Zambia: With Its Neighbours

Introduction

Zambia is a landlocked Sub-Saharan country sharing boundaries with Malawi, Mozambique, Zimbabwe, Botswana, Namibia, Angola, Democratic Republic of the Congo and Tanzania. It has a total surface area of about 752,614 square km, thus ranking among the smaller countries in South Central Africa. It lies between 8° and 18° south latitudes and longitudes 22° and 34° east.

Administration

Zambia gained independence from Britain on 24th October 1964. It has experienced three major phases of governance, the multiparty system from 1964 to 1972, one party system from 1972 to 1991 and multiparty system again since 1991.

Administratively, the country is divided into nine provinces, namely Central, Copperbelt, Eastern, Luapula, Lusaka, Northern, North-Western, Southern and Western provinces. These provinces are further subdivided into a total of seventy-two (72) districts. Lusaka is the capital city of Zambia and seat of government. The government comprises Central and Local government.

Natural resources

Zambia is situated on the great plateau of Central Africa. Its vegetation is mainly made up of savannah woodlands and grassland. It has a tropical climate with three distinct seasons, the cool and dry season, the hot and dry season and the hot and wet season.

The country has abundant natural resources. It has five main rivers, namely Zambezi, Kafue, Luangwa, Luapula, and Chambeshi rivers. In addition to these rivers, the country also has major lakes such as Tanganyika, Mweru, Mweru Wa Ntipa, Bangweulu and the man-made lakes Kariba and Itzhi Tezhi. Other interesting features include the Victoria Falls, one of the Seven Wonders of the World.

Zambia has some of nature's best wildlife and game reserves affording the country with abundant tourism potential for earning foreign exchange. The magnificent Luangwa and Kafue National Parks have one of the most prolific animal populations in Africa. It is also endowed with various minerals and precious stones such as copper, emeralds, zinc, lead and cobalt.
