Data from this publication may be reproduced, applied or processed, provided Statistics South Africa (Stats SA) is acknowledged as the original source of the data; that it is specified that any application and/or analysis of the data is the result of the user's independent processing of the data; and that neither the basic data nor any reprocessed version or application thereof may be sold or offered for sale in any form whatsoever without the prior permission of Stats SA.

Information in *Statistics in Brief* is taken from Statistics South Africa (Stats SA) releases and reports. The last edition was published in 2000. In this edition most information has been updated to the end of April 2002.

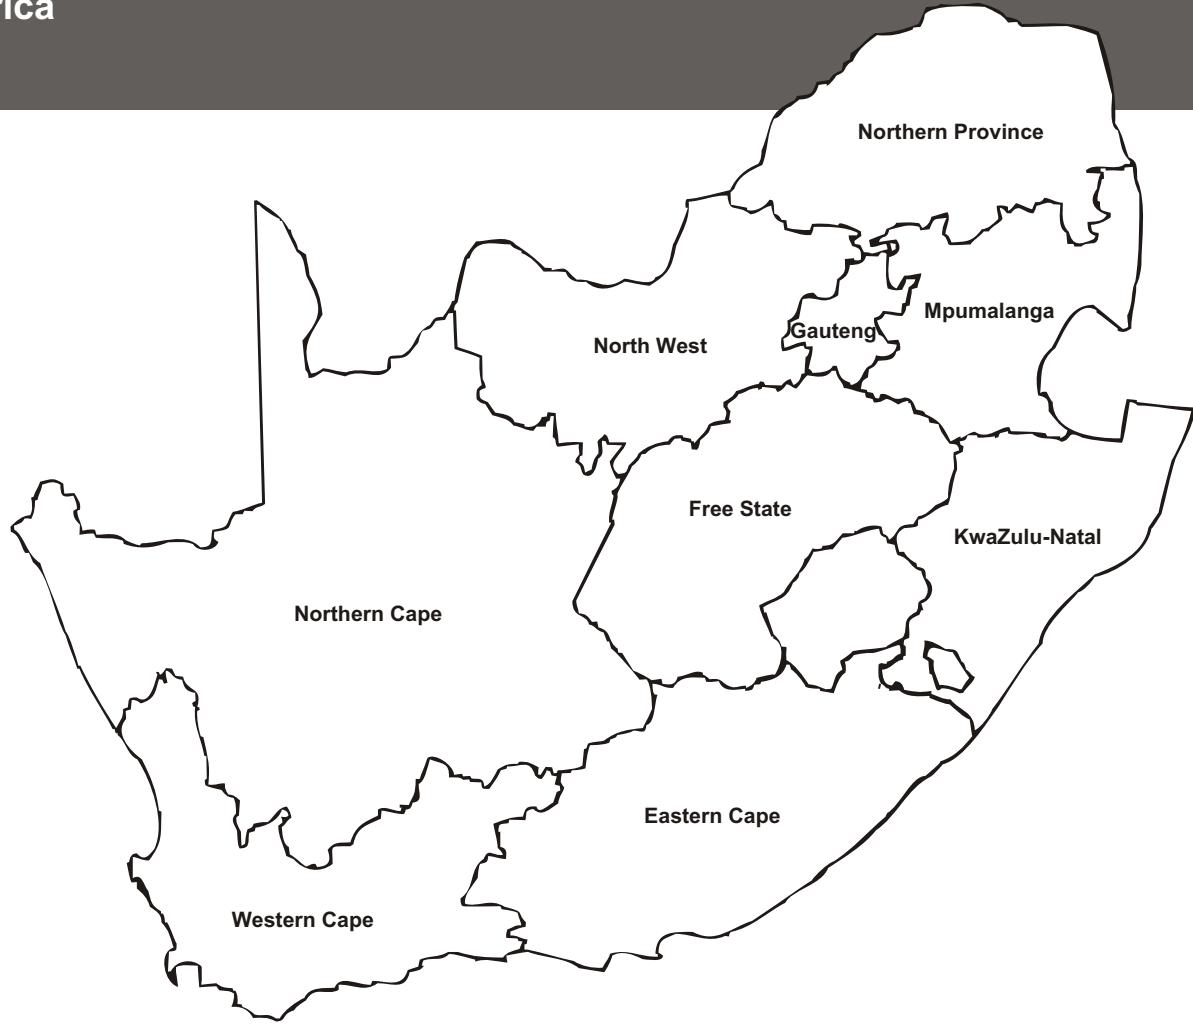

It should however be noted that data taken from census findings is from Census '96. Stats SA has published a range of publications based on that census, including *Census in Brief*. Data from the 2001 census will be available in 2003.

Note: Limpopo is the new name for the province previously known as Northern Province, and the capital city of Limpopo is now Polokwane (previously Pietersburg). At the time of compiling this edition of *Stats in Brief* the new names had not been promulgated, and the old names are therefore used.

Rounding-off

Figures are rounded off independently of one another; details, therefore, may not necessarily add to the totals shown.

South Africa

Geography and climate

Source: Stats SA, Census '96

The majority of people in South Africa are African (31,1 million). They constitute the vast majority of the population in seven of the nine provinces. In the Northern Cape and Western Cape, however, coloured people are in the majority. The largest percentage of the Indian population is in KwaZulu-Natal.

Demography

2.4 Urban and non-urban population by province, 1996 (percentages)

	Eastern Cape	Free State	Gauteng	KwaZulu- Natal	Mpuma- langa	Northern Cape	Northern Province	North West	Western Cape	South Africa
Urban population	36,6	68,6	97,0	43,1	39,1	70,1	11,0	34,9	88,9	53,7
Non-urban population	63,4	31,4	3,0	56,9	60,9	29,9	89,0	65,1	11,1	46,3
Total	100,0	100,0	100,0	100,0	100,0	100,0	100,0	100,0	100,0	100,0

Source: Stats SA, Census '96

Urban refers to all areas legally proclaimed as urban at the time of Census '96 (towns, cities and metropolitan areas).

Non-urban refers to all other areas (such as commercial farms, small settlements and rural villages). Informal settlements adjacent to the boundaries of a town, and densely populated homeland areas, are therefore included with non-urban.

Gauteng and Western Cape are highly urbanised provinces with the vast majority of people living in urban areas. Four provinces (Eastern Cape, KwaZulu-Natal, Mpumalanga and North West) are less urbanised, while Northern Province is predominantly rural with about one tenth of the population living in urban areas.

Demography

2.5 Gender ratios by province, 1996 (percentages)

	Eastern Cape	Free State	Gauteng	KwaZulu- Natal	Mpuma- langa	Northern Cape	Northern Province	North West	Western Cape	South Africa
Male	46,1	49,3	51,0	46,9	48,6	49,1	45,7	49,2	48,9	48,1
Female	53,9	50,7	49,0	53,1	51,4	50,9	54,3	50,8	51,1	51,9
Total	100,0	100,0	100,0	100,0	100,0	100,0	100,0	100,0	100,0	100,0

Source: Stats SA, Census '96

Gender ratio is the percentage distribution of males and females within a province.

Gauteng, the most urbanised province, has a male to female ratio of 51,0 : 49,0, which is the reverse of the national ratio of 48,1 : 51,9.

Demography

2.6 Distribution and growth rates of the population of South Africa by population group, 1996-2001 (percentages)

	Percentages ¹	Percentage growth per annum ²
	1996	1996-2001
African	76,7	2,4
Coloured	8,9	1,9
Indian	2,6	1,6
White	10,9	0,9
Unspecified/other	0,9	1,5
Total	100,0	2,2

Source: Stats SA, Census '96

¹ The general indication is that over the past two decades the proportion of Africans has slowly been increasing and that of whites has slowly been decreasing. The proportion of Indians and coloureds has remained largely constant. The proportions obtained from previous censuses are not reported here because of their lack of comprehensiveness.

² These average annual growth rates are based on information derived from a single census instead of two censuses. The estimates of fertility and mortality are derived from the 1996 census. The 1996 population figures have been projected to 2001 without taking into account additional deaths due to HIV/AIDS. The growth rates per annum have been computed from these two sets of figures. These growth rates are 'inferred' growth rates, and not actual growth rates. They are provisional and may change if the estimates of fertility and mortality are modified, or if non-zero estimates of international migration are used in the projection.

The African population group in South Africa is growing more rapidly than the other groups.

Demography

2.7 Mid-year population estimates (revised figures) without taking into account deaths due to HIV/AIDS, 1993-2001 (thousands)

1993	1994	1995	1996	1996*	1997	1998	1999	2000	2001

¹ Excluding unspecified.

Most provinces have one predominant first home language. For example, the vast majority of people in Eastern Cape speak isiXhosa (83,8%). But in Gauteng, there is no predominant first home language, which reflects its multi-culturalism.

Source: Stats SA, *Marriages and divorces 1998* (Report 03-07-01)

* Numbers exclude foreign and unspecified divorces.

Recorded marriages of all population groups are included in the totals. Certain types of marriages, for example, traditional and Muslim, were not officially recognised until recently, and were therefore not recorded. A breakdown of customary, traditional and other types of marriages will be available by the end of 2002.

In some instances separations are not reflected in the figures unless they are legalised.

Figures include all population groups.

Vital statistics

3.6 Registered live births by province, 2000 (thousands)

Eastern Cape	Free State	Gauteng	KwaZulu- Natal	Mpuma- langa	Northern Cape	Northern Province	North West	Western Cape	Foreign	South Africa
219	70	192	348	108	19	217	122	98	15	1 408

Source: Stats SA, *Recorded live births 1998-2000* (Release P0305)

The total number of birth registrations for any given year comprises both current registrations (for births registered in the year of birth) and late registrations (for births registered later than the year of birth). In South Africa many births are not registered in the year they occur; instead the pattern is to register some births only before school-going age. In recent years more births are being registered in the year in which they occur, but that process still needs to be improved.

Vital statistics

3.7 Recorded deaths and infant deaths, 1991-2000

	1991	1992	1993	1994	1995	1996	1997	1998	1999	2000

Source: Stats SA, *Tourism 2000* (Report 03-51-02)

The majority of foreign visitors coming into the country come on holiday.

Tourism and migration

4.5 Arrivals of foreign visitors by mode of travel, 2000 (percentages)

29

Source: Stats SA, *Tourism 2000* (Report 03-51-02)

Foreign visitors entering the country using road and rail transport do so through the South African borders with neighbouring countries – Lesotho, Namibia, Botswana, Zimbabwe, Mozambique and Swaziland.

Ports of entry for air travel are mainly through the international airports at Cape Town, Durban and Johannesburg. Ports of entry for sea travel are mainly Cape Town, Durban, East London and Port Elizabeth.

Tourism and migration

4.6 Declared immigrants by district of origin and emigrants by district of destination, 1997-2000 (numbers)

	Immigrants				Emigrants			
	1997	1998	1999	2000	1997	1998	1999	2000

Source: Stats SA, *Documented migration 1997-2000* (Report 03-51-03)

Emigration refers to South Africans settling permanently in another country. These migration figures are obtained from legal ports of entry into South Africa. They do not reflect undeclared migration.

The four most likely destinations for emigrants are Europe, North America, Australasia and Africa.

Totals include other and unspecified population groups.

According to the official definition of unemployment, the unemployed are those people within the economically active population who:

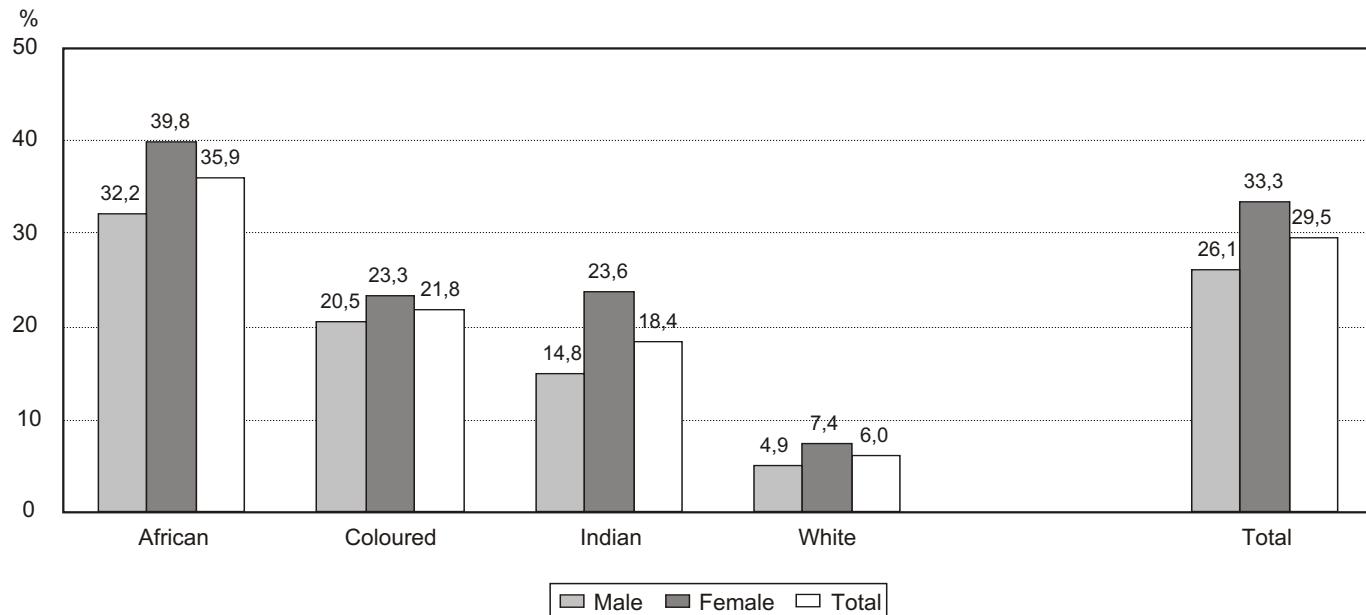

- (a) did not work during the seven days to the interview,
- (b) want to work and are available to start work within a week of the interview, and
- (c) have taken active steps to look for work or to start some form of self-employment in the four weeks prior to the interview.

Labour statistics

8.2 Unemployment rates by population group and gender (official definition), 2001

43

Source: Stats SA, *Labour force survey Sep 2001* (Release P0210)

Almost four in every ten economically active African women are unemployed, as against one in every twenty economically active white men.

Source: Stats SA, *Labour statistics survey of monthly earnings* (Release P0272)

* Excluding:

- Agriculture, hunting, forestry and fishing;
- Restaurants and other eating and drinking places, boarding houses, caravan parks and guest farms;
- Water and air transport;
- Financial institutions, excluding banks;
- Real estate and business services;
- Private educational services;
- Private medical, dental and other health services;
- Private welfare organisations;
- Religious organisations;
- Recreational and cultural services;
- Household services and domestic workers in households;
- Informal businesses.

Average monthly salaries and wages at constant 2000 prices measure change in average salaries and wages after the direct effects of inflation have been eliminated.

Average monthly salaries and wages at current prices are calculated by dividing the total gross salaries and wages (including performance and other bonuses and overtime payments and excluding severance, termination and redundancy payments) for the reference month by the number of employees as at the end of the reference month.

Prices

9.4 The consumer price index excluding interest rates on mortgage bonds (CPIX) and core index, 1997-2001 (base year 2000=100), for the metropolitan and other urban areas

	1997	1998	1999	2000	2001
CPIX ¹	81,1	86,8	92,8	100,0	106,6
Core index ²	80,7	86,4	92,9	100,0	106,9
Food price index ³	83,3	88,4	92,7	100,0	105,4

Sources: Stats SA, *Consumer price index* (Release P0141.1 & P0141.4)

¹ CPIX is the CPI which excludes interest rates on mortgage bonds.

² The core index is derived from the CPI by making certain exclusions. The exclusions, and the reasons for exclusions, are as follows:

- Fresh and frozen meat and fish: prices may be highly volatile, particularly during and following periods of drought.
- Fresh and frozen vegetables and fresh fruit and nuts: prices may be highly volatile from month to month due to their sensitivity to climatic conditions.
- Interest rates on mortgage bonds and overdrafts/personal loans: these are excluded due to their negative short-term effect on the CPI. A tightening in monetary policy to counter inflation pressures would cause interest rates to rise and be reflected in the interdict cost component of measured inflation. This, in turn, could provoke a further tightening of monetary policy, resulting in excessive movements in the inflation rate.
- Changes in VAT (Value Added Tax): VAT is predominantly determined by government (fiscal policy).
- Assessment rates: these taxes are predominantly determined by local government.

³ The food price index figures are only for metropolitan and other urban areas.

Prices

9.5 Relative price increases (based on the consumer price index), 1910-2000

	1910	1930	1950	1970	1980	1985	1990	1991	1992	1993	1994	1995	1996	1997	1998	1999	2000	2001

Source: Stats SA

The table indicates the average level of consumer prices in any specific year compared with a rand (100c) in different base years.

* For example, food and services that would have cost R1,00 in 1991, cost R1,84 in 1998, and food and services that would have cost R1,00 in 1993, cost R1,47 in 1998.

Prices

9.6 Percentage change in the production price index of imported and locally produced commodities (annual average), 1995-2001 (base year 2000=100)

59

	1995	1996	1997	1998	1999	2000	2001
Locally produced commodities	73,9	79,4	85,5	88,6	93,2	100,0	107,8
Imported commodities	71,2	75,0	78,7	81,1	87,4	100,0	110,0
All commodities	73,0	78,1	83,6	86,6	91,6	100,0	108,4

Source: Stats SA, *Production price index* (Release P0142.1)

Mining

10.1 Index of the physical volume of mining production, 1995-2001 (base year 1995=100)

	1995	1996	1997	1998	1999	2000	2001
Physical volume including gold							
Actual indices	100,0	98,3	100,4	99,3	97,3	96,3	94,8
Physical volume excluding gold							
Actual indices	100,0	100,7	104,7	107,0	105,6	106,6	108,2

Source: Stats SA, *Mining: Production and sales* (Release P2041)

The physical volume of mining production (including gold) shows a fluctuating, but generally downward trend.

10.2 Total volume of mineral sales, 1995-2001 (R millions)

	1995	1996	1997	1998	1999	2000	2001
Mineral sales including gold							
Actual values	55 010	63 105	66 314	71 392	76 431	98 338	113 793
Mineral sales excluding gold

* The figures for 2001 are for wholesale energy delivered by Eskom.

The figures on consumption by province exclude the energy used by Eskom for its own consumption as from 2001, while the figures on the graph in 12.2 include Eskom's own consumption as from 2001. Hence the difference in the data for the 2001 year in table 12.2 and in figure 12.3.

Human development index

9.1 The human development index (HDI) of South Africa by province for 1981991 and 1996

95

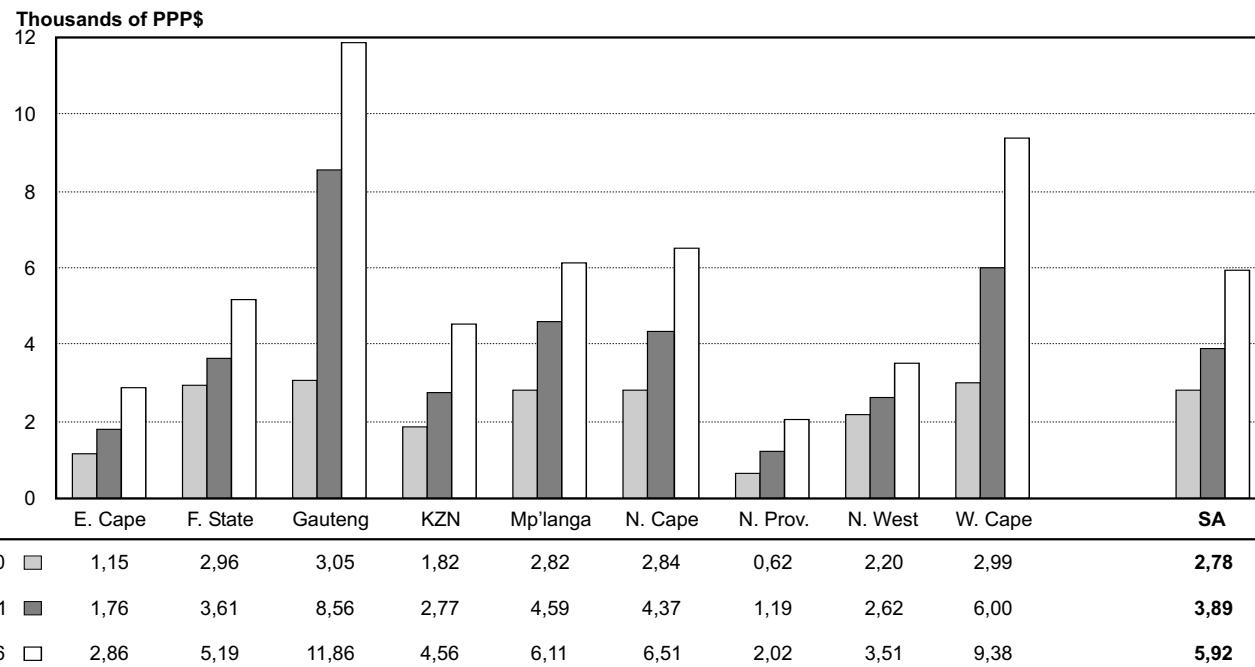

Source: Stats SA, *Human development index (Release P0015)*

The human development index (HDI) is a composite index of achievements in basic human capabilities in three fundamental dimensions – a long and healthy life, knowledge and a decent standard of living. The variables used to determine HDI may vary depending on the aspect to be measured. In this publication the three variables chosen to represent the fundamental dimensions are: life expectancy, educational attainment and income. It should be mentioned that these variables are the ones commonly chosen to determine the basic HDI.

Human development index

19.2 Real GDP per capita (PPP\$) by province for 1980, 1991 and 1996

Source: Stats SA, *Human development index (Release P0015)*

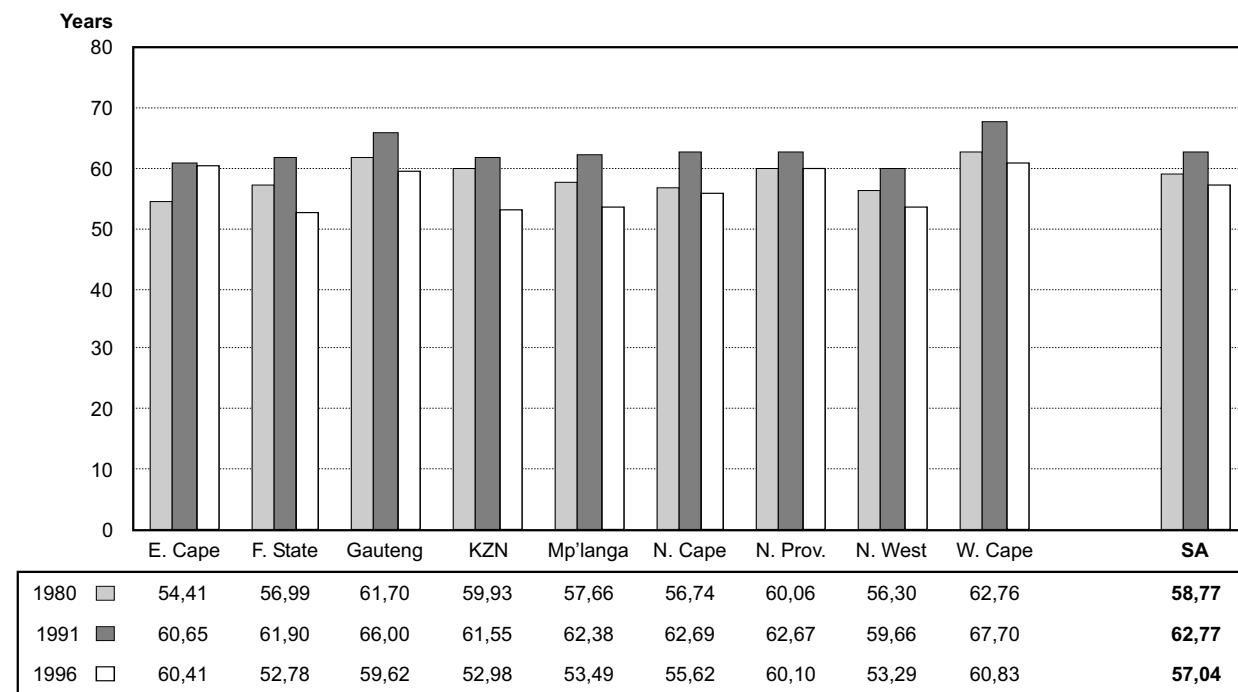

GDP per capita is a measure of the standard of living.

Purchasing power parity (PPP\$) measures the number of units of a country's currency required to buy the same amount of goods and services (in the domestic market) that one dollar would buy in the United States of America. PPP \$1 has the same purchasing power in the domestic economy as \$1 has in the United States.

Human development index

19.3 Life expectancy at birth by province for 1980, 1991 and 1996 (years)

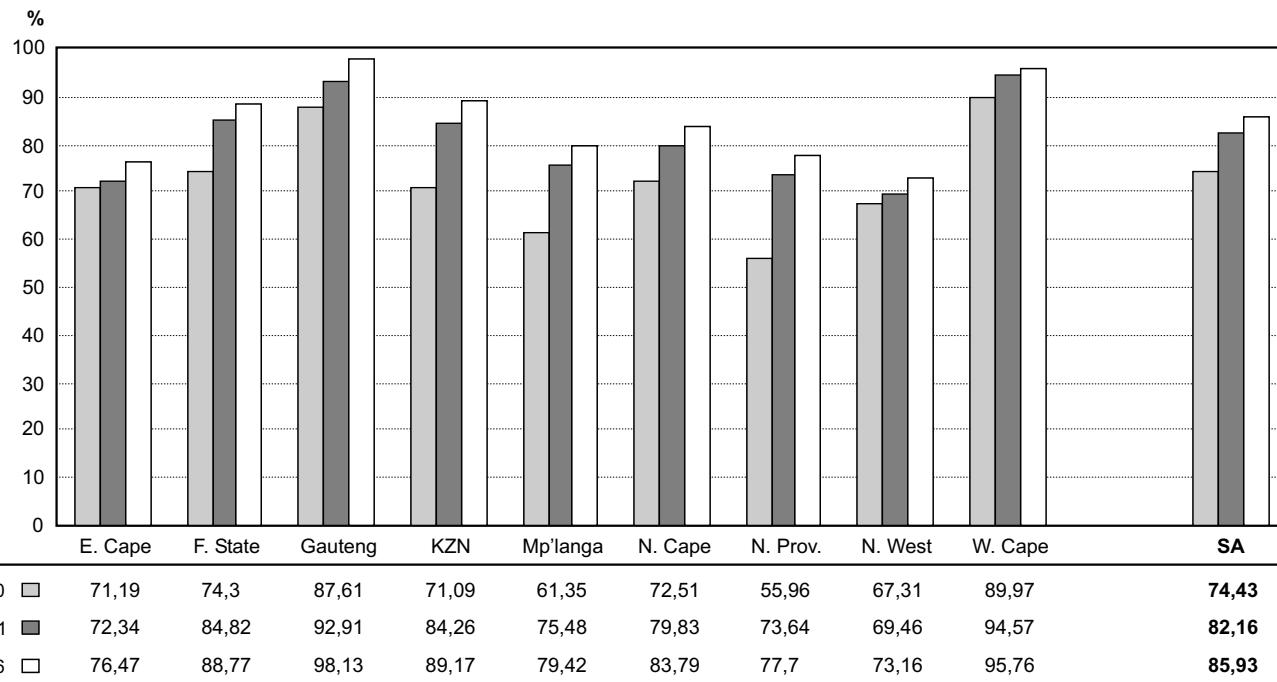

97
