## INTRODUCTION

The object of the Abstract is to provide a selection of statistics, in one compact volume, on topics of interest. Most of the information in this Annual Abstract is published separately, by a number of official departments and other authoritative sources and is already in the public domain. Current data for many of the tables appearing in this Abstract are contained in other Reports published by the Statistics Office, such as the Tourist Survey, Hotel Occupancy Survey and Employment Survey. A number of population statistics have been taken from the Census 2001, also published by the Statistics Office.

### Definitions and explanatory notes

The tables contain notes and definitions that are important to the proper interpretation and use of the statistics. The source of information is shown in relation to each table included in the Abstract.

**Notes:**

(i) As in the UK and as from October 1998, the Employment Survey makes reference to the number of employee jobs in the labour market, formerly known as the number of persons in employment. Thus a person holding both a full-time and a part-time job would be included in the count for each category.

(ii) This nationality split presents problems of accuracy. Some employers classify all their British employees, including Gibraltarians, under the UK British category and since no personal details are provided it is not possible to differentiate between the two categories. This would result in an understatement of the Gibraltarians in employment.

(iii) Employee jobs in the Public Sector include non-civil servant posts in Government Departments and direct employment by Government authorities, agencies and wholly-owned companies.

(iv) Occupations are classified according to the "UK Standard Occupational Classification 2000".
