self-contained programme, is co-ordinated with the United Kingdom programme, to avoid overlapping of research objectives and duplication of investigations.

In the light of the vast amount of research now going forward overseas, and the programmes of many nations for the establishment of full-scale power producing reactors, it seems clear that nuclear power is rapidly approaching the stage of being economically practicable. A number of Government authorities, and several commercial organizations have begun serious study of the possible application of nuclear energy to their problems. The planned Australian research effort will enable Australia to make a full contribution to the advancement of atomic energy technology, both in power production and in other fields, and will, at the same time, place the country in a position to take advantage of the practical uses of atomic energy as they are developed.

§ 15. The United Nations.

1. **General.**—The Moscow Declaration of 1943 concerning a new international organization for the maintenance of international peace and security marked the end of the League of Nations. The dissolution of the League, and the transfer of certain of its functions to the new body, the United Nations, took place over subsequent years. Information concerning the League of Nations was given in issue No. 35 and earlier issues of the Official Year Book.

The Charter of the United Nations was drawn up by the delegates of fifty nations at the United Nations Conference on International Organization at San Francisco from 25th April to 26th June, 1945. Australia's ratification was deposited on 1st November, 1945. Following the admission of 16 new members during the Tenth Session and 5 more during the Eleventh Session there are now *81 member States:—Afghanistan, Albania, Argentina, Australia, Austria, Belgium, Bolivia, Brazil, Bulgaria, Burma, Byelorussia, Cambodia, Canada, Ceylon, Chile, China, Colombia, Costa Rica, Cuba, Czechoslovakia, Denmark, the Dominican Republic, Ecuador, Egypt, El Salvador, Ethiopia, Finland, France, Ghana, Greece, Guatemala, Haiti, Honduras, Hungary, Iceland, India, Indonesia, Iran, Iraq, the Republic of Ireland, Israel, Italy, Japan, Jordan, Laos, Lebanon, Liberia, Libya, Luxembourg, Mexico, Morocco, Nepal, the Netherlands, New Zealand, Nicaragua, Norway, Pakistan, Panama, Paraguay, Peru, the Philippines, Poland, Portugal, Romania, Saudi Arabia, Spain, Sudan, Sweden, Syria, Thailand, Tunisia, Turkey, the Ukraine, the Union of South Africa, the Union of Soviet Socialist Republics, the United Kingdom, the United States of America, Uruguay, Venezuela, Yemen and Yugoslavia.

The full record of the Conference is contained in the Report by the Australian Delegates on the United Nations Conference on International Organization held at San Francisco, from 25th April to 26th June, 1945.

At San Francisco, an Executive Committee and a Preparatory Commission were established, and when these bodies had completed their work of preparation for the first meeting of the United Nations, the General Assembly met in London on 10th January, 1946.

The principal organs of the United Nations are the General Assembly, the Security Council, the Economic and Social Council, the Trusteeship Council, the International Court of Justice, and the Secretariat.

2. **General Assembly.**—This is the forum of the United Nations. In it, each member state is represented and has one vote. It meets in regular annual sessions and has provision for special sessions. With the exception of disputes which are before the Security Council and matters essentially within the domestic jurisdiction of any State, it has power to discuss any matter within the scope of the Charter and to make recommendations upon it. The assembly elects the non-permanent members of the other major organs and considers annual reports from them. Upon the recommendation of the Security Council, it may expel a member which has persistently violated the principles of the Charter.

3. **The Security Council.**—This has the primary responsibility for the maintenance of international peace and security. It is composed of five permanent members, namely China, France, the United Kingdom, the Union of Soviet Socialist Republics and the United States of America, and six non-permanent members with two-year periods of office, of whom three retire at the end of each year. At the initial election three countries, including Australia, were elected for a term of two years and three others for a term of one year only. The following are the non-permanent members of the Security Council at present*: Australia and Cuba (whose terms commenced on 1st January, 1956), the Philippines (elected for a one year term commencing 1st January, 1957 following the resignation of Yugoslavia) and Colombia, Iraq and Sweden (whose terms commenced on 1st January, 1957). On procedural matters, decisions are taken by an affirmative vote of any seven members. But on all other matters, decisions can only be made on the affirmative vote of seven members, including the concurring votes of all the permanent members. However, the powers which are parties to a dispute for peaceful settlement do not vote.

The Security Council is assisted by a Military Staff Committee consisting of the Chiefs of Staff of the permanent members of the Council or their representatives.

4. **The Economic and Social Council.**—This body consists of eighteen members, each elected for a period of three years. Its main functions are to make, or initiate, studies and reports, and to make recommendations to the General Assembly or to members of the United Nations, upon international, economic, social, cultural, educational, health and related matters. It may make recommendations for the purpose of promoting respect for, and observance of, human rights and fundamental freedoms for all.

The present* members of the Economic and Social Council are: France, China, Egypt, Argentina, the Dominican Republic and the Netherlands (retiring 1957); Brazil, Canada, Greece, Indonesia, the United States of America and Yugoslavia (retiring 1958); and the United Kingdom, the Union of Soviet Socialist Republics, Pakistan, Mexico, Poland and Finland (retiring 1959).

5. **The Trusteeship Council.**—The Charter declares the political, social, cultural and economic advancement of the Trusteeship Territories to be a sacred trust. A Trusteeship Council has been set up composed of those members of the United Nations who are administering trust territories and an equal number of members who are not administering trust

* April, 1957.

territories (including any permanent members of the Security Council who are not administering trust territories). Territories which may be placed under trusteeship in accord with individual trusteeship agreements are those previously held under mandate, those detached from enemy states as a result of the 1939-45 War and those dependent territories placed under the system by the states responsible for their administration. Australia is automatically a member of the Trusteeship Council, as the Power administering the Trust Territories of New Guinea and Nauru. The present* members of the Trusteeship Council are: Australia, Belgium, France, Italy, New Zealand, the United Kingdom, the United States of America (administering States), and Burma, China, Guatemala, Haiti, India, Syria and the Union of Soviet Socialist Republics. China and the Union of Soviet Socialist Republics are members of the Trusteeship Council by virtue of their permanent membership of the Security Council.

The Council has among its duties the consideration of annual reports submitted by the trustee state, the carrying out of periodic inspections by agreement with it, and the formulation of questionnaires on the welfare and advancement of the dependent peoples.

6. The International Court of Justice.—This consists of fifteen judges, no two of whom may be nationals of the same state. Its jurisdiction comprises all cases which the parties refer to it, and all matters especially provided for in the Charter or in treaties and conventions in force. Provision exists in the Statute of the Court whereby States, parties to the Statute, may accept the jurisdiction of the Court as compulsory, either conditionally, or unconditionally in certain international disputes.

The present* members of the Court are: Judges Badawi (Egypt), Wellington Koo (China), Read (Canada), Winiarski (Poland), Zorivic (Yugoslavia)—all retiring in 1958; Judges Hackworth (United States of America), Sir Zafrullah Khan (Pakistan), Klaested (Norway), Kojevnikov (U.S.S.R.), and Armand-Ugon (Uruguay)—all retiring in 1961; and Judges Lauterpacht (United Kingdom), Basdevant (France), Guerrero (El Salvador), Cordova (Mexico), and Quintana (Argentina)—all retiring in 1964.

Judge Koo was elected to replace Judge Hsu Mo (China) who died in 1956.

7. The Secretariat.—The Secretary-General is the head of the Secretariat of the organization. He is appointed by the General Assembly upon the recommendation of the Security Council, and he appoints his staff in accordance with the rules approved by the General Assembly. Mr. Trygve Lie (Norway) was appointed first Secretary-General, and at the Sixth Session of the General Assembly in 1950 was re-appointed for three further years as from 1st February, 1951. In November, 1952, Mr. Lie announced his intention of retiring and in April, 1953, Mr. Dag Hammarskjold (Sweden) was appointed in his place.

8. Specialized Agencies.—In addition to these organs of the United Nations there are specialized agencies which co-operate closely with the United Nations in many fields on economic and social questions.

Those now† in operation are: The International Labour Organization; Food and Agriculture Organization; United Nations Educational, Scientific and Cultural Organization; International Civil Aviation Organization; International Bank for Reconstruction and Development; International Monetary Fund; Universal Postal Union; World Health Organization; International Telecommunication Union; World Meteorological Organization.

To enable co-ordination of the work of the specialized agencies, arrangements have been made for them to submit reports on their activities and budgets to the United Nations where they are discussed by the Economic and Social Council and the General Assembly.

§ 16. Australian Representation Abroad : Oversea Representation in Australia.

1. General.—The following statements show particulars of the various Australian diplomatic and other representatives overseas and of overseas representatives in Australia at 31st August, 1957. Full details of Commonwealth and foreign representation in Australia—diplomatic and consular—and of permanent Australian missions overseas may be obtained from publications issued by the Department of External Affairs, Canberra. A statement is issued each quarter by the Department of Trade, showing the latest particulars of the Australian Trade Commissioner Service overseas.

2. Australian Representation Overseas. —

AUSTRALIAN DIPLOMATIC AND OTHER REPRESENTATIVES OVERSEAS.

Her Majesty's Australian Ambassador Extraordinary and Plenipotentiary to—

Burma (Rangoon)—C. T. Moodie.

France (Paris)—A. T. Stirling, C.B.E.

Germany, Federal Republic of (Bonn)—P. Shaw.

Indonesia (Djakarta)—L. R. McIntyre, O.B.E.

* April, 1957.

† December, 1956.

Ireland (Dublin)—(Vacant); S. Jamieson (Chargé d'Affaires *ad interim*).
Japan (Tokyo)—Sir Alan Watt, C.B.E.
The Netherlands (The Hague)—H. A. McClure-Smith.
The Philippines (Manila)—K. C. O. Shann.
Thailand (Bangkok)—J. K. Waller, O.B.E.
United States of America (Washington, D.C.)—The Hon. Sir Percy Spender, K.B.E., Q.C.

Her Majesty's Australian Envoy Extraordinary and Minister Plenipotentiary to—
Brazil (Rio de Janeiro)—(Vacant); R. H. Gilman (Chargé d'Affaires *ad interim*).
Cambodia (Phnom Penh)—F. H. Stuart.
Israel (Tel Aviv)—B. C. Ballard.
Italy (Rome)—D. P. McGuire, C.B.E.
Laos (Vientiane)—F. J. Blakeney.
Vietnam (Saigon)—F. J. Blakeney.

High Commissioners for Australia in—
Canada (Ottawa)—W. R. Crocker, C.B.E.
Ceylon (Colombo)—A. J. Eastman.
India (New Delhi)—P. R. Heydon.
Malaya, Federation of (Kuala Lumpur)—T. K. Critchley.
New Zealand (Wellington)—Vice-Admiral Sir John Collins, K.B.E., C.B.
Pakistan (Karachi)—Major-General W. J. Cawthorn, C.B., C.I.E., C.B.E.
Union of South Africa (Cape Town)—(Vacant); H. Gilchrist (Acting High Commissioner).
United Kingdom of Great Britain and Northern Ireland (London)—The Rt. Hon. Sir Eric Harrison, K.C.V.O.

Australian Military Mission—
Germany, Federal Republic of (Berlin)—Head, P. Shaw.

Australian Mission—
United Nations (New York)—Ambassador, Dr. E. R. Walker, C.B.E.
United Nations (Geneva)—Permanent Representative, G. A. Jockel.

Australian Commissioner in—
Singapore, Brunei, Sarawak and North Borneo (Singapore)—R. L. Harry.

Consuls-General—
Greece (Athens)—J. J. B. Cliffe.
Switzerland (Geneva)—G. A. Jockel.
United States of America (New York)—The Hon. Sir Josiah Francis.
United States of America (San Francisco)—M. H. Marshall.

Consuls—
Denmark (Copenhagen)—G. T. Pretyman.
New Caledonia (Noumea)—Dr. J. S. Cumpston, E.D.
Portugese Timor (Dili)—F. J. A. Whittaker.
United States of America (New York)—J. E. Ryan.

Trade Commissioner Service of the Commonwealth of Australia—
British West Indies—B. T. Connolly (Port of Spain).
Burma—L. C. Holmes, Commercial Secretary and Acting Trade Commissioner (Rangoon).
Canada—C. L. Steele (Montreal); H. Wrigley, C.B.E., M.C., E.D. (Vancouver).
Central African Federation—H. M. Le Marchand (Salisbury).
Ceylon—M. F. Roberts (Colombo).
France—A. R. Taysom, Commercial Counsellor and Trade Commissioner (Paris).
Germany, Federal Republic of—R. R. Ellen, Commercial Counsellor and Trade Commissioner (Bonn).
Hong Kong—K. T. Ridley (Hong Kong).
India—F. R. Gullick (New Delhi); J. L. Chapman (Calcutta); D. L. Crawford (Bombay).
Indonesia—D. R. McPhee, O.B.E., E.D., Commercial Counsellor and Trade Commissioner (Djakarta).
Italy—H. K. H. Cook, Commercial Counsellor and Trade Commissioner (Rome).
Japan—N. F. Stuart, Commercial Counsellor and Trade Commissioner (Tokyo).
Malaya, Federation of—W. Cairns (Kuala Lumpur).
New Zealand—W. R. Hudspeth (Wellington); B. G. Dawson (Auckland); H. Sullivan (Christchurch).
Pakistan—R. K. Scott, Commercial Counsellor and Trade Commissioner (Karachi).
Philippines, The—E. E. Jarvis, Commercial Counsellor and Trade Commissioner (Manila).
Singapore—P. R. Searcey (Singapore).
Union of South Africa—S. D. Shubart, Commercial Counsellor and Trade Commissioner (Johannesburg).

United Kingdom of Great Britain and Northern Ireland—G. R. B. Patterson, Senior Trade Commissioner; E. B. Gilbert (London).

United States of America—A. C. B. Maiden, Commercial Counsellor and Acting Trade Commissioner; J. B. Todd, Commercial Counsellor (Washington); A. J. Day (New York); W. D. Hardy (San Francisco).

3. **Oversea Representation in Australia.**—Consular representatives are not included in the following statement. Particulars of these are contained in a publication *Consular Representatives and Trade Commissioners in Australia*, issued by the Department of External Affairs, Canberra. There are more than 180 such representatives in Australia, and 53 countries are represented.

DIPLOMATIC REPRESENTATIVES IN AUSTRALIA.

Ambassador Extraordinary and Plenipotentiary of—

Burma—(Vacant); U Htoon Shein (Chargé d'Affaires *ad interim*) (Canberra U 1451).

China—(Vacant); Dr. Chen Tai Chu (Charge d'Affaires *ad interim*) (Canberra U 2368).

France—His Excellency Monsieur R. Sivan (Canberra X 2925).

Germany, Federal Republic of—His Excellency Dr. Walther Hess (Canberra X 3575).

Indonesia—His Excellency, Dr. A. Y. Helmi (Canberra U 1221).

United Kingdom Trade Commissioners—Mr. N. L. Hibbs (Canberra U 2211); Messrs. A. R. Bruce, O.B.E., A. Hartland, O.B.E., and L. F. Hope (Sydney BW 8086); Messrs. A. R. Starck, O.B.E. and G. J. Husted (Melbourne MU 5556); Mr. R. Fell (Brisbane B 3207); Mr. J. D. Leithead (Perth BA 2042).*

§ 17. Retail Trade.

1. **General.**—The statistics in this section relate to the number of retail establishments throughout Australia and the turnover of these establishments.

Information of this nature was first collected in respect of the year ended 30th June, 1948, by a full Census of all retail establishments. As this was the first Census of its type in Australia, its scope and the data sought were the minima consistent with the objective of securing a record of the number of such establishments, their type, their geographical distribution, their aggregate sales of goods and a simple commodity dissection together with a record of the value of certain services provided. This Census was followed by a second Census of all retail establishments trading during the year ended 30th June, 1949.

A third Census was taken for the year ended 30th June, 1953, in which retailers were asked to furnish more detailed information concerning the dissection of their turnover into commodity groups and questions were asked about stocks of goods on hand, the number of persons engaged in the business and credit sales.

A further Census was taken in respect of the year ended 30th June, 1957 and tabulation of the results is proceeding.

In general terms, the Censuses covered those establishments which normally sell goods by retail in shops, rooms, kiosks and yards. Certain types of establishments which sell services by retail (including repairs and materials therein) were also included, e.g., boot repairers, hairdressers, motor garages and service stations and cafés. The Censuses included the retail sales of those factories or wholesalers who conducted a regular retail business, but excluded those who only occasionally sold goods by retail. Both new and second-hand goods were included in sales recorded by relevant retail establishments.

During the period between Censuses, variations in the value of retail sales have been measured by means of quarterly sample surveys. Annual totals derived from these surveys and some of the results of the 1952–53 Census are contained in this section.

2. **Value of Retail Sales in Each Commodity Group, 1948–49 and 1950–51 to 1955–56, Australia.**—The following table shows the value of retail sales of goods in each of the commodity groups specified in the years 1948–49 and 1950–51 to 1955–56 on a comparable basis throughout. The figures for the years 1948–49 and 1952–53 were obtained from Censuses taken in respect of those years, whereas figures for the other years shown are estimates based on sample surveys.

VALUE OF RETAIL SALES: COMMODITY GROUPS, AUSTRALIA.
(£ million.)

Commodity Group.	Year ended 30th June—						
	1949.(a)	1951.(b)	1952.(b)	1953.(a)	1954.(c)	1955.(c)	1956.(b)

<i>Total Foodstuffs</i>	<i>325.3</i>	<i>433.9</i>	<i>539.4</i>	<i>596.1</i>	<i>632.7</i>	<i>698.4</i>	<i>764.1</i>
Beer, Wine and Spirits	95.3	123.2	153.9	173.0	186.7	202.1	218.9
Clothing, Drapery, Piece-goods and Footwear	237.8	328.5	351.6	355.1	387.6	421.5	438.8
Hardware(e)	55.7	91.2	109.6	113.8	124.7	142.5	153.3
Electrical Goods	33.8	64.7	77.5	75.8	91.2	99.6	105.5
Furniture	46.4	76.9	76.1	72.8	81.0	86.5	90.9
Other Goods(f)	167.9	252.4	307.5	315.5	336.9	364.6	391.6
<i>Total (excluding Motor and Vehicles, etc.)</i>	<i>962.2</i>	<i>1,370.8</i>	<i>1,615.6</i>	<i>1,702.1</i>	<i>1,840.8</i>	<i>2,015.2</i>	<i>2,163.1</i>
<i>Motor Vehicles, Parts, Petrol, etc.(g)</i>	<i>166.1</i>	<i>382.0</i>	<i>433.3</i>	<i>417.3</i>	<i>491.1</i>	<i>579.5</i>	<i>641.3</i>

(a) Census figures. (b) Survey figures. (c) Survey figures revised since previous issue. (d) Includes fresh fruit and vegetables, confectionery, soft drinks, ice cream, cakes, pastry, cooked provisions, fish, etc., but excludes some delivered milk and bread. (e) Excludes basic building materials (e.g., timber, roofing tiles, bricks, etc.). (f) Includes tobacco, cigarettes, etc., newspapers, books and stationery, chemists' goods, grain and produce, jewellery, office equipment, etc. (g) Excludes farm machinery and implements, earth-moving equipment, etc.

In the foregoing table, figures for the years ended 30th June, 1949 to 1952, relate to establishments with total retail sales of £50 or more; for the years ended 30th June, 1953 to 1956, they relate to establishments with total retail sales of £500 or more. The total amount of retail sales of establishments so excluded in 1952-53 was not significant (less than 0.1 per cent. of total), and their omission does not affect the validity of the comparisons shown.

3. **Takings for Certain Services, Australia.**—The following table shows the amounts of "Other takings" recorded for the services specified in respect of establishments covered by the Retail Censuses of 1948-49 and 1952-53. The figures for the year ended 30th June, 1949 relate to establishments with "Other takings" of £50 or more recorded for the services specified; for the year ended 30th June, 1953, they relate to establishments with retail sales or "Other takings" of £500 or more. The amount of "Other takings" of establishments so excluded in 1952-53 was less than one per cent. of total takings shown for Repair Work Done and Meals in Cafés, Restaurants, etc., and less than three per cent. of total takings shown for Hairdressing.

TAKINGS FOR CERTAIN SERVICES, AUSTRALIA.
(£'000.)

Service.	1948-49.	1952-53.
Repair, Servicing and Maintenance Work Done(a)—		
Motor	25,273	56,864
Other	9,365	16,088
<i>Total</i>	<i>34,638</i>	<i>72,952</i>
Meals in Cafés, Restaurants, etc.	21,256	32,765
Meals and Accommodation in Hotels	13,976	24,936
Hairdressing	6,684	9,883

(a) Includes value of materials used and cost of labour,

4. **Number of Establishments with Sales in each Commodity Group, 1952-53, States.**—The following table shows the number of establishments with sales in each of the commodity groups specified during the year ended 30th June, 1953, for each State. Many establishments recorded sales in more than one commodity group. Thus the aggregate of the number of establishments by commodity group is greater than the total number of individual establishments.

Grand Total ..	(f)								

(a) All figures refer to establishments with total retail sales in 1952-53 of £500 or more. The number of establishments in each State with retail sales in 1952-53 of less than £500 but more than £100 was as follows:—New South Wales, 1,126; Victoria, 989; Queensland, 449; South Australia, 279; Western Australia, 294; Tasmania, 100; Northern Territory and Australian Capital Territory, 5; Total, 3,242. (b) Excludes basic building materials (e.g., timber, roofing tiles, etc.). (c) Not available for publication. (d) Not available. (e) Excludes farm machinery and implements, earth-moving equipment, etc. (f) Many establishments showed sales in more than one commodity group. Thus the number of establishments selling goods in each commodity group does not add down to the total number of individual establishments which is as follows:—New South Wales, 40,523; Victoria, 32,864; Queensland, 15,051; South Australia, 9,673; Western Australia, 7,911; Tasmania, 3,637; Northern Territory, 146; Australian Capital Territory, 180; Total, 109,985.

5. Value of Retail Sales of Goods in each Commodity Group, 1952-53, States.—The following table shows the value of retail sales of goods in each of the commodity groups specified during the year ended 30th June, 1953.

(a) All figures refer to establishments with total retail sales in 1952-53 of £500 or more. The total retail sales of the establishments with retail sales in 1952-53 of less than £500 but more than £100 were as follows:—New South Wales, £312,000; Victoria, £283,000; Queensland, £128,000; South Australia, £88,000; Western Australia, £85,000; Tasmania, £27,000; Northern Territory and Australian Capital Territory, £1,000; Total, £924,000. (b) Excludes basic building materials (e.g. timber, roofing tiles, etc.). (c) Not available for publication. (d) Excludes farm machinery and implements, earth-moving equipment, etc.

6. Number of Retail Establishments and Value of Retail Sales Classified According to Main Type of Business, 1952-53, States.—The following tables show the number of establishments and the value of retail sales made in 1952-53 in each State classified according to the main type of business. In classifying establishments by type of business, the description given by the proprietor was used as a guide but the classification was based mainly on the commodity group for which the largest item of turnover was recorded.

NUMBER OF RETAIL ESTABLISHMENTS CLASSIFIED ACCORDING TO MAIN TYPE OF BUSINESS : STATES, 1952-53.(a)

CHAPTER XXXI.

STATISTICAL ORGANIZATION AND SOURCES OF INFORMATION.

§ 1. Statistical Organization in Australia.

1. **Early Development of Australian Statistics.**—(i) *Crown Colony Blue Books.* Statistical organization in Australia was founded in the "Blue Books" which, in the Crown Colony days, were prepared annually for the information of the Colonial Office. Although primarily intended for administrative purposes, these documents have been important sources of statistical data, even though some important matters are not covered, and others only partially so. These "Blue Books" form the basis from which later statistical publications were developed. This led to an element of uniformity in statistical compilation within the British Empire.

(ii) *Statistical Registers.* Following the advent of Responsible Government which was granted during the period 1851–1860 to all Australian States except Western Australia—and to that State in 1890—the "Blue Book" was succeeded in all States by "Statistical Registers". These were in many respects the old "Blue Books" in a new form, and were largely confined to summaries of the "by-product" statistics of Government administrative departments.

The first example of extensive Governmental organization for purely statistical purposes was the taking of periodic population censuses, which were initiated in all States under the Crown Colony régime. The growing need for quantitative data concerning the progress of the several young communities of Australia eventually led to the appointment of official Statisticians commissioned to prepare and publish such data.

(iii) *Statistical Conferences.* To enable the interchange of ideas between States and to obtain uniform State Statistics which could be aggregated to Australian totals, conferences were held in the several States from as early as 1861. Altogether, six conferences were held prior to the formation of the Commonwealth Bureau of Census and Statistics in 1906. These were held in 1861, 1875, 1890, 1900, 1902 and 1903. The holding of these conferences has been continued since the formation of the Commonwealth Bureau, and a representative from New Zealand attended up to 1928.

2. **Creation of the Commonwealth Bureau of Census and Statistics.**—Under the provisions of section 51 of the Commonwealth Constitution, power is conferred on the Commonwealth Parliament "to make laws for the peace, order and good government of the Commonwealth with respect to—" (*inter alia*) "(XI.) Census and statistics". In compliance with this provision, the Census and Statistics Act 1905 was passed, and in 1906 the Commonwealth Bureau of Census and Statistics was created. A conference of Statisticians in 1906 defined the relations between the Commonwealth and State Bureaux, and in each case the State Statistician became the representative in his own State of the Commonwealth Statistician for the purpose of administering the Commonwealth Act. In addition, each State has its own "Statistics Act", and although these are not identical in all States, they embody common principles. The Commonwealth Bureau did not attempt to duplicate the existing statistical organization, but endeavoured to use the services of the State statistical offices whenever possible, and to undertake the initial collection of statistics only in fields not already occupied by the States, or in which efficiency demanded complete centralization.

3. **Integration of Statistical Services.**—The creation and development of the Commonwealth Bureau of Census and Statistics, the frequent conferences of Commonwealth and State Statisticians, and the close and increasing liaison between officers dealing with the same subjects in the State and Commonwealth fields, did much to promote uniformity in the official statistical collections and methods employed throughout Australia. The complete realization of this aim could not, however, be achieved, even with the utmost co-operation of those concerned, while seven distinct statistical systems operated.

This became apparent after the first world war, when the economic problems that then arose drew attention to deficiencies in the Australian statistical data. With a view to overcoming these weaknesses the Prime Minister of the day proposed to the Premiers' Conference that State statistical offices be transferred to the Commonwealth. Tasmania alone agreed

to this, and the transfer was effected in 1924. Since then, an amalgamated office has functioned satisfactorily in that State as a Commonwealth office which also serves State statistical needs.

The boom of the 1920's, the depression of the 1930's, the second world war, and the post-war boom, each with its special economic problems, imposed a severe strain on the Commonwealth and State statistical systems. Moreover, the development during and since the second world war of a very considerable volume of new statistics added greatly to the complexities of the several administrations in their efforts to secure, and maintain, uniformity in statistical collections. The establishment of Commonwealth statistical offices in some State capitals ameliorated the situation to some extent—indeed, without their establishment the new and expanded statistical collections could not have been carried out at all. However, this did not solve the problem, and constituted only one of a number of improvisations devised to obtain uniform data essential for national purposes, and to satisfy urgent demands for new types of statistics. Furthermore, the excessive amount of time and effort entailed in such improvisations made it impossible to devote the necessary time to the major questions of supplying growing statistical needs promptly.

The emergence of the problem of providing uniform statistical services throughout Australia, adequate to meet present-day demands, was foreseen during the 1939–45 War, and in 1949 discussions were initiated with the Premiers by the Prime Minister, with the object of integrating the statistical services of the Commonwealth and the States by agreement. These negotiations were continued by correspondence, and subsequently the Governments of the States of Western Australia, South Australia and New South Wales accepted the terms of draft agreements to integrate their respective statistical offices with that of the Commonwealth. In each case, an undertaking was given by the Commonwealth to introduce legislation to authorize agreements of the type to be made concerning statistical administration.

Accordingly the Statistics (Arrangements with States) Bill was introduced into the Commonwealth Parliament on 17th April, 1956, its purpose being to seek parliamentary approval of the making of arrangements with individual States for, and the setting up of, integrated statistical services. The legislation is permissive in nature, designed to enable the Commonwealth to enter into an agreement with any State to effect an amalgamation of Commonwealth and State statistical offices and services. The objective of such an agreement is that, in each State accepting it, there will be an integrated statistical service operated by Commonwealth statistical officers under the immediate direction of a statistician in the State who would hold office under both the Commonwealth and State governments. Both Commonwealth and State will be adequately served with statistics, and no State will be required to surrender its existing powers in the field of statistics. The rights of officers transferred under any agreement entered into are provided for. After passing through the usual stages of Parliament, the bill became law on 12th May, 1956.

Agreements authorized under the Act have been made with the States of New South Wales, South Australia and Western Australia, taking effect from 30th August, 11th April and 5th July, 1957, respectively. As stated above, an integrated statistical office has operated in Tasmania since 1924.

4. Scope of the Commonwealth Bureau of Census and Statistics.—The scope of the Commonwealth Bureau of Census and Statistics has constantly been widened, more particularly during the 1939–45 War, when the Bureau responded to the urgent demands of administration for immediate and accurate statistical information in various fields. Since the war, requirements in the administrative, industrial, financial and scientific spheres have led to the development of many new statistical collections. All the activities of the Bureau are covered by the Census and Statistics Act, which confers authority to collect information and contains stringent provisions to ensure that the information obtained is treated, in strictest secrecy.

For administrative purposes the Commonwealth Bureau is divided into a number of Divisions. These are:—Census, Compiling, Development, Publications, Social Accounting and Administrative.

(a) *Census Division.* This Division of the Bureau is responsible for the taking of periodic population censuses and the tabulation, summarization and preparation for publication of the results obtained.

(b) *Compiling Division.* The Compiling Division is divided into the following Branches which compile statistics dealing with specific fields of activity:—

Trade and Transport Branch—Responsible for the original compilation, tabulation and analysis of statistics relating to imports and exports, and for the compilation of statistics relating to road and rail transport, aviation, shipping, posts and telegraphs, telephones and wireless.

Prices Branch—Deals with the collection of retail and wholesale prices and the compilation of retail and wholesale price index numbers. A staff of trained field officers is maintained in the several States to facilitate the collection of accurate information.

Employment and Labour Branch—Compiles all employment estimates, wage and labour statistics.

Primary Production Branch—Deals with statistics relating to agricultural and pastoral activities, mining, forestry and fishing. Original data are largely supplied by State Statisticians.

Secondary Production Branch—Compiles all factory statistics both annual and monthly. Collates on a Commonwealth basis original annual data supplied by State Statisticians.

Finance and Taxation Branch—Compiles statistics of private finance (banking, insurance, exchange rates, etc.), public finance (Commonwealth, State and Local and Semi-Governmental authorities), and statistics relating to all aspects of Commonwealth taxation.

Demography Branch—Concerned with statistics of births, deaths, marriages and migration, and is responsible for periodic estimates of population.

(c) *Development Division.* This Division was created in order to develop new statistical collections to meet post-war demands for more adequate and up-to-date statistics, and also to examine current collections in the light of such requirements. It is divided into three Branches, namely:—

Sampling Techniques Branch—Undertakes the development and application of sampling procedures to statistical collections and furnishes technical advice to branches and other Government departments.

Development Branch—Develops new statistical collections and examines current collections in the light of present day requirements. Compiles social statistics.

Business Statistics Branch—Conducts censuses and surveys and analyses statistics relating to internal trade (retail), business and hire purchase activities, and company investments and profits.

(d) *Publications Division.* This Division is responsible for the scrutiny, editing and graphical illustration of all Bureau publications, and, in collaboration with other Divisions, for the initiation, development and co-ordination of statistical publications. It also maintains a regular flow of statistical series to certain international organizations, and revises statistical material in certain oversea and local publications.

(e) *Social Accounting Division.* This Division undertakes research into the theoretical and practical problems of social accounting. It is divided into three branches as follows:—

Balance of Payments Branch—collects and analyses statistics on Australia's balance of international payments.

National Income and Expenditure Branch—prepares estimates of national income and expenditure.

Quantum Indexes Branch—undertakes research into quantum of production.

(f) *Administrative Division.* The Administrative Division is responsible for all aspects of staff recruitment and direction, supplies, payment of accounts, etc. The Reproduction Section of the Division is equipped with multilith and duplicating machines for processing statistical statements for more immediate requirements. In addition, a special section of this Division is responsible for the examination of statistical methods and systems and the co-ordination of all statistics in Commonwealth Departments (*see* para. 5 below). The Mechanical Tabulation Branch and the specialized library of official and unofficial publications on statistics and economics are controlled by the Administrative Division. The Mechanical Tabulation Branch is equipped with modern tabulating equipment and is responsible for all machine tabulating work required by other Divisions of the Bureau with the exception of the Census Division.

5. *Relation of the Bureau to other Commonwealth Departments.*—In October, 1950, the Commonwealth Public Service Board issued a circular relative to the compilation of statistics in other Commonwealth Departments, in which it stated that the Commonwealth

Statistician should be the co-ordinating authority on all statistics in Commonwealth Departments, and that, as a general principle, where any new statistical field is to be established involving the regular collection of statistics, the Commonwealth Statistician should be consulted to ensure that they are necessary and that they are based on sound statistical methods; furthermore, that the Commonwealth Statistician should make a regular inspection, at least once every twelve months, of all statistical work done by Departments to ensure that their needs are met by the most economical means and without duplication of effort.

This project of co-ordination is being implemented as time and circumstances permit.

§ 2. Statistical Publications of Australia.

1. **General.**—The official statistical publications of Australia may be divided bibliographically into two main divisions, namely:—(i) Commonwealth publications dealing both individually and collectively with the several States of Australia; and (ii) State publications dealing with individual States only.

2. **Commonwealth Publications.**—Commonwealth publications may be grouped under two heads, namely:—(i) Publications issued by the Commonwealth Statistician; and (ii) Parliamentary and Departmental Reports and Papers.

(i) *Publications issued by the Commonwealth Statistician.* The following is a list of the principal statistical publications issued from the Commonwealth Bureau of Census and Statistics since its inauguration to June, 1957:—

Australian Balance of Payments.—Statements Nos. 1 to 3, 1928–29 to 1951–52.

Australian Life Tables, 1901–1910. *Australian Joint Life Tables, 1901–1910.*

Australian Life Tables, 1920–1922.

Australian Life Tables, 1932–1934. *Australian Joint Life Tables, 1932–1934.*

Australian Life Tables, 1946–1948.

Australian Mineral Industry Statistics (formerly *Minerals and Metals Bulletin*).—Part 2 of Quarterly Bulletin issued jointly with the Bureau of Mineral Resources.

Australian Primary Industries.—Report prepared for the Empire Producers Conference, Sydney, March, 1938.

Census (1911) Results.—Bulletins. Vols. I. (Statistician's Report), II., and III., with Appendix "Mathematical Theory of Population."

Census (1921) Results.—Bulletins, Nos. 1 to 26. Parts I. to XVI., forming Vol. I., and Parts XVII. to XXIX., forming, with the Statistician's Report, Vol. II. NOTE.—Part XXVII., Life Tables.

Census (1933) Results.—Bulletins, Nos. 1 to 25. Parts I. to XIV., forming Vol. I., Parts XV. to XXVIII., forming Vol. II., and Parts XXIX. to XXXVII., forming, with Statistician's Report and Australian Life Tables 1932–1934, Vol. III.

Census (1947) Results.—Bulletins, Nos. 1 to 25. Parts I. to XVI., forming Vol. I., Parts XVII. to XIX., forming Vol. II., and Parts XX. to XXVIII., forming, with Statistician's Report and Australian Life Tables 1946–1948, Vol. III.

Census (1954) Results.—See Price List at end of volume.

Census of Motor Vehicles, 31st December, 1955.—Bulletins, Nos. 1 to 8.

* *Census of Retail Establishments (1947–48) Results.*—Bulletins, Nos. 1 to 7.

* *Census of Retail Establishments (1948–49) Results.*—Bulletins, Nos. 1 to 7.

* *Census of Retail Establishments (1952–53) Results.*—Bulletins, Nos. 1 to 14.

* *Dairying Industry* (formerly *Summary of Dairying Industry*).—Statistical Bulletin, monthly; first issue, September, 1937.

Demography, 1911 to 1955 annually.

* *Factories, Principal Statistics, Summary.*—Annually, 1948–49 to 1955–56.

Finance.—Bulletins 1907 to 1916–17 annually; 1917–18 and 1918–19 (one vol.); 1919–20 and 1920–21 (one vol.); 1922–23 to 1955–56 annually.

* *Food Production and the Consumption of Foodstuffs and Nutrients in Australia, Statistical Bulletin.* Half-yearly, 1946–47 to 1947–48; annually, 1948–49 to 1954–55.

* *Fruit Growing Industry Summary.*—Annually, 1944–45 to 1955–56.

Labour and Industrial Statistics.—Memoranda and Reports, various, to 1913.

Labour Report.—Annually, 1913 to 1954.

* Obtainable from Commonwealth Statistician—for methods of obtaining other publications still in print see back page of this volume.

- **Livestock Numbers* (formerly *Summary of Livestock Statistics*).—Statistical Bulletin, annually, 1943 to 1956.
- Local Government in Australia*.—July, 1919.
- **Manufacturing Industries*.—Bulletins on Individual Industries, annually, 1936–37 to 1939–40, 1940–41 (issue incomplete), and 1944–45 to 1955–56.
- **Monthly Review of Business Statistics*.—First issue, October, 1937.
- **Occupation Survey (1945) Results*.—Detailed tables.
- Official Year Book of the Commonwealth of Australia*.—Annually, 1907 to present issue (No. 43). Issues Nos. 40 to 43 also published in parts.
- Oversea Trade*.—Bulletins, annually, 1906 to 1955–56.
- **Oversea Trade*.—Preliminary Bulletins. Annually, 1952–53 to 1956–57.
- **Oversea Trade Statistics: Imports Cleared for Home Consumption classified according to Individual Items of the Customs Tariff, 1950–51 to 1955–56*.
- Pocket Compendium of Australian Statistics* (formerly *Statistical Digest*).—1913, 1914, 1916, and 1918 to 1957 annually.
- Population and Vital Statistics*.—Bulletins and Reports, various, 1906–1910.
- Primary Industries*.—Bulletin, annually, 1950–51 to 1954–55, in two parts; Part I. Rural Industries; Part II. Non-Rural Industries and Value of Production.
- Production*.—Bulletin, annually, 1906 to 1949–50. From 1936–37 to 1949–50 issued in two parts.—Part I. Secondary Industries; Part II. Primary Industries (including Total Recorded Production); thereafter separate Bulletins (see *Primary Industries and Secondary Industries*).
- Professional Papers*.—Various. A full list appears in *Official Year Book No. 13*, p. 3.
- Quarterly Summary of Australian Statistics*.—First issue, No. 70, December, 1917, replacing *Monthly Summary of Australian Statistics* (Bulletins Nos. 1 to 69).
- **Report of Proceedings of the Conference of British Commonwealth Statisticians, 1951*.
- **Rural Land Use and Crop Statistics* (formerly *Summary of Crop Statistics*).—Statistical Bulletin, annually, 1943–44 to 1955–56.
- Secondary Industries*.—Bulletin, annually, 1950–51 to 1954–55.
- Social Insurance*.—Report to the Hon. the Minister for Trade and Customs, 1910.
- Social Statistics*.—Bulletins, 1907 to 1915 annually, and 1918.
- Superannuation for the Commonwealth Public Service*.—Report to the Hon. the Minister for Home Affairs, 1910.
- **Survey of Motor Vehicles (1947–48) Results*.—Bulletins Nos. 1 to 7.
- **Survey of Private Superannuation Schemes 1951–52* (reprinted in *Finance Bulletin No. 44*).
- Transport and Communication*.—Bulletins, 1906, 1908 to 1916 annually, 1919 to 1930 annually, and 1932 to 1955–56 annually.
- **Vegetables Grown on Farms for Human Consumption*.—Statistical Bulletin, annually, 1942–43 to 1955–56.
- Wages and Prices*.—January, 1932.
- Wealth*.—The Private Wealth of Australia and its Growth as ascertained by various methods, together with a Report on the War Census in 1915.
- **Wheat Industry* (formerly *Summary of the Wheat Situation*).—Statistical Bulletin, periodically; first issue, July, 1936.
- **Wool Supplies and Utilization*.—Bulletin, annually, 1952–53 to 1955–56.

The foregoing list includes all the printed publications issued from the Bureau, and certain more important mimeographed publications issued for the most part annually. Other mimeographed statements, obtainable on application to the Commonwealth Statistician and dealing with a wide variety of subjects, are issued as follows:—

Annually—Bee Farming; Commonwealth and State Taxation Collections; Companies with Oversea Affiliations; Factory Products (Principal); Factory Statistics (Principal); Fire, Marine and General Insurance; Fishing and Whaling; Milking Machines on Rural Holdings; Mining and Quarrying; Oversea Trade between Australia and Eastern Countries; Registrations of New Motor Vehicles; Rural Statistics of the Australian Capital Territory; Social Services, Expenditure by States; Tractors on Rural Holdings; University Statistics; Value of Production; Wheat Forecast and Estimate; Wool Production.

Half-yearly—Australian Balance of Payments; Capital Expenditure; Labour Turnover; Meat Production and Utilization; Trade of Australia with the United Kingdom.

* Obtainable from Commonwealth Statistician—for methods of obtaining other publications still in print see back page of this volume.

Quarterly—Building; Interim Retail Price Index; New Capital Raisings; Retail Sales of Goods; Retail Price Variations—All Items ("C" Series) Index; Road Traffic Accidents; Tractor Statistics; Trade of Australia with Monetary Areas.

Monthly—Banking; Demographic Review; Employment; Exports of Wool from Australia; Export Prices Index; Gold Mining Industry; Hire Purchase Business of Finance Companies; Life Assurance; Oversea Trade; Production Statistics; Registrations of New Motor Vehicles; Savings Bank Deposits and Savings Certificates; Wholesale Price (Basic Materials and Foodstuffs) Index.

(ii) *Commonwealth Parliamentary and Departmental Reports and Papers.* Lists of the principal official reports and other documents containing statistical information issued from the inauguration of the Commonwealth appear in the Official Year Books up to No. 13, but it is not now practicable to undertake the preparation of such lists.

3. *State Publications.*—The chief statistical publications of each State are set out hereunder. As with the Commonwealth Parliamentary and Departmental Reports and Papers, it is not practicable to enumerate the various Departmental Reports, statements of accounts, etc., issued by officials, boards, local and semi-governmental authorities, etc., in each State.

- (a) *New South Wales*—Statistical Register (annually); Official Year Book of New South Wales (annually); Pocket Year Book (annually); Statistical Bulletin (monthly to December, 1919, quarterly to June, 1943, then discontinued to September, 1948); Monthly Summary of Business Statistics.
- (b) *Victoria*—Statistical Register (annually to 1916, then discontinued); Victorian Year-book (annually); Statistical Abstract (quarterly to 1917, then discontinued to December, 1946).
- (c) *Queensland*—Statistical Register (annually); Official Year Book, 1901; A.B.C. of Queensland Statistics (annually to 1936, then discontinued); Queensland Year Book (annually 1937 to 1941, then discontinued to 1945); Queensland Pocket Year Book (annually).
- (d) *South Australia*—Statistical Register (annually); Official Year Book, 1912 and 1913; Statesman's Pocket Year Book of South Australia (annually); Quarterly Summary of Statistics.
- (e) *Western Australia*—Statistical Register (annually); Statistical Abstracts (quarterly, previously issued monthly to July, 1917); Pocket Year Book of Western Australia (annually).
- (f) *Tasmania*—Statistical Register (annually); Pocket Year Book of Tasmania (annually); Monthly Review of Business Statistics.

§ 3. The Third Conference of British Commonwealth Statisticians, Canberra, 1951.

Conferences of the Government Statisticians of the British Commonwealth were held first in London in 1920 and then in Ottawa in 1935. The Third Conference was held in Canberra from 12th to 23rd November, 1951. Delegates were present from Australia, Canada, Ceylon, India, New Zealand and the United Kingdom (including a representative of the Colonial Office). Ireland, the Commonwealth Economic Committee and the United Nations were represented by observers, and the Australian State Government Statisticians were also present. A summary of the activities of the conference may be found in Official Year Book No. 39, p. 1320.

§ 4. Select List of Works about, or published in, Australia.

(Compiled by the Librarian of the Commonwealth National Library.)

This list aims to meet the growing need, in Australia as publishing develops, and overseas as interest in Australia widens, for an authoritative current reference and reading list of books dealing with Australia or of Australian authorship, wherever published.

Australians will find these books in the National Library and in their State Libraries as well as in leading bookshops. Oversea readers may have access to them in the collections which the National Library maintains at 42 Australian posts abroad. They will be found also, increasingly, in leading libraries and bookshops in many countries. In the United States, for example, Australian books are included in the Farmington Plan in which 62

libraries and research institutions co-operate to ensure that at least one copy of all material published in any part of the world and likely to be required for a serious purpose will be available promptly somewhere in the country. Under a similar arrangement, Australian books are supplied to the National Library of Canada.

The list is classified broadly by subject and under each heading there is first a list of the principal standard books still in print, then a list of selected books and official publications (excluding annual reports) published in the last few years. To ensure that, so far as is possible, an evenness of standard is maintained in the compilation of the list, the advice of a representative range of experts in the various subject fields has been sought. Where known the retail price in the country of publication is given, but this is subject to fluctuation.

The Library also issues a series of select lists which include; *Australian Public Affairs Information Service* (monthly and, since 1955, cumulated annually), a subject index of material in new books, pamphlets, current periodicals and government publications from English-speaking countries, with an important bearing on investigations into Australian political, economic, cultural and social affairs; and the following full bibliographies.

Australian Government Publications, a monthly list covering both the Commonwealth and the States;

Books published in Australia: a monthly list of books supplied to the National Library under copyright.

The two last-mentioned publications are cumulated annually as the *Annual Catalogue of Australian Publications* which includes also a list of books published overseas of Australian interest or by authors resident in Australia, a select list of the more important Australian periodical and serial publications and a directory of publishers.

DIARY OF PRINCIPAL ECONOMIC EVENTS, 1953 to 1956.

The principal economic events for the years 1931 to 1938 were shown on pp. 968 to 977 of Official Year Book No. 33, those for the years 1939 to 1944 on pp. 1129 to 1141 of Official Year Book No. 36, those for the years 1945 to 1948 on pp. 1235 to 1245 of Official Year Book No. 37, while those for the years 1949 to 1952 were covered by Official Year Books Nos. 38 to 40. For reasons of space some of the items originally shown for the years 1953 and 1954 have been omitted from this issue. Previous issues should be consulted for additional information for these years.

1953.

The immigration programme was cut further during the year. Total employment (excluding rural and household domestic employment and the defence forces) rose from 2,533,000 in December, 1952, to 2,612,000 in December, 1953. Numbers on unemployment benefit dropped to less than half the level of 41,600 reached in January. Production of coal was down slightly from the 1952 level, but production of gas and electricity and of many basic materials continued to increase. Production of domestic electrical goods, many clothing and textile lines and sporting goods increased substantially after the set back of the previous year. There was also some revival in house building. Seasonal conditions were satisfactory. Meat production was substantially increased. The average wheat yield was lower than the previous year's record but still high at 17 bushels per acre. Acreage was somewhat greater and total production was estimated at about 199 million bushels compared with 195 million bushels in the 1952-53 harvest. The wool clip for 1953-54 was only 3 per cent under the record of the previous year. Wool prices firmed at the opening sales in September and during the first half of the 1953-54 season averaged 85d. compared with 81.8d. in 1952-53. Export prices generally remained above the previous year's level and the value of exports was considerably higher than in 1952. During the second half of the year, however, imports also increased substantially, and the balance of payments credit on current account which reached about £110 million in the first half of the year dropped to about £50 million in the second half. Rises in internal prices and earnings were much smaller. Average earnings per employee rose by 4 per cent., the basic wage by 2 per cent., retail prices by 4 per cent., and wholesale prices by 5 per cent. Interest rates were kept stable during the year at 4½ per cent. on Commonwealth bonds, 4¾ per cent. on local and semi-governmental securities and 5 per cent. on bank advances. Both Commonwealth loans raised during the year were oversubscribed.

5th January.—New deposits of coal, bauxite, tin and zinc discovered as a result of surveys carried out by the Bureau of Mineral Resources, Geology and Geophysics.

8th January.—Ten year agreement signed for sale to the United States of America of uranium from deposits at Rum Jungle, Northern Territory.

10th January.—United Kingdom and Queensland Governments agreed to abandon the Queensland-British Food Corporation's farming project in Central Queensland.

19th February.—The Commonwealth Bank Bill 1953, which set up the Commonwealth Trading Bank under a General Manager, in place of the General Banking Division of the Commonwealth Bank, and the Banking Bill 1953, which provided for a new method of determining the maximum amounts which the trading banks may be required to lodge with the Commonwealth Bank, introduced into the House of Representatives. (Both Acts assented to 28th March.)

1st April.—Further relaxation of import restrictions to allow additional imports to the value of £50,000,000 during the next twelve months other than from the dollar area and Japan.

13th April.—New International Wheat Agreement signed in Washington fixing Australia's annual wheat export quota at 75,000,000 bushels. (Legislation introduced into House of Representatives, 11th October.)

15th May.—Australia and United States of America signed conventions to end double taxation between the two countries. (Acts ratifying these conventions were assented to 11th December.)

19th May.—Australian Loan Council meeting at Canberra adopted programme of £231,000,000 for State Government works during 1953–54. Borrowing programme of £90,486,000 by Local Government and Semi-governmental authorities also approved. Loan Council decided to retain ruling interest rates on public loans for at least twelve months.

8th June.—Britain and Australia signed agreement for reciprocity in social services benefits.

24th June.—Contract prices for sale of Australian butter and cheese to the United Kingdom Ministry of Food during 1953–54 increased by approximately $3\frac{1}{2}$ per cent.

1st July.—Commonwealth Medical Benefits Scheme commenced, under which persons who are contributors to an approved medical benefits organization are entitled to receive part reimbursement by the Commonwealth of payments made for medical services to themselves or their dependants.

Conditions of purchase by Australian Atomic Energy Commission of acceptable uranium ores and concentrates from 1st July announced, including guaranteed minimum prices for five years.

Further relaxation of restrictions on imports from sterling countries came into operation. Some increases in imports from Japan also were allowed.

15th July.—Announced that the United Kingdom Government would pay higher prices, representing increases of $7\frac{1}{2}$ and $5\frac{1}{2}$ per cent. respectively, for Australian lamb and mutton in 1953–54.

7th August.—Shipping freights to United Kingdom rose by $7\frac{1}{2}$ per cent.

13th August.—Commonwealth Government rejected a Japanese request for a conference to discuss trade relations between Australia and Japan.

9th September.—The Commonwealth Budget for 1953–54 introduced into the House of Representatives. (For details, see Official Year Book No. 41, p. 1086.)

10th September.—Pearl Fisheries Bill introduced, providing for a licensing system and other measures to control pearl fisheries. (Act assented to 17th September.) (See also 11th September.)

11th September.—Australian sovereignty proclaimed over sea-bed, sub-soil, and continental shelf adjoining Australia and Australian territories.

12th September.—Commonwealth Court of Conciliation and Arbitration refused applications by employers for reduction of current basic wages and for an increase of standard hours of work and also refused applications by unions for increases of basic wages. The employer's applications for abandonment of the system of automatic adjustment of the basic wage in accordance with retail price indexes were, however, granted.

24th September.—Australian Council of Trade Unions Congress withdrew its policy of unqualified opposition to incentive payments, leaving individual unions free to accept incentive payment schemes if they so desire.

1st October.—Announced that Australia would receive an increase of $5\frac{1}{2}$ per cent. in the price of beef and veal shipped to the United Kingdom during 1953–54 under the fifteen-year meat agreement with United Kingdom.

Further relaxation of import restrictions on goods from sterling areas came into operation, allowing additional annual imports valued at £45 million.

7th October.—All states agreed to a price of 14s. per bushel for wheat sold in Australia for the three years ending 1955–56.

13th October.—Wheat Marketing Bill providing for orderly marketing of wheat for next three harvests introduced into House of Representatives. (Act assented to 26th October.)

Bill providing for ratification of the International Wheat Agreement, under which portion of Australia's crop for the next three seasons will be exported within certain price limits, introduced into House of Representatives. (Act assented to 26th October.)

Queensland State Full Industrial Court rejected application by employer's organizations to end basic wage adjustments.

22nd October.—Commonwealth Court of Conciliation and Arbitration refused New South Wales transport authorities permission to withdraw applications for relief from basic wage adjustments.

26th October.—Factories and Shops (Wages Boards) Bill 1953 introduced in Victoria to pay latest cost-of-living increase in basic wages. (Act assented to 25th November.)

12th November.—Industrial Arbitration (Amendment) Bill, giving absolute preference to unionists, introduced in New South Wales Parliament. (Act assented to 17th December.)

3rd December.—Commonwealth Trading Bank of Australia commenced operations.

4th December.—Oil discovered at Exmouth Gulf, 680 miles north of Perth.

31st December.—With the expiration of the Defence Preparations Act, control of Capital Issues ceased.

Price control abandoned in Western Australia.

1954.

Net migration increased from 43,000 in 1953 to 68,000 in 1954, but was still well below the level of the preceding four years. Total employment (excluding rural and household domestic employment and the defence forces) rose from 2,612,000 in December, 1953 to 2,701,000 in December, 1954. In April, total employment exceeded the previous peak of 2,643,000 reached in November, 1951. Numbers on unemployment benefit fell from 13,423 in January to 2,975 in November, 1954. Production of pig-iron and steel was practically the same as in 1953, but there were rises in the production of coal, gas and electricity, and many basic materials. Production of domestic electrical appliances and of many textile and clothing lines also increased. More new houses were commenced in 1954 than in 1953, but the number completed was slightly below the 1953 figure. Meat production increased slightly in 1954. The wheat acreage for 1954–55 was about the same as in 1952–53, but both the total crop and the average yield were below the levels of the previous two seasons. A substantial fall in exports, however, resulted in a level of stocks at 30th November, more than twice as high as a year earlier. The 1954–55 wool clip was practically the same as the record 1952–53 clip and about 3 per cent. higher than the 1953–54 clip. In April, there was a further relaxation of import restrictions on trade with countries other than dollar area and Japan, and imports were substantially higher than in 1953. A fall in wool and wheat prices and a lower volume of wheat exports contributed to a decline in exports. In the second half of 1954, there was a debit balance of £108 million in the balance of payments on current account compared with a debit balance of £65 million in the first half of the year, and a credit balance of £50 million in the second half of 1953. Quotas were re-imposed on some imports in October. Average earnings per employee rose by 4 per cent., the same as the previous year's rise. Retail and wholesale prices, however, showed practically no change. Bank interest rates were not altered during the year. The three Commonwealth loans were issued at 4½ per cent. for long dated bonds and most local and semi-governmental loans at 4¼ per cent.

7th January.—Reciprocal agreement with the United Kingdom on Social Services became operative.

8th–15th January.—Conference of British Finance Ministers held in Sydney with the Prime Minister as Chairman and other Australian Ministers in attendance.

19th January.—It was announced that Australia would sign the declaration extending until 30th June, 1955, the schedule of tariff concessions under the General Agreement on Tariffs and Trade.

25th February.—Interim decision by Full Arbitration Court on claim by Metal Trades employees for increased margins left rates of pay unchanged (*see* 5th November, 1954).

4th March.—Loan of \$54 million from the International Bank, to be used to import capital goods and equipment.

10th March.—19th Security Loan of £35 million closed with a subscription of about £50 million.

1st April.—United Kingdom Free and Assisted Passages Migration Agreement with Australia renewed for another year.

9th April.—Contract for £25 million let for the construction of the Eucumbene–Tumut tunnel and other works in the Snowy Mountains Scheme.

16th April.—Revision of the 15 year marketing agreement for Australian meat sold in the United Kingdom, occasioned by the change over from bulk purchasing to private trading.

27th April.—£3.9 million contract let for building the Upper Tumut power station of the Snowy Mountains Scheme.

4th June.—Queensland Industrial Court increased margins to workers under Mechanical Engineering Award.

28th June.—Australia signed International Tin Agreement as a consuming country.

30th June.—Loan Council approved borrowing programme of £290 million for 1954–55 comprising Government loans, £200 million, Semi-Governmental loans, £75 million, and Local Government loans, £15 million. Tax reimbursement Grants to States to be £150 million for 1954–55. Australian population census taken.

1st July.—Forecast that by 31st July stocks of wheat carried over by the four major producing countries will total 1,601 million bushels compared with 1,061 million in 1953.

4th July.—Commonwealth Budget for 1953–54 resulted in a surplus of £56,300,000. Favourable trade balance of £149,400,000 for 1953–54.

13th July.—Heavy rain and gales caused damage to 200 miles of coastal area from Queensland to Northern New South Wales with floods in river districts of S.E. Queensland and Northern New South Wales.

4th August.—£1,800,000 hydro-electric project approved for Warragamba Dam (New South Wales).

13th August.—Wool sold in Australia in 1953–54 season realized £390.7 million, £14 million less than last year, but third highest on record.

18th August.—Commonwealth Budget for 1954–55 introduced into the House of Representatives. (For details *see* Official Year Book No. 42, p. 1156.)

31st August.—New South Wales Government granted £125,000 to New South Wales University of Technology for research in nuclear engineering (previously £50,000 was granted to the University of Sydney for research into nuclear physics). £50 million Commonwealth Cash and Conversion Loan oversubscribed by £1 million.

20th September.—Mechanical extraction of pillar coal commenced in some New South Wales mines.

29th September.—The Tariff Board annual report issued a warning against any general increase in the tariff level and on high cost in industry.

30th September.—New import restrictions announced on imported materials and equipment (goods on which quota restrictions were abandoned in April, 1954), on the basis of 100 per cent. of imports in the base year, 1950–51.

5th October.—National Joint Production Council formed representing management and workers.

14th October.—Announced that Commonwealth would grant £24 million for roads in 1954–55.

29th October.—Tariff changes increased tariffs on certain imports and increased protection to eight Australian industries. Government bounties on rayon yarn in Australia and scutched flax fibre produced from flax grown in Australia were announced.

3rd November.—Bounty paid on sulphuric acid as from 1st July, 1954. Legislation introduced to appropriate £600,000 annually for five years. Waterside workers declared a general strike on the Australian waterfront as a protest against proposed new Stevedoring legislation (*see* 5th November).

5th November.—Federal Arbitration Court granted higher margins for skilled workers in a judgment intended to be a guide to other wage fixing authorities. New Stevedoring legislation introduced into House of Representatives which, in effect, gave employers the right to nominate new waterside workers. Previously the right of deciding eligibility for work in the industry had been the prerogative solely of the Unions.

19th November.—Privy Council ruled New South Wales State Transport (Co-ordination) Act invalid insofar as it applied to interstate transport.

22nd November.—New arrangements for regulation of trading with Japan gave Japanese exporters the opportunity of obtaining a larger share of Australia's trade.

23rd November.—Commonwealth Government set target of migrants for 1954–55 at 115,000.

2nd December.—Australian wheat prices guaranteed under the wheat stabilization plan to remain at 12s. 7d. per bushel for 1954–55 season.

10th December.—\$25 million loan floated by Australia on United States market over-subscribed.

14th December.—£13 million lag in cash section of Commonwealth Government £125 million cash and conversion loan.

15th December.—Increased margins for coal industry employees, applying in New South Wales, Queensland, Victoria and Tasmania, announced by Coal Industry Tribunal.

31st December.—Governor of Commonwealth Bank announced an increase of 5s. per cent. in rates of interest on bank fixed deposits and Savings Bank deposits.

1955.

When the Treasurer presented the budget in August he said that there were "unmistakable signs of active inflation". A boom had been getting under way in consumer spending and private investment, and labour shortages had become general. No concessions in taxation were made in the budget. During the year, several measures were introduced to check inflation. In July, the Commonwealth Bank directed the trading banks to restrict new loans which would increase the scale of hire purchase. Towards the end of the year, the Prime Minister held a series of conferences with representatives of financial and industrial institutions to enlist their co-operation in checking inflation. Hire purchase and finance companies agreed to restrict the increase in their loans to 10 per cent. above the level at September, 1955. The level of total bank advances changed little in the second half of the year. In spite of lower wool and wheat prices, the value of exports was slightly higher than in 1954. The value of imports was much greater than in 1954 and the balance of payments deficit was therefore greater in 1955. Import restrictions were made more severe in April and again in September. Following the judgment of the Commonwealth Court of Conciliation and Arbitration late in 1954, margins for skill were adjusted upwards in many occupations. Nominal wages rose throughout the year, and by December, 1955 were 3½ per cent. higher than in December, 1954. Over the same period, average earnings rose by 7 per cent. and retail prices by 4½ per cent. Employment rose steadily during the year, and the number of persons receiving unemployment benefit fell to the lowest level since 1951. Investment by private businesses in 1955 was well above the level of 1954. Dwelling construction also continued at a high level. There were 78,000 new houses completed in 1955, a higher number than in any post-war year except 1952. The number commenced was 3,000 less than in 1954, but was higher than in 1952 or 1953. Secondary production was generally maintained at the high level of the previous year, and output of primary products increased. The wheat acreage in 1955-56 was slightly less than in any other post-war year, but the average yield was the highest on record. The total crop was therefore well above the 1954-55 level and nearly as high as in 1953-54. The production of wool in 1955-56 was over 1,410 million pounds compared with the previous record of about 1,290 million pounds in 1954-55. Net immigration during 1955 was 95,000. This compared with 68,000 in 1954 and 43,000 in 1953 but was still well below the 1950 and 1951 levels of 153,000 and 111,000 respectively.

1st January.—Price control in Victoria ended after 14 years. Increased Bank Deposit interest rates.

12th January.—Harbour at Cockburn Sound, Western Australia, opened to provide shipping facilities for Kwinana.

1st February.—Kwinana £40 million oil refinery began operations—to be in production by mid-March.

4th February.—Announced that arrangements completed for issue of £6 million public loan in Switzerland to Commonwealth Government.

7th February.—Australia's first aluminium plant, at Bell Bay, Tasmania, began production.

17th February.—Special conference agreed that Waterside Workers Federation should have right to nominate waterside recruits; counteracts legislation passed last November (see 5th November, 1954).

22nd February.—Guthega power station in operation, first power generated from Snowy Mountains Hydro-electric scheme being fed into New South Wales electricity system.

24th February.—Disastrous floods cover large areas of Central West New South Wales and Hunter Valley. Damage estimated at £15 million to townships, stock and grazing lands, and many lives lost.

18th March.—Government plan announced for sale to tenants of houses built under Commonwealth and State Housing Agreement. Maximum advance to be £2,750 repayable over 45 years at 4½ per cent. interest, minimum deposit 5 per cent. of first £2,000 of sale price, repayments of principal included in rent previously paid to be credited as part of deposit.

19th March.—Details announced of new 15 year 54½ million dollar loan from International Bank of Reconstruction to Australia at 4½ per cent. interest, including Bank's 1 per cent. commission.

21st March.—New import restrictions imposed, cutting Australia's rate of imports by about 20 per cent.; to operate from 1st April.

23rd March.—First commercial shipment of Australian uranium oxide, worth about £200,000, dispatched to United States.

15th April.—All price control ended in New South Wales.

20th April.—Broken Hill Pty. Company announced plans for spending £67 million on plant in next five years at Newcastle and Port Kembla.

12th May.—Increase of interest rates for home purchase and building finance from 5 per cent. to 5½ per cent. announced by most of major life assurance companies in Australia.

16th May.—Commonwealth Government to build ammunition filling and assembly factory at St. Marys, near Sydney, at estimated cost of £23 million.

5th June.—Australia's 1955-56 immigration programme to be increased to basic intake of 125,000 migrants (including 70,000 under assisted-passages scheme).

10th June.—Full High Court in reserved judgment declared invalid recent New South Wales legislation imposing a road tax on interstate road hauliers.

19th June.—Commonwealth abandons control of tea.

21st-23rd June.—At annual Loan Council meeting, Prime Minister rejected proposals by State Premiers for substantially increased loan programme to finance State Works in 1955-1956. Loan Council, by majority vote, approved borrowing programme of £193,500,000 for public works in 1955-56. Prime Minister announced that Commonwealth Government would grant States £157 million taxation reimbursements for 1955-56, an increase of £7 million on 1954-55.

19th July.—Decision by Federal Cabinet to cut subsidy on local consumption of butter and cheese, followed by increase in butter and cheese prices. General Motors-Holden's announced £21.6 million expansion programme for plants throughout Australia.

26th-28th July.—Price control re-imposed in New South Wales and South Australia.

9th August.—Western Australia State Arbitration Court increased Western Australian basic wage by 5s. 11d.

14th August.—Prime Minister stated that Australia would not extend trading concessions to Japan under G.A.T.T.

22nd August.—First International Wool Textile Research Conference to be held in Australia opened in Sydney. Attended by 100 research workers, including 52 scientists from overseas.

23rd August.—Contract system of shipping Australian wool exports to Europe and United Kingdom broke down as British and European shipowners refused to renew contracts at less than 10 per cent. increase in freight rates.

24th August.—Commonwealth Budget for 1955-56 introduced into the House of Representatives, providing for an estimated expenditure of £1,123,599,000, revenue of £1,123,769,000 and an estimated surplus revenue of £170,000. The major items of estimated expenditure from Consolidated Revenue Fund were:—Defence Services, £190,000,000; War and Repatriation Services, £121,000,000; National Welfare Fund, £218,500,000; Payments to or for the States, £220,000,000; Capital Works and Services, £104,000,000. Estimated expenditure from Loan Fund includes £8,500,000 for War Service Land Settlement and £3,000,000 for redemption of War Savings Certificates. The Budget included proposals for increases in expenditure on repatriation benefits (£1,750,000) and social services benefits (£11,000,000).

26th August.—Overall prices of Australian iron and steel raised by 5 per cent.

30th August.—New £30 million hot-strip steel mill of Australian Iron and Steel Ltd. at Port Kembla (N.S.W.) opened by the Prime Minister who described it as "a great and historic event in the development of Australia".

12th-21st September.—Prime Minister called series of conferences with representatives of trading banks, hire purchase companies, and trade-union leaders to discuss financial aspects of Australian economic problems and suggested remedies. Fresh tightening of bank credit.

1st October.—Increase of $7\frac{1}{2}$ per cent. in shipping freights for Australian exports to most oversea countries became effective. Reductions of from $7\frac{1}{2}$ per cent. to 25 per cent. operated on licensed imports.

6th October.—15 million dollars (£A6.8 million) loan successfully negotiated in Canada by Australian Government.

4th November.—Legislation passed to re-introduce automatic quarterly basic wage adjustments in New South Wales.

18th November.—Queensland and New South Wales coal producers combined to form Australian Coal Association with main object of trying to find new and improved ways of producing, preparing and marketing coal.

22nd November.—For the first time in history, brown coal coke was successfully used at a Richmond (Vic.) foundry to smelt iron commercially.

26th November.—Reduction of about 10 per cent. in Queensland shearing rates under the State Shearing industry award ordered in Industrial Court judgment of 25th November.

13th December.—Trade Unions case for increased basic wages and restoration of quarterly cost of living adjustments brought before Arbitration Court.

17th December.—Commonwealth £30 million cash loan undersubscribed by £2 million. Commonwealth Arbitration Court upheld appeal by Public Service Board against salary increases granted under "Castieau" Award of June, 1955, based on metal trades "2½ times" formula; Court, however, granted certain adjustments.

1956.

In order to arrest inflationary tendencies and the decline in international reserves, measures additional to those taken in the latter half of 1955 were found necessary early in 1956. Despite import restrictions, oversea balances had fallen by £55 million in the six months ended, December, 1955. The excessive demand for imports arose from the impact of high and increasing purchasing power on limited local supplies of both investment and consumption goods. On 14th March, the Prime Minister announced new taxation measures to provide a brake on consumption and investment spending. The Government had decided to increase taxation on motor vehicles and petrol, to impose higher customs and excise duties on beer, spirits, tobacco, cigars and cigarettes, to increase company taxation and to increase sales tax on less essential goods. The banks had agreed to raise interest rates on fixed deposits by 1 per cent. and the overdraft rate from 5 per cent. to an average of $5\frac{1}{2}$ per cent. with a maximum of 6 per cent. In June, new import cuts estimated at £40 million a year were imposed on motor vehicles and chassis. Oversea reserves had fallen by a further £18 million in the six months ended June, 1956. Final trade figures for 1956 showed that imports fell from £863 million in 1955 to £765 million and that exports rose from £778 million to £840 million. Exports of wool were £23 million higher at £377 million and exports of wheat and flour £19 million higher at £84 million. Oversea reserves at December, 1956 stood at £425 million, £70 million higher than in June, 1956 and £52 million more than in December, 1955.

Production of wool in 1955–56 was 1,410 million pounds and it was estimated to be 1,565 million pounds in 1956–57. Wheat production in 1955–56 was 195 million bushels but it was estimated that the 1956–57 crop would be the lowest since 1946–47 at about 135 million bushels, the area sown being expected to decline from 10 to 8 million acres. Preliminary estimates of the total value of production of primary industries suggested an increase of 8 or 9 per cent. in 1956–57.

Secondary production generally was at the same high level as in 1955, being maintained by continuing high employment in factories, improved industrial capacity and production of basic materials.

Although total civil employment (excluding rural and household domestic employees) was somewhat higher in the year, the number of persons receiving unemployment benefits was over 13,000 at the end of 1956, compared with 3,245 at the end of 1955. Nominal wages were nearly 5 per cent. higher, the main increase occurring in June, when an increase of 10s. per week in the Commonwealth basic wage was granted by the Full Arbitration Court. Average earnings rose by 6 per cent. over the year, during which retail prices increased by about 6 per cent.

Although there was little change in gross private investment on fixed capital equipment during 1956, significant changes occurred in some of the components of investment. Private dwelling construction was about £10 million lower, the value of motor cars purchased was

about £15 million lower, investment in commercial vehicles and other capital equipment was at much the same level and other new building and construction was about £20 million higher than in 1955.

5th January.—Rent control lifted in Tasmania.

18th January.—Federal Executive Council empowered all trading banks to operate Savings Banks on conditions broadly the same as those governing State Savings Banks. (Bank of New South Wales Savings Bank Limited and Australia and New Zealand Savings Bank Limited opened 19th January, C.B.C. Savings Bank Limited opened 16th July, 1956.)

23rd January.—General Australian waterside strike over pay rates and working conditions for waterside workers. Queensland floods destroyed tobacco crops in South-West, floodwaters created widespread havoc, heavy losses of sheep.

31st January.—Commonwealth Treasury commenced publication of *Quarterly Economic Review*. Eight Australian University economists urged interest and tax increases "to avoid crisis".

1st February.—Loan Council meeting in Canberra decided not to alter the £190 million programme for State public works in this financial year. It agreed also to increase the interest rate on public loans by semi-governmental authorities from $4\frac{1}{2}$ to $4\frac{7}{8}$ per cent. but decided against making any change in the Commonwealth bond rate.

14th February.—Australian Council of Trades Unions began presentation of a case to Arbitration Court for review of the basic wage.

15th February.—Waterside workers resumed work in all Australian ports after 23 days strike (see 23rd January).

17th February.—Conciliation Commissioner reduced award wages for shearers in all States except Queensland by 5 per cent. from 5th March (see also 26th November, 1955).

20th February.—Commonwealth Government set up Advisory Panel of experts to advise Economic Committee of Commonwealth Ministry on economic problems.

24th February.—Federal Council of Australian Workers' Union called on shearers and other pastoral workers not to work under new rates fixed by Conciliation Commissioner (see 17th February).

1st March.—British Atomic Energy Commission contracted to buy more than £40 million worth of uranium oxide from Mary Kathleen leases near Mt. Isa.

2nd March.—Majority decision of Full High Court ruled that Arbitration Court had no power to impose penalties on those disobeying its orders.

5th March.—Improvements to working of the arbitration system discussed at round-table conference by Ministry of Labour Advisory Council which included leading trade-unionists, employer's organizations and Government experts.

14th March.—Australia's first electric main railway line, 98 mile section from Melbourne to Traralgon, Gippsland, opened.

The Prime Minister, in a statement to the House of Representatives, announced a number of new economic measures proposed by the Government to achieve economic stability. These included increases in sales tax on motor vehicles, jewellery and other goods of a less essential character, increases in customs and excise duties on petrol, beer, spirits, tobacco, cigarettes and cigars and increased income tax on companies. Part of the increased taxes on petrol would be used to increase the grants to the States under the Commonwealth Aid Roads legislation. In addition, bank overdraft rates would be permitted to rise from 5 per cent. to an average of $5\frac{1}{2}$ per cent. with a maximum of 6 per cent. and bank fixed deposit rates would be increased by 1 per cent.

21st March.—Australian Loan Council approved Commonwealth proposal that interest rate on new semi-governmental loans be raised. Three new loans issued at rates of $5\frac{1}{2}$ per cent. and $5\frac{3}{8}$ per cent.

27th March.—Announced that banks would be free to fix their own rates for individual loans within the limits announced by the Prime Minister on 14th March (see above).

30th March.—Agreement completed between Australia and Netherlands under which 75,000 Dutch settlers would come to Australia in next five years.

4th April.—Rural and Industries Bank of Western Australia opened Savings Bank department.

7th April.—Commonwealth Bank increased rates of interest payable on savings bank accounts by one-quarter per cent. Other savings banks followed suit.

19th April.—Bill introduced in Commonwealth Parliament to set up Export Payments Insurance Corporation. (Act assented to 19th June.)

21st April.—Extensive deposits of iron ore discovered near Nowa Nowa, 215 miles east of Melbourne in East Gippsland.

27th April.—New agreement finalized by United Nations Wheat Conference; to come into force on 1st August, for a period of three years.

10th May.—Bill introduced in Commonwealth Parliament making sweeping changes in Conciliation and Arbitration system (see Chapter VI, p. 156). (Act assented to 30th June.)

24th May.—Prime Minister in first of series of economic surveys said that the Australian economy faced long-term problems.

25th May.—Full Arbitration Court announced 10s. increase in Commonwealth basic wage and restated decision not to make automatic quarterly adjustments.

29th May.—Bill introduced in Commonwealth Parliament to replace Stevedoring Industry Board by Australian Stevedoring Industry Authority. (Act assented to 30th June.)

Announced that, as part of Commonwealth Government's world-wide trade promotion drive, Australian trade missions would visit New Zealand, India, Ceylon, Japan, Pakistan, the Middle East and, possibly, the Philippines to try to boost Australian exports.

19th June.—Announcement made of successful conclusion of negotiations for an Australian loan of \$25 million to be raised in New York.

21st June.—Executive of Australian Council of Trades Unions, at special congress in Melbourne, empowered to take nation-wide strike action against Stevedoring Industry Act (see 29th May).

24th June.—Biggest floods for 70 years on Darling and Murrumbidgee Rivers cover vast areas of country in south-west New South Wales and also affect northern Victoria.

26th–28th June.—At the meeting of the Loan Council, the Commonwealth rejected proposals by the States for a substantially increased loan programme to finance State works during 1956–57. With the Commonwealth dissenting, the Loan Council approved a governmental borrowing programme of £210,000,000 for 1956–57. This included £35,532,000 for the Commonwealth–State Housing Agreement. However, the Commonwealth indicated that it was prepared to vote for a programme of £190,000,000 and would review the position after the first six months of the financial year to determine whether further assistance could be provided towards financing the Loan Council programme. In addition the Council approved a borrowing programme of £80,250,000 for semi-governmental and local authorities.

28th June.—At the Premiers Conference, the Acting Prime Minister and Treasurer, Sir Arthur Fadden, announced that the Commonwealth Government would make a supplementary grant to the States of £19,400,000. This will bring the total of the tax reimbursement grant and the supplementary grant to £173,000,000. This is £16,000,000 more than similar grants in 1955–56.

Acting Prime Minister announced new £40 million a year import cuts to reduce imports of fully assembled motor vehicles by 50 per cent. and unassembled chassis by 30 per cent. Dollar licences for import of motor vehicles from North America reduced by 30 per cent.

30th June.—Commonwealth budget results for 1955–56 showed surplus of £61.6 million.

10th July.—By decision of Privy Council, New South Wales Government held liable for repayment of £1 million to interstate road hauliers in respect of licence fees and mileage charges paid since July, 1952.

12th July.—Every road between Melbourne and Sydney blocked by floods, mud, or snow.

13th July.—Tasmanian wages board decided to suspend quarterly adjustments of State basic wage after 16s. adjustment made for June quarter.

1st August.—New International Wheat Agreement commenced to operate. Australian quota 30 million bushels out of total of 303 million bushels (see Chapter XXI., p. 836).

14th August.—New Conciliation and Arbitration Act became effective.

16th August.—Special Premiers' Conference. Commonwealth asked States to freeze basic wage but failed to reach agreement.

22nd August.—Large deposit of bauxite discovered on west coast of Cape York Peninsula.

29th August.—The 1956–57 Budget was introduced into the New South Wales Legislative Assembly. During 1955–56, the transactions of the Consolidated Revenue Fund, Railways, Tram and Omnibus Service and Sydney Harbour Services resulted in an

overall deficit of £6.8m. After providing for debt charges, there were deficits of £7.6m. on the Railways and £4.1 m. on Transport Services. The 1956-57 Budget provided for total expenditure of £223,078,000 (an increase of £10,847,000 over 1955-56 expenditure). Estimated revenue was £223,115,000 (£17,717,000 more than 1955-56 revenue). This would leave a small overall surplus of £37,000. After providing for debt charges, it was estimated that there would be deficits of £3.9m. on the Railways and £1.8m. on Tram and Omnibus services. New taxation proposals were the introduction of a land tax, a tax on poker machines and increased stamp duty on hire purchase agreements.

30th August.—Commonwealth Budget for 1956-57 introduced into the House of Representatives. During 1955-56, Commonwealth revenue was £1,130.7m. and exceeded the estimated revenue by £15.9m. Excise revenue, £168.3m., exceeded the estimate by £9.3m. and Sales Tax revenue, £110.0m., exceeded the estimate by £4.0m. Income Tax collections, £574.0m., were £3.0m. below the estimate. Excluding the transfer to the Loan Consolidation and Investment Reserve, Commonwealth Expenditure during 1955-56 was £1,069.1m. or £3.0m. greater than the estimate. This left a surplus of £61.6m. which was transferred to the Loan Consolidation and Investment Reserve. Expenditure on War and Repatriation Services, £124.5m., and the Post Office, £85.6m., were £3.8m. and £2.4m. respectively greater than the estimates. On the other hand, payments to the National Welfare Fund, £214.9m., and expenditure on Capital Works and Services, £101.9m., were £3.5m. and £2.1m. respectively below the estimates.

The Budget for 1956-57 provided for an estimated expenditure of £1,121.4m. an increase of £52.3m. over expenditure during the previous year. It was estimated that revenue would be £1,230.2m. or £99.5m. more than in the previous year. There would thus be a surplus of £108.8m. which would be paid to the Loan Consolidation and Investment Reserve. The more important items of expenditure were (1955-56 expenditure shown in parentheses)—Defence Services, £190.0m. (£190.7m.); War and Repatriation Services, £123.1m. (£124.5m.); National Welfare Fund, £226.6m. (£214.9m.); Payments to the States, £243.8m. (£220.5m.) and Capital Works and Services, £109.7m. (£101.9m.).

Revenue expected from the main sources was (1955-56 revenue shown in parentheses). Income Taxes, £611.7m. (£574.0m.); Excise Duties, £212.2m. (£168.3m.); Sales Tax, £130.0m. (£110.0m.) and Customs Duties, £50.0m. (£87.5m.).

The budget proposals provided for increases in some widows and invalid pensions, some minor concessions in income taxes, the imposition of customs and excise duties on cathode ray tubes used in television sets, and increases in broadcast listeners' fees and some postal, telegraph and telephone charges.

11th September.—The 1956-57 Budget was introduced into the Victorian Legislative Assembly. During 1955-56, there was a deficit of £3.2m. Revenue during the year totalled £123.2m. (£0.2m. more than estimated) and expenditure was £126.4m. (£1.6m. greater than estimated). The Budget provided for expenditure of £135,788,000 in 1956-57. This is £9,391,000 more than the expenditure in the previous year. Estimated revenue was £133,343,000, an increase of £10,191,000 over the previous year. This would result in a deficit of £2,445,000. This included an estimated Railways deficit of £5.5m., an increase of £1.4m. over the deficit in the previous year. Additional revenue was to be obtained by increasing entertainments tax, motor registration fees and stamp duty on cheques and receipts and by imposing a stamp duty on hire purchase agreements.

16th September.—Public première of television in Sydney, first regular television transmissions begun.

18th September.—The 1956-57 Budget was introduced into the South Australian Legislative Assembly. In 1955-56, the transactions of the Consolidated Revenue Fund resulted in a deficit of £1.4m. Revenue was £59.4m. or £0.4m. below the estimate and expenditure was £60.8m. or £0.3m. above the estimate. The 1956-57 Budget proposals provided for expenditure of £65,982,000 (£5,150,000 more than 1955-56) and estimated revenue of £65,129,000 (£5,727,000 more than the previous year). This would result in a deficit of £853,000. The additional revenue would be obtained from increased collections from land tax due to the reassessment of the values of all land, an increase in the rate of stamp duty on cheques, increases of the liquor licence fees and some other statutory fees and increased railway freights.

20th September.—The 1956-57 Budget was introduced into the Queensland Parliament. In 1955-56, Consolidated Revenue Fund receipts of £75.7m. were £1.7m. below the estimate and expenditure, £77.4m., was £0.1m. greater than estimated. This resulted in a deficit of

£1.7m. The 1956-57 Budget provided for an expenditure of £84,760,000 (£7,368,000 more than in 1955-56) from the Consolidated Revenue Fund. Estimated revenue was £84,775,000 (an increase of £9,107,000 over 1955-56). This would leave a small surplus of £15,000. Most of the increased revenue will be provided by increased railway charges which operated from 1st August 1956.

28th September.—All price controls suspended in New South Wales.

4th October.—Minister for Trade stated that United Kingdom asked Government for its reactions to suggestion that United Kingdom should join in partial free trade area in Western Europe.

10th October. Victorian Legislative Assembly passed legislation to abolish cost of living adjustments for State employees.

11th October. Prime Minister announced signing of new five-year Sugar Agreement between Commonwealth and Queensland governments.

12th October.—Queensland State Industrial Court granted an interim Shearing award for payment of £7 11s. per 100 sheep shorn. This was accepted by shearers and 10 months old industrial dispute ended.

19th October.—Rise in "C" series index resulted in 11s. increase in New South Wales basic wage.

26th October.—Eight metal trades unions, backed by A.C.T.U., apply to newly formed Commonwealth Industrial Commission for basic wage increases and restoration of quarterly cost-of-living adjustments.

Details released of plan for development of 1½ million acres of land near Esperance, Western Australia, by the American Chase Syndicate.

31st October.—The Tasmanian Budget for 1956-57 was tabled in the House of Assembly. During 1955-56, revenue was £18.0m. and expenditure £17.9m. This resulted in a surplus of £.1m. The 1956-57 Budget provided for expenditure of £20,283,000 or £ 2,387,000 more than in 1955-56. It was estimated that receipts will be £19,233,000, an increase of £1,223,000 over 1955-56. This would result in a deficit of £1,050,000. Provision was made in the budget proposals for an increase in stamp duty on cheques and a stamp duty on hire purchase agreements.

8th November.—The West Australian Budget for 1956-57 was introduced. In 1955-56, there was a deficit of £1.8m. Revenue during the year was £49.6m. and expenditure £51.4m. The Budget proposals provided for an expenditure of £54.9m. (an increase of £3.5m. over 1955-56). Estimated revenue was £63.6m. (£3.8m. more than 1955-56). This would result in a deficit of £1.4m. Increased land tax and probate duties were announced.

12th November.—Australia and United Kingdom agree on comprehensive trade pact to replace 24-year-old Ottawa Agreement.

22nd November.—Commonwealth Treasurer announced that Minister for External Affairs had signed loan agreements on behalf of Commonwealth for a total of \$27 million (£A12.1 million).

29th November.—First gas from brown-coal gasification plant at Morwell (Victoria) reached Melbourne through 103 mile high-pressure pipeline.

4th December.—World Bank announced \$50 million loan to Australia for development of agriculture, transport, industry and mining.

CHRONOLOGICAL TABLE.

CHRONOLOGICAL TABLE OF CHIEF EVENTS SINCE THE ESTABLISHMENT OF SETTLEMENT IN AUSTRALIA.

NOTES.—For each earlier year this Table rarely contains more than two or three items; for recent years, however, in order to provide a wide cover of events, etc., it includes a much greater number. Both the nature of the Table and considerations of space render necessary a continual reduction in these items, and for more information the reader should therefore consult earlier issues.

The Government was centralized in Sydney, New South Wales, up to 1825, when Tasmania (Van Diemen's Land) was made a separate colony. In the Table the names now borne by the States serve to indicate the localities.

Year.

- 1788 N.S.W.—Arrival of "First Fleet", under Captain Arthur Phillip, at Botany Bay. Land in vicinity being found unsuitable for settlement, the expedition moved to Sydney Cove, and formal possession of the colony was taken on 26th January. Formal proclamation of colony and establishment of regular government on 7th February. Branch Settlement established at Norfolk Island. French navigator La Perouse visited Botany Bay. First cultivation of wheat and barley. First grape vines planted.
- 1789 N.S.W.—First wheat harvested at Parramatta, near Sydney. Discovery of Hawkesbury River.
- 1790 N.S.W.—Scarcity of provisions. "Second Fleet" reached Port Jackson. Landing of the New South Wales Corps.
- 1791 N.S.W.—Arrival of "Third Fleet". Territorial seal brought by Governor King.
- 1792 N.S.W.—Visit of *Philadelphia*, first foreign trading vessel.
- 1793 N.S.W.—First free immigrants arrived in *Bellona*. First Australian church opened at Sydney. Tas.—D'Entrecasteaux discovered the Derwent River.
- 1794 N.S.W.—Establishment of settlement at Hawkesbury River.
- 1795 N.S.W.—Erection of the first printing press at Sydney. Descendants of strayed cattle discovered at Cowpastures, Nepean River.
- 1796 N.S.W.—First Australian theatre opened at Sydney. Coal discovered by fisherman at Newcastle.
- 1797 N.S.W.—Introduction of merino sheep from Cape of Good Hope.
- 1798 Tas.—Insularity of Tasmania proved by voyage of Bass and Flinders.
- 1800 N.S.W.—Hunter River coal-mines worked. First Customs House in Australia established at Sydney. Flinders' charts published.
- 1801 N.S.W.—First colonial manufacture of blankets and linen.
- 1802 Vic.—Discovery of Port Phillip by Lieut. Murray. Q'land.—Discovery of Port Curtis and Port Bowen by Flinders. S.A.—Discovery of Spencer's and St. Vincent Gulfs by Flinders.
- 1803 N.S.W.—First Australian wool taken to England by Capt. Macarthur. Issue of *The Sydney Gazette*, first Australian newspaper. Vic.—Attempted settlement at Port Phillip by Collins. Discovery of Yarra by Grimes. Tas.—First settlement formed at Risdon by Lieut. Bowen.
- 1804 Vic.—Abandonment of settlement at Port Phillip. Tas.—Foundation of settlement at Hobart by Collins.
- 1805 N.S.W.—First extensive sheep farm established at Camden by Capt. Macarthur.
- 1806 N.S.W.—"The great flood" on the Hawkesbury. Shortage of provisions. Tas.—Settlement at Launceston.
- 1807 N.S.W.—First shipment of merchantable wool (245 lb.) to England.
- 1808 N.S.W.—Deposition of Governor Bligh.
- 1809 N.S.W.—Free school established.
- 1810 N.S.W.—Post Office officially established at Sydney.
- 1813 N.S.W.—Passage across Blue Mountains discovered by Wentworth, Lawson and Blaxland. Macquarie River discovered by Evans.

- Year.
- 1814 N.S.W.—Flinders suggested the name “Australia”, instead of “New Holland”. Creation of Civil Courts.
- 1815 N.S.W.—First steam engine in Australia erected at Sydney. Lachlan River discovered by Evans. Tas.—Arrival of first immigrant ship with free settlers. First export of wheat to Sydney.
- 1816 N.S.W.—Sydney Hospital opened.
- 1817 N.S.W.—Oxley’s first exploration inland. Discovery of Lakes George and Bathurst and the Goulburn Plains by Meehan and Hume. First bank in Australia—Bank of New South Wales—opened at Sydney.
- 1818 N.S.W.—Liverpool Plains, and the Peel, Hastings and Manning Rivers discovered by Oxley, and Port Essington (N.T.) by Captain King.
- 1819 N.S.W.—First Savings Bank in Australia opened at Sydney.
- 1820 Tas.—First importation of pure merino sheep from Camden Park (N.S.W.) flocks.
- 1821 Tas.—Establishment of penal settlement at Macquarie Harbour.
- 1822 N.S.W.—Formation of Agricultural Society of New South Wales.
- 1823 N.S.W.—New South Wales Judicature Act passed. Discovery of gold at Fish River by Assistant-Surveyor McBrien. Qld.—Brisbane River discovered by Oxley.
- 1824 N.S.W.—Constituted a Crown Colony. Executive Council formed. Establishment of Supreme Court at Sydney, and introduction of trial by jury. First Australian Enactment (Currency Bill) passed by the Legislative Council. Proclamation of freedom of the press. First manufacture of sugar. All volunteers in Australian Regular Army and Citizen Military Forces to be liable for service anywhere in the world—but only in the event of a major war. Adult franchise for Victorian Legislative Council replaced existing franchise dependent on property qualifications. National Service Bill to establish a system of national training for defence forces of Australia introduced in House of Representatives. Commonwealth Government to contribute £31,250,000 to Colombo Plan for Co-operative Economic Development in South and South-East Asia and £3,500,000 for technical assistance programme. Conference of Commonwealth Prime Ministers in London.
- 1951 Opening of Jubilee celebrations to mark the fiftieth year of Australian federation. British Government's confirmation of transfer of Heard Island and the Macdonald Islands (Southern Indian Ocean) to Australia. Governor-General granted double dissolution of nineteenth Parliament and opened the twentieth Parliament with special Jubilee ceremonies. Official cessation of hostilities with Germany. Conferences at all levels of business, finance, and working classes called by Prime Minister to discuss *methods of dealing with adverse economic trends*. Security Treaty signed in Washington by the United States of America, Australia and New Zealand for action in the event of an armed attack in the Pacific. Japanese Peace Treaty signed at San Francisco. Third Conference of Government Statisticians of the British Commonwealth held in Canberra. Opening of new Legislative Council of Papua and New Guinea, which included, for the first time in the history of Australian Legislature, representatives of the native peoples.
- 1952 Nuclear experiments commenced at National University, Canberra. Refusal by Commonwealth Conciliation Commissioner of an application by eleven metal trades unions for marginal wage increases ("Galvin" Award) affected more than 250,000 metal trades workers throughout Australia. Widespread bushfires in south-eastern Australia. Important high-grade uranium deposits discovered at Rum Jungle, Northern Territory. 1st Battalion, The Royal Australian Regiment, sailed from Sydney for service in Korea. Commonwealth Bank prohibited the establishment of further import credits until licences had been obtained for the goods involved. Severe restrictions imposed on imports from all sources and on amounts available for Australians travelling overseas. Agreement between the Commonwealth and South Australian Governments and the Combined Development Agency of the British and American Governments, on the development of uranium deposits at Radium Hill, South Australia. An amendment to the Conciliation and Arbitration Act provided for a limited right of appeal to the Commonwealth Court of Conciliation and Arbitration from decisions of Conciliation Commissioners, and for an increase in the number of Judges. Central and south-west New South Wales experienced one of the worst floods in history. Representatives of New Zealand, the United States of America and Australia met at Honolulu to consider the Pacific defence pact (A.N.Z.U.S.). Qantas Empire Airways began first direct service between Sydney and Johannesburg, South Africa. Commonwealth Government disposed of shares in Commonwealth Oil Refineries to the Anglo-Iranian Oil Co. Britain's first atomic weapon detonated on the Monte Bello Islands, near the north-west coast of Australia. British Commonwealth Economic Conference in London attended by Prime Minister of Australia.

Year.

- 1953 Television Act authorized the establishment in Australia of both National and Commercial television transmitting stations. Commonwealth Bank Act 1953 and Banking Act 1953 passed. Premiers' Conference in Canberra failed to reach agreement on return of income tax powers to States. 2nd Battalion sailed from Sydney for service in Korea. Bill introduced into Northern Territory Legislative Council to give citizenship rights to Northern Territory aboriginals, except those committed to State care. Atomic Energy Act 1953 established Atomic Energy Commission. National Health Bill 1953 consolidated legislation relating to health services. Australia and United States of America signed conventions to end double taxation between the two countries. Coronation of Her Majesty Queen Elizabeth the Second. Britain and Australia signed agreement for reciprocity in social services benefits. Conference of Commonwealth Prime Ministers on defence, economic and political issues held in London. Commonwealth Medical Benefits Scheme commenced. Korean armistice signed by United Nations and Communist Forces at Panmunjom. Pearl Fisheries Act providing for stricter control of pearl fisheries. Commonwealth Court of Conciliation and Arbitration refused applications by employers for reduction of current basic wages and for an increase of standard hours of work, and also refused applications by unions for increases of basic wages. The employers' applications for abandonment of the system of automatic adjustment of the basic wage in accordance with retail price index numbers were, however, granted. Oil discovered at Exmouth Gulf, about 680 miles north of Perth.
- 1954 Her Majesty the Queen and His Royal Highness the Duke of Edinburgh made first tour of Australia by reigning sovereign. Australian and Japanese Governments submitted dispute over extent of Australian sovereignty over sea-bed and control of pearl fisheries to the International Court of Justice and agreement signed on interim régime to regulate Japanese pearling in Australian waters. Australian Antarctic Research Expedition established a station at Mawson to conduct meteorological and other research. An Australian Services mission visited Singapore for a conference between Service representatives of the United Kingdom, the U.S.A., Australia, and New Zealand. Inaugural meeting of Nuclear Research Foundation. Mr. and Mrs. Vladimir Petrov of the Soviet Embassy granted political asylum. Soviet Government recalled its Embassy in Australia, and Ambassador and staff sailed from Fremantle on 29th April. Australian Embassy left Moscow on same date. Royal Commission into espionage in Australia set up. Political conference on Korea and Indo-China opened in Geneva. Royal Commission into Television recommended introduction of television into Australia as soon as practicable. Australia took part in Five Power military talks, at Washington, on South-East Asia. Premier of South Australia announced two new uranium finds in north-east of State. Australian population census taken. Carnegie Corporation granted £250,000 to help finance the building of a giant radio telescope. Australia at the Manila Conference signed a treaty pledging collective defence against aggression in South-East Asia and the South-West Pacific. 3rd Battalion withdrawn from Korea. At Rum Jungle, Prime Minister officially opened first uranium treatment plant established in Australia. National Joint Production Council formed representing both management and workers. Atomic Energy Commission authorized to construct an advanced type of nuclear reactor and research laboratories as part of a programme of co-operation in atomic research with the United Kingdom. Control of Cocos Islands handed over to Australia by Great Britain. Privy Council ruled that New South Wales State Transport (Co-ordination) Act was invalid insofar as it applied to interstate transport.
- 1955 Harbour at Cockburn Sound, W.A., opened to provide shipping facilities for Kwinana. Commonwealth Government announced that about 135 Japanese pearl divers would be permitted to enter Australia to operate with pearling fleets from Broome to Darwin. Conference of British Commonwealth Prime Ministers held in London. Australia's first aluminium plant began production. Minister for External Affairs attended first council meeting of signatories to Manila Treaty. Prime Minister visited Washington as guest of President Eisenhower to talk on defence policy and Australia's role in South-East Asia. First power generated

Year.

1955—
contd.

from Snowy Mountains fed into New South Wales electricity system. Disastrous floods covered large areas of central west New South Wales and Hunter Valley. Australian population reached 9,000,000. All price control ended in New South Wales. Announced that Australia would make Salk polio vaccine at Commonwealth Serum Laboratories, Melbourne. Commonwealth Government announced licensing of four commercial television stations for Australia. Major contracts let to A.W.A. Limited for construction of national television stations in Melbourne and Sydney. Australia's 1955-56 immigration programme increased to a basic intake of 125,000 migrants, including 70,000 assisted-passage. Privileges committee of Commonwealth Parliament found Messrs. Brown and Fitzpatrick guilty of serious breach of privilege. House of Representatives committed both to prison for three months. Commonwealth Full High Court declared that recent legislation imposing a road tax on interstate hauliers was invalid. South Australian State Government's uranium treatment plant at Port Pirie began operations. Prime Minister announced Australia's acceptance of British invitation to join expedition to cross Antarctic in summer of 1957-58. First International Wool Textile Research Conference to be held in Australia opened in Sydney. First F.A.O. Conference to be held in Australia opened in Brisbane. First S.E.A.C.D.T. defence talks to be held in Australia began in Melbourne. Australian task force left for Malaya. New £30 million hot-strip steel mill of Australian Iron and Steel Ltd. at Port Kembla (N.S.W.) opened. Report of Royal Commission on Espionage tabled in House of Representatives. Minister for Health announced that Commonwealth Government had decided to apply means test to Pensioner Medical Service, to apply to all pensions granted under scheme after 31st October. New South Wales Government reintroduced quarterly automatic basic wage adjustments. Cocos (Keeling) Islands became Territory under authority of Commonwealth. Government of Victoria issued High Court writ for declaration that present system of uniform taxation is illegal.

1956

Dr. Roberto Regala appointed first Philippines Ambassador to Australia. Rent control lifted in Tasmania. S.E.A.T.O. military advisers conference opened in Melbourne. Floods in Queensland wiped out whole of south-west Queensland's tobacco crops, loss estimated at £1 million. Thousands of sheep lost. In New South Wales, wide area threatened by floods, 8,000 homeless near Sydney. Record floods also in Victoria and north-eastern Tasmania. Secretary-General of United Nations paid short visit to Australia. High Court ruled by 4-3 majority that Arbitration Court had no power to impose penalties on those disobeying its orders. Australia's first electric main railway line, 98 mile section from Melbourne to Traralgon, Gippsland, opened. Prime Minister in Supplementary Budget announced immediate increases in company and sales taxation and excise and customs duties. The Australian Trade Commissioner, at Hong Kong, had discussions at Peking with communist China on possible Trade expansion between Australia and China. Australia and Netherlands completed agreement under which 75,000 Dutch settlers would come to Australia in next five years. Northern Territory Legislative Council approved agreement between Commonwealth Government and Australian-American backed company giving company an option on 750,000 acres of sub-coastal plains for rice growing. Basic salary of Federal Members of Parliament and Senators increased by £600 per annum. Lengthy industrial dispute in Queensland shearing industry. Australia and United Kingdom agreed on new multi-million pound programme for Woomera rocket range. Sweeping changes made in Commonwealth system of conciliation and arbitration by new Conciliation and Arbitration Act (*see p. 156*). States of New South Wales, Victoria, South Australia and Tasmania marked centenary of responsible government by special ceremonies. Australia's first ambassador to Burma appointed. Bilateral agreement signed between Australia and U.S.A. for peaceful uses of atomic energy. As result of decision by Privy Council, New South Wales liable for repayment of £1 million to interstate road hauliers in respect of licence fees and mileage charges paid under protest since July, 1952 (*see 1954*). All-party committee appointed by Commonwealth Parliament to consider possible changes in Australian constitution and sittings began in Melbourne. First Commissioner for Federation of Malaya in Australia appointed. Dispute over control of Suez Canal resulted in London conference of Canal users. Australian Prime Minister appointed

1956—

contd.

as chairman of committee to place views of conference before the Egyptian President. Diplomatic relations between Australia and Egypt subsequently broken off. Federal Government decided to reduce immigration from southern European countries. Regular television transmissions commenced in Australia (Sept. 16). First atomic tests on Australian mainland at Maralinga (South Australia). £24 million Eildon Dam, largest water storage scheme in southern hemisphere, officially opened by Premier of Victoria. Australian Government agreed to provide sanctuary for up to 10,000 refugees from Hungarian political oppression. Australia and United Kingdom agreed on comprehensive trade pact to replace 24-year-old Ottawa Agreement. Olympic games held in Melbourne, opened by H.R.H. the Duke of Edinburgh; best performance by Australian athletes in history of games. Antarctic expedition sailed with intention of establishing new station at Vestfold Hills as well as extending existing bases.

STATISTICAL SUMMARY, AUSTRALIA.

NOTE.—(1) In most cases where figures are available back to 1861, these were shown in the Official Year Book No. 39, pp. xxviii-xxix.

(2) Most of the statistics in this Summary relate to the periods shown in the table headings. In those comparatively few cases where the statistics relate to other periods, this is indicated in footnotes.

APPENDIX.

(Some recent information which has come to hand since the various chapters were sent to press is given hereunder in summarized form. For further or more detailed information, and for the latest available statistics, reference should be made to other publications issued by this Bureau (*see pp. 1082-4*), notably the *Monthly Review of Business Statistics* and the *Quarterly Summary of Australian Statistics*.)

CHAPTER II.—PHYSIOGRAPHY.

§ 2. Climate and Meteorology of Australia.

Rainfall: Australian Capital Cities, p. 48.—Rainfall recorded in Australian capital cities during 1956 was as follows:—Canberra, 40.46 ins.; Perth, 37.35 ins.; Adelaide, 27.24 ins.; Brisbane, 59.18 ins.; Sydney, 67.33 ins.; Melbourne, 30.96 ins.; Hobart, 36.63 ins.

CHAPTER III.—GENERAL GOVERNMENT.

§ 1. Scheme of Parliamentary Government.

Commonwealth Parliamentary Allowances, p. 65.—The annual salaries of senators and members of the House of Representatives were increased by £600 to £2,350 from 1st July, 1957. The Parliamentary Allowances Act also provided that senators would receive an annual expense allowance of £700, members in metropolitan electorates £600, and country members £800. Expense allowances which were previously non-taxable became subject to normal income-tax provisions, and stamp allowances and gold passes were abolished.

§ 2. Parliaments and Elections.

State Parliaments, pp. 69-72.—The thirty-fourth Queensland Parliament was dissolved on 13th June, 1957. The thirty-fifth Parliament was opened on 27th August, 1957.

§ 3. Administration and Legislation.

Governors and State Ministers, pp. 76-78.—(i) *New South Wales.* On 1st August, 1957, Lieut.-General Eric Winslow Woodward, C.B., C.B.E., D.S.O., was sworn in as Governor of New South Wales in succession to Lieut.-General Sir John Northcott, K.C.M.G., K.C.V.O., C.B.

(ii) *Queensland*. Subsequent to elections held on 3rd August, 1957, a new ministry took office on 12th August, 1957. It was constituted as follows:—

Premier and Chief Secretary and Vice-President of the Executive Council—

THE HON. G. F. R. NICKLIN.

Minister for Labour and Industry—

THE HON. K. J. MORRIS.

Minister for Education—

THE HON. J. C. A. PIZZEY.

Attorney-General—

THE HON. A. W. MUNRO.

Treasurer and Minister for Housing—

THE HON. T. A. HILEY.

Minister for Development, Mines and Main Roads—

THE HON. E. EVANS.

Minister for Public Lands and Irrigation—

THE HON. A. G. MÜLLER.

Minister for Health and Home Affairs—

THE HON. H. W. NOBLE.

Minister for Agriculture and Stock—

THE HON. O. O. MADSEN.

Minister for Public Works and Local Government—

THE HON. J. A. HEADING.

Minister for Transport—

THE HON. G. W. W. CHALK.

Leaders of the Opposition, Commonwealth and State Parliaments, p. 78.—Victoria: The Hon. A. E. Shepherd. Queensland: L. A. Wood. Western Australia: The Hon. D. Brand.

§ 5. Cost of Parliamentary Government, p. 81.

The cost of Parliamentary Government, Commonwealth and individual States, for the year 1955–56 was as follows:—

Commonwealth, £2,532,246 (5s. 5d. per head); New South Wales, £742,753 (4s. 3d.) Victoria, £586,940 (4s. 7d.); Queensland, £474,515 (7s. 0d.); South Australia, £372,493 (8s. 11d.); Western Australia, £444,527 (13s. 3d.); Tasmania, £224,940 (14s. 1d.); and total, £5,378,414 (11s. 7d.)

The amounts expended under the major headings for all Governments during 1955–56 were:—Governor-General or Governor, £348,730; Ministry, £278,973; Parliament, £3,343,183; Electoral, £1,327,429.

CHAPTER VI.—LABOUR, WAGES AND PRICES.

A. RETAIL PRICES AND PRICE INDEXES.

§ 4. Tabular Statements of Retail Price Index Numbers.

The Interim Retail Price Index, p. 148.—Very large seasonal fluctuations in prices of potatoes and onions, first upward then downward, affected the movement of the Food Group and the All Groups index numbers in most cities from September quarter, 1956 to March quarter, 1957, and caused disparate movements in the indexes for respective cities.

In order to provide an indication of the trend of the indexes in respect of items not materially affected by seasonal factors, a Food Group Index and an All Groups Index which exclude potatoes and onions are shown in the following table in comparison with the indexes including potatoes and onions.

The table shows the interim retail price index numbers for the years ended June, 1956 and June, 1957 and for the quarters from September, 1955 to June, 1957, for each capital city and for the six capital cities combined.

INTERIM RETAIL PRICE INDEX NUMBERS.

(Base of each Index: Year 1952-53 = 100.)

(a) Weighted average. (b) The rent index numbers measure the proportionate rise and fall in the average weekly rentals paid for houses of four and five rooms taking corresponding houses throughout. See footnote (b) on page 149. (c) A group of items under the following headings—Electricity, Gas, and Firewood; Household Sundries; Services; Cinema Admission, Radio Licence, and Newspapers; Fares; and Tobacco and Cigarettes.

§ 5. The "C" Series Retail Price Index.

"C" Series Retail Price Index, Six Capital Cities, p. 151.—For the reason mentioned in §4 (page 1128) (The Interim Retail Price Index), the following table also includes a Food Group Index and an All Groups Index which exclude the price movement of potatoes and onions. This table shows "C" Series index numbers for the year 1956 and for quarters from September, 1955 to June, 1957 for the six capital cities combined.

"C" SERIES RETAIL PRICE INDEX NUMBERS: SIX CAPITAL CITIES COMBINED.

(Base of each Group: Weighted Average of Six Capital Cities, 1923-27 = 1,000.)

Period.	Food and Groceries. (a)		Rent (4 and 5 Roomed Houses.(b))	Clothing.	Miscel- laneous.	Total "C" Series Index.(a)	
	A	B				A	B
Year—1956 ..	2,923	3,084	1,325	3,261	2,236	2,489	2,547
Quarter—							
1955—September ..	2,810	2,854	1,232	3,243	2,081	2,394	2,411

1957—March ..	2,973	2,982	1,357	3,323	2,336	2,547	2,550
June ..	2,977	2,997	1,373	3,354	2,368	2,565	2,572

(a) Indexes in columns "A" exclude (as from and including September quarter, 1955), and those in columns "B" include, the price movement of potatoes and onions. (b) See footnote (b) on page 149.

B. WHOLESALE PRICES AND PRICE INDEXES.

§ 2. Wholesale Price (Basic Materials and Foodstuffs) Index.

Index Numbers, p. 153.—During 1956, supplies and prices of potatoes and onions fluctuated violently upward and downward between abnormally wide limits. These fluctuations were so great as to dominate the movement of the sections of the index in which these items were included, namely, "Foodstuffs and Tobacco" and "Goods Principally Home Produced" as well as the "Total All Groups" index number. In the circumstances of the case, neither seasonal adjustment nor conversion of the index to a "changing weights" formula could be applied to eliminate these transient fluctuations. Accordingly, in order to provide a representative measure of general trend in wholesale prices, the index was reconstructed as from the base period (three years ended June, 1939 = 100), by omitting potatoes and onions.

The table below shows index numbers for each year from the base period and for the twelve months to June, 1957 including the reconstructed indexes mentioned above for "Foodstuffs and Tobacco", "Goods Principally Home Produced" and "Total All Groups".

WHOLESALE PRICE (BASIC MATERIALS AND FOODSTUFFS) INDEX NUMBERS.

(Base of each Group: Average, 3 years ended June, 1939 = 100.)

Period.	Basic Materials.							Foodstuffs and Tobacco. (b)	Basic Materials and Foodstuffs.

ADULT FEMALES—INDEX NUMBERS.							
<i>(Base: Weighted Average for Australia (27.17s.), 30th April, 1914 = 1,000.)</i>							
31st March, 1957 ..	7,929	7,956	7,406	7,635	7,491	7,649	7,831
30th June, 1957 ..	8,076	8,176	7,652	7,967	7,715	7,926	8,039

(a) Weighted average for Australia.

§ 3. Average Weekly Wage Earnings.

Average Weekly Total Wages Paid and Average Earnings, p. 165.—Particulars of average weekly total wages paid and average earnings per employed male unit for the year 1956-57 are shown in the following table:—

AVERAGE WEEKLY TOTAL WAGES PAID AND AVERAGE EARNINGS, 1956-57.

Particulars.	N.S.W.(a)	Vic.	Qld.	S.A.(b)	W.A.	Tas.	Aust.
Average Weekly Total Wages Paid . . . £'000.	20,167	14,111	6,218	4,387	2,979	1,596	49,458
Average Weekly Earnings per Employed Male Unit £	19.20	19.13	16.24	17.70	17.02	17.73	18.43

(a) Includes the Australian Capital Territory. (b) Includes the Northern Territory. (c) Male units represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings. The same ratio has been used in each State, and because the average ratio of female to male earnings may vary between States, precise comparisons between average earnings in different States cannot be made on the basis of the figures above.

§ 4. Basic Wages in Australia.

Basic Wage Inquiry, 1956-57.—Following a summons filed on 26th October, 1956, by the Amalgamated Engineering Union and others, the Commonwealth Conciliation and Arbitration Commission in Presidential Session (consisting of Kirby C.J., Wright and Ashburner J.J.) on 13th November, 1956, commenced to hear claims for alteration of the basic wage prescribed in the Metal Trades Award. The claims made were: 1. "For the increase of the basic wage in all its manifestations to the amount it would have reached if there had remained in the award provisions for automatic quarterly adjustments which had been deleted in September, 1953," 2. "For the re-insertion in the award

of the provisions for the automatic quarterly adjustment of the basic wage” In accordance with past practice this application in respect of the Metal Trades Award was treated by the Commission as a general application for variation of the basic wage in all Federal awards.

The claims of the unions were opposed by the respondent employers. The Attorney-General for the Commonwealth intervened in the public interest under section 36 (1.) of the Conciliation and Arbitration Act, but, of the States, only Victoria and South Australia were represented.

The State of South Australia suggested that if, contrary to that State's opposition, an increase in the basic wage were prescribed, the Commission should first decide upon the increase to be added to the six capitals basic wage and then apportion that increase amongst the six capital cities on a basis accurately reflecting the differences in cost of living in the different cities.

After hearing the claims of the parties, the Commission decided that before it could reach a decision it would have to examine in detail the following three main issues : (i) Whether the system of automatic adjustments should be restored, (ii) whether there should be an increase in the basic wage and, if so, of what amount, and (iii) whether the increase should be of a uniform amount.

In the judgment delivered on 29th April, 1957, the Commission granted a uniform increase of 10s. per week in the basic wage for adult males to come into effect from the first pay-period to commence on or after 15th May, 1957. As a result of this decision the basic wage for females was increased by 7s. 6d. with proportionate increases for juniors of both sexes and for apprentices. The Commission advised that it approved an annual review of the basic wage and would be available for this purpose in February, 1958.

The new basic wage rates of the Commonwealth Conciliation and Arbitration Commission for adult males payable in the capital city of each State from the beginning of the first pay-period on or after 15th May, 1957 are as follows:—Sydney, £13 3s., Melbourne, £12 15s., Brisbane, £11 18s., Adelaide, £12 11s., Perth, £12 16s., Hobart, £13 2s., Six Capital Cities (weighted average), £12 16s.

State Basic Wage Rates, p. 182.—The table below shows the “basic” weekly wage rates of State industrial tribunals, operative in May and August, 1957.

STATE BASIC WAGE—WEEKLY RATES.

(a) Where dates are not quoted wage rates operate from beginning of first pay-period commencing in month shown. (b) Automatic adjustment discontinued from 23rd October, 1953, following decision of the Commonwealth Court of Conciliation and Arbitration on 12th September, 1953 (see p. 169). Automatic adjustment re-introduced from first pay-period in November, 1955. (c) Basic wage rates shown (Melbourne) are those commonly adopted by Wages Boards. (d) The Queensland Industrial Court each quarter announces the variation, if any, in the basic wage after considering movements in the “C” Series retail price index numbers. (e) The “living wage” declared applies to the whole State except for a 5s. loading at Whyalla. On 9th May, 1957 the Governor proclaimed a 10s. increase in the “living wage” payable from 20th May, 1957 to conform with the increase of 10s. announced on 29th April, 1957 by the Commonwealth Conciliation and Arbitration Commission. (f) The Western Australian Arbitration Court each quarter announces any variations in the basic wage after considering a statement, prepared by the Government Statistician, which shows movements in the “C” Series retail price index numbers. (g) Basic wage rates shown (Hobart) are those commonly adopted by Wages Boards.

E. EMPLOYMENT AND UNEMPLOYMENT.

§ 1. Employment.

Wage and Salary Earners in Civilian Employment, pp. 186-8.—The following are particulars of wage and salary earners in civilian employment, excluding rural wage earners, female private domestics, Defence Forces and National Service trainees in camp, for the month of June, 1957.

WAGE AND SALARY EARNERS IN CIVILIAN EMPLOYMENT, JUNE, 1957.

(Excluding Rural Wage Earners, Female Private Domestics, Defence Forces and National Service Trainees in Camp.)
(*000.)

Australia's Balance of Payments with the Dollar Area, p. 368.—The following table presents estimates of Australia's dollar balance of payments in revised form for 1954-55 and 1955-56 and preliminary estimates for 1956-57:—

BALANCE OF PAYMENTS WITH THE DOLLAR AREA: AUSTRALIA.
(United States \$ million.)

Particulars.	1954-55.	1955-56.	1956-57. (a)
CURRENT ACCOUNT.			
1. Exports, f.o.b., to United States of America and Canada	+ 142	+ 148	+ 170
2. Imports, f.o.b., from United States of America and Canada	- 295	- 273	- 266
3. Trade balance with United States of America and Canada	- 153	- 125	- 96
4. Trade balance with other Dollar Area	+ 11	+ 10	+ 9
5. <i>Trade Balance with the Dollar Area</i>	<u>- 142</u>	<u>- 115</u>	<u>- 87</u>
6. Freight	- 33	- 41	- 45
7. Other transportation	- 3	- 3	- 3
8. Travel expenditure	- 3	- 4	- 5
9. Business expenses of Australian firms	- 5	- 5	- 5
10. Film remittances	- 6	- 6	- 6
11. Profits and dividends remitted	- 29	- 26	- 29
12. Undistributed income (net)	- 37	- 43	- 48
13. Public authority interest	- 7	- 6	- 6
14. Other debits	- 16	- 15	- 17
15. Other credits	+ 16	+ 18	+ 20
16. <i>Balance on Invisibles</i>	<u>- 123</u>	<u>- 131</u>	<u>- 144</u>
17. <i>Balance on Current Account (5+16)</i>	<u>- 265</u>	<u>- 246</u>	<u>- 231</u>
18. Other Current Transactions	+ 18	+ 14	+ 24
19. <i>Dollar Deficit on Current Account (17+18)</i>	<u>- 247</u>	<u>- 232</u>	<u>- 207</u>
CAPITAL TRANSACTIONS INVOLVING DOLLARS.			
20. Public authority borrowing	+ 42	+ 60	+ 7
21. Undistributed income (see item 12)	+ 37	+ 43	+ 48
22. Other identified transactions	+ 55	+ 29	} + 54
23. Balancing item	+ 29	+ 14	
24. <i>Balance on Capital Transactions</i>	<u>+ 163</u>	<u>+ 146</u>	<u>+ 109</u>
25. Total Dollar Deficit (-) (19+24)	<u>- 84</u>	<u>- 86</u>	<u>- 98</u>
DOLLAR FINANCING.			
26. Gold sales to United Kingdom	+ 56
27. Dollars repaid to I.M.F. (net) (-)	- 26
28. Estimated dollar drawings on Sterling Area Central Reserves (+)	+ 121	+ 90	+ 52
29. Movement in Australian dollar balances (increase -)	- 11	- 4	- 10
30. Total	<u>+ 84</u>	<u>+ 86</u>	<u>+ 98</u>

(a) Preliminary.

NOTE.—In current and capital account, + signifies a net receipt (exports, etc., or net borrowing); - signifies a net payment (imports, etc., or net lending).

CHAPTER XI.—TRANSPORT AND COMMUNICATION.

PART I.—TRANSPORT.

F. MOTOR VEHICLES.

Motor Vehicle Registrations, p. 404.—Motor vehicles registered at 30th June, 1957 and new motor vehicles registered during 1956–57 were as follows:—

MOTOR VEHICLES: REGISTRATIONS, 1956-57.

State or Territory.	Number of Motor Vehicles Registered at 30th June, 1957.(a)				Number of New Motor Vehicles Registered, 1956-57.(a)			
	Motor Cars.(b)	Commercial Vehicles.(c)	Motor Cycles.	Total.	Motor Cars.(b)	Commercial Vehicles.(c)	Motor Cycles.	Total.
New South Wales ..	515,941	255,580	35,567	807,088	51,513	22,463	2,919	76,895
Victoria(d) ..	527,859	155,100	25,623	708,582	47,603	13,821	1,999	63,423
Queensland ..	194,726	130,493	20,287	345,506	19,024	9,937	1,659	30,620
South Australia ..	164,210	66,198	19,799	250,207	15,689	5,702	1,441	22,832
Western Australia ..	103,788	66,030	13,146	182,964	9,321	4,418	1,192	14,931
Tasmania ..	52,716	22,893	4,391	80,000	5,307	1,981	341	7,629
Northern Territory ..	2,419	3,574	664	6,657	287	389	60	736
Aust. Capital Territory ..	7,674	2,708	461	10,843	951	256	44	1,251
Total ..	1,569,333	702,576	119,938	2,391,847	149,695	58,967	9,655	218,317

(a) Excludes Defence Service vehicles, trailers, road tractors, etc., and dealer's plates. (b) Includes taxis and hire cars. (c) Includes lorries, vans, buses and utilities. (d) Registration in Victoria is according to purpose of use and not type of vehicle; consequently, motor car registrations are overstated by the inclusion of commercial vehicles registered for private use.

G. ROAD TRAFFIC ACCIDENTS.

Total Accidents Recorded, p. 406.—The following table is a summary of the total number of accidents (known to the police) which occurred in public thoroughfares during 1955-56, the number involving casualties and the number of persons killed or injured in each State and the Commonwealth excluding the Northern Territory.

ACCIDENTS (KNOWN TO THE POLICE) WHICH OCCURRED IN PUBLIC THOROUGHFARES: ACCIDENTS RECORDED AND CASUALTIES, 1955-56.

State or Territory.	Total Accidents Recorded.(a)	Accidents Involving Casualties.	Casualties.	
			Persons Killed.	Persons Injured.(b)
New South Wales	38,823	12,917	808	17,047
Victoria	14,781	10,606	582	13,483
Queensland	25,557	7,116	298	9,170
South Australia	12,530	2,886	167	3,709
Western Australia	11,312	3,211	185	4,098
Tasmania	2,259	874	72	1,046
Australian Capital Territory	376	156	7	220
Total	105,638	37,766	2,119	48,773

(a) Total accidents causing death or injury to persons or, except in Tasmania, damage exceeding £10 to property. (b) Persons injured to an extent requiring surgical or medical treatment.

PART II.—COMMUNICATION.

A. POSTS; TELEGRAPHS; TELEPHONES; CABLE AND RADIO COMMUNICATION.

§ 5. Cable and Radio Communication.

Radio-communication Stations Authorized, p. 428.—The following radio-communication stations were authorized in Australia and the External Territories at 30th June, 1957:—Transmitting and receiving stations—amateur, 3,423 (64); aeronautical, 97 (10); coast, 74 (13); land, 3,539 (346); mobile (general), 16,189 (209) (including ship, 1,580; aircraft, 323; other unclassifiable, 583); and miscellaneous, 113. In addition, there were 373 fixed and 61 mobile (general) stations for the purpose of receiving only. The figures in parentheses refer to the External Territories and are included in the totals preceding them.

B. BROADCASTING AND TELEVISION.

§ 2. Broadcasting.

Broadcasting Stations, p. 430.—The following table shows the number of broadcasting stations in operation at 30th June, 1957:—

BROADCASTING STATIONS, 30th JUNE, 1957.

Type of Station.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Papua and New Guinea.	Total.
National—										
Medium Frequency	15	5	12	7	7	4	2	2	1	55
Short-wave ..	1	3	2	..	2	1	9
Commercial ..	37	20	20	8	14	8	..	1	..	108

Broadcast Listeners' Licences, p. 434.—Licences in force at 30th June, 1957 were as follows:—New South Wales, 777,072; Victoria, 554,909; Queensland, 312,527; South Australia, 234,120; Western Australia, 155,166; Tasmania, 73,459; Australia, 2,107,253. Figures for the Northern Territory and the Australian Capital Territory have been included with those for South Australia and New South Wales respectively.

§ 3. Television, p. 434.

Television Viewers' Licences.—Licences in force at 30th September, 1957 were as follows:—New South Wales, 50,563; Victoria, 69,070; Tasmania, 18; Australia, 119,651.

CHAPTER XII.—EDUCATION.

§ 2. Government Schools.

Number of Schools, Teachers and Pupils, p. 442.—The following table gives a summary of particulars relating to government schools in 1955.

GOVERNMENT SCHOOLS(a), 1955.

State or Territory.	Schools open at end of year.	Teachers Employed (Excluding Teachers in Training).	Teachers in Training.	Net Enrolment.
New South Wales(b)	2,595	16,214	3,159	525,298
Victoria	2,016	11,810	2,669	(c) 332,600
Queensland	1,557	6,847	1,746	196,848
South Australia	665	4,670	548	129,407
Western Australia	487	3,243	831	(d) 94,718
Tasmania	291	2,183	390	(e)
Northern Territory	8	86	..	1,987
Australia	7,619	45,053	9,343	(e)

(a) Excludes Senior Technical Colleges. (b) Includes the Australian Capital Territory.
(c) Estimated. (d) Average weekly enrolment. (e) Not yet available.

Average Enrolment and Attendance of Pupils, p. 443.—The following tables gives a summary of average enrolment and attendance of pupils in government schools in 1955.

GOVERNMENT SCHOOLS(a): AVERAGE ENROLMENT AND ATTENDANCE, 1955.

State or Territory.	Average Weekly Enrolment.	Average Daily Attendance.	Percentage of Attendance to Enrolment.
New South Wales(b)	490,595	439,187	89.52
Victoria	317,836	289,331	91.03
Queensland	(c) 192,163	171,118	89.05
South Australia	(d) 124,634	115,661	92.80
Western Australia	94,718	87,699	92.59
Tasmania	53,129	49,053	92.33
Northern Territory	1,760	1,579	89.72
Australia	1,274,835	1,153,628	90.49

(a) Excludes Senior Technical Colleges. (b) Includes the Australian Capital Territory.
(c) Census enrolment 1st August. (d) Average daily enrolment.

Expenditure on Government Schools, pp. 444.—The following table gives a summary of particulars of net expenditure on maintenance of government schools, and on government school buildings in 1955.

GOVERNMENT SCHOOLS(a): NET EXPENDITURE, 1955.
(£.)

State or Territory.	Net Expenditure on Maintenance.	Net Expenditure on Buildings.	Total Net Expenditure on Government Schools.
New South Wales(b)(c)	24,901,349	7,366,160	32,267,509
Victoria(d)(e)	14,453,861	4,660,276	19,114,137
Queensland(e)	6,978,485	1,286,620	8,265,105
South Australia(c)	5,480,363	1,366,399	6,846,762
Western Australia(e)	5,143,030	1,458,278	6,601,308
Tasmania(c)	(f)	(f)	(f)
Northern Territory(e)	125,062	15,608	140,670
Australia	(f)	(f)	(f)

(a) Excludes Senior Technical Colleges. (b) Gross figures, receipts not being available.
Includes the Australian Capital Territory. (c) Year ended 31st December. (d) Excludes Junior Technical Schools. (e) Year ended 30th June. (f) Not yet available.

CHAPTER XIII.—PUBLIC JUSTICE.

§ 2. Lower (Magistrates') Courts. § 3. Higher (Judges') Courts,

§ 4. Civil Courts. § 5. Police and Prisons.

Convictions, Bankruptcies, Police, Prisons, pp. 475, 476, 479, 485, 487.—The following table gives a summary of the more important statistics of this chapter for the latest year for which information is available.

PUBLIC JUSTICE: SUMMARY, 1955.

25-29 ..	370,176	330,665	700,841	65 and over	353,039	441,244	794,283
30-34 ..	383,544	356,163	739,707				
35-39 ..	338,938	326,730	665,668	Total ..	4,777,567	4,649,991	9,427,558

§ 12. Citizenship and Naturalization.

Certificates Granted, p. 582.—The number of certificates granted under the Nationality and Citizenship Act 1948-1955 during the year 1956 was 25,585. Former nationalities of the recipients were: Polish, 4,509; Italian, 2,902; Hungarian, 2,421; Yugoslav, 2,371; Latvian, 2,263; Dutch, 2,019; Czechoslovak, 1,687; Ukrainian, 1,520; Other nationalities, 5,893.

CHAPTER XVII.—VITAL STATISTICS.

§ 2. Marriages.

Age and Conjugal Condition at Marriage, p. 587.—A summary of the previous conjugal condition of bridegrooms and brides in 1956 in relation to age at marriage is as follows.

AGE AND CONJUGAL CONDITION OF BRIDEGROOMS AND BRIDES:
AUSTRALIA, 1956.

Age at Marriage (Years).	Bridegrooms.				Brides.			
	Bachelors.	Widowers.	Divorced.	Total.	Spinsters.	Widows.	Divorced.	Total.
Under 20 ..	2,782	..	1	2,783	17,343	2	5	17,350
20-24 ..	29,464	12	42	29,518	31,477	79	251	31,807
25-29 ..	19,974	66	486	20,526	8,665	183	1,007	9,855
30-34 ..	6,831	135	941	7,907	3,033	307	1,206	4,546
35-39 ..	2,448	213	840	3,501	1,277	373	957	2,607
40-44 ..	1,268	256	746	2,270	712	486	669	1,867
45-49 ..	713	345	578	1,636	450	507	446	1,403
50-54 ..	415	388	339	1,142	255	387	227	869
55-59 ..	198	459	216	873	146	361	94	601
60-64 ..	101	492	93	686	69	342	48	459
65 and over ..	114	740	84	938	61	332	23	416
Total ..	64,308	3,106	4,366	71,780	63,488	3,359	4,933	71,780

In 1956 the proportional distribution (per cent.) of bridegrooms and brides according to previous conjugal condition was:—

Bridegrooms: Bachelors, 89.59; Widowers, 4.33; Divorced, 6.08.

Brides: Spinsters, 88.45; Widows, 4.68; Divorced, 6.87.

The average age in 1956 of bridegrooms was 28.66 years and of brides 25.34 years.

Celebration of Marriages, p. 589.—The number of marriages in 1956 celebrated by ministers of religion in the various denominations or by civil officers was as follows:—

MARRIAGES IN EACH DENOMINATION, 1956.

<i>Commonwealth</i>	1,311,835	1,311,835	..	43,999
Grand Total—Unadjusted	1,889,894	1,896,885	— 6,991	203,226
Adjusted(b)	1,674,318	1,681,309	— 6,991	203,226

(a) Represents the combined transactions of the Consolidated Revenue Fund and the Business Undertakings—Railways, Tramways and Omnibuses and Sydney Harbour Section of the Maritime Services Board—included in the annual Budget Papers. Adjustments have been made to exclude duplications.

(b) To avoid duplication in aggregating particulars for the Commonwealth and States, the grand totals have been adjusted to exclude State payments to the Commonwealth in respect of pay-roll tax and Commonwealth payments to the States included in State Consolidated Revenue Funds in respect of interest on State debts, special grants, uniform taxation, special financial assistance, grants to universities, tuberculosis, capital expenditure and National Welfare payments. There are other relatively minor payments for which adjustments have not been made and the adjusted figures are therefore still slightly overstated.

(c) Preliminary.

D. COMMONWEALTH AND STATE PUBLIC DEBT.

§ 3. Commonwealth and State Public Debt Outstanding.

Public Debt and Annual Interest Payable, pp. 797-8.—The following table shows details of the public debt of the Commonwealth and States and the annual interest payable thereon at 30th June, 1956 and 1957.

COMMONWEALTH AND STATE PUBLIC DEBT AND ANNUAL INTEREST PAYABLE AT 30th JUNE, 1956.

Particulars.	Maturing in—					Total. £'000.
	Australia. £A'000.	London. £Stg.'000.	New York. £'000.(a)	Switzer- land. £'000.(b)	Canada. £'000.(a)

(a) During 1955-56 and 1956-57, \$43,383,000 and \$2,457,000 respectively were drawn against loans made available by the International Bank for Reconstruction and Development. In 1956-57, a loan of \$8,691,000 was raised in New York for Qantas Empire Airways. (b) Australian loans bearing interest at 4½ per cent. were issued at par and those at other rates were issued at prices ranging from par to £99 10s. London loans raised in 1956-57 were issued at £97 10s. The New York loan in 1955-56 was issued at £98 10s. and in 1956-57 at par. The Canadian loan was issued at £98 10s.

CHAPTER XXII.—AGRICULTURAL PRODUCTION.

§ 3. Distribution, Production and Value of Crops.

Principal Crops, pp. 823-7.—The following table shows the area, production and yield per acre of wheat in each State for 1956-57.

WHEAT FOR GRAIN: AREA, PRODUCTION AND YIELD PER ACRE.

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
AREA ('000 ACRES).								
1956-57(a)	1,742	1,565	390	1,455	2,764	4	..	7,920

1956-57(a)	4,019	20,216	7,152	11,943	1,155	334	..	44,819
PIGS ('000.), p. 934.								
1957 (a)	387	258	390	92	40	52	1	1,320
PORK (TONS, BONE-IN WEIGHT), p. 935.								
1956-57 (a)	14,921	10,742	7,018	2,603	3,273	2,163	204	(d)40,983
BACON AND HAM (TONS, CURED WEIGHT), p. 936.								
1956-57 (a)	10,244	7,538	9,965	3,426	3,070	922	..	35,165

(a) Preliminary, subject to revision. (b) Includes an estimate of farm production. (c) Includes Northern Territory, 68 tons. (d) Includes Northern Territory, 59 tons.

CHAPTER XXVI.—MINERAL INDUSTRY.**§ 1. The Mineral Wealth of Australia.**

Quantity and Value of Production, pp. 971-2.—In the table hereunder particulars are given of the quantity and value of production in Australia of the principal minerals during the year 1956:—

MINERAL PRODUCTION: QUANTITIES AND VALUES, AUSTRALIA 1956.**METALLIC MINERALS.**

Year.	Principal Contents of Metallic Minerals Produced.								Total Value of Output of Metal Mining.
	Copper.	Gold.	Iron.	Lead.	Silver.	Tin.	Zinc.	Sulphur. (a)	
	Tons.	Fine oz.	Tons.	Tons.	'000 fine oz.	Tons.	Tons.	Tons.	
1956	53,041	1,029,821	2,542,826	299,485	14,586	2,078	278,082	344,890	92,301

NON-METALLIC AND FUEL MINERALS.

Year.	Quantities Produced.						Total Value of Output of Non-metal and Fuel Mining.
	Coal.		Gypsum.	Limestone. (b)	Mica.	Salt.	
	Black.	Brown.					
	'000 tons.	'000 tons.	Tons.	Tons.	lb.	Tons.	£'000.
1956	19,274	10,560	467,484	4,264,158	28,837	409,000	65,194

(a) Includes sulphur content of spent oxide roasted material.

(b) Excludes limestone used as a construction material.

§ 2. Gold, § 3. Silver, Lead, Zinc, § 4. Copper, § 5. Tin, pp. 979-990.

The smelter and refinery production of the principal metals in Australia during the year 1956 is shown below.

SMELTER AND REFINERY PRODUCTION OF PRINCIPAL METALS: AUSTRALIA, 1956.

Year.	Refined Gold.	Refined Silver. (a)	Refined Lead. (a)	Lead Content of Lead Bullion Produced for Export. (a)	Refined Zinc. (a)	Refined Copper. (a)	Refined Tin. (a)
	'000 fine oz.	'000 fine oz.	Tons.	Tons.	Tons.	Tons.	Tons.

Wool Industry, Inquiry into	29	644
Workmen's Compensation Acts (Conspectus)	22	1028

GENERAL INDEX.*

NOTE.—This index is preceded by a list of special articles, etc., in previous issues of the Official Year Book. A list of maps and graphs contained in this issue will be found on pp. ix and x. Area, population, etc., of particular localities are indexed under the locality concerned. Subject matter extending continuously over more than one page is indexed according to the first page only. *Where more than one reference to a subject is given, the chief reference, wherever it has been possible to determine it, is indicated by italic type. Two references to a subject so indicated signify major, and approximately equal, importance.*

	PAGE		PAGE
A.			
"A" Series Retail Price Index	143	Agricultural Allowances to Returned Soldiers	94
Aboriginals	103, 523, 534, 539, 583, 1163	And Stock Departments	1163
