## INTRODUCTION

This is the thirtieth Abstract of Statistics to be published. The object of the Abstract is to provide a selection of statistics, in one compact volume, on topics of interest. Most of the information in this Annual Abstract is published separately, by a number of official departments and other authoritative sources and is already in the public domain. Current data for many of the tables appearing in this Abstract are contained in other Reports published by the Statistics Office, such as the Tourist Survey, Hotel Occupancy Survey and Employment Survey. A number of population statistics have been taken from the Census 2001, also published by the Statistics Office.

### Definitions and explanatory notes

The tables contain notes and definitions that are important to the proper interpretation and use of the statistics. Sources of information can be found on every page.

*Notes: (i) Refers to actual continuous maximum rating of the generators.*

*(ii) The difference between "Generation" and "Billing" is attributed to electricity consumed by the power stations, distribution transformers and cables and public lighting.*

*(iii) MW - Megawatts, KWH - Kilowatt Hours, M - Millions*

*(iv) The capacity figures in respect of the years 1995 to 2001 have been revised.*
