

Yearbook of Statistics Singapore 2018

YEARBOOK OF STATISTICS SINGAPORE, 2018

ISSN 2591-7919

© Department of Statistics, Ministry of Trade & Industry, Republic of Singapore

Reproducing or quoting any part of this publication is permitted, provided this publication is accredited as the source. Please refer to the Statistics Singapore Website Terms of Use (<http://www.singstat.gov.sg/terms-of-use>) for more details on the conditions of use of this publication.

Statistical activities conducted by the Singapore Department of Statistics are governed by the provisions of the Statistics Act (Cap. 317). The Act guarantees the confidentiality of information collected from individuals and companies. It spells out the legislative authority and responsibility of the Chief Statistician. The Act is available in the Department's Website (www.singstat.gov.sg).

PREFACE

The “Yearbook of Statistics Singapore 2018” is the fifty-first edition of an annual flagship publication by the Singapore Department of Statistics (DOS). It provides a comprehensive and current statistical record of the key socio-demographic and economic characteristics of Singapore. Through this publication, users are able to gain a snapshot of the Singapore economy and population based on the latest available information.

Improvements are continually made to the Yearbook to enhance its value to users. New data series on topics of interest are added as and when appropriate. The Yearbook currently contains 274 tables organised into 27 chapters.

In addition to the Yearbook, the Department disseminates official statistics on Singapore through a range of electronic and mobile services. These include the Statistics Singapore website, SingStat mobile application and SingStat Express. Users may download softcopies of statistical publications via the SingStat website for free. For users with specific data requirements, the Department’s Statistical Information Services offer personalised assistance on a cost-recovery basis.

The data series in the Yearbook are compiled by DOS as well as other government ministries and departments, statutory boards and private organisations. I would like to extend my deep appreciation to all the organisations that have contributed to the success of this publication. I look forward to your continued readership and support.

Wong Wee Kim
Chief Statistician
Singapore

Sep 2018

Our Vision

National Statistical Service of Quality, Integrity and Expertise

Our Mission

We deliver Insightful Statistics and Trusted Statistical Services that
Empower Decision Making

Our Guiding Principles

Professionalism & Expertise	<i>We adhere to professional ethics and develop statistical competency to produce quality statistics that comply with international concepts and best practices.</i>
Relevance & Reliability	<i>We produce statistics that users need and trust.</i>
Accessibility	<i>We make our statistics readily available through user-friendly platforms.</i>
Confidentiality	<i>We protect the confidentiality of information collected by us.</i>
Timeliness	<i>We disseminate statistics at the earliest possible date while maintaining data quality.</i>
Innovation	<i>We constantly seek ways to improve our processes, leveraging on new technology where feasible, to deliver better products and services to users.</i>
Collaboration	<i>We engage users on data needs, data providers and respondents on supply of data, and undertake the role of national statistical coordination.</i>
Effectiveness	<i>We optimise resource utilisation, leveraging on administrative and alternative data sources to ease respondent burden.</i>

LIST OF TABLES BY SECTION

Page

Climate and Air Quality

2

1.1	Air Temperature and Sunshine	5
1.2	Relative Humidity and Rainfall	5
1.3	Air Pollution Levels	6

Population

7

2.1	Singapore Population Size and Growth by Residential Status	11
2.2	Vital Rates	12
2.3	Singapore Residents by Age Group and Sex, End-June	13
2.4	Singapore Residents by Age Group, Ethnic Group and Sex, End-June 2017	14
2.5	Resident Age-Specific Fertility Rates	15
2.6	Live-Births by Ethnic Group and Sex	15
2.7	Live-Births by (a) Birth Order and (b) Place of Occurrence	16
2.8	Resident Age-Sex Specific Death Rates	17
2.9	Deaths by Broad Group of Causes	20
2.10	Life Expectancy of Singapore Residents at Birth and At Age 65 Years by Sex	21
2.11	Age at First Marriage and Divorce	22
2.12	Resident Age-Sex Specific Marriage Rates	23
2.13	Grooms by Age Group	24
2.14	Brides by Age Group	25
2.15	Marriages Registered by Ethnic Group of Couple	26
2.16	Resident Age-Sex Specific Divorce Rates	27
2.17	Divorces and Annulments by Age Group of Males	28
2.18	Divorces and Annulments by Age Group of Females	29
2.19	Divorces and Annulments by Ethnic Group of Couple	30

Households

31

3.1	Resident Households by Household Size	34
3.2	Resident Households by Type of Dwelling	35
3.3	Average Household Size of Resident Households by Type of Dwelling	36
3.4	Resident Households by Tenancy of Household	37
3.5	Home Ownership Rates among Resident Households by Type of Dwelling	38
3.6	Monthly Household Income from Work per Household Member among Resident Employed Households	38
3.7	Average Monthly Household Income from Work per Household Member among Resident Employed Households by Deciles	39
3.8	Ratio of Monthly Household Income from Work per Household Member at the 90th Percentile (P90) to 10th Percentile (P10) among Resident Employed Households	40
3.9	Gini Coefficient among Resident Employed Households	41

Labour and Productivity

42

4.1	Labour Force	46
4.2	Age-Specific Resident Labour Force Participation Rates	47
4.3	Age-Specific Resident Male Labour Force Participation Rates	48
4.4	Age-Specific Resident Female Labour Force Participation Rates	49
4.5	Employed Residents Aged 15 Years and Over by Occupation	50
4.6	Employed Residents Aged 15 Years and Over by Industry	51
4.7	Government Employees in the Public Service	52
4.8	Government Employees in the Civil Service by Sex	52
4.9	Government Employees in the Statutory Boards by Sex	53
4.10	Central Provident Fund Members by Age Group	54
4.11	Active Central Provident Fund Members by Age Group	54
4.12	Active Central Provident Fund Members by Industry	55
4.13	Employment Services	56
4.14	Changes in Value Added Per Worker by Industry	57
4.15	Multifactor Productivity: Contributions to Growth in Real GDP	58
4.16	Indices of Unit Labour Cost by Industry	58
4.17	Gross Monthly Income from Work (including Employer CPF) of Full-Time Employed Residents	59
4.18	Average Weekly Paid Hours Worked Per Employee by Industry	59
4.19	Average Monthly Recruitment Rate by Industry and Occupational Group	60
4.20	Average Monthly Resignation Rate by Industry and Occupational Group	61
4.21	Singapore Workforce Skills Qualifications (WSQ) Trainees by Age, Highest Qualification Attained, and Sex	62
4.22	Singapore Workforce Skills Qualifications (WSQ) Trainees by Level of WSQ Statement of Attainment	63
4.23	Trade Unions and Membership	64
4.24	Labour Relations	64

National Accounts

NOTES

The Yearbook of Statistics contains statistics that are the most recent available at the time of its preparation.

Numbers may not add up to the totals due to rounding.

Some statistics, particularly those for the most recent time periods, are provisional and may be subject to revision in later issues.

Values are shown in Singapore dollars (unless otherwise stated).

Notes on Changes & Revisions

To maintain currency and relevance of the Yearbook of Statistics Singapore, new series are added and existing series are replaced. In this edition, changes have been incorporated in the following tables:

Addition of New Tables

Table 3.4	Resident Households by Tenancy of Household
Table 27.3	Total Final Energy Consumption by Energy Type and Sector

Addition of New Series

Table 2.12	Resident Age-Sex Specific Marriage Rates
Table 4.18	Average Weekly Paid Hours Worked Per Employee by Industry
Table 6.1	Balance of Payments
Table 6.2	Singapore International Investment Position
Table 17.1	Postal Articles Handled and Telecommunications
Table 18.1	International Visitor Arrivals by Inbound Tourism Markets
Table 19.7	Number of Financial Institutions in Singapore
Table 19.11	Assets and Liabilities of Asian Currency Units
Table 19.26	Credit and Charge Cards
Table 23.7	Notifications of Specific Notifiable Diseases
Table 26.3	Visitors to Places of Interest
Table 22.15	Training Places Taken Up Under The Skills Training and Continuing Academic Education Programmes and Persons Who Completed The Programmes, 2017

Replacement of Existing Series

Table 4.19	Average Monthly Recruitment Rate by Industry and Occupational Group
Table 4.20	Average Monthly Resignation Rate by Industry and Occupational Group
Table 14.2	Retail Sales Index
Table 14.3	Food & Beverage Services Index

Climate and Air Quality

1

Climate and Air Quality

Geography

The Republic of Singapore is located between latitudes 1° 09' N and 1° 29' N and longitudes 103° 36' E and 104° 25' E.

The main island of Singapore is about 49km from east to west and 25km from north to south with a coastline of 203km. The total land area of Singapore is approximately 719.9km² as at end June 2017. Among the smaller islands, the larger ones are Pulau Tekong (25.5km²), Pulau Ubin (10.2km²) and Sentosa (4.8km²). The figures are based on 2.515m High Water Mark cadastral survey boundaries.

Singapore is generally flat, with much of the island lying within 15 m of sea level. The highest point of the island's surface reaches 163 m.

Singapore can be geographically divided into three major areas – the central hilly area with heavy deposits of granite in Bukit Timah, Bukit Panjang, Bukit Mandai and Bukit Batok; the western undulating area comprising Mount Faber Ridge and Pasir Panjang Ridge; and the eastern coastal area consisting of alluvium and sediment stretches from Katong to Bedok and Changi.

Climate

Singapore is situated near the equator and has a tropical climate, with abundant rainfall, high and uniform temperatures, and high humidity all year round. The average daily maximum and

minimum temperatures are around 31°C and 24°C respectively.

The relative humidity is usually around 60 per cent on dry afternoons but frequently exceeds 90 per cent in the early hours of the morning before sunrise. Although rain falls throughout the year, the wettest months are usually during the first part of the Northeast Monsoon season from November to January.

The drier months are normally between April and September; however, widespread heavy rain and gusty winds associated with Sumatra squalls typically occur during this time of the year.

Air Pollution

The ambient air quality in Singapore is monitored by the National Environment Agency (NEA) through the Telemetric Air Quality Monitoring and Management System. The system comprises remote air monitoring stations linked to a Data Management System.

Automatic analysers and equipment are deployed at the stations to measure the concentrations of major air pollutants such as Sulphur Dioxide (SO₂), Oxides of Nitrogen (NO_x), Carbon Monoxide (CO), Ozone (O₃) and Particulate Matter (PM₁₀ and PM_{2.5}).

NEA also reports the Pollutant Standards Index (PSI) which is computed from the concentration of Sulphur Dioxide (SO₂), Particulate Matter (PM₁₀ and PM_{2.5}), Nitrogen Dioxide (NO₂), Carbon Monoxide (CO) and Ozone (O₃). Based on the PSI, the air quality is described as 'Good', 'Moderate', 'Unhealthy', 'Very unhealthy' or 'Hazardous'.

Climate and Air Quality ■

Air quality in 2017 was not affected by transboundary haze and was in the 'Good' and 'Moderate' range 99.5 per cent of the time. The ambient temperatures were exceptionally high on 15 March 2017 and the ozone recorded caused the air quality to go into the 'Unhealthy' range, which accounted for the remaining 0.5 per cent.

An annual summary of Singapore's air quality is available in the "[Environmental Protection Division Annual Report](#)", published by the NEA.

Air Quality in 2017

Days with 'Good' and 'Moderate' Air Quality

99.5%

Days with 'Unhealthy' Air Quality

0.5%

Days with 'Very Unhealthy' and 'Hazardous' Air Quality

Notes : Singapore's Air Quality Targets by 2020

Singapore Sustainable Blueprint Target: Sulphur Dioxide $\leq 15 \mu\text{g}/\text{m}^3$ (annual mean)

World Health Organisation (WHO) Interim Target-2: Sulphur Dioxide $\leq 50 \mu\text{g}/\text{m}^3$ (24-hour mean)

WHO Air Quality Guideline: Nitrogen Dioxide $\leq 40 \mu\text{g}/\text{m}^3$ (annual mean)

$\leq 200 \mu\text{g}/\text{m}^3$ (1-hour mean)

WHO Air Quality Guideline: PM₁₀ (Particulate Matter ≤ 10 microns) $\leq 20 \mu\text{g}/\text{m}^3$ (annual mean)

$\leq 50 \mu\text{g}/\text{m}^3$ (99th Percentile 24-hour mean)

Singapore Sustainable Blueprint Target: PM_{2.5} (Particulate Matter ≤ 2.5 microns) $\leq 12 \mu\text{g}/\text{m}^3$ (annual mean)

WHO Interim Target-3: PM_{2.5} (Particulate Matter ≤ 2.5 microns) $\leq 37.5 \mu\text{g}/\text{m}^3$ (99th Percentile 24-hour mean)

WHO Air Quality Guideline: Carbon Monoxide $\leq 10 \text{mg}/\text{m}^3$ (8-hour mean)

$\leq 30 \text{mg}/\text{m}^3$ (1-hour mean)

WHO Air Quality Guideline: Ozone $\leq 100 \mu\text{g}/\text{m}^3$ (Maximum 8-hour mean)

PM₁₀, PM_{2.5} and Carbon Monoxide levels in 2013 and 2015 were severely affected by transboundary smoke haze from overseas land and forest fires.

2

Population

2

Population

Population Census

Singapore's first census was undertaken in April 1871. Regular censuses were undertaken at ten-year intervals up to 1931. The Second World War delayed the next census until 1947. In the pre-war censuses, Singapore was included as part of the Straits Settlements and later as part of Malaya. Separate censuses for Singapore were carried out since 1947. The first post-independence census was conducted in 1970. Subsequently, censuses were undertaken at ten-year intervals in 1980, 1990, 2000 and 2010.

In the 1990 and earlier censuses, the population comprised Singapore citizens and permanent residents who were present and enumerated in Singapore on Census Day. Singapore citizens and permanent residents who were away for short periods of time during the census, as well as non-residents staying or working in Singapore were also included.

From the 2000 census onwards, the de jure concept for Singapore's population estimates based on a person's place of usual residence was adopted. Under this concept, Singapore residents (comprising Singapore citizens and permanent residents) with local addresses were included in the total population count. The non-resident population, comprising foreigners who were working, studying or living in Singapore but not granted permanent residence, was also included in the total population count. The transient population such as tourists and short-term visitors was excluded. For the 2010 census, Singapore residents who were away from Singapore for a continuous period of 12 months or longer were also excluded.

Singapore conducted the first mid-decade mini-census (General Household Survey) in 1995. Subsequent General Household Surveys were conducted in 2005 and 2015.

Register-based Population Estimates

Singapore's mid-year population estimates have been compiled using the register-based approach since 2000, where the basic count and profile of the population are based on a person's place of usual residence i.e. de jure concept. The total population comprises Singapore residents (i.e. Singapore citizens and permanent residents) and non-residents. From 2003 onwards, Singapore residents who were away for a continuous period of 12 months or longer were excluded.

Age Pyramid of Resident Population, end-June 2017

Births and Deaths

The Registration of Births and Deaths Act (Cap 267) specifies that a birth must be registered within 42 days of the date of birth. Births registered after 42 days from occurrence are classified as late registrations. A birth registration after one year from the date of birth can only be effected with the written authority of the Registrar-General of Births and Deaths. Under the same Act, a death must be registered within three days of its occurrence. Still-births, which are classified separately from births and deaths, must be registered within 14 days of their occurrence.

Population ■

Registration facilities for births and deaths are available at the Registry of Births and Deaths (RBD) and at designated government hospitals. Deaths and still-births can also be registered at the nearest Police Divisional Headquarter, Neighbourhood Police Centre or Neighbourhood Police Post. The registration system is comprehensive and the records of birth and death statistics are virtually complete.

Measures of natality and mortality include the crude birth and crude death rates. From 1980 onwards, these are respectively defined as the number of live-births and deaths of Singapore residents, per thousand mid-year resident population.

Crude Birth Rate and Crude Death Rate

(per 1,000 residents)

Marriages

Registration of marriages is compulsory in Singapore. Civil marriages are marriages registered under the Women's Charter, 1961. Notices of such marriages have to be lodged with the Registrar of Marriages regardless of the venue of solemnisation.

Registration of Muslim marriages in Singapore became compulsory from 1 July 1909 when the Mohammadan Marriage Ordinance, 1908 (Ordinance No.XXV of 1908) was enacted. This Ordinance was subsequently repealed and replaced by the Administration of Muslim Law Act, 1966.

Total Marriages, 2017

Divorces and Annulments

Statistics on divorces and annulments under the Women's Charter are obtained from records maintained by the Family Justice Courts.

For divorces under the Administration of Muslim Law Act, statistics are obtained from the register of divorces kept by the Syariah Court. The records on revocation of divorces are obtained from the Registry of Muslim Marriages.

Time-dependent variables, such as the duration of marriage and age of divorcees, are based on the date when Interim Judgment was made final for civil divorces, and the date of registration for Muslim divorces.

Total Divorces and Annulments Registered, 2017

Definitions

Age-specific fertility rate: Refers to the number of live-births to females in a particular age group, per thousand females in that age group during the period.

Total fertility rate (TFR): Refers to the average number of live-births each female would have during her reproductive years if she were subject to the prevailing age-specific fertility rates in the population in a given year. It is derived by aggregating the age-specific fertility rates of females in each of the reproductive ages for a specific year.

Gross reproduction rate: Refers to the average number of daughters each female would have during her reproductive years if she were subject to the prevailing age-specific fertility rates in the population in a given year.

Net reproduction rate: Refers to the average number of daughters each female would have during her reproductive years if she were subject to the prevailing age-specific fertility and mortality rates in the population in a given year. It is a refinement of the gross reproduction rate, and is also the measure of replacement of population.

Life expectancy: Refers to the average number of additional years which a person at a specific age (such as at birth or at age 65 years) might expect to live, if he or she were to experience the age-specific mortality rates of the reference period throughout his or her lifetime.

Age-specific marriage rate: Refers to the number of marriages registered within a specific age group during the year, out of every thousand unmarried population in the same age group.

Age-specific divorce rate: Refers to the number of divorces and annulments granted within a specific age group during the year, out of every thousand married population in the same age group.

General marriage rate: Refers to the number of marriages registered among persons aged 15-49 years during the year, out of every thousand unmarried population in the same age group.

General divorce rate: Refers to the number of divorces and annulments granted to married persons aged 20 years and over during the year, out of every thousand married population in the same age group.

Other References

Statistics on births and deaths are compiled and published quarterly in the “Singapore Demographic Bulletin” produced by

RBD. RBD also publishes the annual “Report on Registration of Births and Deaths”, which provides the demographic and socio-economic characteristics of parents and characteristics of births, detailed causes of death, together with statistical tables and charts.

Complete life tables and key trends in life expectancies for the Singapore resident population are available in the annual statistical report “Complete Life Tables for Singapore Resident Population” published by the Singapore Department of Statistics (DOS).

Annual data on marriages and divorces are available in the report “Statistics on Marriages and Divorces” published by DOS. This publication analyses annual marriage trends and the socio-economic characteristics of grooms and brides, as well as provides insights into the nature of divorces and the socio-economic characteristics of divorcees.

Demographic statistics are available in the annual report “Population Trends” published by DOS. The publication comprises five sections, namely, ‘Population’, ‘Households and Housing’, ‘Family Formation and Dissolution’, ‘Fertility’ and ‘Mortality’. Statistical analyses of Singapore’s changing population profiles can also be found in the publication.

Key Indicators in 2017

Total Fertility Rate was **1.16** per female

Infant Mortality Rate was **2.2** per 1,000 live-births

Life Expectancy at Birth was ...

80.7 years for male residents

85.2 years for female residents

83.1 years for total residents

Notes : Data from 1990 onwards are based on de jure concept (i.e. the person's place of usual residence).

Data from 2000 onwards are based on the register-based approach.

Data from 2003 onwards exclude residents who have been away from Singapore for a continuous period of 12 months or longer as at the reference period.

- 1 Total population comprises Singapore residents and non-residents. Resident population comprises Singapore citizens and permanent residents. Non-resident population comprises foreigners who were working, studying or living in Singapore but not granted permanent residence, excluding tourists and short-term visitors.
- 2 For 1990 and 2000, growth rate refers to the annualised change over the last ten years.
From 2010, growth rate refers to the change over the previous year.
- 3 The growth rate is computed using population estimates based on de facto concept (i.e. the person is present in the country when enumerated at the reference period).

Notes : Figures prior to 1980 pertain to total population which comprises the resident and non-resident population.
From 1980, figures pertain to Singapore resident population (i.e. Singapore citizens and permanent residents).

- 1 The Singapore resident population as at end-June 2003 is used as the standard population which is chosen to fix the age structure to eliminate its effect on mortality trends.

Notes : Total includes divorces or annulments where the ethnic group of males or females was not reported.

- 1 Comprises male and female divorcees of the same ethnicity from other ethnic groups besides Chinese and Indians, namely Malays, Eurasians, Caucasians and other ethnicities as one single 'Others' group.
E.g. Eurasian-Eurasian, Caucasian-Caucasian, Others-Others.
- 2 Refers to divorces or annulments where both the male and female divorcees are of different ethnicity.
E.g. Indian-Chinese, Eurasian-Caucasian, Chinese-Malay, Chinese-Others.
- 3 Comprises Muslim male and female divorcees of the same ethnicity from other ethnic groups besides Malays and Indians, namely Chinese, Eurasians, Caucasians, and other ethnicities as one single 'Others' group.
E.g. Eurasian-Eurasian, Caucasian-Caucasian, Others-Others.
- 4 Refers to divorces where both the male and female divorcees are of different ethnicity.
E.g. Malay-Indian, Malay-Chinese, Indian-Others.

3

Households

3

Households

Households

Household: Refers to a group of two or more persons living together in the same house and sharing common food or other arrangements for essential living. It also includes a person living alone or a person living with others but having his own food arrangements. Although persons may be living in the same house, they may not be members of the same household.

Resident household: Refers to a household headed by a resident (i.e. Singapore citizen or permanent resident).

Resident employed household: Refers to a resident household with at least one working person.

Household size: Refers to the total number of members in the household, including domestic workers.

Household Income from Work

Household income from work: Refers to the sum of income received by working members of the household from employment and business. However, it does not include the income of domestic workers. Household income from work includes one-twelfth of the annual bonus. Data on household income from work refer to household income from work before accounting for Government transfers and taxes, unless stated otherwise.

As the income data pertain to income from work, the coverage of households is based on resident employed households.

Household income from work per household member: Refers to the household income from work divided by the total number of members in the household. For example, if there is one person in a household of four who is working, his income is divided by four to derive the income per household member. This takes into account the different sizes of households in each group and enables

analysis of changes in household income, adjusted for changes in household size over time.

Household Income Groups

Data on household income by income groups are derived by first ranking, in ascending order, all resident employed households by their monthly household income from work per household member, and then dividing them into ten equal groups or deciles.

Not all households are consistently in the same decile group from one year to the next. For example, an employed household may move down from a higher decile in a particular year due to temporary unemployment of a household member, before moving up the deciles when the member resumes work in the subsequent year.

In comparing the performance of any particular decile group over time, it is therefore relevant to note that they may not pertain to the same group of households.

Household Income Distribution

Percentile ratio: A measure of the spread of incomes across the population. P90 refers to the income level at the 90th percentile. P10 refers to the income level at the 10th percentile.

Gini coefficient: A summary measure of income inequality. It is equal to zero in the case of total income equality and equal to one in the case of total inequality. The more unequal the income distribution, the larger the value of the Gini coefficient.

Internationally, the computation methods adopted vary across countries, although the basic concept of Gini remains the same. One major difference is in the equivalence scale adopted. Equivalence scales take into account economies of scale within the household, and adjust for household size so that households of different sizes and compositions are comparable. There are different scales used by different countries.

The simplest method of adjusting for differences in household size is to divide household income by the number of members in the household, and present household income on a per household member basis.

For example, a household of four having income from work of \$4,000 would have \$1,000 on a per member basis.

There are more complex methods of adjusting for differences in household size. One such method is the modified Organisation of Economic Co-operation and Development (OECD) scale.

The modified OECD scale assigns the first adult in the household a weight of 1 point, and each additional adult a weight of 0.5 points and each child a weight of 0.3 points. Equivalised household income is derived by dividing the total household income by the sum of the points allocated to the household members.

For example, a household comprising two adults and two children would have a sum total of 2.1 points. If the household has income from work of \$4,000, then the equivalised household income would be \$1,905 (i.e. \$4,000 divided by 2.1).

Another method is the square root scale, which is used by OECD in its major reports on income inequality. The square root scale divides household income by the square root of household size.

For example, based on the square root scale, a household of four having income from work of \$4,000 would have an equivalised household income of \$2,000 (i.e. \$4,000 divided by the square root of 4).

Government Transfers and Taxes

The Government transfers and taxes included in different years are subject to scheme design and data availability. For example, data on

workfare-related payment starts from 2006, when the scheme was first introduced in 2006 as workfare bonus and subsequently as the workfare income supplement scheme. As more administrative data on transfers or taxes become available, the coverage for Government transfers or taxes would be expanded to include them. The full list of Government transfers and taxes included for the relevant years is available in the annual paper on "[Key Household Income Trends](#)" published by the Singapore Department of Statistics (DOS).

Other References

The annual report on "[Population Trends](#)" published by DOS also contains data on households and housing, among other demographic statistics. The publication comprises five sections, namely 'Population', 'Households and Housing', 'Family Formation and Dissolution', 'Fertility' and 'Mortality'. Statistical analyses of Singapore's changing population profiles are also included in the publication.

Data on household income from work are also available in the annual paper on "[Key Household Income Trends](#)". The paper highlights key trends in household income from work and presents the impact of Government transfers and taxes on household income.

3.6 MONTHLY HOUSEHOLD INCOME FROM WORK PER HOUSEHOLD MEMBER ¹ AMONG RESIDENT EMPLOYED HOUSEHOLDS ²

	Dollars						
	2011	2012	2013	2014	2015	2016	2017
Median (50 th Percentile)	1,994	2,127	2,247	2,380	2,500	2,584	2,699
20 th Percentile	971	1,020	1,083	1,167	1,242	1,280	1,311

Notes : Data are based on the sample of households surveyed in the mid-year Comprehensive Labour Force Surveys.

Household income from work includes employer Central Provident Fund (CPF) contributions.

- 1 Refers to the household income from work divided by the total number of members in the household. For example, if there is one person in a household of four who is working, his income is divided by four to derive the income per household member.
- 2 Refers to a household headed by a resident (i.e. Singapore citizen or permanent resident) and with at least one working person.

Download time series at <http://www.tablebuilder.singstat.gov.sg/publicfacing/createDataTable.action?refId=12307>

3.7 AVERAGE MONTHLY HOUSEHOLD INCOME FROM WORK PER HOUSEHOLD MEMBER¹ AMONG RESIDENT EMPLOYED HOUSEHOLDS² BY DECILES

	Dollars						
Deciles ³	2011	2012	2013	2014	2015	2016	2017
Total	2,925	3,142	3,204	3,418	3,624	3,688	3,835
1 st - 10 th	422	440	463	494	541	543	554
11 th - 20 th	803	856	896	971	1,040	1,064	1,093
21 st - 30 th	1,122	1,200	1,268	1,353	1,446	1,483	1,528
31 st - 40 th	1,445	1,547	1,633	1,747	1,857	1,892	1,958
41 st - 50 th	1,794	1,917	2,033	2,155	2,274	2,339	2,434
51 st - 60 th	2,207	2,355	2,483	2,627	2,780	2,864	2,994
61 st - 70 th	2,726	2,893	3,039	3,217	3,409	3,521	3,670
71 st - 80 th	3,458	3,658	3,837	4,060	4,276	4,438	4,629
81 st - 90 th	4,727	5,004	5,192	5,524	5,804	5,958	6,279
91 st - 100 th	10,543	11,552	11,198	12,032	12,816	12,773	13,215

Notes : Data are based on the sample of households surveyed in the mid-year Comprehensive Labour Force Surveys.

Household income from work includes employer Central Provident Fund (CPF) contributions.

- 1 Refers to the household income from work divided by the total number of members in the household. For example, if there is one person in a household of four who is working, his income is divided by four to derive the income per household member.
- 2 Refers to a household headed by a resident (i.e. Singapore citizen or permanent resident) and with at least one working person.
- 3 Based on the ranking of all resident employed households by their monthly household income from work per household member (including employer CPF contributions).

It is notable, for example, that some resident employed households in the lowest 10% owned a car (11.4%), employed a maid (11.7%), lived in private property (7.7%) or were headed by persons aged 60 years and over (42.8%) in 2017.

It is also important to recognise that not all households are consistently in the same decile group from one year to the next.

For example, an employed household may move down from a higher decile in a particular year due to temporary unemployment of a household member, before moving up the deciles when the member resumes work in the subsequent year.

In comparing the performance of any particular decile group over time, it is therefore relevant to note that they may not pertain to the same group of households.

Download time series at <http://www.tablebuilder.singstat.gov.sg/publicfacing/createDataTable.action?refId=12307>

3.8 RATIO OF MONTHLY HOUSEHOLD INCOME FROM WORK PER HOUSEHOLD MEMBER ¹ AT THE 90TH PERCENTILE (P90) TO 10TH PERCENTILE (P10) AMONG RESIDENT EMPLOYED HOUSEHOLDS ²

	2011	2012	2013	2014	2015	2016	2017
P90/P10 Ratio of Household Income from Work Per Household Member ³	9.19	9.14	9.00	8.92	8.65	8.67	8.97
P90/P10 Ratio of Household Income from Work Per Household Member After Accounting for Government Transfers and Taxes ^{4,5}	6.21	6.37	5.90	5.97	5.78	5.71	5.82

Notes : Data are based on the sample of households surveyed in the mid-year Comprehensive Labour Force Surveys.
Household income from work includes employer Central Provident Fund (CPF) contributions.

- 1 Refers to the household income from work divided by the total number of members in the household. For example, if there is one person in a household of four who is working, his income is divided by four to derive the income per household member.
- 2 Refers to a household headed by a resident (i.e. Singapore citizen or permanent resident) and with at least one working person.
- 3 Based on ranking of all resident employed households by their monthly household income from work per household member (including employer CPF contributions).
- 4 Based on ranking of all resident employed households by their monthly household income from work per household member (including employer CPF contributions) after accounting for Government transfers and taxes.
- 5 Updated as at 13 Feb 2019. As more administrative data on transfers or taxes become available, the coverage for Government transfers and taxes has been expanded to include them.

3.9 GINI COEFFICIENT¹ AMONG RESIDENT EMPLOYED HOUSEHOLDS²

	Unit	2011	2012	2013	2014	2015	2016	2017
Household Income from Work								
Based on Per Household Member ³	Ratio	0.473	0.478	0.463	0.464	0.463	0.458	0.459
Based on Modified OECD Scale ⁴	Ratio	0.452	0.457	0.442	0.444	0.440	0.435	0.437
Based on Square Root Scale ⁵	Ratio	0.434	0.435	0.421	0.425	0.415	0.410	0.417
Household Income from Work After Accounting for Government Transfers and Taxes								
Based on Per Household Member ^{3,6}	Ratio	0.423	0.432	0.409	0.411	0.409	0.401	0.402
Based on Modified OECD Scale ^{4,6}	Ratio	0.402	0.410	0.388	0.392	0.386	0.379	0.381
Based on Square Root Scale ^{5,6}	Ratio	0.380	0.383	0.363	0.369	0.357	0.350	0.357

Notes : Data are based on the sample of households surveyed in the mid-year Comprehensive Labour Force Surveys.
Household income from work includes employer Central Provident Fund (CPF) contributions.

- 1 Internationally, there are differences in computation methods adopted by different countries, although the basic concept of Gini remains the same. One major difference is in the equivalence scale adopted. Equivalence scales take into account economies of scale within the household, and adjust for household size so that households with different sizes and compositions are comparable. There are different scales used by different countries.
- 2 Refers to a household headed by a resident (i.e. Singapore citizen or permanent resident) and with at least one working person.
- 3 Refers to the household income from work divided by the total number of members in the household. For example, if there is one person in a household of four who is working, his income is divided by four to derive the income per household member. The per household member scale is used by economies such as Hong Kong and Japan.
- 4 The modified Organisation of Economic Co-operation and Development (OECD) scale assigns the first adult in the household a weight of 1 point, and each additional adult a weight of 0.5 points and each child a weight of 0.3 points. Equivalised household income is derived by dividing the total household income by the sum of the points allocated to all the household members.
The modified OECD scale is used by Eurostat, the United Kingdom and Australia.
- 5 Based on the ranking of individuals by their household income on a 'per equivalised member basis' (i.e. household income is divided by square root of household size). This follows the approach adopted in the OECD 2008 report "Growing Unequal? Income Distribution and Poverty in OECD Countries".
In following this approach, individuals such as children and maids would also be ranked. It is also noted that some OECD countries publish their own Gini using a different equivalence scale, and not the square root scale.
- 6 Updated as at 13 Feb 2019. As more administrative data on transfers or taxes become available, the coverage for Government transfers and taxes has been expanded to include them.

Labour and Productivity

4

Labour and Productivity

Labour Force

Labour force data are based on the mid-year Labour Force Surveys conducted by the Ministry of Manpower (MOM) every year except for 1990, 1995, 2000 and 2005 which are based on the Censuses of Population and the mid-decade General Household Surveys conducted by the Singapore Department of Statistics. The data refer to persons aged fifteen years and over. The reference period refers to the week preceding the date of interview.

Labour Force
('000), 2017

3,657.0

Definitions

Employed Persons: Refer to persons aged fifteen years and over who, during the reference period: (i) work for one hour or more either for pay, profit or family gains; or (ii) have a job or business to return to but are temporarily absent because of illness, injury, breakdown of machinery at workplace, labour-management dispute or other reasons. Members of the Singapore Armed Forces including full-time National Servicemen are included as persons employed, unless otherwise specified.

Unemployed Persons: Refer to persons aged fifteen years and over who are not working but are actively looking for a job and available for work during the reference period. They include persons who are not working but are taking steps to start their own business or taking up a new job after the reference period.

Persons In The Labour Force: Refer to persons aged fifteen years and over who are either employed or unemployed during the reference period.

Persons Outside The Labour Force: Refer to persons aged fifteen years and over who are neither employed nor unemployed during the

reference period.

Age-Sex Specific Labour Force Participation Rate: Refers to the percentage of the labour force to the population in the specific sex and age group.

Unemployment Rate: Refers to the percentage of unemployed persons to the labour force.

Total Unemployment Rate
(Seasonally Adjusted) in June 2017

2.2%

Labour Productivity: Measures output per unit of labour input. Value-added (VA) is generally used as the measure of output, while labour input may be measured by number of employed persons or hours worked per employee.

Gross Monthly Income From Work: Refers to income earned from employment. For employees, it refers to the gross monthly wages or salaries before deduction of employee CPF contributions and personal income tax. It comprises basic wages, overtime pay, commissions, tips, other allowances and one-twelfth of annual bonuses. For self-employed persons, gross monthly income refers to the average monthly profits from their business, trade or profession (i.e. total receipts less business expenses incurred) before deduction of income tax.

Hours Worked

Statistics on weekly hours worked are compiled from surveys conducted by MOM. Since 2006, both private and public sector establishments are covered in the surveys. For the private sector, only establishments with at least 25 employees are included.

Definitions

Weekly Paid Hours: Refer to the total number of paid hours worked during a week by an employee. It is the sum of standard hours and paid overtime hours worked.

Labour and Productivity ■

Singapore Workforce Skills Qualifications System

The Singapore Workforce Skills Qualifications (WSQ) is a national credential system that trains, develops, assesses and certifies skills and competencies for the workforce. As a continuing education and training (CET) system, WSQ supports the SkillsFuture movement in (i) promoting recognition of skills and competencies to facilitate progression, mastery and mobility; (ii) promoting holistic development of the workforce through technical and generic skills and competencies; (iii) supporting economic development by professionalising skills and competencies to drive industry transformation, productivity and innovation efforts; and (iv) encouraging lifelong learning.

Training programmes developed under WSQ are based on skills and competencies validated by employers, unions and professional bodies. This process ensures existing and emerging skills and competencies that are in demand are used for training and development. The WSQ programmes are funded and quality-assured by SkillsFuture Singapore, which awards the WSQ certifications.

Employment Assistance

Singapore citizens and permanent residents may seek employment assistance at the Workforce Singapore (WSG)'s Careers Connect or National Trades Union Congress (NTUC)'s Employment and Employability Institute centres. Statistics on new registrants for employment and/or training assistance and job seekers placed into employment are compiled by WSG.

Multifactor Productivity

Multifactor productivity relates output to a set of combined inputs, usually labour and capital. A change in multifactor productivity reflects the change in output that cannot be accounted for by the change in combined inputs. Multifactor productivity therefore measures the effects of changes such as technological progress

and changes in the organisation of production.

Unit Labour Cost

Unit Labour Cost (ULC) is defined as the average cost of labour per unit of real output. Total labour cost consists of Compensation of Employees received by the employees, labour income of the self-employed, other labour-related costs (for example, Foreign Worker Levy and net training costs) incurred by the employers and wage subsidies (for example, Wage Credit Scheme and Jobs Credit Scheme) that are provided to the employers. Wage subsidies reduce labour costs to employers, and are netted off from total labour cost.

Central Provident Fund

The Central Provident Fund (CPF) is a comprehensive social security system that enables Singapore Citizens and Permanent Residents to set aside funds for retirement. It also addresses members' housing and healthcare needs.

The employer is liable to pay the total CPF contributions, and is entitled to recover the employee's contribution from the employee's wages. With effect from 1 January 2016, the CPF salary ceiling is \$6,000.

The CPF contribution rates for various age groups¹, are as follows:

Employee's Age	Employer	Employee	Total
	(Percent of Monthly Wage)		
≤ 55 years	17.0	20.0	37.0
> 55 to 60 years	13.0	13.0	26.0
> 60 to 65 years	9.0	7.5	16.5
> 65 years	7.5	5.0	12.5

All CPF members have three accounts with the CPF Board – the Ordinary, MediSave and Special Accounts. Savings in the Ordinary Account can be used to buy a home, pay for insurance premiums (namely the Dependants' Protection Scheme and Home Protection Scheme), or withdrawn for investment and

¹ For employees earning \$750 and above in monthly wages

Labour and Productivity ■

education. MediSave savings can be used for hospitalization expenses, approved medical insurance and certain outpatient treatments while savings in the Special Account are reserved for retirement needs.

From the age of 55, a Retirement Account is created for all CPF members. This account, comprising monies transferred from his Special and/or Ordinary Accounts, is used to provide monthly payments for the member during retirement. With three levels of retirement sums – Basic, Full and Enhanced, members now have more options to decide on the amount of savings to set aside, depending on the amount of monthly payouts they wish to receive in their retirement. Members aged 55 years old and above can also withdraw CPF savings after setting aside the Full Retirement Sum or Basic Retirement Sum with sufficient property charge/pledge in their Retirement Account.

Labour Relations

Concepts and Definitions

Trade Union: Refers to a group or association of employees or employers whose principal objective is to regulate relations between employees and employers for all or any of the following purposes:

- Promote good industrial relations between employers and employees;
- Improve the working conditions of employees or enhance their economic and social status; and
- Raise productivity for the benefit of employees, employers and the economy of Singapore.

Trade Dispute: A dispute (including a threatened, impending or probable dispute) on industrial matters.

Collective Agreement: Refers to an agreement between employers and employees on industrial matters. The duration of a collective agreement is specified and by law shall not be

less than two years or more than three years.

An Industrial Arbitration Court (IAC) Award refers to an award made by the IAC, and includes a collective agreement and a memorandum of the terms which have been certified by the President of the IAC in accordance with the provisions of the Industrial Relations Act.

Sources of Data

Statistics on Employers' and Employees' Trade Unions and Trade Disputes are compiled by MOM's Labour Relations and Workplaces Division (LRWD).

The LRWD monitors the industrial relations situation and provides mediation and conciliation services for the settlement of trade disputes. The Division also investigates complaints on infringements of the Employment Act which governs the terms and conditions of employment.

Statistics on Collective Agreements and Industrial Arbitration Court Awards are obtained from the Industrial Arbitration Court (IAC).

The IAC was set up in 1960 under the Industrial Relations Act. Its functions include the registration and certification of collective agreements, hearing and determination of trade disputes and handing down of awards and interpretation and enforcement of terms of awards and collective agreements.

Other References

Similar data are presented in the "[Singapore Yearbook of Manpower Statistics](#)", published by the Manpower Research and Statistics Department of MOM (MRSD).

Detailed statistics on the labour force are presented in the report "[Labour Force in Singapore](#)", published by MRSD.

The concept and methodology underlying the compilation of the ULC index can be found in the information paper on "[Quarterly Unit Labour Cost Index by Industry](#)".

4.17 GROSS MONTHLY INCOME FROM WORK (INCLUDING EMPLOYER CPF) OF FULL-TIME EMPLOYED RESIDENTS

	Dollars						
	2011	2012	2013	2014	2015	2016	2017
Median (50 th Percentile)	3,249	3,480	3,705	3,770	3,949	4,056	4,232
20 th Percentile	1,733	1,740	1,885	1,972	2,012	2,106	2,200

Source : Comprehensive Labour Force Survey, Manpower Research & Statistics Department, Ministry of Manpower

Notes : Data are for mid-year. As the income data are captured from a sample survey, the income changes for the 20th percentile nearer the end of the income spectrum tend to be more volatile over shorter (e.g. year-on-year) than longer periods (e.g. 5 or 10 years).

Gross monthly income from work refers to income earned from employment. For employees, it refers to the gross monthly wages or salaries before deduction of employee CPF contributions and personal income tax. It comprises basic wages, overtime pay, commissions, tips, other allowances and one-twelfth of annual bonuses.

For self-employed persons, gross monthly income refers to the average monthly profits from their business, trade or profession (i.e. total receipts less business expenses incurred) before deduction of income tax.

Data exclude full-time National Servicemen.

Residents refer to Singapore citizens and permanent residents.

Full-time employment refers to employment where the normal hours of work is 35 hours or more in a week.

Download time series at <http://www.tablebuilder.singstat.gov.sg/publicfacing/createDataTable.action?refId=14603>

Source : SkillsFuture Singapore (SSG)

Notes : Prior to October 2016, data were from the Singapore Workforce Development Agency (WDA). With effect from October 2016, data are from the SkillsFuture Singapore (SSG). SSG is a statutory board under the Ministry of Education (MOE). It is formed to drive and coordinate the implementation of SkillsFuture. In October 2016, SSG took over some of the functions performed by WDA and absorbed the Council for Private Education (CPE), which was a statutory board under MOE.

The Singapore Workforce Skills Qualifications (WSQ) is a national credential system that trains, develops, assesses and certifies skills and competencies for the workforce. Training programmes developed under the WSQ system are based on skills and competencies validated by employers, unions and professional bodies.

WSQ emphasizes flexible competency-based adult learning, open access to skills upgrading and clear career progression pathways for workers to upgrade their skills.

Data are based on calendar year and pertain to local WSQ trainees who have attained at least one WSQ Statement of Attainment.

1 Data are classified according to the Singapore Standard Educational Classification 2010.

National Accounts

5

National Accounts

National Income Estimates

The output, expenditure and income approaches are adopted for compiling the national income aggregates of Singapore. The concepts, definitions and methodology given in the United Nations' publication "System of National Accounts, 2008" are closely followed.

Definitions

Gross National Income (GNI): Refers to the aggregate value of the gross balances of primary incomes (incomes arising from the involvement in production processes or ownership of assets that may be needed for production) receivable by resident units.

Gross Domestic Product (GDP): Refers to the aggregate value of the goods and services produced in the economic territory of Singapore.

Output-based GDP: Refers to the sum of gross value added generated by economic activities in the domestic economy.

Expenditure on GDP: Refers to the sum of private consumption expenditure of households including non-profit institutions serving households, government consumption expenditure, gross capital formation and net exports.

Income Components of GDP: Refers to the sum of incomes generated from the domestic

production of goods and services, which include compensation of employees, gross operating surplus and taxes less subsidies on production and on imports.

Valuation of GDP Estimates: GDP estimates are valued at market prices, that is, the prices actually paid by the purchaser.

GDP at Constant Prices: In order to compare the real value of output/expenditure over time, it is necessary to remove the effect of price changes. This is achieved by selecting the price structure of 2010 as the base according to which the goods and services in other years are revalued. The resulting aggregates after adjustment for price changes are known as constant-price estimates.

GDP Deflators: They provide a broad measure of the change in the overall level of prices of the goods and services that make up GDP between the base year 2010 and any other period. The deflators are derived as the ratio of the current price value of a component of GDP to its corresponding constant price value, with the base year index set at 100.

With the availability of more comprehensive and up-to-date information, the estimates have been revised, especially for the last two years.

Other References

The "Singapore System of National Accounts, 1995", published by the Singapore Department of Statistics, contains the detailed methodology used to compile Singapore's national accounts.

Information on the adoption of basic price is available in the information paper "[Rebasing of the Singapore System of National Accounts to Reference Year 1995](#)".

National Accounts ■

Information on the capitalisation of software expenditure can be found in the Information paper “Rebasing of Singapore’s National Accounts to Reference Year 2000”.

The revised methodology for the measurement and allocation of implicit charges for financial services and other methodological and classification changes are described in the information paper “Rebasing of Singapore’s National Accounts to Reference Year 2005”.

The implementation of capitalisation of research and development expenditure in the national accounts is elaborated in the information paper “Rebasing of Singapore’s National Accounts to Reference Year 2010”.

Analyses on Singapore’s national income may be found in the “Economic Survey of Singapore”, published by the Ministry of Trade and Industry.

International Accounts

6

International Accounts

Balance of Payments

The balance of payments summarises all economic transactions between residents of an economy and non-residents (i.e. the rest of the world). It comprises international trade in goods and services, primary and secondary income flows, as well as capital and financial flows. It is very useful for assessing the external performance of an economy and for formulating policies associated with it.

The transactions recorded in the balance of payments fall into the following three broad categories:

- Current Account:** Consists of transactions relating to Singapore's current national income and expenditure. These include exports and imports of goods and services, primary income receipts and payments, as well as net secondary income (current transfers).
- Capital and Financial Account:** Covers transactions affecting the foreign financial assets and liabilities of Singapore. Hence it records transactions that affect the national income in future periods.
- Reserve Assets:** Show the changes in Singapore's foreign reserves holdings. They consist of Singapore's official holdings of monetary gold and foreign exchange assets, as well as Singapore's special drawing rights and reserve position in the International Monetary Fund.

Singapore's balance of payments estimates are compiled in accordance with the principles and recommendations set out in the International Monetary Fund's Balance of Payments and International Investment Position Manual. The structure and classification of

Singapore's Balance of Payments accounts follow the sixth edition of the manual.

Studies to improve the balance of payments estimates are continual and the estimates are revised as and when appropriate.

Balance of Payments, 2017

(Million Dollars)

Overall Balance	37,841.2
 Current Account Balance	84,220.6
 Capital and Financial Account Balance	46,499.8
Reserve Assets	37,841.2

Sources of Data

The balance of payments estimates are compiled mainly from trade and shipping statistics, regular surveys of companies and administrative records of government departments and statutory authorities.

Definitions

Goods Balance: Refers to the difference between total exports and total imports of goods on a 'f.o.b' (Free On Board) basis.

Services Balance: Refers to the difference between total exports and total imports of services.

Primary Income Balance: Refers to the difference between primary income receivable by Singapore residents from abroad and primary income payable to non-residents from Singapore.

Secondary Income Balance: Refers to the difference between current transfers received by Singapore residents from abroad and current transfers received by non-residents from Singapore.

International Accounts ■

Current Account Balance: Refers to the balance of transactions in goods, services, primary income and secondary income. It shows the net change in financial assets arising from Singapore's real transactions.

Capital and Financial Account Balance: Refers to the balance of transactions in the capital and financial account. It reflects the net changes in Singapore's foreign financial assets and liabilities.

Overall Balance: Refers to the overall balance of the current, capital and financial accounts. It is the balance of all of Singapore's transactions with non-residents and is financed by official reserves.

International Investment Position

The international investment position (IIP) is a statistical statement that shows, at a point in time, the value and composition of financial assets and liabilities of residents of an economy with non-residents. The net IIP, or the difference between an economy's external financial assets with its liabilities, plus the value of non-financial assets, equals to the net worth of the economy.

The IIP is related to the financial account of the balance of payments. While the financial account shows net acquisition and disposal of financial assets and liabilities during a period, the IIP records the stock of financial assets and liabilities at a specific point in time. Due to this relationship, both the IIP and financial account of the balance of payments use functional categories as the highest level of classification. These functional categories are direct investment, portfolio investment, financial derivatives, other investment, and reserve assets.

Singapore's IIP estimates are compiled based on the principles recommended in the International Monetary Fund's Balance of

Payments and International Investment Position Manual, Sixth edition.

External Debt

Gross external debt, at any given time, is defined as the outstanding amount of current (and not contingent) debt liabilities owed to non-residents by residents of an economy. The external debt position can also be understood as a subset of the IIP, where it is equivalent to total external liabilities of the latter less equity and investment fund shares and financial derivatives.

The compilation of Singapore's external debt statistics is consistent with the recommendations set out in the International Monetary Fund's External Debt Statistics Guide (2013).

Other References

Major changes and improvements to the current account and capital and financial account of the balance of payments, international investment position and external debt, which includes changes in conceptual treatment, classifications, enhanced coverage, as well as data dissemination and methodological improvements, are described in the occasional paper "[Implementation of IMF Balance of Payments and International Investment Position Manual, Sixth Edition in Singapore's balance of payments](#)" and the information paper "[Singapore's International Accounts: Methodological Updates and Recent Developments](#)".

Analyses on Singapore's balance of payments may be found in the "[Economic Survey of Singapore](#)", published by the Ministry of Trade and Industry.

(continued on the next page)

Notes : With the implementation of the recommendations of the 6th Edition of the Balance of Payments and International Investment Manual (BPM6), Singapore's gross external debt is now reported on a BPM6 format. The accompanying revision in the treatment of Asian Currency Units (ACUs) as resident units (which previously were treated as non-resident units) means that the coverage of Singapore's external assets and liabilities has been expanded to include those of the ACUs, resulting in increases in both Singapore's external assets and liabilities. While the expansion of coverage has resulted in higher gross external debt (or liabilities), it has resulted also in higher external assets. Singapore remains a net creditor, as the resulting increase in external assets is more than the increase in liabilities. More information may be found in the Occasional Paper on "Implementation of IMF Balance of Payments and International Investment Position Manual, Sixth Edition in Singapore's Balance of Payments".

1 Refers to direct investment enterprise.

Investment

Direct Investment

Data on foreign direct investment are sourced from financial accounts which companies file with the Accounting and Corporate Regulatory Authority (ACRA) and other government agencies, as well as the Survey of Foreign Debt and Financial Derivative Transactions and Survey of Singapore's Investment Abroad.

Definitions

Foreign Direct Investment (FDI): Refers to an investment in which a direct investor owns 10 per cent or more of the ordinary shares or voting power in an enterprise in another country.

FDI comprises foreign direct equity investment (FDEI) and the net inter-company debt between the direct investment enterprise and its investors.

Foreign Direct Equity Investment (FDEI): Refers to equity capital in the direct investment enterprise attributable to its foreign direct investors.

Equity capital covers all components of shareholders' funds (proportionate to the percentage of shares held), including

equity, contributed surplus, reinvested earnings, revaluations, as well as any reserve accounts.

Net fixed assets are used as a proxy of equity capital for branches of non-resident banks. For branches of other non-resident entities, the net amount owed by branches to their non-resident head office is used.

Reinvested Earnings: Refer to earnings on equity accruing to the direct investors less distributed earnings, proportionate to the percentage of shares held by the direct investors.

Net Inter-Company Debt: Refers to the net outstanding debt owed by the foreign direct investment enterprise to its foreign direct investors. The debt could be in the form of loans or debt securities.

Investment Commitments

Investment commitments refer to investment projects in terms of fixed assets which companies commit to invest in Singapore. Projects are only recorded as commitments if the company has made a firm undertaking to implement the project.

Other References

Annual statistics on direct investment are available in the reports "Foreign Direct Investment in Singapore" and "Singapore's Direct Investment Abroad" published by the Singapore Department of Statistics.

Research and Development

Data on research and development (R&D) in Singapore are collected through the National Survey of R&D, conducted annually by the Agency for Science, Technology and Research (A*STAR). The scope of the survey covers R&D activities in the private, higher education, government and public research institutes sectors.

To facilitate international comparability, data from the survey are collected and presented based on guidelines provided in the Organisation for Economic Co-operation and Development (OECD) Guidelines on Collecting and Reporting Data on Research and Experimental Development, "Frascati Manual" (Sixth Edition).

Definitions

R&D Manpower

Researchers: Refer to professionals who are engaged in the conception or creation of new knowledge, products, processes, methods and systems, or in the management of the projects concerned. Managers and administrators engaged in the planning and management of the scientific and technical aspects of a researcher's work also fall into this category. Researchers are further sub-classified into:

- Research scientists and engineers (RSEs)
- Full-time postgraduate research students (FPGRS)
- Non-degree researchers

Technicians: Refer to persons whose main tasks require technical knowledge and experience in one or more fields of science and technology. They participate in R&D by performing scientific and technical tasks that involve the application of concepts and operational methods, normally under the supervision of researchers.

Other supporting staff: Includes skilled and unskilled craftsmen, secretarial and clerical staff participating in or are directly associated with R&D projects.

R&D Manpower, 2016

50,006

R&D Expenditure

R&D expenditure includes capital expenditure (acquisition of fixed tangible assets involved in R&D activities, excluding depreciation provisions), R&D manpower costs, and other R&D-related operating expenditures. Data for R&D expenditure in each year are expressed in nominal terms and are not adjusted for inflation.

R&D Expenditure, 2016

\$9,519.3 mil

Patents

Data on patents resulting from R&D activities carried out in Singapore that are published in the National Survey of R&D are as reported by survey respondents. Only one patent is awarded to an invention, irrespective of the number of countries to which the patent is being applied or awarded.

R&D Output, 2016

11,533

The Corporate Sector

9

The Corporate Sector

Data on the corporate sector cover companies incorporated or registered in Singapore, including branches of foreign companies. They are sourced from financial accounts which companies file with the Accounting and Corporate Regulatory Authority (ACRA) or other government agencies.

Definitions

Total Equity: Comprises mainly share capital, retained earnings and other reserves. For Singapore branches of foreign-incorporated companies, the net amounts owed by Singapore branches to the foreign head offices are used as proxies for their equity.

Total Equity by Industry, (End of Period), 2016

Equity Ratio: Refers to the ratio of total equity to total assets. It measures the dependence of the company on external funding, i.e. funding which is not from its shareholders or its overseas

headquarters (for the local branch of a foreign-incorporated company). The higher the company's dependence on external funding, the lower the ratio.

Current Ratio: Refers to the ratio of current assets to current liabilities. It measures the liquidity of the company, i.e. its ability to meet current debt payments when due. A ratio of 1 indicates that the company has balanced exactly its current liabilities with current assets. The lower the ratio is below 1, the higher is the risk of the company running into a liquidity problem. A ratio above 1 indicates liquidity in the company.

Rate of Return on Total Assets (ROA): Refers to the ratio of pre-tax profit before deducting interest payments in the year to the average of total assets at the beginning and at the end of the year. It measures the efficiency of the company in using its available resources.

Rate of Return on Total Equity (ROE): Refers to the ratio of pre-tax profit in the year to the average of total equity at the beginning and at the end of the year. It measures the company's profitability, i.e. the rate of return that it has earned on the capital provided by shareholders, after accounting for payments to all other capital providers.

Other References

The report "Singapore's Corporate Sector", published by the Singapore Department of Statistics, contains analysis and detailed tables on the aggregated balance sheets and financial ratios of the corporate sector.

Formation and Cessation of Business Entities

10

Formation and Cessation of Business Entities

Coverage and Sources of Data

Data on business entities are primarily sourced from the registration records of the Accounting and Corporate Regulatory Authority (ACRA).

Business entities refer to companies, sole proprietorships & partnerships, limited liability partnerships, limited partnerships and public accounting firms.

Definitions

Formation: Refers to business entities incorporated or registered with ACRA.

Cessation: Refers to business entities which have ceased operations. Examples of cessation status include ceased registration, struck off, amalgamated, cancelled and dissolved.

62,113 business entities were formed in 2017

48,274 business entities ceased operation in 2017

Notes : The statistics on business entities cessation have been adjusted to provide a more accurate reflection of the underlying cessation trends. In 2016 and 2017, ACRA conducted periodic reviews and removed from its public register, sole proprietorships & partnerships that failed to renew their registrations, and companies that were dormant. These periodic removal of business entities took place at ad hoc intervals and impacted published statistics on business entities cessation. The number of business entities cessation have therefore been adjusted to reflect the removal of such business entities at the date when they would have normally been removed. Going forward, such review and removal exercises will be conducted on a regular basis to provide a more accurate reflection of cessation trends.

Agriculture, Animal Production and Fisheries

11

Agriculture, Animal Production and Fisheries

General

The agricultural sector of Singapore is engaged mainly in the production of eggs, fish and vegetables for local consumption, as well as orchids and ornamental fish for export. About one per cent of Singapore's land area is used for agricultural purposes.

Horticulture

The main crops cultivated in Singapore are vegetables and orchids. The vegetable and food crop production in local farms are mainly leafy vegetables and bean sprouts. With about 90% of the leafy vegetables derived from soil cultivation, intensive and modern farming methods are adopted to maximise vegetable production and to ensure production of high quality leafy vegetables.

Local Vegetable Production, 2017

A number of farms and nurseries grow orchids, ornamental and foliage plants (which include potted plants, foliages, ornamental plants, aquatic plants and tissue-cultured plantlets) for export and domestic sale. Singapore is a major exporter of quality cut orchids.

Local Orchid Production, 2017

5
million stalks

Fisheries

Local fish production comprises mainly aquaculture produces from fish farms with small quantities from local capture fisheries. Singapore also imports, exports and tranships fish caught by foreign vessels.

Local Fish Production, 2017

5,916
tonnes

The Jurong Fishery Port (JFP) is a major seafood landing and distribution point in Singapore. JFP handled about 43,800 tonnes of seafood in 2017, the bulk of which comprised fresh seafood landed by foreign vessels as well as those imported by air and road. The Senoko Fishery Port (SFP) began its operations in September 1997. A home base for local fishing vessels, the port handled locally-produced and imported seafood totaling about 5,500 tonnes of seafood in 2017. There are 145 seafood processing establishments licensed to manufacture fishery products in Singapore. Three processing establishments and one cold store are approved to export seafood products to the EU countries.

There are 114 floating fish farms covering 100.5 hectares of coastal waters, culturing various fish species like milk fish, mullet, snappers, trevally, groupers, tilapia, pompano, threadfin and seabass for the live fish market and supermarkets.

12

Manufacturing

12 Manufacturing

Census of Manufacturing Activities

A census of manufacturing establishments is conducted annually by the Research and Statistics Unit of the Economic Development Board (EDB). The results provide comprehensive data for the study of the structure and trends of the manufacturing sector.

The activities covered in the census include manufacturing and industrial servicing. They are classified according to the Singapore Standard Industrial Classification 2015.

The census is conducted by mail inquiry and via the internet, using two standard questionnaires. The reference period is the calendar year, except for those establishments whose financial years do not coincide with the calendar year.

Definitions

Establishment: Refers to a manufacturing unit engaged in one manufacturing activity and generally operating at one location.

Workers: Refer to all persons engaged in the industrial activity of the establishment, that is, all employees, the self-employed and their relatives. Data generally refer to employment as at 30 June, except where establishments commence operation after June.

371,900 Persons Employed in the Manufacturing sector in 2017

Remuneration: Refers to the amount expended for the whole year. For employees, total remuneration comprises salaries (including bonuses), contributions to the Central Provident Fund and pensions paid by employers, and other benefits provided. For working proprietors, it refers to the amount withdrawn for their personal use. For unpaid family workers, it refers to allowances.

Manufacturing Output: Refers to the total value of all commodities produced (including by-products) and industrial services rendered during the year.

Total Output: Refers to the total value of goods and services derived from a production process and ancillary activities such as management or marketing. As such, it includes manufacturing output and other operating income.

Total Output for the Manufacturing Sector in 2017 was

S\$321.1 billion

Materials Used: Covers raw or basic materials, chemicals and packing materials consumed in the production. They refer to the actual consumption during the year.

Value Added: Refers to total output less materials, utilities, fuel, transportation charges, work given out and other operating costs.

Value Added for the Manufacturing Sector in 2017 amounted to

S\$75.0 billion

Manufacturing ■

Net Operating Surplus: Refers to value-added less remuneration, depreciation of fixed assets and indirect taxes.

Sales and Direct Exports: Refer to local sales or exports to other countries of goods manufactured. Resale of goods not manufactured by the establishments is excluded.

Gross Value of Fixed Assets: Refers to the accumulated cost of acquiring the fixed assets.

Net Value of Fixed Assets: Refers to the gross value net of accumulated depreciation.

Index of Industrial Production

The index of industrial production covers all manufacturing activities classified under Section C of the Singapore Standard Industrial Classification 2015. The indices published are at the 2-digit industry division and total manufacturing levels.

Annual Growth in Index of Industrial Production

The base year for the index of industrial production is 2015. The value-added weighting pattern is based on data from the 2014 Census of

Manufacturing Activities. The weighting pattern reflects the relative importance of the industry divisions and changing structure within the manufacturing sector. The Laspeyres' formula is used for the compilation of the index.

Unit Business Cost Index

The Unit Business Cost Index (UBCI) is compiled by the Singapore Department of Statistics. It measures the relative business cost of producing one unit of real manufacturing output with respect to the base year. The main components of business cost are labour cost, services cost, as well as non-labour production taxes. The UBCI is compiled based on the benchmark on business cost from the Census of Manufacturing Activities (CMA) and extrapolated using data from the Monthly Survey of Manufacturing Activities (MMA).

Other References

More detailed statistics on the manufacturing sector are available from the "[Census of Manufacturing Activities](#)", published annually by the Research and Statistics Unit of EDB.

The information paper on "[Methodological Review on the Unit Business Cost Index for the Manufacturing Industry \(Base Year 2010 = 100\)](#)" provides details on the concept, methodology and data sources underlying the compilation of the UBCI.

12.1 PRINCIPAL MANUFACTURING STATISTICS

	Unit	2011	2012	2013	2014	2015	2016	2017
Establishments	No.	9,008	9,577	9,303	9,106	8,778	8,988	na
Workers	No.	418,324	424,622	424,505	416,406	403,286	384,726	371,922

Building, Real Estate, Construction and Housing

Building, Real Estate and Construction

Building construction refers to the erection of new buildings and additions or alterations to existing buildings, but excludes the erection of temporary structures, illegal building works or minor works which do not require planning approval. Data on new buildings given planning and building plan approvals, notices of commencement and Temporary Occupation Permits (TOPs)/Certificates of Statutory Completion (CSC) are compiled from the administrative records of the Urban Redevelopment Authority (URA) and the Building and Construction Authority (BCA). Statistics on contracts awarded and progress payments certified are collected through surveys conducted by BCA.

Definitions

Provisional Permission: Refers to the conditional approval granted by the Minister for National Development or the Competent Authority to develop any land subject to conditions in accordance with the development rules in force.

Written Permission: Refers to the approval granted by the Minister for National Development or the Competent Authority to develop any land subject to conditions in accordance with the development rules in force.

Building Plan Approval: Refers to the approval granted by the Commissioner of Building Control in respect of building plans and specifications submitted in accordance with the prescribed building regulations in force.

Building Commencement: Construction of a building project is deemed to have commenced when a permit to commence building works in respect of that building is issued by the Commissioner of Building Control.

Building Commencement, 2017

Private Residential Properties ¹

5,397

Gross Floor Area ('000 m²)

Office Space

223

Retail Space

97

Factory Space

556

Warehouse Space

309

¹ Excludes hostels, HDB flats, tenement houses, parsonages and Executive Condominiums.

Building Completion: A building project is deemed completed when the Temporary Occupation Permit (TOP) or Certificate of Statutory Completion (CSC) in respect of that building is issued by the Commissioner of Building Control. Completed properties are referred to as the existing stock.

Gross Floor Area: Refers to the covered floor space (whether within or outside a building and whether or not enclosed) measured between party walls, including thickness of external walls and any open area used for commercial or industrial purposes.

Nett Floor Area: Refers to all covered floor space available on an exclusive basis to occupiers in a building excluding common areas viz: staircases, lifts, common passageways and corridors.

Contracts Awarded: Refers to the full contract awarded to the main contractor by the developer or owner even though part or all of the works may be further sub-contracted to other contractors.

Progress Payments Certified: Refers to the value of all construction works done and certified for progress payment. Where construction works are carried out by the developer or owner himself and the architect

Building, Real Estate, Construction and Housing ■

does not certify progress payments, the expenses incurred on the construction work are taken to be the progress payments certified.

Other References

Details on construction and real estate statistics relating to industrial properties are published by the JTC Corporation (JTC) and can be found on [J-SPACE](#), JTC's industrial property statistics portal.

Public Housing

The Housing and Development Board (HDB) was established on 1 February 1960 as the public housing authority of Singapore. HDB's mission is to provide affordable homes of quality and value, create vibrant and sustainable towns, and promote the building of active and cohesive communities. HDB also develops and maintains other facilities, such as commercial properties and car parks. To help build sustainable communities, HDB plans towns with a comprehensive range of facilities to meet residents' needs. These include recreational and community facilities such as neighbourhood parks and children's playgrounds in its housing estates.

In 2017, 35,210 flats were completed, bringing the total number of flats built since HDB's inception to 1,164,446.

35,210 flats were constructed in 2017

Introduced in 1964, the Home Ownership Scheme enables citizens to acquire homes through the purchase of HDB flats. In 2017, 27,708 flats were sold under this scheme.

27,708 flats were sold under the Home Ownership Scheme in 2017

In 2017, about 79 per cent of the resident population lived in Home Ownership flats.

79% of the resident population lived in Home Ownership flats in 2017

Between 1989 and 2017, HDB sold 244 land parcels (308 hectares) for private residential development and 46 land parcels (51 hectares) for commercial development. A total of 67 Executive Condominium sites (136 hectares) were sold during this period.

Residential Dwellings

The Singapore Standard Classification of Type of Dwelling defines a dwelling as a building or part of a building used or intended to be used by one or more persons as living quarters. Each dwelling type has its own separate entrance(s) with direct access to a public road or pathway. A dwelling may be a residential building by itself or a unit in a residential building, or part of a non-residential building such as a shop or factory with space used as living quarters.

Source : Housing & Development Board

1 Refers to resident population which comprises Singapore citizens and permanent residents.

2 Data as at 31 March of each calendar year.

3 Flats are considered 'sold' only when keys are issued to the applicants.

Data include Studio Apartments and keys issued by private developers for Design, Build and Sell Scheme flats.

4 Refers to percentage of sold flats over total units under management.

Download time series at <http://www.tablebuilder.singstat.gov.sg/publicfacing/createDataTable.action?refId=14606>

Source : JTC Corporation

Notes : Figures may not add up due to rounding.

Data for "Total Allocated" and "Supply" and "Occupancy Rate" are as at end of period.

- 1 Renamed as High-Rise Space (from Flatted Factory) to cover the various types of high-rise space JTC has.
- 2 Renamed as Land-Based Factory (from Standard Factory) to cover the various types of land-based facilities that JTC has.
- 3 Excludes Prepared Industrial Land that is tendered out as part of the Industrial Government Land Sales (IGLS) programme.
- 4 Includes Prepared Industrial Land that is tendered out as part of the IGLS programme and land occupied by JTC's Ready Built Facilities. Data on Prepared Industrial Land from IGLS are based on date of allocation instead of date of tender award. The date of allocation is normally a few months after the date of tender award.

Services

14 Services

Annual Survey of Services

The Annual Survey of Services covers establishments engaged in wholesale trade, retail trade, transport & storage services, accommodation & food services, information & communications services, business services and recreation, community & personal services, as classified under Sections G, H, I, J, L, M, N, P, Q, R and S of the Singapore Standard Industrial Classification (SSIC) 2015. Establishments engaged in financial & insurance services and public administration activities are excluded. Taxi drivers, hawkers and stall-holders, independent artistes, self-employed persons operating private hire vehicles and other individual self-employed persons not registered with the Accounting and Corporate Regulatory Authority (ACRA) are also excluded.

Stratified random sampling is adopted for the survey. All establishments in the sampling frame are first stratified by activity and within each activity, establishments are then stratified by operating receipts. Establishments with large operating receipts are selected with certainty and the rest are selected using simple random sampling without replacement.

Definitions

Enterprise: Refers to an incorporated/registered entity (such as company, sole-proprietorship, partnership, association, society, etc).

Establishment: Refers to a business or organisation unit within an enterprise engaged in one activity and operating in a single location. Thus, for a multi-activity firm or organisation, units engaged in separate activities in the same location constitute distinct establishments.

Similarly, a branch of a multi-branch organisation operating at separate location is conceptually a different establishment.

Total Establishments, 2016

Operating Receipts: Refer to income earned from business operations, i.e. income from services rendered, sales of goods, commission fees, and rental of premises, machinery and equipment.

Operating Expenditure: Refers to all expenditure incurred by the establishment in its business, with adjustment for changes in inventory. It includes remuneration, purchases, indirect taxes, work given out, rental and maintenance of machinery and equipment, legal, accounting and other professional services, rental and maintenance of premises, depreciation, transport and travelling, utilities, advertisement, entertainment, stationery and printing, postage and telecommunications, fuel, freight charges and other expenses that are connected with the establishment's operation.

Operating Surplus: Refers to the amount of operating receipts less operating expenditure plus depreciation of fixed assets. For non-profit organisations (i.e. entities which cannot distribute any surplus made to their shareholders) which mainly rely on funds (such as grants and donations) other than receipts from sales of goods and services rendered to cover their operating expenditure, operating surplus refers only to depreciation of fixed assets.

Value Added (at Basic Price): Comprises the value of operating surplus, remuneration and taxes (less subsidies) on production.

Retail Sales and Food & Beverage

Services Indices

The Retail Sales and Food & Beverage Services Indices measure the short-term performance of the retail and food & beverage services industries based on the sales records of retail and food & beverage enterprises. Data for the compilation of the indices are primarily obtained from more than 620 enterprises covered in the monthly retail sales and food & beverage services surveys. The base year for the indices is 2017.

The indices are presented at both current prices and constant prices. Changes in the indices at current prices measure the changes in sales values resulting from changes in both price and quantity. By removing the price effect, the changes in indices at constant prices measure the changes in the volume of economic activity.

Wholesale Trade Index

The Wholesale Trade Index (WTI) measures the short-term performance of wholesale trade activities. Data for the compilation of the WTI are sourced from over 1,000 wholesale trade enterprises covered in the quarterly survey of

wholesale trade as well as from administrative records. The base year for the WTI is 2017.

Two series of the WTI are compiled – Domestic WTI and Foreign WTI. The Domestic WTI records wholesale sales in Singapore. The Foreign WTI measures wholesale sales outside Singapore, which comprises domestic exports, re-exports, transshipment cargo and offshore merchandise.

The indices are presented at both current prices and constant prices. Changes in the indices at current prices measure the changes in sales values which can result from changes in both price and quantity. By removing the price effect, the changes in indices at constant prices measure the changes in the volume of sales.

Business Receipts Index

The Business Receipts Index (BRI) for services industries (excluding wholesale & retail trade and accommodation & food services) measures the changes in the amount of business or operating receipts on a quarterly basis.

The BRI is compiled based on survey data and administrative records of more than 11,000 enterprises in the transport & storage services, information & communications services, financial & insurance services, business services and recreation, community & personal services industries. The BRI is compiled at current prices, with 2014 as the base year.

International Trade

Merchandise Trade

Sources of Data

Since April 1987, Singapore's merchandise trade statistics are compiled by Enterprise Singapore (previously International Enterprise Singapore) from the following information submitted to Singapore Customs:

- i) Import and export permits submitted by traders or declaring agents;
- ii) Data on postal packages furnished by Singapore Post Limited; and
- iii) Statement on bunker fuel, aircraft fuel and stores supplied to non-Singapore-registered ships and aircraft furnished by shipping and aircraft agents.

Prior to April 1987, merchandise trade statistics were compiled by the Singapore Department of Statistics from the same sources.

Coverage

Singapore adopts the "general" system for recording merchandise trade statistics. Under this system, all goods imported into or exported from Singapore are included in the merchandise trade statistics with the following major exceptions:

- i) Transshipment cargo on through bills of lading or through air waybills;
- ii) Fish and other marine produce landed by Singapore and Peninsular Malaysia-registered vessels direct from sea;
- iii) Goods imported and exported by, or on behalf of, diplomatic services and armed forces;
- iv) Exposed cinematographic films imported or exported on a rental basis;

- v) Television news films, news or press materials;
- vi) Ships and aircraft arriving for or departing after repairs;
- vii) Goods temporarily taken into or out of the country to be returned after a specific purpose, for example, for an exhibition;
- viii) Personal and household effects accompanying passengers or crews;
- ix) Samples and specimens for test or analysis; and unaccompanied personal effects and gifts not exceeding the value of \$400;
- x) Gold held as reserve assets that are exchanged between monetary authorities or authorised banks; and
- xi) Issued currency notes and coins.

Ships and aircraft are included if they are imported or exported as merchandise, whether or not they arrive or depart under their own power.

Definitions

Merchandise imports: Refer to all goods brought into Singapore, except those specified as excluded under the **Coverage** section, irrespective of whether they are for consumption, for processing, for use in manufacturing, or for subsequent re-shipment to other countries.

Merchandise exports: Refer to all goods taken out of Singapore, except those specified as excluded under the **Coverage** section. It comprises domestic exports and re-exports.

Domestic Exports: Refer to exports of Singapore origin. It comprises (i) primary commodities grown or produced in Singapore and (ii) goods which have been transformed, that is, manufactured, assembled or processed in

Singapore including those with imported materials or parts.

Re-exports: Refer to all goods which are exported from Singapore in the same form as they have been imported (including goods that have undergone minor processing, such as re-packing, splitting into lots, sorting or grading, marking and the like).

Merchandise Trade at 2012 Prices: This is obtained by adjusting the recorded value of trade using import and export price indices with base year 2012. The series on trade at 2012 prices indicate the volume of trade after adjusting for the effect of price changes.

Valuation

Merchandise imports are valued at 'CIF' (Cost, Insurance and Freight), that is, the value of goods at the frontier of the exporting country plus the cost of insurance and freight and any other charges when sold for export to Singapore.

Merchandise exports are valued at 'FOB' (Free On Board), that is, the value of goods when sold abroad up to the point where the goods are deposited on board the outgoing vessel, aircraft or vehicle.

Classification

The "Singapore Trade Classification, Customs and Excise Duties 2018" came into effect on 24 June 2018 and was adopted for the documentation of Singapore's merchandise trade from 17 July 2018. This classification adopts the ASEAN Harmonized Tariff Nomenclature 2017

(AHTN 2017) which is based on the 6-digit Harmonized Commodity Description and Coding System (HS), developed by the World Customs Organization (WCO).

However, for publication of merchandise trade statistics, the Standard International Trade Classification (SITC), Revision 4.1 is used from 1999 onwards and SITC, Revision 3 for years prior to 1999. Merchandise imports are classified by country of origin and exports by country of destination.

Trade in Services

The main source of Singapore's trade in services statistics is the International Trade in Services Survey.

Definitions

Exports of Services: Refer to the value of cross-border services provided by residents to non-residents.

Imports of Services: Refer to the value of cross-border services provided by non-residents to residents.

Other References

Detailed monthly merchandise trade statistics are available in the "Singapore's External Trade" report published monthly by Enterprise Singapore.

Detailed annual data on trade in services are available in the "Singapore's International Trade in Services" publication.

Aggregated services trade estimates are also released on a quarterly basis in the "Economic Survey of Singapore" published by the Ministry of Trade and Industry, as well as in Enterprise Singapore's quarterly and annual reviews of trade performance.

Transport

16 Transport

Maritime Statistics

The Maritime and Port Authority of Singapore (MPA) is responsible for Singapore's port and maritime development, taking on the roles of port authority, port regulator, port planner, International Maritime Centre (IMC) champion, and national maritime representative. MPA partners the industry and other agencies to enhance safety, security and environmental protection in Singapore's port waters, facilitate port operations and growth, expand the cluster of maritime ancillary services, and promote maritime research and development as well as manpower development.

Singapore is both a premier global hub port, as well as an international maritime centre for ship owners, operators and other maritime service providers. In total, the Singapore maritime cluster comprises over 5,000 establishments.

Statistics on vessel traffic, cargo volumes and other port activities within Singapore port waters are collated by MPA.

Sea Cargo Handled, 2017

Definitions

Vessel arrivals: Refers to the number of vessels exceeding 75 Gross Tonnage that arrive at the Port of Singapore during the year.

Total cargo throughput: Refers to the total volume of cargo loaded and unloaded at the Port of Singapore. The figures include transshipment cargo.

Total container throughput: Refers to the total number of containers (expressed in Twenty-Foot Equivalent Units) loaded and unloaded at the Port of Singapore. The figures include transshipment containers.

Container Throughput, 2017

Bunker sales: Refers to the volume of bunkers delivered within the Port of Singapore to vessels that are on international voyages.

Singapore Registry of Ships: Refers to the total number and tonnage of vessels registered under the Singapore flag.

Civil Air Traffic

The Civil Aviation Authority of Singapore (CAAS) provides air navigation services, regulates, promotes and facilitates the use and development of air services, airports and aerospace industries, as well as promotes and facilitates the development and improvement of civil aviation capabilities and skills in Singapore. Following the corporatisation of Changi Airport on 1 July 2009, the operations of Changi Airport, including the collection of data on passengers, airfreight, airmail and aircraft traffic passing through Changi Airport and Seletar Aerodrome, are managed by Changi Airport Group Pte Ltd (CAG).

Statistics on passenger, airfreight, parcel mail and aircraft movements are compiled by CAAS from the data collected by CAG.

Transport ■

Air Cargo Handled¹, 2017

¹ Refers to Changi Airport only. Excludes passenger baggage, diplomatic cargo and aircraft stores.

Public Roads

Public roads are classified into expressways, arterial roads, collector roads and local access roads². Data on public roads refer to the length of roads measured in lane-kilometres.

Paved Roads, 2017

Definitions

Expressways: Refer to roads that provide planned long-distance mobility from one part of the island to another without the interruption of traffic lights.

Arterial Roads: Refer to roads connecting an expressway with roads surrounding or passing through estate developments. They also improve traffic circulation between adjacent towns.

Collector Roads: Refer to roads forming links between local roads and arterial roads and providing links to building or land developments.

² Road length in lane-km data includes all public roads maintained by the Land Transport Authority. It excludes all roads maintained by the other agencies and on privately-owned areas.

Local Access Roads: Refer to roads that provide direct access to buildings and other developments and that only connect with collector roads.

Road Traffic Accident Casualties

Data on road traffic accident casualties are compiled from police records of fatal and injury traffic accidents that occurred on the roads of Singapore.

Public Transport

The Land Transport Authority (LTA) is a statutory board under the Ministry of Transport, which spearheads land transport developments in Singapore. As the agency responsible for planning, designing, building and maintaining Singapore's land transport infrastructure and systems, the LTA aims to bring about a greener and more inclusive public transport system, complemented by convenient options to walk and cycle for commuters in their daily travel. The LTA leverages on technology to strengthen the rail and bus infrastructure and provide exciting options for future land transport.

Vehicles Registered

All vehicles to be kept or used in Singapore must be registered with the LTA.

Motor Vehicle Population³, 2017

³ Include vehicles which are exempted from Vehicle Quota System and all other taxes.

Source : Maritime and Port Authority of Singapore

- 1 Refers to the number of vessels exceeding 75 Gross Tonnage that arrive at the Port of Singapore during the reference period.
- 2 Refers to a ship structured specifically to carry containers.
- 3 Refers to a ship designed to carry general goods in parcel or in bulk form.
- 4 Refers to a ship which is intended primarily to carry dry cargo in bulk, including such types as ore carriers and combination carriers.
- 5 Refers to a ship constructed or adapted primarily to carry oil or gas in bulk in its cargo spaces and includes combination carriers.
- 6 Refers to a ship which carries more than twelve passengers.
- 7 Refers to a long flat-bottomed boat for carrying cargo, either under its own power or towed by another.
- 8 Refers to a boat used for pushing or towing other vessels.
- 9 Refers to vessels not categorised as container, freighter, bulk carrier, tanker, passenger, barge or tug.

InfoComm and Media

Revenue of the Information and Communication Technology Industry

The revenue of the information and communication technology industry refers to all sales income that is derived from carrying out the main activities of the enterprise from the industry, and is booked in Singapore, as reflected in total receipts.

It includes the total value of services rendered and commissions earned, agency fees, as well as administration and management fees, but excludes Goods and Services Tax and other sources of income such as rental and interests earned. All manufacturing output and sales to distributors are also excluded.

From 1999, the survey frame comprises companies with business activities relating to IT products and services as classified by the Singapore Standard Industrial Classification (SSIC), companies in the telecommunications business and companies providing content services. Companies based on the 5-digit SSIC as identified by the Info-communications Media Development Authority of Singapore (IMDA) are selected from the Commercial Establishment Information System (CEIS) database.

Radio, Television and Over-the-top Services CN AIR

Mediacorp has the widest range of media platforms in Singapore, spanning digital, television, radio, and out-of-home media. It pioneered the development of Singapore's broadcasting industry, with the radio broadcast in 1936 and television broadcast in 1963. Mediacorp launched its over-the-top service, *Toggle*, in 2015. Today, the company has over 50 products and brands in four languages (English, Mandarin, Malay and Tamil), reaching out to virtually all audience segments in Singapore.

SPH Radio Ptd Ltd manages and operates five 24-hour radio stations—ONE FM 91.3, Kiss92, MONEY FM 89.3, UFM 100.3, and 96.3 Hao FM. ONE FM 91.3 and Kiss92 are English music stations. MONEY FM 89.3, which is also in English, is Singapore's first and only business and personal finance radio station. The latter two stations, UFM 100.3 and 96.3 Hao FM, are Mandarin music stations, with 96.3 Hao FM focusing more on lifestyle, healthcare and financial topics.

So Drama! Entertainment owns and operates two radio stations – 88.3Jia FM and Power 98FM. 88.3Jia FM is Singapore's only bilingual music station, while Power 98FM is an English music station.

Key Indicators for 2017

Radio Transmission
was **2,800** hours
per week

8.5 billion
SMS Messages
sent and received

21.2 billion
International
Telephone Call
Minutes

859,000
Pay TV
Subscribers

Television Transmission
was **1,009** hours
per week

Mobile Population
Penetration Rate
was **150.8%**

Info-communications Media Development Authority

Notes : With effect from 1 October 2016, the Infocomm Development Authority and the Media Development Authority were restructured to form the Info-communications Media Development Authority and the Government Technology Agency of Singapore.

- 1 Refers to end of period.
- 2 Total post-paid and pre-paid subscriptions (2G) has ceased service with effect from April 2017.
- 3 Covers paid internet access subscriptions only.
- 4 Includes retail xDSL, cable modems, leased line Internet, 3G, 3.5G/HSDPA, 4G/LTE, WiMAX or its equivalent and Wi-Fi hotspots access (including Wireless@SG subscriptions).
- 5 Includes all retail residential wired broadband subscriptions provided over xDSL, cable modems, leased line and optical fibre. Residential wireless broadband subscriptions are excluded.
- 6 Includes all retail corporate wired broadband subscriptions provided over xDSL, cable modems, leased line and optical fibre. Corporate wireless broadband subscriptions are excluded.
- 7 Includes all retail broadband Internet access subscriptions provided via wireless platforms such as 3G, 3.5G/HSDPA, 4G/LTE, WiMAX or its equivalent and Wi-Fi hotspots (including Wireless@SG subscriptions).
- 8 Includes SMS messages sent and received over 2G (up to April 2017), 3G and 4G (from March 2013) mobile networks.
- 9 Reflects the amount of bi-directional (the aggregated total downloaded) mobile data sent over the mobile networks, including MMS and any other upload/download but excludes video telephony and SMS.
- 10 Includes total retail outgoing international call minutes, transit minutes, calls to Malaysia and traffic by all Service-Based Operators.

International Visitor Arrivals

The Singapore Tourism Board publishes monthly statistics on international visitor arrivals. Quarterly and annual summaries of visitor profiles from major source markets are available from the “Quarterly Tourism Focus” and “Annual Report on Tourism Statistics” reports.

Data on international visitor arrivals are compiled from Disembarkation/Embarkation Forms completed by all visitors arriving in Singapore at the points of entry.

Definitions

Length of Stay: Refers to the actual length of stay in Singapore. The date of arrival as indicated in the disembarkation/embarkation card is matched against the date of departure to

compute the actual length of stay. As some visitors may not depart within the calendar year, the number of visitor departures may be lower than total visitor arrivals during the year.

Standard Average Occupancy Rate:

Obtained by dividing gross lettings (room-nights) by available room-nights. Gross lettings refer to both paid and complimentary lettings. Available room-nights refer to room-nights available for occupancy, excluding rooms closed for renovations and staff use as declared by the hotels.

Tourism Receipts:

Comprise any expenditure incurred by visitors (including transit passengers, foreign air/sea crew and foreign students) during their stay in Singapore as well as the amount they prepaid on components such as accommodation and sightseeing tours before arrival.

Key Indicators for 2017

17.4 mil
International
Visitor Arrivals ¹

¹ Excludes arrivals of Malaysians by land.

Source : Singapore Tourism Board (STB)

Notes : STB has reviewed and updated the data estimation methodology to better present the overall performance of the hotel industry (for gazetted hotels). The updated methodology takes into account estimates of statistics for hotels that did not submit their data in time. Estimations are based on past hotel submissions as well as performance data of properties with similar size and pricing.

- 1 Refers to room-nights available for occupancy. Excludes rooms closed for renovations and staff use as declared by the hotels in the statutory forms.
- 2 Refers to gross lettings (room nights) divided by available room-nights.
- 3 Refers to total room revenue divided by gross lettings.

Finance

19 Finance

Household Sector Balance Sheet

The quarterly Household Sector Balance Sheet is compiled by the Singapore Department of Statistics. The quarterly series start from the reference period of 1st Quarter 1995. The Household Sector Balance Sheet shows the household sector's assets and liabilities at a particular point in time (i.e. as at end-of-period).

Household assets can be classified as financial or non-financial assets. Financial assets include currency and deposits, shares and securities (e.g. listed shares, unlisted shares, unit trusts and investment funds), life insurance (attributable to households as policyholders), CPF balances and pension funds. Non-financial assets, which refer mainly to residential property assets, are categorised into public housing and private housing.

Household liabilities comprise mortgages (from HDB and financial institutions) and personal loans (e.g. motor vehicle loans, credit or charge card loans and other personal loans from banks and other financial institutions).

Banking, Finance and Insurance

Before 1971, the various monetary functions normally associated with a central bank were performed by several government departments and agencies. To centralise these functions, the Monetary Authority of Singapore (MAS) was established in 1971 to assume the central bank role except for the currency issuing function which remained the responsibility of the Board of Commissioners of Currency Singapore (BCCS). In October 2002, the BCCS was merged with the MAS.

The MAS conducts monetary and exchange rate policies appropriate for sustained

and non-inflationary economic growth in Singapore. It administers the statutes pertaining to money and banking and formulates policies for the development of a sound banking system and an orderly financial market. It aims to develop Singapore into an international financial centre.

Statistics on banking, finance and insurance are compiled from returns submitted to the MAS. They may be found in the "[Monthly Statistical Bulletin](#)" and [Annual Reports](#) published by the MAS.

Asian Dollar Market

The Asian Dollar Market was officially established in October 1968 when approval was first given for a bank to operate an Asian Currency Unit (ACU). Since then, merchant banks have also been allowed to operate ACUs. As at 31 March 2018, there was a total of 155 ACUs in operation.

Insurance

The insurance industry is regulated by the MAS under the Insurance Act (Cap 142).

Insurance business in Singapore is divided into two classes – life business and general business.

The range of products offered by life insurers includes traditional whole life, endowment, term, accident, health and annuity plans as well as investment-linked insurance plans. General insurers provide coverage for a wide range of risks such as fire, marine and aviation, motor, work injury compensation and public liability.

Central Provident Fund

Please see Chapter 4.

Definitions

Money Supply: Refers to the amount of money in an economy. Narrowly defined, money supply (M1) consists of currency in active circulation and demand deposits. A broad definition of money supply (M2) comprises M1 and quasi money. The latter includes fixed, savings and other deposits with banks as well as negotiable certificates of deposit in Singapore dollar issued by Singapore banks. Money supply (M3) consists of M2 and net deposits with non-bank financial institutions.

Asian Currency Unit (ACU): Refers to an operational entity of a financial institution which has been granted approval by the MAS to participate in the Asian Dollar Market in Singapore. The ACU is essentially a separate accounting unit of a financial institution set up for its transactions in the Asian Dollar Market.

Official Foreign Reserves: Refer to the gross official reserves held by the MAS. These include gold and foreign exchange, Special Drawing Rights and Singapore's reserve position in the International Monetary Fund (IMF). Prior to May 1999, Singapore's official foreign reserves were valued at book cost. With effect from May 1999, the book value of foreign reserve

assets are translated at market exchange rates prevailing at the end of each reporting month.

Special Drawing Rights (SDR): Refer to an international reserve asset created by the IMF and allocated to its members in proportion to their quotas as a supplement to existing reserve assets. The SDR serves as the unit of account of the IMF. The valuation of the SDR is determined on the basis of a basket of five currencies: the US dollar, Euro, Chinese Renminbi, Japanese Yen and Pound Sterling.

Main Cards and Supplementary Cards: Refer to both credit and charge cards issued by the card issuing companies.

Total Cards Billings: Refer to total billings of Singapore cardholders excluding interest charges and membership fees.

Rolled Over Balances: Refer to balances that are subject to interest charges because they are not settled within the 'free credit' period. These include the minimum payment not settled by due date as well as the amount that is rolled over after settlement of the minimum sum.

Bad Debts Written Off: As the period when bad debts are written off differs from one card issuer to another, they are included as and when they occur.

Public Finance

The presentation of the annual Government Budget is based on the financial year (FY) of the Government, which runs from 1 April of the year to 31 March of the following year.

Under Singapore's Constitution, a distinction is made between the reserves accumulated by the Government during its current term of office, and past reserves, which refer to the reserves not accumulated in the current term of Government. The Government is expected to balance the budget within its term and can only draw on past reserves with the approval of the President. This Constitutional framework protects past reserves by enforcing fiscal prudence, while allowing the Government to draw on them in times of need.

The Overall Budget Balance that is published by the Ministry of Finance and presented to the Parliament is based on revenues that the Government of the day can spend under the Constitution. Not all Government revenues and receipts collected can be spent by the Government. Receipts such as land sales accrue to past reserves.

Singapore separately publishes a set of government finance data that follows the International Monetary Fund's presentation format for government finance statistics. This set of data includes all receipts, including items not available for spending by the Government of the day under Singapore's Constitution.

Government Revenue

The main revenue-collecting agencies are the Inland Revenue Authority of Singapore (IRAS) and the Singapore Customs. IRAS is responsible for the collection of income tax, property tax, Goods and Services Tax (GST), stamp duty, betting duty, casino tax and private lotteries duty. The Singapore Customs collects import GST as well as customs and excise duties on liquors, tobacco, petroleum products

and motor vehicles.

A person who has stayed or exercised employment in Singapore for a period of 183 days or more in the year preceding the year of assessment would be considered a tax resident of Singapore. Tax residents pay personal income tax at progressive rates on the chargeable income of the preceding year after appropriate deductions (e.g. allowable expenses, donations and reliefs) have been made. Non-tax resident individuals are not entitled to personal reliefs or rebates and are normally taxed at a flat rate.

A company is taxed at a flat rate on its chargeable income earned in the preceding financial year. Tax reliefs in the form of tax exemption schemes and corporate income tax rebates are available for companies to help reduce their taxes. More related information is available at the [IRAS website](#).

GST is a consumption tax levied on the import of goods, and all supplies of goods and services in Singapore, except for the sales and leases of residential properties, importation and local supply of investment precious metals and the provision of financial services. The GST rate is 7 per cent. International services and export of goods are zero-rated (i.e. GST is charged at 0 per cent).

Government Expenditure

Total Expenditure consists of Operating Expenditure and Development Expenditure.

Operating Expenditure includes Running Costs and Transfers. Running Costs represent the day-to-day operating expenditure of the Government Ministries and Departments on the maintenance of the operations and other regular activities of the Government. The main components of Running Costs are expenditure on manpower, other operating expenditure and operating grants to Statutory Boards and other institutions. Transfers are payments made by the

Government to members of the public and outside organisations. These include public assistance, subsidies, subventions and Government contributions to local and external organisations. Operating Expenditure is met from the Consolidated Fund ¹.

Development Expenditure refers to expenses that represent a longer-term investment or result in the formation of a capitalisable asset of the Government. Examples of spending areas are the acquisition of heavy equipment, as well as capitalisable assets, for example, buildings and roads. Development Expenditure is met from the Development Fund ².

The funding sources of the Development Fund are:

- i) monies appropriated from time to time from the Consolidated Fund;
- ii) proceeds of any loan raised for the purposes of the fund and appropriated to such purposes by the law raising the loan;
- iii) loans or grants from time to time made to Singapore for the purposes of or properly allocable to the fund;
- iv) revenues of Singapore allocated to the fund;
- v) interest and other income from investments of the fund and profits arising from the realisation of any such investments; and
- vi) repayments of any loans made from the fund, or payments of interest on such loans.

The Development Fund may be used for:

- i) construction, improvement, acquisition

or replacement of capital assets (for example, buildings, vehicles, aircraft, machinery, rolling-stock, roads) required in respect of or in connection with the economic development or general welfare of Singapore;

- ii) acquisition of land and of any right or interest in or over land and in respect of the use of any invention; and
- iii) grants and loans to, or investments in any public authority or corporation for any of the purposes mentioned in (i) and (ii) above.

Government Debt

The Government issues the following debt securities: Treasury Bills, Singapore Government Securities (SGS) bonds, Special Singapore Government Securities (SSGS) and Singapore Savings Bonds (SSB), all for reasons unrelated to the Government's fiscal needs:

- i) SGS bonds and Treasury Bills are tradable debt instruments issued to develop Singapore's debt markets;
- ii) SSGS are non-tradable bonds issued primarily to meet the investment needs of the Central Provident Fund (CPF) Board, Singapore's national pension fund; and
- iii) SSB are introduced to provide individual investors with a long-term savings option that offers safe returns.

The Government does not borrow to fund its Budget. Under the Protection of Reserves Framework in Singapore's Constitution, borrowing proceeds are not revenues that the Government is allowed to spend. All borrowing proceeds from the issuance of securities are therefore invested.

The Singapore Government has a strong balance sheet with assets in excess of its liabilities.

¹ The Consolidated Fund was constituted by Article 145 of the Constitution of the Republic of Singapore (1999 Revised Edition).

² The Development Fund was established by the Development Fund Act (Cap. 80, 2013 Revised Edition).

Notes : Data refer to the Government's financial year, which begins on 1 April of the current year and ends on 31 March of the following year. Figures may not add up due to rounding.

- 1 Refers to receipts credited to the Consolidated Revenue Account and Development Fund Account, but excludes the repayment of loans and advances, interest income, investment income and capital receipts.
- 2 With effect from April 2010, Withholding Tax, which was included in the figures reported under Personal Income Tax, has been reported separately. This item refers to collections under Section 45 of the Income Tax Act, which is a withholding tax on locally-sourced income earned by non-residents.
- 3 Refers to a tax on the total market value of a person's assets (cash and non-cash) at the date of his or her death. It has been removed for deaths occurring on and after 15 February 2008.
- 4 Comprises additional registration fees, road tax, special tax on heavy-oil engines, passenger vehicle seating fees and non-motor vehicle licences, but exclude excise duties on motor vehicles which are classified under Customs and Excise Duties.
- 5 Includes casino tax collected under Section 146 of the Casino Control Act with effect from March 2010.
- 6 Includes the foreign worker levy, annual tonnage tax, water conservation tax and development charge.

Source : Accountant-General's Department

Notes : Data refer to the Government's financial year, which begins on 1 April of the current year and ends on 31 March of the following year. Refinements have been made over time to the sectoral classification of Ministries' expenditure to better reflect the nature of the programmes. In FY2013, expenditure by the Ministry of Manpower under the Financial Security and Lifelong Employability programme (subsequently re-named as the Financial Security for Singaporeans programme) was reclassified from the Economic Development sector to the Social Development sector.

Figures may not add up due to rounding.

- 1 Refers to expenditure on manpower, other operating expenditure (excluding expenses on investment and agency fees on land sales), operating grants and transfers. Excludes Special Transfers and spending from Government Endowment and Trust Funds.
- 2 With effect from 1 November 2012, the Ministry of Community Development, Youth and Sports (MCYS) and the Ministry of Information, Communications and the Arts (MICA) were restructured to form three Ministries: (i) MCYS was renamed as the Ministry of Social and Family Development (MSF), (ii) MICA was renamed as the Ministry of Communications and Information (MCI) and (iii) the new Ministry of Culture, Community and Youth (MCCY) was formed to undertake functions transferred from MCYS and MICA.
- 3 Info-Communications and Media Development expenditure under the Economic Development sector refers to expenditure under the Infocomm Development Authority of Singapore and Media Development Authority prior to 1 October 2016. Thereafter, it refers to that of Info-communications Media Development Authority and Government Technology Agency of Singapore (from October 2016 to March 2017).

Memorandum item : Debt Guarantees ¹	-	-	-	-	-	-	-

Sources : Accountant-General's Department
Monetary Authority of Singapore

Notes : The debt is raised through the issuance of the Singapore Government Securities (SGS) Bonds, Treasury Bills, Singapore Savings Bonds and Special Singapore Government Securities (SSGS).

SGS bonds and Treasury Bills are for purposes of developing Singapore's debt markets, SSGS are non-tradable bonds issued specifically to meet the investment needs of the Central Provident Fund (CPF) Board and SSB are issued to provide individual investors with a long-term savings option.

Under the Protection of Reserves Framework in the Singapore Constitution, borrowing proceeds are not revenues that the Government is allowed to spend. All borrowing proceeds from the issuance of securities are therefore invested.

1 Refers to the market value of debt guarantees.

Notes : Data refer to the Government's financial year, which begins on 1 April of the current year and ends on 31 March of the following year.

Presentation format of the table follows that of the National Summary Data Page for Singapore, which disseminates the data prescribed by the International Monetary Fund's Special Data Dissemination Standards. Data in the table represent a broader definition of Government revenues and receipts than what are permissible for Government spending as presented in each year's Budget Statement. This is because some revenues and receipts accrue to the Government's past reserves, which cannot be drawn on without the approval of the President.

The data prior to FY2015 follow the IMF Government Financial Statistics Manual (GFSM), i.e., GFSM 2001.

Data from FY2015 follow the latest IMF Government Financial Statistics Manual (GFSM), GFSM 2014, which is an update from the previous GFSM 2001. Details on the differences in the reporting format for GFSM 2014 and GFSM 2001 can be found in IMF's website <http://www.imf.org/external/pubs/ft/gfs/manual/aboutgfs.htm>.

General government finance includes budgetary and extra-budgetary accounts.

Figures may not add up due to rounding.

- 1 Does not reflect the fiscal position of the current term of government, as it takes into account land sales and capital receipts (which accrue primarily to past reserves) in addition to taxes and other revenues, as well as land-related expenditure.
- 2 Reflects the net issuance of Government securities and lending minus repayments.

Prices

21

Prices

Consumer Price Index

The Consumer Price Index (CPI) measures the average price changes in a fixed basket of consumption goods and services commonly purchased by households over time. The weighting pattern for the 2014-based CPI was derived from the expenditure values collected in the Household Expenditure Survey (HES) conducted from October 2012 to September 2013. These expenditure values were updated to 2014 values by taking into account price changes between 2012/13 and 2014.

The CPI is compiled on a monthly basis. The annual CPI is derived by taking a simple average of the 12 months' indices for the year. The annual inflation rate for a specific year is computed by comparing the average for the 12 monthly indices with that for the preceding year.

Details on the compilation of the 2014-based CPI can be obtained from the Information Paper "[Rebasing of The Consumer Price Index \(Base Year 2014 = 100\)](#)", published by the Singapore Department of Statistics (DOS).

Average Retail Prices of Consumer Items

Retail prices of selected goods and services are collected regularly from a wide range of retailers and service providers commonly patronised by households.

The average annual retail price refers to the simple average of the 12 monthly retail prices for the year.

Average retail prices of consumer items starting from January 2014 are based on the 2014-based CPI basket. These prices may not be strictly comparable with those published based on earlier CPI baskets due to changes in the sample of brands, varieties and outlets priced.

Singapore Manufactured Products & Domestic Supply Price Indices

The Singapore Manufactured Products Price Index measures the changes in the prices of goods manufactured by local manufacturers. The Domestic Supply Price Index monitors the price changes of commodities, either locally manufactured or imported from abroad, which are retained for use in the domestic economy. The 2012-based series is compiled using the 'modified Laspeyres' formula, where the weight reference period is 2011 and the price reference period is 2012.

The weights for Singapore manufactured products are derived from production data collected in the 2011 Census of Manufacturing Activities. The weights for the Domestic Supply Price Index are made proportionate to the combined value of retained imports and locally manufactured goods sold in the domestic market. Prices of imported goods and ex-factory prices are collected from selected importers and local manufacturers respectively every month.

Indices at the commodity division and commodity section levels can be found on the [SingStat Website](#) via the following selections: Economy → Prices and Price Indices → Producer Price Indices. Analyses of price changes are published in the monthly report on [Singapore Manufactured Products & Domestic Supply Price Indices](#).

Import & Export Price Indices

The Import & Export Price Indices track the price movements of imported and exported goods. Prices for imported products are valued at 'CIF' (Cost, Insurance and Freight) and prices for exported products are valued at 'FOB' (Free On Board). The 2012-based series is compiled using the Laspeyres formula, where the price and weight reference periods are aligned to the reference period of 2012.

Prices

The weights for the imported and exported products are derived from the import and export statistics in 2012. Monthly prices are collected from selected importers and exporters.

Indices at the commodity division and commodity section levels can be found on the [SingStat Website](#) via the following selections: Economy → Prices and Price Indices → International Trade Price Indices. Analyses of price changes are available in the monthly report on [Import & Export Price Indices](#).

Construction Material Market Prices

The Building and Construction Authority (BCA) compiles data on construction material

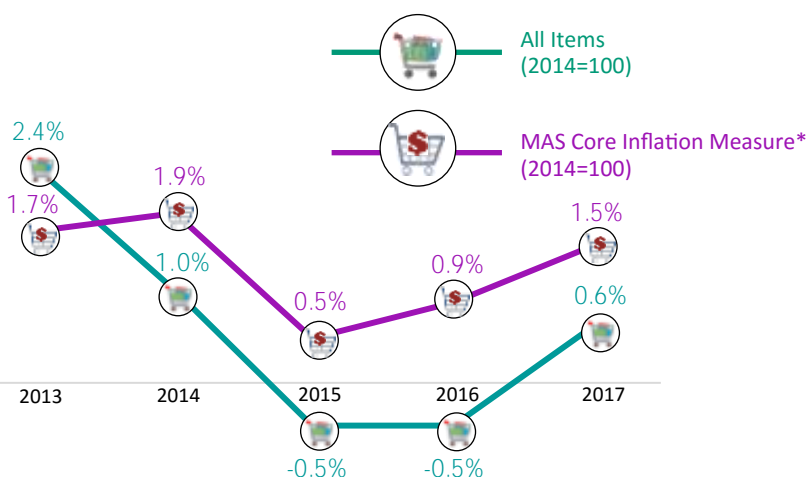

market prices. Construction material market prices are computed based on the average market prices of construction materials for the respective years.

Other Price Indices

The Housing and Development Board (HDB) compiles the Price Index of HDB Resale Flats, while the Urban Redevelopment Authority (URA) compiles the Private Residential Property Price Index and Commercial Property Price and Rental Indices. Since the fourth quarter of 2013, the Industrial Property Price Index, previously released by URA, has been compiled by the JTC Corporation.

1 The weighting pattern of the Consumer Price Index (CPI) was derived from the expenditure values collected from the 2012/13 Household Expenditure Survey (HES) and updated to 2014 values by taking into account price changes between 2012/13 and 2014.

2 A significant share of the CPI Accommodation group is "owner-occupied accommodation (OOA) cost", which is computed based on the imputed rental concept under the rental equivalence method. Besides the imputed rentals on OOA, actual rentals paid on rented units are included separately under the CPI Accommodation group. Given that imputed rentals on OOA have no impact on the cash expenditure of most households in Singapore as they already own their homes, "All Items less imputed rentals on OOA" is compiled as an additional indicator.

3 Excludes the components of "Accommodation" and "Private Road Transport".

1 The weighting pattern of the Consumer Price Index (CPI) was derived from the expenditure values collected from the 2012/13 Household Expenditure Survey (HES) and updated to 2014 values by taking into account price changes between 2012/13 and 2014.

2 A significant share of the CPI Accommodation group is "Owner-Occupied Accommodation (OOA) cost", which is computed based on the imputed rental concept under the rental equivalence method. Besides the imputed rentals on OOA, actual rentals paid on rented units are included separately under the CPI Accommodation group. Given that imputed rentals on OOA have no impact on the cash expenditure of most households in Singapore as they already own their homes, "All Items less Imputed Rentals on OOA" is compiled as an additional indicator.

Sources : Urban Redevelopment Authority

JTC Corporation (With effect from 4Q 2013, for data pertaining to industrial properties)

- 1 Data are computed using stratified hedonic regression method. The sum of values of transactions from 1Q 2014 to 1Q 2015 is used as weights to compute the index. Prior to 3Q 2016, data are compiled based on transaction prices given in contracts submitted for stamp duty payment and data provided by licensed developers on new units sold. From 3Q 2016, net prices of units sold by de-licensed developers are included as well.
- 2 The weights used to compute the index are updated every quarter.
- 3 With effect from 1Q 2014, the coverage of shop space statistics has been expanded to include non-shop retail uses (i.e. food & beverage (F&B), entertainment and health & fitness) and referenced as 'retail space'.
- 4 Prior to 4Q 2014, the price index was computed based on transactions of multiple-user factories in the Central region and island-wide multiple-user warehouses, with weights updated every quarter using past 12 quarters' transaction values. From 4Q 2014, the price index is computed based on island-wide transactions of multiple-user factories and single-user factories. From 4Q 2014 to 4Q 2015, the weights were fixed using 2012 transaction values. From 1Q 2016, the weights are fixed using 2015 transaction values. The price index is also re-scaled to 100 at 4Q 2012.
- 5 Prior to 4Q 2014, the price index was computed based on transactions of multiple-user factories in the Central region. From 4Q 2014, the scope of the price index is expanded to include transactions outside the Central region. From 4Q 2014 to 4Q 2015, the weights were fixed using 2012 transaction values. From 1Q 2016, the weights are fixed using 2015 transaction values. The price index is also re-scaled to 100 at 4Q 2012.
- 6 The price index is computed using fixed weights based on 2009 transaction values prior to 1Q 2013. From 1Q 2013 to 4Q 2015, the weights were fixed using 2012 transaction values. From 1Q 2016, the weights are fixed using 2015 transaction values.

Education

Singapore's education system aims to bring out the best in every child by enabling students to discover their talents, realise their full potential, and develop a passion for life-long learning. There are multiple educational pathways catering to students with different strengths, interests and learning styles, developing each child to his full potential.

The bilingual policy is a cornerstone of Singapore's education system. It requires students to offer two languages: English Language and a Mother Tongue Language. The learning of the Mother Tongue Language reinforces cultural identity and enables Singaporeans to connect with communities across Asia and the world who speak the same language or share similar culture.

Schools in Singapore provide a rich diversity of learning experiences for students. On top of building a strong foundation in literacy and numeracy, students are developed holistically in the physical, aesthetic, moral, social and emotional spheres. In the process, students also have the opportunity to engage in hands-on learning through authentic settings which allows them to see the relevance of what they learn in the real-world context.

Primary Education

At the primary level, students go through a six-year course designed to lay a strong educational foundation. This includes developing language and numeracy skills, building character and nurturing sound values and good habits.

At the end of Primary 6, students take the Primary School Leaving Examination (PSLE), which places them in the secondary school course that matches their learning pace and aptitude.

Secondary Education

At the secondary level, three core courses, namely Express course, Normal (Academic) course and Normal (Technical) course are offered to match students' learning needs.

Specialised Schools, Specialised Schools for Normal (Technical) Students, Specialised Independent Schools, Independent Schools and schools which offer the Integrated Programme form the diverse secondary school landscape, to suit the unique needs of every student. In addition, all secondary schools have distinctive programmes to better support students' interests and talents.

Post-Secondary Education

After Secondary 4 or Secondary 5, most students proceed to one of the following post-secondary educational institutions:

Junior Colleges/Centralised Institute

Junior colleges offer a two-year pre-university education course while the centralised institute offers a three-year programme.

Polytechnics

The polytechnics offer a wide range of courses that equip students for careers in diverse fields.

Institute of Technical Education (ITE)

The ITE taps on industry expertise to ensure its graduates are well-equipped with skills needed by industries.

Arts Institutions

The LASALLE College of the Arts and the Nanyang Academy of Fine Arts offer a range of publicly-funded full-time diploma programmes in

Education and Literacy ■

visual and performing arts. A range of full-time degree programmes are also offered to students who intend to pursue visual or performing arts at a higher level.

Universities

There are six publicly-funded universities in Singapore.

National University of Singapore (NUS)

NUS is a research-intensive university with sixteen faculties and schools, including a music conservatory. NUS offers traditional undergraduate programmes, the University Scholars Programme, a liberal arts degree programme, and a wide range of graduate programmes.

Nanyang Technological University (NTU)

NTU is a comprehensive, research-intensive university, with a strong focus on engineering, science and technology. It is made up of five Colleges and seven autonomous entities including the National Institute of Education.

Singapore Management University (SMU)

SMU offers undergraduate and postgraduate programmes across its six schools in accountancy, business, law, social sciences, economics and information systems. SMU is known for its interactive pedagogy of seminar-style teaching in small class sizes.

Singapore University of Technology & Design (SUTD)

SUTD was established in collaboration with the Massachusetts Institute of Technology and Zhejiang University. It is a small, top-tier research-intensive university focusing on design education in engineering and architecture, and hosts an International Design Centre that conducts research on technologically-intensive design.

Singapore Institute of Technology (SIT)

SIT is one of the pioneers of the applied degree pathway, with a focus on science and technology. It offers its own applied degrees, as well as degree programmes in partnership with reputable overseas universities that have a strong emphasis on practice-oriented learning, a strong nexus with industry, and integration of work and study.

Singapore University of Social Sciences (SUSS)

SUSS became Singapore's sixth Autonomous University in 2017. It provides an applied education that targets both fresh school leavers and adult learners, in the domain of the social sciences, as well as in disciplines that have a strong impact on human and community development.

Lifelong Learning

Working adults who wish to deepen their skills or acquire new ones may do so in post-secondary education institutions. These institutions provide a wide range of learning options, which help to address manpower and skills gaps and enable the workforce to stay employable amidst rapid shifts in the economic landscape.

The ITE offers part-time *Nitec*, *Higher Nitec*, *Specialist Nitec*, and ITE Skills Certificate courses. It also offers MOE-subsidised lessons for Secondary 1 Normal to N- and O-Levels for adult learners. The polytechnics offer part-time programmes at diploma and post-diploma levels. The universities offer part-time degree courses at both undergraduate and postgraduate levels. In addition, ITE, polytechnics and universities offer tailored modular training which allows more flexibility in learning.

Education and Literacy ■

Education Profile and Key Educational Indicators

The education composition of the population is commonly associated with its highest qualification attained. Specifically, based on the highest educational level that a person has attained, the population can be broadly divided into five categories, namely “Below Secondary”, “Secondary”, “Post-Secondary (Non-Tertiary)”, “Diploma & Professional Qualification” and “University”.

Statistics on the highest qualification attained of the population are collected through the Census of Population and General Household Survey conducted by the Department of Statistics (DOS) and the mid-year Labour Force Survey conducted by the Ministry of Manpower. These statistics pertain to residents who are not attending educational institutions as full-time students.

Other key educational indicators, namely mean years of schooling and literacy rate, are compiled annually for the resident population. These indicators are commonly used internationally as an indication of the educational development of the population.

Definitions

Highest Qualification Attained: Refers to the highest grade or standard a person has passed or the highest level where a certificate, diploma, or degree is awarded. The Singapore Standard Educational Classification is used to classify persons by highest qualification attained.

Mean Years of Schooling: Refers to the years of education a person received on average.

Literacy Rate: Refers to the proportion of population who are able to read with understanding (e.g. a newspaper). It is derived based on information as reported in surveys, including the Censuses of Population and General Household Surveys, as well as administrative data. Persons whose literacy is not known from surveys or administrative records are excluded from the computation of literacy rate.

Other References

The Ministry of Education (MOE) publishes detailed education statistics which can be found in the “[Education Statistics Digest](#)”. An overview of Singapore’s education system is also available from the MOE [website](#).

Statistics on the highest qualification attained by the resident population, mean years of schooling and literacy rates are available in the annual report “[Population Trends](#)” published by DOS.

Health

23 Health

The Ministry of Health (MOH) is committed to promoting good health, providing good healthcare services and encouraging medical excellence.

Through MOH, the Government manages the public healthcare system to ensure that quality and affordable basic medical services are available to all Singaporeans. Financing schemes including subsidies, Medisave savings and insurance help to ensure affordability of healthcare. There will also be ongoing investment in healthcare facilities, manpower and information infrastructure to enhance the accessibility across the continuum of care. At the same time, MOH continues to encourage individuals to adopt a healthy lifestyle and to take charge of their own health to lead better, healthier lives. Safety nets are provided to ensure that no Singaporean is denied access to healthcare because of financial difficulty.

Public Healthcare Services

Singapore's public healthcare establishments provide a full range of services covering primary care at polyclinics to secondary and tertiary care at hospitals. These include nine acute hospitals, one psychiatric hospital, three community hospitals and twenty polyclinics.

Statutory Boards

Two statutory boards under MOH were established on 1 April 2001.

The Health Promotion Board (HPB) aims to empower Singaporeans to attain optimal health, increase the quality and years of healthy life, and prevent illness, disability and premature death. As the key driver of national health promotion and disease prevention programmes, HPB

spearheads programmes reaching out to the healthy, the at-risk and the unhealthy at all stages of life. Health promotion programmes include nutrition, mental health, physical activity, tobacco control, and communicable disease education. HPB also promotes healthy ageing, integrated health screening, and chronic disease education and management.

The Health Sciences Authority (HSA) is a multidisciplinary scientific and regulatory agency that serves three key functions to protect and advance national health and safety. It is the national regulator for drugs, innovative therapeutics, medical devices and health-related products, ensuring they are well-regulated to high standards of safety, quality and efficacy. As the national blood service, it secures the nation's blood supply by ensuring a safe and adequate blood supply for public and private hospitals. It is also the provider of national expertise in forensic medicine, forensic science and analytical chemistry testing to serve the administration of justice and safeguard public health.

Public Health

Statistics on immunisation coverage are collected by the National Immunisation Registry in HPB from various healthcare institutions, including polyclinics, general practitioners and hospitals. Data on patient attendances at primary healthcare clinics are obtained from statistical returns.

Hospital Statistics

Data on public hospital beds, patient admissions and outpatient attendances are obtained from administrative records and the computerised patient registration systems of the

hospitals. For non-public hospitals, the data are compiled from returns prescribed by MOH and from administrative data.

Medical Personnel

Data on registered healthcare personnel refer to the number of doctors, dentists,

pharmacists, nurses and midwives, optometrists and opticians, allied health professionals, as well as traditional Chinese medicine practitioners registered under the respective acts. Manpower statistics pertaining to these healthcare personnel are derived from the registers maintained by the respective professional bodies.

Number of Registered Health Personnel in 2017		
	Doctors	13,386
	Dentists	2,293
	Pharmacists	3,047
	Registered Nurses	32,672
	Enrolled Nurses	8,631
	Registered Midwives	137
	Optometrists and Opticians	2,605
	Occupational Therapists	1,125
	Physiotherapists	1,814
	Speech Therapists	595
	Traditional Chinese Medicine (TCM) Physicians	2,952
	Acupuncturists	254

Source : Ministry of Health

Notes : Public health facilities refer to those owned or controlled by a government unit or another public corporation (where control is defined as the ability to determine the general corporate policy).

Not-for-profit health facilities refer to those producing health goods and services, but are not permitted to be a source of income, profit or financial gain for the unit(s) that establish, control or finance them.

Private health facilities refer to those set up for the purpose of producing health goods and services and are capable of generating a profit or other financial gains for their owners.

A residen. al health facility providing more than one residential care service will be categorised based on its highest level of medical capability (LMC), provided the highest LMC beds make up at least 25 per cent of total bed capacity.

For example, a health facility providing both community hospital and chronic sick services will be categorised as a "Community Hospital" if its number of community hospital beds is at least 25 per cent of its total bed capacity.

- 1 Comprises both general hospitals and specialty centres (excluding Psychiatric Hospitals) with acute care inpatient facilities. With effect from 2012, data include Mount Elizabeth Novena Hospital and Fortis Colorectal Hospital (currently known as Concord International Hospital). With effect from 2014, data include Farrer Park Hospital. With effect from 2015, data include Ng Teng Fong General Hospital. Johns Hopkins Singapore International Medical Centre ceased operations with effect from 2017.
- 2 With effect from 2011, data include Bright Vision Hospital. With effect from 2015, data include Jurong Community Hospital and Yishun Community Hospital.
- 3 With effect from April 2011, the ownership of Bright Vision Hospital was transferred to Singapore Health Services (Public).
- 4 West Point Hospital closed on December 2015 and re-opened in September 2016.

Hawkers and Food Establishments

24

Hawkers and Food Establishments

Hawker stalls and food retail establishments are licensed by the National Environment Agency (NEA). Food factories are licensed by the Agri-Food & Veterinary Authority (AVA). Both agencies ensure that food sold in Singapore is safe for consumption.

Licensed Hawkers

Licensed hawkers refer to hawkers who are issued with the licence by NEA to operate stalls in wet markets and hawker centres, as well as itinerant street hawkers.

Licensed Hawkers by Type of Premises (End of Period) 2017

13,329 market/
food centre

536 street

Licensed Food Establishments

Licensed food establishments are grouped under five separate categories, namely, food shops, food stalls, food factories, supermarkets and private markets.

Businesses that require a food shop licence include restaurants, cake shops, eating houses, coffeeshops, food courts, pubs, bars, market produce shops, food caterers, and mobile food wagons.

A food stall refers to a compartmentalised unit housed in a food shop, such as coffeeshop, eating house, food court or canteen.

Food factories refer to AVA licensed food establishments where food is manufactured, processed, prepared or packed for the purpose of distribution to wholesalers and retailers. These food establishments include noodles and pasta manufacturers, bakery and flour confectionery

manufacturers, meat and fish processing establishments, slaughterhouses and cold stores used for the storage of meat and/or fish products.

These food establishments are subjected to regular inspections and food samples would be collected for laboratory analysis to ensure that the food produced is safe and fit for human consumption. They are also graded and classified under grades 'A', 'B', 'C' or 'D' according to their food safety and hygiene standards.

Supermarkets refer to air-conditioned retail markets that sell meat, fish, fruit, vegetable, poultry, egg or other article of food (cooked or uncooked) and other household items. They are operated on a self-service basis.

Private markets refer to markets (including any stalls therein) licensed to private operators for the sale of meat, fish, fruit, vegetable, poultry, egg or other article of food (cooked or uncooked).

Community Services

The Ministry of Social and Family Development (MSF) aims to nurture resilient individuals, strong families and a caring society. MSF oversees policies on social assistance, social services, family, child care and child development, vulnerable adults and elderly, disability, as well as the management of problem gambling. In addition to its developmental role, MSF directly administers services which include the protection of children and rehabilitation of youth delinquents, registration of civil marriages, licensing of child care centres, public education on family matters and disbursement of social assistance. MSF also oversees regulatory functions under the various legislations such as the Maintenance of Parents Act, the Children and Young Persons Act, the Women's Charter and the Mental Capacity Act. To address social needs, MSF works closely with its partners in the social service sector, which include Voluntary Welfare Organisations (VWOs), Community Development Councils (CDCs), major funders such as the Singapore Totalisator Board (or Tote Board), corporate entities as well as the public.

The Ministry of Culture, Community and Youth (MCCY) seeks to inspire Singaporeans through the arts and sports, strengthen community bonds, and promote volunteerism and philanthropy. Since its inception in November 2012, MCCY has been actively engaging the arts, heritage, sports, community and youth sectors. MCCY aims to bring into sharper focus the efforts to build a more cohesive and vibrant society, and to deepen a sense of identity and belonging to the nation. MCCY works with its stakeholders to create an environment where Singaporeans can pursue their aspirations for a better quality of life and together, build a gracious and caring society.

People's Association

The People's Association (PA) is a statutory board set up on 1 July 1960 to promote racial

harmony and social cohesion. The PA also connects the people and the Government through consultation and feedback gathering to close last-mile delivery.

PA achieves its mission through a wide range of programmes offered by its network¹ of about 1,900 Grassroots Organisations (GROs) and five Community Development Councils.

Community Development Councils

The Community Development Councils (CDCs) were set up in 1997 under the PA to "Assist the Needy, Bond the People and Connect the Community" (in short, the "ABC" mission) to strengthen community bonding and social cohesion, and to foster the community spirit of self-help and mutual support. Guided by the mission, the CDCs develop and implement programmes that identify existing and emerging needs in the community, and work closely with public, private and people (3P) partners to develop and implement sustainable programmes that promote caring for environment, helping the elderly and vulnerable, volunteerism, self-reliance and upward social mobility.

Through the 3P partnership, the CDCs aim to rally the community to strengthen social infrastructure, build social resilience and social capital, and promote the culture of giving back so as to build a "Great Home and a Caring Community" and a "Cohesive and Compassionate Nation".

¹ Includes Citizens' Consultative Committees, Community Club Management Committees, Residents' Committees, Neighbourhood Committees, Community Sports Clubs, Community Emergency and Engagement Committees, Women's Executive Committees, Youth Executive Committees, Senior Citizens' Executive Committees, Malay Activity Executive Committees, Indian Activity Executive Committees and Teens Network Club Management Committees.

Community Services ■

Volunteers

"Volunteers" refer to individuals, interest groups and organisations who provide services in community and welfare programmes without receiving full market rates of remuneration or allowances.

Child Care Centres and Kindergartens

The Early Childhood Development Agency (ECDA) serves as the regulatory and developmental authority for the early childhood sector in Singapore, overseeing key aspects of children's development below the age of 7 years in kindergartens and child care centres. It is jointly overseen by the Ministry of Education (MOE) and MSF.

Child care centres provide child care services for children aged 18 months to 6 years. Some centres also provide infant care services for infants aged 2 months to 18 months. Centres may offer regular full-day, half-day and flexible programmes to cater to the different needs of parents and children.

Kindergartens provide pre-school developmental programmes for children from 3 to 6 years of age. Most kindergartens run two sessions a day, with each session ranging from 3 to 4 hours, 5 days a week.

In 2017, there were 1,398 child care centres and 471 kindergartens in Singapore, located in HDB void decks, community spaces and workplaces to provide parents with ease of access and choices in meeting the early childhood needs of their children.

Student Care Centres

Student Care Centres provide care and supervision to school-going children in the Primary to lower Secondary levels outside school hours, while their parents are at work. There are currently over 400 student care centres located in schools and in the community that administer the Student Care Fee Assistance (SCFA) scheme to support lower income families in accessing the service.

ComCare Short-to-Medium Term Assistance

ComCare Short-to-Medium Term Assistance provides temporary financial support to low-income families and individuals who are temporarily unable to work (e.g. due to illness, caregiving responsibilities), jobseekers who require financial assistance, and those earning a low income and require financial support. A Social Service Officer (SSO) will work with the applicants to develop a plan of action to improve their circumstances. Beneficiaries may receive cash assistance for their daily living expenses, assistance for household bills (e.g. rent, utilities, and service and conservancy charges), medical assistance and employment assistance.

ComCare Long Term Assistance

ComCare Long Term Assistance (also known as the Public Assistance, or PA scheme) provides long-term support to persons who are unable to work due to old age, illness or disability, have limited or no means of income, and have little or no family support. Besides a monthly cash allowance, beneficiaries receive Medifund assistance for medical bills as well as assistance for other specialised needs and one-off purchase of essential household items. They may be referred to community-based agencies for relevant social services such as home help, befriending, and senior activity centre programmes.

Community Services ■

ComCare Interim Assistance

ComCare Interim Assistance schemes are administered by SSOs and community partners to provide immediate financial assistance to individuals and families who require urgent and temporary financial relief. The community touch-points administering ComCare Interim Assistance are the Citizens' Consultative Committees (Grassroots), the Family Service Centres, and the Community Justice Centre. The type and amount of assistance rendered depend on the needs and circumstances of each resident, and may be in the form of cash or in kind, e.g. supermarket vouchers.

Student Care Fee Assistance

ComCare provides monthly fee subsidies for children from eligible families to attend student care centres while their parents are at work. These subsidies are available to children attending student care centres registered with MSF, including special student care centres for students with special needs. The families are also given a one-off Start Up Grant to offset the initial costs of placing their child in the centre.

Family Service Centres

Family Service Centres (FSCs) play a key role in building strong and stable families in Singapore. FSCs are community-based social work entities that provide a suite of services, such as Information and Referral services and social work intervention. FSCs focus on serving low income and vulnerable individuals and families, to help them achieve independence, stability and resilience. There are currently 47 FSCs serving more than 25,000 clients a year.

Services for Senior Citizens

As Secretariat to the Ministerial Committee on Ageing, the Ageing Planning Office (APO) in the Ministry of Health (MOH) works with government, private and public agencies to plan and develop initiatives to help Singaporeans age in-place successfully. As part of the Action Plan for Successful Ageing, MOH works with the PA, the Council for Third Age (C3A), the Health Promotion Board (HPB) and various agencies to promote active and healthy ageing. MOH also undertakes the planning and development of aged care services for senior citizens, which includes both the health and social aspects of aged care services, ranging from home and community-based services to residential care services.

MOH's focus is to enhance the accessibility, quality and affordability of aged care services. New initiatives include the development of Active Ageing Hubs which provide active ageing services as well as integrated care services across the health and social care continuum.

In line with its core role of supporting low-income and vulnerable seniors, MSF oversees the Senior Group Homes and Sheltered Homes.

31,741

seniors had access to
Senior Activity Centres
in FY2017

Notes : CCCs = Citizens' Consultative Committees
The PA introduced the Grassroots Member Scheme in 2013.
Grassroots members can be appointed at the constituency level and to any grassroots organisations.

- Includes RC Block Representatives.
- Refers to the Singapore Boys' Home and Singapore Girls' Home.
- Refers to the number of foster families under MSF's Fostering Scheme.
- Volunteer Transport Minders are individuals who support the routine and access to services for children and young persons under MSF's Child Protective Service. They assist to ferry children and young persons from their place of alternative care to schools, venues for contact with their families, medical appointments, counselling/therapy sessions. This scheme started in 2012.
- ProPALS (Promoting Pathways in Arts, Leisure and Sports) started in August 2014. Data refer to the number of agencies/groups. Through the ProPALS scheme, volunteers motivate and inspire children and youths under the care of MSF in their journey towards transformation and growth through sports, arts and recreational initiatives that impart life lessons and build resilience. Volunteers share their expertise in sports, arts or other professional skills to increase competencies of children and youth, and also plan and implement programmes and activities.

26

Culture and Recreation

As a vibrant city of the arts, culture and media, and a sporting and learning nation, Singapore aims to provide a better quality of life for all.

Cinema

Data on cinema attendances are compiled by the Singapore Department of Statistics from returns submitted by cinema organisations. Total attendances are based on the number of tickets sold.

Library

The National Library Board (NLB) aims to nurture the learning needs of a Knowledgeable Society, where all Singaporeans are Readers for Life and are actively engaged in Learning Communities. NLB has around 2.4 million members. In addition to the National Library, there are 26 public libraries located conveniently across Singapore comprising 13 libraries located in shopping malls, 10 stand-alone public libraries and 3 regional libraries. NLB also manages 3 mobile libraries (MOLLY) and 4 libraries belonging to government agencies and institutions.

NLB has a physical collection of 7.5 million books, serials and special materials. Out of this collection, some 2.8 million fiction items and 3.6 million non-fiction items are in the lending collection. Over 29 million loans were made in 2017.

The reference collection offered by the Lee Kong Chian Reference Library at the National Library Building consists of over 744,000 items covering social sciences and humanities,

arts, science and technology, business and management.

NLB also provides library users with on-site and remote access to a digital library at www.nlb.gov.sg. Its eResources site offers more than 696,000 copies of eBooks, over 80 databases with more than 7,000 titles of electronic newspapers and magazines in over 60 languages, and approximately 2 million music tracks.

Sports

As the national sports agency, Sport Singapore recognises the value of sport to transform the nation by advancing the national priorities of developing our people, bonding our communities and strengthening national identity and pride.

In line with *Vision 2030: Live Better Through Sport* recommendations, Sport Singapore uses sport to create greater sporting opportunities and access, more inclusivity and integration, as well as broader development of capabilities. Sport Singapore collaborates with a vast network of public, private and people sector partners to enable individuals to live better through sport.

Through its Sport Facilities Master Plan & ActiveSG, the national movement for sport and physical activity, Sport Singapore creates opportunities for Singaporeans of all ages and abilities to conveniently participate in sport within their communities anytime and anywhere.

Active Health, a social movement introduced by Sport Singapore, encourages

Culture and Recreation ■

Singaporeans to proactively take ownership of their health and wellness through the management of Physical Activity, Screen Time, Sleep and Nutrition.

SportCares activates sport as a force for social good, enabling Persons With Disabilities (PWDs) and vulnerable groups to lead more enriched and fulfilling lives through personal empowerment, social inclusion and bridging communities through sport.

Team Nila, the national volunteer movement, empowers individuals to give back to society through sport and to contribute to the nation as One Team Singapore.

Lifeskills and Lifestyle Courses and Interest Groups

The People's Association (PA) and its grassroots network promote friendship and trust amongst residents of all races and backgrounds through its wide range of community activities and courses pertaining to arts and lifestyle, education and lifeskills, performing arts and sports. These are held at Community Clubs, Resident's Committee Centres, Water Venture Centres and other community spaces. The PA also encourages the formation of interest groups for

residents to deepen their friendships through the pursuit of common interests.

The Arts

The Ministry of Culture, Community and Youth (MCCY)'s publication "Singapore Cultural Statistics", published annually since 2008, provides an update on the state of the arts and cultural landscape in Singapore. The statistics reported in this publication include data on arts and cultural performance, heritage events and museum exhibitions.

Definitions

Performing arts: Refer to folk, traditional, classical, contemporary and popular forms of dance, music and theatre performances. Community arts and cultural events such as cultural festivals and district arts festivals are included.

Visual arts: Refer to public exhibitions of abstract or representational art objects such as paintings, prints, sculpture, pottery, ceramics, creative photography, installation art and multi-media art. Applied arts like film, video, graphic design, fashion design, jewellery design and handicrafts are excluded.

1 Visitorship to the museums is counted using an automatic tracking system, which makes use of tracking devices fixed at all the entrances. All visitors who access the museum premises are captured in the count, regardless of whether the entries are based on paid admissions or those not requiring payment.

2 Includes visitors to Asian Civilisations Museum at Empress Place Building.

3 Gardens by the Bay was officially opened on 29 June 2012.

4 The Indian Heritage Centre opened on 7 May 2015.

5 Visitorship to the Malay Heritage Centre prior to 2015 is not directly comparable to future years due to updates in the data collection method.

6 The National Gallery Singapore opened officially on 24 November 2015.

7 Refers to the financial year which begins in April of the current year and ends in March of the following year.

8 Excludes Southern Island arrivals and includes arrivals to Resorts World Sentosa.

9 Singapore Art Museum (SAM) had been incorporated as an independent company limited by guarantee in November 2013. From January 2014, visitorship data are provided by SAM. Visitorship data include visitors to SAM at 8Q.

10 The National Heritage Board is the appointed operator of Sun Yat Sen Nanyang Memorial Hall from 2009.

Sun Yat Sen Nanyang Memorial Hall was closed for redevelopment from October 2010 to 7 October 2011.

Data for 2011 refer to the visitorship to Sun Yat Sen Nanyang Memorial Hall from 8 October to 31 December 2011.

11 River Safari was officially opened on 3 April 2013.

Miscellaneous

Water Supply

PUB, the national water agency, is responsible for managing Singapore's water supply, water catchment and used water in an integrated way. To ensure sustainability of Singapore's water supply, efforts are taken to diversify the supply sources and manage demand.

Singapore's water supply is diversified through the four National Taps, namely, water from local catchments, imported water from Malaysia, NEWater and desalinated water. PUB's drinking water supply is well within the requirements stipulated under the Environmental Public Health (Quality of Piped Drinking Water) Regulations and the World Health Organisation's Guidelines for Drinking Water Quality. PUB works with the community and various sectors to adopt water conservation measures, such as promoting good water habits and improving efficient use of water as part of water demand management.

499.4 million m³/year of portable water was sold in 2017

Electricity

The Energy Market Authority (EMA) was formed in April 2001 to ensure a reliable and secure energy supply, promote effective competition in the energy market, and develop a dynamic energy sector in Singapore.

There are currently 15 power generation companies participating in the National Electricity Market of Singapore (NEMS), a real-time electricity trading pool operated and administered by the Energy Market Company. The power generation companies bid to sell electricity on a half-hourly basis through NEMS.

Of these 15 power generation companies, seven generate electricity using natural gas as their primary fuel. They are:

- ◆ Keppel Merlimau Cogen Pte Ltd
- ◆ PacificLight Power Pte Ltd
- ◆ Sembcorp Cogen Pte Ltd
- ◆ Senoko Energy Pte Ltd
- ◆ Tuas Power Generation Pte Ltd
- ◆ Tuaspring Pte Ltd
- ◆ YTL PowerSeraya Pte Ltd

For the remaining power generation companies, the National Environment Agency (NEA), Keppel Seghers Tuas Waste-To-Energy Plant Pte Ltd and Senoko Waste-To-Energy Pte Ltd operate and sell electricity generated by their incineration plants. TP Utilities Pte Ltd generates electricity using mainly coal and biomass. ExxonMobil Asia Pacific Pte Ltd, Shell Eastern Petroleum Pte Ltd and Singapore Refinery Company Pte Ltd generate electricity with natural gas, mainly for their own use. TuasOne Pte Ltd has commissioned an incineration plant that it expects to start generating electricity in end 2018.

The total registered power generation capacity was 13,499MW as at December 2017. The total amount of electricity produced in 2017 was 52,225.3 GWh and the peak demand was 7,188 MW. As at end September 2017, there was 141.3 MWp (megawatt-peak) of grid-connected solar photovoltaic capacity.

52,225.3

gigawatt hours of electricity was generated in 2017

EMA has progressively opened the electricity retail market to competition since 2001. This liberalisation of the electricity market aims to facilitate the supply of competitively

Miscellaneous ■

priced electricity and allow greater consumer choice. Commercial and industrial consumers with an average monthly electricity consumption of at least 2,000 kWh can choose to buy electricity from a retailer of their choice instead of buying at the regulated tariff from SP Group.

Since April 2018, households and businesses in Jurong can choose to buy electricity from an electricity retailer of their choice with a price plan that best meets their needs. This initiative – Open Electricity Market – is expected to be extended to the rest of Singapore in the second half of 2018.

As at end January 2018, there were 27 licensed electricity retailers¹.

Piped Gas Industry

The gas industry in Singapore consists of two separate gas networks - the town gas network and the natural gas network.

The town gas network serves about 61% of households in Singapore and is used mainly for cooking and water heating. Total amount of town gas sold in 2017 was 1,756 million kWh.

1,756.0 million units
of town gas was sold in
2017.

Natural gas is used mainly for power generation. In 2017, natural gas contributed to about 95.39% of the total electricity generated.

To diversify our energy sources and meet the rising demand for energy, Singapore imports Liquefied Natural Gas (LNG) from across

the world. The LNG Terminal on Jurong Island currently has a peak throughput capacity of 11 million tonnes per annum.

Waste Management

Over the last four decades, Singapore has seen an increase in the amount of solid waste generated.

Waste generated in Singapore is broadly classified into two categories:

- i) Domestic waste: Collected from residential premises, markets, food retail outlets, schools and trade premises; and
- ii) Non-domestic waste: Collected from commercial and industrial premises.

2.98 million tonnes
of waste was disposed
in 2017.

With limited land resources available for waste disposal, the NEA has adopted the following strategies to manage the growth in solid waste generation:

- a) Minimise and segregate waste at source;
- b) Develop cost-effective collection, recycling and disposal systems;
- c) Build a resource-efficient society; and
- d) Maximise lifespan of landfill.

4.72 million tonnes
of waste was recycled
in 2017.

¹ These licensed electricity retailers are: Best Electricity Supply Pte Ltd; Charis Electric Pte Ltd; Cleantech Solar Management Company Pte Ltd; Diamond Energy Merchants Pte Ltd; Energy Supply Solutions Pte Ltd; Environmental Solutions (Asia) Pte Ltd; Heang Nereng Corporation Pte Ltd; Hyflux Energy Pte Ltd; I Switch Pte Ltd; Just Electric Pte Ltd; Keppel Electric Pte Ltd; MyElectricity Pte Ltd; Ohm Energy Pte Ltd; PacificLight Energy Pte Ltd; Peerer Energy Pte Ltd; Red Dot Power Pte Ltd; SembCorp Power Pte Ltd; Senoko Energy Supply Pte Ltd; Seraya Energy Pte Ltd; SilverCloud Energy Pte Ltd; Sun City Pte Ltd; SmartCity Electric Pte Ltd; Sun Electric Power Pte Ltd; Sunseap Energy Pte Ltd; Tuas Power Supply Pte Ltd; Union Power Pte Ltd; ValuElectric Pte Ltd

Miscellaneous ■

Today, Singapore has in place an integrated solid waste management system. Waste that is not segregated at source for recycling is collected and sent to disposal facilities. Incinerable waste is disposed of safely at waste-to-energy plants, while non-incinerable waste and ash residue from the incineration process are disposed of at the offshore Semakau Landfill.

Fire Occurrences

The mission of the Singapore Civil Defence Force (SCDF) is to protect and save lives and property for a safe and secure Singapore. SCDF compiles data on fire occurrences.

3,871
fire occurrences
in 2017.

Definitions

Residential buildings: Refer to all buildings, either permanent or temporary, used for residential purposes only, such as bungalows, private and public housing, semi-detached and terrace houses. They do not include boarding houses, hostels and hotels.

Non-residential buildings: Refer to all buildings, either permanent or temporary, used for other than residential purposes, such as commercial, industrial, social and communal.

Non-building structures: Refer to all properties or structures other than buildings,

such as discarded materials, electrical cables, vegetation, vehicles and vessels.

Criminal Offences

Singapore's crime statistics are compiled from offences reported to the police during the reference period and not at the time the offences were actually committed.

Crime rate was **584**
per 100,000 population.

Bankruptcy Applications, Orders Made and Discharges

A bankruptcy application is filed with the High Court by the creditor or the debtor himself.

Upon hearing the bankruptcy application, the High Court may make a bankruptcy order declaring the individual a bankrupt.

A bankruptcy discharge refers to the conclusion of the bankruptcy of an individual. The individual is no longer subject to the restrictions and disabilities of a bankrupt after his discharge.

Sources : Ministry of the Environment and Water Resources
PUB, Singapore's national water agency

Notes : Data on water prices are as at end of December of each year.

- 1 Water is charged by cubic metre (m³), which is equivalent to 1,000 litres. Excludes Goods and Services Tax.
- 2 For the calculation of total price, the Sanitary Appliance Fee is converted to its volumetric equivalent.
- 3 From 1 July 2017, the Sanitary Appliance Fee has been combined with the Waterborne Fee into a single, volume-based fee.
- 4 From 1 July 2017, there is a 10% Water Conservation Tax imposed on NEWater.

INFORMATION DISSEMINATION SERVICES

Statistics Singapore Website

The *Statistics Singapore Website* was launched by the Singapore Department of Statistics (DOS) in January 1995. Internet users can access the website by connecting to:

<https://www.singstat.gov.sg>

Key Singapore statistics and resources are available via the following sections:

- ❖ **What's New**

Obtain latest data for key economic and social indicators, browse news releases by DOS and Research and Statistics Units (RSUs) of other public sector agencies.

- ❖ **Find Data**

Choose from almost 50 topics to access the relevant statistics, press releases, infographics, charts, storyboards, videos and references.

- ❖ **Publications**

Browse DOS's publications, papers and articles by topics. All publications are available for free access.

- ❖ **Advance Release Calendar**

View dates of upcoming releases in the half-yearly ahead calendar.

The website also provides a convenient gateway to international statistical websites and resources:

- ❖ **IMF Dissemination Standards Bulletin Board**

View metadata and latest data about Singapore's key indicators in the real, fiscal, financial and external sectors, including dissemination practices and information about pre-release access of current indicators.

- ❖ **International Statistics**

Access international databases, websites of international bodies and national statistical offices.

- ❖ **International Classifications**

Access quick links to international economic and social classifications.

SingStat Express

Subscribe to the *SingStat Express* and receive email and SMS alerts (for local users) on the latest press releases, notices of publication, occasional and information papers and newsletters. Subscription details are available at <https://www.singstat.gov.sg/whats-new/sign-up-for-alerts>.

INFORMATION DISSEMINATION SERVICES

(cont'd)

SingStat Mobile App

The *SingStat Mobile App* provides users with on-the-go access to latest key Singapore official statistics and ASEAN statistics via their mobile devices. The app allows visualisation of data with over 200 charts of commonly used statistics from 28 data categories. Users can also opt to receive notifications on updates to their preferred indicators, organise data categories in the order of their preference, download tables or share charts via social media and perform computation for quick analyses. The app is available for downloading in iOS and Android devices. More information is available at <https://www.singstat.gov.sg/our-services-and-tools/singstat-mobile-app>.

SingStat Table Builder

The *SingStat Table Builder* contains data series from 60 public sector agencies providing a comprehensive statistical view of Singapore economic and socio-demographic characteristics. Users may create customised data tables, and export them in different file formats and download multiple tables at one go. APIs for commonly accessed tables are provided in JSON and CSV formats for ease of data retrieval. In addition, developer APIs are available for users to customise and use the parameters available to define queries. Explore data trends with this digital service at <https://www.singstat.gov.sg/tablebuilder>.

Really Simple Syndication

Really Simple Syndication (RSS) is an easy way to stay updated on the latest statistical news released by DOS. The SingStat RSS feed delivers statistical news highlights and hyperlinks to the source documents whenever the updates are posted. More information is available at <https://www.singstat.gov.sg/whats-new/really-simple-syndication-rss>.

E-survey

The *E-survey* enables business organisations to complete and submit their survey forms through the internet. Using secured encryption protocols, the E-survey ensures that the information transmitted through the net is secured and protected. The system features online helps and validation checks to assist respondents in completing their survey forms. With the E-survey, respondents do away with the tedious paper work and manual tasks of mailing or faxing their survey returns to DOS.

Statistical Enquiries and Feedback

If you have any statistical enquiries or feedback on our services, you are welcomed to:
